Form 27
Securities Act
MATERIAL CHANGE REPORT
Under Section 85(1) of the Act

Item 1 **Reporting Issuer**
ROCK RESOURCES INC.
Suite #2120 – 1500 West Hastings Street
Vancouver, B.C. V6E 2E9
Telephone: (604) 688-3304
Fax: (604) 682-6038

Item 2 **Date of Material Change**

November 18, 2002 - Vancouver, British Columbia

Item 3 **Press Release**

November 18, 2002

Item 4 **Summary of Material Change** Please see item 5 below for details.

The Company and Tres-Or Resources Ltd. are pleased to report that the phase I exploration by Tres-Or on the Temagami North Option has outlined over a dozen targets. Further ground truthing, interpretation and additional magnetic surveys are underway. Diamond drilling has been recommended to further test this anomaly as part of the Rock/Tres-Or winter exploration program.

Item 5 **Full Description of Material Change**

TEMAGAMI NORTH – WINTER DRILL PROGRAM TO COMMENCE

Rock Resources Inc. ("Rock") and Tres-Or Resources Ltd. ("Tres-Or") are pleased to report that the phase I exploration by Tres-Or on the Temagami North Option has outlined over a dozen targets.

The program has outlined over a dozen priority circular magnetic targets with responses indicative of potential kimberlite pipes on the Bucke and Lundy claims. Detailed follow-up sampling, prospecting and mapping have outlined structural features that may have influenced kimberlite emplacement. As part of the phase I program, 41 till samples were collected down-ice of magnetic anomalies to test for kimberlite indicator minerals (KIM). Further ground truthing, interpretation and additional magnetic surveys are underway. Seven ground magnetic survey grids have been completed to cover portions of the Temagami North Option properties in Firstbrook and Coleman townships. Data compilation and interpretation is continuing.

A series of northwest trending faults occur in the Bucke Township area. These faults are part of the Lake Timiskaming Structural Zone, and graben feature that extends from the Ottawa River northwest toward the James Bay lowlands. Research indicates that some of these northwest trending faults are associated with the emplacement of kimberlites in the New Liskeard/Cobalt kimberlite field. The till samples collected during the exploration program are located down-ice of magnetic anomalies with signatures having the potential to be kimberlite pipes. The till samples are being processed by Meridian Geoscience Ltd. for indicator minerals and the recovered KIM grains will be selectively analysed chemically by electron microprobe to prioritise potentially diamondiferous targets.

An earlier till sample tested a circular magnetic target on the Temagami North claims that is similar in size and amplitude to the Bucke Pipe owned by NovaWest Resources Inc. Recent sediments derived from the Wisconsinian glaciation period cover this area and glacial till, glacio-fluvial sediments, and lake bottom deposits are locally thick. Diamond drilling has been recommended to further test this anomaly as part of the Rock/Tres-Or winter exploration program. Over the Bucke Pipe, located approximately 500m east of the claims, between 50 and 100 metres of overburden cover the 700m X 700m pipe. The Temagami North claims have the potential to host diamondiferous kimberlite due to the underlying Archean basement rocks

of the Superior Craton, their position within the New Liskeard kimberlite field, and their proximity to the known Bucke and Gravel pipes.

In making the announcement, Graeme Rowland, Rock Resources Chairman and President said, "The Company has agreed to Tres-Or's proposals to drill targets on this joint venture property beginning this winter."

Item 6 **Reliance on Section 85(2) of the Act**

Not applicable.

Item 7 **Omitted Information**

Not applicable.

Item 8 **Senior Officers**

The following senior officer of the Issuer is knowledgeable about the material change and may be contacted by the Commission at the following:

Officer: Graeme W. Rowland
 President
Telephone: (604) 688-3304
Fax: (604) 682-6038
Address: Rock Resources Inc.
 Suite #2120 – 1055 West Hasting Street
 Vancouver, B.C. V6E 2E9

Item 9 **Statement of Senior Officer**

The foregoing accurately discloses the material change referred to herein.
