FORM 10-Q

[X] QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended December 31, 2006

or

[] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 000-26658

PHARMACYCLICS, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

94-3148201

(IRS Employer Identification Number)

995 E. Arques Avenue

Sunnyvale, California 94085-4521

(Address of principal executive offices including zip code)

(408) 774-0330

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐

Accelerated filer ☒

Non-accelerated filer ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES ☐ NO ☒

As of January 31, 2007, there were 25,938,091 shares of the registrant's Common Stock, par value \$0.0001 per share, outstanding.

This quarterly report on Form 10-Q consists of 22 pages of which this is page 1. The Exhibits Index page immediately follows page 22.

PHARMACYCLICS, INC.
(a development stage enterprise)
NOTES TO CONDENSED FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

Basis of Presentation

The accompanying interim condensed financial statements have been prepared by Pharmacyclics, Inc. (the company or Pharmacyclics), without audit, in accordance with the instructions to Form 10-Q and, therefore, do not necessarily include all information and footnotes necessary for a fair statement of its financial position, results of operations and cash flows in accordance with accounting principles generally accepted in the United States. The balance sheet at June 30, 2006 is derived from the audited balance sheet at that date which is not presented herein.

In the opinion of management, the unaudited financial information for the interim periods presented reflects all adjustments, which are only normal and recurring, necessary for a fair statement of results of operations, financial position and cash flows. These condensed financial statements should be read in conjunction with the financial statements included in the company's Annual Report on Form 10-K for the fiscal year ended June 30, 2006. Operating results for interim periods are not necessarily indicative of operating results for an entire fiscal year.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts and the disclosure of contingent amounts in the company's financial statements and the accompanying notes. Actual results could differ from those estimates.

Share-Based Compensation

The company adopted SFAS 123R effective beginning July 1, 2005 using the modified prospective application transition method. The modified prospective application transition method requires that companies recognize compensation expense on new share-based payment awards and existing share-based payment awards that are modified, repurchased, or cancelled after the effective date. Additionally, compensation cost of the portion of awards of which the requisite service has not been rendered that are outstanding as of July 1, 2005 shall be recognized as the requisite service is rendered.

The fair value of each stock option is estimated on the date of grant using the Black-Scholes valuation model using the assumptions noted in the following table. Expected volatility is based on historical volatility data of the company's stock. The expected term of stock options granted is based on historical data and represents the period of time that stock options are expected to be outstanding. The expected term is calculated for and applied to one group of stock options as the company does not expect substantially different exercise or post-vesting termination behavior amongst its employee population. The risk-free rate of the stock options is based on a zero-coupon United States Treasury bond whose maturity period equals the expected term of the company's options.

	Six Months Ended	
	December 31,	
	2006	2005
Stock Option Plans:		
Expected dividend yield	0 %	0 %
Expected stock price volatility	76 %	70 %
Risk free interest rate	4.76 %	4.15 %
Expected life (years)	4.59	4.98
Employee Stock Purchase Plan:		
Expected dividend yield	0 %	0 %
Expected stock price volatility	54 %	54 %
Risk free interest rate	4.42 %	4.42 %
Expected life (years)	2.00	2.00

The weighted average estimated grant date fair value, as defined by SFAS 123, for options granted under the company's stock option plans during the six months ended December 31, 2006 and 2005 were \$2.85 and \$5.43 per share, respectively. The

weighted average estimated grant date fair value of purchase awards under the company's employee stock purchase plan during the six months ended December 31, 2006 and 2005 were \$3.30 and \$3.30 per share, respectively.

As of December 31, 2006, \$6,576,000 of total unrecognized compensation costs related to non-vested options are scheduled to be recognized over a weighted average period of 2.6 years. There were no capitalized share-based compensation costs at December 31, 2006.

The company accounts for equity instruments issued to non-employees for goods or services in accordance with the provisions of SFAS No. 123 and Emerging Task Force Issue No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services* ("EITF 96-18"). Accordingly, as these instruments vest, the company is required to remeasure the fair value of the equity instruments at each reporting period prior to vesting and then finally at the vesting date of the equity instruments.

Note 2 - Basic and Diluted Net Loss Per Share

Basic earnings per share is computed using the weighted average number of common shares outstanding during the period. Diluted net loss per share is computed using the weighted average number of common and potential common shares outstanding during the period. Potential common shares consist of shares issuable upon the exercise of stock options (using the treasury stock method). Options to purchase 4,729,643 and 4,682,201 shares of common stock were outstanding at December 31, 2006 and 2005, respectively, but have been excluded from the computation of diluted net loss per share because their effect was anti-dilutive.

