## USVO's Zmail Selected to Deliver Internet Media Campaign for U.S. Congressional Prospect.

Mystic, Connecticut, February 15, 2002 – USA Video Interactive Corporation (OTCBB: USVO; CDNX: US; BSE/Frankfurt: USF; <http://www.usvo.com/>) announced today that it has completed a contract with Miriam Masullo, PhD, to promote her campaign for election to the United States House of Representatives.

Dr. Masullo, a Republican, has formed an exploratory committee to lay the foundation for a campaign in Connecticut's First Congressional District, during which she intends to use web-based media as an integral solution for spreading her message.

An internationally recognized expert in applying technology to education, Dr. Masullo commented "I have observed and assessed USVO's StreamHQ™ technology and am excited and confident that its unique capabilities will contribute to the success of my campaign effort in numerous ways. As a prospective member of Congress, I am committed to bringing the educational and business opportunities of the Internet to as many citizens as possible, and I am glad that Zmail is available to help me achieve this goal."

"We look forward to the dynamic role our technology will play in this year's elections, as candidates discover the intelligent and cost effective communications enabled by StreamHQ™," said Edwin Molina, USVO's President and Chief Executive Officer. "Zmail lets candidates target their communications with precision, while adding the dynamism of rich media and interactivity. We anticipate helping many candidates be more effective than ever before with their media dollars."

### About USA Video Interactive

USVO is a developer and supplier of Internet media delivery services, systems, and innovative end-to-end solutions. The company has developed its StreamHQ™ architecture to provide a wide range of business customers with value-added media delivery services. StreamHQ™ facilitates the transmission of digitized and compressed video to the user's desktop via multiple modes that take advantage of available connectivity. While competitors take a "one-size-fits-all" streaming approach, StreamHQ™ brings unique value propositions to individual vertical markets with functionality designed specifically for those markets. Beyond high quality media delivery, USVO gives its customers media asset management tools and information that provide accountability and return on investment (ROI) for their streaming expenditures. USVO has created Zmail and mediaClix™, which use StreamHQ™ to deliver rich media campaigns for advertising, marketing, corporate communications, and customer service applications. USVO holds the pioneering patent for store-and-forward video, filed in 1990 and issued by the United States Patent and Trademark Office on July 14, 1992; it has been cited by at least 145 other patents. USVO holds similar patents in Germany, Canada, England, France, Spain, and Italy, and has a similar patent pending in Japan. For more information, visit [www.usvo.com](http://www.usvo.com).
