CALGARY, ALBERTA—TYLER RESOURCES INC. (TYS-CDNX) and NORTHERN ABITIBI MINING CORP.(NAI-CDNX) are pleased to announce that Tyler, the Operator of the Tyler and Northern Abitibi Joint Venture, has executed a formal contract with Fugro Airborne Surveys to carry out a high resolution airborne DIGHEM Mag/EM survey over the Keni Property. Approximately 4,800 line-kilometers of high-resolution airborne geophysics will be flown in early to mid March 2002. Fuel for this airborne survey is currently being mobilized in anticipation of the survey.

Tyler and Northern Abitibi are currently earning a 65% interest in the Keni Property. The Keni Property is located in the emerging Coronation Gulf Diamond District of the north Slave Craton region of Nunavut. The Property is situated approximately 520 kilometers north of Yellowknife, NWT. The Property consists of approximately 113,000 contiguous acres and is located roughly 17 kilometers to the east of the ASHTON/Northern Empire Kikerk Property where encouraging diamond counts have recently been released for the newly discovered Potentilla kimberlite pipe. The Property also lies 30 kilometers east of the ASHTON/Pure Gold KIM property where equally encouraging results have been released for the newly discovered Artemisia kimberlite pipe.

A summer field season program will be outlined by Mr. Regan Chernish, P.Geol., formerly of Diavik Diamond Mines Ltd., upon receipt and interpretation of the airborne geophysical data.

Jean-Pierre Jutras, Director

All statements, other than statements of historical fact, in this news release are forward-looking statements that involve various risks and uncertainties, including, without limitation, statements regarding the potential extent of mineralization and reserves, exploration results and future plans and objectives of Northern Abitibi Mining Corp. These risks and uncertainties include, but are not restricted to, the amount of geological data available, the uncertain reliability of drilling results and geophysical and geological data and the interpretation thereof and the need for adequate financing for future exploration and development efforts. There can be no assurance that such statements will prove to be accurate. Actual results and future events could differ materially from those anticipated in such statements. These and all subsequent written and oral forward-looking statements are based on the estimates and opinions of management on the dates they are made and are expressly qualified in their entirety by this notice. The Company assumes no obligation to update forward-looking statements should circumstances or management's estimates or opinions change.
