

Prospectus

ESTATE DESIGNER VARIABLE UNIVERSAL LIFE A FLEXIBLE PREMIUM VARIABLE UNIVERSAL LIFE INSURANCE POLICY issued by

Security Life of Denver Insurance Company and Security Life of Denver Separate Account L1

Consider carefully the policy charges, deductions, and refunds beginning on page 47 in this prospectus.

You should read this prospectus and keep it for future reference. A prospectus for each underlying investment portfolio must accompany and should be read together with this prospectus.

This policy is not available in all jurisdictions. This policy is not offered in any jurisdiction where this type of offering is not legal. Depending on the state where it is issued, policy features may vary. You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with information that is different.

We offer other products to insure the lives of two people which may or may not better match your needs and interests.

Replacing your existing life insurance policy(ies) with this policy may not be beneficial to you. Your existing policy may be subject to fees or penalties upon surrender or cancellation.

Your Policy

- is a flexible premium variable joint and survivor universal life insurance policy;
- is issued on two lives on whom insurance coverage may continue, in whole or in part, until both have died;
- is issued by Security Life of Denver Insurance Company;
- is guaranteed not to lapse during the first five policy years if you meet certain requirements; and
- is returnable by you during the free look period if you are not satisfied.

Your Premium Payments

- are flexible, so the premium amount and frequency may vary;
- are allocated to variable investment options and the guaranteed interest division, based on your instructions;
- are subject to specified deductions.

Your Account Value

- is the sum of your holdings in the variable division, the guaranteed interest division and the loan division;
- has no guaranteed minimum value under the variable division. The value varies with the value of the underlying investment portfolio;
- has a minimum guaranteed rate of return under the guaranteed interest division only; and
- is subject to specified expenses and charges.

Death Proceeds

- are paid if the policy is in force at the death of the second of the two insured people;
- are equal to the death benefit *minus* an outstanding policy loan, accrued loan interest and unpaid charges incurred before the second insured person dies;
- are calculated under your choice of options;
 - * Option 1 - a fixed minimum death benefit;
 - * Option 2 - a stated death benefit *plus* your account value; and
 - * Option 3 - a stated death benefit *plus* the sum of the premiums we receive *minus* partial withdrawals; and
- are generally not federally income taxed if your policy continues to meet the federal income tax definition of life insurance.

Neither the SEC nor any state securities commission has approved these securities or determined that this Prospectus is accurate or complete. Any representation to the contrary is a criminal offense.

This life insurance policy IS NOT a bank deposit or obligation, federally insured or backed by any bank or government agency.

Date of Prospectus May 1, 2001

POLICY SUMMARY

Your Policy

Your policy provides life insurance protection on the lives of two insured people and insurance coverage may continue until both have died. The policy includes the basic policy, applications and riders or endorsements. As long as the policy remains in force, we pay a death benefit after the death of the second of the insured people. While your policy is in force, you may access a portion of your policy value by taking loans or partial withdrawals. You may surrender your policy for its net cash surrender value. At the policy anniversary nearest the younger insured person's 100th birthday you may surrender the policy or choose the continuation of coverage option. *See Continuation of Coverage, page 32.*

Life insurance is not a short-term investment. You should evaluate your need for life insurance coverage and this policy's long-term investment potential and risks before purchasing a policy.

We pay compensation to firms for sales of this policy. *See Distribution of the Policies, page 44.*

Free Look Period

Within limits as specified by law, you have the right to examine your policy and return it for a refund of all premium we have received or the account value, if

you are not satisfied for any reason. The policy is then void. *See Free Look Period, page 41.*

Premium Payments

The policy is a flexible premium policy because the amount and frequency of the premium payments you make may vary within limits. You must make a premium payment for us to issue your policy. You may need to make additional payments to keep your policy in force.

The amount of premium you pay affects the length of time your policy remains in force. *See Premium Payments, page 22.*

Allocation of Net Premiums

This policy has premium-based charges which are subtracted from your payments. We add the balance, or net premium, to your policy based on your investment instructions. You may allocate the net premium among one or more variable investment options and the guaranteed interest division. *See Allocation of Net Premiums, page 24.*

Charges and Deductions

All charges presented here are guaranteed unless stated otherwise.

This summary highlights some of the important points about your policy. The policy is more fully described in the attached, complete prospectus. Please read it carefully. "We," "us," "our," and the "company" refer to Security Life Insurance Company. "You" and "your" refer to the policy owner. The owner is the individual, entity, partnership, representative or party who may exercise all rights over the policy and receive the policy benefits during the insured people's lifetimes.

State variations are covered in a special policy form used in that state. This prospectus provides a general description of the policy. Your actual policy and any riders are the controlling documents. If you would like to review a copy of the policy and riders, contact our customer service center or your agent/registered representative.

Charges

Other Than Investment Portfolio Annual Expenses
(See *Charges and Deductions*, page 47)

Deductions from Premiums

| Charge | When Charge is Deducted | Amount Deducted | Policies Affected |
|---|-------------------------------|---|-------------------|
| Tax Charge <ul style="list-style-type: none"> • State and local taxes • Estimated federal tax treatment of deferred acquisition costs | Each premium payment received | <ul style="list-style-type: none"> • 2.5% of premium • 1.5% of premium | All policies |
| Maximum Sales Charge | Each premium payment received | Percentage of policy or segment premium up to target premium and above target premium: year 1 up to target 8%, above target 4%; year 2-7 up to target 8%, above target 1.5%; year 8+, 1.5% of all premium received. | All policies |

Policy Charges

| Charge | When Charge is Deducted | Amount Deducted | Policies Affected |
|---------------------------------|---|---|--------------------------------------|
| Mortality & Expense Risk Charge | Daily, included in unit value calculation | Percentage of account value in variable division. 0.002055% daily (0.75% annually) | All policies |
| Policy Charge | Monthly from account value | \$15 per month for first ten policy years and \$9 per month thereafter. | All policies |
| Monthly Administrative Charge | Monthly from account value | \$0.06 per \$1,000 death benefit for the first ten policy years, \$0.01 per \$1,000 death benefit for each policy year thereafter. Applies to first \$2,500,000 of death benefit. | All policies |
| Cost of Insurance Charge | Monthly from account value | Varies based on age, gender, policy duration, amount of target death benefit and premium class. Maximum rates are never more than policy guaranteed maximum rates. | All policies |
| Rider Charges | Monthly from account value | Varies depending on the rider benefits you choose. | Policies electing rider with charges |

Transaction Fees

| Charge | When Charge is Deducted | Amount Deducted | Policies Affected |
|-------------------------|-------------------------------------|------------------------------|--|
| Partial Withdrawal Fee | Upon withdrawal from account value | 2% of withdrawal up to \$25. | Policies taking partial withdrawals |
| Excess Illustration Fee | Transaction date from account value | \$25 each. | Policies requesting more than one (free) illustration per policy year. |

Guaranteed Interest Division

The guaranteed interest division guarantees principal and is part of our general account. Amounts you direct into the guaranteed interest division are credited with interest at a fixed rate. ***See Guaranteed Interest Division, page 20.***

Variable Division

If you invest in the variable investment options, you may make or lose money depending on market conditions. The variable investment options are described in the prospectuses for the underlying investment portfolios. Each investment portfolio has its own investment objective. ***See Investment Portfolio Objectives, page 14.***

The separate account purchases shares of the underlying investment portfolios, at net asset value. This price reflects 12b-1 fees, investment management fees and other direct expenses deducted from the portfolio assets. This table describes these fees and expenses in gross amounts and net amounts after waiver or reimbursement of fees or expenses by the investment portfolio advisers. Waivers or

reimbursements are voluntary and subject to change. The portfolio expense information was provided to us by the portfolios and we have not independently verified this information.

These expenses are not direct charges against variable division assets or reductions from contract values; rather these expenses are deducted in computing each underlying portfolio's net asset value, which is the share price used to calculate the unit values of the variable investment options. For a more complete description of the portfolios' costs and expenses, see the prospectuses for the portfolios.

We receive 12b-1 fees from some investment portfolios. Some investment portfolio advisers and distributors (or their affiliates) may pay us compensation for servicing, distribution, administration or other expenses. The amount of compensation is usually based on the aggregate assets of the investment portfolio from contracts that we issue or administer. Some advisers and distributors may pay us more or less than others. These advisers include AIM Advisors, Inc., Fidelity Management & Research Company, Fred Alger Management Inc., Directed Services Inc., INVESCO Funds Group Inc., and Van Eck Associates Corporation.

¹ Neuberger Berman Management Inc. (“NBMI”) has undertaken through April 30, 2002 to reimburse certain operating expenses, excluding taxes, interest, extraordinary expenses, brokerage commissions and transaction costs, that exceed, in the aggregate, 1% of the Portfolios’ average daily net asset value.

² Included in AIM V.I. Government Securities Fund’s “Other Expenses” is 0.12% of interest expense.

³ Actual annual class operating expenses were lower because a portion of the brokerage commissions that the fund paid was used to reduce the fund’s expenses, and/or because through arrangements with the fund’s custodian, credits realized as a result of uninvested cash balances were used to reduce a portion of the fund’s custodian expenses. See the accompanying fund prospectus for details.

⁴ The annual class operating expenses provided are based on historical expenses, adjusted to reflect the current management fee structure.

⁵ The fund’s manager has voluntarily agreed to reimburse the class’s expenses if they exceed a certain level. Including this reimbursement, the annual class operating expenses were 0.28%. This arrangement may be discontinued by the fund’s manager at any time.

⁶ The GCG Trust pays Directed Services, Inc. (“DSI”) for its services a monthly management fee based on the annual rates of the average daily net assets of the investment portfolios. DSI (and not the GCG Trust) in turn pays each portfolio manager a monthly fee for managing the assets of the portfolios.

⁷ The Portfolios’ “Other Expenses” and “Total Portfolio Expenses” were lower than the figure shown because their custodian fees were reduced under expense offset arrangements.

⁸ INVESCO absorbed a portion of VIF-Small Company Growth Fund’s “Other Expenses” and “Total Portfolio Expenses.” After this absorption, these expenses are 0.62% and 1.37%, respectively.

⁹ INVESCO absorbed a portion of VIF-Total Return Fund’s “Other Expenses” and “Total Portfolio Expenses.” After this absorption, these expenses are 0.46% and 1.21%, respectively.

- ¹⁰ INVESCO absorbed a portion of VIF-Utilities Fund's "Other Expenses" and "Total Portfolio Expenses." After this absorption, these expenses are 0.62% and 1.22%, respectively.
- ¹¹ Janus Aspen Service Shares has a distribution plan or "Rule 12b-1 plan" which is described in the funds' prospectuses. Expenses are based on expenses for the fiscal year ended December 31, 2000, restated to reflect a reduction in the management fee for those portfolios. All expenses are shown without the effect of any expense offset arrangements.
- ¹² The table shows the estimated operating expenses for each Portfolio as a ratio of expenses to average daily net assets. These estimates are based on each Portfolio's actual operating expenses for its most recently completed fiscal year and fee waivers to which the Adviser has agreed for each Portfolio.
- ¹³ ING Pilgrim Investments has entered into written expense limitation agreements with each Portfolio which it advises under which it will limit expenses of the Portfolio, excluding interest, taxes, brokerage and extraordinary expenses, subject to possible reimbursement to ING Pilgrim Investments within three years. The expense limit for each such Fund is shown as "Total Net Portfolio Expenses." For each Portfolio, the expense limits will continue through at least December 31, 2001.
- ¹⁴ Restated to reflect an increase in 12b-1 fees currently payable to Putnam Investment Management, LLC ("Putnam Management"). The Trustees currently limit payments on class IB shares to 0.25% of average net assets. Actual 12b-1 fees during the most recent fiscal year were 0.15% of average net assets.
- ¹⁵ Operating Expenses for the Worldwide Hard Assets Fund, the Worldwide Emerging Markets Fund and the Worldwide Real Estate Fund were reduced by a brokerage agreement where the Funds direct certain portfolio trades to a broker that, in return, pays a portion of the Funds' operating expenses. The Adviser agreed to assume expenses on the Worldwide Emerging Markets Fund and the Worldwide Real Estate Fund exceeding 1.30% and 1.50%, respectively, of average daily net assets except interest, taxes, brokerage commissions and extraordinary expenses for the year ended December 31, 2000. Without such absorption, Other Expenses were 0.16% for the Worldwide Hard Assets Fund, 0.33% for the Worldwide Emerging Markets Fund and 1.27% for the Worldwide Real Estate Fund for the year ended December 31, 2000 and Total Expenses were 1.16%, 1.33% and 2.27%, respectively.

Policy Values

Your account value is the amount you have in the guaranteed interest division, *plus* the amount you have in each variable investment option. If you have an outstanding policy loan, your account value includes the amount in the loan division. *See Policy Values, page 34, and Partial Withdrawals, page 38.*

Your Account Value in the Variable Division

Accumulation units are the way we measure value in the variable division. Accumulation unit value is the value of one unit of a variable investment option on a valuation date. Each variable investment option has a different accumulation unit value. *See Determining Values in the Variable Division, page 34.*

The accumulation unit value for each variable investment option reflects the investment performance of the underlying investment portfolio during the valuation period. Each accumulation unit value reflects reductions for the asset-based charges under the policy and the expenses of the investment portfolios. *See Determining Values in the Variable Division, page 34, and How We Calculate Accumulation Unit Values, page 35.*

Transfers of Account Value

You may make transfers among the variable investment options or to the guaranteed interest division. There are restrictions on transfers from the guaranteed interest division. *See Transfers of Account Value, page 35.*

Special Policy Features

Designated Deduction Option

You may designate one investment option from which we will take all of your monthly deductions. *See Designated Deduction Option, page 31.*

Riders

You may add benefits to your policy by rider. In most cases, we deduct a monthly charge from your account value for these benefits. *See Riders, page 29.*

Dollar Cost Averaging

Dollar cost averaging is a systematic plan of transferring account value to selected investment options. It is intended to protect your policy value from short-term price fluctuations. However, dollar cost averaging does not assure a profit, nor does it protect against a loss in a declining market. Dollar cost averaging is free. *See Dollar Cost Averaging, page 36.*

Automatic Rebalancing

Automatic rebalancing periodically reallocates your account value among your selected investment options to maintain your specified distribution of account value among those investment options. Automatic rebalancing is free. *See Automatic Rebalancing, page 37.*

Loans

You may take a loan against your policy's net account value. We charge an annual loan interest rate of 3.75%. We credit an annual interest rate of 3% on amounts held in the loan account as collateral for your loan. *See Policy Loans, page 37.*

Policy loans may reduce your policy's death benefit and may cause your policy to lapse.

A loan may have tax consequences if the policy is modified endowment contract. *See Tax Considerations, page 50.*

Partial Withdrawals

You may withdraw part of your net account value after your first policy anniversary. You may make up to twelve partial withdrawals per policy year.

Partial withdrawals may reduce your policy's death benefit, incur a fee and will reduce your account value. *See Partial Withdrawals, page 38.*

Some policies with a high account value may qualify for a partial withdrawal before the first policy anniversary. Partial withdrawals may have tax consequences. *See Tax Considerations, page 50.*

Persistency Refund

After your tenth policy anniversary, where permitted by law, we add a persistency refund to your account value. *See Persistency Refund, page 33.*

Refund of Sales Charge

We guarantee that if you surrender your policy within the first two policy years and it has not lapsed, we will refund some of the sales charge we previously deducted from your first-year premium payments. *See Refund of Sales Charge, page 33.*

Policy Modification, Termination and Continuation Features

Right to Exchange Policy

For 24 months after the policy date you may exchange your policy for a guaranteed policy, unless state law requires differently. There is no charge for this exchange. *See Right to Exchange Policy, page 32.*

Policy Split Option

Under certain circumstances, you may split your policy into two separate life insurance policies each insuring the life of one person. This split may occur upon divorce between the two insured people, business dissolution, or a possible adverse future change in the tax law, unless law requires otherwise. The policy split option is free. *See Policy Split Option, page 31.*

Surrender

You may surrender your policy for its net cash surrender value at any time before the death of the second of the insured people. All insurance coverage ends on the date we receive your request. *See Surrender, page 41.*

Surrenders may have tax consequences. *See Tax Considerations, page 50.*

Lapse

In general, insurance coverage continues as long as your net account value is enough to pay the monthly deductions. However, your policy and its riders are guaranteed not to lapse during the first five years of your policy if the conditions of the special continuation period have been met. *See Lapse, page 40, and Special Continuation Period, page 23.*

Policy lapses may have tax consequences. See Tax Considerations, page 50.

Reinstatement

You may reinstate your policy and its riders within five years of its lapse if you still own it and the insured people are still living and meet our underwriting requirements. You will need to give proof of insurability and pay required reinstatement premiums.

If you had a policy loan existing when coverage ended, we will reinstate it with accrued loan interest to the date of the lapse. *See Reinstatement, page 41.*

Policy Maturity

If at least one of the insured people is still living on the policy anniversary nearest the younger insured person's 100th birthday (the maturity date) and you do not choose to let the continuation of coverage feature become effective, you must surrender your policy. We will pay the net account value. Your policy then ends. *See Policy Maturity, page 32.*

Continuation of Coverage

At the policy anniversary nearest the younger insured person's 100th birthday, you may choose to let the continuation of coverage feature become effective. *See Continuation of Coverage, page 32.*

You should consult a qualified tax adviser before you allow the continuation of coverage feature to become effective.

Death Benefits

After the death of the second of the two insured people, we pay death proceeds to the beneficiaries if your policy is still in force. The base death benefit varies based on the death benefit option you have chosen.

We generally require a minimum total death benefit of \$500,000 to issue your policy. If you have an adjustable term insurance rider, the minimum stated death benefit required is \$1,000, as long as your total death benefit is at least \$500,000.

You may change your death benefit amount while your policy is in force, subject to certain restrictions. *See Changes in Death Benefit Amounts, page 28.*

Tax Considerations

Under current federal income tax law, death benefits of life insurance policies generally are not subject to income tax. In order for this treatment to apply, the policy must qualify as a life insurance contract. We believe it is reasonable to conclude that the policy will qualify as a life insurance contract. *See Tax Status of the Policy, page 50.*

Assuming the policy qualifies as a life insurance contract under current federal income tax law, your account value earnings are generally not subject to income tax as long as they remain within your policy. However depending on circumstances, the following events may cause taxable consequences to you:

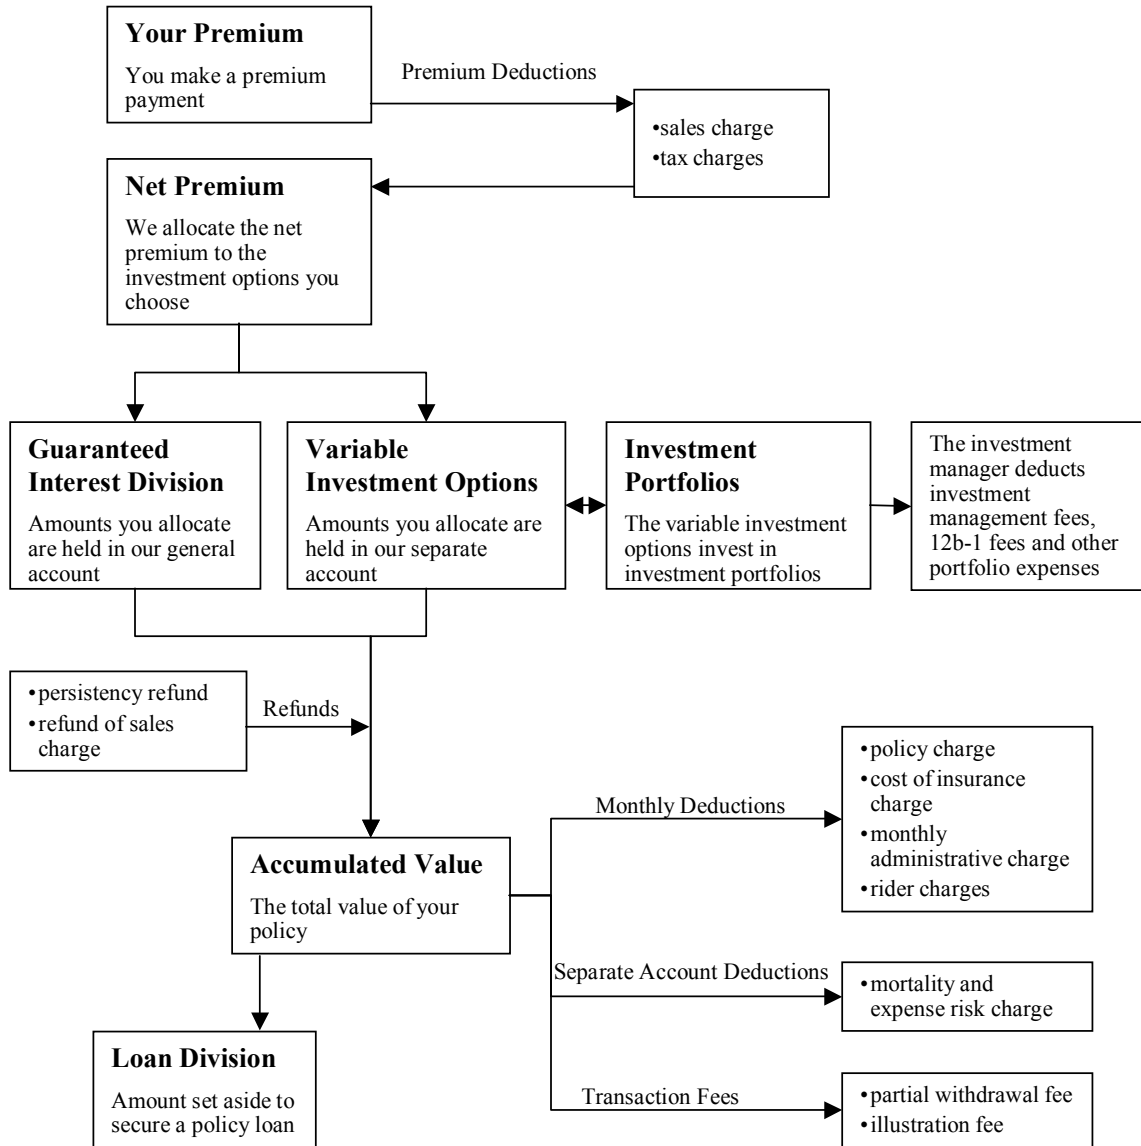

- partial withdrawals
- surrender
- lapse.

In addition, if your policy is a modified endowment contract, a loan against or secured by the policy may cause income taxation. A penalty tax may be imposed on a distribution from a modified endowment contract as well. *See Modified Endowment Contracts, page 24.*

In recent years, Congress has adopted new rules relating to life insurance owned by businesses. A business contemplating the purchase of a new policy or a change in an existing policy should consult a tax adviser.

You should consult a qualified legal or tax adviser before you purchase your policy.

How the Policy Works

SECURITY LIFE, THE SEPARATE ACCOUNT AND THE INVESTMENT OPTIONS

Security Life of Denver Insurance Company

Security Life of Denver Insurance Company (“ING Security Life”) is a stock life insurance company organized under the laws of the State of Colorado in 1929. Our headquarters are located at 1290 Broadway, Denver, Colorado 80203-5699. We are admitted to do business in the District of Columbia and all states except New York. At the close of 2000, the company had over \$41.5 billion of life insurance in force. As of December 31, 2000 the total assets were over \$8.8 billion and capital and surplus were over \$491 million measured on a statutory basis of accounting, as prescribed or permitted by the Colorado Division of Insurance.

ING Security Life is a wholly owned indirect subsidiary of ING Groep, N.V. (“ING”). ING ranks 10th among the top 20 global financial institutions by market capitalization (*Source: ING Group, market capitalization of \$80.3 billion as of Nov. 30, 2000*). ING is headquartered in Amsterdam, The Netherlands. It has consolidated assets over \$604.6 billion on a Dutch (modified U.S.) generally accepted accounting principles basis, as of December 31, 2000.

ING offers a complete line of life insurance products, including:

- annuities
- individual life
- group life
- pension products
- market life reinsurance.

The principal underwriter and distributor for our policies is ING America Equities, Inc. ING America Equities is a stock corporation organized under the laws of the State of Colorado in 1993. It is a wholly owned subsidiary of ING Security Life and is registered as a broker-dealer with the SEC and the NASD. ING America Equities, Inc., is located at 1290 Broadway, Denver, Colorado 80203-5699.

Security Life Separate Account L1

Separate Account Structure

We established Security Life Separate Account L1 (the “separate account”) on November 3, 1993, under Colorado insurance law. It is a unit investment trust, registered with the SEC under the Investment Company Act of 1940. The SEC does not supervise our management of the separate account or ING Security Life.

The separate account is used to support our variable life insurance policies and for other purposes allowed by law and regulation. We may offer other variable life insurance contracts with different benefits and charges that invest in the separate account. We do not discuss these contracts in this prospectus. The separate account may invest in other securities not available for the policy described in this prospectus.

The company owns all the assets in the separate account. We credit gains to or charge losses against the separate account without regard to performance of other investment accounts.

