Forward-Looking Statements

This Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Our actual results could differ materially from those set forth in each forward-looking statement. Certain factors that might cause such a difference are discussed in this report, including in the section entitled "Forward Looking Statements" on page 56 of this Form 10-K.

Item 1. Business

The Company

Home Properties, Inc. ("Home Properties" or the "Company") is a self-administered and self-managed real estate investment trust ("REIT") that owns, operates, acquires, develops and rehabilitates apartment communities. The Company's properties are regionally focused, primarily in selected Northeast, Mid-Atlantic and Southeast Florida markets along the East Coast of the United States. The Company was formed in November 1993 to continue and expand the operations of Home Leasing Corporation ("Home Leasing"). The Company completed an initial public offering of 5,408,000 shares of common stock (the "IPO") on August 4, 1994.

The Company conducts its business through Home Properties, L.P. (the "Operating Partnership"), a New York limited partnership and a management company – Home Properties Resident Services, Inc. ("HPRS"), which is a Maryland corporation. At December 31, 2008, the Company held 71.7% (70.8% at December 31, 2007) of the limited partnership units in the Operating Partnership ("UPREIT Units"). Formerly, a portion of the Company's business was also conducted by Home Properties Management, Inc. ("HP Management"), also a Maryland corporation, which was merged into HPRS on November 21, 2006.

Home Properties, through its affiliates described above, as of December 31, 2008, operated 112 communities with 38,280 apartment units. Of these, 37,130 units in 110 communities are owned outright (the "Owned Properties"), 868 units in one community are managed and partially owned by the Company as general partner, and 282 units in one community are managed for other owners (collectively, the "Managed Properties").

The Owned Properties and the Managed Properties (collectively, the "Properties") are concentrated in the following market areas:

The Company's mission is to maximize long-term shareholder value by acquiring, repositioning, developing and managing market-rate apartment communities while enhancing the quality of life for its residents and providing employees with opportunities for growth and accomplishment. Our vision is to be a prominent owner and manager of market-rate apartment communities, located in selected high barrier, high growth, East Coast markets. The areas we have targeted for growth are the Baltimore, Boston, New York City, Philadelphia, Southeast Florida and Washington, D.C. regions. We expect to maintain or grow portfolios in markets that profitably support our mission as economic conditions permit.

The Company's long-term business strategies include: (i) aggressively managing and improving its communities to achieve increased net operating income; (ii) acquiring additional apartment communities with attractive returns at prices that provide a positive spread over the Company's long-term cost of capital; (iii) developing new apartment communities on raw land, on land adjacent to existing owned communities, and where there are density opportunities to replace existing garden apartments with mid- or high-rise structures; (iv) disposing of properties that have reached their potential, are less efficient to operate, or are located in markets where growth has slowed to a pace below the markets targeted for acquisition; and (v) maintaining a strong and flexible capital structure with cost-effective access to the capital markets.

Structure

The Company was formed in November 1993 as a Maryland corporation and is the general partner of the Operating Partnership. On December 31, 2008, it held a 71.7% partnership interest in the Operating Partnership comprised of: 1) a 1.0% interest as sole general partner; and 2) a 70.7% limited partner interest through its wholly owned subsidiary, Home Properties I, LLC, which owns 100% of Home Properties Trust, which is the limited partner. The holders of the remaining 28.3% of the UPREIT Units are certain individuals and entities who received UPREIT Units as consideration for their interests in entities owning apartment communities purchased by the Operating Partnership, including certain officers and directors of the Company.

The Operating Partnership is a New York limited partnership formed in December 1993. Holders of UPREIT Units in the Operating Partnership may redeem an UPREIT Unit for one share of the Company's common stock or cash equal to the fair market value at the time of the redemption, at the option of the Company. Management expects that it will continue to utilize UPREIT Units as a form of consideration for a portion of its acquisition properties when it is economical to do so.

HPRS is, and HP Management was, prior to its merger into HPRS in November 2006, wholly owned by the Operating Partnership, and as a result, the accompanying consolidated financial statements include the accounts of both companies. HPRS is, and HP Management was, a taxable REIT subsidiary under the Tax Relief Extension Act of 1999. HP Management was formed in January 1994 and HPRS was formed in December 1995. Both companies managed for a fee certain of the commercial, residential and development activities of the Company and provided construction, development and redevelopment services for the Company. After the Company's sale and transfers of its affordable management properties and commercial management contracts, the amount of activity in HPRS and HP Management was minimal in 2006 and HP Management therefore was merged into HPRS.

In September 1997, Home Properties Trust ("QRS") was formed as a Maryland real estate trust and as a qualified REIT subsidiary. The QRS is wholly owned by Home Properties I, LLC which is owned 100% by the Company. The QRS is a limited partner of the Operating Partnership and holds all of the Company's interest in the Operating Partnership, except for the 1% held directly by the Company as sole general partner.

The Company currently has approximately 1,150 employees and its executive offices are located at 850 Clinton Square, Rochester, New York 14604. Its telephone number is (585) 546-4900.

Operating Strategies

The Company will continue to focus on enhancing long-term investment returns by: (i) developing new apartments and acquiring apartment communities and repositioning those apartment communities for long-term growth at prices that provide a positive spread over the Company's long-term cost of capital; (ii) recycling assets by disposing of properties in low growth markets and those that have reached their potential or are less efficient to operate due to size or remote location; (iii) balancing its decentralized property management philosophy with the efficiencies of centralized support functions and accountability including rent optimization and volume purchasing; (iv) enhancing the quality of living for the Company's residents by improving the service and physical amenities available at each community every year; (v) adopting new technology so that the time and cost spent on administration can be minimized while the time spent attracting and serving residents can be maximized; (vi) continuing to utilize its written "Pledge" of customer satisfaction that is the foundation on which the Company has built its brand recognition; and (vii) focusing on reducing expenses while constantly improving the level of service to residents. Due to the economic crisis and constrictions in the credit markets which occurred in 2008, in the short term, the Company plans to conserve capital and does not anticipate acquiring new properties or adding any new development projects to its pipeline in 2009.

The Company has a strategy of acquiring and repositioning mature C to B- apartment properties. Since its 1994 IPO, the Company has acquired and repositioned 197 communities, containing more than 54,000 units. The rehabilitation and revitalization process requires a minimum 9% return on repositioning investments which is often greatly exceeded. The Company has increased the targeted return to 10% for 2009, reflecting caution in these recessionary times. In addition, it is expected that capital expenditures will decrease in 2009 as potential residents may not prefer an upgraded apartment at a higher monthly rent in this difficult economy. Fewer capital expenditures will enable the Company to preserve capital. Extensive experience and expertise in repositioning has helped the Company build significant internal design and construction management skills. The complete initial repositioning of a community can take place over a five to seven year period. The comprehensive process typically begins with improvements in landscaping, signage and common areas. Exterior improvements increase curb appeal and marketability of the property. Deferred maintenance is corrected which can include new HVAC systems, roofs, new balconies and windows. At many properties, community centers and swimming pools are added or upgraded. Apartment interiors are renovated when residents move out, with the most significant investments made in upgrading kitchens and baths. Complete remodeling of dated kitchens and bathrooms typically include new appliances, flooring, counters, cabinets, lighting, tile, fixtures, sinks, bathtubs and toilets. It may include the removal of kitchen walls to open up the living area. Where feasible, in-unit washers and dryers are added. Repositioning efforts upgrade properties that were C to B- level when acquired to the B to B+ level, which over time significantly increases the property's rental income, net operating income and market value.

Acquisition and Sale Strategies

The Company's strategy is to grow primarily through acquisitions in the suburbs of major metropolitan markets that have significant barriers to new construction, limited new apartment supply, easy access to the Company's headquarters and enough apartments available for acquisition to achieve a critical mass. Targeted markets also possess other characteristics, including acquisition opportunities below replacement costs, a mature housing stock, high average single-family home prices, a favorable supply/demand relationship, stable or moderate job growth, reduced vulnerability to economic downturns and large prime renter populations including immigrants, young adults in their twenties and early thirties, and seniors over age 55. The Company currently expects that its growth will be focused primarily within suburban sub-markets of selected metropolitan areas within the Northeast, Mid-Atlantic and Southeast Florida regions of the United States where it has already established a presence. The largest metropolitan areas the Company will focus on include Baltimore, Boston, New York City, Philadelphia, Southeast Florida, and Washington, D.C. The Company may expand into new markets that possess the characteristics described above although it has no current plans to do so. Continued geographic specialization is expected to have a greater impact on operating efficiencies versus widespread accumulation of properties. The Company will continue to pursue the acquisition of individual properties as well as multi-property portfolios. It may also consider strategic investments in other apartment companies, as well as strategic alliances, such as joint ventures. In the current recessionary environment, the Company does not plan to close on any acquisitions in 2009 and has not included any purchases in its budget for 2009.

During 2008, the Company acquired two communities with a total of 813 units for an aggregate consideration of \$100.4 million, or an average of approximately \$123,528 per apartment unit. The weighted average expected first year capitalization rate for the acquired communities was 6.8%. Capitalization rate ("cap rate") is defined as the rate of interest used to convert the first year expected net operating income ("NOI") less a 3.0% management fee into a single present value. NOI is defined by the Company as rental income and property other income less operating and maintenance expenses. One acquisition was in a Baltimore suburb; the other acquisition was in a suburb of Washington, D.C.

During 2008, the Company completed the sale of fifteen communities with a total of 1,227 units for an aggregate consideration of \$124.5 million, at a weighted average expected first-year cap rate of 6.8%. The Company reinvested the net proceeds from those properties of approximately \$103.7 million, which were expected to produce a weighted average unleveraged internal rate of return ("IRR") of 6.0%, with the purchase of properties expected to produce an unleveraged IRR of 8.5%. IRR is defined as the discount rate at which the present value of the future cash flows of the investment is equal to the cost of the investment. Seven of the properties sold in 2008 were in the Company's Hudson Valley, New York region. The Company had owned properties in the region since 1996 and had largely completed upgrading and repositioning efforts. As a result, the Company saw limited future potential and decided to exit the region. With the sale on January 30, 2009 of two additional properties in the region, the Company completed its exit from the Hudson Valley region.

The Company has targeted additional communities for sale and will continue to evaluate the sale of other of its communities. Typically, a property will be targeted for sale if management is of the opinion that it has reached its potential or if it is located in a slower growth market or is less efficient to operate. A certain number of the properties may originally have been acquired through UPREIT transactions. Therefore, those sales will have to be matched with suitable acquisitions using a tax deferred exchange. The Company has anticipated closing on sales of \$110 million in its budget for 2009.

Financing and Capital Strategies

The Company intends to continue to adhere to the following financing policies: (i) maintaining a ratio of debt-to-total market capitalization (total debt of the Company as a percentage of the value (using the Company's internally calculated Net Asset Value ("NAV" per share) of outstanding diluted common stock (including the common stock equivalents of the UPREIT Units) plus total debt) of approximately 55% or less; (ii) utilizing primarily fixed rate debt; (iii) varying debt maturities to avoid significant exposure to interest rate changes upon refinancing; and (iv) maintaining a line of credit so that it can respond quickly to acquisition opportunities. Due to the economic crisis and constrictions in the credit markets which occurred in 2008 and are assumed to continue all of 2009, the Company plans to conserve capital in various aspects of its operations, including limiting acquisitions, development and capital expenditures.

Specific to 2009, and in response to the constrictions in the credit market, the Company will be pursuing certain initiatives as follows: 1) The Company is evaluating alternatives to replace or extend the existing unsecured line of credit which matures September 1, 2009. The Company is working with its existing lead bank and discussions suggest that there is interest from banks to participate in the Company's facility. The Company anticipates it will be able to replace the entire \$140 million. Pricing will be more expensive, and may move from interest at 0.75% over the one-month LIBOR under the existing agreement possibly to a spread closer to 3.00%. In addition, up-front and on-going fees could add another 75 basis points to pricing. 2) During 2008, the Company has increased the level of the value of unencumbered properties in relationship to the total property portfolio from 16% to 19%. This higher level adds flexibility in 2009 allowing the Company to place secured financing on unencumbered assets as required. 3) The Company benefits from its multifamily focus as the Government Sponsored Enterprises ("GSEs") Fannie Mae and Freddie Mac are still very active lending to apartment owners. Underwriting has become stricter, but the Company believes it will be able to refinance its debt maturities during this cycle of reduced liquidity. 4) The Company is in the fortunate position of having only \$19 million of secured loans maturing in 2009. For 2010 and 2011, that number rises to \$334 million and \$302 million, respectively. The Company is currently negotiating with the GSEs on forward commitments to contractually provide for a pool of loans for approximately half of these maturities. The commitment would not fix rates today, but other criteria, including loan-to-value and debt service coverage requirements, would be agreed to in advance.

On December 31, 2008, the Company's debt was approximately \$2.3 billion and the debt-to-total market capitalization ratio was 55.8% based on the year-end closing price of the Company's common stock of \$40.60. The weighted average interest rate on the Company's mortgage debt as of December 31, 2008 was 5.7% and the weighted average maturity was approximately five and one-half years. Debt maturities are staggered, ranging from July 2009, through November 2034. As of December 31, 2008, the Company had an unsecured line of credit facility from M&T Bank of \$140 million. This facility is available for acquisition and other corporate purposes and bears an interest rate at 0.75% over the one-month LIBOR rate. As of December 31, 2008, the one-month LIBOR rate was 0.44% and there was \$71 million outstanding on the line of credit.

Management expects to continue to fund a portion of its continued growth by taking advantage of its UPREIT structure and using UPREIT Units as currency in acquisition transactions. During 2007, the Company issued \$36.3 million worth of UPREIT Units as partial consideration for three acquired properties. During 2008, there were no UPREIT Units used as consideration for acquired properties. It is difficult to predict the level of demand from sellers for this type of transaction. In periods when the Company's stock price is trading at a discount to estimated NAV, it is unlikely that management would engage in UPREIT transactions.

During periods when the Company's shares are trading at a premium to its estimate of NAV, it is unlikely that management would engage in share repurchases. In such circumstances, it is more likely that management would pursue issuing equity in order to raise capital to be used to pay down existing indebtedness. This should be neutral to both earnings per share and NAV, increase the level of unencumbered assets and better position the Company to fund future acquisition and development pipeline needs.

In 1997, the Company's Board of Directors approved a stock repurchase program under which the Company can repurchase shares of its outstanding common stock and UPREIT Units. Shares or units may be repurchased through the open market or in privately-negotiated transactions. The Company's strategy is to opportunistically repurchase shares at a discount to its underlying NAV, thereby continuing to build value for long-term shareholders. At December 31, 2006, there was approval remaining to purchase 2,606,448 shares. During 2007, the Company repurchased 1,243,700 shares of its outstanding common stock at a cost of \$58.3 million at a weighted average price of \$46.86 per share. During the first quarter of 2008, the Company repurchased 1,071,588 shares of its outstanding common stock at a cost of \$50.0 million at a weighted average price of \$46.66 per share. On May 1, 2008, the Board granted authorization to repurchase up to an additional two million shares/units, resulting in a remaining authorization level of 2,291,160 shares as of December 31, 2008. The 2009 guidance assumes no additional share repurchases.

Competition

The Company's properties are primarily located in developed areas where there are other multifamily properties which directly compete for residents. There is also competition from single family homes and condominiums for sale or rent. The competitive environment may have a detrimental effect on the Company's ability to lease apartments at existing and at newly developed properties, as well as on rental rates.

In addition, the Company competes with other real estate investors in seeking property for acquisition and development. These competitors include pension and investment funds, insurance companies, private investors, local owners and developers, and other apartment REITs. This competition could increase prices for properties that the Company would like to purchase and impact the Company's ability to achieve its long-term growth targets.

The Company believes, however, that it is well-positioned to compete effectively for both residents and properties as a result of its:

- focus on service and resident satisfaction, as evidenced by both The Home Properties Pledge, which provides a money-back service guarantee and lease flexibility, and by its resident turnover ratio which is consistently below the industry average;
- ability to issue UPREIT Units in purchase transactions, which provides sellers with the opportunity to defer taxes; and
- unique repositioning strategy that differentiates the Company from its competitors.

Market Environment

The markets in which Home Properties operates could be characterized long-term as stable, with moderate levels of job growth. During 2008 and expected to continue through 2009, many regions of the United States are experiencing varying degrees of economic recession resulting in negative job growth for both the country as a whole and the Company's markets.

For 2007, the Company's markets experienced slightly stronger job growth of 1.0% compared to 0.9% for the country. With the recession of 2008, job losses became the norm. The Company's markets still compare favorably for 2008 with job losses of 1.2% compared to 2.1% for the country. In addition, the unemployment rate for the Company's markets of 5.9% trails the country average of 7.1%. The Northern VA/DC market stands out for the Company as it maintained slightly positive job growth of 0.4% for 2008. This market represents 25.1% of the total apartment unit count and produces 27.6% of the property NOI. These two favorable comparisons help explain why the Company's markets help the Company outperform many peers in a tough economic environment.

The information on the "Market Demographics and Multifamily Supply and Demand" tables on Pages 11 and 12 were compiled by the Company from the sources indicated on the tables. The methods used include estimates and, while the Company feels that the estimates are reasonable, there can be no assurance that the estimates are accurate. There can also be no assurance that the historical information included on the table will be consistent with future trends.

New construction in the Company's markets is low relative to the existing multifamily housing stock and compared to other regions of the country. In 2008, Home Properties' markets represented 27.5% of the total estimated existing U.S. multifamily housing stock, but only 18.0% of the country's estimated net new supply of multifamily housing units.

An analysis of future multifamily supply compared to projected multifamily demand can indicate whether a particular market is tightening, softening or in equilibrium. The fourth to last column in the "Multifamily Supply and Demand" table on Page 12 reflects current estimated net new multifamily supply as a percentage of new multifamily demand for the Company's markets and the United States. In 2008, net new multifamily supply as a percent of net new multifamily demand in Home Properties' markets was approximately a negative 32.1%, compared to a national average of negative 32.8%. In 2007, these same percentages were more favorable for the Company at 57% compared to 111% for the country.

In 2007, the Company's markets experienced better metrics in comparison to the country. In 2008, with demand down due to job losses which has reduced household formations, both the Company's markets and the country are softening with new supply in excess of estimated demand.

The third to the last column in the Multifamily Supply and Demand table on Page 12 shows the estimated net new multifamily supply as a percent of existing multifamily housing stock. In the Company's markets, net new supply only represents 0.3% of the existing multifamily housing stock. This compares favorably to the national average net new multifamily supply estimates at 0.5% of the multifamily housing stock.

⁽⁶⁾ **Estimated 2008 New Supply of Multifamily** = Multifamily permits (2008 figures U.S. Census Bureau, Mfg. & Constr. Div., 5+ permits only) adjusted by the average % of permits resulting in a construction start (estimated at 95%).

⁽⁷⁾ **Estimated 2008 Multifamily Obsolescence** = 0.5% of Estimated 2008 Multifamily Housing Stock.

⁽⁸⁾ **Estimated 2008 Net New Multifamily Supply** = Estimated 2008 New Supply of Multifamily - Estimated 2008 Multifamily Obsolescence.

⁽⁹⁾ **Estimated 2008 New Multifamily Household Demand** = Trailing 12 month job growth (Nonfarm, not seasonally adjusted payroll employment figures) (12/31/2007-12/31/2008) multiplied by the expected % of new household formations resulting from new jobs (66.7%) and the % of multifamily households in each market (based on Claritas estimates).

⁽¹⁰⁾ **Expected Excess Demand** = Estimated 2008 New Multifamily Household Demand - Estimated 2008 Net New Multifamily Supply.

⁽¹¹⁾ **Expected Excess Revenue Growth** = Expected Excess Demand divided by 2008 Multifamily Housing Stock. This percentage is expected to reflect the relative impact that changes in the supply and demand for multifamily housing units will have on occupancy rates and/or rental rates in each market, beyond the impact caused by broader economic factors, such as inflation and interest rates.

Environmental Matters

As a current or prior owner, operator and developer of real estate, the Company is subject to various federal, state and local environmental laws, regulations and ordinances and also could be liable to third parties as a result of environmental contamination or noncompliance at its properties. See the discussion under the caption, "We may incur costs due to environmental contamination or non-compliance" in Item 1A, Risk Factors, for information concerning the potential effect of environmental regulations on the Company's operations.

Available Information

The Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and other reports required by Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, are electronically filed with the Securities and Exchange Commission ("SEC"). The public may read and copy any materials the Company files with the SEC at the SEC's Public Reference Room at 100 F Street NE, Washington, DC 20549-2521. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the Public Reference Room. The SEC maintains a Web site at www.sec.gov that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

Company Web Site

The Company maintains an Internet Web site at www.homeproperties.com. The Company provides free of charge access to its reports filed with the SEC, and any amendments thereto, through this Web site. These reports are available as soon as reasonably practicable after the reports are filed electronically with the SEC and are found under "Investors/SEC Filings." In addition, paper copies of annual and periodic reports filed with the SEC may be obtained at no charge by contacting the Corporate Secretary, Home Properties, Inc., 850 Clinton Square, Rochester, New York 14604.

Current copies of the Company's Code of Business Conduct and Ethics, Code of Ethics for Senior Financial Officers, Corporate Governance Guidelines and Charters for the Audit, Compensation, Corporate Governance/Nominating and Real Estate Investment Committees of the Board of Directors are also available on the Company's Web site under the heading "Investors/Corporate Overview Highlights/Governance Documents." Item 1A. Risk Factors

As used in this section, references to "we" or "us" or "our" refer to the Company, the Operating Partnership, and HPRS.

The following risks apply to Home Properties, the Operating Partnership, and HPRS, in addition to other risks and factors set forth elsewhere in this Form 10-K.

Real Estate Investment Risks

We are subject to risks that are part of owning real estate.

Real property investments are subject to varying degrees of risk. If our communities do not generate revenues sufficient to meet operating expenses, debt service and capital expenditures, our cash flow and ability to make distributions to our stockholders will be adversely affected. A multifamily apartment community's revenues and value may be adversely affected by general economic conditions; local economic conditions; local real estate considerations (such as oversupply of or reduced demand for apartments); the perception by prospective residents of the safety, convenience and attractiveness of the communities or neighborhoods in which they are located and the quality of local schools and other amenities; and increased operating costs (including real estate taxes and utilities). Certain significant fixed expenses are generally not reduced when circumstances cause a reduction in income from the investment.

We depend on rental income for cash flow to pay expenses and make distributions.

We are dependent on rental income to pay operating expenses, debt service and capital expenditures, in order to generate cash to enable us to make distributions to our stockholders. If we are unable to attract and retain residents or if our residents are unable, due to an adverse change in the economic condition of the region or otherwise, to pay their rental obligations, our ability to make expected distributions will be adversely affected. In addition, the weather and other factors outside of our control can result in an increase in the operating expenses for which we are responsible.

The current economic crisis might negatively impact our occupancy rates, our residents' ability to pay rent and our ability to raise rents.

In 2008 and early 2009, problems in the financial system have caused consumer confidence to plunge and unemployment to soar. Increasing job losses typically slow household formations, which could affect occupancy. In addition, continued job losses might negatively impact our current residents' ability to pay rent and would likely impact our ability to raise rents.

