JJ 00098

PLAN FOR THE MERGER
OF TELECOM ITALIA S.P.A.
INTO OLIVETTI S.P.A.
(under Article 2501-*bis* of the Civil Code)

Milan, April 15, 2003

The following is an English translation of the official version in Italian language. In case of conflict, the Italian language version will prevail.

JJ 00009

Except as provided below, any offer to purchase or sell securities described herein is not being made, directly or indirectly, in or into, or by the use of the mails of, or by any means or instrumentality (including, without limitation by mail, telephonically or electronically by way of internet or otherwise) of interstate or foreign commerce, or any facility of any securities exchange, of the United States of America and any such offer will not be capable of acceptance by any such use, means, instrumentality or facility.

The information contained herein does not constitute an offer of securities for sale in the United States or offer to acquire securities in the United States.

The Olivetti securities referred to herein have not been, and are not intended to be, registered under the U.S. Securities Act of 1933 (the "Securities Act") and may not be offered or sold, directly or indirectly, into the United States except pursuant to an applicable exemption. The Olivetti ordinary shares and Olivetti savings shares are intended to be made available within the United States in connection with the merger pursuant to an exemption from the registration requirements of the Securities Act.

The proposed cash tender offer for a portion of the Telecom Italia ordinary shares described herein is intended to be made available in or into the United States pursuant to an exemption from the tender offer rules available pursuant to the Securities Exchange act of 1934.

The proposed cash tender offer for a portion of the Telecom Italia savings shares described herein is not being made and will not be made, directly or indirectly, in or into the United States

***

The merger described herein relates to the securities of two foreign companies. The merger in which Telecom Italia ordinary shares will be converted into Olivetti ordinary shares is subject to disclosure and procedural requirements of a foreign country that are different from those of the United States.Financial statements included in the document, if any, will be prepared in accordance with foreign accounting standards that may not be comparable to the financial statements of United States companies.

It may be difficult for you to enforce your rights and any claim you may have arising under the federal securities laws, since Olivetti and Telecom Italia are located in Italy, and some or all of their officers and directors may be residents of Italy or other foreign countries. You may not be able to sue a foreign company or its officers or directors in a foreign court for violations of the U.S. securities laws. It may be difficult to compel a foreign company and its affiliates to subject themselves to a U.S. court's judgment.

You should be aware that Olivetti may purchase securities of Telecom Italia otherwise than under the merger offer, such as in open market or privately negotiated purchases.

PLAN FOR THE MERGER
OF TELECOM ITALIA S.P.A.
INTO OLIVETTI S.P.A.
(under Article 2501-*bis* of the Civil Code)

1. Companies participating in the Merger

Absorbing Company

OLIVETTI S.P.A.

Olivetti S.p.A. ("Olivetti" or the "Absorbing Company"), with registered office at 77 Via Jervis, Ivrea, fully paid-up share capital of Euro 8,845,537,520 divided into 8,845,537,520 ordinary shares with a par value of Euro 1 each, tax code and registration number in the Turin Company Register: 00488410010.

Company to be Absorbed

TELECOM ITALIA S.P.A.

Telecom Italia S.p.A. ("Telecom Italia" or the "Company to be Absorbed"), with registered office at 2 Piazza degli Affari, Milan, and headquarters and secondary office at 41 Corso d'Italia, Rome, fully paid-up share capital of Euro 4,023,816,860.80 divided into 5,262,908,631 ordinary shares with a par value of Euro 0.55 each and 2,053,122,025 savings shares with a par value of Euro 0.55 each, tax code and registration number in the Milan Company Register: 00471850016.

2. Bylaws of the Absorbing Company and amendments thereto deriving from the Merger

As a consequence of the Merger, Olivetti will basically adopt the current bylaws of Telecom Italia.

In particular:

(i) the Absorbing Company will change its name to "Telecom Italia S.p.A.";

(ii) the Absorbing Company will take over the corporate purpose of Telecom Italia in its entirety, so as to be able to continue to perform the activities that Telecom Italia is authorized to perform under administrative measures. The amendment to the corporate purpose will give the right of withdrawal to

J1 00011

Olivetti shareholders who are absent or contrary to the Merger, pursuant to Article 2437 of the Civil Code;

(iii) the bylaws of the Absorbing Company will be amended to take account of the changes that will be made to the number and par value (which will be fixed at Euro 0.55) of the ordinary and savings shares at the end of the Merger and hence following the application of the share exchange ratio and assignment procedure described in Sections 3 and 4. As a further consequence of the Merger the bylaws will also be amended to take account of (a) the updating of the amount of the increases in capital already approved by Olivetti for the purposes of the "Piano triennale di Stock Option 2002-2004" stock-option plan, the "Piano triennale di Stock Option febbraio 2002-dicembre 2004" stock-option plan, the "Warrant Azioni Olivetti ex Tecnost 1999-2004" warrants, and the convertible bond issues "Prestito Olivetti 1,5% 2001-2004 convertibile con premio al rimborso" and "Prestito Olivetti 1,5% 2001-2010 convertibile con premio al rimborso", and (b) the increases in capital that the Olivetti shareholders' meeting will be called to approve for the purposes of the stock-option plans of the Company to be Absorbed (Piano 1999, Piano 2000, Piano 2001, Piano Top 2002 and Piano 2002), for the part still applicable;

(iv) the bylaws of the Absorbing Company will contain an article concerning the savings shares that will be assigned in exchange to the holders of Telecom Italia savings shares on the basis of the exchange ratio and assignment procedure described in Sections 3 and 4. In accordance with Article 145 of Legislative Decree 58/1998, this article will specify the substance of the preferential rights attaching to the savings shares issued for the purpose of the exchange, the related conditions, limits and procedures for the exercise thereof and describe the legal treatment of this class of shares in the event of the delisting of the ordinary or savings shares of the Absorbing Company. The preferential rights of the savings shares to be issued in exchange will be the same as those of the Telecom Italia savings shares, including the possibility of satisfying the rights attaching to them by distributing reserves, whose introduction in the Telecom Italia bylaws will be proposed at the shareholders' meeting called to consider the Merger Plan;

(v) the Minister for the Economy and Finance has notified Telecom Italia that he does not consider there are grounds for vetoing the adoption of the merger resolution by the Telecom Italia shareholders. With regard to the inclusion in the bylaws of the clauses providing for special powers, the Minister for the Economy and Finance has communicated that he considers it necessary to maintain the power of approval of the acquisition of major equity interests in the company and the veto powers, in the text currently contained in the Telecom Italia bylaws. The Minister for the Economy and Finance has also communicated that he has reached the agreement on these decisions with the Minister for Productive Activities. This premised, pending the formalization of the measure most appropriate to these decisions and the opinion, if any,

11 00019

that the competent European Union authorities may see fit to express on the matter, the Minister for the Economy and Finance has requested that the bylaws to be submitted to the shareholders meetings of the Companies Participating in the Merger contain the provisions specified above.

(vi) It is also pointed out the shareholders' meeting of the Absorbing Company called to approve the Merger Plan will also be requested to grant a delegation under Article 2443 of the Civil Code to increase the share capital following the Merger by means of the issue of up to a maximum of 88,445,000 ordinary shares with a par value of Euro 0.55 each (and thus for a maximum of Euro 48,644,750), to be offered for subscription to employees of the Absorbing Company or its subsidiaries, with the exclusion of the right of pre-emption under the combined effects of Article 2441, last paragraph, of the Civil Code and Articles 134(2) and 134(3) of Legislative Decree 58/1998.

(vii) Lastly, it is pointed out that the shareholders' meeting of the Absorbing Company called to approved the Merger Plan will first be requested to approve the replacement of Article 20 (Board of Auditors) and the amendment of Article 13 (Board of Directors) of Olivetti's bylaws.

The complete text of the Absorbing Company's bylaws incorporating all the amendments deriving from the Merger, including what is provided for at points (v) and (vi), is annexed to this Merger Plan. The numbers contained in such bylaws will be specified in the merger instrument, on the basis of the principles and methods described in Sections 3 and 4.

3. Exchange ratio

The draft financial statements for the year ended 31 December 2002 of Olivetti and Telecom Italia were taken as showing their assets and liabilities in accordance with and for the purposes of Article 2501-*ter* of the Civil Code.

The exchange ratio has been fixed as follows:

- 7 Olivetti ordinary shares with a par value of Euro 1 (one) each for every Telecom Italia ordinary share with a par value of Euro 0.55;

- 7 Olivetti savings shares with a par value of Euro 1 (one) each for every Telecom Italia savings share with a par value of Euro 0.55;

No cash consideration is envisaged.

J1 00013

4. Procedure for assigning the shares of the Absorbing Company

The exchange ratio between the economic values underlying the shares will be satisfied principally by redistributing Olivetti's capital at the time of the Merger's implementation, net of the Olivetti shares with a par value of Euro 1 (one) for which the right of withdrawal referred to in Section 2(ii) has been exercised. This redistribution, subsequent to the change of the par value of the shares of the Absorbing Company from Euro 1 to Euro 0.55, will be made to the shareholders of Olivetti and the shareholders of Telecom Italia other than Olivetti at the time of the implementation of the Merger on the basis of the exchange ratio specified above and will thus give rise to the following assignment ratios:

- for every Olivetti share (with a par value of Euro 1) withdrawn and cancelled, "x" newly-issued ordinary shares of the Absorbing Company (with a par value of Euro 0.55) will be assigned;
- for every Telecom Italia ordinary share (with a par value of Euro 0.55) withdrawn and cancelled, "7x" newly-issued ordinary shares of the Absorbing Company (with a par value of Euro 0.55) will be assigned;
- for every Telecom Italia savings share (with a par value of Euro 0.55) withdrawn and cancelled, "7x" newly-issued savings shares of the Absorbing Company (with a par value of Euro 0.55) will be assigned;

where "x" is the ratio between

- ✓ the total number of shares of the Absorbing Company with a par value of Euro 0.55 to be redistributed
- ✓ the sum of (i) the total number of Olivetti shares with a par value of Euro 1 outstanding (for which the right of withdrawal has not been exercised) at the time of the Merger's implementation and (ii) 7 times the total number of Telecom Italia shares to be exchanged at the time of the Merger's implementation.

Moreover, if the capital to be redistributed is less than Euro 8,845,537,520, the redistribution will be accompanied by the assignment to all the holders of the Absorbing Company's ordinary and savings shares, in proportion to their respective holdings following the redistribution and therefore on the basis of the above-mentioned exchange ratio, of up to a maximum of 11,103,237,961 new ordinary or savings shares with a par value of Euro 0.55 each (and hence up to a total maximum of Euro 6,106,780,879.1) until the share capital of the Absorbing Company reaches a total of Euro 8,845,537,520 (more precisely: Euro 8,845,537,520.05, taking account of the change of the par value of the Absorbing Company's shares to Euro 0.55), without prejudice to any rounding deriving from the exchange operations.

A service will be provided to the shareholders of both Olivetti and Telecom Italia through authorized intermediaries to handle any fractions of shares, at market prices and at no cost in terms of expenses, stamp duty or commissions, which will permit the number of newly-issued shares due to be rounded down or up to the nearest whole number.

In the event that the Olivetti shares held do not entitle the holder to receive, in accordance with the assignment mechanism, even one newly-issued Olivetti share at the end of the Operation, maintenance of the position of shareholder can be ensured by the assignment free of charge to such persons of one share of the Absorbing Company made available by Olivetti International S.A.

The ordinary and savings shares assigned in exchange as specified above will be listed in the same way as the Olivetti ordinary shares currently outstanding.

Upon completion of the assignment procedure described above, the share capital of the Absorbing Company will be fixed in an amount between a minimum of Euro 8,845,537,520 (more precisely: Euro 8,845,537,520.05, taking account of the change of the par value of the Absorbing Company's shares to Euro 0.55) corresponding to Olivetti's paid-up share capital and certified as per Article 2444 of the Civil Code at the date of this Merger Plan, and a maximum of Euro 11,926,697,278 (more precisely: Euro 11,926,697,277.55, taking account of the change of the par value of the Absorbing Company's shares to Euro 0.55) corresponding to the Absorbing Company's share capital assuming that the conversion and subscription rights attaching respectively to the bonds and to the warrants and stock options issued by Olivetti are exercised in full, without prejudice to any rounding deriving from the exchange operations.

5. Date from which the ordinary and savings shares assigned in exchange will be entitled to a share of profits

The ordinary and savings shares issued by the Absorbing Company in exchange for the shares of the Company to be Absorbed that are cancelled as a result of the Merger will have regular dividend rights.

6. Date of effectiveness of the Merger. Recording of Telecom Italia transactions in the accounts of Olivetti. Start of the tax effects of the Merger

In accordance with Article 2504-*bis* of the Civil Code, the effects of the Merger shall start on the date of the last filing of the merger instrument, or from such later date as may be specified in that instrument.

The effectiveness of the Merger is subject to the admission to listing on the MTA electronic share market operated by Borsa Italiana S.p.A. of the savings shares assigned by the Absorbing Company for the purpose of the exchange.

With reference to point 6 of Article 2501-*bis* of the Civil Code, the transactions carried out by the Company to be Absorbed will be recorded in the accounts of the Absorbing Company from 1 January of the year in which the Merger will become effective in respect of third parties. The tax effects of the Merger will also start on that date.

J J 00015

7. Treatment reserved to particular categories of shareholders or holders of securities other than shares. Special advantages for directors

No special treatment is envisaged in connection with the Merger for any categories of shareholders or for holders of financial instruments other than the shares of the Absorbing Company or the shares of the Company to be Absorbed, although:

a) the number of shares obtainable by exercising warrants (Olivetti) and stock options (Olivetti and Telecom Italia) and the conversion ratios for the convertible bonds issued by Olivetti will be adjusted to take account of the exchange ratio and assignment procedure described in Sections 3 and 4, with ensuing amendment to all the respective rules;
b) the savings shares issued by the Absorbing Company in exchange for the savings shares of the Company to be Absorbed will have the same rights and features as the latter, as specified in Section 2(iv).

The Absorbing Company will assume the bonds already issued by Telecom Italia and adopt the rules thereof.

No special advantages are envisaged in favour of the directors of the Companies Participating in the Merger.

All numerical and other changes, additions and updates to this Merger Plan or the bylaws of the Absorbing Company annexed hereto shall be made that may be required by the administrative authorities, *inter alia* with reference to the powers referred to in Section 2(v), or on the occasion of filing with the Company Register or in connection with and/or attendant upon the operations envisaged in this Plan.

Milan, 15 April 2003.

TELECOM ITALIA S.p.A. OLIVETTI S.p.A.

(in original signed by the respective Legal Representatives)

Annexes:
Bylaws of the Absorbing Company after the Merger

11 00016

Annexed to the plan for the merger
of Telecom Italia S.p.A. into Olivetti S.p.A.

POST-MERGER BYLAWS OF THE ABSORBING COMPANY

NAME - REGISTERED OFFICE - PURPOSE AND DURATION OF THE COMPANY

Article 1

The name of the Company shall be "TELECOM ITALIA S.p.A."

Article 2

The registered office of the Company shall be at 2 Piazza degli Affari, Milan, and the headquarters and secondary office at 41 Corso d'Italia, Rome.

Article 3

The Company's purpose shall be:

- the installation and operation, using any technique, method or system, of fixed and mobile equipment and installations, including space systems which use artificial satellites, radio stations, including shipboard stations, links for maritime wireless communications, and dedicated and/or integrated networks, for the purpose of providing and operating, without territorial restrictions, licensed telecommunications services for public use and telecommunications services in a free-market environment, including those resulting from technological progress, and the performance of activities directly or indirectly related thereto, including the design, construction, operation, maintenance and distribution of telecommunications, remote-computing, online and electronic products, services and systems;
- the performance of activities related to or otherwise serving the pursuit of the corporate purpose, including publishing, advertising, information technology, online and multimedia activities and, in general, all commercial, financial, property, research, training and consulting activities;
- the acquisition, provided it is not the Company's principal activity, of equity interests in other companies and undertakings falling within the scope of the corporate purpose or related, complementary or similar thereto, including companies involved in manufacturing electronic products and insurance;
- the control and the strategic, technical and administrative and financial coordination of subsidiary companies and undertakings, and the financial planning and management thereof, with the implementation of all related transactions.

Activities reserved to persons entered in a professional register, activities involving dealings with the public covered by Article 106 of Legislative Decree 385/1993, and those which are otherwise prohibited by applicable legislation shall be expressly excluded.

Article 4

The duration of the Company shall be until 31 December 2100.

SHARE CAPITAL – SHARES - BONDS

Article 5

The share capital shall be Euro [-],divided into [-] ordinary shares with a par value of Euro 0.55 each and [-] savings shares with a par value of Euro 0.55 each.

The Extraordinary Shareholders' Meeting of 4 October 2000 approved the increase, in one or more steps, of the share capital by up to a maximum amount now remaining, partly as a consequence of the resolution adopted by the Extraordinary Shareholders' Meeting of [-], of Euro 56,992,575.20, which is reserved exclusively for the exercise of the Warrant Tecnost 1999-2004 (now Warrant Azioni Olivetti ex Tecnost 1999-2004) warrants, by means of the issue of up to a maximum of 103,622,864 ordinary shares with a par value of Euro 0.55 each.

The Shareholders' Meeting of [-], reiterating, updating and, where necessary, renewing earlier resolutions of the Shareholders' Meeting and the Board of Directors resolved to increase the share capital by the following divisible amounts:

1. up to a maximum of Euro 492,726.30, by means of the issue of up to a maximum of 895,866 shares with a par value of Euro 0.55 each for the exercise of the "Piano triennale Stock Option 2002-2004" stock options, increase to be implemented by 15 December 2004;
2. up to a maximum of Euro 10,743,649.40, by means of the issue of up to a maximum of 19,533,908 shares with a par value of Euro 0.55 each for the exercise of the "Piano triennale Stock Option febbraio 2002-dicembre 2004" stock options, increase to be implemented by 31 December 2004;
3. up to a maximum of Euro 180,568,488.10, by means of the issue of up to a maximum of 328,306,342 shares with a par value of Euro 0.55 each to be reserved irrevocably and exclusively for the conversion of the "Olivetti 1,5% 2001-2004 convertibile con premio al rimborso" convertible bonds, on the basis of a conversion ratio equal to the assignment ratio established for the shareholders of Olivetti S.p.A. in the context of the merger of Telecom Italia S.p.A. into Olivetti S.p.A.;
4. up to a maximum of Euro 892,681,820.80, by means of the issue of up to a maximum of 1,623,057,856 shares with a par value of Euro 0.55 each to be reserved irrevocably and exclusively for the conversion of the "Olivetti 1,5% 2001-2010 convertibile con premio al rimborso" convertible bonds, on the basis of a conversion ratio equal to the assignment ratio established for the shareholders of Olivetti S.p.A. in the context of the merger of Telecom Italia S.p.A. into Olivetti S.p.A.

The Shareholders' Meeting of [-] also resolved to increase the share capital by up to a maximum of Euro 261,956,575.10, by means of the issue of up to a maximum of 476,284,682 shares with a par value of Euro 0.55 each, divided into the following divisible tranches:

1. a tranche of up to a maximum of Euro 21,969,104.30 for the exercise of the "Piano di Stock Option 1999" stock options, increase to be implemented by 31 January 2005 by means of the issue of up to a maximum of 39,943,826 shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 6.79 per option held;
2. a tranche of up to a maximum of Euro 53,421,890.50 for the exercise of the "Piano di Stock Option 2000" stock options, increase to be implemented by 30 July 2008 by means of the issue of up to a maximum of 97,130,710 shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 13.815 per option held;
3. a tranche of up to a maximum of Euro 84,158,927.60 for the exercise of the "Piano di Stock Option 2001" stock options, increase to be implemented by 30 April 2008 by means of the issue of up to a maximum of 153,016,232 shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 10.488 per option held;
4. a tranche of up to a maximum of Euro 30,600,889.00 for the exercise of the "Piano di Stock Option Top 2002" stock options, increase to be implemented by 28 February 2010 by means of the

11 6918

issue of up to a maximum of 55,637,980 shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 9.203 per option held;

5. a tranche of up to a maximum of Euro 71,805,763.70 for the exercise of the "Piano di Stock Option 2002" stock options, increase to be implemented by 31 March 2008 for the first lot, by 31 March 2009 for the second lot and by 31 March 2010 for the third lot by means of the issue of up to a maximum of 130,555,934 ordinary shares with a par value of Euro 0.55 each, to be subscribed for at a total price for the different options of respectively Euro 9.665, Euro 7.952 and Euro 7.721 per option held.

The Extraordinary Shareholders' Meeting of 8 May 2002 authorized the directors, under Article 2420-*ter* of the Civil Code, to issue, in one or more steps, for up to a maximum of five years from the date of the resolution referred to above, bonds, in euros or other currencies, possibly convertible into the shares of other companies, with or without warrants giving the right to acquire shares of other companies, up to a maximum amount of Euro 9 billion, within the limits permitted from time to time by law, and to establish the procedures, time limits, conditions and related rules of such issues.

The Shareholders' Meeting of [-] authorized the Board of Directors, under Article 2443 of the Civil Code and for a period of up to a maximum of five years from [-], to increase the share capital in one or more steps by means of the issue for cash of up to a maximum of 88,445,000 ordinary shares with a par value of Euro 0.55 each (and thus for up to a maximum of Euro [-]), to be offered for subscription to employees of Telecom Italia S.p.A. or its subsidiaries, with the exclusion of the right of pre-emption pursuant to the combined effects of Article 2441, last paragraph, of the Civil Code and Articles 134(2) and 134(3) of Legislative Decree 58/1998. The Board of Directors' resolutions shall establish a time limit for the subscription of the shares and provide that, in the event of the increase approved not being subscribed for within the time limit established from time to time for the purpose, the share capital be increased by an amount equal to the subscriptions collected by such time limit.

Article 6

The savings shares shall have the preferential rights set forth in this Article.

The net profit shown in the duly approved annual accounts, less the amount allocated to the legal reserve, must be distributed to the savings shares up to five per cent of their par value.

The net profit that remains after the allocation to the savings shares of the preferred dividend provided for in the second paragraph, payment of which must be approved by the Shareholders' Meeting, shall be divided among all the shares in such a way that the dividend per savings share is higher by two per cent of its par value than the dividend per ordinary share.

When the dividend paid on savings share in a fiscal year is less than that indicated in the second paragraph, the difference shall go to increase the preferred dividend in the next two fiscal years.

In the event of a distribution of reserves, the savings shares have the same rights as the other shares. If the net profit for the year is nil or insufficient to satisfy the property rights referred to in the preceding paragraphs, the Shareholders' Meeting called to approve the annual accounts may resolve to satisfy the right referred to in the second paragraph and/or the right to the premium referred to in the third paragraph by drawing on the reserves. Payment made by drawing on the reserves shall exclude application of the mechanism for carrying over, to the two following fiscal years, the right to preferred dividends not received through the distribution of profits referred to in the fourth paragraph.

A reduction of the share capital due to losses shall not entail a reduction of the par value of the savings shares, except for the amount of the loss that exceeds the total par value of the other shares.

Upon dissolution of the Company, the savings shares shall have priority in the repayment of the capital up to their entire par value.

If the Company's ordinary or savings shares are delisted, holders of saving shares may apply to the Company for their conversion into ordinary shares, in the manner approved by an Extraordinary Shareholders' Meeting called ad hoc within two months of the delisting.

Article 7

The shares shall be indivisible. In the event of joint ownership, the rights of the joint owners shall be exercised by a common representative. Fully paid-up shares may be bearer shares when the law permits. In such case, shareholders may apply for their shares to be converted, at their own expense, into registered shares or vice versa.

Vis-à-vis the Company, shareholders shall be deemed to elect domicile for all legal purposes at the domicile indicated in the Shareholders' Register.

Article 8

The Company may issue bonds and shall establish the terms and conditions of their placement.

BOARD OF DIRECTORS

Article 9

The Company shall be managed by a Board of Directors consisting of not less than seven and not more than twenty-three members. The Shareholders' Meeting shall establish the number of members of the Board, which shall remain unchanged until the Meeting establishes a different number.

The Board of Directors shall be appointed on the basis of slates presented by the shareholders pursuant to the following paragraphs or by the outgoing Board of Directors, on which the candidates shall be listed by serial number.

When the Board of Directors presents its own slate, it shall be filed at the registered office of the Company and published in at least one Italian daily newspaper with national circulation, at least twenty days prior to the date set for the Shareholders' Meeting on the first call.

The slates presented by the shareholders shall be filed at the registered office of the Company and published at the expense of the shareholders in the manner indicated in the preceding paragraph at least ten days prior to the date set for the Shareholders' Meeting on the first call.

Each shareholder may present or participate in the presentation of only one slate and each candidate may appear on only one slate on pain of ineligibility.

Only shareholders who alone or together with other shareholders hold a total number of shares representing at least 1% of the share capital entitled to vote at the Ordinary Shareholders' Meeting may submit slates. To evidence ownership of the number of shares necessary to present slates, shareholders must present and/or deliver to the registered office of the Company, at least five days prior to the date set for the Shareholders' Meeting on the first call, a copy of the documentation attesting their right to attend the meeting.

Together with each slate, and within the respective time limits specified above, declarations must be filed in which the individual candidates agree to their candidacy and attest, on their own responsibility, that there are no grounds for ineligibility or incompatibility, and that they meet any requirements prescribed for the positions in question. Together with the declarations, a curriculum vitae shall be filed for each candidate setting out their main personal and professional data with an indication, where appropriate, of the grounds for their qualifying as independent.

