Decision by the arbitration court postponed

The arbitration court in the dispute between Studsvik AB's subsidiary Studsvik, Inc. and the consortium Metric Constructors and Duke Engineering (Metric Duke) has requested a delay in reporting its decision. Studsvik and Metric Duke have both accepted the arbitration court's request. The decision is now expected to be presented before the end of January 2003.

Facts about Studsvik

Studsvik is a high-tech company with a leading position in nuclear technology. Studsvik develops and markets products and services which contribute to solving customers' environmental, safety and quality problems through the application of primarily nuclear technology as well as other industrial processes. Studsvik's business is international and customers mainly comprise nuclear power plants and nuclear fuel producers as well as industrial companies and organizations in the health care sector. Studsvik comprises four strategic business units (SBU) – Nuclear Technology, Waste & Decommissioning, Industrial Services and Nuclear Medicine.

Studsvik has signed a special service agreement with Barsebäck and Ringhals

Stensand AB, a wholly-owned subsidiary of Studsvik AB, has signed a four-year special service agreement with the nuclear power plants Barsebäck and Ringhals. The agreement can be extended to a fifth year if the parties so agree. The agreement includes waste management, chemical cleaning, decontamination, human protection services and transportation.

Barsebäck and Ringhals have been customers of Stensand since the start up of both nuclear power plants, but up to now the contracts have been carried out on a current basis by several competing companies. The special service agreement entails some increase in volume for Stensand, since the company is taking over the contracts that up to now have been carried out by competitors.

"Our long experience of special service work at Ringhals and Barsebäck has enabled Stensand, in the face of keen competition, to sign such a long-term agreement, where we are the only contractor for these assignments. This is very favourable, since in this way we have greater opportunities to develop our work from a long-term perspective" says Jan Bjerler, president of Stensand.

"We chose Stensand mainly because they presented a proposal that was entirely in line with what we are looking for. The fact that we have worked together successfully for a long time also means that we have great confidence in Stensand", says Ulf Andersson, group manager of maintenance services for the Ringhals group.