Note 3 - Share-Based Compensation Plans:

2004 Equity Incentive Award Plan. In December 2004, stockholders approved the 2004 Equity Incentive Award Plan (the "2004 Plan") as a replacement for both the company's 1995 Stock Option Plan (the "1995 Plan") and the 1995 Non-Employee Directors Stock Option Plan (the "Directors Plan"). The adoption of the 2004 Plan included an increase of 600,000 in the number of shares available for issuance over the remaining shares available for issuance under the 1995 Plan and Directors Plan. In December 2005, the stockholders approved an increase in the total number of shares of common stock authorized for issuance under the 2004 Plan by an additional 1,000,000 shares. The 2004 Plan provides for the issuance of various types of equity awards, such as incentive stock options, nonstatutory stock options stock, restricted stock, stock appreciation rights and performance shares. The exercise price of all stock options granted under the 2004 Plan may not be less than the fair market value of the company's common stock on the date of grant and no stock option will be exercisable more than ten years after the date it is granted. Stock options for employees and consultants typically vest over four years. Non-employee Directors receive annual, automatic, non-discretionary grants of nonqualified stock options. Each new non-employee Director receives an option to purchase 10,000 shares as of the date he or she first becomes a Director. This option grant vests in equal annual installments over five years. In addition, on the date of each annual meeting, each individual re-elected as a non-employee Director will receive an automatic option grant to purchase an additional 7,500 shares of common stock, provided such individual has served as a Director for at least six months prior to the date of grant. This option grant vests in equal monthly installments over twelve months following the date of grant.

1995 Stock Option Plan. The company's 1995 Plan was adopted by the Board of Directors in August 1995. Options issued under the 1995 Plan can, at the discretion of the plan administrator, be either incentive stock options or nonqualified stock options. In December 2003, the stockholders approved amendments to the 1995 Plan (i) such that the exercise price of all stock options must be at least equal to the fair value of Pharmacyclics' common stock on the date of grant and (ii) that increased the total number of authorized shares under the plan to 5,345,724 shares of common stock. Generally, shares subject to options under the 1995 Plan vest over a four or five year period and are exercisable for a period of ten years. In December 2004, the remaining shares available for future grant under the 1995 Plan were transferred to the 2004 Plan. Additionally, if options granted under the 1995 Plan expire or otherwise terminate without being exercised, the shares of common stock reserved for such options again become available for future grant under the 2004 Plan.

1995 Non-Employee Directors Stock Option Plan. The company's Directors Plan was adopted by the Board of Directors on August 2, 1995 and provides for issuance of common stock to non-employee Directors pursuant to a predetermined formula. The exercise price of options granted under the Directors Plan must be at least equal to the fair value of Pharmacyclics' common stock on the date of grant. Each individual first elected or appointed as a non-employee Board member will automatically be granted, on the date of such election or appointment, a non-statutory option to purchase 10,000 shares of common stock vesting

over five years. In addition, on the date of each annual stockholders' meeting each individual who is to continue to serve as a non-employee Board member after that annual meeting and has been a member of the Board for at least six months will automatically be granted a non-statutory option to purchase 5,000 shares of common stock. A total of 271,667 shares of common stock have been reserved for issuance under the Directors Plan. In December 2004, the remaining shares available for future grant under the Directors Plan were transferred to the 2004 Plan. Additionally, if options granted under the Directors Plan expire or otherwise terminate without being exercised, the shares of common stock reserved for such options again become available for future grant under the 2004 Plan.

The company settles stock option exercises with newly issued common shares.

The following table summarizes the company's stock option activity for the six months ended December 31, 2006:

	Shares Available for Grant	Options Outstanding	
		Number	Weighted Average Exercise Price
Balance at June 30, 2006	1,088,095	5,266,802	\$ 13.26
Options Granted	(123,579)	123,579	4.57
Options Exercised	--	(133,164)	4.38
Options Forfeited	40,954	(40,954)	5.68
Options Cancelled	486,620	(486,620)	17.88
Balance at December 31, 2006	<u>1,492,090</u>	<u>4,729,643</u>	12.87

The total intrinsic value of stock options exercised during the six month periods ended December 31, 2006 and 2005 was approximately \$64,000 and \$372,000, respectively. No income tax benefits were realized by the company in the six month periods ended December 31, 2006 and 2005.

A summary of outstanding and vested stock options as of December 31, 2006 is as follows:

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Number of Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Number of Options	Weighted Average Exercise Price	Aggregate Intrinsic Value
\$3.22 - \$ 4.13	149,059	\$ 3.75	\$ --	95,276	\$ 3.54	\$ --
\$4.16 - \$ 4.16	1,176,116	4.16	--	148,476	4.16	--
\$4.25 - \$ 4.47	642,924	4.38	--	593,225	4.38	--
\$4.50 - \$ 7.39	620,062	6.78	--	551,703	6.91	--
\$7.43 - \$ 7.76	475,299	7.76	--	186,198	7.75	--
\$8.20 - \$ 15.75	481,218	11.75	--	370,162	11.94	--
\$17.63 - \$ 27.51	796,720	23.97	--	796,720	23.97	--
\$28.13 - \$ 58.06	356,945	49.24	--	356,945	49.24	--
\$66.13 - \$ 78.13	31,300	76.21	--	31,300	76.21	--
	<u>4,729,643</u>	\$ 12.87	<u>\$ 1,721,677</u>	<u>3,130,005</u>	\$ 16.70	<u>\$ 705,967</u>

As of December 31, 2006, the weighted average remaining contractual term of options outstanding and options vested was 6.49 and 5.23 years, respectively.

