DESCRIPTION OF THE FUND AND PORTFOLIOS

The Fund is a Maryland corporation formed on July 15, 1993. Each Portfolio is a separate series of the Fund, an open-end management investment company, known as a mutual fund. Each Portfolio is a diversified portfolio, which means that, with respect to 75% of the Portfolio's total assets, the Portfolio will not invest more than 5% of its assets in the securities of any single issuer, nor hold more than 10% of the outstanding voting securities of any single issuer (other than, in each case, securities of other investment companies, and securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities).

The Dreyfus Corporation (the "Manager" or "Dreyfus") serves as each Portfolio's investment adviser. Dreyfus has engaged its affiliate, Mellon Equity Associates ("Mellon Equity"), to serve as each Portfolio's sub-investment adviser and to provide day-to-day management of each Portfolio's investments, subject to the supervision of Dreyfus. Dreyfus and Mellon Equity are referred to collectively as the "Advisers."

Dreyfus Service Corporation (the "Distributor") is the distributor of each Portfolio's shares.

Investment Approach

The following information supplements and should be read in conjunction with the Fund's Prospectus.

I. Asset Allocation Baseline. For each Portfolio, Mellon Equity will establish an asset allocation baseline (the "Portfolio Baseline"). The Portfolio Baseline describes target levels or relative weights for the Portfolio's asset classes: Level One describes the relative weighting of total assets between international assets, domestic assets, and money market instruments; Level Two describes the relative weighting of international and domestic assets between common stock and fixed-income assets; and Level Three describes the relative weighting of domestic common stock assets between large and small capitalization stocks. The following table illustrates this hierarchy:

<u>Portfolio</u>	Level One			Level Two		Level Three			
	Total Assets			International Assets	Domestic Assets	Domestic Equity			
	<u>Int'l</u>	<u>Domestic</u>	<u>Money Market Instruments</u>	<u>Equity</u>	<u>Fixed Income</u>	<u>Equity</u>	<u>Fixed Income</u>	<u>Large Cap</u>	<u>Small Cap</u>
Income	N/A	90%	10%	N/A	N/A	25%	75%	100%	N/A
Growth and Income	10%	90%	*	50%	50%	50%	50%	80%	20%
Growth	15%	85%	*	80%	20%	80%	20%	80%	20%

* Not held as an asset class. Money market instruments held for transactional and liquidity purposes only.

Mellon Equity will attempt to maintain relative asset class weights consistent with the Portfolio Baseline as adjusted by the Active Allocation Overlay described below. At any given time, however, actual weights will not equal the Portfolio Baseline because of

fluctuations in market values, money market instruments held for transactional and liquidity purposes, and Mellon Equity's active allocation overlay decisions.

II. Active Allocation Overlay. For each of the Growth Portfolio and the Growth and Income Portfolio, Mellon Equity will establish two active allocation ranges ("Portfolio Overlay One" and "Portfolio Overlay Two"). Portfolio Overlay One describes the amount of over/under weighting to the Portfolio Baseline for the relative weighting between international and domestic assets. Portfolio Overlay Two describes the amount of over/under weighting to the Portfolio Baseline for the relative weighting of domestic assets between common stock and fixed-income assets. The following table illustrates these ranges:

Portfolio	Portfolio Overlay One	Portfolio Overlay Two
	Range for Relative Weighting of International and Domestic Assets	Range for Relative Weighting of Domestic Assets Between Equity Assets and Fixed-Income Assets
Growth and Income	+/- 5% of Portfolio Baseline	+/- 15% of Portfolio Baseline
Growth	+/- 10% of Portfolio Baseline	+20%/-15% of Portfolio Baseline

The following examples illustrate Mellon Equity's allocation overlay process:

Example 1: Given the Level One Portfolio Baseline for the Growth and Income Portfolio of 10% of total assets in international securities and 90% of total assets in domestic securities, under Portfolio Overlay One, Mellon Equity could invest as much as 15% of the Growth and Income Portfolio's total assets in international securities and 85% of its total assets in domestic securities or as little as 5% of its total assets in international securities and 95% of its total assets in domestic securities.

Example 2: Given the Level Two Portfolio Baseline for the Growth and Income Portfolio of 50% of domestic assets in equity securities and 50% of domestic assets in fixed-income securities, under Portfolio Overlay Two, Mellon Equity could invest as much as 65% of the Growth and Income Portfolio's assets invested in domestic assets in equity securities and 35% of such domestic assets in fixed-income securities or as little as 35% of the Portfolio's assets invested in domestic assets in equity securities and 65% of such domestic assets in fixed-income securities.

Under normal circumstances, Mellon Equity expects to maintain relative asset class weights consistent with the Portfolio Baseline adjusted by Portfolio Overlay One and Portfolio Overlay Two as described above. At any given time, however, actual weights may not fall within the ranges suggested by the Portfolio Baseline adjusted by the Active Allocation Overlay because of fluctuations in market values, cash and cash-equivalents held for transactional and liquidity purposes, and Portfolio rebalancing.

Mellon Equity reserves the right to vary the relative asset class weights and the percentage of assets invested in any asset class from the Portfolio Baseline adjusted by the Active Allocation Overlay as the risk and return characteristics of either asset classes or markets, as assessed by Mellon Equity, vary over time. None of the Portfolios will be

managed as a balanced portfolio, which would require that at least 25% of the Portfolio's total assets be invested in fixed-income securities.

III. Implementing the Active Allocation Overlay. To implement Portfolio Overlay One, Mellon Equity will employ a proprietary country asset allocation model (the "Country Model"). The Country Model evaluates the return and risk characteristics of individual capital markets and their correlation across countries, incorporates expected movements in currency markets to determine expected U.S. dollar returns, and then employs an international correlation model to recommend appropriate relative weightings.

To implement Portfolio Overlay Two, Mellon Equity will employ a proprietary domestic asset allocation model (the "Domestic Model"). The Domestic Model evaluates the return and risk characteristics of the domestic equity and fixed-income markets by comparing the valuation of equity and fixed-income assets relative to their current market prices and long-term values in the context of the current economic environment. Once this analysis is completed, the Domestic Model recommends appropriate relative weightings.

With respect to the Growth Portfolio and the Growth and Income Portfolio, Mellon Equity will compare each such Portfolio's relative asset class weights from time to time to that suggested by the Country Model and the Domestic Model. Recommended changes will be implemented subject to Mellon Equity's assessment of current economic conditions and investment opportunities. From time to time, Mellon Equity may change the criteria and methods used to implement the recommendations of the asset allocation models.

IV. Asset Class Benchmarks. For each asset class, other than money market instruments, a market-based index is designated as a benchmark or reference for the respective asset class (the "Asset Class Benchmark"). A brief description of each Asset Class Benchmark listed in the table below is contained in Section VI. The Asset Class Benchmarks are used in the investment management process as described in the following section. The Asset Class Benchmarks are listed in the following table:

Asset Class	Portfolios	Asset Class Benchmark
Domestic Large Cap Equity	Income, Growth and Income and Growth	Standard & Poor's 500® Index ("S&P 500 Index")
Domestic Small Cap Equity	Growth and Income and Growth	Russell 2000® Index
International Equity	Growth and Income and Growth	Morgan Stanley Capital International Europe, Australasia, Far East (Free) Index ("EAFE Index")*
Domestic Fixed-Income	Income, Growth and Income and Growth	Lehman Brothers Government/Corporate Intermediate Bond Index ("Lehman Government/ Corporate Index")
International Fixed-Income	Growth and Income and Growth	J.P. Morgan Non-US Government Bond Index - Hedged ("J.P. Morgan Global Index")

* In U.S. dollars.

Under normal circumstances, Mellon Equity expects to use the Asset Class Benchmarks as described below. Mellon Equity, however, reserves the right to substitute another suitable Asset Class Benchmark if the then-existing Asset Class Benchmark is no longer calculated, suffers a material change in formula or content, fails to adequately reflect

the return characteristics of the asset class, or for any other reason, in the judgment of Mellon Equity, is inappropriate.

V. Asset Class Investment Management. When constructing portfolios for each asset class, Mellon Equity seeks to select securities, which, in the aggregate, have approximately the same investment characteristics as those of the Asset Class Benchmark with expected returns equal to or better than that of the Asset Class Benchmark. Some of the asset classes will be managed on an indexed basis and Mellon Equity reserves the right, in its judgment, to manage asset classes either actively or on an indexed basis consistent with the Portfolio's investment objective.

For asset classes managed on an indexed basis, a statistically based "sampling" technique will be used to construct portfolios. The sampling technique is expected to be an effective means of substantially duplicating the investment performance of the Asset Class Benchmark. It will not, however, provide investment performance relative to the Asset Class Benchmark with the same degree of accuracy that complete or full replication would provide.

If possible, Mellon Equity will seek to fully replicate the holdings of an Asset Class Benchmark when managing an indexed portfolio. Such a strategy is limited by the number of securities in the Asset Class Benchmark and will not provide investment performance equal to that of the Asset Class Benchmark owing to certain factors, including Asset Class Benchmark changes, calculation rules which assume dividends are reinvested into the Asset Class Benchmark on ex-dividend dates and transaction costs of rebalancing.

For asset classes that are actively managed, Mellon Equity will employ proprietary valuation models to assist in the selection of stocks and in the construction of portfolios that maintain the investment characteristics of the Asset Class Benchmark consistent with the Portfolio's investment objective. In its active investment process, Mellon Equity concentrates on fundamental factors such as relative price/earnings ratios, relative book to price ratios, earnings growth rates and momentum, and consensus earnings expectations and changes in that consensus to value and rank stocks based on expected relative performance to the Asset Class Benchmark.

Mellon Equity will seek to manage each asset class consistent with the descriptions above and with each Portfolio's investment objective. Across the Portfolios, it is not anticipated that each asset class will be managed identically with respect to being an indexed portfolio or actively managed. For example, the domestic equity, large cap asset class could be managed as an index portfolio in the Income Portfolio while being actively managed in the other Portfolios.

Mellon Equity may choose to combine Asset Class Benchmarks proportionately if the amount of investable assets in a Portfolio is deemed low in the judgment of Mellon Equity. For example, the domestic equity large cap and small cap Asset Class Benchmarks could be combined proportionately according to the Portfolio Baseline in order to create more efficient portfolio management as deemed appropriate by Mellon Equity. Mellon Equity would continue to provide investment management services as described above, but would manage to the combined Asset Class Benchmark.

VI. Description of Asset Class Benchmarks.

Common Stocks. The S&P 500 Index is composed of 500 common stocks, most of which are listed on the New York Stock Exchange. The weightings of stocks in the S&P 500 Index are based on each stock's relative total market capitalization; that is, its market price per share times the number of shares outstanding.

The Russell 2000® Index is an unmanaged index and is composed of the smallest companies in the Russell 3000® Index. The Russell 3000® Index is composed of 3,000 of the largest U.S. companies by market capitalization.

The EAFE Index is a broadly diversified international index composed of the equity securities of approximately 1,070 companies located outside the United States. The weightings of stocks in the EAFE Index are based on each stock's market capitalization relative to the total market capitalization of all stocks in the Index.

Fixed Income Securities. The Lehman Government/Corporate Index is composed of approximately 5,000 fixed-income securities, including U.S. Government securities and investment grade corporate bonds, with an average outstanding market value of more than \$600 million and maturities of less than ten years and greater than one year.

The J.P. Morgan Global Index is composed of traded, fixed-rate government bonds from twelve countries with maturities of greater than one year. The twelve countries are Australia, Belgium, Canada, Denmark, France, Germany, Italy, Japan, the Netherlands, Spain, Sweden and the United Kingdom.

Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Depository Receipts. (Growth and Income Portfolio and Growth Portfolio only) Each of these Portfolios may invest in the securities of foreign issuers in the form of American Depositary Receipts and American Depositary Shares (collectively, "ADRs") and Global Depositary Receipts and Global Depositary Shares (collectively, "GDRs") and other forms of depository receipts. These securities may not necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by a United States bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. GDRs are receipts issued outside the United States typically by non-United States banks and trust companies that evidence ownership of either foreign or domestic securities. Generally, ADRs in registered form are designed for use in the United States securities markets and GDRs in bearer form are designed for use outside the United States.

These securities may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities.

