

PORTFOLIO CONSTRUCTION & ASSET ALLOCATION

FOURTH QUARTER 2022

This presentation is confidential. It is intended only for the person to whom it has been directly provided and under no circumstances may a copy be shown, copied, transmitted or otherwise be given to any person other than the authorized recipient without Johnson Investment Counsel's prior consent.

OUR PHILOSOPHY

OUR INVESTMENT MANAGEMENT RESPONSIBILITY

- » Be prudent stewards of our clients' capital
- » Preserve and build wealth over time
- » Maximize total returns at an acceptable level of risk
- » Never risk everything on any one market forecast

1. We focus on long-term performance
2. We will not outperform every year
3. The key to #1 is being prepared for #2

THE STOCK MARKET IS RELIABLY POSITIVE OVER THE LONG-TERM

- » Market returns vary widely in the short-term but become more predictable over long periods.
- » Maintaining a long-term focus reduces the risk of negative returns. There has never been a negative 30-year period for the S&P 500.

Distribution of Stock Market Returns Since 1950

SOURCE: BLOOMBERG, DATA AS OF 12/31/2021

TO PARTICIPATE IN LONG-TERM RETURNS, INVESTORS MUST SUCCESSFULLY NAVIGATE MARKET DRAWDOWNS

- » Despite an average positive return of 11.4% per year, the average intra-year decline of the S&P 500 is 14%.
- » On average, a 10% or greater decline in the S&P 500 occurs every 19 months.

Stock Market Performance vs. Intra-Year Declines

SOURCE: BLOOMBERG, DATA AS OF 12/31/2020

MARKET TIMING IS NOT A RELIABLE RISK MITIGATION TOOL

- » Attempting to time the market is difficult and dangerous.
- » Successfully timing the market requires both a well-timed exit and a well-timed re-entry.
- » Missing out on the late stages of a bull market can be more costly than participating in a bear market.

Median Return Leading Up To and Following Equity Market Peaks

SOURCE: BLOOMBERG, DATA AS OF 12/31/2021

NOTE: CHART IS BASED ON RETURN DATA FROM 9 BEAR MARKETS FROM 1950-2022. A BEAR MARKET IS DEFINED AS A DECLINE OF 20% OR MORE IN THE S&P 500 BENCHMARK PRICE.

THE BEST PATH TO RELIABLE DOWNSIDE PROTECTION IS THROUGH OWNING HIGH QUALITY SECURITIES

- A better approach to managing risk in portfolios is owning high-quality securities throughout the cycle.
- The timing of market declines is unpredictable, but the relative performance of the best securities in a downturn is consistent.

SOURCE: ZEPHYR DATA AS OF 12/31/2022

NOTE: JOHNSON 60/40 PORTFOLIO MADE UP OF JEQIX AND JIBFX, MARKET INDEX MADE UP OF S&P 500 AND BLOOMBERG US AGGREGATE; INFORMATION ABOUT INDICES IS PROVIDED TO ALLOW FOR COMPARISON OF THE PERFORMANCE OF JOHNSON PORTFOLIO TO THAT OF THE MARKET INDEX MADE UP OF S&P500 AND BLOOMBERG US AGGREGATE. THERE IS NO REPRESENTATION THAT SUCH INDICES ARE AN APPROPRIATE BENCHMARK FOR SUCH COMPARISON. YOU CANNOT INVEST DIRECTLY IN AN INDEX, WHICH ALSO DOES NOT TAKE INTO ACCOUNT TRADING COMMISSIONS AND COSTS. THE VOLATILITY OF INDICES MAY BE MATERIALLY DIFFERENT FROM THE PERFORMANCE OF THE JOHNSON PORTFOLIO. IN ADDITION, JOHNSON'S RECOMMENDATIONS MAY DIFFER SIGNIFICANTLY FROM THE SECURITIES THAT COMPRISE THE INDICES.

QUALITY SECURITIES ALLOW FOR A GROWTH-ORIENTED ASSET ALLOCATION

- » Asset allocation is a key driver of long-term investor success.
- » By reducing risk through the ownership of high-quality securities, investors can maintain a higher allocation to the stock market over time.

