GENERAL INSTRUCTIONS

A. Rule as to Use of Form 6-K.

This form shall be used by foreign private issuers which are required to furnish reports pursuant to Rule 13a-16 or 15d-16 under the Securities Exchange Act of 1934.

B. Information and Document Required to be Furnished.

Subject to General Instruction D herein, an issuer furnishing a report on this form shall furnish whatever information, not required to be furnished on Form 40-F or previously furnished, such issuer (i) makes or is required to make public pursuant to the law of the jurisdiction of its domicile or in which it is incorporated or organized, or (ii) files or is required to file with a stock exchange on which its securities are traded and which was made public by that exchange, or (iii) distributes or is required to distribute to its security holders.

NEWS RELEASE

FOR IMMEDIATE RELEASE

REORGANIZATION OF TELECOM AMERICAS COMPLETED AND CAPITAL STRUCTURE IMPROVED

- *Telecom Americas becomes pure-play Brazil mobile company*
- *Arranging US\$660 million of new equity*
- *Reduces debt and extends maturity profile*
- *Targeting over 5 million subscribers by year-end 2002*

Mexico City, February 12, 2002 – América Móvil S.A. de C.V. ("América Móvil") today announced the closing of the plan to reorganize its Latin American joint venture, Telecom Americas Ltd. ("Telecom Americas"), into a company focused on the Brazilian mobile wireless market. As part of the reorganization, América Móvil with its partners in Telecom Americas, Bell Canada International Inc. ("BCI") and Texas-based SBC International, Inc. ("SBC"), have completed the following transactions:

- Telecom Americas transferred its 77.1% interest in Comunicación Celular S.A. - Comcel S.A. to América Móvil;
- América Móvil transferred cash of US\$80 million and its 41% interest in Algar Telecom Leste S.A. ("ATL") to Telecom Américas;

- Telecom Américas distributed its 75.6% interest in Canbras Communications Corp. to BCI;
- Telecom Américas will distribute its 60% interest in Techtel-LMDS Comunicaciones Interactivas, S.A. to América Móvil upon receipt of regulatory approvals; and
- Telecom Américas distributed its 59% interest in Genesis Telecom C.A. equally to BCI and América Móvil.

As part of this reorganization, originally announced on December 3, 2001, Telecom Américas has secured capital contributions from its principal shareholders, América Móvil and BCI, in the amount of US\$240 million, which is being provided in proportion to their current ownership interests in Telecom Américas. Telecom Américas has also reached an agreement with a financial investor for an equity investment of US\$300 million, which is subject to customary closing conditions and is expected to close before the end of February 2002. Additional capital resources in the amount of US\$120 million have been committed to Telecom Américas in the form of a shareholder loan that is repayable in June 2004 in common shares of Telecom Américas. Over US\$500 million of these resources will be used to reduce short-term debt, with the balance being used to fund operating requirements, including capital expenditures.

Taking into account the proposed US\$300 million equity injection, América Móvil's interest in Telecom Américas would be approximately 42.4%, as compared to 45.5% currently.

Telecom Américas also concluded a number of funding arrangements which have allowed it to refinance and significantly extend the average life of some of its existing debt. This includes, among others, a new loan from the Banco

Nacional de Desenvolvimento Economico e Social ("BNDES") to Tess S.A. and medium term loans for ATL.

About América Móvil

América Móvil is the leading provider of wireless services in Latin America, with operations in several countries in the Americas and over 26 million wireless subscribers. Visit www.americamovil.com

AMÉRICA MÓVIL SELLS 49% INTEREST IN CABLEVISIÓN

- Shares floated in the Mexican Stock Exchange

Mexico City, April 9, 2002 - América Móvil, [BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL], announced today that it sold its 49% indirect equity interest in the Mexican cable television operator Empresas Cablevisión, S.A. de C.V. (Cablevisión). Proceeds from the sale will be approximately US\$200 million.

The transaction reflects the strategy of the company of actively managing its asset base with a view to directing its efforts and resources towards the development of its core business, wireless telecommunications. This is the second sale of non-core assets during 2002.

