COLT SIGNS AGREEMENT WITH KPN TELECOM TO SUPPLY SERVICES IN EUROPE FOR CLIENTS AFTER KPNQWEST BANKRUPTCY

COLT Telecom Group plc (COLT) and KPN Telecom have signed a major co-operative agreement for the supply of broadband services to KPN's corporate clients. Through this agreement, KPN Telecom can offer an alternative for providing broadband services to its clients who might experience continuity problems caused by the bankruptcy of KPNQwest. KPN already placed an order with COLT for the supply of 17 STM-1 backbone connections for KPN's international telephone and data traffic. COLT had this European network up and running within 36 hours.

The agreement covers European ATM/Frame Relay and Managed Broadband Services. The co-operation between KPN and COLT provides continuity for KPN clients who use KPNQwest's broadband services. These are companies with sizeable European networks. The joint KPN and COLT team will migrate these clients on request to COLT T's own network in the immediate future. This rapid migration is possible because of COLT's pan-European presence and end-to-end network management capability.

"We strive not only for growth, but especially for reliability as well. Our clients are leading enterprises to which telecommunications is of vital importance. This agreement proves that the expertise of our staff and the quality of our network are recognized in the market. We look forward to further intensifying our co-operation with KPN Telecom", says Richard Oosterom, Managing Director COLT, Benelux.

Steve Robertson, Managing Director of COLT's European Network Services added: "COLT has a reputation for exceptional customer service and we are working round the clock to ensure the efficient transition of customers on to the COLT network."

About COLT

COLT Telecom Group plc is a leading European provider of business communication services. COLT has over 13,000 directly connected network services and eBusiness customers and has high bandwidth local networks in 32 European cities in thirteen countries supported by a series of Internet Solution Centres and inter-linked by a 15,000 route kilometre high capacity fibre-optic long distance network. Information about COLT and its products and services can be found on the web at www.colt.net.