Acquisitions may fail to meet expectations.

For 2009, we do not plan to acquire any properties unless the current economic situation improves. Long term, however, we do intend to continue to acquire apartment communities. There are risks that acquisitions will fail to meet our expectations. Our estimates of future income, expenses and the costs of improvements or redevelopment that are necessary to allow us to operate an acquired property as originally intended may prove to be inaccurate.

Real estate investments are relatively illiquid, and we may not be able to respond to changing conditions quickly.

Real estate investments are relatively illiquid and, therefore, we have limited ability to adjust our portfolio quickly in response to changes in economic or other conditions. In addition, the prohibition in the Internal Revenue Code (the "Code") on REITs holding property for sale and related regulations may affect our ability to sell properties without adversely affecting distributions to stockholders. A significant number of our Properties were acquired using UPREIT Units and are subject to certain agreements which restrict our ability to sell such Properties in transactions that would create current taxable income to the former owners.

Current economic conditions may make it difficult for us to execute our planned dispositions on favorable terms.

We have included in our operating plan for 2009 that we will strategically dispose of properties having an approximate value of \$110 million. We have already closed on \$68 million in 2009. The uncertainty in the credit markets could negatively impact our ability to make additional dispositions or may adversely affect the price we receive since buyers may experience increased borrowing costs or an inability to obtain financing.

Our business is subject to competition.

Long term, we plan to continue to acquire additional multifamily residential properties in the Northeast, Mid-Atlantic and Southeast Florida regions of the United States. There are a number of multifamily developers and other real estate companies that compete with us in seeking properties for acquisition, prospective residents and land for development. Most of our Properties are in developed areas where there are other properties of the same type. Competition from other properties may affect our ability to attract and retain residents, to increase rental rates and to minimize expenses of operation. Competition for the acquisition of properties could increase prices for the types of properties we would like to pursue and adversely affect our financial performance.

Repositioning and development risks could affect our profitability.

A key component of our strategy is to acquire properties and to reposition them for long-term growth. In addition, we have developed and are in the process of developing new apartment units. We plan to continue to expand our development activities. Development projects generally require various governmental and other approvals, which have no assurance of being received. Our repositioning and development activities generally entail certain risks, including the following:

- funds may be expended and management's time devoted to projects that may not be completed due to a variety of factors, including without limitation, the inability to obtain necessary zoning or other approvals;
- construction costs of a project may exceed original estimates, possibly making the project economically unfeasible;
- development projects may be delayed due to delays in obtaining necessary zoning and other approvals, adverse weather conditions, labor shortages, or other unforeseen complications;
- occupancy rates and rents at a completed project may be less than anticipated; and
- the operating expenses at a completed development may be higher than anticipated.

These risks may reduce the funds available for distribution to our stockholders. Further, the repositioning and development of properties is also subject to the general risks associated with real estate investments.

Short-term leases expose us to the effects of declining market conditions.

Virtually all of the leases for our Properties are short-term leases (generally, one year or less). Typically, our residents can leave after the end of a one-year lease term. As a result, our rental revenues are impacted by declines in market conditions more quickly than if our leases were for longer terms.

A significant uninsured property or liability loss could adversely affect us in a material way.

The Company carries comprehensive liability, fire, extended and rental loss insurance for each of the Properties. There are however certain types of extraordinary losses, such as losses for terrorism and natural catastrophes, for which the Company may not have insurance coverage. If an uninsured loss occurred, we could lose our investment in, and cash flow from, the affected property, and could be required to repay any indebtedness secured by that property and related taxes and other charges.

Changes in applicable laws, or noncompliance with applicable laws, could adversely affect our operations or expose us to liability.

We must operate our Properties in compliance with numerous federal, state and local laws and regulations, including landlord tenant laws and other laws generally applicable to business operations. Noncompliance with laws could expose us to liability.

Compliance with changes in: (i) laws increasing the potential liability for environmental conditions existing on Properties or the restrictions on discharges or other conditions; (ii) rent control or rent stabilization laws; or (iii) other governmental rules and regulations or enforcement policies affecting the use and operation of our communities, including changes to building codes and fire and life-safety codes, may result in lower revenue growth or significant unanticipated expenditures.

We may incur costs and increased expenses to repair property damage resulting from inclement weather.

Particularly in the Northeast and Chicago, we are exposed to risks associated with inclement winter weather, including increased costs for the removal of snow and ice. In addition, in Southeast Florida, we have exposure to severe storms which could also increase the need for maintenance and repair of our communities in that region.

We may incur costs due to environmental contamination or non-compliance.

Under various federal, state and local environmental laws, regulations and ordinances, we may be required, regardless of knowledge or responsibility, to investigate and remediate the effects of hazardous or toxic substances at our Properties and may be held liable under these laws or common law to a governmental entity or to third parties for property, personal injury or natural resources damages and for investigation and remediation costs incurred as a result of the contamination. These damages and costs may be substantial. The presence of such substances, or the failure to properly remediate the contamination, may adversely affect our ability to borrow against, sell or rent the affected property.

The development, construction and operation of our communities are subject to regulations and permitting under various federal, state and local laws, regulations and ordinances, which regulate matters including wetlands protection, storm water runoff and wastewater discharge. Noncompliance with such laws and regulations may subject us to fines and penalties. We do not currently anticipate that we will incur any material liabilities as a result of noncompliance with these laws.

Certain federal, state and local laws, regulations and ordinances govern the removal, encapsulation or disturbance of asbestos containing materials ("ACMs") when such materials are in poor condition or in the event of renovation or demolition of a building. These laws and the common law may impose liability for release of ACMs and may allow third parties to seek recovery from owners or operators of real properties for personal injury associated with exposure to ACMs. ACMs are present at several of our communities. We implement an operations and maintenance program at each of the communities at which ACMs are detected. We do not currently anticipate that we will incur any material liabilities as a result of the presence of ACMs at our communities.

We are aware that some of our communities have lead paint and have implemented an operations and maintenance program at each of those communities to contain or remove lead paint to limit the exposure of our residents. We do not currently anticipate that we will incur any material liabilities as a result of the presence of lead paint at our communities.

All of the Owned Properties and all of the communities that we are currently developing have been subjected to at least a Phase I or similar environmental assessment, which generally does not involve invasive techniques such as soil or ground water sampling. These assessments, together with subsurface assessments conducted on some Properties, have not revealed, and we are not otherwise aware of, any environmental conditions that we believe would have a material adverse effect on our business, assets, financial condition or results of operation. There is no assurance that Phase I assessments would reveal all environmental liabilities or that environmental conditions not known to the Company may exist now or in the future which would result in liability to the Company for remediation or fines, either under existing laws and regulations or future changes to such requirements.

Mold growth may occur when excessive moisture accumulates in buildings or on building materials, particularly if the moisture problem remains undiscovered or is not addressed over a period of time. Although the occurrence of mold at multifamily and other structures, and the need to remediate such mold, is not a new phenomenon, there has been increased awareness in recent years that certain molds may in some instances lead to adverse health effects, including allergic or other reactions. There have been only limited cases of mold identified to us. We do not currently anticipate that we will incur any material liabilities relating to mold.

Additionally, we occasionally have been involved in managing, leasing and operating various properties for third parties. Consequently, we may be considered to have been an operator of such properties and, therefore, potentially liable for removal or remediation costs or other potential costs which could relate to hazardous or toxic substances. We are not aware of any material environmental liabilities with respect to properties managed by us for such third parties.

Financing and compliance requirements could limit our income and the ability to raise rents.

As a requirement relating to some of our financing, or, in some instances, relating to zoning or other municipal approvals, we have committed to make some of the apartments in a community available to households whose income does not exceed certain thresholds and/or to limit rent increases. As of December 31, 2008, approximately 9% of our apartment units were under some form of such limitations. These commitments typically expire after a period of time, and may limit our ability to raise rents aggressively and, in consequence, can also limit increases in the value of the communities subject to these restrictions.

Real Estate Financing Risks

The current instability in the credit markets could adversely affect our ability to obtain financing or re-financing at favorable rates.

As of December 31, 2008, we had approximately \$2.11 billion of mortgage debt, a significant portion of which is subject to balloon payments. We do not expect to have cash flows from operations to make all of these balloon payments. The fixed rate mortgage debt has the following maturation schedule:

2009	\$ 18.8 million
2010	334.5 million
2011	301.5 million
2012	168.0 million
Thereafter	1,289.5 million

In addition, in 2006, the Company issued \$200 million of exchangeable notes with a coupon rate of 4.125%. The outstanding principal balance of the notes are \$140 million. Holders of the notes may require the Company to repurchase the notes on November 1, 2011. Based on the fact that the current stock price for the Company's Common Stock is well below the exchange rate on the notes, we anticipate that the holders will exercise their repurchase rights.

Our ability to refinance these obligations could be negatively impacted by the severe disruptions in the credit and capital markets that occurred in 2008 and early 2009. If we can refinance some or all of the debt, the terms of such refinancing might not be as favorable as the terms of the existing indebtedness. If we cannot refinance or extend the maturity of some of the debt, the properties that are mortgaged could be foreclosed upon. This could adversely affect our cash flow and, consequently, the amount available for distribution to our stockholders. In order to finance the repurchase of the exchangeable notes, we might be forced to sell some of the properties at otherwise unacceptable prices or to issue equity at prices that would dilute the interests of our current stockholders.

The Company in part relies on its line of credit to meet its short-term liquidity requirements and the line expires on September 1, 2009.

As of December 31, 2008, the Company had an unsecured line of credit of \$140 million with an outstanding balance of \$71 million. That line of credit expires on September 1, 2009 at which time the remaining balance will be due and payable. The Company is in the process of negotiating a new line of credit with the current lender. The disruptions in the credit market may adversely affect our ability to negotiate a new line of credit. If we are successful in negotiating a new line of credit, the terms might not be as favorable as the existing line. If we are unable to negotiate a new line of credit, we may be forced to postpone capital expenditures necessary for the maintenance of our properties and/or may have to dispose of one or more properties on terms that would otherwise not be acceptable to us. We might also have to reduce the dividend paid to our stockholders or consider paying a portion of the dividend in the Company's common stock.

Rising interest rate could adversely affect operations and cash flow.

As of December 31, 2008, approximately 95% of our debt was at fixed rates. This limits our exposure to changes in interest rates. Prolonged interest rate increases, however, could negatively affect our ability to make acquisitions, to dispose of properties at favorable prices, to develop properties and to refinance existing borrowings at acceptable rates.

There is no legal limit on the amount of debt we can incur.

The Board of Directors has adopted a policy of limiting our indebtedness to approximately 55% of our total market capitalization (with the equity component of total market capitalization based on the per share net asset value presented to our Board of Directors at its most recent Board meeting), but our organizational documents do not contain any limitation on the amount or percentage of indebtedness we may incur. Accordingly, the Board of Directors could alter or eliminate its current policy on borrowing. If this policy were changed, we could become more highly leveraged, resulting in an increase in debt service that could adversely affect our ability to make expected distributions to stockholders and increase the risk of default on our indebtedness. Our net asset value fluctuates based on a number of factors. Our line of credit agreement limits the amount of indebtedness we may incur.

Federal Income Tax Risks

There is no assurance that we will continue to qualify as a REIT.

We believe that we have been organized and have operated in such manner so as to qualify as a REIT under the Internal Revenue Service Code, commencing with our taxable year ended December 31, 1994. A REIT generally is not taxed at the corporate level on income it currently distributes to its shareholders as long as it distributes currently at least 90% of its taxable income (excluding net capital gains). No assurance can be provided, however, that we have qualified or will continue to qualify as a REIT or that new legislation, Treasury Regulations, administrative interpretations or court decisions will not significantly change the tax laws with respect to our qualification as a REIT or the federal income tax consequences of such qualification.

We are required to make certain distributions to qualify as a REIT, and there is no assurance that we will have the funds necessary to make the distributions.

In order to continue to qualify as a REIT, we currently are required each year to distribute to our stockholders at least 90% of our taxable income (excluding net capital gains). In addition, we will be subject to a 4% nondeductible excise tax on the amount, if any, by which certain distributions made by us with respect to the calendar year are less than the sum of 85% of our ordinary income, 95% of our capital gain net income for that year, and any undistributed taxable income from prior periods. We intend to make distributions to our stockholders to comply with the 90% distribution requirement and to avoid the nondeductible excise tax and will rely for this purpose on distributions from the Operating Partnership. However, differences in timing between taxable income and cash available for distribution could require us to borrow funds or to issue additional equity to enable us to meet the 90% distribution requirement (and, therefore, to maintain our REIT qualification) and to avoid the nondeductible excise tax. The Operating Partnership is required to pay (or reimburse us, as its general partner, for) certain taxes and other liabilities and expenses that we incur, including any taxes that we must pay in the event we were to fail to qualify as a REIT. In addition, because we are unable to retain earnings (resulting from REIT distribution requirements), we will generally be required to refinance debt that matures with additional debt or equity. There can be no assurance that any of these sources of funds, if available at all, would be available to meet our distribution and tax obligations. On December 10, 2008 the IRS issued Revenue Procedure 2008-68 that temporarily (for 2009) permits publicly traded REITs to satisfy this tax requirement by offering their shareholders the election to receive the dividend in the form of cash or stock. The aggregate amount of cash is allowed to be as low as 10%. We are not presently planning on taking advantage of this revenue procedure, but it is available if conditions warrant and cash is not otherwise available.

Our failure to qualify as a REIT would have adverse consequences.

If we fail to qualify as a REIT, we will be subject to federal income tax (including any applicable alternative minimum tax) on our taxable income at regular corporate rates. In addition, unless entitled to relief under certain statutory provisions, we will be disqualified from treatment as a REIT for the four taxable years following the year during which REIT qualification is lost. The additional tax burden on us would significantly reduce the cash available for distribution by us to our stockholders. Our failure to qualify as a REIT could reduce materially the value of our common stock and would cause all our distributions to be taxable as ordinary income to the extent of our current and accumulated earnings and profits (although, subject to certain limitations under the Code, corporate distributees may be eligible for the dividends received deduction with respect to these distributions).

The Operating Partnership intends to qualify as a partnership but there is no guaranty that it will qualify.

We believe that the Operating Partnership qualifies as a partnership for federal income tax purposes. No assurance can be provided, however, that the Internal Revenue Service (the "IRS") will not challenge its status as a partnership for federal income tax purposes, or that a court would not sustain such a challenge. If the IRS were to be successful in treating the Operating Partnership as an entity that is taxable as a corporation, we would cease to qualify as a REIT because the value of our ownership interest in the Operating Partnership would exceed 5% of our assets and because we would be considered to hold more than 10% of the voting securities of another corporation. Also, the imposition of a corporate tax on the Operating Partnership would reduce significantly the amount of cash available for distribution to its limited partners. Finally, the classification of the Operating Partnership as a corporation would cause its limited partners to recognize gain (upon the event that causes the Operating Partnership to be classified as a corporation) at least equal to their "negative capital accounts" (and possibly more, depending upon the circumstances).

Other Risks

The ability of our stockholders to effect a change of control is limited by certain provisions of our Articles of Incorporation as well as by Maryland law and our Executive Retention Plan.

Our Articles of Amendment and Restatement of the Articles of Incorporation, as amended (the "Articles of Incorporation"), authorize the Board of Directors to issue up to a total of 80 million shares of common stock, 10 million shares of excess stock and 10 million shares of preferred stock and to establish the rights and preferences of any shares issued. Further, under the Articles of Incorporation, the stockholders do not have cumulative voting rights.

In order for us to maintain our qualification as a REIT, not more than 50% in value of our outstanding stock may be owned, directly or indirectly, by five or fewer individuals (as defined in the Code to include certain entities) at any time during the last half of its taxable year. We have limited ownership of the issued and outstanding shares of common stock by any single stockholder to 8.0% of the aggregate value of our outstanding shares.

The percentage ownership limit described above, the issuance of preferred stock in the future and the absence of cumulative voting rights could have the effect of: (i) delaying or preventing a change of control of us even if a change in control were in the stockholders' interest; (ii) deterring tender offers for our common stock that may be beneficial to the stockholders; or (iii) limiting the opportunity for stockholders to receive a premium for their common stock that might otherwise exist if an investor attempted to assemble a block of our common stock in excess of the percentage ownership limit or otherwise to effect a change of control of us.

As a Maryland corporation, we are subject to the provisions of the Maryland General Corporation Law. Maryland law imposes restrictions on some business combinations and requires compliance with statutory procedures before some mergers and acquisitions may occur, which may delay or prevent offers to acquire us or increase the difficulty of completing any offers, even if they are in our stockholders' best interests. In addition, other provisions of the Maryland General Corporation Law permit the Board of Directors to make elections and to take actions without stockholder approval (such as classifying our Board such that the entire Board is not up for re-election annually) that, if made or taken, could have the effect of discouraging or delaying a change in control.

Also, to assure that our management has appropriate incentives to focus on our business and Properties in the face of a change of control situation, we have adopted an executive retention plan which provides some key employees with salary, bonus and some benefits continuation in the event of a change of control.

Potential conflicts of interest could affect some directors' decisions.

Unlike persons acquiring common stock, certain of our directors, who constitute less than a majority of the Board of Directors, own a significant portion of their interest in us through UPREIT Units. As a result of their status as holders of UPREIT Units, those directors and other limited partners may have interests that conflict with stockholders with respect to business decisions affecting us and the Operating Partnership. In particular, those directors may suffer different or more adverse tax consequences than us upon the sale or refinancing of some of the Properties as a result of unrealized gain attributable to those Properties. Thus, those directors and the stockholders may have different objectives regarding the appropriate pricing and timing of any sale or refinancing of Properties. In addition, those directors, as limited partners of the Operating Partnership, have the right to approve certain fundamental transactions such as the sale of all or substantially all of the assets of the Operating Partnership, merger or consolidation or dissolution of the Operating Partnership and certain amendments to the Operating Partnership Agreement.

The future sale of shares may negatively impact our stock price.

Sales of substantial amounts of shares of common stock in the public market or the perception that such sales might occur could adversely affect the market price of the common stock. As of December 31, 2008, the Operating Partnership has issued and outstanding approximately 12.8 million UPREIT Units held by persons other than us or the Trust. The UPREIT Units may be exchanged on a one-for-one basis for shares of Common Stock under certain circumstances. In addition, Home Properties has granted options to purchase shares of stock to certain directors, officers and employees of Home Properties, of which, as of December 31, 2008, 2.9 million options remained outstanding and unexercised.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

As of December 31, 2008, the Owned Properties consisted of 110 multifamily residential communities containing 37,130 apartment units. In 2008, Home Properties acquired 813 apartment units in two communities for a total purchase price of \$100.4 million. Also in 2008, the Company sold fifteen communities in six transactions with a total of 1,227 units for total consideration of \$124.5 million.

The Owned Properties are generally located in established markets in suburban neighborhoods and are well maintained and well leased. Average physical occupancy at the Owned Properties was 94.9% for 2008. Occupancy is defined as total possible rental income, net of vacancy; as a percentage of total possible rental income. Total possible rental income is determined by valuing occupied units at contract rates and vacant units at market rents. The Owned Properties are typically two- and three-story garden style apartment buildings in landscaped settings and a majority are of brick or other masonry construction. The Company believes that its strategic focus on appealing to middle income residents and the quality of the services it provides to such residents results in lower resident turnover. Average turnover at the Owned Properties was approximately 42% for 2008, which is significantly below the national average of approximately 55% for garden style apartments.

Resident leases are generally for a one year term. Security deposits equal to one month's rent or less are generally required.

Certain of the Owned Properties collateralize mortgage loans. See Schedule III contained herein (pages 99 to 101).

The table on the following pages illustrates certain of the important characteristics of the Owned Properties as of December 31, 2008.

(1) "Core Communities" represents the 34,560 apartment units owned consistently throughout 2008 and 2007.

(2) "Resident Turnover" reflects, on an annual basis, the number of moveouts, divided by the total number of apartment units.

(3) "Average % Occupancy" is the average physical occupancy for the years ended December 31, 2008 and 2007.

(4) For communities acquired during 2008 and 2007, this is the average occupancy from the date of acquisition.

(5) Trexler Park West construction was completed in 2008.

Property Development

The Company has the ability to develop new market-rate communities. It plans to engage in development activity only in markets in which it currently is doing business to add net asset value and supplement future earnings and growth. It expects to develop new apartment communities on raw land and on land adjacent to existing Owned Properties, as well as to increase the density of units at some communities currently owned.

During 2008, the Company completed the development of a 216 unit apartment community in Allentown, Pennsylvania, adjacent to a market-rate community purchased in 2000. The total construction cost for this development was \$25.7 million upon completion and was 94% occupied for the fourth quarter of 2008.

A project at 1200 East West Highway in Silver Spring, Maryland was under construction during 2008. It is a 14-story high rise with 247 apartments and 10,600 square feet of retail or nonresidential space that is expected to be completed in the first quarter of 2010 at a total cost of \$78 million. The property is approximately three blocks south of Home Properties' Falkland Chase apartment community. The costs associated with construction in progress for this development were \$34.0 million as of December 31, 2008.

A project at Huntington Station, just south of Old Town Alexandria in Fairfax County, Virginia was also under construction during 2008. It is a podium design, with 421 units, adjacent to the Huntington Metro station and consists of four, four-story buildings. Construction is expected to be completed in 2011 at a total cost of \$125 million. The costs associated with construction in progress for this development were \$47.5 million as of December 31, 2008.

The Company had three projects in the pre-construction phase during 2008:

- Ripley Street, a 314-unit high rise, is located in Silver Spring, Maryland. Construction is expected to begin in 2010, with completion in 2012, at a total cost of \$113 million. The pre-construction costs for this project were \$17.0 million as of December 31, 2008.
- Cobblestone Square, a 314-unit garden apartment community, is located in Fredericksburg, Virginia. Construction is expected to begin in 2010, with a completion in 2011, at a total cost of \$50 million. The pre-construction costs, consisting mostly of land value, were \$12.5 million at December 31, 2008.
- Falkland Chase, located in Silver Spring, Maryland, currently has 450 garden apartments constructed between 1936 and 1939. The Company is planning on redeveloping the North parcel, which will be renamed Falkland North. The Company has submitted plans to redevelop this parcel into 1,059 units in four high-rise buildings with a community center, exercise room, swimming pool, convenience retail shops and a major supermarket. If approved, construction is expected to start in 2010, with completion anticipated in 2014 at a total cost of \$318 million. The pre-construction costs associated with this project were \$1.7 million as of December 31, 2008.

Property Management

As of December 31, 2008, the Managed Properties consist of two multifamily communities, one 868 unit community managed as general partner in Columbus, Ohio and one fee-managed 282 unit community in Annapolis, Maryland.

The Company may pursue the management of additional properties not owned by the Company, but will only do so when such additional properties can be effectively and efficiently managed in conjunction with other properties owned or managed by Home Properties, or where the Company views the properties as potential acquisitions in desirable markets.

Supplemental Property Information

At December 31, 2008, none of the Properties have an individual net book value equal to or greater than ten percent of the total assets of the Company or would have accounted for ten percent or more of the Company's aggregate gross revenues for 2008. There is no resident who has one or more leases which, in the aggregate, account for more than 10% of the aggregate gross revenues for the year ended December 31, 2008.

