Prospectus Dated June 30, 2016

The Toronto-Dominion Bank

\$ ●

Market Linked Securities – Leveraged Upside Participation to a Cap and Fixed Percentage Buffered Downside
Principal at Risk Securities Linked to the EURO STOXX 50[®] Index due July 6, 2022

The Toronto-Dominion Bank (“TD” or “we”) is offering the Principal at Risk Securities (the “Securities”) linked to the EURO STOXX 50[®] Index (the “Reference Asset”) described below.

The Securities provide a 200% leveraged positive return if the level of the Reference Asset increases from the Initial Level to the Final Level, subject to the Maximum Redemption Amount. Investors will lose 1% of the Principal Amount for each 1% decrease from the Initial Level to the Final Level of more than 20% and may lose up to 80% of the Principal Amount. **Any payments on the Securities are subject to our credit risk.**

The Securities are unsecured and are not savings accounts or insured deposits of a bank. The Securities are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality of Canada or the United States.

The Securities will not be listed on any securities exchange.

The Payment at Maturity will be greater than the Principal Amount only if the Percentage Change is greater than zero. The Securities do not guarantee the return of the Principal Amount and investors may lose up to 80% of their investment in the Securities.

The Securities have complex features and investing in the Securities involves a number of risks. See “Additional Risk Factors” on page P-7 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the product prospectus supplement MLN-EI-1 dated June 30, 2016 (the “product prospectus supplement”) and “Risk Factors” on page 1 of the prospectus dated June 30, 2016 (the “prospectus”).

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of these securities or determined that this pricing supplement, the product prospectus supplement or the prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

We will deliver the Securities in book-entry only form through the facilities of The Depository Trust Company on or about July 6, 2017, against payment in immediately available funds.

The estimated value of the Securities on the Pricing Date is expected to be between \$917.60 and \$937.60 per Security, as discussed further under “Additional Risk Factors — Estimated Value” beginning on page P-10 and “Additional Information Regarding Our Estimated Value of the Securities” beginning on P-25, respectively. The estimated value is expected to be less than the public offering price of the Securities.

	Public Offering Price ¹	Underwriting Discount ²	Proceeds to TD
Per Security	\$1,000.00	\$45.00	\$955.00
Total	\$	\$	\$

¹ Certain dealers who purchase the Securities for sale to certain fee-based advisory accounts may forego some or all of their selling concessions, fees or commissions. The price for investors purchasing the Securities in these accounts may be as low as \$955.00 (95.50%) per Security.

² The Agents may receive a commission of up to \$45.00 (4.50%) per Security and may use a portion of that commission to allow selling concessions to other dealers in connection with the distribution of the Securities, or will offer the Securities directly to investors. The Agents may resell the Securities to other securities dealers at the Principal Amount less a concession not in excess of \$25.00 per Security. Such securities dealers may include Wells Fargo Advisors (“WFA”, the trade name of the retail brokerage business of Wells Fargo Clearing Services, LLC and Wells Fargo Advisors Financial Network, LLC), an affiliate of Wells Fargo Securities, LLC (“Wells Fargo Securities”). The other dealers may forego, in their sole discretion, some or all of their selling concessions. In addition to the selling concession allowed to WFA, Wells Fargo Securities will pay \$1.20 per Security of the underwriting discount to WFA as a distribution expense fee for each Security sold by WFA. TD will reimburse TD Securities (USA) LLC (“TDS”) for certain expenses in connection with its role in the offer and sale of the Securities, and TD will pay TDS a fee in connection with its role in the offer and sale of the Securities. See “Supplemental Plan of Distribution (Conflicts of Interest) –Selling Restrictions” on page P-24 of this pricing supplement.

Summary

The information in this “Summary” section is qualified by the more detailed information set forth in this pricing supplement, the product prospectus supplement and the prospectus.

Issuer:	The Toronto-Dominion Bank
Issue:	Senior Debt Securities
Type of Security:	Market Linked Securities – Leveraged Upside Participation to a Cap and Fixed Percentage Buffered Downside
Term:	Approximately 5 years
Reference Asset:	EURO STOXX 50 [®] Index (Bloomberg Ticker: SX5E)
CUSIP / ISIN:	89114QJF6 / US89114QJF63
Agents:	TDS and Wells Fargo Securities. The Agents may receive a commission of up to \$45.00 and may resell the Securities to other securities dealers, including securities dealers acting as custodians, at the Principal Amount less a concession of not in excess of \$25.00 per Security. Such securities dealers may include WFA, an affiliate of Wells Fargo Securities. In addition to the concession allowed to WFA, Wells Fargo Securities will pay \$1.20 per Security of the underwriting discount to WFA as a distribution expense fee for each Security sold by WFA.
Currency:	U.S. Dollars
Minimum Investment:	\$1,000 and minimum denominations of \$1,000 in excess thereof.
Principal Amount:	\$1,000 per Security
Pricing Date:	June 30, 2017
Issue Date:	July 6, 2017
Valuation Date:	June 28, 2022, subject to postponement for market disruption events and non-trading days, as described under “General Terms of the Notes – Market Disruption Events” in the product prospectus supplement.
Maturity Date:	July 6, 2022, subject to postponement for market disruption events and non-trading days, as described under “General Terms of the Notes– Market Disruption Events” in the product prospectus supplement.
Payment at Maturity:	<p>If the Percentage Change is positive, then the investor will receive an amount per Security equal to the lesser of:</p> <ul style="list-style-type: none"> (i) Principal Amount + (Principal Amount x Percentage Change x Leverage Factor); and (ii) the Maximum Redemption Amount. <p>If the Percentage Change is less than or equal to 0% but greater than or equal to -20%, then the investor will receive only the Principal Amount.</p> <p>If the Percentage Change is less than -20%, then the investor will receive less than the Principal Amount, calculated using the following formula:</p> $\text{Principal Amount} + [\text{Principal Amount} \times (\text{Percentage Change} + \text{Buffer Percentage})]$ <p>If the Final Level is less than Buffer Level, the investor will receive less, and possibly 80% less, than the Principal Amount at maturity.</p>
Leverage Factor:	200%
Maximum Redemption Amount:	The Maximum Redemption Amount will be determined on the Pricing Date and will be within the range of 175.00% to 185.00% of the Principal Amount (or \$1,750.00 to \$1,850.00 per Security). As a result, the maximum return on the Securities will be 75.00% to 85.00% of the Principal Amount (assuming a public offering price of \$1,000 per Security).
Buffer Percentage:	20%

Buffer Level:	80% of the Initial Level
Percentage Change:	$(\text{Final Level} - \text{Initial Level}) / \text{Initial Level}$, expressed as a percentage
Initial Level:	The closing level of the Reference Asset on the Pricing Date
Final Level:	The closing level of the Reference Asset on the Valuation Date
Closing Level of the Reference Asset:	The closing level of the Reference Asset will be the official closing level of the Reference Asset or any successor index (as defined in the accompanying product prospectus supplement) published by the Index Sponsor (as defined in the accompanying product prospectus supplement) on any trading day for the Reference Asset.
Business Day:	Any day that is a Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or required by law to close in New York City or Toronto.
Trading Day:	For purposes of the Securities, the definition of “trading day” set forth in the product prospectus supplement is superseded. For purposes of the Securities, a “trading day” means a day, as determined by the calculation agent, on which (i) the Index Sponsor is scheduled to publish the level of the Reference Asset and (ii) each related futures or options exchange is scheduled to be open for trading for its regular trading session. A “related futures or options exchange” means an exchange or quotation system where trading has a material effect (as determined by the calculation agent) on the overall market for futures or options contracts relating to the Reference Asset.
U.S. Tax Treatment:	By purchasing a Security, each holder agrees, in the absence of a statutory, regulatory, administrative or judicial ruling to the contrary, to characterize the Securities, for U.S. federal income tax purposes, as pre-paid derivative contracts with respect to the Reference Asset. Based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, it is reasonable to treat the Securities in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Securities, it is possible that your Securities could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization and the timing and character of your income from the Securities could differ materially from the treatment described above, as described further under “Supplemental Discussion of U.S. Federal Income Tax Consequences”.
Canadian Tax Treatment:	Please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences,” which applies to the Securities.
Calculation Agent:	TD
Listing:	The Securities will not be listed on any securities exchange.
Clearance and Settlement:	DTC global (including through its indirect participants Euroclear and Clearstream, Luxembourg, as described under “Forms of the Debt Securities” and “Book-Entry Procedures and Settlement” in the prospectus).

The Pricing Date, the Issue Date, the Valuation Date and the Maturity Date are subject to change. These dates will be set forth in the final pricing supplement that will be made available in connection with sales of the Securities.

Investor Considerations

We have designed the Securities for investors who:

- seek 200% exposure to the upside performance of the Reference Asset if the Final Level is greater than the Initial Level, subject to the Maximum Redemption Amount of 175.00% to 185.00% (to be determined on the Pricing Date) of the Principal Amount, assuming a public offering price of \$1,000 per Security;
- desire to limit downside exposure to the Reference Asset through the Buffer Percentage;
- understand that if the Final Level is less than the Initial Level by more than the Buffer Percentage, they will receive less, and possibly 80% less, than the Principal Amount at maturity;
- are willing to forgo interest payments on the Securities and dividends on securities comprising the Reference Asset (the "Reference Asset Constituents");
- are willing to accept the risk of exposure to the eurozone equity market;
- are willing to accept the credit risk of TD to obtain exposure to the Reference Asset generally and the Reference Asset Constituents specifically;
- are willing to hold the Securities until maturity.

The Securities are not designed for, and may not be a suitable investment for, investors who:

- seek a liquid investment or are unable or unwilling to hold the Securities to maturity;
- are unwilling to accept the risk that the Final Level of the Reference Asset may decrease by more than the Buffer Percentage from the Initial Level;
- seek uncapped exposure to the upside performance of the Reference Asset;
- seek full return of the Principal Amount at maturity;
- are unwilling to purchase securities with an estimated value as of the Pricing Date that is lower than the public offering price and that may be as low as the lower estimated value set forth on the cover page;
- seek current income;
- seek exposure to the Reference Asset but are unwilling to accept the risk/return trade-offs inherent in the Payment at Maturity for the Securities;
- are unwilling to accept the risk of exposure to the eurozone equity market;
- are unwilling to accept the credit risk of TD to obtain exposure to the Reference Asset generally or the Reference Asset Constituents specifically; or
- prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings.

