PART I

Item 1. Business

General Development of Business

Skyline Corporation was originally incorporated in Indiana in 1959, as successor to a business founded in 1951. Skyline Corporation and its consolidated subsidiaries (the “Corporation”) design, produce and distribute manufactured housing (mobile homes and multi-sectional homes) and recreational vehicles (travel trailers, including park models and fifth wheels).

The Corporation, which is one of the largest producers of manufactured homes in the United States, produced 9,849 manufactured homes in fiscal year 2002.

The Corporation’s manufactured homes are marketed under a number of trademarks. They are available in lengths ranging from 36’ to 80’ and in single wide widths from 12’ to 18’, double wide widths from 20’ to 32’, and triple wide widths from 36’ to 42’.

The Corporation’s recreational vehicles are sold under the “Nomad,” “Layton,” and “Aljo” trademarks for travel trailers and fifth wheels.

In fiscal year 2002, manufactured homes represented 75% of total sales, while recreational vehicles accounted for the remaining 25%. In the prior year, the sales dollars were 76% manufactured homes and 24% recreational vehicles. Additional financial data relating to these industry segments is included in Note 5, Industry Segment Information, in the Notes to Consolidated Financial Statements included in this document under Item 8.

Narrative Description of Business

Principal Markets

The principal markets for manufactured homes are the suburban and rural areas of the continental United States. The principal buyers continue to be young married couples and senior citizens, but the market tends to broaden when conventional housing becomes more difficult to purchase and finance.

The recreational vehicle market is made up of primarily vacationing middle-income families, retired couples traveling around the country and sportsmen pursuing four-season hobbies.

Item 1. Business

Method of Distribution

The Corporation's manufactured homes are distributed by approximately 410 dealers at 860 locations throughout the United States and recreational vehicles are distributed by approximately 240 dealers at 270 locations throughout the United States. These are generally not exclusive dealerships and it is believed that most dealers also sell products of other manufacturers.

The Corporation provides the retail purchaser of its manufactured homes with a full one-year warranty against defects in materials and workmanship. Recreational vehicles are covered by a two-year warranty. The warranties are backed by a corporate service department and an extensive field service system.

The Corporation's products are sold to dealers either through floor plan financing with various financial institutions or on a cash basis. Payments to the Corporation are made either directly by the dealer or by financial institutions, which have agreed to finance dealer purchases of the Corporation's products. In accordance with industry practice, certain financial institutions which finance dealer purchases require the Corporation to execute repurchase agreements which provide that in the event a dealer defaults on its repayment of the financing, the Corporation will repurchase its products from the financing institution in accordance with a declining repurchase price schedule established by the Corporation. Any loss under these agreements is the difference between the repurchase cost and the resale value of the units repurchased. Further, the risk of loss is spread over numerous dealers. There have been no material losses related to repurchases in past years. Additional information regarding these repurchase agreements is included in Note 2, Contingencies, in the Notes to Consolidated Financial Statements included in this document under Item 8.

Raw Materials and Supplies

The Corporation is basically an assembler of components purchased from outside sources. The major components used by the Corporation are lumber, plywood, shingles, vinyl and wood siding, steel, aluminum, insulation, home appliances, furnaces, plumbing fixtures, hardware, floor coverings and furniture. The suppliers are many and range in size from large national companies to very small local companies. At the present time, the Corporation is obtaining sufficient materials to fulfill its needs.

Patents, Trademarks, Licenses, Franchises and Concessions

The Corporation does not rely upon any terminable or nonrenewable rights such as patents, licenses or franchises under the trademarks or patents of others, in the conduct of any segment of its business.

Item 1. Business

Seasonal Fluctuations

While the Corporation maintains production of manufactured homes and recreational vehicles throughout the year, seasonal fluctuations in sales do occur. Sales and production of manufactured homes are affected by winter weather conditions at the Corporation's northern plants. Recreational vehicle sales are generally higher in the spring and summer months than in the fall and winter months.

