2001 Annual Report

April 30, 2002

To The Limited Partners in IEA Income Fund IX, L.P.:

Enclosed herein is the annual report for IEA Income Fund IX, L.P. (the "Partnership") for the year ended December 31, 2001. In this report, we discuss prevailing economic and market conditions and their effect on Partnership operations during the period.

The commencement of 2001 was marked by weakness in the U.S. economy, with slowdowns in manufacturing and capital spending, combined with excess container inventories, creating uncertain prospects for the global economy. As the year progressed, this weakness soon spread overseas, with the world's major and developing economies declining in tandem due in large part to a sharp fall-off in demand for foreign-made goods from the U.S. Subsequent to the events of September 11, 2001, uncertainty over the short-term prospects for the world's economies intensified and compounded the global economic slump already underway. This uncertainty weighed heavily on those industries most dependent on world trade and further pressured the business of the Partnership, as well as that of our customers, the shipping lines.

The container leasing industry faced a challenging and difficult year during 2001. The aforementioned economic conditions resulted in reduced demand for leased containers as well as increased off-hire inventories, and contributed to lower utilization and per-diem rental rates. At the same time, the shipping lines have begun taking delivery of larger container ships that had been ordered in prior periods in anticipation of an economic recovery. Due to the sluggish global economy, the excess shipping capacity created by the larger container ships has put added pressure on the business of our customers. They, too, have had to cut costs and reduce excess container inventories.

Although the container leasing industry is dependent upon the volume of world trade, I would like to take this opportunity to provide you with some perspective concerning other factors that influence the market for container leasing. Over the past 10 years, our industry has been witness to a shift in many of the fundamental elements that define our business. These fundamental elements include new container prices, utilization rates and per-diem lease rates, all of which are interrelated and generally serve as performance indicators for the container leasing industry.

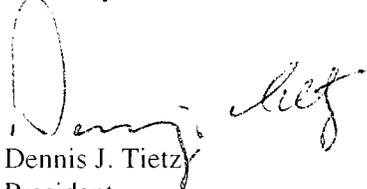

As referenced in our quarterly investor reports, the Partnership's revenue is dependent on the supply and demand for its containers, measured by the utilization rate of its fleet, as well as per-diem lease rates. There is also a strong relationship between new container prices and current per-diem lease rates. Dry cargo container per-diem lease rates achieved their highest levels in 1992, while the cost of a new dry cargo container also reached its highest point during the same period. Since that time, new container prices and per-diem lease rates have declined by approximately 50%. Many factors have contributed to these declines, but none has been more influential than China's dominance of global container production. China now accounts for approximately 80% of the world's dry cargo container production. Since 1992, the price of a standard twenty-foot dry cargo container has declined from an average of \$2,900 to approximately \$1,200 today. Additionally, the aggressive new container purchasing programs of the container leasing companies and shipping lines over the last ten years should not be overlooked. During this period, the availability of low-cost capital resulted in container leasing companies and shipping lines purchasing new containers at levels that

contributed to conditions of oversupply. Unforeseen economic events, including the Asian financial crises of the late 1990's and the current global economic slowdown, further exacerbated the oversupply of containers.

As a result of these conditions, the Partnership's operating performance has declined, and you are undoubtedly disappointed – as we are – with these results. Unfortunately, most investors suffered from the effects of the contracting economy over the past year, and the Partnership was no exception. During 2001, we implemented a strategic plan focused on increasing revenues and reducing costs. Key objectives of this plan include the strategic repositioning of containers to areas where we foresee an increase in demand. This ensures that containers are in the right place at the right time to take advantage of specific market opportunities. We also focused on the reduction of costs through our decision to outsource the General Partner's investor services as a means of reducing the costs of the Partnership.

Key domestic and global economic indicators have recently suggested that the world economies may be in the early stages of recovery. It is, of course, impossible to predict the speed or strength of economic recovery, the timing of any significant rebound in the volume of world trade, or the pace of improvement in overall leasing market activity. Yet, we look ahead with growing optimism. While exports from Asia to the U.S. had been weak due to low consumer demand, the container leasing market has recently shown important signs of stability, specifically with respect to Intra-Asia trade. Lease out activities for most Asian locations have improved, and empty containers are being repositioned to the area to meet the current demand. Additionally, since September 11, 2001, the credit markets have tightened, and the availability of capital to container leasing companies, as well as to the shipping lines for the acquisition of new containers, has become scarce. We expect this to have a positive impact on existing container inventories as fewer new containers are added to the worldwide container fleet and as our customers increase the size of their leased fleets to meet the demand created by the world's improving economies. We expect to be an important part of our customers' leasing needs during 2002 by assisting them with their requirements for marine cargo containers, and we are cautiously optimistic regarding the performance and profitability of the Partnership.

