SYS Overview

For over thirty years, SYS has been providing quality managerial and technical support services to the Government and commercial activities. The direction and role of SYS continues to be that of rising to the challenges of constantly evolving information technology service requirements demanded in today's business environment. The accompanying information about our General Services Administration (GSA) Federal Supply Services (FSS) Schedule contract for Information Technology (IT) Services is the latest addition to our contracting capabilities.

Our IT services expertise has evolved in response to our customers' requirements and has become integral to the broad range of management and engineering consulting support we provide.

SYS has been and continues to be under contract to provide IT services support for Government program managers of complex systems.

The complexity of our IT services support requirements require us to hire personnel with a combination of computer, business, contract, and finance skills. SYS believes that there is no substitute for quality personnel. Therefore, we have maintained an active recruiting program to find, hire and retain the best personnel

available. Each individual has the requisite education, training, skills and experience to fulfill contract requirements in a qualitative, cost-effective manner. As your requirements for IT services develop, consider the use of the GSA IT contract. Our representatives are always ready to provide assistance and support, even if you just want to inquire about our experience and capabilities. For more information about SYS, check out our Website <http://www.ssys.com>.

15. Warranty provision: SYS will exercise due professional care and competence in the performance of services.

16. Export Packing Charge: N/A

18. Commercial Credit Card Acceptance: Net 30 days

Description of SIN 132-51 for Information Technology (IT) Professional Services

FPDS Code D301 - IT Facility Operation and Maintenance:

Furnish project delineation and formulation as required for facilities coordination with regard to design, construction, equipment, communication equipment, maintenance, and operations. Include: facilities, customer and energy surveys, engineering documentation and drawings, development specifications, design selection, laboratory and facility equipment installation, integration and testing, cable plant design and requirements analysis, cable plant material acquisition and installation, integration and testing, cable plant documentation and drawings, acquisition support and documentation.

FPDS Code D302 - IT Systems Development Services:

Furnish personnel, equipment, and facilities to accomplish database planning and design. Include: requirements analysis, comparative study and evaluation of available database engines, concept development, hardware specifications, database specifications, internet and intranet design, data warehousing applications, database compatibility assessments, recommendations, acquisition support and documentation.

FPDS Code D306 - IT Systems Analysis Services:

Furnish personnel, equipment and facilities to accomplish systems analysis and design. Include: Mission requirements analysis, concept development, Systems requirements analyses and information engineering, Systems specifications, Database specifications, Business Process Re-engineering, Requirements Modeling and Prototyping, User-oriented design, Coding, unit testing, and integration testing, test plans and test analysis reports, hardware specifications, acquisition support and documentation.

FPDS Code D307 - Automated Information System Design Integration Services:

Furnish technical support required from delivery of product through installation and integration to a fully functioning system. Include: Site preparation, Network analysis and design, COTs product evaluation and selection, Migration plan, Network configuration management plans, Communication interface analyses, LAN/WAN installation and integration, equipment acquisition, receipt, unpacking, relocation and inventory, assembly of system components, loading of software, testing and evaluation, customer training, acquisition support and documentation.

FPDS Code D308 - Programming Services:

Furnish software development of tailored programs and modification and enhancement of existing and/or COTs programs. Include: Design specifications, Code generation, Interoperability studies, Prototype development, migration to match platform requirements, testing, debugging, verification and validation,

Source code management, User interface design, Internet and multimedia development, Firewalls/Security, and acquisition support.

FPDS Code D311 - IT Data Conversion Services:

Furnish facilities design, media conversion to digital format, systems deployment and transition/re-hosting, systems reengineering, cabling/system installation, training, acquisition support and documentation.

FPDS Code D316 - IT Network Management Services

Furnish project management personnel and services, including, Project Management, personnel support services, including, Project management, personnel support services, personnel management, Integrated logistics support, total cost of ownership analysis and modeling, Program control, monitoring, scheduling, cost oversight, acquisition planning, financial management/budgeting services, status reviews, customer interface, quality assurance/independent verification and validation support, administrative assistance, acquisition support and documentation.

FPDS Code D317-1 - Automated News Services, Data Services, or Other Information Services

Furnish data input/export, data/records analysis, error identification and resolution, acquisition support and documentation.

FPDS Code D399 - Other Information Technology Services, not elsewhere classified

Provide the following services for integration of all current and future hardware and software products:

- Organization development,
- IT management,
- Performance measurements,
- Engineering assessment of new technologies,
- Analyses of hardware and software requirements to implement requirements,
- Migration planning,
- Development of architectures,
- Software design evaluations,
- Interface requirements definition,
- Design support,
- Facilities management and upgrade analysis,
- Asset management,
- Network management,
- Help desk operations,
- Testing support,
- Acquisition support,
- Documentation and Financial management/budgeting services.

FPDS Code D399 - Other Information Technology Services, not elsewhere classified

Provide Logistics/Training Support personnel, equipment and services for tasking as required, including, training classes, plan, materials, instructors, documentation for equipment and systems, configuration management support services, life cycle costing or total cost of ownership support, security systems

support, disaster recovery program support, acquisition support, hazardous materials support services, documentation and financial management/budgeting services.

Ordering Instructions and Guidelines

Getting Started: When you determine that outside assistance may be needed, your project manager should work closely with the agency procurement office to develop a statement of work (SOW). Your procurement office should then request proposals or expressions of interest from a minimum of three Federal Supply Schedule (FSS) contractors. A listing of these contractors is available on the GSA Website at <http://www.gsa.gov>. Further formal competition to determine a vendor's technical capabilities is not required because GSA has already determined that Schedule holders are qualified to perform the services.

Issuing a Delivery order: Establishing a delivery order under the FSS is relatively simple and can usually be accomplished quickly (within a few days). Essentially, your activity through the agency procurement office issues a delivery order directly to the contractor for the required services based on the SOW. Selection of the contractor must be based on one of the following approaches, before the delivery order can be issued:

1. Contact and/or review the catalogs of at least three FSS firms, or
2. Request oral proposals from at least three FSS firms, or
3. Request written proposals from at least three FSS firms.

Federal Acquisition Regulations (FAR) Part 13 does not apply when agency requirements are satisfied through a FSS and ordering activities are not required to seek full and open competition, synopsise the requirement, or make a determination of fair and reasonable pricing. This process has already been accomplished for you. GSA does not prescribe a particular delivery order method; however, you must specify the type of services required, delivery time(s), and a task order pricing method (using either fixed price or labor hour pricing).

Establishing a Blanket Purchase Agreement: If you anticipate a repetitive need for services, you may wish to establish a Blanket Purchase Agreement (BPA). BPAs can be established for your activity, only, or they may be established agency-wide. The

BPA is particularly useful when ordering activities wish to purchase a wide range of consulting services, but the exact items and delivery requirements are not known in advance and may vary considerably from order to order. BPAs may be established directly with FSS contractors. FAR Part 13, Subpart 13.202 (c) (3) specifically addresses establishing BPAs with FSS contractors.
