ASSOCIATED ESTATES REALTY CORPORATION

3rd QUARTER EARNINGS

- (1) The Company defines FFO as the inclusion of all operating results, both recurring and non-recurring, except those results defined as "extraordinary items" under generally accepted accounting principles (GAAP), adjusted for depreciation on real estate assets and amortization of intangible assets, gains on insurance recoveries and gains and losses from the disposition of properties and land. FFO does not represent cash generated from operating activities in accordance with GAAP and is not necessarily indicative of cash available to fund cash needs and should not be considered an alternative to net income as an indicator of the Company's operating performance or as an alternative to cash flow as a measure of liquidity. The Company generally considers FFO to be a useful measure for reviewing the comparative operating and financial performance of the Company because FFO can help one compare the operating performance of a company's real estate between periods or as compared to different REITs. It should be noted, however, that certain other real estate companies may define FFO in a different manner.
- (2) The Company defines FFO as adjusted as FFO, as defined above, plus the add back of defeasance and other prepayment costs/credits of \$(563,000) and \$2.0 million for the nine months ended September 30, 2009 and 2008, respectively. In accordance with GAAP, these prepayment costs/credits are included as interest expense in the Company's Consolidated Statement of Operations. The Company is providing this calculation as an alternative FFO calculation as it considers it a more appropriate measure of comparing the operating performance of a company's real estate between periods or as compared to different REITs.
- (3) The Company defines FAD as FFO as adjusted, as defined above, plus depreciation other and amortization of deferred financing fees less recurring fixed asset additions. Fixed asset additions exclude development, investment, revenue enhancing and non-recurring capital additions. The Company considers FAD to be an appropriate supplemental measure of the performance of an equity REIT because, like FFO and FFO as adjusted, it captures real estate performance by excluding gains or losses from the disposition of properties and land and depreciation on real estate assets and amortization of intangible assets. Unlike FFO and FFO as adjusted, FAD also reflects that recurring capital expenditures are necessary to maintain the associated real estate.
