## Note to Investors

---

The fund closed to new investors on June 30, 2000. Shareholders of the fund on that date may continue to buy shares in accounts existing on that date. Investors who did not own shares of the fund on June 30, 2000, generally will not be allowed to buy shares of the fund except that new accounts may be established by participants in most group employer retirement plans (and their successor plans) if the fund has been established as an investment option under the plans (or under another plan sponsored by the same employer). Shareholders whose accounts were closed before or after June 30, 2000 may be prohibited from reactivating their account or opening a new account. These restrictions generally will apply to investments made directly with Dreyfus and investments made through intermediaries. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted.

# The Fund

## GOAL/APPROACH

The fund seeks capital growth. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of companies Dreyfus believes to be emerging leaders: small companies characterized by new or innovative products, services or processes having the potential to enhance earnings or revenue growth. The fund currently considers small companies to be those companies with market capitalizations that fall within the range of the Russell 2000 Index at the time of purchase. As of October 31, 2005, market capitalization range of the index was between \$37 million and \$4 billion. Because the fund may continue to hold a security whose market capitalization grows, a substantial portion of the fund's holdings can have market capitalizations in excess of the index at any time. The fund's investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings. The fund may invest up to 25% of its assets in foreign securities.

The portfolio managers construct the portfolio through a "bottom-up," structured approach, focusing on stock selection as opposed to making proactive decisions as to industry or sector exposure. The fund generally attempts to have a neutral exposure to industries and capitalizations relative to its benchmark. Finally, within each sector and style subset, the fund overweights the most attractive stocks and underweights or zero weights the stocks that have been ranked least attractive. The investment process is driven by computer models that identify and rank stocks based on:

- **fundamental momentum**, meaning measures that reflect the changes in short-term earnings outlook through factors such as revised earnings estimates and earnings surprises
- **relative value**, such as current and forecasted price-to-earnings ratios, price-to-book ratios, yields and other price-sensitive data for a stock compared to its past, its peers and the models' overall stock universe

- **long-term growth**, based on measure that reflect the changes in estimated long-term earnings growth over multiple horizons
- **additional factors**, such as technical factors, trading by company insiders or share issuance/buy-back data

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

## Concepts to understand

**Small companies:** new, often entrepreneurial companies. Small companies can, if successful, grow faster than large-cap companies and typically use profits for expansion rather than for paying dividends. Their share prices are more volatile than those of larger companies. Small companies fail more often.

**Growth companies:** companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

**Value companies:** companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

## MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Smaller company risk.* Small companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.

- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's performance from year to year. The table compares the fund's average annual total returns to those of the Russell 2000 Index, an unmanaged index of small-cap stock performance. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

**Best Quarter:** Q4 '98 **+24.00%**

**Worst Quarter:** Q3 '02 **-21.04%**

The fund's year-to-date total return as of 9/30/05 was 6.04%.

Average annual total returns as of 12/31/04

	1 Year	5 Years	Since inception (9/29/95)
<b>Fund</b> <i>returns before taxes</i>	<b>14.23%</b>	<b>4.64%</b>	<b>17.09%</b>
<b>Fund</b> <i>returns after taxes on distributions</i>	<b>14.23%</b>	<b>4.47%</b>	<b>16.16%</b>
<b>Fund</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>9.25%</b>	<b>3.93%</b>	<b>14.84%</b>
<b>Russell 2000 Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>18.33%</b>	<b>6.61%</b>	<b>9.78%*</b>

\* For comparative purposes, the value of the index on 9/30/95 is used as the beginning value on 9/29/95.

## What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Shareholder transaction fees are paid from your account. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees.

### Fee table

<b>Shareholder transaction fees</b>	
<i>% of transaction amount</i>	
Maximum redemption fee	<b>1.00%</b>
<i>charged only when selling shares you have owned for less than 30 days</i>	
<b>Annual fund operating expenses</b>	
<i>% of average daily net assets</i>	
Management fees	0.90%
Shareholder services fee	0.25%
Other expenses	0.18%
<b>Total</b>	<b>1.33%</b>

### Expense example

1 Year	3 Years	5 Years	10 Years
<b>\$135</b>	<b>\$421</b>	<b>\$729</b>	<b>\$1,601</b>

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

- Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.
- Shareholder services fee:** the fee paid to the fund's distributor for shareholder account service and maintenance.
- Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

### Investor adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.90% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Investment decisions for the fund are made by a committee of portfolio managers that comprise the Smallcap Team of Franklin Portfolio Associates, LLC, an affiliate of Dreyfus. Each of whom also is an employee of Dreyfus and will manage the fund in that capacity. The team members are John S. Cone, Oliver Buckley, Langton C. Garvin and Kristin Crawford. Mr. Cone is chief executive officer, president and a senior portfolio manager of Franklin Portfolio Associates, where he has been employed since its inception in 1982. Mr. Buckley is a senior vice president and senior portfolio manager of Franklin Portfolio Associates, which he joined in 2000. Mr. Garvin is a senior vice president and senior portfolio manager of Franklin Portfolio Associates, which he joined in 2004; prior thereto, he was a portfolio manager with Batterymarch Financial Management. Ms. Crawford is a vice president and portfolio manager of Franklin Portfolio Associates, which she joined in 2000. There are no limitations on the role of a committee member with respect to making investment decisions for the fund. The Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

This table describes the fund's performance for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distribu-

tions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

	<i>Year Ended August 31,</i>				
	<b>2005</b>	2004	2003	2002	2001

# Your Investment

## ACCOUNT POLICIES

---

### Buying shares

**The fund is currently closed to new investors.** Existing shareholders pay no sales charges to invest in this fund. Your price for fund shares is the fund's net asset value per share (NAV), which is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund. Foreign securities held by the fund may trade on days that the fund is not open for business, thus affecting the value of the fund's assets on days when fund shareholders may not be able to buy or sell fund shares.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

### Third-party investments

If you invest through a third party (rather than directly with Dreyfus), the policies and fees may be different than those described herein. Banks, brokers, 401(k) plans, financial advisers and financial supermarkets may charge transaction fees and may set different minimum investments or limitations on buying or selling shares. Consult a representative of your plan or financial institution for further information.

The fund closed to new investors on June 30, 2000. Shareholders of the fund on that date may continue to buy shares in accounts existing on that date. Investors who did not own shares of the fund on June 30, 2000, generally will not be allowed to buy shares of the fund except that new accounts may be established by participants in most group employer retirement plans (and their successor plans) if the fund has been established as an investment option under the plans (or under another plan sponsored by the same employer). Shareholders whose accounts were closed before or after June 30, 2000 may be prohibited from reactivating their account or opening a new account. These restrictions generally will apply to investments made directly with Dreyfus and investments made through intermediaries. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted.

Minimum investments		
	Initial	Additional
Regular accounts	\$2,500	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum after the first year
Dreyfus automatic investment plans	\$100	\$100

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

- Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

If you are selling or exchanging shares you have owned for less than 30 days, the fund may deduct a 1% redemption fee (not charged on shares sold through the Automatic Withdrawal Plan or Dreyfus Auto-Exchange Privilege, or on shares acquired through dividend reinvestment).

### Limitations on selling shares by phone or online through Dreyfus.com

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

\* Not available online on accounts whose address has been changed within the last 30 days.

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/ Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

Although these policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

#### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains are taxable to you as qualified dividends and capital gains.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

---

### Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application or by calling 1-800-645-6561.

---

#### For investing

**Dreyfus Automatic Asset Builder®** For making automatic investments from a designated bank account.

**Dreyfus Payroll Savings Plan** For making automatic investments through a payroll deduction.

**Dreyfus Government Direct Deposit Privilege** For making automatic investments from your federal employment, Social Security or other regular federal government check.

**Dreyfus Dividend Sweep** For automatically reinvesting the dividends and distributions from one Dreyfus fund into another (not available for IRAs).

#### For exchanging shares

**Dreyfus Auto-Exchange Privilege** For making regular exchanges from one Dreyfus fund into another.

#### For selling shares

**Dreyfus Automatic Withdrawal Plan** For making regular withdrawals from most Dreyfus funds.

### Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one Dreyfus fund into another. You can request your exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has one.

### Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application.

### Dreyfus Express® voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, purchase fund shares, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling 1-800-645-6561. Certain requests may require the services of a representative.

### Dreyfus Financial Centers

Through a nationwide network of Dreyfus Financial Centers, Dreyfus offers a full array of investment services and products. This includes information on mutual funds, brokerage services, tax-advantaged products and retirement planning.

Experienced financial consultants can help you make informed choices and provide you with personalized attention in handling account transactions. The Financial Centers also offer informative seminars and events. To find the Financial Center nearest you, call **1-800-499-3327**.

### Retirement plans

Dreyfus offers a variety of retirement plans, including traditional and Roth IRAs, and Education Savings Accounts. Here's where you call for information:

- for traditional, rollover and Roth IRAs, and Education Savings Accounts, call **1-800-645-6561**
- for SEP-IRAs, Keogh accounts, 401(k) and 403(b) accounts, call **1-800-358-0910**

## INSTRUCTIONS FOR REGULAR ACCOUNTS

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
The Dreyfus Family of Funds  
P.O. Box 55299, Boston, MA 02205-8553

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
The Dreyfus Family of Funds  
P.O. Box 105, Newark, NJ 07101-0105

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55263, Boston, MA 02205-8501

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279664
- the fund name
- your account number
- name(s) of investor(s)

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279664
- the fund name
- your account number
- name(s) of investor(s)

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be sent to your bank by electronic check.

**Check** Call us to request your transaction. A check will be sent to the address of record.

## Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

To reach Dreyfus, call toll free in the U.S.

**1-800-645-6561**

Outside the U.S. 516-794-5452

Make checks payable to:

**The Dreyfus Family of Funds**

You also can deliver requests to any Dreyfus Financial Center. Because processing time may vary, please ask the representative when your account will be credited or debited.

INSTRUCTIONS FOR **REGULAR ACCOUNTS** (continued)

## TO OPEN AN ACCOUNT

- Online ([www.dreyfus.com](http://www.dreyfus.com))

## TO ADD TO AN ACCOUNT

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction.

TO SELL SHARES

**Wire** Visit **www.dreyfus.com** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Visit **www.dreyfus.com** to request your transaction. A check will be sent to the address of record.

- Automatically

**With an initial investment** Indicate on your application which automatic service(s) you want. Return your application with your investment.

**Without any initial investment** Check the Dreyfus Step Program option on your application. Return your application, then complete the additional materials when they are sent to you.

**All services** Call us to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials.

**Dreyfus Automatic Withdrawal Plan** Call us to request a form to add the plan. Complete the form, specifying the amount and frequency of withdrawals you would like.

Be sure to maintain an account balance of \$5,000 or more.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail in the slip and the check (see "To Open an Account" at left).

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number
- the fund name
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail in your request (see "To Open an Account" at left).

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279664
- the fund name
- your account number
- name of investor
- the contribution year

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Telephone Contribution** Call to request us to move money from a regular Dreyfus account to an IRA (both accounts must be held in the same shareholder name).

#### Automatically

**Without any initial investment** Call us to request a Dreyfus Step Program form. Complete and return the form along with your application.

**All services** Call us to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials.

All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

## Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

To reach Dreyfus, call toll free in the U.S.

**1-800-645-6561**

Outside the U.S. 516-794-5452

Make checks payable to:

**The Dreyfus Trust Company, Custodian**

You also can deliver requests to any Dreyfus Financial Center. Because processing time may vary, please ask the representative when your account will be credited or debited.

# For More Information

## **Dreyfus Emerging Leaders Fund**

A series of Dreyfus Growth and Value Funds, Inc.

SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

### **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's managers discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

### **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

### **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

## Note to Investors

---

The fund closed to new investors on January 4, 2002. Shareholders of the fund on that date may continue to buy shares in accounts existing on that date. Investors who did not own shares of the fund on January 4, 2002, generally will not be allowed to buy shares of the fund except that new accounts may be established by participants in most group employer retirement plans (and their successor plans) if the fund has been established as an investment option under the plans (or under another plan sponsored by the same employer). Shareholders whose accounts were closed before or after January 4, 2002 may be prohibited from reactivating their account or opening a new account. These restrictions generally will apply to investments made directly with Dreyfus and investments made through intermediaries. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted.

# The Fund

## GOAL/APPROACH

The fund seeks to surpass the performance of the Russell Midcap Value Index. To pursue this goal, the fund normally invests at least 80% of its assets in midcap stocks with market capitalizations between \$1 billion and \$25 billion at the time of purchase. Because the fund may continue to hold a security whose market capitalization grows, a substantial portion of the fund's holdings can have market capitalizations in excess of \$25 billion at any given time. The fund's stock investments may include common stocks, preferred stocks and convertible securities of both U.S. and foreign issuers, including those purchased in initial public offerings. The fund may invest up to 15% of its assets in foreign securities.

The portfolio manager identifies potential investments through extensive quantitative and fundamental research. The fund will focus on individual stock selection (a "bottom-up" approach), emphasizing three key factors:

- **relative value**, or how a stock is valued relative to its intrinsic worth based on traditional value measures. Estimates of fair values are based on comparisons to industry averages or historic norms rather than solely on an average of the overall market
- **business health**, or overall efficiency and profitability as measured by return on assets and return on equity
- **business momentum**, or the presence of a catalyst (such as a corporate restructuring, change in management or spin-off) that will trigger a price increase near term to midterm

The fund typically sells a stock when it is no longer considered a value company, appears less likely to benefit from the current market and economic environment, shows deteriorating fundamentals or declining momentum, or falls short of the manager's expectations.

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

## Concepts to understand

**Midcap companies:** established companies that may not be well known. Midcap companies may lack the resources to weather economic shifts, though they can be faster to innovate than large companies.

**Relative value:** the identification of stocks trading inexpensively relative to a sector or peer group based on certain financial measurements such as price-to-earnings or price-to-book ratios. Using a relative valuation approach may mean investing in securities and industries traditionally thought to be growth-oriented.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Small and midsize company risk.* Small and midsize companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Value stock risk.* Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued. Securities selected based on relative value investment process may be more volatile than a traditional value approach.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged.

- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's performance from year to year. The table compares the fund's average annual total returns to those of the Russell Midcap Value Index, a broad measure of midcap value stock performance. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

**Best Quarter:** Q4 '01 +29.48%

**Worst Quarter:** Q3 '98 -27.65%

The fund's year-to-date total return as of 9/30/05 was 4.69%.

Average annual total returns as of 12/31/04

	1 Year	5 Years	Since inception (9/29/95)
<b>Fund</b> <i>returns before taxes</i>	<b>17.53%</b>	<b>13.00%</b>	<b>17.12%</b>
<b>Fund</b> <i>returns after taxes on distributions</i>	<b>17.53%</b>	<b>11.37%</b>	<b>14.72%</b>
<b>Fund</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>11.40%</b>	<b>10.25%</b>	<b>13.66%</b>
<b>Russell Midcap Value Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>23.71%</b>	<b>13.48%</b>	<b>13.92%*</b>

\* For comparative purposes, the value of the index on 9/30/95 is used as the beginning value on 9/29/95.

## What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Shareholder transaction fees are paid from your account. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees.

### Fee table

<b>Shareholder transaction fees</b>	
<i>% of transaction amount</i>	
Maximum redemption fee	<b>1.00%</b>
<i>charged only when selling shares you have owned for less than 30 days</i>	
<b>Annual fund operating expenses</b>	
<i>% of average daily net assets</i>	
Management fees	0.75%
Shareholder services fee	0.25%
Other expenses	0.16%
<b>Total</b>	<b>1.16%</b>

### Expense example

1 Year	3 Years	5 Years	10 Years
<b>\$118</b>	<b>\$368</b>	<b>\$638</b>	<b>\$1,409</b>

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

- Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.
- Shareholder services fee:** the fee paid to the fund's distributor for shareholder account service and maintenance.
- Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

### Investor adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.75% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

David A. Daglio is the fund's primary portfolio manager. Mr. Daglio has been a primary portfolio manager of the fund since September 2003. He is a senior vice president of The Boston Company Asset Management (TBCAM), an affiliate of Dreyfus, where he has been employed since 1997. He also has been employed by Dreyfus since 2001. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

### Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of

Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

### Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

This table describes the fund's performance for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distribu-

tions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

# Your Investment

## ACCOUNT POLICIES

---

### Buying shares

**You pay no sales charges** to invest in this fund. Your price for fund shares is the fund's net asset value per share (NAV), which is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

### Third-party investments

If you invest through a third party (rather than directly with Dreyfus), the policies and fees may be different than those described herein. Banks, brokers, 401(k) plans, financial advisers and financial supermarkets may charge transaction fees and may set different minimum investments or limitations on buying or selling shares. Consult a representative of your plan or financial institution.