Additional Terms of Your Securities

You should read this pricing supplement together with the prospectus, as supplemented by the product prospectus supplement, relating to our Senior Debt Securities, of which these Securities are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict the following hierarchy will govern: first, this pricing supplement; second, the product prospectus supplement; and last, the prospectus. ***The Securities vary from the terms described in the product prospectus supplement in several important ways. You should read this pricing supplement carefully.***

This pricing supplement, together with the documents listed below, contains the terms of the Securities and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” on page P-7 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the product prospectus supplement and “Risk Factors” on page 1 of the prospectus, as the Securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Securities. You may access these documents on the Securities and Exchange Commission (the “SEC”) website at www.sec.gov as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website):

- Prospectus dated June 30, 2016:
<https://www.sec.gov/Archives/edgar/data/947263/000119312516638441/d162493d424b3.htm>
- Product Prospectus Supplement MLN-EI-1 dated June 30, 2016:
https://www.sec.gov/Archives/edgar/data/947263/000089109216015847/e70323_424b2.htm

Our Central Index Key, or CIK, on the SEC website is 0000947263. As used in this pricing supplement, the “Bank,” “we,” “us,” or “our” refers to The Toronto-Dominion Bank and its subsidiaries. Alternatively, The Toronto-Dominion Bank, any agent or any dealer participating in this offering will arrange to send you the product prospectus supplement and the prospectus if you so request by calling 1-855-303-3234.

For purposes of the Securities, the definition of “market disruption event” and the postponement provisions set forth in the product prospectus supplement are superseded. For purposes of the Securities, a “market disruption event” with respect to the Reference Asset means, any of (A), (B), (C) or (D) below, as determined by the calculation agent in its sole discretion:

- (A) Any of the following events occurs or exists with respect to any security included in such Reference Asset or any successor index (as defined in the accompanying product prospectus supplement), and the aggregate of all securities included in such Reference Asset or successor index with respect to which any such event occurs comprise 20% or more of the level of such Reference Asset or successor index:
 - a material suspension of or limitation imposed on trading by the relevant stock exchange for such security or otherwise at any time during the one-hour period that ends at the scheduled closing time for the relevant stock exchange for such security on that day, whether by reason of movements in price exceeding limits permitted by the relevant stock exchange or otherwise;
 - any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, such security on its relevant stock exchange at any time during the one-hour period that ends at the scheduled closing time for the relevant stock exchange for such security on that day; or
 - the closure on any exchange business day of the relevant stock exchange for such security prior to its scheduled closing time unless the earlier closing is announced by such relevant stock exchange at least one hour prior to the earlier of (i) the actual closing time for the regular trading session on such relevant stock exchange and (ii) the submission deadline for orders to be entered into the relevant stock exchange system for execution at the scheduled closing time for such relevant stock exchange on that day.
- (B) Any of the following events occurs or exists with respect to futures or options contracts relating to such Reference Asset or any successor index:
 - a material suspension of or limitation imposed on trading by any related futures or options exchange or otherwise at any time during the one-hour period that ends at the close of trading on such related futures or options exchange on that day, whether by reason of movements in price exceeding limits permitted by the related futures or options exchange or otherwise;
 - any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, futures or options contracts relating to such Reference Asset or successor index on any related futures or options exchange at any time during the one-hour period that ends at the close of trading on such related futures or options exchange on that day; or
 - the closure on any exchange business day of any related futures or options exchange prior to its scheduled closing time unless the earlier closing time is announced by such related futures or options exchange at least one hour prior to the earlier of (i) the actual closing time for the regular trading session on such related futures or

options exchange and (ii) the submission deadline for orders to be entered into the related futures or options exchange system for execution at the close of trading for such related futures or options exchange on that day.

- (C) The Index Sponsor fails to publish the level of such Reference Asset or any successor index (other than as a result of the Index Sponsor having discontinued publication of such Reference Asset or successor index and no successor index being available).
- (D) Any related futures or options exchange fails to open for trading during its regular trading session.

For purposes of determining whether a market disruption event has occurred with respect the Reference Asset:

- (1) the relevant percentage contribution of a security included in such Reference Asset or any successor index to the level of such index will be based on a comparison of (x) the portion of the level of such index attributable to that security to (y) the overall level of such index, in each case using the official opening weightings as published by the Index Sponsor as part of the market opening data;
- (2) the “scheduled closing time” of any relevant stock exchange or related futures or options exchange on any trading day means the scheduled weekday closing time of such relevant stock exchange or related futures or options exchange on such trading day, without regard to after hours or any other trading outside the regular trading session hours;
- (3) an “exchange business day” means any trading day on which (i) the Index Sponsor publishes the level of such Reference Asset or any successor index and (ii) each related futures or options exchange is open for trading during its regular trading session, notwithstanding any related futures or options exchange closing prior to its scheduled closing time; and
- (4) the “relevant stock exchange” for any security underlying the Reference Asset means the primary exchange or quotation system on which such security is traded, as determined by the calculation agent.

If a market disruption event occurs or is continuing with respect to the Reference Asset on the Valuation Date, then such Valuation Date will be postponed to the first succeeding trading day on which a market disruption event has not occurred and is not continuing; however, if such first succeeding trading day has not occurred as of the eighth trading day after the originally scheduled Valuation Date, that eighth trading day shall be deemed to be the Valuation Date. If the Valuation Date has been postponed eight trading days after the originally scheduled Valuation Date and a market disruption event occurs or is continuing on such eighth trading day, the calculation agent will determine the closing level of such Reference Asset on such eighth trading day in accordance with the formula for and method of calculating the closing level of such Reference Asset last in effect prior to commencement of the market disruption event, using the closing price (or, with respect to any relevant security, if a market disruption event has occurred with respect to such security, its good faith estimate of the value of such security at the time at which the official closing level of such Reference Asset is calculated and published by the Index Sponsor) on such date of each security included in such Reference Asset. As used herein, “closing price” means, with respect to any security on any date, the relevant stock exchange traded or quoted price of such security as of the time at which the official closing level of such Reference Asset is calculated and published by the Index Sponsor.

Additional Risk Factors

The Securities involve risks not associated with an investment in conventional debt securities. This section describes the most significant risks relating to the terms of the Securities. For additional information as to these risks, please see “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and “Risk Factors” in the prospectus.

You should carefully consider whether the Securities are suited to your particular circumstances before you decide to purchase them. Accordingly, prospective investors should consult their investment, legal, tax, accounting and other advisors as to the risks entailed by an investment in the Securities and the suitability of the Securities in light of their particular circumstances.

Principal at Risk.

Investors in the Securities could lose a substantial portion of their Principal Amount if there is a decline in the level of the Reference Asset by more than the Buffer Percentage. You will lose 1% of the Principal Amount of your Securities for each 1% that the Final Level is less than the Initial Level by more than the Buffer Percentage and you may lose up to 80% of your Principal Amount.

The Securities Do Not Pay Interest and Your Return on the Securities May Be Lower Than the Return on a Conventional Debt Security of Comparable Maturity.

There will be no periodic interest payments on the Securities as there would be on a conventional fixed-rate or floating-rate debt security having the same term. The return that you will receive on the Securities, which could be negative, may be less than the return you could earn on other investments. Even if your return is positive, your return may be less than the return you would earn if you bought a conventional senior interest bearing debt security of TD.

Your Potential Return on the Securities Will Be Limited by the Maximum Redemption Amount and May Be Less Than the Return on a Hypothetical Direct Investment In the Reference Asset.

The opportunity to participate in the possible increases in the Percentage Change of the Reference Asset through an investment in the Securities will be limited because the Payment at Maturity will not exceed the Maximum Redemption Amount. Furthermore, the effect of the Leverage Factor will not be taken into account for any Percentage Change that, when multiplied by the Leverage Factor, exceeds the maximum return on the Securities (75.00% to 85.00% of the Principal Amount) regardless of how much the Reference Asset has appreciated. Accordingly, your return on the Securities may be less than your return would be if you made a hypothetical investment in a security directly linked to the performance of the Reference Asset or made a hypothetical investment in the Reference Asset, or the Reference Asset Constituents.

Investors Are Subject to TD's Credit Risk, and TD's Credit Ratings and Credit Spreads May Adversely Affect the Market Value of the Securities.

Although the return on the Securities will be based on the performance of the Reference Asset, the payment of any amount due on the Securities is subject to TD's credit risk. The Securities are TD's senior unsecured debt obligations. Investors are dependent on TD's ability to pay all amounts due on the Securities on the Maturity Date and, therefore, investors are subject to the credit risk of TD and to changes in the market's view of TD's creditworthiness. Any decrease in TD's credit ratings or increase in the credit spreads charged by the market for taking TD's credit risk is likely to adversely affect the market value of the Securities.

The Agent Discount, Offering Expenses and Certain Hedging Costs Are Likely to Adversely Affect Secondary Market Prices.

Assuming no changes in market conditions or any other relevant factors, the price, if any, at which you may be able to sell the Securities will likely be lower than the public offering price. The public offering price includes, and any price quoted to you is likely to exclude, the underwriting discount paid in connection with the initial distribution, offering expenses as well as the cost of hedging our obligations under the Securities. In addition, any such price is also likely to reflect dealer discounts, mark-ups and other transaction costs, such as a discount to account for costs associated with establishing or unwinding any related hedge transaction. In addition, because an affiliate of Wells Fargo Securities is to conduct hedging activities for us in connection with the Securities, that affiliate may profit in connection with such hedging activities and such profit, if any, will be in addition to the compensation that the dealer receives for the sale of the Securities to you. You should be aware that the potential to earn fees in connection with hedging activities may create a further incentive for the dealer to sell the Securities to you in addition to the compensation they would receive for the sale of the Securities.