Each person entitled to vote may vote for only one slate.

The Board of Directors shall be elected as specified below:

a) four fifths of the directors to be elected shall be chosen from the slate that obtains the majority of the votes cast by the shareholders, in the order in which they are listed on the slate; in the event of a fractional number, it shall be rounded down to the nearest whole number;

b) the remaining directors shall be taken from the other slates; to that end, the votes obtained by the various slates shall be divided first by one, then by two, then by three and then by four, up to the

elected any director or that has elected the smallest number of directors shall be elected.

If none of such slates has yet elected a director or all of them have elected the same number of directors, the candidate from the slate that obtained the largest number of votes shall be elected. If the different slates have received the same number of votes and their candidates have been assigned the same quotients, a new vote shall be held by the entire Shareholders' Meeting and the candidate obtaining the simple majority of the votes shall be elected.

In appointing directors who for any reason have not been appointed pursuant to the procedure specified above, the Shareholders' Meeting shall vote on the basis of the majorities required by law.

If in the course of the fiscal year one or more vacancies occur on the Board, the procedure specified in Article 2386 of the Civil Code shall be followed.

Should a majority of the seats on the Board of Directors become vacant for any cause or reason, the remaining directors shall be deemed to have resigned and they shall cease to hold office from the time the Board has been reconstituted by persons appointed by the Shareholders' Meeting.

Article 10

The Board of Directors shall elect a Chairman from among its member — if the Shareholders' Meeting has not already done so — and may also appoint a Deputy Chairman; both may be re-elected.

In the absence or disability to act of the Chairman, the Deputy Chairman, if one has been appointed, shall take his/her place or, if the Deputy Chairman is absent, the most senior director by age.

The Board of Directors may elect a Secretary who need not be a director.

Extracts from the register of the minutes of meetings of the Board of Directors signed by the Chairman or by two directors and countersigned by the Secretary shall be conclusive evidence.

Article 11

The Chairman or whoever takes his/her place shall call meetings of the Board of Directors at the Company's registered office or elsewhere, indicating the time and place, whenever he/she deems this appropriate in the interests of the Company or receives a written request to do so from at least one third of the directors holding office or from the members of the Board of Auditors.

In general, meetings shall be called at least five days prior to the date thereof, except in urgent cases, when it may be given by telegram, fax or e-mail with at least twenty-four hours' notice.

Notice shall be given to the Board of Auditors within the same time limits.

Meetings of the Board of Directors may be held — if the Chairman or the person acting in his/her place deems it necessary — by video-conference or audio-conference, provided that all those taking part can be identified by the Chairman and all the other participants, that they are able to follow the debate and intervene in real time in relation to the matters under discussion, that they are able to exchange documents pertaining to such matters and that all the above is fully recorded in the minutes. Once the above conditions have been verified, the Board meeting shall be considered to have taken place where the Chairman is located, where the Secretary to the meeting must also be.

Article 12

The Board of Directors shall have the broadest possible powers of ordinary and extraordinary administration of the Company, since all matters not expressly reserved to the General Shareholders' Meeting by law or these bylaws are within its jurisdiction.

J1 00021

The Board of Directors, through the Chairman or other directors delegated for the purpose, shall report to the Board of Auditors on the activities carried out and the transactions of greatest economic, financial or asset-related significance concluded by the Company or its subsidiaries; in particular, transactions involving a potential conflict of interest must be reported on. The report shall be made in good time, and at least once in each quarter, on the occasion of the meetings of the Board of Directors and the Executive Committee or in a written memorandum addressed to the Chairman of the Board of Auditors.

In accordance with the times and procedures for disclosing information to the market, the representative of the holders of savings shares must be informed by the Board of Directors or the persons delegated for the purpose of any corporate transactions that might affect the price of the shares of that class.

Article 13

To implement its own resolutions and manage the Company, the Board of Directors, subject to the limits provided for by law, may:

- create an Executive Committee, establishing its powers and the number of members;
- delegate suitable powers, establishing the limits thereof, to one or more directors, possibly with the title of Chief Executive Officer;
- appoint one or more General Managers, establishing their powers and duties;
- appoint attorneys, who may be members of the Board of Directors, for specific transactions and for a limited period of time.

Article 14

The company signature and the legal representation of the Company vis-à-vis third parties and in legal proceedings shall pertain to the Chairman and, in his absence or disability to act, the Deputy Chairman, if one is appointed; they shall also pertain to the directors with delegated powers.

Article 15

The directors shall be entitled to the reimbursement of expenses incurred in the performance of their duties. The Ordinary Shareholders' Meeting shall also decide the annual compensation payable to the Board. Once fixed, this compensation shall remain unchanged until the Meeting establishes a different amount.

BOARD OF AUDITORS

Article 16

The Board of Auditors shall consist of five or seven auditors. The Shareholders' Meeting shall establish the exact number, which shall remain unchanged until the Meeting establishes a different number. The Meeting shall also appoint two alternates.

The Board of Auditors shall elect a Chairman from among its members by majority vote. In the absence or disability to act of the Chairman, he/she shall be replaced by the most senior auditor by age.

Without prejudice to the situations of incompatibility established by law, persons who are members of the boards of auditors of more than five companies listed on Italian regulated markets may not be appointed auditors and shall forfeit the post if they are elected. TELECOM ITALIA S.p.A. and its subsidiaries shall not be included when computing the above limit.

For the purposes of Articles 1(2)(b) and 1(2)(c) of the regulation referred to in Justice Minister Decree 162/2000, the following sectors of activity and matters shall be considered closely linked to those of the Company: telecommunications, information technology, online systems, electronics and multimedia technology, and matters related to private and administrative law, economics and business administration.

The appointment of the Board of Auditors shall be based on the slates presented by shareholders who individually or together with other shareholders hold a total number of shares representing at least 1% of the share capital entitled to vote at the Ordinary Shareholders' Meeting. To evidence ownership of the number of shares necessary to present slates, shareholders must present and/or deliver to the registered office of the Company, at least five days prior to the date set for the Shareholders' Meeting on the first call, a copy of the documentation attesting their right to attend the meeting.

Each shareholder may present or participate in the presentation of only one slate and each candidate may appear on only one slate on pain of ineligibility.

The slates must be filed at the registered office of the Company and published at the expense of the shareholders who present them in at least one Italian daily newspaper with national circulation, at least ten days prior to the date set for the Shareholders' Meeting on the first call.

Together with each slate, declarations must be filed in which the individual candidates agree to their candidacy and attest, on their own responsibility, that there are no grounds for ineligibility or incompatibility, and that they meet the requirements prescribed by law and these bylaws. Together with the declarations, a curriculum vitae for each candidate shall be filed setting out their main personal and professional data.

The slates shall be divided into two sections: one for candidates to the position of auditor and the other for candidates to the position of alternate. The first candidate in each section must be selected from among persons entered in the register of auditors who have worked on statutory audits for a period of not less than three years.

Each person entitled to vote may vote for only one slate.

The Board of Auditors shall be elected as specified below:

a) from the slate that obtains the majority of the votes cast by the shareholders (the Majority Slate) one alternate and all the auditors not chosen from the other slates (the Minority Slates) shall be

to the candidate auditors on each slate in the order specified thereon. On the basis of the quotients assigned, the candidates on the various slates shall be arranged in a single decreasing ranking and those who have obtained the highest quotients shall be elected.

If more than one candidate obtains the same quotient, the candidate from the slate that has not yet elected an auditor shall be elected or, subordinately, there shall be a tiebreaker vote by the entire Shareholders' Meeting and the slate that obtains the simple majority of the votes shall prevail.

In appointing auditors who for any reason have not been appointed pursuant to the procedure specified above, the Shareholders' Meeting shall vote on the basis of the majorities required by law.

In the event of the substitution of an auditor chosen from the Majority Slate or one of the Minority Slates, the alternate chosen respectively from the Majority List or the Minority Lists shall take his/her place. Appointments to fill vacancies on the Board of Auditors pursuant to Article 2401 of the Civil Code shall be made by the Shareholders' Meeting on the basis of the majorities required by law.

After notifying the Chairman of the Board of Directors, the Board of Auditors, or at least two auditors, may call, as provided for by law, a meeting of the shareholders, the Board of Directors or the Executive Committee.

been verified, the meeting of the Board of Auditors shall be considered to have taken place where the Chairman is located.

SHAREHOLDERS' MEETING

Article 17

An Ordinary Shareholders' Meeting shall be called to approve the annual accounts every year within six months of the end of the fiscal year. Ordinary and Extraordinary Shareholders' Meetings may be held in a place other than the Registered Office, provided it is in Italy.

An Extraordinary Shareholders' Meeting shall be called whenever it is deemed advisable by the Board of Directors and when it is required by law.

Article 18

Every shareholder entitled to attend may be represented at the Shareholders' Meeting by giving a proxy to an individual or legal entity, subject to the restrictions established by law.

In order to facilitate the collection of proxies among employee shareholders of the Company and its subsidiaries who belong to shareholder associations satisfying the requirements established by law, special areas shall be made available in accordance with the procedures and time limits established by the Board of Directors either directly or through its agents where information can be provided and proxy forms collected.

Article 19

The Chairman of the Board of Directors or whoever takes his/her place or, in the absence thereof, the person appointed by those present, shall chair the Shareholders' Meeting and set the rules for the proceedings.

The Secretary shall be appointed by the Meeting, which may select a person who is not a shareholder.

The proceedings of shareholders' meetings shall be governed by law, these bylaws and the Meeting Rules approved by the Ordinary Shareholders' Meeting.

Article 20

Resolutions may be adopted by a show of hands. The Chairman shall establish the procedures for recording votes and may choose two or more tellers from among the persons present.

Each shareholder may exercise his/her right to vote by mail, in accordance with the applicable law.

FISCAL YEAR – DIVIDENDS

Article 21

The fiscal year shall end on 31 December of each year.

From the net profit reported in the annual accounts, 5% shall be allocated to the legal reserve until this reaches an amount equal to one-fifth of the share capital.

The remainder shall be used to pay the dividend determined by the Shareholders' Meeting, and for such other purposes as the Meeting deems most appropriate or necessary.

During the course of the fiscal year, the Board of Directors may distribute interim dividends to the shareholders.

SPECIAL POWERS

Article 22

Pursuant to Article 2(1) of Decree Law 332/1994, ratified with amendments by Law 474/1994, the Minister for the Economy and Finance, in agreement with the Minister for Productive Activities, shall have the following special powers:

a) approval, to be granted expressly upon the acquisition by parties subject to the limitations on share ownership referred to in Article 3 of Decree Law 332/1994, ratified with amendments by Law 474/1994, of major holdings, taken to mean holdings that, as specified by Treasury Minister Decree of 24 March 1997, are equal to at least 3% of the share capital represented by shares with a right to vote at the Ordinary Shareholders' Meeting. Approval must be granted within sixty days of the date of the communication that the Board of Directors must send at the time of the application for entry in the Shareholders' Register. Until approval has been granted and after expiration of the time limit without any action, the transferee may not exercise the voting rights or any rights other than the property rights attaching to the shares that represent the major holding. If approval is refused or the time limit expires without action, the transferee must sell the shares within one year. If this is not done, the Court, at the request of the Minister for the Economy and Finance, shall order the sale of the shares representing the major holding pursuant to the procedures established in Article 2359-*ter* of the Civil Code;

b) veto of any resolution to dissolve the Company, transfer the business, merge or divide the Company, transfer the registered office outside Italy, change the corporate object, or amend these bylaws with a view to eliminating or modifying the powers specified in subparagraphs a) and b).

In accordance with the provisions of the Prime Ministerial Decree issued on 21 March 1997 pursuant to Law 474/1994 and the Treasury Minister Decree issued pursuant to the same law on 21 March 1997, this article shall remain in the bylaws for three years and in any case until the liberalization of the telecommunications industry has reached a sufficiently advanced stage and the industry regulatory authority has become firmly established; the decision that these conditions have been met shall be adopted in an instrument issued in the form indicated in the above-mentioned Prime Ministerial Decree.

31 00025

Exhibit 1.3

Report of the Board of Directors of Olivetti S.p.A. on the plan for the merger of

Telecom Italia S.p.A.

into

Olivetti S.p.A.

Milan, April 15, 2003

The following is an English translation of the official version in Italian language. In case of conflict, the Italian language version will prevail.

Except as provided below, any offer to purchase or sell securities described herein is not being made, directly or indirectly, in or into, or by the use of the mails of, or by any means or instrumentality (including, without limitation by mail, telephonically or electronically by way of internet or otherwise) of interstate or foreign commerce, or any facility of any securities exchange, of the United States of America and any such offer will not be capable of acceptance by any such use, means, instrumentality or facility.

The information contained herein does not constitute an offer of securities for sale in the United States or offer to acquire securities in the United States.

The Olivetti securities referred to herein have not been, and are not intended to be, registered under the U.S. Securities Act of 1933 (the "Securities Act") and may not be offered or sold, directly or indirectly, into the United States except pursuant to an applicable exemption. The Olivetti ordinary shares and Olivetti savings shares are intended to be made available within the United States in connection with the merger pursuant to an exemption from the registration requirements of the Securities Act.

The proposed cash tender offer for a portion of the Telecom Italia ordinary shares described herein is intended to be made available in or into the United States pursuant to an exemption from the tender offer rules available pursuant to the Securities Exchange act of 1934.

The proposed cash tender offer for a portion of the Telecom Italia savings shares described herein is not being made and will not be made, directly or indirectly, in or into the United States

***

The merger described herein relates to the securities of two foreign companies. The merger in which Telecom Italia ordinary shares will be converted into Olivetti ordinary shares is subject to disclosure and procedural requirements of a foreign country that are different from those of the United States.Financial statements included in the document, if any, will be prepared in accordance with foreign accounting standards that may not be comparable to the financial statements of United States companies.

It may be difficult for you to enforce your rights and any claim you may have arising under the federal securities laws, since Olivetti and Telecom Italia are located in Italy, and some or all of their officers and directors may be residents of Italy or other foreign countries. You may not be able to sue a foreign company or its officers or directors in a foreign court for violations of the U.S. securities laws. It may be difficult to compel a foreign company and its affiliates to subject themselves to a U.S. court's judgment.

You should be aware that Olivetti may purchase securities of Telecom Italia otherwise than under the merger offer, such as in open market or privately negotiated purchases.

9. AMENDMENTS TO THE BYLAWS

10. CONSIDERATIONS OF THE BOARD OF DIRECTORS CONCERNING THE POTENTIAL RECOURSE TO THE RIGHT OF WITHDRAWAL

Dear shareholders,

We submit for your consideration this report, which describes, from the legal and economic standpoints, the plan for the merger of Telecom Italia S.p.A. ("**Telecom Italia**" or the "**Company to be Absorbed**") into Olivetti S.p.A. ("**Olivetti**" or the "**Absorbing Company**"; once the merger becomes effective, Olivetti is also referred to as the "**Company Resulting from the Merger**") and, in particular, the methods used to determine the exchange ratio of the shares of the companies concerned, pursuant to Article 2501-*quater* of the Civil Code and Article 70(2) of Consob Regulation 11971/1999 (the "**Regulation on Issuers**").

1. Description of and reasons for the operation

1.1 The operation

1.1.1 The operation submitted for your approval, of which the Boards of Directors of Olivetti and Telecom Italia approved the broad outline on 11 March 2003, will consist in the merger of Telecom Italia into Olivetti pursuant to Article 2501 et seq. of the Civil Code (the "**Operation**"). The Operation, since it involves companies with financial instruments listed on an Italian regulated market, is also subject to Legislative Decree 58/1998 and the Regulation on Issuers.

The proposed Operation will lead to the Company Resulting from the Merger being the universal successor to Telecom Italia, so that, from the date on which the merger becomes effective, it will assume all the assets and liabilities, rights and obligations of Telecom Italia, thus including, but not limited to, the title to all the related tangible and intangible assets, receivables and payables accrued and accruing, and, more generally, the entire patrimony of Telecom Italia. Provision is also made for the Company Resulting from the Merger to succeed to Telecom Italia in all the concessions, licences and administrative authorizations granted thereto, in the ways established by the law in force, including the amendment of its corporate purpose.

The balance sheets used for the purposes of the merger are those of the draft financial statements of Olivetti and Telecom Italia for the year ended 31 December 2002, in accordance with Article 2501-*ter* of the Civil Code.

The companies participating in the merger intend to complete the Operation as soon as possible and, specifically, to work for the merger to become effective in the first few days of August 2003.

1.1.2 Provision has been made for the Company Resulting from the Merger to adopt new bylaws, corresponding almost entirely to Telecom Italia's bylaws — with special reference to the governance rules, which will provide minority shareholders with

analogous protection to that provided by Telecom Italia's bylaws — and the latter's corporate purpose.

In particular, the change in Olivetti's corporate purpose, made necessary by the need — derivable from the provisions of the licences and related fee schedules issued by the competent authorities pursuant to Presidential Decree 318/1997 — for the Company Resulting from the Merger to have a purpose that expressly includes the regulated activities subject to administrative authorization currently performed by Telecom Italia will trigger the right of withdrawal from the company, under Article 2437 of the Civil Code, in favour of Olivetti shareholders contrary to the adoption of the resolution providing for such change.

The change in the corporate purpose is also necessary in order to eliminate the reference in Olivetti's present bylaws to the prevalent nature of the activity of holding company, which is incompatible with the activity performed by Telecom Italia, as expressly stated in its present bylaws.

The relative majority shareholder of Olivetti, Olimpia S.p.A., has announced that it will not exercise its right of withdrawal.

In order to meet the needs deriving from the settlement of withdrawals, Olivetti will draw on lines of credit provided by a pool of banks and amounting to Euro 9,000,000,000.

Provision has also been made for the Company Resulting from the Merger to adopt the name Telecom Italia. This meets the need to make the name of the Company Resulting from the Merger consistent with the new organizational structure and the nature of the activities it will acquire and perform at the end of the Operation, although the intention is to continue to capitalize on the historic name of "Olivetti" together with the other Group marks.

Lastly, it is proposed that the registered office of the Company Resulting from the Merger be transferred to Milan, at the address of Telecom Italia's present registered office. Ivrea will continue to be the strategic headquarters for the manufacturing activity of the Olivetti Group centred around Olivetti Tecnost and for the latter's activity in connection with the Tiberius Project.

For a more detailed discussion of the changes to the bylaws and the right of withdrawal made necessary by the Operation, see Sections 9 and 10.

1.1.3 Since the Operation will involve Olivetti's absorption of a subsidiary, it will result in the cancellation of Olivetti's holding in Telecom Italia at the time the merger becomes effective and the assignment to the holders of Telecom Italia ordinary and savings shares other than Olivetti of ordinary and savings shares issued by the Company Resulting from the Merger and to the holders of Olivetti shares of newly-

issued ordinary shares of the Company Resulting from the Merger on the basis of assignment ratios corresponding to the exchange ratio. This assignment will be made by redistributing Olivetti's capital at the end of the Operation (see most notably Section 4).

In particular, in order to comply with the exchange ratio for the Telecom Italia savings shares, provision has been made for the Company Resulting from the Merger to issue savings shares to be assigned to the holders of Telecom Italia savings shares. It is proposed that application be made to Borsa Italiana S.p.A. for the listing of these savings shares on the MTA electronic share market. The effectiveness of the merger will be subject to such listing.

1.1.4 As mentioned earlier, as a consequence of the merger, Olivetti will cancel all the Telecom Italia shares it holds at the time the merger takes place. For the purposes of the financial statements for the fiscal year, the difference between the carrying value of the cancelled Telecom Italia shares and the corresponding share of the shareholders' equity will be positive and will therefore give rise to a cancellation deficit. This deficit, whose size will also depend on the level of acceptances of the tender offer (discussed in Subsection 1.1.8), will be allocated to Telecom Italia's assets (in particular its holding of TIM shares) and any remaining difference will be entered under "goodwill". In view of the procedure for assigning the shares of the Company Resulting from the Merger (see Section 4), it is reasonable to expect that an exchange surplus will emerge.

In Olivetti's consolidated financial statements the consolidation difference that arose with the acquisition of Telecom Italia in 1999 will be increased by the difference between the carrying value of any Telecom Italia shares acquired in the tender offer and the corresponding share of the shareholders' equity.

1.1.5 The savings shares issued by the Company Resulting from the Merger for the holders of Telecom Italia savings shares will have identical economic rights to those of the Telecom Italia savings shares, including the possibility of satisfying the preferential rights provided for in the bylaws by distributing reserves (the addition of which to the Telecom Italia bylaws, with immediate effect, will be proposed to the shareholders' meeting called to approve the merger plan).

The maintenance of the preferential rights to which each Telecom Italia savings share is entitled by law will be accompanied by an improvement in the preferential position of each savings shareholder, since he/she will be assigned, for each such share held, more than one savings share of the Company Resulting from the Merger (on the basis of the assignment ratio by means of which the exchange will be implemented; on this point see Section 4).

Since each of the newly-issued savings shares of the Company Resulting from the Merger will have a par value equal to the present par value of the Telecom Italia

savings shares (Euro 0.55) and will give the same percentage preferential right calculated with reference to its par value, at the time of the exchange each holder of Telecom Italia savings shares will receive, as a consequence of the assignment ratio, a larger amount of the nominal capital of the Company Resulting from the Merger than the amount previously held and will therefore be entitled to a larger preferred dividend in absolute terms.

This advantage, together with the above-mentioned possibility of satisfying the preferential rights by distributing reserves, improves the position of the holders of savings shares compared with that prevailing before the Operation.

1.1.6 On 13 March 2003 Olivetti published a notice in the *Gazzetta Ufficiale* regarding the rights of holders of "Olivetti 1,5% 2001-2004 convertibile con premio al rimborso" and "Olivetti 1,5% 2001-2010 convertibile con premio al rimborso" convertible bonds to exercise the right of conversion pursuant to Article 2503-*bis*, second paragraph, of the Civil Code.

The time limit for the *de jure* exercise of the conversion right expired on 13 April 2003. The holders of bonds convertible into Olivetti shares can, however, exercise the conversion right in accordance with the rules of the above-mentioned bond issues after the expiration of the time limit established by Article 2503-*bis*, second paragraph, of the Civil Code, without prejudice to the periods of suspension provided for in such rules.

Lastly, it should be noted that as a consequence of the merger the ratio for the bond conversion into Olivetti shares and that for the exercise of the warrants will be adjusted to take account of the new par value of the shares of the Company Resulting from the Merger and in relation to the assignment ratio, as explained in more detail in Section 4. In particular, the adjustment will be made to reflect the new fractional number of shares of the Company Resulting from the Merger into which each bond and each warrant can be converted at the end of the merger in view of the assignment ratio on the basis of which the shares of the Company Resulting from the Merger will be assigned in exchange to the shareholders of Olivetti who have not exercised their right of withdrawal.

1.1.7 The Olivetti shareholders' meeting called to adopt the merger Resolution will therefore be required to update the resolutions adopted to increase the capital for the exercise of the rights attaching to the "Warrant azioni ordinarie Olivetti ex Tecnost 1999-2004" warrants and the "Olivetti 1,5% 2001-2004 convertibile con premio al rimborso" and "Olivetti 1,5% 2001-2010 convertibile con premio al rimborso" convertible bonds and for the exercise of stock options, with the consequent revision of the related rules. The same Olivetti shareholders' meeting will also be called upon to approve increases in capital for the stock options issued by Telecom Italia that have not yet been exercised.

Naturally, the exact quantification of the shares obtainable by exercising the warrants and stock options and of those deriving from conversions will be possible only when, at the time the deed of merger is signed, the assignment ratio is established, as provided for in Section 4.

1.1.8 As part of the Operation and before its completion, provision has been made for a tender offer for some of Telecom Italia's ordinary and savings shares. In addition to having an investment rationale, this is also intended to provide a way for Telecom Italia shareholders who do not wish to keep their entire holding in the Company Resulting from the Merger to liquidate part of it, in a similar way to the Olivetti shareholders who exercise their *de jure* right of withdrawal. The tender offer will be made for an amount equal to that remaining, if any, from the Euro 9,000,000,000 made available by the pool of banks to finance the exercise of the right of withdrawal.

Consequently, assuming the availability of financial resources, as specified above, the tender offer will be made only at the end of the period allowed for the exercise of the right of withdrawal following the approval of the merger plan and the adoption of the new bylaws with the amended corporate purpose and no minimum threshold will be set for acceptances. The number of Telecom Italia shares tendered for will be established — once the number of Olivetti shares for which the right of withdrawal has been exercised is known — by dividing the amount remaining of the finance provided for withdrawals, if any, by the offer price per Telecom Italia ordinary and savings share (established in the manner described below), so that the offer will be for the same percentage of ordinary shares and savings shares (calculated in relation to the total number of shares of each class).

The offer price will be equal to the weighted average of the official prices recorded on the stock exchange between 12 March 2003 and the date of the shareholders' meeting of the Absorbing Company that approves the merger plan, plus a 20% premium. In addition, the offer price will be between: (i) a maximum of Euro 8.40 and a minimum of Euro 7 per share for Telecom Italia ordinary shares and (ii) a maximum of Euro 5.65 and a minimum of Euro 4.70 per share for Telecom Italia savings shares.