Inventory

The Corporation does not build significant inventories of either finished goods or raw materials at any time. In addition, there are no significant inventories sold on consignment.

Dependence Upon Individual Customers

The Corporation does not rely upon any single dealer for a significant percentage of its business in any industry segment.

Backlog

The Corporation does not consider the existence and extent of backlog to be significant in its business. The Corporation's production is based on a relatively short manufacturing cycle and dealer's orders, which continuously fluctuate. As such, the existence of backlog is not significant at any given date and does not typically provide a reliable indication of the status of the Corporation's business.

Government Contracts

The Corporation has had no significant contracts during the past three years.

Competitive Conditions

The manufactured housing and recreational vehicle industries are highly competitive, with particular emphasis on price and features offered. The Corporation's competitors are numerous, ranging from multi-billion dollar corporations to relatively small and specialized manufacturers.

Item 1. Business

Competitive Conditions, continued

The Manufactured Housing Institute reported that the industry produced approximately 193,200 homes in calendar year 2001. In the same period, the Corporation produced 10,148 units for a 5.3 % market share. In calendar year 2000, approximately 250,500 homes were manufactured by the industry. In that period, the Corporation produced 11,700 homes for a 4.7% market share.

The recreational vehicle industry produced 321,000 units in calendar year 2001 compared to 418,300 units in calendar year 2000. The following table shows the Corporation's competitive position in the recreational vehicle product lines it sells.

	<u>Units Produced</u> <u>Calendar Year 2001</u>		<u>Units Produced</u> <u>Calendar Year 2000</u>	
	<u>Industry</u>	<u>Skyline</u>	<u>Industry</u>	<u>Skyline</u>
Travel Trailers	102,200	6,126	114,500	6,773
Fifth Wheels	54,700	1,550	62,300	1,392
Park Models	7,400	365	8,200	403

Both the manufactured housing and recreational vehicle segments of the Corporation's business are dependent upon the availability of financing to dealers and retail financing. Consequently, increases in interest rates and/or tightening of credit through governmental action or otherwise have adversely affected the Corporation's business in the past and may do so in the future.

The Corporation considers it impossible to predict the future occurrence, duration or severity of cost or availability problems in financing either manufactured homes or recreational vehicles. To the extent that they occur, such public concerns will affect sales of the Corporation's products.

Regulation

The manufacture, distribution and sale of manufactured homes and recreational vehicles are subject to government regulations in both the United States and Canada, at federal, state or provincial and local levels.

Item 1. Business

Environmental Quality

The Corporation believes that compliance with federal, state and local requirements respecting environmental quality will not require any material capital expenditures for plant or equipment modifications which would adversely affect earnings.

Other Regulations

The U.S. Department of Housing and Urban Development (HUD) has set national manufactured home construction and safety standards and implemented recall and other regulations since 1976. The National Mobile Home Construction and Safety Standards Act of 1974, as amended, under which such standards and regulations are promulgated, prohibits states from establishing or continuing in effect any manufactured home standard that is not identical to the federal standards as to any covered aspect of performance. Implementation of these standards and regulations involves inspection agency approval of manufactured home designs, plant and home inspection by states or other HUD-approved third parties, manufacturer certification that the standards are met, and possible recalls if they are not or if homes contain safety hazards.

Some components of manufactured homes may also be subject to Consumer Product Safety Commission standards and recall requirements. In addition, the Corporation has voluntarily subjected itself to third party inspection of all of its products nationwide in order to further assure the Corporation, its dealers, and customers of compliance with established standards.

The Corporation's travel trailers continue to be subject to safety standards and recall and other regulations promulgated by the U.S. Department of Transportation under the National Traffic and Motor Vehicle Safety Act of 1966, as well as state laws and regulations.

The Corporation's operations are subject to the Federal Occupational Safety and Health Act, and are routinely inspected thereunder.

The transportation and placement (in the case of manufactured homes) of the Corporation's products are subject to state highway use regulations and local ordinances which control the size of units that may be transported, the roads to be used, speed limits, hours of travel, and allowable locations for manufactured homes and parks.