---

## Minimum investments

	Initial	Additional
<b>Regular accounts</b>	<b>\$2,500</b>	<b>\$100</b>
<b>Traditional IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Spousal IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Roth IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Education Savings Accounts</b>	<b>\$500</b>	<b>no minimum</b> <i>after the first year</i>
<b>Dreyfus automatic investment plans</b>	<b>\$100</b>	<b>\$100</b>

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

## Concepts to understand

**Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

The fund closed to new investors on January 4, 2002. Shareholders of the fund on that date may continue to buy shares in accounts existing on that date. Investors who did not own shares of the fund on January 4, 2002, generally will not be allowed to buy shares of the fund except that new accounts may be established by participants in most group employer retirement plans (and their successor plans) if the fund has been established as an investment option under the plans (or under another plan sponsored by the same employer). Shareholders whose accounts were closed before or after January 4, 2002 may be prohibited from reactivating their account or opening a new account. These restrictions generally will apply to investments made directly with Dreyfus and investments made through intermediaries. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund’s transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

If you are selling or exchanging shares you have owned for less than 30 days, the fund may deduct a 1% redemption fee (not charged on shares sold through the Automatic Withdrawal Plan or Dreyfus Auto-Exchange Privilege, or on shares acquired through dividend reinvestment).

Limitations on selling shares by phone or online through Dreyfus.com

Proceeds sent by	Minimum phone/online	Maximum phone/online
Check*	no minimum	\$250,000 per day
Wire	\$1,000	\$500,000 for joint accounts every 30 days/ \$20,000 per day
Dreyfus TeleTransfer	\$500	\$500,000 for joint accounts every 30 days/ \$20,000 per day

\* Not available online on accounts whose address has been changed within the last 30 days.

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

Although these policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

#### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

---

### Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application or by calling 1-800-645-6561.

---

#### For investing

**Dreyfus Automatic Asset Builder®** For making automatic investments from a designated bank account.

**Dreyfus Payroll Savings Plan** For making automatic investments through a payroll deduction.

**Dreyfus Government Direct Deposit Privilege** For making automatic investments from your federal employment, Social Security or other regular federal government check.

**Dreyfus Dividend Sweep** For automatically reinvesting the dividends and distributions from one Dreyfus fund into another (not available for IRAs).

#### For exchanging shares

**Dreyfus Auto-Exchange Privilege** For making regular exchanges from one Dreyfus fund into another.

#### For selling shares

**Dreyfus Automatic Withdrawal Plan** For making regular withdrawals from most Dreyfus funds.

### Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one Dreyfus fund into another. You can request your exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has one.

### Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application.

### Dreyfus Express® voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, purchase fund shares, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling 1-800-645-6561. Certain requests may require the services of a representative.

### Dreyfus Financial Centers

Through a nationwide network of Dreyfus Financial Centers, Dreyfus offers a full array of investment services and products. This includes information on mutual funds, brokerage services, tax-advantaged products and retirement planning.

Experienced financial consultants can help you make informed choices and provide you with personalized attention in handling account transactions. The Financial Centers also offer informative seminars and events. To find the Financial Center nearest you, call **1-800-499-3327**.

### Retirement plans

Dreyfus offers a variety of retirement plans, including traditional and Roth IRAs, and Education Savings Accounts. Here's where you call for information:

- for traditional, rollover and Roth IRAs, and Education Savings Accounts, call **1-800-645-6561**
- for SEP-IRAs, Keogh accounts, 401(k) and 403(b) accounts, call **1-800-358-0910**

## INSTRUCTIONS FOR REGULAR ACCOUNTS

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
The Dreyfus Family of Funds  
P.O. Box 55299, Boston, MA 02205-8553

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.

Mail the slip and the check to:  
The Dreyfus Family of Funds  
P.O. Box 105, Newark, NJ 07101-0105

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55263, Boston, MA 02205-8501

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279656
- the fund name
- your account number
- name(s) of investor(s)

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279656
- the fund name
- your account number
- name(s) of investor(s)

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be sent to your bank by electronic check.

**Check** Call us to request your transaction. A check will be sent to the address of record.

## Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

To reach Dreyfus, call toll free in the U.S.

**1-800-645-6561**

Outside the U.S. 516-794-5452

Make checks payable to:

**The Dreyfus Family of Funds**

You also can deliver requests to any Dreyfus Financial Center. Because processing time may vary, please ask the representative when your account will be credited or debited.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail in the slip and the check (see "To Open an Account" at left).

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number
- the fund name
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail in your request (see "To Open an Account" at left).

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279656
- the fund name
- your account number
- name of investor
- the contribution year

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Telephone Contribution** Call to request us to move money from a regular Dreyfus account to an IRA (both accounts must be held in the same shareholder name).

#### Automatically

**Without any initial investment** Call us to request a Dreyfus Step Program form. Complete and return the form along with your application.

**All services** Call us to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials.

All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

## Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

You also can deliver requests to any Dreyfus Financial Center. Because processing time may vary, please ask the representative when your account will be credited or debited.

# For More Information

## Dreyfus Midcap Value Fund

A series of Dreyfus Growth and Value Funds, Inc.

SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

### Annual/Semiannual Report

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

### Statement of Additional Information (SAI)

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

### Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

## Note to Investors

---

The fund closed to new investors on April 1, 1998. Shareholders of the fund on that date may continue to buy shares in accounts existing on that date. Investors who did not own shares of the fund on April 1, 1998, generally will not be allowed to buy shares of the fund except that new accounts may be established by participants in most group employer retirement plans (and their successor plans) if the fund has been established as an investment option under the plans (or under another plan sponsored by the same employer). Shareholders whose accounts were closed before or after April 1, 1998 may be prohibited from reactivating their accounts or opening new accounts. These restrictions generally will apply to investments made directly with Dreyfus and investments made through intermediaries. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted.

## GOAL/APPROACH

The fund seeks capital appreciation. To pursue this goal, the fund normally invests at least 80% of its assets in small-company stocks with market capitalizations between \$100 million and \$2 billion at the time of purchase. Because the fund may continue to hold a security whose market capitalization grows, a substantial portion of the fund's holdings can have market capitalizations in excess of \$2 billion at any given time. The fund's stock investments may include common stocks, preferred stocks and convertible securities of both U.S. and foreign issuers, including those purchased in initial public offerings (IPOs).

The portfolio manager identifies potential investments through extensive quantitative and fundamental research. The fund will focus on individual stock selection (a "bottom-up" approach), emphasizing three key factors:

- **relative value**, or how a stock is valued relative to its intrinsic worth based on traditional value measures. Estimates of fair values are based on comparisons to industry averages or historic norms rather than solely on an average of the overall market
- **business health**, or overall efficiency and profitability as measured by return on assets and return on equity
- **business momentum**, or the presence of a catalyst (such as a corporate restructuring, change in management or spin-off) that will trigger a price increase near term to midterm

The fund typically sells a stock when it is no longer considered a value company, appears less likely to benefit from the current market and economic environment, shows deteriorating fundamentals or declining momentum, or falls short of the manager's expectations.

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

## Concepts to understand

**Small companies:** new, often entrepreneurial companies. Small companies can, if successful, grow faster than large-cap companies and typically use profits for expansion rather than for paying dividends. Their share prices are more volatile than those of larger companies. Small companies fail more often.

**Relative value:** the identification of stocks trading inexpensively relative to a sector or peer group based on certain financial measurements such as price-to-earnings or price-to-book ratios. Using a relative valuation approach may mean investing in securities and industries traditionally thought to be growth-oriented.

## MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Small company risk.* Small companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Value stock risk.* Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued. Securities selected based on relative value investment process may be more volatile than a traditional value approach.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.
- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.

- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities or money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's performance from year to year. The table compares the fund's average annual total returns to those of the Russell 2000 Value Index, a broad measure of small-cap value stock performance. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

**Best Quarter:** Q4 '01 +41.02%  
**Worst Quarter:** Q3 '02 -36.65%

The fund's year-to-date total return as of 9/30/05 was 4.55%.

Average annual total returns as of 12/31/04

	1 Year	5 Years	10 Years
<b>Fund</b> returns before taxes	<b>12.72%</b>	<b>10.86%</b>	<b>15.91%</b>
<b>Fund</b> returns after taxes on distributions	<b>12.72%</b>	<b>8.01%</b>	<b>13.20%</b>
<b>Fund</b> returns after taxes on distributions and sale of fund shares	<b>8.27%</b>	<b>7.53%</b>	<b>12.41%</b>
<b>Russell 2000</b> <b>Value Index</b> reflects no deduction for fees, expenses or taxes	<b>22.25%</b>	<b>17.23%</b>	<b>15.17%</b>

## What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Shareholder transaction fees are paid from your account. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees.

### Fee table

<b>Shareholder transaction fees</b>	
<i>% of transaction amount</i>	
Maximum redemption fee	<b>1.00%</b>
<i>charged only when selling shares you have owned for less than 30 days</i>	
<b>Annual fund operating expenses</b>	
<i>% of average daily net assets</i>	
Management fees	0.75%
Shareholder services fee	0.25%
Other expenses	0.18%
<b>Total</b>	<b>1.18%</b>

### Expense example

1 Year	3 Years	5 Years	10 Years
<b>\$120</b>	<b>\$375</b>	<b>\$649</b>	<b>\$1,432</b>

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

- Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.
- Shareholder services fee:** the fee paid to the fund's distributor for shareholder account service and maintenance.
- Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

---

### Investor adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.75% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

David A. Daglio has been the fund's primary portfolio manager since August 2005. Mr. Daglio is a senior vice president of The Boston Company Asset Management (TBCAM), an affiliate of Dreyfus, where he has been employed since 1997. He also has been employed by Dreyfus since 2001. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees and other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

This table describes the fund's performance for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distribu-

tions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

# Your Investment

## ACCOUNT POLICIES

### Buying shares

**The fund is currently closed to new investors.** Existing shareholders pay no sales charges to invest in the fund. Your price for fund shares is the fund's net asset value per share (NAV), which is generally calculated as of the close of trading on the New York Stock Exchange (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with the procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

### Third-party investments

If you invest through a third party (rather than directly with Dreyfus), the policies and fees may be different than those described herein. Banks, brokers, 401(k) plans, financial advisers and financial supermarkets may charge transaction fees and may set different minimum investments or limitations on buying or selling shares. In addition, such third parties may receive payments from Dreyfus in connection with their offering of fund shares to their customers, or for marketing, distribution or other services. The receipt of such payments could create an incentive for the third party to offer the fund instead of other mutual funds where such payments are not received. Consult a representative of your plan or financial institution for further information.

The fund closed to new investors on April 1, 1998. Shareholders of the fund on that date may continue to buy shares in accounts existing on that date. Investors who did not own shares of the fund on April 1, 1998, generally will not be allowed to buy shares of the fund except that new accounts may be established by participants in most group employer retirement plans (and their successor plans) if the fund has been established as an investment option under the plans (or under another plan sponsored by the same employer). Shareholders whose accounts were closed before or after April 1, 1998 may be prohibited from reactivating their accounts or opening new accounts. These restrictions generally will apply to investments made directly with Dreyfus and investments made through intermediaries. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted.

Minimum investments

	Initial	Additional
Regular accounts	\$2,500	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum after the first year
Dreyfus automatic investment plans	\$100	\$100

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

**Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

If you are selling or exchanging shares you have owned for less than 30 days, the fund may deduct a 1% redemption fee (not charged on shares sold through the Automatic Withdrawal Plan or Dreyfus Auto-Exchange Privilege, or on shares acquired through dividend reinvestment).

### Limitations on selling shares by phone or online through Dreyfus.com

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

\* Not available online on accounts whose address has been changed within the last 30 days.

## Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

Although these policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

#### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 45 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

---

### Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application or by calling 1-800-645-6561.

---

#### For investing

**Dreyfus Automatic Asset Builder®** For making automatic investments from a designated bank account.

**Dreyfus Payroll Savings Plan** For making automatic investments through a payroll deduction.

**Dreyfus Government Direct Deposit Privilege** For making automatic investments from your federal employment, Social Security or other regular federal government check.

**Dreyfus Dividend Sweep** For automatically reinvesting the dividends and distributions from one Dreyfus fund into another (not available for IRAs).

#### For exchanging shares

**Dreyfus Auto-Exchange Privilege** For making regular exchanges from one Dreyfus fund into another.

#### For selling shares

**Dreyfus Automatic Withdrawal Plan** For making regular withdrawals from most Dreyfus funds.

### Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one Dreyfus fund into another. You can request your exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has one.

### Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application.

### Dreyfus Express® voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, purchase fund shares, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling 1-800-645-6561. Certain requests may require the services of a representative.

### Dreyfus Financial Centers

---

Through a nationwide network of Dreyfus Financial Centers, Dreyfus offers a full array of investment services and products. This includes information on mutual funds, brokerage services, tax-advantaged products and retirement planning.

Experienced financial consultants can help you make informed choices and provide you with personalized attention in handling account transactions. The Financial Centers also offer informative seminars and events. To find the Financial Center nearest you, call **1-800-499-3327**.

### Retirement plans

---

Dreyfus offers a variety of retirement plans, including traditional and Roth IRAs, and Education Savings Accounts. Here's where you call for information:

- for traditional, rollover and Roth IRAs, and Education Savings Accounts, call **1-800-645-6561**
- for SEP-IRAs, Keogh accounts, 401(k) and 403(b) accounts, call **1-800-358-0910**

## INSTRUCTIONS FOR REGULAR ACCOUNTS

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
The Dreyfus Family of Funds  
P.O. Box 55299, Boston, MA 02205-8553

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
The Dreyfus Family of Funds  
P.O. Box 105, Newark, NJ 07101-0105

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55263, Boston, MA 02205-8501

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900088168
- the fund name
- your account number
- name(s) of investor(s)

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900088168
- the fund name
- your account number
- name(s) of investor(s)

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Be sure the fund has your bank account information on file. Call us to request your transaction. Proceeds will be sent to your bank by electronic check.

**Check** Call us to request your transaction. A check will be sent to the address of record.

## Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

To reach Dreyfus, call toll free in the U.S.

**1-800-645-6561**

Outside the U.S. 516-794-5452

Make checks payable to:

**The Dreyfus Family of Funds**

You also can deliver requests to any Dreyfus Financial Center. Because processing time may vary, please ask the representative when your account will be credited or debited.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail in the slip and the check (see "To Open an Account" at left).

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number
- the fund name
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail in your request (see "To Open an Account" at left).

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900088168
- the fund name
- your account number
- name of investor
- the contribution year

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Telephone Contribution** Call to request us to move money from a regular Dreyfus account to an IRA (both accounts must be held in the same shareholder name).

#### Automatically

**Without any initial investment** Call us to request a Dreyfus Step Program form. Complete and return the form along with your application.

**All services** Call us to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials.

All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

## Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

# For More Information

**Dreyfus Small Company Value Fund**  
A series of Dreyfus Growth and Value Funds, Inc.  
SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

## **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

## **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

## **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

## Dreyfus Premier Technology Growth Fund

Ticker Symbols **Class A: DTGRX**  
**Class B: DTGBX**  
**Class C: DTGCX**  
**Class R: DGVRX**  
**Class T: DPTGX**

### GOAL/APPROACH

The fund seeks capital appreciation. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of growth companies of any size that Dreyfus believes to be leading producers or beneficiaries of technological innovation. Up to 25% of the fund's assets may be invested in foreign securities. The fund's stock investments may include common stocks, preferred stocks and convertible securities of both U.S. and foreign issuers, including those purchased in initial public offerings.