Order of Separate Account Liabilities

State law provides that we may not charge general account liabilities against separate account assets equal to its reserves and other liabilities. This means that if we ever become insolvent, the separate account assets will be used first to pay separate account policy claims. Only if separate account assets remain after these claims have been satisfied can these assets be used to pay other policy owners and creditors.

The separate account may have liabilities from assets credited to other variable life policies offered by the separate account. If the assets of the separate account are greater than required reserves and policy liabilities, we may transfer the excess to our general account.

Investment Options

There are three divisions: the variable division, the guaranteed interest division and the loan division. Under the variable division, there are numerous variable investment options. *See Investment Portfolio Objectives, page 14.*

Investment options include the variable and the guaranteed interest divisions, but not the loan division. The separate account has several variable investment options which invest in shares of underlying investment portfolios. The investment performance of a policy depends on the performance of the investment portfolios you choose.

Investment Portfolios

Each of the investment portfolios is a separate series of an open-end management investment company. The investment company receives investment advice from a registered investment adviser, who, other than Directed Services, Inc., and ING Pilgrim Investments, Inc., is not associated with us.

The investment portfolios sell shares to separate accounts of insurance companies. These insurance companies may or may not be affiliated with us. This is known as “shared funding.” Investment portfolios may sell shares as the underlying investment for both variable annuity and variable life insurance contracts. This process is known as “mixed funding.”

The investment portfolios may sell shares to certain qualified pension and retirement plans that qualify under Section 401 of the Internal Revenue Code (“IRC”). As a result, a material conflict of interest may arise between insurance companies, owners of different types of contracts and retirement plans or their participants.

If there is a material conflict, we will consider what should be done, including removing the investment portfolio from the separate account. There are certain risks with mixed and shared funding, and with selling shares to qualified pension and retirement plans. See the investment portfolios’ prospectuses.

Investment Portfolio Objectives

Each investment portfolio has a different investment objective that it tries to achieve by following its own investment strategy. The objectives and policies of each investment portfolio affect its return and its risks. We summarize the investment objectives for each investment portfolio here. With this prospectus, you must receive the current prospectus for each investment portfolio. You should read each investment portfolio prospectus.

Certain investment portfolios offered under this policy have investment objectives and policies similar to other funds managed by the portfolio’s investment adviser. The investment results of a portfolio may be higher or lower than those of other funds managed by the same adviser. There is no assurance and no representation is made that the investment results of any investment portfolio will be comparable to those of another fund managed by the same investment adviser.

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|--|---|--|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub- Adviser | Investment Objective |
| <i>AIM V.I. Capital Appreciation Fund</i> | <u>Investment Company:</u> AIM Variable Insurance Funds <u>Investment Adviser:</u> A I M Advisors, Inc. | Seeks growth of capital. |
| <i>AIM V.I. Government Securities Fund</i> | <u>Investment Company:</u> AIM Variable Insurance Funds <u>Investment Adviser:</u> A I M Advisors, Inc. | Seeks to achieve a high level of current income. |

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|--|---|--|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub- Adviser | Investment Objective |
| <i>Alger American Growth Portfolio</i> | <u>Investment Manager:</u> Fred Alger Management, Inc. | Seeks long-term capital appreciation by focusing on growing companies that generally have broad product lines, markets, financial resources and depth of management. Under normal circumstances, the portfolio invests primarily in the equity securities of large companies. The portfolio considers a large company to have a market capitalization of \$1 billion or greater. |
| <i>Alger American Leveraged AllCap Portfolio</i> | <u>Investment Manager:</u> Fred Alger Management, Inc. | Seeks long-term capital appreciation by investing, under normal circumstances, in the equity securities of companies of any size which demonstrate promising growth potential. The portfolio can leverage, that is, borrow money, up to one-third of its total assets to buy additional securities. By borrowing money, the portfolio has the potential to increase its returns if the increase in the value of the securities purchased exceeds the cost of borrowing, including interest paid on the money borrowed. |
| <i>Alger American MidCap Growth Portfolio</i> | <u>Investment Manager:</u> Fred Alger Management, Inc. | Seeks long-term capital appreciation by focusing on midsize companies with promising growth potential. Under normal circumstances, the portfolio invests primarily in the equity securities of companies having a market capitalization within the range of companies in the S&P MidCap 400 Index. |
| <i>Alger American Small Capitalization Portfolio</i> | <u>Investment Manager:</u> Fred Alger Management, Inc. | Seeks long-term capital appreciation by focusing on small, fast-growing companies that offer innovative products, services or technologies to a rapidly expanding marketplace. Under normal circumstances, the portfolio invests primarily in the equity securities of small capitalization companies. A small capitalization company is one that has a market capitalization within the range of the Russell 2000 Growth Index or the S&P SmallCap 600 Index. |
| <i>VIP Growth Portfolio</i> | <u>Investment Company:</u> Fidelity Variable Insurance Products Fund <u>Investment Manager:</u> Fidelity Management & Research Company | Seeks capital appreciation by investing in common stocks of companies that it believes have above-average growth potential, either domestic or foreign issuers. |
| <i>VIP Money Market Portfolio</i> | <u>Investment Company:</u> Fidelity Variable Insurance Products Fund <u>Investment Manager:</u> Fidelity Management & Research Company | Seeks as high a level of current income as is consistent with the preservation of capital and liquidity by investing in U.S. dollar-denominated money market securities, including U.S. Government securities and repurchase agreements, and entering into reverse repurchase agreements. |

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|---|--|---|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub- Adviser | Investment Objective |
| <i>VIP Overseas Portfolio</i> | <u>Investment Company:</u> Fidelity Variable Insurance Products Fund <u>Investment Manager:</u> Fidelity Management & Research Company | Seeks long-term growth of capital by investing at least 65% of total assets in foreign securities. |
| <i>VIP II Asset Manager Portfolio</i> | <u>Investment Company:</u> Fidelity Variable Insurance Products Fund II <u>Investment Manager:</u> Fidelity Management & Research Company | Seeks high total return with reduced risk over the long term by allocating its assets among stocks, bonds, and short-term instruments. |
| <i>VIP II Index 500 Portfolio</i> | <u>Investment Company:</u> Fidelity Variable Insurance Products Fund II <u>Investment Manager:</u> Fidelity Management & Research Company <u>Sub-Adviser:</u> Bankers Trust Company | Seeks investment results that correspond to the total return of common stocks publicly traded in the United States as represented by the S&P [®] 500. |
| <i>Fully Managed</i> | <u>Investment Company:</u> The GCG Trust <u>Investment Manager:</u> Directed Services, Inc. <u>Portfolio Manager:</u> T. Rowe Price Associates, Inc. | Seeks, over the long term, a high total investment return consistent with the preservation of capital and with prudent investment risk. Invests primarily in the common stocks of established companies believed by the portfolio manager to have above-average potential for capital growth. |
| <i>Mid-Cap Growth Portfolio</i> | <u>Investment Company:</u> The GCG Trust <u>Investment Manager:</u> Directed Services, Inc. <u>Portfolio Manager:</u> Massachusetts Financial Services Company | Seeks long-term growth of capital. Invests primarily in equity securities of companies with medium market capitalization which the portfolio manager believes have above-average growth potential. |
| <i>VIF-Equity Income Fund</i> | <u>Investment Company:</u> INVESCO Variable Investment Funds, Inc. <u>Investment Adviser:</u> INVESCO Funds Group, Inc. | Seeks high total return through both growth and current income by investing primarily in dividend-paying common and preferred stocks. The rest of the fund's assets are invested in debt securities, and lower-grade debt securities. |
| <i>VIF-High Yield Fund</i> | <u>Investment Company:</u> INVESCO Variable Investment Funds, Inc. <u>Investment Adviser:</u> INVESCO Funds Group, Inc. | Seeks to provide a high level of current income by investing primarily in debt securities and preferred stock, with medium to lower credit ratings, including securities issued by foreign companies. It also seeks capital appreciation. |

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|--|--|---|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub- Adviser | Investment Objective |
| <i>VIF-Small Company Growth Fund</i> | <u>Investment Company:</u> INVESCO Variable Investment Funds, Inc. <u>Investment Adviser:</u> INVESCO Funds Group, Inc. | Seeks long-term capital growth by investing primarily in equity securities of companies with market capitalizations of \$2 billion or less at the time of purchase. The remainder of the fund's assets can be invested in a wide range of securities that may or may not be issued by small companies. |
| <i>VIF-Total Return Fund</i> | <u>Investment Company:</u> INVESCO Variable Investment Funds, Inc. <u>Investment Adviser:</u> INVESCO Funds Group, Inc. | Seeks to provide high total return through both growth and current income by investing primarily in a combination of common stocks of companies with a strong history of paying regular dividends and in debt securities. The remaining assets of the fund are allocated among these and other investments at INVESCO's discretion, based upon current business, economic and market conditions. |
| <i>VIF-Utilities Fund</i> | <u>Investment Company:</u> INVESCO Variable Investment Funds, Inc. <u>Investment Adviser:</u> INVESCO Funds Group, Inc. | Seeks capital appreciation and income by investing primarily in companies doing business in the utilities economic sector. The remainder of the fund's assets are not required to be invested in the utilities economic sector. |
| <i>Aspen Aggressive Growth Portfolio Service Shares</i> | <u>Investment Company:</u> Janus Aspen Series <u>Investment Adviser:</u> Janus Capital | Seeks long-term growth of capital by investing primarily in common stocks selected for their growth potential and normally investing at least 50% of its equity assets in medium-sized companies which fall within the range of companies in the S&P® MidCap 400 Index. |
| <i>Aspen Growth Portfolio Service Shares</i> | <u>Investment Company:</u> Janus Aspen Series <u>Investment Adviser:</u> Janus Capital | Seeks long-term growth of capital in a manner consistent with preservation of capital by investing primarily in common stocks selected for their growth potential. Although the portfolio can invest in companies of any size, it generally invests in larger, more established companies. |
| <i>Aspen International Growth Portfolio Service Shares</i> | <u>Investment Company:</u> Janus Aspen Series <u>Investment Adviser:</u> Janus Capital | Seeks long-term growth of capital by investing at least 65% of its total assets in securities of issuers from at least five different countries, excluding the United States. Although the portfolio intends to invest substantially all of its assets in issuers located outside the United States, it may at times invest in U.S. issuers and it may at times invest all of its assets in fewer than five countries or even a single country. |

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|--|--|---|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub- Adviser | Investment Objective |
| <i>Aspen Worldwide Growth Portfolio Service Shares</i> | <u>Investment Company:</u> Janus Aspen Series <u>Investment Adviser:</u> Janus Capital | Seeks long-term growth of capital in a manner consistent with preservation of capital by investing primarily in common stocks of companies of any size throughout the world. The portfolio normally invests in issuers from at least five different countries, including the United States. The portfolio may at times invest in fewer than five countries or even in a single country. |
| <i>Growth Portfolio</i> | <u>Investment Company:</u> Neuberger Berman Advisers Management Trust <u>Investment Adviser:</u> Neuberger Berman Management Inc. <u>Sub-Adviser:</u> Neuberger Berman, LLC | Seeks growth of capital by investing mainly in common stock mid-capitalization companies. |
| <i>Limited Maturity Bond Portfolio</i> | <u>Investment Company:</u> Neuberger Berman Advisers Management Trust <u>Investment Adviser:</u> Neuberger Berman Management Inc. <u>Sub-Adviser:</u> Neuberger Berman, LLC | Seeks the highest available current income consistent with liquidity and low risk to principal by investing mainly in investment-grade bonds and other debt securities from U.S. Government and corporate issuers. |
| <i>Partners Portfolio</i> | <u>Investment Company:</u> Neuberger Berman Advisers Management Trust <u>Investment Adviser:</u> Neuberger Berman Management Inc. <u>Sub-Adviser:</u> Neuberger Berman, LLC | Seeks growth of capital by investing mainly in common stock of mid- to large-capitalization companies. |
| <i>VP Growth Opportunities Portfolio</i> | <u>Investment Company:</u> Pilgrim Variable Products Trust <u>Investment Adviser:</u> ING Pilgrim Investments, LLC | This fund seeks long-term growth of capital. |
| <i>VP MagnaCap Portfolio</i> | <u>Investment Company:</u> Pilgrim Variable Products Trust <u>Investment Adviser:</u> ING Pilgrim Investments, LLC | The fund seeks growth of capital with dividend income as a secondary consideration. |

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|---|---|--|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub- Adviser | Investment Objective |
| <i>VP MidCap Opportunities Portfolio</i> | <u>Investment Company:</u> Pilgrim Variable Products Trust <u>Investment Adviser:</u> ING Pilgrim Investments, LLC | This fund seeks long-term capital appreciation. |
| <i>VP SmallCap Opportunities Portfolio</i> | <u>Investment Company:</u> Pilgrim Variable Products Trust <u>Investment Adviser:</u> ING Pilgrim Investments, LLC | This fund seeks capital appreciation. |
| <i>Putnam VT Growth and Income Fund – Class IB Shares</i> | <u>Investment Company:</u> Putnam Variable Trust <u>Investment Adviser:</u> Putnam Investment Management, LLC | Seeks capital growth and current income by investing mainly in common stocks of U.S. companies with a focus on value stocks that offer the potential for capital growth, current income or both. |
| <i>Putnam VT New Opportunities Fund – Class IB Shares</i> | <u>Investment Company:</u> Putnam Variable Trust <u>Investment Adviser:</u> Putnam Investment Management, LLC | Seeks long-term capital appreciation by investing mainly in commons stocks of U.S. companies with a focus on growth stocks within sectors believed to have high growth potential. |
| <i>Putnam VT Small Cap Value Fund – Class IB Shares</i> | <u>Investment Company:</u> Putnam Variable Trust <u>Investment Adviser:</u> Putnam Investment Management, LLC | Seeks capital appreciation by investing in common stocks of U.S. companies with a focus on value stocks. |
| <i>Putnam VT Voyager Fund – Class IB Shares</i> | <u>Investment Company:</u> Putnam Variable Trust <u>Investment Adviser:</u> Putnam Investment Management, LLC | Seeks to provide capital appreciation by investing in stocks of U.S. companies with a focus on growth stocks. |
| <i>Worldwide Bond Fund</i> | <u>Investment Company:</u> Van Eck Worldwide Insurance Trust <u>Investment Adviser and Manager:</u> Van Eck Associates Corporation | Seeks high total return—income plus capital appreciation—by investing globally, primarily in a variety of debt securities. |
| <i>Worldwide Emerging Markets Fund</i> | <u>Investment Company:</u> Van Eck Worldwide Insurance Trust <u>Investment Adviser and Manager:</u> Van Eck Associates Corporation | Seeks long-term capital appreciation by investing in equity securities in emerging markets around the world. |

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|-----------------------------------|---|---|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub- Adviser | Investment Objective |
| <i>Worldwide Hard Assets Fund</i> | <u>Investment Company:</u> Van Eck Worldwide Insurance Trust <u>Investment Adviser and Manager:</u> Van Eck Associates Corporation | Seeks long-term capital appreciation by investing primarily in “hard asset securities.” Hard assets include precious metals, natural resources, real estate and commodities. Income is a secondary consideration. |
| <i>Worldwide Real Estate Fund</i> | <u>Investment Company:</u> Van Eck Worldwide Insurance Trust <u>Investment Adviser and Manager:</u> Van Eck Associates Corporation | Seeks high total return by investing in equity securities of companies that own significant real estate or that principally do business in real estate. |

Guaranteed Interest Division

You may allocate all or a part of your net premium and transfer your net account value into the guaranteed interest division. The guaranteed interest division guarantees principal and is part of our general account. It pays interest at a fixed rate that we declare.

The general account contains all of our assets other than those held in the separate account (variable investment options) or other separate accounts.

The general account supports our non-variable insurance and annuity obligations. We have not registered interests in the guaranteed interest division under the Securities Act of 1933. Also, we have not registered the guaranteed interest division or the general account as an investment company under the Investment Company Act of 1940 (because of exemptive and exclusionary provisions). This means that the general account, the guaranteed interest division and its interests are generally not subject to regulation under these Acts.

The SEC staff has not reviewed the disclosures in this prospectus relating to the general account and the guaranteed interest division. These disclosures, however, may be subject to certain requirements of the federal securities law regarding accuracy and completeness of statements made.

The amount you have in the guaranteed interest division is the net premium you allocate to that

division, *plus* amounts you transfer to it, *plus* interest earned, *minus* amounts you transfer out or withdraw. It may be reduced by deductions for charges from your account value allocated to the guaranteed interest division.

We declare the interest rate that applies to all amounts in the guaranteed interest division. This interest rate is never less than the minimum guaranteed interest rate of 3% and will be in effect for at least twelve months. Thereafter, the credited interest rate will be guaranteed for a successive period of at least twelve months at an interest rate current at that time. Interest compounds daily at an effective annual rate that equals the declared rate. We credit interest to the guaranteed interest division on a daily basis. We pay interest regardless of the actual investment performance of our general account. We bear all of the investment risk for the guaranteed interest division.

DETAILED INFORMATION ABOUT THE POLICY

This prospectus describes our standard Estate Designer variable universal life insurance policy. There may be differences in the policy features, benefits and charges because of state requirements where we issue your policy. We describe such differences in your policy.

If you would like to know about variations specific to your state, please ask your agent/registered representative. ING Security Life can provide him/her with the list of variations that will apply to your policy.

We and our affiliates offer other products to insure the lives of two people which may or may not better match your needs.

Applying for a Policy

You purchase this variable universal life policy by submitting an application to us. On the policy date, the joint equivalent age of the two insured people must be at least 15 and generally no older than age 85. The individual age of each insured person generally must be no more than 90 on the policy date. There is no maximum age difference between the two insured people.

The insured people are the two people on whose lives we issue the policy. The insured people share some relationship and commonly include husband and wife; business partners; parent and child; grandparent and grandchild; and siblings. Upon the death of the second of the insured people we pay the death benefit. *See Age, page 42.*

From time to time, we may accept an insured person who exceeds our normal maximum age limit. We will not unfairly discriminate in determining the maximum age at issue. All exceptions to our normal limit are dependent upon our ability to obtain acceptable reinsurance coverage for our risk with an older insured.

We may back-date the policy up to six months to allow the insured people to give proof of a younger age or for certain other purposes.

We may reduce the minimum death benefit for group or sponsored arrangements, or corporate purchasers. Our underwriting and reinsurance procedures in effect at the time you apply limit the maximum death benefit.

Temporary Insurance

If you apply and qualify, we may issue temporary insurance in an amount equal to the face amount of the policy for which you applied. The maximum

amount of temporary insurance for binding limited life insurance coverage is \$3 million, which includes other in-force coverage you have with us.

Temporary coverage begins when all of the following events have occurred:

- you have completed and signed our binding limited life insurance coverage form
- we receive and accept a premium payment of at least your scheduled premium (selected on your application)
- part I of the application is complete.

Temporary life insurance coverage ends on the earliest of:

- the date we return your premium payments.
- five days after we mail notice of termination to the address on your application
- the date your policy coverage starts
- the date we refuse to issue a policy based on your application
- 90 days after you sign our binding limited life insurance coverage form.

There is no death benefit under the temporary insurance agreement if any of the following events occur:

- there is a material misrepresentation in your answers on the binding limited life insurance coverage form.
- there is a material misrepresentation in statements on your application.
- the person or persons intended to be the insured people die by suicide or self-inflicted injury.
- the bank does not honor your premium check.

Policy Issuance

Before we issue a policy, we require satisfactory evidence of insurability of both insured people and payment of your initial premium. This evidence may include a medical examination and completion of underwriting and issue requirements.

The policy date shown on your policy schedule determines:

- monthly processing dates
- policy months
- policy years
- policy anniversaries.

The policy date is not affected by when you receive the policy. Generally, we charge monthly deductions from your policy date.

The policy date is determined one of three ways:

1. the date you designate on your application, subject to our approval.
2. the back-date of the policy, subject to our approval and law.
3. if there is no designated date or back-date, the policy date is:
 - the date all underwriting and administrative requirements have been met if we receive your initial premium before we issue your policy; or
 - the date we receive your initial premium if it is after we approve your policy for issue.

If you choose to have your policy date be earlier than the date we issue your policy (called back-dating), then the following charges will be charged from that earlier date on your first monthly processing date:

- cost of insurance charges
- monthly rider charges
- monthly administrative charge
- policy charge
- mortality and expense risk charge

If you have elected to backdate your policy which enables you to gain benefit of a lower age for the purposes of calculating the cost of insurance charges on your policy, you should understand there are some inherent costs associated with your decision to backdate. For each month that your policy is backdated, the applicable cost of insurance charges are accumulated and deducted from your initial premium payment. Thus, backdating your policy has the effect of lowering your initial net premium and thus the amount available to be allocated to the investment options. On backdated policies the accrued cost of insurance charges deducted from the initial premium result in policy values being lower than those in any policy illustrations you have received.

Definition of Life Insurance

The guideline premium/cash value corridor test applies to your policy. We may limit premium payments relative to your policy death benefit under this test. *See Tax Status of the Policy, page 50.*

Premium Payments

You may choose the amount and frequency of premium payments, within limits. We cannot accept premium payments after the death of the second of the insured people or after the continuation of coverage period begins. *See Continuation of Coverage, page 32.*

We consider payments we receive to be premium payments if you do not have an outstanding loan and your policy is not in the continuation of coverage period. After we deduct certain charges from your payment, we add the remaining net premium to your policy.

A payment is received by us when it is received at our offices. After you have paid your initial premium, we suggest you send payments directly to the Company, rather than through your agent/registered representative, to assure the earliest crediting date.

Scheduled Premiums

Your premiums are flexible. You may select your scheduled (planned) premium (within our limits) when you apply for your policy. The scheduled premium, shown in your policy and schedule, is the amount you choose to pay over a stated time period. **This amount may or may not be enough to keep your policy in force.** You may receive premium reminder notices for the scheduled premium on a quarterly, semi-annual or annual basis. You are not required to pay the scheduled premium.

You may choose to pay your premium by electronic funds transfer each month. Your financial institution may charge for this service. If you choose to pay your initial premium by electronic transfer, please be sure to include the appropriate information as part of your application to avoid a delay in making your coverage effective.

You can change the amount of your scheduled premium within our minimum and maximum limits at any time. If you fail to pay your scheduled premium or if you change the amount of your scheduled premium, your policy performance will be affected. During the special continuation period, your scheduled premium should not be less than the minimum annual premium shown in your policy.

Unscheduled Premium Payments

Generally speaking, you may make unscheduled premium payments at any time, however:

- We may limit the amount of your unscheduled premium payments that would result in an increase in the base death benefit amount required by the federal income tax law definition of life insurance. We may require satisfactory evidence that the insured people are insurable at the time that you make the unscheduled premium payment if the death benefit is increased due to your unscheduled premium payments.
- We may require proof that at least one insured person is insurable if your unscheduled premium payment will cause the net amount at risk to increase.
- We will return premium payments which are greater than the “seven-pay” limit for your policy if your payment would cause your policy to become a modified endowment contract, unless you have acknowledged in writing the new modified endowment contract status for your policy. The “seven-pay” limit is defined by the Internal Revenue Code and actuarially determined. It varies with the age, gender and premium class of each insured, as well as the death benefit and additional benefits or riders on the policy. It is generally the maximum premium that we may receive during the first seven policy years in order for the policy not to be classified as a modified endowment contract.

See Modified Endowment Contracts, page 24, and Changes to Comply with the Law, page 53.

If you have an outstanding policy loan and you make an unscheduled payment, we will consider it a loan repayment, unless you tell us otherwise. If your payment is a loan repayment, we do not deduct tax or sales charges.

Target Premium

Target premium is not based on your scheduled premium. Target premium is actuarially determined based on the age, gender and premium class of the insured persons. The target premium is used to determine your initial sales charge and the sales compensation we pay. It may or may not be enough to keep your policy in force. You are not required to pay the target premium and there is no penalty for

paying more or less. The target premium for your policy and additional segments is listed in your policy schedule pages. ***See Premium Payments, page 22.***

Minimum Annual Premium

To qualify for the special continuation period, you must pay a minimum annual premium during each of your first five policy years.

Your minimum annual premium is based on:

- each insured person’s age, gender and premium class
- the stated death benefit of your policy
- riders on your policy.

Your minimum annual premium is shown in the schedule pages of your policy. We may reduce the minimum annual premium for group or sponsored arrangements, or for corporate purchasers.

Special Continuation Period

The special continuation period is the first five policy years. Under the special continuation period, we guarantee that your policy will not lapse, regardless of its net account value, if on a monthly processing date:

- the sum of all premiums you have paid, *minus* partial withdrawals that you have taken, *minus* outstanding policy loans, including accrued loan interest is greater than or equal to;
- the minimum monthly premiums for each policy month from the first month of your policy through the current monthly processing date.

The minimum monthly premium is one-twelfth of the minimum annual premium.

During the first five years of your policy if there is not enough net account value to pay the monthly deductions and you have satisfied these requirements, we do not allow your policy to lapse. We do not permanently waive policy charges. Instead, we continue to deduct these charges which may result in a negative net account value, unless you pay enough premium to prevent this. The negative balance is your unpaid monthly deductions owing. At the end of the special continuation period, to avoid lapse of your policy you must pay enough premium to bring the net account value to zero *plus* an amount that covers your estimated monthly deductions for the following two months. ***See Lapse, page 40.***

Allocation of Net Premiums

The net premium is the balance remaining after we deduct tax and sales charges from your premium payment.

