Part I **Financial Information**
Item 1 **Financial Statements**

OM GROUP, INC.
Notes to Condensed Consolidated Financial Statements (Unaudited)
September 30, 2001
(Thousands of dollars, except per share amounts)

Note A **Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair financial presentation have been included. Past operating results are not necessarily indicative of the results which may occur in future periods. For further information refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2000.

Statements of Financial Accounting Standards (SFAS) No. 141 "Business Combinations" and No. 142 "Goodwill and Other Intangible Assets" were approved by the Financial Accounting Standards Board effective June 30, 2001. SFAS No. 141 eliminates the pooling-of-interests method for business combinations and requires use of the purchase method. SFAS No. 142 changes the accounting for goodwill from an amortization approach to a non-amortization (impairment) approach. The Statement requires amortization of goodwill recorded in connection with previous business combinations to cease upon adoption of the Statement by calendar year companies on January 1, 2002. The Company is currently studying the impact of the Statements on its financial position, results of operations and cash flows.

Note B **Acquisition and Pro Forma Earnings Per Share**

On August 10, 2001, the Company acquired dmc² Degussa Metals Catalysts Cerdec (dmc²) for a purchase price of approximately \$1.118 billion, including cash acquired and related financing and transaction costs. dmc², which had fiscal 2000 sales of \$5.984 billion, is a worldwide provider of metal-based functional materials for a wide variety of end markets. The acquisition of dmc² will be financed through a combination of debt and equity and the sale of certain assets. On September 7, 2001 the Company completed the disposition of the electronic materials, performance pigments, glass systems and Cerdec ceramics divisions of dmc² to Ferro Corporation for a cash purchase price of \$525.5 million, including interest.

The acquired assets and liabilities of dmc² are recorded at estimated fair values, as determined by the Company's management, based on information currently available including its responsibility for any environmental or legal matters at the date of acquisition. Accordingly, the allocation of the purchase price to the acquired assets and liabilities of dmc² may be revised at a later date as fair value determinations are finalized. The acquired business comprises the Company's two new business segments; precious metal chemistry and metal management.

Pro forma net sales, net income and net income per share, for the nine months ended September 30, 2001 and 2000, as if the acquisition had occurred as of January 1, 2001 and 2000, respectively, would have been as follows:

	Nine Months Ended	
	September 30, 2001	September 30, 2000
Net sales	\$4,605,700	\$4,525,800
Net income	\$81,800	\$72,600
Net income per common share	\$2.97	\$2.66
Net income per common share – assuming dilution	\$2.93	\$2.62

The unaudited pro forma results include preliminary estimates and assumptions which the Company's management believes are reasonable. However, the pro forma results are not necessarily indicative of the results which would have occurred if the acquisition had occurred on the dates indicated, or which may result in the future.

The aforementioned pro forma information reflects the following assumptions: amortization of financing costs over 6 years; adjustment of depreciation expense over 10 years; interest cost on the incremental funds borrowed; and the issuance of equity securities.

Note C Financial Instruments

Effective January 1, 2001, the Company adopted SFAS No. 133, "Accounting for Derivatives and Hedging Activities", as amended. SFAS No. 133 requires that derivatives be recognized in the balance sheet and measured at fair value. The Company's derivatives consist of interest rate swaps and commodity and foreign currency forward contracts.

Note D Inventories

Inventories consist of the following:

	September 30,	December 31,
	2001	2000
Raw materials and supplies	\$260,639	\$168,750
Finished goods	396,711	156,159
	657,350	324,909
LIFO reserve	89,142	68,940
Total inventories	<u>\$746,492</u>	<u>\$393,849</u>

Note E Contingent Matters

The Company is a party to various legal proceedings incidental to its business and is subject to a variety of environmental and pollution control laws and regulations in the jurisdictions in which it operates. As is the case with other companies in similar industries, the Company faces exposure from actual or potential claims and legal proceedings involving environmental matters. Although it is very difficult to quantify the potential impact of compliance with or liability under environmental protection laws, management believes that the ultimate aggregate cost to the Company of environmental remediation, as well as other legal proceedings arising out of operations in the normal course of business, will not result in a material adverse effect upon its financial condition or results of operations.

Note F Computation of Earnings per Share

The following table sets forth the computation of net income per common share and net income per common share - assuming dilution (shares in thousands):

	Three Months Ended		Nine Months Ended

Item 2 Results of Operations and Financial Condition

Three Months Ended September 30, 2001 Compared to Three Months Ended September 30, 2000

Net sales for the three months ended September 30, 2001 were \$833.3 million, an increase of 257% compared to the same period for 2000. The increase was primarily the result of the acquisition of dmc², partially offset by a decline in the Company's base metal chemistry

segment due to weak global economic conditions and lower metal prices.

Gross profit increased to \$97.4 million for the three month period ended September 30, 2001, a 71.3% increase over the same period in 2000. The increase in gross profit was due to the acquisition of dmc². Cost of products sold increased to 88.3% from 75.6% primarily as a result of the acquisition of dmc² with its high cost of precious metals relative to revenues.