Depending on the offer price established in the manner described above, and assuming that the full amount of Euro 9,000,000,000 is available owing to the failure of Olivetti shareholders to exercise their right of withdrawal, the tender offer will be for the minimum and maximum quantities of Telecom Italia ordinary and savings shares shown below:

(i) assuming that the offer price is equal to the maximum price specified above, the offer will be for about 16.1% of the ordinary shares and about 16.1% of the savings shares;

(ii) assuming that the offer price is equal to the minimum price specified above, the offer will be for about 19.4% of the ordinary shares and about 19.4% of the savings shares;

If, however, the acceptances of the tender offer fall short of the maximum quantity for one class of shares but exceed it for the other class, the amount not used to buy shares of the first class will be used to buy shares of the second class, and the maximum quantity of shares of the latter class will increase until all the funds available have been used, so that the largest number of shareholders wishing to accept the offer can be satisfied. In such case the percentages indicated in the subparagraphs (i) and (ii) will change.

The tender offer will be made as soon as possible after the close of the period for Olivetti shareholders to exercise their right of withdrawal. Provision has also been made for the tender offer, if made, to become ineffective if the merger does not become effective by a given date, now tentatively envisaged to be 31 December 2003, without prejudice to the intention of the companies participating in the Operation to complete the merger as soon as possible and, specifically, in the first few days of August 2003.

The foregoing condition for the ineffectiveness of the tender offer is intended to ensure that it depend on substantially the same circumstances as the right of withdrawal of the Olivetti shareholders, which applies only if the merger is completed.

1.1.9 At the end of the Operation the ordinary shares of the Company Resulting from the Merger will continue to be listed on Borsa Italiana's MTA electronic share market. Nor will the Operation affect the listing of the Olivetti ordinary shares on the Frankfurt Stock Exchange. As mentioned earlier, the intention is for the savings shares also to be listed on the MTA market before the merger becomes effective and as a condition of its effectiveness. It is also intended that the ordinary and savings shares be listed on the New York Stock Exchange in the form of American Depositary Receipts (ADRs), thus maintaining the present situation with regard to Telecom Italia ordinary and savings shares.

1.2 *The companies participating in the Operation*

1.2.1 Olivetti is a holding company, of which the most important holding is its 54.9% interest in the ordinary share capital of Telecom Italia (about 39.5% of the total share capital). It also has holdings in other industrial sectors such as office products and services and in real estate, notably through its subsidiaries Olivetti Tecnost

S.p.A. (information technology and communications products and services) and Olivetti Multiservice S.p.A. (services related to the real-estate sector).

The following tables show selected income, balance sheet and financial data for the Olivetti Group and for Olivetti, drawn from the consolidated financial statements for the 2002 fiscal year, Olivetti's draft financial statements for 2002 and its financial statements for 2001 and 2000, appropriately reclassified to conform with those of Telecom Italia.

1.2.2 Telecom Italia, together with the group of companies it heads, is one of the largest international groups operating in the sector of telecommunication services and,

more in general, information and communication technology. Its companies, leaders in fixed and mobile communications, the Internet and multimedia, information technology and research offer integrated and innovative services in Italy and abroad. Its principal strength lies in its leadership in the Italian markets for fixed and mobile telecommunications and Internet services. The companies of the Group have created broadband, fixed and mobile networks providing innovative services, complex solutions for ICT, multimedia messaging, solutions for mobile business, products for e-government and online banking.

Following the changes in top management in 2001 and the significant overhaul of corporate growth strategies with the formulation of the Business Plan for 2002-2004, in 2002 an overall restructuring was launched. In particular, organizational restructuring led to the formation of a completely renewed, compact and stable management team. During 2002 the responsibilities of the Domestic Wireline and Information Technology business units were revised in depth and a new South American business unit was established.

At Group level the so-called "professional families" were upgraded and strengthened with the establishment of a functional link between distinctive competences in the individual Telecom Italia Group companies and the analogous functions in the parent company so as **(i)** to ensure greater organizational effectiveness and the verification of resources, and **(ii)** to foster intra-Group mobility. In addition, new procedures were introduced for the approval and monitoring of investments and acquisitions, with the centralization of governance responsibilities.

Important progress was made in financial strengthening and industrial restructuring, in line with the Business Plan. The results obtained with the gain in efficiency and the plan of disposals (which generated a net cash flow of Euro 4,771 million in 2002) were decisive in reducing the Group's debt from Euro 21,942 million at the end of 2001 to Euro 18,118 million at 31 December 2002. The proportion of debt with a maturity of more than one year rose from 64% at the end of 2001 to 75% at the end of 2002. The Group's structure was simplified, with the number of companies declining in 2002 from 714 to 416.

Turning to business developments, the focus in 2002 was placed on innovation by strengthening the company's leadership in the Italian market and its presence in international markets.

In the field of mobile telephony, TIM ranks first among European operators in terms of the number of GSM lines on a single network and is the leader in Italy. In October TIM launched Brazil's first GSM service, which reached more than 80 cities throughout the country.

The following tables show selected income, balance sheet and financial data for the Telecom Italia Group and for Telecom Italia, drawn from the consolidated financial statements for the 2002 fiscal year, the company's draft financial statements for 2002 and the financial statements for 2001 and 2000.

[1] Operating income + Depreciation and amortization – Industrial investments – Change in working capital.

1.3 *The reasons for the Operation*

One aspect of interest to shareholders is that the Operation will lead to the Company Resulting from the Merger being more contestable since, upon completion of the Operation, the holding of the present relative majority shareholder of Olivetti will be reduced (see Section 7), with a consequent increase in the security's liquidity and the reasons for the market to view it favourably, to the benefit of all the shareholders.

The proposed Operation will also bring a major simplification in the structure of the Group, in line with the expectations of the market and the objective of an overall improvement in Olivetti's financial position. Among other things, the integration of corporate functions will ensure faster decision-making in the context of an organizational structure comparable to that of the leading international operators.

The Operation is also intended to bring additional advantages by:

- optimizing financial and income flows within the Group through a more efficient management of Group debt and more efficient use of financial leverage. In fact the Operation will permit the whole financial debt to be allocated directly to a level closer to the operational activities that generate cash flow and eliminate the dependence of Olivetti on the dividend policy of the Company to be Absorbed. It is also likely that these effects will lead to an improvement in the creditworthiness of the Company Resulting from the Merger, which, in turn, could lead to a more favourable rating and a reduction in the cost of future debt;

- allowing the Company Resulting from the Merger to optimize its financial structure and reduce the average cost of capital employed compared with that of Telecom Italia today. This effect should help to sustain the price of the shares of the Company Resulting from the Merger and therefore create value for the shareholders of Olivetti and Telecom Italia;

- improving the tax efficiency of the Company Resulting from the Merger under the current tax rules, through the complete and faster recovery, including the part currently not stated, of the tax benefits in connection with the value adjustments to equity interests decided at the time of the approval of Olivetti's draft financial statements for the 2002 fiscal year ("**Tax Asset**").

1.4 *The objectives for operations and the plans for achieving them*

The companies participating in the merger were in agreement on the objectives for operations and the plans for their achievement by the Company Resulting from the Merger. Substantially, they coincide with those of Telecom Italia approved by its Board of Directors on 13 February 2003, which in turn confirm the guidelines and objectives of the Business Plan 2002-2004. With specific regard to Olivetti, it should

be noted that Olivetti Tecnost is substantially neutral in terms of its impact on the operatingincome.

However, the Operation will result in a merger deficit (deriving from share cancellation) , any portion of which not classified as a Telecom Italia asset (specifically among equity interests) will be amortized over a period of 20 years. The updated financial projections take account of this additional portion of amortization.

The same projections consider the financial charges associated with Olivetti's present debt, as well as the effect of the tax asset connected with the value adjustments made in Olivetti's and Telecom Italia's draft financial statements for 2002.

In addition to the disposals already envisaged by the Business Plan (Telekom Austria, Operazioni Real Estate), the projections also include the receipts from the disposal of the company into which Seat Pagine Gialle is to be spun off.

Lastly, it is estimated that the cash flows from operations and disposals of the Company Resulting from the Merger will be able to sustain not only a reduction in debt but also a dividend distribution policy in line with that set out in Telecom Italia's Business Plan.

The following table summarizes the above considerations at consolidated level, from which the sustainability of the commitments entered into for the future appears evident.

Billions of euros	Olivetti 2002 consolidated financial statements	Consolidated objectives of the Company Resulting from the Merger (*) CAGR 2002-2005 ***
Sales of products and services	31.4	4 - 4.5%
Gross operating profit % of sales	14.0 44.6%	5 – 5.5%
Operating income % of sales	6.0 19.1%	8 – 8.5%
		Cumulative 2003-2005
Free Cash Flow	8.6	29
Net financial position	33.4**	34.3****

(*) Assuming zero withdrawals, fully diluted.
(**) The net financial position does not take account of the forward purchase commitments (December 2005) in respect of Aldermanbury Investment Limited (formerly Chase Equities Limited), equal to Euro 2,417 million.
(***) The scope of the consolidation is the same.
(****) At 31 December 2004.

2. The values attributed to Olivetti and Telecom Italia for the purpose of determining the exchange ratio

For the valuations needed to establish the exchange ratio, Olivetti's Board of Directors had recourse to the advice and assistance of a leading financial advisor, JPMorgan Chase Bank ("**JPMorgan**").

The valuation methods applied by JP Morgan to establish the exchange ratio have been checked by Professor Angelo Provasoli, in his capacity as Olivetti's consultant, with a view to verifying their mutual consistency and appropriateness with respect to the purpose of the Operation.

Olivetti's Board of Directors — taking into account the draft financial statements of the Absorbing Company and the Company to be Absorbed for the year ended 31 December 2002, approved by the two companies' respective Boards of Directors as the reference statements of assets and liabilities, and of the proposed distribution of reserves by Telecom Italia up to a maximum of about Euro 1,333 million, and after careful analyzing the valuations put forward by the financial advisor and the conclusions reached by Professor Angelo Provasoli and being in agreement with the valuation methods applied and described in Section 3 — has identified the following ranges for the values of the shares of the companies participating in the merger for the purpose of establishing the exchange ratio:

	Minimum	Mean	Maximum
Values per Telecom Italia ordinary share (euros)	**8.1**	**8.6**	**9.1**

	Minimum	Mean	Maximum
Values per Telecom Italia savings share (euros)	**5.4**	**5.8**	**6.1**

	Minimum	Mean	Maximum
Values per Olivetti ordinary share (euros)	**1.13**	**1.26**	**1.39**

	Minimum	Mean	Maximum
Values per Olivetti savings share (euros)	**0.76**	**0.84**	**0.93**

It should be noted that the figures in the above tables, as in all the tables in Section 3, have been rounded, albeit without this materially affecting the results.

3. The exchange ratio established and the methods used in determining it

3.1 *Valuation methods used*

3.1.1 It needs to be premised that the ultimate aim of the valuation of the companies participating in a merger is to obtain values of the companies participating in the operation that can be meaningfully compared.

Consistently with this objective, and in accordance with the regular practice, a uniform yardstick must be adopted throughout the whole valuation process in order to defend the interests of the shareholders of the Absorbing Company and the Company to be Absorbed. This does not necessarily mean that identical valuation methods must be used for all the companies directly or indirectly involved in the merger, especially if they operate in different sectors, but rather that there must be the same approach to valuation.

Since, as mentioned earlier, the exclusive aim of the estimates is to establish significantly comparable values, the methods adopted in the context of valuations for merger purposes and the related results may differ from those used for valuations having a different purpose.

On the basis of these assumptions and as a consequence of the adoption of the redistribution method for the assignment of the shares of the Company Resulting from the Merger (as discussed in more detail in Section 4), it is first necessary to establish a "natural" exchange ratio between the shares of the two companies, corresponding to the exchange ratio that would have been applied if the merger had involved the issue of new shares for the purpose of the exchange. This "natural" exchange ratio will correspond to different assignment ratios, which will depend, as shown in Section 4, on a number of variables.

With this premise, the "natural" exchange ratio was established by applying valuation methods that are commonly used in Italy and abroad for operations of this kind and for businesses in this sector.

In particular, account was taken of the comparative valuation of the companies involved and priority given to the homogeneousness and comparability of the methods used with respect to the simple estimate of the economic capital of each company considered on its own.

In this perspective, the valuations were carried out considering the two companies as separate entities and therefore ignoring all the strategic, operational and financial synergies expected from the merger, as well as the question of control premiums/minority discounts associated with the possession of equity interests.

3.1.2 For the valuation of Telecom Italia, the fundamental method it was decided to apply was that known as the Sum-of-the-Parts method, which it is standard market practice to use to estimate the value of a group operating in several sectors.

Under the Sum-of-the-Parts method the value of a company's economic capital is calculated as the sum of the values of its separate units, in the sense of economic entities that can be valued independently and suitably adjusted to take account of the company's financial position and minority interests, where material, and of other factors such as off-balance-sheet items and potential tax benefits.

As regards the single units, in view of the complexity and extensiveness of the structure of the Telecom Italia Group and of the many sectors in which it operates, it was decided advisable to value each of them using the methods deemed most appropriate to each situation. In particular, the valuation of the principal units was based primarily on the Discounted Cash Flow method, while the remaining assets, which are of limited importance in the overall valuation, were valued using stock market prices, for companies listed on a regulated market, and/or the method of market multiples, with use also made for testing and control purposes of balance sheet values and the values published in analysts' research reports on such units, where available.

The Discounted Cash Flow method gives the value of a company as a whole. It is based on the assumption that the value of a company or an economic activity is equal to the present value of future cash flows. These flows can be determined analytically as follows:

+	Earnings before interest and tax (EBIT)
-	Imputed tax on EBIT
+	Depreciation and other non-cash allowances
-	Fixed investment
+/-	Change in net working capital

Under this method the value of the economic capital of a company or an economic activity is equal to the sum of (i) the discounted value of the expected cash flows and (ii) the terminal value of the company, less (iii) the net financial debt and minority interests, as given by the following formula:

$$W = \sum_{t=1}^{n} \frac{FC_t}{(1+WACC)^t} + \frac{VT}{(1+WACC)^n} - DF_{t0}$$

where:

W	=	Value of the economic capital
FC t	=	Annual cash flow expected in period t
VT	=	Terminal value
DF	=	Net financial debt and minority interests at time t=0
n	=	Number of projection periods
WACC	=	Weighted average cost of capital

The terminal value is the value of the company or economic activity to be valued at the end of the period covered by the projections and is determined assuming that the duration of the business is unlimited.

The terminal value is determined using the perpetual growth method by applying the following formula:

$$VT = FC / (WACC - g)$$

where:

VT	=	Terminal value
FC	=	Normalized cash flow
g	=	Perpetual growth rate
WACC	=	Weighted average cost of capital

The terminal value obtained in this way is treated as if it were an additional cash flow and thus discounted using the weighted average cost of capital, which is the average of the costs of the different forms of financing used (equity capital and debt capital net of tax effects) weighted according to the financial structure of the company or economic activity.

$$WACC = Kd\ (1-t)\ \frac{D}{D+E} + Ke\ \frac{E}{D+E}$$

where:

Kd	= Cost of debt capital
Ke	= Cost of equity capital
D	= Debt capital
E	= Equity capital
t	= Tax rate

In particular, the cost of debt capital is the long-term interest rate applicable to companies or economic activities of similar riskiness net of the tax effect. The cost of equity capital, instead, reflects the rate of return expected by the investor with account taken of the relative risk, calculated using the Capital Asset Pricing Model, as shown below:

$$K_e = R_f + \beta(R_m - R_f)$$

where:

K_e	=	Cost of equity capital
R_f	=	Rate of return on risk-free investments

β	=	Coefficient that measures the correlation between the rate of return expected on an investment and the rate of return expected on the reference equity market
R_m	=	Expected equity market rate of return
$(R_m - R_f)$	=	Risk premium required by the equity market with respect to the rate of return on risk-free investments

3.1.3 The valuation of Olivetti was based, instead, using as fundamental method the Net Asset Value method (substantially equivalent in methodological terms to the Sum-of-the-Parts method), since it is standard market practice to use this method to value holding companies without a significant operating activity.

According to the Net Asset Value method, the value of the economic capital of a company is the sum of the values of its holdings, in the sense of economic entities that can be valued independently, and suitably adjusted to take account of the company's financial position and minority interests, where material, and of other factors such as the centralized costs of the holding company, other assets, off-balance-sheet items and potential tax benefits.

3.1.4 The exchange ratio obtained by applying the above methods was tested by using the stock-market prices method, which, in the case in question, involves considering the ratio between the values of the shares of the companies participating in the merger expressed by the stock market.

This method is considered significant when making valuations for a merger when both the companies involved are listed. Its significance increases further when, as in the case in question, the average volumes traded are large; in such circumstances the prices formed in the market provide a baseline for the purposes of a comparison of the profitability, soundness, growth prospects and riskiness of the companies from the standpoint of investors and thus for the ratio between the values of the companies involved in the merger.

In applying this method it is necessary to strike a balance between the need to mitigate the volatility of daily share prices by considering a sufficiently long period and the need to use recent data that are indicative of the market values of the companies in question. In identifying the time horizon to consider it also necessary to take account of any major changes or significant events that have affected the companies.

Since both Telecom Italia and Olivetti are listed on Borsa Italiana's MTA electronic share market and are among the largest Italian companies in terms of market value, it was considered that the stock market prices of their securities constituted a reliable benchmark.

3.2 *Application of the chosen valuation methods*

This subsection contains a description of the manner in which the valuation methods discussed in Subsection 3.1 were applied to the companies participating in the merger in order to obtain the "natural" exchange ratio.

3.2.1 Telecom Italia

Telecom Italia was valued using the Sum-of-the-Parts fundamental method.

In applying this method, the valuation of the principal activities (the activities of Telecom Italia S.p.A., Telecom Italia Mobile and Seat Pagine Gialle-directory) was based primarily on the Discounted Cash Flow method, while the remaining units were valued using stock market prices, for companies listed on a regulated market, and/or the method of market multiples, with use also made for testing and control purposes of balance sheet values and the values published in analysts' research reports on such companies, where available.

In the case of the units for which the Discounted Cash Flow method was used, the method was applied with a view to determining the fundamental value of the companies for financial investors and on the basis of the following assumptions and approaches:

- reference was made to the cash flows of the individual units as set out in the economic and financial plans drawn up by Telecom Italia;

- the growth rates used for the financial projections beyond the time horizon of Telecom Italia's business plan and for the calculation of the terminal value reflect growth prospects consistent with the relevant market benchmarks; the terminal value, determined on the basis of the flows estimated in the manner indicated, is substantially consistent with the multiples implicit in the current prices of comparable companies;

- the weighted average cost of capital (WACC) was calculated on the basis of a capital structure substantially in line with the present one.

In applying the Discounted Cash Flow method, reference was made, as mentioned earlier, to the cash flows from operations for the main activities based on the economic and financial plans drawn up by Telecom Italia's management. These are briefly described in what follows.

Fixed telephony

The economic and financial projections in this field were constructed starting from the market and economic and financial results achieved in 2002. For the years 2003-2005 they

reflect the company's strategic operating and financial objectives within a market scenario that refers substantially to the Italian fixed telephony market.

The projections were developed assuming little change in the regulatory framework, which is reflected in the movements expected in the prices for access, interconnection and leased lines. In particular, consideration was given to the introduction of the network cap for access and interconnection, while for leased lines the financial projections reflect a continuation of the present downward trend of prices in the period 2003-2005.

In a retail market characterized (i) by a decline in the value of voice traffic at an annual rate of 2.3%, as a result of small increases in volumes and falling prices, and (ii) by an in increase in sales in the Internet, data transmission and high value-added services segments, the "Domestic Wireline" business unit is expected to maintain the present level of revenues, with an average compound annual growth rate estimated at 0% - 0.5% in the period 2002-2005.

With revenues performing as described above, the Gross operating margin is forecast to grow at an annual rate of 2% - 2.5% until 2005, with an objective for the margin on sales of more than 49%. These results stem from the strategy of focusing on the core business, product innovation and a policy aimed at enhancing efficiency and lowering operating costs.

The high levels of profitability and of the generation of cash flow from operations will also benefit from capital spending on the order of Euro 6.2 billion in the period 2003-2005, of which about 80% will be on the development of innovative products and services.

The following table summarizes the financial objectives of the "Domestic Wireline" business unit, which consists principally of Telecom Italia's activity in the field of fixed telephony.

	2002 (billions of euros)	CAGR 2002 – 2005 (%)
Revenues	17.0	0%– 0.5%
EBITDA	8.0	2% - 2.5%
EBIT	4.7	4.5% - 5%
		Cumulative 2003 – 2005 (billions of euros)
Capex	2.5	6.2

Mobile telephony (TIM)

In this field consideration was given to market data and the results for the year 2002, together with economic and financial projections based on the TIM group's strategic objectives, with a distinction made between activities in Italy and abroad.

As regards the domestic market for mobile telephony, it is estimated that its value will have risen to 1.5% of GDP in 2005 and that the level of penetration will reach 100% in 2004. The level of profitability is expected to remain high in the European context.

The main source of the creation of value will be Value Added Services (VAS), which are expected to record a compound annual growth rate of around 30% in the period 2002-2005, with an objective for their contribution to Average Revenue Per User (ARPU) of 18%-22% in 2005, compared with 9% in 2002. Capital spending to sustain the growth of VAS in the domestic market is expected to increase from 28% of all capital spending on mobile telephony in 2003 to 35% in 2005.

Business abroad is expected to account for a rising proportion of mobile telephony revenues. In Brazil, which will be the main area of international expansion, it is estimated that the penetration of mobile telephony will rise from 19% in 2002 to 26% in 2005 and that over the same period the Group's market share will grow from 16% to 26%, with the objective of increasing users to 12.5 million, of which 9.9 million on the GSM network; this growth will be sustained by capital spending on the order of Euro 1.1 billion in the period 2003-2005.

The following table summarizes the results achieved in 2002 and the main economic and financial objectives for the period 2003-2005.

	2002 (billions of euros)	CAGR 2002 – 2005 (%)
Revenues	10.9	7% - 8%
EBITDA	5.0	8% - 9%
		Cumulative 2003 – 2005 (billions of euros)
Capex	1.7	5.6

Seat Pagine Gialle

In this case consideration was again given to market data and the results for the year 2002; reference was also made to a macroeconomic scenario with moderate growth in GDP and advertising in the main target markets (Italy and the United Kingdom).

In particular, Seat Pagine Gialle's strategy focuses on the search for further efficiency gains and aggressive action to expand its business, in order to generate continuous and growing cash flows.

This growth in business will come from a strengthening of the Directories sector through the integration of the different platforms (phone, paper and the Internet) and the application of this model in foreign markets, starting with the United Kingdom.

As regards Internet business, a rapid growth in revenues is envisaged, at an annual rate of between 17% and 21% in the period 2002-2005.

The estimates underlying Seat Pagine Gialle's financial projections are summarized in the following table.

	2002 (billions of euros)	CAGR 2002 – 2005 (%)
Revenues	2.0	6% - 8%
EBITDA	0.6	11% - 13%
EBIT	0.2	27% - 29%
		Cumulative 2003 – 2005 (billions of euros)
Capex	0.1	0.3

Sum of the Parts

In applying the Discounted Cash Flow method, in the context of the calculation of the Sum of the Parts, for the rate of return expected on risk-free investments, recourse was made to the "normal" rate of return on risk-free investments in the Italian market, while the beta coefficient was calculated on the basis of the most appropriate market indicators in the light of the financial structure of the activity to be valued. The risk premium required by the market was deduced from the rate of return implicit in market prices.

To the sum of the values of the assets calculated in the manner described above was added the net financial position at 31 December 2002 (adjusted to take account of the effects of the proportional net debts and minority interests, where material) and the net value of other adjustments, including some off-balance-sheet items and tax benefits.

The table below shows the minimum, mean and maximum values of the Telecom Italia ordinary share obtained using the Sum-of-the-Parts method before the distribution of reserves planned for June 2003 and thus before the completion of the merger.

	Minimum	Mean	Maximum
Values per Telecom Italia ordinary share (euros)	**8.3**	**8.8**	**9.3**

The results obtained using the Sum-of-the-Parts method were tested by analyzing the target prices identified by financial analysts. The research reports published by brokers and investment banks available at 7 March 2003, which gave a sample of 20 target prices for the Telecom Italia ordinary share, showed a range of values from Euro 7.5 to Euro 12.0 per Telecom Italia ordinary share. The mean value was Euro 9.2 per Telecom Italia ordinary share and the mid point of the range was Euro 9.8 per Telecom Italia ordinary share.

The table below shows the minimum, mean and maximum values of the Telecom Italia ordinary share obtained using the Sum-of-the-Parts method adjusted for the distribution of reserves planned for June 2003.

	Minimum	Mean	Maximum
Values per Telecom Italia ordinary share (euros)	**8.1**	**8.6**	**9.1**

The next table shows the minimum, mean and maximum values of the Telecom Italia savings share calculated on the basis of the average market discount of the last month before 7 March 2003, equal to about 33%, which is in line with the discount on the last day of trading of the Olivetti and Telecom Italia shares before the announcement of the merger (7 March 2003) and substantially in line with the average discount of the last 3, 6 and 12 months.

	Minimum	Mean	Maximum
Values per Telecom Italia savings share (euros)	**5.4**	**5.8**	**6.1**

3.2.2 Olivetti

As mentioned earlier, Olivetti was valued using the Net Asset Value method, which it is standard market practice to use to value holding companies without a significant operating activity.

The net asset value was calculated as the sum of the value of the company's equity investments and of its other assets, less its net financial liabilities and minority interests,

where material, and with consideration also given to the negative net present value of the centralized costs of the holding company.

