SAN JOSE, CA, January 29, 2004 – Sunrise Telecom Incorporated (Nasdaq: SRTI), a leading provider of service verification equipment for the telecommunications and cable broadband industries, reported sales for the fourth quarter of 2003 of \$20.4 million, compared with \$12.3 million in the third quarter of 2003 and \$16.5 million in the prior year fourth quarter. Diluted net income per share was \$0.04, compared with a net loss of \$0.03 per share last quarter and with \$0.00 per share for the fourth quarter of 2002. At quarter end, backlog decreased to \$6.4 million, compared with \$7.5 million at the end of the third quarter of 2003 and \$4.4 million at the end of the fourth quarter of 2002.

Sales for the full year 2003 were \$54.9 million, compared with \$54.3 million for 2002. Net loss per share for 2003 was \$0.08 compared with a net loss per share of \$0.10 in 2002. Cash generated by operations for the year was \$5.8 million. That positive cash flow, combined with a stable to improving outlook, recently enacted favorable tax laws, the company's cash position, and anticipated needs for cash led the Board of Directors to institute an annual dividend for the company, declaring a \$2.5 million, or \$0.05 per share, cash dividend to be paid to shareholders of record as of February 10, 2004.

"We experienced a phenomenal order rate at the end of the third quarter," stated Paul Chang, President & CEO of Sunrise Telecom. "It stayed strong right through the end of the year. I'm really proud of our production and sales people who worked closely together and prepared well for some large, late orders, delivering products prior to the end of the fiscal year to satisfy the needs of our customers. Our SunSet MTT led the way in configurations optimized for DSL Internet service deployment by field technicians. The MTT has established a new standard of modularity and lightweight utility for the field technician handling today's broad basket of services. We see interesting new opportunities for it in 2004."

Outlook

The company expects sales of \$12 to \$15 million in the first quarter on the strength of year-end backlog. In general, the company's telecom and cable TV customers' networks and services remain in flux, creating new needs for service verification and diagnostic solutions. The company sees opportunity in Internet Protocol services, business data services, fiber to the home roll out, digital network capacity expansions, wireless service evolution, wave-division maintenance needs in the metropolitan network, and network technician redeployment. This opportunity leads to a stable to improving outlook.