In choosing stocks, the fund looks for technology companies with the potential for strong earnings or revenue growth rates, although some of the fund's investments may currently be experiencing losses. The fund focuses on the technology sectors that are expected to outperform on a relative scale. The more attractive sectors are overweighted. Among the sectors evaluated are those that develop, produce or distribute products or services in the computer, internet, semi-conductor, electronics, communications, health care, biotechnology, computer software and hardware, electronic components and systems, network and cable broadcasting, telecommunications, defense and aerospace, and environmental sectors.

The fund typically sells a stock when the manager believes there is a more attractive alternative, or there are deteriorating fundamentals, such as a loss of competitive advantage, a failure in management execution or deteriorating capital structure. The fund also may sell stocks when the manager's evaluation of a sector has changed.

# The Fund

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

### Concepts to understand

**Growth companies:** companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Technology company risk.* Technology companies, especially small-cap technology companies, involve greater risk because their revenue and/or earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain technology companies may have limited product lines, markets or financial resources, or may depend on a limited management group. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of tech stocks than it does in other sectors. Fund investments made in anticipation of future products and services may decline dramatically in value if the anticipated products or services are delayed or cancelled.
- *Technology sector risk.* The technology sector has been among the most volatile sectors of the stock market. Because the fund's investments are concentrated in the technology sector, its performance will be significantly affected by developments in that sector.
- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Small company risk.* The risks associated with technology companies are magnified in the case of small-cap technology companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can have an adverse effect on the pricing of these securities and on the fund's ability to sell these securities.
- *Growth stock risk.* Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions may magnify the fund's gains or losses.

- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions, and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's Class A performance from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the fund's average annual total returns for each class to those of the S&P 500® Index, a broad measure of stock performance, and to those of the Morgan Stanley High Tech 35 Index, a measure of technology company stock performance. These returns include the fund's applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)  
Class A shares

The fund's Class A year-to-date total return as of 9/30/05 was -1.65%.

## Average annual total returns as of 12/31/04

Share class/ Inception date	1 Year	5 Years	Since inception
<b>Class A</b> (10/13/97) <i>returns before taxes</i>	<b>-5.46%</b>	<b>-16.42%</b>	<b>8.10%</b>
<b>Class A</b> <i>returns after taxes on distributions</i>	<b>-5.46%</b>	<b>-16.42%</b>	<b>8.04%</b>
<b>Class A</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>-3.55%</b>	<b>-13.06%</b>	<b>7.08%</b>
<b>Class B</b> (4/15/99) <i>returns before taxes</i>	<b>-4.70%</b>	<b>-16.53%</b>	<b>-4.42%</b>
<b>Class C</b> (4/15/99) <i>returns before taxes</i>	<b>-1.67%</b>	<b>-16.16%</b>	<b>-4.24%</b>
<b>Class R</b> (4/15/99) <i>returns before taxes</i>	<b>0.81%</b>	<b>-15.07%</b>	<b>-3.03%</b>
<b>Class T</b> (8/31/99) <i>returns before taxes</i>	<b>-4.62%</b>	<b>-16.58%</b>	<b>-7.21%</b>
<b>S&amp;P 500 Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>10.87%</b>	<b>-2.30%</b>	<b>5.01%*</b>
<b>Morgan Stanley High Tech 35 Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>7.06%</b>	<b>-10.97%</b>	<b>9.96%*</b>

\* Based on the life of Class A. For comparative purposes, the value of each index on 9/30/97 is used as the beginning value on 10/13/97.

## What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> <i>(fees paid from your account)</i>					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses</b> <i>(expenses paid from fund assets)</i> <i>% of average daily net assets</i>					
Management fees	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>
Rule 12b-1 fee	<b>none</b>	<b>.75</b>	<b>.75</b>	<b>none</b>	<b>.25</b>
Shareholder services fee	<b>.25</b>	<b>.25</b>	<b>.25</b>	<b>none</b>	<b>.25</b>
Other expenses	<b>.32</b>	<b>.54</b>	<b>.53</b>	<b>.11</b>	<b>.54</b>
<b>Total</b>	<b>1.32</b>	<b>2.29</b>	<b>2.28</b>	<b>.86</b>	<b>1.79</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$702</b>	<b>\$969</b>	<b>\$1,257</b>	<b>\$2,074</b>
<b>Class B</b>				
<i>with redemption</i>	<b>\$632</b>	<b>\$1,015</b>	<b>\$1,425</b>	<b>\$2,157**</b>
<i>without redemption</i>	<b>\$232</b>	<b>\$715</b>	<b>\$1,225</b>	<b>\$2,157**</b>
<b>Class C</b>				
<i>with redemption</i>	<b>\$331</b>	<b>\$712</b>	<b>\$1,220</b>	<b>\$2,615</b>
<i>without redemption</i>	<b>\$231</b>	<b>\$712</b>	<b>\$1,220</b>	<b>\$2,615</b>
<b>Class R</b>	<b>\$88</b>	<b>\$274</b>	<b>\$477</b>	<b>\$1,061</b>
<b>Class T</b>	<b>\$624</b>	<b>\$988</b>	<b>\$1,376</b>	<b>\$2,461</b>

\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of its operation.

**Rule 12b-1 fee:** the fee paid to the fund's distributor to finance the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

**Shareholder services fee:** the fee paid to the fund's distributor for providing shareholder services.

**Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

---

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.75% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

The fund's primary portfolio manager is Mark Herskovitz. Mr. Herskovitz has been the primary portfolio manager of the fund since its inception. He is a senior vice president and portfolio manager of The Boston Company Asset Management, LLC, an affiliate of Dreyfus, where he has been employed since June 2005. He also has been employed by Dreyfus since 1996. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the fiscal periods indicated. Certain information reflects financial results for a single fund share. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you

had reinvested all dividends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

When you invest in Class A or Class T shares you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	Class A	Class B	Class C	Class T	Class R
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information (SAI).

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of certain other Dreyfus Premier Funds or Founders Funds. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or

Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the SAI.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

**Orders to buy and sell shares** received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
<b>Regular accounts</b>	<b>\$1,000</b>	<b>\$100</b>
<b>Traditional IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Spousal IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Roth IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Education Savings Accounts</b>	<b>\$500</b>	<b>no minimum</b> <i>after the first year</i>

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

- Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

## Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

\* Not available online on accounts whose address has been changed within the last 30 days.

## Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

### General policies

**Unless you decline teleservice privileges** on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can also request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request, you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You'll also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR **REGULAR ACCOUNTS**

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.

Mail your application and a check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.

Mail the slip and the check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:

The Dreyfus Family of Funds

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900336722
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900336722
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.  
Make checks payable to: **The Dreyfus Family of Funds**.

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

# INSTRUCTIONS FOR **REGULAR ACCOUNTS** (continued)

## TO OPEN AN ACCOUNT

Online ([www.dreyfus.com](http://www.dreyfus.com))

## TO ADD TO AN ACCOUNT

## TO SELL SHARES

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction.

**Wire** Visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction. A check will be sent to the address of record.

Automatically

**With an initial investment** Indicate on your application which automatic service(s) you want. Return your application with your investment.

**All services** Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials.

**Dreyfus Automatic Withdrawal Plan** Call us or your financial representative to request a form to add the plan. Complete the form, specifying the amount and frequency of withdrawals you would like.

Be sure to maintain an account balance of \$5,000 or more.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail the slip and the check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number and fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Trust Company  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900336722
- the fund name
- the share class
- your account number
- name of investor
- the contribution year
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

#### Automatically

**All services** Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

For information and assistance, contact your financial representative or call toll free in the U.S. **1-800-554-4611**. Make checks payable to: **The Dreyfus Trust Company, Custodian**.

# For More Information

## **Dreyfus Premier Technology Growth Fund**

A series of Dreyfus Growth and Value Funds, Inc.

SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

### **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

### **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

### **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

## Dreyfus Premier Midcap Value Fund

Ticker Symbols **Class A: DMVPX**  
**Class B: DMVBX**  
**Class C: DMVCX**  
**Class R: DMVRX**  
**Class T: DMVTX**

### GOAL/APPROACH

The fund seeks to exceed the performance of the Russell Midcap Value Index. To pursue this goal, the fund normally invests at least 80% of its assets in stocks of midcap companies. The fund currently considers companies with market capitalizations that fall in the range of the capitalizations of the companies that comprise the S&P Midcap 400 Index or the Russell Midcap Index at the time of purchase to be midcap companies. As of October 31, 2005 the market capitalizations of companies that comprise such indexes ranged between \$260 million and \$17 billion; however, based on market conditions, the range of midcap companies may vary. Because the fund may continue to hold a security whose market capitalization grows, a substantial portion of the fund's holdings can have market capitalizations in excess of \$17 billion at any given time. Although the fund normally will invest in common stocks of U.S. issuers, it may invest up to 20% of its total assets in foreign securities. The fund's stock investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings (IPOs).

The portfolio manager identifies potential investments through extensive quantitative and fundamental research. In choosing stocks, the portfolio manager focuses on individual stock selection (a "bottom-up" approach) rather than forecasting stock market trends (a "top-down" approach), and looks for value companies. A three-step screening process is used to select stocks:

- **value:** quantitative screens track traditional measures such as price-to-earnings, price-to-book and price-to-sales ratios; these ratios are analyzed and compared against the market
- **sound business fundamentals:** a company's balance sheet and income data are examined to determine the company's financial history
- **positive business momentum:** a company's earnings and forecast changes are analyzed and sales and earnings trends are reviewed to determine the company's financial condition or the presence of a catalyst that will trigger a price increase near- to mid-term

# The Fund

The fund typically sells a stock when it reaches the portfolio manager's target price, unless there is a material improvement in its fundamentals and business momentum to justify a higher, revised target price. In addition, the fund generally sells a stock when it is no longer considered a value company, appears less likely to benefit from the current market and economic environment, shows deteriorating fundamentals or declining business momentum (such as negative earnings revisions or slowing sales), or falls short of the portfolio manager's expectations. The fund also may reduce or eliminate its holdings in a stock if the issuer of the stock begins to exhibit financial problems, despite retaining strong value and positive business momentum.

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

### Concepts to understand

**Midcap companies:** established companies that may not be well known. Midcap companies may lack the resources to weather economic shifts, though they can be faster to innovate than large companies.

**Value companies:** companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs or competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, the fund's performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged. Each of these risks could increase the fund's volatility.
- *Midsized company risk.* Midsized companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation would cause the stock price to drop.
- *Value stock risk.* Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing growth stocks).
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions may magnify the fund's gains or losses.

- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in IPOs. The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the performance of the fund's Class A shares from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the average annual total returns of the fund's Class A shares to those of the Russell Midcap Value Index, a broad measure of midcap value stock performance. These returns include the fund's applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Since Class B, C, R and T shares have less than one calendar year of performance, past performance information for those share classes is not included in this part of the prospectus. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares adjusted to reflect sales loads. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

### Year-by-year total returns *as of 12/31 each year (%)*

#### Class A shares

**Best Quarter:** Q2 '03 **+20.50%**

**Worst Quarter:** Q3 '02 **-20.61%**

*The fund's Class A year-to-date total return as of 9/30/05 was 4.99%.*

### Average annual total returns *as of 12/31/04*

Share class/ inception date	1 Year	Since inception
<b>Class A</b> (6/29/01) <i>returns before taxes</i>	<b>9.98%</b>	<b>2.85%</b>
<b>Class A</b> <i>returns after taxes on distributions</i>	<b>7.89%</b>	<b>2.23%</b>
<b>Class A</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>6.81%</b>	<b>2.11%</b>
<b>Russell Midcap Value Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>23.71%</b>	<b>12.90%*</b>

*\* For comparative purposes, the value of the index on 6/30/01 is used as the beginning value on 6/29/01.*

## What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> ( <i>fees paid from your account</i> )					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses</b> ( <i>expenses paid from fund assets</i> )					
<i>% of average daily net assets</i>					
Management fees	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>
Rule 12b-1 fee	<b>none</b>	<b>.75</b>	<b>.75</b>	<b>none</b>	<b>.25</b>
Shareholder services fee	<b>.25</b>	<b>.25</b>	<b>.25</b>	<b>none</b>	<b>.25</b>
Other expenses	<b>.85</b>	<b>.97</b>	<b>1.01</b>	<b>2.72</b>	<b>1.10</b>
<b>Total</b>	<b>1.85</b>	<b>2.72</b>	<b>2.76</b>	<b>3.47</b>	<b>2.35</b>
Fee waiver and/or expense reimbursements	<b>(.35)</b>	<b>(.47)</b>	<b>(.51)</b>	<b>(2.22)</b>	<b>(.60)</b>
<b>Net operating expenses**</b>	<b>1.50</b>	<b>2.25</b>	<b>2.25</b>	<b>1.25</b>	<b>1.75</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

\*\* Net operating expenses have been restated to reflect that Dreyfus has contractually agreed, until August 31, 2007, to waive receipt of its fees and/or assume the expenses of the fund so that the expenses of none of the classes exceed 1.25% (excluding Rule 12b-1 fees, shareholder services fees, taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses).

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$719</b>	<b>\$1,057</b>	<b>\$1,453</b>	<b>\$2,558</b>
<b>Class B</b>				
<i>with redemption</i>	<b>\$628</b>	<b>\$1,051</b>	<b>\$1,549</b>	<b>\$2,565***</b>
<i>without redemption</i>	<b>\$228</b>	<b>\$751</b>	<b>\$1,349</b>	<b>\$2,565***</b>
<b>Class C</b>				
<i>with redemption</i>	<b>\$328</b>	<b>\$755</b>	<b>\$1,361</b>	<b>\$3,000</b>
<i>without redemption</i>	<b>\$228</b>	<b>\$755</b>	<b>\$1,361</b>	<b>\$3,000</b>
<b>Class R</b>	<b>\$127</b>	<b>\$626</b>	<b>\$1,380</b>	<b>\$3,367</b>
<b>Class T</b>	<b>\$620</b>	<b>\$1,036</b>	<b>\$1,537</b>	<b>\$2,911</b>

\*\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five-, and ten-years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor for financing the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

**Shareholder services fee:** the fee paid to the fund's distributor for providing shareholder services.

**Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.39% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged its affiliate, The Boston Company Asset Management, LLC (TBCAM), located at One Boston Place, Boston, Massachusetts 02108, to serve as the fund's sub-investment adviser. TBCAM, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments. As of November 30, 2005 TBCAM managed approximately \$20 billion in assets for 60 other registered investment companies and provided investment advisory services to discretionary accounts having aggregate assets of approximately \$59 billion.

The fund's primary portfolio manager is David A. Daglio. Mr. Daglio has been the fund's primary portfolio manager since September 2003. He is a senior vice president of TBCAM, which he joined in 1997. In April 2001, Mr. Daglio became a dual employee of Dreyfus and TBCAM. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all

dividends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

Class A	2005	Year Ended August 31,			
		2004 <sup>1</sup>	2003	2002	2001 <sup>2</sup>

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

## Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees, and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	Class A	Class B	Class C	Class T	Class R
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information (SAI).

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Founders Funds that are subject to a sales load. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the SAI.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

---

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders may pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with the procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net assets values. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign, small-capitalization equity securities and certain other thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

**Orders to buy and sell shares** received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

---

#### Minimum investments

	Initial	Additional
<b>Regular accounts</b>	<b>\$1,000</b>	<b>\$100</b> for Dreyfus TeleTransfer investments
<b>Traditional IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Spousal IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Roth IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Education Savings Accounts</b>	<b>\$500</b>	<b>no minimum</b> after the first year

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

#### Concepts to understand

**Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

### Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

\* Not available online on accounts whose address has been changed within the last 30 days.

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm the instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

#### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including interest income and distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your redemption of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive upon redemption.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request, you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You'll also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR REGULAR ACCOUNTS

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.

Mail your application and a check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.

Mail the slip and the check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:

The Dreyfus Family of Funds

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479604
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479604
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number for purchases of Class A shares, or "666" before your 14-digit account number for purchases of Class B, Class C, Class R or Class T shares.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.

Make checks payable to: **The Dreyfus Family of Funds**.

