Form 10-K – December 31, 2005

Item 7. Management's Discussion And Analysis Of Financial Condition And Results Of Operations, page 47

Critical Accounting Policies, page 49

Revenue Recognition, page 49

1. We believe that your disclosure related to estimates of items that reduce gross revenue such as product returns, chargebacks, customer rebates and other

discounts and allowances could be improved as follows, provide us the following information in disclosure-type format:

- a) The nature and amount of each accrual at the balance sheet date and the effect that could result from using other reasonably likely assumptions than what you used to arrive at each accrual such as a range of reasonably likely amounts or other type of sensitivity analysis.
- b) The factors that you consider in estimating each accrual such as historical return of products, levels of inventory in the distribution channel, estimated remaining shelf life, price changes from competitors and introductions of generics and/or new products.
- c) To the extent that information you consider in b) is quantifiable, discuss both quantitative and qualitative information and discuss to what extent information is from external sources (e.g., end-customer prescription demand, third-party market research data comparing wholesaler inventory levels to end-customer demand). For example, in discussing your estimate of product that may be returned, consider disclosing and discussing, preferably by product and in tabular format, the total amount of product (in sales dollars) that could potentially be returned as of the balance sheet date and disaggregated by expiration period.
- d) If applicable, discuss any shipments made as a result of incentives and/or in excess of your customer's ordinary course of business inventory level. Discuss your revenue recognition policy for such shipments.
- e) A roll forward of the liability for each estimate for each period presented showing the following:
  - Beginning balance,
  - Current provision related to sales made in current period,
  - Current provision related to sales made in prior periods,
  - Actual returns or credits in current period related to sales made in current period,
  - Actual returns or credits in current period related to sales made in prior periods, and
  - Ending balance.
- f) In your discussion of results of operations for the period to period revenue comparisons, discuss the amount of and reason for fluctuations for each type of reduction of gross revenue (i.e. product returns, chargebacks, customer rebates and other discounts and allowances) including the effect that changes in your estimates of these items had on your revenues and operations.
