MEXICO, D.F. (July 18, 2002) – Tubos de Acero de México, S.A. (AMEX: TAM) informs

that, as of today, the financial statements as of and for the fiscal year ended December 31, 2001, and as of and for the quarter ended March 31, 2002, are available to investors through the Mexican Stock Exchange system. These financial statements include the adjustment in the value of the investment in associated companies mentioned in the press release published in July 1, 2002, in which Tamsa also announced that its independent accountants had removed the qualification in connection with the value of its investments in Amazonia.

Tamsa's financial statements as of and for the fiscal year ended December 31, 2001, have been included on Tamsa's report on Form 20-F, filed with the Securities and Exchange Commission on June 28, 2002. Tamsa's results for the quarter ended March 31, 2002, as revised to reflect the adjustment in the value of Tamsa's investment in associated companies, are set forth below.

All figures are in thousands of Mexican pesos, except per share/ADR data, with purchasing power as of March 31, 2002.

First Quarter 2002 Results Highlights

(1Q02 vs. 1Q01)

- Domestic oil related sales volume increased 28.5%
- Export sales volume totaled 138,705 metric tons during the quarter
- Operating profit as a percentage of sales was 21.3%

Results for the First Quarter of 2002

Operating profit reached Ps.311,217 during the first quarter of 2002 representing 21.3% of net sales. EBITDA in the first quarter of 2002 totaled Ps.409,980, which represented 28.0% of net sales.

During the first quarter of 2002 net sales were Ps.1,462,186, a decrease of 14.7% when compared to the same period of 2001. The decrease in net sales was mainly attributable to lower sales volume in the non-oil domestic market, which was affected by the continued slow pace of the North American economies during the period, as well as by lower sales at Tubos de Acero de Venezuela's (Tavsá) resulting from adverse economic and political conditions in that country, as well as management and

labor problems at PDVSA's reflected in a reduction of 32.9% in Venezuela's rig count year over year. The decrease in net sales was also attributable to lower average selling prices in the domestic petroleum market due to a variation in the mix of products sold during this quarter and to the effect of a 5.3% increase in the value of the Mexican peso since March 31, 2001. These negative trends were partially offset by higher sales in the domestic petroleum pipe market. Net sales in dollar terms decreased by 4.9% in the first quarter of 2002 compared to the same period in 2001.

Sales volume during the first quarter of 2002 reached 179,205 metric tons, from 191,868 metric tons in the same period of 2001 representing a decrease of 6.6%. This decrease was mainly due to a 44.6% decrease in Tavsas's sales volume and a 40.6% decrease in the non-oil domestic market sales volume, this result was partially offset by a 28.5% recovery in the domestic petroleum pipe market.

Domestic sales volume to oil-related customers totaled 18,633 metric tons in the first quarter of 2002, compared to 14,504 metric tons in the same period of 2001. This increase in sales was due to more stable operations at Pemex since the second half of 2001 – mainly in the Northern region of the country – related to the Strategic Gas Program. This activity occurred despite the delays in budget allocations which resulted in a slowdown of operations. Sales volume to non-oil related domestic customers decreased by 40.6%, totaling 9,681 metric tons in the first quarter of 2002, from 16,290 metric tons during the same period of 2001. The decrease was mainly due to a contraction of industrial production in the Mexican economy coupled with a slow recovery of the U.S. economy, affecting the automotive, mechanical and industrial sectors.

Export sales volume in the first quarter of 2002 totaled 138,705 metric tons remaining practically at the same level when compared to 142,062 metric tons achieved in the same period of 2001. This decrease was due to the reduced drilling activity in Latin America – mainly in Venezuela and Argentina – demonstrated by the 13.8% decrease in the average rig count for the first quarter of 2002 when compared to the same period of 2001. Sales volume improved in the Middle East, the United Kingdom, Kazakhstan, Ecuador, Algeria, Nigeria and China.

Tavsas's sales volume totaled 7,903 metric tons in the first quarter of 2002, representing a 44.6% decrease compared to 14,260 metric tons in the same period of 2001. This decrease is the result of adverse economic and political conditions in Venezuela that affected the oil sector, as well as the reduction in oil production mandated by OPEC.

Riga's sales volume during the first quarter of 2002 totaled 2,007 metric tons of welded pipe fittings. Sales volume of steel bars decreased to 2,276 metric tons during the first quarter of 2002, compared to 4,752 metric tons in the same period of 2001 since we reduced significantly our shipments of steel bars to AlgomaTubes.

Cost of products sold, expressed as a percentage of net sales was 59.8% in the first quarter of 2002, compared to 58.1% in the same period of 2001. This increase in cost was due to higher depreciation expenses which include, as Tavsas's plant and equipment modernization completed in 2001 began to be

depreciated during this quarter. When compared to the fourth quarter of 2001, cost of products sold as a percentage of sales decreased from 62.0% to 59.8% in line with the first nine months of 2001.

Selling, general and administrative expenses in the first quarter of 2002, as a percentage of net sales, was 18.9%, compared to 17.3% in the same period of 2001. Selling expenses represented 11.3% in the first quarter of 2002 compared to 10.0% in the same period of 2001, mainly due to higher sales to markets with different selling conditions, principally Nigeria where products are sold mostly delivery duty paid, as well as higher premium joint royalties and agent commissions in the Middle East. General and administrative expenses in the first quarter of 2002 remained stable at 7.5% of total sales, compared to 7.3% in the same period of 2001. In absolute terms, general and administrative expenses decreased 11.9% during the first quarter of 2002 compared to the same period of 2001.