	Return	Standard Deviation	Sharpe Ratio	Max Drawdown
Johnson 60/40 Portfolio (Net)	7.30%	9.16%	0.67	-26.38%
Johnson 63/37 Portfolio (Net)	7.46%	9.55%	0.66	-27.78%
Market Index 60/40 Portfolio	6.87%	9.71%	0.59	-32.54%

SOURCE: ZEPHYR DATA AS OF 12/31/2022

NOTE: JOHNSON PORTFOLIOS MADE UP OF JEQIX AND JIBFX, MARKET INDEX PORTFOLIO MADE UP OF S&P500 AND BLOOMBERG US AGGREGATE INDEX; RETURN SEQUENCE FROM 1/1/2006 (JEQIX INCEPTION) TO 6/30/2021; INFORMATION ABOUT INDICES IS PROVIDED TO ALLOW FOR COMPARISON OF THE PERFORMANCE OF JOHNSON PORTFOLIO TO THAT OF THE MARKET INDEX MADE UP OF S&P500 AND BLOOMBERG US AGGREGATE. THERE IS NO REPRESENTATION THAT SUCH INDICES ARE AN APPROPRIATE BENCHMARK FOR SUCH COMPARISON. YOU CANNOT INVEST DIRECTLY IN AN INDEX, WHICH ALSO DOES NOT TAKE INTO ACCOUNT TRADING COMMISSIONS AND COSTS. THE VOLATILITY OF INDICES MAY BE MATERIALLY DIFFERENT FROM THE PERFORMANCE OF THE JOHNSON PORTFOLIO. IN ADDITION, JOHNSON'S RECOMMENDATIONS MAY DIFFER SIGNIFICANTLY FROM THE SECURITIES THAT COMPRISE THE INDICES.

RECESSIONARY MARKET DECLINES WARRANT ADDITIONAL RISK CONTROL

- » In most environments, quality securities give sufficient protection to weather difficult markets.
- » Not all volatility is the same; recessions lead to bear markets.
- » Recessionary periods have historically been much more detrimental to portfolios and warrant adjustments at the asset allocation level.

Historically, recessionary drawdowns have been much more severe than non-recessionary market pullbacks.

Average Time to Recover (Months) Max Recover Time (Months)

At the same time, the market has typically recovered more quickly coming out of non-recessionary pullbacks.

RECESSIONS ARE UNPREDICTABLE, BUT THERE ARE NORMALLY WARNING SIGNS

- » We monitor economic data to determine when recessions are more likely; our proprietary multifactor model has been a strong indicator of recession risk.
- » When market volatility increases in tandem with recession risk, we are likely to move more conservative in asset allocation.