Sincerely,

Dennis J. Tietz
President
Cronos Capital Corp.
The General Partner

Independent Auditors' Report

The Partners
IEA Income Fund IX, L.P.

We have audited the accompanying balance sheets of IEA Income Fund IX, L.P. (the "Partnership") as of December 31, 2001 and 2000, and the related statements of operations, partners' capital, and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Partnership at December 31, 2001 and 2000, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2001 in conformity with accounting principles generally accepted in the United States of America.

*Notes to Financial Statements
December 31, 2001, 2000 and 1999*

(1) Summary of Significant Accounting Policies

(a) Nature of Operations

IEA Income Fund IX, L.P. (the "Partnership") is a limited partnership organized under the laws of the State of California on June 8, 1988 for the purpose of owning and leasing marine cargo containers worldwide to ocean carriers. To this extent, the Partnership's operations are subject to the fluctuations of world economic and political conditions. Such factors may affect the pattern and levels of world trade. The Partnership believes that the profitability of, and risks associated with, leases to foreign customers is generally the same as those of leases to domestic customers. The Partnership's leases generally require all payments to be made in United States currency.

Cronos Capital Corp. ("CCC") is the general partner and, with its affiliate Cronos Containers Limited (the "Leasing Company"), manages the business of the Partnership. CCC and the Leasing Company also manage the container leasing business for other partnerships affiliated with the general partner. The Partnership shall continue until December 31, 2009, unless terminated sooner upon the occurrence of certain events.

The Partnership commenced operations on December 5, 1988, when the minimum subscription proceeds of \$1,000,000 were obtained. The Partnership offered 40,000 units of limited partnership interest at \$500 per unit, or \$20,000,000. The offering terminated on September 11, 1989, at which time 33,992 limited partnership units had been sold.

(b) Leasing Company and Leasing Agent Agreement

Pursuant to the Limited Partnership Agreement of the Partnership, all authority to administer the business of the Partnership is vested in CCC. A Leasing Agent Agreement exists between CCC and the Leasing Company, whereby the Leasing Company has the responsibility to manage the leasing operations of all equipment owned by the Partnership. Pursuant to the Agreement, the Leasing Company is responsible for leasing, managing and re-leasing the Partnership's containers to ocean carriers and has full discretion over which ocean carriers and suppliers of goods and services it may deal with. The Leasing Agent Agreement permits the Leasing Company to use the containers owned by the Partnership, together with other containers owned or managed by the Leasing Company and its affiliates, as part of a single fleet operated without regard to ownership. Since the Leasing Agent Agreement meets the definition of an operating lease in Statement of Financial Accounting Standards (SFAS) No. 13, it is accounted for as a lease under which the Partnership is lessor and the Leasing Company is lessee.

The Leasing Agent Agreement generally provides that the Leasing Company will make payments to the Partnership based upon rentals collected from ocean carriers after deducting direct operating expenses and management fees to CCC. The Leasing Company leases containers to ocean carriers, generally under operating leases which are either master leases or term leases (mostly one to five years). Master leases do not specify the exact number of containers to be leased or the term that each container will remain on hire but allow the ocean carrier to pick up and drop off containers at various locations, and rentals are based upon the number of containers used and the applicable per-diem rate. Accordingly, rentals under master leases are all variable and contingent upon the number of containers used. Most containers are leased to ocean carriers under master leases; leasing agreements with fixed payment terms are not material to the financial statements. Since there are no material minimum lease rentals, no disclosure of minimum lease rentals is provided in these financial statements.

Notes to Financial Statements
(Continued)

(c) Concentrations of Credit Risk

The Partnership's financial instruments that are exposed to concentrations of credit risk consist primarily of cash, cash equivalents and net lease receivables due from the Leasing Company. See note 3 for further discussion regarding the credit risk associated with cash and cash equivalents.