There May Not Be an Active Trading Market for the Securities — Sales in the Secondary Market May Result in Significant Losses.

There may be little or no secondary market for the Securities. The Securities will not be listed on any securities exchange. The Agents and their respective affiliates may make a market for the Securities; however, they are not required to do so. The Agents and their respective affiliates may stop any market-making activities at any time. Even if a secondary market for the Securities develops, it may not provide significant liquidity or trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your Securities in any secondary market could be substantial.

If you sell your Securities before the Maturity Date, you may have to do so at a substantial discount from the public offering price irrespective of the level of the Reference Asset, and as a result, you may suffer substantial losses.

If the Level of the Reference Asset Changes, the Market Value of Your Securities May Not Change in the Same Manner.

Your Securities may trade quite differently from the performance of the Reference Asset. Changes in the level of the Reference Asset may not result in a comparable change in the market value of your Securities. Even if the level of the Reference Asset increases above

its respective Initial Level during the life of the Securities, the market value of your Securities may not increase by the same amount and could decline.

The Payment at Maturity Is Not Linked to the Level of the Reference Asset at Any Time Other than the Valuation Date.

The Final Level will be based on the closing level of the Reference Asset on the Valuation Date (subject to adjustment as described elsewhere in this pricing supplement). Therefore, if the closing level of the Reference Asset dropped precipitously on the Valuation Date, the Payment at Maturity for your Securities may be significantly less than it would have been had the Payment at Maturity been linked to the closing level of the Reference Asset prior to such drop in the level of the Reference Asset. Although the actual level of the Reference Asset on the Maturity Date or at other times during the life of your Securities may be higher than their prices on the Valuation Date, you will not benefit from the closing level of the Reference Asset at any time other than the closing prices on the Valuation Date.

You Will Not Have Any Rights to the Reference Asset Constituents and the Reference Asset only Reflects Price Return.

As a holder of the Securities, you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the Reference Asset Constituents would have. The Reference Asset measures price return only and is not a total return index or strategy, meaning the Final Level will not reflect any dividends paid on the Reference Asset Constituents.

An Investment in the Securities Will Be Subject to Risks Associated with Non-U.S. Securities Markets.

The Reference Asset includes equity securities that have been issued by non-U.S. companies. An investment in securities linked to the value of non-U.S. equity securities involves particular risks. Non-U.S. securities markets may have less liquidity and be more volatile than U.S. securities markets, and market developments may affect non-U.S. securities markets differently from the U.S. securities markets. Direct or indirect government intervention to stabilize these non-U.S. securities markets, as well as cross shareholdings among non-U.S. companies, may affect trading prices and volumes in those markets. Also, there is generally less publicly available information in the U.S. about non-U.S. companies than about those U.S. companies that are subject to the reporting requirements of the SEC, and non-U.S. companies are subject to accounting, disclosure, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.

Securities prices in non-U.S. countries are subject to political, economic, financial, military and social factors that may be unique to the particular country. These factors, which could negatively affect the non-U.S. securities markets, include the possibility of recent or future changes in the economic and fiscal policies of non-U.S. governments, the possible imposition of, or changes in, currency exchange laws or other non-U.S. laws or restrictions applicable to non-U.S. companies or investments in non-U.S. equity securities, the possibility of fluctuations in the rate of exchange between currencies, the possibility of outbreaks of hostility and political instability and the possibility of natural disaster or adverse public health developments in the region. Moreover, the economies of certain foreign countries may differ favorably or unfavorably from the U.S. economy in important respects, such as growth of gross national product, rate of inflation, trade surpluses or deficits, capital reinvestment, resources and self-sufficiency.

Equity securities included in the Reference Asset may be listed on a foreign stock exchange. A foreign stock exchange may impose trading limitations intended to prevent extreme fluctuations in individual security prices and may suspend trading in certain circumstances. These actions could limit variations in the level of the Reference Asset.

The Percent Change for the Reference Asset Will Not Be Adjusted for Changes in Exchange Rates Relative to the U.S. Dollar Even Though the Equity Securities Included in the Reference Asset are Traded in a Non-U.S. Currency and the Securities are Denominated in U.S. Dollars.

The value of your Securities will not be adjusted for exchange rate fluctuations between the U.S. dollar and the currencies in which the equity securities included in the Reference Asset are based. Therefore, if the applicable currencies appreciate or depreciate relative to the U.S. dollar over the term of the Securities, you will not receive any additional payment at maturity, if any. The amount payable on the Maturity Date will be based solely upon the overall change in the level of the Reference Asset over the life of your Securities. Changes in foreign currency exchange rates, however, may reflect changes in the economy of the foreign countries in which the securities comprising the Reference Asset are listed that, in turn, may affect the level of the Reference Asset.

The U.K.'s Referendum to Leave the European Union May Adversely Affect the Performance of the Securities.

The Reference Asset Constituents are equity securities that have been issued by European Union member companies. The U.K.'s referendum on June 23, 2016 to leave the European Union, which we refer to as "Brexit," has and may continue to cause disruptions to capital and currency markets worldwide and to the markets tracked by those Reference Asset Constituents in particular. The full impact of the Brexit decision, however, remains uncertain. A process of negotiation, which is likely to take a number of years, will determine the future terms of the U.K.'s relationship with the European Union. The performance of the Reference Asset Constituents may be negatively affected by interest rate, exchange rate and other market and economic volatility, as well as regulatory and political uncertainty.

The Eurozone Financial Crisis Could Negatively Impact Investors in the Securities

A number of countries in the eurozone are undergoing a financial crisis affecting their economies, their ability to meet their sovereign financial obligations, and their financial institutions. Countries in the eurozone that are not currently experiencing a financial crisis may do so in the future as a result of developments in other eurozone countries. The economic, political, legal and regulatory ramifications of this financial crisis, including any legal or regulatory changes made in response to the crisis, are impossible to predict. During the crisis, the USD/EUR exchange rate may be significantly more volatile than it has been in the past (as may the exchange rate between the euro and other currencies). In response to this crisis, governments and regulatory bodies have taken, and may in the future take, extraordinary measures to intervene in the currency markets for the euro and the economies and financial institutions of the eurozone. Increased volatility caused by the crisis and any economic, political, legal or regulatory changes made to address, or otherwise resulting

from, the crisis and any intervention in the currency markets or eurozone economies could have an adverse effect on the USD/EUR exchange rate or the exchange rate between the euro and other currencies. There is also a possibility that one or more eurozone countries may cease to use the euro, which could also adversely affect the exchange rate between the euro and other currencies and potentially the convertibility of the euro in such countries. There is also the possibility that the euro may cease to exist or the USD/EUR exchange rate may otherwise become unavailable. If these events were to happen, the closing level of the Reference Asset, and the value of the Securities, could be adversely affected.

The Market Value of Your Securities May Be Influenced by Many Unpredictable Factors.

When we refer to the market value of your Securities, we mean the value that you could receive for your Securities if you choose to sell them in the open market before the Maturity Date. A number of factors, many of which are beyond our control, will influence the market value of your Securities, including:

- the level of the Reference Asset
- the volatility – i.e., the frequency and magnitude of changes – in the level of the Reference Asset;
- the dividend rates, if applicable, of the Reference Asset Constituents
- economic, financial, regulatory and political, military or other events that may affect the levels of the Reference Asset;
- interest rates in the market;
- the time remaining until your Securities mature;
- our creditworthiness, whether actual or perceived, and including actual or anticipated upgrades or downgrades in our credit ratings or changes in other credit measures.

These factors will influence the price you will receive if you sell your Securities before maturity, including the price you may receive for your Securities in any market-making transaction.

Past Reference Asset Performance is No Guide to Future Performance.

The actual performance of the Reference Asset over the life of the Securities, as well as the Payment at Maturity, may bear little relation to the historical closing levels of the Reference Asset or to the hypothetical return examples set forth elsewhere in this pricing supplement. We cannot predict the future performance of the Reference Asset.

There Are Potential Conflicts of Interest Between You and the Calculation Agent.

The Calculation Agent will, among other things, determine the amount of your payment on the Securities. We will serve as the Calculation Agent and may appoint a different Calculation Agent after the Issue Date without notice to you. The Calculation Agent will exercise its judgment when performing its functions and may take into consideration our ability to unwind any related hedges. For example, the Calculation Agent may have to determine whether a market disruption event affecting the Reference Asset has occurred. This determination may, in turn, depend on the Calculation Agent's judgment whether the event has materially interfered with our ability or the ability of one of our affiliates to unwind our hedge positions. Since this determination by the Calculation Agent will affect the payment on the Securities, the Calculation Agent may have a conflict of interest if it needs to make a determination of this kind. For additional information as to the Calculation Agent's role, see "General Terms of the Notes—Role of Calculation Agent" in the product prospectus supplement.

We Have No Affiliation with the Index Sponsor and Will Not Be Responsible for Any Actions Taken by the Index Sponsor.

STOXX Limited (the "Index Sponsor") is not an affiliate of ours and will not be involved in any offerings of the Securities in any way. Consequently, we have no control of any actions of the Index Sponsor, including any actions of the type that would require the Calculation Agent to adjust the payment to you at maturity. The Index Sponsor does not have any obligation of any sort with respect to the Securities. Thus, the Index Sponsor has no obligation to take your interests into consideration for any reason, including in taking any actions that might affect the value of the Securities. None of our proceeds from any issuance of the Securities will be delivered to the Index Sponsor, except to the extent that we are required to pay the Index Sponsor licensing fees with respect to the Reference Asset.

The Business Activities of the Issuer or its Affiliates May Create Conflicts of Interest.