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

Make checks payable to: **The Dreyfus Trust Company, Custodian.**

# For More Information

**Dreyfus Premier Midcap Value Fund**  
A series of Dreyfus Growth and Value Funds, Inc.  
SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

## **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semi-annual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

## **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

## **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

## Note to Investors

---

The fund intends to close to new investors after it reaches \$400 million in total assets. Shareholders of the fund at that time may continue to buy shares in existing accounts. Shareholders whose accounts have a zero balance on or after the fund closes will be prohibited from reactivating the account or opening a new account. Investors who do not own shares of the fund at that time generally will not be allowed to buy shares of the fund, except that new accounts may be established by participants in most group employer retirement plans (and their successor plans) if the fund had been established as an investment option under the plans before the fund closes. Financial institutions maintaining omnibus accounts with the fund will be prohibited from accepting purchase orders from new investors after the fund closes. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted after the fund has closed. The board reserves the right to reopen the fund to new investors after the fund closes, should circumstances change.

**Class T: DFLTX**

### GOAL/APPROACH

The fund seeks capital growth. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of companies Dreyfus believes to be future leaders: small companies characterized by new or innovative products, services or processes having the potential to enhance earnings or revenue growth. The fund currently considers small companies to be those companies with market capitalizations that fall within the range of the Russell 2000 Index at the time of purchase. As of October 31, 2005, market capitalization range of the index was between \$37 million and \$4 billion. However, since the fund may continue to hold its securities as their market capitalizations grow, a substantial portion of the fund's holdings can have market capitalizations in excess of the index at any time. The fund's investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings. The fund may invest up to 25% of its assets in foreign securities.

The portfolio managers construct the portfolio through a "bottom-up," structured approach, focusing on stock selection as opposed to making proactive decisions as to industry or sector exposure. The fund generally attempts to have a neutral exposure to industries and capitalizations relative to its benchmark. Finally, within each sector and style subset, the fund overweights the most attractive stocks and underweights or zero weights the stocks that have been ranked least attractive. The investment process is driven by computer models that identify and rank stocks based on:

- **fundamental momentum**, meaning measures that reflect the changes in short-term earnings outlook through factors such as revised earnings estimates and earnings surprises
- **relative value**, such as current and forecasted price-to-earnings ratios, price-to-book ratios, yields and other price-sensitive data for a stock compared to its past, its peers and the models' overall stock universe

# The Fund

- **long-term growth**, based on measure that reflect the changes in estimated long-term earnings growth over multiple horizons
- **additional factors**, such as technical factors, trading by company insiders or share issuance/buy-back data

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

### Concepts to understand

**Small companies:** new, often entrepreneurial companies.

Small companies can, if successful, grow faster than large-cap companies and typically use profits for expansion rather than for paying dividends. Their share prices are more volatile than those of larger companies. Small companies fail more often.

**Growth companies:** companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

**Value companies:** companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

## MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Small company risk.* Small companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio managers believe is their full market value, either because the market fails to recognize the stock's intrinsic worth or the managers misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.

- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates) and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the performance of the fund's Class A shares from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the average annual total returns for each class to those of the Russell 2000 Index, a broad measure of small-cap stock performance. These returns include the fund's applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns *as of 12/31 each year (%)*  
**Class A shares**

The fund's Class A year-to-date total return as of 9/30/05 was 8.03%.

## Average annual total returns *as of 12/31/04*

Share class/ inception date	1 Year	Since inception
<b>Class A</b> (6/30/00) <i>returns before taxes</i>	<b>2.36%</b>	<b>7.91%</b>
<b>Class A</b> <i>returns after taxes on distributions</i>	<b>2.36%</b>	<b>7.91%</b>
<b>Class A</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>1.53%</b>	<b>6.85%</b>
<b>Class B</b> (6/30/00) <i>returns before taxes</i>	<b>3.88%</b>	<b>8.19%</b>
<b>Class C</b> (6/30/00) <i>returns before taxes</i>	<b>6.93%</b>	<b>8.57%</b>
<b>Class R</b> (6/30/00) <i>returns before taxes</i>	<b>9.08%</b>	<b>9.72%</b>

<b>Russell 2000 Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>18.33%</b>	<b>6.66%</b>

## What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> ( <i>fees paid from your account</i> )					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses</b> ( <i>expenses paid from fund assets</i> )					
<i>% of average daily net assets</i>					
Management fees	<b>.90</b>	<b>.90</b>	<b>.90</b>	<b>.90</b>	<b>.90</b>
Rule 12b-1 fee	<b>none</b>	<b>.75</b>	<b>.75</b>	<b>none</b>	<b>.25</b>
Shareholder services fee	<b>.25</b>	<b>.25</b>	<b>.25</b>	<b>none</b>	<b>.25</b>
Other expenses	<b>.31</b>	<b>.27</b>	<b>.23</b>	<b>.16</b>	<b>.38</b>
<b>Total</b>	<b>1.46</b>	<b>2.17</b>	<b>2.13</b>	<b>1.06</b>	<b>1.78</b>
Fee waiver and/or expense reimbursements	<b>(.21)</b>	<b>(.17)</b>	<b>(.13)</b>	<b>(.06)</b>	<b>(.28)</b>
<b>Net operating expenses**</b>	<b>1.25</b>	<b>2.00</b>	<b>2.00</b>	<b>1.00</b>	<b>1.50</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

\*\* Net operating expenses have been restated to reflect that Dreyfus has contractually agreed, until August 31, 2006, to waive receipts of its fees and/or assume the expenses of the fund so that the expenses of none of the classes exceed 1.00% (excluding Rule 12b-1 fees, shareholder services fees, taxes, interest, brokerage commissions, commitment fees on borrowing and extraordinary expenses).

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$695</b>	<b>\$991</b>	<b>\$1,308</b>	<b>\$2,204</b>
<b>Class B</b>				
<i>with redemption</i>	<b>\$603</b>	<b>\$963</b>	<b>\$1,349</b>	<b>\$2,144***</b>
<i>without redemption</i>	<b>\$203</b>	<b>\$663</b>	<b>\$1,149</b>	<b>\$2,144***</b>
<b>Class C</b>				
<i>with redemption</i>	<b>\$303</b>	<b>\$654</b>	<b>\$1,132</b>	<b>\$2,452</b>
<i>without redemption</i>	<b>\$202</b>	<b>\$654</b>	<b>\$1,132</b>	<b>\$2,452</b>
<b>Class R</b>	<b>\$102</b>	<b>\$331</b>	<b>\$579</b>	<b>\$1,289</b>
<b>Class T</b>	<b>\$596</b>	<b>\$959</b>	<b>\$1,346</b>	<b>\$2,428</b>

\*\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five- and ten-years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor for financing the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

**Shareholder services fee:** the fee paid to the fund's distributor for providing shareholder services.

**Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.83% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Investment decisions for the fund will be made by the Smallcap Team of Franklin Portfolio Associates, each of whom also is an employee of Dreyfus and will manage the fund in that capacity. The team members are John S. Cone, Oliver Buckley, Langton C. Garvin and Kristin Crawford. Mr. Cone is chief executive officer, president and a senior portfolio manager of Franklin Portfolio Associates, where he has been employed since its inception in 1982. Mr. Buckley is a senior vice president and senior portfolio manager of Franklin Portfolio Associates, which he joined in 2000. Mr. Garvin is a senior vice president and senior portfolio manager of Franklin Portfolio Associates, which he joined in 2004; prior thereto, he was a portfolio manager with Batterymarch Financial Management. Ms. Crawford is a vice president and portfolio manager of Franklin Portfolio Associates, which she joined in 2000. There are no limitations on the role of a committee member with respect to making investment decisions for the fund. The Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all

dividends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	<b>Class A</b>	<b>Class B</b>	<b>Class C</b>	<b>Class T</b>	<b>Class R</b>
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

---

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

---

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information.

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of certain other Dreyfus Premier Funds or Founders Funds. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or Founders Funds, in any class of shares, by your

spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the Statement of Additional Information.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- participants in certain Health Savings Account programs
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

---

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

You may buy Class R shares if you are:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

**Orders to buy and sell shares** received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
<b>Regular accounts</b>	<b>\$1,000</b>	<b>\$100</b>
<b>Traditional IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Spousal IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Roth IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Education Savings Accounts</b>	<b>\$500</b>	<b>no minimum</b> <i>after the first year</i>

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

**Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

**Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:**

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

### Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

*\* Not available online on accounts whose address has been changed within the last 30 days.*

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You'll also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR REGULAR ACCOUNTS

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900404124
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900404124
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.  
Make checks payable to: **The Dreyfus Family of Funds**

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

### INSTRUCTIONS FOR **REGULAR ACCOUNTS** (continued)

## TO OPEN AN ACCOUNT

Online ([www.dreyfus.com](http://www.dreyfus.com))

## TO ADD TO AN ACCOUNT

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction.

TO SELL SHARES

**Wire** Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction. A check will be sent to the address of record.

Automatically

**With an initial investment** Indicate on your application which automatic service(s) you want. Return your application with your investment.

**All services** Call us or your financial representative to request a form to add any automatic investing service (see “Services for Fund Investors”). Complete and return the form along with any other required materials.

**Dreyfus Automatic Withdrawal Plan** Call us or your financial representative to request a form to add the plan. Complete the form, specifying the amount and frequency of withdrawals you would like.

Be sure to maintain an account balance of \$5,000 or more.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail the slip and the check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Trust Company  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900404124
- the fund name
- the share class
- your account number
- name of investor
- the contribution year
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

#### Automatically

**All services** Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

For information and assistance, contact your financial representative or call toll free in the U.S. **1-800-554-4611.**

Make checks payable to: **The Dreyfus Trust Company, Custodian**

# For More Information

**Dreyfus Premier Future Leaders Fund**  
A series of Dreyfus Growth and Value Funds, Inc.  
**SEC file number: 811-7123**

More information on this fund is available free upon request, including the following:

## **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's managers discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

## **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

## **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

## Dreyfus Premier Strategic Value Fund

Ticker Symbols **Class A: DAGVX**  
**Class B: DBGVX**  
**Class C: DCGVX**  
**Class R: DRGVX**  
**Class T: DTGVX**

### GOAL/APPROACH

The fund seeks capital appreciation. To pursue this goal, the fund normally invests at least 80% of its assets in stocks. The fund's stock investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings. The fund may invest up to 30% of its assets in foreign securities.

The portfolio manager identifies potential investments through extensive quantitative and fundamental research. The fund will focus on individual stock selection (a "bottom-up" approach), emphasizing three key factors:

- **value**, or how a stock is valued relative to its intrinsic worth based on traditional value measures
- **business health**, or overall efficiency and profitability as measured by return on assets and return on equity
- **business momentum**, or the presence of a catalyst (such as a corporate restructuring, change in management or spin-off) that will trigger a price increase near term to midterm

The fund typically sells a stock when the manager believes there is a more attractive alternative, the stock's valuation is excessive or there are deteriorating fundamentals, such as a loss of competitive advantage, a failure in management execution or deteriorating capital structure. The fund also may sell stocks when the manager's evaluation of a sector has changed.

# The Fund

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities. At times, the fund may engage in other hedging techniques, overweighting industry and security positions, and investing in small companies, high-yield debt securities and private placements.

### Concepts to understand

**Value companies:** companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Value stock risk.* Because different types of stocks tend to shift in and out of favor depending on the market and economic conditions, the fund's performance may sometimes be lower or higher than other types of funds. Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.

- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

At times, the fund may engage in short-term trading, which could produce higher brokerage costs and taxable distributions, and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's Class A performance from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the average annual total returns of the fund's Class A, B, C, R, and T shares to those of the Russell 1000 Value Index, a broad measure of value stock performance. These returns include applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

### Year-by-year total returns as of 12/31 each year (%)

#### Class A shares

**Best Quarter:** Q2 '03 **+19.26%**

**Worst Quarter:** Q3 '02 **-23.95%**

The fund's Class A year-to-date total return as of 9/30/05 was 5.14%.

### Average annual total returns as of 12/31/04

Share class/ Inception date	1 Year	5 Years	Since inception
<b>Class A</b> (9/29/95) <i>returns before taxes</i>	<b>10.85%</b>	<b>6.63%</b>	<b>14.88%</b>
<b>Class A</b> <i>returns after taxes on distributions</i>	<b>10.85%</b>	<b>5.24%</b>	<b>12.92%</b>
<b>Class A</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>7.05%</b>	<b>4.85%</b>	<b>12.09%</b>
<b>Class B</b> (5/30/01) <i>returns before taxes</i>	<b>12.92%</b>	–	<b>4.43%</b>
<b>Class C</b> (5/30/01) <i>returns before taxes</i>	<b>15.86%</b>	–	<b>5.17%</b>
<b>Class R</b> (5/30/01) <i>returns before taxes</i>	<b>17.86%</b>	–	<b>5.85%</b>
<b>Class T</b> (5/30/01) <i>returns before taxes</i>	<b>11.99%</b>	–	<b>4.00%</b>
<b>Russell 1000 Value Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>16.49%</b>	<b>5.27%</b>	<b>11.83%*</b>

\* Based on the life of Class A. For comparative purposes, the value of the index on 9/30/95 is used as the beginning value on 9/29/95.

### What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> ( <i>fees paid from your account</i> )					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses</b> ( <i>expenses paid from fund assets</i> ) <i>% of average daily net assets</i>					
Management fees	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>
Rule 12b-1 fee	<b>none</b>	<b>.75</b>	<b>.75</b>	<b>none</b>	<b>.25</b>
Shareholder services fee	<b>.25</b>	<b>.25</b>	<b>.25</b>	<b>none</b>	<b>.25</b>
Other expenses	<b>.25</b>	<b>.29</b>	<b>.24</b>	<b>.41</b>	<b>.33</b>
<b>Total</b>	<b>1.25</b>	<b>2.04</b>	<b>1.99</b>	<b>1.16</b>	<b>1.58</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$695</b>	<b>\$949</b>	<b>\$1,222</b>	<b>\$1,999</b>
<b>Class B</b>				
with redemption	<b>\$607</b>	<b>\$940</b>	<b>\$1,298</b>	<b>\$1,980**</b>
without redemption	<b>\$207</b>	<b>\$640</b>	<b>\$1,098</b>	<b>\$1,980**</b>
<b>Class C</b>				
with redemption	<b>\$302</b>	<b>\$624</b>	<b>\$1,073</b>	<b>\$2,317</b>
without redemption	<b>\$202</b>	<b>\$624</b>	<b>\$1,073</b>	<b>\$2,317</b>
<b>Class R</b>	<b>\$118</b>	<b>\$368</b>	<b>\$638</b>	<b>\$1,409</b>
<b>Class T</b>	<b>\$603</b>	<b>\$926</b>	<b>\$1,272</b>	<b>\$2,244</b>

\*\*Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor for financing the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

**Shareholder services fee:** the fee paid to the fund's distributor for providing shareholder services.

**Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial institution intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

---

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.75% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Brian C. Ferguson has been the fund's primary portfolio manager and has been employed by Dreyfus since April 2001. Mr. Ferguson has been employed by The Boston Company Asset Management, LLC (TBCAM), an affiliate of Dreyfus, since June 1997. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the fiscal periods indicated. Certain information reflects financial results for a single fund share. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you

had reinvested all dividends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	Class A	Class B	Class C	Class T	Class R
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

---

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

---

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information (SAI).

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Founders Funds. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or

Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the SAI.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- participants in certain Health Savings Account programs
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

---

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is accepted by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

**Orders to buy and sell shares** received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

---

#### Minimum investments

	Initial	Additional
<b>Regular accounts</b>	<b>\$1,000</b>	<b>\$100</b>
<b>Traditional IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Spousal IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Roth IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Education Savings Accounts</b>	<b>\$500</b>	<b>no minimum</b> <i>after the first year</i>

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

#### Concepts to understand

**Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

**Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:**

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

### Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

*\* Not available online on accounts whose address has been changed within the last 30 days.*

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

**Unless you decline teleservice privileges** on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax adviser before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You also can exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request, you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You'll also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR **REGULAR ACCOUNTS**

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279648
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279648
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.  
Make checks payable to: **The Dreyfus Family of Funds**.