About América Móvil

América Móvil is the leading provider of wireless services in Latin America, with operations in several countries in the Americas and over 26 million wireless subscribers.

TELECOM AMERICAS CLOSES TRANSACTION WITH A FINANCIAL INVESTOR

- 300 million dollars equity investment made by a financial investor

Mexico City, April 22, 2002 - América Móvil, [BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL], announced today the closing of a transaction with a financial investor for an equity investment in Telecom Americas.

On February 12, América Móvil announced that a private investor had agreed to purchase 300 million dollars of shares in Telecom Americas, Ltd. The transaction closed on April 19 and as a result América Móvil's ownership in Telecom Americas was reduced to 42.89%.

With the conclusion of its restructuring plan, Telecom Americas has operations solely in the Brazilian wireless market.

- América Móvil's wireless subscriber base reached 27.4 million clients at the end of the first quarter, registering net gains of 9 million subscribers year on year. In addition, it had 741 thousand fixed wirelines.
- Consolidated revenues, which include Concel's since February, totaled 11.6 billion pesos in the quarter, up 16.2% compared to the previous year. Service revenues rose 11.5% in that period.
- EBITDA came in at 3.9 billion pesos, having increased by 7% quarter over quarter and 49% on an annual basis. The EBITDA margin rose to 33.2% from 25.9% a year before.
- The subsidiaries' operating performance continued to be strong, with Telcel increasing by a point its EBITDA margin, to 35.6% and the Ecuadorian and Colombian operations raising by 8 and 16 percentage points respectively their EBITDA margins relative to the previous quarter.
- At 1.5 billion pesos, net income for the quarter was 3.7 times greater than a year before, representing 11.2 peso cents per share (24.6 dollar cents per ADR).
- Total debt rose to 27.4 billion pesos at the end of March, after the consolidation in February of Concel, which brought along 5.7 billion pesos of debt. Net debt increased to 16.1 billion pesos.
- Telecom Americas' recapitalization was completed with the closing, on April 19th, of the 300 million dollars equity contribution by an outside investor. The reorganization of the company, which left it only with operations in the Brazilian wireless market, closed on February 12th.
- Subsequent to the end of the quarter, América Móvil sold its 49% stake in Empresas Cablevisión, through an IPO in the Mexican Stock Exchange. Proceeds of the sale amounted to 2.0 billion pesos.
- América Móvil's external credit ratings were upgraded during the quarter, to Baa1 by Moody's and BBB- by Standard & Poor's. The company is now rated investment grade by the two rating agencies. In Mexico, it maintains the two top ratings for domestic debt, Aaa.mx and mxAAA, respectively.
- Under its medium term note program, América Móvil issued notes for a total of 2.75 billion pesos in the Mexican market, with 4, 5 and 7 year tenors.

Relevant Events

The 300 million dollars capitalization of Telecom Americas by an outside financial investor closed on April 19th. As part of the exit strategy agreed to with the new investor, América Móvil has provided a put option, exercisable in October 2006, on 50% of the investment, and has obtained a call option on the same notional amount. The new equity investment completed an equity infusion of 660 million dollars in Telecom Americas, including a 120 million dollars loan convertible into Telecom Americas shares provided by América Móvil. On February 12th, the reorganization of Telecom Americas was completed, leaving the latter solely with interests in four Brazilian wireless companies: ATL, Telet, Americel and Tess. As part of this restructuring Telecom Americas' interest in Comcel was transferred to América Móvil, which since February consolidates the financial results of the company.

Conclusion of Telecom Americas's restructuring and recapitalization

AMX's stake in Cablevisión sold for 2 bn MxP

On April 9th, América Móvil sold its 49% indirect stake in Empresas Cablevisión, the Mexican cable-television operator, for 2.0 billion pesos, through an initial public offering of shares in the Mexican Stock Exchange. This was in continuation with its policy of actively managing its asset base so as to focus its resources on its core businesses.

Greater stake in Conecel

During the month of April América Móvil increased its interest in Ecuadorian subsidiary Conecel, from 61.3% to 80.6%, which implied the payment of 70.3 million dollars.