Employee Stock Purchase Plan. The company adopted an Employee Stock Purchase Plan (the "Purchase Plan") in August 1995. Qualified employees may elect to have a certain percentage of their salary withheld to purchase shares of the company's common stock under the Purchase Plan. The purchase price per share is equal to 85% of the fair market value of the stock on specified dates. Sales under the Purchase Plan in the six month periods ended December 31, 2006 and 2005 were 28,233 and 43,656 shares of common stock at an average price of \$4.58 and \$5.26, respectively. Shares available for future purchase under the Purchase Plan are 290,905 at December 31, 2006.

Note 4 - Comprehensive Loss

Comprehensive loss includes unrealized gains (losses) on marketable securities that are excluded from the results of operations.

The company's comprehensive losses were as follows:

	Three Months Ended December 31,		Six Months Ended December 31,	
	2006	2005	2006	2005
Net loss	\$ (5,977,000)	\$ (9,890,000)	\$ (12,468,000)	\$ (20,091,000)
Change in net unrealized losses				
on available-for-sale securities	31,000	78,000	124,000	84,000
Comprehensive loss	<u>\$ (5,946,000)</u>	<u>\$ (9,812,000)</u>	<u>\$ (12,344,000)</u>	<u>\$ (20,007,000)</u>

Note 5 – Recent Accounting Pronouncements

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108 (SAB 108). Due to diversity in practice among registrants, SAB 108 expresses SEC staff views regarding the process by which misstatements in financial statements are evaluated for purposes of determining whether financial statement restatement is

necessary. SAB 108 is effective for fiscal years ending after November 15, 2006, and early application is encouraged. We do not believe SAB 108 will have a material impact on our results from operations or financial position.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 (SFAS No. 157), "Fair Value Measurements" which clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy. SFAS No. 157 is effective the first quarter of our 2008 fiscal year with early adoption permitted. We have not yet determined the impact, if any, that the implementation of SFAS No. 157 will have on our financial statements.

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), which, among other things, requires applying a "more likely than not" threshold to the recognition and derecognition of tax positions. The provisions of FIN 48 will be effective for us on July 1, 2007. We are currently evaluating the impact of adopting FIN 48 on the financial statements, but we do not expect its adoption to have a significant transition effect.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with our interim financial statements and the related notes appearing at the beginning of this report. The interim financial statements and this Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the financial statements and notes thereto for the year ended June 30, 2006 and the related Management's Discussion and Analysis of Financial Condition and Results of Operations, both of which are contained in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 12, 2006.

The following discussion contains forward-looking statements that involve risks and uncertainties. These statements relate to future events, such as our future clinical and product development, financial performance and regulatory review of our product candidates. Our actual results could differ materially from any future performance suggested in this report as a result of various factors, including those discussed in Part II, Item 1A, "Risk Factors", and elsewhere in this report, in the company's Annual Report on Form 10-K for the fiscal year ended June 30, 2006 and in our other Securities and Exchange Commission reports and filings. All forward-looking statements are based on information currently available to Pharmacyclics; and we assume no obligation to update such forward-looking statements. Stockholders are cautioned not to place undue reliance on such statements.

Overview

Pharmacyclics is a pharmaceutical company focused on the development of products that improve therapeutic approaches to cancer and other diseases. To date, substantially all of our resources have been dedicated to the research and development of our products, and we have not generated any commercial revenues from the sale of our products. We do not expect to generate any product revenues until we receive the necessary regulatory and marketing approvals and launch one of our products, if at all.

We have incurred significant operating losses since our inception in 1991, and as of December 31, 2006, had an accumulated deficit of approximately \$301.4 million. The process of developing and commercializing our products requires significant research and development, preclinical testing and clinical trials, manufacturing arrangements as well as regulatory and marketing approvals. These activities, together with our general and administrative expenses, are expected to result in significant operating losses until the commercialization of our products generates sufficient revenues to cover our expenses. We expect that losses will fluctuate from quarter to quarter and that such fluctuations may be substantial. Our achieving profitability depends upon our ability, alone or with others, to successfully complete the development of our products under development, obtain required regulatory approvals and successfully manufacture and market our products.

Xcytrin, our lead product candidate, is an anti-cancer drug being evaluated in various clinical trials. Based on the clinical activity seen in our initial Phase 3 trial in patients with brain metastases from non-small cell lung cancer (NSCLC), we conducted a pivotal Phase 3 clinical trial to confirm the potential clinical benefits observed in patients with brain metastases from NSCLC. This trial, known as the **SMART** (Study of Neurologic Progression with **M**otexafin **G**adolinium **A**nd **R**adiation **T**herapy) trial, enrolled 554 patients with brain metastases from NSCLC. The SMART trial was designed to compare the safety and efficacy of whole brain radiation therapy (WBRT) alone to WBRT plus Xcytrin. The primary endpoint for the study was

time to neurologic progression (TNP) as determined by a blinded events review committee. In December 2005, we announced the top line results of this trial. Although patients receiving Xcytrin had a longer time to neurologic progression, the study's primary endpoint, the difference compared to patients in the control arm did not reach statistical significance.