Item 3. Legal Proceedings

The Company is subject to a variety of legal actions for personal injury or property damage arising in the ordinary course of its business, most of which are covered by liability insurance. Various claims of employment and resident discrimination are also periodically brought. While the resolution of these matters cannot be predicted with certainty, management believes that the final outcome of such legal proceedings and claims will not have a material adverse effect on the Company's liquidity, financial position or results of operations.

Item 4. Submission of Matters to Vote of Security Holders

None.

Item 4A. Executive Officers

PART II

Item 5. Market for the Registrant's Common Stock and Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information, Holders and Dividends

The Common Stock has been traded on the New York Stock Exchange ("NYSE") under the symbol "HME" since July 28, 1994. The following table sets forth for the previous two years the quarterly high and low sales prices per share reported on the NYSE, as well as all dividends paid with respect to the common stock.

	<u>High</u>	<u>Low</u>	<u>Dividends</u>
<u>2008</u>			
First Quarter	\$52.22	\$39.17	\$0.66
Second Quarter	\$54.21	\$47.11	\$0.66
Third Quarter	\$60.39	\$46.81	\$0.66
Fourth Quarter	\$57.76	\$24.93	\$0.67
<u>2007</u>			
First Quarter	\$64.97	\$51.59	\$0.65
Second Quarter	\$58.49	\$50.55	\$0.65
Third Quarter	\$56.90	\$45.01	\$0.65
Fourth Quarter	\$56.65	\$41.10	\$0.66

As of February 20, 2009, the Company had approximately 3,807 shareholders of record, 32,857,072 common shares (plus 12,392,587 UPREIT Units convertible into 12,392,587 common shares) were outstanding, and the closing price was \$27.38. It is the Company's policy to pay dividends. The Company has historically paid dividends on a quarterly basis in the months of February, May, August and November.

Securities Authorized for Issuance Under Equity Compensation Plans

The following table provides information as of December 31, 2008, with respect to shares of our common stock that may be issued under the Stock Benefit Plans:

<u>Plan Category</u>	<u>Number of Securities to be Issued Upon Exercise of Outstanding Options</u>	<u>Weighted Average Exercise Price of Outstanding Options</u>	<u>Number of Securities Remaining Available for Future Issuance⁽²⁾⁽³⁾</u>
Options:			
Equity compensation plans approved by security holders	2,691,789	\$46.01	1,877,049
Equity compensation plans not approved by security holders ⁽¹⁾	<u>163,339</u>	<u>32.62</u>	<u>-</u>
Total Options ⁽²⁾	<u>2,855,128</u>	<u>\$45.25</u>	<u>1,877,049</u>
Restricted Stock Awards:			
Equity compensation plans approved by security holders	118,713	N/A	664,745
Equity compensation plans not approved by security holders ⁽¹⁾	<u>50,600</u>	<u>N/A</u>	<u>-</u>
Total Restricted Stock Awards ⁽³⁾	<u>169,313</u>	<u>N/A</u>	<u>664,745</u>

⁽¹⁾ These options and restricted stock awards were made under Company's 2000 Stock Benefit Plan, the material features of which are described in Note 9 of the accompanying Consolidated Financial Statements. The 2000 Stock Benefit Plan was approved by the stockholders in 2000 and was amended in 2001 to increase the options

available for issuance by 500,000 and to increase the number of restricted shares available by 55,000. This increase was not required to be approved by the stockholders.

- (2) This assumes that all 1,877,049 equity awards that are available under the 2008 Stock Benefit Plan are issued in the form of options. In that case, there would be no awards available for the issuance of restricted stock.
- (3) This assumes that all 1,887,049 equity awards that are available under the 2008 Stock Benefit Plan are issued in the form of restricted stock. In that case, there would be no awards available for the issuance of options. Under the Plan, awards of restricted stock reduce the number of shares available for award by one share for every one share awarded, up to 250,000 shares. Beyond that restricted stock reduces the shares available for award by 3.5 shares for every one share awarded.

Performance Graph

The following graph compares the cumulative return on the Company's common stock during the five year period ended December 31, 2008 to the cumulative return of the NAREIT All Equity REIT Index and the Standard and Poor's 500 Index for the same period. The total return assumes that dividends were reinvested quarterly at the same price as provided under the Company's Dividend Reinvestment and Direct Stock Purchase Plan (with a discount for 2004, and without a discount for 2005 through 2008) and is based on a \$100 investment on December 31, 2003. Stockholders should note that past performance does not predict future results.

Issuer Purchases of Equity Securities

In 1997, the Company's Board of Directors approved a stock repurchase program under which the Company may repurchase shares of its outstanding common stock and UPREIT Units. The shares/units may be repurchased through open market or privately negotiated transactions at the discretion of Company management. The Board's action does not establish a specific target stock price or a specific timetable for share repurchase. In addition, participants in the Company's Stock Benefit Plan can use common stock of the Company that they already own to pay all or a portion of the exercise price payable to the Company upon the exercise of an option. In such event, the common stock used to pay the exercise price is returned to authorized but unissued status, and for purposes of this table is deemed to have been repurchased by the Company. At December 31, 2007, the Company had authorization to repurchase 1,362,748 shares of common stock and UPREIT Units under the stock repurchase program. During the first quarter of 2008, the Company repurchased 1,071,588 shares at a cost of \$49,996,219, and on May 1, 2008, the Board granted authorization to repurchase up to an additional two million shares/units, resulting in a remaining authorization level of 2,291,160 shares/units as of December 31, 2008.

The following table summarizes the total number of shares (units) repurchased by the Company during the year ended December 31, 2008:

⁽¹⁾ During 2008, and as permitted by the Company's stock option plans, 9,874 shares of common stock already owned by option holders were used by those holders to pay the exercise price associated with their option exercise. These shares were returned to the status of authorized but unissued shares. In addition, the Company repurchased 58,873 shares of common stock through share repurchase by the transfer agent in the open market in connection with the Company's Dividend Reinvestment and Direct Stock Purchase Plan.

- (1) Other income includes property other income, interest income and other income.
- (2) Redeemable preferred stock was redeemable solely at the option of the Company.
- (3) Pursuant to the revised definition of Funds From Operations ("FFO") adopted by the Board of Governors of the National Association of Real Estate Investment Trusts ("NAREIT"), FFO is defined as net income (computed in accordance with accounting principles generally accepted in the United States of America ("GAAP")) excluding gains or losses from sales of property, minority interest and extraordinary items plus depreciation from real property including adjustments for unconsolidated partnerships and joint ventures less dividends from non-convertible preferred shares. In 2008, 2007 and 2006, the Company added back debt extinguishment costs which were incurred as a result of repaying property specific debt triggered upon sale as a gain or loss on sale of the property. Because of the limitations of the FFO definition as published by NAREIT as set forth above, the Company has made certain interpretations in applying the definition. The Company believes all adjustments not specifically provided for are consistent with the definition.

In addition to presenting FFO in accordance with the NAREIT definition, we also disclose FFO after a specific and defined supplemental adjustment to exclude losses from early extinguishments of debt associated with the sales of real estate. The adjustment to exclude losses from early extinguishments of debt results when the sale of real estate encumbered by debt requires us to pay the extinguishment costs prior to the debt's stated maturity and to write-off unamortized loan costs at the date of the extinguishment. Such costs are excluded from the gains on sales of real estate reported in accordance with GAAP. However, we view the losses from early extinguishments of debt associated with the sales of real estate as an incremental cost of the sale transactions because we extinguished the debt in connection with the consummation of the sale transactions and we had no intent to extinguish the debt absent such transactions. We believe that this supplemental adjustment more appropriately reflects the results of our operations exclusive of the impact of our sale transactions.

Although our FFO as adjusted clearly differs from NAREIT's definition of FFO, and may not be comparable to that of other REITs and real estate companies, we believe it provides a meaningful supplemental measure of our operating performance because we believe that, by excluding the effects of the losses from early extinguishments of debt associated with the sales of real estate, management and investors are presented with an indicator of our operating performance that more closely achieves the objectives of the real estate industry in presenting FFO.

Neither FFO nor FFO as adjusted should be considered as an alternative to net income (determined in accordance with GAAP) as an indication of our performance. Neither FFO nor FFO as adjusted represents cash generated from operating activities determined in accordance with GAAP, and neither is a measure of liquidity or an indicator of our ability to make cash distributions. We believe that to further understand our performance, FFO and FFO as adjusted should be compared with our reported net income and considered in addition to cash flows in accordance with GAAP, as presented in our consolidated financial statements.

FFO falls within the definition of "non-GAAP financial measure" set forth in Regulation S-K and as a result the Company is required to include in this report a statement disclosing the reasons why management believes that presentation of this measure provides useful information to investors. Management believes that in order to facilitate a clear understanding of the combined historical operating results of the Company, FFO should be considered in conjunction with net income as presented in the consolidated financial statements included elsewhere herein. Management believes that by excluding gains or losses related to dispositions of property and excluding real estate depreciation (which can vary among owners of similar assets in similar condition based on historical cost accounting and useful life estimates), FFO can help one compare the operating performance of a company's real estate between periods or as compared to different companies. The Company also uses this measure to compare its performance to that of its peer group. FFO does not represent cash generated from operating activities in accordance with generally accepted accounting principles and is not necessarily indicative of cash available to fund cash needs. FFO should not be considered as an alternative to net income as an indication of the Company's performance or to cash flow as a measure of liquidity.

(3) (continued)

The following table sets forth the calculation of FFO for the previous five years, beginning with "net income available to common shareholders" from the Company's audited financial statements prepared in accordance with GAAP:

	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2005</u>	<u>2004</u>

FFO as adjusted by the Company per share diluted ^(a)	<u>\$ 3.57</u>	<u>\$ 3.20</u>	<u>\$ 3.07</u>	<u>\$ 2.84</u>	<u>\$ 2.54</u>

(a) The calculation of FFO and FFO per share assumes the conversion of dilutive common stock equivalents and convertible preferred stock. Therefore, the convertible preferred dividends are added to FFO, and the common stock equivalent is included in both the basic and diluted weighted average common shares/units outstanding. The convertible preferred stock had an anti-dilutive effect in 2004 on the per-share calculation; therefore, the convertible preferred dividends of \$2,194 are not included in FFO for the 2004 diluted calculation. The weighted average common shares/units outstanding assumes conversion of all UPREIT Units to common shares. The diluted shares/units for the year ended December 31, 2004 used for Diluted FFO are 49,910.5 instead of the regular diluted shares/units of 49,077.1.

(b) Includes amounts passed through from unconsolidated investments.

All REITs may not be using the same definition for FFO. Accordingly, the above presentation may not be comparable to other similarly titled measures of FFO of other REITs.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to facilitate an understanding of the Company's business and results of operations. It should be read in conjunction with the Consolidated Financial Statements, the accompanying Notes to Consolidated Financial Statements and the selected financial data included elsewhere in this Form 10-K. This Form 10-K, including the following discussion, contains forward-looking statements regarding future events or trends as described more fully under "Forward-Looking Statements" on page 56. Actual results could differ materially from those projected in such statements as a result of the risk factors described in Item 1A, "Risk Factors," of this Form 10-K.

The Company is engaged in the ownership, management, acquisition, rehabilitation and development of residential apartment communities primarily in selected Northeast, Mid-Atlantic and Southeast Florida markets. As of December 31, 2008, the Company operated 112 apartment communities with 38,280 apartments. Of this total, the Company owned 110 communities, consisting of 37,130 apartments, managed as general partner one partnership that owned 868 apartments, and fee managed one property with 282 apartments for a third party.

Executive Summary

The Company operated during 2008 in a declining economic environment. For historical reference, from 2004 through 2007, both the Company's markets and the country as a whole experienced positive job growth; 1.0%, 1.1%, 1.2% and 1.0% for the Company, and 1.7%, 1.5%, 1.7% and 0.9% for the country, respectively. An increase in job growth leads to household formations, which creates an increase in demand for rental housing. In addition, during 2006 and continuing through 2008, the rising home mortgage interest rates and subsequent sub-prime lending crisis issues made it more difficult for residents who may have considered purchasing a home. After years of home ownership being the number one reason our residents gave for moving out of our apartment communities, it dropped to number two in 2007 and number three in 2008. In the three-year period from 2004 to 2006, home purchases represented, on average, over 19% of our move-outs. In 2007 and 2008, we experienced the first significant drop in years, with move out for home purchase declining to 15.5% and 12.0%, respectively. Continued uncertainty in the mortgage lending industry could push this level down further, which could positively affect our turnover rates, rental rates and occupancy, which all will all be challenged in 2009 as the recessionary environment continues. As referenced in our Market Demographics table on Page 11 of this report, job growth for our markets declined in 2008 with 1.2% negative growth over 2007, after four years of approximately 1.1% positive job growth in 2004 through 2007. As there is usually a lag between job loss and its effect on household formation, this decline did not create a measurable decreased demand for our apartments until very late in 2008. This reduced demand will put pressure on our ability in 2009 to raise rents and maintain occupancy.

The reason for using rent concessions, and the ultimate level of those concessions, has been consistent the last few years, with concessions in 2006 and 2007 at just slightly over 90 basis points. During late 2007, the Company started converting to a new property management operating system ("MRI") that wasn't fully rolled out until late spring 2008. The Company implemented a Lease Rent Options ("LRO") program that no longer uses concessions to set market rents. Concessions continued in the legacy operating system but were phased out during the year upon converting properties to the new program. Under the new program rents are set to market daily, based on apartment availability, local supply of and demand for units, and pricing. Therefore, concessions dropped considerably in 2008 to 37 basis points of rent potential. Rent concessions are still used, but sparingly, in specific locations for specific units. For comparison, rent concessions were only 15 basis points for the fourth quarter of 2008.

The Company owned 102 communities with 34,560 apartment units throughout 2007 and 2008 where comparable operating results are available for the years presented (the "2008 Core Properties"). Occupancies at the 2008 Core Properties increased slightly, by 20 basis points, from 94.8% to 95.0%. Occupancies in the fourth quarter of 2008 averaged 94.9%, compared to 94.6% a year ago. Including bad debt in the calculation to arrive at economic occupancy, this metric decreased slightly, from 93.9% in 2007 to 93.7% in 2008. The level of bad debt increased in 2008 to 125 basis points compared to 84 basis points in 2007. The Company has taken measures to reduce this level by taking a more active role in the collection of receivables instead of relying on third party providers. The addition of utility reimbursements for residents has increased receivables, which along with the recession, has put pressure on our ability to limit bad debts to historical levels. For 2009, we are projecting bad debts to be just over 130 basis points of rent potential.

The Company uses a measurement referred to as Available to Rent, or ATR. This is a leading indicator of future occupancy rates and refers to units which will be available for rent, based upon leases signed or termination notices received relating to future move in/move out dates. As of the middle of February, 2009, our ATR was 6.8%, compared to the same time period a year ago when ATR was 6.1%. This suggests that occupancy could decline as we expect to have more units available to rent in the near future. For 2009, we are projecting physical occupancy averaging 0.6% below 2008.

Total Core Properties rental revenue growth for 2008 was projected to be 3.3%, consisting of 3.1% in rental rate growth and 0.2% in economic occupancy improvement. Actual results were 2.7% in rental rate growth, and 0.2% decrease in economic occupancy, resulting in 2.5% total rental revenue growth, or 80 basis points lower than guidance. It is difficult to compare rental growth without including the utility recovery revenue which is classified as property other income. The Company recorded \$20.2 million of recovery revenue in 2008 versus \$17.4 million in 2007. Actual results, including utility recovery revenue, were 3.3% in rental rate growth and 0.2% decrease in economic occupancy, totaling 3.1% total rental revenue growth including utility recovery income.

The guidance for 2009 Core Properties (apartment units owned throughout 2008 and 2009, the "2009 Core Properties") revenue growth is 1.6%. Rental rates are projected to increase 2.3%, including above-average rental increases at certain communities resulting from continued efforts to upgrade the properties. Economic occupancies are expected to decrease 0.9% for the year, such that rental revenues are projected to increase 1.4%. Property other income is expected to rise year over year, increasing the 1.4% rental revenue growth to 1.6% total revenue growth. Driving the property other income growth is a \$1.2 million increase from utility recovery income.

Expenses for 2009 Core Properties are projected to increase 3.5%. See below under "Results of Operations" for more details on expense comparisons.

These revenue and expense projections result in 2009 Core Properties net operating income ("NOI") growth of 0.3% at the mid-point of 2009 guidance. Markets where the Company expects above average NOI growth include: Washington, D.C. 1.7%; New York City Metro area 1.1%; and Baltimore 0.4%. Markets with below average expectations include: Philadelphia -0.5%; Maine -1.2%; Chicago -1.5%; Boston -2.8%; and Florida -5.0%. Certain historical demographic information for these markets may be found in the tables on Pages 11 and 12 of this report.

Of the two items comprising NOI, revenue and operating expenses, the revenue component is likely to be more volatile. It is difficult to predict how much worse the present economy could become or when the ultimate recovery will commence, factors in determining job growth (loss) and housing demand. A worsening economic recession could put pressure on the Company's ability to reach the mid-point of guidance. An economic recovery sooner than anticipated could allow the Company to achieve results above the mid-point of guidance. The Company has given FFO guidance for 2009 with a range of \$3.04 to \$3.28 per share.

The Company has anticipated no new acquisitions in its budget for 2009. The Company is committed to a disciplined approach to acquisitions, and with rising cap rates and lack of confidence in underwriting positive NOI growth, coupled with a difficult credit market, we believe that this is a time to conserve capital, keep our powder dry, and wait for a better day to continue our long-term growth strategy. The Company is also targeting \$110 million in dispositions from properties that have reached their potential.

During 2009, the Company will target leverage of approximately 53.5% (equal to the level at year end 2008) of debt-to-total market capitalization (calculated using NAV to estimate equity value) in order to meet the goals described above.

Results of Operations (dollars in thousands, except unit and per unit data)

Comparison of year ended December 31, 2008 to year ended December 31, 2007.

The Company owned 102 communities with 34,560 apartment units throughout 2007 and 2008 where comparable operating results are available for the years presented (the "2008 Core Properties"). For the year ended December 31, 2008, the 2008 Core Properties showed an increase in total revenues of 3.4% and a net operating income increase of 3.3% over the 2007 period. Property level operating expenses increased 3.6%. Average physical occupancy for the 2008 Core Properties increased from 94.8% to 95.0%, with average monthly rental rates increasing 2.7% to \$1,135 per apartment unit.

A summary of the 2008 Core Properties NOI is as follows:

	<u>2008</u>	<u>2007</u>	<u>\$ Change</u>	<u>% Change</u>
Rent	\$ 441,266	\$ 430,377	\$ 10,889	2.5%

Net operating income ("NOI") may fall within the definition of "non-GAAP financial measure" set forth in Item 10(e) of Regulation S-K and, as a result, the Company may be required to include in this report a statement disclosing the reasons why management believes that presentation of this measure provides useful information to investors. The Company believes that NOI is helpful to investors as a supplemental measure of the operating performance of a real estate company because it is a direct measure of the actual operating results of the Company's apartment communities. In addition, the apartment communities are valued and sold in the market by using a multiple of NOI. The Company also uses this measure to compare its performance to that of its peer group.

During 2008, the Company acquired and developed a total of 861 apartment units in three communities (the "2008 Acquisition Communities"). In addition, the Company experienced full-year results for the 1,709 apartment units in six apartment communities (the "2007 Acquisition Communities") acquired and developed during 2007. The inclusion of these acquired and developed communities generally accounted for the significant changes in operating results for the year ended December 31, 2008. In addition, the reported income from operations include the consolidated results of one investment where the Company is the managing general partner that has been determined to be a Variable Interest Entity ("VIE").

A summary of the NOI from continuing operations for the Company as a whole is as follows:

	<u>2008</u>	<u>2007</u>	<u>\$ Change</u>	<u>% Change</u>
Rent	\$ 466,620	\$ 448,919	\$ 17,701	3.9%

During 2008, the Company disposed of fifteen properties in six transactions with a total of 1,227 units, which had partial results for 2008 and full year results for 2007 (the "2008 Disposed Communities"). During 2007, the Company disposed of five properties with a total of 1,084 units, which had partial results for 2007 and full year results for 2006 (the "2007 Disposed Communities"). The results of these disposed properties have been reflected in discontinued operations and are not included in the table above.

For the year ended December 31, 2008, income from operations (income before minority interest, and discontinued operations) increased by \$8,763 when compared to the year ended December 31, 2007. The increase was primarily attributable to the following factors: an increase in rental income of \$17,701, an increase in property other income of \$6,140, and a gain on early extinguishment of debt of \$13,884. These changes were partially offset by a decrease in interest and other income of \$2,521, an increase in operating and maintenance expense of \$11,379, an increase in general and administrative expense of \$2,078, an increase in interest expense of \$1,001, an increase in depreciation and amortization of \$7,983, and an impairment of assets held as general partner of \$4,000. Each of the items are described in more detail below.

Of the \$20,841 increase in rental income including utility recoveries, \$5,003 is attributable to the 2007 Acquisition Communities, \$2,137 is attributable to the 2008 Acquisition Communities partially offset by a \$25 decrease attributable to the consolidation of the VIE. The balance of \$13,726 relates to a 3.1% increase from the 2008 Core Properties due primarily to an increase of 2.7% in weighted average rental rates, accompanied by a decrease in economic occupancy from 93.9% to 93.7%, resulting in 2.5% rental growth before utility recovery revenue. Included in the Core increase is \$2,837 which represents increased utility recovery revenue compared to 2007 attributable to the Company's water & sewer, heat, and electric recovery programs, which were initiated in the second quarter of 2005 and phased in through the early part of the third quarter of 2007.

In the current economic environment, it is very difficult to project rental rate and occupancy results. The Company has provided guidance for 2009, which, at the mid-point of the range, anticipates 2009 Core Properties revenue growth of 1.6%, including utility recovery and above-average rental increases from the continued efforts to upgrade the properties. Physical occupancy levels are expected to decline from the level at the end of the fourth quarter of 2008, producing an expected average for 2009 Core Properties of 94.3%, 60 basis points lower than all of 2008. In addition, bad debts are expected to increase with the result of decreasing rental revenue growth by 30 basis points.

The remaining property other income, which consists primarily of income from operation of laundry facilities, late charges, administrative fees, garage and carport rentals, revenue from corporate apartments, cable revenue, pet charges, and miscellaneous charges to residents, increased in 2008 by \$3,000. Of this increase, \$330 is attributable to the 2007 Acquisition Communities and \$572 is attributable to the 2008 Acquisition Communities; partially offset by a \$47 decrease attributable to the VIE. The balance of \$2,145 relates to an 11.7% increase from the 2008 Core Properties resulting from increased emphasis on charging early termination fees and late charges as compared to 2007.

Interest income decreased \$1,797 due to a lower level of invested excess cash on hand. The 2007 period realized higher interest income from proceeds of the fourth quarter 2006 and third and fourth quarter 2007 property dispositions and proceeds from exchangeable senior notes awaiting reinvestment into replacement and development property.