Money Market Instruments. The short-term money market instruments in which a Portfolio may invest consist of U.S. Government securities; bank obligations, including certificates of deposit, time deposits and bankers' acceptances and other short-term obligations of domestic or foreign banks, domestic savings and loan associations and other banking institutions having total assets in excess of \$1 billion; commercial paper; and repurchase agreements. The Income Portfolio will purchase only money market instruments having remaining maturities of 13 months or less, and generally invests up to 10% of its assets in money market instruments.

When the Advisers determine that adverse market conditions exist, a Portfolio may adopt a temporary defensive position and invest without limitation in money market instruments. A Portfolio also may purchase money market instruments when it has cash reserves or in anticipation of taking a market position.

Zero Coupon, Pay-In-Kind and Step-up Securities. Each Portfolio may invest in zero coupon U.S. Treasury securities, which are Treasury Notes and Bonds that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interests in such stripped debt obligations and coupons. Zero coupon securities also are issued by corporations and financial institutions, which constitute a proportionate ownership of the issuer's pool of underlying U.S. Treasury securities. A zero coupon security pays no interest to its holder during its life and is sold at a discount to its face value at maturity. Each Portfolio may invest in pay-in-kind bonds, which are bonds, that generally pay interest through the issuance of additional bonds. Each Portfolio also may purchase step-up coupon bonds, which are debt securities, that typically do not pay interest for a specified period of time and then pay interest at a series of different rates. The amount of any discount on these securities varies depending on the time remaining until maturity or cash payment date, prevailing interest rates, liquidity of the security and perceived credit quality of the issuer. Zero coupon securities also may take the form of debt securities that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interest in such stripped debt obligations and coupons. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of securities that pay cash interest periodically having similar maturities and credit qualities. In addition, unlike bonds that pay cash interest throughout the period to maturity, a Portfolio will realize no cash until the cash payment date unless a portion of such securities are sold and, if the issuer defaults, the Portfolio may obtain no return at all on its investment. Federal income tax law requires the holder of a zero coupon security or of certain pay-in-kind or step-up bonds to accrue income with respect to these securities prior to the receipt of cash payments. To maintain its qualification as a regulated investment company and avoid liability for Federal income taxes, the Portfolio may be required to distribute such income accrued with respect to these securities and may have to dispose of portfolio securities under disadvantageous circumstances in order to generate cash to satisfy these distribution requirements. See "Dividends, Distributions and Taxes."

Foreign Securities. (Growth and Income Portfolio and Growth Portfolio only) Each of these Portfolios may invest in "foreign securities." These securities include equity and debt securities of companies organized under the laws of countries other than the United States and debt securities issued or guaranteed by governments other than the U.S. Government or by foreign supranational entities. They also include securities of companies whose principal trading market is in a country other than the United States or of companies (including those that are located in the U.S. or organized under U.S. law) that derive a

significant portion of their revenue or profits from foreign businesses, investments or sales, or that have a majority of their assets outside the United States. They may be traded on foreign securities exchanges or in the foreign over-the-counter markets. Supranational entities include international organizations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies. Examples include the International Bank for Reconstruction and Development (the World Bank), the European Coal and Steel Community, the Asian Development Bank and the InterAmerican Development Bank.

Securities of foreign issuers that are represented by ADRs or that are listed on a U.S. securities exchange or traded in the U.S. over-the-counter markets are not considered “foreign securities” for the purpose of a portfolio’s investment allocations, because they are not subject to many of the special considerations and risks, discussed in the Fund’s Prospectus and this SAI, that apply to foreign securities traded and held abroad.

Investment Companies. Each Portfolio may invest in securities issued by other investment companies to the extent consistent with its investment objective. Under the Investment Company Act of 1940, as amended (the “1940 Act”), the Portfolio’s investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Portfolio’s total assets with respect to any one investment company and (iii) 10% of the Portfolio’s total assets in the aggregate. As a shareholder of another investment company, the Portfolio would bear, along with other shareholders, its pro rata portion of the other investment company’s expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Portfolio bears directly in connection with its own operations. Each Portfolio also may invest its uninvested cash reserves or cash it receives as collateral from borrowers of its portfolio securities in connection with the Portfolio securities lending program, in shares of one or more money market funds advised by Dreyfus. Such investments will not be subject to the limitations described above. See “Lending Portfolio Securities.”

Illiquid Securities. Each Portfolio may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Portfolio’s investment objective. These securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, repurchase agreements providing for settlement in more than seven days after notice, and certain privately negotiated, non-exchange traded options and securities used to cover such options. As to these securities, the Portfolio is subject to a risk that should the Portfolio desire to sell them when a ready buyer is not available at a price the Portfolio deems representative of their value, the value of the Portfolio’s net assets could be adversely affected.

Investment Techniques

The following information supplements and should be read in conjunction with the Fund’s Prospectus.

Foreign Currency Transactions. (Growth and Income Portfolio and Growth Portfolio only) Each of these Portfolios may enter into foreign currency transactions for a variety of purposes, including: to fix in U.S. dollars, between trade and settlement date, the value of a security the Portfolio has agreed to buy or sell; to hedge the U.S. dollar value of securities the Portfolio already owns, particularly if it expects a decrease in the value of the currency in

which the foreign security is denominated; or to gain exposure to the foreign currency in an attempt to realize gains.

Foreign currency transactions may involve, for example, the Portfolio's purchase of foreign currencies for U.S. dollars or the maintenance of short positions in foreign currencies. A short position would involve the Portfolio agreeing to exchange an amount of a currency it did not currently own for another currency at a future date in anticipation of a decline in the value of the currency sold relative to the currency the Portfolio contracted to receive. The Portfolio's success in these transactions may depend on the Advisers' ability to predict accurately the future exchange rates between foreign currencies and the U.S. dollar.

Currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors, as seen from an international perspective. Currency exchange rates also can be affected unpredictably by intervention by U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad.

Leverage. Leveraging (buying securities using borrowed money) exaggerates the effect on net asset value of any increase or decrease in the market value of a Portfolio's portfolio. These borrowings will be subject to interest costs, which may or may not be recovered by appreciation of the securities purchased; in certain cases, interest costs may exceed the return received on the securities purchased. For borrowings for investment purposes, the 1940 Act requires a Portfolio to maintain continuous asset coverage (total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed. If the required coverage should decline as a result of market fluctuations or other reasons, the Portfolio may be required to sell some of its portfolio holdings within three days to reduce the amount of its borrowings and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. The Portfolio also may be required to maintain minimum average balances in connection with such borrowing or pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

A Portfolio may enter into reverse repurchase agreements with banks, brokers/dealers other than financial institutions. This form of borrowing involves the transfer by the Portfolio of an underlying debt instrument in return for cash proceeds based on a percentage of the value of the security. The Portfolio retains the right to receive interest and principal payments on the security. At an agreed upon future date, the Portfolio repurchases the security at principal plus accrued interest. As a result of these transactions, the Portfolio is exposed to greater potential fluctuations in the value of its assets and its net asset value per share. To the extent the Portfolio enters into a reverse repurchase agreement, the Portfolio will segregate permissible liquid assets at least equal to the aggregate amount of its reverse repurchase obligations, plus accrued interest, in certain cases, in accordance with releases promulgated by the Securities and Exchange Commission. The Securities and Exchange Commission views reverse repurchase transactions as collateralized borrowings by the Portfolio. Except for these transactions, a Portfolio's borrowings generally will be unsecured.

Derivatives. Each Portfolio may invest in, or enter into, derivatives, for a variety of reasons, including to hedge certain market or interest rate risks, to provide a substitute for

purchasing or selling particular securities or to increase potential returns. Generally derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, and related indexes. Examples of derivative instruments the Portfolios may use include options contracts, futures contracts, and options on futures contracts. Derivatives may provide a cheaper, quicker or more specifically focused way for the Portfolios to invest than “traditional” securities would. The Fund’s portfolio managers may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by a Portfolio will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the Portfolio to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Portfolio can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Portfolio's performance.

If a Portfolio invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Portfolio's return or result in a loss. The Portfolio also could experience losses if its derivatives were poorly correlated with its other investments, or if the Portfolio were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency, which is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. By contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Advisers will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by a Portfolio. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Some derivatives the portfolios may use involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index). This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable. Pursuant to regulations and/or published positions of the Securities and Exchange Commission, a Portfolio may be required to segregate permissible liquid assets to cover its obligations relating to its purchase of derivatives. For example, in the case of futures contracts or forward contracts that are not contractually required to cash settle, the Portfolio must set

aside liquid assets equal to such contracts' full notional value (generally, the total numerical value of the asset underlying a future or forward contract at the time of valuation) while the positions are open. With respect to futures contracts or forward contracts that are contractually required to cash settle, however, the Portfolio is permitted to set aside liquid assets in an amount equal to the Portfolio's daily marked-to-market net obligation (i.e., the Portfolio's daily net liability) under the contracts, if any, rather than such contracts' full notional value. By setting aside assets equal to only its net obligations under cash-settled futures and forwards contracts, the Portfolio may employ leverage to a greater extent than if the Portfolio were required to segregate assets equal to the full notional value of such contracts.

Neither the Fund nor any Portfolio will be a commodity pool. The Fund has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility as a registered investment company for an exclusion from the definition of commodity pool operator and that neither the Fund nor any of the Portfolios is subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

Futures Transactions--In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date. Each Portfolio may invest on futures contracts and options on futures contracts, including, with respect to the Growth and Income Portfolio and Growth Portfolio; foreign currency futures contracts and options thereon.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is affected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the Portfolio realizes a capital gain, or if it is more, the Portfolio realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the Portfolio realizes a capital gain, or if it less, the Portfolio realizes a capital loss. Transaction costs also are included in these calculations.

A Portfolio may enter into futures contracts in U.S. domestic markets or, in the case of the Growth and Income Portfolio and Growth Portfolio, on exchanges located outside the United States. Foreign markets may offer advantages such as trading opportunities or arbitrage possibilities not available in the United States. Foreign markets, however, may have greater risk potential than domestic markets. For example, some foreign exchanges are principal markets so that no common clearing facility exists and an investor may look only to the broker for performance of the contract. In addition, any profits a Portfolio might realize in trading could be eliminated by adverse changes in the currency exchange rate, or the Portfolio could incur losses as a result of those changes. Transactions on foreign exchanges may include commodities, which are traded on domestic exchanges or those, which are not. Unlike trading on domestic commodity exchanges, trading on foreign commodity exchanges is not regulated by the Commodity Futures Trading Commission.

Engaging in these transactions involves risk of loss to a Portfolio, which could adversely affect the value of the Portfolio's net assets. Although each Portfolio intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Portfolio to substantial losses.

Successful use of futures by a Portfolio also is subject to the ability of the Advisers to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the position being hedged and the price movements of the futures contract. For example, if a Portfolio uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Portfolio will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Portfolio has insufficient cash, it may have to sell securities to meet daily variation margin requirements. A Portfolio may have to sell such securities at a time when it may be disadvantageous to do so.

Specific Futures Transactions. A Portfolio may purchase and sell stock index futures contracts. A stock index future obligates a Portfolio to pay or receive an amount of cash equal to a fixed dollar amount specified in the futures contract multiplied by the difference between the settlement price of the contract on the contract's last trading day and the value of the index based on the stock prices of the securities that comprise it at the opening of trading in such securities on the next business day.

A Portfolio may purchase and sell interest rate futures contracts. An interest rate future obligates the Portfolio to purchase or sell an amount of a specific debt security at a future date at a specific price.

The Growth and Income Portfolio and Growth Portfolio may purchase and sell currency futures. A foreign currency future obligates the Portfolio to purchase or sell an amount of a specific currency at a future date at a specific price.

Options--In General. Each Portfolio may invest up to 5% of its assets, represented by the premium paid, in the purchase of call and put options. Each Portfolio may write (i.e., sell) covered call and put option contracts to the extent of 20% of the value of its net assets at the time such option contracts are written. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by a Portfolio is a call option with respect to which the Portfolio owns the underlying security or otherwise covers the transaction by segregating

permissible liquid assets. A put option written by a Portfolio is covered when, among other things, the Portfolio segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. A Portfolio receives a premium from writing covered call or put options, which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Portfolio is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. A Portfolio may purchase and sell call and put options in respect of specific securities (or groups or "baskets" of specific securities) or stock indices listed on national securities exchanges or traded in the over-the-counter market. An option on a stock index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the stock index upon which the option is based is greater than in the case of a call, or less than in the case of a put, the exercise price of the option. Thus, the effectiveness of purchasing or writing stock index options will depend upon price movements in the level of the index rather than the price of a particular stock.