OUR PORTFOLIO CONSTRUCTION PROCESS

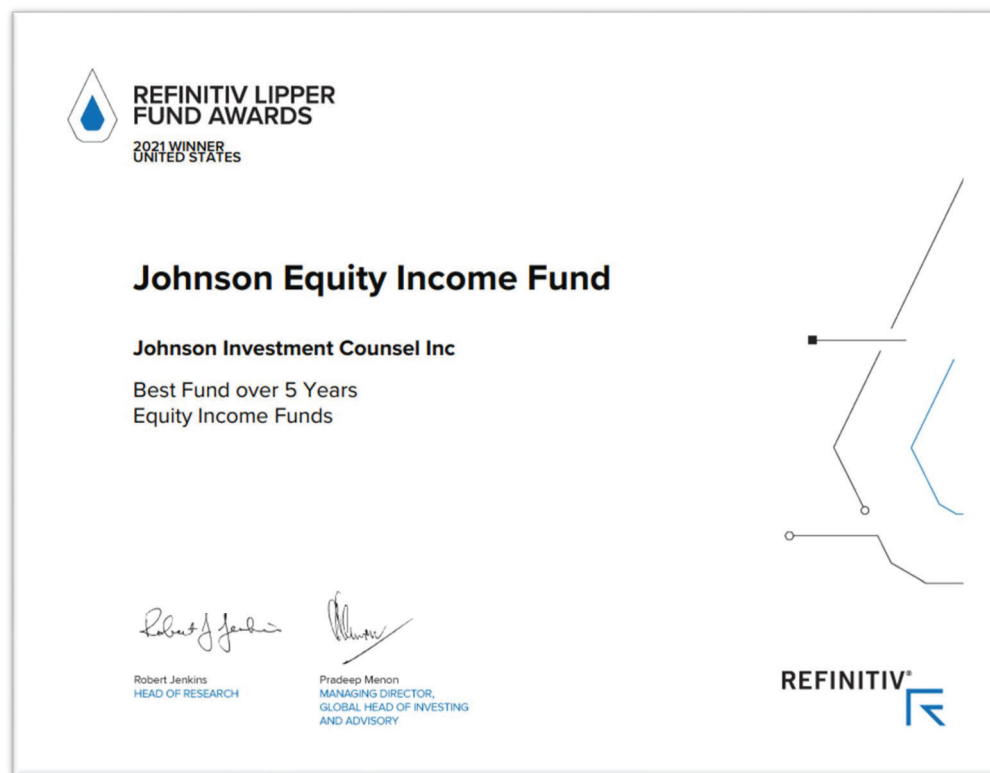

- » Before any investment is made, it moves through a multi-step process guided by our investment discipline.
- » Our team-based approach enables our Portfolio Managers to tailor our institutional investment research to accomplish your personalized goals.

JOHNSON ASSET MANAGEMENT AWARD WINNING FUNDS

- » Johnson has had multiple funds win Lipper awards for strong performance in their respective peer groups.
- The Johnson Equity Income Fund is a 2021 winner of the Refinitiv Lipper Fund Award for “Best Fund over 5 Years” for Equity Income Funds.
- The Johnson Institutional Intermediate Bond Fund is a 2021 winner of the Refinitiv Lipper Fund Award for “Best fund over 3 years” AND “Best fund over 5 years” for Institutional Mutual Funds.