Selling, general and administrative expenses increased by \$31.6 million in the three month period ended September 30, 2001, from the same period in 2000, resulting primarily from the acquisition of dmc² which added approximately \$28 million.

Other expense – net was \$15.9 million for the three month period ended September 30, 2001, an increase of 43.6% from the third quarter of 2000, due primarily to the additional interest expense incurred on the additional debt to finance the acquisition of dmc².

Income taxes as a percentage of income before income taxes, minority interests and equity in income of affiliates, were 29.8% compared to 29.7% in the same period in 2000. The effective tax rate is lower than the U.S. statutory tax rate due to higher income earned in the relatively low statutory tax country of Finland and a tax holiday in Malaysia.

Net income for the three-month period ended September 30, 2001 was \$20.5 million, an increase of \$1.8 million from the same period in 2000, due to the aforementioned factors.

Base metal chemistry segment

The base metal chemistry segment includes the cobalt, nickel, copper and other base metal chemistry manufacturing businesses as previously reported by the Company.

The following information summarizes market prices of the primary raw materials used by the base metal chemistry segment:

	Market Price Ranges per Pound	
	Three Months Ended September 30,	
	2001	2000
Cobalt - 99.3% Grade	\$8.41 to \$ 9.85	\$11.55 to \$14.13
Nickel	\$2.20 to \$ 2.75	\$ 3.43 to \$ 3.97
Copper	\$0.65 to \$ 0.70	\$ 0.81 to \$ 0.92

The following information summarizes the physical volumes of products sold by the base metal chemistry segment:

(in millions of pounds)	<u>Three Months Ended September 30,</u>		Percentage <u>Change</u>
	<u>2001</u>	<u>2000</u>	
Organics	16.9	18.9	-10.6%
Inorganics	22.5	26.5	-15.1%
Powders	10.1	11.7	-13.7%
Metals	<u>31.4</u>	<u>23.2</u>	35.3%
	<u>80.9</u>	<u>80.3</u>	0.7%

Operating profit for the three months ended September 30, 2001 was \$34.8 million, a decrease of 17.4% compared to the same period for 2000. The decline was primarily the result of global economic weakness leading to lower cobalt contained volumes across many industries and lower metal prices resulting in lower refining profits. Net sales were \$174.9 million, a decline of 25% resulting principally from lower selling prices, as cobalt, nickel and copper raw material market prices decreased compared to the same period in 2000. Physical sales volumes were up overall by approximately 1%, reflecting an increase in nickel based products sold, and offsetting the decrease in cobalt based products sold. The global recession and post September 11 cutbacks reduced cobalt product demand across most industries and all geographic areas.

Precious metal chemistry segment

The precious metal chemistry segment includes the platinum group and other precious metals manufacturing businesses that were acquired in the dmc² acquisition (the results of operations exclude the businesses divested in September 2001). This segment develops, produces and markets a variety of products, predominantly from precious metals such as platinum, palladium, rhodium, gold and silver. Operating profit was \$12.3 million for the period, primarily as a result of strong sales of auto catalysts to the European diesel market. Net sales were \$243.9 million.

Metal management segment

The metal management segment was acquired in the dmc² acquisition. This segment acts as a metal sourcing operation for our other business segments and for our customers, primarily procuring precious metals such as platinum, palladium, rhodium, gold and silver. Metal management centrally manages metal purchases and sales by providing the necessary precious metal liquidity, financing and hedging for our other segments. Operating profit was \$5.2 million for the period and was positively effected by the Company's management of a volatile precious metal pricing environment. Net sales were \$414.4 million.

Nine Months Ended September 30, 2001 Compared to Nine Months Ended September 30, 2000

Net sales for the nine months ended September 30, 2001 were \$1,285.5 million, an increase of 96.2% compared to the same period for 2000. The increase in sales was primarily due to the acquisition of dmc².

Gross profit increased to \$218.1 million for the nine month period ended September 30, 2001, a 41.4% increase over the same period in 2000. The increase in gross profit was primarily due to the acquisition of dmc². Cost of products sold increased to 83.0% of net sales for the nine months ended September 30, 2001 from 76.5% of net sales during the same period of 2000 primarily as a result of the acquisition of dmc² with its high cost of precious metals relative to revenues.

Selling, general and administrative expenses increased by \$41.4 million in the nine month period ended September 30, 2001, from the same period in 2000, resulting primarily from the acquisition of dmc² which added approximately \$28 million.

Other expense - net in 2001 was \$38.3 million, an increase of 40.2%, due primarily to the additional interest expense incurred on the additional debt to finance the dmc² acquisition.

Income taxes as a percentage of income before income taxes, minority interests and equity in income of affiliates, decreased to 28.4% for the first nine months of 2001 from 29.6% in the same period in 2000. The effective tax rate is lower than the U.S. statutory tax rate due to higher income earned in the relatively low statutory tax country of Finland and a tax holiday in Malaysia.

Net income for the nine-month period ended September 30, 2001 was \$60.3 million, an increase of \$8.1 million from the same period in 2000, due to the aforementioned factors.

