NEWS RELEASE

ELD No. 02-17
October 31, 2002

ELDORADO AND ANGLOGOLD COMPLETE AGREEMENT

VANCOUVER, B.C. - Paul N. Wright, President and Chief Executive Officer of Eldorado Gold Corporation (the "Company" or "Eldorado") (TSX: ELD) is pleased to announce the completion of an agreement with AngloGold South America Limited ("AngloGold") to further both parties interests in and around Eldorado's São Bento Mine and AngloGold's adjacent properties in the state of Minas Gerais, Brazil.

The principal terms of the agreement are as prescribed in the Letter of Intent previously signed by the Company and AngloGold.

- 1) Eldorado, through São Bento Mineração S.A. (Eldorado's wholly owned subsidiary) has been granted the right to explore, develop and mine any reserves discovered down dip beyond its existing property boundary.

In exchange, a net smelter royalty ("NSR") will be paid to AngloGold according to a graduated scale ranging from 0.5% at a gold price less than US\$275/oz. to a maximum of 4.0% at a gold price US\$399/oz. or greater.

- 2) AngloGold has been granted an option valid for a period of 3 years, that provides it with the right, in the event that a mining operation is developed at their Corrego do Sitio Project, to access surplus milling capacity at the São Bento plant. AngloGold also has the option to expand the São Bento plant at AngloGold's sole cost and without disruption to Eldorado's operations. Operating costs for the plant will be borne by both companies pro rata according to their proportionate planned and actual use of the facility. Eldorado will receive a NSR based on the same graduated scale as AngloGold's NSR and payable on all gold produced from the Corrego do Sitio Project that is processed through the São Bento plant.

"The agreement with Eldorado provides the basis for our shareholders to derive maximum benefit from the obvious synergies available in our respective land holdings. We look forward to exploring other opportunities for mutual benefit with Eldorado Gold in Minas Gerais," commented Mr. Roberto Carvalho Silva, President and Chief Executive Officer of AngloGold South America.

São Bento Underground Drilling Confirms Continuity

Drilling continues between the 28th and 32nd levels designed to both define additional reserves and extend the existing resource. The deepest hole drilled to date IF-O55, intersected the main and west ore horizon at the 32nd level, 375 meters below the current mining operations (See Figure 1). The intersection of 13.41 grams per tonnes over 5.31 meters true width (combined main and west ore horizons) has confirmed the continuity of the São Bento ore body over a vertical distance of 1,350 meters. Other significant intercepts from the drilling program are shown in Table 1. The drilling has established that the strike length of the ore zones at the 30th level is in excess of 350 meters similar to historic mining length at São Bento.

The drilling and the 23rd level crosscut also intersected a gold bearing sulphidic quartz vein 200 meters above the main São Bento ore zones. Significant intercepts from this zone designated the Eastern Trend Mineralization, are shown in Table 2. Additional drilling will be carried out on this trend with the objective to further define this zone of mineralization.

A total of 7,400 meters of drilling is underway from the 23rd level crosscut to test the ore zones between the 29th level and 32nd level. A further 7,500 meters of drilling is planned from the 27th level crosscut to establish reserves between the 32nd level and 34th level, 350 meters to 500 meters below the current operations.

Year end 2001 proven and probable reserves at São Bento totaled 461,300 ounces. These reserves were derived from the measured and indicated resources above the mine's 30th level. With the agreement in place and drilling completed both above and below the mine's 30th level, the Company plans at year-end 2002 to have increased its reserves and resources.

"This agreement with AngloGold, combined with continued positive results from our ongoing drilling program, and an improving metal price have ensured the continued extension of our profitable São Bento operation," commented Eldorado's President and Chief Executive Officer, Paul N. Wright.

Eldorado has superior gold assets in Brazil and Turkey, two countries with enormous geological potential. In Brazil we are focusing on the continuing improvement at the São Bento mine, and on the potential of the Brumal property. In Turkey, we continue to expand our asset base, with a resource of approximately 8.8 million ounces in an increasingly attractive jurisdiction. With our international expertise in mining, finance and project development, together with highly skilled and dedicated staff, Eldorado is well positioned to grow in value as we create and pursue new opportunities.

**ON BEHALF OF
ELDORADO GOLD CORPORATION**

Paul N. Wright
President and Chief Executive Officer

Item 1. Name and Address of Reporting Issuer

Eldorado Gold Corporation (the "Company")
920 - 1055 West Hastings Street
Vancouver, BC V6E 2E9

Item 2. Date of Material Change

October 31, 2002

Item 3. Press Release

A Press Release was disseminated by the Company on October 31, 2002, News Release No. 02-17, to the Toronto Stock Exchange and through approved public media.

Item 4. Summary of Material Change

The Company announced the completion of an agreement with AngloGold South America Limited ("AngloGold") under which AngloGold granted the Company, through its wholly owned subsidiary, São Bento Mineração S.A., the right to explore, develop and mine any reserves discovered below 365 metres on property held by AngloGold in and around Eldorado's São Bento Mine. The Company has agreed to pay AngloGold a net smelter royalty on production from AngloGold's property and has granted AngloGold the right to access surplus milling capacity at the São Bento Mine plant together with an option to expand the São Bento Mine plant at AngloGold's sole cost and without disruption to the Company's operations.

Item 5. Full Description of Material Change

Paul N. Wright, President and Chief Executive Officer of the Company is pleased to announce the completion of an agreement with AngloGold to further both

parties interests in and around the Company's São Bento Mine and AngloGold's adjacent properties in the state of Minas Gerais, Brazil.

The principal terms of the agreement are substantially the same as set forth in the Letter of Intent previously signed and publicly announced by the Company and AngloGold and include the following:

- 1) The Company, through São Bento Mineração S.A. (the Company's wholly owned subsidiary) has been granted the right to explore, develop and mine any reserves discovered down dip (below 365 metres) beyond its existing property boundary on property held by AngloGold.

In exchange, the Company will pay AngloGold a net smelter royalty ("NSR") on production from the AngloGold property according to a graduated scale ranging from 0.5% at a gold price less than US\$275/oz. to a maximum of 4.0% at a gold price US\$399/oz. or greater.

- 2) AngloGold has been granted an option, valid for a period of 3 years, providing it with the right, in the event that a mining operation is developed at AngloGold's Corrego do Sitio Project, to access surplus milling capacity at the São Bento Mine plant on certain terms and conditions. AngloGold is also granted the option to expand the São Bento Mine plant at AngloGold's sole cost and without disruption to Eldorado's operations. Upon completion of the expansion, operating costs for the plant will be borne by both companies pro rata according to their proportionate planned and actual use of the facility. AngloGold will pay the Company a NSR, based on the same graduated scale as AngloGold's NSR, on all gold produced from the Corrego do Sitio Project that is processed through the São Bento Mine plant.

Item 6. Confidential Report

Not applicable.

Item 7. Omitted Information

Not applicable.

Item 8. Senior Officer