Insurance coverage does not begin until we receive your initial premium. It must be at least the amount of your scheduled premiums from your policy date through your investment date.

The investment date is the first date we apply net premium to your policy.

We apply the initial net premium to your policy after:

- we receive the required amount of premium
- all issue requirements have been received by our customer service center
- we have approved your policy for issue.

Amounts you designate for the guaranteed interest division will be allocated to that division on the investment date. If your state requires return of your premium during the free look period, we initially invest amounts you have designated for the variable division in Fidelity VIP Money Market Portfolio. We later transfer these amounts from Fidelity VIP Money Market Portfolio to your selected variable investment options, based on your most recent premium allocation instructions, at the earlier of the following dates:

- five days after we mailed your policy *plus* your state free look period has ended; or
- we have received your delivery receipt *plus* your state free look period has ended.

If your state provides for return of account value during the free look period or no free look period, we invest amounts you designate for the variable division directly into your selected variable investment options.

We allocate all later premium payments to your policy on the valuation date of receipt. A payment is received by us when it is received at our offices.

After you have paid your initial premium, we suggest you send payments directly to the Company, rather than through your agent/registered representative, to assure the earliest crediting date. We use your most recent premium allocation instructions specified in whole numbers totaling 100%. You may change your premium allocation at any time by sending notice to us.

Premium Payments Affect Your Coverage

Unless your policy is in the special continuation period, your coverage lasts only as long as your net account value is enough to pay the monthly charges and your account value is more than your outstanding policy loan *plus* accrued loan interest. If you do not meet these conditions, your policy will enter the 61-day grace period and you must make a premium payment to avoid lapse. ***See Lapse, page 40, and Grace Period, page 40.***

If you pay your minimum premium each year during the first five policy years and take no policy loan or withdrawals, we guarantee your policy and riders will not lapse during the special continuation period, regardless of your net **account** value. ***See Special Continuation Period, page 23.***

Modified Endowment Contracts

There are special federal income tax rules for distributions from life insurance policies which are modified endowment contracts. These rules apply to policy loans, surrenders and partial withdrawals. Whether or not these rules apply depends upon whether or not the premiums we receive are greater than the “seven-pay” limit.

If we find that your scheduled premium causes your policy to be a modified endowment contract on your policy date, we will require you to acknowledge that you know the policy is a modified endowment contract. We will issue your policy based on the scheduled premium you selected. If you do not want your policy to be issued as a modified endowment contract, you may reduce your scheduled premium to a level which does not cause your policy to be a modified endowment contract. We will then issue your policy based on the revised scheduled premium. ***See Modified Endowment Contracts, page 24.***

Death Benefits

As a joint and survivor universal life insurance policy, your policy has a joint nature to the death benefit. We do not pay death proceeds until the death of the second of the insured people. The death benefit is valued as of the date of death of the second of the insured people.

You decide the amount of insurance you need, now and in the future. You can combine the long-term advantages of permanent life insurance (base coverage) with the flexibility and short-term advantages of term life insurance. Both permanent and term life insurance are available with one policy. The stated death benefit is the permanent element of your policy. The adjustable term insurance rider is the term insurance element of your policy. *See Adjustable Term Insurance Rider, page 29.*

Generally we require a minimum total death benefit of \$500,000 to issue a policy. If you have an adjustable term insurance rider, the minimum stated

death benefit to issue a policy is \$1,000, as long as your total death benefit is at least \$500,000.

It may be to your economic advantage to include part of your insurance coverage under the adjustable term insurance rider. Both the cost of insurance under the adjustable term insurance rider and the cost of insurance for the base death benefit are deducted monthly from your account value and generally increase with the age of the insured people. Use of the adjustable term insurance rider may reduce sales compensation, but may increase the monthly cost of insurance. *See Adjustable Term Insurance Rider, page 29.*

Death Benefit Summary

This chart assumes no death benefit option changes and no requested or scheduled increases or decreases in stated or target death benefit and that partial withdrawals are less than the premium we receive.

| | Option 1 | Option 2 | Option 3 |
|--|--|--|---|
| Stated Death Benefit | The amount of policy death benefit at issue, not including rider coverage. This amount stays level throughout the life of the policy. | The amount of policy death benefit at issue, not including rider coverage. This amount stays level throughout the life of the policy. | The amount of policy death benefit at issue, not including rider coverage. This amount stays level throughout the life of the policy. |
| Base Death Benefit | The greater of the stated death benefit or the account value <i>multiplied</i> by the appropriate factor from the definition of life insurance factors. | The greater of the stated death benefit <i>plus</i> the account value or the account value <i>multiplied</i> by the appropriate factor from the definition of life insurance factors. | The greater of the stated death benefit <i>plus</i> the sum of all premiums we receive <i>minus</i> partial withdrawals you have taken, or the account value <i>multiplied</i> by the appropriate factor from the definition of life insurance factors. |
| Target Death Benefit | Stated death benefit <i>plus</i> adjustable term insurance rider benefit. This amount remains level throughout the life of the policy. | Stated death benefit <i>plus</i> adjustable term insurance rider benefit. This amount remains level throughout the life of the policy. | Stated death benefit <i>plus</i> adjustable term insurance rider benefit. This amount remains level throughout the life of the policy. |
| Total Death Benefit | The greater of the target death benefit or the base death benefit. | The greater of the target death benefit <i>plus</i> the account value or the base death benefit. | It is the greater of the target death benefit <i>plus</i> the sum of all premiums we receive <i>minus</i> partial withdrawals you have taken or the base death benefit. |
| Adjustable Term Insurance Rider Benefit | The total death benefit <i>minus</i> base death benefit, but not less than zero. If the account value multiplied by the death benefit corridor factor is greater than the stated death benefit, the adjustable term insurance benefit will be decreased. It will be decreased so that the sum of the base death benefit and the adjustable term insurance rider benefit is not greater than the target death benefit. If the base death benefit becomes greater than the target death benefit, then the adjustable term insurance rider benefit is zero. | The total death benefit <i>minus</i> the base death benefit, but not less than zero. If the account value multiplied by the death benefit corridor factor is greater than the stated death benefit <i>plus</i> the account value, the adjustable term insurance rider benefit will be decreased. It will be decreased so that the sum of the base death benefit and the adjustable term insurance rider benefit is not greater than the target death benefit <i>plus</i> the account value. If the base death benefit becomes greater than the target death benefit <i>plus</i> the account value, then the adjustable term insurance rider benefit is zero. | The adjustable term insurance rider benefit is the total death benefit <i>minus</i> the base death benefit, but it will not be less than zero. If the account value multiplied by the death benefit corridor factor is greater than the stated death benefit <i>plus</i> the sum of all premiums we receive <i>minus</i> partial withdrawals you have taken, the adjustable term insurance rider benefit will be decreased. It will be decreased so that the sum of the base death benefit and the adjustable term insurance rider benefit is not greater than the target death benefit <i>plus</i> the sum of all premiums we receive <i>minus</i> partial withdrawals you have taken. If the base death benefit becomes greater than the target death benefit <i>plus</i> the sum of all premiums we receive <i>minus</i> partial withdrawals you have taken, then the adjustable term insurance rider benefit is zero. |

Base Death Benefit

Your base death benefit can be different from your stated death benefit as a result of:

- your choice of death benefit option
- increases or decreases in the stated death benefit
- a change in your death benefit option.

Federal income tax law requires that your death benefit be at least as much as your account value multiplied by a factor defined by law. This factor is based on the attained age of the younger insured person. **See Appendix A, page 181.**

As long as your policy is in force, we will pay the death proceeds to your beneficiaries calculated at the date of death of the second of the insured people. The beneficiaries are the people you name to receive the death proceeds from your policy. The death proceeds are:

- your base death benefit; *plus*
- rider benefits; *minus*
- your outstanding policy loan with accrued loan interest; *minus*
- outstanding policy charges incurred before the death of the second of the insured people.

There could be outstanding policy charges if the second of the insured people dies while your policy is in the grace period or in the five-year special continuation period.

Death Benefit Options

You have a choice of three death benefit options: option 1, option 2 or option 3. Your choice may result in your base death benefit being greater than your stated death benefit.

If you choose death benefit option 1, your base death benefit is the greater of:

- your stated death benefit on the date of death of the second of the insured people; or
- your account value on the date of death of the second of the insured people *multiplied* by the appropriate factor from the definition of life insurance factors shown in Appendix A.

With option 1, positive investment performance generally reduces your net amount at risk, which lowers your policy's cost of insurance charge. Option 1 offers insurance coverage that is a set

amount with potentially lower cost of insurance charges over time.

Under death benefit option 2, your base death benefit is the greater of:

- your stated death benefit *plus* your account value on the date of death of the second of the insured people; or
- your account value on the date of death of the second of the insured people *multiplied* by the appropriate factor from the definition of life insurance factors shown in Appendix A.

With option 2, investment performance is reflected in your insurance coverage.

If you choose death benefit option 3, the base death benefit is the greater of:

- your stated death benefit *plus* all premium we have received *minus* partial withdrawals you have taken; or
- your account value on the date of death of the second of the insured people *multiplied* by the appropriate factor from the definition of life insurance factors shown in Appendix A.

Under option 3, the base death benefit generally will increase as you pay premium and decrease if you take partial withdrawals. In no event will your base death benefit be less than your stated death benefit.

Death benefit options 2 and 3 are not available during the continuation of coverage period. If you select option 2 or 3, it automatically converts to death benefit option 1 when the continuation of coverage period begins. **See Continuation of Coverage, page 32.**

Changes in Death Benefit Options

You may request a change in your death benefit option at any time on or after your first monthly processing date and before the continuation of coverage period. A death benefit option change applies to your entire stated or base death benefit. Changing your death benefit option may reduce or increase your target death benefit, as well as your stated death benefit.

Your death benefit option change is effective on your next monthly processing date after we approve it, so long as at least one day remains before your monthly processing date. If less than one day remains before

your monthly processing date, the change will be effective on your second following monthly processing date.

After we approve your request, we send a new policy schedule page to you. You should attach it to your policy. We may ask you to return your policy to our customer service center so that we can make this change for you.

We may not approve a death benefit option change if it reduces the target death benefit below the minimum we require to issue your policy.

You may change from death benefit option 1 to option 2, from option 2 to option 1 or from option 3 to option 1. You may not change from death benefit option 1 or 2 to option 3, or option 3 to option 2. For you to change from death benefit option 1 to option 2, we may require proof that the insured people are insurable under our normal rule of underwriting.

On the effective date of your option change, your stated death benefit changes as follows:

| Change From | Change To | Stated Death Benefit Following Change: |
|-------------|-----------|---|
| Option 1 | Option 2 | your stated death benefit before the change <i>minus</i> your account value on the effective date of the change. |
| Option 2 | Option 1 | your stated death benefit before the change <i>plus</i> your account value on the effective date of the change. |
| Option 3 | Option 1 | your stated death benefit before the change <i>plus</i> the sum of the premiums we have received, <i>minus</i> partial withdrawals you have taken as of the effective date of the change. |

We increase or decrease your stated death benefit to keep the net amount at risk the same on the date of your death benefit option change. There is no change to the amount of coverage under your adjustable term insurance rider. ***See Cost of Insurance Charge, page 49.***

If you change your death benefit option, we adjust the stated death benefit for each of your segments by

allocating your account value to each benefit segment. For example, if you change from death benefit option 1 to option 2, your stated death benefit is decreased by the amount of your account value allocated to each segment. If you change from death benefit option 2 to option 1, your stated death benefit is increased by the amount allocated to each segment.

Changing your death benefit option may have tax consequences. You should consult a tax adviser before making changes.

Changes in Death Benefit Amounts

Contact your agent/registered representative or our customer service center to request a change in your policy's death benefit. The change is effective as of the next monthly processing date after we approve your request. Your requested change must be for at least \$1,000.

After we make your requested change, we will send you a new schedule page. Keep it with your policy. Or we may ask you to send your policy to us so that we can make the change for you.

We may not approve a requested change if it will disqualify your policy as life insurance under federal income tax law. If we disapprove a change for any reason, we provide you with a notice of our decision. ***See Tax Considerations, page 50.***

You may request a decrease in the stated death benefit after your first policy anniversary.

If you decrease your death benefit, you may not decrease your target death benefit below the minimum we require to issue your policy. You cannot decrease the stated death benefit below \$1,000.

Requested reductions in the death benefit amount will first decrease the target death benefit. We decrease your stated death benefit only after your adjustable term insurance rider coverage is reduced to zero. If you have more than one segment, we divide decreases in stated death benefit among your benefit segments pro rata unless law requires differently.

You may increase your target or stated death benefit on or after your first monthly processing date and before the policy anniversary when the joint equivalent age of the insured people is 85.

You must provide satisfactory evidence that the insured people are still insurable to increase your death benefit. Unless you tell us differently, we assume a request to increase your target death benefit is also a request for an increase to your stated death benefit. Thus, the amount of your adjustable term insurance rider will not change. You may change the target death benefit once a policy year.

The initial death benefit segment, or first segment, is the stated death benefit on your policy's effective date. A requested increase in stated death benefit will create a new segment. Once created, it is permanent unless law requires differently. The segment year runs from the segment's effective date to its anniversary.

Each new segment may have:

- a new minimum annual premium during the special continuation period
- a new sales charge
- new cost of insurance charges, guaranteed and current
- a new incontestability period
- a new suicide exclusion period
- a new target premium.

Premium we receive after an increase are applied to your policy segments in the same proportion as the target premium for each segment bears to the total target premium for all segments. For each coverage segment, your schedule shows your target premium which is used to determine your sales charge.

There may be tax consequences as a result of a change in your death benefit amount. Consult your tax adviser before making a change. *See Tax Status of the Policy, page 50, and Modified Endowment Contracts, page 24.*

Riders

Your policy may include benefits attached by rider. A rider may have an additional cost. You may cancel riders at any time.

We may offer riders not listed here. Contact your agent/registered representative for a list of riders currently available.

Riders may have tax consequences. *See Modified Endowment Contracts, page 24.*

Adjustable Term Insurance Rider

You may increase your death proceeds by adding an adjustable term insurance rider before the insured people's joint equivalent age of 85, assuming both insured people are alive and insurable. This rider allows you to schedule the death benefits based on your anticipated needs. As the name suggests, the adjustable term insurance rider adjusts over time to maintain your desired level of coverage.

You specify a target death benefit when you apply for this rider. The target death benefit can be level for the life of your policy or scheduled to change at the beginning of a selected policy year(s). *See Death Benefits, page 24.*

The adjustable term insurance rider death benefit is the difference between your target death benefit and your base death benefit. The rider's death benefit automatically adjusts daily as your base death benefit changes.

We generally require a minimum target death benefit of \$500,000 to issue a policy. If you have an adjustable term insurance rider, the minimum stated death benefit to issue a policy is \$1,000, as long as your target death benefit is at least \$500,000.

Your death benefit depends on which death benefit option is in effect:

Option 1: If option 1 is in effect, the total death benefit is the greater of:

- a. the target death benefit; or
- b. the account value multiplied by the appropriate factor from the death benefit corridor factors in the policy.

Option 2: If option 2 is in effect, the total death benefit is the greater of:

- a. the target death benefit *plus* the account value; or
- b. the account value *multiplied* by the appropriate factor from the death benefit corridor factors in the policy.

Option 3: If option 3 is in effect, the total death benefit is the greater of:

- a. the target death benefit *plus* the sum of the premiums we have received *minus* partial withdrawals you have taken; or
- b. the account value *multiplied* by the appropriate factor from the death benefit corridor factors in the policy.

For example, under option 1, assume your base death benefit changes as a result of changes in your account value. The adjustable term insurance rider adjusts to provide death benefits equal to your target death benefit in each year:

| <u>Base Death Benefit</u> | <u>Target Death Benefit</u> | <u>Adjustable Term Insurance Rider Amount</u> |
|---------------------------|-----------------------------|---|
| \$501,500 | \$550,000 | \$48,500 |
| 502,500 | 550,000 | 47,500 |
| 502,250 | 550,000 | 47,750 |

It is possible that the amount of your adjustable term insurance may be zero if your base death benefit increases enough. Using the same example, if the base death benefit under your policy grew to \$550,000 or more, the adjustable term insurance coverage would be zero.

Even when the adjustable term insurance is reduced to zero, your rider remains in effect until you remove it from your policy. Therefore, if later the base death benefit drops below your target death benefit, the adjustable term insurance rider coverage reappears to maintain your target death benefit.

You may change the target death benefit schedule after it is issued, based on our rules. *See Changes in Death Benefit Amounts, page 28.*

We may deny future, scheduled increases to your target death benefit if you cancel a scheduled change or if you ask for an unscheduled decrease in your target death benefit.

Partial withdrawals, changes from death benefit option 1 to option 2 and base decreases may reduce your target death benefit. *See Partial Withdrawals, page 38, and Changes in Death Benefit Options, page 27.*

There is no defined premium for a given amount of adjustable term insurance coverage. Instead, we

deduct a monthly cost of insurance charge from your account value. The cost of insurance for this rider is calculated as the monthly cost of insurance rate for the rider coverage *multiplied* by the adjustable term death benefit in effect that month. The cost of insurance rates are determined by us from time to time. They are based on the issue ages, genders and premium classes of the insured people, as well as the length of time since your policy date. Rates will not exceed 125% of the 1980 Commissioner's Standard Ordinary Sex Distinct Mortality Table. The monthly guaranteed maximum cost of insurance rates for this rider will be in your policy. *See Cost of Insurance Charge, page 49.*

If the target death benefit is increased by you after the rider is issued, we use the same cost of insurance rate schedule for the entire coverage for this rider. These rates are based on the original premium classes even though new evidence of insurability is required for the increased schedule.

Not all policy features apply to the adjustable term insurance rider. The rider does not contribute to the policy account value or surrender value. It does not affect investment performance and cannot be used for a policy loan. The adjustable term insurance rider provides benefits only at the death of the second of the insured people.

Single Life Term Insurance Rider

This rider provides a benefit upon the death of one of the insured people under your policy. You may choose to add a single life term insurance rider for one insured person. Or, you may add two riders, one for each insured person. You may add this rider to your policy at any time if both insured people are alive and insurable according to our rules.

We will issue the single life term insurance rider on an insured person who is between the ages of 15 and 85. Coverage may continue until the earlier of when:

- the insured person covered by this rider reaches age 100
- the continuation of coverage provision becomes effective
- the insured person covered by this rider dies
- the grace period expires
- the policy is surrendered.

See Continuation of Coverage, page 32.

The minimum amount of coverage for a single life term insurance rider is \$1,000. The maximum

coverage under this rider is subject to our underwriting determinations. At issue, you may schedule the rider's death benefit to increase or decrease.

Your request for an increase or decrease in rider coverage is effective on the next monthly processing date after we approve your request. There may be underwriting or other requirements which must be met before we approve your request. A requested change in your coverage must be for at least \$1,000. If you schedule or request an increase after issue, the insured person will be subject to our underwriting requirements.

The charge for this rider is based on the age, gender, premium class and underwriting characteristics of the insured person. The charge for this rider is deducted on each monthly processing date as a cost per each \$1,000 of the net amount at risk under the rider. See the policy schedule pages for information on your actual cost.

Accelerated Death Benefit Rider

The rider pays part of the death benefit to you upon your written request if a qualified doctor diagnoses a terminal illness of the insured person. Receipt of an accelerated payment of death benefit reduces the death benefit of your policy and the net cash surrender value. No policy loans are permitted after this rider is exercised. There is no charge for this rider. ***Benefits paid under this rider may be taxable. You should consult with your tax adviser.***

Special Features

Designated Deduction Option

You may designate one investment option from which we deduct your monthly charges. You may make this designation at any time. You may not use the loan division.

If you do not choose a designated deduction option or if the amount in your designated deduction option is not enough to cover the deductions and charges, the charges will be taken from all investment options (including the guaranteed interest division) in the same proportion that your account value in each has to your total net account value on the monthly processing date.

Policy Split Option

Under certain circumstances, you may exchange your policy for two single life insurance policies: one on each of the two insured people. The policy split option has insurability requirements which may be met at or before your policy is split. Evidence of insurability is required for a new single life policy where coverage is greater than 50% of your original policy death benefit or for an insured person who is subject to certain underwriting ratings.

On the effective date of the policy split, the available death benefit under your policy will be divided between the two new single life insurance policies. You may take less than the maximum death benefit amount available.

Unless law requires otherwise, you may use the policy split option if:

- three months following the effective date of a final divorce decree regarding the marriage of the two insured people.
- there is a change to the federal estate tax law which results in either:
 - i) removal of the unlimited marital deduction provision; or
 - ii) a reduction in the current maximum federal estate tax of at least 50% after your policy date.
- there is a dissolution of business conducted or owned by the two insured people.

You must send us written notice of your election to use the policy split option within 180 days of the eligible event. You must provide satisfactory evidence that the event has occurred.

The effective date of the policy split is the first monthly processing date after we approve it. The insurance coverage under the two individual life insurance policies will start on the effective date of the policy split only if both insured people are alive on that date. If either insured person is not alive on that date, your exchange is void.

All terms and conditions of the new policies apply once your policy is split and they may differ from those of this policy. Consult your new single life insurance policies.

The premium for each new policy will be based on each insured person's age, gender and premium class at the time of the split of your policy. Premium will be due for each new policy under the terms of the

new policy. The account value of the old policy will be allocated to the new policies on the effective date in the same proportion that the stated death benefit was divided between the two single life insurance policies, unless we agree to a different allocation. If this allocation causes an increase in the stated death benefit of either of the new single life policies, we may limit the account value you may apply to each new policy. Remaining account value will be paid to you and may be taxable. The refund of sales charge does not apply to a policy split.

If you have an outstanding policy loan it will be divided and transferred to each new single life insurance policy in the same proportion as your account value is allocated. A remaining loan balance must be paid before the effective date of the policy split. Any person or entity to which you have assigned your policy must agree to the policy split. An assignment of your policy generally will apply to each new single life insurance policy.

If you have a single life term insurance rider on your policy at the date of the policy split, you may have a term insurance rider insuring the same person on the new policy, if that rider is available. Other riders may or may not be available on the new policies and may be subject to proof of insurability.

Exercising the policy split option may be treated as a taxable transaction. Moreover, the two single life insurance policies could be treated as modified endowment contracts. ***See Tax Considerations, page 50.***

You may not split your policy into two single life insurance policies if:

- the continuation of coverage period has begun
- one of the insured people has died
- your policy grace period has ended
- your policy has been terminated or surrendered.

You should consult a tax adviser before exercising the policy split option.

Right to Exchange Policy

During the first 24 months after your policy date, you have the right to exchange your policy for a guaranteed policy, unless law requires differently. We transfer the amount you have in the variable division to the guaranteed interest division. We allocate all future net premium to the guaranteed

interest division. We do not allow future payments or transfers to the variable division after you exercise this right. We do not charge you for this exchange. ***See Guaranteed Interest Division, page 20.***

Policy Maturity

At the policy anniversary nearest the younger insured person's 100th birthday (Maturity Date) if you do not want the continuation of coverage feature become effective, you may surrender the policy for the net account value and end coverage. Part of this payment may be taxable. You should consult your tax adviser.

Continuation of Coverage

The continuation of coverage feature allows your insurance coverage to continue beyond maturity. If on the maturity date you allow the continuation of coverage feature to become effective, we:

- convert target death benefit to stated death benefit
- convert death benefit option 2 or 3 to death benefit option 1
- terminate all riders
- transfer your net account value (excluding the amount in the loan division) into the guaranteed interest division
- terminate dollar cost averaging and automatic rebalancing.

Your insurance coverage continues until the death of the second of the insured people, unless the policy lapses or is surrendered. However:

- we accept no further premium payments
- we deduct no further charges except loan interest and partial withdrawal charges, if applicable
- your monthly deductions cease.
- you may not make transfers into the variable division.

During the continuation of coverage period, you may take policy loans or partial withdrawals from your policy. If we pay a persistency refund on the guaranteed interest division, it will be credited to your policy. ***See Persistency Refund, page 33.***

If you have an outstanding policy loan, interest continues to accrue. If you fail to make sufficient loan or loan interest payments, it is possible that the loan balance *plus* accrued interest may become greater than your account value and cause your policy to lapse. To avoid this lapse, you may repay

loans and loan interest payments during the continuation of coverage period.

If you wish to stop coverage during the continuation of coverage period, you may surrender your policy and receive the net account value. All other normal consequences of surrender apply. *See Surrender, page 41.*

The continuation of coverage feature is not available in all states. If a state has approved this feature, it is automatic and you do not need to take any action to activate it.

The tax consequences of coverage continuing beyond the younger insured's person's 100th birthday are uncertain. You should consult a tax adviser as to those consequences.

Persistency Refund

Where law allows us, we pay long-term policy owners a persistency refund. Each month your policy remains in force after your tenth policy anniversary, we credit your account value with a refund of 0.05% of the account value. This refund is 0.60% of your account value on an annual basis.

We do not guarantee that we will pay a persistency refund on the guaranteed interest division. If we pay a persistency refund on the guaranteed interest division, we will pay it even if your policy is in the continuation of coverage period.