Tamsa's comprehensive financing result during the first quarter of 2002 represented a cost of Ps.33,268, compared to a cost of Ps.17,972 in the same period of 2001. The main factor that contributed to this increase was the exchange related loss of Ps.42,404 resulting from the Venezuelan Bolivar devaluation as Tavsya's debt is denominated in US dollars, compared to an exchange related loss of Ps.1,230 during the same period of 2001. This increase was partially offset by lower net interest expenses in the first quarter of 2002 of Ps.10,915, compared to Ps.19,259 in the same period of 2001 and a monetary gain Ps.20,051 in the first quarter of 2002, compared to a monetary gain of Ps.2,517 in the same period of 2001.

During the first quarter of 2002, other income totaled Ps.3,958, compared to other expenses of Ps.1,109 in the same period of 2001. This increase stems from operations where Tamsa sells as a trader products from the other TenarisGroup companies.

Income tax, asset tax and profit sharing provisions totaled Ps.143,895 in the first quarter of 2002, compared to Ps.146,605 in the same period of 2001. This result reflects: (i) higher income tax that totaled Ps.193,413 compared to Ps.145,592 in the same period of 2001, (ii) higher profit sharing provisions of Ps.37,314 compared to Ps.33,102 in the same period of 2001; and (iii) lower tax benefits arising from tax loss carry forwards during the first quarter of 2002, that totaled Ps.384, compared to Ps.4,986 in the same period of 2001. A net deferred tax credit of Ps.86,953 was registered in the first quarter of 2002, compared to a credit of Ps.27,103 in the same period of 2001 that resulted from the application of Statement D-4 effective January 1, 2001.

During the first quarter of 2002, losses from associated companies equaled Ps.53,089, compared to a loss of Ps.15,428 during the same period of 2001. These losses were derived mainly from Tamsa's equity participation in Consorcio Siderurgia Amazonia's (Amazonia) through its subsidiary Tamsider LLC (Tamsider).

Tavsya's net loss for the first quarter of 2002 was Ps.30,758, compared to a net income of Ps.29,746 for the same period of 2001.

Net income during the first quarter of 2002 totaled Ps.84,923, compared to Ps.228,351 in the same period of 2001. This important decrease of 62.8% stems mainly from losses of associated companies and lower operating profit. Net income corresponding to majority shareholders during the first quarter of 2002 totaled Ps.94,150 compared to Ps.219,427 in the same period of 2001.

Tamsa's financial debt was Ps.1,503,462 (US\$166.5 million) as of March 31, 2002, compared to Ps.1,356,634 (US\$135.9 million) as of March 31, 2001. Notwithstanding the increase in debt, financial debt net of cash as of March 31, 2002 decreased significantly to Ps.672,380 (US\$74.5 million) in the first quarter of 2002, compared to Ps.1,062,006 (US\$106.4 million) in the same period of 2001. The deferred tax liability as of March 31, 2002 equaled Ps.1,917,432.

Tamsa's interest coverage ratio was 37.6 to 1 at March 31, 2002, compared to 22.6 to 1 at March 31, 2001.

EBITDA in the first quarter of 2002 totaled Ps.409,980, compared to Ps.522,928 in the same period of 2001, representing a decrease of 21.6%, as a result of lower operating profit. As a percentage of total sales in the first quarter of 2002, EBITDA represented 28.0% of net sales, compared to the 30.5% achieved in the same period of 2001.

Net earnings per share during the first quarter of 2002 were Ps.0.25, compared to Ps.0.67 in the same period of 2001. Net earnings per ADR (one ADR = five shares) during the first quarter of 2002 were Ps.1.25.

During the first quarter of 2002, the Company produced 206,827 metric tons of steel, an increase of 1.9% compared to the 202,997 metric tons of steel produced in the same period of 2001. Tamsa produced 171,367 metric tons of finished pipes in the first quarter of 2002 compared to 185,923 metric tons of finished pipes manufactured in the same period of 2001, representing a decrease of 7.8%.

Other transactions

Tamsa entered into agreements with Citibank and JPMorgan Chase in March 2002 and April 2002 in order to reduce its exposure to above-market prices under its natural gas supply agreement with Pemex. Under its agreement with Pemex, Tamsa is required to purchase 296,600 million BTUs (British Thermal Units) per month of natural gas from January 1, 2001 until December 31, 2003 at a fixed price of US\$4.00 per million BTUs. The economic effect of the agreements with Citibank and JPMorgan Chase is to permit Tamsa to purchase 320,000 million BTUs per month at market prices instead of at the US\$4.00 per million BTU rate charged by Pemex, resulting in a more favorable price to Tamsa for natural gas so long as the market price remains below US\$4.00. Under the agreements, Tamsa must continue to make its purchases of natural gas at market prices even if the market price rises above US\$4.00 per million BTUs, thereby exposing Tamsa to a later risk of above-market prices. Also, under the agreements, Tamsa must continue to make purchases at the US\$4.00 per million BTU rate if the market price of natural gas falls to U.S.\$2.00 per million BTUs or lower (during the period from May 1,

2002 to February 28, 2003) or to U.S.\$2.25 per million BTUs or lower (during the period from March 1, 2003 to December 31, 2003). In addition, under each of the agreements with Citibank and JPMorgan Chase, Tamsa is required to purchase 160,000 million BTUs of natural gas per month from January 1, 2004 to December 31, 2005 at a price of US\$2.7 per million BTU.

Some of the statements contained in this press release are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended. Forward-looking statements are based on management's current views and assumptions and involve known and unknown risks that could cause actual results, performance or events to differ materially from those expressed or implied by those statements. These risks include but are not limited to risks arising from uncertainties as to future oil prices and their impact on investment programs by oil companies.