Other income, which is comprised of management and other real estate service fees recognized by the Company, decreased by \$724, primarily due to a \$612 reduction in post closing consultation fees recognized between periods. The first half of 2007 realized higher fees as a result of the significant fourth quarter 2006 property dispositions.

Of the \$11,379 increase in operating and maintenance expenses, \$3,023 is attributable to the 2007 Acquisition Communities, \$699 is attributable to the 2008 Acquisition Communities and a \$752 increase attributable to the consolidation of the VIE reflecting an increase in repairs & maintenance that occurred in 2008. The balance for the 2008 Core Properties, a \$6,905 increase in operating expenses or 3.6%, is primarily a result of increases in repairs and maintenance, property insurance and real estate taxes. These increases were offset in part by reductions in gas heating and snow removal costs.

The breakdown of operating and maintenance costs for the 2008 Core Properties by line item is listed below:

	<u>2008</u>	<u>2007</u>	<u>\$ Variance</u>	<u>% Variance</u>
Electricity	\$ 8,427	\$ 7,988	\$ (439)	(5.5%)

Natural gas heating costs were down \$944, or 4.7%, from a year ago, due mostly from decreases in natural gas pricing as a direct result of the Company's natural gas purchasing program. For 2008, our natural gas weighted average cost was \$8.36 per decatherm compared to \$8.89 for the 2007 period, a 6.0% decrease. The savings on the commodity was partially offset by a slight increase in consumption during 2008.

As of January 31, 2009, the Company had fixed-price contracts covering approximately 95.3% of its natural gas exposure for the balance of the 2008/2009 heating season. Risk is further diversified by staggering contract term expirations. For the balance of the 2008/2009 heating season, the Company estimates the average price per decatherm will be approximately \$8.42. For calendar year 2009, where the Company has coverage for 85% of its exposure, the Company's negotiated average price per decatherm was approximately \$8.29, with an all-in weighted expectation of \$7.87 including an estimate for the 15% variable portion. The Company has provided guidance for 2009 which anticipates a 7.5% increase in natural gas heating costs. This is based on the thirty-year average for the number of degrees days for 2009. Even though the cost per decatherm is expected to go down slightly, usage is expected to increase to normal levels as the first quarter of 2008 was unseasonably mild. For guidance, the portion of the calendar year not covered by fixed price contracts (15%) is assumed to be priced at a level that reflects twelve month strip pricing as of January, 2009.

Water & sewer costs were up \$416, or 3.2% from a year ago due primarily to two properties realizing refunds of \$223 during 2007 relating to the correction of metering issues that did not reoccur in 2008 with the balance of the increase, \$193, or 1.5%, attributable to general cost increases being assessed by local municipalities; however, the water & sewer recovery program, which became fully phased in during 2006, enables the Company to recapture much of these cost increases from our residents. The guidance for 2009 reflects an increase of 2.9%.

Repairs & maintenance expenses were up \$2,063, or 7.6%, primarily due to the 2007 period including \$602 more in recoveries from insurance claims. Without the impacts of these insurance recoveries, the recurring repairs & maintenance expenses increased \$1,461, or 5.4%, mostly in contract repairs and cleaning. The Company has provided guidance for 2009 which anticipates a 5.8% increase in repairs and maintenance.

Personnel expenses were up \$876 or 2.0% over 2007. Of the increase, \$798 is reflective of changes in health and workers compensation reserves between periods. In 2007, reserves were increased by \$779 as compared to 2008, where we were able to decrease these reserves by \$19. The swing in the reserves between periods reflects the variable nature of health and workers compensation claims. The balance of the increase in personnel costs after reserve changes was \$1,674, or 3.9%, which includes a 2.7% salary and wage increase between periods. The guidance for 2009 reflects an increase of 3.9%.

Advertising expenses were down \$226, or 5.0% in 2008 and is reflective of the resident marketing program which places less emphasis and spending on print media and more focus on referrals and internet based methods which have resulted in a 10% increase in traffic in 2008 as compared to 2007.

Legal & professional expenses were up \$385, or 27.9%, primarily due to a specific reserve for pending litigation.

Property insurance costs increased \$1,864, or 18.4%, primarily attributed to a change in how the Company is exposed to the self-insurance portion of the November 1, 2008 policy renewal. Historically, we had a \$250 deductible per occurrence, so we were responsible for the first \$250 on a large fire loss. For the new policy year, we are responsible for an aggregate retention amount of \$2,250 for all losses before a smaller deductible of \$100 on each occurrence thereafter. In looking at the year from an actuarial perspective, the new pricing should produce similar results over the 12-month policy period, but could produce volatility for the year. Less than two months into the policy period, we suffered a \$1,300 loss from a large fire on Christmas night, or almost 60% of the aggregate retention for the year. As we are 100% responsible for this loss, the entire \$1,300 loss was recognized in December, 2008. During 2009, we expect this volatility to reverse out as we use up the retention and kick into a smaller deductible. The guidance for 2009 reflects a decrease of 14.7% in insurance expense.

Real estate taxes were up \$2,199, or 5.2%. The contributing factor was \$1,081 in refunds received in 2007 from successful tax assessment appeals compared to \$590 in the 2008 period. Without the impact of refunds, recurring taxes were up \$1,708, or 4.0%. The Company expects real estate taxes to increase 7.3% in 2009 as additional assessment reductions are not anticipated, although the Company will continue initiatives to challenge assessments and obtain cost reductions.

Snow removal costs were down \$377, or 34.2%. The year 2007 produced above normal snowfalls compared to below normal snowfalls in 2008. Snow removal costs are anticipated to increase to normal levels in 2009, and the guidance reflects a 7.0% increase

Trash removal costs were up \$473, or 16.3%, driven by higher costs, including fuel surcharges, being passed through to the Company by trash haulers.

The operating expense ratio (the ratio of operating and maintenance expense compared to rental and property other income) for the 2008 Core Properties was 41.6% for both 2008 and 2007. The consistent performance resulted from the 3.4% increase in total revenue achieved through ongoing efforts to upgrade and reposition properties for maximum potential and a full year impact of the Company's roll out of its heating cost recovery program, which began in 2005; partially offset by the 3.6% increase in operating and maintenance expense. In general, the Company's operating expense ratio is higher than that experienced in other parts of the country due to relatively high real estate taxes and heating costs in its markets.

General and administrative expenses ("G&A") increased in 2008 by \$2,078 or 8.9% from \$23,413 in 2007 to \$25,491 in 2008. G&A as a percentage of total revenues (including discontinued operations and gain on early extinguishment of debt) were 4.8% for 2008 as compared to 4.6% for 2007. If not for \$520 in one-time uncompleted transaction costs expensed in the third quarter of 2007, the G&A as a percentage of total revenues would have been 4.5% in 2007. Stock-based compensation expenses were up \$1,016 in 2008 as compared to 2007. The 2008 stock plan contained vesting conditions that triggered a \$388 increase in director restricted stock compensation recognized in the second quarter of 2008 as compared to the terms in the prior plans. It is important to note that this is a timing difference only and that the total value of the stock awards was similar between years. Also, the change in estimated forfeitures from the 2003 grant year added \$195 more expense in the current period. Incentive bonus expense was up \$835 in 2008 as compared to 2007, which was driven by the increases in the Company's operating performance and increases in base salaries as compared to prior year. The rollout, training and support of the new property management systems accounted for staff and consulting increases of \$328 within the information systems department. Additionally, the ramp-up of the development department accounted for a \$285 increase. A decrease of \$312, or 21.0%, was realized in the external costs incurred for auditing, tax and consultation expense, including costs to comply with Section 404 of Sarbanes-Oxley. The Company has provided guidance for 2009 which anticipates a 5.5% decrease in G&A, generally from reduced incentive compensation associated with expectations of reduced earnings and other areas where the Company has identified expense reductions.

Interest expense increased by \$1,001 in 2008 primarily as a result of a full year of interest expense for the 2007 Acquisition Communities, increased borrowings on the line of credit and the increased borrowings for the 2008 Acquisition Communities, partially offset by capitalized interest, which was \$2,031 higher due to increased development levels in 2008 as compared to 2007. In addition, amortization from deferred charges relating to the financing of properties totaled \$2,989 and \$2,929, and was included in interest expense for 2008 and 2007, respectively.

Depreciation and amortization expense increased \$7,983 due to the incremental depreciation on the capital expenditures for additions and improvements to the Core Properties in 2008 and 2007 of \$94,003 and \$79,593, respectively; a full year of depreciation expense for the 2007 Acquisition Communities as well as the additional depreciation expense on the 2008 Acquisition Communities.

In the fourth quarter of 2008, the Company made a formal decision to pursue the sale of its general partnership interest in its VIE. This decision, and the resulting shortened holding period, resulted in a re-valuation of the underlying real estate and goodwill of the partnership. The Company performed a valuation analysis on the underlying real estate, and as a result, recorded a \$4,000 impairment charge to reduce its long-term asset's net book value to fair market value including a \$394 impairment charge to write off the goodwill associated with the management contract.

During October and November 2008, the Company repurchased and retired \$60,000 face value of its exchangeable senior notes for \$45,360, in several privately-negotiated transactions resulting in a gain on early extinguishment of debt of \$13,884, after the write off of \$756 unamortized debt issuance costs.

Minority interest increased \$3,632 as a direct result of the gain on early extinguishment of debt, plus an increase in the minority interest percentage over the prior year.

Included in discontinued operations for 2008 are the operating results, net of minority interest, of the 2008 Disposed Communities. Included in discontinued operations for 2007 are the operating results, net of minority interest, of the 2008 and 2007 Disposed Communities. For purposes of the discontinued operations presentation, the Company only includes interest expense and losses from early extinguishment of debt associated with specific mortgage indebtedness of the properties that are sold or held for sale.

Included in the \$36,572 gain on disposition of property reported for 2008 is the sale of fifteen apartment communities where the Company recorded a combined gross gain on sale of \$51,559, net of minority interest of \$14,987.

Included in the \$30,077 gain on disposition of property reported for 2007 is the sale of five apartment communities where the Company has recorded a combined gross gain on sale of \$42,126, net of minority interest of \$12,049.

Net income increased \$8,122 primarily due to the gain of early extinguishment of debt and an increase in gain on sale of discontinued operations of \$6,495 in 2008 compared to 2007; partially offset by \$5,121 lower income from continuing operations before gain on early extinguishment of debt and minority interest, and \$3,504 lower income from discontinued operations in 2008 compared to 2007.

Comparison of year ended December 31, 2007 to year ended December 31, 2006.

The Company owned 93 communities with 31,373 apartment units throughout 2006 and 2007 where comparable operating results are available for the years presented (the "2007 Core Properties"). For the year ended December 31, 2007, the 2007 Core Properties showed an increase in total revenues of 4.1% and a net operating income increase of 5.2% over the 2006 period. Property level operating expenses increased 2.6%. Average physical occupancy for the 2007 Core Properties increased from 94.7% to 94.8%, with average monthly rental rates increasing 2.5% to \$1,100 per apartment unit.

A summary of the 2007 Core Properties NOI is as follows:

	<u>2007</u>	<u>2006</u>	<u>\$ Change</u>	<u>% Change</u>
Rent	\$ 389,188	\$ 379,913	\$ 9,275	2.4%

During 2007, the Company acquired and developed a total of 1,625 apartment units in six communities (the "2007 Acquisition Communities"). In addition, the Company experienced full-year results for the 3,271 apartment units in ten apartment communities (the "2006 Acquisition Communities") acquired and developed during 2006. The inclusion of these acquired and developed communities generally accounted for the significant changes in operating results for the year ended December 31, 2007. In addition, the reported income from operations include the consolidated results of one investment where the Company is the managing general partner that has been determined to be a VIE.

A summary of the NOI from continuing operations for the Company as a whole is as follows:

	<u>2007</u>	<u>2006</u>	<u>\$ Change</u>	<u>% Change</u>
Rent	\$ 448,919	\$ 392,892	\$ 56,027	14.3%

During 2007, the Company disposed of five properties with a total of 1,084 units, which had partial results for 2007 and full year results for 2006 (the "2007 Disposed Communities"). During 2006, the Company disposed of 39 properties with a total of 9,705 units, which had partial results for 2006 and full year results for 2005 (the "2006 Disposed Communities"). The results of these disposed properties have been reflected in discontinued operations and are not included in the table above.

For the year ended December 31, 2007, income from operations (income before minority interest, and discontinued operations) increased by \$6,109 when compared to the year ended December 31, 2006. The increase was primarily attributable to the following factors: an increase in rental income of \$56,027 and an increase in property other income of \$10,684. These changes were partially offset by a decrease in interest and other income of \$2,142, an increase in operating and maintenance expense of \$25,767, an increase in general and administrative expense of \$787, an increase in interest expense of \$14,688, and an increase in depreciation and amortization of \$17,218. Each of the items are described in more detail below.

Of the \$65,127 increase in rental income including utility recoveries, \$34,671 is attributable to the 2006 Acquisition Communities, \$13,527 is attributable to the 2007 Acquisition Communities partially offset by a \$104 decrease attributable to the consolidation of the VIE. The balance of \$17,033 relates to a 4.4% increase from the 2007 Core Properties due primarily to an increase of 2.5% in weighted average rental rates, accompanied by a decrease in average economic occupancy from 94.0% to 93.9%, resulting in 2.4% rental growth before utility recovery revenue. Included in the Core increase is \$7,758 which represents increased utility recovery revenue compared to 2006 attributable to the Company's water & sewer, heat, and electric recovery programs, which were initiated in the second quarter of 2005 and phased in through the early part of the third quarter of 2007.

The remaining property other income, which consists primarily of income from operation of laundry facilities, late charges, administrative fees, garage and carport rentals, revenue from corporate apartments, cable revenue, pet charges, and miscellaneous charges to residents, increased in 2007 by \$1,584. Of this increase, \$1,314 is attributable to the 2006 Acquisition Communities, \$667 is attributable to the 2007 Acquisition Communities and partially offset by a \$377 decrease in the 2007 Core Properties and an \$20 decrease attributable to the VIE. The decrease in the 2007 Core Properties is due to a reduction of corporate apartment revenue.

Interest income increased \$202 due to a higher level of invested excess cash on hand available from sale proceeds of the 2006 Disposed Communities and proceeds from exchangeable senior notes awaiting reinvestment into replacement property, both occurring in the first quarter of 2007; plus sale proceeds of the 2007 Disposed Communities occurring in the third and fourth quarters of 2007.

Other income, which primarily reflects management and other real estate service fees recognized by the Company, decreased by \$2,344. This is primarily due to a reduction in management fee income resulting from the acquisition of Mount Vernon Square at the end of 2006, which was previously being managed by the Company and a decrease in post closing consultation fees earned in connection with the significant second and fourth quarter 2006 property dispositions.

Of the \$25,767 increase in operating and maintenance expenses, \$14,334 is attributable to the 2006 Acquisition Communities, \$6,825 is attributable to the 2007 Acquisition Communities and a \$179 increase attributable to the consolidation of the VIE. The balance for the 2007 Core Properties, a \$4,429 increase in operating expenses or 2.6%, is primarily a result of increases in personnel, property insurance, real estate taxes, water & sewer and snow removal costs. These increases were offset in part by reductions in repairs & maintenance and gas heating costs.

The breakdown of operating and maintenance costs for the 2007 Core Properties by line item is listed below:

	<u>2007</u>	<u>2006</u>	<u>\$ Variance</u>	<u>% Variance</u>
Electricity	\$ 7,150	\$ 6,869	\$ (281)	(4.1%)
Gas	18,744	19,212	468	2.4%
Water & sewer	11,698	11,190	(508)	(4.5%)
Repairs & maintenance	24,424	26,141	1,717	6.6%
Personnel expense	38,548	35,423	(3,125)	(8.8%)
Advertising	4,066	3,980	(86)	(2.2%)
Legal & professional	1,330	1,203	(127)	(10.6%)
Office & telephone	5,055	5,212	157	3.0%
Property insurance	8,604	6,848	(1,756)	(25.6%)
Real estate taxes	39,311	38,301	(1,010)	(2.6%)
Snow	896	529	(367)	(69.4%)
Trash	2,659	2,432	(227)	(9.3%)
Property management G&A	<u>13,184</u>	<u>13,900</u>	<u>716</u>	<u>5.2%</u>
Total	<u>\$ 175,669</u>	<u>\$ 171,240</u>	<u>\$ (4,429)</u>	<u>(2.6%)</u>

Natural gas heating costs were down \$468, or 2.4%, primarily as a result of having fixed contracts for our natural gas usage at a lower cost than last year. For 2007, we had fixed contracts for 93% of our natural gas usage at a weighted average cost of \$8.94 per decatherm. The cost for 2006 was \$9.29 per decatherm, or 3.9% higher than experienced in 2007. The savings on the commodity coupled with savings realized through a full year impact of conservation measures implemented during 2006 were partially offset by a slight increase in consumption during 2007, as the 2006 period included above average temperatures and the 2007 heating season was closer to the thirty-year average for degree days.

Water & sewer costs were up \$508, or 4.5% from a year ago due to general cost increases being assessed by local municipalities; however, the water & sewer recovery program, which became fully phased in during 2006, enables the Company to recapture much of these cost increases from our residents.

The decrease in repairs and maintenance of \$1,717, or 6.6% is mainly attributed to non-recurring \$1,302 reductions in 2007 due to cost reimbursements from fire losses. After factoring the fire reimbursement, the 2007 decrease was only \$415, or 1.6%, which is due in part to two large properties that were acquired in late 2005 that required significant work in the early part of 2006 to bring them up to Company standards. This was not repeated in 2007.

Personnel expenses were up \$3,125 or 8.8% over 2006. Of the increase, \$1,383 is reflective of changes in health and workers compensation expense between periods. In 2007, reserves were increased by \$385 as compared to 2006, where we were able to decrease these reserves by \$998. The swing in the reserves between periods reflects the variable nature of health and workers compensation claims. The balance of the increase in personnel costs after reserve changes was \$1,742, or 4.9%, which includes a 3.1% salary and wage increase between periods.

The normal increase of property insurance costs was \$2,159 or 31.5%, which is due to a general increase in our property and general liability insurance coverage's. Insurance costs have continued to climb due to catastrophe rate increases and higher reinsurance rates. The coverage increases were partially offset by \$403 lower self-insurance reserve increases in 2007 over 2006, resulting in a net increase of \$1,756, or 25.6% over 2006.

Real estate taxes were up \$1,010, or 2.6%. The contributing factor was \$555 in refunds received in 2006 from successful tax assessment appeals which did not occur in the 2007 period. Without the impact of refunds, taxes would have been up only \$455, or 1.2%, which reflects continued efforts in 2007 to reduce assessments.

Snow removal costs were up \$367 or 69.4%. The year 2006 produced below normal snowfalls compared to above normal snowfalls in 2007.

The operating expense ratio (the ratio of operating and maintenance expense compared to rental and property other income) for the 2007 Core Properties was 41.6% and 42.2% for 2007 and 2006, respectively. This 0.6% decrease resulted from the 4.1% increase in total revenue achieved through ongoing efforts to upgrade and reposition properties for maximum potential and a full year impact of the Company's roll out of its heating cost recovery program, which began in 2006; partially offset by the 2.6% increase in operating and maintenance expense. In general, the Company's operating expense ratio is higher than that experienced in other parts of the country due to relatively high real estate taxes and heating costs in its markets.

General and administrative expenses ("G&A") increased in 2007 by \$787 or 3.5% from \$22,626 in 2006 to \$23,413 in 2007. G&A as a percentage of total revenues (including discontinued operations) were 4.6% for 2007 as compared to 4.4% for 2006. If not for \$520 in one-time uncompleted transaction costs expensed in the third quarter of 2007, the G&A as a percentage of total revenues would have been 4.5% in 2007. Additionally, the ramp-up of the development department accounted for a \$453 increase. A decrease of \$264, or 15.1%, was realized in the external costs incurred for auditing, tax and consultation expense, including costs to comply with Section 404 of Sarbanes-Oxley.

Interest expense increased in 2007 by \$14,688 as a result of a full year of interest expense for the 2006 Acquisition Communities, interest expense on the exchangeable senior notes and the increased borrowings in connection with the acquisition of the 2007 Acquisition Communities partially offset by lower interest on the line of credit, and a \$2,354 increase in interest capitalized in connection with development activities. In addition, amortization from deferred charges relating to the financing of properties totaled \$2,929 and \$2,389, and was included in interest expense for 2007 and 2006, respectively.

Depreciation and amortization expense increased \$17,218 due to the additional depreciation expense on the 2007 Acquisition Communities and a full year of depreciation expense for the 2006 Acquisition Communities, as well as the incremental depreciation on the capital expenditures for additions and improvements to the Core Properties in 2007 and 2006 of \$69,406 and \$69,861, respectively.

Minority interest increased \$2,144 as a direct result of the increase in income from operations, plus an increase in the minority interest percentage over the prior year.

Included in discontinued operations for 2007 are the operating results, net of minority interest, of the 2008 and 2007 Disposed Communities. Included in discontinued operations for 2006 are the operating results, net of minority interest, of the 2008, 2007 and 2006 Disposed Communities. For purposes of the discontinued operations presentation, the Company only includes interest expense and losses from early extinguishment of debt associated with specific mortgage indebtedness of the properties that are sold or held for sale.

Included in the \$30,077 gain on disposition of property reported for the year 2007 is the sale of five apartment communities where the Company has recorded a combined gross gain on sale of \$42,126, net of minority interest of \$12,049.

Included in the \$78,748 net gain on disposition of property for 2006 is the sale of 39 apartment communities where the Company recorded a combined gross gain on sale of \$110,514, net of minority interest of \$31,766.

Net income decreased \$48,941 primarily due to the decrease in gain on sale of discontinued operations of \$48,671 and a decrease of \$4,235 in the income from discontinued operations in 2007 compared to 2006; partially offset by \$3,965 higher income from continuing operations in 2007 compared to 2006.

Liquidity and Capital Resources

The Company's principal liquidity demands are expected to be distributions to the common stockholders and holders of UPREIT Units, capital improvements and repairs and maintenance for the properties, acquisition and development of additional properties, debt repayments and stock repurchases. The Company may also acquire equity ownership in other public or private companies that own and manage portfolios of apartment communities. Management does not anticipate the acquisition of communities in 2009.

The Company intends to meet its short-term liquidity requirements through net cash flows provided by operating activities and its existing bank line of credit, described below. The Company considers its ability to generate cash to be adequate to meet all operating requirements, including availability to pay dividends to its stockholders and make distributions to its Unit holders in accordance with the provisions of the Internal Revenue Code, as amended, applicable to REITs.

As of December 31, 2008, the Company had an unsecured line of credit agreement with M&T Bank of \$140 million which expires September 1, 2009. The Company has had no occurrences of default through December 31, 2008. The Company had \$71 million outstanding under the credit facility and \$7.4 million outstanding in letters of credit on December 31, 2008. Borrowings under the line of credit bear interest at 0.75% over the one-month LIBOR rate of 0.44% at December 31, 2008. Accordingly, increases in interest rates will increase the Company's interest expense and as a result will affect the Company's results of operations and financial condition.