The corporation is also subject to many state manufacturer licensing and bonding requirements, and to dealer day in court requirements in some states.

Item 1. Business

Other Regulations, continued

Manufactured homes and recreational vehicles may be subject to the Magnuson-Moss Warranty – Federal Trade Commission Improvement Act, which regulates warranties on consumer products. The Corporation believes that its existing warranties meet all requirements of the Act.

HUD has promulgated rules requiring producers of manufactured homes to utilize wood products certified by their suppliers to meet HUD's established limits on formaldehyde emissions, and to place in each home written notice to prospective purchasers of possible adverse reaction from airborne formaldehyde in the homes. These rules are designated as preemptive of state regulation.

Number of Employees

The Corporation employs approximately 2,800 people at the present time.

Item 2. Properties

The Corporation owns its corporate offices and design facility, which are located in Elkhart, Indiana.

The Corporation's 24 manufacturing plants, all of which are owned, are as follows:

<u>Location</u>	<u>Products</u>
California, San Jacinto	Manufactured Housing/Park Models
California, Hemet	Recreational Vehicles
California, Hemet	Recreational Vehicles
California, Woodland	Manufactured Housing
Florida, Ocala	Manufactured Housing
Florida, Ocala	Manufactured Housing

Indiana, Elkhart	Recreational Vehicles
Indiana, Goshen	Manufactured Housing
Kansas, Arkansas City	Manufactured Housing
Kansas, Halstead	Manufactured Housing
Louisiana, Bossier City	Manufactured Housing
North Carolina, Mocksville	Manufactured Housing
Ohio, Sugarcreek	Manufactured Housing
Oregon, McMinnville	Manufactured Housing
Oregon, McMinnville	Recreational Vehicles

Item 2. Properties, continued

Pennsylvania, Ephrata	Manufactured Housing
Pennsylvania, Leola	Manufactured Housing
Pennsylvania, Leola	Recreational Vehicles
Texas, Mansfield	Recreational Vehicles
Vermont, Fair Haven	Manufactured Housing
Wisconsin, Lancaster	Manufactured Housing

The above facilities range in size from approximately 50,000 square feet to approximately 160,000 square feet.

It is extremely difficult to determine the unit productive capacity of the Corporation because of the ever-changing product mix.

The Corporation believes that its plant facilities, machinery and equipment are well maintained and are in good operating condition.

Item 3. Legal Proceedings

Neither the Corporation nor any of its subsidiaries is a party to any pending legal proceedings which could have a material effect on operations.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders during the fourth quarter of fiscal year ended May 31, 2002.

PART II

Item 5. Market for the Registrant's Common Stock and Related Stockholder Matters

Skyline Corporation (SKY) is traded on the New York Stock Exchange. A quarterly cash dividend of 18 cents (\$0.18) per share was paid in fiscal 2002 and 2001. At May 31, 2002, there were approximately 1,300 holders of record of Skyline Corporation common stock. A quarterly summary of the market price is listed for the fiscal years ended May 31, 2002 and 2001.

	<u>2002</u>		<u>2001</u>	
Quarter	High	Low	High	Low
First	\$28.50	\$23.84	\$23.06	\$19.44
Second	\$30.40	\$22.80	\$22.44	\$19.81
Third	\$32.25	\$27.45	\$24.75	\$18.56
Fourth	\$37.76	\$29.30	\$26.70	\$21.15

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations (Unaudited)

Results of Operations - Fiscal 2002 Compared to Fiscal 2001

Sales in 2002 were \$450,722,000, a decrease of \$13,102,000 from \$463,824,000 in 2001. Manufactured housing sales totaled \$339,260,000 for 2002 compared to \$353,610,000 in 2001. Manufactured housing unit sales decreased to 9,849 from 10,664. Recreational vehicle sales increased from \$110,214,000 in 2001 to \$111,462,000 in 2002. Recreational vehicle unit sales also dropped from 8,156 in 2001 to 8,028 in 2002. The decrease in manufactured housing sales reflects difficult market conditions that persisted throughout the year. Difficult market conditions also existed for recreational vehicle sales for most of the year. Demand, however, did increase for products in this business segment in the fourth fiscal quarter.