We and our affiliates expect to engage in trading activities related to the Reference Asset or any Reference Asset Constituents that are not for the account of holders of the Securities or on their behalf. These trading activities may present a conflict between the holders' interests in the Securities and the interests we and our affiliates will have in their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for their customers and in accounts under their management. These trading activities, if they influence the level of the Reference Asset, could be adverse to the interests of the holders of the Securities. We and one or more of our affiliates may, at present or in the future, engage in business with the issuers of the Reference Asset Constituents, including making loans to or providing advisory services. These services could include investment banking and merger and acquisition advisory services. These activities may present a conflict between our or one or more of our affiliates' obligations and your interests as a holder of the Securities. Moreover, we, and our affiliates may have published, and in the future expect to publish, research reports with respect to the Reference Asset and/or any Reference Asset Constituents. This research is modified from time to time without

notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Securities. Any of these activities by us or one or more of our affiliates may affect the level of the Reference Asset, and, therefore, the market value of the Securities.

Hedging Activities May Adversely Affect the Market Value of the Securities.

We and any third party with whom we may enter into hedging arrangements with respect to the Securities may hedge by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the price of the Reference Asset, and may adjust these hedges by, among other things, purchasing or selling securities, futures, options or other derivative instruments at any time. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the Securities declines. We or these third parties may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the price of the Reference Asset.

These trading activities may present a conflict between the holders' interest in the Securities and the interests we and our affiliates will have in our or their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our or their customers' accounts and in accounts under our or their management. These trading activities could be adverse to the interests of the holders of the Securities.

Estimated Value

The Estimated Value of Your Securities Is Expected to Be Lower Than the Public Offering Price of Your Securities.

The estimated value of your Securities on the Pricing Date is expected to be lower, and may be significantly lower, than the public offering price of your Securities. The difference between the public offering price of your Securities and the estimated value of the Securities reflects costs and expected profits associated with selling and structuring the Securities, as well as hedging our obligations under the Securities. Because hedging our obligations entails risks and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or a loss.

The Estimated Value of Your Securities Is Based on Our Internal Funding Rate.

The estimated value of your Securities on the Pricing Date is determined by reference to our internal funding rate. The internal funding rate used in the determination of the estimated value of the Securities generally represents a discount from the credit spreads for our conventional fixed-rate debt securities and the borrowing rate we would pay for its conventional fixed-rate debt securities. This discount is based on, among other things, our view of the funding value of the Securities as well as the higher issuance, operational and ongoing liability management costs of the Securities in comparison to those costs for our conventional fixed-rate debt, as well as estimated financing costs of any hedge positions, taking into account regulatory and internal requirements. If the interest rate implied by the credit spreads for our conventional fixed-rate debt securities, or the borrowing rate we would pay for our conventional fixed-rate debt securities were to be used, we would expect the economic terms of the Securities to be more favorable to you. Additionally, assuming all other economic terms are held constant, the use of an internal funding rate for the Securities is expected to increase the estimated value of the Securities at any time.

The Estimated Value of the Securities Is Based on Our Internal Pricing Models; These May Prove to Be Inaccurate and May Be Different from the Pricing Models of Other Financial Institutions.

The estimated value of your Securities on the Pricing Date is based on our internal pricing models. Our pricing models take into account a number of variables, such as our internal funding rate on the Pricing Date, and are based on a number of subjective assumptions, which are not evaluated or verified on an independent basis and may or may not materialize. Further, our pricing models may be different from other financial institutions' pricing models and the methodologies used by us to estimate the value of the Securities may not be consistent with those of other financial institutions that may be purchasers or sellers of the Securities in the secondary market. As a result, the secondary market price of your Securities may be materially lower than the estimated value of the Securities determined by reference to our internal pricing models. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect.

The Estimated Value of Your Securities Is Not a Prediction of the Prices at Which You May Sell Your Securities in the Secondary Market, if Any, and Such Secondary Market Prices, if Any, Will Likely Be Lower Than the Public Offering Price of Your Securities and May Be Lower Than the Estimated Value of Your Securities.

The estimated value of the Securities will not be a prediction of the prices at which the Agents, other affiliates of ours or third parties may be willing to purchase the Securities from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Securities in the secondary market at any time may be based on pricing models that differ from our pricing models and will be influenced by many factors that cannot be predicted, such as market conditions and any bid and ask spread for similar sized trades, and may be substantially less than our estimated value of the Securities. Further, as secondary market prices of your Securities take into account the levels at which our debt securities trade in the secondary market and do not take into account our various costs and expected profits associated with selling and structuring the Securities, as well as hedging our obligations under the Securities, secondary market prices of your Securities will likely be lower than the public offering price of your Securities. As a result, the price at which the Agents, other affiliates of ours or third parties may be willing to purchase the Securities from you in secondary market transactions, if any, will likely be lower than the price you paid for your Securities, and any sale prior to the Maturity Date could result in a substantial loss to you.

The Temporary Price at Which We May Initially Buy the Securities in the Secondary Market May Not Be Indicative of Future Prices of Your Securities.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agents may initially buy or sell the Securities in the secondary market (if the Agents make a market in the Securities, which they are not obligated to do) may exceed our estimated value of the Securities on the Pricing Date, as well as the secondary market value of the Securities, for a temporary period after the issue date of the Securities, as discussed further under “Additional Information Regarding Our Estimated Value of the Securities”. The price at which the Agents may initially buy or sell the Securities in the secondary market may not be indicative of future prices of your Securities.

The Valuation Date and Therefore the Maturity Date May be Postponed In the Case of a Market Disruption Event.

The Valuation Date and therefore the Maturity Date may be postponed in the case of a Market Disruption Event as described herein and in the product prospectus supplement. For a description of what constitutes a market disruption event as well as the consequences of that market disruption event, see “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement and “Summary” above.

Significant Aspects of the Tax Treatment of the Securities Are Uncertain.

Significant aspects of the U.S. tax treatment of the Securities are uncertain. You should consult your tax advisor about your tax situation and should read carefully the section entitled “Supplemental Discussion of U.S. Federal Income Tax Consequences” below.

For a more complete discussion of the Canadian federal income tax consequences of investing in the Securities, please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences.”

If you are not a Non-resident Holder (as that term is defined in the prospectus) for Canadian federal income tax purposes or if you acquire the Securities in the secondary market, you should consult your tax advisors as to the consequences of acquiring, holding and disposing of the Securities and receiving the payments that might be due under the Securities.

Hypothetical Returns

The examples, table and graph set out below are included for illustration purposes only. The **hypothetical** Percentage Changes of the Reference Asset used to illustrate the calculation of the Payment at Maturity (rounded to two decimal places) are not estimates or forecasts of the Final Level or the level of the Reference Asset on any trading day prior to the Maturity Date throughout the term of the Securities. All examples, the table and the graph are based on a hypothetical Initial Level of 3,500, assume a Buffer Percentage of 20% (the Buffer Level is 80% of the Initial Level), a Leverage Factor of 200%, a Maximum Redemption Amount of 180.00% of the Principal Amount (the midpoint of the Maximum Redemption Amount range of 175.00% to 185.00%), that a holder purchased Securities with an aggregate Principal Amount and public offering price of \$1,000 and that no market disruption event occurs on the Valuation Date.

Example 1— Calculation of the Payment at Maturity where the Percentage Change is positive and the Payment at Maturity is less than the Maximum Redemption Amount.

Percentage Change: 10%

Payment at Maturity: $\$1,000 + (\$1,000 \times 10\% \times 200\%) = \$1,000 + \$200 = \$1,200.00$

On a \$1,000 investment, a 10% Percentage Change results in a Payment at Maturity of \$1,200.00, a 20.00% return on the Securities.

Example 2— Calculation of the Payment at Maturity where the Percentage Change is positive and the Payment at Maturity equals the Maximum Redemption Amount.

Percentage Change: 50%

Payment at Maturity: $\$1,000 + (\$1,000 \times 50\% \times 200\%) = \$1,000 + \$1,000.00 = \$2,000.00$ however, the Maximum Payment Amount is \$1,800.00, and the Payment at Maturity would be \$1,800.00.

On a \$1,000 investment, a 50% Percentage Change results in a Payment at Maturity equal to the Maximum Redemption Amount, an 80.00% return on the Securities, because that amount is the lesser of the Maximum Redemption amount and \$2,000.00.

In addition to limiting your return on the Securities, the Maximum Redemption Amount limits the positive effect of the Leverage Factor. If the Final Level is greater than the Initial Level, you will participate in the performance of the Reference Asset at a rate of 200% up to a certain point. However, the effect of the Leverage Factor will be progressively reduced for Final Levels that are greater than 140.00% of the Initial Level (assuming a Maximum Redemption Amount of 180.00% or \$1,800.00 per Security, the midpoint of the specified range for the Maximum Redemption Amount) since your return on the Securities for any Final Level greater than approximately 140.00% of the Initial Level will be limited to the Maximum Redemption Amount.

Example 3— Calculation of the Payment at Maturity where the Percentage Change is negative (but greater than or equal to -20%).

Percentage Change: -13%

Payment at Maturity: At maturity, if the Percentage Change is negative BUT greater than or equal to -20%, then the Payment at Maturity will equal the Principal Amount.

On a \$1,000 investment, a -13% Percentage Change results in a Payment at Maturity of \$1,000.00, a 0.00% return on the Securities.

Example 4— Calculation of the Payment at Maturity where the Percentage Change is less than -20%.

Percentage Change: -35%

Payment at Maturity: $\$1,000 + [\$1,000 \times (-35\% + 20\%)] = \$1,000 - \$150 = \850.00

On a \$1,000 investment, a -35% Percentage Change results in a Payment at Maturity of \$850.00, a -15.00% return on the Securities.

The following table and graph show the return profile for the Securities at the Maturity Date, assuming that the investor purchased the Securities on the Pricing Date and held the Securities until the Maturity Date. The returns illustrated in the following table are not estimates or forecasts of the Percentage Change or the return on the Securities. Neither TD nor either Agent is predicting or guaranteeing any gain or particular return on the Securities.

