Performance graphs

The following performance graph sets forth the Company's cumulative total stockholder return during the five years ended December 29, 2001, with the cumulative total return on the S&P 500 Index and a custom Peer Group Index including companies in the same line of business (supermarket retail companies)(1). The Peer Group Index is weighted based on the various companies' market capitalization. The comparison assumes \$100 was invested at the end of 1996 in the Company's common stock and in each of the related indices and assumes reinvestment of dividends.

The Company's common stock is valued as of the end of each fiscal quarter. After the end of a quarter, however, shares continue to be traded at the prior valuation until the new valuation is received. The cumulative total return for the companies represented in the S&P 500 Index and the custom Peer Group Index is based on those companies' calendar year end trading price. Therefore, the Company has provided a performance graph based on the Company's fiscal year end valuation (rather than the trading price at fiscal year end, representing the appraised value as of the prior fiscal quarter). For comparative purposes, additional information is provided based on the fiscal year end trading price of the Company's shares.