Cost of sales in 2002 was 85.9% compared to 87.0% in 2001. Manufactured housing cost of sales in 2002 decreased to 84.9% from 86.5% in 2001. The decrease is primarily attributable to the Corporation's effort to control manufacturing costs. Recreational vehicle cost of sales increased to 89.0% of sales from 88.7% in 2001.

Selling and administrative expenses as a percentage of sales decreased slightly to 10.5% in 2002 from 10.8% in 2001.

Manufactured housing operating earnings as a percentage of sales were 5.6% in 2002 and 3.8% in 2001. The increase is due to improved gross margins and cost control. Recreational vehicle operating earnings as a percentage of sales increased to 0.8% of sales in 2002 from 0.7% of sales in 2001. Earnings of the recreational vehicle segment were impacted by the startup of a new manufacturing process at one recreational vehicle facility.

Interest income amounted to \$4,102,000 in 2002 compared to \$7,717,000 in 2001. Interest income is directly related to the amount available for investment and the prevailing yields of U.S. Government securities.

Results of Operations - Fiscal 2001 Compared to Fiscal 2000

Sales in 2001 were \$463,824,000, a decrease of \$115,727,000 from \$579,551,000 in 2000. Manufactured housing sales totaled \$353,610,000 for 2001 compared to \$447,338,000 in 2000. Manufactured housing unit sales decreased to 10,664 from 13,731. Recreational vehicle sales declined from \$132,213,000 in 2000 to \$110,214,000 in 2001. Recreational vehicle unit sales also dropped from 9,780 in 2000 to 8,156 in 2001. The decrease in sales reflects persistently difficult market conditions in both the manufactured housing and recreational vehicle industries.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations (Unaudited), continued

Results of Operations - Fiscal 2001 Compared to Fiscal 2000

Cost of sales in 2001 was 87.0% of sales compared to 87.4% in 2000. Manufactured housing cost of sales in 2001 decreased to 86.5% of sales from 87.5% in 2000. Recreational vehicle cost of sales in 2001 increased to 88.7% of sales from 87.1% in 2000.

Selling and administrative expenses as a percentage of sales were 10.8% in 2001 compared to 9.4% in 2000. The increase is due to a larger proportion of fixed and semi-fixed costs resulting from lower sales volume.

Manufactured housing operating earnings as a percentage of sales were 3.8% in 2001 and 3.9% in 2000. Recreational vehicle operating earnings as a percentage of sales decreased to 0.7% of sales in 2001 from 4.0% of sales in 2000. Both decreases were largely due to either decreased sales volume or gross margins.

Interest income amounted to \$7,717,000 in 2001 compared to \$6,572,000 in 2000. Interest income is directly related to the amount available for investment and the prevailing yields of U.S. Government securities.

Liquidity and Capital Resources

At May 31, 2002, cash and short-term investments in U.S. Treasury Bills totaled \$147,026,000, an increase of \$30,611,000 from \$116,415,000 at May 31, 2001. Current assets exclusive of cash and investments in U.S. Treasury Bills totaled \$45,797,000 at the end of fiscal 2002, a decrease of \$27,294,000 from fiscal 2001's total of \$73,091,000. The decrease was primarily due to the maturity of investment in U.S. Treasury Notes (\$25,006,000). Current liabilities decreased \$3,452,000 from \$39,915,000 at May 31, 2001 to \$36,463,000 at May 31, 2002. The decrease was due to a decline in accounts payable (\$1,328,000), accrued marketing programs (\$1,011,000), and income taxes (\$884,000). Income taxes declined due to the timing of tax payments, while the decreases in accounts payable and accrued marketing programs are a reflection of the decline in sales that occurred in the year.

