Attention Business Editors:**Boliden supplies environmental technology to Russian mining company**

STOCKHOLM, Sweden, Dec. 18 /CNW/ - Boliden Contech and the Russian company Kola Mining and Metallurgical Company, KMMC, have signed an agreement regarding environmental technology at KMMCs metallurgical operations situated on the Kola Peninsula in Western Russia. The contract is worth SEK 116 million and includes construction and delivery of equipment by Boliden Contech for gas and water treatment as well as other environmental technology to KMMCs operations in the area.

"Over its long history, Boliden has accumulated a vast knowledge and considerable experience in the area of environmental technology. This has been instrumental in being able to sign this important agreement with KMMC regarding the Pechannickel project", says Staffan Jahkel, Vice President, Boliden Contech.

In addition, Boliden Contech has also signed an agreement with the Nordic investment bank, Nordiska Investeringsbanken, NIB. The contract with NIB amounts to SEK 11 million and encompasses services that Boliden Contech will supply to NIB. NIB is the primary investor in the modernization that KMMC plans to carry out.

Boliden Contech conducts research and sales of technology for mineral treatment, smelting, refining, chemicals and the environment. Boliden has also built a considerable sales operation by supplying spare parts, project management and other services within the area of base metal production.