The Growth and Income Portfolio and Growth Portfolio may purchase and sell call and put options on foreign currency. These options convey the right to buy or sell the underlying currency at a price which is expected to be lower or higher than the spot price of the currency at the time the option is exercised or expires.

Successful use by a Portfolio of options will be subject to the ability of the Advisers to predict correctly movements in the prices of individual stocks or the stock market generally, interest rates or foreign currencies. To the extent such predictions are incorrect, a Portfolio may incur losses.

Future Developments. A Portfolio may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Portfolio or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Portfolio's investment objective and legally permissible for the Portfolio. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in its Prospectus or Statement of Additional Information.

Lending Portfolio Securities. Each Portfolio may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Portfolio remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities. The Portfolio also has the right to terminate a loan at any time. The Portfolio may call the loan to vote proxies if a material issue affecting the investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Portfolio's total assets (including the value of all assets received as collateral for the loan). The Portfolio will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Portfolio a loan premium fee. If the collateral consists of cash, the Portfolio will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The Portfolio may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of the total earnings of the Portfolio derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Portfolio may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by Dreyfus to be of good financial standing. In a loan transaction, the Portfolio will also bear the risk of any decline in value of securities acquired with cash collateral. A Portfolio will minimize this risk by limiting the investment of cash collateral to money market funds advised by Dreyfus, repurchase agreements or other high quality instruments with short maturities.

Forward Commitments. A Portfolio may purchase securities on a forward commitment or when-issued basis, which means that delivery and payment take place a number of days after the date of the commitment to purchase. The payment obligation and the interest rate receivable on a forward commitment or when-issued security are fixed when the Portfolio enters into the commitment, but the Portfolio does not make payment until it receives delivery from the counterparty. The Portfolio will commit to purchase such securities only with the intention of actually acquiring the securities, but the Portfolio may sell these securities before the settlement date if it is deemed advisable. The Portfolio will segregate permissible liquid assets at least equal at all times to the amount of the Portfolio's purchase commitments.

Securities purchased on a forward commitment or when-issued basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities purchased on a forward commitment or when-issued basis may expose a Portfolio to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a forward commitment or when-issued basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment or when-issued basis when a Portfolio is fully or almost fully invested may result in greater potential fluctuation in the value of the Portfolio's net assets and its net asset value per share.

Certain Investment Considerations and Risks

General. Because each Portfolio will have at any given time a different asset mix to achieve its investment objective, the risks of investing will vary depending on the Portfolio selected for investment. Before selecting a Portfolio in which to invest, the investor should assess the risks associated with the types of investments made by the Portfolio. The net asset value per share of each Portfolio should be expected to fluctuate. Investors should consider each Portfolio as a supplement to an overall investment program and should invest only if they are willing to undertake the risks involved.

Foreign Securities. (Growth and Income and Growth Portfolios only) Investing in the securities of foreign issuers, as well as instruments that provide investment exposure to foreign securities and markets, involves risks that are not typically associated with investing in U.S. dollar-denominated securities of domestic issuers. Investments in foreign issuers may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. A change in the value of such foreign currency against the U.S. dollar also will result in a change in the amount of income a Portfolio has available for distribution. Because a portion of a Portfolio's investment income may be received in foreign currencies, the Portfolio will be required to compute its income in U.S. dollars for distribution to shareholders, and therefore the Portfolio will absorb the cost of currency fluctuations. After the Portfolio has distributed income, subsequent foreign currency losses may result in the Portfolio having distributed more income in a particular fiscal period than was available from investment income, which could result in a return of capital to shareholders. In addition, if the exchange rate for the currency in which the Portfolio receives interest payments declines against the U.S. dollar before such income is distributed as dividends to shareholders, the Portfolio may have to sell portfolio securities to obtain sufficient cash to enable the Portfolio to pay such dividends. Commissions on transactions in foreign securities may be higher than those for similar transactions on domestic stock markets and foreign custodial costs are higher than domestic custodial costs. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have on occasion been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign securities markets generally are not as developed or efficient as those in the United States. Securities of some foreign issuers are less liquid and more volatile than securities of comparable U.S. issuers. Similarly, volume and liquidity in most foreign securities markets are less than in the United States and, at times, volatility of price can be greater than in the United States.

Because stock certificates and other evidences of ownership of such securities usually are held outside the United States, by investing in foreign securities the Growth and Income Portfolio and Growth Portfolio will be subject to additional risks, which include possible adverse political and economic developments, seizure or nationalization of foreign deposits or adoption of governmental restrictions which might adversely affect or restrict the payment of principal, interest and dividends on the foreign securities to investors located outside the country of the issuers, whether from currency blockage or otherwise. Moreover, foreign securities held by the Portfolio may trade on days when the Portfolio does not calculate its net asset value and thus may affect the Portfolio's net asset value on days when investors have no access to the Portfolio.

Since foreign securities often are purchased with and payable in currencies of foreign countries, the value of these assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in currency rates and exchange control regulations.

Investment Restrictions

Each Portfolio's investment objective is a fundamental policy, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Portfolio's outstanding voting securities. In addition, each Portfolio has adopted investment restrictions numbered 1 through 10 as fundamental policies. Investment restrictions numbered 11 through 16 are not fundamental policies and may be changed, as to a Portfolio, by vote of a majority of the Fund's Board members at any time. No Portfolio may:

1. Invest more than 5% of its assets in the obligations of any single issuer, except that up to 25% of the value of the Portfolio's total assets may be invested, and securities issued or guaranteed by the U.S. Government, or its agencies or instrumentalities may be purchased, without regard to any such limitation.
2. Hold more than 10% of the outstanding voting securities of any single issuer. This Investment Restriction applies only with respect to 75% of the Portfolio's total assets.
3. Invest in commodities, except that the Portfolio may purchase and sell options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.
4. Purchase, hold or deal in real estate, or oil, gas or other mineral leases or exploration or development programs, but the Portfolio may purchase and sell securities that are secured by real estate or issued by companies that invest or deal in real estate.
5. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowing to no more than 33¹/₃% of the Portfolio's total assets). For purposes of this investment restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.
6. Make loans to others, except through the purchase of debt obligations and the entry into repurchase agreements. However, the Portfolio may lend its portfolio securities in an amount not to exceed 33¹/₃% of the value of its total assets. Any loans of portfolio securities will be made according to guidelines established by the Securities and Exchange Commission and the Fund's Board of Directors.
7. Act as an underwriter of securities of other issuers, except to the extent the Portfolio may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.
8. Invest more than 25% of the value of its assets in the securities of issuers in any single industry, provided that, there shall be no limitation on the purchase of obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

9. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except to the extent the activities permitted in Investment Restriction Nos. 3, 5, 12 and 13 may be deemed to give rise to a senior security.

10. Purchase securities on margin, but the Portfolio may make margin deposits in connection with transactions in options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.

11. Invest in the securities of a company for the purpose of exercising management or control, but the Portfolio will vote the securities it owns in its portfolio as a shareholder in accordance with its views.

12. Pledge, mortgage or hypothecate its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the purchase of securities on a when-issued or forward commitment basis and the deposit of assets in escrow in connection with writing covered put and call options and collateral and initial or variation margin arrangements with respect to options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.

13. Purchase, sell or write puts, calls or combinations thereof, except as may be described in the Fund's Prospectus and this Statement of Additional Information.

14. Purchase securities of any company having less than three years' continuous operations (including operations of any predecessors) if such purchase would cause the value of the Portfolio's investments in all such companies to exceed 5% of the value of its total assets.

15. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities which are illiquid, if, in the aggregate, more than 15% of the value of the Portfolio's net assets would be so invested.

16. Purchase securities of other investment companies, except to the extent permitted under the 1940 Act.

If a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values or assets will not constitute a violation of such restriction. With respect to Investment Restriction No. 5, however, if borrowings exceed 33-1/3% of the value of the Portfolio's total assets as a result of a change in values or assets, the Portfolio must take steps to reduce such borrowings at least to the extent of such excess.

MANAGEMENT OF THE FUND

The Fund's Board is responsible for the management and supervision of each Portfolio, and approves all significant agreements with those companies that furnish services to the Portfolios. These companies are as follows:

The Dreyfus Corporation	Investment Adviser
Mellon Equity Associates	Sub-Investment Adviser
Dreyfus Service Corporation	Distributor
Dreyfus Transfer, Inc.	Transfer Agent
Mellon Bank, N.A.	Custodian

Board Members of the Fund¹

Board members of the Fund, together with information as to their positions with the Fund, principal occupations and other board memberships and affiliations, are shown below.

Name (Age) Position with Fund (Since)	Principal Occupation During Past 5 Years	Other Board Memberships and Affiliations
Joseph S. DiMartino (63) Chairman of the Board (1995)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i> Sunair Services Corporation, engaging in the design, manufacture and sale of high frequency systems for long-range voice and data communications, as well as providing certain outdoor-related services to homes and business, <i>Director</i>
Clifford L. Alexander, Jr. (73) Board Member (2003)	President of Alexander & Associates, Inc., a management consulting firm (January 1981 – present) Chairman of the Board of Moody's Corporation (October 2000 – October 2003)	Mutual of America Life Insurance Company, <i>Director</i>
Lucy Wilson Benson (79) Board Member (1994)	President of Benson and Associates, consultants to business and government (1980 - present)	The International Executive Services Corps., <i>Director Emeritus</i> Citizens Network for Foreign Affairs, <i>Vice Chairman</i> Council on Foreign Relations, <i>Member</i> Lafayette College Board of Trustees, <i>Trustee Emeritus</i> Atlantic Council of the U.S., <i>Director</i>
David W. Burke (70) Board Member (1994)	Corporate Director and Trustee	John F. Kennedy Library Foundation, <i>Director</i> U.S.S. Constitution Museum, <i>Director</i>

¹ None of the Board members are "interested persons" of the Fund, as defined in the 1940 Act.

Name (Age) Position with Fund (Since)	Principal Occupation During Past 5 Years	Other Board Memberships and Affiliations
Whitney I. Gerard (72) Board Member (1993)	Partner of Chadbourne & Parke LLP	None
George L. Perry (72) Board Member (1992)	Economist and Senior Fellow at Brookings Institution	None

Board members are elected to serve for an indefinite term. The Fund has standing audit, nominating and compensation committees, each comprised of its Board members who are not "interested persons" of the Fund, as defined in the 1940 Act. The function of the audit committee is (i) to oversee the Fund's accounting and financial reporting processes and the audits of the Fund's financial statements and (ii) to assist in the Board's oversight of the integrity of the Fund's financial statements, the Fund's compliance with legal and regulatory requirements and the independent registered public accounting firm's qualifications, independence and performance. The Fund's nominating committee is responsible for selecting and nominating persons as members of the Board for election or appointment by the Board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the committee takes into consideration various factors listed in the nominating committee charter, including character and integrity, business and professional experience, and whether the committee believes the person has the ability to apply sound and independent business judgment and would act in the interest of the Fund and its shareholders. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Fund, c/o The Dreyfus Corporation Legal Department, 200 Park Avenue, 8th Floor East, New York, New York 10166, which includes information regarding the recommended nominee as specified in the Nominating Committee Charter. The function of the compensation committee is to establish the appropriate compensation for serving on the Board. The Fund also has a standing pricing committee comprised of any one Board member. The function of the pricing committee is to assist in valuing the Portfolios' investments. During the fiscal year ended September 30, 2006, the audit committee met four times. The compensation, nominating and pricing committees did not meet during the past fiscal year.

The table below indicates the dollar range of each Board member's ownership of Portfolio shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2006.

	Joseph S. DiMartino	Clifford L. Alexander, Jr.	Lucy Wilson Benson	David W. Burke	Whitney I. Gerard	George L. Perry
Dreyfus Lifetime Portfolio, Inc.:	None	None	None	None	None	None
- Growth Portfolio	None	None	None	None	None	None
- Growth and Income Portfolio	None	None	None	None	None	None
- Income Portfolio	None	None	None	None	None	None
Aggregate Holdings of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member	Over \$100,000	Over \$100,000	Over \$100,000	Over \$100,000	Over \$100,000	None

As of December 31, 2006, none of the Board members or their immediate family members owned securities of Dreyfus, Mellon Equity, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with Dreyfus, Mellon Equity or the Distributor.