The company's principal equity investment is that in Telecom Italia, which has been valued as discussed in Subsection 3.2.1 with reference to the values obtained using the Sum-of-the-Parts method, adjusted for the effect of the distribution of reserves planned for June 2003.

In this respect it needs to be stressed that it was not considered appropriate to calculate the Net Asset Value on the basis of the current stock market value of Olivetti's holding in Telecom Italia since, in the context of a valuation for the purpose of establishing an exchange ratio, having deemed it correct to value Telecom Italia on the basis of a fundamental method (Sum of the Parts), the valuation of the holding therein in the context of Olivetti's Net Asset Value had to be based on a fundamental method, so as to ensure the homogeneousness of the methods adopted and the overall reliability of the results. On the contrary, the calculation of Olivetti's Net Asset Value on the basis of stock-market prices of Telecom Italia would have been marked not only by the non-homogeneousness of the methods adopted but also by high volatility owing to Olivetti's financial leverage, which would cause the valuation to be unreliable.

The other equity investments and assets were valued using the Discounted Cash Flow method (Olivetti Tecnost), the stock market price method for companies listed on regulated markets and/or the market multiples method, with use also made for testing and control purposes of balance sheet values and the values published in analysts' research reports on such companies, where available.

The Olivetti treasury shares held both directly and indirectly through the subsidiary Olivetti International S.A. were valued at the final implicit value resulting from the calculation of Olivetti's Net Asset Value. This valuation method gives a result that is substantially equivalent to that obtained with the alternative method, which consists in determining the value of the Olivetti share by dividing the value of the company's economic capital (calculated without considering the holding of treasury shares) by the number of shares, excluding the treasury shares.

The calculation of the Net Asset Value also included the Tax Asset in connection with the adjustment of the value of Olivetti's equity investment in Telecom Italia proposed in Olivetti's draft financial statements for the 2002 fiscal year.

The value of the Tax Asset was calculated by discounting the amounts of the lower tax liabilities resulting from application of the tax deductions for which Olivetti would be eligible

on a stand-alone basis, taking into account to that end the taxable income it is forecast to earn.

To the sum of the values of the assets and the Tax Asset, calculated as described above, was added the value of the net financial position at 31 December 2002, adjusted for the effect of Telecom Italia's distribution of reserves planned for June 2003 and to take account of the pro forma effect of the conversion of the "Olivetti 1.5% 2001-2010 convertibile con premio al rimborso" convertible bonds, consistently with the fully-diluted method, which assumes the conversion into ordinary shares (the price of such conversion, equal to Euro 1 per bond, is lower than the value of the economic capital per Olivetti ordinary share obtained using the Net Asset Value valuation method).

The table below shows the minimum, mean and maximum values of the Olivetti ordinary share calculated using the fully-diluted method.

	Minimum	Mean	Maximum
Values per Olivetti ordinary share (euros)	**1.13**	**1.26**	**1.39**

The next table shows the minimum, mean and maximum values of the Olivetti ordinary share calculated assuming the same 33% discount as was assumed for the Telecom Italia savings share. The reference to the market discount of Telecom Italia savings shares with respect to the ordinary shares is the only objective and non-discretionary method which can be used in the absence of Olivetti savings shares.

	Minimum	Mean	Maximum
Values per Olivetti savings share (euros)	**0.76**	**0.84**	**0.93**

The discount applied reflects the average market discount of the Telecom Italia savings share with respect to the Telecom Italia ordinary share in the last month before 7 March 2003, equal to about 33%, which is in line with the discount on the last day of trading of the Olivetti and Telecom Italia shares before the announcement of the merger (7 March 2003) and substantially in line with the average discount of the last 3, 6 and 12 months.

Moreover, it appears unlikely that the discount of the savings shares of the Company Resulting from the Merger with respect to the ordinary shares will change significantly from that of the Telecom Italia savings shares before the Operation. This view is based on consideration of effects of opposite sign: on the one hand, the increase in the overall dividend premium in absolute terms would suggest a reduction in the discount; on the other

hand, the possibly greater rise in the price of the ordinary shares as a result of the increased contestability of the Company Resulting from the Merger would suggest an increase.

For the purposes of the valuation account was therefore taken both of the fact that, as an effect of the redistribution mechanism (described in Section 4), after the Operation the holders of Telecom Italia savings shares will have received a larger total number of savings shares of the Company Resulting from the Merger that, since they have the same par value and preferential rights as the Telecom Italia savings shares, will entitle them to a larger overall dividend premium in absolute terms, and of the fact that the importance of the administrative rights might exceed that of the economic rights in the Company Resulting from the Merger as a consequence of its greater contestability.

Lastly, it needs to be stressed that in establishing the exchange ratio an analysis was made of the reasonably foreseeable effects of the possible exercise of the right of withdrawal by Olivetti shareholders. This led, also on the basis of the stock-market prices of the relevant period already closed, to the belief that the number of withdrawals would not make it necessary to change the exchange ratio, since it can reasonably be expected that the withdrawal price will be lower than the value attributed to the Olivetti shares for the purposes of the merger on the basis of the valuation methods used.

Lastly, account was taken in determining the exchange ratio of the eventuality of the exercise of financial instruments giving rise to the subscription of Olivetti and Telecom Italia shares (stock options, convertible bonds and warrants) exclusively to the extent that their exercise was reasonably likely in the light of related economic and financial convenience.

3.2.3 Difficulties encountered in making the valuations

In applying the valuation methods described above, consideration was given to the characteristics and limitations of each one of them in the light of the standard practice normally followed in Italy and abroad for the valuation of companies comparable with Olivetti and Telecom Italia.

In making the valuations the following main critical areas were encountered:

- the valuations were made assuming that the present tax system will remain in force in the future. However, the tax reform under way in Italy envisages a series of changes (including new rates, consolidation for tax purposes and the abolition of Dual Income Tax, etc.), whose effects are difficult to assess.

- the estimation of the value of the savings shares assigned by the Company Resulting from the Merger for the purpose of the exchange was based on the differential found between the stock-market prices of Telecom Italia ordinary and savings shares. As explained in detail, the decision to differentiate the estimated values of the shares of different classes according to the differences between their market prices is consistent with standard practice in this field. However, even though in the case in question there were no objective elements permitting any other solution, some empirical analyses have shown that the differentials between the prices of ordinary and savings shares tend to be larger for companies, such as the Company Resulting from the Merger, where control is contestable. In such cases, in fact, the importance of the administrative rights exceeds that of the economic rights. This principle, however, is not applicable objectively to the case in question in the absence of historical data regarding Olivetti and it would only be possible to estimate its effects generically on the basis of data regarding comparable companies. Acting in the opposite direction to the foregoing, is the increase discussed earlier in the economic rights attached to the savings shares.

- the treasury shares held by Olivetti and the Olivetti shares held by the subsidiary Olivetti International S.A., which can be likened to treasury shares, were valued on the basis of the overall economic value of Olivetti itself. This approach assumes that the economic value is the same as the realizable value, i.e. the market value, of the shares in question, an assumption that has not always been true in practice. However, the valuation method adopted comes close to one of the technical solutions suggested by the literature and practice, which recommend treating treasury shares as early retirement of capital and accordingly setting their value equal to zero and calculating the value per share with reference to a smaller number of shares than the total issued, equal to those actually in circulation.

- at the present time it is not possible to make an accurate forecast of the outcome of the proposed disposal of the new company that will be created as a result of the spin-off of Seat Pagine Gialle. It is nonetheless considered, in view of the percentage of Telecom Italia's overall value accounted for by its equity investment in Seat Pagine Gialle, that the disposal cannot produce effects requiring the exchange ratio to be changed.

- in view of the size of the holding in Telecom Italia, a careful analysis was made, with the help of the Advisor, of the arguments put forward by some institutional investors regarding the application of the NAV method to Olivetti, as a holding company whose most important asset is the holding in Telecom Italia, with special reference to the appropriateness of valuing that holding on the basis of stock-market prices. Although recognizing the complexity of the question, it has been deemed appropriate, given the purpose of the valuation and the need, discussed in Subsection 3.2.2, to adopt uniform criteria for both the Companies, to value Olivetti using the same methods as those adopted to determine the value of Telecom Italia (Sum of the Parts).

3.2.4 Determination of the exchange ratio

The next table summarizes the range of the estimates of the exchange ratio calculated, with the methods and application criteria discussed in the preceding subsections, as the ratio of the estimated value of the Telecom Italia ordinary share to the estimated value of the Olivetti share using the minimum and maximum values of the ranges reported earlier.

	Minimum	Mean	Maximum
Olivetti ordinary shares per Telecom Italia ordinary share	**6.6**	**6.9**	**7.2**
Olivetti savings shares per Telecom Italia savings share	**6.6**	**6.9**	**7.2**

The Board of Directors, in the light of the indications provided by JP Morgan and after considering the results of the application of the above-mentioned valuation methods, reached a conclusion with regard to the ratio between the economic values of the two companies participating in the merger.

This conclusion was then compared with that reached by the Board of Directors of Telecom Italia, in the light of the indications provided by its own advisors, Lazard and Goldman Sachs.

At the end of the valuation process and the comparison between the results obtained by the two companies participating in the merger, the Board of Directors of Olivetti and the Board of Directors of Telecom Italia established that the "natural" exchange ratio on the basis of which to determine the assignment of the shares of the Company Resulting from the Merger was:

7 Olivetti shares assuming the current par value of Euro 1.00 each
for every
1 Telecom Italia share assuming the current par value of Euro 0.55 each

The exchange ratio will be the same for both the Telecom Italia ordinary shares and for the Telecom Italia savings shares. As will be shown in Section 4, the "natural" exchange ratio will correspond to a different assignment ratio, made necessary by the decision to carry out the exchange through the redistribution of the capital of the Company Resulting from the Merger, which means that it will also be necessary to establish an assignment ratio for the Olivetti shares.

The above exchange ratio must be verified by the experts appointed under Article 2501-*quinquies* of the Civil Code, namely by the auditing firm Deloitte & Touche Italia S.p.A., appointed by the President of the Ivrea Tribunal, for Olivetti, and by the auditing firm Reconta Ernst & Young, the external auditors, for Telecom Italia, for the purpose of the issuance of the fairness opinion required by law.

3.2.5 Control methodologies

In order to test the accuracy of the exchange ratio obtained in the manner described above, a further test was made using the method based on stock market prices.

The method was applied considering the average exchange ratio (Olivetti ordinary shares per Telecom Italia ordinary share) expressed by the market in different periods prior to the day on which Borsa Italiana S.p.A. suspended trading in the Olivetti and Telecom Italia securities in view of the forthcoming announcement of the Operation (the ratios given by the official prices recorded on 7 March 2003 and the weighted averages of the official prices in the preceding 1, 3, 6 and 12 months), adjusted for the effect of the distribution of reserves planned for June 2003, before the completion of the merger.

Account was not taken, instead, of the stock market prices of the Telecom Italia and Olivetti shares after the announcement of the Operation since they were influenced by the announcement and were therefore not deemed to be significant.

The following table shows the average exchange ratios obtained with reference to the different periods specified above.

	7 March	1 month	3 months	6 months	12 months
Olivetti ordinary shares per Telecom Italia ordinary share	**6.7**	**7.0**	**6.9**	**7.1**	**6.9**

The next table shows the minimum, mean and maximum values of the exchange ratio (Olivetti ordinary shares per Telecom Italia ordinary share) given by the stock market in the periods considered above.

	Minimum	Mean	Maximum
Olivetti ordinary shares per Telecom Italia ordinary share	**6.7**	**6.9**	**7.1**

The above figures are consistent with the exchange ratio established using the main valuation method. It should be noted that the stock market price method cannot be used to test the exchange ratio for the savings shares owing to the non-existence of Olivetti savings shares. Nonetheless, in the light of the arguments put forward above regarding the hypothesis of a substantially unchanged discount for the savings shares of the Company Resulting from the Merger with respect to its ordinary shares compared with that recorded by Telecom Italia's savings shares, the consistency of the exchange ratio established using the main valuation method can also be confirmed for the savings share ratio.

4. Procedure for assigning the shares of the Company Resulting from the Merger

In view of the interest in maintaining a flexible capital structure of a size suitable for corporate activities and with a view to limiting the effects of the Operation on the future remuneration of the shares, it was considered advisable to leave the nominal capital of Olivetti substantially unchanged at the conclusion of the Operation inasmuch as the absolute increase in the nominal capital by means of the issue of as many new shares as are necessary to satisfy the Exchange Ratio of all the Telecom Italia shares to be exchanged would lead, under current accounting rules, on the one hand, to an increase in the shareholders' equity consisting of capital with a consequent significant (exchange) merger deficit subject to amortization, obviously to the detriment of the remuneration of shares in future years, and, on the other, to a capital structure characterized by the nearly total prevalence of items not available for distribution.

Considering the adequacy of Olivetti's share capital (in relation also to the overall size of the debt when this is measured against the cash generating capacity of the Company Resulting from the Merger, both in absolute terms and relative to the main European competitors), it was decided to carry out the share exchange primarily by redistributing Olivetti's capital and have recourse to the issue of new shares only insofar as this proved necessary to maintain the share capital at the level currently subscribed.

The redistribution technique, which has also been used on previous occasions in important mergers involving listed companies, consists in dividing the share capital of the absorbing company and hence the shares composing it (in an equal, larger or smaller number than that existing, depending on whether the intention is to hold the par value of each share unchanged, decrease it or increase it) among the shareholders of the absorbing company and those of the absorbed company, according to what was referred to above as the "natural" Exchange Ratio between the shares.

Obviously, the redistribution takes the share capital of the absorbing company at the time the merger is implemented as the baseline. In the case in question, the share capital of Olivetti at the time the merger is implemented may vary from the current figure of Euro 8,845,537,520: (i) increasing as a consequence of the conversion of the "Olivetti 1,5% 2001-2004 convertibile con premio al rimborso" and "Olivetti 1,5% 2001-2010 convertibile con premio al rimborso" convertible bonds, the exercise of the "Warrant azioni ordinarie Olivetti ex Tecnost 1999-2004" Olivetti warrants and the exercise of all the Olivetti stock options ("**Conversions**") and (ii) decreasing as a consequence of withdrawals by Olivetti shareholders absent or contrary to the merger. The Absorbing Company's capital "to be "redistributed" will therefore be the algebraic sum of the subscribed capital at the time the merger plan is approved and the subsequent variations up to the implementation of the merger.

Assuming the extreme cases of (i) the total exercise of Conversions and no withdrawals and (ii) no Conversions and the exercise of the right to withdraw by all the Olivetti minority shareholders except the relative majority shareholder Olimpia, Olivetti's share capital at the time the merger is completed can vary between a maximum of Euro 11,926,697,278 and a minimum of Euro 2,738,756,641.

Since it is assumed that the post-merger share capital must not be less than the current figure of Euro 8,845,537,520, in the event that the decreasing effect of withdrawals outweighs the increasing effect of Conversions so that the share capital at the time the merger is implemented is less than Euro 8,845,537,520, the redistribution of the share capital will be accompanied by a simultaneous capital increase for the purpose of the merger to bring the share capital up to the above-mentioned minimum figure, apart from roundings serving to eliminate any resulting fractions of shares. In this connection Olivetti International has announced that it stands ready to renounce such number of shares or fractions of shares as will be necessary to close out the operation.

In the light of the method and principles described above, the share capital will be established and the share exchange carried out according to the following rules:

a) Olivetti will fix the nominal value of its shares — in the amount resulting after Conversions on the one hand and withdrawals on the other — at Euro 0.55 (equal to the par value of Telecom Italia shares), in place of the current par value of Euro 1. Consequently, Olivetti's share capital will be divided into a larger number of shares. Such shares will be divided into ordinary shares and savings shares.

b) The new ordinary and savings shares with a par value of Euro 0.55 each making up the share capital at the time of the merger of Olivetti will be redistributed, respectively, to the holders of Olivetti and Telecom Italia ordinary shares and the holders of Telecom Italia savings shares according to assignment ratios reflecting, with reference to the actual number of shares to be redistributed, the "natural" exchange ratio specified above of 7 Olivetti ordinary or savings shares for every Telecom Italia ordinary or savings share. In the redistribution only the Telecom Italia shares held by persons other than Olivetti and Telecom Italia itself will be exchanged with shares of the Company Resulting from the Merger. The number of shares of the Company to be Absorbed held by minority shareholders and actually to be exchanged will therefore vary, depending on the outcome of the tender offer that Olivetti may make after the shareholders' meeting called to approve the merger and before the latter's completion.

More precisely, where:

- **No. OLI Euro 1 shares** denotes the number of Euro 1 Olivetti shares resulting after Conversions and withdrawals;

- **No. OLI Euro 0.55 shares** denotes the number of shares of the Company Resulting from the Merger with a par value of Euro 0.55 each actually to be redistributed following the operation referred to at point a);

- **No. T.I. shares** denotes the number of Telecom Italia shares held by minority shareholders that must be exchanged;

(1) the holders of Olivetti ordinary shares will be assigned, for every share held, a number of ordinary shares of the Company Resulting from the Merger equal to:

$$\frac{\text{No. OLI Euro 0.55 shares}}{\text{No. OLI Euro 1 shares + (No. T.I. shares x 7)}}$$

(2) the holders of Telecom Italia ordinary and savings shares will be assigned, for every ordinary or savings share held, a number of ordinary or savings shares of the Company Resulting from the Merger equal to:

seven times the number of shares assigned to Olivetti shareholders for every share held by the latter

Assuming the extreme case in which all the Conversions were carried out, all the shares reserved for the Telecom Italia stock-option plans were issued, no withdrawals occurred and none of the holders of Telecom Italia ordinary and savings shares accepted the tender offer, the redistribution would involve 21,684,904,141 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each and the Telecom Italia shares to be exchanged would total (taking account of Olivetti's holding in the capital of Telecom Italia and of the latter's holding of treasury shares at the date of this Report) 4,459,575,170. In such case, applying the formula above would give the following assignment ratios:

(i) 0.502620 new ordinary shares of the Company Resulting from the Merger with a par value of Euro 0.55 each for every Olivetti ordinary share with a par value

of Euro 1 held at the date at which the merger becomes effective and for which the right of withdrawal has not been exercised;

(ii) 3.518341 new ordinary or savings shares of the Company Resulting from the Merger for every Telecom Italia ordinary or savings share, respectively, held at the date at which the merger becomes effective by minority shareholders other than Olivetti other than Olivetti and Telecom Italia itself.

In the light of the above, since the variables represented by Conversions, Telecom Italia stock options exercised, withdrawals and acceptances of the tender offer can only be quantified exactly at the time the merger is implemented, it is evident that the assignment ratio for the purposes of redistribution can be established precisely only at the time the merger becomes effective.

At all events, at the end of the Operation the ratio between the shares assigned to Olivetti shareholders and those assigned to Telecom Italia shareholders will accurately reflect the "natural" exchange ratio (1/7), as calculated above.

c) As already indicated, if at the time the merger is implemented the Absorbing Company's share capital is less than the current figure of Euro 8,845,537,520 because the decreasing effect of withdrawals outweighs the increasing effect of Conversions, the redistribution of the share capital just described will be accompanied by the simultaneous issue of up to a maximum of 11,103,237,962 new ordinary and saving shares of the Company Resulting from the Merger with a par value of Euro 0.55 each for the purpose of the share exchange, against the transfer to capital of the portion of Telecom Italia's shareholders' equity belonging to minority interests, with the possibility of an exchange deficit. These additional shares will be assigned to all the shareholders of both the Absorbing Company and the Company to be Absorbed in proportion to their respective shareholdings obtained by applying the assignment ratios indicated at Point b).

Thus, even if such an event occurs, at the end of the Operation the ratio between the shares assigned to Olivetti shareholders and those assigned to Telecom Italia shareholders will accurately reflect the "natural" exchange ratio (1 to 7), as calculated above.

d) As part of the procedure for assigning the shares of the Company Resulting from the Merger, a service will be provided to the minority shareholders of both Olivetti and Telecom Italia, through authorized intermediaries, to permit the rounding of the

number of newly-issued shares owned down or up to nearest whole number, at market prices and at no cost in terms of expenses, stamp duty or commissions.

In the event that the Olivetti shares held do not entitle the holder to receive, in accordance with the assignment mechanism, even one newly-issued share of the Company Resulting from the Merger at the end of the Operation, maintenance of the position of shareholder will be ensured by Olivetti International S.A. making available to such persons, free of charge, one share of the Company Resulting from the Merger.

e) The newly-issued shares to be utilized for the share exchange will be assigned to those entitled by the respective authorized intermediaries participating in Monte Titoli S.p.A. at the date the Operation becomes effective. It will be possible to exchange Olivetti and Telecom shares which have not been dematerialized only by delivering them to an authorized intermediary for dematerialized book-entry in the central securities system.

Olivetti will promptly publish notices in at least three newspapers with a national circulation, of which one must be a financial newspaper, announcing the amount of the capital of the Company Resulting from the Merger at the time thereof as a result of the quantification of the variables involved in the Operation (Conversions, the exercise of Telecom Italia stock options, withdrawals from Olivetti, acceptances of the tender offer), the exact assignment ratio in the overall and final measure resulting from the outcome of the supplementary assignment described at Point c), if any, and the detailed instructions on how to carry out the share exchange and to trade or obtain fractional rights as provided for at Point d).

5. Date on which the Operation becomes effective and dividend entitlement date

In accordance with Article 2504-*bis*, second paragraph, of the Civil Code (and with standard market practice for companies with listed shares), the Operation will become effective starting on the date of the last filing of the deed of merger provided for in Article 2504 of the Civil Code, or on such later date as may be specified in that deed.

The newly-issued shares of the Company Resulting from the Merger will have regular dividend rights.

In accordance with the combined effect of Articles 2504-*bis*, third paragraph, and 2501-*bis*, first paragraph, point 6, of the Civil Code, the transactions of Telecom Italia will be recorded

in the accounts of the Company Resulting from the Merger starting from 1 January of the year in which the Operation becomes effective and thus, according to the planned timetable, from 1 January 2003, for tax purposes as well, pursuant to Article 123(7) of Presidential Decree 917/1986.

Consequently, on the date the Operation becomes effective, the Company Resulting from the Merger will assume all Telecom Italia's assets, rights and obligations, including, but not limited to, all its fixed and movable, tangible and intangible assets, licences, authorizations, franchises, securities, current account assets and liabilities, loans, equity investments, insurance policies, labour contracts and every other contractual instrument.

6. Tax effects of the Operation on Olivetti and Telecom Italia

This section, after first indicating the main provisions of tax law governing mergers, considers the most important tax aspects of the Operation.

6.1 Tax neutrality

Pursuant to Article 123 of Presidential Decree 917/1986 (the "Income Tax Code") and Article 27(1) of Law 724/1994, mergers are transactions that do not give rise to the realization or distribution of capital gains or losses in respect of the assets of the company being absorbed.

6.2 Merger differences

The Operation will make it necessary to include specific items in order to achieve accounting balance between the assets and liabilities sides following the unification of the patrimonies of the companies involved. As mentioned earlier, in fact, the merger will give rise to a cancellation deficit and it is reasonable to expect that an exchange surplus will emerge.

The cancellation deficit, as mentioned in Subsection 1.1.4, will be allocated to Telecom Italia's assets (In particular to its holding of TIM shares) and any difference will be included under "goodwill".

Under Article 6(1) of Legislative Decree 358/1997 such revaluations may also be recognized for tax purposes if the 19% tax in lieu of income tax is paid. Pursuant to paragraph 2 of the same article, revaluations in connection with merger deficits may be recognized for tax purposes, even in the absence of payment of the tax in lieu of income tax, if and to the extent that the equity investments cancelled led to the previous owners being taxed on the resulting capital gains, net of the related capital losses and writedowns.

6.3 Reserves with tax deferred

The reserves with tax deferred shown in the latest financial statements of the company being absorbed will be included in the income of the absorbing company if and to the extent that they are not reconstituted in its accounts.

This rule does not apply to reserves that are taxable only if they are distributed (e.g. revaluation reserves), which have to be reconstituted in the balance sheet of the absorbing company only if there is a merger surplus or an increase in capital that exceeds the total capital of the companies participating in the merger, net of the parts of the capital of each company they already held. In this case the reserves will be included in the income of the absorbing company in the event of a subsequent distribution of the surplus or reduction in capital because it is excessive.

The reserves already allocated to capital by the company being absorbed are considered to be transferred to the capital of the absorbing company and form part of its income in the event of a reduction in capital because it is excessive.

6.4 Registration tax

Applicable in the fixed amount of Euro 129.11.

6.5 Effects on the shareholders of the company being absorbed

The exchange of the shares held by the shareholders of the company being absorbed is immaterial for tax purposes since it does not involve them in the realization of their shares.

For tax purposes the cost of the cancelled shares is automatically transferred to the new shares received in the exchange.

7. Forecasts of the composition of major shareholders and of the control structure of the Company Resulting from the Merger

Since the Operation will lead to the entry of Telecom Italia's shareholders into the capital of the Company Resulting from the Merger and the extinction of Telecom Italia, the forecasts of the composition of major shareholders at the end of the Operation refer to the Company Resulting from the Merger.