Capital expenditures totaled \$3,330,000 in 2002 compared to \$2,499,000 in the prior year. Capital expenditures during the current fiscal year included \$820,000 to implement a new manufacturing process at one recreational vehicle facility. Other capital expenditures were made primarily to replace or refurbish machinery and equipment, improve manufacturing efficiencies, and increase manufacturing capacity. No cash was used to purchase the Corporation's stock in fiscal 2002, compared to \$5,974,000 in fiscal 2001.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations (Unaudited), continued

Liquidity and Capital Resources

The cash provided by operating activities in fiscal 2003, along with current cash and short-term investments, is expected to be adequate to fund any capital expenditures and treasury stock purchases during the year. Historically, the Corporation's financing needs have been met through funds generated internally.

As further discussed in Note 2 to the financial statements, the Corporation is contingently liable under repurchase agreements with certain financial institutions. One of these financial institutions, Conseco Finance Servicing Corporation (Conseco), was a national provider of floor plan funding for manufactured housing dealer inventories. On March 1, 2002, Conseco announced that effective April 1, 2002, it would stop approving requests to fund purchases of additional inventory for industry dealers. On May 16, 2002, Conseco began notifying manufacturers and industry dealers that amounts due under floor plan financing agreements were to be paid in full on or prior to July 17, 2002. Conseco also indicated in this notification that certain options would be made available to assist the dealers in meeting their commitments. As of July 18, 2002, the Corporation believes that the potential repurchase obligation with Conseco is approximately \$6.5 million. During fiscal year 2002 less than 10 percent of the Corporation's total sales were from manufactured housing dealers who exclusively relied on Conseco for floor plan financing.

Other Matters

The provisions for federal income taxes in each year approximates the statutory rate and for state income taxes reflects current state rates effective for the period based upon activities within the taxable entities.

The consolidated financial statements included in this report reflect transactions in the dollar values in which they were incurred and, therefore, do not attempt to measure the impact of inflation. However, the Corporation believes that inflation has not had a material effect on its operations during the past three years. On a long-term basis the Corporation has demonstrated an ability to adjust the selling prices of its products in reaction to changing costs due to inflation.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations (Unaudited), continued

Forward Looking Information

Certain statements in this report are considered forward looking as indicated by the Private Securities Litigation Reform Act of 1995. These statements involve uncertainties that may cause actual results to materially differ from expectations as of the report date. These uncertainties include but are not limited to:

- Cyclical nature of the manufactured housing and recreational vehicle industries
- Availability of wholesale and retail financing
- Interest rate levels
- Impact of inflation
- Competitive pressures on pricing and promotional costs
- Consumer confidence
- Market demographics
- Market disruption resulting from the terrorist attacks on September 11, 2001, and any subsequent armed conflict by the United States.

REPORT OF INDEPENDENT ACCOUNTANTS

To the Shareholders and Board of Directors of Skyline Corporation

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of earnings and retained earnings, and of cash flows present fairly, in all material respects, the financial position of Skyline Corporation and its subsidiaries at May 31, 2002 and 2001, and the results of their operations and their cash flows for each of the three years in the period ended May 31, 2002, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of Skyline Corporation's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Skyline Corporation and Subsidiary Companies

Notes to Consolidated Financial Statements

NOTE 1 Nature of Operations and Accounting Policies

Nature of operations--Skyline Corporation designs, manufactures and sells at wholesale both a broad line of single and multi-section manufactured homes and a large selection of non-motorized recreational vehicle models. Both product lines are sold through numerous independent dealers throughout the United States who often utilize floor plan financing arrangements with lending institutions.

The following is a summary of the accounting policies that have a significant effect on the consolidated financial statements.

Basis of presentation--The consolidated financial statements include the accounts of Skyline Corporation and all of its subsidiaries (Corporation), each of which is wholly-owned. All intercompany transactions have been eliminated. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Revenue recognition--Substantially all of the Corporation's products are made to order. Revenue is recognized upon shipment.