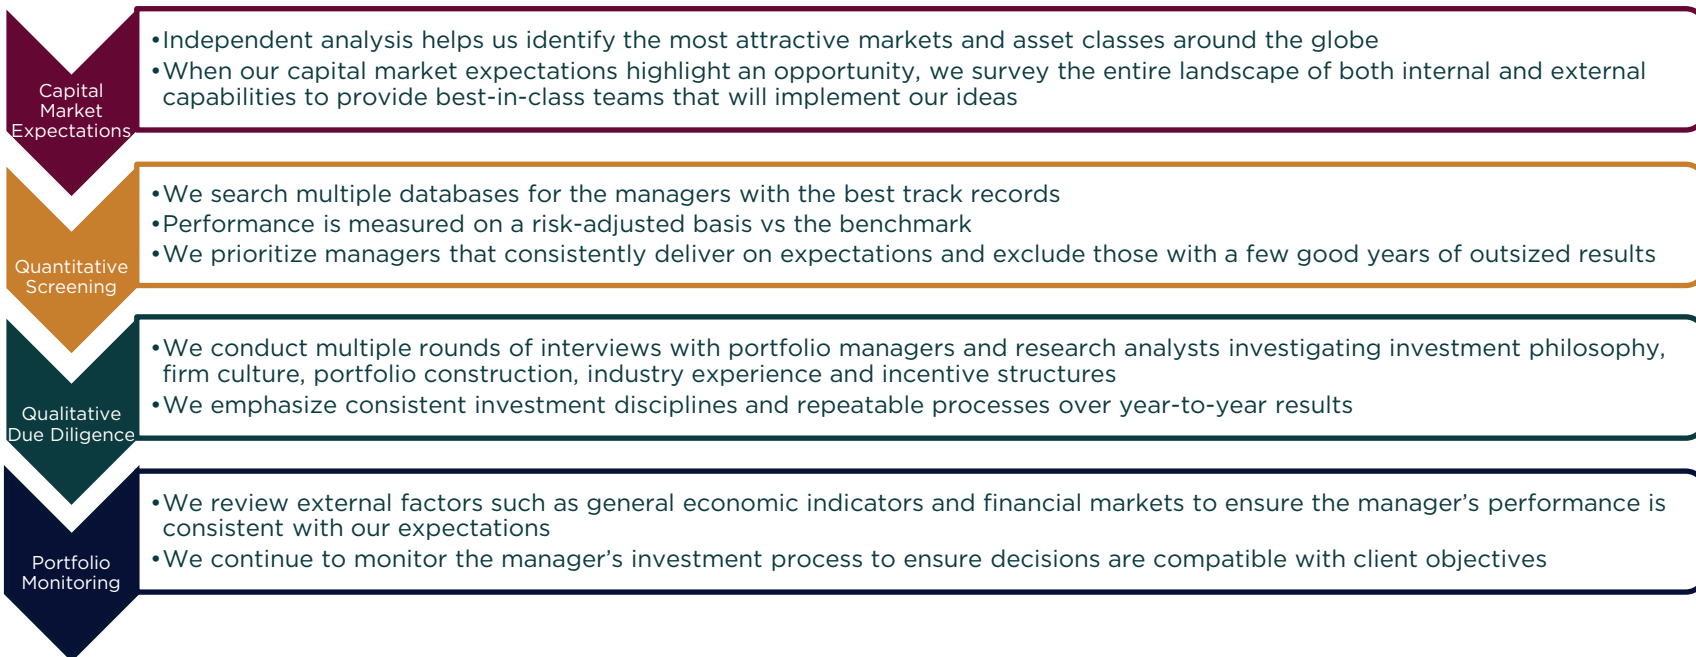

These honors are given to individual mutual funds that have outperformed peers based on risk-adjusted, consistent returns over three-, five-, and ten-years relative to their peers. Refinitiv Lipper designates award-winning funds in most individual classifications for the three-, five-, and ten-year periods.

NOTE: THE REFINITIV LIPPER FUND AWARDS, GRANTED ANNUALLY, HIGHLIGHT FUNDS AND FUND COMPANIES THAT HAVE EXCELLED IN DELIVERING CONSISTENTLY STRONG RISK-ADJUSTED PERFORMANCE RELATIVE TO THEIR PEERS. THE REFINITIV LIPPER FUND AWARDS ARE BASED ON THE LIPPER LEADER FOR CONSISTENT RETURN RATING, WHICH IS A RISK-ADJUSTED PERFORMANCE MEASURE CALCULATED OVER 36, 60 AND 120 MONTHS. THE FUND WITH THE HIGHEST LIPPER LEADER FOR CONSISTENT RETURN (EFFECTIVE RETURN) VALUE IN EACH ELIGIBLE CLASSIFICATION WINS THE REFINITIV LIPPER FUND AWARD. FOR MORE INFORMATION, SEE LIPPERFUNDWARDS.COM. ALTHOUGH REFINITIV LIPPER MAKES REASONABLE EFFORTS TO ENSURE THE ACCURACY AND RELIABILITY OF THE DATA CONTAINED HEREIN, THE ACCURACY IS NOT GUARANTEED BY REFINITIV LIPPER. THE AWARD MAY NOT BE REPRESENTATIVE OF EVERY CLIENT'S EXPERIENCE. THE AWARD IS NOT INDICATIVE OF FUTURE PERFORMANCE AND THERE IS NO GUARANTEE OF FUTURE INVESTMENT SUCCESS.