On 15 April 2003 the shareholders of Olivetti listed in the table below were found, on the basis of the shareholders' register and the notifications of major shareholdings pursuant to Article 120 of Legislative Decree 58/1998, to possess more than 2% of the company's capital:

	Number of ordinary	% of ordinary

Shareholders	shares held	share capital
Olimpia S.p.A.	2,524,127,813	28.54%
Caisse des Dépôts et Consignations*	389,200,000	4.40%
Assicurazioni Generali S.p.A.**	334,842,996	3.79%
Olivetti International S.A.***	211,931,328	2.40%
Mediobanca S.p.A.	200,000,000	2.26%

* Investment held via CDC Ixis Capital Market
** Investment held through subsidiaries
*** Subsidiary of Olivetti S.p.A. Under Article 2359-*bis* of the Civil Code, the voting rights of the shares held by Olivetti International S.A. may not be exercised.

The following table shows the foreseeable composition of shareholders with holdings of more than 2% in the Company Resulting from the Merger on the assumption: (i) that there are no Conversions (apart from those deriving from applications received by 31 March 2003, which are not yet reflected in Olivetti's share capital filed with the Company Register but are considered in this analysis) and that no Telecom Italia stock options have been exercised; (ii) that 25% of the shareholders other than Olimpia S.p.A. withdraw at a price taken to be equal to Euro 1 (which is in line with the average of the official prices recorded from 26 November 2002 up to today), giving a total outlay of about Euro 1,527 million; and (iii) that the tender offer is made at the average price between the minimum and maximum prices for the Telecom Italia ordinary and savings shares (i.e. Euro 7.7 per ordinary share and Euro 5.175 per savings share), giving a total outlay of about Euro 7,473 million, so that the tender offer covers about 14.6% of the ordinary and savings shares in the event of full acceptance.

Shareholders	Number of ordinary shares held	% of ordinary share capital
Olimpia S.p.A.	1,336,092,044	13.65%
Caisse des Dépôts et Consignations*	206,014,537	2.10%

* Investment held via CDC Ixis Capital Market

It is foreseeable that no single shareholder will have control of the Company Resulting from the Merger, which, as mentioned earlier, will be fully contestable.

8. Effects of the Operation on shareholders' agreements falling within the scope of Article 122 of Legislative Decree 58/1998

The parties to the shareholders' agreements falling within the scope of Article 122 of Legislative Decree 58/1998 that concern the companies participating in the merger have not sent any notification concerning the possible effects of the merger on such agreements.

9. Amendments to the bylaws

As mentioned earlier, it is intended the Company Resulting from the Merger adopt new bylaws, corresponding substantially to those of the current Telecom Italia bylaws.

In particular, following the Operation the Company Resulting from the Merger will change its name to "Telecom Italia S.p.A.", with the consequent amendment of Article 1 of the bylaws and of the other articles in which the name of the company appears. It has been clarified that the Company Resulting from the Merger can continue to use its own corporate marks and those of Telecom Italia.

Article 2, regarding the registered office of the Company Resulting from the Merger, will be amended to make the registered office that of Telecom Italia at 2 Piazza Affari, Milan.

As specified earlier, upon completion of the Operation the Company Resulting from the Merger will adopt the corporate purpose of Telecom Italia, with the integral substitution of Article 3 of Olivetti's current bylaws.

Article 5 of the bylaws of the Company Resulting from the Merger, concerning the share capital, will undergo a series of amendments to take account, in particular, of the redistribution and the assignment of the shares issued for the purpose of the exchange, as set out in Section 4, and of the adjustments necessary, in the light of the new amount of the share capital following the merger, for the conversion of the convertible bonds and the exercise of the warrants issued by the Absorbing Company and for the stock-option plans approved by the Absorbing Company and the Company to be Absorbed. In more detail, Article 5 of the bylaws will be amended as follows:

a) a new maximum amount of Euro 492,726.30 will be established for the variable capital increase for the exercise of the options already assigned by the Absorbing Company under the "Piano triennale di Stock Option 2002-2004" stock-option plan, increase to be carried out by 15 December 2004, with an update of up to a maximum of 895,866 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each, which will be offered to the holders of the above-mentioned options on the basis of the exchange ratio for the shareholders of the

Absorbing Company in the context of the merger, at the price of Euro 3.308 per option held;

b) a new maximum amount of Euro 10,743,649.40 will be established for the variable increase in capital for the exercise of the options already assigned by the Absorbing Company under the "Piano triennale Stock Option febbraio 2002-December 2004" stock-option plan, increase to be carried out by 31 December 2004, with an update of up to a maximum of 19,533,908 shares of the Company Resulting from the Merger with a par value of Euro 0.55 to be offered to the holders of the above-mentioned options on the basis of the exchange ratio for the shareholders of the Absorbing Company in the context of the merger, at a price of Euro 2.515 per option held;

c) a new maximum amount of Euro 103,622,863.85 will be established for the increase in capital for the exercise of the "Warrant azioni ordinarie Olivetti ex Tecnost 1999-2004" warrants, increase to be carried out by 20 June 2004, with an update of up to a maximum of 188,405,207 shares of the Company Resulting from the Merger with a par value of Euro 0.55 to be offered to the holders of the above-mentioned warrants on the basis of the exchange ratio for the shareholders of the Absorbing Company in the context of the merger, at a price already fixed by the governing bodies of the Absorbing Company and included in the warrant rules;

d) a new maximum amount of Euro 180,568,488.10 will be established for the variable capital increase for the conversion of the "Olivetti 1,5% 2001-2004 convertibile con *premio al rimborso*" convertible bonds already issued by the Absorbing Company, increase to be carried out by 1 January 2004, with an update of up to a maximum of 328,306,342 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each, reserved for the holders of the above-mentioned bonds at a conversion ratio equal to the exchange ratio for the shareholders of the Absorbing Company in the context of the merger.

e) a new maximum amount of Euro 892,681,820.80 will be established for the variable capital increase for the conversion of the "Olivetti 1,5% 2001-2010 convertibile con premio al rimborso" convertible bonds already issued by the Absorbing Company, increase to be carried out by 1 January 2010, with an update of up to a maximum of 1,623,057,856 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each, reserved for the holders of the above-mentioned bonds at a conversion ratio equal to the exchange ratio for the shareholders of the Absorbing Company in the context of the merger.

As mentioned earlier, the Company Resulting from the Merger will also have to take over Telecom Italia's stock-option plans and will therefore have to honour the stock options already assigned thereunder. To this end, Olivetti will approve corresponding increases in capital permitting the issue in relation to such stock options of a number of shares updated

in accordance with the exchange ratio and the assignment ratio provided for in the merger plan, while the exercise price will remain unchanged.

In other words, the owner of Telecom Italia stock options will maintain the right to subscribe, at the price already fixed, not for the original number of Telecom Italia shares but the larger number of shares of the Company Resulting from the Merger established on the basis of the "natural" exchange ratio of 1 to 7.

Naturally, the exact quantification of the new quantities that can be subscribed will be possible only when, at the time the deed of merger is signed, the assignment ratio is established, as provided for in Section 4. At all events, the foregoing calculations will accurately reflect, with respect to the number of shares currently obtainable, the "natural" exchange ratio of 1 to 7.

More precisely, Olivetti will approve an increase in capital for up to a total maximum amount of Euro 261,956,575.10 by means of the issue of up to a maximum of 476,284,682 shares with a par value of Euro 0.55 each, divided into the following variable tranches:

a) a tranche of up to a maximum of Euro 21,969,104.30 for the exercise of the options already assigned by Telecom Italia under the "Piano di Stock Option 1999" stock-option plan, to be implemented by 31 January 2005 by the issue of up to a maximum of 39,943,826 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each, which will be offered to the holders of the above-mentioned options on the basis of the exchange ratio for Telecom Italia shareholders in the context of the merger, at a price of Euro 6.79 per option held;

b) a tranche of up to a maximum of Euro 53,421,890.50 for the exercise of the options already assigned by Telecom Italia under the "Piano di Stock Option 2000" stock-option plan, to be implemented by 30 July 2008 by the issue of up to a maximum of 97,130,710 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each, which will be offered to the holders of the above-mentioned options on the basis of the exchange ratio for Telecom Italia shareholders in the context of the merger, at a price of Euro 13.815 per option held;

c) a tranche of up to a maximum of Euro 84,158,927.60 for the exercise of the options already assigned by Telecom Italia under the "Piano di Stock Option 2001" stock-option plan, to be implemented by 30 April 2008 by the issue of up to a maximum of 153,016,232 shares with a par value of Euro 0.55 each, which will be offered to the holders of the above-mentioned options on the basis of the exchange ratio for Telecom Italia shareholders in the context of the merger, at a price of Euro 10.488 per option held;

d) a tranche of up to a maximum of Euro 30,600,889.00 for the exercise of the options already assigned by Telecom Italia under the "Piano di Stock Option Top 2002" stock-option plan, to be implemented by 28 February 2010 by the issue of up to a maximum

of 55,637,980 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each, which will be offered to the holders of the above-mentioned options on the basis of the exchange ratio for Telecom Italia shareholders in the context of the merger, at a price of Euro 9.203 per option held;

e) a tranche of up to a maximum of Euro 71,805,763.70 for the exercise of the options already assigned by Telecom Italia in three distinct lots under the "Piano di Stock Option 2002" stock-option plan, to be implemented for the three lots by 31 March 2008, 31 March 2009 and 31 March 2010 respectively by the issue of up to a maximum total of 130,555,934 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each, which will be offered to the holders of the above-mentioned options on the basis of the exchange ratio for Telecom Italia shareholders in the context of the merger, at a price for the three lots of Euro 9.665, Euro 7.952 and Euro 7.721 respectively per option held.

Article 6 will be reformulated and lay down the rules for the savings shares that will be issued by the Company Resulting from the Merger. These shares will entitle their holders to analogous preferential rights to those currently enjoyed by the holders of Telecom Italia savings shares. Provision will also be made, as announced, for the possibility for the preferred dividend established in the bylaws to be paid by means of the distribution of reserves (in accordance with the resolution that will be proposed to the Telecom Italia shareholders' meeting called to approve the merger plan).

As regards corporate governance, the bylaws of the Company Resulting from the Merger will provide for the appointment of a Board of Directors with not less than 7 and not more than 23 members, appointed by means of a slate mechanism taken over in large part from Telecom Italia's current bylaws.

Lastly, it needs to be underscored that Article of Telecom Italia's bylaws contains clauses that give the Minister for the Economy and Finance some special powers, to be exercised in agreement with the Minister for Productive Activities, in application of Article 2 of Law 474/1994, it should be noted that such powers include the right to veto the adoption of merger resolutions and amendments to the bylaws that would suppress or alter such powers, which were introduced into Telecom Italia's bylaws under a Prime Ministerial Decree of 21 March 1997 in the light of the sector of the company's operations (telecommunications) and with a view to its privatization.

At the end of the meeting of its Board of Directors on 11 March 2003, Telecom Italia requested the Minister for the Economy and Finance to indicate whether he intended to exercise the powers in question.

The Minister for the Economy and Finance subsequently informed Telecom Italia that he did not consider the conditions existed for the exercise of the power of veto with respect to the adoption by Telecom Italia's shareholders' meeting of the merger resolution. By contrast, as regards the question of the presence in the bylaws of the clauses giving the

special powers, the Minister for the Economy and Finance indicated that he considered it necessary to maintain the power of expressing a favourable opinion on the acquisition of major shareholdings in the company's capital and the power of veto as set out in the current bylaws of Telecom Italia.

The Minister for the Economy and Finance also stated that he had reached agreement with the Minister for Productive Activities on the indications regarding these questions.

With this premise, and pending the formalization of the measure best suited to the foregoing indications and any opinion the competent European Union authorities might express on the matter, the Minister for the Economy and Finance requested that the bylaws to be submitted to the shareholders' meetings of the companies participating in the merger conform with the indications set out above.

The amendments to the bylaws described above will come into force on the date that the Operation becomes effective, pursuant to Article 2504-*bis* of the Civil Code and the merger plan.

The amended text of the bylaws of the Company Resulting from the Merger, including the above-mentioned special powers, to be submitted to the shareholders' meetings of Olivetti and Telecom Italia for their approval is annexed to this Report.

10. Considerations of the Board of Directors concerning the potential recourse to the right of withdrawal

At the end of the Operation the Company Resulting from the Merger will adopt the corporate purpose of Telecom Italia. This innovation is necessary in order to reflect the major change in the business of Olivetti, which will be transformed from a holding company into an operational company with numerous administrative authorizations and franchises and operations in regulated markets, so that its corporate purpose must include the supply of the services for which such authorizations and franchises have been granted.

In particular, the adoption of the new corporate purpose for the Company Resulting from the Merger serves to permit it to maintain the licences currently held by Telecom Italia for the supply of telecommunications services to the public.

In fact Telecom Italia's activity consists essentially in the installation and operation of telecommunications equipment and in the supply of telecommunications services on the basis of individual licences and general authorizations issued under Presidential Decree 318/1997. Whereas the corporate purpose of Telecom Italia laid down in its bylaws provides expressly for all the activities referred to above, the corporate purpose of Olivetti only mentions "production and marketing in the field ... of telecommunications" and "services" as a merely secondary activity (without further specification).

The change in the corporate purpose is also intended to allow the Company Resulting from the Merger to engage in other activities covered by Telecom Italia's bylaws, such as advertising and publishing, which are not envisaged in Olivetti's current bylaws.

The adoption of Telecom Italia's corporate purpose means that the bylaws of the Company Resulting from the Merger will contain the requirement that holding equity investments should not be its principal activity, as it was for Olivetti. This formal change entails a substantial change in the risk profile associated with the investment since, as a consequence of the Operation, the Company Resulting from the Merger will no longer have the characteristics established by the Minister of the Treasury in implementing Article 113 of Legislative Decree 385/1993 to define the concept of "*engaging as the principal activity, without dealings with the public, in the acquisition of equity interests*".

Under Article 2437 of the Civil Code, the Olivetti shareholders who are contrary to the merger resolution and those who are absent may exercise the right of withdrawal.

The right of withdrawal may be exercised by shareholders entitled to do so by sending a registered letter that must reach Olivetti within 3 days of the date of the shareholders' meeting that approved the merger if sent by shareholders who were present at the meeting and contrary to the resolution or within 15 days of the filing of the resolution with the Company Register if sent by shareholders who were not present at the meeting. The date on which letters are received by Olivetti will count and not the date on which they were sent; it is therefore up to the shareholders contrary to the resolution to ensure compliance with the above-mentioned time limit since Olivetti takes no responsibility for transmission or delivery delays due to causes beyond its control.

For the purposes of legitimizing the exercise of the right of withdrawal, shareholders must also send Olivetti an appropriate certification, issued by an authorized intermediary pursuant to the provisions governing dematerialized financial instruments deposited with a central securities depository, attesting in particular the ownership of the company's shares from the date of the merger resolution. As provided for by the regulations in force, when certifications are issued the shares will be blocked by the intermediary in question until they are redeemed.

Olivetti will inform shareholders in good time, as laid down by law, regarding the procedure and time limits for exercising the right of withdrawal.

The amount due to Olivetti shareholders who exercise the right of withdrawal will be based on the price per share calculated as the mean of the official prices of the six months preceding the date of the merger resolution. For the purposes of the redemption, consideration will be given to the daily quotations of the Olivetti shares in the six calendar months preceding the date of the adoption of the merger resolution.

The Olivetti shareholders who exercise their right of withdrawal will be entitled to have their shares redeemed from the date on which the Operation becomes effective, with the consequent right to be paid interest at the legal rate from such date.

Accordingly, at the time the Operation becomes effective for civil law purposes and simultaneously with the exchange of shares for the Olivetti shareholders who did not exercise the right of withdrawal, Olivetti will redeem and cancel the shares of the shareholders who exercised the right of withdrawal, with the related payment expected to be made at the latest within 90 days of the date on which the Operation becomes effective.

The sums due to the shareholders who exercise the right of withdrawal will be taxable profit for any part exceeding the subscription or purchase price paid for the shares Olivetti cancels (Article 44(3) of the "Income Tax Code").

In the event that shareholders who are natural persons but not entrepreneurs or qualified shareholders are assigned reserves other than capital reserves, even if they were previously classified as share capital, the intermediary participating in the Monte Titoli S.p.A. central securities depository (or foreign central securities depositories participating therein) is required to apply the 12.50% tax in lieu of income tax pursuant to Article 27-*ter*, paragraph 1, of Presidential Decree 600/1973.

If, instead, the above-mentioned reserves were used to redeem non-residents, the tax in lieu of income would be 27%, without prejudice to the rate reduction provided for in double taxation agreements.

In the event that shareholders who are natural persons are qualified shareholders or, not being qualified shareholders, elect not to be subject to the tax in lieu of income referred to above, the taxable profit must be indicated in their tax returns for an amount equal to the difference between that redeemed and the subscription or purchase price for the shares Olivetti cancels and will be subject to personal income tax (Irpef) or separate taxation. At all events, for the part of the taxable profit determined in this way corresponding to the reserves, other than capital reserves, attributable to shareholders in relation to the shares cancelled, a tax credit on the dividends will be recognized up to the amount of the taxes referred to in Articles 105(1)(*a*) and 105(1)(*b*) of the "Income Tax Code".

Milan, 15 April 2003
On behalf of the Board of Directors of Olivetti S.p.A.

(in original signed by Olivetti's Legal Representative)

The meeting of ordinary shareholders of Olivetti S.p.A. (the Absorbing Company),

- having seen the plan for the merger of Telecom Italia S.p.A. into Olivetti S.p.A., entered respectively in the Turin Company Register and the Milan Company Register on April 22, 2003 and on April 18, 2003 (the Merger Plan);
- having examined the Directors' report on the merger operation (the Merger);
- having taken note of the balance sheets of the companies participating in the Merger, as shown in their draft financial statements for the year ended 31 December 2002;
- having taken note of the reports on the congruousness of the merger exchange ratio prepared by the auditing firms Deloitte & Touche Italia S.p.A. for Olivetti and Reconta Ernst & Young S.p.A. for Telecom Italia;
- having taken note of the timely filing of the documentation required under the applicable law;
- having taken note of the Board of Auditors' attestation that the present share capital is fully paid up;

resolves

1. to approve the Merger Plan and consequently to proceed — with the accounting and tax effects starting on 1 January of the year in which the Merger becomes effective in respect of third parties, as provided for in the Merger Plan — with the merger of Telecom Italia S.p.A. into Olivetti S.p.A. on the basis of the following exchange ratio:
   - 7 Olivetti ordinary shares with a par value of Euro 1 (one) for every Telecom Italia ordinary share with a par value of Euro 0.55 each;
   - 7 Olivetti savings shares with a par value of Euro 1 (one) for every Telecom Italia savings share with a par value of Euro 0.55 each;

   with the effectiveness of the whole operation subject (i) to the adoption by the shareholders' meeting of Telecom Italia of a like resolution and (ii) to the admission to listing on the MTA electronic share market operated by Borsa Italiana S.p.A. of the savings shares to be issued;

2. to withdraw and cancel the Olivetti shares with a par value of Euro 1 each (net of those for which the right of withdrawal has been exercised) and simultaneously to issue new ordinary and savings shares with a par value of Euro 0.55 each and regular dividend entitlement, in the number resulting from their assignment to Olivetti shareholders and Telecom Italia shareholders other than Olivetti in accordance with the following criteria:

   A. satisfaction of the exchange ratio between the economic values underlying the Olivetti and Telecom Italia shares by redistributing Olivetti's capital at the time of the implementation of the Merger, net of the Olivetti shares with a par value of Euro 1 (one) for which the right of withdrawal has been exercised, subsequent to the change in the par value of the shares of the Absorbing Company from Euro 1 to Euro 0.55, and thus by applying the following assignment ratios:
      - for every Olivetti share (with a par value of Euro 1) withdrawn and cancelled, assignment of "x" newly-issued ordinary shares of the Absorbing Company (with a par value of Euro 0.55 each);
      - for every Telecom Italia ordinary share (with a par value of Euro 0.55) withdrawn and cancelled, assignment of "7x" newly-issued ordinary shares of the Absorbing Company (with a par value of Euro 0.55 each);
      - for every Telecom Italia savings share (with a par value of Euro 0.55) withdrawn and cancelled, assignment of "7x" newly-issued savings shares of the Absorbing Company (with a par value of Euro 0.55 each);

      where the number "x" is the ratio between

- ✓ the total number of shares of the Absorbing Company with a par value of Euro 0.55 each to be redistributed and
- ✓ the sum of (i) the total number of Olivetti shares with a par value of Euro 1 outstanding (for which the right of withdrawal has not been exercised) at the time of the implementation of the Merger and (ii) 7 times the total number of Telecom Italia shares to be exchanged at the time of the implementation of the Merger;

B. assignment, if necessary, to all the holders of the Absorbing Company's ordinary and savings shares, in proportion to their respective holdings following the redistribution and therefore on the basis of the above-mentioned exchange ratio, of up to a maximum of 11,103,237,961 new shares, of the same class as the shares already assigned under the redistribution, with a par value of Euro 0.55 each (and thus up to a total maximum amount of Euro 6,106,780,879.10) until the share capital of the Absorbing Company reaches a total of Euro 8,845,537,520.05.

A service will be provided to shareholders to handle any fractions of shares, without prejudice to any rounding deriving from the aforesaid assignment operations;

3. to recalculate the remaining amount of the increase in capital already approved by the Extraordinary Shareholder's Meeting of 4 October 2000, for the part set aside for the exercise of the "Warrant Azioni Olivetti ex Tecnost 1999-2004" warrants, up to a maximum amount of Euro 56,992,575.20, by means of the issue of up to a maximum of 103,622,864 ordinary shares with a par value of Euro 0.55 each.

   A service will be provided to holders of the aforementioned warrants who exercise their subscription rights to handle any fractions of shares, without prejudice to any rounding deriving from the exercise of the warrants;

4. to increase the share capital as of the date on which the Merger becomes effective — by reiterating, updating and, where necessary, renewing earlier resolutions to increase the share capital adopted by Olivetti's Shareholders' Meeting and Board of Directors, insofar as they are still effective — by the following divisible amounts to take account of the assignment ratio for Olivetti shareholders in the context of the Merger:
   (i) up to a maximum of Euro 492,726.30, by means of the issue of up to a maximum of 895,866 ordinary shares with a par value of Euro 0.55 each for the exercise of the "Piano triennale Stock Option 2002-2004" stock options, increase to be implemented by 15 December 2004;
   (ii) up to a maximum of Euro 10,743,649.40, by means of the issue of up to a maximum of 19,533,908 ordinary shares with a par value of Euro 0.55 each for the exercise of the "Piano triennale Stock Option febbraio 2002-dicembre 2004" stock options, increase to be implemented by 31 December 2004;
   (iii) up to a maximum of Euro 180,568,488.10, by means of the issue of up to a maximum of 328,306,342 ordinary shares with a par value of Euro 0.55 each to be reserved irrevocably and exclusively for the conversion of the "Olivetti 1,5% 2001-2004 convertibile con premio al rimborso" convertible bonds, on the basis of a conversion ratio equal to the assignment ratio established for the shareholders of Olivetti S.p.A. in the context of the merger of Telecom Italia S.p.A. into Olivetti S.p.A.;
   (iv) up to a maximum of Euro 892,681,820.80, by means of the issue of up to a maximum of 1,623,057,856 ordinary shares with a par value of Euro 0.55 each to be reserved irrevocably and exclusively for the conversion of the "Olivetti 1,5% 2001-20010 convertibile con premio al rimborso" convertible bonds, on the basis of a conversion ratio equal to the assignment ratio established for the shareholders of Olivetti S.p.A. in the context of the merger of Telecom Italia S.p.A. into Olivetti S.p.A.

   A service will be provided to holders of the aforementioned securities who exercise their subscription/conversion rights to handle any fractions of shares, without prejudice to any rounding deriving from the exercise of the stock options and/or the conversion of the convertible bonds;

5. to increase the share capital as of the date on which the Merger becomes effective — for the outstanding stock option plans of Telecom Italia S.p.A., insofar as they are still effective, with account taken of the assignment ratio for Telecom Italia ordinary shareholders in the context of the Merger — by up to a maximum of Euro 261,956,575.10, by means of the issue of up to a maximum of 476,284,682 ordinary shares with a par value of Euro 0.55 each, divided into the following divisible tranches:
   (i) a tranche of up to a maximum of Euro 21,969,104.30 for the exercise of the "Piano di Stock Option 1999" stock options, increase to be implemented by 31 January 2005 by means of the issue of up to a maximum of 39,943,826 ordinary shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 6.79 per option held;
   (ii) a tranche of up to a maximum of Euro 53,421,890.50 for the exercise of the "Piano di Stock Option 2000" stock options, increase to be implemented by 30 July 2008 by means of the issue of up to a maximum of 97,130,710 ordinary shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 13.815 per option held;
   (iii) a tranche of up to a maximum of Euro 84,158,927.60 for the exercise of the "Piano di Stock Option 2001" stock options, increase to be implemented by 30 April 2008 by means of the issue of up to a maximum of 153,016,232 ordinary shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 10.488 per option held;
   (iv) a tranche of up to a maximum of Euro 30,600,889.00 for the exercise of the "Piano di Stock Option Top 2002" stock options, increase to be implemented by 28 February 2010 by means of the issue of up to a maximum of 55,637,980 ordinary shares with a par value of Euro 0.55 each, to be subscribed for at a total price of Euro 9.203 per option held;
   (v) a tranche of up to a maximum of Euro 71,805,763.70 for the exercise of the "Piano di Stock Option 2002" stock options, increase to be implemented by 31 March 2008 for the first lot, by 31 March 2009 for the second lot and by 31 March 2010 for the third lot by means of the issue of up to a maximum of 130,555,934 ordinary shares with a par value of Euro 0.55 each, to be subscribed for at a total price for the different options of respectively Euro 9.665, Euro 7.952 and Euro 7.721 per option held.