Hypothetical Final Level	Hypothetical Percentage Change	Hypothetical Payment at Maturity (\$)	Hypothetical Return on Securities ² (%)
7,000.000	100.00%	\$1,800.00	80.000%
6,125.000	75.00%	\$1,800.00	80.000%
5,250.000	50.00%	\$1,800.00	80.000%
4,900.000	40.00%	\$1,800.00	80.000%
4,550.000	30.00%	\$1,600.00	60.000%
4,200.000	20.00%	\$1,400.00	40.000%
3,850.000	10.00%	\$1,200.00	20.000%
3,675.000	5.00%	\$1,100.00	10.000%
3,587.500	2.50%	\$1,050.00	5.000%
3,500.000	0.00%	\$1,000.00	0.000%
3,325.000	-5.00%	\$1,000.00	0.000%
3,150.000	-10.00%	\$1,000.00	0.000%
2,975.000	-15.00%	\$1,000.00	0.000%
2,800.000	-20.00%	\$1,000.00	0.000%
2,450.000	-30.00%	\$900.00	-10.000%
2,100.000	-40.00%	\$800.00	-20.000%
1,750.000	-50.00%	\$700.00	-30.000%
875.000	-75.00%	\$450.00	-55.000%
0.000	-100.00%	\$200.00	-80.000%

¹ This is the hypothetical Initial Level; the actual Initial Level will be set on the Pricing Date.

² The "return" as used in this pricing supplement is the number, expressed as a percentage, that results from comparing the difference between the Payment at Maturity per Security and the Principal Amount.

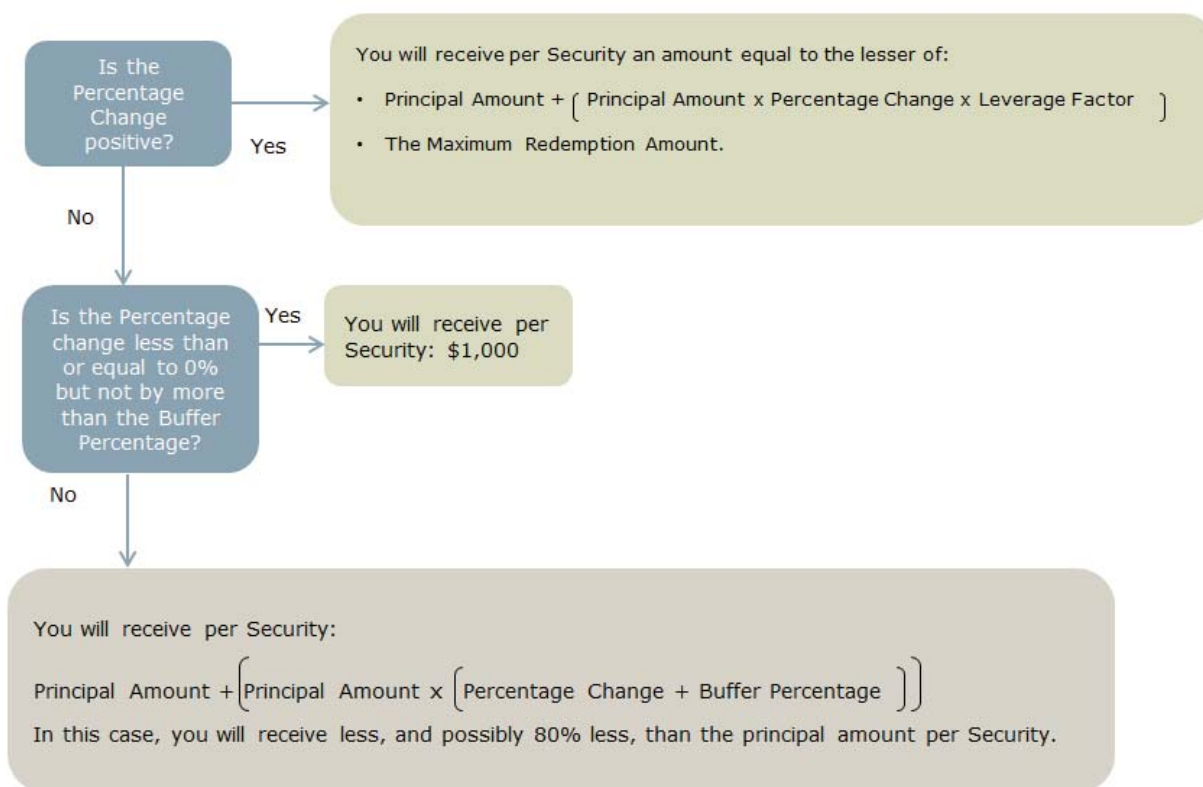

* These calculations are hypothetical and should not be taken as an indication of the future performance of the Reference Asset as measured from the actual Pricing Date. We cannot give you assurance that the performance of the Reference Asset will result in any positive return on your initial investment.

* The graph above represents a hypothetical payout profile for the Securities. The 45 degree dotted line represents the hypothetical Percentage Change of the Reference Asset and the solid line represents the hypothetical return on the Securities for a given Percentage Change in the Reference Asset.

Determining the Payment at Maturity

On the Maturity Date, you will receive a cash payment per Security (the Payment at Maturity) calculated as follows:

Information Regarding the Reference Asset

The EURO STOXX 50[®] Index

We have derived all information regarding the EURO STOXX 50[®] Index contained in this pricing supplement, including without limitation, its make-up, method of calculation and changes in its components from publicly available information. Such information reflects the policies of, and is subject to change by STOXX Limited.

The SX5E is a free-float market capitalization-weighted index of 50 European blue-chip stocks and was created by and is sponsored and maintained by STOXX Limited. Publication of the SX5E Index began on February 26, 1998, based on an initial index value of 1,000 at December 31, 1991. The level of the SX5E Index is disseminated on the STOXX Limited website. STOXX Limited is under no obligation to continue to publish the SX5E and may discontinue publication of it at any time. Additional information regarding the SX5E Index may be obtained from the STOXX Limited website: <http://www.stoxx.com>. We are not incorporating by reference the website or any material it includes in this pricing supplement.

The top ten constituent stocks of the EURO STOXX 50[®] Index as of April 28, 2017, by weight, are: Total S.A. (4.79%), Siemens AG (4.63%), Sanofi (4.22%), Bayer AG (3.89%), SAP SE (3.81%), Banco Santander S.A. (3.62%), BASF SE (3.40%), Allianz SE (3.31%), Anheuser-Busch InBev N.V. (3.18%) and Unilever N.V. (3.14%); constituent weights may be found at stoxx.com/download/indices/factsheets/SX5GT.pdf under “Factsheets and Methodologies” and are updated periodically.

As of April 28, 2017, the top ten industry sectors which comprise the EURO STOXX 50[®] Index represent the following weights in the index: Automobiles & Parts (5.1%), Banks (15.7%), Chemicals (9.1%), Health Care (7.8%), Industrial Goods & Services (10.6%), Insurance (6.6%), Oil & Gas (6.3%), Personal & Household Goods (9.0%), Technology (7.0%) and Telecommunications (5.2%); industry weightings may be found at stoxx.com/download/indices/factsheets/SX5GT.pdf under “Factsheets and Methodologies” and are updated periodically. Percentages may not sum to 100% due to rounding. Sector designations are determined by the underlier sponsor using criteria it has selected or developed. Index sponsors may use very different standards for determining sector designations. In addition, many companies operate in a number of sectors, but are listed in only one sector and the basis on which that sector is selected may also differ. As a result, sector comparisons between indices with different index sponsors may reflect differences in methodology as well as actual differences in the sector composition of the indices.

As of April 28, 2017, the eight countries which comprise the EURO STOXX 50[®] Index represent the following weights in the index: Belgium (3.2%), Finland (1.3%), France (36.0%), Germany (33.5%), Ireland (1.2%), Italy (4.5%), Netherlands (9.7%) and Spain (10.7%); country weightings may be found at stoxx.com/download/indices/factsheets/SX5GT.pdf under “Factsheets and Methodologies” and are updated periodically.

The above information was derived from information prepared by the basket underlier sponsor, however, the percentages we have listed above are approximate and may not match the information available on the basket underlier sponsor's website due to subsequent corporation actions or other activity relating to a particular stock.

SX5E Composition.

The SX5E is composed of 50 underlier stocks chosen by STOXX Limited from the 19 EURO STOXX Supersector indices, which represent the Eurozone portion of the STOXX Europe 600 Supersector indices. STOXX Limited selects underlier stocks that have, in its view, a high degree of liquidity and represent the largest companies across all market sectors. The 19 supersectors from which stocks are selected for the SX5E are Automobiles & Parts, Banks, Basic Resources, Chemicals, Construction & Materials, Financial Services, Food & Beverages, Health Care, Industrial Goods & Services, Insurance, Media, Oil & Gas, Personal & Household Goods, Real Estate, Retail, Technology, Telecommunications, Travel & Leisure and Utilities, although stocks from each of these supersectors are not necessarily included at a given time.

Component Selection

The composition of the SX5E is reviewed by STOXX Limited annually in September. Within each of the 19 EURO STOXX Supersector indices, the respective index component stocks are ranked by free—float market capitalization. The largest stocks are added to the selection list until the coverage is close to, but still less than,

60% of the free—float market capitalization of the corresponding EURO STOXX Total Market Index Supersector Index. If the next highest—ranked stock brings the coverage closer to 60% in absolute terms, then it is also added to the selection list. All remaining stocks that are current SX5E components are then added to the selection list. The stocks on the selection list are then ranked by free—float market capitalization. The 40 largest stocks on the selection list are chosen as index components. The remaining 10 stocks are then selected from the largest current stocks ranked between 41 and 60. If the number of index components is still below 50, then the largest remaining stocks on the selection list are added until the SX5E contains 50 stocks. In exceptional cases, the STOXX Limited Management Board may make additions and deletions to the selection list.

Ongoing Maintenance of Component Stocks

TD SECURITIES (USA) LLC

WELLS FARGO SECURITIES, LLC

The component stocks of the SX5E are monitored on an ongoing monthly basis for deletion and quarterly basis for addition. Changes to the composition of the SX5E due to corporate actions (including mergers and takeovers, spin—offs, sector changes and bankruptcy) are announced immediately, implemented two trading days later and become effective on the next trading day after implementation.