The Fund currently pays its Board members its allocated portion of an annual retainer of \$60,000 and a fee of \$7,500 per meeting (with a minimum of \$500 per meeting and per telephone meeting) attended for the Fund and fifteen other funds (comprised of 36 portfolios) in the Dreyfus Family of Funds and reimburses them for their expenses. The Chairman of the Board receives an additional 25% of such compensation. Emeritus Board members, if any, are entitled to receive an annual retainer and a per meeting attended fee of one-half the amount paid to them as Board members. The aggregate amount of compensation paid to each Board member by the Fund for the fiscal year ended September 30, 2006, and by all funds in the Dreyfus Family of Funds for which such person was a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) for the year ended December 31, 2006, was as follows:

Name of Board Member	Aggregate Compensation From the Fund*	Total Compensation From the Fund and Fund Complex Paid to Board Member(**)
Joseph S. DiMartino	\$1,264	\$857,400 (193)
Clifford L. Alexander, Jr.	\$1,025	\$199,500 (60)
Lucy Wilson Benson	\$1,025	\$116,000 (37)
David W. Burke	\$1,025	\$285,500 (81)
Whitney I. Gerard	\$1,025	\$98,000 (35)
Arthur A. Hartman***	\$1,025	\$99,500 (35)
George L. Perry	\$1,025	\$97,500 (35)

* Amount does not include the cost of office space, secretarial services and health benefits for the Chairman and expenses reimbursed to Board members for attending Board meetings, which in the aggregate amounted to \$3,997 for all Board members as a group.

** Represents the number of separate portfolios comprising the investment companies in the Fund Complex, including the Portfolios, for which the Board member serves.

*** Emeritus Board member since March 12, 2006.

Officers of the Fund

J. DAVID OFFICER, Chief Operating Officer, Vice Chairman and a director of Dreyfus, and an officer of 90 investment companies (comprised of 190 portfolios) managed by Dreyfus. He is 58 years old and has been an employee of Dreyfus since April 1, 2998.

MARK N. JACOBS, Vice President since March 2000. Executive Vice President, Secretary and General Counsel of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 60 years old and has been an employee of Dreyfus since June 1977.

JAMES WINDELS, Treasurer since November 2001. Director-Mutual Fund Accounting of Dreyfus, and an officer of the 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 48 years old and has been an employee of Dreyfus since April 1985.

MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005. Associate General Counsel of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 46 years old and has been an employee of Dreyfus since October 1991.

JAMES BITETTO, Vice President and Assistant Secretary since August 2005. Associate General Counsel and Assistant Secretary of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 40 years old and has been an employee of the Manager since December 1996.

JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. She is 51 years old and has been an employee of the Manager since October 1988.

JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005. Associate General Counsel of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 45 years old and has been an employee of Dreyfus since June 2000.

JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005. Associate General Counsel of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Dreyfus. She is 43 years old and has been an employee of Dreyfus since February 1984.

JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 43 years old and has been an employee of Dreyfus since February 1991.

ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of Dreyfus, and an officer of 91 investment companies (comprising 206 portfolios) managed by Dreyfus. He is 54 years old and has been an employee of Dreyfus since May 1986.

JEFF PRUSNOFSKY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the manager. He is 41 years old and has been an employee of Dreyfus since October 1990.

ERIK D. NAVILOFF, Assistant Treasurer since December 2002. Senior Accounting Manager Taxable Fixed Income Funds of Dreyfus and an officer of 91 investment

companies (comprised of 206 portfolios) managed by Dreyfus. He is 38 years old and has been an employee of Dreyfus since November 1992.

GAVIN C. REILLY, Assistant Treasurer since December 2005. Tax Manager of the Investment Accounting and Support Department of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 38 years old and has been an employee of Dreyfus since April 1991.

ROBERT S. ROBOL, Assistant Treasurer since August 2005. Senior Accounting Manager – Money Market Funds of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 42 years old and has been an employee of Dreyfus since October 1988.

ROBERT J. SVAGNA, Assistant Treasurer since December 2002. Senior Accounting Manager Equity Funds of Dreyfus and an officer of 91 investment companies (comprised if 206 portfolios) managed by Dreyfus. He is 39 years old and has been an employee of Dreyfus since November 1990.

JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004. Chief Compliance Officer of Dreyfus and The Dreyfus Family of Funds (91 investment companies, comprised of 206 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 49 years old and has served in various capacities with Dreyfus since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since August 2002. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 87 investment companies (comprised of 202 portfolios) managed by Dreyfus. He is 36 years old and has been an employee of the Distributor since October 1998.

The address of each Board member and officer of the Fund is 200 Park Avenue, New York, New York 10166.

The Fund's Board members and officers, as a group, owned less than 1% of each Portfolio's shares outstanding on January 5, 2007.

The following persons are known by the Fund to own of record 5% or more of the outstanding voting securities of the indicated Portfolio as of January 5, 2007:

A shareholder who beneficially owns, directly or indirectly, more than 25% of the Fund's voting securities may be deemed a "control person" (as defined in the 1940 Act) of the Fund.

MANAGEMENT ARRANGEMENTS

Investment Adviser. Dreyfus is a wholly-owned subsidiary of Mellon Financial Corporation ("Mellon"). Mellon is a global financial holding company incorporated under Pennsylvania law in 1971 and registered under the Federal Bank Holding Company Act of 1956, as amended. Mellon provides a comprehensive range of financial products and services in domestic and selected international markets.

Dreyfus supervises investment management of each Portfolio and provides investment advisory assistance and day-to-day management of each Portfolio's fixed-income investments pursuant to the Management Agreement (the "Management Agreement") between Dreyfus and the Fund. As to each Portfolio, the Management Agreement is subject to annual approval by (i) the Fund's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Portfolio's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund or Dreyfus, by vote cast in person at a meeting called for the purpose of voting on such approval. As to each Portfolio, the Management Agreement is terminable without penalty, on 60 days' notice, by the Fund's Board or by vote of the holders of a majority of such Portfolio's outstanding voting securities, or, upon not less than 90 days' notice, by Dreyfus. The Management Agreement will terminate automatically, as to the relevant Portfolio, in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of Dreyfus: Jonathan Little, Chair of the Board; Thomas F. Eggers, President, Chief Executive Officer and a director; Jonathan

Baum, Vice Chair-Distribution and a director; J. Charles Cardona, Vice Chair and a director; Diane P. Durnin, Vice Chair and a director; Phillip N. Maisano, Chief Investment Officer, Vice Chair and a director; J. David Officer, Chief Operating Officer, Vice Chair and a director; Mark N. Jacobs, Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President-Corporate Communications; Jill Gill, Vice President-Human Resources; Anthony Mayo, Vice President-Information Systems; Theodore A. Schachar, Vice President-Tax; Alex G. Sciulli, Vice President; Gary Pierce, Controller; Joseph W. Connolly, Chief Compliance Officer; James Bitetto, Assistant Secretary; and Ronald P. O'Hanley III, directors.

Dreyfus maintains office facilities on behalf of the Fund, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Fund. Dreyfus may pay the Distributor for shareholder services from Dreyfus' own assets, including past profits but not including the management fee paid by the Fund. The Distributor may use part or all of such payments to pay financial institutions (which may include banks), securities dealers and other industry professionals ("Service Agents") in respect of these services. Dreyfus also may make such advertising and promotional expenditures using its own resources, as it from time to time deems appropriate.

Sub-Investment Adviser. Mellon Equity makes asset allocation determinations for each Portfolio and provides investment advisory assistance and day-to-day management of each Portfolio's equity investments pursuant to the Sub-Investment Advisory Agreement (the "Sub-Advisory Agreement") between Mellon Equity and Dreyfus. As to each Portfolio, the Sub-Advisory Agreement is subject to annual approval by (i) the Fund's Board or (ii) vote of a majority (as defined in the 1940 Act) of such Portfolio's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund or the Advisers, by vote cast in person at a meeting called for the purpose of voting on such approval. As to each Portfolio, the Sub-Advisory Agreement is terminable without penalty, (i) by Dreyfus on 60 days' notice, (ii) by the Fund's Board or by vote of the holders of a majority of such Portfolio's outstanding voting securities on 60 days' notice, or (iii) upon not less than 90 days' notice, by Mellon Equity. The Sub-Advisory Agreement will terminate automatically, as to the relevant Portfolio, in the event of its assignment (as defined in the 1940 Act).

The following entities/persons are partners, officers and/or directors of Mellon Equity: MMIP, LLC. as General Partner (1%); Mellon Bank, N.A. as Limited Partner (99%); Ronald P. O'Hanley, Chairman and Executive Committee Member; John J. Nagorniak, Executive Committee Member; William P. Rydell, Executive Committee Member, President and Chief Executive Officer; Scott E. Wennerholm, Executive Committee Member; and Patricia K. Nichols, Executive Committee Member, Executive Vice President and Chief Operations Officer.

Portfolio Management. Mellon Equity makes asset allocation determinations for each Portfolio and provides day-to-day management of each Portfolio's equity investments, subject to the supervision of Dreyfus and the Fund's Board. The Advisers provide the Fund with portfolio managers who are authorized by the Fund's Board to execute purchases and sales of securities for each Portfolio. The Fund's primary portfolio manager is Jocelin A. Reed. The other Fund portfolio managers are Michael McNerney and Deborah Wingerson, who are employees of Dreyfus and Standish Mellon Asset management LLC ("Standish

Mellon”), an affiliate of Dreyfus and Mellon Equity. The Advisers maintain research departments with professional portfolio managers and securities analysts who provide research services for the Fund and for other funds advised by Dreyfus and Mellon Equity.

Mellon and its affiliates may have deposit, loan and commercial banking or other relationships with the issuers of securities purchased by a Portfolio. The Advisers have informed the Fund that in making investment decisions they do not obtain or use material inside information that Mellon or its affiliates may possess with respect to such issuers.

The Fund, the Advisers and the Distributor each have adopted a Code of Ethics that permits its personnel, subject to such respective Code of Ethics, to invest in securities, including securities that may be purchased or held by the Portfolios. The Advisers' Code of Ethics subjects their employees' personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Adviser. In that regard, portfolio managers and other investment personnel of the Advisers must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics, and are also subject to the oversight of Mellon's Investment Ethics Committee. Portfolio managers and other investment personnel who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

Portfolio Manager Compensation - Mellon Equity Associates. The portfolio managers' cash compensation is comprised primarily of a market-based salary and an incentive compensation plan (annual and long term incentive). The Fund's portfolio managers employed by Mellon Equity are compensated by Dreyfus or its affiliates and not by the Fund. Funding for the MEA Annual Incentive Plan and Long Term Incentive Plan is through a pre-determined fixed percentage of overall company profitability. Therefore, all bonus awards are based initially on Company performance. The investment professionals are eligible to receive annual cash bonus awards from the incentive compensation plan. Annual awards are granted in March, for the prior calendar year. Individual awards for investment professionals are discretionary, based on product performance goals established at the beginning of each calendar year and a subjective evaluation of the portfolio manager's contribution to the overall investment process. Also considered in determining individual awards are team participation and general contributions to MEA.

All portfolio managers are also eligible to participate in the MEA Long Term Incentive Plan. This plan provides for an annual award, payable in deferred cash that cliff vests after 3 years, with an interest rate equal to the average year over year earnings growth of MEA (capped at 20% per year). Management has discretion with respect to actual participation.

Portfolio managers whose compensation exceeds certain levels may elect to defer portions of their base salaries and/or incentive compensation pursuant to Mellon's elective deferred compensation plan.

Portfolio Manager Compensation - Standish Mellon. The portfolio managers' cash compensation is comprised primarily of a market-based salary and an incentive compensation plan (annual and long term incentive). The Fund's portfolio managers employed by Standish Mellon and Dreyfus are compensated by Standish Mellon and not by Dreyfus or the Fund. Funding for the Standish Mellon Annual Incentive Plan and Long Term

Incentive Plan is through a pre-determined fixed percentage of overall company profitability. Therefore, all bonus awards are based initially on Standish Mellon's performance. The portfolio managers are eligible to receive annual cash bonus awards from the incentive compensation plan. Annual awards are granted in March, for the prior calendar year. Individual awards for portfolio managers are discretionary, based on product performance relative to both benchmarks and peer comparisons and goals established at the beginning of each calendar year. Goals are to a substantial degree based on investment performance, including performance for one and three year periods. Also considered in determining individual awards are team participation and general contributions to Standish Mellon.