   A service will be provided to holders of the aforementioned options who exercise their subscription rights to handle any fractions of shares, without prejudice to any rounding deriving from the exercise of the stock options.

6. to adopt as of the date on which the Merger becomes effective the bylaws annexed to the Merger Plan (the Bylaws of the Absorbing Company), to be understood as referred to here in their entirety, in the version consistent with the indications of the competent governmental authorities regarding the special powers of the Minister for the Economy and Finance under Article 2(1) of Decree Law 332/1994, ratified with amendments by Law 474/1994;
7. to grant severally to the Legal Representatives the powers needed:
   (a) to complete all the formalities required for the resolutions adopted to obtain all the necessary authorizations, with the right to approve and introduce into such resolutions, the Merger Plan and the Bylaws of the Absorbing Company annexed thereto any amendments, additions or deletions that may be requested or suggested by administrative authorities and/or following the exercise of the special powers referred to in Article 5 of the bylaws of Telecom Italia S.p.A. or on the occasion of filings with the Company Register;
   (b) to draw up and sign, *inter alia* by having ad hoc recourse to attorneys or agents, in conformity with the resolution of point 1, the public merger instrument and every other assessment, supplement and amendment that should prove necessary or desirable, defining every agreement, condition, clause, time limit and procedure thereof in conformity with and in implementation of the Merger Plan;

(c) to complete and amend at the signing of the merger instrument the numbers contained in Article 5 of the Bylaws of the Absorbing Company on the basis of the final assignment ratios obtained in accordance with the criteria set out in point 2;
(d) to make, as and when necessary, the changes to Article 5 of the Bylaws of the Absorbing Company consequent on the implementation of the increases in capital referred to in points 2, 3 and 4, and to that end to complete all the formalities and publish all the notices required by law;
(e) to establish the timetable and procedures for carrying out the redistribution and assignment operations referred to in point 2;
(f) to do — *inter alia* by having ad hoc recourse to attorneys or agents — whatever else may be necessary for and conducive to the complete implementation of the foregoing resolutions, authorizing entries, transcriptions, annotations, amendments and corrections in public registers and every other competent seat.

Exhibit 1.4

BOARD OF DIRECTORS OF TELECOM ITALIA S.P.A.
MEETING OF 15 APRIL 2003

REPORT ON THE PLAN FOR THE MERGER OF TELECOM ITALIA S.P.A. INTO OLIVETTI S.P.A.

Milan, 15 April 2003

The following is an English translation of the official version in Italian language. In case of conflict, the Italian language version will prevail.

REPORT OF THE BOARD OF DIRECTORS OF TELECOM ITALIA S.P.A. ON THE PLAN FOR THE MERGER OF TELECOM ITALIA S.P.A. INTO OLIVETTI S.P.A. PURSUANT TO ARTICLE 2501-*QUATER* OF THE CIVIL CODE AND ARTICLE 70(2) OF CONSOB REGULATION 11971/1999 ON ISSUERS, AS AMENDED, IMPLEMENTING LEGISLATIVE DECREE 58/1998 (THE "CONSOLIDATED LAW").

Dear Shareholders,

In accordance with Article 2501 *quater* of the Civil Code and Article 70 of Consob Regulation 11971/1999 (the "**Regulation**"), we submit for your consideration and approval the plan (the "**Merger Plan**") for the merger (the "**Merger**" or the "**Operation**") of Telecom Italia S.p.A. ("**Telecom Italia**" or the "**Company to be Absorbed**") into Olivetti S.p.A. ("**Olivetti**" or the "**Absorbing Company**", or – once the Merger becomes effective – the "**Company Resulting from the Merger**"). The purpose of this report is to describe and justify the Merger Plan from the legal and economic standpoints, with particular regard to the exchange ratio.

1. Description of the Operation and the reasons therefor, with particular regard to the operating objectives of the companies participating in the merger and the programmes formulated for achieving them

1.1 Description of the persons involved

1.1.1 Telecom Italia S.p.A.: Telecom Italia is a company limited by shares with registered office at 2 Piazza Affari, Milan and headquarters at 4 Corso d'Italia, Rome, and a fully paid-up share capital of Euro 4,023,816,860.80 divided into 5,262,908,631 ordinary shares with a par value of Euro 0.55 each and 2,053,122,025 savings shares with a par value of Euro 0.55 each. The Company to be Absorbed is domiciled for tax purposes at its registered office, and its Milan Company Register Number and tax number is 00471850016.

1.1.2 Olivetti S.p.A.: Olivetti is a company limited by shares with registered office at 77 Via Jervis, Ivrea, a fully paid-up share capital of Euro 8,845,537,520 divided into 8,845,537,520 ordinary shares with a par value of Euro 1 each. The Absorbing Company is domiciled for tax purposes at its registered office, and its Ivrea Company Register number and tax number is 00488410010.

1.2 Description of the activities of Telecom Italia

1.2.1 The Telecom Italia Group is one of the largest international groups operating in the sector of telecommunications services and, more in general, information and communication technology. Its companies, leaders in fixed and mobile communications, the Internet and media, information technology and research offer integrated and innovative services in Italy and abroad. Its principal strength is its leadership in the domestic market in fixed and mobile telecommunications and Internet services. The companies of the Group have created broadband, fixed and mobile networks providing innovative services, complex solutions for ICT, multimedia messaging, solutions for mobile business, products for e-government and online banking.

1.2.2 Following the changes in top management during 2001 and the significant overhaul of corporate growth strategies with the formulation of the Business Plan for 2002-2004 (the "**Business Plan**"), in 2002 an overall restructuring was launched. In particular, organizational restructuring led to the formation of a completely renewed, compact and stable management team. During 2002 the responsibilities of the "Domestic Wireline" and "Information Technology" business units were revised in depth and a new "South America" business unit was established.

1.2.3 At Group level the so-called "professional families" were upgraded and strengthened with the establishment of a functional link between distinctive competences in the individual Telecom Italia Group companies and the analogous functions in the parent company so as **(i)** to ensure greater organizational effectiveness and the verification of resources, and **(ii)** to foster intra-Group mobility. In addition, new procedures were introduced for the approval and monitoring of investments and acquisitions, with the centralization of governance responsibilities.

1.2.4 The objectives of financial strengthening and industrial restructuring were achieved in accordance with the Business Plan. The results obtained with the gain in efficiency and the plan of disposals (which generated a net cash flow of Euro 4,771 million in 2002) were decisive in reducing the Group's debt from Euro 21,942 million at the end of 2001 to Euro 18,118 million at 31 December 2002. The proportion of debt with a maturity of more than one year rose from 64% at the end of 2001 to 75% at the end of 2002. The Group's structure was simplified, with the number of companies declining from 714 to 416.

1.2.5 Turning to business developments, 2002 brought a strengthening of Telecom Italia's leadership in the Italian market, obtained thanks to effective marketing and the focus on innovation.

1.2.6 In the field of mobile telephony, TIM S.p.A. ranks first among European operators in terms of the number of GSM lines on a single network and is the leader in Italy. In October TIM S.p.A. launched Brazil's first GSM service, which reached more than 80 cities throughout the country.

1.2.7 The following tables show selected income, balance sheet and financial data for the Telecom Italia Group and for Telecom Italia, drawn from the consolidated financial accounts for the 2002 fiscal year, Telecom Italia's draft financial statements for 2002 and its financial statements for 2001 and 2000.

1.3 Description of Olivetti's activities

1.3.1 Olivetti, in conformity with its current corporate purpose, is a company entered in the special section of the general register, kept by the Italian Foreign Exchange Office, of persons engaging "principally" in financial activities "without dealings with the public" pursuant to and for the effects of Articles 106 and 113 of Legislative Decree 385/1993.

1.3.2 Olivetti's principal equity interest is that held in Telecom Italia (54.9% of the ordinary capital) and, indirectly, in its subsidiaries. Olivetti is also present in business sectors such as office products and services and real estate, notably through its subsidiaries Olivetti Tecnost S.p.A. (information technology and communications products and services) and Olivetti Multiservice S.p.A. (services related to the real-estate sector).

1.3.3 The following tables show selected income, balance sheet and financial data for the Olivetti Group and for Olivetti, drawn from the consolidated financial statements for the 2002 fiscal year, Olivetti's draft financial statements for 2002 and its financial statements for 2001 and 2002, appropriately reclassified to make them consistent with those of Telecom Italia.

1.4 Main legal aspects of the Operation

1.4.1 The proposed Operation envisages the merger of Telecom Italia into Olivetti pursuant to and for the effects of Article 2501 et seq. of the Civil Code. The Operation was approved, as regards its objectives and principal characteristics, by the Boards of Directors of the interested companies in their meetings on 11 March 2003.

On 13 March 2003 Olivetti published the notice provided for by Article 2503-*bis*, second paragraph, of the Civil Code. The time limit for exercising of conversion rights de jure expired on 13 April 2003. However, it is appropriate to point out that the holders of bonds convertible into Olivetti shares will able to exercise conversion rights in accordance with rules of these bond issues even after the expiration of the time limit indicated in Article 2503-*bis*, second paragraph, of the Civil Code, without prejudice to the periods of suspension of such rights envisaged by the issue rules.

1.4.2 The Merger will take place on the basis of the draft financial statements for the fiscal year ended 31 December 2002 of Olivetti and Telecom Italia (jointly the "**Companies Participating in the Merger**"), which were also adopted by the Boards of Directors of the Companies Participating in the Merger as statements of assets and liabilities under Article 2501-*ter* of the Civil Code (for each the "**Merger Statement of Assets and Liabilities**").

1.4.3 The Absorbing Company, as a consequence and at the conclusion of the Merger, will assume the name and corporate purpose of Telecom Italia. More in general, Olivetti will adopt new bylaws based on the current bylaws of Telecom Italia.

Concerning the amendment of the corporate purpose, premised that the extension of the corporate purpose to the performance of services in the telecommunications sector would by itself legitimate the right of withdrawal, it was nonetheless considered appropriate to take over Telecom Italia's corporate purpose in its entirety, in order to permit the Absorbing Company to operate in all the sectors in which Telecom Italia is currently present, with particular regard to the activities that Telecom Italia is authorized to engage in pursuant to administrative measures.

In this regard, the fee schedules of the individual licences issued to Telecom Italia provide that "the corporate purpose of the company must include activities in the telecommunications sector", which must refer to the provision of telecommunications services, as defined in Presidential Decree 318/1997, on the basis of which the licences were issued.

OVC

The inclusion of such activities in the corporate purpose of the licensee is among the elements evaluated for the grant of licences and, inasmuch as it responds to a specific prescription of the schedules accessory to such licences, must therefore be considered among the conditions for the preservation thereof by the successor Olivetti, whose corporate purpose does not currently provide for them.

As a consequence of the amendment of the corporate purpose within the context of the Merger, Olivetti shareholders who are absent or contrary to the resolutions approving the Operation will have the right to withdraw pursuant to and for the purposes of Article 2437 of the Civil Code (on the right to withdraw, see also Section 10 below).

The relative majority shareholder of Olivetti has already announced that it will not exercise its right of withdrawal.

1.4.4 In order to give the shareholders of Telecom Italia a possibility to disinvest within the context of the Operation, Olivetti has announced its intention of making a partial tender offer for ordinary and savings shares of Telecom Italia (the "**Offer**").

The consideration offered will be fixed on the basis of the weighted average of the official stock-market prices of the ordinary and savings shares of Telecom Italia in the period between 12 March 2003 and the date of the shareholders' meeting of the Absorbing Company called to approve the Merger Plan, plus a premium of 20%, but in no case will such consideration be **(i)** greater than Euro 8.40 per ordinary share and Euro 5.65 per savings share or **(ii)** lower than Euro 7 per ordinary share and Euro 4.70 per savings share.

The market has been informed that the number of shares to be tendered for will be decided after the time limit for exercising the right to withdraw under Article 2437 of the Civil Code has expired and, therefore, after the amount of the outlay to be incurred by Olivetti for the withdrawal rights actually exercised ("**Withdrawals**") has been ascertained. The maximum total amount to be allocated to the Offer will be Euro 9 billion, less the repayment for Withdrawals.

The Offer will be for the same percentage of ordinary shares and savings shares. If the resources allocated to the Offer for each of the two classes of shares (ordinary and savings) are not completely used for that class, they will be used for the other class. If the acceptances of the Offer by the holders of ordinary shares and savings shares were to exceed the quantity tendered for, they will be prorated with respect to each class.

On the basis of what Olivetti has indicated, if there were no Withdrawals and the Offer therefore had a maximum overall value of Euro 9,000,000,000:

(a) if made at the minimum price of Euro 7 per ordinary share and Euro 4.70 per savings share, the Offer would be for about 19.4% of the ordinary share capital and savings share capital respectively;

(b) if made at the maximum price of Euro 8.40 per ordinary share and Euro 5.65 per savings share, the Offer would be for about 16.1% of the ordinary share capital and savings share capital respectively.

The Offer will take place as soon as possible following the expiration of the time limit for the exercise of Withdrawals and will close before the merger instrument is signed. The Offer will cease to be effective in the event of failure to complete the procedure for filing the merger instrument with the Company Register within a given date, now tentatively envisaged to be 31 December 2003, without prejudice to the intention of the Companies Participating in the Merger to complete the formalities for the Merger in the shortest time possible, and specifically, as indicated in Subsection 1.4.8 below, by early August. The Offer will be evaluated by the Board of Directors of Telecom Italia pursuant to and for the purposes of Article 39 of the Regulation once the offer document has been received.

Since the Operation will result in Olivetti's absorbing a subsidiary, it will have as a consequence the cancellation of the equity interest held by Olivetti in Telecom Italia at the time the Merger becomes effective and the assignment to Telecom Italia ordinary or savings shareholders other than Olivetti of ordinary or savings shares and to Olivetti shareholders of ordinary shares issued by the Company Resulting from the Merger on the basis of the assignment ratios corresponding to the exchange ratio. This assignment will be made by Olivetti's capital at the completion of the Operation (see Section 4).

Olivetti will cancel all the Telecom Italia shares held at the time of the Merger. For the purposes of the annual financial statements, the difference between the carrying value of the cancelled Telecom Italia shares and the corresponding portion of shareholders' equity will be positive and will thus give rise to a "cancellation deficit". This deficit, whose size will also depend on the acceptances of the Offer, will be allocated to Telecom Italia assets (in particular, to the Tim shares held) and any difference recorded under the item "goodwill". Considering the procedure for the assignment of the shares of the Company Resulting from the Merger by means of the redistribution technique, it is reasonable to expect that a share exchange surplus will emerge.

1.4.5 For the share exchange, Olivetti will assign holders of Telecom Italia savings shares new savings shares with features identical to those of the shareholders currently issued by Telecom Italia. Among other things, the bylaws of the Company Resulting from the Merger will contain an article identical in content to that of the bylaws of Telecom Italia, including the possibility of satisfying the preferential rights of the holders of savings shares by distributing reserves, whose introduction in the bylaws of the Company to be Absorbed will be proposed at the shareholders' meeting called to approve the Merger Plan.

In the context of the Operation, and as an essential aspect thereof, the savings shares that will be issued by the Absorbing Company for the share exchange in favour of holders of Telecom Italia savings shares are to be listed on the stock exchange. The new Olivetti savings shares will have a par value of Euro 0.55 each, thus corresponding fully to the current savings shares of Telecom in this respect as well.

The Operation will therefore not give rise to any prejudice for the holders of savings shares. Consequently, lacking the preconditions referred to in Article 2376 of the Civil Code and Article 146 of the Consolidated Law, it will not be necessary to call the special meeting of such shareholders.

Considering that as a consequence of the share exchange and the specific manner in which it is to be carried out each holder of savings shares will be assigned a larger number of savings shares that that currently held, and that each of the new shares assigned by the Absorbing Company will have the same par value as a Telecom Italia savings share, there will be an increase in the total amount of dividends payable on a preferential basis to the holders of Telecom Italia savings shares at the date the Merger becomes effective.

This advantage in absolute terms, together with the above-mentioned possibility of satisfying the preferential right by distributing reserves, undoubtedly improves the position of the holders of Telecom Italia savings shares.

1.4.6 The Absorbing Company will succeed to all the legal relationships of Telecom Italia, including the concessions, licences and administrative authorizations granted thereto in accordance with the procedures established by the legislation in force. The Absorbing Company will also succeed to the relationships pertaining to Telecom Italia's bond issues and stock-option plans; to this end, the Absorbing Company will implement the capital increases for the purpose of such plans and will update the capital increases for the convertible bonds, stock-option plans and warrants issued by Olivetti with the necessary adjustments to take

account of the new par value of the Olivetti shares and the assignment procedure described in Section 4.

1.4.7 At the end of the Merger, the (ordinary and savings) shares of the Company Resulting from the Merger will be listed on Borsa Italiana's MTA electronic share market. Furthermore, it is expected that (1) the Company Resulting from the Merger will also succeed to Telecom Italia in being listed on the NYSE in the form of American Depositary Receipts (ADRs), and (ii) the Merger will not have consequences for the listing on the Frankfurt Stock Exchange of the ordinary shares of the Company Resulting from the Merger.

1.4.8 It is the intention of the Companies Participating in the Merger to complete the Operation in the shortest possible time. The Merger is expected to become effective in early August 2003.

1.5 Reasons for the Operation

1.5.1 The Operation is framed in the reorganization drive aimed at creating value for Telecom Italia shareholders, launched in July 2001 and carried out through an industrial and financial restructuring with positive results despite the crisis in the stock markets and the telecommunications sector.

1.5.2 The strategic objective of creating value for Telecom Italia shareholders involved the identification of a multiplicity of actions and initiatives. In particular, industrial restructuring and refocusing on the core business, completed earlier than had been announced to the financial community from September 2001 onwards and in line with the Business Plan, and carried out in part through the disposal of a number of non-strategic assets (such as the equity interests in Auna, Telemaco Immobiliare, Bouygues Decaux Telecom, Mobilkom Austria, Telekom Austria, Telespazio, Sogei and Lottomatica) led to:

- an improvement in the operating result, with the consolidated operating result rising by 10.6% to Euro 7.4 billion in the 2002 fiscal year, and

- a reduction in consolidated total net debt from Euro 21.9 billion at 31 December 2001 to Euro 18.1 million at 31 December 2002.

Meanwhile, Olivetti carried out a series of transactions to refinance its debt, with an improvement in the debt's conditions of maturity.

The completion of the above-mentioned industrial restructuring activities of the Telecom Italia Group, together with the improvement in Olivetti's financial situation, now makes it possible to take the further step of simplifying the Olivetti-Telecom Group's corporate structure, in accordance with the market's expectations, by merging Telecom Italia into Olivetti.

1.5.3 As a consequence of the Operation, Telecom Italia shareholders will be able to benefit fully from the enhancement in value deriving from the execution of the Business Plan.

Currently, Telecom Italia is majority controlled by Olivetti and the latter has a major shareholder- Olimpia S.p.A. - holding 28.54% of its share capital.

As a result of the Merger, Olivetti's controlling interest in Telecom Italia will be extinguished as a result of the cancellation of the shares, while Olimpia's interest in Olivetti will be diluted substantially.

Consequently, Telecom Italia shareholders, like Olivetti shareholders, will hold shares of a fully contestable company in which there will be no controlling shareholder. In this regard, it is to noted that the final size of Olimpia S.p.A.'s holding in the Company Resulting from the Merger will depend on a series of factors such as the number of Conversions (as defined below), the number of Olivetti warrants and Telecom Italia stock options exercised, the number of Withdrawals and the number of acceptances of the Offer (see also what is indicated in Subsection 7.3).

This will result in a more liquid security and, on the basis of experience, an enhanced possibility of it being appreciated by the market, to the benefit of all the shareholders.

1.5.4 At the same time, the Merger will create scope to improve tax efficiency, in compliance with the legislation in force, inter alia through the full and more rapid recovery within the Company Resulting from the Merger of Olivetti's tax assets (see Subsection 2.2.3, Point E).

1.5.5 The Operation as a whole will also make it possible to attain a more efficient financial structure, involving an increase in debt capital, whose net cost is lower than the cost of equity capital.

In connection with this aspect, it needs to be stressed that the increase in overall debt following the Merger involves reaching a level of debt **(i)** in line with or better than that of other companies of comparable size

operating in the sector in Europe, and (ii) consistent and compatible with Telecom Italia's set of activities and the prospective cash flows deriving from the execution of the Business Plan. According to the latter, debt is projected to decline with the utilization of the proceeds of the sales of other non-strategic assets. Furthermore, Telecom Italia will also benefit from the positive effects of unified debt management in terms of the lengthening of maturities and optimal correlation with corporate requirements.

1.5.6 Moreover, the Company Resulting from the Merger is expected to maintain a capacity to produce profits and adopt a dividend-distribution policy that will ensure Telecom Italia's current shareholders receive a total amount of dividends at least on a par with that currently received.

1.5.7 In conclusion, the Board of Directors considers the Merger an essential step so that the shareholders of Telecom Italia can reap, without constraints arising from control by another listed company such as Olivetti, all the benefits of a widely-held company operating in a strategic sector and with significant potential for value growth. The Business Plan and the clear direction adopted by the Board of Directors in terms of focusing on core business and constantly improving operational efficiency ensure a trajectory of value creation without dispersion of economic resources, assuming the macroeconomic environment remains unchanged.

1.6 Operating objectives and programmes to achieve them

1.6.1 The Companies Participating in the Merger have agreed on the operating objectives and the programmes to achieve them on the part of the Company Resulting from the Merger. These objectives are basically the same as those of Telecom Italia, adopted by the Board of Directors on 13 February 2003, which in turn confirm the guidelines and objectives of the Business Plan. With specific regard to Olivetti, it should be noted that Olivetti Tecnost is basically neutral in terms of its impact on the operating result.

However, the Operation will result in a Merger deficit (deriving from share cancellation) , any portion of which not classified as a Telecom Italia asset (specifically among equity interests) will be amortized over a period of 20 years. The updated financial projections take account of this additional portion of amortization.

1.6.2 The same projections consider the financial charges associated with Olivetti's present debt, as well as the effect of the tax asset connected with the value adjustments made in Olivetti's and Telecom Italia's draft

financial statements for 2002. In addition to the disposals already envisaged by the Business Plan (Telekom Austria, Operazioni Real Estate), the projections also include the receipts from the disposal of the company into which Seat Pagine Gialle S.p.A. ("**Seat Pagine Gialle**") is to be spun off.

1.6.3 Lastly, it is estimated that the cash flows from operations and disposals of the Company Resulting from the Merger will be able to sustain not only a reduction in debt but also a dividend distribution policy such as to ensure Telecom Italia's current shareholders a total dividend amount in line with that set out in the Business Plan, which expressly envisaged dividend policy remaining constant.

1.6.4 The following table summarizes the above considerations at consolidated level, from which the sustainability of the commitments entered into for the future appears evident.

Billions of euros	Olivetti 2002 consolidated financial statements	Consolidated objectives of the Company Resulting from the Merger (*) CAGR 2002-2005 ***
Sales of products and services	31.4	4 - 4.5%
Gross operating margin % of sales	14.0 44.6%	5 - 5.5%
Operating result % of sales	6.0 19.1%	8 - 8.5%
		Cumulative 2003-2005
Free Cash Flow	8.6	29
Net financial position	33.4**	34.3****

(*) Assuming zero Withdrawals, fully diluted.
(**) The net financial position does not take account of the forward purchase commitments (December 2005) in respect of Aldermanbury Investment Limited (formerly Chase Equities Limited), equal to Euro 2,417 million.
(***) The scope of the consolidation is the same.
(****) At 31 December 2004.

2. The values attributed to the Companies Participating in the Merger for the purpose of determining the Exchange Ratio

2.1 Objective of the valuation

2.1.1 The objective of the valuation in question is to establish the exchange ratio ("**Exchange Ratio**") on the basis of which the participation in the

Company Resulting from the Merger of the shareholders of Olivetti and Telecom Italia respectively will be determined.

The purpose of the valuation, therefore, is to value the two Companies Participating in the Merger in order to obtain significantly comparable values for the purpose of determining the Exchange Ratio with respect to the specific Operation in question, considering all the shareholders of the Companies Participating in the Merger as parties interested in the valuation and the Exchange Ratio.

To achieve this objective, the valuations for the purpose of determining the Exchange Ratio require the identification and application of valuation methods based on uniform criteria for the Companies Participating in the Merger.

Such valuations may therefore differ from other valuations made in different contexts or for different purposes, notably as regards the selection of the methods used.

2.1.2 The Board of Directors of Telecom Italia has reached its conclusions on the Exchange Ratio following a well-considered evaluation of the Companies Participating in the Merger, selecting from a multiplicity of valuation methods those generally considered most appropriate in the Merger in the light of the activities performed by the Absorbing Company and the Company to be Absorbed.

Furthermore, as suggested by theory and standard professional practice, the Board of Directors of Telecom Italia has compared the values attributed to the Companies Participating in the Merger on a going-concern basis.

The baseline accounting situation for the valuations performed is that resulting from the Merger Statements of Assets and Liabilities.

2.1.3 For the purpose of determining the Exchange Ratio, the Board of Directors of the Company to be Absorbed was assisted by Lazard and Goldman Sachs as independent financial advisors (the "**Advisors**").

It is to be noted that the Board of Directors of Olivetti was assisted by JP Morgan and by Professor Angelo Provasoli (who ascertained the consistency and appropriateness of the valuation methods adopted by JP Morgan for the Operation) as independent advisors.