The component stocks of the SX5E are subject to a “fast exit” rule. A component stock is deleted if it ranks 75 or below on the monthly selection list and it ranked 75 or below on the selection list of the previous month. The highest-ranked non-component stock will replace the exiting component stock. The SX5E is also subject to a “fast entry” rule. All stocks on the latest selection lists and initial public offering (IPO) stocks are reviewed for a fast-track addition on a quarterly basis. A stock is added if it qualifies for the latest blue-chip selection list generated at the end of February, May, August or November and if it ranks within the lower buffer (between 1 and 25) on the selection list. If added, the stock replaces the smallest component stock.

A deleted stock is replaced immediately to maintain the fixed number of stocks. The replacement is based on the latest monthly selection list. In the case of a merger or takeover where a component stock is involved, the original component stock is replaced by the new component stock. In the case of a spin-off, if the original stock was a component stock, then each spin-off stock qualifies for addition if it lies within the lower buffer (between 1 and 40) on the latest selection list. The largest qualifying spin-off stock replaces the original component stock, while the next qualifying spin-off stock replaces the lowest ranked component stock and likewise for other qualifying spin-off stocks.

The free float factors and outstanding number of shares for each underlier stock that STOXX Limited uses to calculate the SX5E, as described below, are reviewed, calculated and implemented on a quarterly basis and are fixed until the next quarterly review. Certain extraordinary adjustments to the free float factors and/or the number of outstanding shares are implemented and made effective more quickly. The timing depends on the magnitude of the change. Each component's weight is capped at 10% of the SX5E's total free float market capitalization. The free float factor reduces the underlier stock's number of shares to the actual amount available on the market. All holdings that are larger than five percent of the total outstanding number of shares and held on a long-term basis are excluded from the index calculation (including, but not limited to, stock owned by the company itself, stock owned by governments, stock owned by certain individuals or families, and restricted shares).

Index Calculation

STOXX Limited calculates the SX5E using the “Laspeyres formula,” which measures the aggregate price changes in the underlier stocks against a fixed base quantity weight. The discussion below describes the “price return” calculation of the SX5E. The applicable pricing supplement will describe the calculation of the SX5E if the underlier for your notes is not the price return calculation. The formula for calculating the SX5E value can be expressed as follows:

$$\text{SX5E} = \frac{\text{Free Float Market Capitalization of the SX5E}}{\text{Divisor}}$$

The “free float market capitalization of the SX5E” is equal to the sum of the product of the price, the number of shares, the free float factor and the weighting cap factor for each underlier stock as of the time the SX5E is being calculated. The index stocks trade in Euros and thus, no currency conversion is required. Where any index component stock price is unavailable on any trading day, the underlier sponsor will generally use the last reported price for such component stock.

In case the investability and tradability of the index and index based products is affected by an upcoming market or company event that is considered significant or “extreme” by the STOXX Management Board, the following actions or a combination of the following actions are taken. For all such changes a minimum notification period of two full trading days will be observed. The action scope may include but is not limited to:

- application of expert judgment for index component pricing data,
- adjustment of operational procedures,
- postponement of index adjustments,
- adjustment of selection lists,
- change of weights of index constituents by adjusting the number of shares, free-float factors or weighting cap-factors, or
- adjustment of index compositions.

EURO STOXX 50 Divisor

The SX5E is calculated using a divisor that helps to maintain the continuity of the index's value so that corporate actions do not artificially increase or decrease the level of the SX5E.

The divisor is calculated by starting with the previous divisor in effect for the SX5E (which we call the "original divisor value") and multiplying it by a fraction, the numerator of which is the previous free float market capitalization of the SX5E, plus or minus the difference between the closing market capitalization of the SX5E and the adjusted closing market capitalization of the SX5E, and the denominator of which is the previous free float market capitalization of the SX5E. The adjusted free float market capitalization is calculated for stocks of companies that have experienced a corporate action of the type described below as of the time the new divisor value is being calculated using the free float market capitalization calculated with adjusted closing prices, the new number of shares, and the new free float factor minus the free float market capitalization calculated with that stock's original closing price, number of shares, and free float factor, in each case as used in calculating the original divisor value. Errors in divisor calculation are corrected on an intraday basis if discovered on the same day the new divisor is effective. If the error is discovered later, the error is corrected on an intraday basis if feasible and only if the error is considered significant by the STOXX Limited Management Board.

Divisor Adjustments

STOXX Limited adjusts the divisor for the SX5E to maintain the continuity of the SX5E values across changes due to corporate actions. Changes in weights due to corporate actions are distributed proportionally across all index components and equal an investment into the portfolio. The following is a summary of the adjustments to any underlier stock made for corporate actions and the effect of such adjustments on the divisor, where shareholders of the underlier stock will receive "B" new shares for every "A" share held (where applicable) and assuming that the version of the index to which your notes are linked is the price return version. If your notes are linked to the total return calculation of the SX5E, please see the discussion in your pricing supplement regarding divisor adjustments. All adjusted prices consider withholding taxes based on the new shares being distributed, using "B * (1 – withholding tax where applicable)".

(1) Special cash dividend:

Adjusted price = closing price – dividend announced by the company * (1- withholding tax if applicable)

Divisor: decreases

(2) Split and reverse split:

Adjusted price = closing price * A / B

New number of shares = old number of shares * B /

A Divisor: no change

(3) Rights offering:

Adjusted price = (closing price * A + subscription price * B) / (A + B)

New number of shares = old number of shares * (A + B) / A

Divisor: increases

If the subscription price is not available or if the subscription price is equal to or greater than the closing price on the day before the effective date, then no adjustment is made.

Extremely dilutive rights issues having a share ratio larger or equal to 2000% ($B/A \geq 20$) are treated as follows:

STOXX will announce the deletion of the company from all indices following the standard rules for index replacements if sufficient notice of two trading days before the ex-date can be given.

The company may enter the indices again at the next periodic index review, but only after the new rights issue shares have been listed.

Extremely dilutive rights issues for which two trading days' notice before the ex-date cannot be given, and all highly dilutive rights issues having a share ratio larger or equal to 200% ($B/A > 2$) are treated as follows:

- The rights issue shares are included into the indices with a theoretical price on the ex-date;
- The rights issue shares must be listed on an eligible stock exchange and tradable starting on the ex-date,

- otherwise, only a price adjustment is made and the rights are not included;
- The rights issue shares will have the same parameters as the parent company;
- The rights issue shares will be removed after their first trading day at the close; and
- The number of shares and weighting factors will be increased after the new rights issue shares have been listed.

(4) *Stock dividend:*

Adjusted price = closing price * A / (A + B)

New number of shares = old number of shares * (A + B) / A

Divisor: no change

(5) *Stock dividend from treasury stock if treated as extraordinary dividend:*

Adjusted close = close – close * B / (A + B)

Divisor: decreases

(6) *Stock dividend of another company:*

Adjusted price = (closing price * A – price of other company * B) / A

Divisor: decreases

(7) *Return of capital and share consolidation:*

Adjusted price = [closing price – capital return announced by company * (1 – withholding tax)] * A / B

New number of shares = old number of shares * B / A

Divisor: decreases

(8) *Repurchase of shares / self-tender:*

Adjusted price = [(price before tender * old number of shares) – (tender price * number of tendered shares)] / (old number of shares – number of tendered shares)

New number of shares = old number of shares – number of tendered shares

Divisor: decreases

(9) *Spin– off:*

Adjusted price = (closing price * A – price of spin–off shares * B) / A

Divisor: decreases

(10) *Combination stock distribution (dividend or split) and rights offering:*

For this corporate action, the following additional assumptions apply:

Shareholders receive B new shares from the distribution and C new shares from the rights offering for every A share held; and

If A is not equal to one, all the following “new number of shares” formulae need to be divided by A.

If rights are applicable after stock distribution (one action applicable to another):

Adjusted price = [closing price * A + subscription price * C * (1 + B / A)] / [(A + B) * (1 + C / A)]

New number of shares = old number of shares * [(A + B) * (1 + C / A)] / A

Divisor: increases

If stock distribution is applicable after rights (one action applicable to another):

Adjusted price = (closing price * A + subscription price * C) / [(A + C) * (1 + B / A)]

New number of shares = old number of shares * [(A + C) * (1 + B / A)]

Divisor: increases

Stock distribution and rights (neither action is applicable to the other):

Adjusted price = (closing price * A + subscription price * C) / (A + B + C)

New number of shares = old number of shares * (A + B + C) / A

Divisor: increases

(11) Addition/deletion of a company

No price adjustments are made. The net change in market capitalization determines the divisor adjustment.

(12) Free float and shares changes

No price adjustments are made. The change in market capitalization determines the divisor adjustment.

The SX5E is the intellectual property of STOXX Limited, Zurich, Switzerland and/or its licensors ("Licensors"), which is used under license. The securities or other financial instruments based on the SX5E are in no way sponsored, endorsed, sold or promoted by STOXX and its Licensors and neither STOXX nor its Licensors shall have any liability with respect thereto.

License Agreement

We have entered into a non-exclusive license agreement with STOXX providing for the license to us and certain of our affiliated or subsidiary companies, in exchange for a fee, of the right to use indices owned and published by STOXX (including the SX5E) in connection with certain securities, including the Notes offered hereby.

The license agreement between us and STOXX requires that the following language be stated in this document:

STOXX has no relationship to us, other than the licensing of the SX5E and the related trademarks for use in connection with the Notes. STOXX does not:

- sponsor, endorse, sell, or promote the Notes;
- recommend that any person invest in the Notes offered hereby or any other securities;
- have any responsibility or liability for or make any decisions about the timing, amount, or pricing of the Notes;
- have any responsibility or liability for the administration, management, or marketing of the Notes; or
- consider the needs of the Notes or the holders of the Notes in determining, composing, or calculating the SX5E, or have any obligation to do so.

STOXX will not have any liability in connection with the Notes. Specifically:

- STOXX does not make any warranty, express or implied, and disclaims any and all warranty concerning:
- the results to be obtained by the Notes, the holders of the Notes or any other person in connection with the use of the SX5E and the data included in the SX5E;
- the accuracy or completeness of the SX5E and its data;
- the merchantability and the fitness for a particular purpose or use of the SX5E and its data;
- STOXX will have no liability for any errors, omissions, or interruptions in the SX5E or its data; and
- Under no circumstances will STOXX be liable for any lost profits or indirect, punitive, special, or consequential damages or losses, even if STOXX knows that they might occur.