Base metal chemistry segment

The following information summarizes market prices on the primary raw materials used by the base metal chemistry segment:

	Market Price Ranges per Pound	
	Nine Months Ended September 30,	
	2001	2000
Cobalt – 99.3% Grade	\$8.41 to \$12.35	\$11.55 to \$15.25
Nickel	\$2.20 to \$ 3.35	\$ 3.43 to \$ 4.75
Copper	\$0.65 to \$ 0.85	\$ 0.75 to \$ 0.92

The following information summarizes the physical volumes of products sold by the base metal segment:

(in millions of pounds)	<u>Nine Months Ended September 30,</u>		<u>Percentage</u>
	<u>2001</u>	<u>2000</u>	<u>Change</u>
Organics	56.7	58.7	-3.4%
Inorganics	73.6	79.8	-7.8%
Powders	33.0	35.2	-6.3%
Metals	<u>90.0</u>	<u>50.8</u>	77.2%
	<u>253.3</u>	<u>224.5</u>	12.8%

Operating profit for the nine months ended September 30, 2001 was \$122.3 million, an increase of 6% compared to the same period for 2000. The increase was primarily due to the full impact in 2001 of the results of the Harjavalta nickel refinery, which was acquired in April, 2000. Net sales were \$627.2 million, a decline of 4.3%, resulting principally from lower prices, as cobalt, nickel and copper raw material market prices decreased compared to the same period in 2000. Physical sales volumes were up overall by 12.8% primarily due to the full impact of the Harjavalta nickel refinery operations.

Precious metal chemistry and metal management segments

These segments were acquired in the dmc² acquisition on August 10, 2001. Results of operations for these two segments, since the date of acquisition, are included in the discussion for the three months ended September 30, 2001.

Liquidity and Capital Resources

During the nine month period ended September 30, 2001, the Company's net working capital increased by approximately \$178.7 million. This increase was primarily the result of the acquisition of the working capital of dmc². Capital expenditures in 2001 were primarily related to capacity expansions at the Company's base metal chemistry facilities in Finland and at various precious metal chemistry locations. These capital expenditures were funded through cash generated by operations as well as additional borrowings under the Company's revolving credit facility.

In August 2001, the Company's credit facilities were revised and increased to \$1.31 billion, in conjunction with the acquisition of dmc² (which is discussed more fully in Note B). These credit facilities are comprised of a \$325 million revolving credit facility, a \$135 million five year term loan, a \$500 million seven year term loan and a \$350 million asset sale term loan, all bearing interest at a rate of Libor plus 3%. In addition, the Company obtained a \$550 million increasing rate bridge loan, initially bearing interest at a rate of 10.5%. The bridge loan matures on May 10, 2002, which if unpaid as of that date, will automatically extend to March 31, 2008. The asset sale term loan was re-paid from the proceeds of the sale of certain assets to Ferro Corporation. The Company intends to refinance the bridge loan and a portion of these facilities through a combination of long-term debt and equity financing.

The Company believes that it will have sufficient cash generated by operations and through its credit facilities to provide for its future working capital and capital expenditure requirements and to pay quarterly dividends on its common stock, subject to the Board's discretion. Subject to several limitations in its credit facilities, the Company may incur additional borrowings to finance working capital and certain capital expenditures, including, without limitation, the purchase of additional raw materials.

Forward Looking Statements

The Company is making this statement in order to satisfy the "safe harbor" provisions contained in the Private Securities Litigation Reform Act of 1995. The foregoing discussion includes forward-looking statements relating to the business of the Company. Such

forward-looking statements are subject to uncertainties and factors relating to the Company's operations and business environment, all of which are difficult to predict and many of which are beyond the control of the Company, that could cause actual results of the Company to differ materially from those matters expressed in or implied by such forward-looking statements. The Company believes that the following factors, among others, could affect its future performance and cause actual results of the Company to differ materially from those expressed in or implied by forward-looking statements made by or on behalf of the Company: (a) the price and supply of raw materials; (b) demand for metal-based specialty chemicals and products in the markets served; (c) the effect of non-currency risks of investing in and conducting operations in foreign countries, including those relating to political, social, economic and regulatory factors, together with fluctuations in currency exchange rates upon the Company's international operations; and (d) the ability to identify suitable acquisition candidates, or finance (through available cash flow and/or additional debt or equity financing), consummate or assimilate such acquisitions.

Item 3 Quantitative and Qualitative Disclosures About Market Risk

A discussion of market risk exposures is included in Part II, Item 7a, "Qualitative and Quantitative Disclosure About Market Risk", of the Company's 2000 Annual Report on Form 10-K. There have been no material changes in the base metal chemistry segment market risks during the nine months ended September 30, 2001.

The acquisition of dmc² (as described in Note B), and the resultant precious metal chemistry and metal management segments, increase the Company's risk exposure to include commodity price risk for precious metals, increased interest risk related to the borrowings to fund the acquisition, and additional foreign currency risk associated with a greater number of manufacturing facilities in locations where fluctuations in currency prices may effect the Company's operating results. To mitigate certain of these risks, the Company enters into derivative instruments and hedging activities which are closely monitored and controlled.