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

A series of Dreyfus Growth and Value Funds, Inc.  
SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

## **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

## **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

## **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

Class B: **DBSM**

Class C: **DCSM**

Class R: **DRSM**

Class T: **DMGT**

### GOAL/APPROACH

The fund seeks capital appreciation. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of midcap companies. The fund currently considers midcap companies to be those companies with market capitalizations that fall within the range of the Russell Midcap Growth Index at the time of purchase. As of October 31, 2005, the market capitalization of such companies ranged between \$850 million and \$17 billion. The fund invests in growth companies that the portfolio manager believes have solid market positions and reasonable financial strength. The fund's stock investments may include common stocks, preferred stocks and convertible securities of U.S. and foreign issuers, including those purchased in initial public offerings or shortly thereafter.

The portfolio manager seeks investment opportunities for the fund in companies with fundamental strengths that indicate the potential for growth. The portfolio manager focuses on individual stock selection, building the portfolio from the bottom up, searching one by one for companies whose fundamental strengths suggest the potential to provide superior earnings growth over time. The investment process begins with the screening of reported financials. For a stock to be considered for investment, the following criteria are used:

- **positive earnings growth**, considering only currently profitable companies, that are showing positive earnings growth
- **high return on equity**, investing only in profitable companies as evidenced by their high return on equity
- **substantial reinvestment rate**, identifying companies that reinvest in themselves and have "high retained earnings," giving them the ability to self-finance growth
- **strong financials**, seeking to purchase companies that have strong balance sheets and are not overly leveraged

# The Fund

- **attractive market price**, seeking to purchase companies whose stocks are selling below their fair market value as determined by the manager's valuation model
- **market demand — liquidity**, monitoring the trading volume of all qualified stocks in an attempt to reduce market price impact

The fund typically sells a stock when the company's earnings are no longer growing, or it no longer possesses the characteristics that caused its purchase. A stock may be a sell candidate when its valuation reaches or exceeds its calculated fair value, or there are deteriorating fundamentals. The fund also may sell a stock if it becomes an overweighted portfolio position, as determined by the portfolio manager.

### Concepts to understand

**Midcap companies:** generally, established companies that may not be as well known as larger, more established companies. Midcap companies may lack the resources to weather economic shifts, though they can be faster to innovate than larger companies.

**Growth companies:** companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Small and midsize company risk.* Small and midsize companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Growth stock risk.* Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns.
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. Each of these risks could increase the fund's volatility.

- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities or money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the performance of the fund's Class A shares for the fund's first full calendar year of operations. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the average annual total returns of the fund's Class A, B, C, R and T shares to those of the Russell Midcap Growth Index, a broad measure of midcap growth stock performance. These returns include applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

### Year-by-year total returns *as of 12/31 each year (%)*

#### Class A shares

**Best Quarter:** Q4 '04 +12.96%

**Worst Quarter:** Q3 '04 -1.29%

*The fund's Class A year-to-date total return as of 9/30/05 was 6.34%.*

### Average annual total returns *as of 12/31/04*

Share class/ inception date	1 Year	Since inception
<b>Class A</b> (3/31/03) <i>returns before taxes</i>	<b>10.39%</b>	<b>22.55%</b>

<b>Russell Midcap Growth Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>15.48%</b>	<b>33.05%</b>

### What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> ( <i>fees paid from your account</i> )					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses**</b> ( <i>expenses paid from fund assets</i> )					
<i>% of average daily net assets</i>					
Management fees	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>
Rule 12b-1 fee	<b>none</b>	<b>.75</b>	<b>.75</b>	<b>none</b>	<b>.25</b>
Shareholder services fee	<b>.25</b>	<b>.25</b>	<b>.25</b>	<b>none</b>	<b>.25</b>
Other expenses	<b>3.54</b>	<b>[3.57]</b>	<b>3.44</b>	<b>3.41</b>	<b>3.42</b>
<b>Total annual fund operating expenses</b>	<b>4.54</b>	<b>5.26</b>	<b>5.19</b>	<b>4.16</b>	<b>4.67</b>
Fee waiver and/or expense reimbursements	<b>(3.04)</b>	<b>(3.01)</b>	<b>(2.94)</b>	<b>(2.91)</b>	<b>(2.92)</b>
<b>Net operating expenses</b>	<b>1.50</b>	<b>2.25</b>	<b>2.25</b>	<b>1.25</b>	<b>1.75</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1% if redeemed within one year.

\*\* Net operating expenses have been restated to reflect that Dreyfus has agreed, until August 31, 2007, to waive receipt of its fee and/or assume the expenses of the fund so that the expenses of none of the classes exceed 1.25% (excluding taxes, brokerage commissions, extraordinary expenses, shareholder services fees and Rule 12b-1 fees).

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$719</b>	<b>\$1,311</b>	<b>\$2,209</b>	<b>\$4,491</b>
<b>Class B</b>				
<i>with redemption</i>	<b>\$628</b>	<b>\$1,297</b>	<b>\$2,270</b>	<b>\$4,463***</b>
<i>without redemption</i>	<b>\$228</b>	<b>\$997</b>	<b>\$2,070</b>	<b>\$4,463***</b>
<b>Class C</b>				
<i>with redemption</i>	<b>\$328</b>	<b>\$991</b>	<b>\$2,051</b>	<b>\$4,685</b>
<i>without redemption</i>	<b>\$228</b>	<b>\$991</b>	<b>\$2,051</b>	<b>\$4,685</b>
<b>Class R</b>	<b>\$127</b>	<b>\$695</b>	<b>\$1,580</b>	<b>\$3,859</b>
<b>Class T</b>	<b>\$620</b>	<b>\$1,255</b>	<b>\$2,186</b>	<b>\$4,538</b>

\*\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five- and ten-years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor for financing the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

**Shareholder services fee:** the fee paid to the fund's distributor for providing shareholder services.

**Other expenses:** fees paid by the fund for the current fiscal year for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

---

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, Dreyfus waived receipt of its management fee from the fund pursuant to an undertaking. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Fred A. Kuehndorf is the fund's primary portfolio manager. Mr. Kuehndorf has managed the fund since its inception. Mr. Kuehndorf has been a portfolio manager for The Boston Company Asset Management, LLC (TBCAM), an affiliate of Dreyfus, since September 2005. At that time, he became a dual employee of Dreyfus and TBCAM. Prior to joining TBCAM, Mr. Kuehndorf was a senior vice president and senior portfolio manager with Lighthouse Dreyfus Growth Advisors, an affiliate of Dreyfus, since November 2002. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the periods indicated. “Total return” shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all divi-

dends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund’s financial statements, is included in the annual report, which is available upon request.

	Year Ended August 31,

<sup>1</sup> From March 31, 2003 (commencement of operations) to August 31, 2003.<sup>2</sup> Based on average shares outstanding at each month end.<sup>3</sup> Exclusive of sales charge.<sup>4</sup> Not annualized.

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	<b>Class A</b>	<b>Class B</b>	<b>Class C</b>	<b>Class T</b>	<b>Class R</b>
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

---

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

---

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information (SAI).

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of certain other Dreyfus Premier Funds or Founders Funds. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.

- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the SAI.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

---

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

**Orders to buy and sell shares** received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
Regular accounts	\$1,000	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum after the first year

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

- Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

**Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:**

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

### Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days / <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days / <b>\$20,000</b> per day

*\* Not available online on accounts whose address has been changed within the last 30 days.*

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

**Unless you decline teleservice privileges** on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR REGULAR ACCOUNTS

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479973
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479973
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.  
Make checks payable to: **The Dreyfus Family of Funds**.

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail the slip and the check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Trust Company  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479973
- the fund name
- the share class
- your account number
- name of investor
- the contribution year
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

#### Automatically

**All services** Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

For information and assistance, contact your financial representative or call toll free in the U.S. **1-800-554-4611**. Make checks payable to: **The Dreyfus Trust Company, Custodian**.

# For More Information

## **Dreyfus Premier Select Midcap Growth Fund**

A series of Dreyfus Growth and Value Funds, Inc.

SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

### **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

### **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

### **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

To obtain information:

## GOAL/APPROACH

The fund seeks long-term capital growth. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of companies included in the Russell 1000 Value Index at the time of purchase. The fund's stock investments may include common stocks, preferred stocks and convertible securities of U.S. and foreign issuers, including those purchased in initial public offerings.

The portfolio managers select stocks through a "bottom-up" structured approach that seeks to identify undervalued securities using a quantitative screening process. This process is driven by computer models that identify and rank stocks based on:

- **fundamental momentum**, meaning measures that reflect the changes in short-term earnings outlook through factors such as revised earnings estimates and earnings surprises
- **relative value**, such as current and forecasted price-to-earnings ratios, price-to-book ratios, yields and other price-sensitive data for a stock compared to its past, its peers and the models' overall stock universe
- **long-term growth**, based on measure that reflect the changes in estimated long-term earnings growth over multiple horizons
- **additional factors**, such as technical factors, trading by company insiders or share issuance/buy-back data

Next, the portfolio managers, using the BARRA E3 Risk Model and Optimizer construct the portfolio through a "bottom-up" and structured approach, focusing on stock selection as opposed to making proactive decisions as to industry sector exposure. The fund attempts to have a neutral exposure to industries and capitalizations relative to the Russell 1000 Value Index. Finally, within each sector and style subset, the fund overweights the most attractive stocks and underweights or zero weights the stocks that have been ranked least attractive.

# The Fund

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

## Concepts to understand

**Large companies:** established companies that tend to have long histories of operation, well-established business relationships, substantial resources and the ability to weather change and economic downturn.

**Computer models:** proprietary computer models that evaluate and rank a universe of over 3,500 stocks. The portfolio managers review each of the screens on a regular basis. The portfolio managers also maintain the flexibility to adapt the screening criteria to changes in market conditions.

**Value companies:** companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Value stock risk.* Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing growth stocks).
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.
- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.

- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. Each of these risks could increase the fund's volatility.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions, and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the fund's Class A performance from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the average annual total returns of the fund's Class A, B, C, R and T shares to those of the Russell 1000 Value Index, a broad measure of value stock performance. These returns include applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

### Year-by-year total returns *as of 12/31 each year (%)*

#### Class A shares

**Best Quarter:** Q4 '04 +9.30%

**Worst Quarter:** Q2 '04 -1.06%

The fund's Class A year-to-date total return as of 9/30/05 was 6.06%.

### Average annual total returns *as of 12/31/04*

Share class/ inception date	1 Year	Since inception
<b>Class A</b> (12/31/03) <i>returns before taxes</i>	<b>10.13%</b>	<b>10.13%</b>

<b>Russell 1000 Value Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>16.49%</b>	<b>16.49%</b>

### What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> ( <i>fees paid from your account</i> )					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses</b> ( <i>expenses paid from fund assets</i> ) <i>% of average daily net assets</i>					
Management fees	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>	<b>.75</b>
Rule 12b-1 fee	<b>none</b>	<b>.75</b>	<b>.75</b>	<b>none</b>	<b>.25</b>
Shareholder services fee	<b>.25</b>	<b>.25</b>	<b>.25</b>	<b>none</b>	<b>.25</b>
Other expenses	<b>3.96</b>	<b>3.96</b>	<b>3.96</b>	<b>3.95</b>	<b>3.95</b>
<b>Total</b>	<b>4.96</b>	<b>5.71</b>	<b>5.71</b>	<b>4.70</b>	<b>5.20</b>
Fee waiver and/or expense reimbursements	<b>(3.46)</b>	<b>(3.46)</b>	<b>(3.46)</b>	<b>(3.45)</b>	<b>(3.45)</b>
<b>Net operating expenses**</b>	<b>1.50</b>	<b>2.25</b>	<b>2.25</b>	<b>1.25</b>	<b>1.75</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

\*\* Net operating expenses have been restated to reflect that Dreyfus has contractually agreed, until August 31, 2007, to waive receipt of its fees and/or assume the expenses of the fund so that the expenses of none of the classes exceed 1.25% (excluding Rule 12b-1 fees, shareholder services fees, taxes, interest, brokerage commissions, commitment fees on borrowings and extraordinary expenses).

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$719</b>	<b>\$1,349</b>	<b>\$2,318</b>	<b>\$4,744</b>
<b>Class B</b>				
with redemption	<b>\$628</b>	<b>\$1,339</b>	<b>\$2,388</b>	<b>\$4,725***</b>
without redemption	<b>\$220</b>	<b>\$1,039</b>	<b>\$2,188</b>	<b>\$4,725***</b>
<b>Class C</b>				
with redemption	<b>\$328</b>	<b>\$1,039</b>	<b>\$2,188</b>	<b>\$4,988</b>
without redemption	<b>\$228</b>	<b>\$1,039</b>	<b>\$2,188</b>	<b>\$4,988</b>
<b>Class R</b>	<b>\$127</b>	<b>\$747</b>	<b>\$1,731</b>	<b>\$4,217</b>
<b>Class T</b>	<b>\$620</b>	<b>\$1,303</b>	<b>\$2,323</b>	<b>\$4,853</b>

\*\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five-, and ten-years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor for financing the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment in such shares and may cost you more than paying other types of sales charges.

**Shareholder services fee:** a fee paid to the fund's distributor (which may pay third parties) for providing shareholder services to the holders of Class A, B, C and T shares.

**Other expenses:** fees paid by the fund for the miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, Dreyfus waived receipt of its management fee from the fund pursuant to an undertaking. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged its affiliate, Franklin Portfolio Associates, LLC, located at Two International Place, Boston, Massachusetts 02110, to serve as the fund's sub-investment adviser. Franklin Portfolio, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments. As of November 30, 2005, Franklin Portfolio managed approximately \$33 billion in assets for corporate pension plans, public pension plans, endowments, foundations, and Taft-Hartley pension plans, as well as acting as sub-adviser for seven registered investment companies with approximately \$16.3 billion in aggregate assets.

Oliver E. Buckley is the fund's primary portfolio manager. Mr. Buckley has been employed by Franklin Portfolio since September 2000. Prior to joining Franklin Portfolio, Mr. Buckley was responsible for research in the structured products group at INVESCO from 1996 to September 2000. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following table describes the performance for each share class for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased or (decreased) during each period, assuming you had reinvested all

dividends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

Class A	Year Ended August 31,	
	2005	2004 <sup>1</sup>

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	Class A	Class B	Class C	Class T	Class R
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

## Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the higher ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has a lower ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information (SAI).

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Founders Funds that are subject to a sales load. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.

- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the SAI.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are subject to a lower Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders may pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its existing shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

**Orders to buy and sell shares** received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
Regular accounts	\$1,000	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum after the first year

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

**Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

**Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:**

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

## Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

*\* Not available online on accounts whose address has been changed within the last 30 days.*

## Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

**Unless you decline teleservice privileges** on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- “redeem in kind,” or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

#### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares when the fund has realized** but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or Class C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR **REGULAR ACCOUNTS**

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900480122
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900480122
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.  
Make checks payable to: **The Dreyfus Family of Funds**.

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

INSTRUCTIONS FOR **REGULAR ACCOUNTS** (continued)

## Dreyfus Premier Structured Midcap Fund

Ticker Symbols **Class A: DPSAX**  
**Class B: DPSBX**  
**Class C: DPSCX**  
**Class R: DPSRX**  
**Class T: DPSTX**

### GOAL/APPROACH

The fund seeks long-term capital growth. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of companies included in the S&P 400 Midcap Index or the Russell Midcap Index at the time of purchase. The fund's stock investments may include common stocks, preferred stocks and convertible securities of U.S. and foreign issuers, including those purchased in initial public offerings.

The portfolio managers select stocks through a "bottom-up," structured approach that seeks to identify undervalued securities using a quantitative screening process. This process is driven by computer models that identify and rank stocks based on:

- **fundamental momentum**, meaning measures that reflect the changes in short-term earnings outlook through factors such as revised earnings estimates and earnings surprises
- **relative value**, such as current and forecasted price-to-earnings ratios, price-to-book ratios, yields and other price-sensitive data for a stock compared to its past, its peers and the models' overall stock universe
- **long-term growth**, based on measure that reflect the changes in estimated long-term earnings growth over multiple horizons
- **additional factors**, such as technical factors, trading by company insiders or share issuance/buy-back data

Next, the portfolio managers construct the portfolio through a "bottom-up" and structured approach, focusing on stock selection as opposed to making proactive decisions as to industry sector exposure. The fund attempts to have a neutral exposure to industries and capitalizations relative to its benchmark. Finally, within each sector and style subset, the fund overweights the most attractive stocks and underweights or zero weights the stocks that have been ranked least attractive.