The Company has been very successful in increasing the percentage of unencumbered assets of the total property pool. At the end of 2007, unencumbered assets were 16% of the property portfolio. At the end of 2008, this had grown to 19%, comprising 23 owned properties with 6,812 apartment units which were unencumbered by debt. This higher level adds flexibility as the unencumbered pool is estimated at year-end 2008 to support unsecured borrowing in excess of a half billion dollars, compared to outstanding unsecured debt at year-end 2008 of \$211 million.

To the extent that the Company does not satisfy its long-term liquidity requirements through net cash flows provided by operating activities and its unsecured credit facility, it intends to satisfy such requirements through property debt financing, proceeds from the sale of properties, the issuance of UPREIT Units, proceeds from its Dividend Reinvestment and Direct Stock Purchase Plan ("DRIP"), or the issuance of additional debt and equity securities.

Specific to 2009, and in response to the constrictions in the credit market, the Company will be pursuing certain initiatives as follows: 1) The Company is evaluating alternatives to replace or extend the existing unsecured line of credit which matures September 1, 2009. The Company is working with its existing lead bank and discussions suggest that there is interest from banks to participate in the Company's facility. The Company anticipates it will be able to replace the entire \$140 million. Pricing will be more expensive, and may move from interest at 0.75% over the one-month LIBOR under the existing agreement possibly to a spread closer to 3.00%. In addition, up-front and on-going fees could add another 75 basis points to pricing. 2) During 2008, the Company has increased the level of the value of unencumbered properties in relationship to the total property portfolio from 16% to 19%. This higher level adds flexibility in 2009 allowing the Company to place secured financing on unencumbered assets as required. 3) The Company benefits from its multifamily focus as the Government Sponsored Enterprises ("GSEs") Fannie Mae and Freddie Mac are still very active lending to apartment owners. Underwriting has become more stringent, but the Company believes it will be able to refinance its debt maturities during this cycle of reduced liquidity. 4) The Company is in the fortunate position of having only \$19 million of secured loans maturing in 2009. For 2010 and 2011, that number rises to \$334 million and \$302 million, respectively. The Company is currently negotiating with the GSEs on forward commitments to contractually provide for a pool of loans for approximately half of these maturities. Under such commitment, rates would not be fixed today, but other criteria, including loan-to-value and debt service coverage requirements, would be agreed to in advance.

On April 4, 2007, the Company filed a Form S-3 universal shelf registration statement with the SEC that registers the issuance, from time to time, of common stock, preferred stock or debt securities. The Company may offer and sell securities issued pursuant to the universal shelf registration statement after a prospectus supplement, describing the type of security and amount being offered, is filed with the SEC.

During 2008, the Company sold 15 communities for a total sales price of \$124.5 million. A gain on sale of approximately \$51.6 million, before the allocation of minority interest, was realized from these sales. The Company was able to sell these properties at a weighted average first year capitalization rate of 6.8%.

Management has included in its operating plan that the Company will strategically dispose of assets totaling approximately \$110 million in 2009, \$68 million of which were closed during the first two months of 2009, although there can be no assurance that additional dispositions will actually occur.

During 2007, the Company sold five communities, with a total of 1,084 units, for \$129.5 million. A gain on sale of approximately \$42.1 million, before the allocation of minority interest, was realized from these sales. The weighted average first year capitalization rate projected on these dispositions was 5.9%.

The issuance of UPREIT Units for property acquisitions continues to be a source of capital for the Company. During 2007, the Company issued \$36.3 million in 634,863 UPREIT Units as partial consideration for three acquired properties. During 2008, the Company issued no UPREIT Units as partial consideration for acquired properties.

The Company's DRIP provides the stockholders of the Company an opportunity to automatically invest their cash dividends in additional shares of common stock. In addition, eligible participants may make monthly payments or other voluntary cash investments in shares of common stock. The maximum monthly investment permitted without prior Company approval is currently \$10,000. The Company meets share demand under the DRIP through share repurchases by the transfer agent in the open market on the Company's behalf or new share issuances. From December 27, 2006 through September 25, 2007, the Company met demand by issuing new shares. As of September 26, 2007, the Company switched to meeting demand through share repurchases by the transfer agent in the open market on the Company's behalf.

Management monitors the relationship between the Company's stock price and its estimated NAV. During times when the difference between these two values is small, resulting in little "dilution" of NAV by common stock issuances, the Company can choose to issue new shares. At times when the gap between NAV and stock price is greater, the Company has the flexibility to satisfy the demand for DRIP shares with stock repurchased in the open market. In addition, the Company can issue waivers to DRIP participants to provide for investments in excess of the \$10,000 maximum monthly investment. No such waivers were granted during 2007 or 2008.

In October 2006, the Company issued \$200 million of exchangeable senior notes with a coupon rate of 4.125%, which generated net proceeds of \$195.8 million. The net proceeds were used to repurchase 933,000 shares of common stock for a total of \$58 million, pay down \$70 million on the line of credit, with the balance used for redemption of the Series F Preferred Shares and property acquisitions. The exchange terms and conditions are more fully described under "Contractual Obligations and Other Commitments", below.

During the fourth quarter of 2008, the Company repurchased \$60 million of the exchangeable senior notes for \$45.4 million. A gain of \$13.9 million was recognized net of unamortized issuance costs in continuing operations.

In March 2002, the Company issued 2,400,000 shares of its 9.00% Series F Cumulative Redeemable Preferred Stock ("Series F Preferred Shares"), with a \$25.00 liquidation preference per share. This offering generated net proceeds of approximately \$58.1 million. The net proceeds were used to fund the Series B preferred stock repurchase, property acquisitions, and property upgrades. Each Series F Preferred share received an annual dividend equal to 9.00% of the liquidation preference per share (equivalent to a fixed annual amount of \$2.25 per share). The Series F Preferred Shares were redeemed by the Company on March 26, 2007 at a redemption price of \$25.00 per share, plus accrued and unpaid dividends of \$0.4 million. In accordance with the SEC's clarification of EITF Abstracts, Topic No. D-42, *The Effect on the Calculation of Earnings per Share for the Redemption or Induced Conversion of Preferred Stock*, the initial offering costs of \$1.9 million associated with the issuance of the Series F Preferred Shares were written-off in the first quarter of 2007, and are reflected as a reduction of net income available to common stockholders in determining earnings per share for the year ended December 31, 2007.

In 1997, the Company's Board of Directors approved a stock repurchase program under which the Company may repurchase shares of its common stock or UPREIT Units ("Company Program"). The shares/units may be repurchased through open market or privately negotiated transactions at the discretion of Company management. The Board's action did not establish a target stock price or a specific timetable for repurchase. At December 31, 2006, there was approval remaining to purchase 2,606,448 shares. During 2007, the Company repurchased 1,243,700 shares of its outstanding common stock at a cost of \$58.3 million at a weighted average price of \$46.86 per share. During 2008, the Company repurchased 1,071,588 shares of its outstanding common stock at a cost of \$50 million at a weighted average price of \$46.66 per share. On May 1, 2008, the Board of Directors approved an additional 2,000,000-share increase in the stock repurchase program, resulting in a remaining authorization level of 2,291,160 shares as of December 31, 2008. The Company will continue to monitor stock prices, the net asset value,

and acquisition/development alternatives to determine the current best use of capital between the two major uses of capital – stock buybacks and acquisitions/development. The 2009 guidance assumes no share repurchases.

In 2000, the Company obtained an investment grade rating from Fitch, Inc. The rating in effect at December 31, 2008 (no change from initial rating) is a corporate credit rating of "BBB" (Triple-B).

As of December 31, 2008, the weighted average rate of interest on the Company's total indebtedness of \$2.3 billion was 5.4% with staggered maturities averaging approximately six and one quarter years. Approximately 95% of total indebtedness is at fixed rates. This limits the exposure to changes in interest rates, minimizing the effect of interest rate fluctuations on the Company's results of operations and cash flows.

The Company's net cash flow from operating activities decreased from \$163 million in 2007, to \$160 million in 2008. The small decrease was principally due to improved operating performance of the 2008 Core Properties and increases in accounts payable and accrued expenses offset by increases in other assets. A \$2.5 million increase in accounts payable was due to the last check run of 2008 occurring several days earlier than in the 2007 period plus a higher level of development activity at the end of 2008 resulting in \$1.4 million higher construction retainage than in 2007, and a residential fire loss occurred at the end of 2008, which resulted in a \$1.3 million increase to the accrued insurance expense. The increase in other assets was principally due to a \$2.8 million increase in accounts receivable reflecting an increased number accrual days of utility recovery revenue in 2008 due to timing differences in the last billing between periods. The 2008 accrual period was 42 days compared to 26 days for the 2007 period. An increase of \$1.7 million in prepaid real estate taxes in 2008 is attributable to the tax due dates of the 2008 acquired properties and a 2008 refinancing which required the prepayment of the 2009 taxes before the end of 2008. The balance of the increase in other assets was due to the refinancing activities near the end of 2008 which resulted in a \$1.4 million increase in rate lock deposits over 2007; more active pre-construction activities during 2008 leading to an increase of \$0.5 million; and an increase of \$0.5 million in insured business interruption losses in 2008; all partially offset by an \$0.8 million decrease in the level of prepaid free rent, reflecting the 2008 impact of the LRO system which adjusts rental rates compared to the more prevalent 2007 practice of offering concessions as an inducement for new residents.

Cash used in investing activities was \$81 million during 2008 compared to \$88 million for 2007. Cash outflows for the purchase of properties was \$35 million for 2008 as compared to \$108 million for 2007. Cash used for purchase of land for development was \$28 million in 2008 as compared to \$47 million in 2007. The lower outflows for purchase of properties and land during 2008 are due to the 2007 period including the redeployment of proceeds from significant 2006 dispositions and the proceeds from the exchangeable senior notes, both of which did not recur during 2008. In addition, the acquisition environment has not produced that same level of accretive acquisition opportunities in 2008 as there were in 2007. Withdrawals from funds held in escrow were \$1 million during 2008 as compared to \$42 million for 2007. The 2007 activity represented the use of proceeds from significant 2006 dispositions which did not recur during 2008. Cash outflows for capital improvements were \$107 million during 2008 as compared to \$87 million for 2007. The higher outflow in 2008 reflects increased rehabilitation of core and non-core communities between periods, which enables higher rent increases and occupancy levels. Cash outflows for additions to construction in progress were \$33 million in 2008 as compared to \$15 million in 2007. The higher spending on development in 2008 reflects the construction of three communities as compared to one community in 2007. During 2008, the proceeds from the sale of fifteen communities yielded \$122 million or \$101,000 per apartment unit as compared to \$127 million or \$119,000 per apartment unit in 2007 from the sale of five properties. The lower sale price per unit in 2008 is reflective of the locations and cap rates of the sold properties as compared to the 2007 sales.

Net cash used in financing activities totaled \$79 million for 2008, primarily as a result of net borrowing under our line of credit of \$69 million, net borrowing on mortgage notes of \$64 million and proceeds from stock option exercises of \$11 million, more than offset by distributions paid to shareholders and OP Unitholders of \$120 million, common stock repurchases of \$54 million and \$45 million for early extinguishment of exchangeable senior notes with a face value of \$60 million. Net cash used in financing activities totaled \$187 million for 2007, primarily as a result of net proceeds of mortgage notes of \$46 million and proceeds from stock option exercises of \$10 million, more than offset by distributions paid to shareholders and OP Unitholders of \$123 million, preferred stock repurchases of \$60 million and common stock repurchases of \$61 million.

On February 9, 2009, the Board of Directors declared a dividend of \$0.67 per share for the quarter ended December 31, 2008. This is the equivalent of an annual distribution of \$2.68 per share. The dividend is payable February 27, 2009 to shareholders of record on February 20, 2009.

Critical Accounting Policies (dollars in thousands, except unit and per unit data)

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying consolidated financial statements and related notes. In preparing these financial statements, management has utilized information available including industry practice and its own past history in forming its estimates and judgments of certain amounts included in the financial statements, giving due consideration to materiality. It is possible that the ultimate outcome as anticipated by management in formulating its estimates inherent in these financial statements may not materialize. However, application of the accounting policies below involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. In addition, other companies may utilize different estimates which may impact comparability of the Company's results of operations to those of companies in similar businesses.

Revenue Recognition

The Operating Partnership leases its residential apartment units under leases with terms generally one year or less. Rental income is recognized on a straight-line basis over the related lease term. As a result, deferred rents receivable are created when rental income is recognized during the concession period of certain negotiated leases and amortized over the remaining term of the lease. In accordance with SFAS No. 141, *Business Combinations* ("SFAS 141"), the Company recognizes rental revenue of acquired in-place "above and below" market leases at their fair value over the weighted average remaining lease term. Property other income, which consists primarily of income from operation of laundry facilities, utility recovery, administrative fees, garage and carport rentals and miscellaneous charges to residents, is recognized when earned (when the services are provided, or when the resident incurs the charge).

Property management fees are recognized when earned based on a contractual percentage of net monthly cash collected on rental income.

Real Estate

Real estate is recorded at cost. Costs related to the acquisition, development, construction and improvement of properties are capitalized. Recurring capital replacements typically include carpeting and tile, appliances, HVAC equipment, new roofs, site improvements and various exterior building improvements. Non-recurring upgrades include, among other items, community centers, new appliances, new windows, kitchens and bathrooms. Interest costs are capitalized until construction is substantially complete. There was \$5,472, \$3,441 and \$1,087 of interest capitalized in 2008, 2007 and 2006, respectively. Salaries and related costs capitalized for 2008, 2007 and 2006 were \$3,537, \$1,967 and \$2,097, respectively. When retired or otherwise disposed of, the related asset cost and accumulated depreciation are cleared from the respective accounts and the net difference, less any amount realized from disposition, is reflected in income. Ordinary repairs and maintenance that do not extend the life of the asset are expensed as incurred.

Management reviews its long-lived assets used in operations for impairment when, in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long Lived Assets* ("SFAS 144"), there is an event or change in circumstances that indicates an impairment in value. An asset is considered impaired when the undiscounted future cash flows are not sufficient to recover the asset's carrying value. If such impairment is present, an impairment loss is recognized based on the excess of the carrying amount of the asset over its fair value. The Company records impairment losses and reduces the carrying amounts of assets held for sale when the carrying amounts exceed the estimated selling proceeds less the costs to sell.

The Company accounts for its acquisitions of investments in real estate in accordance with SFAS 141, which requires the fair value of the real estate acquired to be allocated to the acquired tangible assets, consisting of land, building, and personal property and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, value of in-place leases and value of resident relationships, based in each case on

their fair values. The Company considers acquisitions of operating real estate assets to be businesses as that term is defined in Emerging Issues Task Force Issue No. 98-3, *Determining Whether a Nonmonetary Transaction Involves Receipt of Productive Assets or of a Business*.

The Company allocates purchase price to the fair value of the tangible assets of an acquired property (which includes the land, building, and personal property) determined by valuing the property as if it were vacant. The as-if-vacant value is allocated to land, buildings, and personal property based on management's determination of the relative fair values of these assets.

Above-market and below-market in-place lease values for acquired properties are recorded based on the present value (using an interest rate which reflects the risks associated with the leases acquired) of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management's estimate of fair market lease rates for the corresponding in-place leases, measured over a period equal to the remaining non-cancelable term of the lease. The capitalized above-market lease values are included in other assets and are amortized as a reduction of rental income over the remaining non-cancelable terms of the respective leases. The capitalized below-market lease values are included in accrued expenses and other liabilities and are amortized as an increase to rental income over the initial term of the respective leases.

Other intangible assets acquired include amounts for in-place lease values that are based upon the Company's evaluation of the specific characteristics of the leases. Factors considered in these analyses include an estimate of carrying costs during hypothetical expected lease-up periods considering current market conditions, and costs to execute similar leases. The Company also considers information obtained about each property as a result of its pre-acquisition due diligence, marketing and leasing activities in estimating the fair value of the tangible and intangible assets acquired. In estimating carrying costs, management also includes real estate taxes, insurance and other operating expenses and estimates of lost rentals at market rates during the expected lease-up periods depending on the property acquired.

The total amount of other intangible assets acquired is further allocated to resident relationships, which includes intangible values based on management's evaluation of the specific characteristics of the residential leases and the Company's resident retention history.

The value of in-place leases and resident relationships are amortized and included in depreciation and amortization expense over the initial term of the respective leases.

The acquisitions of minority interests for shares of the Company's common stock are recorded under the purchase method with assets acquired reflected at the fair market value of the Company's common stock on the date of acquisition. The acquisition amounts are allocated to the underlying assets based on their estimated fair values. There were 625,759 and 478,318 shares of UPREIT Units converted to common stock, during 2008 and 2007, respectively. The Company made adjustments in the amount of \$17,793 and \$16,475, during 2008 and 2007, respectively, to record the fair market value of the conversions.

Discontinued Operations

The Company reports its property dispositions as discontinued operations as prescribed by the provisions of SFAS 144. Pursuant to the definition of a component of an entity in SFAS 144, assuming no significant continuing involvement by the former owner after the sale, the sale of an apartment community is considered a discontinued operation. In addition, apartment communities classified as held for sale are also considered a discontinued operation. The Company generally considers assets to be held for sale when all significant contingencies surrounding the closing have been resolved, which often corresponds with the actual closing date.

Included in discontinued operations for the three years ended December 31, 2008 are the operating results, net of minority interest, of 59 apartment community dispositions (15 sold in 2008, 5 sold in 2007 and 39 sold in 2006). For purposes of the discontinued operations presentation, the Company only includes interest expense associated with specific mortgage indebtedness of the properties that are considered discontinued operations.

Capital Improvements

The Company has a policy to capitalize costs related to the acquisition, development, rehabilitation, construction, and improvement of properties. Capital improvements are costs that increase the value and extend the useful life of an asset. Ordinary repair and maintenance costs that do not extend the useful life of the asset are expensed as incurred. Costs incurred on a lease turnover due to normal wear and tear by the resident are expensed on the turn. Recurring capital improvements typically include: appliances, carpeting and flooring, HVAC equipment, kitchen/bath cabinets, new roofs, site improvements and various exterior building improvements. Non-recurring upgrades include, among other items: community centers, new windows, and kitchen/bath apartment upgrades. The Company capitalizes interest and certain internal personnel costs related to the communities under rehabilitation and construction.

The Company is required to make subjective assessments as to the useful lives of its properties and improvements for purposes of determining the amount of depreciation to reflect on an annual basis. These assessments have a direct impact on the Company's net income.

Federal Income Taxes

The Company has elected to be taxed as a real estate investment trust ("REIT") under the Internal Revenue Code of 1986, as amended, commencing with the taxable year ended December 31, 1994. As a result, the Company generally is not subject to Federal or State income taxation at the corporate level to the extent it distributes annually at least 90% of its REIT taxable income to its shareholders and satisfies certain other requirements. For the years ended December 31, 2008, 2007 and 2006, the Company distributed in excess of 100% of its taxable income; accordingly, no provision has been made for federal income taxes in the accompanying consolidated financial statements. Stockholders of the Company are taxed on dividends and must report distributions from the Company as either ordinary income, capital gains, or as return of capital.

Included in total assets on the Consolidated Balance Sheets are deferred tax assets of \$10,176 and \$10,149 as of December 31, 2008 and 2007, respectively. The deferred tax assets were a result of the net losses associated with the affordable property portfolio sales during 2004 and 2003. Management does not believe it is more likely than not that these deferred assets will be used, and accordingly has recorded a reserve against the deferred tax assets of \$10,176 and \$10,149 for the years ended December 31, 2008 and 2007, respectively. The deferred tax assets are associated with HPRS who performs certain of the residential and development activities of the Company. HPRS historically provided commercial management services and provided loan advances to affordable housing entities owned through general partnership interests. As these activities are no longer provided, Management does not currently believe there is a source for future material taxable earnings for HPRS that would give rise to value for the deferred tax assets.

Variable Interest Entities

Effective March 31, 2004, the Company adopted FASB Interpretation No. 46R, *Consolidation of Variable Interest Entities, an interpretation of ARB No. 51 – Consolidated Financial Statements*. The interpretation addresses consolidation by businesses of special purpose entities (variable interest entities, "VIE").

The Company is currently the general partner in one VIE with a total of 868 units syndicated using low income housing tax credits under Section 42 of the Internal Revenue Code. As general partner, the Company manages the day-to-day operations of this partnership for a management fee. In addition, the Company has certain operating deficit and tax credit guarantees to its limited partner. The Company is responsible for funding operating deficits to the extent there are any and can receive operating incentive awards if cash flows reach certain levels. The effect on the Consolidated Balance Sheets of including this VIE as of December 31, 2008 and 2007 includes total assets of \$14,136 and \$19,241, total liabilities of \$18,056 and \$17,703 and partners equity (deficiency) of (\$3,920) and \$1,538, respectively. The VIE is included in the Consolidated Statement of Operations for the years ended December 31, 2008, 2007 and 2006.

During the fourth quarter of 2008, the Company determined to pursue a strategy to sell its general partner interest in the VIE as a result of continued deterioration in property performance and the surrounding market in general. In addition, the Limited Partner of the VIE agreed to allow the Company to pursue an exit strategy. This decision to

pursue a plan to exit the property lead to a re-evaluation of the holding period cash flows and resulting fair market value of the VIE's assets under SFAS 144. Under the guidance of SFAS 144, the Company estimated the undiscounted cash flows for the hold period along with a residual sales value. The undiscounted cash flows of the assets did not equal or exceed the assets net book value, which is indicative of an impairment of the asset. In order to determine the amount of the impairment, the Company calculated the fair value of the assets by using a weighted combination of a direct capitalization approach and a comparable sales approach, as this combination was deemed to be the most indicative of the Company's fair value in an orderly transaction between market participants. The data used to determine the fair market value included historical industry data for estimated capitalization rates, historical and budgeted NOI for the VIE, and recent comparable sales in the market in which the property is located. This resulted in an impairment charge of \$4,000 (including \$394 of goodwill), which is included in the impairment of assets held as general partner. As more fully described in Note 15, the fourth quarter 2008 events leading to the impairment of the VIE did not satisfy the criteria for held for sale treatment, accordingly, the VIE is not included in discontinued operations for the period presented.

Acquisitions and Dispositions (dollars in thousands, except unit and per unit data)

In 2008, the Company acquired two communities with a total of 813 units for total consideration of \$100,400, or an average of approximately \$123,500 per unit. For the same time period, the Company sold fifteen properties with a total of 1,227 units for total consideration of \$124,500, or an average of \$101,400 per unit. The weighted average expected first year cap rate of the 2008 Acquisition Communities was 6.8% and of the 2008 Disposed Communities was 6.8%. The weighted average unleveraged IRR during the Company's ownership for the properties sold was 13.3%.

In 2007, the Company acquired a total of five communities with a total of 1,541 units for total consideration of \$161,500, or an average of approximately \$104,800 per unit. For the same time period, the Company sold five properties with a total of 1,084 units for total consideration of \$129,500, or an average of \$119,500 per unit. The weighted average expected first year cap rate of the 2007 Acquisition Communities was 5.9% and of the 2007 Disposed Communities was 5.9%. The weighted average unleveraged IRR during the Company's ownership for the properties sold was 12.0%.