If applicable, we add the persistency refund to the variable and guaranteed interest divisions, but not the loan division, in the same proportion that your account value in each investment option has to your net account value as of the monthly processing date.

Here are two examples of how the persistency refund may affect your account value:

Example 1: Your policy has no loan:

- account value = \$10,000 (all in the variable division)

- monthly persistency refund rate = 0.0005
- persistency refund = $10,000 \times 0.0005$
= \$5.00

| | Value Before Persistency Refund | Value After Persistency Refund |
|----------------------|---------------------------------------|--------------------------------------|
| Variable Division | \$10,000.00 | \$10,005.00 |

Example 2: Your policy does have a loan:

- account value = \$10,000
- account value in the variable division = \$6,000
- account value in the loan division = \$4,000
- monthly persistency refund rate = 0.0005
- persistency refund = $10,000 \times 0.0005$
= \$5.00

| | Value Before Persistency Refund | Value After Persistency Refund |
|----------------------|---------------------------------------|--------------------------------------|
| Variable Division | \$6,000.00 | \$6,005.00 |
| Loan | \$4,000.00 | \$4,000.00 |

The persistency refund may have adverse tax consequences if it results in a small difference between the interest rate charged and the interest rate credited on a policy loan (a low cost loan).

Refund of Sales Charge

If you surrender your policy within the first two policy years (guaranteed) and it has not lapsed, we will refund a portion of the sales charge previously deducted from your premium payments. We base the refund on premium payments we receive in your first policy year. The refund of sales charge is not available if your policy was purchased with the proceeds of a policy issued by us or one of our affiliates.

| Policy Year | Refund of Sales Charge as a Percentage of First Policy Year Premium | | |
|-------------|--|----------------------|----------------------|
| | We Guarantee a Minimum of | We Currently Pay | |
| | | Up to Target Premium | Above Target Premium |
| 1 | 5% | 10% | 8% |
| 2 | 2.5% | 10% | 4% |
| 3 | N/A | 10% | N/A |
| 4+ | N/A | N/A | N/A |

Policy Values

Account Value

Your account value is the total amount you have in the guaranteed interest division, the variable division and the loan division. Your account value reflects:

- net premiums applied
- charges deducted
- loan interest deducted
- partial withdrawals taken
- investment performance of the variable investment options
- interest earned on the guaranteed interest division
- interest earned on the loan division.

Net Account Value

Your policy's net account value is your account value *minus* the amount of your outstanding policy loan and accrued loan interest, if any.

Cash Surrender Value

Your cash surrender value is your account value *plus* refund of sales charge due.

Net Cash Surrender Value

Your net cash surrender value is your cash surrender value *minus* the amount of your outstanding policy loan and accrued loan interest, if any.

Determining Values in the Variable Division

The amounts in the variable division are measured by accumulation units and accumulation unit values. The value of a variable investment option is the accumulation unit value for that option *multiplied* by the number of accumulation units you own in that

option. Each variable investment option has a different accumulation unit value.

The accumulation unit value is the value determined on each valuation date. The accumulation unit value of each variable investment option varies with the investment performance of the underlying portfolio. It reflects:

- investment income
- realized and unrealized gains and losses
- investment portfolio expenses
- daily mortality and expense risk charges we take from the separate account.

A valuation date is one on which the net asset value of the investment portfolio shares and unit values of the variable investment options are determined. Valuation dates are each day the New York Stock Exchange and the company's customer service center are open for business, except for days on which a corresponding investment portfolio does not value its shares, or any other day as required by law. Each valuation date ends at 4 p.m. Eastern Time. Our customer service center may not be open for business on major holidays.

You purchase accumulation units when you allocate premium or make transfers to a variable investment option, including transfers from the loan division.

We redeem accumulation units:

- when amounts are transferred from a variable investment option (including transfers to the loan division)
- for your policy's monthly deductions from your account value
- for policy transaction charges
- when you take a partial withdrawal
- when you surrender your policy
- to pay the death proceeds.

To calculate the number of accumulation units purchased or sold, we divide the dollar amount of your transaction by the accumulation unit value for that variable investment option calculated at the close of business on the valuation date of the transaction.

See How We Calculate Accumulation Unit Values, page 35.

The date of a transaction is the date we receive your premium or transaction request at our customer service center, so long as the date of receipt is a valuation date. We use the accumulation unit value which is next calculated after we receive your premium or transaction request and we use the number of accumulation units attributable to your policy on the date of receipt.

We take monthly deductions from your account value on the monthly processing date. If your monthly processing date is not a valuation date, the monthly deduction is processed on the next valuation date.

The value of amounts allocated to the variable investment options goes up or down depending on investment performance.

For amounts in the variable investment options, there is no guaranteed minimum value.

How We Calculate Accumulation Unit Values

We determine accumulation unit values on each valuation date.

We generally set the accumulation unit value for a variable investment option at \$10 when the investment option is first opened. After that, the accumulation unit value on any valuation date is:

- the accumulation unit value for the preceding valuation date *multiplied* by
- the variable investment option's accumulation experience factor for the valuation period.

Every valuation period begins at 4:00 p.m. Eastern time on a valuation date and ends at 4:00 p.m. Eastern time on the next valuation date.

We calculate an accumulation experience factor for each variable investment option every valuation date as follows:

- We take the share value of the underlying portfolio shares as reported to us by the investment portfolio managers as of the close of business on that valuation date.

- We add dividends or capital gain distributions declared per share and reinvested by the investment portfolio on the date that the share value is affected. If applicable, we subtract a charge for taxes.
- We divide the resulting amount by the value of the shares in the underlying investment portfolio at the close of business on the previous valuation date.
- We then subtract the mortality and expense risk charge under your policy. The daily charge is .002055% (.75% annually) of the accumulation unit value. If the previous day was not a valuation date, the charge is multiplied by the number of days since the last valuation date.

Transfers of Account Value

You may transfer your account value among the variable investment options and the guaranteed interest division. If your state requires a refund of premium during the free look period, you may not make transfers until after your free look period ends.

Currently, we do not limit the number of transfers you may make; but, we reserve the right to do so if we determine the trading within your policy is excessive. You may not make transfers during the continuation of coverage period. ***See Excessive Trading, page 36, and Continuation of Coverage, page 32.***

You may make transfer requests in writing, or by telephone if you have telephone privileges, to our customer service center. You may fax your request to us. Telephone and facsimile transfers may not always be available. Telephone or fax systems, whether yours, your service provider's or your agent's, can experience outages or slowdowns for a variety of reasons. These outages or slowdowns may delay or prevent our processing of your request. Although we have taken precautions to help our systems handle heavy use, we cannot promise complete reliability under all circumstances. If you are experiencing problems, you should make your transfer request in writing.

Your transfer takes effect on the valuation date we receive your request. The minimum amount you may transfer is \$100. This minimum does not need to come from one investment option or be transferred to one investment option as long as the total amount you transfer is at least \$100. However, if the amount

remaining in an investment option is less than \$100 and you make a transfer request from that investment option, we transfer the entire amount.

Excessive Trading

Excessive trading activity can disrupt investment portfolio management strategies and increase portfolio expenses through:

- increased trading and transaction costs
- forced and unplanned portfolio turnover
- lost opportunity costs
- large asset swings that decrease the investment portfolio's ability to provide maximum investment return to all policyowners.

In response to excessive trading, we may place restrictions or refuse transfers and may impose a fee for each future transfer of \$25. We will take such actions when we determine, in our sole discretion, that transfers are harmful to the investment portfolios or to policyowners as a whole.

Guaranteed Interest Division Transfers

Transfers into the guaranteed interest division are not restricted.

You may transfer from the guaranteed interest division only in the first 30 days of each policy year. Transfer requests received within 30 days before your policy anniversary will be processed on your policy anniversary. A request received by us within 30 days after your policy anniversary is effective on the valuation date we receive it. Transfer requests made at any other time will not be processed.

Transfers from the guaranteed interest division in each policy year are limited to the largest of:

- 25% of your guaranteed interest division balance at the time of your first transfer or withdrawal out of it in that policy year
- the sum of the amounts you have transferred and withdrawn from the guaranteed interest division in the prior policy year
- \$100.

Dollar Cost Averaging

You can elect dollar cost averaging if your policy has at least \$10,000 invested in a qualifying source portfolio. The qualifying source investment portfolio is the Fidelity VIP Money Market Portfolio or the Neuberger Berman AMT Limited Maturity Bond

Portfolio. The main goal of dollar cost averaging is to protect your policy values from short-term price changes.

Dollar cost averaging does not assure a profit nor does it protect you against a loss in a declining market.

This systematic plan of transferring account values is intended to reduce the risk of investing too much when the price of a portfolio's shares is high. It also reduces the risk of investing too little when the price of a portfolio's shares is low. Since you transfer the same dollar amount to these investment options each period, you purchase more units when the unit value is low and you purchase fewer units when the unit value is high.

There is no charge for this feature. You may add dollar cost averaging to your policy at any time. The first dollar cost averaging date must be at least one day after we receive your dollar cost averaging request. If your state requires a refund of premium during the free look period, dollar cost averaging begins after your free look period has ended.

With dollar cost averaging, you designate either a dollar amount or a percentage of your account value for automatic transfer from a qualifying source portfolio. Each period we automatically transfer the amount you select from your chosen source portfolio to one or more other variable investment options. You may not use the guaranteed interest division or the loan division in dollar cost averaging.

The minimum percentage you may transfer to one investment option is 1% of the total amount you transfer. You must transfer at least \$100 on each dollar cost averaging transfer date.

Dollar cost averaging may occur on the same day of the month on a monthly, quarterly, semi-annual or annual basis. Unless you tell us otherwise, dollar cost averaging automatically takes place monthly on the monthly processing date.

You may have both dollar cost averaging and automatic rebalancing at the same time. However, the dollar cost averaging source portfolio cannot be included in your automatic rebalancing program.

Changing Dollar Cost Averaging

If you have telephone privileges, you may change the program by telephoning our customer service center

or you may fax your request to us. Telephone and facsimile transfers may not always be available. Telephone or fax systems, whether yours, your service provider's or your agent's, can experience outages or slowdowns for a variety of reasons. These outages or slowdowns may delay or prevent our processing of your request. Although we have taken precautions to help our systems handle heavy use, we cannot promise complete reliability under all circumstances. If you are experiencing problems, you should make your transfer request in writing. ***See Telephone Privileges, page 44.***

Terminating Dollar Cost Averaging

You may cancel dollar cost averaging by sending satisfactory notice to our customer service center. We must receive it at least one day before the next dollar cost averaging date.

Dollar cost averaging will terminate on the date:

1. you specify;
2. your balance in the source portfolio reaches a dollar amount you set;
3. the amount in the source portfolio is equal to or less than the amount to be transferred on a dollar cost averaging date. We will transfer the remaining amount and dollar cost averaging ends.

Automatic Rebalancing

Automatic rebalancing is a method of maintaining a consistent approach to investing account values over time and simplifying the process of asset allocation among your chosen investment options. There is no charge for this feature.

If you choose this feature, on each rebalancing date we transfer amounts among the investment options to

match your pre-set automatic rebalancing allocation. After the transfer, the ratio of your account value in each investment option to your total account value for all investment options included in automatic rebalancing matches the automatic rebalancing allocation percentage you set for that investment option. This action rebalances the amounts in the investment options that do not match your set allocation. This mismatch can happen if an

investment option outperforms the other investment options for that time period.

You may choose automatic rebalancing on your application or later by completing our customer service form. Automatic rebalancing may occur on the same day of the month on a monthly, quarterly, semi-annual or annual basis. If you do not specify a frequency, automatic rebalancing will occur quarterly.

The first transfer occurs on the date you select (after your free look period ends if your state requires return of premium during the free look period). If you do not request a date, processing is on the last valuation date of the calendar quarter in which we receive your request.

You may have both automatic rebalancing and dollar cost averaging at the same time. However, the source portfolio for your dollar cost averaging cannot be included in your automatic rebalancing program. You may not include the loan division.

Changing Automatic Rebalancing

You may change your allocation percentages for automatic rebalancing at any time. Your allocation change is effective on the valuation date that we receive it at our customer service center. If you reduce the amount allocated to the guaranteed interest division, it is considered a transfer from that division. You must meet the requirements for the maximum transfer amount and time limitations on transfers from the guaranteed interest division. ***See Transfers of Account Value, page 35.***

Terminating Automatic Rebalancing

You may terminate automatic rebalancing at any time, as long as we receive your notice of termination at least one day before the next automatic rebalancing date.

Policy Loans

You may borrow from your policy after the first monthly processing date, by using your policy as security for a loan, or as otherwise required by law. The amount you borrow (policy loan) is:

- the amount you borrow from your policy; *plus*
- policy loan interest that is capitalized when due; *minus*

- policy loan or interest repayments you make.

Unless law requires differently, a new policy loan must be at least \$100. The maximum amount you may borrow, unless required differently by law, is your net account value *minus* the monthly deductions to your next policy anniversary or 13 monthly deductions if you take a loan within thirty days before your next policy anniversary.

Your request for a policy loan must be directed to our customer service center. If you have telephone privileges, you may request a policy loan of less than \$25,000 by telephone or fax. Telephone and facsimile transfers may not always be available. Telephone or fax systems, whether yours, your service provider's or your agent's, can experience outages or slowdowns for a variety of reasons. These outages or slowdowns may delay or prevent our processing of your request. Although we have taken precautions to help our systems handle heavy use, we cannot promise complete reliability under all circumstances. If you are experiencing problems, you should make your transfer request in writing. ***See Telephone Privileges, page 44.***

When you request a loan you may specify one investment option from which the loan will be taken. If you do not specify one, the loan will be taken proportionately from each active investment option you have, including the guaranteed interest division.

When you take a policy loan, we transfer an amount equal to your policy loan to the loan division. We follow this same process for loan interest due at your policy anniversary. The loan division is part of our general account specifically designed to hold money used as collateral for loans and loan interest. We credit the loan division with interest at an annual rate of 3%.

Loan interest charges on your policy loan accrue daily at an annual interest rate of 3.75%. Interest is due in arrears on each policy anniversary. If you do not pay it when due, we add it to your policy loan balance.

If you request an additional loan, we add the new loan amount to your existing policy loan. This way, there is only one loan outstanding on your policy at any time.

Loan Repayment

You may repay your policy loan at any time. We assume that payments you make, other than scheduled premium payments, are policy loan repayments. You must tell us if you want payments to be premium payments.

When you make a loan repayment, we transfer an amount equal to your repayment from the loan division to the variable investment options and the guaranteed interest division in the same proportion as your current premium allocation, unless you tell us otherwise.

Effects of a Policy Loan

Taking a loan decreases the amount you have in the investment options. Accruing loan interest will change your net account value as compared to what it would have been if you did not take a loan.

Even if you repay your loan, it has a permanent effect on your account value. The benefits under your policy may be affected.

The loan is a first lien on your policy. If you do not repay your policy loan, we deduct your outstanding policy loan and accrued loan interest from the death proceeds payable or the cash surrender value payable.

Failure to repay your loan may affect the length of time your policy remains in force. Policy loans may cause your policy to lapse if your net account value is not enough to pay your deductions each month. ***See Lapse, page 40.***

Policy loans may have tax consequences. If your policy lapses with a loan outstanding, you may have further tax consequences. ***See Distributions Other than Death Benefits from Modified Endowment Contracts, page 52, and Distributions Other than Death Benefits from Policies That Are Not Modified Endowment Contracts, page 52.***

If you use the continuation of coverage feature and you have a policy loan, loan interest continues to accrue.

Partial Withdrawals

You may request a partial withdrawal to be processed on any valuation date after your first policy

anniversary by contacting our customer service center. If your policy qualifies as being “in corridor,” you may make partial withdrawals prior to your first anniversary. A policy is “in corridor” if:

- Under Death Benefit Option 1, your account value multiplied by the appropriate factor from Appendix A is greater than your stated death benefit.
- Under Death Benefit Option 2, your account value multiplied by the appropriate factor from Appendix A is greater than your stated death benefit plus your account value.

You make a partial withdrawal by withdrawing part of your net account value. If your request is by telephone or fax, it must be for less than \$25,000 and may not cause a decrease in your death benefit. Otherwise, your request must be in writing.

Telephone and facsimile transfers may not always be available. Telephone or fax systems, whether yours, your service provider’s or your agent’s, can experience outages or slowdowns for a variety of reasons. These outages or slowdowns may delay or prevent our processing of your request. Although we have taken precautions to help our systems handle heavy use, we cannot promise complete reliability under all circumstances. If you are experiencing problems, you should make your transfer request in writing. ***See Telephone Privileges, page 44.***

You may take up to twelve partial withdrawals per policy year. The minimum withdrawal is \$100. The maximum you may take is that which leaves \$500 as your net account value. If you request a withdrawal of more than this maximum, you must surrender your policy or reduce the withdrawal amount. When you take a partial withdrawal, we deduct the withdrawal amount *plus* a service fee from your account value. The maximum withdrawal from an “in corridor” policy prior to the first policy anniversary is limited to the amount that would cause your policy to no longer qualify as being “in corridor.” ***See Charges and Deductions, page 47.***

Unless you tell us otherwise, we will make a partial withdrawal from the guaranteed interest division and the variable investment options in the same proportion that each has to your net account value immediately before your withdrawal. You may not withdraw from the guaranteed interest division an amount greater than your total withdrawal *multiplied* by the proportion of your account value in the guaranteed interest division to your net account value immediately prior to the withdrawal. You may select one investment option from which your partial withdrawal will be taken.

Partial withdrawals may have adverse tax consequences. ***See Distributions Other than Death Benefits from Modified Endowment Contracts, page 24, and Distributions Other than Death Benefits from Policies That Are Not Modified Endowment Contracts, page 52.***

Partial Withdrawals under Death Benefit Option 1

If you selected death benefit option 1, it is your first partial withdrawal of the policy year, no more than fifteen years have passed since your policy date and the joint equivalent age of the insured people is not yet age 81, you may make a partial withdrawal of up to the greater of 10% of your account value, or 5% of your stated death benefit without decreasing your stated death benefit.

Otherwise, amounts you withdraw will reduce your stated death benefit by the amount of the withdrawal unless your policy death benefit has been increased due to the federal income tax definition of life insurance. If your policy death benefit has been increased due to the federal income tax definition of life insurance at the time of the partial withdrawal, then at least part of your partial withdrawal may be made without reducing your stated death benefit.

Partial Withdrawals under Death Benefit Option 2

If you have selected death benefit option 2, a partial withdrawal does not reduce your stated or target death benefit. However because your account value is reduced, we reduce the total death benefit by at least the partial withdrawal amount.

Partial Withdrawals under Death Benefit Option 3

If you have selected death benefit option 3 and your partial withdrawal is less than the total of premiums we have received *minus* the total of your partial withdrawals, then your stated death benefit will not be reduced. However because your account value is reduced, your total death benefit will be reduced.

If your partial withdrawal is more than the amount of premium we have received *minus* your total prior withdrawals, a two step process is used:

1. Your withdrawal of the amount that makes premiums received *minus* all partial withdrawals equal to zero is taken; then
2. The excess withdrawal amount you requested will reduce your stated death

benefit if:

- the excess amount is greater than 10% of your account value after step “1” above; or
- the excess amount is greater than 5% of your stated death benefit.

Stated Death Benefit and Target Death Benefit Reductions

Regardless of your chosen death benefit option, partial withdrawals do not reduce your stated death benefit if:

- your base death benefit has been increased to qualify your policy as life insurance under the federal income tax laws; and
- you withdraw an amount that is no greater than the amount that reduces your account value to a level which no longer requires your base death benefit to be increased to qualify as life insurance for federal income tax law purposes. *See Tax Status of the Policy, page 50.*

We require a minimum stated death benefit and a minimum target death benefit to issue your policy. You may not take a partial withdrawal if it reduces your stated death benefit or target death benefit below this minimum. *See Policy Issuance, page 21.*

We will send a new policy schedule page to you showing the effect of your withdrawal if there is any change to your stated death benefit or your target death benefit. In order to make this change, we may ask that you return the policy to our customer service center. Your withdrawal and reductions in the death benefits are effective as of the valuation date on which we receive your request. *See Distributions Other than Death Benefits from Modified Endowment Contracts, page 52, and Distributions Other than Death Benefits from Policies That Are Not Modified Endowment Contracts, page 52.*

Lapse

Your insurance coverage continues as long as your net account value is enough to pay your deductions

each month. Lapse does not apply if the special continuation period is in effect and you have met all requirements. *See Special Continuation Period, page 23.*

If the continuation of coverage feature is active, your policy could lapse if there is an outstanding policy loan even though there are no monthly deductions.

Grace Period

Your policy enters a 61-day lapse grace period if, on a monthly processing date:

- your net account value is zero (or less)
- the five-year special continuation period has expired, or you have not paid the required special continuation period premium.

We notify you that your policy is in a grace period at least 30 days before it ends. We send this notice to you (or a person to whom you have assigned your policy) at your last known address in our records. We notify you of the premium payment necessary to prevent your policy from lapsing. This amount generally is the past due charges, *plus* the estimated monthly policy and rider deductions for the next two months. If the death of the second of the insured people occurs during the grace period we do pay death proceeds to your beneficiaries, but with reductions for your policy loan balance, accrued loan interest and monthly deductions owed.

If we receive payment of the required amount before the end of the grace period, we apply it to your account value in the same manner as your other premium payments, then we deduct the overdue amounts from your account balance.

If you do not pay the full amount within the 61-day grace period, your policy and its riders lapse without value. We withdraw your remaining account balance from the variable and guaranteed interest divisions. We deduct amounts you owe us, including surrender charges, and inform you that your policy coverage has ended.

Lapse Summary

| Special Continuation Period | |
|---|--|
| If you meet the requirements | If you do <u>not</u> meet the requirements or it is no longer in effect |
| Your policy does not lapse if you do not have enough net account value to pay the monthly charges. The charges are deducted and may cause a negative account value until the earlier of: 1) the date you have enough net account value, or 2) until the end of the special continuation period. | Your policy enters the grace period if your net account value is not enough to pay the monthly charges, or if your loan <i>plus</i> accrued loan interest is more than your account value. If you do not pay enough premium to cover the past due monthly charges and interest due <i>plus</i> the monthly charges and interest due through the end of the grace period, your policy lapses. |

Reinstatement

If you do not pay enough premium before the end of the grace period, your policy lapses. You may still reinstate your policy and its riders within five years of the end of the grace period.

Unless state law requires differently, we will reinstate your policy and riders if:

- you are the owner and have not surrendered your policy
- you provide satisfactory evidence to us that both insured people are alive and that each is still insurable according to our normal rules of underwriting
- we receive enough premium to keep your policy and its riders in force from the beginning to the end of the grace period and for two months after the reinstatement date.

We will not reinstate your policy if one insured person has died or become uninsurable since your policy date. If one insured person was uninsurable at the issue of your policy and remains uninsurable, we will review the underwriting requirements applicable to each insured person at the time you request reinstatement to determine whether or not your policy may be reinstated.

Reinstatement is effective on the monthly processing date following our approval of your reinstatement application. If you had a policy loan when coverage ended, we reinstate it with accrued loan interest to the date of lapse. The cost of insurance charges at the time of reinstatement are adjusted to reflect the time since the lapse.

We apply net premium received after reinstatement according to your most recent instructions which may be those in effect at the start of the grace period.

Surrender

You may surrender your policy for its net cash surrender value any time before the death of the second of the insured people. You may take your net cash surrender value in other than one payment. We compute your net cash surrender value as of the valuation date we receive your written surrender request and policy at our customer service center. All insurance coverage ends on the date we receive your surrender request and policy. ***See Policy Values, page 34, and Settlement Provisions, page 45.***

We do not pro-rate or add back charges or expenses which we deducted before your surrender to your account value but a refund of sales charge may apply. ***See Refund of Sales Charge, page 33.***

A surrender of your policy may have adverse tax consequences. ***See Distributions Other than Death Benefits from Modified Endowment Contracts, page 52, and Distributions Other than Death Benefits from Policies That Are Not Modified Endowment Contracts, page 52.***

General Policy Provisions

Free Look Period

You have the right to examine your policy and return it, for any reason, to us during the period shown in

the policy. The right to examine period, often called the free look period, starts on the date you receive your policy and is a length of time specified by law. If you return your policy to us within the specified period, we will consider it canceled as of your policy date.

If you cancel your policy during this free look period, you will receive a refund as determined by state law. Generally, there are two types of free look refunds

- some states require a return of all premium
- other states require payment of account value plus a refund of all charges deducted.

Your policy will specify what type of free look refund applies in your state. The type of free look refund in your state will affect when premium we receive before the end of the free look period is invested into the variable investment options. *See Allocation of Net Premiums, page 24.*

Your Policy

The entire contract between you and us is the combination of:

- your policy;
- a copy of your original application and any applications for benefit increases or decreases;
- all of your riders;
- endorsements;
- policy schedule pages; and
- reinstatement applications.

If you make a change to your coverage, we give you a copy of your changed application and new policy schedules. If you send your policy to us, we attach these items to your policy and return it to you. Otherwise, you need to attach them to your policy.