Moody's and S&P upgraded AMX's long term foreign currency ratings

Moody's Investors Service upgraded the long-term foreign currency rating of América Móvil from Baa2 to Baa1 and Standard & Poor's raised the foreign currency rating on América Móvil to 'BBB-' from 'BB+', outlook to stable from positive. Both rating changes followed the improvement of the foreign currency rating of Mexico. América Móvil's domestic debt has the top ratings available in Mexico.

In the first quarter, América Móvil issued 2 billion pesos in commercial paper and 2.75 billion pesos in medium term notes. The last note, issued on March 22nd, is a one billion peso, seven year floating-rate note based on the 6 month Cete rate.

Subscribers

AMX's subscriber base at 27.4 M

By the end of March, the number of wireless subscribers of América Móvil's subsidiaries and affiliates had increased by 1.4 million clients relative to December, to 27.4 million, a 5% rise in the quarter. This total no longer includes 595 thousand subscribers which were lost with the sale of Cellular Communications of Puerto Rico. On an annual basis, net gains added up to 9 million new subscribers for a 49.1% increase.

Conecel and Comcel the most dynamic subsidiaries

In relative terms, Conecel, in Ecuador, and Comcel, in Colombia continued to be the most dynamic companies in terms of subscriber additions, both registering double-digit growth rates quarter over quarter. The former gained 62 thousand new subscribers (a 13% increase) while the latter added 204 thousand (an 11% increase). On an annual basis, these companies also registered the highest relative net gains. Concerning Tracfone, it had a net loss of 20 thousand clients in the quarter to finish with 1.9 subscribers.

460 thousand subscribers in Guatemala

Regarding Guatemala, Sercom, its wireless arm, registered net additions of 40 thousand new subscribers, lower than those observed in the previous quarter but higher than those of prior quarters. These net additions brought the total to 460 thousand subscribers, a 58% increase year on year. Likewise, Telgua's fixed lines totaled 741 thousand, having increase by 26 thousand in the period.

4.5 M subscribers in Brazil

The four Brazilian wireless companies in which América Móvil holds an economic interest ended the quarter with a combined 4.5 million-subscribers, resulting in quarter net gains of 171 thousand, up 4%.

Equity subscribers rose to 24.4 million from 22.7 million in December 2001. This figure already reflects the reorganization of Telecom Americas – with América Móvil increasing its interest in Comcel but reducing it in ATL – and the sale of its stake in CCPR.

América Móvil Consolidated Results

Revenues up 16% yoy

América Móvil's first quarter revenues, 11.6 billion pesos, were up 16% year on year, with service revenues increasing by 12%. Relative to the previous quarter, equipment revenues were down – typically the fourth quarter is the strongest in subscriber gains and, therefore, handset sales – but service revenues rose 8%. The figures include, beginning in February, the revenues of Comcel, the Colombian wireless operator that is now a subsidiary of América Móvil; without them, service revenues would have grown 15% year on year and 3% sequentially.

Traffic rises 40% yoy

The expansion of traffic was somewhat more rapid than the consolidated results suggest, to the extent that the figures of the non-Mexican subsidiaries had to be converted into constant Mexican pesos at a time when the peso has appreciated relative to the U.S. dollar by 5.3% annually and 2.1% quarter on quarter (based on average exchange rates in each quarter), and when other Latin American currencies have fallen against both the U.S. dollar and the peso. In fact, relative to the first quarter of 2001, traffic went up by 40%, twice the rate of growth of service revenues.

Net Income	1,465	1,649	-11.1%	401	265.2%

EBITDA increases 49% on an annual basis

América Móvil's EBITDA was up 7% in the quarter and 49% on an annual basis, to 3.9 billion pesos – a 33.2% EBITDA margin – whereas the operating profit was down in the quarter (on account of greater depreciation and amortization charges brought about by the consolidation of Comcel) but up 71% year on year, to 2.4 billion pesos.

