**SYNEX INTERNATIONAL ANNOUNCES
PROGRESS OF POWER PROJECT INTEREST**

Synex International Inc. is providing an update in respect of the minority interest that its wholly owned subsidiary, Synex Energy Resources Ltd, has in Coast Mountain Power Corp, which is listed on the Canadian Venture Exchange.

On June 12, Coast Mountain Power, announced that its wholly owned subsidiary, Coast Mountain Hydro Corp, has engaged TD Securities (USA) Inc. to act as an exclusive financial adviser in connection with its Forest Kerr Hydroelectric Project.

The Forest Kerr Project is a 100 MW hydroelectric powerplant located on the Iskut River, approximately 80 miles north of Stewart, British Columbia, which is expected to be eventually connected to the BC Hydro grid. The project is subject to review under the BC Environmental Assessment Act and therefore Coast Mountain has spent the past year preparing an application for a project approval certificate, which will address a wide range of political, environmental and social and economic criteria.

Coast Mountain has stated publicly that it is not aware of any significant adverse environmental consequences resulting from the project and that it will serve as a major improvement to the northern industrial infrastructure, which in turn may lead to a renewal of interest in the development of a resource based economy.

Synex International Inc. is a public company, trading on the Toronto Stock Exchange with three operating divisions covering: the development and operation of electrical generation facilities; the development and marketing of business intelligence and accounting related software products; and an engineering group providing services for the control and use of water, particularly hydroelectric facilities.