# The Fund

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

### Concepts to understand

**Midcap companies:** established companies that may not be as well known as larger, more established companies. Midcap companies may lack the resources to weather economic shifts, though they can be faster to innovate than large companies.

**Growth companies:** companies whose earnings are expected to grow faster than the overall market. Often, growth stocks have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

**Value companies:** companies that appear underpriced according to certain financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Midsized company risk.* Midsized companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Growth and value stock risk.* By investing in a mix of growth and value companies, the fund assumes the risks of both. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that may cushion stock prices in market downturns. Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.
- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.

- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions, and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's Class A performance from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the fund's average annual total returns for each class to those of the Standard & Poor's Midcap 400 Index and the Russell Midcap Index, broad measures of midcap value stock performance. These returns include the fund's applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

### Year-by-year total returns as of 12/31 each year (%)

#### Class A shares

**Best Quarter:** Q2 '03 **+17.78%**

**Worst Quarter:** Q3 '02 **-14.97%**

The fund's Class A year-to-date total return as of 9/30/05 was 5.98%.

### Average annual total returns as of 12/31/04

Share class/ inception date	1 Year	Since inception
<b>Class A</b> (6/29/01) <i>returns before taxes</i>	<b>12.47%</b>	<b>7.64%</b>
<b>Class A</b> <i>returns after taxes on distributions</i>	<b>12.13%</b>	<b>7.47%</b>
<b>Class A</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>8.54%</b>	<b>6.52%</b>
<b>Class B</b> (6/29/01) <i>returns before taxes</i>	<b>14.33%</b>	<b>7.92%</b>
<b>Class C</b> (6/29/01) <i>returns before taxes</i>	<b>17.43%</b>	<b>8.61%</b>
<b>Class R</b> (6/29/01) <i>returns before taxes</i>	<b>19.77%</b>	<b>9.77%</b>
<b>Class T</b> (6/29/01) <i>returns before taxes</i>	<b>13.77%</b>	<b>7.80%</b>
<b>S&amp;P 400 Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>16.48%</b>	<b>8.48%*</b>
<b>Russell Midcap Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>20.22%</b>	<b>9.15%*</b>

\* For comparative purposes, the value of each index on 6/30/01 is used as the beginning value on 6/29/01.

### What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> <i>(fees paid from your account)</i>					
Maximum front-end sales charge on purchases <i>% of offering price</i>	5.75	none	none	none	4.50
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	none*	4.00	1.00	none	none*
<b>Annual fund operating expenses</b> <i>(expenses paid from fund assets)</i> <i>% of average daily net assets</i>					
Management fees	.75	.75	.75	.75	.75
Rule 12b-1 fee	none	.75	.75	none	.25
Shareholder services fee	.25	.25	.25	none	.25
Other expenses	.71	.87	.70	.98	.68
<b>Total annual fund operating expenses</b>	1.71	2.62	2.45	1.73	1.93
Fee waiver and/or expense reimbursements	(.21)	(.37)	(.20)	(.48)	(.18)
<b>Net operating expenses**</b>	1.50	2.25	2.25	1.25	1.75

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

\*\* Net operating expenses have been restated to reflect that Dreyfus has contractually agreed, until August 31, 2007, to waive receipt of its fee and/or assume the expenses of the fund so that the expenses of none of the classes exceed 1.25% (excluding taxes, brokerage commissions, extraordinary expenses, shareholder services fees and Rule 12b-1 fees).

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$719</b>	<b>\$1,043</b>	<b>\$1,410</b>	<b>\$2,441</b>
<b>Class B</b>				
<i>with redemption</i>	<b>\$628</b>	<b>\$1,041</b>	<b>\$1,519</b>	<b>\$2,462***</b>
<i>without redemption</i>	<b>\$228</b>	<b>\$741</b>	<b>\$1,319</b>	<b>\$2,462***</b>
<b>Class C</b>				
<i>with redemption</i>	<b>\$328</b>	<b>\$724</b>	<b>\$1,267</b>	<b>\$2,750</b>
<i>without redemption</i>	<b>\$228</b>	<b>\$724</b>	<b>\$1,267</b>	<b>\$2,750</b>
<b>Class R</b>	<b>\$127</b>	<b>\$448</b>	<b>\$843</b>	<b>\$1,950</b>
<b>Class T</b>	<b>\$620</b>	<b>\$994</b>	<b>\$1,411</b>	<b>\$2,570</b>

\*\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five- and ten-years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor for financing the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment in such shares and may cost you more than paying other types of sales charges.

**Shareholder services fee:** a fee paid to the fund's distributor (which may pay third parties) for providing shareholder services to the holders of Class A, B, C and T shares.

**Other expenses:** fees paid by the fund for the miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

### Investor adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.50% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Dreyfus has engaged its affiliate, Franklin Portfolio Associates, LLC, located at One Boston Place, Boston, Massachusetts 02108, to serve as the fund's sub-investment adviser. Franklin Portfolio, subject to Dreyfus' supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments. As of November 30, 2005, Franklin Portfolio managed approximately \$33 billion in assets for corporate pension plans, public pension plans, endowments, foundations, and Taft-Hartley pension plans, as well as acting as sub-adviser for seven registered investment companies with approximately \$16.3 billion in aggregate assets.

Michael F. Dunn is the fund's primary portfolio manager. Mr. Dunn has been employed by Franklin Portfolio since October 1999. Prior to joining Franklin Portfolio, Mr. Dunn was responsible for quantitative research and development at Wellington Management Company from 1994 to October 1999. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the fiscal periods indicated. “Total return” shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all

dividends and distributions. These figures have been independently audited by Ernst & Young LLP whose report, along with the fund’s financial statements, is included in the annual report, which is available upon request.

		Year Ended August 31,				
Class A		2005	2004	2003	2002	2001 <sup>1</sup>
<b>Per-Share Data (\$):</b>						
Net asset value, beginning of period		14.74	12.88	10.84	11.79	12.50
Investment operations:	Investment income (loss) – net <sup>2</sup>	(.02)	(.01)	(.04)	(.05)	.00 <sup>3</sup>

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees, and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	<b>Class A</b>	<b>Class B</b>	<b>Class C</b>	<b>Class T</b>	<b>Class R</b>
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

---

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

---

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information (SAI).

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of the fund and certain other Dreyfus Premier Funds or Founders Funds that are subject to a sales load. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in the fund and certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.

- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the SAI.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

---

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders may pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

Class R shares may be purchased by:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares made through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the fund may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
Regular accounts	\$1,000	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum after the first year

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

- Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in paper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

**Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:**

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

### Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

*\* Not available online on accounts whose address has been changed within the last 30 days.*

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

**Unless you decline teleservice privileges** on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

#### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when a fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You also can exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contact your financial representative.

### Reinvestment privilege

**Upon written request, you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR **REGULAR ACCOUNTS**

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.

Mail your application and a check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.

Mail the slip and the check to:

Name of Fund

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:

The Dreyfus Family of Funds

P.O. Box 55268, Boston, MA 02205-8502

Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479582
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479582
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.

Make checks payable to: **The Dreyfus Family of Funds**.

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail the slip and the check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number and fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Trust Company  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479582
- the fund name
- the share class
- your account number
- name of investor
- the contribution year
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

#### Automatically

**All services** Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

For information and assistance, contact your financial representative or call toll free in the U.S. **1-800-554-4611**. Make checks payable to: **The Dreyfus Trust Company, Custodian**.

# For More Information

## **Dreyfus Premier Structured Midcap Fund**

A series of Dreyfus Growth and Value Funds, Inc.

SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

### **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

### **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI incorporated by reference (is legally considered part of this prospectus).

### **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

## Dreyfus Premier International Value Fund

Ticker Symbols **Class A: DVLAX**  
**Class B: DIBVX**  
**Class C: DICVX**  
**Class R: DIRVX**  
**Class T: DITVX**

### GOAL/APPROACH

The fund seeks long-term capital growth. To pursue this goal, the fund normally invests at least 80% of its assets in stocks. The fund ordinarily invests most of its assets in securities of foreign issuers which Dreyfus considers to be value companies. The fund typically invests in companies in at least ten foreign countries, and limits its investments in any single company to no more than 5% of its assets at the time of purchase. The fund's stock investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings or shortly thereafter.

The fund's investment approach is value oriented and research driven. In selecting stocks, the fund manager identifies potential investments through extensive quantitative and fundamental research. Emphasizing individual stock selection rather than economic and industry trends, the fund focuses on three key factors:

- **value**, or how a stock is valued relative to its intrinsic worth based on traditional value measures
- **business health**, or overall efficiency and profitability as measured by return on assets and return on equity
- **business momentum**, or the presence of a catalyst (such as a corporate restructuring, change in management or spin-off) that will trigger a price increase near term to midterm

# The Fund

The fund typically sells a stock when it is no longer considered a value company, appears less likely to benefit from the current market and economic environment, shows deteriorating fundamentals or declining momentum, or falls short of the managers' expectations.

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

### Concepts to understand

**Value companies:** companies that appear undervalued in terms of price relative to other financial measurements of their intrinsic worth or business prospects (such as price-to-earnings or price-to-book ratios). For international investing, "value" is determined relative to a company's home market and its global sector. Because a stock can remain undervalued for years, value investors often look for factors that could trigger a rise in price.

**Foreign companies:** companies (i) that are organized under the laws of a foreign country; (ii) whose principal trading market is in a foreign country; or (iii) with a majority of their assets or business outside the U.S.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Foreign investment risk.* The fund's performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged.
- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Small and midsize company risk.* Small and midsize companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Value stock risk.* Because different types of stocks tend to shift in and out of favor depending on the market and economic conditions, the fund's performance may sometimes be lower or higher than other types of funds. Value stocks involve the risk that they may never reach what the portfolio manager believes is their full market value, either because the market fails to recognize the stock's intrinsic worth or the portfolio manager misgauged that worth. They also may decline in price, even though in theory they are already undervalued. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, the fund's performance may sometimes be lower or higher than that of other types of funds (such as those emphasizing growth stocks).
- *Market sector risk.* The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.

- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

Under adverse market conditions, the fund could invest some or all of its assets in the securities of U.S. issuers, U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's Class A performance from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the average annual total returns of each of the fund's share classes to those of the Morgan Stanley Capital International (MSCI) Europe, Australasia, Far East (EAFE®) Index, a broad measure of foreign stock performance. These returns include the fund's applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

### What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

### Year-by-year total returns as of 12/31 each year (%)

#### Class A shares

**Best Quarter:** Q2 '03 +21.71%

**Worst Quarter:** Q3 '02 -20.49%

The fund's Class A year-to-date total return as of 9/30/05 was 6.63%.

### Average annual total returns as of 12/31/04

<b>Class A</b> returns after taxes on distributions and sale of fund shares	<b>8.75%</b>	<b>2.35%</b>	<b>6.27%</b>
<b>Class B</b> (11/15/02) returns before taxes	<b>14.86%</b>	–	<b>24.58%</b>
<b>Class C</b> (11/15/02) returns before taxes	<b>17.97%</b>	–	<b>25.87%</b>
<b>Class R</b> (11/15/02) returns before taxes	<b>20.26%</b>	–	<b>27.10%</b>
<b>Class T</b> (11/15/02) returns before taxes	<b>14.01%</b>	–	<b>23.06%</b>
<b>MSCI EAFE® Index</b> reflects no deduction for fees, expenses or taxes	<b>20.25%</b>	<b>-1.13%</b>	<b>5.33%*</b>

\* Based on the life of Class A. For comparative purposes, the value of the index on 9/30/95 is used as the beginning value on 9/29/95.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> ( <i>fees paid from your account</i> )					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses</b> ( <i>expenses paid from fund assets</i> ) <i>% of average daily net assets</i>					
Management fees	<b>1.00</b>	<b>1.00</b>	<b>1.00</b>	<b>1.00</b>	<b>1.00</b>
Rule 12b-1 fee	<b>none</b>	<b>0.75</b>	<b>0.75</b>	<b>none</b>	<b>0.25</b>
Shareholder services fee	<b>0.25</b>	<b>0.25</b>	<b>0.25</b>	<b>none</b>	<b>0.25</b>
Other expenses	<b>0.26</b>	<b>0.32</b>	<b>0.26</b>	<b>0.13</b>	<b>0.42</b>
<b>Total</b>	<b>1.51</b>	<b>2.32</b>	<b>2.26</b>	<b>1.13</b>	<b>1.92</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1.00% if redeemed within one year.

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$720</b>	<b>\$1,025</b>	<b>\$1,351</b>	<b>\$2,273</b>
<b>Class B</b>				
with redemption	<b>\$635</b>	<b>\$1,024</b>	<b>\$1,440</b>	<b>\$2,267**</b>
without redemption	<b>\$235</b>	<b>\$724</b>	<b>\$1,240</b>	<b>\$2,267**</b>
<b>Class C</b>				
with redemption	<b>\$329</b>	<b>\$706</b>	<b>\$1,210</b>	<b>\$2,595</b>
without redemption	<b>\$229</b>	<b>\$706</b>	<b>\$1,210</b>	<b>\$2,595</b>
<b>Class R</b>	<b>\$115</b>	<b>\$359</b>	<b>\$622</b>	<b>\$1,375</b>
<b>Class T</b>	<b>\$636</b>	<b>\$1,026</b>	<b>\$1,440</b>	<b>\$2,592</b>

\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total returns each year and no changes in expenses. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor for financing the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

**Shareholder services fee:** the fee paid to the fund's distributor for providing shareholder services.

**Other expenses:** fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

---

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 1.00% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct and stable identity.

The fund's primary portfolio manager is D. Kirk Henry. Mr. Henry has held this position since June 2002. Mr. Henry has been employed by Dreyfus since May 1996 and by The Boston Company Asset Management LLC (TBCAM), an affiliate of Dreyfus, since 1994. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the fiscal periods indicated. Certain information reflects financial results for a single share. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had

reinvested all dividends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	Class A	Class B	Class C	Class T	Class R
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

---

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

---

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information (SAI).

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of certain other Dreyfus Premier Funds or Founders Funds. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or

Founders Funds, in any class of shares, by your spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the SAI.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

You may buy Class R shares if you are:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions of Class B or Class C shares through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

Orders to buy and sell shares received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

Minimum investments

	Initial	Additional
Regular accounts	\$1,000	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum after the first year

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Concepts to understand

- Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

**Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:**

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

### Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days / <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days / <b>\$20,000</b> per day

\* Not available online on accounts whose address has been changed within the last 30 days.

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

**Unless you decline teleservice privileges** on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax adviser before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or it may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or C shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	---

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request, you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You'll also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR REGULAR ACCOUNTS

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279605
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279605
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Call us or your financial representative to request your transaction. A check will be sent to the address of record.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.  
Make checks payable to: **The Dreyfus Family of Funds**

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or to receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but it may take up to eight business days to clear. Electronic checks are usually available without a fee at all Automated Clearing House (ACH) banks.

INSTRUCTIONS FOR **REGULAR ACCOUNTS** (continued)

— Online ([www.dreyfus.com](http://www.dreyfus.com))

TO ADD TO AN ACCOUNT

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction.

TO SELL SHARES

**Wire** Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction. A check will be sent to the address of record.

- Automatically

**With an initial investment** Indicate on your application which automatic service(s) you want. Return your application with your investment.

**All services** Call us or your financial representative to request a form to add any automatic investing service (see “Services for Fund Investors”). Complete and return the form along with any other required materials.

**Dreyfus Automatic Withdrawal Plan** Call us or your financial representative to request a form to add the plan. Complete the form, specifying the amount and frequency of withdrawals you would like.

