RADA to Provide the Chilean Air Force (FACH) With an Advanced Debriefing Solution for Its New F-16 C/D Aircraft Purchase

NETANYA, Israel, May 15 /PRNewswire-FirstCall/ -- RADA Electronic Industries Ltd. (Nasdaq: [RADIF](#) - News), has announced today that the Chilean Air Force has selected RADA for the supply of an Advanced Digital Debriefing Solution for its new F-16 C/D aircraft purchase. The solution consists of an airborne Digital Video, Audio and Data Recorder complimented with a Ground Debriefing Station (GDS) capable of presenting simultaneously the digital video recording synchronized with a 3-D computerized representation of all aircraft involved in the mission.

For the airborne digital recorder, RADA has chosen the digital solid state MDR-87 (Mission Data Recorder) produced by TEAC America Inc., which will include ACMI elements provided by Israel Aircraft Industries (IAI) MLM division. The MDR-87 will replace the base line F-16 Analog Hi-8mm Video, V-83 AVTR, also produced by TEAC America Inc.

The V-80/83 AVTR is installed on a majority of the F-16 aircraft worldwide. RADA will be the first company to replace the V-83 AVTR with a digital airborne recorder and provide a complete advanced digital debriefing solution for its customers.

Maj. General (Res.) Herzle Bodinger, RADA President & Chairman stated "RADA has previously provided a similar debriefing solution based on analog video recording for the F-5 aircraft of the Chilean Air Force, through an upgrade program of Israel Aircraft Industries (IAI) LAHAV division. We are proud to enable the Chilean Air Force to perform advanced integrated debriefing of its advanced F-16 and F-5 squadrons through RADA's debriefing solutions. We are certain that other Air Forces worldwide will recognize the benefits from having an advanced debriefing tool and will follow suit the Chilean Air Force".

About RADA

RADA Electronic Industries Ltd. is an Israel based company involved in the commercial and military aerospace industries. The company specializes in Avionics, Data Acquisition Systems, Ground Debriefing Stations and Automatic Test Equipment. RADA, employs 100 people, many of which are engineers.