Net lease receivables due from the Leasing Company (see notes 1(b) and 4 for discussion regarding net lease receivables) subject the Partnership to a significant concentration of credit risk. These net lease receivables, representing rentals earned by the Leasing Company, on behalf of the Partnership, from ocean carriers after deducting direct operating expenses and management fees to CCC and the Leasing Company, are remitted by the Leasing Company to the Partnership three to four times per month. The Partnership has historically never incurred a loss associated with the collectibility of unremitted net lease receivables due from the Leasing Company.

(d) Basis of Accounting

The Partnership utilizes the accrual method of accounting. Net lease revenue is recorded by the Partnership in each period based upon its leasing agent agreement with the Leasing Company. Net lease revenue is generally dependent upon operating lease rentals from operating lease agreements between the Leasing Company and its various lessees, less direct operating expenses and management fees due in respect of the containers specified in each operating lease agreement.

The financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which requires the Partnership to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(e) Allocation of Net Income or Loss and Partnership Distributions

Net income or loss has been allocated between general and limited partners in accordance with the Partnership Agreement.

Actual cash distributions differ from the allocations of net income or loss between the general and limited partners as presented in these financial statements. Partnership distributions are based on "distributable cash" and are paid to the general and limited partners on a quarterly basis, in accordance with the provisions of the Partnership Agreement. Partnership distributions from operations are allocated 95% to the limited partners and 5% to the general partner. Distributions of sales proceeds are allocated 99% to the limited partners and 1% to the general partner. These allocations remain in effect until such time as the limited partners have received from the Partnership aggregate distributions in an amount equal to their capital contributions plus a 10% cumulative, compounded (daily) annual return on their adjusted capital contributions. Thereafter, all Partnership distributions will be allocated 85% to the limited partners and 15% to the general partner. Cash distributions from operations to the general partner in excess of 5% of distributable cash will be considered an incentive fee and will be recorded as compensation to the general partner, with the remaining distributions from operations charged to partners' capital.

Notes to Financial Statements
(Continued)

(f) Acquisition Fees

Pursuant to the Partnership Agreement, acquisition fees paid to CCC are based on 5% of the equipment purchase price. These fees are capitalized and included in the cost of the rental equipment.

(g) Container Rental Equipment

In accordance with SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of," container rental equipment is considered to be impaired if the carrying value of the asset exceeds the expected future cash flows from related operations (undiscounted and without interest charges). If impairment is deemed to exist, the assets are written down to fair value. Depreciation policies are also evaluated to determine whether subsequent events and circumstances warrant revised estimates of useful lives. Because the Partnership evaluates future cash flows and potential impairment by container type rather than for each individual container, future losses could result for individual container dispositions due to various factors, including age, condition, suitability for continued leasing, as well as the geographical location of containers when disposed. There were no impairment charges to the carrying value of container rental equipment during 2001, 2000, and 1999.

Container rental equipment is depreciated using the straight-line basis. Effective June 1, 2001, the estimated depreciable life was changed from a twelve-year life to a fifteen-year life and the estimated salvage value was changed from 30% to 10% of the original equipment cost. The effect of these changes is an increase to depreciation expense of approximately \$178,340 from June 1 to December 31, 2001.

(h) Income Taxes

The Partnership is not subject to income taxes, consequently no provision for income taxes has been made. The Partnership files federal and state annual information tax returns, prepared on the accrual basis of accounting. Taxable income or loss is reportable by the partners individually.

(i) Financial Statement Presentation

The Partnership has determined that, for accounting purposes, the Leasing Agent Agreement is a lease, and the receivables, payables, gross revenues and operating expenses attributable to the containers managed by the Leasing Company are, for accounting purposes, those of the Leasing Company and not of the Partnership. Consequently, the Partnership's balance sheets and statements of operations display the payments to be received by the Partnership from the Leasing Company as the Partnership's receivables and revenues.

Notes to Financial Statements
(Continued)

(j) New Accounting Pronouncements

In August 2001, the Financial Accounting Standards Board issued SFAS No. 143, "Accounting for Asset Retirement Obligations," which is effective for all fiscal years beginning after June 15, 2002. This standard requires a company to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred, and a corresponding increase in the carrying value of the related long-lived asset. The Registrant is currently evaluating the impact that SFAS No. 143 will have on its financial statements.

In August 2001, the Financial Accounting Standards Board issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets," which is effective for all fiscal years beginning after December 15, 2001 with early application encouraged. SFAS No. 144 supersedes SFAS No. 121, but retains its fundamental provisions relating to the recognition and measurement of the impairment of long-lived assets to be held and used, and the measurement of long lived assets to be disposed of by sale. SFAS No. 144 will be adopted by the Partnership effective January 1, 2002, without a significant impact on its financial statements.