The results of the study were presented at the 2006 Annual Meeting of the American Society of Clinical Oncology (ASCO). In the intent-to-treat analysis, the median TNP was 15.4 months for patients receiving WBRT plus Xcytrin compared to 10.0 months for patients treated with WBRT alone ($P=0.122$, hazard ratio=0.78). Substantial differences in patient characteristics and outcomes were observed for the 348 patients enrolled in North America (63 percent of all patients enrolled in the study) compared to the other regions. In North America, the median TNP for WBRT plus Xcytrin treatment was 24.2 months compared to 8.8 months for WBRT alone ($P=0.004$, hazard ratio=0.53). By contrast, for regions outside of North America, there was no significant difference in TNP between treatment arms. Xcytrin was well tolerated in the study. The most common drug related grade 3 and 4 adverse events were hypertension (4%), elevated liver enzymes (3%) and fatigue (3%), all of which were reversible. We believe the reasons for the regional differences in treatment benefit may be related to the time interval between diagnosis of brain metastases and initiation of WBRT.

In North America, most patients (79%) received WBRT within three weeks of their diagnosis of brain metastases. In certain European centers, there was substantial delay in the initiation of WBRT either due to use of chemotherapy as the initial therapy for brain metastases, or clinical practice patterns resulting in delays in access to radiation therapy. Moreover, there was an imbalance in treatment delay favoring the control arm of the study. As presented at ASCO in June of 2006, adjusting for this imbalance resulted in a treatment benefit for the Xcytrin arm of the study ($P=0.05$). We believe that the clinical data indicate Xcytrin benefited patients that had prompt treatment with WBRT, regardless of region, and that this benefit was progressively diminished by delay in initiation of radiation.

As presented at the Society of Neuro-Oncology Annual Meeting in November 2006, pooled data from two randomized trials involving 805 patients with brain metastases from NSCLC comparing Xcytrin plus WBRT to WBRT alone have shown a benefit for Xcytrin. In the pooled results analysis, the median TNP determined by a blinded events review committee was 15.4 months for patients receiving WBRT plus Xcytrin compared to 9.0 months for patients treated with WBRT alone ($P = 0.016$, hazard ratio = 0.73). Secondary endpoints also showed significant benefit for Xcytrin plus WBRT compared to WBRT alone: TNP as determined by investigators, $P = 0.015$, hazard ratio = 0.76; time to neurocognitive progression, $P = 0.02$, hazard ratio = 0.78.

Based on our review of the data from the SMART trial, pooled data from both of our randomized trials, and discussion with the FDA, we submitted a New Drug Application (NDA) to the FDA in December 2006, for the use of Xcytrin in combination with radiation therapy for the treatment of patients with brain metastases from NSCLC.

In November 2003, we were granted fast track designation by the FDA for the use of Xcytrin for the treatment of brain metastases from lung cancer. This designation will not impact the results of our trial nor will it affect the overall approvability of Xcytrin with the FDA, but it may assist in expediting the FDA's review of the application for the approval of Xcytrin. The FDA has also designated Xcytrin as an orphan drug for the treatment of brain metastases arising from solid tumors.

We continue to evaluate Xcytrin for the treatment of a diverse range of cancer types and in various clinical situations including Xcytrin as a single agent and in combination with chemotherapy and/or radiation therapy. We are enrolling patients in Phase 2 clinical trials with Xcytrin used alone to treat lung cancer and to treat hematologic cancers such as lymphomas and chronic lymphocytic leukemia. Phase 2 trials for recurrent lung cancer are underway evaluating Xcytrin given in combination with Taxotere[®] and in combination with Alimta[®]. We have completed enrollment in a Phase 2 clinical trial with Xcytrin used in combination with stereotactic radiosurgery for the treatment of brain metastases from solid tumors.

In April 2006, we acquired the following drug candidates from Celera Genomics:

- A novel compound, known as PCI-24781, that inhibits histone deacetylase enzymes (HDAC) and is in a Phase 1 study for the treatment of advanced solid tumors.
- A first-in-class HDAC-8 selective inhibitor in preclinical development for the potential treatment of cancer and inflammatory diseases.
- A first-in-class Factor VIIa inhibitor targeting a tumor signaling pathway involved in angiogenesis, tumor growth and metastases.

- B cell associated tyrosine kinase inhibitors potentially useful for treatment of lymphomas and autoimmune diseases.

We have also completed a Phase 1 clinical trial with Antrin[®] Angiophototherapy for the treatment of coronary artery disease in patients receiving balloon angioplasty and stents. We do not plan to conduct further clinical trials with Antrin unless we are able to enter into a corporate partnership arrangement for its continued commercial development.

We are subject to risks common to pharmaceutical companies developing products, including risks inherent in our research, development and commercialization efforts, preclinical testing, clinical trials, uncertainty of regulatory and marketing approvals, uncertainty of market acceptance of our products, history of and expectation of future operating losses, reliance on collaborative partners, enforcement of patent and proprietary rights, and the need for future capital. In order for a product to be commercialized, we must conduct preclinical tests and clinical trials, demonstrate efficacy and safety of our product candidates to the satisfaction of regulatory authorities, obtain marketing approval, enter into manufacturing, distribution and marketing arrangements, build a U.S. commercial oncology franchise, obtain market acceptance and, in many cases, obtain adequate coverage of and reimbursement for our products from government and private insurers. We cannot provide assurance that we will generate revenues or achieve and sustain profitability in the future.