All portfolio managers are also eligible to participate in the Standish Mellon Long Term Incentive Plan. This Plan provides for an annual award, payable in deferred cash that cliff vests after 3 years, with an interest rate equal to the average year over year earnings growth of Standish Mellon (capped at 20% per year). Management has discretion with respect to actual participation.

Portfolio managers whose compensation exceeds certain levels may elect to defer portions of their base salaries and/or incentive compensation pursuant to Mellon's Elective Deferred Compensation Plan.

Additional Information About the Portfolio Managers. The following table lists the number and types of other accounts advised by the Fund's primary portfolio manager and assets under management in those accounts as of the end of the Fund's fiscal year:

Portfolio Manager	Registered Investment Company Accounts	Assets Managed	Pooled Accounts	Assets Managed	Other Accounts	Assets Managed
Jocelin A. Reed	6	\$1000,495,583	6	\$289,480,674	22	\$1,110,810,800

None of the funds or accounts are subject to a performance-based advisory fee.

The dollar range of Portfolio shares beneficially owned by the primary portfolio manager are as follows as of September 30, 2006:

Portfolio Manager	Portfolio Name	Dollar Range of Fund Shares Beneficially Owned
Jocelin A. Reed	None	None

Portfolio managers at Dreyfus may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of institutions such as pension funds, insurance companies and foundations), bank common trust accounts and wrap fee programs ("Other Accounts").

Potential conflicts of interest may arise because of Dreyfus' management of the Fund and Other Accounts. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Dreyfus may be perceived as causing accounts it manages to participate in an offering to increase Dreyfus' overall allocation of securities in that offering, or to increase Dreyfus' ability to participate in future offerings by the same underwriter or issuer. Allocations of

bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as Dreyfus may have an incentive to allocate securities that are expected to increase in value to preferred accounts. Initial public offerings, in particular, are frequently of very limited availability. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the Fund, that they are managing on behalf of Dreyfus. Dreyfus periodically reviews each portfolio manager's overall responsibilities to ensure that they are able to allocate the necessary time and resources to effectively manage the Fund. In addition, Dreyfus could be viewed as having a conflict of interest to the extent that Dreyfus or its affiliates and/or portfolio managers have a materially larger investment in Other Accounts than their investment in the Fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the Fund. For these or other reasons, the portfolio manager may purchase different securities for the Fund and the Other Accounts, and the performance of securities purchased for the Fund may vary from the performance of securities purchased for Other Accounts. The portfolio manager may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the Fund, which could have the potential to adversely impact the Fund, depending on market conditions.

A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in another account, such as when a purchase increases the value of securities previously purchased by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Conflicts of interest similar to those described above arise when portfolio managers are employed by a sub-investment adviser or are dual employees of Dreyfus and an affiliated entity and such portfolio managers also manage Other Accounts.

Dreyfus' goal is to provide high quality investment services to all of its clients, while meeting our fiduciary obligation to treat all clients fairly. Dreyfus has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that it believes address the conflicts associated with managing multiple accounts for multiple clients. In addition, Dreyfus monitors a variety of areas, including compliance with Fund guidelines, the allocation of IPOs, and compliance with the firm's Code of Ethics. Furthermore, senior investment and business personnel at Dreyfus periodically review the performance of Dreyfus' portfolio managers.

Expenses. All expenses incurred in the operation of the Fund are borne by the Fund, except to the extent specifically assumed by Dreyfus. The expenses borne by the Fund include: taxes, interest, loan commitment fees, interest and distributions paid on securities sold short, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Advisers or their affiliates, Securities and Exchange Commission fees, state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of maintaining the Fund's existence, costs of independent pricing services, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders, costs of

shareholders' reports and meetings, and any extraordinary expenses. In addition, each class of shares bears any class specific expenses allocated to such class, such as expenses related to the distribution and/or shareholder servicing of such class. The Investor Class shares are subject to an annual shareholder service fee. See "Shareholder Services Plan." Expenses attributable to a particular Portfolio are charged against the assets of that Portfolio; other expenses of the Fund are allocated among the Portfolios on the basis determined by the Fund's Board, including, but not limited to, proportionately in relation to the net assets of the Portfolios.

As compensation for Dreyfus' services, the Fund agreed to pay Dreyfus a monthly management fee at the annual rate of 0.60% of the value of the Income Portfolio's average daily net assets and 0.75% of the value of the average daily net assets of each of the Growth Portfolio and the Growth and Income Portfolio. For the fiscal years ended September 30, 2004, 2005 and 2006, the management fees paid by each Portfolio to Dreyfus were as follows:

<u>Portfolio</u>	<u>Management Fee Paid</u>			<u>Reduction</u>		<u>Net Fees Paid by</u>			
	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>in Fee</u>		<u>Portfolio</u>			
	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2004</u>	<u>2005</u>	<u>2006</u>
Income Portfolio	\$668,340	\$ 658,427	\$602,817	\$0	\$0	\$898	\$ 668,340	\$ 658,427	\$601,919
Growth and Income Portfolio	\$2,227,647	\$1,768,753	\$912,330	\$0	\$0	\$0	\$2,227,647	\$1,768,753	\$912,330
Growth Portfolio	\$684,117	\$ 678,235	\$446,599	\$0	\$0	\$0	\$ 684,117	\$ 678,235	\$446,599

As compensation for Mellon Equity's services for periods prior to April 19, 2007, Dreyfus agreed to pay Mellon Equity a monthly sub-advisory fee at the following annual rate: 0.35% of each Portfolio's average daily net assets up to \$600 million in Fund assets; 0.25% of the Portfolio's average daily net assets when the Fund's assets are between \$600 million and \$1.2 billion; 0.20% of the Portfolio's average daily net assets when the Fund's assets are between \$1.2 billion and \$1.8 billion; and 0.15% of the Portfolio's average daily net assets when the Fund's assets are over \$1.8 billion. For the fiscal years ended September 30, 2004, 2005 and 2006, the sub-advisory fees paid by Dreyfus to Mellon Equity were as follows:

<u>Portfolio</u>	<u>Sub-Investment Advisory Fee Paid by Dreyfus</u>		
	<u>2004</u>	<u>2005</u>	<u>2006</u>
Income Portfolio	\$390,136	\$323,541	\$185,869
Growth and Income Portfolio	\$1,040,370	\$757,138	\$316,274
Growth Portfolio	\$319,472	\$289,128	\$154,821

As compensation for Mellon Equity's service, beginning April 19, 2007, Dreyfus has agreed to pay Mellon Equity a monthly sub-advisory fee at the following annual rate: 0.28% of each Portfolio's average daily net assets up to \$600 million in Fund assets; 0.18% of the Portfolio's average daily net assets when the Fund's assets are between \$600 million and \$1.2

billion; 0.13% of the Portfolio's average daily net assets when the Fund's assets are between \$1.2 billion and \$1.8 billion; and 0.08% of the Portfolio's average daily net assets when the Fund's assets are over \$1.8 billion.

Dreyfus has agreed that if in any fiscal year the aggregate expenses of a Portfolio, exclusive of taxes, brokerage, interest on borrowings and (with the prior written consent of the necessary state securities commissions) extraordinary expenses, but including the management fee, exceed the expense limitation of any state having jurisdiction over that Portfolio, the Fund may deduct from the payment to be made to Dreyfus under the Management Agreement, or Dreyfus will bear, such excess expense to the extent required by state law. Such deduction or payment, if any, will be estimated daily, and reconciled and effected or paid, as the case may be, on a monthly basis.

The aggregate of the fees payable to Dreyfus is not subject to reduction as the value of the Portfolios' net assets increases.

Distributor. The Distributor, a wholly-owned subsidiary of Dreyfus, located at 200 Park Avenue, New York, New York 10166, serves as each Portfolio's distributor on a best efforts basis pursuant to an agreement with the Fund which is renewable annually.

The Distributor may pay Service Agents that have entered into agreements with the Distributor a fee based on the amount invested through such Service Agents in Portfolio shares by employees participating in qualified or non-qualified employee benefit plans, including pension, profit-sharing and other deferred compensation plans, whether established by corporations, partnerships, non-profit entities or state and local governments ("Retirement Plans"), or other programs. The term "Retirement Plans" does not include IRAs, IRA "Rollover Accounts" or IRAs set up under Simplified Employee Pension Plans ("SEP-IRAs"). Generally, the Distributor may pay such Service Agents a fee of up to 1% of the amount invested through the Service Agents. The Distributor, however, may pay Service Agents a higher fee and reserves the right to cease paying these fees at any time. The Distributor will pay such fees from its own funds, other than amounts received from a Portfolio, including past profits or any other source available to it. Sponsors of such Retirement Plans or the participants therein should consult their Service Agent for more information regarding any such fee payable to the Service Agent.

Dreyfus or the Distributor may provide additional cash payments out of its own resources to financial intermediaries that sell shares of the Portfolios or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees and other expenses paid by the Portfolios. These additional payments may be made to Service Agents, including affiliates that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid to Service Agents for inclusion of a Portfolio on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a Service Agent to recommend or sell shares of the Portfolio to you. Please contact your Service Agent for details about any payments they may receive in connection with the sale of Fund shares or the provision of services to the Portfolios.

From time to time, Dreyfus or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets, or

other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

Transfer and Dividend Disbursing Agent and Custodian. Dreyfus Transfer, Inc. (the "Transfer Agent"), a wholly-owned subsidiary of Dreyfus, 200 Park Avenue, New York, New York 10166, is the Fund's transfer and dividend disbursing agent. Under a transfer agency agreement with the Fund, the Transfer Agent arranges for the maintenance of shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by each Portfolio. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses.

Mellon Bank, N.A. (the "Custodian"), an affiliate of Dreyfus, One Mellon Bank Center, Pittsburgh, Pennsylvania 15258, acts as custodian of the Fund's investments. The Custodian has no part in determining the investment policies of the Portfolios or which securities are to be purchased or sold by the Portfolios. Under a custody agreement with the Fund, the Custodian holds each Portfolio's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of each Portfolio's assets held in custody and receives certain securities transaction charges.

HOW TO BUY SHARES

General. Shares of each Class are sold without a sales charge. Certain Service Agents effecting transactions in Fund shares may charge their clients direct fees in connection with such transactions. You will be charged a fee if an investment check is returned unpayable. Stock certificates are issued only upon your written request. No certificates are issued for fractional shares.

The Fund reserves the right to reject any purchase order. The Fund will not establish an account for a "foreign financial institution," as that term is defined in Department of the Treasury rules implementing section 312 of the USA PATRIOT Act of 2001. Foreign financial institutions include: foreign banks (including foreign branches of U.S. depository institutions); foreign offices of U.S. securities broker-dealers, futures commission merchants, and mutual funds; non-U.S. entities that, if they were located in the United States, would be securities broker-dealers, futures commission merchants or mutual funds; and non-U.S. entities engaged in the business of a currency dealer or exchanger or a money transmitter.

Investor Class shares are offered to any investor. Restricted Class shares are offered only to clients of Service Agents that have entered into a selling agreement with the Distributor, and omnibus accounts maintained by institutions that provide sub-accounting or recordkeeping services to their clients. Restricted Class shares also may be purchased by investors who held Restricted Class shares (formerly, Retail Class shares) in a Fund account on August 31, 1997 and who are purchasing the shares for such account. Otherwise, Restricted Class shares may not be purchased directly by individuals, although institutions may purchase Restricted Class shares for accounts maintained by individuals.

The minimum initial investment for each Class is \$2,500, or \$1,000 if you are a client of a Service Agent which maintains an omnibus account in the Fund and has made an

aggregate minimum initial purchase for its customers of \$2,500. Subsequent investment must be at least \$100. However, the minimum initial investment is \$750 for Dreyfus-sponsored Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs and rollover IRAs) and 403(b)(7) Plans with only one participant and \$500 for Dreyfus-sponsored Education Savings Account, with no minimum for subsequent purchases. The initial investment must be accompanied by the Account Application. For full-time or part-time employees of Dreyfus or any of its affiliates or subsidiaries, directors of Dreyfus, Board members of a fund advised by Dreyfus, including members of the Fund's Board, or the spouse or minor child of any of the foregoing, the minimum initial investment is \$1,000. For full-time or part-time employees of Dreyfus or any of its affiliates or subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. Fund shares are offered without regard to the minimum initial investment requirements to Board members of a fund advised by Dreyfus, including members of the Fund's Board, who elect to have all or a portion of their compensation for serving in that capacity automatically invested in a Portfolio. Portfolio shares are offered without regard to the minimum subsequent investment requirements to shareholders purchasing portfolio shares through Dreyfus Managed Assets Program or through other wrap account programs. The Fund reserves the right to offer Portfolio shares without regard to minimum purchase requirements to employees participating in certain Retirement Plans or other programs where contributions or account information can be transmitted in a manner and form acceptable to the Fund. The Fund reserves the right to vary further the initial and subsequent investment minimum requirements at any time.