(k) Reclassification

The Partnership has reclassified net loss on disposal of equipment and impairment losses, from other income (loss) to other operating expenses, a component of loss from operations. All periods have been adjusted to reflect this reclassification.

(2) Operating Segment

An operating segment is a component of an enterprise that engages in business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the enterprise's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and about which separate financial information is available. Management operates the Partnership's container fleet as a homogenous unit and has determined that as such it has a single reportable operating segment.

The Partnership derives revenues from dry cargo containers. As of December 31, 2001, the Partnership owned 1,075 twenty-foot, 438 forty-foot and 785 forty-foot high-cube marine dry cargo containers.

Due to the Partnership's lack of information regarding the physical location of its fleet of containers when on lease in the global shipping trade, it is impracticable to provide the geographic area information.

No single sub-lessee of the Leasing Company contributed more than 10% of the Leasing Company's rental revenue earned during 2001, 2000 and 1999 on behalf of the Registrant.

Notes to Financial Statements
(Continued)

(3) Cash and Cash Equivalents

Cash equivalents include money market funds that invest in highly-liquid first-tier securities, such as U.S. Treasury obligations, repurchase agreements secured by U.S. Treasury obligations, and obligations whose principal and interest are backed by the U.S. Government. Cash equivalents are carried at cost which approximates fair value, and at times, may exceed federally insured limits. The Partnership has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk.

(4) Net Lease Receivables Due from Leasing Company

Net lease receivables due from the Leasing Company are determined by deducting direct operating payables and accrued expenses, base management fees payable, and reimbursed administrative expenses payable to CCC and its affiliates from the rental billings earned by the Leasing Company under operating leases to ocean carriers for the containers owned by the Partnership. Net lease receivables at December 31, 2001 and December 31, 2000 were as follows:

	December 31, <u>2001</u>	December 31, <u>2000</u>
Gross lease receivables	\$ 281,929	\$ 423,070
Less:		
Direct operating payables and accrued expenses	170,872	165,794
Damage protection reserve (note 5)	8,276	29,287
Base management fees payable	42,086	51,032
Reimbursed administrative expenses	3,761	15,014
Allowance for doubtful accounts	<u>25,940</u>	<u>62,985</u>
Net lease receivables	\$ <u>30,994</u>	\$ <u>98,958</u>

(5) Damage Protection Plan

The Leasing Company offers a repair service to several lessees of the Partnership's containers, whereby the lessee pays an additional rental fee for the convenience of having the Partnership incur the repair expense for containers damaged while on lease. This fee is recorded as revenue when earned according to the terms of the rental contract. An accrual has been recorded to provide for the estimated costs incurred by this service. This accrual is a component of net lease receivables due from the Leasing Company (see note 4). The Partnership is not responsible in the event repair costs exceed predetermined limits, or for repairs that are required for damages not defined by the damage protection plan agreement.

Notes to Financial Statements
(Continued)

(6) Net Lease Revenue

Net lease revenue is determined by deducting direct operating expenses, base management fees and reimbursed administrative expenses to CCC from the rental revenue earned by the Leasing Company under operating leases to ocean carriers for the containers owned by the Partnership. Net lease revenue for the years ended December 31, 2001, 2000 and 1999, was as follows:

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Rental revenue	\$ 1,023,877	\$ 1,465,941	\$ 1,721,546
Less:			
Rental equipment operating expenses	185,518	309,755	374,146
Base management fees (note 7)	71,348	97,712	127,310
Reimbursed administrative expenses (note 7):			
Salaries	34,908	50,247	46,001
Other payroll related expenses	3,533	4,535	7,853
General and administrative expenses	<u>13,400</u>	<u>19,843</u>	<u>33,837</u>
	\$ <u>715,170</u>	\$ <u>983,849</u>	\$ <u>1,132,399</u>

(7) Compensation to General Partner

Base management fees are equal to 7% of gross lease revenues attributable to operating leases pursuant to the Partnership Agreement. Reimbursed administrative expenses are equal to the costs expended by CCC and its affiliates for services necessary for the prudent operation of the Partnership pursuant to the Partnership Agreement. The following compensation was paid or will be paid by the Partnership to CCC:

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Base management fees	\$ 71,348	\$ 97,712	\$ 127,310
Reimbursed administrative expenses	<u>51,841</u>	<u>74,625</u>	<u>87,691</u>
	\$ <u>123,189</u>	\$ <u>172,337</u>	\$ <u>215,001</u>

(8) Limited Partners' Capital

Cash distributions made to the limited partners during 2001, 2000 and 1999 included distributions of proceeds from equipment sales in the amount of \$605,486, \$637,354, and \$467,394, respectively. These distributions, as well as cash distributions from operations, are used in determining "Adjusted Capital Contributions" as defined by the Partnership Agreement.