The licensing agreement between us and STOXX is solely for their benefit and our benefit, and not for the benefit of the holders of the Notes or any other third parties.

Historical Information

We obtained the information regarding the historical performance of the Reference Asset in the table below from Bloomberg Financial Markets and have not conducted any independent review or due diligence. The table below sets forth the quarterly high, low, and period-end Closing Levels of the Reference Asset for each quarter in the period from January 2, 2007 through June 9, 2017. On June 9, 2017, the Closing Level of the Reference asset was 3,586.07. The historical performance of the Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the market price of the Reference Asset on any Valuation Date (including the Final Valuation Date).

Quarter Ending	Quarter High	Quarter Low	Quarter Close
March 30, 2007	4,272.32	3,906.15	4,181.03

The graph below sets forth the information relating to the historical performance of the Reference Asset.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS.

Supplemental Discussion of U.S. Federal Income Tax Consequences

General. The following is a general description of certain U.S. federal tax considerations relating to the Securities. Prospective purchasers of the Securities should consult their tax advisors as to the consequences under the tax laws of the country of which they are a resident for tax purposes and the tax laws of the U.S. of acquiring, holding and disposing of the Securities and receiving payments under the Securities. This summary is based upon the law as in effect on the date of this pricing supplement and is subject to any change in law that may take effect after such date. We urge you to read the more detailed discussion in the product prospectus supplement under “Supplemental Discussion of U.S. Federal Income Tax Consequences”.

No statutory, judicial or administrative authority directly discusses how the Securities should be treated for U.S. federal income tax purposes. As a result, the U.S. federal income tax consequences of your investment in the Securities are uncertain. Accordingly, we urge you to consult your tax advisor as to the tax consequences of your investment in the Securities (and of having agreed to the required tax treatment of your Securities described below) and as to the application of state, local or other tax laws to your investment in your Securities and the possible effects of changes in federal or other tax laws.

Section 1297. We will not attempt to ascertain whether any Reference Asset Constituent would be treated as a Passive Foreign Investment Company (“PFIC”) within the meaning of Section 1297 of the Internal Revenue Code of 1986, as amended (the “Code”). If any such entity were so treated, certain adverse U.S. federal income tax consequences might apply upon the sale, exchange, issuer call, redemption or maturity of a Security. You should refer to information filed with the SEC or the equivalent governmental authority by such entities and consult your tax advisor regarding the possible consequences to you if any such entity is or becomes a PFIC.

U.S. Tax Treatment. Pursuant to the terms of the Securities, the Bank and you agree, in the absence of a statutory, regulatory, administrative or judicial ruling to the contrary, to characterize your Securities as pre-paid derivative contracts with respect to the Reference Asset. If your Securities are so treated, you should generally recognize gain or loss upon the sale, exchange, redemption or maturity of your Securities in an amount equal to the difference between the amount you receive at such time and the amount you paid for your Securities. Such gain or loss should generally be long-term capital gain or loss if you have held your Securities for more than one year (otherwise such gain or loss should be short-term capital gain or loss). The deductibility of capital losses is subject to limitations.

In the opinion of our counsel, Cadwalader, Wickersham & Taft LLP, it would be reasonable to treat your Securities in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Securities, it is possible that your Securities could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization, such that the timing and character of your income from the Securities could differ materially from the treatment described above.

Possible Change in Law. The Internal Revenue Service (“IRS”) released a notice that may affect the taxation of holders of the Securities. According to Notice 2008-2, the IRS and the Treasury Department are actively considering whether a holder of an instrument such as the Securities should be required to accrue ordinary income on a current basis, and they are seeking taxpayer comments on the subject. It is not possible to determine what guidance they will ultimately issue, if any. It is possible, however, that under such guidance, holders of the Securities will ultimately be required to accrue income currently and this could be applied on a retroactive basis. The IRS and the Treasury Department are also considering other relevant issues, including whether additional gain or loss from such instruments should be treated as ordinary or capital, whether foreign holders of such instruments should be subject to withholding tax on any deemed income accruals, and whether the special “constructive ownership rules” of Section 1260 of the Code should be applied to such instruments.

In 2007, legislation was introduced in Congress that, if it had been enacted, would have required holders of Securities purchased after the bill was enacted to accrue interest income over the term of the Securities despite the fact that there will be no interest payments over the term of the Securities. It is not possible to predict whether a similar or identical bill will be enacted in the future, or whether any such bill would affect the tax treatment of your Securities.

Additionally, in 2013, the House Ways and Means Committee released in draft form certain proposed legislation relating to financial instruments. If enacted, the effect of this legislation generally would be to require instruments such as the Securities to be marked to market on an annual basis with all gains and losses to be treated as ordinary, subject to certain exceptions.

It is impossible to predict what any such legislation or administrative or regulatory guidance might provide, and whether the effective date of any legislation or guidance will affect Securities that were issued before the date that such legislation or guidance is issued. You are urged to consult your tax advisor as to the possibility that any legislative or administrative action may adversely affect the tax treatment of your Securities.

Medicare Tax on Net Investment Income. U.S. holders that are individuals or estates and certain trusts are subject to an additional 3.8% tax on all or a portion of their “net investment income,” or “undistributed net investment income” in the case of an estate or trust, which may include any income or gain with respect to the Securities, to the extent of their net investment income or undistributed net investment income (as the case may be) that, when added to their other modified adjusted gross income, exceeds \$200,000 for an unmarried individual, \$250,000 for a married taxpayer filing a joint return (or a surviving spouse), \$125,000 for a married individual filing a separate return, or the dollar amount at which the highest tax bracket begins for an estate or trust (which, in 2017, is \$12,500). The 3.8% Medicare tax is determined in a different manner than the regular income tax. U.S. holders should consult their advisors with respect to the 3.8% Medicare tax.

Specified Foreign Financial Assets. U.S. holders may be subject to reporting obligations with respect to their Securities if they do not hold their Securities in an account maintained by a financial institution and the aggregate value of their Securities and certain other “specified foreign financial assets” (applying certain attribution rules) exceeds \$50,000. Significant penalties can apply if a U.S. holder is required to disclose its Securities and fails to do so.

Treasury Regulations Requiring Disclosure of Reportable Transactions. Treasury regulations require U.S. taxpayers to report certain transactions (“Reportable Transactions”) on IRS Form 8886. An investment in the Securities or a sale of the Securities should generally not be treated as a Reportable Transaction under current law, but it is possible that future legislation, regulations or administrative rulings could cause your investment in the Securities or a sale of the Securities to be treated as a Reportable Transaction. You should consult with your tax advisor regarding any tax filing and reporting obligations that may apply in connection with acquiring, owning and disposing of Securities.

Backup Withholding and Information Reporting. The proceeds received from a sale, exchange, redemption or maturity of the Securities will be subject to information reporting unless you are an “exempt recipient” and may also be subject to backup withholding at the rate specified in the Code if you fail to provide certain identifying information (such as an accurate taxpayer number, if you are a U.S. holder) or meet certain other conditions.

Amounts withheld under the backup withholding rules are not additional taxes and may be refunded or credited against your U.S. federal income tax liability, provided the required information is furnished to the IRS.

Non-U.S. Holders. This section applies only if you are a non-U.S. holder. For these purposes, you are a non-U.S. holder if you are the beneficial owner of the Securities and are, for U.S. federal income tax purposes:

- a non-resident alien individual;
- a non-U.S. corporation; or
- an estate or trust that, in either case, is not subject to U.S. federal income tax on a net income basis on income or gain from the Securities.

If you are a non-U.S. holder, subject to Section 871(m) and FATCA, as discussed, you should generally not be subject to U.S. withholding tax with respect to payments on your Securities or to generally applicable information reporting and backup withholding requirements with respect to payments on your Securities if you comply with certain certification and identification requirements as to your non-U.S. status including providing us (and/or the applicable withholding agent) a properly executed and fully completed applicable IRS Form W-8. Subject to Section 897 and 871(m), as discussed below, gain from the sale, exchange, redemption or maturity of the Securities generally will not be subject to U.S. tax unless such gain is effectively connected with a trade or business conducted by you in the U.S. or unless you are a non-resident alien individual and are present in the U.S. for 183 days or more during the taxable year of such sale, exchange, redemption or maturity and certain other conditions are satisfied.

Section 871(m). A 30% withholding tax (which may be reduced by an applicable income tax treaty) is imposed under Section 871(m) of the Code on certain “dividend equivalents” paid or deemed paid to a non-U.S. holder with respect to a “specified equity-linked instrument” that references one or more dividend-paying U.S. equity securities or indices containing U.S. equity securities. The withholding tax can apply even if the instrument does not provide for payments that reference dividends. Treasury regulations provide that the withholding tax applies to all dividend equivalents paid or deemed paid on specified equity-linked instruments that have a delta of one (“delta one specified equity-linked instruments”) issued after 2016 and to all dividend equivalents paid or deemed paid on all other specified equity-linked instruments issued after 2017.

Based on the nature of the Securities and the Reference Asset, our counsel is of the opinion that the Securities should not be delta one specified equity-linked instruments and thus should not be subject to withholding on dividend equivalents. Our determination is not binding on the IRS, and the IRS may disagree with this determination. Furthermore, the application of Section 871(m) of the Code will depend on our determinations made upon issuance of the Securities. If withholding is required, we will not make payments of any additional amounts.

Nevertheless, after issuance, it is possible that your Securities could be deemed to be reissued for tax purposes upon the occurrence of certain events affecting the Reference Asset or the Reference Asset Constituents or your Securities, and following such occurrence your Securities could be treated as delta one specified equity-linked instruments that are subject to withholding on dividend equivalents. It is also possible that withholding tax or other tax under Section 871(m) of the Code could apply to the Securities under these rules if a non-U.S. holder enters, or has entered, into certain other transactions in respect of the Reference Asset or the Reference Asset Constituents or the Securities. A non-U.S. holder that enters, or has entered, into other transactions in respect of the Reference Asset or the Reference Asset Constituents or the Securities should consult its tax advisor regarding the application of Section 871(m) of the Code to its Securities in the context of its other transactions.