Fund shares also are offered without regard to the minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan pursuant to the Dreyfus Step Program described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

Service Agents may receive different levels of compensation for selling different Classes of shares. Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this Statement of Additional Information, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. As discussed under "Management Arrangements – Distributor," Service Agents may receive revenue sharing payments from Dreyfus or the Distributor. The receipt of such payments could create an incentive for a Service Agent to recommend or sell shares of a Portfolio instead of other mutual funds where such payments are not received. Please contact your Service Agent for details about any payments they may receive in connection with the sale of Portfolio shares or the provision of services to the Portfolios.

Shares are sold on a continuous basis at the net asset value per share next determined after an order in proper form is received by the Transfer Agent or other entity authorized to receive orders on behalf of the Fund. Net asset value per share is determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time) on each day the New York Stock Exchange is open for regular business. For purposes of computing net asset value, certain futures contracts and options may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per

share of each Class is computed by dividing the value of the Portfolio's net assets represented by such Class (i.e., the value of its assets less liabilities) by the total number of Portfolio shares of such Class outstanding. For information regarding the methods employed in valuing the Portfolios' investments, see "Determination of Net Asset Value."

For certain institutions that have entered into agreements with the Distributor, payment for the purchase of Portfolio shares may be transmitted, and must be received by the Transfer Agent, within three business days after the order is placed. If such payment is not received within three business days after the order is placed, the order may be canceled and the institution could be held liable for resulting fees and/or losses.

Dreyfus TeleTransfer Privilege. You may purchase shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the share price determined on that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or made on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the share price determined on the next bank business day following such purchase order. To qualify to use the Dreyfus TeleTransfer Privilege, the initial payment for purchase of shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares--Dreyfus TeleTransfer Privilege."

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

SHAREHOLDER SERVICES PLAN (INVESTOR CLASS SHARES ONLY)

The Fund has adopted a Shareholder Services Plan pursuant to which each Portfolio pays the Distributor for the provision of certain services to holders of its Investor Class shares a fee at an annual rate of 0.25% of the value of the average daily net assets of the Portfolio's Investor Class shares. The services provided may include personal services relating to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of shareholder accounts. Under the Shareholder Services Plan, the Distributor may make payments to Service Agents in respect to these services.

A quarterly report of the amounts expended under the Shareholder Services Plan, and the purposes for which such expenditures were incurred, must be made to the Fund's Board

for its review. In addition, the Shareholder Services Plan provides that material amendments must be approved by the Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. As to each Portfolio, the Shareholder Services Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Shareholder Services Plan. The Shareholder Services Plan is terminable at any time with respect to each Portfolio by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreements entered into in connection with the Shareholder Services Plan.

For the fiscal year ended September 30, 2006, the amounts paid by Investor Class shares of each Portfolio pursuant to the Shareholder Services Plan were as follows:

<u>Portfolio</u>	<u>Amount Paid Pursuant to the Plan</u>
Income Portfolio	\$25,839
Growth and Income Portfolio	\$124,343
Growth Portfolio	\$40,551

HOW TO REDEEM SHARES

General. Each Portfolio ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the rules of the Securities and Exchange Commission. However, if you have purchased shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder®, and subsequently submit a written redemption request to the Transfer Agent, the Portfolio may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Portfolio will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder order against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Shares may not be redeemed until the Transfer Agent has received your Account Application.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you or a representative of your Service Agent, and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Fund will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt if the Transfer Agent receives a redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Stock Certificates; Signatures."

Stock Certificates; Signatures. Any certificates representing Portfolio shares to be redeemed must be submitted with the redemption request. A fee may be imposed to replace lost or stolen certificates, or certificates that were never received. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program ("STAMP") and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor, and "Signature-Guaranteed" must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians, and may accept other suitable verification arrangements from foreign investors, such as consular verification. For more information with respect to signature-guarantees, please call one of the telephone numbers listed on the cover.

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds (minimum \$500 per day) be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. See "How to Buy Shares--Dreyfus TeleTransfer Privilege."

Redemption Commitment. The Fund has committed to pay in cash all redemption requests by any shareholder of record of a Portfolio, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of the Portfolio's net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the Securities and Exchange Commission. In the case of requests for redemption in excess of such amount, the Board reserves the right to make payments in whole or in part in securities or other assets in case of an emergency or any time a cash distribution would impair the liquidity of the Portfolio to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Portfolio's investments are valued. If the recipient sells such securities, brokerage charges would be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when trading in the markets the Portfolio ordinarily utilizes is restricted, or when an emergency exists as determined by the Securities and Exchange Commission so that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods

as the Securities and Exchange Commission by order may permit to protect the Portfolio's shareholders.

SHAREHOLDER SERVICES

Fund Exchanges. You may purchase, in exchange for shares of a Portfolio, shares of the same Class of another Portfolio or shares of certain other funds managed or administered by Dreyfus or shares of certain funds advised by Founders Asset Management LLC ("Founders"), an indirect subsidiary of Dreyfus, to the extent such shares are offered for sale in your state of residence. Shares of other funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.

To accomplish an exchange under item D above, you must notify the Transfer Agent of your prior ownership of fund shares and your account number.

To request an exchange, you must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone is given to all Fund shareholders automatically, unless you check the applicable "No" box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic or online instructions (including over the Dreyfus Express® voice-response system) from any person representing himself or herself to be you, and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form are not eligible for telephone or online exchange. No fees currently are charged shareholders directly in connection with exchanges, although the Fund reserves the right, upon not less than 60 days' written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the Securities and Exchange Commission.

To establish a retirement plan by exchange, shares of the fund being exchanged must have a value of at least the minimum initial investment required for the fund into which the exchange is being made.

During times of drastic economic or market conditions, the Fund may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate components--redemption orders with a simultaneous request to purchase the other fund's shares. In such a case, the redemption request would be processed at the relevant Portfolio's next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of a Portfolio, shares of the same Class of another Portfolio, shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under "Fund Exchanges." Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by you. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction. Shares held under IRA accounts and other retirement plans are eligible for this Privilege. Exchanges of IRA shares may be made between IRA accounts and from regular accounts to IRA accounts, but not from IRA accounts to regular accounts. With respect to all other retirement accounts, exchanges may be made only among those accounts.

Fund Exchanges and Dreyfus Auto-Exchange Privilege are available to shareholders resident in any state in which shares of the fund being acquired may legally be sold. Shares may be exchanged only between accounts having certain identical identifying designations.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-645-6561, or visiting www.Dreyfus.com. The Fund reserves the right to reject any exchange request in whole or in part. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus-Automatic Asset Builder®. Dreyfus-Automatic Asset Builder permits you to purchase Portfolio shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Portfolio shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Portfolio shares (minimum of \$100 and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the Federal Government automatically deposited into your fund account.

Dreyfus Payroll Savings Plan. Dreyfus Payroll Savings Plan permits you to purchase Portfolio shares (minimum of \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH

system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer's payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Step Program. Dreyfus Step Program enables you to purchase Portfolio shares without regard to the Fund's minimum initial investment requirements through Dreyfus-Automatic Asset Builder, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan. To establish a Dreyfus Step Program account, you must supply the necessary information on the Account Application and file the required authorization form(s) with the Transfer Agent. For more information concerning this Program, or to request the necessary authorization form(s), please call toll free 1-800-782-6620. You may terminate your participation in this Program at any time by discontinuing your participation in Dreyfus-Automatic Asset Builder, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan, as the case may be, as provided under the terms of such Privilege(s). The Fund may modify or terminate this Program at any time. If you wish to purchase Portfolio shares through the Dreyfus Step Program in conjunction with a Dreyfus-sponsored retirement plan, you may do so only for IRA's, SEP IRAs and rollover IRAs.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from a Portfolio in shares of the same Class of another Portfolio, shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. Shares of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund which does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that impose a contingent deferred sales charge ("CDSC") and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from a Portfolio to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly

basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Portfolio shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. The Automatic Withdrawal Plan may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

Certain Retirement Plans, including Dreyfus-sponsored retirement plans, may permit certain participants to establish an automatic withdrawal plan from such Retirement Plans. Participants should consult their Retirement Plan sponsor and tax adviser for details. Such a withdrawal plan is different than the Automatic Withdrawal Plan.

Corporate Pension/Profit-Sharing and Retirement Plans. The Fund makes available to corporations a variety of prototype pension and profit-sharing plans, including a 401(k) Salary Reduction Plan. In addition, the Fund makes available Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs, and rollover IRAs), Education Savings Accounts and 403(b)(7) Plans. Plan support services also are available.

If you wish to purchase Portfolio shares in conjunction with a Keogh Plan, a 403(b)(7) Plan or an IRA, including an SEP-IRA, you may request from the Distributor forms for adoption of such plans.

The entity acting as custodian for Keogh Plans, 403(b)(7) Plans or IRAs may charge a fee, payment of which could require the liquidation of shares. All fees charged are described in the appropriate form.

Shares may be purchased in connection with these plans only by direct remittance to the entity acting as custodian. Purchases for these plans may not be made in advance of receipt of Portfolio.

You should read the prototype retirement plan and the appropriate form of custodial agreement for further details on eligibility, service fees and tax implications, and you should consult a tax adviser.

DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. Each Portfolio's investments are valued on the basis of market quotation or official closing prices. Each Portfolio's securities, including covered call options written by the Portfolio, are valued at the last sale price on the securities exchange or national securities market on which such securities primarily are traded. Securities listed on the NASDAQ National Market System for which market quotations are available are valued at the official closing price or, if there is no official closing price on that day, at the last sale price. Short-term investments may be carried at amortized cost, which approximates value. Securities not listed on an exchange or national securities market, or securities in which there were no transactions, are valued at the average of the most recent bid and asked prices. Bid price is used when no asked price is available. Any assets or liabilities initially expressed in terms of foreign currency will be translated into dollars at the midpoint of the New York Interbank market spot exchange rate as quoted on the day of such translation by the Federal Reserve Bank of New York or if no such rate is quoted on such date, at the exchange rate previously quoted by the Federal Reserve Bank of New York or at such other quoted market exchange rate as may be determined to be appropriate by the Advisers. Forward currency contracts will be valued at the current cost of offsetting the contract. Because of the need to obtain prices as of the close of trading on various exchanges throughout the world, the calculation of net asset value for each of the Growth and Income Portfolio and Growth Portfolio does not take place contemporaneously with the determination of prices of certain portfolio securities. Expenses and fees of each Portfolio, including the management fee paid by the Portfolio and, with respect to Investor Class shares, fees pursuant to the Fund's Shareholder Services Plan, are accrued daily and taken into account for the purpose of determining the net asset value of Portfolio shares. Because of the difference in operating expenses incurred by each Class of share of a Portfolio, the per share net asset value of each Class of shares of the Portfolio will differ.

Restricted securities, as well as securities or other assets for which recent market quotations or official closing prices are not readily available, are not valued by a pricing service approved by the Fund's Board, or are determined by the Fund not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example a foreign exchange or market) but before the Fund calculates its NAV), are valued at fair value as determined in good faith based on procedures approved by the Fund's Board. Fair value of investments may be determined by the Fund's Board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate. The factors that may be considered when fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased or sold, and public trading in similar securities of the issuer or comparable issuers. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indices of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. The valuation of a security based on fair value procedures may differ from the security's most recent closing price, and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by a Portfolio may trade on days that the Fund is not open for business, thus affecting the value of the Portfolio's assets on days when investors have no access to the Fund. Restricted securities which are, or are convertible into, securities of the same class of other securities for which a public market

exists usually will be valued at such market value less the same percentage discount at which the restricted securities were purchased. This discount will be revised periodically by the Fund's Board if it believes that it no longer reflects the value of the restricted securities. Restricted securities not of the same class as securities for which a public market exists usually will be valued initially at cost. Any subsequent adjustment from cost will be based upon considerations deemed relevant by the Fund's Board.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Management of the Fund believes that each Portfolio qualified for treatment for the fiscal year ended September 30, 2006 as a "regulated investment company" under the Internal Revenue Code of 1986, as amended (the "Code"). Each Portfolio intends to continue to so qualify if such qualification is in the best interests of its shareholders. Qualification as a regulated investment company relieves the Portfolio from any liability for Federal income tax to the extent its earnings are distributed in accordance with the applicable provisions of the Code. If a Portfolio does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

If you elect to receive dividends and distributions in cash, and your dividend or distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividend or distribution and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Any dividend or distribution paid shortly after an investor's purchase may have the effect of reducing the aggregate net asset value of your shares below the cost of the investment. Such a dividend or distribution would be a return of capital in an economic sense, although taxable as described in the Fund's Prospectus. In addition, the Code provides that if a shareholder holds shares of a Portfolio for six months or less and has received a capital gain distribution with respect to such shares, any loss incurred on the sale of such shares will be treated as long-term capital loss to the extent of the capital gain distribution received.

