Media Release

Unaxis Displays wins large order for Flat Panel Displays in Taiwan

Pfäffikon SZ, June 21, 2002 – The Unaxis Corporation's Displays Division has received a large order from Chunghwa Picture Tubes (CPT) for Flat Panel Display production systems worth over CHF 50 million.

Taiwan-based CPT is one of the world's leading manufacturers of Flat Panel Displays. The company will be making exclusive use of production systems from Unaxis Displays at its three factories. The production systems are based on PECVD technology (Plasma Enhanced Chemical Vapor Deposition), an increasingly popular technique used in Flat Panel Displays manufacture. CPT will be deploying the Unaxis Displays production systems for making large computer, notebook and TV displays as well as compact units for mobile telephones and PDAs.

Unaxis Displays leads the market thanks to innovative technology

Unaxis Displays is one of the world's major vendors of production systems for Flat Panel Displays. The CPT order further consolidates the division's leadership for PECVD systems in Taiwan. Instrumental in clinching the deal was Unaxis Displays' leading-edge process technology, which offers significant cost advantages for Flat Panel Displays production. Shipment to CPT is planned for February 2003, at which point the deal will also be reflected in sales figures.

Unaxis is a globally active leading provider of production systems, components and services for selected growth markets, focused on information technology. Unaxis' activities comprise the Information Technology segment (semiconductors, displays, data storage and optical components), Surface Technology, and Components and Special Systems (vacuum technology and space travel engineering). Unaxis Headquarters are in Pfäffikon (SZ) Switzerland, with production facilities in Europe, North America and Asia. The corporation, which employs around 7 200 people, achieved sales of CHF 2 127 million in 2001.