Freight billed to customers is considered sales revenue, and the related freight costs are cost of sales. Volume based rebates paid to dealers are classified as a reduction in sales revenue.

Consolidated statements of cash flows--For purposes of the statements of cash flows, investments in treasury bills are included as investing activities. The Corporation's cash flows from operating activities were reduced by income taxes paid of \$8,870,000, \$6,943,000, and \$11,911,000 in 2002, 2001 and 2000, respectively.

Inventory--Inventories are stated at cost, which includes the cost of raw materials, labor and overhead, determined under the first-in, first-out method, which is not in excess of market. At May 31, 2002, total inventories consisted of raw materials, \$4,280,000, work in process, \$5,183,000, and finished goods, \$169,000. At May 31, 2001, raw materials inventory totaled \$3,891,000, work in process inventory totaled \$5,098,000, and finished goods totaled \$37,000.

Skyline Corporation and Subsidiary Companies

Notes to Consolidated Financial Statements

NOTE 1 Nature of Operations and Accounting Policies, continued

Property, plant and equipment--Property, plant and equipment is stated at cost. Depreciation is computed over the estimated useful lives of the assets using the straight-line method for financial statement reporting and accelerated methods for income tax purposes.

Investments--The Corporation invests in United States Government securities. These securities are typically held until maturity or reasonable proximity to maturity and are therefore classified as held-to-maturity and carried at amortized cost.

The cost of U.S. Treasury Bills, which approximates their fair market value, totaled \$138,327,000 and \$110,965,000 at May 31, 2002 and 2001, respectively. These securities mature within one year. The Corporation does not have any other financial instruments which have market values differing from recorded values.

Warranty--The Corporation provides a warranty on its products. Estimated warranty costs are accrued at the time of sale.

Income taxes--The difference between the Corporation's statutory federal income tax rate and the effective income tax rate is due primarily to state income taxes.

The Corporation's deferred tax assets consist primarily of temporary differences in the basis of certain liabilities for financial statement and tax return purposes and its deferred tax liabilities are due to the use of accelerated depreciation methods for tax purposes. The amounts of such deferred tax items are not significant individually or in the aggregate.

Recently issued accounting pronouncements--During fiscal 2002 the Financial Accounting Standards Board, (FASB), enacted two Financial Accounting Standards (FAS). FAS No.144, "Accounting for the Impairment or Disposal of Long-Lived Assets", addresses financial accounting and reporting for the impairment or disposal of long-lived assets. The Corporation will adopt FAS No. 144 in fiscal 2003, and expects no material impact on the consolidated financial statements. The FASB also enacted FAS No.143, "Accounting for Obligations Associated with the Retirement of Long-Lived Assets". This statement provides accounting guidance for legal obligations associated with the retirement of tangible long-lived assets. The Corporation will adopt FAS No. 143 in fiscal year 2004, and anticipates no material impact on the consolidated financial statements.

Notes to Consolidated Financial Statements

NOTE 1 Nature of Operations and Accounting Policies, continued

On April 19, 2001, the FASB'S EITF reached a consensus on Issue Number 00-25, "Vendor Income Statement Characterization of Consideration Paid to a Reseller of the Vendor's Products". This issue addresses the income statement classification of consideration from a vendor to a reseller of the vendor's products. The Corporation adopted Issue 00-25 in the fourth quarter of fiscal 2002 with no material impact on the consolidated financial statements.

The Corporation has determined that the effects on the financial statements from any other recently issued accounting standards are not applicable.

Reclassification--Certain prior year amounts have been reclassified to conform to the current year presentation.

NOTE 2 Contingencies

The Corporation was contingently liable at May 31, 2002 under repurchase agreements with certain financial institutions. The maximum repurchase liability is the total amount that would be paid upon the default of all the Corporation's independent dealers. The maximum potential repurchase liability, without reduction for the resale value of the repurchased units, was approximately \$120 million at May 31, 2002. The loss, if any, under these agreements is the difference between the repurchase cost and the resale value of the units. For the years ended May 31, 2002, 2001 and 2000, the Corporation repurchased units in the amounts of \$922,000, \$2,019,000 and \$2,345,000, respectively. Incurred net losses for the same periods totaled \$179,000, \$152,000 and \$196,000, respectively.