Results of Operations

Revenues

	Three Months ended			Percent change	Six Months ended			Percent change
	December 31,		December 31,					
	2006	2005	2006		2005			
Contract and grant revenues	\$ --	\$ --	--	\$ 19,000	\$ --	--	--	

The increase in contract and grant revenues for the six months ended December 31, 2006 was the result of a federal grant awarded by the National Institutes of Health (NIH).

Research and Development

	Three Months ended			Percent change	Six Months ended			Percent change
	December 31,		December 31,					
	2006	2005	2006		2005			
Research and development expenses	\$ 4,810,000	\$ 6,698,000	-28%	\$ 9,888,000	\$ 14,002,000	-29%		

The decrease of 28% or \$1,888,000 in research and development expenses for the three months ended December 31, 2006 as compared to the three months ended December 31, 2005 was primarily due to a decrease of \$615,000 in share-based compensation expense, and a decrease of \$576,000 in outside clinical trial costs and \$247,000 in consulting expenses due to the completion of our Phase 3 SMART trial.

The decrease of 29% or \$4,114,000 in research and development expenses for the six months ended December 31, 2006 as compared to the six months ended December 31, 2005 was primarily due to a decrease of \$1,901,000 in outside clinical trial costs, a decrease of \$929,000 in share-based compensation expense, a decrease of \$358,000 in personnel and consulting expenses, and a decrease of \$315,000 in drug manufacturing costs.

We expect research and development expenses to increase in the second half of fiscal 2007 as compared to the first half of fiscal 2007.

Research and development costs are identified as either directly attributed to one of our research and development programs or as an indirect cost, with only direct costs being tracked by specific program. Direct costs consist of personnel costs directly associated with a program, preclinical study costs, clinical trial costs, and related clinical drug and device development and

manufacturing costs, drug formulation costs, contract services and other research expenditures. Indirect costs consist of personnel costs not directly associated with a program, overhead and facility costs and other support service expenses. The following table summarizes our principal product development initiatives, including the related stages of development for each product, the direct costs attributable to each product and total indirect costs for each respective period. The information in the column labeled “Estimated Completion of Phase” is only our estimate of the timing of completion of the current in-process development phase. The actual timing of completion of those phases could differ materially from the estimates provided in the table. For a discussion of the risks and uncertainties associated with the timing and cost of completing a product development phase, see Part II, Item IA, “Risk Factors.”

Prior to fiscal 1999, we did not track our research and development expenses by specific program and for this reason we cannot accurately estimate our total historical costs on a specific program basis. Direct costs by program and indirect costs are as follows:

Product	Description	Phase of Development	Estimated Completion of Phase	Related R&D Expenses Three Months ended December 31,		Related R&D Expenses Six Months ended December 31,	
				2006	2005	2006	2005
XCYTRIN	Cancer	Several Phase 1 trials Several Phase 2 trials Phase 3	Unknown Unknown Fiscal 2006	\$ 1,926,000	\$ 4,295,000	\$ 4,192,000	\$ 9,234,000
OTHER				488,000	163,000	881,000	421,000
Total direct costs.....				2,414,000	4,458,000	5,073,000	9,655,000
Indirect costs.....				2,396,000	2,240,000	4,815,000	4,347,000
Total research and development expenses.....				<u>\$ 4,810,000</u>	<u>\$ 6,698,000</u>	<u>\$ 9,888,000</u>	<u>\$ 14,002,000</u>

General and Administrative

	Three Months ended December 31,		Percent change	Six Months ended December 31,		Percent change
	2006	2005		2006	2005	
General and administrative expenses	\$ 1,686,000	\$ 3,686,000	-54%	\$ 3,610,000	\$ 7,071,000	-49%

The decrease of 54% or \$2,000,000 in general and administrative expenses for the three months ended December 31, 2006 as compared to the three months ended December 31, 2005 was primarily due to a \$683,000 decrease in commercialization expenses, a \$405,000 decrease in personnel expenses due to a lower number of employees and a \$651,000 decrease in share-based compensation expense.

The decrease of 49% or \$3,461,000 in general and administrative expenses for the six months ended December 31, 2006 compared to the six months ended December 31, 2005 was primarily due to a \$1,216,000 decrease in commercialization expenses, a \$1,181,000 decrease in share-based compensation expense and a \$811,000 decrease in personnel expenses.

We expect general and administrative expenses to increase in the second half of fiscal 2007 as compared to the first half of fiscal 2007.

Interest and Other, Net

	Three Months ended December 31,		Percent change	Six Months ended December 31,		Percent change
	2006	2005		2006	2005	
Interest and other, net	\$ 519,000	\$ 494,000	5%	\$ 1,011,000	\$ 982,000	3%

Our cash and marketable securities consist primarily of fixed rate instruments.

Liquidity and Capital Resources

Our principal sources of working capital have been private and public equity financings and proceeds from collaborative research and development agreements, as well as interest income.

As of December 31, 2006, we had approximately \$50,337,000 in cash, cash equivalents and marketable securities. Net cash used in operating activities of \$11,937,000 during the six months ended December 31, 2006, resulted primarily from our net loss, net of depreciation and amortization, share-based compensation expense and a net decrease in accounts payable and accrued liabilities. Net cash used in operating activities of \$15,763,000 during the six months ended December 31, 2005, resulted primarily from our net loss, net of depreciation and amortization, share-based compensation expense and increases in accounts payable and accrued liabilities.