Improved Latin American operations

All the Latin American operations, save for Telgua, improved their EBITDA margin in the quarter. Telgua's fell relative to the previous quarter essentially because in the latter there had been extraordinary revenues resulting from the favorable resolution of a legal process on behalf of the company, which had boosted that quarter's EBITDA margin; correcting for this, Telgua's margin also would have increased in the quarter.

The above figures reflect the fact that, while typically a weak one, the first quarter was even more so this year given the fact that the Easter holiday took place in March, significantly reducing the number of work days in the period.

EBITDA margins of 33.2%

Given the strong performances of its subsidiaries, and in spite of the appreciation of the Mexican peso against the U.S. dollar and the incorporation of Comcel – whose EBITDA margin is still somewhat below América Móvil's average – , América Móvil managed to increase its EBITDA margin from 32.5% to 33.2% in the quarter. This partly reflects the more moderate growth of the subscriber base as compared to the very fast pace of the fourth quarter.

The net loss attributable to América Móvil's equity participation in affiliates was 538 million pesos, down from 836 million the year before. (In the fourth quarter a

gain was registered, due to the appreciation of the Brazilian reais against the U.S. dollar that took place at the time.) Net income came in at 1.5 billion pesos – 11.2 peso cents per share – and was 3.7 times higher than a year before, in spite of a greater net debt position and its impact on overall financial costs.

Net debt of 16.1 M MxP

Total debt rose to 27.4 billion pesos from 22.0 billion in December, on the back of the consolidation of Comcel, which owed 5.7 billion pesos (631 million dollars) at the time when it was brought into América Móvil. The above, coupled with a reduction in the cash and securities position of the company, led to an increase of 6.7 billion pesos in the company's net debt, to 16.1 billion pesos at the end of March.

Total Assets	98,196	98,026	0.2%	Total Liabilities and Equity	98,196	98,026	0.2%

* includes current portion of Long Term Debt

The net debt figure mentioned above already considers the full payment for Williams Communications' stake in ATL; the acquisition of an additional interest in Comcel from Empresa de Telecomunicaciones de Bogotá; the buy-back of América Móvil shares in the market; and the payment of dividends. It considers as well monies received from SBC International on account of its purchase of América Móvil's stake in Cellular Communications of Puerto Rico.

Several items of the balance sheet changed significantly in the quarter. Most of the changes had to do with the acquisition of Comcel which essentially affected, besides the debt figures, those of goodwill, licenses and other current liabilities. Other changes reflect the sale of América Móvil's stake in CCPR and ATL, recorded essentially under investments in affiliates and other current assets.

Telcel

Telcel's revenues of 8.9 bn MxP

Telcel's total revenues for the first quarter of 2002 were 8.9 billion pesos, practically unchanged relative to the previous quarter and 18% higher from a year before. Service revenues grew 5% quarter on quarter in spite of the Easter holiday having taken place in March, which affected overall usage during the period. Fewer net additions, most of which are attributable to seasonal factors, resulted in equipment sales decreasing 22% in the period.

8 cities with GSM service The GSM network rollout continued during the quarter, having concluded the building stage of the project in 8 cities where the service is now available.

Telgua

40 thousand net adds in 1Q02 Telgua's quarterly net additions of 40 thousand subscribers, 9.4% increase, brought the total to 460 thousand, continuing with the company's strong growth rates registered during the previous quarters. The number of fixed wirelines was 741 thousand at the end of March.

Total revenues of 109 MDIs Total revenues in the quarter were 109 million dollars. Equipment revenues – double the previous year's – reflect Telgua's rapid subscriber growth.

Costs & Expenses down 18% Compared to the same period a year earlier, total costs and expenses were slashed by more than 18%, or 10 million dollars, as cost reduction policies continued to yield results.

Telgua's EBITDA of 65 MDIs, up 17.7% yoy At 65 million dollars, EBITDA was up 17.7% on an annual basis. The EBITDA margin remained close to 60%, some 9 percentage points higher than a year earlier. The operating profit represented 35.8% of revenues, compared with 29.5% in 2001.

