PRESS RELEASE

Raymond A. Hrkac, President of GGL Diamond Corp. (GGL.TSX Venture) is pleased to report on the following drill results.

Drill hole CH02-08SE, located approximately 40 km. south south-west of the Ekati Mine, on the Company's 100% owned Seahorse Property was laid out to test one of three strong magnetic anomalies. The hole was drilled at Azimuth 287.2 degrees at -45 degrees.

The core has not been logged, but a preliminary assessment, subject to confirmation by logging and confirmation by an independent qualified person, indicates the following.

Until confirmation by an independent person under NI 43-101*, the reference to "kimberlite" refers to an "ultramafic rock" that has "characteristics consistent with kimberlite".

Drill Hole CH02-08SE