Net cash used in investing activities of \$1,305,000 in the six months ended December 31, 2006 consisted primarily of purchases of marketable securities, net of maturities and sales of marketable securities. Net cash provided by investing activities of \$17,486,000 in the six months ended December 31, 2005, consisted primarily of maturities and sales of marketable securities.

Net cash provided by financing activities of \$22,003,000 in the six months ended December 31, 2006, consisted primarily of proceeds from a public offering of common stock. Net cash provided by financing activities of \$380,000 in the six months December 31, 2005 consisted primarily of proceeds from the issuance of shares from the Company's stock plans.

In August 2006, we entered into a common stock purchase agreement with Azimuth Opportunity Ltd., which provides that, upon the terms and subject to the conditions set forth in the purchase agreement, Azimuth is committed to purchase, at our discretion, up to \$20.0 million of our common stock, or 4,189,337 shares, whichever occurs first, at a discount of 5 to 7%, to be determined based on our market capitalization at the start of each sale period. The term of the purchase agreement is 18 months. Upon each sale of our common stock to Azimuth under the purchase agreement, we have also agreed to pay Reedland Capital Partners a placement fee equal to one percent of the aggregate dollar amount of common stock purchased by Azimuth. Azimuth is not required to purchase our common stock if the price of our common stock falls below \$3.00 per share.

In February 2004, we filed a registration statement on Form S-3 to offer and sell, from time to time, equity, debt securities and warrants in one or more offerings up to a total dollar amount of \$100 million. In April 2004, we completed a public offering of common stock and sold 3,200,000 shares of common stock at a price of \$13.00 per share for net proceeds of approximately \$39,350,000. In November 2006, we completed a public offering of common stock and sold 4,830,000 shares of common stock at a price of \$4.75 per share for net proceeds of approximately \$21,300,000. We may seek to raise funds through additional public offerings in the future but cannot guarantee that such efforts will be successful.

Our future contractual obligations at December 31, 2006 are as follows:

	<u>Operating Lease Commitments</u>
Remaining 6 months of fiscal 2007	\$ 461,000
Fiscal 2008 and 2009	1,861,000
Fiscal 2010	487,000
After Fiscal 2010	--
Total	<u>\$ 2,809,000</u>

In April 2006, we acquired multiple small molecule drug candidates for the treatment of cancer and other diseases from Celera Genomics, an Applera Corporation business. Future milestone payments under the agreement could total as much as \$144 million, although we currently cannot predict if or when any of the milestones will be achieved. In addition, Celera will also be entitled to royalty payments in the mid- to high single digits based on annual sales of any drugs commercialized from these programs.

Based upon the current status of our product development and commercialization plans, we believe that our existing cash, cash equivalents and marketable securities will be adequate to satisfy our capital needs through at least the next twelve months. We expect research and development expenses, as a result of on-going and future clinical trials, to consume a large portion of our existing cash resources. Changes in our research and development plans or other changes affecting our operating expenses may affect actual future consumption of existing cash resources as well. In any event, we will need to raise substantial additional capital to fund our operations in the future. We expect to finance our future cash needs through public or private financings, collaborative relationships (partnerships with other drug manufacturers) or other arrangements to complete commercialization. Our actual capital requirements will depend on many factors, including the following:

- the progress and success of clinical trials of our product candidates;
- the costs and timing of obtaining regulatory approvals;
- our ability to establish and the scope of any new collaborations; and
- the timing and scope of commercialization expenses for Xcytrin.

Our forecast of the period of time through which our financial resources will be adequate to support our operations is a forward-looking statement that involves risks and uncertainties, and actual results could vary materially. The factors described above will impact our future capital requirements and the adequacy of our available funds. If we are required to raise additional funds, we cannot be certain that such additional funding will be available on terms attractive to us, or at all. Furthermore, any additional equity financing may be dilutive to existing stockholders and debt financing, if available, may involve restrictive covenants. Collaborative arrangements, if necessary to raise additional funds, may require us to relinquish rights to certain of our technologies, products or marketing territories. Our failure to raise capital when needed could have a material adverse effect on our business, financial condition and results of operations.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, changes in our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Critical Accounting Policies, Estimates and Judgments

This discussion and analysis of financial condition and results of operations is based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures. On an on-going basis, we evaluate our estimates, including those related to revenue recognition and clinical trial accruals. We base our estimates on historical experience and on various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results, however, may differ significantly from these estimates under different assumptions or conditions and may adversely affect the financial statements.

We believe the following critical accounting policies reflect the more significant judgments and estimates used in the preparation of our financial statements and accompanying notes.

Revenue Recognition

Revenues are recognized when persuasive evidence of an arrangement exists, title has transferred or services have been rendered, the price is fixed and determinable and collectibility is reasonably assured. License revenue is typically recognized over the term of the arrangement and milestone revenue is recognized when earned as evidenced by achievement of the specified milestone and the absence of any on-going obligation. License, milestone, contract and grant revenues are not subject to repayment. Any amounts received in advance of performance are recorded as deferred revenues.