Unless there is fraud, we consider all statements made in an application to be representations and not guarantees. We use no statement to deny a claim, unless it is in an application.

A president or an officer of our company and our secretary or assistant secretary must sign all changes or amendments to your policy. No other person may change its terms or conditions.

Age

The age stated in your policy schedule is the joint equivalent age of the insured people we use to issue

your policy. The joint equivalent age is the sum of both insured people's ages adjusted for the differences in ages and gender, divided by two and rounded down.

The insured people must each be no more than age 90 at policy issue. The minimum joint equivalent age must be at least 15. The maximum joint equivalent age must be no more than 85. There is no limit on the difference in the insured people's ages. Age is measured as the age of the insured person on the birthday nearest the policy anniversary.

The younger insured person's 100th birthday is the 100th anniversary of the younger insured person's birth regardless if he/she has survived. The policy anniversary nearest to this date is the date used for policy maturity and continuation of coverage.

Ownership

The original owner is the person named as the owner in the policy application. The owner can exercise all rights and receive the benefits until the death of the second of the insured people. This includes the right to change the owner, beneficiaries or the method designated to pay death proceeds.

As a matter of law, all rights of ownership are limited by the rights of any person who has been assigned rights under the policy and any irrevocable beneficiaries.

You may name a new owner by giving us written notice. The effective date of the change to the new owner is the date the prior owner signs the notice. However, we will not be liable for any action we take before a change is recorded at our customer service center. A change in ownership may cause the prior owner to recognize taxable income on gain under the policy.

Beneficiaries

You, as owner, name the beneficiaries when you apply for your policy. The primary beneficiaries who survive both of the insured people receives the death proceeds. Other surviving beneficiaries receive death proceeds only if there are no surviving primary beneficiaries. If more than one beneficiary survives both insured people, they share the death proceeds equally, unless you have told us otherwise. If none of your policy beneficiaries has survived both insured people, we pay the death proceeds to you or your estate, as owner.

You may name new beneficiaries any time before the death of the second of the insured people. We pay the death proceeds to the beneficiaries whom you have most recently named according to our records. We do not make payments to multiple sets of beneficiaries.

Collateral Assignment

You may assign your policy by sending written notice to us. After we record the assignment, your rights as owner and the beneficiaries' rights (unless the beneficiaries was made irrevocable beneficiaries under an earlier assignment) are subject to the assignment. It is your responsibility to make sure the assignment is valid.

A collateral assignment may have tax consequences. You should consult your tax adviser.

Incontestability

After your policy has been in force and both insured people are alive for two years from your policy date, and from the effective date of a new segment or an increase in any other benefit, we will not question the validity of statements in your applicable application.

Misstatements of Age or Gender

If an insured person's age or gender has been misstated, we adjust the death benefit to the amount which would have been purchased for each insured person's correct age and gender. We base the adjusted death benefit on the cost of insurance charges deducted from your account value on the last monthly processing date before the death of the second of the insured people, or as otherwise required by law.

If unisex cost of insurance rates apply, we do not make adjustments for a misstatement of gender.

Suicide

If either insured person commits suicide, while sane or insane, within two years of your policy date, unless otherwise required by law, we limit death proceeds payable to:

1. the total of all premiums we receive to the time of death; *minus*
2. outstanding policy loan amounts and accrued loan interest; *minus*

3. partial withdrawals taken.

We make a limited payment to the beneficiaries for a new segment or other increase if the second of the insured people commits suicide, while sane or insane, within two years of the effective date of a new segment or within two years of an increase in any other benefit, unless otherwise required by law. The limited payment is equal to the cost of insurance and monthly expense charges which were deducted for the increase.

Transaction Processing

Generally, within seven days of when we receive all information required to process a payment, we pay:

- death proceeds
- net cash surrender value
- partial withdrawals
- loan proceeds.

We may delay processing these transactions if:

- the NYSE is closed for trading
- trading on the NYSE is restricted by the SEC
- there is an emergency so that it is not reasonably possible to sell securities in the variable investment options or to determine the value of a variable investment option's assets
- a governmental body with jurisdiction over the separate account allows suspension by its order.

SEC rules and regulations determine whether or not these conditions exist.

We execute transfers among the variable investment options as of the valuation date of our receipt of your request at our customer service center.

We determine the death benefit as of the date of death of the second of the insured people. The death proceeds are not affected by subsequent changes in the value of the variable investment options.

We may delay payment from our guaranteed interest division for up to six months, unless law requires otherwise, of surrender proceeds, withdrawal amounts or loan amounts. If we delay payment more than 30 days, we pay interest at our declared rate (or at a higher rate if required by law) from the date we receive your complete request.

Notification and Claims Procedures

Except for certain authorized telephone requests, we must receive any election, designation, change, assignment or request in writing from the owner.

You must use a form acceptable to us. We are not liable for actions taken before we receive and record your notice. We may require you to return your policy for certain policy changes or if you surrender it.

If an insured person dies while your policy is in force, please let us know as soon as possible. We will immediately send you instructions on how to make a claim. As proof of the insured person's death, we may require you to provide proof of the deceased insured person's age and a certified copy of the death certificate.

The beneficiaries and the deceased insured person's next of kin may need to sign authorization forms. These forms allow us to get information such as medical records from doctors and hospitals.

Telephone Privileges

Telephone privileges are automatically provided to you and your agent/registered representative, unless you decline it on the application or contact our customer service center. Telephone privileges allow you or your agent/registered representative to call our customer service center to:

- make transfers
- change premium allocations
- change features in your dollar cost averaging and automatic rebalancing programs
- request partial withdrawals
- request a policy loan.

Our customer service center uses reasonable procedures to make sure that instructions received by telephone are genuine. These procedures may include:

- requiring some form of personal identification.
- providing written confirmation of any transactions
- tape recording telephone calls.

By accepting automatic telephone privileges, you authorize us to record your telephone calls with us. If we use reasonable procedures to confirm instructions, we are not liable for losses due to

unauthorized or fraudulent instructions. We may discontinue this privilege at any time.

Non-participation

Your policy does not participate in the surplus earnings of Security Life.

Distribution of the Policies

The principal underwriter (distributor) for our policies is ING America Equities, Inc., ING America Equities, Inc., is an affiliate of Security Life. It is registered as a broker/dealer with the SEC and the NASD. We pay ING America Equities, Inc., for acting as the principal underwriter under a distribution agreement.

We sell our policies through licensed insurance agents who are registered representatives of other broker/dealers including, but not limited to:

1. VESTAX Securities Corporation, an indirect affiliate;
2. Locust Street Securities, Inc., an indirect affiliate;
3. Multi-Financial Securities, Corp., an indirect affiliate;
4. IFG Network Securities, Inc., an indirect affiliate;
5. Washington Square Securities, Inc., an indirect affiliate;
6. Guaranty Brokerage Services Inc., an indirect affiliate;
7. Financial Network Investment Corporation, an indirect affiliate;
8. AETNA Investment Services, LLC, an indirect affiliate;
9. Primevest Financial Services, Inc., an indirect affiliate;
10. Granite Investment Services, Inc., an indirect affiliate; and
11. Financial Northeastern Securities, Inc., an indirect affiliate.

All broker/dealers who sell this policy have entered into selling agreements with us. Under these agreements, we pay a distribution allowance to the broker/dealers, who pay commissions to their agents/registered representatives who sell this policy.

There are two structures for the distribution allowances, but the structure choice does not affect fees or charges on your policy.

Under the levelized structure, the distribution allowance in policy years one through seven is 12% of the premium we receive up to target premium and less thereafter.

Under the modified structure, the distribution allowance in policy year one is 30% of premium we receive up to target premium and significantly lower thereafter.

Although it varies by policy, we estimate the typical first year compensation payable to a selling broker/dealer if a policy pays target premium to be \$6 per \$1,000 of stated death benefit.

Broker/dealers receive annual renewal payments (trails) of 0.20% of the average net account value for the first ten policy years and are paid at a lower rate each policy year thereafter. If both insured people die before the seventh policy anniversary and your policy is in force, we make a one-time additional compensation payment for the initial sale of your policy.

Some broker/dealers receive a slightly lower distribution allowance because we provide them with greater marketing and administrative support. We pay wholesaler fees and marketing and training allowances. We may provide repayments or make sponsor payments for broker/dealers to use in sales contests for their registered representatives. We do not hold contests directly based on sales of this product. We do hold training programs from time to time at our own expense. We pay dealer concessions, wholesaling fees, other allowances and the costs of all other incentives or training programs from our resources which include sales charges.

Advertising Practices and Sales Literature

We may use advertisements and sales literature to promote this product, including:

- articles on variable life insurance and other information published in business or financial publications;

- indices or rankings of investment securities; and
- comparisons with other investment vehicles, including tax considerations.

We may use information regarding the past performance of the variable investment options. Past performance is not indicative of future performance of the investment options or the policies and is not reflective of the actual investment experience of policyowners.

We may feature certain investment options and their managers, as well as describe asset levels and sales volumes. We may refer to past, current, or prospective economic trends and investment performance or other information we believe may be of interest to our customers.

Settlement Provisions

You may take your net cash surrender value in other than one payment. Likewise, you may elect to have the beneficiaries receive the death proceeds other than in one payment. If you make this election, you must do so before the death of the second of the insured people. If you have not made this election, the beneficiaries may do so within 60 days after we receive proof of death of the second of the insured people.

The investment performance of the variable investment options does not affect payments under these settlement options. Instead, interest accrues at a fixed rate based on the option you choose. Payment options are subject to our rules at the time you make your selection. Currently, a periodic payment must be at least \$20 and the total proceeds must be \$2,000 or more.

- Option I:** Payouts for a Designated Period
- Option II:** Life Income with Payouts Guaranteed for a Designated Period
- Option III:** Hold at Interest
- Option IV:** Payouts of a Designated Amount
- Option V:** Other Options We Offer at the Time We Pay the Benefit

Administrative Information About the Policy

Voting Privileges

We invest the variable investment options' assets in shares of investment portfolios. We are the legal owner of the shares held in the separate account and we have the right to vote on certain issues. Among other things, we may vote on issues described in the fund's current prospectus or issues requiring a vote by shareholders under the Investment Company Act of 1940.

Even though we own the shares, we give you the opportunity to tell us how to vote the number of shares attributable to your account value. We count fractional shares. If you have a voting interest, we send you proxy material and a form on which to give us your voting instructions.

Each investment portfolio share has the right to one vote. The votes of all investment portfolio shares are cast together on a collective basis, except on issues for which the interests of the portfolios differ. In these cases, voting is done on a portfolio-by-portfolio basis.

Examples of issues that require a portfolio-by-portfolio vote are changes in the fundamental investment policy of a particular investment portfolio; or approval of an investment advisory agreement.

We vote the shares in accordance with your instructions at meetings of investment portfolio shareholders. We vote any investment portfolio shares that are not attributable to policies and any investment portfolio shares for which the owner does not give us instructions, the same way we vote as if we did receive owner instructions.

We reserve the right to vote investment portfolio shares without getting instructions from policy owners if the federal securities laws, regulations or their interpretations change to allow this.

You may instruct us only on matters relating to the investment portfolios corresponding to those in which you have invested assets as of the record date set by the investment portfolio's Board for the portfolio's shareholders meeting. We determine the number of investment portfolio shares in each variable investment option that we attribute to your policy by dividing your account value allocated to

that variable investment option by the net asset value of one share of the matching investment portfolio.

Material Conflicts

We are required to track events to identify material conflicts arising from using investment portfolios for both variable life and variable annuity separate accounts. The boards of the investment portfolios, Security Life and other insurance companies participating in the investment portfolios, have this same duty. There may be a material conflict if:

- state insurance law or federal income tax law changes
- investment management of an investment portfolio changes
- voting instructions given by owners of variable life insurance policies and variable annuity contracts differ.

The investment portfolios may sell shares to certain qualified pension and retirement plans qualifying under Code Section 401. These include cash or deferred arrangements under Code Section 401(k). Therefore, there is a possibility that a material conflict may arise between the interests of owners in general or between certain classes of owners; and these retirement plans or participants in these retirement plans.

If there is a material conflict, we have the duty to determine appropriate action including removing the portfolios involved from our variable investment options. We may take other action to protect policy owners. This could mean delays or interruptions of the variable operations.

When state insurance regulatory authorities require it, we may ignore voting instructions relating to changes in an investment portfolio's adviser or its investment policies. If we do ignore voting instructions, we give you a summary of our actions in our next semi-annual report to owners.

Under the Investment Company Act of 1940, we must get your approval for certain actions involving our separate account. In this case, you have one vote for every \$100 of value you have in the variable investment options. We cast votes credited to amounts in the variable investment options, but not credited to policies in the same proportion as votes cast by owners.

Right to Change Operations

Subject to state limitations and the rules and regulations of the SEC, we may from time to time make any of the following changes to our separate account with respect to some or all classes of policies:

- Change the investment objective.
- Offer additional variable investment options which will invest in portfolios we find appropriate for policies we issue.
- Eliminate variable investment options.
- Combine two or more variable investment options.
- Substitute a new investment portfolio for a portfolio in which the division currently invests. A substitution may become necessary if, in our judgment:
 - » a portfolio no longer suits the purposes of your policy
 - » there is a change in laws or regulations
 - » there is a change in a portfolio's investment objectives or restrictions
 - » the portfolio is no longer available for investment
 - » another reason we deem a substitution is appropriate.
- Transfer assets related to your policy class to another separate account.
- Withdraw the separate account from registration under the 1940 Act.
- Operate the separate account as a management investment company under the 1940 Act.
- Cause one or more variable investment options to invest in a mutual fund other than, or in addition to, the investment portfolios.
- Stop selling these policies.
- End any employer or plan trustee agreement with us under the agreement's terms.
- Limit or eliminate any voting rights for the separate account.
- Make any changes required by the 1940 Act or its rules or regulations.
- Close an investment option to new investments.

We will not make a change until it is effective with the SEC and approved by the appropriate state insurance departments, if necessary. We will notify you of changes. If you wish to transfer the amount you have in the affected investment option to another variable investment option or to the guaranteed

interest division, you may do so free of charge. Just notify us at our customer service center.

Reports to Owners

At the end of each policy year we send a report to you that shows:

- your total net policy death benefit (your stated death benefit *plus* adjustable term insurance rider death benefit, if any)
- your account value
- your policy loan, if any, *plus* accrued interest
- your net cash surrender value
- your account transactions during the policy year showing net premiums, transfers, deductions, loan amounts and withdrawals.

We send semi-annual reports with financial information on the investment portfolios, including a list of the investment holdings of each portfolio to you.

We send confirmation notices to you throughout the year for certain policy transactions such as partial withdrawals and loans.

CHARGES AND DEDUCTIONS

The amount of a charge may not correspond to the cost incurred by us to provide the service or benefit. For example, the sales charges may not cover all of our sales and distribution expenses. Some proceeds from other charges, including the mortality and expense risk charge or cost of insurance charges, may be used to cover such expenses.

Deductions from Premiums

We treat payments we receive as premium if you do not have an outstanding policy loan and your policy is not in the continuation of coverage period. After we deduct certain charges from your payment, we add the remaining net premium to your policy.

Sales Charge

We deduct a percentage of each premium payment to compensate us for the costs we incur in selling the policies. The sales charge helps cover the costs of distribution, preparing sales literature, promotional expenses and other direct and indirect expenses.

We base the percentage on the time expired since your policy date, or addition of a segment and on your premium payments up to and above a target premium. The sales charge deducted from your premium payments after an increase in stated death benefit is based on each segment's target premium and the length of time that the segment has been in effect.

Your policy schedule page shows the target premium for your policy.

| Policy or Segment <u>Year</u> | <u>Sales Charge Percentage</u> | |
|----------------------------------|---|---|
| | Up to Policy or Segment Target <u>Premium</u> | Above Policy or Segment Target <u>Premium</u> |
| 1 | 8% | 4% |
| 2 - 7 | 8% | 1.5% |
| 8 + | 1.5% | 1.5% |

For example, if this policy is issued to insure a male, age 85 who is uninsurable, and a female, age 85 who is insurable but in a substandard underwriting rating class, the target premium for sales charge purposes is \$590 for each \$1,000 of stated death benefit. We believe this amount represents the maximum target premium and that most policies will have a much lower target premium. *See Target Premium, page 23.*

We may reduce or waive the sales charge for certain group or sponsored arrangements, or for corporate purchasers. *See Group or Sponsored Arrangements, or Corporate Purchasers, page 50.*

Tax Charges

We pay state and local taxes in almost all states. These taxes vary in amount from state to state and may vary from jurisdiction to jurisdiction within a state. Currently, state and local taxes range from 0.5% to 5% with some states not imposing these types of taxes. We deduct 2.5% of each premium payment to cover these taxes. This rate approximates the average tax rate we expect to pay in all states.

We also deduct 1.5% of each premium payment to cover our estimated costs for the federal income tax treatment of deferred acquisition costs. This cost is determined solely by the amount of life insurance premiums we receive.

We reserve the right to increase or decrease this charge for taxes if there are changes in the tax law, within limits set by law. We also reserve the right to increase or decrease the charge for the federal income tax treatment of deferred acquisition costs based on any change in that cost to us.

Daily Deductions from the Separate Account

Mortality and Expense Risk Charge

We deduct 0.002055% per day (0.75% annually) of the amount you have in the variable investment options for the mortality and expense risks we assume. This charge is deducted as part of the calculation of the daily unit values for the variable investment options and does not appear as a separate charge on your statement or confirmation.

The mortality risk is that insured people, as a group, may live less time than we estimated. The expense risk is that the costs of issuing and administering the policies and in operating the variable division are greater than the amount we estimated.

The mortality and expense risk charge does not apply to your account value in the guaranteed interest division or the loan division.

Monthly Deductions from Account Value

We deduct charges from your account value on each monthly processing date until the maturity date.

Policy Charge

The initial policy charge is \$15 per month for the first ten years of your policy. After the first ten years, the policy charge is \$9 per month. This charge compensates us for such costs as:

- application processing
- medical examinations
- establishment of policy records
- insurance underwriting costs.

Monthly Administrative Charge

We charge a per month administrative charge of \$0.06 per \$1,000 for the first ten policy years for the greater of target or stated death benefit. We charge

\$0.01 per \$1,000 for each policy year after the tenth for the greater of target or stated death benefit. We limit the per \$1,000 charge to \$150 per month for the first ten policy years and \$25 per month for each policy year thereafter. This charge applies to the first \$2,500,000 of death benefit.

This charge is designed to compensate us for ongoing costs such as:

- premium billing and collections
- claim processing
- policy transactions
- record keeping
- reporting and communications with policy owners
- other expenses and overhead.

Cost of Insurance Charge

The cost of insurance charge compensates us for the ongoing costs of providing insurance coverage, including the expected cost of paying death proceeds that may be more than your account value.

The cost of insurance charge is equal to our current monthly cost of insurance rate *multiplied* by the net amount at risk for each portion of your death benefit. We calculate the net amount at risk monthly, at the beginning of each policy month. For the base death benefit, the net amount at risk is calculated using the difference between the current base death benefit and your account value. We determine your account value after we deduct your policy charges due on that date other than cost of insurance charges.

If your base death benefit at the beginning of a month increases (as a requirement of the federal income tax law definition of life insurance), the net amount at risk for your base death benefit for that month also increases. Similarly, the net amount at risk for your adjustable term insurance rider decreases. Your cost of insurance charge varies from month to month with changes in your net amount at risk, changes in the death benefit and with the increasing age of the insured people. We allocate the net amount at risk to segments in the same proportion that each segment has to the total stated death benefit for all segments as of the monthly processing date.

We base your current cost of insurance rates on the insured people's ages, genders, policy duration, amount of target death benefit and premium classes on the policy and each segment date.

We apply unisex rates where appropriate under the law. This currently includes the state of Montana

and policies purchased by employers and employee organizations in connection with employment-related insurance or benefit programs.

Separate cost of insurance rates apply to each segment of the base death benefit, your adjustable term insurance rider and single life term insurance riders.

We may make changes in the cost of insurance or rider charges for a class of insured persons. We base the new charge on changes in expectations about:

- investment earnings;
- mortality;
- the time policies remain in effect;
- expenses; and
- taxes.

These rates are never more than the guaranteed maximum rates shown in your policy. The guaranteed maximum rates are based on the 1980 Commissioner's Standard Ordinary Sex Distinct Mortality Table.

The maximum rates for the initial and each new segment will be printed in your schedule pages.

Rider Charges

On each monthly processing date, we deduct the cost of benefits under your riders including the single life term insurance rider. Rider charges do not include the adjustable term insurance rider. ***See Riders, page 29.***

Policy Transaction Fees

We charge fees for certain transactions under your policy. We deduct these fees from the variable and guaranteed interest divisions pro rata to the account value in each.

Partial Withdrawal Fee

We deduct the lesser of a \$25 service fee or 2% of the requested partial withdrawal from your account value for each partial withdrawal you take to cover our costs. ***See Partial Withdrawals, page 38.***

Excess Illustration Fee

The first policy illustration you request in a policy year is free. After that, we charge a fee of up to \$25 for each illustration.

How We Deduct Charges, Loans and Partial Withdrawals

| | Monthly Charges: Cost of Insurance Charges, Rider Charges, Administrative Fees | Policy Transactions and Fees: Loans, Partial Withdrawals, and Excess Illustration Fee |
|---------|---|--|
| Choice | May choose a designated deduction investment option, including guaranteed interest division | May choose any investment option or combination of investment options |
| Default | Proportionally among variable and guaranteed interest divisions | Proportionally among variable and guaranteed interest divisions |

Other Charges

Under current law, we pay no tax on investment income and capital gains included in variable life insurance policy reserves. So no charge is made to the variable investment options for our federal income taxes. If the tax law changes and we have federal income tax chargeable to the variable investment options, we may make such a charge in the future.

Group or Sponsored Arrangements, or Corporate Purchasers

Individuals, corporations or other institutions may purchase this policy. For group or sponsored arrangements (including employees and certain family members of employees of Security Life, its affiliates and appointed sales agents), corporate purchasers or internal exchanges, we may reduce or waive the:

- administrative charge;
- minimum stated death benefit;
- minimum target death benefit;
- minimum annual premium;
- target premium;
- sales charges;
- cost of insurance charges; or
- other charges normally assessed.

We can reduce or waive these items based on expected economies. Our sales, administration and mortality costs generally vary with the size and stability of the group, among other factors. We take into account when we reduce charges. We make reductions to charges based on our rules in effect when we approve a policy application. We may change these rules from time to time.

Group arrangements include those in which there is a trustee, an employer or an association. The group may purchase multiple policies covering a group of individuals. Sponsored arrangements include those in which an employer or association allows us to offer policies to its employees or members on an individual basis. Each sponsored arrangement or corporation may have different group premium payments and premium requirements.

We will not be unfairly discriminatory in any variation in the surrender charge, administrative charge, or other charge, fee or privilege. These variations are based on differences in costs or services.

TAX CONSIDERATIONS

The following summary provides a general description of the federal income tax considerations associated with the policy and does not purport to be complete or to cover all tax situations. This discussion is not intended as tax advice. Counsel or other competent tax advisers should be consulted for more complete information. This discussion is based upon our understanding of the present federal income tax laws. No representation is made as to the likelihood of continuation of the present federal income tax laws or as to how they may be interpreted by the Internal Revenue Service.

Tax Status of the Policy

This policy is designed to qualify as a life insurance contract under the Internal Revenue Code. All terms and provisions of the policy shall be construed in a manner which is consistent with that design. In order to qualify as a life insurance contract for federal income tax purposes and to receive the tax treatment

normally accorded life insurance contracts under federal tax law, a policy must satisfy certain requirements which are set forth in the Internal Revenue Code. Specifically, the policy must meet the requirements of the “guideline premium/cash value corridor test,” as specified in Code section 7702. While there is very little guidance as to how these requirements are applied, we believe it is reasonable to conclude that our policies satisfy the applicable requirements. If it is subsequently determined that a policy does not satisfy the applicable requirements, we will take appropriate and reasonable steps to bring the policy into compliance with such requirements and we reserve the right to restrict policy transactions or modify your policy in order to do so.

The guideline premium/cash value corridor test provides for a maximum premium in relation to the death benefit, and a minimum “corridor” of death benefit in relation to account value. *See Appendix A, page 181, for a table of the guideline premium/cash value corridor test factors.*

We will at all times strive to assure that the policy meets the statutory definition which qualifies the policy as life insurance for federal income tax purposes. *See Tax Treatment of Policy Death Benefits, page 51.*

Diversification and Investor Control Requirements

In addition to meeting the Code Section 7702 guideline premium/cash corridor test, Code Section 817(h) requires separate account investments, such as our separate account, to be adequately diversified. The Treasury has issued regulations which set the standards for measuring the adequacy of any diversification. To be adequately diversified, each variable investment option must meet certain tests. If your variable life policy is not adequately diversified under these regulations, it is not treated as life insurance under Code Section 7702. You would then be subject to federal income tax on your policy income as you earn it. Our variable investment options’ investment portfolios have promised they will meet the diversification standards that apply to your policy.