Contractual Obligations and Other Commitments

The primary obligations of the Company relate to its borrowings under the line of credit, exchangeable senior notes and mortgage notes payable. The Company's line of credit matures in September 2009, and had \$71 million outstanding at December 31, 2008. The \$2.1 billion in mortgage notes payable have varying maturities ranging from 6 months to 26 years. The principal payments on the mortgage notes payable for the years subsequent to December 31, 2008, are set forth in the table below as "Long-term debt."

In October 2006, the Company issued \$200 million of exchangeable senior notes with a coupon rate of 4.125%. The notes are exchangeable into cash equal to the principal amount of the notes and, at the Company's option, cash or common stock for the exchange value, to the extent that the market price of common stock exceeds the initial exchange price of \$73.34 per share, subject to adjustment. The exchange price is adjusted for payments of dividends in excess of the reference dividend per the indenture of \$0.64 per share. The adjusted exchange price at December 31, 2008 was \$73.11 per share. Upon an exchange of the notes, the Company will settle any amounts up to the principal amount of the notes in cash and the remaining exchange value, if any, will be settled, at the Company's option, in cash, common stock or a combination of both. The notes are not redeemable at the option of the Company for five years, except to preserve the status of the Company as a REIT. Holders of the notes may require the Company to repurchase the notes upon the occurrence of certain designated events. In addition, prior to November 1, 2026, the holders may require the Company to repurchase the notes on November 1, 2011, 2016 and 2021. The notes will mature on November 1, 2026, unless previously redeemed, repurchased or exchanged in accordance with their terms prior to that date. During October and November 2008, the Company repurchased and retired \$60 million face value of its exchangeable senior notes for \$45.4 million, in several privately-negotiated transactions at a 24.4% discount from face value. A gain on debt extinguishment of approximately \$13.9 million (net of \$0.76 million in unamortized debt issuance costs that were written off) was recorded in the fourth quarter of 2008.

The Company leases its corporate office space from an affiliate and the office space for its regional offices from third parties. The corporate office space requires an annual base rent plus a pro-rata portion of property improvements, real estate taxes, and common area maintenance. The regional office leases require an annual base rent plus a pro-rata portion of real estate taxes. These leases are set forth in the table below as "Operating leases."

Purchase obligations represent those costs that the Company is contractually obligated to pay in the future. The significant components of this caption are costs for capital improvements at the Company's properties, as well as costs for normal operating and maintenance expenses at the site level that are tied to contracts such as utilities, landscaping and grounds maintenance and advertising. The purchase obligations include amounts tied to contracts, some of which expire in 2009. It is the Company's intention to renew these normal operating contracts; however, there has been no attempt to estimate the length or future costs of these contracts.

⁽²⁾ The contractual obligations and other commitments in the table are set forth as required by Item 303(a)(5) of Regulation S-K promulgated by the SEC in January of 2003 and are not prepared in accordance with generally-accepted accounting principles.

As discussed in the section entitled "Variable Interest Entities," the Company, through its general partnership interest in an affordable property limited partnership, has guaranteed certain low income housing tax credits to limited partners in this partnership totaling approximately \$3 million. With respect to the guarantee of the low income housing tax credits, the Company believes the property's operations conform to the applicable requirements and does not anticipate any payment on the guarantee. In addition, the Company, acting as general partner in this partnership, is obligated to advance funds to meet partnership operating deficits.

Capital Improvements (dollars in thousands, except unit and per unit data)

Effective January 1, 2007, the Company updated its estimate of the amount of recurring, non-revenue enhancing capital expenditures incurred on an annual basis for a standard garden style apartment. For 2007, the Company estimated that the proper amount was \$760 per apartment unit. For 2008, the Company has grown this amount using a 3% inflationary factor and is using \$780.

The Company's policy is to capitalize costs related to the acquisition, development, rehabilitation, construction and improvement of properties. Capital improvements are costs that increase the value and extend the useful life of an asset. Ordinary repair and maintenance costs that do not extend the useful life of the asset are expensed as incurred. Costs incurred on a lease turnover due to normal wear and tear by the resident are expensed on the turn. Recurring capital improvements typically include: appliances, carpeting and flooring, HVAC equipment, kitchen/bath cabinets, new roofs, site improvements and various exterior building improvements. Non-recurring, revenue generating capital improvements include, among other items: community centers, new windows, and kitchen/bath apartment upgrades. Revenue generating capital improvements will directly result in rental earnings or expense savings. The Company capitalizes interest and certain internal personnel costs related to the communities under rehabilitation and construction.

The table below is a list of the items that management considers recurring, non-revenue enhancing capital and maintenance expenditures for a standard garden style apartment. Included are the per unit replacement cost and the useful life that management estimates the Company incurs on an annual basis.

⁽¹⁾ Estimated weighted average actual physical useful life of the expenditure capitalized.

⁽²⁾ This amount is not necessarily incurred each and every year. Some years will be higher, or lower depending on the timing of certain longer life expenditures.

⁽³⁾ These expenses are included in the Operating and maintenance line item of the Consolidated Statement of Operations. Maintenance labor costs are not included in the \$590 per unit estimate. All personnel costs for site supervision, leasing agents, and maintenance staff are combined and disclosed in the Company's Core Properties expense detail schedule.

⁽⁴⁾ Includes computers, office equipment/furniture, and maintenance vehicles.

⁽⁵⁾ The level of exterior painting may be lower than other similar titled presentations as the Company's portfolio has a significant amount of brick exteriors. In addition, the other exposed surfaces are most often covered in aluminum or vinyl.

⁽⁶⁾ Includes items such as balconies, siding, and concrete/sidewalks.

In reviewing the breakdown of costs above, one must consider the Company's unique strategy in operating apartments which has been to improve every property every year regardless of age. Another part of its strategy is to purchase older properties and rehabilitate and reposition them to enhance internal rates of return. This strategy results in higher costs of capital expenditures and maintenance costs which is more than justified by higher revenue growth, higher net operating income growth and a higher rate of property appreciation.

The Company estimates that approximately \$780 and \$760 per unit was spent on recurring capital expenditures in 2008 and 2007, respectively. The table below summarizes the breakdown of capital improvements by major categories between recurring and non-recurring, revenue generating capital improvements as follows:

Environmental Issues

Phase I environmental site assessments have been completed on substantially all of the Owned Properties. As of December 31, 2008, there were no recorded amounts resulting from environmental liabilities as there were no known contingencies with respect thereto. Furthermore, no condition is known to exist that would give rise to a material liability for site restoration or other costs that may be incurred with respect to the sale or disposal of a property.

During the past few years, there has been media attention given to the subject of mold in residential communities. The Company has responded to this attention by providing to its community management the Company's Operation and Maintenance Plan for the Control of Moisture ("O&M Plan"). The O&M Plan, designed to analyze and manage all exposures to mold, has been implemented at all of the Company's communities. There have been only limited cases of mold identified to management due to the application and practice of the O&M Plan. No condition is known to exist that would give rise to a material liability for site restoration or other costs that may be incurred with respect to mold.

Recent Accounting Pronouncements

On January 1, 2008, the Company adopted SFAS No. 157, *Fair Value Measurements* ("SFAS 157"). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies to other accounting pronouncements that require or permit fair value measurements; the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, SFAS 157 does not require any new fair value measurements for the Company. In February 2008, the FASB deferred the effective date of SFAS 157 until January 1, 2009 for all non-financial assets and non-financial liabilities except for those that are recognized or disclosed at fair value in the financial statements on a recurring basis. The adoption of SFAS 157 did not have a material impact on the Company's financial position and results of operations. In addition, the Company is currently evaluating the impact and believes that the adoption of SFAS 157 for non-financial assets and non-financial liabilities will not have a material effect on its financial position and results of operations.

On January 1, 2008, the Company adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115* ("SFAS 159"). Under SFAS 159, entities are now permitted to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis. Excluded from the scope of SFAS 159 are real estate assets and interests in VIE's. The Company has not opted to fair value any assets or liabilities, therefore, the adoption of SFAS 159 did not have any impact on the Company's financial position and results of operations.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* ("SFAS 141R"), which establishes principles and requirements for how the acquirer shall recognize and measure in its financial statements the identifiable assets acquired, liabilities assumed, any non-controlling interest in the acquiree and goodwill acquired in a business combination. This statement is effective for business combinations for which the acquisition date is on or after January 1, 2009. The Company is currently evaluating the impact and believes that the adoption of SFAS 141R will not have a material effect on its financial position and results of operations. In addition, the Company has no planned acquisitions for 2009 and thus, SFAS 141R is not expected to have any impact on its financial position or results of operations for 2009.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* ("SFAS 160"), which establishes and expands accounting and reporting standards for minority interests, which will be re-characterized as non-controlling interests in a subsidiary and the deconsolidation of a subsidiary. This statement is effective for the Company beginning January 1, 2009. The Company is currently assessing the potential impact that the adoption of SFAS 160 will have on its financial position and results of operations.

In May 2008, the FASB issued FSP No. APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)*, ("FSP APB 14-1"), that requires the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) to be separately accounted for in a manner that reflects the issuer's nonconvertible debt borrowing rate. FSP APB 14-1 requires that the initial debt proceeds from the sale of the Company's \$200 million of 4.125% exchangeable senior notes due 2026 be allocated between a liability component and an equity component in a manner that reflects interest expense at the interest rate of similar nonconvertible debt. The resulting debt discount will be amortized over the period during which the debt is expected to be outstanding (through the first optional redemption date of November 1, 2011) as additional non-cash interest expense and will increase in subsequent reporting periods, as the debt accretes to its par value through November 1, 2011. FSP APB 14-1 is effective for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Early adoption is not permitted. Upon adoption, FSP APB 14-1 requires companies to retrospectively apply the requirements of the pronouncement to all periods presented.

Based on the Company's initial assessment of the application of FSP APB 14-1, the additional non-cash interest expense, including the impact of additional capitalized interest of \$20 to \$115 per year and the impact of extinguishment of \$60 million during 2008 (as described in Note 5), is as follows:

<u>Year ended December 31</u>	<u>Increased Interest expense</u>	<u>Decrease to gain on early extinguishment of debt</u>	<u>Decrease to income available to common shareholders (net of minority interest)</u>	<u>Decrease to EPS – diluted</u>
2006	\$ 425		\$ 300	\$ 0.01
2007	2,400		1,700	0.05
2008	2,300	\$14,500	11,900	0.37
2009	1,800		N/A	N/A
2010	1,900		N/A	N/A
2011	1,700		N/A	N/A

In June 2008, the FASB issued FSP No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* ("FSP EITF 03-6-1") which clarifies that share-based payment awards that entitle their holders to receive nonforfeitable dividends before vesting should be considered participating securities. As participating securities, these instruments should be included in the calculation of basic EPS. This statement is effective for the Company beginning January 1, 2009. The Company has evaluated the impact and believes that the adoption of FSP EITF 03-6-1 will not have a material effect on its financial position and results of operations.

In October 2008, the FASB issued FSP No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active* ("FSP 157-3"). FSP 157-3 clarified the application of SFAS 157 in cases where a market is not active. FSP 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. The Company has considered the guidance provided by FSP 157-3 in its determination of estimated fair values as of December 31, 2008, and the impact was not material.

Economic Conditions

Substantially all of the leases at the communities are for a term of one year or less, which enables the Company to seek increased rents upon renewal of existing leases or commencement of new leases. These short-term leases minimize the potential adverse effect of inflation on rental income, although residents may leave without penalty at the end of their lease terms and may do so if rents are increased significantly.

Historically, real estate has been subject to a wide range of cyclical economic conditions, which affect various real estate sectors and geographic regions with differing intensities and at different times. Starting in 2001 and continuing into 2004 many regions of the United States had experienced varying degrees of economic recession and certain recessionary trends, such as a temporary reduction in occupancy and reduced pricing power limiting the ability to aggressively raise rents. Starting in the second half of 2004 and continuing into 2007, we saw a reversal of these recessionary trends. However, in the fourth quarter of 2007, throughout 2008 and continuing into 2009, the sub-prime issue put significant pressure on the mortgage lending industry. This led to problems in the financial system which developed into the worst recession since the Great Depression. The credit markets tightened, consumer confidence plunged and unemployment soared. The Company has continued to receive favorable financing at market rates of interest. Its occupancy at 95.0% in 2008 was the highest it has been since 2000 and financial performance continued strong. However, a recessionary economy and increasing job losses typically slow household formations which could affect occupancy and decrease the Company's ability to raise rents. In light of this, we will continue to review our business strategy throughout the year. However, we believe that given our B-class property type and the geographic regions in which we are located, the Company's financial performance will be affected less negatively than its peers.

Contingencies

The Company is not a party to any legal proceedings which are expected to have a material adverse effect on the Company's liquidity, financial position or results of operations. The Company is subject to a variety of legal actions for personal injury or property damage arising in the ordinary course of its business, most of which are covered by liability and property insurance. Various claims of employment and resident discrimination are also periodically brought. While the resolution of these matters cannot be predicted with certainty, management believes that the final outcome of such legal proceedings and claims will not have a material adverse effect on the Company's liquidity, financial position or results of operations.

Forward Looking Statements

This Form 10-K contains "forward-looking statements" within the meaning of Section 27A of the Securities Exchange Act of 1933 and Section 21E of the Securities Exchange Act of 1934, both as amended. Some examples of forward-looking statements include statements related to acquisitions (including any related pro forma financial information), future capital expenditures, potential development and redevelopment opportunities, projected costs and rental rates for development and redevelopment projects, financing sources and availability, and the effects of environmental and other regulations. Although the Company believes that the expectations reflected in those forward-looking statements are based upon reasonable assumptions, it can give no assurance that its expectations will be achieved. Factors that may cause actual results to differ include general economic and local real estate conditions, the weather and other conditions that might affect operating expenses, the timely completion of repositioning activities and development within anticipated budgets, the actual pace of future development, acquisitions and sales, and continued access to capital to fund growth. For this purpose, any statements contained in this Form 10-K that are not statements of historical fact should be considered to be forward-looking statements. Some of the words used to identify forward-looking statements include "believes", "anticipates", "plans", "expects", "seeks", "estimates", and similar expressions. Readers should exercise caution in interpreting and relying on forward-looking statements since they involve known and unknown risks, uncertainties and other factors which are, in some cases, beyond the Company's control and could materially affect the Company's actual results, performance or achievements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company's primary market risk exposure is interest rate risk. At December 31, 2008 and December 31, 2007, approximately 95% and 99%, respectively, of the Company's debt bore interest at fixed rates. At December 31, 2008 and 2007, approximately 89% of the Company's debt was secured and bore interest at fixed rates. The secured fixed rate debt had weighted average maturities of approximately 5 and 6 years and a weighted average interest rate of approximately 5.77% and 5.76% at December 31, 2008 and 2007, respectively. The remainder of the Company's secured debt bore interest at variable rates with a weighted average maturity of approximately 13 and 20 years and a weighted average interest rate of 2.02% and 4.63%, for 2008 and 2007, respectively. The Company does not intend to utilize a significant amount of permanent variable rate debt to acquire properties in the future. On occasion, the Company may use its line of credit in connection with a property acquisition or stock repurchase with the intention to refinance at a later date. The Company believes, however, that in no event would increases in interest expense as a result of inflation significantly impact the Company's distributable cash flow.

At December 31, 2008 and December 31, 2007, the fair value of the Company's fixed and variable rate secured debt amounted to a liability of \$2.08 billion and \$2.02 billion, respectively, compared to its carrying amount of \$2.11 billion and \$1.99 billion, respectively. The Company estimates that a 100 basis point increase in market interest rates at December 31, 2008 would have changed the fair value of the Company's fixed and variable rate secured debt to a liability of \$2.00 billion. At December 31, 2008 and December 31, 2007, the fair value of the Company's total debt, including the exchangeable senior notes and line of credit, amounted to a liability of \$2.26 billion and \$2.20 billion, respectively, compared to its carrying amount of \$2.32 billion and \$2.19 billion.

The Company intends to continuously monitor and actively manage interest costs on its variable rate debt portfolio and may enter into swap positions based upon market fluctuations. In addition, the Company believes that it has the ability to obtain funds through additional debt and/or equity offerings and/or the issuance of UPREIT Units. Accordingly, the cost of obtaining such interest rate protection agreements in relation to the Company's access to capital markets will continue to be evaluated. The Company has not, and does not plan to, enter into any derivative financial instruments for trading or speculative purposes. As of December 31, 2008, the Company had no other material exposure to market risk.

Additional disclosure about market risk is incorporated herein by reference to the discussion under the heading "Results of Operations" in Item 7: Managements Discussion and Analysis of Financial Condition and Results of Operations.

Item 8. Financial Statements and Supplementary Data

The financial statements and supplementary data are listed under Item 15(a) and filed as part of this report on the pages indicated.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures.

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports filed or submitted by the Company under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the officers who certify the Company's financial reports and to the other members of senior management and the Board of Directors.

The principal executive officer and principal financial officer evaluated, as of December 31, 2008, the effectiveness of the disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") and have determined that such disclosure controls and procedures are effective.

Management's Annual Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. The Company's internal control over financial reporting is a process designed under the supervision of the Company's principal executive officer and principal financial officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with the United States of America generally accepted accounting principles.

Under the supervision and with the participation of management, including the Company's principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of its internal control over financial reporting based on the framework in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its evaluation under that framework, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2008. In addition, management has not identified any material weaknesses in the Company's internal controls.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2008 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Changes in Internal Control Over Financial Reporting

There were no changes in the internal controls over financial reporting that occurred during the fourth quarter of the year ended December 31, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

Mrs. Tait is a graduate of Princeton University and holds an MBA from the William E. Simon Graduate School of Business Administration of the University of Rochester. She is the daughter of Norman Leenhouts and the niece of Nelson B. Leenhouts.

See Item 4A in Part I hereof for information regarding executive officers of the Company.

Section 16(a) Beneficial Ownership Reporting Compliance.

Section 16(a) of the Securities Exchange Act of 1934, as amended, (the "Exchange Act") requires the Company's executive officers and directors, and persons who own more than 10% of a registered class of the Company's equity securities, to file reports of ownership and changes in ownership with the Securities and Exchange Commission and the New York Stock Exchange. Officers, directors and greater than 10% shareholders are required to furnish the Company with copies of all Section 16(a) forms they file.

To the Company's knowledge, based solely on review of the copies of such reports furnished to the Company and written representations that no other reports were required during the fiscal year ended December 31, 2008, all Section 16(a) filing requirements applicable to its executive officers, directors and greater than 10% beneficial owners were satisfied on a timely basis, except as follows: The vesting of some shares of restricted stock held by Donald Hague was inadvertently left off a filing made on his behalf for another reportable event. The above transaction was subsequently reported on a Form 4.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Home Properties, Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Home Properties, Inc. and its subsidiaries (the "Company") at December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2008 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the index appearing under Item 15(a)(2) present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control Over Financial Reporting under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

HOME PROPERTIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Dollars in thousands, except share and per share data)

1 ORGANIZATION AND BASIS OF PRESENTATION

Organization

Home Properties, Inc. (the "Company ") was formed in November 1993, as a Maryland corporation and is engaged primarily in the ownership, management, acquisition, rehabilitation and development of residential apartment communities primarily in select Northeast, Mid-Atlantic and Southeast Florida regions of the United States. The Company conducts its business through Home Properties, L.P. (the "Operating Partnership"), a New York limited partnership. As of December 31, 2008, the Company operated 112 apartment communities with 38,280 apartments. Of this total, the Company owned 110 communities, consisting of 37,130 apartments, managed as general partner one partnership that owned 868 apartments, and fee managed one community, consisting of 282 apartments, for a third party.

Basis of Presentation

The accompanying consolidated financial statements include the accounts of the Company and its ownership of 71.7% of the limited partnership units in the Operating Partnership ("UPREIT Units") at December 31, 2008 (70.8% at December 31, 2007). The remaining 28.3% is reflected as Minority Interest in these consolidated financial statements at December 31, 2008 (29.2% at December 31, 2007). The Company owns a 1.0% general partner interest in the Operating Partnership and the remainder indirectly as a limited partner through its wholly owned subsidiary, Home Properties I, LLC, which owns 100% of Home Properties Trust, which is the limited partner. Home Properties Trust was formed in September 1997, as a Maryland real estate trust and as a qualified REIT subsidiary ("QRS") and owns the Company's share of the limited partner interests in the Operating Partnership. For financing purposes, the Company has formed a limited liability company (the "LLC") and a partnership (the "Financing Partnership"), which beneficially own certain apartment communities encumbered by mortgage indebtedness. The LLC is wholly owned by the Operating Partnership. The Financing Partnership is owned 99.9% by the Operating Partnership and 0.1% by the QRS.

The accompanying consolidated financial statements include the accounts of Home Properties Management, Inc. ("HPM") and Home Properties Resident Services, Inc. ("HPRS"), (altogether, the "Management Companies"). The Management Companies are wholly owned subsidiaries of the Company. On November 21, 2006, HPM was merged into HPRS, with HPRS the surviving entity. In addition, the Company consolidates one affordable housing limited partnership in accordance with FASB Interpretation No. 46R, *Consolidation of Variable Interest Entities, an interpretation of ARB No. 51 – Consolidated Financial Statements* ("FIN 46R"). All significant inter-company balances and transactions have been eliminated in these consolidated financial statements.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Real Estate

Real estate is recorded at cost. Costs related to the acquisition, development, construction and improvement of properties are capitalized. Recurring capital replacements typically include carpeting and tile, appliances, HVAC equipment, new roofs, site improvements and various exterior building improvements. Non-recurring upgrades include, among other items, community centers, new appliances, new windows, kitchens and bathrooms. Interest costs are capitalized until construction is substantially complete. The interest rate used for capitalization is the weighted average interest rate for all Company indebtedness, including amortization of debt issuance costs. There was \$5,472, \$3,441 and \$1,087 of interest capitalized in 2008, 2007 and 2006, respectively. Salaries and related costs capitalized for the years ended December 31, 2008, 2007 and 2006 were \$3,537, \$1,967 and \$2,097, respectively. When retired or otherwise disposed of, the related asset cost and accumulated depreciation are cleared from the respective accounts and the net difference, less any amount realized from disposition, is reflected in income. Ordinary repairs and maintenance that do not extend the life of the asset are expensed as incurred.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Real Estate (Continued)

Management reviews its long-lived assets used in operations for impairment when, in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long Lived Assets* ("SFAS 144"), there is an event or change in circumstances that indicates an impairment in value. An asset is considered impaired when the undiscounted future cash flows are not sufficient to recover the asset's carrying value. If such impairment is present, an impairment loss is recognized based on the excess of the carrying amount of the asset over its fair value. The Company records impairment losses and reduces the carrying amounts of assets held for sale when the carrying amounts exceed the estimated selling proceeds less the costs to sell.

The Company accounts for its acquisitions of investments in real estate in accordance with SFAS No. 141, *Business Combinations* ("SFAS 141"), which requires the fair value of the real estate acquired to be allocated to the acquired tangible assets, consisting of land, building, and personal property and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, value of in-place leases and value of resident relationships, based in each case on their fair values. The Company considers acquisitions of operating real estate assets to be businesses as that term is contemplated in Emerging Issues Task Force Issue No. 98-3, *Determining Whether a Nonmonetary Transaction Involves Receipt of Productive Assets or of a Business*.