Cash Equivalents and Marketable Securities

We maintain investment portfolio holdings of various issuers, types and maturities. We consider all highly liquid investments purchased with original maturities of three months or less to be cash equivalents. At December 31, 2006, all other investment securities are classified as available-for-sale and consequently are recorded on the balance sheet at fair value with unrealized gains and losses reported as a component of accumulated other comprehensive income (loss) within stockholders' equity. Management assesses whether declines in the fair value of investment securities are other than temporary. If the decline in fair value is judged to be other than temporary, the cost basis of the individual security is written down to fair value and the amount of the write down is included in earnings. In determining whether a decline is other than temporary, management considers the following factors:

- Length of the time and the extent to which the market value has been less than cost;
- The financial condition and near-term prospects of the issuer; and
- Our intent and ability to retain our investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

To date we have had no declines in fair value that have been identified as other than temporary.

Research and Development Expenses and Accruals

Research and development expenses include personnel and facility-related expenses, outside contracted services including clinical trial costs, manufacturing and process development costs, research costs and other consulting services. Research and development costs are expensed as incurred. In instances where we enter into agreements with third parties for clinical trials, manufacturing and process development, research and other consulting activities, costs are expensed upon the earlier of when non-refundable amounts are due or as services are performed. Amounts due under such arrangements may be either fixed fee or fee for service, and may include upfront payments, monthly payments, and payments upon the completion of milestones or receipt of deliverables.

Our cost accruals for clinical trials are based on estimates of the services received and efforts expended pursuant to contracts with numerous clinical trial centers and clinical research organizations. In the normal course of business we contract with third parties to perform various clinical trial activities in the on-going development of potential products. The financial terms of these agreements are subject to negotiation and vary from contract to contract and may result in uneven payment flows. Payments

under the contracts depend on factors such as the achievement of certain events, the successful enrollment of patients, the completion of portions of the clinical trial or similar conditions. The objective of our accrual policy is to match the recording of expenses in our financial statements to the actual services received and efforts expended. As such, expense accruals related to clinical trials are recognized based on our estimate of the degree of completion of the event or events specified in the specific clinical study or trial contract.

Share-Based Compensation

We have previously accounted for options issued to employees and members of the board of directors using the intrinsic method in accordance with Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* ("APB 25"). Beginning on July 1, 2005, we began to account for employee share-based payments in accordance with Statement of Financial Accounting Standards 123R ("SFAS 123R"), *Share-Based Payment - An Amendment of FASB Statements no. 123 and 95*. Under this standard, companies are no longer able to account for share-based compensation transactions in accordance with APB 25. Instead, companies are required to account for such transactions using a fair-value method and recognize the expense in the statement of operations.

We used the modified prospective application transition method to adopt SFAS 123R. The modified prospective application transition method requires that companies recognize compensation expense on new share-based payment awards and existing share-based payment awards that are modified, repurchased, or cancelled after the effective date. Additionally, compensation cost of the portion of awards of which the requisite service has not been rendered that are outstanding as of the July 1, 2005 shall be recognized as the requisite service is rendered. We use the Black-Scholes valuation model to determine the fair value of stock options issued. Volatility is based on the historical volatility of our common stock.

The fair value of each stock option is estimated on the date of grant using the Black-Scholes valuation model. Expected volatility is based on historical volatility data of the company's stock. The expected term of stock options granted is based on historical data and represents the period of time that stock options are expected to be outstanding. The expected term is calculated for and applied to one group of stock options as the company does not expect substantially different exercise or post-vesting termination behavior amongst its employee population. The risk-free rate of the stock options is based on a zero-coupon United States Treasury bond whose maturity period equals the expected term of the company's stock options.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to interest rate risk relates primarily to our investment portfolio. Fixed rate securities may have their fair market value adversely impacted due to fluctuations in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Due in part to these factors, our future investment income may fall short of expectations due to changes in interest rates or we may suffer losses in principal if forced to sell securities that have declined in market value due to changes in interest rates. The primary objective of our investment activities is to preserve principal while at the same time maximizing yields without significantly increasing risk. To achieve this objective, we invest in debt instruments of the U.S. Government and its agencies and high-quality corporate issuers, and, by policy, restrict our exposure to any single corporate issuer by imposing concentration limits. To minimize the exposure due to adverse shifts in interest rates, we maintain investments at an average maturity of generally less than two years. Assuming a hypothetical increase in interest rates of one percentage point, the fair value of our total investment portfolio as of December 31, 2006 would have declined by approximately \$242,000.

Item 4. Controls and Procedures

(a) *Evaluation of disclosure controls and procedures:* As required by Rule 13a-15 under the Securities Exchange Act of 1934, as of the end of the second fiscal quarter of 2007, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. This evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are adequate and effective to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and

procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) *Changes in internal controls over financial reporting:* There has been no change in our internal control over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings
Not Applicable.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended June 30, 2006, which have not materially changed other than as set forth below. Those risks, which could materially affect our business, financial condition or future results, are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

To generate revenue, we will depend on FDA approval of our lead product candidate, Xcytrin for the potential treatment of non-small cell lung cancer patients with brain metastases. If we are unable to obtain FDA approval, our ability to generate revenue will be significantly delayed.