In certain circumstances, you, as owner of a variable life insurance contract, may be considered the owner for federal income tax purposes of the separate account assets used to support your contract. Any

income and gains from the separate account assets are includable in the gross income from your policy under these circumstances. The IRS has stated in published rulings that a variable contract owner is considered the owner of separate account assets if the contract owner has “*indicia of ownership*” in those assets. “*Indicia of ownership*” includes the ability to exercise investment control over the assets.

Your ownership rights under your policy are similar to, but different in some ways from those described by the IRS in rulings in which it determined that policy owners are not owners of separate account assets. For example, you have additional flexibility in allocating your premium payments and in your policy values. These differences could result in the IRS treating you as the owner of a pro rata share of the separate account assets. We do not know what standards will be set forth in the future, if any, in Treasury regulations or rulings. We reserve the right to modify your policy, as necessary, to try to prevent you from being considered the owner of a pro rata share of the separate account assets, or to otherwise qualify your policy for favorable tax treatment.

The following discussion assumes that the policy will qualify as a life insurance contract for federal income tax purposes.

Tax Treatment of Policy Death Benefits

We believe that the death benefit under a policy is generally excludable from the gross income of the beneficiaries under section 101(a)(1) of the Code. However, there are exceptions to this general rule. Additionally, federal and local transfer, estate inheritance and other tax consequences of ownership or receipt of policy proceeds depend on the circumstances of each policy owner or beneficiaries. A tax adviser should be consulted about these consequences.

Generally, the policy owner will not be taxed on any of the policy account value until there is a distribution. When distributions from a policy occur, or when loan amounts are taken from or secured by a policy, the tax consequences depend on whether or not the policy is a “modified endowment contract.”

Special rules also apply if you are subject to the alternative minimum tax. You should consult a tax adviser if you are subject to the alternative minimum tax.

Modified Endowment Contracts

Under the Internal Revenue Code, certain life insurance contracts are classified as “modified endowment contracts” and are given less favorable tax treatment than other life insurance contracts. Due to the flexibility of the policies as to premiums and benefits, the individual circumstances of each policy will determine whether or not it is classified as a modified endowment contract. The rules are too complex to be summarized here, but generally depend on the amount of premiums we receive during the first seven policy years. Certain changes in a policy after it is issued could also cause it to be classified as a modified endowment contract. A current or prospective policy owner should consult with a competent adviser to determine whether or not a policy transaction will cause the policy to be classified as a modified endowment contract.

If a policy becomes a modified endowment contract, distributions that occur during the policy year will be taxed as distributions from a modified endowment contract. In addition, distributions from a policy within two years before it becomes a modified endowment contract will be taxed in this manner. This means that a distribution made from a policy that is not a modified endowment contract could later become taxable as a distribution from a modified endowment contract.

Multiple Policies

All modified endowment contracts that are issued by us (or our affiliates) to the same policy owner during any calendar year are treated as one modified endowment contract for purposes of determining the amount includable in the policy owner’s income when a taxable distribution occurs.

Distributions Other than Death Benefits from Modified Endowment Contracts

Once a policy is classified as a modified endowment contract, the following tax rules apply both prospectively and to any distributions made in the prior two years:

1. All distributions other than death benefits, including distributions upon surrender and

withdrawals, from a modified endowment contract will be treated first as distributions of gain taxable as ordinary income and as tax-free recovery of the policy owner’s investment in the policy only after all gain has been distributed.

2. Loan amounts taken from or secured by a policy classified as a modified endowment contract are treated as distributions and taxed first as distributions of gain taxable as ordinary income and as tax-free recovery of the policy owner’s investment in the policy only after all gain has been distributed.
3. A 10% additional income tax penalty may be imposed on the distribution amount subject to income tax. Consult a tax adviser to determine whether or not you may be subject to this penalty tax.

Distributions Other than Death Benefits from Policies That Are Not Modified Endowment Contracts

Distributions other than death benefits from a policy that is not classified as a modified endowment contract are generally treated first as a recovery of the policy owner’s investment in the policy. Only after the recovery of all investment in the policy, is there taxable income. However, certain distributions which must be made in order to enable the policy to continue to qualify as a life insurance contract for federal income tax purposes, if policy benefits are reduced during the first fifteen policy years, may be treated in whole or in part as ordinary income subject to tax.

Loan amounts from or secured by a policy that is not a modified endowment contract are uncertain and a tax advisor should be consulted about such loans. Finally, neither distributions from, nor loan amounts from or secured by, a policy that is not a modified endowment contract are subject to the 10% additional income tax.

Investment in the Policy

Your investment in the policy is generally the total of your aggregate premiums. When a distribution is taken from the policy, your investment in the policy is reduced by the amount of the distribution that is tax free.

Policy Loans

In general, interest on a policy loan will not be deductible. Moreover, the tax consequences associated with a preferred loan available in the policy are uncertain. Before taking out a policy loan, you should consult a tax adviser as to the tax consequences.

If a loan from a policy is outstanding when the policy is canceled or lapses, then the amount of the outstanding indebtedness will be added to the amount treated as a distribution from the policy and will be taxed accordingly.

Continuation of Policy Beyond Age 100

The tax consequences of continuing the policy beyond the policy anniversary nearest the younger insured person's 100th birthday are unclear. You should consult a tax adviser if you intend to keep the policy in force beyond the policy anniversary nearest the younger insured person's 100th birthday.

Section 1035 Exchanges

Code Section 1035 generally provides that no gain or loss shall be recognized on the exchange of one life insurance policy for another life insurance policy or for an endowment or annuity contract. We accept 1035 exchanges with outstanding loans. Special rules and procedures apply to Section 1035 exchanges. If you wish to take advantage of Section 1035, you should consult your tax adviser.

Taxation of Policy Splits

The policy split option permits a Policy to be split into two other single life policies upon the occurrence of (i) a divorce of the joint insureds, or (ii) certain changes in federal estate tax law, or (iii) there is a dissolution of business conducted or owned by the two insureds. A policy split option could have adverse tax consequences. Before you exercise rights provided by the policy split option, it is important that you consult with a tax advisor regarding possible consequences of a policy split.

Tax-exempt Policy Owners

Special rules may apply to a policy that is owned by a tax-exempt entity. Tax-exempt entities should consult their tax adviser regarding the consequences of purchasing and owning a policy. These consequences could include an effect on the tax-exempt status of the entity and the possibility of the unrelated business income tax.

Possible Tax Law Changes

Although the likelihood of legislative action is uncertain, there is always the possibility that the tax treatment of the policy could be changed by legislation or otherwise. You should consult a tax adviser with respect to legislative developments and their effect on the policy.

Changes to Comply with the Law

So that your policy continues to qualify as life insurance under the Code, we reserve the right to refuse to accept all or part of your premium payments or to change your death benefit. We may refuse to allow you to make partial withdrawals that would cause your policy to fail to qualify as life insurance. We also may make changes to your policy or its riders or take distributions from your policy to the degree that we deem necessary to qualify your policy as life insurance for tax purposes.

If we make any change of this type, it applies the same way to all affected policies.

Additionally, assuming that you do not want your policy to be or to become a modified endowment contract, we include a policy endorsement under which we have the right to amend your policy, including riders. We do this to attempt to enable your policy to continue to meet the seven-pay test for federal income tax purposes. If the policy premium you pay is more than the seven-pay limit, we have the right to remove any excess premium or to make any appropriate adjustments to your policy's account value and death benefit. It is not clear, however, whether we can take effective action pursuant to this endorsement under all possible circumstances to prevent a policy that has exceeded the premium limitation from being classified as a modified endowment contract.

Any increase in your death benefit will cause an increase in your cost of insurance charges.

Other

Policy owners may use our policies in various arrangements, including:

- qualified plans;
- non-qualified deferred compensation or salary continuance plans;
- split dollar insurance plans;
- executive bonus plans;
- retiree medical benefit plans; and
- other plans.

The tax consequences of these plans may vary depending on the particular facts and circumstances of each arrangement. If you want to use any of your policies in this type of arrangement, you should consult a qualified tax adviser regarding the tax issues of your particular arrangement.

In recent years, Congress has adopted new rules relating to life insurance owned by businesses. Any business contemplating the purchase of a new policy or a change in an existing policy should consult a tax adviser.

The IRS requires us to withhold income taxes from any portion of the amounts individuals receive in a taxable transaction. We do not withhold income taxes if you elect in writing not to have withholding apply. If the amount withheld for you is insufficient to cover income taxes, you may have to pay income taxes and possibly penalties later.

The transfer of the policy or designation of a beneficiary may have federal, state and/or local transfer and inheritance tax consequences, including the imposition of gift, estate and generation-skipping transfer taxes. For example the transfer of the policy to, or the designation as a beneficiary of, or the payment of proceeds to a person who is assigned to a generation which is two or more generations below the generation assignment of the policy owner may have generation skipping transfer tax consequences under federal tax law. The individual situation of each policy owner or beneficiary will determine the extent, if any, to which federal, state and local transfer and inheritance taxes may be imposed and how ownership or receipt of policy proceeds will be treated for purposes of federal, state and local estate, inheritance, generation skipping and other taxes.

You should consult qualified legal or tax advisers for complete information on federal, state, local and other tax considerations.

ADDITIONAL INFORMATION

Directors and Officers

Set forth below is information regarding the directors and principal officers of Security Life of Denver Insurance Company. Security Life's address, and the business address of each person named, except as noted with one or two asterisks (*/**), is Security Life Center, 1290 Broadway, Denver, Colorado 80203-5699. The business address of each person denoted with one asterisk (*) is 5780 Powers Ferry Road, Atlanta, Georgia 30327-4390. The business address of each person denoted with two asterisks (**) is 20 Washington Avenue South, Minneapolis, MN 55401.

Regulation

We are regulated and supervised by the Division of Insurance of the Department of Regulatory Agencies of the State of Colorado which periodically examines our financial condition and operations. In addition, we are subject to the insurance laws and regulations in every jurisdiction in which we do business. As a result, the provisions of this policy may vary somewhat from jurisdiction to jurisdiction.

We are required to submit annual statements, including financial statements, of our operations and finances to the insurance departments of the various jurisdictions in which we do business to determine solvency and compliance with state insurance laws and regulations.

We are also subject to various federal securities laws and regulations.

Legal Matters

The legal matters in connection with the policy described in this prospectus have been passed on by Counsel of ING Security Life. Sutherland Asbill & Brennan LLP has provided advice on certain matters relating to the federal securities laws.

Legal Proceedings

ING Security Life, as an insurance company, is ordinarily involved in litigation. We do not believe that any current litigation is material to ING Security Life's ability to meet its obligations under the policy or to the separate account, and we do not expect to incur significant losses from such actions. ING America Equities, Inc., the principal underwriter and

distributor of the policy, is not engaged in any litigation of any material nature.

Experts

The financial statements of Security Life of Denver Insurance Company at December 31, 2000 and 1999, and for each of the three years in the period ended December 31, 2000, and the financial statements of the Security Life Separate Account L1 at December 31, 2000, and for each of the three years in the period ended December 31, 2000, appearing in this prospectus and registration statement have been audited by Ernst & Young LLP, independent auditors, as set forth in their reports thereon appearing elsewhere herein, and are included in reliance upon such reports given on the authority of such firm as experts in accounting and auditing.

Actuarial matters in this prospectus have been examined by James L. Livingston, Jr., F.S.A., M.A.A.A., who is Executive Vice President and Chief Actuary of ING Security Life. His opinion on actuarial matters is filed as an exhibit to the Registration Statement we filed with the SEC.

Registration Statement

We have filed a Registration Statement relating to the separate account and the variable life insurance policy described in this prospectus with the SEC. The Registration Statement, which is required by the Securities Act of 1933, includes additional information that is not required in this prospectus under the rules and regulations of the SEC. The additional information may be obtained from the SEC's principal office in Washington, DC. There is a charge for this material.

FINANCIAL STATEMENTS

The statutory-basis financial statements of Security Life of Denver Insurance Company (“Security Life”) at December 31, 2000 and 1999, and for each of the three years in the period ended December 31, 2000, are prepared in conformity with accounting practices prescribed or permitted by the Division of Insurance of the Department of Regulatory Agencies of the State of Colorado (Colorado Division of Insurance), which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States, and start on page 59.

The financial statements included for the Security Life Separate Account L1 at December 31, 2000, and for each of the three years in the period ended December 31, 2000, are prepared in accordance with accounting principles generally accepted in the United States and represent those divisions that had commenced operations by that date.

The financial statements of Security Life, as well as the financial statements included for the Security Life Separate Account L1 referred to above, have been audited by Ernst & Young LLP. The financial statements of Security Life should be distinguished from the financial statements of the Security Life Separate Account L1 and should be considered only as bearing upon the ability of Security Life to meet its obligations under the policies. They should not be considered as bearing upon the investment experience of the divisions of Security Life Separate Account L1.

Report of Independent Auditors

Board of Directors and Stockholder
Security Life of Denver Insurance Company

We have audited the accompanying statutory-basis balance sheets of Security Life of Denver Insurance Company (a wholly owned subsidiary of ING America Insurance Holdings, Inc.) as of December 31, 2000 and 1999, and the related statutory-basis statements of operations, changes in capital and surplus, and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1 to the financial statements, the Company presents its financial statements in conformity with accounting practices prescribed or permitted by the Division of Insurance of the Department of Regulatory Agencies of the State of Colorado (Colorado Division of Insurance), which practices differ from accounting principles generally accepted in the United States. The variances between such practices and accounting principles generally accepted in the United States are described in Note 1. The effects on the financial statements of these variances are not reasonably determinable but are presumed to be material.

In our opinion, because of the effects of the matter described in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States, the financial position of Security Life of Denver Insurance Company at December 31, 2000 and 1999 or the results of its operations or its cash flows for each of the three years in the period ended December 31, 2000.

However, in our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Security Life of Denver Insurance Company at December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting practices prescribed or permitted by the Colorado Division of Insurance.

Security Life of Denver Insurance Company
Notes to Financial Statements - Statutory Basis

December 31, 2000

1. Nature of Operations and Basis of Financial Reporting

Security Life of Denver Insurance Company (the Company) is a wholly owned subsidiary of ING America Insurance Holdings, Inc. (ING America). The Company focuses on three markets, the advanced market, reinsurance to other insurers and the investment products market. The life insurance products offered for the advanced market include wealth transfer and estate planning, executive benefits, charitable giving and corporate-owned life insurance. These products include traditional life, interest-sensitive life, universal life, and variable life. Operations are conducted almost entirely on the general agency basis and the Company is presently licensed in all states (approved for reinsurance only in New York), the District of Columbia and the U.S. Virgin Islands. In the reinsurance market, the Company offers financial security to clients through a mix of total risk management and traditional life insurance services. In the investment products market, the Company offers guaranteed investment contracts, funding agreements, and Trust notes to institutional buyers.

The preparation of financial statements of insurance companies requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

Basis of Presentation

The accompanying financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Division of Insurance of the Department of Regulatory Agencies of the State of Colorado (Colorado Division of Insurance), which practices differ from accounting principles generally accepted in the United States ("GAAP"). The most significant variances from GAAP are as follows:

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Investments

Investments in bonds and mandatorily redeemable preferred stocks are reported at amortized cost or market value based on the National Association of Insurance Commissioners ("NAIC") rating; for GAAP, such fixed maturity investments are designated at purchase as held-to-maturity, trading or available-for-sale. Held-to-maturity investments are reported at amortized cost, and the remaining fixed maturity investments are reported at fair value with unrealized capital gains and losses reported in operations for those designated as trading and as a separate component of other comprehensive income in stockholder's equity for those designated as available-for-sale.

Investments in real estate are reported net of related obligations rather than on a gross basis. Real estate owned and occupied by the Company is included in investments rather than reported as an operating asset, and investment income and operating expenses include rent for the Company's occupancy of those properties. Changes between depreciated cost and admitted asset investment amounts are credited or charged directly to unassigned surplus rather than income.

Valuation Allowances

The asset valuation reserve (AVR) is determined by an NAIC-prescribed formula and is reported as a liability rather than as a valuation allowance or an appropriation of surplus. The change in AVR is reported directly to unassigned surplus.

Under a formula prescribed by the NAIC, the Company defers the portion of realized gains and losses on sales of fixed-income investments, principally bonds and mortgage loans, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity based on groupings of individual securities sold in five-year bands. The net deferral is reported as the interest maintenance reserve (IMR) in the accompanying balance sheets.

Realized gains and losses on investments are reported in operations net of federal income tax and transfers to the IMR. Under GAAP, realized capital gains and losses are reported in the statements of operations on a pretax basis in the period that the asset giving rise to the gain or loss is sold and valuation allowances are provided when there has been a decline in value deemed other than temporary, in which case the provision for such declines is charged to income.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Policy Acquisition Costs

The costs of acquiring and renewing business are expensed when incurred. Under GAAP, acquisition costs related to traditional life insurance, to the extent recoverable from future policy revenues, are deferred and amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policy benefit reserves. For universal life insurance and investment products, acquisition costs are amortized generally in proportion to the present value of expected gross margins from surrender charges and investment, mortality, and expense margins.

Benefit and Contract Reserves

Life policy and contract reserves under statutory accounting practices are calculated based upon both the net level premium and Commissioners' Reserve Valuation methods using statutory rates for mortality and interest. GAAP requires that policy reserves for traditional products be based upon the net level premium method utilizing reasonably conservative estimates of mortality, interest, and withdrawals prevailing when the policies were sold. For interest-sensitive products, the GAAP policy reserve is equal to the policy fund balance plus an unearned revenue reserve which reflects the unamortized balance of early year policy loads over renewal year policy loads.

Reinsurance

For business ceded to unauthorized reinsurers, statutory accounting practices require that reinsurance credits permitted by the treaty be recorded as an offsetting liability and charged against unassigned surplus. Such treatment is not required by GAAP. Statutory income recognized on certain reinsurance treaties representing financing arrangements is not recognized on a GAAP basis.

Policy and contract liabilities ceded to reinsurers have been reported as reductions of the related reserves rather than as assets as required under GAAP.

Commissions allowed by reinsurers on business ceded are reported as income when received rather than being deferred and amortized with deferred policy acquisition costs as required under GAAP.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Subsidiaries

The accounts and operations of the Company's subsidiaries are not consolidated with the accounts and operations of the Company as required under GAAP.

Nonadmitted Assets

Certain assets designated as "nonadmitted," principally the difference between amortized cost and fair value of less-than-investment-grade bonds, agents' debit balances, furniture and equipment and deferred federal income tax recoverable, are excluded from the accompanying balance sheets and are charged directly to unassigned surplus.

Employee Benefits

For purposes of calculating the Company's postretirement benefit obligation, only vested participants and current retirees are included in the valuation. Under GAAP, active participants not currently vested are also included.

Investment-type Products

Revenues for investment-type products consist of the entire premium received and benefits represent the death benefits paid and the change in policy reserves. Under GAAP, premiums received in excess of policy charges are not recognized as premium revenue; benefits represent the excess of benefits paid over the policy account value and interest credited to the account values.

Policyholder Dividends

Policyholder dividends are recognized when declared rather than over the term of the related policies.

Surplus Notes

Surplus notes are reported as a component of surplus. Under statutory accounting practices, no interest is recorded on the surplus notes until payment has been approved by the Colorado Division of Insurance. Under GAAP, surplus notes are reported as liabilities and the related interest is reported as a charge to earnings over the term of the note.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Statements of Cash Flows

Cash and short-term investments in the statements of cash flows represent cash balances and investments with initial maturities of one year or less. Under GAAP, the corresponding caption of cash and cash equivalents include cash balances and investments with initial maturities of three months or less.

Reconciliation to GAAP

The effects of the preceding variances from GAAP on the accompanying Statutory-basis financial statements have not been determined, but are presumed to be material.

Other significant accounting practices are as follows:

Investments

Bonds, preferred stocks, common stocks, short-term investments and derivative instruments are stated at values prescribed by the NAIC, as follows:

Bonds not backed by other loans are principally stated at amortized cost using the interest method.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Single class and multi-class mortgage-backed/asset-backed securities are valued at amortized cost using the interest method including anticipated prepayments. Prepayment assumptions are obtained from dealer surveys or internal estimates and are based on the current interest rate and economic environment. The retrospective adjustment method is used to value all such securities except for higher-risk asset backed securities, which are valued using the prospective method.

Redeemable preferred stocks are reported at cost or amortized cost or the lower of cost, amortized cost, or market value and nonredeemable preferred stocks are reported at market value or the lower of cost or market value as determined by the Securities Valuation Office of the NAIC ("SVO").

Common stocks are reported at market value as determined by the SVO and the related unrealized capital gains/(losses) are reported in unassigned surplus without any adjustment for federal income taxes.

The Company uses interest rate swaps, caps and floors, options and certain other derivatives as part of its overall interest rate risk management strategy for certain life insurance and annuity products. As the Company only uses derivatives for hedging purposes, the Company values all derivative instruments on a consistent basis with the hedged item. Upon termination, gains and losses on those instruments are included in the carrying values of the underlying hedged items and are amortized over the remaining lives of the hedged items as adjustments to investment income or benefits from the hedged items. Any unamortized gains or losses are recognized when the underlying hedged items are sold.

Interest rate swap contracts are used to convert the interest rate characteristics (fixed or variable) of certain investments to match those of the related insurance liabilities that the investments are supporting. The net interest effect of such swap transactions is reported as an adjustment of interest income from the hedged items as incurred.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Interest rate caps and floors are used to limit the effects of changing interest rates on yields of variable rate or short-term assets or liabilities. The initial cost of any such agreement is amortized to net investment income over the life of the agreement. Periodic payments that are receivable as a result of the agreements are accrued as an adjustment of interest income or benefits from the hedged items.

The Company's insurance subsidiaries are reported at their underlying statutory-basis net assets plus the admitted portion of goodwill, and the Company's noninsurance subsidiary is reported at the GAAP-basis of its net assets. The admitted portion of goodwill, which represents the excess of the purchase price over the statutory-basis net assets of the subsidiary at acquisition, is amortized on a straight-line basis over ten years. Dividends from subsidiaries are included in net investment income. The remaining net change in the subsidiaries' equity is included in the change in net unrealized capital gains or losses.

Mortgage loans are reported at unpaid principal balances, less allowance for impairments.

Policy loans are reported at unpaid principal balances.

Land is reported at cost. Real estate occupied by the company is reported at depreciated cost; other real estate is reported at the lower of depreciated cost or fair value. Depreciation is calculated on a straight-line basis over the estimated useful lives of the properties.

Dollar roll transactions are accounted for as collateral borrowings, where the amount borrowed is equal to the sales price of the underlying securities.

Short-term investments are reported at cost. Short-term investments include investments with maturities of less than one year at the date of acquisition.

Other invested assets are reported at amortized cost using the effective interest method. Other invested assets primarily consist of residual collateralized mortgage obligations and partnership interests.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Realized capital gains and losses are determined using the specific identification basis. Changes in market values of common stocks are reported as a change in unrealized gains or losses directly in unassigned surplus and, accordingly, have no effect on net income.

Aggregate Reserve for Life Policies and Contracts

Life, annuity, and accident and health reserves are developed by actuarial methods and are determined based on published tables using statutorily specified interest rates and valuation methods that will provide, in the aggregate, reserves that are greater than or equal to the minimum or guaranteed policy cash value or the amounts required by law. Interest rates range from 2% to 11.25%.

The Company waives the deduction of deferred fractional premiums upon the death of the insured. It is the Company's practice to return a pro rata portion of any premium paid beyond the policy month of death, although it is not contractually required to do so for certain issues.

The methods used in valuation of substandard policies are as follows:

1. For Life, Endowment and Term policies issued substandard, the standard reserve during the premium-paying period is increased by 50% of the gross annual extra premium. Standard reserves are held on Paid-Up Limited Pay contracts.
2. For reinsurance accepted:
 - a. with table rating, the reserve established is a multiple of the standard reserve corresponding to the table rating;
 - b. with flat extra premiums, the standard reserve is increased by 50% of the flat extra.

The amount of insurance in force for which the gross premiums are less than the net premiums, according to the standard of valuation required by the State of Colorado, is \$61,062,274,000 at December 31, 2000. The amount of reserves for policies on which gross premiums are less than the net premiums is \$783,259,000 at December 31, 2000.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

The tabular interest has been determined from the basic data for the calculation of policy reserves for all direct ordinary life insurance and for the portion of group life insurance classified as group Section 79. The method of determination of tabular interest of funds not involving life contingencies is as follows: current year reserves, plus payments, less prior year reserves, less funds added.

Reinsurance

Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on bases consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Reserves are based on the terms of the reinsurance contracts, and are consistent with the risks assumed. Premiums and benefits ceded to other companies have been reported as a reduction of premium revenue and benefits expense. Amounts applicable to reinsurance ceded for reserves and unpaid claim liabilities have been reported as reductions of these items, and expense allowances received in connection with reinsurance ceded have been reflected in operations.

Real Estate and Electronic Data Processing Equipment

Real estate and electronic data processing equipment are carried at cost less accumulated depreciation. Depreciation for major classes of assets is calculated on a straight-line basis over the estimated useful life.