The limited partners' per unit share of capital at December 31, 2001, 2000 and 1999 was \$98, \$141, and \$180, respectively. This is calculated by dividing the limited partners' capital at the end of each year by 33,992, the total number of limited partnership units.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Liquidity and Capital Resources

During the Registrant's first 10 years of operations, the Registrant's primary objective was to generate cash flow from operations for distribution to its limited partners. Aside from the initial working capital reserve retained from the gross subscription proceeds (equal to approximately 1% of such proceeds), the Registrant relied primarily on container rental receipts to meet this objective as well as to finance current operating needs. No credit lines are maintained to finance working capital. Commencing in 1999, the Registrant's 11th year of operations, the Registrant began focusing its attention on the disposition of its fleet in accordance with another of its original investment objectives, realizing the residual value of its containers after the expiration of their economic useful lives, estimated to be between 12 to 15 years after placement in leased service. Since that time, the Registrant has been actively disposing of its fleet, while cash proceeds from equipment disposals, in addition to cash from operations, have provided the cash flow for distributions to the limited partners. The decision to dispose of containers is influenced by various factors including age, condition, suitability for continued leasing as well as the geographical location when disposed. At that time whereby the Registrant's fleet size is reduced to approximately 20% of its original fleet size, the Registrant expects to enter the final phase of its liquidation and wind-up stage of operations.

Cash distributions from operations are allocated 5% to the general partner and 95% to the limited partners. Distributions of sale proceeds are allocated 1% to the general partner and 99% to the limited partners. This sharing arrangement will remain in place until the limited partners receive aggregate distributions in an amount equal to their capital contributions, plus a 10% cumulative, compounded (daily), annual return on their adjusted capital contributions. Thereafter, all distributions will be allocated 15% to the general partner and 85% to the limited partners, pursuant to Section 6.1(b) of the Registrant's Partnership Agreement. Cash distributions from operations to the general partner in excess of 5% of distributable cash will be considered an incentive fee and compensation to CCC.

From inception through February 28, 2002, the Registrant has distributed \$22,685,065 in cash from operations and \$3,069,939 in cash from container sales proceeds to its limited partners. This represents total distributions of \$25,755,004, or approximately 152% of the limited partners' original invested capital. Distributions to partners are determined and paid quarterly, based primarily on each quarter's cash flow from operations and cash generated from container sales. Quarterly distributions are also affected by periodic increases or decreases to working capital reserves, as deemed appropriate by the general partner. Sales proceeds distributed to its partners may fluctuate in subsequent periods, reflecting the level of container disposals.

At December 31, 2001, the Registrant had \$492,681 in cash and cash equivalents, a decrease of \$248,533 from the cash balance at December 31, 2000, and no change from the cash balance at December 31, 1999. The Registrant invests its working capital as well as its cash flows from operations and sale of containers that have not yet been distributed to CCC or its limited partners in money market funds.

Cash from Operating Activities: Net cash provided by operating activities was \$732,838 and \$1,067,166 during 2001 and 2000, respectively, primarily generated from the billing and collection of net lease revenue.

Cash from Investing Activities: Net cash provided by investing activities was \$491,219 and \$647,744 in 2001 and 2000, respectively. These amounts represent sales proceeds generated from the sale of container equipment.

Cash from Financing Activities: Net cash used in financing activities was \$1,472,590 during 2001 compared to \$1,466,376 during 2000. These amounts represent distributions to the Registrant's general and limited partners. The Registrant's continuing container disposals, as well as current market conditions, should produce lower operating results and, consequently, lower distributions to its partners in subsequent periods.

