SYS Overview

For over thirty years, **SYS** has provided quality engineering and logistics support services to government and commercial customers. These services range from concept formulation and development for new systems and capabilities, to life cycle support of in-service systems. **SYS** has always risen to the challenge of new and evolving technology, techniques and capabilities to meet our customers' needs. Our General Services Administration (GSA) Professional Engineering Services (PES) Schedule contract for planning; development and analysis; design, engineering and integration; test and evaluation; and integrated logistics support, acquisition and life cycle management is the latest addition to our government contracting vehicles.

Our engineering and logistics management expertise has evolved in response to our customers' requirements. This expertise is central to the broad range of management, engineering and logistics support we provide. Some of our work experience includes concept studies, feasibility studies, systems and equipment design, prototype procurement, test development and evaluation, system installation design and installation support, integrated logistics support development and life-cycle support.

These services are routinely performed at our own facilities, at our customer facilities and at industrial complexes worldwide. Services range from highly abstract concept development with program implementation cost and time

estimates to hands-on support for in-service systems wherever they may be located.

SYS has been and continues to be under contract to provide professional engineering services to the U.S. Navy to support program managers in engineering and logistics development and support of weapons systems, combat systems and sub-systems such as radar, launcher and communications systems. We also continue long term support of the development, implementation and life cycle support of shipboard materials handling and replenishment systems.

The complexity of the electronic, electrical and mechanical systems we develop and support requires us to maintain a workforce with broad systems engineering and logistics capabilities and up-to-date skills. Our personnel have the required education, training, experience and skills to provide quality products in a cost effective and timely manner.

Our C4I Division provides top level system engineering, effects based planning capability development; program management and business development support; organizational management support; advanced concept development, test and evaluation; C4ISR system architecture design; information operations capabilities and numerous related Special Compartmented Information (SCI) efforts. The initial customer base includes SPAWAR Systems Center San Diego, Boeing Phantomworks, Program Executive Office Strike Weapons and Unmanned Aviation. The Division personnel work closely with other services and Joint Agencies as well as with Office of Naval Research, Defense Advanced Research Program Agency, ASN RD&A, OPNAV, Naval Warfare Development Center (NWDC), Joint Battle Center (JBC), and Battelle Labs.

As your requirements develop for engineering and logistics support, consider the use of this GSA PES contract. We are always available to provide specific information concerning our background, skills and capabilities that may meet your needs.

We invite you to visit our Web Site at www.ssys.com.

Customer Information

1a. Special Item Numbers: (note 1)

SIN 871-1 Strategic Planning for Technology Programs/Activities

SIN 871-2 Concept Development and Requirements Analysis

SIN 871-3 System Design, Engineering and Integration

SIN 871-4 Test and Evaluation

SIN 871-5 Integrated Logistics Support

SIN 871-6 Acquisition and Life Cycle Management

1b. See price list

2. Maximum Order: (note 2) \$750,000

3. Minimum Order: \$100

4. Geographic Coverage: National

5. Points of Production: Oxnard and San Diego, California and Arlington, Virginia

6. Discount from list prices or Statement of Net Price: Government customers receive 10% discount on all Commercial Prices

7. Quantity Discounts: None

- 8. Prompt Payment Terms: Net 30 days
- 9a. Annotate if Government Commercial Credit Card is Accepted: Yes
- 9b. Discount of payment by Government Commercial Credit Card: None
- 10. Foreign Items: None
- 11a. Time of Delivery: Determined by individual order
- 11b. Expedited Delivery: N/A
- 11c. Overnight and 2-Day Delivery: N/A
- 11d. Urgent Requirements: N/A
- 12. F.O.B. Points: Destination
- 13. Ordering Address:

(858) 715-5500
- 15. Warranty provision: **SYS** will exercise due professional care and competence in the performance of services provided.
- 16. Export Packing Charge: N/A
- 17. Terms and Conditions of Government Commercial Credit Card Acceptance: Net 30 days
- Note 1:** See next page for a more detailed description of each SIN.
- Note 2:** Agencies are authorized to order in excess of this amount, but may seek a price reduction for orders placed over this amount.