The Corporation is a party to various pending legal proceedings in the normal course of business. Management believes that any losses resulting from such proceedings would not have a material adverse effect on the Corporation's results of operations or financial position.

NOTE 3 Purchase of Treasury Stock

The Corporation's board of directors from time to time has authorized the repurchase of shares of the Corporation's common stock, in the open market or through negotiated transactions, at such times and at such prices as management may decide.

Skyline Corporation and Subsidiary Companies

Notes to Consolidated Financial Statements

NOTE 3 Purchase of Treasury Stock, continued

In fiscal 2002 the Corporation did not acquire any shares of its common stock. In fiscal 2001 it acquired 291,700 shares of its common stock for \$5,974,000, and in fiscal 2000 it acquired 317,000 shares for \$7,361,000.

The effect of the aggregate repurchases on basic earnings per share was \$.37 per share in 2002, \$.32 per share in 2001 and \$.36 per share in 2000. At May 31, 2002, the Corporation had authorization to repurchase an additional 391,300 shares of its common stock.

NOTE 4 Employee Benefits

A) PROFIT SHARING AND 401(K) PLANS

The Corporation has two deferred profit sharing Plans which together cover substantially all of its employees. The Plans are defined contribution plans to which the Corporation has the right to modify, suspend or discontinue contributions. For the years ended May 31, 2002, 2001 and 2000, contributions to the Plans were \$2,413,000, \$2,484,000 and \$2,554,000, respectively.

The Corporation has an employee savings plan (the "401(k) Plan") that is intended to provide participating employees with an additional method of saving for retirement. The 401(k) Plan covers all employees who meet certain minimum participation requirements. The Corporation does not currently provide a matching contribution to the 401(k) Plan.

B) RETIREMENT AND DEATH BENEFIT PLANS

The Corporation has entered into arrangements with certain employees which provide for benefits to be paid to the employees' estates in the event of death during active employment or retirement benefits to be paid over 10 years beginning at the date of retirement. To fund all such arrangements, the Corporation purchased life insurance or annuity contracts on the covered employees. The present value of the principal cost of such arrangements is being accrued over the period from the date of such arrangements to full eligibility using a discount rate of 7.0% in 2002, and 8.0% in 2001 and 2000. The amount charged to operations under these arrangements was \$352,000 in fiscal 2002, and \$252,000 in fiscal years 2001 and 2000.

NOTE 5 Industry Segment Information

Dollars in thousands

Operating earnings represent earnings before interest income, gain on sale of property, plant and equipment and provision for income taxes with non-traceable operating expenses being allocated to industry segments based on percentages of sales.

Identifiable assets, depreciation and capital expenditures, by industry segment, are those items that are used in operations in each industry segment, with jointly used items being allocated based on a percentage of sales.

Financial Summary by Quarter

EXHIBIT (3) (i)

Articles of Incorporation

No changes were made to the Articles of Incorporation during the fiscal year ended May 31, 2002. The Articles of Incorporation were filed with and are incorporated by reference from the Corporation's Form 10-K for the fiscal year ended May 31, 1996.

EXHIBIT (3) (ii)

BY-LAWS

Changes were made to the By-Laws during the fiscal year ended May 31, 2002. On September 24, 2001, the Board of Directors amended the By-Laws by increasing the number of board members from nine to ten. The By-Laws were further amended at a December 18, 2001 Board of Directors' meeting. The change pertained to the signing of shareholder certificates, the calling of special meetings, the organization of meetings, the functions of the Governance and Compensation Committee, the execution of documents, and the functions of the Corporate Controller. The By-Laws were filed with the Corporation's Form 10-Q for the third quarter-ended February 28, 2002.