The Company allocates purchase price to the fair value of the tangible assets of an acquired property (which includes the land, building, and personal property) determined by valuing the property as if it were vacant. The as-if-vacant value is allocated to land, buildings, and personal property based on management's determination of the relative fair values of these assets.

Above-market and below-market in-place lease values for acquired properties are recorded based on the present value (using an interest rate which reflects the risks associated with the leases acquired) of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management's estimate of fair market lease rates for the corresponding in-place leases, measured over a period equal to the remaining non-cancelable term of the lease. The capitalized above-market lease values are included in other assets and are amortized as a reduction of rental income over the remaining non-cancelable terms of the respective leases. The capitalized below-market lease values are included in accrued expenses and other liabilities and are amortized as an increase to rental income over the initial term of the respective leases.

Other intangible assets acquired include amounts for in-place lease values that are based upon the Company's evaluation of the specific characteristics of the leases. Factors considered in these analyses include an estimate of carrying costs during hypothetical expected lease-up periods considering current market conditions, and costs to execute similar leases. The Company also considers information obtained about each property as a result of its pre-acquisition due diligence, marketing and leasing activities in estimating the fair value of the tangible and intangible assets acquired. In estimating carrying costs, management also includes real estate taxes, insurance and other operating expenses and estimates of lost rentals at market rates during the expected lease-up periods depending on the property acquired.

The total amount of other intangible assets acquired is further allocated to resident relationships, which includes intangible values based on management's evaluation of the specific characteristics of the residential leases and the Company's resident retention history.

The value of in-place leases and resident relationships are amortized and included in depreciation and amortization expense over the initial term of the respective leases.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Real Estate (Continued)

The exchange of minority interests for shares of the Company's common stock are recorded under the purchase method with assets acquired reflected at the fair market value of the Company's common stock on the date of exchange. The acquisition amounts are allocated to the underlying assets based on their estimated fair values. During 2008 and 2007, there were 625,759 and 478,318 shares of UPREIT Units converted to common stock, respectively. The Company made an adjustment in the amount of \$17,793 and \$16,475, respectively, to record the fair market value of the conversions.

Depreciation

Properties are depreciated using a straight-line method over the estimated useful lives of the assets as follows:

Land improvements	3-20 years
Buildings and improvements	3-40 years
Furniture, fixtures and equipment	5-10 years
Computer software	5 years

Depreciation expense charged to operations was \$114,112, \$104,695 and \$87,851 from continuing operations and \$1,699, \$5,546 and \$11,856 from discontinued operations for the years ended December 31, 2008, 2007 and 2006, respectively.

Cash and Cash Equivalents

Cash and cash equivalents include all cash and highly liquid investments purchased with original maturities of three months or less. The Company estimates that the fair value of cash equivalents approximates the carrying value due to the relatively short maturity of these instruments. The majority of the Company's cash and cash equivalents are held at major commercial banks which at times may exceed the Federal Deposit Insurance Corporation limit of \$250. The Company has not experienced any losses to date on its invested cash.

Cash in Escrows

Cash in escrows consists of cash restricted under the terms of various loan agreements to be used for the payment of property taxes and insurance as well as required replacement reserves, resident security deposits for residential properties and funds held in escrow from tax-free exchanges.

Accounts Receivable and Allowance for Doubtful Receivables

Accounts receivable are generally comprised of amounts receivable from residents and other miscellaneous receivables from non-affiliated entities. We evaluate the collectibility of accounts receivable from residents and establish an allowance for accounts greater than 60 days past due for current residents and all receivables due from former residents, after the application of security deposits. The allowance for doubtful receivables was \$2,925, \$1,699 and \$984 as of December 31, 2008, 2007 and 2006, respectively.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Deferred Charges

Costs relating to the financing of properties are deferred and amortized over the life of the related financing agreement. The straight-line method, which approximates the effective interest method, is used to amortize all financing costs; such amortization is reflected as interest expense in the consolidated statement of operations. The financing agreement terms range from 1-16 years. Accumulated amortization was \$10,753, \$9,148 and \$7,421, as of December 31, 2008, 2007 and 2006, respectively.

Intangible Assets

Intangible assets of \$9,262, \$8,994 and \$8,080 at December 31, 2008, 2007 and 2006, respectively, included in Other Assets, consist primarily of intangible assets recorded in connection with SFAS 141. Intangible assets associated with SFAS 141 are amortized on the straight-line basis over their estimated useful lives of 5 months to 3 years. Accumulated amortization of intangible assets was \$7,926, \$7,038 and \$4,714 as of December 31, 2008, 2007 and 2006, respectively. Amortization expense charged to operations was \$908, \$2,342 and \$1,968 from continuing operations and \$1, \$2 and \$20 from discontinued operations for the years ended December 31, 2008, 2007 and 2006, respectively. The carrying value of intangible assets is periodically reviewed by the Company and impairments are recognized when the expected future operating cash flows derived from such intangible assets are less than their carrying value. During 2008, the Company wrote off the goodwill associated with its variable interest entity ("VIE") of \$394 and is included in impairment of assets held as general partner.

Fair Value of Financial Instruments

The Company follows the guidance under SFAS No. 157, *Fair Value Measurements* ("SFAS 157"), when valuing its financial instruments. The valuation of financial instruments under SFAS No. 107, *Disclosures about Fair Value of Financial Instruments* ("SFAS 107") requires the Company to make estimates and judgments that affect the fair value of the instruments. The Company determines the fair value of the mortgage notes payable and line of credit facility using a discounted future cash flow technique that incorporates a market interest yield curve with adjustments for duration, loan to value, and risk profile (level 2 inputs, as defined by SFAS 157). In determining the market interest yield curve, the Company considered its BBB credit rating. The Company bases the fair value of its exchangeable senior notes using quoted prices (level 1 inputs, as defined by SFAS 157).

At December 31, 2008 and December 31, 2007, the fair value of the Company's total debt, including the exchangeable senior notes and line of credit, amounted to a liability of \$2,257,917 and \$2,200,901, respectively, compared to its carrying amount of \$2,323,331 and \$2,189,289.

Revenue Recognition

The Operating Partnership leases its residential apartment units under leases with terms generally one year or less. Rental income is recognized on a straight-line basis over the related lease term. As a result, deferred rents receivable are created when rental income is recognized during the concession period of certain negotiated leases and amortized over the remaining term of the lease. In accordance with SFAS 141, the Company recognizes rental revenue of acquired in-place "above and below" market leases at their fair value over the weighted average remaining lease term. Property other income, which consists primarily of income from utility recovery, administrative fees, operation of laundry facilities, garage and carport rentals and miscellaneous charges to residents, is recognized when earned (when the services are provided, or when the resident incurs the charge).

Property management fees are recognized when earned based on a contractual percentage of net monthly cash collected on rental income.

Other Income

Other income for the years ended December 31, 2008, 2007 and 2006 primarily reflects management and other real estate service fees.

Gains on Real Estate Sales

Gains on disposition of properties are recognized using the full accrual method in accordance with the provisions of SFAS No. 66, *Accounting for Real Estate Sales*, provided that various criteria relating to the terms of sale and any subsequent involvement by the Company with the properties sold are met.

Advertising

Advertising expenses are charged to operations during the year in which they were incurred. Advertising expenses incurred and charged to operations were \$4,643, \$4,785 and \$4,140 from continuing operations, and \$113, \$337 and \$1,532 from discontinued operations, for the years ended December 31, 2008, 2007 and 2006, respectively.

Federal Income Taxes

The Company has elected to be taxed as a real estate investment trust ("REIT") under the Internal Revenue Code of 1986, as amended, commencing with the taxable year ended December 31, 1994. As a result, the Company generally is not subject to Federal or State income taxation at the corporate level to the extent it distributes annually at least 90% of its REIT taxable income to its shareholders and satisfies certain other requirements. For the years ended December 31, 2008, 2007 and 2006, the Company distributed in excess of 100% of its taxable income; accordingly, no provision has been made for federal income taxes in the accompanying consolidated financial statements. Stockholders of the Company are taxed on dividends and must report distributions from the Company as either ordinary income, capital gains, or as return of capital (Note 8).

The Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* ("FIN 48") on January 1, 2007. FIN 48 addresses the recognition and measurement of assets and liabilities associated with tax positions taken or expected to be taken in a tax return. As a result of the adoption of FIN 48, the Company reviewed its potential uncertain tax positions that would qualify under FIN 48 and made no adjustments to its existing financial and tax accounting treatment.

SFAS No. 109, *Accounting for Income Taxes*, requires a public enterprise to disclose the aggregate difference in the basis of its net assets for financial and tax reporting purposes. The tax basis of assets is less than the amounts reported in the accompanying consolidated financial statements by approximately \$569,437 and \$580,925 at December 31, 2008 and 2007, respectively.

The following table reconciles net income to taxable income for the years ended December 31, 2008, 2007 and 2006:

Adjusted taxable income subject to 90% REIT dividend requirement	<u>\$ 60,180</u>	<u>\$ 65,442</u>	<u>\$ 53,181</u>

The Company made actual distributions in excess of 100% of taxable income before capital gains. All adjustments to net income from REIT operations are net of amounts attributable to minority interest and the taxable REIT subsidiary, HPRS.

Included in total assets on the Consolidated Balance Sheets are deferred tax assets of \$10,176 and 10,149 as of December 31, 2008 and 2007, respectively. Management does not believe it is more likely than not that these deferred assets will be used, and accordingly has recorded a reserve against the deferred tax assets of \$10,176 and \$10,149 as of December 31, 2008 and 2007, respectively. The deferred tax assets are associated with HPRS who performs certain of the residential and development activities of the Company. HPRS historically provided commercial management services and provided loan advances to affordable housing entities owned through general partnership interests. As these activities are no longer provided, Management does not currently believe there is a source for future material taxable earnings for HPRS that would give rise to value for the deferred tax assets.

Earnings Per Share

Basic Earnings Per Share ("EPS") is computed as net income available to common shareholders divided by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur from common shares issuable through stock-based compensation including stock options (using the treasury stock method) and the conversion of any cumulative convertible preferred stock or exchangeable senior notes. The exchange of an UPREIT Unit for common stock will have no effect on diluted EPS as unitholders and stockholders effectively share equally in the net income of the Operating Partnership.

Income from continuing operations is the same for both the basic and diluted EPS calculation. The reconciliation of the basic and diluted earnings per share for the years ended December 31, 2008, 2007 and 2006, is as follows:

	2008	2007	2006
Income from continuing operations	\$ 32,518	\$ 27,387	\$ 23,422
Less: Preferred dividends	-	(1,290)	(5,400)
Less: Preferred stock issuance costs write-off	-	(1,902)	-
Basic and Diluted – Income from continuing operations applicable to common shareholders	32,518	24,195	18,022
Discontinued operations	37,148	34,157	87,063
Net income available to common shareholders	<u>\$ 69,666</u>	<u>\$ 58,352</u>	<u>\$ 105,085</u>
Basic weighted average number of shares outstanding	31,991,817	33,130,067	32,697,794

Discontinued operations	1.15	1.01	2.61
Net income available to common shareholders	<u>\$ 2.15</u>	<u>\$ 1.73</u>	<u>\$ 3.15</u>

Unexercised stock options to purchase 1,462,713, 1,028,597 and 18,900 shares of the Company's common stock were not included in the computations of diluted EPS because the options' exercise prices were greater than the average market price of the Company's stock during the years ended December 31, 2008, 2007 and 2006, respectively. In conjunction with the issuance of the Exchangeable Senior Notes, there were 343,616, 490,880 and 490,880 potential shares issuable under certain circumstances, of which none are considered dilutive as of December 31, 2008, 2007 and 2006, respectively.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recent Accounting Pronouncements

On January 1, 2008, the Company adopted SFAS No. 157, *Fair Value Measurements* ("SFAS 157"). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies to other accounting pronouncements that require or permit fair value measurements; the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, SFAS 157 does not require any new fair value measurements for the Company. In February 2008, the FASB deferred the effective date of SFAS 157 until January 1, 2009 for all non-financial assets and non-financial liabilities except for those that are recognized or disclosed at fair value in the financial statements on a recurring basis. The adoption of SFAS 157 did not have a material impact on the Company's financial position and results of operations. In addition, the Company is currently evaluating the impact and believes that the adoption of SFAS 157 for non-financial assets and non-financial liabilities will not have a material effect on its financial position and results of operations.

On January 1, 2008, the Company adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115* ("SFAS 159"). Under SFAS 159, entities are now permitted to measure many financial instruments and certain other assets and liabilities at fair value on an instrument-by-instrument basis. Excluded from the scope of SFAS 159 are real estate assets and interests in VIE's. The Company has not opted to fair value any assets or liabilities, therefore, the adoption of SFAS 159 did not have any impact on the Company's financial position and results of operations.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* ("SFAS 141R"), which establishes principles and requirements for how the acquirer shall recognize and measure in its financial statements the identifiable assets acquired, liabilities assumed, any non-controlling interest in the acquiree and goodwill acquired in a business combination. This statement is effective for business combinations for which the acquisition date is on or after January 1, 2009. The Company is currently evaluating the impact and believes that the adoption of SFAS 141R will not have a material effect on its financial position and results of operations. In addition, the Company has no planned acquisitions for 2009 and thus, SFAS 141R is not expected to have any impact on its financial position or results of operations for 2009.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* ("SFAS 160"), which establishes and expands accounting and reporting standards for minority interests, which will be re-characterized as non-controlling interests in a subsidiary and the deconsolidation of a subsidiary. This statement is effective for the Company beginning January 1, 2009. The Company is currently assessing the potential impact that the adoption of SFAS 160 will have on its financial position and results of operations.

Recent Accounting Pronouncements (Continued)

In May 2008, the FASB issued FSP No. APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)*, ("FSP APB 14-1"), that requires the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) to be separately accounted for in a manner that reflects the issuer's nonconvertible debt borrowing rate. FSP APB 14-1 requires that the initial debt proceeds from the sale of the Company's \$200 million of 4.125% exchangeable senior notes due 2026 be allocated between a liability component and an equity component in a manner that reflects interest expense at the interest rate of similar nonconvertible debt. The resulting debt discount will be amortized over the period during which the debt is expected to be outstanding (through the first optional redemption date of November 1, 2011) as additional non-cash interest expense and will increase in subsequent reporting periods, as the debt accretes to its par value through November 1, 2011. FSP APB 14-1 is effective for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Early adoption is not permitted. Upon adoption, FSP APB 14-1 requires companies to retrospectively apply the requirements of the pronouncement to all periods presented. Based on the Company's initial assessment of the application of FSP APB 14-1, the additional non-cash interest expense, including the impact of additional capitalized interest of \$20 to \$115 per year and the impact of extinguishment of \$60 million during 2008 (as described in Note 5), is as follows:

<u>Year ended December 31</u>	<u>Increased Interest expense</u>	<u>Decrease to gain on early extinguishment of debt</u>	<u>Decrease to income available to common shareholders (net of minority interest)</u>	<u>Decrease to EPS – diluted</u>
2006	\$ 425		\$ 300	\$ 0.01
2007	2,400		1,700	0.05
2008	2,300	\$14,500	11,900	0.37
2009	1,800		N/A	N/A
2010	1,900		N/A	N/A
2011	1,700		N/A	N/A

In June 2008, the FASB issued FSP No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* ("FSP EITF 03-6-1") which clarifies that share-based payment awards that entitle their holders to receive nonforfeitable dividends before vesting should be considered participating securities. As participating securities, these instruments should be included in the calculation of basic EPS. This statement is effective for the Company beginning January 1, 2009. The Company has evaluated the impact and believes that the adoption of FSP EITF 03-6-1 will not have a material effect on its financial position and results of operations.

In October 2008, the FASB issued FSP No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active* ("FSP 157-3"). FSP 157-3 clarified the application of SFAS 157 in cases where a market is not active. FSP 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. The Company has considered the guidance provided by FSP 157-3 in its determination of estimated fair values as of December 31, 2008, and the impact was not material.

3 VARIABLE INTEREST ENTITIES

The Company is the general partner in one VIE syndicated using low income housing tax credits under Section 42 of the Internal Revenue Code. As general partner, the Company manages the day-to-day operations of the partnership for a management fee. In addition, the Company has an operating deficit guarantee and tax credit guarantee to the limited partner of that partnership. The Company is responsible to fund operating deficits to the extent there are any and can receive operating incentive awards if cash flows reach certain levels.

The effect on the Consolidated Balance Sheets of including this VIE as of December 31, 2008 and 2007 includes total assets of \$14,136 and \$19,241, total liabilities of \$18,056 and \$17,703 and partners equity (deficiency) of (\$3,920) and \$1,538, respectively.

During the fourth quarter of 2008, the Company determined to pursue a strategy to sell its general partner interest in the VIE as a result of continued deterioration in property performance and the surrounding market in general. In addition, the Limited Partner of the VIE agreed to allow the Company to pursue an exit strategy. This decision to pursue a plan to exit the property lead to a re-evaluation of the holding period cash flows and resulting fair market value of the VIE's assets under SFAS 144. Under the guidance of SFAS 144, the Company estimated the undiscounted cash flows for the hold period along with a residual sales value. The undiscounted cash flows of the assets did not equal or exceed the assets net book value, which is indicative of an impairment of the asset. In order to determine the amount of the impairment, the Company calculated the fair value of the assets by using a weighted combination of a direct capitalization approach and a comparable sales approach, as this combination was deemed to be the most indicative of the Company's fair value in an orderly transaction between market participants. The data used to determine the fair market value included historical industry data for estimated capitalization rates, historical and budgeted NOI for the VIE, and recent comparable sales in the market in which the property is located. This resulted in an impairment charge of \$4,000 (including \$394 of goodwill), which is included in the impairment of assets held as general partner. As more fully described in Note 15, the fourth quarter 2008 events leading to the impairment of the VIE did not satisfy the criteria for held for sale treatment, accordingly, the VIE is not included in discontinued operations for the period presented.

4 MORTGAGE NOTES PAYABLE

The Company's mortgage notes payable are summarized as follows:

	<u>2008</u>	<u>2007</u>
Fixed rate mortgage notes payable	\$2,056,176	\$1,958,104
Variable rate mortgage notes payable	<u>56,155</u>	<u>28,685</u>
Mortgage notes payable	<u>\$2,112,331</u>	<u>\$1,986,789</u>

For 2008 and 2007, mortgage notes payable are collateralized by certain apartment communities. The mortgage notes payable outstanding as of December 31, 2008 mature at various dates from 2009 through 2034, with a weighted average remaining term of five and one-half years. The weighted average interest rate of the Company's fixed rate notes was 5.77% and 5.76% at December 31, 2008 and 2007, respectively. The weighted average interest rate of the Company's variable rate notes was 2.02% and 4.63% at December 31, 2008 and 2007, respectively.

Principal payments on the mortgage notes payable for years subsequent to December 31, 2008 are as follows:

2009	\$ 46,088
2010	396,381
2011	316,773
2012	174,881
2013	217,093
Thereafter	<u>961,115</u>
	<u>\$2,112,331</u>

At December 31, 2008 and 2007, the consolidated mortgage balance of \$2,112,331 and \$1,986,789, respectively, included mortgage notes payable related to the Company's VIE consolidated in connection with the Company's adoption of FIN 46R, in the amount of \$16,269 and \$16,524, respectively.

Prepayment penalties of \$4,746, \$759 and \$8,621 were incurred for the years ended December 31, 2008, 2007 and 2006, respectively. For 2008, 2007 and 2006, prepayment penalties of \$1,266, \$754 and \$8,621, respectively, were incurred in connection with the sale of property and are included in discontinued operations. For 2008 and 2007, penalties of \$3,480 and \$5, respectively, were incurred in connection with the repayment of mortgages and are included in interest expense.

5 EXCHANGEABLE SENIOR NOTES

In October 2006, the Company issued \$200,000 of exchangeable senior notes under an Indenture Agreement (the "Indenture"), with a coupon rate of 4.125%. The notes are exchangeable into cash equal to the principal amount of the notes and, at the Company's option, cash or common stock for the exchange value, to the extent that the market price of common stock exceeds the initial exchange price of \$73.34 per share, subject to adjustment. The exchange price is adjusted for payments of dividends in excess of the reference dividend per the Indenture of \$0.64 per share. The adjusted exchange price at December 31, 2008 was \$73.11 per share. Upon an exchange of the notes, the Company will settle any amounts up to the principal amount of the notes in cash and the remaining exchange value, if any, will be settled, at the Company's option, in cash, common stock or a combination of both. The notes are not redeemable at the option of the Company for five years, except to preserve the status of the Company as a REIT. Holders of the notes may require the Company to repurchase the notes upon the occurrence of certain designated events. In addition, prior to November 1, 2026, the holders may require the Company to repurchase the notes on November 1, 2011, 2016 and 2021. The notes will mature on November 1, 2026, unless previously redeemed, repurchased or exchanged in accordance with their terms prior to that date.

Noteholders may also require an exchange of the notes subsequent to December 31, 2006 if the closing sale price of common stock exceeds 130% of the exchange price for a certain period of time or if the trading price on the notes is less than 98% of the product of the closing sales price of common stock multiplied by the applicable exchange rate for a certain period of time.

During the fourth quarter of 2008, the Company repurchased \$60,000 of the exchangeable senior notes for \$45,360. A gain of \$13,884 (net of \$756 unamortized debt issuance costs written off) was recognized in continuing operations.

The notes are structurally subordinated to the secured indebtedness of the Company. The Company is not subject to any financial covenants under the Indenture. In addition, the Indenture will not restrict the ability to pay distributions, incur debt or issue or repurchase securities.

6 LINE OF CREDIT

As of December 31, 2008, the Company had an unsecured line of credit agreement with Manufacturers and Traders Trust Company ("M&T Bank") for \$140,000 which expires September 1, 2009. The Company had \$71,000 outstanding under the credit facility and \$7,441 outstanding in letters of credit on December 31, 2008. The Company has had no occurrences of default through December 31, 2008. The line of credit is led by M&T Bank, as Administrative Agent, with three other participants: Citizens Bank of Rhode Island, Chevy Chase Bank, and Comerica Bank. Borrowings under the line of credit bear interest at 0.75% over the one-month LIBOR. The one-month LIBOR was 0.44% at December 31, 2008.

Increases in interest rates will raise the Company's interest expense on any outstanding balances and as a result would affect the Company's results of operations and financial condition. The credit agreement relating to this line of credit requires the Company to maintain certain financial ratios and measurements. The Company was in compliance with these financial covenants for the years ended December 31, 2008 and 2007.

7 MINORITY INTEREST

Minority interest in the Company relates to the interest in the Operating Partnership and affordable limited partnership not owned by Home Properties, Inc. Holders of UPREIT Units may redeem a unit for one share of the Company's common stock or cash equal to the fair market value at the time of the redemption, at the option of the Company.