In general, dividends (other than capital gain dividends) paid by the Fund to U.S. individual shareholders may be eligible for the 15% preferential maximum tax rate to the extent that the Fund's income consists of dividends paid by U.S. corporations and certain foreign corporations on shares that have been held by the Fund for at least 61 days during the 121-day period commencing 60 days before the shares become ex-dividend. In order to be eligible for the preferential rate, the investor in the Fund must have held his or her shares in the Fund for at least 61 days during the 121-day commencing 60 days before the Fund shares become ex-dividend. Additional restrictions in an investor's qualification for the preferential rate may apply.

In general, dividends (other than capital gain dividends) paid to U.S. corporate shareholders by the Growth Portfolio and, to a certain extent, the Growth and Income Portfolio, may be eligible for the dividends received deduction to the extent that the Portfolio's income consists of dividends paid by U.S. corporations on shares that have been held by the Portfolio for at least 46 days during the 91-day period commencing 45 days before the shares become ex-dividend. In order to claim the dividends received deduction, the investor in the Portfolio must have held its shares in the Portfolio for at least 46 days during the 91-day period commencing 45 days before the Portfolio shares become ex-dividend. Additional restrictions on an investor's ability to claim the dividends received deduction may apply.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gains and losses. However, a portion of the gain or loss from the disposition of foreign currencies and non-U.S. dollar denominated securities (including debt instruments, certain financial forward futures and option contracts and certain preferred stock) may be treated as ordinary income or loss. In addition, all or a portion of any gain realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. Finally, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gains) may be treated as ordinary.

Gain or loss, if any, realized by a Portfolio from certain futures and forward contracts and options transactions ("Section 1256 Contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of such contracts and options as well as from closing transactions. In addition, any Section 1256 Contracts remaining unexercised at the end of the Portfolio's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Portfolio characterized in the manner described above.

Offsetting positions held by a Portfolio involving certain financial futures or forward contracts or options transactions with respect to actively traded personal property may be considered, for tax purposes, to constitute "straddles." To the extent the straddle rules apply to positions established by the Portfolio, losses realized by the Portfolio may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by the Portfolio may constitute "mixed straddles." The Portfolio may make one of more elections with respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If a Portfolio either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial position") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") respecting the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Portfolio generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Portfolio enters into the financial position or acquires the property, respectively.

Investment by the Portfolio in securities issued or acquired at a discount, or providing for deferred interest or for payment of interest in the form of additional obligations, could under special tax rules affect the amount, timing and character of distributions to shareholders by causing the Portfolio to recognize income prior to the receipt of cash payments. For example, the Portfolio could be required to accrue a portion of the discount (or deemed discount) at which the securities were issued and to distribute such income in order to maintain its qualification as a regulated investment company. In such case, the Portfolio may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy these distribution requirements.

If the Growth and Income Portfolio or Growth Portfolio invests in an entity that is classified as a "passive foreign investment company" ("PFIC") for Federal income tax purposes, the operation of certain provisions of the Code applying to PFICs could result in the imposition of certain Federal income taxes on the Portfolio. In addition, gain realized from the sale or other disposition of PFIC securities may be treated as ordinary income.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Fund could subject you to a \$50 penalty imposed by the Internal Revenue Service.

PORTFOLIO TRANSACTIONS

General. Dreyfus assumes general supervision over the placement of securities purchase and sale orders on behalf of the funds it manages. Funds managed by dual employees of the Manager and an affiliated entity, and funds with a sub-investment adviser, execute portfolio transactions through the trading desk of the affiliated entity or sub-investment adviser, as applicable (cumulatively the "Trading Desk"). Those funds use the research facilities, and are subject to the internal policies and procedures, of applicable affiliated entity or sub-investment adviser.

The Trading Desk generally has the authority to select brokers (for equity securities) or dealers (for fixed income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions is made in the best judgment of the Trading Desk and in a manner deemed fair and reasonable. In choosing brokers or dealers, the Trading Desk evaluates the ability of the broker or dealer to execute the transaction at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of a fund are selected on the basis of their professional capability and the value and quality of their services. The Trading Desk attempts to obtain best execution for the funds by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the quality and efficiency of the broker's or dealer's execution; (v) the broker's or dealer's willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counter-party risk (i.e., the broker's or dealer's financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (e.g., foreign or domestic security, large block, illiquid security). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors

will be more important than others in determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

Investment decisions for one fund or account are made independently from those for other funds or accounts managed by the portfolio managers. Under the Trading Desk's procedures, portfolio managers and their corresponding Trading Desks may seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one fund or account. In some cases, this policy may adversely affect the price paid or received by a fund or an account, or the size of the position obtained or liquidated. As noted above, certain brokers or dealers may be selected because of their ability to handle special executions such as those involving large block trades or broad distributions, provided that the primary consideration of best execution is met. Generally, when trades are aggregated, each fund or account within the block will receive the same price and commission. However, random allocations of aggregate transactions may be made to minimize custodial transaction costs. In addition, at the close of the trading day, when reasonable and practicable, the completed securities of partially filled orders will generally be allocated to each participating fund and account in the proportion that each order bears to the total of all orders (subject to rounding to "round lot" amounts and other relevant factors).

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the portfolio managers will not be deterred from changing a Fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of brokerage commissions paid is evaluated by the Trading Desk based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs, and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that a fund invests in foreign securities, certain of such fund's transactions in those securities may not benefit from the negotiated commission rates available to funds for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The portfolio managers may deem it appropriate for one fund or account they manage to sell a security while another fund or account they manage is purchasing the same security. Under such circumstances, the portfolio managers may arrange to have the purchase and sale transactions effected directly between the funds and/or accounts ("cross transactions"). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

Funds and accounts managed by the Manager, an affiliated entity or a sub-investment adviser may own significant positions in portfolio companies which, depending on market conditions, may affect adversely the ability to dispose of some or all of such positions.

For the fiscal years ended September 30, 2004, 2005 and 2006, the Portfolios paid the below total brokerage commissions, none of which was paid to the Distributor. The amounts for brokerage commissions does not include gross spreads and concessions on principal transactions which were determinable for the same period, none of which was paid to the Distributor:

<u>Portfolio</u>	<u>Brokerage Commissions Paid</u>		
	<u>2004</u>	<u>2005</u>	<u>2006</u>
Income Portfolio	\$6,151	\$4,321	\$27,578
Growth and Income Portfolio	\$328,394	\$235,504	\$110,434
Growth Portfolio	\$133,924	\$120,334	\$75,173

The above figures for brokerage commissions do not include gross spreads and concessions on principal transactions, which were determinable for the fiscal years ended September 30, 2004, 2005 amounted to zero for each Portfolio and in 2006 amounted to \$0 for Income Portfolio; \$2,340, Growth and Income Portfolio and \$1,950, Growth Portfolio.

For each Portfolio, the aggregate amount of transactions during the last fiscal year in securities effected on an agency basis through a broker for, among other things, research services, and the commissions and concessions related to such transactions were as follows:

<u>Portfolio</u>	<u>Transaction Amount</u>	<u>Commissions and Concessions</u>
Growth	\$63,885	\$26,622
Growth and Income	\$98,344	\$34,916

The Fund contemplates that, consistent with the policy of seeking best price and execution, brokerage transactions may be conducted through affiliates of the Manager. The Board has adopted procedures in conformity with Rule 17e-1 under the 1940 Act to ensure that all brokerage commissions paid to affiliates of the Manager are reasonable and fair. There were no commissions paid to affiliates of the Manager for the fiscal year ended September 30, 2006.

Soft Dollars. The term "soft dollars" is commonly understood to refer to arrangements where an investment adviser uses client (or fund) brokerage commissions to pay for research and other services to be used by the investment adviser. Section 28(e) of the Securities Exchange Act of 1934 provides a "safe harbor" that permits investment advisers to enter into soft dollar arrangements if the investment adviser determines in good faith that the amount of the commission is reasonable in relation to the value of the brokerage and research services provided. Eligible products and services under Section 28(e) include those that provide lawful and appropriate assistance to the investment adviser in the performance of its investment decision-making responsibilities.

Subject to the policy of seeking best execution, Dreyfus-managed funds may execute transactions with brokerage firms that provide research services and products, as defined in Section 28(e). Any and all research products and services received in connection with brokerage commissions will be used to assist the applicable affiliated entity or sub-investment adviser in its investment decision-making responsibilities, as contemplated under Section 28(e). Under certain conditions, higher brokerage commissions may be paid in connection with certain transactions in return for research products and services.

The products and services provided under these arrangements permit the Trading Desk to supplement its own research and analysis activities, and provide it with information from individuals and research staffs of many securities firms. Such services and products

may include, but are not limited to the following: fundamental research reports (which may discuss, among other things, the value of securities, or the advisability of investing in, purchasing or selling securities, or the availability of securities or the purchasers or sellers of securities, or issuers, industries, economic factors and trends, portfolio strategy and performance); current market data and news; technical and portfolio analyses; economic forecasting and interest rate projections; and historical information on securities and companies. The Trading Desk also may defray the costs of certain services and communication systems that facilitate trade execution (such as on-line quotation systems, direct data feeds from stock exchanges and on-line trading systems with brokerage commissions generated by client transactions) or functions related thereto (such as clearance and settlement). Some of the research products or services received by the Trading Desk may have both a research function and a non-research administrative function (a "mixed use"). If the Trading Desk determines that any research product or service has a mixed use, the Trading Desk will allocate in good faith the cost of such service or product accordingly. The portion of the product or service that the Trading Desk determines will assist it in the investment decision-making process may be paid for in soft dollars. The non-research portion is paid for by the Trading Desk in hard dollars.

The Trading Desk generally considers the amount and nature of research, execution and other services provided by brokerage firms, as well as the extent to which such services are relied on, and attempts to allocate a portion of the brokerage business of its clients on the basis of that consideration. Neither the services nor the amount of brokerage given to a particular brokerage firm are made pursuant to any agreement or commitment with any of the selected firms that would bind the Trading Desk to compensate the selected brokerage firm for research provided. The Trading Desk endeavors, but is not legally obligated, to direct sufficient commissions to broker/dealers that have provided it with research and other services to ensure continued receipt of research the Trading Desk believes is useful. Actual commissions received by a brokerage firm may be more or less than the suggested allocations.

There may be no correlation between the amount of brokerage commissions generated by a particular fund or client and the indirect benefits received by that fund or client. The affiliated entity or sub-investment adviser may receive a benefit from the research services and products that is not passed on to a fund in the form of a direct monetary benefit. Further, research services and products may be useful to the affiliated entity or sub-investment adviser in providing investment advice to any of the funds or clients it advises. Likewise, information made available to the affiliated entity or sub-investment adviser from brokerage firms effecting securities transactions for a fund may be utilized on behalf of another fund or client. Information so received is in addition to, and not in lieu of, services required to be performed by the affiliated entity or sub-investment adviser and fees are not reduced as a consequence of the receipt of such supplemental information. Although the receipt of such research services does not reduce the normal independent research activities of the affiliated entity or sub-investment adviser, it enables them to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff.

There were no transactions conducted on an agency basis through a broker, for among other things, research services for the fiscal year ended September 30, 2006.