Description of Special Item Numbers (SINs) for Professional Engineering Services

1. SIN 871-1: Strategic Planning for Technology Programs and/or

Activities: Services required under this SIN involve the definition and interpretation of high-level organizational engineering performance requirements such as, projects, systems, missions, etc., and the objectives and approaches to their achievement. Examples include but are not limited to: evaluation and preliminary definition of new and/or improved performance goals for navigation satellites, useful service life, accuracy and resistance to natural and man-made electronic interference.

2. SIN 871-2: Concept Development and Requirements Analysis: Services required under this SIN involve abstract or concept studies and analysis, requirements definition, preliminary planning, the evaluation of alternative technical approaches and associated costs for the development or enhancement of high level general performance specifications of a system, project, mission or activity. Examples include but are not limited to: development and analysis of the total mission profile and life cycle of the improved satellite including examination of performance and cost tradeoffs.

3. Sin 871-3: System Design, Engineering and Integration: Services required under this SIN involve the translation of a system concept into a preliminary and detailed design, performing risk identification/analysis/mitigation,

traceability, and then integrating the various components to produce a working prototype or model of the system. Examples include but are not limited to: navigation satellite concept produced in the preceding stage will be converted to a detailed engineering design package, performance will be computer simulated and a working model will be built for testing and design verification.

4. SIN 871-4: Test and Evaluation: Services required under this SIN involves the application of various techniques demonstrating that a prototype system performs in accordance with the objectives outlined in the original design. Examples include but are not limited to: navigation satellite working model will be subjected to a series of tests which may simulate and ultimately duplicate its operation environment.

5. SIN 871-5: Integrated Logistics Support: Services required under this SIN involve the analysis, planning and detailed design of all engineering specific logistics support including material goods, personnel, and operational maintenance and repair of systems throughout their life cycles. Examples include but are not limited to: full range of life cycle logistics support for the navigation satellite will be identified and designed in this stage including training, operation and maintenance requirements, and replacement procedures.

6. SIN 871-6: Acquisition and Life Cycle Management: Services required under this SIN involve all of the planning, budgetary, contract and systems/program management functions required to procure and/or produce, render operational, and provide life cycle support to technology-based systems, activities, subsystems, projects, etc. Examples include but are not limited to: during this stage the actual manufacturing, launch, and performance monitoring of the navigation satellite will be assisted through project management, configuration management, reliability analysis, engineering retrofit improvements and similar functions.

Ordering Instructions and Guidelines

Getting Started: When you determine that outside assistance may be needed, your project manager should work closely with the agency procurement office to develop a statement of work (SOW). Your procurement office should then request proposals or expressions of interest from a minimum of three Professional Engineering Services (PES) contractors. A listing of these contractors is available on the GSA Web Site at <http://www.gsa.gov/>. Further formal competition to determine a vendor's technical capabilities is not required because GSA has already determined that Schedule holders are qualified to perform the services.

Issuing a Delivery order: Establishing a delivery order under the PES is relatively simple and can usually be accomplished quickly (within a few days). Your activity through the agency procurement office issues a delivery order directly to the contractor for the required services based on the SOW. Selection of the contractor must be based on one of the following approaches, before the delivery order may be issued:

- 1.** Contact and/or review the catalogs of at least three PES firms, or
- 2.** Request oral proposals from at least three PES firms, or
- 3.** Request written proposals from at least three PES firms.

Federal Acquisition Regulations (FAR) Part 13 does not apply when agency requirements are satisfied through a FSS and ordering activities are not required to seek full and open competition, synopses the requirement, or make a determination of fair and reasonable pricing. This process has already been accomplished for you. GSA does not prescribe a particular delivery order method; however, you must specify the type of services required, delivery time(s), and a task order pricing method (using either fixed price or labor hour pricing).

Establishing a Blanket Purchase Agreement: If you anticipate a repetitive need for services, you may wish to establish a Blanket Purchase Agreement (BPA). BPAs can be established for your activity, only, or they may be established agency-wide. The BPA is particularly useful when ordering activities wish to purchase a wide range of consulting services, but the exact items and delivery requirements are not known in advance and may vary considerably from order to order. BPAs may be established directly with PES contractors. FAR Part 13, Subpart 13.202 (c) (3) specifically addresses establishing BPAs with PES contractors.