Be sure to maintain an account balance of \$5,000 or more.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail the slip and the check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number and fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Trust Company  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900279605
- the fund name
- the share class
- your account number
- name of investor
- the contribution year
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

#### Automatically

**All services** Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

For information and assistance, contact your financial representative or call toll free in the U.S. **1-800-554-4611.**

Make checks payable to: **The Dreyfus Trust Company, Custodian**

# For More Information

## Note to Investors

---

The fund intends to close to new investors after it reaches \$500 million in total assets, or December 29, 2006, whichever occurs first. Shareholders of the fund at that time may continue to buy shares in existing accounts. Shareholders whose accounts have a zero balance on or after the date the fund closes will be prohibited from reactivating the account or opening a new account. Investors who do not own shares of the fund at the closing date generally will not be allowed to buy shares of the fund, with the following exceptions. New accounts may be opened by participants in group employer retirement plans (and their successor plans), provided that the plans are approved by Dreyfus and establish the fund as an investment option under the plans by the closing date. New accounts may be opened by discretionary wrap accounts that are approved by Dreyfus and that establish the fund as an investment option under the discretionary wrap accounts before the closing date. New accounts may be opened for the fund's primary portfolio managers and board members who do not have existing accounts. Financial institutions maintaining omnibus accounts with the fund will be prohibited from accepting purchase orders from new investors after the fund closes. Investors may be required to demonstrate eligibility to buy shares of the fund before an investment is accepted after the fund has closed. The board reserves the right to reopen the fund to new investors after the fund closes, should circumstances change.

### GOAL/APPROACH

The fund seeks long-term capital appreciation. To pursue this goal, the fund normally invests at least 80% of its assets in the stocks of small companies. The fund currently considers small companies to be those companies with market capitalizations that fall within the range of the Russell 2000 Growth Index at the time of purchase. As of September 30, 2005, the market capitalization of such companies ranged between \$29 million and \$3.6 billion. The fund invests in growth companies that the manager believes have solid market positions, visionary leadership and reasonable financial strength. Although the fund normally invests in U.S.-based companies, it may invest up to 35% of its assets in foreign companies. The fund's stock investments may include common stocks, preferred stocks and convertible securities, including those purchased in initial public offerings or shortly thereafter.

The fund's strategy combines market economics with fundamental research. The portfolio manager begins by assessing current economic conditions and forecasting economic expectations. Each industry sector of the Russell 2000 Growth Index is examined to determine the sector's market-capitalized weighting and to estimate the performance of the sector relative to the index as a whole. A balance is determined for the fund, giving greater relative weight to sectors that are expected to outperform the overall market. Stocks are then selected for the fund's portfolio, typically based on the issuer's industry classification, the stock's historical sensitivity to changing economic events and conditions and an assessment of the stock's current valuation and prospects.

# The Fund

The fund typically sells a stock when the manager believes there is a more attractive alternative, the stock's valuation is excessive or there are deteriorating fundamentals, such as the loss of competitive advantage, a failure in management execution or deteriorating capital structure. The fund also may sell stocks when the manager's evaluation of a sector has changed.

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, or as part of a hedging strategy. The fund also may engage in short-selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities.

### Concepts to understand

**Small companies:** generally new, often entrepreneurial companies. Small companies can, if successful, grow faster than large-cap companies and typically use profits for expansion rather than for paying dividends. Their share prices are more volatile than those of larger companies. Small companies fail more often.

**Growth companies:** companies whose revenue and/or earnings are expected to grow faster than the overall market. Often, growth stocks pay little or no dividends, have relatively high price-to-earnings, price-to-book and price-to-sales ratios, and tend to be more volatile than value stocks.

**Russell 2000 Growth Index:** measures the performance of the small-capitalization sector of the U.S. equity market. It is comprised of the Russell 2000 Index companies with higher price-to-book ratios and higher forecasted growth.

## MAIN RISKS

---

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Issuer risk.* The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services.
- *Small company risk.* Small companies carry additional risks because their earnings and revenues tend to be less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. These companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Other investments, including special situations, are made in anticipation of future products and services or events whose delay or cancellation could cause the stock price to drop.
- *Growth stock risk.* Because different types of stocks tend to shift in and out of favor depending on the market and economic conditions, the fund's performance may sometimes be lower or higher than other types of funds. Investors often expect growth companies to increase their earnings at a certain rate. If these expectations are not met, investors can punish the stocks inordinately, even if earnings do increase. In addition, growth stocks typically lack the dividend yield that can cushion stock prices in market downturns.
- *Market sector risk.* The fund may significantly overweight or underweight certain market sectors and companies, which may cause the fund's performance to be more or less sensitive to developments affecting those sectors and companies.
- *Foreign investment risk.* To the extent the fund invests in foreign securities, its performance will be influenced by political, social and economic factors affecting investments in foreign companies. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.
- *Foreign currency risk.* Investments in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedged positions, that the U.S. dollar will decline relative to the currency being hedged.
- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.

- *Derivatives risk.* The fund may invest in derivative instruments, such as options, futures and options on futures (including those relating to stocks, indexes, foreign currencies and interest rates), and swaps. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.
- *IPO risk.* The fund may purchase securities of companies in initial public offerings (IPOs). The prices of securities purchased in IPOs can be very volatile. The effect of IPOs on the fund's performance depends on a variety of factors, including the number of IPOs the fund invests in relative to the size of the fund and whether and to what extent a security purchased in an IPO appreciates or depreciates in value. As a fund's asset base increases, IPOs often have a diminished effect on such fund's performance.

## Other potential risks

At times, the fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

## PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's Class A performance from year to year. Sales loads are not reflected in the chart; if they were, the returns shown would have been lower. The table compares the average annual total returns of the fund's Class A, B, C, R and T shares to those of the Russell 2000 Growth Index, a broad measure of small-cap growth stock performance. These returns include applicable sales loads. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results. Performance of each share class will vary from the performance of the fund's other share classes due to differences in charges and expenses.

After-tax performance is shown only for Class A shares. After-tax performance of the fund's other share classes will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

### Class A shares

**Best Quarter:** Q2 '03 +17.91%  
**Worst Quarter:** Q3 '04 -4.09%

The fund's Class A year-to-date total return as of 9/30/05 was 6.59%.

## Average annual total returns as of 12/31/04

Share class/ inception date	1 Year	Since inception
<b>Class A</b> (6/28/02) <i>returns before taxes</i>	<b>8.99%</b>	<b>11.26%</b>
<b>Class A</b> <i>returns after taxes on distributions</i>	<b>8.97%</b>	<b>11.25%</b>
<b>Class A</b> <i>returns after taxes on distributions and sale of fund shares</i>	<b>5.88%</b>	<b>9.68%</b>
<b>Class B</b> (6/28/02) <i>returns before taxes</i>	<b>10.75%</b>	<b>12.15%</b>
<b>Class C</b> (6/28/02) <i>returns before taxes</i>	<b>13.75%</b>	<b>13.14%</b>
<b>Class R</b> (6/28/02) <i>returns before taxes</i>	<b>16.05%</b>	<b>14.35%</b>

<b>Russell 2000 Growth Index</b> <i>reflects no deduction for fees, expenses or taxes</i>	<b>14.31%</b>	<b>15.47%*</b>

\* For comparative purposes, the value of the index on 6/30/02 used as the beginning value on 6/28/02.

## What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

## EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below.

### Fee table

	Class A	Class B	Class C	Class R	Class T
<b>Shareholder transaction fees</b> ( <i>fees paid from your account</i> )					
Maximum front-end sales charge on purchases <i>% of offering price</i>	<b>5.75</b>	<b>none</b>	<b>none</b>	<b>none</b>	<b>4.50</b>
Maximum contingent deferred sales charge (CDSC) <i>% of purchase or sale price, whichever is less</i>	<b>none*</b>	<b>4.00</b>	<b>1.00</b>	<b>none</b>	<b>none*</b>
<b>Annual fund operating expenses</b> ( <i>expenses paid from fund assets</i> )					
<i>% of average daily net assets</i>					
Management fees	<b>.90</b>	<b>.90</b>	<b>.90</b>	<b>.90</b>	<b>.90</b>
Rule 12b-1 fees	<b>none</b>	<b>.75</b>	<b>.75</b>	<b>none</b>	<b>.25</b>
Shareholder services fee	<b>.25</b>	<b>.25</b>	<b>.25</b>	<b>none</b>	<b>.25</b>
Other expenses	<b>3.30</b>	<b>3.27</b>	<b>3.30</b>	<b>3.13</b>	<b>3.27</b>
<b>Total annual fund operating expenses</b>	<b>4.45</b>	<b>5.17</b>	<b>5.20</b>	<b>4.03</b>	<b>4.67</b>
Fee waiver and/or expense reimbursements	<b>(2.80)</b>	<b>(2.77)</b>	<b>(2.80)</b>	<b>(2.63)</b>	<b>(2.72)</b>
<b>Net operating expenses**</b>	<b>1.65</b>	<b>2.40</b>	<b>2.40</b>	<b>1.40</b>	<b>1.95</b>

\* Shares bought without an initial sales charge as part of an investment of \$1 million or more may be charged a CDSC of 1% if redeemed within one year.

\*\* Net operating expenses have been restated to reflect that Dreyfus has agreed, until August 31, 2007, to waive receipt of its fees and/or assume the expenses of the fund so that the expenses of none of the classes exceed 1.40% (excluding taxes, brokerage commissions, extraordinary expenses, interest expenses, commitment fees on offerings, shareholder services fees and Rule 12b-1 fees).

### Expense example

	1 Year	3 Years	5 Years	10 Years
<b>Class A</b>	<b>\$733</b>	<b>\$1,317</b>	<b>\$2,198</b>	<b>\$4,444</b>
<b>Class B</b>				
<i>with redemption</i>	<b>\$643</b>	<b>\$1,303</b>	<b>\$2,258</b>	<b>\$4,416***</b>
<i>without redemption</i>	<b>\$243</b>	<b>\$1,003</b>	<b>\$2,058</b>	<b>\$4,416***</b>
<b>Class C</b>				
<i>with redemption</i>	<b>\$343</b>	<b>\$1,066</b>	<b>\$2,066</b>	<b>\$4,699</b>
<i>without redemption</i>	<b>\$243</b>	<b>\$1,066</b>	<b>\$2,066</b>	<b>\$4,699</b>
<b>Class R</b>	<b>\$143</b>	<b>\$696</b>	<b>\$1,556</b>	<b>\$3,779</b>
<b>Class T</b>	<b>\$639</b>	<b>\$1,273</b>	<b>\$2,202</b>	<b>\$4,549</b>

\*\*\* Assumes conversion of Class B to Class A at end of the sixth year following the date of purchase.

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The one-year example and the first year of the three-, five- and ten-years examples are based on net operating expenses, which reflect the expense waiver/reimbursement by Dreyfus. Because actual returns and expenses will be different, the example is for comparison only.

### Concepts to understand

**Management fee:** the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations.

**Rule 12b-1 fee:** the fee paid to the fund's distributor to finance the sale and distribution of Class B, C and T shares. Because this fee is paid out of the fund's assets on an ongoing basis, over time it will increase the cost of your investment and may cost you more than paying other types of sales charges.

**Shareholder services fee:** the fee paid to the fund's distributor for providing shareholder services.

**Other expenses:** fees paid by the fund for the current fiscal year for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

## MANAGEMENT

---

### Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$173 billion in approximately 200 mutual fund portfolios. For the past fiscal year, Dreyfus waived receipt of its management fee from the fund pursuant to an undertaking. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended August 31, 2005. Dreyfus is the primary mutual fund business of Mellon Financial Corporation (Mellon Financial), a global financial services company. Headquartered in Pittsburgh, Pennsylvania, Mellon Financial is one of the world's leading providers of financial services for institutions, corporations and high net worth individuals, providing institutional asset management, mutual funds, private wealth management, asset servicing, payment solutions and investor services, and treasury services. Mellon Financial has approximately \$4.5 trillion in assets under management, administration or custody, including \$766 billion under management.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

B. Randall Watts, CFA, has been the fund's primary portfolio manager since March 2003. Mr. Watts has been a portfolio manager for The Boston Company Asset Management, LLC (TBCAM), an affiliate of Dreyfus, since 2001. In March 2003, he became a dual employee of Dreyfus and TBCAM. For ten years prior to joining TBCAM, Mr. Watts was a director and portfolio manager with Westfield Capital Management. The Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

## Distributor

The fund's distributor is Dreyfus Service Corporation (DSC), a wholly owned subsidiary of Dreyfus. Dreyfus or DSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are in addition to any sales charges, 12b-1 fees and/or shareholder services fees or other expenses paid by the fund. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

From time to time, Dreyfus or DSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

## Code of ethics

The fund, Dreyfus and DSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

## FINANCIAL HIGHLIGHTS

The following tables describe the performance of each share class for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all

dividends and distributions. These figures have been independently audited by Ernst & Young LLP, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

Class A		Year Ended August 31,			
		2005	2004	2003	2002 <sup>1</sup>

# Your Investment

## SHAREHOLDER GUIDE

The Dreyfus Premier Funds are designed primarily for people who are investing through a third party, such as a bank, broker-dealer or financial adviser, or in a 401(k) or other retirement plan. Third parties with whom you open a fund account may impose policies, limitations and fees which are different from those described in this prospectus. Consult a representative of your plan or financial institution for further information. Consult a representative of your plan or financial institution for further information.

Your financial representative may receive different compensation for selling one class of shares than for selling another class. It is important to remember that the CDSCs and Rule 12b-1 fees for Class B and Class C shares have the same purpose as the front-end sales charge on sales of Class A and Class T shares: to compensate the distributor for concessions and expenses it pays to dealers and financial institutions for selling shares.

### Deciding which class of shares to buy

This prospectus offers Class A, B, C, T and R shares of the fund. The different classes represent investments in the same portfolio of securities, but the classes are subject to different expenses and will likely have different share prices. When choosing a class, you should consider your investment amount, anticipated holding period, the potential costs over your holding period and whether you qualify for any reduction or waiver of the sales charge.

**When you invest in Class A or Class T shares** you generally pay an initial sales charge. Class A shares have no ongoing Rule 12b-1 fees and Class T shares have lower ongoing Rule 12b-1 fees than either Class B or Class C shares. Each class, except Class R shares, is subject to a shareholder service fee. Class R shares are available only to limited types of investors. Please see below for more information regarding the eligibility requirements.

A more complete description of each class follows. You should review these arrangements with your financial representative before determining which class to invest in.

	<b>Class A</b>	<b>Class B</b>	<b>Class C</b>	<b>Class T</b>	<b>Class R</b>
Initial sales charge	up to 5.75%	none	none	up to 4.50%	none
Ongoing distribution fee (Rule 12b-1 fee)	none	0.75%	0.75%	0.25%	none
Ongoing shareholder service fee	0.25%	0.25%	0.25%	0.25%	none
Contingent deferred sales charge	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	sliding scale over six years	1% on sale of shares held for one year or less	1% on sale of shares bought within one year without an initial sales charge as part of an investment of \$1 million or more	none
Conversion feature	no	yes	no	no	no
Recommended purchase maximum	none	\$100,000	\$1 million	\$1 million	none

### Class A share considerations

When you invest in Class A shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment, as the following table shows. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

Since some of your investment goes to pay an up-front sales charge when you purchase Class A shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you are usually better off purchasing Class A shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fees on Class B and Class C shares may eventually exceed the cost of the up-front sales charge
- qualify for a reduced or waived sales charge

If you invest \$1 million or more (and are not eligible to purchase Class R shares), Class A shares will always be the most advantageous choice.

#### Class A sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	5.75%	6.10%
\$50,000 to \$99,999	4.50%	4.70%
\$100,000 to \$249,999	3.50%	3.60%
\$250,000 to \$499,999	2.50%	2.60%
\$500,000 to \$999,999	2.00%	2.00%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

### Class T share considerations

When you invest in Class T shares, you pay the public offering price, which is the share price, or NAV, plus the initial sales charge that may apply to your purchase. The amount of the initial sales charge is based on the size of your investment. We also describe below how you may reduce or eliminate the initial sales charge. (See “Sales charge reductions and waivers.”)