Regular Broker-Dealers. A Portfolio may purchase securities issued by one or more of its "regular brokers or dealers," as defined in Rule 10b-1 under the 1940 Act. Rule 10b-1

provides that a “regular broker or dealer” is one of the ten brokers or dealers that, during the Portfolio’s most recent fiscal year (i) received the greatest dollar amount of brokerage commissions from participating, either directly or indirectly, in the Portfolio’s portfolio transactions, (ii) engaged as principal in the largest dollar amount of the Portfolio’s portfolio transactions or (iii) sold the largest dollar amount of the Portfolio’s securities. The following is a list of each Portfolio that acquired securities of its regular brokers or dealers for the fiscal year ended September 30, 2006, the issuer of the securities and the aggregate value per issuer, as of September 30, 2006, of such securities:

Fund	Name of Regular Broker Dealer	Aggregate Value Per Issuer
Income Portfolio	Bear Stearns & Co.	\$122,000
	Deutsche Bank Securities Inc.	\$94,000
Growth and Income	Deutsche Bank Securities Inc.	\$45,000
	Bank of America Securities LLC	\$1,173,000
	Citigroup Global Markets Inc.	\$710,000
	Goldman Sachs & Co.	\$508,000
	Deutsche Bank Securities Inc.	\$459,000
	J.P. Morgan Chase & Co.	\$423,000
	Bear Stearns & Co.	\$308,000
Growth	Bank of America Securities LLC	\$1,023,000
	Citigroup Global Markets Inc.	\$616,000
	Goldman Sachs & Co.	\$457,000
	Deutsche Bank Securities Inc.	\$386,000
	J.P. Morgan Chase & Co.	\$277,000
	Bear Stearns & Co.	\$266,000

Disclosure of Portfolio Holdings. It is the policy of the Fund to protect the confidentiality of its portfolio holdings and prevent the selective disclosure of non-public information about such holdings. The Fund will publicly disclose its holdings in accordance with regulatory requirements, such as periodic portfolio disclosure in filings with the Securities and Exchange Commission. The Fund will publicly disclose its complete schedule of portfolio holdings, as reported on a month-end basis, on its website at www.dreyfus.com. The information will be posted with a one-month lag and will remain accessible until the Fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the Fund will publicly disclose on the website its complete schedule of portfolio holdings as of the end of such quarter.

If portfolio holdings are released pursuant to an ongoing arrangement with any party, the Fund must have a legitimate business purpose for doing so, and neither the Fund, nor Dreyfus or its affiliates, may receive any compensation in connection with an arrangement to make available information about the Fund’s portfolio holdings. The Fund may distribute portfolio holdings to mutual fund evaluation services such as Standard & Poor’s, Morningstar or Lipper Analytical Services; due diligence departments of broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds before their public disclosure; and broker-dealers that may be used by the Fund, for the purpose of efficient trading and receipt of relevant research, provided that: (a) the recipient does not distribute the

portfolio holdings to persons who are likely to use the information for purposes of purchases or selling Fund shares or Fund portfolio holdings before the portfolio holdings become public information; and (b) the recipient signs a written confidentiality agreement.

The Fund may also disclose any and all portfolio information to its service providers and others who generally need access to such information in the performance of their contractual duties and responsibilities and are subject to duties of confidentiality, including a duty not to trade on non-public information, imposed by law and/or contract. These service providers include the Fund's custodian, auditors, investment adviser, administrator, and each of their respective affiliates and advisers.

Disclosure of the Fund's portfolio holdings may be authorized only by the Fund's Chief Compliance Officer, and any exceptions to this policy are reported quarterly to the Fund's Board.

SUMMARY OF THE PROXY VOTING POLICY, PROCEDURES AND GUIDELINES OF THE DREYFUS FAMILY OF FUNDS

The Board of each fund in the Dreyfus Family of Funds has delegated to Dreyfus the authority to vote proxies of companies held in the fund's portfolio. Dreyfus, through its participation on the Mellon Proxy Policy Committee (the "MPPC") applies Mellon's Proxy Voting Policy, related procedures, and voting guidelines when voting proxies on behalf of the funds.

Dreyfus recognizes that an investment adviser is a fiduciary that owes its clients, including funds it manages, a duty of utmost good faith and full and fair disclosure of all material facts. An investment's adviser's duty of loyalty requires an adviser to vote proxies in a manner consistent with the best interest of its clients and precludes the adviser from subrogating the clients' interests to its own. In addition, an investment adviser voting proxies on behalf of a fund must do so in a manner consistent with the best interests of the fund and its shareholders.

Dreyfus seeks to avoid material conflicts of interest by participating in the MPPC, which applies detailed, pre-determined written proxy voting guidelines (the "Voting Guidelines") in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, the MPPC engages a third party as an independent fiduciary to vote all proxies of funds managed by Mellon or its affiliates (including the Dreyfus Family of Funds), and may engage an independent fiduciary to vote proxies of other issuers at its discretion.

All proxies received by the funds are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. The guidelines are reviewed periodically and updated and necessary to reflect new issues and any changes in Mellon's or Dreyfus' policies on specific issues. Items that can be categorized under the Voting Guidelines are voted in accordance with any applicable guidelines or referred to the MPPC, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines are referred to the MPPC for discussion and vote. Additionally, the MPPC reviews proposals where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, the MPPC weighs the cost of voting and potential inability to sell the securities (which may occur during the voting process) against

the benefit of voting proxies to determine whether or not to vote. With respect to securities lending transactions, the MPPC seeks to balance the economic benefits of continuing to participate in an open securities lending transaction against the inability to vote proxies.

When evaluating proposals, the MPPC recognizes that the management of a publicly held company may need protection from the market's frequent focus on short-term considerations, so as to be able to concentrate on such long-term goals as productivity and development of competitive products and services. In addition, the MPPC generally supports proposals designed to provide management with a short-term insulation from outside influences so as to enable them to bargain effectively with potential suitors to the extent such proposals are discrete and not bundled with other proposals. The MPPC believes that a shareholder's role in the governance of a publicly-held company is generally limited to monitoring the performance of the company and its management and voting on matters, which properly come to a shareholder vote. However, the MPPC generally opposes proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. Accordingly, the MPPC generally votes in accordance with management on issues that the MPPC believes neither unduly limit the rights and privileges of shareholders nor adversely affect the value of the investment.

On questions of social responsibility where economic performance does not appear to be an issue, the MPPC attempts to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the particular social issues, including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The MPPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take actions on issues.

In evaluating proposals regarding incentive plans and restricted stock plans, the MPPC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the MPPC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The MPPC generally voted against proposals that permit or are silent on the repricing or replacement of stock options without shareholder approval.

Information regarding how Dreyfus voted proxies for the Fund is available on the Dreyfus Family of Funds' website at <http://www.dreyfus.com> and on the Securities and Exchange Commission's website at <http://www.sec.gov> on the Fund's Form N-PX filed with the Securities and Exchange Commission.

INFORMATION ABOUT THE FUND AND PORTFOLIOS

Each Portfolio share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and non-assessable. Portfolio shares are of one class and have equal rights as to dividends and in liquidation. Shares have no preemptive or subscription rights and are freely transferable.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Fund to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the

Fund to hold a special meeting of shareholders for purposes of removing a Board member from office. Shareholders may remove a Board member by the affirmative vote of a majority of the Fund's outstanding voting shares. In addition, the Fund's Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders. The Fund is a "series fund," which is a mutual fund divided into separate portfolios, each of which is treated as a separate entity for certain matters under the 1940 Act and for other purposes. A shareholder of one Portfolio is not deemed to be a shareholder of any other Portfolio. For certain matters shareholders vote together as a group; as to others they vote separately by Portfolio.

To date, the Board has authorized the creation of three series of shares. All consideration received by the Fund for shares of one of the Portfolios and all assets in which such consideration is invested will belong to that Portfolio (subject only to the rights of creditors of the Fund) and will be subject to the liabilities related thereto. The assets attributable to, and the expenses of, one Portfolio (and as to classes within a Portfolio) are treated separately from those of the other Portfolios (and classes). The Fund has the ability to create, from time to time, new portfolios of shares without shareholder approval.

Rule 18f-2 under the 1940 Act provides that any matter required to be submitted under the provisions of the 1940 Act or applicable state law or otherwise to the holders of the outstanding voting securities of an investment company, such as the Fund, will not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each Portfolio affected by such matter. Rule 18f-2 further provides that a Portfolio shall be deemed to be affected by a matter unless it is clear that the interests of each Portfolio in the matter are identical or that the matter does not affect any interest of such Portfolio. The Rule exempts the selection of independent accountants and the election of Directors from the separate voting requirements of the rule.

The Fund sends annual and semi-annual financial statements to all its shareholders.

Each Portfolio is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing shares of other funds in the Dreyfus Family of Funds. Accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive or abusive trading. In addition, the Fund with respect to each portfolio may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Portfolio would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Portfolio receives or anticipates receiving simultaneous orders that may significantly affect the Portfolio. If an exchange request is refused, the Fund will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Fund will take reasonable steps to prevent excessive short term trading deemed to be harmful to the Fund, it may be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Fund, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Fund's Prospectus.

Ernst & Young LLP, 5 Times Square, New York, New York 10036, an independent registered public accounting firm, have been selected as the independent registered public accounting firm for the Fund.

APPENDIX A

Rating Categories

Description of certain ratings assigned by Standard & Poor's Ratings Services ("S&P"), Moody's Investors Service ("Moody's"), Fitch Ratings ("Fitch") and Thompson Financial BankWatch ("BankWatch"):

S&P

Long-term

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial

commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A subordinated debt or preferred stock obligation rated 'C' is currently highly vulnerable to nonpayment. The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action taken, but payments on this obligation are being continued. A 'C' also will be assigned to a preferred stock issue in arrears on dividends or sinking fund payments, but that is currently paying.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

r

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

N.R.

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.

Short-term

A-1

A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are given a plus sign (+) designation. This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B

A short-term obligation rated 'B' is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C

A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Moody's

Long-term

Aaa

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

A

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for

the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B

Bonds rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa

Bonds rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca

Bonds rated 'Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C

Bonds rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated **Prime-3** (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Fitch

Long-term investment grade

AAA

Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA

Very high credit quality. 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. 'BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Long-term speculative grade

BB

Speculative. 'BB' ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B

Highly speculative. 'B' ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. 'CC' ratings indicate that default of some kind appears probable. 'C' ratings signal imminent default.

DDD, DD, D

Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. 'DDD' obligations have the highest potential for recovery, around 90% - 100% of outstanding amounts and accrued interest. 'DD' ratings indicate potential recoveries in the range of 50% - 90% and 'D' the lowest recovery potential, i.e., below 50%.

Entities rated in this category have defaulted on some or all of their obligations. Entities rated 'DDD' have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated 'DD' and 'D' are generally undergoing a formal reorganization or liquidation process; those rated 'DD' are likely to satisfy a higher portion of their outstanding obligations, while entities rated 'D' have a poor prospect of repaying all obligations.

Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F2

Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

F3

Fair credit quality. The capacity for timely payment of financial commitment is adequate; however, near-term adverse changes could result in a reduction non-investment grade.

B

Speculative. Minimal capacity for timely payment of financial commitments plus vulnerability to near-term adverse changes in financial and economic conditions.

C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D

Default. Denotes actual or imminent payment default.

'**NR**' indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' long-term rating category, to categories below 'CCC', or to short-term ratings other than 'F1.'

BankWatch

(obligations of financial institutions)

Long-term investment grade

AAA

A rating of 'AAA' indicates that the ability to repay principal and interest on a timely basis is extremely high.

AA

A rating of 'AA' indicates a very strong ability to repay principal and interest on a timely basis, with limited incremental risk compared to issues rated in the highest category.

A

A rating of 'A' indicates the ability to repay principal and interest is strong. Issues rated 'A' could be more vulnerable to adverse developments (both internal and external) than obligations with higher ratings.

BBB

The rating of 'BBB' is the lowest investment grade category. This rating indicates an acceptable capacity to repay principal and interest. 'BBB' issues are more vulnerable to adverse developments (both internal and external) than obligations with higher ratings.

Short-term

TBW-1

'TBW-1' is the highest category and indicates a very high likelihood that principal and interest will be paid on a timely basis.

TBW-2

'TBW-2' is the second-highest category. While the degree of safety for these issues regarding timely repayment of principal and interest is strong, the relative degree of safety is not as high as for issues rated 'TBW-1.'

TBW-3

'TBW' is the lowest investment grade category and indicates that while the obligation is more susceptible to adverse developments (both internal and external) than those with higher ratings, the capacity to service principal and interest in a timely fashion is considered adequate.

TBW-4

'TBW-4' is the lowest rating category. This rating is regarded as non-investment grade and therefore speculative.
