Dear Sir,

Subject: Pailin Project: Phase II Gas Production

Reference is made to Pailin Project (concession block B12/27, located in the Gulf of Thailand) with PTT Exploration and Production Public Company Limited (PTTEP), the joint venture partner with 45% interest, Unocal Thailand, Ltd. – the operator with 35% interest, Amerada Hess Exploration (Thailand) Co., Ltd., with 15% interest and MOECO Thai Oil Development Co., Ltd. (an affiliate of Mitsui Oil Exploration Co., Ltd.) with 5% interest. Gas production of the Pailin Project started since August 1999.

The Company would like to report that on July 1, 2002, Pailin Project Phase II gas production has begun in accordance with the Gas Sales Agreement with PTT Public Company Limited at a higher production rate from the average of 165 million cubic feet per day (MMCFD) to the average of 330 MMSCFD. In addition, condensate production from the field is expected to reach approximately 15,300 barrels per day. This marks a successful milestone in increasing production from the Pailin Project as planned in order to satisfy the natural gas demand in Thailand.

Yours sincerely,

Chitrapongse Kwangsukstith
President