Our ability to generate revenue will depend on the successful development, regulatory approval and commercialization of Xcytrin. In December 2005, we announced the top line results of our pivotal Phase 3 clinical study of Xcytrin for the potential treatment of non-small cell lung cancer (NSCLC) patients with brain metastases. Although patients receiving Xcytrin had a longer time to neurologic progression (TNP), the study's primary endpoint, the difference compared to patients in the control arm did not reach statistical significance.

Although we have received a Special Protocol Assessment (SPA) from the FDA for our Phase 3 SMART trial, the study did not meet its primary endpoint with statistical significance. Based on our ongoing review of the data from the SMART trial, in December 2006 we submitted a New Drug Application (NDA) to the FDA for the potential treatment of NSCLC patients with brain metastases. In meetings with FDA in early 2006, FDA noted that the applicable review Division has not approved drugs based on the results of non-pre-specified subgroup analyses when the trial has failed to meet its primary endpoint. FDA discouraged the submission of an NDA based on subset analyses from the SMART trial. However, in subsequent meetings with FDA and further review of the data, the Agency indicated a willingness to review an NDA based on analyses which include all of the data.

There can be no assurance that our NDA will be accepted for filing by the FDA. If the FDA determines after an initial review of the NDA that the data included in the application is insufficient and not ready for formal consideration, we could receive a "refuse to file" notice. The FDA has substantial discretion in the approval process and may disagree with our interpretation of the data from the Phase 3 SMART trial and data from the pooled analysis of our two randomized trials. The FDA could also require that we conduct additional studies and submit that data before it will reconsider our application, which would require us to expend more resources than we planned or that are available to us, and could substantially delay any approval of our application. If the FDA is not satisfied with data included in our NDA, we may need to expend additional resources or conduct additional studies, including clinical trials, to obtain data that the FDA believes is sufficient. It is also possible that additional studies may not suffice to make our application approvable. Even if the NDA is accepted for filing by the FDA, there can be no assurance that it would be approved in a timely manner or at all. Even though Xcytrin previously has received fast track designation and expedited review, the FDA may determine during the review of the NDA that this product does not merit this designation, which will delay the review process.

We have a history of operating losses and we expect to continue to have losses in the future.

We have incurred significant operating losses since our inception in 1991 and, as of December 31, 2006, had an accumulated deficit of approximately \$301.4 million. We expect to continue to incur substantial additional operating losses until such time, if ever, as the commercialization of our products generates sufficient revenues to cover our expenses. Our achieving profitability depends upon our ability, alone or with others, to successfully complete the development of our products, and to obtain required regulatory approvals and to successfully manufacture and market our proposed products. If our lead product, Xcytrin, fails to receive regulatory approval on a timely basis, or at all, our ability to become profitable would be materially impacted. To date, we have not generated revenue from the commercial sale of our products.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not Applicable.

Item 3. Defaults Upon Senior Securities

Not Applicable.

Item 4. Submission of Matters to a Vote of Security Holders

On December 8, 2006, at the company's 2006 Annual Meeting of Stockholders, the following matters were submitted to and voted on by stockholders and were adopted:

A. The election by the stockholders of Miles R. Gilburne, James L. Knighton, Richard M. Levy, Ph.D., Richard A. Miller, M.D., William R. Rohn and Christine A. White, M.D.

The results of the vote are as follows:

	Total Vote for Each Director	Total Vote Withheld from Each Director
Miles R. Gilburne	19,560,483	93,613
James L. Knighton	19,582,988	71,108
Richard M. Levy, Ph.D.	18,593,824	1,060,272
Richard A. Miller, M.D.	19,613,917	40,179
William R. Rohn	18,568,954	1,085,142
Christine A. White, M.D.	19,584,688	69,408

B. The amendment of the company's Employee Stock Purchase Plan (the "Purchase Plan") in order to increase the total number of common shares authorized for issuance over the term of the Purchase Plan by an additional 200,000 shares.

The results of the vote are as follows:

For	Against	Abstain	No Vote
12,774,681	246,547	109,948	6,522,920

C. The ratification of the appointment of PricewaterhouseCoopers LLP as the company's independent registered public accounting firm for the fiscal year ending June 30, 2007.

The results of the vote are as follows:

For	Against	Abstain
19,633,612	10,720	9,764

Item 5. Other Information
Not Applicable.

Item 6. Exhibits

31.1 Rule 13a-14(a)/15d-14(a) Certification of CEO.

31.2 Rule 13a-14(a)/15d-14(a) Certification of CFO.

32.1 Section 1350 Certifications of CEO and CFO.

EXHIBITS INDEX

<u>Exhibit Number</u>	<u>Description</u>
31.1	Rule 13a-14(a)/15d-14(a) Certification of CEO.
31.2	Rule 13a-14(a)/15d-14(a) Certification of CFO.
32.1	Section 1350 Certifications of CEO and CFO.

Rule 13a-14(a)/15d-14(a) Certification

I, Richard A. Miller, M.D., certify that:

1. I have reviewed this quarterly report on Form 10-Q of Pharmacyclics, Inc.
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant is made known to us by others within the registrant, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting;
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