Participating Insurance

Participating business approximates less than 1% of the Company's ordinary life insurance in force and 1.5% of premium income. The amount of dividends to be paid is determined annually by the Board of Directors. Amounts allocable to participating policyholders are based on published dividend projections or expected dividend scales. Dividends of \$2,417,000, \$2,562,000 and \$2,317,000 were paid in 2000, 1999 and 1998, respectively.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Federal Income Taxes

Deferred federal income taxes have been recognized to reflect prepayment of taxes relating to significant timing differences between income reported for tax and financial statement purposes using assumptions that are both reasonable and conservative. The deferred tax asset has been nonadmitted as a charge against surplus.

Pension Plans

The Company provides noncontributory retirement plans for substantially all employees and certain agents. Pension costs are charged to operations as contributions are made to the plan. The Company also provides a contributory retirement plan for substantially all employees.

Nonadmitted Assets

Nonadmitted assets are summarized as follows:

| | December | |
|--|-------------------------|-------------------------|
| | 2000 | 1999 |
| | <i>(In thousands)</i> | |
| Deferred federal income tax recoverable | \$159,281 | \$169,893 |
| Agents' debit balances | 2,354 | 2,652 |
| Furniture and equipment | 4,308 | 4,168 |
| Bonds in default | 549 | 4,303 |
| Disallowed Interest Maintenance Reserves | 17,436 | — |
| Other | 4,910 | 714 |
| Total nonadmitted assets | <u>\$188,838</u> | <u>\$181,730</u> |

Changes in nonadmitted assets are generally reported directly in surplus as an increase or decrease in nonadmitted assets. Certain changes are reported directly in surplus as a change in unrealized capital gains or losses.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Basis of Financial Reporting (continued)

Claims and Claims Adjustment Expenses

Claim expenses represent the estimated ultimate net cost of all reported and unreported claims incurred through December 31. The Company does not discount claim and claim adjustment expense reserves. Such estimates are based on actuarial projections applied to historical claim payment data. Such liabilities are considered to be reasonable and adequate to discharge the Company's obligations for claims incurred but unpaid as of December 31.

Cash Flow Information

Cash and short-term investments include cash on hand, demand deposits and short-term fixed maturity instruments (with a maturity of less than one year at date of acquisition).

The Company borrowed \$1,387,826,000 and repaid \$1,382,300,000 during 2000, borrowed \$2,055,061,000 and repaid \$2,039,861,000 during 1999, and borrowed \$837,411,000 and repaid \$837,411,000 during 1998. These borrowings were on a short-term basis, at an interest rate that approximated current money market rates and exclude borrowings from dollar roll transactions. Interest paid on borrowed money was \$1,586,000, \$2,180,000 and \$4,500,000 during 2000, 1999 and 1998, respectively.

Separate Accounts

Separate accounts held by the Company represent funds held for the benefit of the Company's variable life and annuity policy and contract holders who bear all of the investment risk associated with the policies. All net investment experience, positive or negative, is attributed to the policy and contract holders' account values. The assets and liabilities of these accounts are carried at fair value.

Reserves related to the Company's mortality risk associated with these policies are included in life and annuity reserves. The operations of the separate accounts are not included in the accompanying statements of operations.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

2. Permitted Statutory-Basis Accounting Practices (continued)

The Company prepares statutory-basis financial statements in accordance with accounting practices prescribed or permitted by the Colorado Division of Insurance. Currently, prescribed statutory accounting practices are interspersed throughout state insurance laws and regulations, *NAIC's Accounting Practices and Procedures Manual* and a variety of publications of the NAIC. "Permitted" statutory accounting practices encompass all accounting practices that are not prescribed; such practices may differ from state to state, and from company to company within a state, and may change in the future.

The NAIC has revised the *Accounting Practices and Procedures Manual* in a process referred to as Codification. The revised manual will be effective January 1, 2001. The State of Colorado has adopted the provisions of the revised manual. The revised manual has changed, to some extent, prescribed statutory accounting practices and will result in changes to the accounting practices that the Company uses to prepare its statutory-basis financial statements. The cumulative effect of changes in accounting principles adopted to conform to the revised *Accounting Practices and Procedures Manual*, will be reported as an adjustment to surplus as of January 1, 2001. Management believes the effect of these changes will not result in a significant reduction in the Company's statutory-basis capital and surplus as of adoption.

The Company is required to identify those significant accounting practices that are permitted, and obtain written approval of the significant practices from the Colorado Division of Insurance.

Prescribed statutory reserve methodology does not fully encompass universal life-type products. The NAIC, however, has promulgated a Model Regulation regarding universal life reserves. The Colorado Division of Insurance has not adopted the regulation, but requires that reserves be held which are at least as great as those required by Colorado statutes. The NAIC Universal Life Model Regulation is used by the Company to provide reserves consistent with the principles of this article. Because the reserves satisfy the requirements prescribed by the State of Colorado for the valuation of universal life insurance, the Company is permitted to compute reserves in accordance with this model regulation.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

3. Investments

The amortized cost and fair value of bonds and equity securities are as follows:

| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|---|---------------------------|---------------------------------------|--|-----------------------|
| | <i>(In Thousands)</i> | | | |
| At December 31, 2000: | | | | |

| Total | <u>\$4,574,207</u> | <u>\$4,567,521</u> |

At December 31, 2000, investments in certificates of deposit, bonds, and mortgage loans, with an admitted asset value of \$20,777,000, were on deposit with state insurance departments to satisfy regulatory requirements.

Reconciliation of bonds from amortized cost to carrying value as of December 31:

| | 2000 | 1999 |
|------------------------|---------------------------|--------------------|
| | <i>(In Thousands)</i> | |
| Amortized cost | \$4,574,207 | \$3,422,684 |
| Less nonadmitted bonds | 549 | 4,303 |
| Carrying value | <u>\$4,573,658</u> | <u>\$3,418,381</u> |

The amortized cost and fair value of investments in bonds at December 31, 2000, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

3. Investments (continued)

Proceeds from sales of investments in bonds and other fixed maturity interest securities were \$2,254,036,000, \$3,273,528,000 and \$4,527,803,000 in 2000, 1999 and 1998, respectively. Gross gains of \$31,736,000, \$18,928,000 and \$38,615,000 and gross losses of \$54,352,000, \$55,203,000 and \$33,297,000 during 2000, 1999 and 1998, respectively, were realized on those sales. A portion of the gains realized in 2000, 1999 and 1998 has been deferred to future periods in the interest maintenance reserve.

Net realized gains (losses), before capital gains tax and interest maintenance reserve transfers and changes in net unrealized gains (losses), are summarized as follows:

| | Capital Gains (Losses) | | | Net Capital Gain (Loss) |
|----------------|-------------------------------|----------------|-----------------|------------------------------------|
| | Bonds | Stocks | Other | |
| | <i>(In Thousands)</i> | | | |
| 2000: | | | | |
| Net realized | \$(35,399) | \$ - | \$12,783 | \$(22,616) |
| Net unrealized | 3,754 | 8,244 | 103 | 12,101 |
| Total | \$(31,645) | \$8,244 | \$12,886 | \$(10,515) |
| 1999: | | | | |
| Net realized | \$(44,838) | \$ 124 | \$1,546 | \$(43,168) |
| Net unrealized | (4,303) | 4,078 | 174 | (51) |
| Total | \$(49,141) | \$4,202 | \$1,720 | \$(43,219) |
| 1998: | | | | |
| Net realized | \$ 5,318 | \$ 165 | \$ 233 | \$ 5,716 |
| Net unrealized | — | 7,040 | 799 | 7,839 |
| Total | \$ 5,318 | \$7,205 | \$1,032 | \$ 13,555 |

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

3. Investments (continued)

Major categories of net investment income are summarized as follows:

| | Year ended December 31 | | |
|---------------------------|------------------------|-----------|-----------|
| | 2000 | 1999 | 1998 |
| | <i>(In Thousands)</i> | | |
| Income: | | | |
| Bonds | \$316,733 | \$233,247 | \$216,972 |
| Mortgage loans | 101,617 | 66,456 | 51,173 |
| Policy loans | 67,909 | 59,085 | 56,767 |
| Company-occupied property | 2,154 | 2,313 | 2,252 |
| Other | 4,733 | 41,800 | 44,469 |
| Total investment income | 493,146 | 402,901 | 371,633 |
| Investment expenses | (19,126) | (15,216) | (22,028) |
| Net investment income | \$474,021 | \$387,685 | \$349,605 |

As part of its overall investment strategy, the Company has entered into agreements to purchase securities as follows:

| | December 31 | | |
|---------------------------------|-----------------------|-----------|----------|
| | 2000 | 1999 | 1998 |
| | <i>(In Thousands)</i> | | |
| Investment purchase commitments | \$98,228 | \$140,600 | \$75,575 |

The Company also entered into dollar roll transactions to increase its return on investments and improve liquidity. Dollar rolls involve a sale of securities and an agreement to repurchase substantially the same securities as those sold. The dollar rolls are accounted for as short term collateralized financings and the repurchase obligation is reported in borrowed money. The repurchase obligation totaled \$121,936,000 at December 31, 2000. Such borrowings averaged approximately \$122,215,000 during the last three months of 2000 and were collateralized by investment securities with fair values approximately equal to the loan value. The primary risk associated with short-term collateralized borrowings is that the counterparty will be unable to perform under the terms of the contract. The Company's exposure is limited to the excess of the net replacement cost of the securities over the value of the short-term investments (such excess was not material at December 31, 2000). The Company believes the counterparties to the dollar roll agreements are financially responsible and that the counterparty risk is minimal.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

3. Investments (continued)

The Company has an outstanding liability for borrowed money in the amount of \$5,926,875 which is due to an affiliate. The principal amount is due January 5, 2001. Interest at 6.75% is required to be paid at maturity.

The maximum and minimum lending rates for long-term mortgage loans during 2000 were 9.10% and 6.85%. Fire insurance is required on all properties covered by mortgage loans and must at least equal the excess of the loan over the maximum loan which would be permitted by law on the land without the buildings.

The maximum percentage of any loan to the value of collateral at the time of the loan, exclusive of insured or guaranteed or purchase money mortgages, was 75.7% on commercial properties. As of December 31, 2000, the Company held no mortgages with interest more than one year overdue. Total interest due equals \$101,607.

4. Derivative Financial Instruments Held for Purposes Other than Trading

The Company enters into interest rate and currency contracts, including swaps, caps, floors, and options, to reduce and manage risks which include the risk of a change in the value, yield, price, cash flows, exchange rates or quantity of, or a degree of exposure with respect to, assets, liabilities, or future cash flows which the Company has acquired or incurred. Hedge accounting practices are supported by cash flow matching, scenario testing and duration matching.

Interest rate swap agreements generally involve the exchange of fixed and floating interest payments over the life of the agreement without an exchange of the underlying principal amount. Currency swap agreements generally involve the exchange of local and foreign currency payments over the life of the agreements without an exchange of the underlying principal amount. Interest rate cap and interest rate floor agreements owned entitle the Company to receive payments to the extent reference interest rates exceed or fall below strike levels in the contracts based on the notional amounts.

Premiums paid for the purchase of interest rate contracts are included in other invested assets and are being amortized to interest expense over the remaining terms of the contracts or in a manner consistent with the financial instruments being hedged. Amounts paid or received, if any, from such contracts are included in interest expense or income. Accrued amounts payable to or receivable from counterparties are included in other liabilities or other invested assets.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

4. Derivative Financial Instruments Held for Purposes Other than Trading (continued)

Gains or losses as a result of early terminations of interest rate contracts are amortized to investment income over the remaining term of the items being hedged to the extent the hedge is considered to be effective; otherwise, they are recognized upon termination.

Interest rate contracts that are matched or otherwise designated to be associated with other financial instruments are recorded at fair value if the related financial instruments mature, are sold, or are otherwise terminated or if the interest rate contracts cease to be effective hedges. Changes in the fair value of the derivative are recorded as investment income. The Company manages the potential credit exposure from interest rate contracts through careful evaluation of the counterparties' credit standing, collateral agreements, and master netting agreements.

The Company is exposed to credit loss in the event of nonperformance by counterparties on interest rate contracts; however, the Company does not anticipate nonperformance by any of these counterparties. The amount of such exposure is generally the unrealized gains in such contracts.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

4. Derivative Financial Instruments Held for Purposes Other than Trading (continued)

The table below summarizes the Company's interest rate contracts included in other invested assets at December 31, 2000 and 1999 (in thousands):

| | December 31, 2000 | | |
|--------------------------|--------------------|-------------------|---------------|
| | Notional Amount | Carrying Value | Fair Value |

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

5. Concentrations of Credit Risk

The Company held less-than-investment-grade corporate bonds with an aggregate book value of \$419,904,000 and \$317,271,000 with an aggregate market value of \$395,837,000 and \$305,533,000 at December 31, 2000 and 1999, respectively. Those holdings amounted to 9.2% of the Company's investments in bonds and 4.8% of total admitted assets at December 31, 2000. The holdings of less-than-investment-grade bonds are widely diversified and of satisfactory quality based on the Company's investment policies and credit standards.

The Company held unrated bonds of \$723,168,000 and \$335,079,000 with an aggregate NAIC market value of \$724,545,000 and \$332,404,000 at December 31, 2000 and 1999, respectively. The carrying value of these holdings amounted to 16% of the Company's investment in bonds and 8% of the Company's total admitted assets at December 31, 2000.

At December 31, 2000, the Company's commercial mortgages involved a concentration of properties located in California (14%) and Florida (10%). The remaining commercial mortgages relate to properties located in 37 other states. The portfolio is well diversified, covering many different types of income-producing properties on which the Company has first mortgage liens. The maximum mortgage outstanding on any individual property is \$45,000,000.

Notes to Financial Statements - Statutory Basis (continued)

6. Annuity Reserves

At December 31, 2000 and 1999, the Company's annuity reserves, including those held in separate accounts and deposit fund liabilities that are subject to discretionary withdrawal (with adjustment), subject to discretionary withdrawal (without adjustment), and not subject to discretionary withdrawal provisions are summarized as follows:

| | December 31, 2000 | |
|--|--------------------------|----------------|
| | Amount | Percent |
| | <i>(In Thousands)</i> | |
| Subject to discretionary withdrawal (with adjustment): | | |
| With market value adjustment | \$2,619,437 | 60.8% |
| At book value less surrender charge | 134,697 | 3.1 |
| Subtotal | 2,754,134 | 63.9 |
| Subject to discretionary withdrawal (without adjustment) at book value with minimal or no charge or adjustment | 248,208 | 5.8 |
| Not subject to discretionary withdrawal | 1,305,567 | 30.3 |
| Total annuity reserves and deposit fund liabilities— | | |
| Before reinsurance | 4,307,909 | 100.0% |
| Less reinsurance | 2,269,160 | |
| Net annuity reserves and deposit fund liabilities | \$2,038,749 | |

| | December 31, 1999 | |
|--|--------------------------|----------------|
| | Amount | Percent |
| | <i>(In Thousands)</i> | |
| Subject to discretionary withdrawal (with adjustment): | | |
| With market value adjustment | \$2,918,405 | 69.3% |
| At book value less surrender charge | 119,807 | 2.9 |
| Subtotal | 3,038,212 | 72.2 |
| Subject to discretionary withdrawal (without adjustment) at book value with minimal or no charge or adjustment | 367,014 | 8.7 |
| Not subject to discretionary withdrawal | 803,795 | 19.1 |
| Total annuity reserves and deposit fund liabilities— | | |
| before reinsurance | 4,209,021 | 100.0 |
| Less reinsurance | 3,555,109 | |
| Net annuity reserves and deposit fund liabilities | \$ 653,912 | |

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

7. Employee Benefit Plans

Pension Plan and Postretirement Benefits

The Company has a qualified noncontributory defined benefit retirement plan covering substantially all employees. In addition, the Company maintains a nonqualified unfunded Supplemental Employees Retirement Plan (SERP).

In addition to providing pension plans, the Company provides certain health care and life insurance benefits for retired employees. Net postretirement benefit cost for the year ended December 31, 2000, 1999 and 1998 was \$1,016,000, \$1,118,000 and \$930,000 respectively, and includes the expected cost of such benefits for newly eligible or vested employees, interest cost, gains and losses arising from differences between actuarial assumptions and actual experiences, and amortization of the transition obligation. At December 31, 2000 and 1999, the unfunded postretirement benefit obligation for retirees and other fully eligible or vested plan participants was \$6,245,000 and \$5,549,000, respectively. The estimated cost of the benefit obligation for active nonvested employees was \$1,906,000.

The funded status for the defined benefit plans and other postretirement benefit plan is as follows (in thousands):

| | Qualified Plan | SERP | Post- retirement |
|---|-------------------------|--------------------------|-------------------------|
| December 31, 2000 | | | |
| Projected benefit obligation | \$(39,931) | \$(13,135) | \$(6,370) |
| Less plan assets at fair value | 47,098 | — | — |
| Plan assets in excess of (less than) projected benefit obligation | <u>\$ 7,167</u> | <u>\$(13,135)</u> | <u>\$(6,370)</u> |
| | Qualified Plan | SERP | Post- Retirement |
| December 31, 1999 | | | |
| Projected benefit obligation | \$(36,352) | \$(11,803) | \$(6,256) |
| Less plan assets at fair value | 50,495 | — | — |
| Plan assets in excess of (less than) projected benefit obligation | <u>\$ 14,143</u> | <u>\$(11,803)</u> | <u>\$(6,256)</u> |

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

7. Employee Benefit Plans (continued)

Pension Plan and Postretirement Benefits (continued)

The net periodic pension cost, employer contribution, plan participant contributions, and benefits paid for the defined benefit plans are as follows (in thousands):

| | Qualified Plan | SERP | Post- Retirement |
|--|-------------------|---------|---------------------|
| December 31, 2000 | | | |
| Net periodic pension (benefit) expense | \$ (337) | \$2,426 | \$1,016 |
| Employer contributions | — | 375 | 320 |
| Plan participants' contributions | — | — | 120 |
| Benefits paid | 1,916 | 375 | 440 |
| | | | |
| | Qualified Plan | SERP | Post- Retirement |
| December 31, 1999 | | | |
| Net periodic pension expense | \$ 40 | \$1,971 | \$1,236 |
| Employer contributions | — | 387 | 467 |
| Plan participants' contributions | — | — | 94 |
| Benefits paid | 1,238 | 387 | 561 |
| | | | |
| | Qualified Plan | SERP | Post- retirement |
| December 31, 1998 | | | |
| Net periodic pension expense | \$82 | \$1,109 | \$893 |
| Employer contributions | — | 325 | 218 |
| Plan participants' contributions | — | — | 77 |
| Benefits paid | 890 | 325 | 296 |

Assumptions used in determining the accounting for the defined benefit plans as of December 31, 2000 and 1999 were as follows:

| | 2000 | 1999 |
|---|-------|-------|
| Weighted-average discount rate | 7.75% | 8.00% |
| Rate of increase in compensation level | 5.00% | 5.00% |
| Expected long-term rate of return on assets | 9.25% | 9.25% |

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

7. Employee Benefit Plans (continued)

Plan assets of the defined benefit plans at December 31, 2000 are invested primarily in U.S. government securities, corporate bonds, mutual funds, mortgage loans, money market funds, and common stock. Certain of the Qualified Plan's investments are held in the ING-NA Master Trust, which was established in 1998 for the investment of assets of the Plan and several other ING-NA sponsored retirement plans.

The annual assumed rate of increase in the per capita cost of covered benefits (i.e., health care cost trend rate) for the medical plan is 8.5% graded to 5.5% over 6 years. The health care cost trend rate assumption has a significant effect on the amounts reported. For example, increasing the assumed health care cost trend rates by one percentage point in each year would increase the accumulated postretirement benefit obligation for the medical plan as of December 31, 2000 by \$501,000. Decreasing the assumed health care cost trend rates by one percentage point in each year would decrease the accumulated postretirement benefit obligation for the medical plan as of December 31, 2000 by \$(436,000).

The weighted-average discount rate used in determining the accumulated postretirement benefit obligation was 7.75% at December 31, 2000 and 8.00 % at December 31, 1999.

401(k) Plan

Effective January 1, 2000, the Security Life of Denver Insurance Company Savings Incentive Plan was merged into the ING Savings Plan (Savings Plan), a defined contribution plan sponsored by ING America. The Savings Plan is a defined contribution plan, which is available to substantially all home office employees. Participants may make contributions to the plan through salary reductions up to a maximum of \$10,500 for 2000, 1999 and 1998. Such contributions are not currently taxable to the participants. The Company matches 100% of the first 3% of participant contributions, plus 50% of contributions which exceed 3% of participants' compensation, subject to a maximum matching percentage of 4-1/2% of the individual's salary. Company matching contributions were \$1,552,000, \$1,423,000 and \$1,343,000 for 2000, 1999 and 1998, respectively.

Plan assets of the Savings Plan at December 31, 2000 are invested in a group deposit administration contract (the Contract) with the Company, various mutual funds maintained by the Principal Financial Group, and loans to participants. The Contract is an employee benefit liability of the Company and had a balance of \$28.0 million and \$28.7 million at December 31, 2000 and 1999, respectively.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

8. Separate Accounts

Separate account assets and liabilities represent funds segregated by the Company for the benefit of certain policy and contract holders who bear the investment risk. Revenues and expenses on the separate account assets and related liabilities equal the benefits paid to the separate account policy and contract holders.

Premiums, deposits, and other considerations received for the years ended December 31, 2000, 1999 and 1998 were \$256,712,000, \$153,671,000 and \$129,527,000, respectively.

A reconciliation of the amounts transferred to and from the separate accounts is presented below:

| | 2000 | 1999 | 1998 |
|--|-------------------------|-------------------------|-------------------------|
| | <i>(In Thousands)</i> | | |
| Transfers as reported in the summary of operations of the Separate Accounts Statement: | | | |
| Transfers to separate accounts | \$317,529 | \$161,205 | \$136,617 |
| Transfers from separate accounts | 61,187 | 82,218 | 70,879 |
| Net transfers to separate accounts | 256,342 | 78,987 | 65,738 |
| Reconciling adjustments: | | | |
| Miscellaneous transfers | 196 | 1 | — |
| Transfers as reported in the Statement of Operations | <u>\$256,538</u> | <u>\$ 78,988</u> | <u>\$ 65,738</u> |

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

9. Reinsurance

The Company is involved in both ceded and assumed reinsurance with other companies for the purpose of diversifying risk and limiting exposure on larger risks. As of December 31, 2000, the Company's retention limit for acceptance of risk on life insurance policies had been set at various levels up to \$3,000,000.

To the extent that the assuming companies become unable to meet their obligations under these treaties, the Company remains contingently liable to its policyholders for the portion reinsured. To minimize its exposure to significant losses from retrocessionaire insolvencies, the Company evaluates the financial condition of the retrocessionaire and monitors concentrations of credit risk.

Assumed premiums amounted to \$612,585,000, \$520,490,000 and \$426,503,000 for the years ended December 31, 2000, 1999 and 1998 respectively.

The Company's ceded reinsurance arrangements reduced certain items in the accompanying financial statements by the following amounts:

| | 2000 | 1999 | 1998 |
|---|-----------------------|-------------|-------------|
| | <i>(In Thousands)</i> | | |
| Premiums | \$ 859,405 | \$1,701,959 | \$2,916,141 |
| Benefits paid or provided | 247,622 | 216,778 | 71,001 |
| Policy and contract liabilities at year end | 2,647,258 | 3,890,702 | 3,525,241 |

During 2000, 1999 and 1998, the Company had ceded blocks of insurance under reinsurance treaties to provide funds for financing and other purposes. These reinsurance transactions, generally known as "financial reinsurance," represent financing arrangements. Financial reinsurance has the effect of increasing current statutory surplus while reducing future statutory surplus as the reinsurers recapture amounts.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

10. Federal Income Taxes and Policyholders' Surplus Account

Federal income tax expense consists of the following:

| | 2000 | 1999 | 1998 |
|----------------------------|-----------------------|-----------------|----------------|
| | <i>(In Thousands)</i> | | |
| Operations: | | | |
| Current | \$(1,339) | \$ 21,193 | \$20,910 |
| Deferred | – | (12,580) | (18,539) |
| Federal income tax expense | \$(1,339) | \$ 8,613 | \$2,371 |

Deferred federal income taxes arise from the recognition of timing differences between income determined for financial statement purposes and income tax purposes (principally differences relating to the recognition of tax-basis deferred acquisition costs, policy and contract liabilities and investment income). The resulting deferred tax asset is nonadmitted and charged against surplus.

The Company files a consolidated federal income tax return with its parent, ING America, and other U.S. affiliates and subsidiaries. The parties that join in the consolidated return have an agreement for the allocation of taxes. The agreement specifies that the separate return payable or the separate return receivable of each member will be the federal income tax payable or receivable that the member would have had for the period had it filed a separate return.