Conecel

Conecel's service revenues surge 58.9% yoy

During the first quarter, Conecel continued with strong subscriber growth (13% in the quarter), surpassing the 500 thousand subscribers mark. Quarter revenues totaled 25 million dollars, with service revenues growing by 58.9% year-on-year. With costs and expenses increasing much less rapidly than revenues, EBITDA grew to 9 million dollars, more than doubling the previous year's EBITDA.

Service revenues are up 36% yoy

Total revenues went up by 6 billion Colombian Pesos in the quarter, to 222 billion Colombian Pesos (98 million dollars) driven by the 14% growth in service revenues. The latter reflects the increase in the company's subscriber base-including postpaid clients, which generate higher ARPU's and traffic levels-as well as an increase of the company's tariffs in January. Year on year, total revenues increased by 61 billion Colombian Pesos (27 million dollars) on the back of higher equipment sales brought about by the launch of new prepaid and postpaid plans, as well as a 36% increase in service revenues.

Total costs and expenses totaled 157 billion Colombian Pesos (69 million dollars), down 16% compared to the previous quarter as a result of successful cost control policies implemented by the company's management and a decrease in equipment costs, which were down by a third due to seasonal factors. On an annual basis revenues outpaced costs at a rate of almost two to one.

At 29.1%, EBITDA margin is 10.3 points higher yoy

EBITDA shot up to 65 billion Colombian Pesos (29 million dollars), more than doubling both on an annual and sequential basis. Thus, the margin rose to 29.1%, 10.3 percentage points higher than a year before.

The improved operating performance of the company was reinforced with its financial restructuring, which brought about a significant reduction in interest costs.

Tracfone

Tracfone's churn rate is down by 2.2 pp

At 1.9 million clients at the end of March, Tracfone's subscriber base was practically unchanged in the first quarter (it came down slightly, by 20 thousand subscribers). However, the churn rate decreased notably, by 2.2 percentage points, as the number of disconnections came down compared to the previous quarter.

Total revenues were somewhat lower quarter on quarter as airtime revenues fell 5.4%, which could be explained by seasonal factors. The company's sales of digital handsets are gradually picking up.

Telecom Americas' EBITDA
R\$ Millions

Total revenues were slightly down relative to the previous quarter, however, reflecting lower equipment sales as compared to the fourth quarter's, traditionally the strongest period of the year.

An operating profit for the first time

For the first time, these operations managed to turn an operating profit, 1.7 million reais, reverting the operating loss of 26 million reais seen a year earlier.

The integral financing costs were up relative to the previous quarter's, since in the latter an important foreign exchange gain (which more than offset interest costs) was obtained as the reais appreciated against the dollar. In the first quarter there was no such gain, but a relatively small loss.

América Móvil, S.A. de C.V. (the "Company") quarterly reports and all other written materials may from time to time contain forward-looking statements that reflect the current views and/or expectations of the Company and its management with respect to its performance, business and future events. Forward looking statements include, without limitation, any statement that may predict, forecast, indicate or imply future results, performance, or achievements, and may contain words like "believe", "anticipate", "expect", "envisages", "will likely result", or any other words or phrases of similar meaning. Such statements are subject to a number of risks, uncertainties and assumptions. We caution you that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in this report. In no event, neither the Company nor any of its subsidiaries, affiliates, directors, officers, agents or employees shall be liable before any third party (including investors) for any investment or business decision made or action taken in reliance on the information and statements contained in this document or for any consequential, special or similar damages.

GENERAL INSTRUCTIONS

A. Rule as to Use of Form 6-K.

This form shall be used by foreign private issuers which are required to furnish reports pursuant to Rule 13a-16 or 15d-16 under the Securities Exchange Act of 1934.

B. Information and Document Required to be Furnished.

Subject to General Instruction D herein, an issuer furnishing a report on this form shall furnish whatever information, not required to be furnished on Form 40-F or previously furnished, such issuer (i) makes or is required to make public pursuant to the law of the jurisdiction of its domicile or in which it is incorporated or organized, or (ii) files or is required to file with a stock exchange on which its securities are traded and which was made public by that exchange, or (iii) distributes or is required to distribute to its security holders.