Foreign Account Tax Compliance Act. The Foreign Account Tax Compliance Act (“FATCA”) was enacted on March 18, 2010, and imposes a 30% U.S. withholding tax on “withholdable payments” (i.e., certain U.S.-source payments, including interest (and original issue discount), dividends, other fixed or determinable annual or periodical income, and the gross proceeds from a disposition of property of a type that can produce U.S.-source interest or dividends) and “passthru payments” (i.e., certain payments attributable to withholdable payments) made to certain foreign financial institutions (and certain of their affiliates) unless the payee foreign financial institution agrees (or is required), among other things, to disclose the identity of any U.S. individual with an account of the institution (or the relevant affiliate) and to annually report certain information about such account. FATCA also requires withholding agents making withholdable payments to certain foreign entities that do not disclose the name, address, and taxpayer identification number of any

substantial U.S. owners (or do not certify that they do not have any substantial U.S. owners) to withhold tax at a rate of 30%. Under certain circumstances, a holder may be eligible for refunds or credits of such taxes.

Pursuant to final and temporary Treasury regulations and other IRS guidance, the withholding and reporting requirements under FATCA will generally apply to certain “withholdable payments” made on or after July 1, 2014, certain gross proceeds on a sale or disposition occurring after December 31, 2018, and certain foreign passthru payments made after December 31, 2018 (or, if later, the date that final regulations defining the term “foreign passthru payment” are published). If, however, withholding is required, we (and/or the applicable withholding agent) will not be required to pay additional amounts with respect to the amounts so withheld. Foreign financial institutions and non-financial foreign entities located in jurisdictions that have an intergovernmental agreement with the U.S. governing FATCA may be subject to different rules.

Investors should consult their tax advisors about the application of FATCA, in particular if they may be classified as financial institutions (or if they hold their Securities through a non-U.S. entity) under the FATCA rules.

Because of the uncertainty regarding the application of the 30% withholding tax on dividend equivalents to the Securities, you are urged to consult your tax advisor regarding the potential application of Section 871(m) of the Code and the 30% withholding tax to an investment in the Securities.

As discussed above, alternative characterizations of the Securities for U.S. federal income tax purposes are possible. Should an alternative characterization of the Securities cause payments with respect to the Securities to become subject to withholding tax, we (or the applicable withholding agent) will withhold tax at the applicable statutory rate and we will not make payments of any additional amounts.

Both U.S. and non-U.S. holders should consult their tax advisors regarding the U.S. federal income tax consequences of an investment in the Securities, as well as any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction (including that of the Bank or any issuers of the Reference Asset Constituents).

Supplemental Plan of Distribution (Conflicts of Interest) - Selling Restrictions

We have appointed TDS, an affiliate of TD, and Wells Fargo Securities, as the agents for the sale of the Securities. Pursuant to the terms of a distribution agreement, the Agents will purchase the Securities from TD at the public offering price less the underwriting discount set forth on the cover page of this pricing supplement for distribution to other registered broker-dealers, including WFA, or will offer the Securities directly to investors. The Agents may resell the Securities to other registered broker-dealers at the public offering price less a concession not in excess of \$25.00 (2.50%) per Security. In addition to the concession allowed to WFA, Wells Fargo Securities will pay \$1.20 (0.12%) per Security of the agent's discount to WFA as a distribution expense fee for each Security sold by WFA. The Agents or other registered broker-dealers will offer the Securities at the public offering price set forth on the cover page of this pricing supplement. Certain dealers who purchase the Securities for sale to certain fee-based advisory accounts may forego some or all of their selling concessions, fees or commissions. The price for investors purchasing the Securities in these accounts may be as low as \$955.00 (95.50%) per Security. TD will reimburse TDS for certain expenses in connection with its role in the offer and sale of the Securities, and TD will pay TDS a fee in connection with its role in the offer and sale of the Securities.

We expect that delivery of the Securities will be made against payment for the Securities on or about July 6, 2017, which is the third (3rd) Business Day following the Pricing Date (this settlement cycle being referred to as “T+3”). See “Plan of Distribution” in the prospectus.

Conflicts of Interest. TDS is an affiliate of TD and, as such, has a “conflict of interest” in this offering within the meaning of Financial Industry Regulatory Authority, Inc. (“FINRA”) Rule 5121. In addition, TD will receive the net proceeds from the initial public offering of the Securities, thus creating an additional conflict of interest within the meaning of FINRA Rule 5121. Consequently, the offering is being conducted in compliance with the provisions of FINRA Rule 5121. TDS is not permitted to sell Securities in this offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder.

We may use this pricing supplement in the initial sale of the Securities. In addition, TDS or another of our affiliates may use this pricing supplement in a market-making transaction in the Securities after their initial sale. ***If a purchaser buys the Securities from us or TDS or another of our affiliates, this pricing supplement is being used in a market-making transaction unless we or TDS or another of our affiliates informs such purchaser otherwise in the confirmation of sale.***

Selling Restrictions

Argentina. The Toronto-Dominion Bank U.S. Medium-Term Notes program and the related offer of securities and the sale of securities under the terms and conditions provided herein does not constitute a public offering in Argentina. Consequently, no public offering approval has been requested or granted by the Comisión Nacional de Valores, nor has any listing authorization of the securities been requested on any stock market in Argentina.

Brazil. The securities may not be offered or sold to the public in Brazil. Accordingly, this pricing supplement and the accompanying prospectus supplement and prospectus have not been submitted to the Comissão de Valores Mobiliários for approval. Documents relating to this offering may not be supplied to the public as a public offering in Brazil or be used in connection with any offer for subscription or sale to the public in Brazil.

Chile. The securities have not been registered with the Superintendencia de Valores y Seguros in Chile and may not be offered or sold publicly in Chile. No offer, sales or deliveries of the securities, or distribution of this pricing supplement or the accompanying prospectus

supplement and prospectus, may be made in or from Chile except in circumstances that will result in compliance with any applicable Chilean laws and regulations.

Mexico. The securities have not been registered with the National Registry of Securities maintained by the Mexican National Banking and Securities Commission and may not be offered or sold publicly in Mexico. This pricing supplement and the accompanying prospectus supplement and prospectus may not be publicly distributed in Mexico.

Paraguay. This is a private and personal offering. The securities offered have not been approved by or registered with the National Securities Commission (Comisión Nacional de Valores) and are not part of a public offering as defined by the Paraguayan Securities Law. The information contained herein is for informational and marketing purposes only and should not be taken as an investment advice.

Taiwan. The securities may be made available outside Taiwan for purchase by Taiwan residents outside Taiwan but may not be offered or sold in Taiwan.

Additional Information Regarding Our Estimated Value of the Securities

The final terms for the Securities will be determined on the date the Securities are initially priced for sale to the public, which we refer to as the Pricing Date, based on prevailing market conditions on the Pricing Date, and will be communicated to investors in a final pricing supplement.

The economic terms of the Securities are based on our internal funding rate (which is our internal borrowing rate based on variables such as market benchmarks and our appetite for borrowing), and several factors, including any sales commissions expected to be paid to TDS or another affiliate of ours, any selling concessions, discounts, commissions or fees expected to be allowed or paid to non-affiliated intermediaries, the estimated profit that we or any of our affiliates expect to earn in connection with structuring the Securities, estimated costs which we may incur in connection with the Securities and an estimate of the difference between the amounts we pay to an affiliate of WFS and the amounts that an affiliate of WFS pays to us in connection with hedging your Securities as described further under “Supplemental Plan of Distribution (Conflicts of Interest) - Selling Restrictions” above. Because our internal funding rate generally represents a discount from the levels at which our benchmark debt securities trade in the secondary market, the use of an internal funding rate for the Securities rather than the levels at which our benchmark debt securities trade in the secondary market is expected to have an adverse effect on the economic terms of the Securities.

On the cover page of this pricing supplement, we have provided the initial estimated value range for the Securities. This range of estimated values was determined by reference to our internal pricing models which take into account a number of variables and are based on a number of assumptions, which may or may not materialize, typically including volatility, interest rates (forecasted, current and historical rates), price-sensitivity analysis, time to maturity of the Securities, and our internal funding rate. For more information about the initial estimated value, see “Additional Risk Factors” beginning on page P-7. Because our internal funding rate generally represents a discount from the levels at which our benchmark debt securities trade in the secondary market, the use of an internal funding rate for the Securities rather than the levels at which our benchmark debt securities trade in the secondary market is expected, assuming all other economic terms are held constant, to increase the estimated value of the Securities. For more information see the discussion under “Additional Risk Factors — The Estimated Value of Your Securities Is Based on Our Internal Funding Rate.”

Our estimated value on the Pricing Date is not a prediction of the price at which the Securities may trade in the secondary market, nor will it be the price at which the Agents may buy or sell the Securities in the secondary market. Subject to normal market and funding conditions, the Agents or another affiliate of ours intends to offer to purchase the Securities in the secondary market but it is not obligated to do so.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agents may initially buy or sell the Securities in the secondary market, if any, may exceed our estimated value on the Pricing Date for a temporary period expected to be approximately five months after the Issue Date because, in our discretion, we may elect to effectively reimburse to investors a portion of the estimated cost of hedging our obligations under the Securities and other costs in connection with the Securities which we will no longer expect to incur over the term of the Securities. We made such discretionary election and determined this temporary reimbursement period on the basis of a number of factors, including the tenor of the Securities and any agreement we may have with the distributors of the Securities. The amount of our estimated costs which we effectively reimburse to investors in this way may not be allocated ratably throughout the reimbursement period, and we may discontinue such reimbursement at any time or revise the duration of the reimbursement period after the issue date of the Securities based on changes in market conditions and other factors that cannot be predicted. **We urge you to read the “Additional Risk Factors” beginning on page P-7 of this pricing supplement.**