For 2008, 2007 and 2006, the effect of consolidating the affordable limited partnerships (Note 3) in connection with FIN 46R has been reflected in the change in minority interest for the year. The changes in minority interest for the years ended December 31, 2008, 2007 and 2006 are as follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>

Preferred Stock

In March 2002, the Company issued 2,400,000 shares of its 9.00% Series F Cumulative Redeemable Preferred Stock ("Series F Preferred Shares"), with a \$25.00 liquidation preference per share. This offering generated net proceeds of approximately \$58,098. Each Series F Preferred share received an annual dividend equal to 9.00% of the liquidation preference per share (equivalent to a fixed annual amount of \$2.25 per share). The Series F Preferred Shares were redeemed by the Company on March 26, 2007 at a redemption price of \$25.00 per share, plus accrued and unpaid dividends of \$390. In accordance with the SEC's clarification of EITF Abstracts, Topic No. D-42, *The Effect on the Calculation of Earnings per Share for the Redemption or Induced Conversion of Preferred Stock*, the initial offering costs of \$1,902 associated with the issuance of the Series F Preferred Shares were written-off in the first quarter of 2007, and are reflected as a reduction of net income available to common stockholders in determining earnings per share for the year ended December 31, 2007.

Common Stock

In 1997, the Company's Board of Directors approved a stock repurchase program under which the Company may repurchase shares of its outstanding common stock and UPREIT Units ("Company Program"). The shares/units may be repurchased through open market or privately negotiated transactions at the discretion of Company management. The Board's action did not establish a target price or a specific timetable for repurchase. At December 31, 2005 the Company had authorization to repurchase 3,220,195 shares of common stock and UPREIT Units under the Company Program. On each of October 27, 2006 and May 1, 2008, the Board of Directors approved 2,000,000-share increases in the stock repurchase program. During 2008, 2007 and 2006 the Company repurchased 1,071,588, 1,243,700 and 2,613,747 additional shares at a cost of \$49,998, \$58,285 and \$142,533, respectively. The Company has authorization to repurchase 2,291,160 shares/units as of December 31, 2008.

Dividend Reinvestment Plan

The Company has a Dividend Reinvestment Plan (the "DRIP"). The DRIP provides the stockholders of the Company an opportunity to automatically invest their cash dividends in common stock. In addition, eligible participants may make monthly payments or other voluntary cash investments in shares of common stock. The maximum monthly investment without prior Company approval is currently \$10. There is no discount offered on the investment. The Company meets share demand under the DRIP through share repurchases by the transfer agent in the open market on the Company's behalf or new share issuance. From January 1, 2006 through December 26, 2006, the Company met demand through share repurchases by the transfer agent in the open market on the Company's behalf. From December 27, 2006 through September 25, 2007, the Company met demand by issuing new shares. As of September 26, 2007, the Company switched to meeting demand through share repurchases by the transfer agent in the open market on the Company's behalf.

Dividends

Stockholders are taxed on dividends and must report such dividends as either ordinary income, capital gains, or as return of capital. The Company has declared a \$2.65 distribution per common share (CUSIP 437306103) during its most recent fiscal year. Pursuant to Internal Revenue Code Section 857 (b) (3) (C), for the years ended December 31, 2008, 2007 and 2006, the Company designates the taxable composition of the following cash distributions to holders of common and preferred shares in the amounts set forth in the tables below:

9 STOCK BENEFIT PLAN

Description of Stock Benefit Plans

The Company has established a Stock Benefit Plan for the purpose of attracting and retaining experienced employees and non-employee directors and to provide incentive for them to exert their best efforts on behalf of the Company.

The Company's 1994 Stock Benefit Plan (the "1994 Plan") was adopted by the Company at the time of its initial public offering. On February 1, 2000, the Company adopted the 2000 Stock Benefit Plan, which was subsequently amended (the "2000 Plan"). On May 6, 2003, the Company adopted the 2003 Stock Benefit Plan and on May 6, 2005, the shareholders approved the Amended and Restated 2003 Stock Benefit Plan (the "2003 Plan"). On May 1, 2008, the Company adopted the 2008 Stock Benefit Plan (the "2008 Plan"), as a successor to the 2003 Plan. No additional options will be issued under the 1994 Plan, 2000 Plan, and the 2003 Plan. Participants in each of the above referenced plans (the "Stock Plans") include officers, non-employee directors, and key employees of the Company. The Stock Plans allow for the award of options, stock appreciation rights and restricted stock. No stock appreciation rights have been awarded. The 1994 Plan provided for the issuance of up to 1,596,000 options to officers and employees and 154,000 options to non-employee directors. The 2000 Plan limited the number of shares issuable under the plan to 2,755,000, of which 205,000 were to be available for issuance to the non-employee directors. The 2003 Plan limited the number of shares issuable under the plan to 2,859,475, of which 249,475 were to be available for issuance to the non-employee directors. The 2008 Plan limits the number of shares issuable under the plan to 2,450,000. Stock options awarded reduce the number of shares available for awards by one share for every one share granted. Awards of restricted stock reduce the number of shares available for award by one share for every one share awarded, up to 250,000; beyond that, restricted stock reduces the number of shares available for award by 3.5 shares for every one share awarded. Director awards for 2008 were limited to a number of options and shares of restricted stock equal to a value of \$26,000 and \$55,000, respectively. For each of 2009 and 2010, the number of options and shares of restricted stock to be issued to each non-employee director may not exceed 6,000 options and 2,000 shares.

Under the 1994 Plan, 1,542,381 shares have been granted to employees and 153,654 shares have been granted to non-employee directors. Awards for 2,451,922 shares have been granted to employees and awards for 166,460 shares have been granted to non-employee directors under the 2000 Plan. Awards for 2,833,964 shares have been granted to employees and awards for 246,658 shares have been granted to non-employee directors under the 2003 Plan. Under the 2008 Plan and as of December 31, 2008, 535,128 awards for shares have been issued to employees and 40,440 awards for shares have been issued to non-employee directors and 1,887,049 common shares are available for future grant of awards for officers, employees and non-employee directors. Options granted under the Stock Plans vest 20% for each year of service until 100% vested on the fifth anniversary, except that options issued to certain officers (276,000) and all of the options issued to non-employee directors under the 1994 Plan and 2000 Plan vested immediately upon grant. The exercise price per share for stock options issued under all of the Stock Plans may not be less than 100% of the fair market value of a share of common stock on the date the stock option is granted. Options granted to non-employee directors under the 1994 Plan and the 2000 Plan expire after five years from the date of grant. All other options expire after ten years from the date of grant. Restricted stock awards granted to directors vest 100% on the fifth anniversary of the date of grant. All of the 67,801, 43,756 and 53,066 restricted stock awards granted to employees during 2008, 2007 and 2006 vest 25% on each anniversary of the date of grant for a period of four years. The Company has a policy of issuing new shares upon the exercise of stock options and upon the lapsing of restrictions with respect to restricted stock.

9 STOCK BENEFIT PLAN (Continued)

Description of Stock Benefit Plans (Continued)

On January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123R, *Share Based Payments* ("SFAS 123R"). The statement is a revision of SFAS No. 123 *Accounting for Stock-Based Compensation*. SFAS 123R supersedes APB Opinion No. 25 *Accounting for Stock Issued to Employees* and its related implementation guidance. SFAS 123R requires that entities recognize the cost of employee services received in exchange for awards of equity instruments (i.e., stock options and restricted shares) based on the grant-date fair value of those awards. Prior to January 1, 2006, the Company applied the provisions of SFAS No. 148 *Accounting for Stock-Based Compensation – Transition and Disclosure*, an Amendment to SFAS No. 123 ("SFAS 148"). Under SFAS 148, the Company recognized compensation cost related to stock option grants, based on the fair value on the date of the grant, over the expected service period of the employee receiving the award.

Stock Options

The Company uses the Black-Scholes formula to estimate the fair value of stock options granted to employees for both SFAS 123R and SFAS 148. SFAS 123R and SFAS 148 require the estimation of forfeitures when recognizing compensation expense and that this estimate of forfeitures be adjusted over the requisite service period should actual forfeitures differ from such estimates. Changes in estimated forfeitures are recognized through a cumulative catch-up adjustment, which is recognized in the period of change and which impacts the amount of unamortized compensation expense to be recognized in future periods. For options granted prior to January 1, 2006, the Company used the nominal vesting period approach. For option grants on or after January 1, 2006, the Company applies the non-substantive vesting period approach which resulted in \$724 of additional compensation costs in the year of adoption for retirement eligible employees and directors than what would have been recognized under SFAS 148. As a result of the adoption of SFAS 123R, the Company began capitalizing stock-based compensation costs as a component of employee compensation that is capitalized as part of self-constructed fixed assets which amounted to \$113 and \$87 for the years ended December 31, 2008 and 2007, respectively. The Company applied the modified prospective application in adopting SFAS 123R.

A summary of stock option activity for the year ended December 31, 2008 is as follows:

	<u>Number of Options</u>	<u>Weighted Average Exercise Price Per Option</u>	<u>Weighted Average Remaining Contractual Term in Years</u>	<u>Aggregate Intrinsic Value</u>
Options outstanding at December 31, 2007	2,651,522	\$ 43.33

Options exercisable at December 31, 2008	<u>1,432,649</u>	<u>\$ 39.54</u>	<u>5.1</u>	<u>\$ 1,519</u>

The total cash received from the exercise of options was \$7,933, \$6,293 and \$25,070 during the years ended December 31, 2008, 2007 and 2006, respectively. The weighted-average grant-date fair value of options granted during the years 2008, 2007 and 2006 was \$5.85, \$6.79 and \$6.69, respectively. The total intrinsic value of options exercised was \$3,422, \$2,971 and \$14,419 during the years ended December 31, 2008, 2007 and 2006, respectively.

Stock Options (Continued)

A summary of unvested stock option activity for the year ended December 31, 2008 is as follows:

	<u>Number of Options</u>	<u>Weighted Average Exercise Price Per Option</u>
Unvested stock options at December 31, 2007	1,453,033	\$ 48.69
Granted	498,983	52.56
Vested	(447,530)	45.67
Cancelled	<u>(82,007)</u>	<u>48.72</u>
Unvested stock options at December 31, 2008	<u>1,422,479</u>	<u>\$ 51.00</u>

As of December 31, 2008, there was \$4,430 of total unrecognized compensation cost related to unvested stock options; that cost is expected to be recognized over a weighted-average period of 1.87 years. The total fair value of options vested during the years ended December 31, 2008, 2007 and 2006 was \$2,065, \$1,687 and \$1,279, respectively.

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions for the years ended December 31, 2008, 2007 and 2006 as follows:

<u>Assumption</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Expected dividend yields	5.48%	5.27%	5.26%
Expected volatility	20.97%	19.25%	18.73%
Expected lives of the options with a lifetime of ten years	5.7 Years	5.7 Years	6.5 Years
Expected lives of the options with a lifetime of five years	4.6 Years	4.6 Years	5.0 Years
Risk free interest rate	3.35%	4.59%	5.09%

The expected dividend yield was based on the historical dividend growth rates and the historical annual dividends. The expected volatility was based on the historical volatility of the Company's common stock. In 2008 and 2007 the weighted average expected option lives, for both options with a lifetime of ten and five years, was based on the Company's historical data for prior period stock option exercise and cancellation activity. In 2006, the expected lives of the options was determined by applying the "simplified method" approach (median between the average vesting term and the contractual term) for plain vanilla option grants made during 2006, as prescribed by Staff Accounting Bulletin No. 107, *Share-Based Payment* ("SAB 107"). The risk-free interest rates for the expected life of the options were based on the implied U.S. Treasury yield curve.

In 2008, 2007 and 2006, the Company recognized \$2,411, \$1,938 and \$1,793, respectively, in stock compensation costs related to its outstanding stock options.

Restricted Stock

A summary of restricted stock activity for the year ended December 31, 2008 is as follows:

	Number of Shares	Weighted Average Grant Date Fair Value Per Share
Restricted stock outstanding and unvested at December 31, 2007	215,899	\$ 44.34
Granted	76,585	50.09
Vested and issued	(118,341)	39.04
Cancelled	<u>(4,830)</u>	<u>51.17</u>
Restricted stock outstanding and unvested at December 31, 2008	<u>169,313</u>	<u>\$ 50.44</u>

In 2008, 2007 and 2006, the Company granted a total of 76,585, 52,216 and 62,066 shares of restricted stock, respectively, to both employees and directors. The directors' grants included above for 2008, 2007 and 2006 were 8,784, 8,460 and 9,000 shares, respectively. The restricted stock outstanding at December 31, 2008, 2007 and 2006 was 169,313, 215,899 and 270,405 shares, respectively.

Effective January 1, 2006, the Company began recognizing expense for the restricted stock grants based on the expected service period of the grantee. Under the 2000 and 2003 Plans, for grant recipients that have met or exceeded the retirement eligible age (59.5 for employees and 75 for directors), the expense was recognized upon grant. For recipients approaching retirement, the expense is being recognized ratably over the lesser of the term between the grant date and the expected retirement date or the vesting period. All other restricted stock grants are expensed ratably over the vesting period of 5 and 4 years for director and employee grants, respectively. Under the 2008 Plan, the expense is recognized upon grant for employee grant recipients that have met or exceeded the retirement eligible age of 59.5 and for all director grants. For employees approaching retirement, the expense is recognized ratably over the lesser of the term between the grant date and the expected retirement date or the vesting period. All other restricted stock grants are expensed ratably over the vesting period of 4 years for employee grants. Prior to 2006, restricted stock grants were expensed ratably over the vesting period of 5 and 4 years for director and employee grants, respectively.

The restricted shares were granted during 2008, 2007 and 2006 at a weighted average price of \$50.09, \$55.70 and \$51.00 per share, respectively. The fair value of restricted shares is equivalent to the closing stock price on the grant date. The total fair value of restricted shares vested during 2008, 2007 and 2006 was \$5,378, \$6,032 and \$3,562, respectively. Total compensation cost recorded for 2008, 2007 and 2006 for the restricted share grants was \$3,133, \$2,592 and \$2,883, respectively. As of December 31, 2008, there was \$4,921 of total unrecognized compensation cost related to unvested restricted stock; that cost is expected to be recognized over a weighted-average period of 2.47 years.

10 SEGMENT REPORTING

The Company is engaged in the ownership and management of market rate apartment communities. Each apartment community is considered a separate operating segment. Each segment on a stand alone basis is less than 10% of the revenues, profit or loss, and assets of the combined reported operating segments and meets all of the aggregation criteria under SFAS 131. The operating segments are aggregated as Core and Non-core properties.

HOME PROPERTIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Dollars in thousands, except share and per share data)

10 SEGMENT REPORTING (Continued)

Non-segment revenue to reconcile to total revenue consists of interest income and other income. Non-segment assets to reconcile to total assets include cash and cash equivalents, cash in escrows, accounts receivable, prepaid expenses, deferred charges, and other assets.

Core properties consist of all apartment communities owned throughout 2007 and 2008 where comparable operating results are available. Therefore, the Core Properties represent communities owned as of January 1, 2007. Non-core properties consist of apartment communities acquired and developed during 2007 and 2008, such that full year comparable operating results are not available.

The Company assesses and measures segment operating results based on a performance measure referred to as net operating income. Net operating income is defined as total revenues less operating and maintenance expenses. The accounting policies of the segments are the same as those described in Notes 1 and 2.

11 DERIVATIVE FINANCIAL INSTRUMENTS

At December 31, 2008, the Company had no outstanding interest rate swap agreements; however, during 2007 the Company had four interest rate swaps that effectively converted variable rate debt to fixed rate debt. The notional amount amortized in conjunction with the principal payments of the hedged items. The terms were as follows:

<u>Original Notional Amount</u>	<u>Fixed Interest Rate</u>	<u>Variable Interest Rate</u>	<u>Scheduled Maturity Date</u>
\$16,384,396	5.35%	LIBOR + 1.50%	June 25, 2007

11 DERIVATIVE FINANCIAL INSTRUMENTS (Continued)

On May 29, 2007, these interest rate swaps were terminated and the Company received a termination fee of \$27. The accumulated other comprehensive income of \$84 was reclassified into earnings. The related variable rate debt was repaid on June 13, 2007. For the entire term of these interest rate swap agreements, as the critical terms of the interest rate swaps and the hedged items were the same, no ineffectiveness was recorded in the consolidated statements of operations. All components of the interest rate swaps were included in the assessment of hedge effectiveness.

The Company has entered into interest rate swaps to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. The Company does not utilize these arrangements for trading or speculative purposes. The principal risk to the Company through its interest rate hedging strategy is the potential inability of the financial institutions from which the interest rate protection was purchased to cover all of their obligations. To mitigate this exposure, the Company purchases its interest rate swaps from either the institution that holds the debt or from institutions with a minimum A- credit rating.

All derivatives, which have historically been limited to interest rates swaps designated as cash flow hedges, are recognized on the balance sheet at their fair value in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* ("SFAS 133"). On the date that the Company enters into an interest rate swap, it designates the derivative as a hedge of the variability of cash flows that are to be received or paid in connection with a recognized liability. To the extent effective, subsequent changes in the fair value of a derivative designated as a cash flow hedge are recorded in other comprehensive income, until earnings are affected by the variability of cash flows of the hedged transaction. Any hedge ineffectiveness will be reported in interest expense in the consolidated statement of operations. The fair value of the interest rate swaps is based upon the estimate of amounts the Company would receive or pay to terminate the contract at the reporting date and is estimated using interest rate market pricing models.

The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedge transactions. The Company formally assesses (both at the hedge's inception and on an ongoing basis) whether the derivatives that are used in hedging transactions have been highly effective in offsetting changes in the cash flows of the hedged items and whether those derivatives may be expected to remain highly effective in future periods. Should it be determined that a derivative is not (or has ceased to be) highly effective as a hedge, the Company will discontinue hedge accounting prospectively.

12 TRANSACTIONS WITH AFFILIATES

The Company and HPRS recognized management and development fee revenue, interest income and other miscellaneous income from affiliated entities of \$19, \$24 and \$59 for the years ended December 31, 2008, 2007 and 2006, respectively.

The Company leases its corporate office space from an affiliate. The lease requires an annual base rent of \$895 for the years ended 2006 through 2009. The lease also requires the Company to pay a pro rata portion of property improvements, real estate taxes and common area maintenance. For each of the years ended December 31, 2008 and 2007, rental expense was \$1,711. For the year ended December 31, 2006, rental expense was \$1,699.

13 COMMITMENTS AND CONTINGENCIES

401(k) Savings Plan

The Company sponsors a defined contribution plan. Under the plan, the Company will match 75% of the first 4% of each participant's contributions not to exceed 3% of that participant's eligible compensation. The matching expense under this plan was \$844, \$794 and \$832 for the years ended December 31, 2008, 2007 and 2006, respectively.

Incentive Compensation Plan

The Incentive Compensation Plan provides that eligible officers and key employees may earn a cash bonus based upon two performance measures: the percentage of growth in the Company's funds from operations ("FFO") on a per share/unit diluted basis from the previous year and the percentage of growth in same store net operating income from the previous year as compared to industry peers. The bonus expense charged to operations was \$5,402, \$4,341 and \$4,983 for the years ended December 31, 2008, 2007 and 2006, respectively.

Letters of Credit

As of December 31, 2008, the Company had provided \$7,441 in letters of credit, which were provided under the Company's \$140,000 unsecured line of credit agreement (Note 6). The letters of credit were required to be issued under certain tax escrow agreements, workers compensation and health insurance policies and construction projects.

Contingencies

In connection with various UPREIT transactions, the Company has agreed to maintain certain levels of nonrecourse debt for a period of 5 to 10 years associated with the contributed properties acquired. In addition, the Company is restricted in its ability to sell certain contributed properties (50% of the owned portfolio) for a period of 7 to 15 years except through a tax deferred Internal Revenue Code Section 1031 like-kind exchange. The remaining terms on the sale restrictions range from 1 to 7 years.

Debt Covenants

The line of credit loan agreement contains restrictions which, among other things, require maintenance of certain financial ratios (Note 6).

In connection with the issuance of the Series F Preferred Stock, the Company was required to maintain for each fiscal quarterly period a fixed charge coverage ratio, as defined in the Series F Cumulative Redeemable Preferred Stock Article Supplementary, of 1.75 to 1.0. The Company was in compliance with the fixed charge coverage ratio for each quarterly period. The Series F Preferred Shares were redeemed by the Company on March 26, 2007.

13 COMMITMENTS AND CONTINGENCIES (Continued)

Guarantees

As of December 31, 2008, the Company, through its general partnership interest in an affordable property limited partnership (see Note 3), has guaranteed certain low income housing tax credits to limited partners totaling approximately \$3,000. As of December 31, 2008, there were no known conditions that would make such payments necessary relating to these guarantees. In addition, the Company, acting as general partner in this partnership, is obligated to advance funds to meet partnership operating deficits.

Executive Retention Plan

Effective February 2, 1999, the Executive Retention Plan provides for severance benefits and other compensation to be received by certain employees in the event of a change in control of the Company and a subsequent termination of their employment without cause or voluntarily with good cause.

15 DISCONTINUED OPERATIONS

The Company reports its property dispositions as discontinued operations as prescribed by the provisions of SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* ("SFAS 144"). Pursuant to the definition of a component of an entity in SFAS 144, assuming no significant continuing involvement by the former owner after the sale, the sale of an apartment community is considered a discontinued operation. In addition, apartment communities classified as held for sale are also considered a discontinued operation. The Company generally considers assets to be held for sale when all significant contingencies surrounding the closing have been resolved, which often corresponds with the actual closing date.

Included in discontinued operations for the three years ended December 31, 2008 are the operating results, net of minority interest, of 59 apartment community dispositions (15 sold in 2008, 5 sold in 2007 and 39 sold in 2006). For purposes of the discontinued operations presentation, the Company only includes interest expense associated with specific mortgage indebtedness of the properties that are considered discontinued operations.

A summary of community dispositions is as follows:

<u>Year</u>	<u>Number of Disposed Communities</u>	<u>Number of Disposed Units</u>	<u>Number of Transactions</u>	<u>Total Sales Price</u>	<u>Sales Price Per Unit</u>	<u>Total Gain On Sale (before minority interest)</u>

The sum of the quarterly earnings per common share amounts may not equal the annual earnings per common share amounts due primarily to changes in the number of common shares outstanding quarter to quarter. The quarterly reports for the years ended December 31, 2008 and 2007 have been reclassified to reflect discontinued operations in accordance with SFAS 144.

18 SUBSEQUENT EVENTS

On January 30, 2009, the Company sold three apartment communities, with a total of 741 units for \$67,815. Two communities were located in Hudson Valley, New York and one community was located in northern New Jersey. A gain on sale of approximately \$13,600 (before the allocation of minority interest) will be recorded in the first quarter 2009 related to this sale.

On February 9, 2009, the Board of Directors declared a dividend of \$0.67 per share for the quarter ended December 31, 2008. This is the equivalent of an annual distribution of \$2.68 per share. The dividend is payable February 27, 2009 to shareholders of record on February 20, 2009.

CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO RULE 13a-14 PROMULGATED BY
THE SECURITIES AND EXCHANGE COMMISSION
(Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Edward J. Pettinella, certify that:

1. I have reviewed this annual report on Form 10-K of Home Properties, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations, and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