The initial sales charge on Class A is higher than that of Class T. Nevertheless, you are usually better off purchasing Class A shares rather than Class T shares if you:

- plan to own the shares for an extended period of time, since the ongoing Rule 12b-1 fee on Class T may eventually exceed the initial sales charge differential
- invest at least \$1 million, regardless of your investment horizon, because there is no initial sales charge at that level and Class A has no ongoing Rule 12b-1 fee

Since some of your investment goes to pay an up-front sales charge when you purchase Class T shares, you purchase fewer shares than you would with the same investment in Class B or Class C shares. Nevertheless, you should consider purchasing Class T shares, rather than Class B or Class C shares, and paying an up-front sales charge if you:

- qualify for a reduced or waived sales charge
- are unsure of your expected holding period

#### Class T sales charges

Purchase amount	Sales charge as a % of offering price	Sales charge as a % of NAV
Less than \$50,000	4.50%	4.70%
\$50,000 to \$99,999	4.00%	4.20%
\$100,000 to \$249,999	3.00%	3.10%
\$250,000 to \$499,999	2.00%	2.00%
\$500,000 to \$999,999	1.50%	1.50%
\$1 million or more *	none	none

\* No sales charge applies on investments of \$1 million or more, but a contingent deferred sales charge of 1% may be imposed on certain redemptions of such shares within one year of the date of purchase.

## Sales charge reductions and waivers

To receive a reduction or waiver of your initial sales charge, you must let your financial intermediary or the fund know at the time you purchase shares that you qualify for such a reduction or waiver. If you do not let your financial intermediary or the fund know that you are eligible for a reduction or waiver, you may not receive the reduction or waiver to which you are otherwise entitled. In order to receive a reduction or waiver, you may be required to provide your financial intermediary or the fund with evidence of your qualification for the reduction or waiver, such as records regarding shares of Dreyfus Premier Funds or Founders Funds held in accounts with that financial intermediary and other financial intermediaries. Additional information regarding reductions and waivers of sales loads is available, free of charge, at [www.dreyfus.com](http://www.dreyfus.com) and in the fund's Statement of Additional Information.

**You can reduce your initial sales charge** in the following ways:

- *Rights of accumulation.* You can count toward the amount of your investment your total account value in all share classes of certain other Dreyfus Premier Funds or Founders Funds. For example, if you have \$1 million invested in shares of certain other Dreyfus Premier Funds or Founders Funds, you can invest in Class A shares of any fund without an initial sales charge. We may terminate or change this privilege at any time on written notice.
- *Letter of intent.* You can sign a letter of intent, in which you agree to invest a certain amount (your goal) in certain other Dreyfus Premier Funds or Founders Funds over a 13-month period, and your initial sales charge will be based on your goal. A 90-day back-dated period can also be used to count previous purchases toward your goal. Your goal must be at least \$50,000, and your initial investment must be at least \$5,000. The sales charge will be adjusted if you do not meet your goal.
- *Combine with family members.* You can also count toward the amount of your investment all investments in certain other Dreyfus Premier Funds or Founders Funds, in any class of shares, by your

spouse and your children under age 21 (family members), including their rights of accumulation and goals under a letter of intent. Certain other groups may also be permitted to combine purchases for purposes of reducing or eliminating sales charges. (See "How to Buy Shares" in the Statement of Additional Information.)

**Class A shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- full-time or part-time employees, and their family members, of Dreyfus or any of its affiliates
- board members of Dreyfus and board members of the Dreyfus Family of Funds
- full-time employees, and their family members, of financial institutions that have entered into selling agreements with the fund's distributor
- "wrap" accounts for the benefit of clients of financial institutions, provided they have entered into an agreement with the fund's distributor specifying operating policies and standards
- qualified separate accounts maintained by an insurance company; any state, county or city or instrumentality thereof; charitable organizations investing \$50,000 or more in fund shares; and charitable remainder trusts
- investors who have continuously owned shares of the fund since before the imposition of a sales load

**Class A and Class T shares may be purchased** at NAV without payment of a sales charge by the following individuals and entities:

- employees participating in qualified or non-qualified employee benefit plans
- shareholders in Dreyfus-sponsored IRA rollover accounts funded with the proceeds from a Dreyfus-sponsored qualified retirement plan or Dreyfus-sponsored 403(b)(7) plan that invested all or a portion of its assets in the Dreyfus Family of Funds, certain funds advised by Founders Asset Management, LLC, or certain other products made available by the fund's distributor to such plans

### Class B and Class C share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class B or Class C shares buys more shares than the same investment would in Class A or Class T shares. However, you will pay ongoing distribution fees. Over time these fees may cost you more than paying an initial sales charge on Class A or Class T shares.

Due to availability of sales charge discounts for Class A and Class T shares and the higher ongoing fees for Class B and Class C shares, the fund will generally not accept a purchase order for Class B shares in the amount of \$100,000 or more and will generally not accept a purchase order for Class C shares in the amount of \$1 million or more. While the fund will take reasonable steps to prevent investments of \$100,000 or more in Class B shares, and \$1 million or more in Class C shares, it may not be able to identify such investments made through certain financial intermediaries or omnibus accounts.

Class B shares sold within six years of purchase are subject to the following CDSCs:

---

#### Class B sales charges

For shares sold in the:	CDSC as a % of amount redeemed subject to the charge
First year	4.00%
Second year	4.00%
Third year	3.00%
Fourth year	3.00%
Fifth year	2.00%
Sixth year	1.00%
Thereafter	none

Class B shares convert to Class A shares (which are not subject to a Rule 12b-1 fee) approximately six years after the date they were purchased. If you intend to hold your shares less than six years, Class C shares will generally be more economical than Class B shares.

Class C shares redeemed within one year of purchase are subject to a 1% CDSC. Unlike Class B shares, Class C shares will never convert to Class A shares. As a result, long-term Class C shareholders pay higher ongoing Rule 12b-1 fees over the life of their investment.

### Class R share considerations

Since you pay no initial sales charge, an investment of less than \$1 million in Class R shares buys more shares than the same investment would in Class A or Class T shares. There is also no CDSC imposed on purchases of Class R shares, and you do not pay any ongoing service or distribution fees.

You may buy Class R shares if you are:

- a bank trust department or other financial services provider acting on behalf of its customers having a qualified trust or investment account or relationship at such institution
- a custodian, trustee, investment manager or other entity authorized to act on behalf of a qualified or non-qualified employee benefit plan that has entered an agreement with the fund's distributor or a SEP-IRA

### CDSC waivers

The CDSC on Class A, B, C and T shares may be waived in the following cases:

- permitted exchanges of shares, except if shares acquired by exchange are then redeemed within the period during which a CDSC would apply to the initial shares purchased
- redemptions made within one year of death or disability of the shareholder
- redemptions due to receiving required minimum distributions from retirement accounts upon reaching age 70 ½
- redemptions through the fund's Automatic Withdrawal Plan, if such redemptions do not exceed 12% of the value of the account annually
- redemptions from qualified and unqualified employee benefit plans

## Buying shares

The **net asset value (NAV)** of each class is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. The fund's investments are valued on the basis of market quotations or official closing prices. If market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market), but before the fund calculates its NAV), the fund may value those investments at fair value as determined in accordance with procedures approved by the fund's board. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indexes of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities may trade on days when the fund does not calculate its NAV and thus may affect the fund's NAV on days when investors have no access to the fund.

Investments in foreign securities and certain thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Shareholder Guide — General Policies" for further information about the fund's frequent trading policy.

## Concepts to understand

**Net asset value (NAV):** the market value of one share, computed by dividing the total net assets of a fund or class by its shares outstanding. The fund's Class A and Class T shares are offered to the public at NAV plus a sales charge. Classes B, C and R are offered at NAV, but Classes B and C generally are subject to higher annual operating expenses and a CDSC.

**Orders to buy and sell shares** received by dealers by the close of trading on the NYSE and transmitted to the distributor or its designee by the close of its business day (normally 5:15 p.m. Eastern time) will be based on the NAV determined as of the close of trading on the NYSE that day.

---

#### Minimum investments

	Initial	Additional
<b>Regular accounts</b>	<b>\$1,000</b>	<b>\$100</b>
<b>Traditional IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Spousal IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Roth IRAs</b>	<b>\$750</b>	<b>no minimum</b>
<b>Education Savings Accounts</b>	<b>\$500</b>	<b>no minimum</b> <i>after the first year</i>

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

#### Concepts to understand

**Traditional IRA:** an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

**Spousal IRA:** an IRA funded by a working spouse in the name of a nonworking spouse.

**Roth IRA:** an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

**Education Savings Account:** an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

*For more complete IRA information, consult Dreyfus or your tax professional.*

## Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

To keep your CDSC as low as possible, each time you request to sell shares we will first sell shares that are not subject to a CDSC, and then those subject to the lowest charge. The CDSC is based on the lesser of the original purchase cost or the current market value of the shares being sold, and is not charged on shares you acquired by reinvesting your dividends. As described above in this prospectus, there are certain instances when you may qualify to have the CDSC waived. Consult your financial representative or refer to the SAI for additional details.

**Before selling shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:**

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not process wire, telephone, online or Dreyfus TeleTransfer redemption requests for up to eight business days following the purchase of those shares

### Limitations on selling shares by phone or online

Proceeds sent by	Minimum phone/online	Maximum phone/online
<b>Check*</b>	<b>no minimum</b>	<b>\$250,000</b> per day
<b>Wire</b>	<b>\$1,000</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day
<b>Dreyfus TeleTransfer</b>	<b>\$500</b>	<b>\$500,000</b> for joint accounts every 30 days/ <b>\$20,000</b> per day

\* Not available online on accounts whose address has been changed within the last 30 days.

### Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

**A signature guarantee** helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call us to ensure that your signature guarantee will be processed correctly.

## General policies

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

**The fund is designed for long-term investors.** Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter arrangements with any person or group to permit frequent trading.

**The fund reserves the right to:**

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus/Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded small-capitalization equity securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policies and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

### Small account policy

---

If your account falls below \$500, the fund may ask you to increase your balance. If it is still below \$500 after 30 days, the fund may close your account and send you the proceeds.

## DISTRIBUTIONS AND TAXES

---

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

**Distributions paid by the fund** are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

**High portfolio turnover** and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

**If you buy shares of a fund** when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax adviser before investing.

## SERVICES FOR FUND INVESTORS

The third party through whom you purchased fund shares may impose different restrictions on these services and privileges offered by the fund, or may not make them available at all. Consult your financial representative for more information on the availability of these services and privileges.

### Automatic services

**Buying or selling shares automatically** is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application, or by calling your financial representative or 1-800-554-4611.

---

#### For investing

<b>Dreyfus Automatic Asset Builder®</b>	For making automatic investments from a designated bank account.
<b>Dreyfus Payroll Savings Plan</b>	For making automatic investments through a payroll deduction.
<b>Dreyfus Government Direct Deposit Privilege</b>	For making automatic investments from your federal employment, Social Security or other regular federal government check.
<b>Dreyfus Dividend Sweep</b>	For automatically reinvesting the dividends and distributions from the fund into another Dreyfus fund or certain Founders-advised funds (not available for IRAs).

#### For exchanging shares

<b>Dreyfus Auto-Exchange Privilege</b>	For making regular exchanges from the fund into another Dreyfus fund or certain Founders-advised funds.
--	---

#### For selling shares

<b>Dreyfus Automatic Withdrawal Plan</b>	For making regular withdrawals from most Dreyfus funds. There will be no CDSC on Class B or C shares shares, as long as the amount of any withdrawal does not exceed on an annual basis 12% of the greater of the account value at the time of the first withdrawal under the plan, or at the time of the subsequent withdrawal.
--	--

### Exchange privilege

**You can exchange shares worth \$500 or more** (no minimum for retirement accounts) from one class of the fund into the same class of another Dreyfus Premier fund or Founders-advised fund. You can also exchange Class T shares into Class A shares of certain Dreyfus Premier fixed-income funds. You can request your exchange by contacting your financial representative. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will generally have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has a higher one.

### Dreyfus TeleTransfer privilege

**To move money between your bank account and your Dreyfus fund account** with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application, or contacting your financial representative.

### Reinvestment privilege

**Upon written request you can reinvest** up to the number of Class A, B or T shares you redeemed within 45 days of selling them at the current share price without any sales charge. If you paid a CDSC, it will be credited back to your account. This privilege may be used only once.

### Account statements

**Every fund investor** automatically receives regular account statements. You will also be sent a yearly statement detailing the tax characteristics of any dividends and distributions you have received.

## INSTRUCTIONS FOR **REGULAR ACCOUNTS**

### TO OPEN AN ACCOUNT

#### In Writing

Complete the application.  
Mail your application and a check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.  
Mail the slip and the check to:  
Name of Fund  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the share class
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Family of Funds  
P.O. Box 55268, Boston, MA 02205-8502  
Attn: Institutional Processing

#### By Telephone

**Wire** Call us to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479833
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

Return your application with the account number on the application.

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479833
- the fund name
- the share class
- your account number
- name(s) of investor(s)
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Call us to request your transaction.

**Wire** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Call us or your financial representative to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

To open an account, make subsequent investments or to sell shares, please contact your financial representative or call toll free in the U.S. **1-800-554-4611**.  
Make checks payable to: **The Dreyfus Family of Funds**.

### Concepts to understand

**Wire transfer:** for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

**Electronic check:** for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

INSTRUCTIONS FOR **REGULAR ACCOUNTS** (continued)

## TO OPEN AN ACCOUNT

—Online ([www.dreyfus.com](http://www.dreyfus.com))

TO ADD TO AN ACCOUNT

**Dreyfus TeleTransfer** Request Dreyfus TeleTransfer on your application. Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction.

TO SELL SHARES

**Wire** Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be wired to your bank.

**Dreyfus TeleTransfer** Visit **[www.dreyfus.com](http://www.dreyfus.com)** to request your transaction. Be sure the fund has your bank account information on file. Proceeds will be sent to your bank by electronic check.

**Check** Visit [www.dreyfus.com](http://www.dreyfus.com) to request your transaction. A check will be sent to the address of record.

- Automatically

**With an initial investment** Indicate on your application which automatic service(s) you want. Return your application with your investment.

**All services** Call us or your financial representative to request a form to add any automatic investing service (see “Services for Fund Investors”). Complete and return the form along with any other required materials.

**Dreyfus Automatic Withdrawal Plan** Call us or your financial representative to request a form to add the plan. Complete the form, specifying the amount and frequency of withdrawals you would like.

Be sure to maintain an account balance of \$5,000 or more.

## INSTRUCTIONS FOR IRAS

### TO OPEN AN ACCOUNT

#### In Writing

Complete an IRA application, making sure to specify the fund name and to indicate the year the contribution is for.

Mail your application and a check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check. Indicate the year the contribution is for.

Mail the slip and the check to:  
The Dreyfus Trust Company, Custodian  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

### TO SELL SHARES

Write a letter of instruction that includes:

- your name and signature
- your account number and fund name
- the dollar amount you want to sell
- the share class
- how and where to send the proceeds
- whether the distribution is qualified or premature
- whether the 10% TEFRA should be withheld

Obtain a signature guarantee or other documentation, if required (see "Shareholder Guide – Selling Shares").

Mail your request to:  
The Dreyfus Trust Company  
P.O. Box 55552, Boston, MA 02205-8568  
Attn: Institutional Processing

#### By Telephone

**Wire** Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900479833
- the fund name
- the share class
- your account number
- name of investor
- the contribution year
- dealer number if applicable

**Electronic check** Same as wire, but insert "111" before your 14-digit account number.

#### Automatically

**All services** Call us or your financial representative to request a form to add any automatic investing service (see "Services for Fund Investors"). Complete and return the form along with any other required materials. All contributions will count as current year.

**Systematic Withdrawal Plan** Call us to request instructions to establish the plan.

For information and assistance, contact your financial representative or call toll free in the U.S. **1-800-554-4611.**

Make checks payable to: **The Dreyfus Trust Company, Custodian.**

# For More Information

**Dreyfus Premier Small Company Growth Fund**  
A series of Dreyfus Growth and Value Funds, Inc.  
SEC file number: 811-7123

More information on this fund is available free upon request, including the following:

## **Annual/Semiannual Report**

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at [www.dreyfus.com](http://www.dreyfus.com).

## **Statement of Additional Information (SAI)**

Provides more details about the fund and its policies. A current SAI is available at [www.dreyfus.com](http://www.dreyfus.com) and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

## **Portfolio Holdings**

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at [www.dreyfus.com](http://www.dreyfus.com), under Mutual Fund Center – Dreyfus Mutual Funds – Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at [www.dreyfus.com](http://www.dreyfus.com) its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.