Results of Operations

Year Ended December 31, 2001 Compared to the Year Ended December 31, 2000

Pursuant to the Limited Partnership Agreement of the Registrant, all authority to administer the business of the registrant is vested in CCC. A Leasing Agent Agreement exists between CCC and the Leasing Company, whereby the Leasing Company has the responsibility to manage the leasing operations of all equipment owned by the Registrant. Pursuant to the Agreement, the Leasing Company is responsible for leasing, managing and re-leasing the Registrant's containers to ocean carriers and has full discretion over which ocean carriers and suppliers of goods and services it may deal with. The Leasing Agent Agreement permits the Leasing Company to use the containers owned by the Registrant, together with other containers owned or managed by the Leasing Company and its affiliates, as part of a single fleet operated without regard to ownership.

At December 31, 2001, 48% of the original equipment remained in the Registrant's fleet, as compared to 59% at December 31, 2000. The following chart summarizes the composition of the Registrant's fleet (based on container type) at December 31, 2001.

	<u>20-Foot</u>	<u>40-Foot</u>	<u>40-Foot High-Cube</u>
Containers on lease:			
Term leases	468	192	150
Master leases	<u>367</u>	<u>88</u>	<u>389</u>
Subtotal	835	280	539
Containers off lease	<u>240</u>	<u>158</u>	<u>246</u>
Total container fleet	<u>1,075</u>	<u>438</u>	<u>785</u>

	<u>20-Foot</u>		<u>40-Foot</u>		<u>40-Foot High-Cube</u>	
	<u>Units</u>	<u>%</u>	<u>Units</u>	<u>%</u>	<u>Units</u>	<u>%</u>
Total purchases	2,327	100%	799	100%	1,653	100%
Less disposals	<u>1,252</u>	<u>54%</u>	<u>361</u>	<u>45%</u>	<u>868</u>	<u>53%</u>
Remaining fleet at December 31, 2001	<u>1,075</u>	<u>46%</u>	<u>438</u>	<u>55%</u>	<u>785</u>	<u>47%</u>

The demand for dry cargo containers has been adversely affected by the slowdown in the global economy resulting in an excess supply of containers in many locations. Transpacific trade, a large proportion of which consists of technology-related goods, has been largely affected by the slowdown of the US economy, while the contraction in the Japanese economy contributed to lower levels of intra-Asian trade. For the first time in many years, the GDP growth rates of the United States, Europe, and Japan decelerated simultaneously, contributing to lower utilization rates and higher container inventories throughout the world.

As a result of the increasing world-wide container inventories during 2001, the demand for new container production has declined. Although a slowdown in new container production should have positive short and long-term effects for the container leasing industry, a reduction in new containers will not significantly reduce off-hire container inventories without an improvement in the world's economies. During the fourth quarter of 2001, prices for new containers reached historic lows, creating further downward pressures on future per-diem rates and container residual values.

Recent corporate failures and defaults within the credit markets, as well as an increasingly cautious business climate since September 11, 2001, have contributed to lower levels of capital available for new container purchases. Accordingly, a more conservative credit market should result in a reduction of funding for new container production and, in the short term, contribute to improving the level of off-hire container inventories for both leasing companies and shipping lines. In response to the foregoing, the Leasing Company continues to implement a number of marketing initiatives which are designed to target identified leasing opportunities and enhance inventory management of the Registrant's fleet.

The effect of the slowdown in global economic conditions on the container leasing industry's customers, the shipping lines, coupled with their acquisition of new, larger container ships, appear to have created a condition of excess shipping capacity. This may ultimately result in some shipping lines experiencing financial difficulty, insolvency, or consolidation and ultimately influence the demand for leased containers. Although the ultimate outcome, as well as its impact on the container leasing industry and the Registrant's results of operations is unknown, CCC, on behalf of the Registrant, will work closely with the Leasing Company to monitor outstanding receivables, collections, and credit exposure to various existing and new customers.

The Registrant's average fleet size and utilization rates for the years ended December 31, 2001, 2000 and 1999 were as follows:

	<u>2001</u>	<u>2000</u>	<u>1999</u>
Fleet size (measured in twenty-foot equivalent units (TEU))			
Dry cargo containers	3,909	4,762	5,467
Average utilization rates			
Dry cargo containers	75%	81%	78%

The Registrant's average dry cargo container per-diem rental rates for the year 2001 decreased 10% from 2000 levels. The decline in the Registrant's fleet size, combined with the net reduction in average per-diem rental rates contributed to a 30% decline in gross rental revenue (a component of net lease revenue) for 2001 when compared to the previous year.