2.1.4 The methods followed and the results obtained by the Board of Directors of Telecom Italia, with the support of the Advisors, are described in the following subsection.

2.2 Methods adopted and results obtained

2.2.1 Introduction

A. The Board of Directors of Telecom Italia, with the assistance of the Advisors, selected the valuation methods to be applied in the case in question taking into account:

a) the specific objectives of the valuations in connection with the Operation;

b) the nature of the activities performed by each of the Companies Participating in the Merger.

B. Concerning the first aspect, in selecting the valuation principles and methods, reference was made, as is considered proper and appropriate in every kind of valuation, to the purpose of the exercise and to the significant factors allowing the value of the object of valuation to be calculated. Given the objective of obtaining comparable values for the determination of the Exchange Ratio, valuation methods based on uniform criteria were adopted for both the Companies Participating in the Merger.

In the case in question, the Exchange Ratio was established on the basis of a comparison of the values of the Companies Participating in the Merger.

As reported above, these values were determined on a going-concern basis and can neither be considered to represent a separate valuation of the two Companies Participating in the Merger nor compared with any acquisition or disposal prices (which normally take account of majority premiums and minority discounts, if any). Nor do these values reflect strategic, operational and financial synergies expected from the Merger.

As indicated below, the Board of Directors utilized both the stock-market price method and the sum-of-parts method for the valuation of both of the Companies Participating in the Merger. In particular, for the purpose of establishing the Exchange Ratio, values determined on the basis of uniform methods were compared: the ratio between stock-market prices on the one hand and the ratio between fundamental values (sum-of-parts) on the

other. Consequently, in the circumstances it was considered that the Net Asset Value (NAV) method based on the current stock-market value of the equity interest in Telecom Italia could not be adopted. In a valuation to establish the Exchange Ratio carried out on the basis of a fundamental method, the latter must also be applied to Olivetti's equity interest in Telecom Italia. On the contrary, the application to Olivetti of a NAV based on the current stock-market value of the equity interest in Telecom Italia would lead to highly volatile results, mainly owing to Olivetti's financial leverage. Besides, the application of this method would imply referring to market values for only one of the Companies Participating in the Merger, which the Board of Directors considered methodologically inadmissible.

C. With regard to the second aspect, account was taken on the one hand of the various areas of the Telecom Italia Group's operations and, on the other, of the fact that the controlling interest in Telecom Italia held by Olivetti represents a significant component of the latter's balance sheet assets.

D. In the light of the above, the following methods were used to calculate the values of Olivetti and Telecom Italia, with equal level of significance for the purpose of the valuation procedure:

(i) stock-market prices ("**Stock-Market Prices**") as the principal method. In this regard, it is noted that where companies interested in a merger have shares listed in regulated securities markets, theory and professional practice suggest that account should be taken of the results derivable from the stock-market prices of the respective shares, averaged over appropriate periods of time. In the case in question, the stock-market prices are considered to be particularly significant, taking account of the high capitalization and liquidity of Telecom Italia and Olivetti;

(ii) the sum-of-parts ("**Sum-of-Parts**") method as a control. Under this method a company's value is calculated as the sum of the values of its separate units (taken as economic entities that can be valued independently) adjusted to take account of the company's financial position, minority interests and, where material, of other effects such as those of off-balance-sheet items and potential tax benefits.

In applying the valuation methods described, account was taken of the planned distribution of reserves by Telecom Italia of up to a maximum of Euro 1,333 million, whose proposal to the

095

shareholders' meeting called to consider the Merger Plan was approved by the Board of Directors on 11 March 2003. Since under the timetable of the Merger the share exchange is to take place after the payment of the dividend, the impact of the distribution of reserves on the values of the economic capital of the two Companies Participating in the Merger was taken into account in establishing the Exchange Ratio.

Finally, it should be stressed that in determining the Exchange Ratio an analysis was made of the reasonably foreseeable effects of the possible exercise of the right of withdrawal by Olivetti shareholders and it was considered that on the basis, inter alia, of the share prices in the significant period already elapsed the outcome of such Withdrawals will not be such as to render a change in the Exchange Ratio necessary; and this inasmuch as the withdrawal price can be reasonably expected to be lower than the value attributed to the shares of Olivetti for the purpose of the Merger under the valuation methods used.

E. The subsections that follow describe the methods and principles adopted in valuing the Companies Participating in the Merger both from the theoretical point of view and in terms of the main results.

2.2.2 Stock-market price method

A. The stock-market price method estimates the value of the capital on the basis of the stock-market prices recorded in a significant period concluding at a date close to that on which the estimation is performed. After the announcement of the Operation, the stock-market prices of Telecom Italia and Olivetti were influenced by the announcement. Hence, the prices following such announcement are not considered significant.

B. The stock-market price method is not applicable to Telecom Italia savings shares inasmuch as Olivetti savings shares do not exist today. For the savings shares, it was therefore assumed that the prices of the Olivetti savings shares would reflect a discount similar to that applied by the market to the Telecom Italia savings shares, as detailed in Subsection 2.2.4.

C. On the basis of the market data at 7 March 2003 (the last day of trading of the securities before the date of the board meetings that announced the Operation), it is found that:

D9L

a) both of the Companies Participating in the Merger have a large market capitalization and a significant and widely-distributed float;

b) as can be seen from the following table: (i) the daily volume of trading in Telecom Italia and Olivetti ordinary shares is high (around 1% of the float on average); and (ii) during the twelve months preceding the announcement of the Operation:

- trades of Olivetti shares amounted to around 240% of the share capital (excluding the portion held by Olimpia S.p.A.), for a value of Euro 16.9 billion;

- trades of Telecom Italia ordinary shares amounted to around 289% of the share capital represented by that class of shares (excluding the shares held by Olivetti), for a value of around Euro 54 billion.

Telecom Italia (ordinary shares)	Average volume ('000)	Cumulated volume ('000)	Average % of capital traded (*)	Cumulated % of capital traded (*)
Prices				
7 March 2003	42,131.3	42,131.3	1.8%	1.8%
Last week	38,225.3	191,126.4	1.6%	8.1%
Last month	28,994.8	579,895.0	1.2%	24.5%
Last 3 months	31,411.6	1,884,693.5	1.3%	79.5%
Last 6 months	30,126.5	3,765,810.3	1.3%	158.8%
Last year	27,073.7	6,849,656.0	1.1%	288.8%

Olivetti	Average volume ('000)	Cumulated volume ('000)	Average % of capital traded (*)	Cumulated % of capital traded (*)
Prices				
7 March 2003	90,695.9	90,695.9	1.0%	1.0%
Last week	86,240.0	431,200.0	1.4%	6.8%
Last month	59,319.6	1,186,392.2	0.9%	18.8%
Last 3 months	61,400.2	3,684,009.3	1.0%	58.3%
Last six months	61,220.3	7,652,538.4	1.0%	121.2%
Last year	59,851.9	15,142,528.8	1.0%	240.6%

(*) On the total number of shares held by the market.

Source: Datastream

c) both the Companies constitute a significant portion of the total capitalization of the Mibtel and MIB30 stock indices. At 24 March 2003 (for the MIB30 index) and 1 April 2003 (for the Mibtel index), according to data provided by Borsa Italiana:

- Olivetti made up 1.9% of the Mibtel index and 2.4% of the MIB30 index; and

- Telecom Italia made up 8.4% of the Mibtel index and 9.5% of the MIB30 index;

d) Telecom Italia's and Olivetti's floats are significantly split up among Italian and foreign institutional investors and Italian retail investors, none of whom is in a position to influence the price of the securities.

D. In order to mitigate the short-term fluctuations typical of the financial markets, in line with best valuation practice the analysis of the share prices was extended to the average figures recorded by the market in sufficiently large intervals of time.

Accordingly, the following were performed, among others:

a) analysis of the simple averages over a time span extending up to the 12 preceding months;

b) analysis of the volume-weighted averages over a time span extending up to the 12 preceding months;

c) analysis of 1, 3, 6 and 12 month moving averages;

d) adjustment of the value of Telecom Italia shares to take account of the planned distribution of the dividend for 2002.

E. From the analysis of the historical price movements, the 1, 3, 6 and 12-month averages were identified as those falling within a corridor of constant valuations, as can be seen from the following table.

Market prices	Stock-market value		Value for the purpose of the share exchange		Ratio*
	TI (€)	Oli (€)	TI post-div (€)	Oli (€)	
Weighted averages					
7 March 2003	5.9	0.86	5.7	0.86	6.7
1 month	6.5	0.91	6.3	0.91	7.0
3 months	7.0	0.99	6.8	0.99	6.9
6 months	7.4	1.02	7.2	1.02	7.1
12 months	7.8	1.11	7.6	1.11	6.9
Arithmetic averages					
7 March 2003	5.9	0.86	5.7	0.86	6.7
1 month	6.6	0.91	6.4	0.91	7.0
3 months	7.0	0.99	6.9	0.99	7.0
6 months	7.4	1.01	7.2	1.01	7.1
12 months	7.9	1.11	7.7	1.11	6.9
Maximum and minimum prices					
Maximum price in the last 12 months	9.7	1.47	9.5	1.47	6.5
Minimum prices in the last 12 months	5.9	0.84	5.7	0.84	6.8

Source: Datastream

* Differences are due to rounding.

F. The results shown above are also confirmed when the time horizon of the analysis is extended to 18 months.

2.2.3 Sum-of-Parts method

A. Under the Sum-of-Parts method, the value of Telecom Italia and Olivetti is calculated as the sum of the values of the individual units of each company, taken as economic entities that can valued independently. Such sum is suitably adjusted to take account of the financial position and minority interests for each of the Companies Participating in the Merger and, where material, of other effects, including those of any off-balance-sheet items and potential tax benefits.

B. Given the significant incidence on Olivetti's balance sheet assets of its controlling interest in Telecom Italia, the valuation procedure concentrated mainly on estimating Telecom Italia's economic capital, which was also the key factor in determining that of Olivetti.

In view of the complexity of the corporate structure of the Group and the many areas in which it operates, the individual assets were valued using the methods, among those commonly employed for valuation purposes, deemed most appropriate to each specific situation. In particular, the principal assets, such as fixed and mobile telephony, were valued using the discounted cash flow ("DCF") method.

The remaining assets and liabilities were valued on a case-by-case basis mainly with reference to their book or market value, in view of their limited importance in the overall valuation of Telecom Italia.

The DCF method was applied by discounting operating cash flows gross of any component of a financial nature (Free cash Flows or "FCF"). Under this method the value of a company is equal to the sum of the following components:

- operating cash flows that the company will be able to generate in the future, discounted at a rate representing the weighted average cost of capital;

- net financial position and minority interests, which in the case in question were calculated with reference to 31 December 2002.

The DCF method was applied to determine the fundamental value for financial investors and reflects the following assumptions and approaches:

- the Weighted Average Cost of Capital (WAAC") was calculated on a capital structure in line with the current one;

- the growth rates used for the financial projections beyond the horizon of Telecom Italia's Business Plan and for the calculation of the terminal value reflect growth prospects consistent with the relevant market benchmarks.

C. In applying the DCF method, reference was made to the cash flows from operations for the main activities based on the economic and financial plans drawn up by Telecom Italia's management. These are briefly described in what follows.

Fixed telephony

The economic and financial projections in this field were constructed starting from the market and economic and financial results achieved in 2002. For the years 2003-2005 they reflect the company's strategic operating and financial objectives within a market scenario that refers basically to the Italian fixed telephony market.

The projections were developed assuming little change in the regulatory framework, which is reflected in the movements expected in the prices for access, interconnection and rented lines. In particular, consideration was given to the introduction of the network cap for access and interconnection, while for rented lines the financial projections reflect a continuation of the present downward trend of prices in the period 2003-2005.

In a retail market characterized (i) by a decline **in the value of voice traffic** at an annual rate of 2.3%, as a result of **small increases in volumes** and **falling prices**, and (ii) in increase in sales in the Internet, data transmission and high value-added services segments, the "Domestic Wireline" business unit is expected to maintain the present level of revenues, with an average compound annual growth rate estimated at 0% - 0.5% in the period 2002-2005.

With revenues performing as described above, the EBITDA is forecast to grow at an annual rate of 2% - 2.5% until 2005, with an objective for the margin on sales of more than 49%. These results stem from the strategy of focusing on the core business, product innovation and a policy aimed at enhancing efficiency and lowering production costs.

The high levels of profitability and of the generation of cash flow from operations will also benefit from capital spending on the order of Euro 6.2 billion in the period 2003-2005, of which about 80% will be on the development of innovative products and services.

The following table summarizes the financial objectives of the "Domestic Wireline" business unit, which consists principally of Telecom Italia's activity in the field of fixed telephony.

	2002 (billions of euros)	CAGR 2002 - 2005 (%)
Revenues	17.0	0%- 0.5%
EBITDA	8.0	2% - 2.5%
Operating result	4.7	4.5% - 5%
		Cumulative 2003 - 2005 (billions of euros)
Capital spending	2.5	6.2

Mobile telephony (TIM)

In this field consideration was given to market data and the results for the year 2002, together with economic and financial projections based on the TIM group's strategic objectives, with a distinction made between activities in Italy and abroad.

As regards the domestic market for mobile telephony, it is estimated that its value will have risen to 1.5% of GDP in 2005 and that the level of penetration will reach 100% in 2004. The level of profitability is expected to remain high in the European context.

The main source of the creation of value will be Value Added Services (VAS), which are expected to record a compound annual growth rate of around 30% in the period 2002-2005, with an objective for their contribution to Average Revenue Per User (ARPU) of 18%-22% in 2005, **compared with 9% in 2002**. Capital spending to sustain the growth of VAS in the domestic market is expected to increase from 28% of all capital spending on mobile telephony in 2003 to 35% in 2005.

Business abroad is expected to account for a rising proportion of mobile telephony revenues. In Brazil, which will be the main area of international expansion, it is estimated that the penetration of mobile telephony will rise from 19% in 2002 to 26% in 2005 and that over the same period the Group's market share will grow from 16% to 26%, with the objective of increasing users to 12.5 million, of which 9.9 million on the GSM network; this growth will be sustained by capital spending on the order of Euro 1.1 billion in the period 2003-2005.

The following table summarizes the results achieved in 2002 and the main economic and financial objectives for the period 2003-2005.

	2002 (billions of euros)	CAGR 2002 - 2005 (%)
Revenues	10.9	7% - 8%
EBITDA	5.0	8% - 9%
		Cumulative 2003 - 2005 (billions of euros)
Capital spending	1.7	5.6

Seat Pagine Gialle

In this case consideration was again given to market data and the results for the year 2002; reference was also made to a macro-economic scenario with moderate growth in GDP and advertising in the main target markets (Italy and the United Kingdom).

In particular, Seat Pagine Gialle's strategy focuses on the search for further efficiency gains and aggressive action to expand its business, in order to generate continuous and growing cash flows.

This growth in business will come from a strengthening of the Directories sector through the integration of the different platforms (phone, paper and the Internet) and the application of this model in foreign markets, starting with the United Kingdom.

As regards Internet business, a rapid growth in revenues is envisaged, at an annual rate of between 17% and 21% in the period 2002-2005.

The estimates underlying Seat Pagine Gialle's financial projections are summarized in the following table.

	2002 (billions of euros)	CAGR 2002 - 2005 (%)
Revenues	2.0	6% - 8%
EBITDA	0.6	11% - 13%
Operating result	0.2	27% - 29%
		Cumulative 2003 - 2005 (billions of euros)
Capital spending	0.1	0.3

D. The financial projections for the activities analyzed above provided the basis for the estimates of operating cash flows in the forecasting period considered and of the residual value at the end of that period ("Terminal Value").

For the estimation of the Terminal Value, theory and professional practice proposes two alternatives:

- the value corresponding to the capitalization of the normalized operating cash flow (or the present value of the operating cash flows expected for the period subsequent to the time horizon of the explicit projection), which can be estimated as follows:

$$VT = \frac{FCFn}{(WACC - g)}$$

where:

VT = Terminal Value;
FCFn = Normalized operating cash flow;
g = Assumed perpetual growth rate;
WACC = Weighted Average Cost of Capital;

or,

- the value calculated on the basis of a multiple of EBITDA of the last year of the projection period considered.

Since the cash flows in question will be used to remunerate all the persons contributing capital, in discounting it is necessary to use a rate representing the cost of all the financial resources utilized by the company. This rate is identified as the Weighted Average Cost of Capital (WACC) and is calculated with reference to a capital structure in line with that of the company to be valued, as follows:

$$WACC = Kd\,(1 - t)\,\frac{D}{D+E} + Ke\,\frac{E}{D+E}$$

where:

Kd = Cost of debt capital;
Ke = Cost of equity capital;
D = Debt capital;

E = Equity capital;
t = Tax rate.

In particular, the prevailing practice is to calculate the cost of equity capital on the basis of the Capital Asset Pricing Model (CAPM), defined by the following formula:

$$Ke = Rf + Beta \times (Rm - Rf)$$

where:

Rf	=	rate of return on risk-free investments;
Beta	=	correlation coefficient between a share's effective rate of return and the overall market rate of return;
Rm	=	overall market rate of return;
(Rm - Rf)	=	premium required by the market with respect to the rate of return on risk-free investments.

The principle underlying this method rests on the hypothesis that in a liquid and efficient market investors determine the required rate of return only considering the degree of systematic (or market) risk of the investment, expressed by the relation between the variation in the price of the specific share and the variation in the market (Beta). The specific risk of the investment (the share) is not considered, since it can be eliminated by the investor through appropriate diversification of investments.

E. In the light of the above, in the case in question reference was made to the operating cash flows for the individual units as shown by the economic and financial plans prepared by Telecom Italia. The Terminal Value was calculated using both a perpetual growth rate of the FCF and a multiple of EBITDA consistent with the results produced by comparable listed companies for the different sectors of reference.

The "normal" rate of return on riskless investments in the Italian market was used for the risk-free rate. Beta was calculated on the basis of the most appropriate market data, taking account of the financial structure of the activities being valued. The most recent valuation practice was followed for the risk premium required by the market.

For Olivetti, which has the structure of a holding company whose assets consist principally of the equity interest in Telecom Italia, the Sum-of-Parts method was applied by valuing such equity interest according to the procedures described earlier and valuing

the remaining assets and liabilities principally at book or market value, in view of their limited importance in the overall valuation.

In the valuation of Telecom Italia and Olivetti account was also taken of the tax assets generated by value adjustments to the controlling interests held respectively by Telecom Italia in Seat Pagine Gialle and by Olivetti in Telecom Italia for the part that the Companies Participating in the Merger will effectively be able to use – independently of the completion of the Operation – on the basis of the taxable income they are forecast to make on their own.

From the sum of the values of the assets and the tax asset, calculated as described above, was subtracted the value of the net financial position at 31 December 2002, adjusted (i) for Telecom Italia, for the effect of the dividend to be distributed from reserves (June 2003) and (ii) for Olivetti, for the pro forma effect of the conversion of the 1.5% 2001-2010 convertible bonds, consistently with the fully-diluted method, which assumes the conversion into ordinary shares.

F. With reference to the Sum-of-Parts method, with the assistance of the Advisors the Board of Directors of Telecom Italia has identified the following values per ordinary share:

SUM-OF-PARTS METHOD			
	Telecom Italia	Olivetti	Ratio
Value per ordinary share (in euros)	8.8	1.27	6.9

The results obtained applying the Sum-of-Parts method confirm the relative values found with the stock-market price method.

2.2.4 Savings shares

For savings shares, inasmuch as shares of this class issued by Olivetti do not exist today, it was assumed, inter alia considering the preferential rights that Olivetti saving shares will have, that their prices reflected a discount similar to that applied by the market to Telecom Italia savings shares, and it was therefore considered appropriate to adopt the same Exchange Ratio as for ordinary shares.

It is a generally accepted principle, in fact, that other procedures for dividing the value of the capital between ordinary shares and savings

shares would introduce discretionary elements into the valuation unsupported by any objective evidence.

Moreover, it appears unlikely that the discount of the savings shares of the Company Resulting from the Merger with respect to the ordinary shares will be significantly different from that of the Telecom Italia savings shares before the Operation. This view is based on consideration of effects of opposite sign: on the one hand, the increase in the overall dividend premium in absolute terms would suggest a reduction in the discount; on the other hand, the possibly greater rise in the price of the ordinary shares as a result of the Company Resulting from the Merger not being controlled anymore by another entity would suggest an increase.

2.2.5 Main problems

In performing the valuations to determine the Exchange Ratio, the Board of Directors of Telecom Italia encountered the following main problems:

(i) Possible further asset sales during 2003: at present it is not possible to foretell precisely the outcome of the planned disposal of the new company that will be created as a result of the spin-off of Seat Pagine Gialle. At all events, in view of the limited importance of the equity interest in Seat Pagine Gialle in the overall value of Telecom Italia, the disposal is not expected to require changes in the Exchange Ratio;

(ii) taxation: the valuation was made on the basis of current tax law and therefore did not take into account the tax reform now being prepared, whose effects are difficult to quantify today;

(iii) valuation of savings shares: no Olivetti savings shares exist today. To avoid introducing discretionary elements into the analysis unsupported by objective evidence, in the absence of historical data to which to refer for Olivetti, reference consideration was given only to the price differential between Telecom ordinary and savings shares.

The Board of Directors has also carefully considered, with the help of the Advisors, the arguments put forward by some institutional investors regarding the application of the NAV method to Olivetti, as a holding company whose most important asset is the holding in Telecom Italia. Although recognizing the complexity of the question, the Board of Directors has come to the conclusion that, given the purpose of the valuation and the need to adopt uniform criteria for both the Companies Participating in the Merger, it is correct to value Olivetti using the same

methods as those adopted to determine the value of Telecom Italia (Stock-Market Prices and Sum of Parts).

3. Conclusions

3.1 Determination of the Exchange Ratio

3.1.1 In the light of the valuations made with the aid of their respective Advisors, the Boards of Directors of Telecom Italia and Olivetti have defined and agreed the relative values of the Companies Participating in the Merger for the purpose of determining the Exchange Ratio.

3.1.2 The exchange ratios derived by applying the methods used by the Board of Directors of Telecom Italia are summarized below:

METHOD	EXCHANGE RATIO
Stock-market price method	
- 7 March 2003	6.7
Weighted averages:	
- 1 Month	7.0
- 3 Months	6.9
- 6 Months	7.1
- 12 Months	6.9
Sum-of-Parts method	6.9

3.1.3 These conclusions were compared with those reached by the Board of Directors of Olivetti with the assistance of its financial advisor, JP Morgan. At the end of the comparison, the Exchange Ratio indicated below was established.

3.2 Exchange Ratio

3.2.1 On the basis of the valuations of the Companies Participating in the Merger described above, the following so-called "natural" Exchange Ratio was established", corresponding to the exchange ratio that would have been applied without redistribution but through the issue of new shares for the purpose of the exchange:

- 7 Olivetti shares (ordinary and savings respectively) with a par value of Euro 1 each for every Telecom Italia ordinary share or savings share with a par value of Euro 0.55 each.

3.2.2 No cash consideration is envisaged.

4. Procedure for assigning the shares of the Company Resulting from the Merger and the entitlement date of the shares

4.1 Procedure for carrying out the share exchange

4.1.1 In view of the interest in maintaining a flexible capital structure of a size suitable for corporate activities and with a view to limiting the effects of the Operation on the future remuneration of the shares, it was considered advisable to leave the nominal capital of Olivetti basically unchanged at the conclusion of the Operation inasmuch as the absolute increase in the nominal capital by means of the issue of as many new shares as would be needed to satisfy the Exchange Ratio of all the Telecom Italia shares to be exchanged would have led, under the accounting rules in force, on the one hand, to an increase in the shareholders' equity consisting of capital with a consequent significant (exchange) merger deficit subject to amortization, obviously to the detriment of the remuneration of shares in future years, and, on the other, to a capital structure characterized by the nearly total prevalence of items not available for distribution.

4.1.2 Considering the adequacy of Olivetti's share capital (in relation also to the overall size of the debt when this is measured against the cash generating capacity of the Company Resulting from the Merger, both in absolute terms and relative to the main European competitors), it is proposed that the share exchange be carried out primarily by redistributing Olivetti's capital, with recourse to the issue of new shares only insofar as this proves necessary to maintain the share capital at the level currently subscribed.

4.1.3 The redistribution technique, which has also been used on previous occasions in important mergers involving listed companies, consists in dividing the share capital of the absorbing company and hence the shares composing it (in an equal, larger or smaller number than that existing, depending on whether the intention is to hold the par value of each share unchanged, decrease it or increase it) among the shareholders of the absorbing company and those of the absorbed company, according to what was referred to above as the "natural" Exchange Ratio between the shares.

Obviously, the redistribution takes the share capital of the absorbing company at the time the merger is implemented as the baseline. In the case in question, the share capital of Olivetti at the time the Merger is implemented may vary from the current figure of Euro 8,845,537,520: (i) increasing as a consequence of the conversion of the "Olivetti 1,5%

2001-2004 convertibile con premio al rimborso" and "Olivetti 1,5% 2001-2010 convertibile con premio al rimborso" convertible bonds, the exercise of the "Warrant azioni ordinarie Olivetti ex Tecnost 1999-2004" Olivetti warrants and the exercise of all the Olivetti stock options ("**Conversions**") and (ii) decreasing as a consequence of Withdrawals. The Absorbing Company's capital "to be "redistributed" will therefore be the algebraic sum of the subscribed capital at the time the Merger Plan is approved and the subsequent variations up to the implementation of the Merger.