THOROUGH OUTSIDE MANAGER DUE DILIGENCE

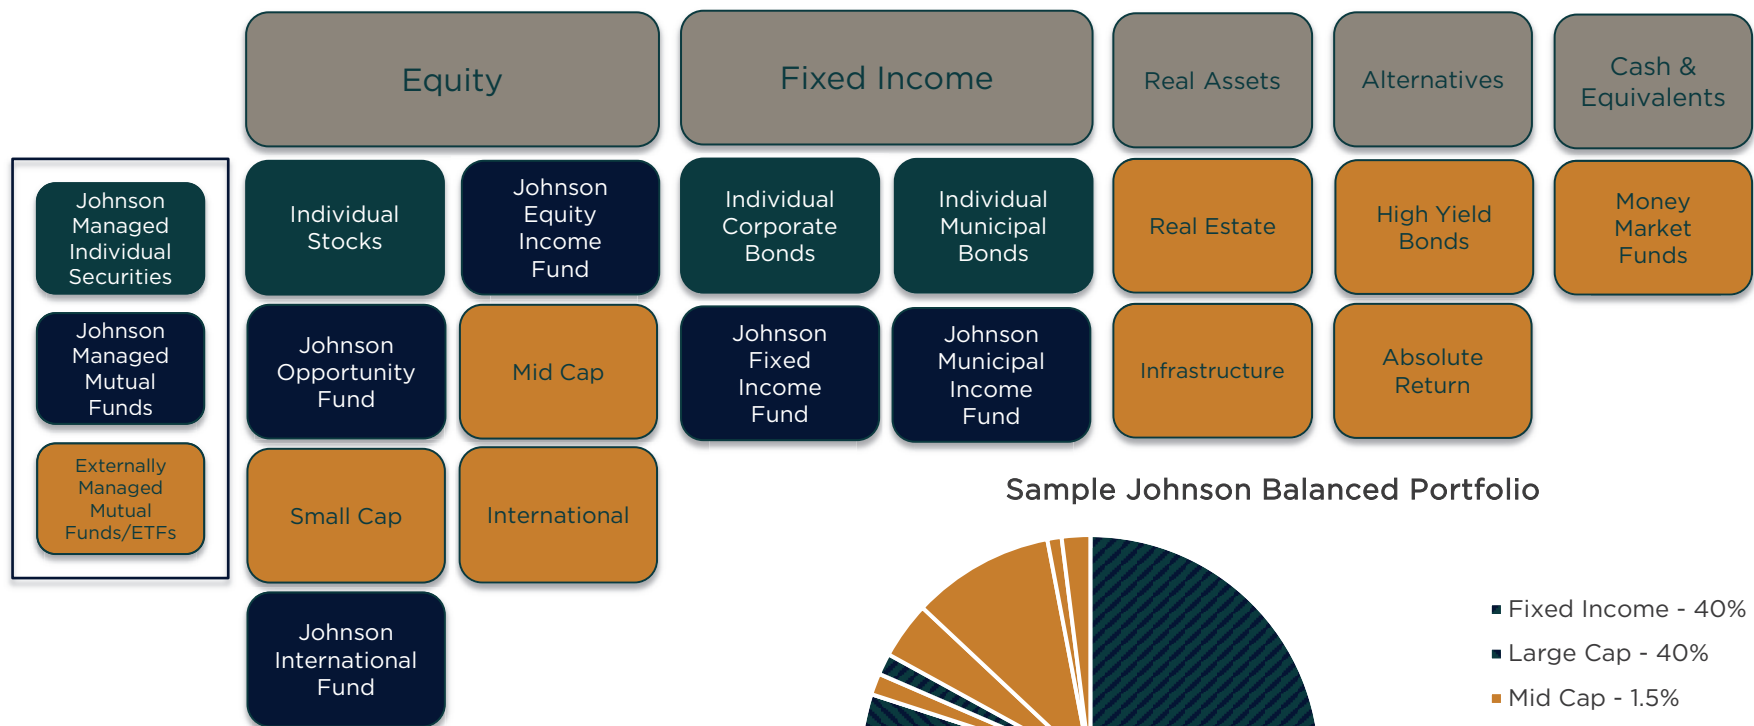

- » We are committed to providing best-in-class investment solutions to our clients, whether internally or externally managed.
- » We apply the same quality-oriented investment discipline to our evaluation of external partners.
- » Our portfolio strategy team follows an analytical screening process which identifies the world's best investment managers through a mixture of quantitative screening and qualitative analysis.
- » We maintain total independence throughout due diligence and monitoring process.

Our scale enables us to provide favorable terms for our clients when making fund selection decisions

SAMPLE PORTFOLIO: IN-HOUSE VS. EXTERNALLY MANAGED

- » We leverage a combination of our in-house asset management expertise as well as best in class external managers, leveraging our firm scale for cost savings and portfolio efficiency.
- » Our internal capabilities ensure a single fee layer for the majority of the portfolio.

Sample Johnson Balanced Portfolio

Across Large Cap, Fixed Income and Mid Cap, over 80% of the sample portfolio is managed by our in-house investment management teams