The primary component of the Registrant's results of operations is net lease revenue. Net lease revenue is determined by deducting direct operating expenses, management fees and reimbursed administrative expenses, from rental revenues billed by the Leasing Company from the leasing of the Registrant's containers. Net lease revenue is directly related to the size, utilization and per-diem rental rates of the Registrant's fleet.

Income (loss) from operations for the year ended December 31, 2001 was a loss of \$26,293, compared to income of \$89,629 for the prior year. The decline was primarily due to a decrease in net lease revenue of \$268,679, partially offset by a decrease in the net loss on disposal of equipment of \$40,049, and a \$122,700 decrease in depreciation expense.

Net lease revenue was \$715,170 for the year 2001, compared to \$983,849 for the prior year. The decrease was due to a \$442,064 decline in gross rental revenue (a component of net lease revenue) from the year 2000. Gross rental revenue was impacted by the Registrant's smaller fleet size, lower per-diem rental rates and lower fleet utilization rates. Other components of net lease revenue, including rental equipment operating expenses, management fees, and reimbursed administrative expenses, were lower by a combined \$173,385 when compared to the year 2000, and partially offset the decline in gross lease revenue. Contributing to the decline in direct operating expenses were declines in repair and maintenance expenses, handling and storage costs, and the provision for doubtful accounts.

Depreciation expense of \$553,348 was \$122,700 lower than 2000 due to an aging, declining fleet. Effective June 1, 2001, the Registrant changed the estimated life of its rental container equipment from an estimated 12 year life to a 15 year life, and its estimated salvage value from 30% to 10% of original equipment cost. The effect of these changes was an increase in depreciation expense of approximately \$178,340 since June 1, 2001.

Other general and administrative expenses were \$70,904 in 2001, an increase of \$9,992 or 16% when compared to 2000. Contributing to this increase were professional fees, costs related to investor communications and net exchange rate losses.

Net loss on disposal of equipment was a result of the Registrant disposing of 539 containers in 2001, as compared to 626 containers during 2000. These disposals resulted in a net loss of \$117,211 for 2001, compared to a net loss of \$157,260 for 2000. The Registrant believes that the net loss on container disposals in 2001 was a result of various factors, including the age, condition, suitability for continued leasing, as well as the geographical location of the containers when disposed. These factors will continue to influence the decision to repair or dispose of a container when it is returned by a lessee, as well as the amount of sales proceeds received and the related gain or loss on container disposals. The level of the Registrant's container disposals in subsequent periods will also contribute to fluctuations in the net gain or loss on disposals. As a result of current world events and market conditions, the Registrant re-evaluated its asset impairment criteria pursuant to the Financial Accounting Standards Board's accounting pronouncement SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of." There were no reductions to the carrying value of container rental equipment during 2001, 2000, and 1999.

Year Ended December 31, 2000 Compared to the Year Ended December 31, 1999

Income from operations for the year ended December 31, 2000 was \$89,629, compared to \$126,576 for the prior year. The decrease was primarily due to a \$148,550 decline in net lease revenue, partially offset by a decline in depreciation expense of \$121,820.

Net lease revenue of \$983,849 for the year 2000 was \$148,550 lower compared to the prior year. The decline was due to a \$255,605 decline in gross rental revenue (a component of net lease revenue) from the year 1999, partially offset by a \$64,391 decline in rental equipment operating expenses, attributable to the Registrant's higher utilization rate in 2000 and its impact on activity based expenses such as storage and handling. Gross rental revenue was impacted by the Registrant's smaller fleet size and lower per-diem rental rates. Average dry cargo per-diem rental rates for the year 2000 decreased 9% from 1999 levels. Other components of net lease revenue, including management fees and reimbursed administrative expenses, were lower by a combined \$107,055 when compared to the prior year, a result of the Registrant's fleet size and related performance.

Depreciation expense of \$676,048 in 2000 was \$121,820 lower than 1999 due to an aging, declining fleet size.

Other general and administrative expenses increased to \$60,912 in 2000, an increase of \$17,305 when compared to the prior year. Contributing to this increase were professional fees and costs related to investor communications, partially offset by an increase in net exchange rate gains.

Net loss on disposal of equipment was a result of the Registrant disposing of 626 containers during 2000, as compared to 429 containers during 1999. These disposals resulted in a net loss of \$157,260 for 2000 as compared to a net loss of \$164,348 for 1999. The Registrant believes that the net loss on container disposals in 2000 was a result of various factors including the age, condition, suitability for continued leasing, as well as the geographic location of the containers when disposed.
