Press releases
FIRST GTL CONTRACT FOR TECHNIP-COFLEXIP

Paris-La Défense, June 20, 2002

The Petroleum Oil and Gas Corporation of South Africa (Pty) Ltd (Petro SA) - a merger between Mossgas and other State petroleum assets - on behalf of a joint venture between Mossgas and Statoil, has awarded Technip-Coflexip (NYSE: TKP and Euronext: 13170) an engineering and services contract for the implementation of a semi-commercial unit based on Statoil's low temperature Fischer Tropsch technology.

The plant, with a nominal capacity of 1,000 barrels/day, will be based at Mossel Bay in the Republic of South Africa. The expected start-up date is end of 2003.

Under the terms of this contract, Technip-Coflexip will carry out detail engineering as well as procurement services and supervision of construction.

This project will be performed by the engineering center of Technip-Coflexip based in Rome, in association with Technip-Coflexip's new affiliate to be created in South Africa with a local partner.

This contract is the first breakthrough of Technip-Coflexip on the emerging market of gas-to-liquids (GTL) facilities for which several large-scale projects are currently being developed. GTL facilities are designed to produce high quality liquid hydrocarbons from gas. The liquid hydrocarbons can be easily transported from the gas producing countries and they meet the needs of the refiners to satisfy new environmental standards.

* * *

With a workforce of about 18,000 and annual revenues of about 5 billion euros, Technip-Coflexip ranks among the top five in the field of oil and petrochemical engineering, construction and services. Headquartered in Paris, the Group is listed in New York (NYSE: TKP) and in Paris (EURONEXT: 13170). The main engineering and business centers of Technip-Coflexip are located in France, Italy, Germany, the UK, Norway, Finland, the Netherlands, the United States, Brazil, Abu-Dhabi, China, India, Malaysia and Australia. The Group has high-quality industrial and construction facilities in France, Brazil, the UK, the USA, and Finland as well as a world class fleet of offshore construction vessels

Paris-La Défense, June 20, 2002

PRESS RELEASE

EXTENSION CONTRACT FOR LA PAMPILLA REFINERY

The Peruvian company Refinería La Pampilla S.A. partly owned by the Repsol YPF Group has awarded on an EPC lump sum turn-key basis to a joint venture created between Technip-Coflexip and the Spanish group Dragados Industrial a contract for a major extension of its refinery located in La Pampilla nearby Lima.

The project mainly consists in the addition of new units like Vacuum, Visbreaker, Merox and Sour Water Treatment as well as the revamp of its crude unit and the related utilities. It will be mechanically completed in 23 months.

Technip Coflexip, who already built different units of La Pampilla refinery in the 70's and Dragados Industrial will provide engineering services, supplies and construction for this project. This is the first significant cooperation project between Technip-Coflexip and Dragados Industrial.

TECHNIP-COFLEXIP

Paris-La Défense, June 21, 2002

PRESS RELEASE

ANNUAL GENERAL SHAREHOLDERS MEETING OF TECHNIP-COFLEXIP HELD ON 20 JUNE 2002

At the general meeting of shareholders of Technip-Coflexip (NYSE: TKP and EURONEXT: 13170) held on 20 June 2002, all 17 resolutions proposed by the Management Board were approved.

The shareholders approved a dividend of EUR3.30 per share (to which is attached the tax credit of EUR1.65 per share) to be paid on 28 June 2002.

The shareholders also approved the merger of ISIS into Technip-Coflexip which already owned 99.09% of ISIS. Shareholders of ISIS (apart from Technip-Coflexip) will receive 11 shares of Technip-Coflexip for each 10 shares of ISIS. The effective payout date for the share exchange is 20 June 2002. Consequently, ISIS shareholders will receive the dividend noted above.

Mr. Valot, Chairman of the Management Board, noted that the company is working on improving its earnings forecasting procedures in order to enable management to communicate with the market more promptly. With respect to the outlook for 2002, Mr. Valot noted that EBITDA for the second quarter of 2002 would be stronger than that of the first quarter of 2002, but not as strong as second quarter 2001 pro forma EBITDA which was particularly high.

Recalling that the company's backlog at 31 March 2002 reached a record high at EUR 5.5 billion, or 14 months of revenue, Mr. Valot also pointed out that, in addition to the backlog, the company has EUR1 billion in "pre-backlog" (signed contracts awaiting entry into force).

The Chairman of the Management Board also noted that the accessible market for Technip-Coflexip has continued to expand especially with respect to projects for large deepwater floaters, since the company is now very often pre-qualified by operators to tender for such projects in Brazil and West Africa.

These potential revenue synergies will be complemented with cost synergies, (on procurement, information technology, fixed costs and tendering costs) a portion of which will be achieved in 2003 given the delays in the start-up of several large projects.

Also announced was the program to dispose of non-strategic assets, valued at over EUR100 million, during the coming 12 months. The corporate offices of the former Coflexip will figure among these disposals.

For a complete copy of the presentation given by Mr. Valot, visit the "Publications and Presentations" section on the company website at www.technip-coflexip.com.