MARKET OUTLOOK

JANUARY 2023

MARKET AND ECONOMIC OVERVIEW

- » Investors will look back on 2022 as a historic year in the markets. In fact, 2022 marked the worst year in recorded history for the U.S. bond market and the 7th worst year for the U.S. stock market. While Q4 saw both stocks and bonds rally, the S&P 500 ended 2022 down -18.11% and the Bloomberg US Aggregate index finished down an astonishing -13.01%. As a result, 2022 was the worst year since 2008 for the “60/40 portfolio”.
- » The primary driver of markets throughout 2022 was the extraordinary pace at which the Federal Reserve embarked upon hiking interest rates. Entering the year, economists estimated the Fed might hike anywhere from one to five 25 bps increments, however the Fed Funds rate ended 2022 at 4.25%, equivalent to seventeen 25 Bps hikes during the year. The Fed was forced to take such dramatic action by continuing elevated and persistent inflation levels. Headline CPI peaked at 9% year-over-year in June, while Core CPI reached 6.7% in September, their highest levels in decades. Both measures did begin to cool in Q4 with Headline falling to 6.5% and Core to 5.7% by the end of the year. While there are signs inflation is falling, overall levels remain much higher than the Fed’s 2.0% target and will take time to move toward that level. The tenor of the discussion around inflation has turned from how aggressively the Fed will continue, to when the Fed might pause or stop raising interest rates, as the market now expects a lower terminal rate than the Fed itself forecasts.
- » As the effects of policy tightening settle in, leading economic indicators are flashing warning signs. The housing market has slowed to levels not seen since the 2008 financial crisis, and the Conference Board LEI measure fell -4.5% in November. While leading economic activity measures are slowing dramatically, the labor market remains relatively stable. Job openings have come down and employment numbers are slowing, however the Fed continues to look at labor tightness as a sign that the economy can handle an ongoing restrictive policy stance. That said, the lagged effects of monetary tightening continue to work their way through the economy, and we are watching closely for signs of further slowdown.
- » Rising interest rates had cascading effects across financial markets in 2022. The stock market had a roller coaster year, primarily driven by the contraction in price multiples. Higher valuation growth stocks were hit hard, with many of the pandemic era darling stocks down well over 50% from their highs. The Energy sector was the loan standout, returning over 60% with higher oil prices and energy scarcity in 2022. While equity market performance was driven by multiple contraction, high nominal growth was a tailwind for corporate earnings, which were positive for the year. We are monitoring fundamental economic activity and individual company guidance closely, as 2023 earnings estimates are being revised lower.
- » The dramatic increase in interest rates, both in level and rate of change, ravaged Fixed Income markets in 2022. Starting from historically low yield levels, bonds had very little income generation to shield portfolios from the negative price returns that result from higher rates. There was no place to hide as U.S. treasuries, investment grade corporates, and high yield all saw double digit negative returns. That said, the outlook for Fixed Income returns has improved dramatically as higher rates are beneficial to long-term investors. Because income is the primary driver of returns in a bond portfolio, the self-healing nature of bonds grows with portfolio yields, setting fixed income markets up to see stronger returns going forward. Additionally, Johnson’s quality-focused credit selection process remains important in navigating markets with significant uncertainty around the economy and markets ahead.
- » 2022 was undoubtedly a challenging year for investment portfolios, as asset allocation did not provide the benefit that we have come to expect over the history of markets. It is in times like these that we lean on the principles of our quality-oriented investment discipline to provide clients with peace of mind. 2022 was a reminder that quality security selection can provide relative downside protection in even the most difficult markets. As we continue to monitor markets and economic activity, we remain committed to that discipline across asset classes.

MARKET CONCENTRATION STILL A CONCERN DESPITE TOUGH 2022

Historical Weight of Top 5 in S&P 500

When interest rates were at lows, market participants were willing to pay record valuations for companies with the above-average growth prospects. Higher interest rates impacted these names the most as investors were forced to reconcile their high expectations with increasing long-term funding costs.

S&P 500 Top 5 Constituents (As of 12/31/2021)

	S&P 500	Apple	Microsoft	Alphabet	Amazon	Tesla
Weight (%)		6.9	6.3	4.2	3.6	2.1

STRATEGIC ASSET ALLOCATION MARKET BAROMETER

Note: We cannot promise future results. Our opinions reflect our best judgement at the time this presentation was created, and we disclaim any obligation to update or alter forward looking statements as a result of new information, future events or otherwise.

EXECUTIVE SUMMARY: NEAR-TERM UNCERTAINTY, BRIGHTEST LONG-TERM OUTLOOK IN YEARS

- » Inflation and the Fed's response to it were the key drivers of 2022 returns across asset classes .
- » There are signs inflation is moderating. Unfortunately, there are also signs the economy is slowing.
- » Slowing economic activity could make it hard for companies to meet current earnings estimates. Earnings disappointments can lead to market volatility.
- » As is often the case, the market is pricing in some level of disappointment in advance of actual earnings revisions. Similarly, markets tend to recover before the economy and normally provide outside returns early in recoveries.
- » Valuations for stocks and bonds are more compelling than they have been in years. Lower earnings multiples and higher interest rates are very positive for the long-term outlook.
- » As always, risk management is critical to long-term success. While caution is prudent to protect near-term spending needs, investors with long-term time horizons would do well to view short-term volatility opportunistically.

STRATEGIC ASSET ALLOCATION SCALE

ASSET CLASS	Conservative Higher Returns for Bond Risk		Moderate-Conservative		Moderate Higher Returns for 60/40 Balanced Risk		Moderate- Aggressive		Aggressive Stock Returns at Lower Risk