The Policyholders' Surplus Account is an accumulation of certain special deductions for income tax purposes and a portion of the "gain from operations" which were not subject to current taxation under the Life Insurance Company Income Tax Act of 1959. At December 31, 1984, the balance in this account for tax return purposes was approximately \$60,490,000. The Tax Reform Act of 1984 provides that no further accumulations will be made in this account. If amounts accumulated in the Policyholders' Surplus Account exceed certain limits, or if distributions to the shareholder exceed amounts in the Shareholder's Surplus Account as determined for income tax purposes, amounts in the Policyholders' Surplus Account would become subject to income tax at rates in effect at that time. Should this occur, the maximum tax, under current tax law, which would be paid is \$21,172,000. The Company does not anticipate any such action or foresee any events which would result in such tax.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

11. Investment in and Advances to Subsidiaries

The Company has two wholly owned insurance subsidiaries, Midwestern United Life Insurance Company (Midwestern United) and First ING Life Insurance Company of New York (First ING). The Company also has three wholly owned noninsurance subsidiaries, First Secured Mortgage Deposit Corporation, Tailored Investments Notes Trust, and ING America Equities, Inc.

ING America Equities, Inc. is a wholesale broker/dealer whose business activities consist only of the distribution of variable life and annuity contracts. ING America Equities, Inc. does not hold customer funds or securities.

Amounts invested in and advanced to the Company's subsidiaries are summarized as follows:

| | December 31 | |
|---|-----------------------|-------------|
| | 2000 | 1999 |
| | <i>(In Thousands)</i> | |
| Common stock (cost—\$61,318 in 2000 and 1999) | \$85,324 | \$77,127 |
| (Payable) receivable from subsidiaries | (2,476) | 2,060 |

Summarized financial information for these subsidiaries is as follows:

| | 2000 | 1999 | 1998 |
|---|-----------------------|-------------|-------------|
| | <i>(In Thousands)</i> | | |
| Revenues | \$ 97,086 | \$ 89,507 | \$ 74,536 |
| Income before net realized gains on investments | 9,783 | 7,884 | 6,123 |
| Net income | 9,571 | 6,301 | 6,123 |
| Admitted assets | 298,260 | 296,265 | 308,771 |
| Liabilities | 212,936 | 219,139 | 234,881 |

Midwestern United and First ING paid a common stock dividend to the Company of \$1,320,000 and \$1,970,000 in 1999 and \$1,385,000 and \$0 in 1998, respectively. No such dividend was paid in 2000.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

12. Capital and Surplus

Under Colorado insurance regulations, the Company is required to maintain a minimum total capital and surplus of \$1,500,000. Additionally, the amount of dividends which can be paid by the Company to its stockholder without prior approval of the Colorado Division of Insurance is limited to the greater of 10% of statutory surplus or the statutory net gain from operations.

The Company has two surplus notes to a related party for \$84,259,000 and \$100,000,000 which represent the cumulative cash draws on two \$100,000,000 commitments issued by ING America through December 31, 2000, less principal payments.

These subordinated notes bear interest at a variable rate equal to the prevailing rate for 10-year U.S. Treasury bonds plus 1/4% adjusted annually. The principal and interest is scheduled to be repaid in five annual installments beginning on April 15, 2000 and continuing through April 15, 2004 for the first note and April 2005 and continuing through April 15, 2009, for the second note, respectively. Future minimum payments, assuming a current effective interest rate of 5.11%, are as follows (in thousands):

| Year | Total Payments |
|-----------------------|-------------------|
| 2001 | \$25,842 |
| 2002 | 25,842 |
| 2003 | 25,842 |
| 2004 | 25,842 |
| Subsequent years | 143,788 |
| Total | 247,156 |
| Less imputed interest | (62,897) |
| Outstanding principal | <u>\$184,259</u> |

The repayment of these notes require approval of the Commissioner of Insurance of the State of Colorado and are payable only out of surplus funds of the Company and only at such time as the surplus of the Company, after payment is made, does not fall below the prescribed level. In July 2000, the Company made payments of \$15,741,000 and \$11,098,000 for principal and interest, respectively, after receiving approval from the Commissioner of Insurance of the State of Colorado.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

13. Fair Values of Financial Instruments

In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the financial instrument. Accordingly, the aggregate fair value amounts presented herein do not represent the underlying value of the Company.

Life insurance liabilities that contain mortality risk and all nonfinancial instruments have been excluded from the disclosure requirements. However, the fair values of liabilities under all insurance contracts are taken into consideration in the Company's overall management of interest rate risk, such that the Company's exposure to changing interest rates is minimized through the matching of investment maturities with amounts due under insurance contracts.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

13. Fair Values of Financial Instruments (continued)

The carrying amounts and fair values of the Company's financial instruments are summarized as follows:

| | December 31 | | | |
|--|-----------------------|---------------|--------------------|---------------|
| | 2000 | | 1999 | |
| | Carrying Amount | Fair Value | Carrying Amount | Fair Value |

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

13. Fair Values of Financial Instruments (continued)

The following methods and assumptions were used by the Company in estimating the fair value disclosures for financial instruments:

Fixed maturities and equity securities: The fair values for bonds, preferred stocks and common stocks, reported herein, are based on quoted market prices, where available. For securities not actively traded, fair values are estimated using values obtained from independent pricing services or, in the case of private placements, collateralized mortgage obligations and other mortgage derivative investments, are estimated by discounting expected future cash flows. The discount rates used vary as a function of factors such as yield, credit quality, and maturity, which fall within a range between 6% and 15% over the total portfolio. Fair values determined on this basis can differ from values published by the NAIC Securities Valuation Office. Market value as determined by the NAIC as of December 31, 2000 and 1999 was \$4,675,995,000 and \$3,448,196,000, respectively.

Mortgage loans: Estimated market values for commercial real estate loans were generated using a discounted cash flow approach. Loans in good standing are discounted using interest rates determined by U.S. Treasury yields on December 31 and spreads implied by independent published surveys. The same is applied on new loans with similar characteristics. The amortizing features of all loans are incorporated in the valuation. Where data on option features is available, option values are determined using a binomial valuation method, and are incorporated into the mortgage valuation. Restructured loans are valued in the same manner; however, these loans were discounted at a greater spread to reflect increased risk. All residential loans are valued at their outstanding principal balances, which approximate their fair values.

Residual collateralized mortgage obligations: Residual collateralized mortgage obligations are included in the other invested assets balance. Fair values are calculated using discounted cash flows. The discount rates used vary as a function of factors such as yield, credit quality, and maturity, which fall within a range between 6% and 15% over the total portfolio.

Derivative financial instruments: Fair values for on-balance-sheet derivative financial instruments (caps and floors) and off-balance-sheet derivative financial instruments (swaps) are based on broker/dealer valuations or on internal discounted cash flow pricing models taking into account current cash flow assumptions and the counterparties' credit standing.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

13. Fair Values of Financial Instruments (continued)

Guaranteed investment contracts: The fair values of the Company's guaranteed investment contracts are estimated using discounted cash flow calculations, based on interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued.

Off-balance-sheet instruments: The Company accepted additional deposits on existing synthetic guaranteed investment contracts in the amounts of \$0, \$70,000,000 and \$66,480,000 in 2000, 1999 and 1998, respectively, from trustees of 401(k) plans. Pursuant to the terms of these contracts, the trustees own and retain the assets related to these contracts. Such assets had a value of \$406,896,000 and \$471,380,000 at December 31, 2000 and 1999, respectively. Under synthetic guaranteed investment contracts, the synthetic issuer may assume interest rate risk on individual plan participant initiated withdrawals from stable value options of 401(k) plans. Approximately 88% of the synthetic guaranteed investment contract book values are on a participating basis and have a credited interest rate reset mechanism which passes such interest rate risk to plan participants.

Other investment-type insurance contracts: The fair values of the Company's deferred annuity contracts are estimated based on the cash surrender values. The carrying values of other policyholder liabilities, including immediate annuities, dividend accumulations, supplementary contracts without life contingencies, and premium deposits, approximate their fair values.

Letters of credit: The Company is the recipient of letters of credit totaling \$250,071,000 (see Note 15), which have a market value to the Company of \$0, and two lines of credit totaling \$340,136,000 which have a market value to the Company of \$0.

The carrying value of all other financial instruments approximates their fair value.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

14. Commitments and Contingencies

The Company is a party to pending or threatened lawsuits arising from the normal conduct of its business. Due to the climate in insurance and business litigation, suits against the Company sometimes include substantial additional claims, consequential damages, punitive damages and other similar types of relief. While it is not possible to forecast the outcome of such litigation, it is the opinion of management that the disposition of such lawsuits will not have a materially adverse effect on the Company's financial position or interfere with its operations. The Company has established an accrued liability in the financial statements of \$20,449,000 related to certain pending litigation. The Company is vigorously defending its position in these cases.

The Company guarantees the obligations incurred by its wholly owned subsidiary, Midwestern United, with respect to all life insurance policies in force in both 2000, 1999 and 1998. In the event Midwestern United is unable to fulfill its obligations under these policies, the Company would be required to assume the policy obligations. The statutory reserve liabilities for the guaranteed policies totaled \$201,306,000 and \$209,203,000 as of December 31, 2000 and 1999, respectively.

The Company entered into a Tangible Net Worth Maintenance Agreement, dated June 25, 1998 pursuant to which the Company agreed to cause First ING, a wholly owned subsidiary of the Company, to have a tangible net worth equal to an NAIC-defined risk-based capital ratio of at least 200%, calculated by dividing (total adjusted capital x 100) by (the authorized control level risk based capital x 2). The contingent statutory reserve liability for this guarantee is \$189,036.

The Company has agreed to guarantee a revolving line of credit issued to Pen-Cal Administrators, Inc., a California producer group, and represented by the credit agreement dated January 1, 2000 between Bank One and Pen-Cal Administrators, Inc., in the principal amount of \$2,500,000.

15. Financing Agreements

The Company has a line of credit of \$100,000,000 to provide short-term liquidity which expires July 31, 2001. The amount of funds available under this line is reduced by borrowings of certain affiliates also party to the agreement. Interest on all loans is based on the cost of funds by the lender plus .23%. The Company had outstanding borrowings under this agreement at December 31, 2000 and 1999 of \$-0- and \$200,000, respectively.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

15. Financing Agreements (continued)

The Company is the beneficiary of letters of credit totaling \$250,071,000 that were established in accordance with the terms of reinsurance agreements. The terms of the letters of credit provide for automatic renewal for the following year at December 31, unless otherwise canceled or terminated by either party to the financing. The letters were unused during both 2000 and 1999.

16. Related Party Transactions

Affiliates

The Company has a \$200,136,000 line of credit issued by the Company's parent to provide short-term liquidity. Interest on the loans are indexed to the A1+/P1 commercial paper rates. The average borrowing by the Company in 2000 and 1999 was \$17,453,000 and \$10,365,000, respectively, with an average borrowing rate of 6.29% and 5.16%, respectively. At December 31, 2000 and 1999, outstanding borrowings were \$5,927,000 and \$15,000,000, respectively.

The Company provides administrative, investment and other operating services to affiliates. Amounts received for these services were \$13,053,000, \$2,606,000 and \$1,605,000 for 2000, 1999 and 1998, respectively.

The Company also has an Investment Advisory Agreement with an affiliate whereby it receives investment and portfolio management services for a fee. Total fees under the agreement were approximately \$9,885,000, \$11,373,000 and \$10,504,000 for 2000, 1999 and 1998, respectively.

Subsidiaries

The Company provides administrative, investment and other operating services to certain of its subsidiaries pursuant to contractual arrangements. Amounts received for these services were \$3,561,000, \$4,057,000 and \$4,280,000 for 2000, 1999 and 1998, respectively.

Security Life of Denver Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

17. Guaranty Fund Assessments

Insurance companies are assessed the costs of funding the insolvencies of other insurance companies by the various state guaranty associations, generally based on the amount of premium companies collect in that state.

The Company accrues the cost of future guaranty fund assessments based on estimates of insurance company insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) and the amount of premiums written in each state. The Company reduces the accrual by credits allowed in some states to reduce future premium taxes by a portion of assessments in that state. The Company has estimated this liability to be \$2,305,000 as of December 31, 2000 and 1999 and has recorded a reserve. The Company has also recorded an asset of \$5,045,000 and \$5,950,000 as of December 31, 2000 and 1999, respectively, for future credits to premium taxes for assessments already paid. Payments received for guaranty fund assessments in 2000 and 1999 were \$267,000 and \$120,000, respectively.

18. Regulatory Risk-Based Capital

The NAIC prescribes risk-based capital (RBC) requirements for life/health insurance companies. RBC is a series of dynamic surplus-related formulas for monitoring solvency. At December 31, 2000, the Company exceeded all minimum RBC requirements.

Security Life Separate Account L1 of
Security Life of Denver Insurance Company

We have audited the accompanying statement of net assets of Security Life Separate Account L1 of Security Life of Denver Insurance Company, comprising, respectively, the Neuberger Berman Advisers Management Trust (comprising the Limited Maturity Bond, Growth and Partners Divisions) (“NB”), the Alger American Fund (comprising the American Small Capitalization, American MidCap Growth, American Growth and American Leveraged AllCap Divisions) (“Alger”), the Fidelity Variable Insurance Products Fund and Variable Insurance Products Fund II (comprising the Asset Manager, Growth, Overseas, Money Market and Index 500 Divisions) (“Fidelity”), the INVESCO Variable Investment Funds, Inc. (comprising the Total Return, Equity Income, High Yield, Utilities and Small Company Growth Divisions) (“INVESCO”), the Van Eck Worldwide Trust (comprising the Worldwide Hard Assets, Worldwide Bond, Worldwide Emerging Markets and Worldwide Real Estate Divisions) (“Van Eck”), AIM Advisors, Inc. (comprising the Capital Appreciation and Government Securities Divisions) (“AIM”), the Directed Services, Inc. (comprising the Equity Income, Growth, Hard Asset, Limited Maturity Bond, Liquid Asset, MidCap, Research and Total Return Divisions) (“GCG”), and Janus Aspen Series Funds (comprising the Aggressive Growth, Growth, International Growth and Worldwide Growth Divisions) (“Janus”), as of December 31, 2000, and the related statements of operations and changes in net assets for each of the three years in the period then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2000, by correspondence with the transfer agents. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Security Life Separate Account L1 at December 31, 2000, and the results of its operations and changes in its net assets for each of the three years in the period then ended, in conformity with accounting principles generally accepted in the United States.

Security Life Separate Account L1

Notes to Financial Statements

December 31, 2000

1. Organization

Security Life Separate Account L1 (the “Separate Account”) was established by resolution of the Board of Directors of Security Life of Denver Insurance Company (the “Company”) on November 3, 1993. The Separate Account is organized as a unit investment trust registered with the Securities and Exchange Commission under the Investment Company Act of 1940.

The Separate Account supports the operations of the FirstLine Variable Universal Life, FirstLine II Variable Universal Life, Strategic Advantage Variable Universal Life, Strategic Advantage II Variable Universal Life, Variable Survivorship Universal Life, Corporate Benefits Variable Universal Life, Strategic Benefits Variable Universal Life, and Estate Designer policies (“Variable Universal Life Policies”) offered by the Company. Corporate Benefits Variable Universal Life and Strategic Benefits Variable Universal Life became effective in 2000 and are defined as Class B policies due to their mortality and expense charge structure. All other Variable Universal Life Policies are defined as Class A policies. The Separate Account may be used to support other variable life policies as they are offered by the Company. The assets of the Separate Account are the property of the Company. However, the portion of the Separate Account’s assets attributable to the policies will not be used to satisfy liabilities arising out of any other operations of the Company.

As of December 31, 2000, the Separate Account offered 35 investment divisions available to the policyholders, 27 of which invest in an independently managed mutual fund portfolio and eight of which invest in a mutual fund portfolio managed by an affiliate, Direct Services, Inc. (collectively, “Funds”). The Funds are as follows:

Portfolio Managers/Portfolios (Funds)

Neuberger Berman Management Incorporated (NB)
Neuberger Berman Limited Maturity Bond Portfolio
Neuberger Berman Growth Portfolio
Neuberger Berman Partners Portfolio

Fred Alger Management, Inc. (Alger)
Alger American Small Capitalization Portfolio
Alger American MidCap Growth Portfolio
Alger American Growth Portfolio
Alger American Leveraged AllCap Portfolio

 - Van Eck Worldwide Bond Portfolio
 - Van Eck Worldwide Emerging Markets Portfolio
 - Van Eck Worldwide Real Estate Portfolio

- AIM Advisors, Inc. (AIM)
 - AIM VI - Capital Appreciation Portfolio
 - AIM VI - Government Securities Portfolio

- INVESCO Funds Group, Inc. (INVESCO)
 - INVESCO VIF Small Company Growth Portfolio

Effective May 1, 2000, eight new divisions became available to the policyholders for investment in the following funds:

- Directed Services, Inc. ("GCG")
 - GCG Trust - Equity Income Portfolio
 - GCG Trust - Growth Portfolio
 - GCG Trust - Hard Assets Portfolio
 - GCG Trust - Limited Maturity Bond Portfolio
 - GCG Trust - Liquid Asset Portfolio
 - GCG Trust - MidCap Growth Portfolio
 - GCG Trust - Research Portfolio
 - GCG Trust - Total Return Portfolio

Effective October 13, 2000, four new divisions became available to the policyholders for investment in the following funds:

- Janus Aspen Series Funds ("Janus")
 - Aggressive Growth
 - Growth
 - International Growth
 - Worldwide Growth

Security Life Separate Account L1

Notes to Financial Statements (continued)

1. Organization (continued)

Portfolio Managers/Portfolios (Funds) (continued)

The Variable Universal Life Policies allow the policyholders to specify the allocation of their net premium to the various Funds. They can also transfer their account values among the Funds. The Variable Universal Life Policies also provide the policyholders the option to allocate their net premiums, or to transfer their account values, to a Guaranteed Interest Division (“GID”) in the Company’s general account. The GID guarantees a rate of interest to the policyholder, and it is not variable in nature. Therefore, it is not included in these Separate Account statements.

2. Summary of Significant Accounting Policies

The accompanying financial statements of the Separate Account have been prepared on the basis of accounting principles generally accepted in the United States (“U.S. GAAP”). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The significant accounting principles followed by the Separate Account and the methods of applying those principles are presented below or in the footnotes which follow:

Investment Valuation

The investments in shares of the Funds are valued at the closing net asset value (market value) per share as determined by the Funds on the day of measurement.

Investment Transactions and Related Investment Income

The investments in shares of the Funds are accounted for on the date the order to buy or sell is confirmed. Dividend income and distributions of capital gains are recorded on the ex-dividend date. Realized gains and losses from sales transactions are reported using the first-in, first-out (“FIFO”) method of accounting for cost. The difference between cost and current market value of investments owned on the day of measurement is recorded as unrealized gain or loss on investment.

Security Life Separate Account L1

Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Valuation Period Deductions

For FirstLine, FirstLine II, Strategic Advantage, Strategic Advantage II, Variable Survivorship and Estate Designer policies (Class A Policies), charges are made directly against the assets of the Separate Account divisions and are reflected daily in the computation of the unit values of the divisions.

A daily deduction, at an annual rate of .75% of the daily asset value of the Separate Account divisions, is charged to the Separate Account for mortality and expense risks assumed by the Company. Total mortality and expense charges for the years ended December 31, 2000, 1999 and 1998 were \$4,508,171, \$2,908,885, and \$1,740,661, respectively.

For the Corporate Benefits and Strategic Benefits policies (Class B Policies), mortality and expense charges result in the redemption of units rather than a deduction in the daily computation of unit values.

For Corporate Benefits policies, a monthly deduction, at an annual rate of .20% of the account value, is charged. For Strategic Benefits policies, a monthly deduction, at an annual rate of .85%, .60% and .05% of the account value, is charged during policy years 1 through 10, 11 through 20, and 21 and later, respectively. Total mortality and expense charges for these policies for the year ended December 31, 2000 were \$42,000 and are included in the Statement of Changes in Net Assets as cost of insurance and administrative charges.

Policyholder Reserves

Policyholder reserves are recorded in the Separate Account at the aggregate account values of the policyholders invested in the Separate Account divisions. To the extent that benefits to be paid to the policyholders exceed their account values, the Company will contribute additional funds to the benefit proceeds.

3. Investments

Fund shares are purchased at net asset value with net premiums (premium payments, less sales and tax loads charged by the Company) and divisional transfers from other divisions. Fund shares are redeemed for the payment of benefits, for surrenders, for transfers to other divisions, and for charges by the Company for certain cost of insurance and administrative charges. The cost of insurance and administrative charges for the years ended December 31, 2000, 1999 and 1998 were \$30,552,382, \$20,649,015, and \$14,458,798, respectively. Dividends made by the Funds are reinvested in the Funds.

Security Life Separate Account L1

Notes to Financial Statements (continued)

3. Investments (continued)

Security Life Separate Account L1

Notes to Financial Statements (continued)

3. Investments (continued)

Aggregate proceeds from sales of investments for the year ended December 31, 2000 were \$540,823,407.

4. Other Policy Deductions

The Variable Universal Life Policies provide for certain deductions for sales and tax loads from premium payments received from the policyholders and for surrender charges and taxes from amounts paid to policyholders. Such deductions are taken before the purchase of divisional units or after the redemption of divisional units of the Separate Account. Such deductions are not included in the Separate Account financial statements.

5. Policy Loans

The Variable Universal Life Policies allow the policyholders to borrow against their policies by using them as collateral for a loan. At the time of borrowing against the policies, an amount equal to the loan amount is transferred from the Separate Account divisions to a Loan Division in the Company's General Account to secure the loan. As payments are made on the policy loan, amounts are transferred back from the Loan Division to the Separate Account divisions. Interest is credited to the balance in the Loan Division at a fixed rate. The Loan Division is not variable in nature and is not included in these Separate Account statements.

6. Federal Income Taxes

The Separate Account is not taxed separately because the operations of the Separate Account are part of the total operations of the Company. The Company is taxed as a life insurance company under the Internal Revenue Code. The Separate Account is not taxed as a "Regulated Investment Company" under subchapter "M" of the Internal Revenue Code.

THE POLICY'S BASE DEATH BENEFIT AT ANY TIME WILL BE AT LEAST EQUAL TO THE ACCOUNT VALUE TIMES THE APPROPRIATE FACTOR FROM THIS TABLE.

APPENDIX B

Performance Information

POLICY PERFORMANCE

The following hypothetical performance demonstrates how the actual investment experience of each variable investment option of the separate account affects the cash surrender value, account value and death benefit of a policy. These hypothetical illustrations are based on the actual historical return of each portfolio as if a policy had been issued on the date indicated. Each portfolio's annual total return is based on the total return calculated for each fiscal year. These annual total return figures reflect the net portfolio's management fees after any voluntary waiver and other operating expenses but do not reflect the policy level or separate account asset-based charges and deductions, which if reflected, would result in lower total return figures than those shown.

The performance is based on the payment of a \$13,000 annual premium, received at the beginning of each year, for a hypothetical policy with a \$1,000,000 stated death benefit, the guideline premium test, death benefit option 1, issued to a preferred, tobacco non-user male, age 50 and a preferred, tobacco non-user female, age 50. It is assumed that all premiums are allocated to the variable investment option illustrated for the period shown. The benefits are calculated for a specific date. The amount and timing of premium payments and the use of other policy features, such as policy loans, would affect individual policy benefits.

The amounts shown for the cash surrender values, account values and death benefits take into account the charges against premiums, current cost of insurance and monthly deductions, the daily charge against the separate account for mortality and expense risks, and each portfolio's charges and expenses. *See Charges and Deductions, page 47.*

Past performance is not an indication of future results. Actual investment results may be more or less than those shown in the hypothetical illustrations.

| INVESTMENT PORTFOLIO OBJECTIVES | | |
|---|--|--|
| Variable Investment Option | Investment Company/ Adviser/ Manager/ Sub-Adviser | Investment Objective |
| <i>Brandes International Equity Fund</i> | <u>Investment Company:</u> M Fund, Inc. <u>Investment Adviser:</u> M Financial Investment Advisers, Inc. <u>Sub-Adviser:</u> Brandes Investment Partners, LP | Seeks to provide long-term capital appreciation through investing mainly in equity securities of foreign issuers, including common stocks, preferred stocks and securities that are convertible into common stocks. |
| <i>Clifton Enhanced U. S. Equity Fund</i> | <u>Investment Company:</u> M Fund, Inc. <u>Investment Adviser:</u> M Financial Investment Advisers, Inc. <u>Sub-Adviser:</u> The Clifton Group | Seeks to provide above-market total return through investing in futures contracts on the Standard & Poor's 500 Composite Stock Price Index with the goal of earning a return equal to the Index. Since Futures Contracts do not require cash outlays, all of the Fund's assets are invested in a "cash" portfolio of high quality debt instruments designed to add small incremental return above that of the Index (and to meet margin requirements). |
| <i>Frontier Capital Appreciation Fund</i> | <u>Investment Company:</u> M Fund, Inc. <u>Investment Adviser:</u> M Financial Investment Advisers, Inc. <u>Sub-Adviser:</u> Frontier Capital Management Company, LLC | Seeks to provide maximum capital appreciation through investing in common stock of U. S. companies of all sizes with emphasis on stocks of companies with capitalizations of less than \$3 billion. |
| <i>Turner Core Growth Fund</i> | <u>Investment Company:</u> M Fund, Inc. <u>Investment Adviser:</u> M Financial Investment Advisers, Inc. <u>Sub-Adviser:</u> Turner Investment Partners, Inc. | Seeks to provide long-term capital appreciation through investing mainly in common stocks of U. S. companies that show strong earnings potential and also have reasonable valuations. |