4.1.4 Given the extreme cases of the total exercise of Conversions and no Withdrawals on the one hand and no Conversions and the exercise of the right to withdraw by all the Olivetti minority shareholders except Olimpia on the other, at the time the Merger is implemented, Olivetti's share capital can vary between a maximum of Euro 11,926,697,278 and a minimum of Euro 2,738,756,641.

Since it is assumed that the post-Merger share capital must not be less than the current figure of Euro 8,845,537,520, in the event that the decreasing effect of Withdrawals outweighs the increasing effect of Conversions so that the share capital at the time the Merger is implemented is less than such amount, the redistribution of the share capital will be accompanied by a simultaneous capital increase for the purpose of the Merger to bring the share capital up to the above-mentioned minimum figure, apart from roundings serving to eliminate any resulting fractions of shares.

4.1.5 In the light of the method and principles described above, the share capital will be fixed and the share exchange carried out according to the following rules:

A) Olivetti will fix the nominal value of its shares – in the amount resulting after Conversions on the one hand and Withdrawals on the other – at Euro 0.55 (equal to the par value of Telecom Italia shares), in place of the current par value of Euro 1. Consequently, Olivetti's share capital will be divided into a larger number of shares. Such shares will be divided into ordinary shares and savings shares.

B) The new ordinary and savings shares with a par value of Euro 0.55 each making up the share capital at the time of the Merger of Olivetti will be redistributed, respectively, to the holders of Olivetti and Telecom Italia ordinary shares and the holders of Telecom Italia savings shares according to assignment ratios reflecting, with reference to the actual number of shares to be redistributed, the "natural" Exchange Ratio specified above of 7 Olivetti ordinary or savings shares for every Telecom Italia

ordinary or savings share. It should be noted in this respect that the Telecom Italia shares to be exchanged in the context of the redistribution with shares of the Company Resulting from the Merger with a new par value of Euro 0.55 each will naturally be the Telecom Italian shares held by persons other than Olivetti and Telecom Italia. The number of shares of the Company to be Absorbed held by minority shareholders and actually to be exchanged will therefore vary, depending on the outcome of the Offer that Olivetti may make after the shareholders' meeting called to approve the Merger and before the latter's completion.

More precisely, where:

No. OLI Euro 1 shares denotes the number of Euro 1 Olivetti shares resulting after Conversions and Withdrawals;

No. OLI Euro 0.55 shares denotes the number of new shares of the Company Resulting from the Merger with a par value of Euro 0.55 each actually to be redistributed following the operation referred to at point A;

No. T.I. shares denotes the number of Telecom Italia shares held by minority shareholders that must be exchanged;

(1) the holders of Olivetti ordinary shares will be assigned, for every share held, a number of ordinary shares of the Company Resulting from the Merger equal to:

$$\frac{\textbf{No. OLI Euro 0.55 shares}}{\textbf{No. OLI Euro 1 shares} + (\textbf{No. T.I. shares} \times 7)}$$

(2) the holders of Telecom Italia ordinary and savings shares will be assigned, for every ordinary or savings share held, a number of ordinary or savings shares of the Company Resulting from the Merger equal to:

seven times the number of shares assigned to Olivetti shareholders for every share held by the latter

C) Assuming the extreme case in which all the Conversions were carried out, all the shares reserved for the Telecom Italia stock-option plans were issued, no Withdrawals occurred and none of the holders of Telecom Italia ordinary and savings shares accepted the Offer, the redistribution would involve 21,684,904,142 shares of the Company Resulting from the Merger with a par value of Euro 0.55 each and the Telecom Italia shares to be exchanged would total 4,459,575,170 (taking account of Olivetti's holding in the capital of Telecom Italia and of the latter's holding of own shares at the date of this Report). In such case, applying the formula above would give the following assignment ratios:

(i) 0.502620 new ordinary shares of the Company Resulting from the Merger with a par value of Euro 0.55 each for every Olivetti ordinary share with a par value of Euro 1 held at the date at which the Merger becomes effective and for which the right of withdrawal has not been exercised;

(ii) 3.518341 new ordinary or savings shares of the Company Resulting from the Merger for every Telecom Italia ordinary or savings share, respectively, held at the date at which the Merger becomes effective by minority shareholders other than Olivetti and Telecom Italia itself.

D) In the light of the above, since the variables represented by Conversions, the exercise of Telecom Italia stock options, Withdrawals and acceptances of the Offer can only be quantified exactly at the time the Merger is implemented, it is evident that the assignment ratio for the purpose of redistribution can be established precisely only at the time the Merger becomes effective.

E) At all events, at the end of the Operation the ratio between the shares assigned to Olivetti shareholders and those assigned Telecom Italia shareholders will exactly reflect the "natural" Exchange Ratio (1/7) determined above.

F) As already indicated, if at the time the Merger is implemented the Absorbing Company's share capital is less than the current figure of Euro 8,845,537,520 because the decreasing effect of Withdrawals outweighs the increasing effect of Conversions, the redistribution of the share capital just described will be accompanied by the

simultaneous issue of up to a maximum of 11,103,237,962 new ordinary and saving shares of the Company Resulting from the Merger with a par value of Euro 0.55 each for the purpose of the share exchange, against the transfer to capital of the portion of Telecom Italia's shareholders' equity belonging to minority interests. These additional shares will be assigned to all the shareholders of both the Absorbing Company and the Company to be Absorbed in proportion to their respective shareholdings obtained by applying the assignment ratios indicated at Point B).

G) Thus, even in the event of such an occurrence, at the end of the Operation the ratio between the shares assigned to Olivetti shareholders and those assigned to Telecom Italia shareholders will exactly reflect the "natural" Exchange Ratio (1/7) determined above.

The foregoing is without prejudice to roundings made necessary by the exchange transactions. Olivetti International has announced that it stands ready to renounce such number of shares or fractions of shares as will be necessary to close out the operation.

H) As part of the procedure for assigning the shares of the Company Resulting from the Merger, a service will be provided to the minority shareholders of both Olivetti and Telecom Italia, through authorized intermediaries, to round the number of newly-issued shares owned down or up to nearest whole number, at market prices and at no cost in terms of expenses, stamp duty or commissions. In the event that the Olivetti shares held do not entitle the holder to receive, in accordance with the assignment mechanism, even one newly-issued Olivetti share at the end of the Operation, maintenance of the position of shareholder in the Absorbing Company will be ensured by Olivetti International S.A. making available to such persons, free of charge, one share of the Company Resulting from the Merger.

I) The newly-issued shares to be utilized for the share exchange will be assigned to those entitled by the respective authorized intermediaries participating in Monte Titoli S.p.A. at the date the Operation becomes effective. It will be possible to exchange Olivetti and Telecom shares which have not been dematerialized only by delivering them to an authorized intermediary for dematerialized book-entry in the central securities system.

J) Special notices, published in at least three newspapers with a national circulation (of which one must be a financial newspaper), will promptly announce the amount of the capital of the Company Resulting from the Merger at the time of the Merger as a result of the quantification of the variables involved in the Operation (Conversions, the exercise of Telecom Italia stock options, Withdrawals, acceptances of the Offer), the exact assignment ratio in the overall and final measure resulting from the outcome of the supplementary assignment described at Point F, if any, and the detailed instructions on how to carry out the share exchange and to trade or obtain fractional rights as provided for at Point H).

4.2 Date on which the Merger becomes effective

4.2.1 Pursuant to Articles 2504-*bis*, last paragraph, and 2501-*bis*, first paragraph, point 5, of the Civil Code, the newly-issued shares of the Company Resulting from the Merger will have regular dividend rights.

4.2.2 Pursuant to Article 2504-*bis*, second paragraph, of the Civil Code, the effects of the Merger, except for those referred to in Article 2501-*bis*, points 5 and 6, of the Civil Code, will become effective starting on the date of the last filing of the merger instrument, or from such later date as may be specified in that instrument.

Consequently, on that date the Absorbing Company will assume all the assets, rights and obligations of the Company to be Absorbed, including, but not limited to, all the tangible and intangible assets, expropriation procedures, licences, authorizations, concessions, public service franchises, plant, machinery, equipment, motor vehicles and in general movable goods entered in public registers, patents, intellectual property, securities, current account assets and liabilities, loans, bond issues, equity investments, insurance policies, labour contracts and every other contractual instrument.

5. Date on which transactions are to be recorded in the Absorbing Company's accounts

5.1.1 In accordance with the combined effects of Articles 2504-*bis*, last paragraph, and 2501-*bis*, point 6, of the Civil Code and Article 123(7) of Presidential Decree 917/1986, and in conformity with Point 6 of the Merger Plan, the transactions of the Absorbed Company will be recorded in the accounts of the Absorbing Company starting from 1 January of the year in which the Operation becomes effective and thus, according to the planned timetable, from 1 January 2003, for income tax purposes as well.

6. Tax effects of the Operation on the Absorbing Company's accounts

6.1. Direct taxes: regime of the Companies Participating in the Merger

6.1.1 For income tax purposes, pursuant to Article 123 of the Income Tax Code approved with Presidential Decree 917/1986 and to Article 27(1) of Law 724/1994, mergers are neutral and therefore do not consitute a realization or distribution of capital gains or losses in respect of the assets of the merged companies, including inventories and goodwill. In particular, with regard to the position of the Absorbing Company, it is to be noted that in principle merger differences are not included in income and are totally immaterial for tax purposes.

However, pursuant to Article 6(1) of Legislative Decree 358/1997 it is possible that the larger values stated in the accounts of the Absorbing Company as a consequence of the recording of cancellation or share exchange deficits may be recognized for tax purposes upon application thereto of the tax in lieu of income tax at the rate of 19%. Furthermore, pursuant to Article 6(2) of the same decree, such larger values stated in the accounts as a consequence of the recording of the cancellation deficit are considered to be recognized for tax purposes without any tax liability (that is, without application of the above-mentioned tax in lieu of income tax) if and to the extent that the equity interests cancelled have resulted in the previous holders paying tax on the capital gains, net of the related capital losses and writedown.

6.1.2 Pursuant to Article 123(4) of Presidential Decree 917/1986, Olivetti will reconstitute:

- the reserves with tax deferred in the latest financial statements of Telecom Italia;
- the reserves subject to tax if they are distributed (Article 123(4), second sentence) up to the amount of any share exchange surplus.

6.1.3 From the date on which the Merger becomes effective, Olivetti will succeed to Telecom Italia's obligations and rights relating to income tax. Since the Operation is to be retroactive to 1 January of the year in which the Operation becomes effective for accounting and tax purposes, there is no separate tax period between the closing date of the last fiscal year of the Company to be Absorbed and the date on which the Merger becomes effective.

6.2. Tax regime for the shareholders

6.2.1 For the shareholders, the exchange of the shares held in the Company to be Absorbed does not constitute a sale of such securities since it simply involves replacing the securities of the Company to be Absorbed (which will be cancelled as a result of the Merger) with securities of the Absorbing Company. Consequently, the cost of the equity investment in the Company to be Absorbed will be transferred to the shares issued by the received Absorbing Company received in exchange.

6.3. Indirect tax regime

6.3.1 For the purposes of indirect taxes, the Merger is a transaction excluded from the scope of V.A.T. pursuant to Article 2(3)(f) of Presidential Decree 633/1972, whereby transfers of assets in connection with corporate mergers are not considered sales material for V.A.T. purposes. Consequently, the merger instrument is subject to a registration fee of Euro 129.11 pursuant to Article 4(b) of the first part of the fee schedule annexed to Presidential Decree 131/1986.

7. Forecasts of the composition of the shareholders of the Company Resulting from the Merger

7.1 Telecom Italia shareholders

7.1.1 According to the company share register, supplemented by communications received and available information, at the date of this Report the following shareholders hold an interest of more than 2% in the capital represented by ordinary shares of the Company to be Absorbed:

	NUMBER OF ORDINARY SHARES HELD	% OF ORDINARY SHARE CAPITAL
Olivetti S.p.A.	2,891,656,682	54.94%

7.2 Olivetti shareholders

7.2.1 According to the company share register, supplemented by communications received and available information, the following shareholders hold an interest of than 2% of the capital represented by ordinary shares of the Absorbing Company:

	NUMBER OF ORDINARY SHARES HELD	% OF ORDINARY SHARE CAPITAL
Olimpia S.p.A.	2,524,127,813	28.54%
Caisse des Depots et Consignations	389,200,000	4.40%
Assicurazioni Generali S.p.A.	334,842,996	3.79%
Olivetti International S.A.	211,931,328	2.40%
Mediobanca S.p.A.	210,723,954	2.38%

* Investment held via CDC Ixis Capital Market.

** Investment held through subsidiaries.

*** Subsidiary of Olivetti S.p.A. Under Article 2359-*bis* of the Civil Code, the voting rights of the shares held by Olivetti International S.A. may not be exercised.

7.3 Effects of the Merger on the composition of shareholders

7.3.1 As already mentioned the shareholder structure of the Company Resulting from the Merger depends on the number of Conversions and Withdrawals and consequently on the sum devoted to the Offer and the number of acceptances thereof. The following table shows the foreseeable composition of shareholders with holdings of more than 2% in the Company Resulting from the Merger on the assumption: (i) that there are no Conversions (apart from those deriving from applications received by 31 March 2003, which are not yet reflected in Olivetti's share capital filed with the Company Register but are considered in this analysis) and that no Telecom Italia stock options have been exercised; (ii) that 25% of the shareholders other than Olimpia S.p.A. withdraw at a price taken to be equal to Euro 1 (which is in line with the average of the official prices recorded from 26 November 2002 up to today), giving a total outlay of about Euro 1,527 million; and (iii) that the Offer is made at prices between the minimum and maximum prices for the Telecom Italia ordinary and savings shares (i.e. Euro 7.7 per ordinary share and Euro 5.175 per savings share), giving a total outlay of Euro 7,473 million, so that the Offer covers about 14.6% of the ordinary and savings shares in the event of full acceptance.

	NUMBER OF ORDINARY SHARES HELD	% OF ORDINARY SHARE CAPITAL
Olimpia S.p.A.	1,336,092,044	13.65%
Caisse des Depots et Consignations	296,014,537	2.10%

* Investment held via CDC Ixis Capital Market.

It is foreseeable that no single shareholder will have control of the Company Resulting from the Merger, which, as mentioned earlier, will be fully contestable.

8. Effects of the merger on shareholders agreements (Article 122 of Legislative Decree 58/1998) regarding the shares of the Companies Participating in the Merger

The participants in the shareholders agreements falling within the scope of Article 122 of Legislative Decree 58/1998 for the Companies Participating in the Merger have not sent any notifications concerning possible effects of the Merger on such agreements.

9. Changes to bylaws

9.1 Olivetti's bylaws and changes deriving from the Merger

9.1.1 For the purpose of the Merger, Olivetti will amend its bylaws, basically adopting the current bylaws of Telecom Italia. In particular:

(i) Olivetti will change its name to "Telecom Italia S.p.A." and adopt Telecom Italia's current corporate purpose in its entirety;

(ii) the article of the bylaws concerning the share capital will incorporate the changes concerning the number, par value and class of the shares into which the share capital of the Company Resulting from the Merger will be divided as a result of the Merger on the basis of the assignment procedure described in Section 4. In particular, account is taken of the change in the par value of the shares from Euro 1 to Euro 0.55 and the amount of the capital increases already approved by Olivetti for the purpose of the convertible bond issues, stock-option plans and warrants consequently adjusted, with account also taken of the Exchange Ratio and assignment procedure described in Section 4. Lastly, the amendments are included that are necessary to ensure the assumption by the Company Resulting from the Merger of the commitments under the stock-option plans of the Company to be Absorbed, for the part still applicable. Section 9.12 illustrates the provisions that will be included in the article of the bylaws concerning the share capital with reference to the capital increases for the stock-option plans of the Company to be Absorbed;

(iii) a specific article will concern the savings shares that will be assigned to the holders of Telecom Italia savings shares on the basis of the exchange ratio and assignment procedure described

earlier. In accordance with Article 145 of the Consolidated Law, this article will specify the substance of the preferential rights attaching to the savings shares issued for the purpose of the exchange, the related conditions, limits and procedures for the exercise thereof and describe the legal treatment of this class of shares in the event of the delisting of the ordinary or savings shares of the Company Resulting from the Merger. The preferential rights of the savings shares to be issued in exchange will be the same as those of the Telecom Italia savings shares, including the possibility of satisfying the rights attaching to them by distributing reserves, whose introduction in the Telecom Italia bylaws will be proposed at the shareholders' meeting called to consider the Merger Plan.

9.1.2 As regards the clauses of Telecom Italia's bylaws that give the Minister for the Economy and Finance some special powers, to be exercised in agreement with the Minister for Productive Activities, in application of Article 2 of Law 474/1994, it should be noted that such powers include the right to veto the adoption of merger resolutions and amendments to the bylaws that would suppress or alter such powers, which were introduced into Telecom Italia's bylaws under a Prime Ministerial Decree of 21 March 1997 in the light of the sector of the company's operations (telecommunications) and with a view to its privatization.

At the end of the meeting of its Board of Directors on 11 March 2003, Telecom Italia requested the Minister for the Economy and Finance to indicate whether he intended to exercise the powers in question.

The Minister for the Economy and Finance subsequently informed Telecom Italia that he did not consider the conditions existed for the exercise of the power of veto with respect to the adoption by Telecom Italia's shareholders' meeting of the merger resolution. By contrast, as regards the question of the presence in the bylaws of the clauses giving the special powers, the Minister for the Economy and Finance indicated that he considered it necessary to maintain the power of expressing a favourable opinion on the acquisition of major shareholdings in the company's capital and the power of veto as set out in the current bylaws of Telecom Italia.

The Minister for the Economy and Finance also stated that he had reached agreement with the Minister for Productive Activities on the indications regarding these questions.

With this premise, and pending the formalization of the measure best suited to the foregoing indications and any opinion the competent Community authorities might express on the matter, the Minister for the

Economy and Finance requested that the bylaws to be submitted to the shareholders' meetings of the Companies Participating in the Merger conform with the indications set out above.

9.1.3 The shareholders' meeting of the Absorbing Company called to approve the Merger Plan will be required, in relation to what was just said, not only to update the resolutions adopted to increase the capital for the exercise of the rights attaching to the "Warrant azioni ordinarie Olivetti ex Tecnost 1999-2004" warrants and the "Olivetti 1,5% 2001-2004 convertibile con premio al rimborso" and "Olivetti 1,5% 2001-2010 convertibile con premio al rimborso" convertible bonds and for the exercise of the Olivetti stock options, but also to approve increases in capital for the stock options issued by Telecom Italia that have not yet been exercised.

To this end, the Company Resulting from the Merger will approve corresponding increases in capital permitting the issue in relation to such stock options of a number of shares updated in accordance with the Exchange Ratio and the assignment ratio provided for in the Merger Plan, while the exercise price of the option with respect to the total number of shares updated as indicated above will remain unchanged. In other words, the owner of Telecom Italia stock options will maintain the right to subscribe, at the price already fixed, not for the original number of Telecom Italia shares but the larger number established on the basis of the assignment ratio as defined in Section 4.

In this case as well it will only be possible to calculate the exact numbers of shares that can be subscribed when the final assignment ratio is established at the time of the merger.

More precisely, with reference to Telecom Italia's stock options, the Absorbing Company will approve an increase in capital divided into the following tranches, all of which will be variable up to a maximum amount:

1. a tranche for the exercise of the 8,471,500 options already assigned by the Company to be Absorbed under the "Piano di Stock Option 1999" stock-option plan, to be implemented not later than 31 January 2005 by the issue of ordinary shares with a par value of Euro 0.55 each, which will be reserved for the holders of the above-mentioned options on the basis of the assignment ratio envisaged for the shareholders of the Company to be Absorbed in the Merger, at a price of Euro 6.79 for each option held;

2. a tranche for the exercise of the 20,600,000 options already assigned by the Company to be Absorbed under the "Piano di

Stock Option 2000" stock-option plan, to be implemented not later than 30 July 2008 by the issue of ordinary shares with a par value of Euro 0.55 each, which will be reserved for the holders of the above-mentioned options on the basis of the assignment ratio envisaged for the shareholders of the Company to be Absorbed in the Merger, at a price of Euro 13.815 for each option held;

3. a tranche for the exercise of the 32,452,500 options already assigned by the Company to be Absorbed under the "Piano di Stock Option 2001" stock-option plan, to be implemented not later than 30 April 2008 by the issue of ordinary shares with a par value of Euro 0.55 each, which will be reserved for the holders of the above-mentioned options on the basis of the assignment ratio envisaged for the shareholders of the Company to be Absorbed in the Merger, at a price of Euro 10.488 for each option held;

4. a tranche for the exercise of the 11,800,000 options already assigned by the Company to be Absorbed under the "Piano di Stock Option Top 2002" stock-option plan, to be implemented not later than 28 February 2010 by the issue of ordinary shares with a par value of Euro 0.55 each, which will be reserved for the holders of the above-mentioned options on the basis of the assignment ratio envisaged for the shareholders of the Company to be Absorbed in the Merger, at a price of Euro 9.203 for each option held;

5. a tranche for the exercise of the 27,689,000 options already assigned by the Company to be Absorbed in three distinct lots under the "Piano di Stock Option 2002" stock-option plan, to be implemented not later for the three lots than 31 March 2008, 31 March 2009 and 31 March 2010 respectively by the issue of ordinary shares with a par value of Euro 0.55 each, which will be reserved for the holders of the above-mentioned options on the basis of the assignment ratio envisaged for the shareholders of the Company to be Absorbed in the Merger, at a price for the three lots of Euro 9.665, Euro 7.952 and Euro 7.721 respectively for each option held.

9.1.4 As mentioned earlier, the amendment of the Absorbing Company's corporate purpose is necessary in order to allow the Company Resulting from the Merger to continue all the activities currently performed by Telecom Italia, and particularly those performed on the basis of specific administrative measures.

In another respect, it is necessary to clarify that at the completion of the Merger the Company resulting from the Merger will be able to engage in

other activities, such as *"[...] publishing [and] advertising [...]"*, which are not envisaged by Olivetti's current corporate purpose.

Again with a view to not prejudicing the succession by the Company Resulting from the Merger to the activities of Telecom Italia, and especially to those performed on the basis of specific administrative measures, it was considered advisable to include in the corporate purpose the provision that *"the acquisition [...] of equity interests in other companies or enterprises engaged in activities falling within the scope of the corporate purpose or related, complementary or similar thereto [...]"* may be performed *"provided it is not the Company's principal activity"*. Consequently, Olivetti will cease to be a holding company and will become a company operating principally in the sector of telecommunications services.

10. Evaluation of recourse to the right of withdrawal (Article 131 of Consolidated Law and Article 2437 of the Civil Code) for Telecom Italia shareholders

10.1 Evaluation on the basis of Article 131 of the Consolidated Law

10.1.1 The Absorbing Company is listed, inter alia, on Borsa Italiana's MTA electronic share market and will remain so at the completion of the Merger. Moreover, provision has been made for the Operation to be subject to the listing of the savings shares to be offered in exchange to holders of Telecom Italia savings shares at the date the Merger becomes effective.

Thus, there are no legal grounds for the exercise of the right of withdrawal provided for by Article 131 of the Consolidated Law.

10.2 Evaluation on the basis of Article 2437 of the Civil Code

10.2.1 As explained earlier, as a result of the Merger Olivetti will change its corporate purpose by adopting the current corporate purpose of Telecom Italia.

10.2.2 Consequently, Telecom Italia shareholders will not be entitled to exercise the right of withdrawal provided for by Article 2437 of the Civil Code. By contrast, this right can be exercised by the Olivetti shareholders who are absent or contrary to the approval of the Merger Plan. More precisely, Olivetti shareholders who vote against the plan in the shareholders' meeting will be able to exercise the right of withdrawal within 3 days of the date of the meeting, while those absent will be able

to exercise it within 15 days of the date the resolution is filed with the Company Register. Withdrawal will be exercisable only by those who are Olivetti shareholders at the date on which the Olivetti shareholders' meeting approves the Merger Plan.

* * * * *

Milan, 15 April 2003

TELECOM ITALIA S.p.A.

For the Board of Directors

The meeting of ordinary shareholders of Telecom Italia S.p.A.,

- having seen the plan for the merger of Telecom Italia S.p.A. into Olivetti S.p.A., entered respectively in the Turin Company Register and the Milan Company Register on April 18 and 22, 2003 (the Merger Plan);
- having examined the Directors' report on the merger operation (the Merger);
- having taken note of the balance sheets of the companies participating in the Merger, as shown in their draft financial statements for the year ended 31 December 2002;
- having taken note of the reports on the congruousness of the merger exchange ratio prepared by the auditing firms Deloitte & Touche Italia S.p.A. for Olivetti and Reconta Ernst & Young S.p.A. for Telecom Italia;
- having taken note of the timely filing of the documentation required under the applicable law;

resolves

1. to approve the Merger Plan and consequently to proceed - with the accounting and tax effects starting on 1 January of the year in which the Merger becomes effective in respect of third parties, as provided for in the Merger Plan - with the merger of Telecom Italia S.p.A. into Olivetti S.p.A. (the Absorbing Company) on the basis of the following exchange ratio:
   - 7 Olivetti ordinary shares with a par value of Euro 1 (one) for every Telecom Italia ordinary share with a par value of Euro 0.55 each;
   - 7 Olivetti savings shares with a par value of Euro 1 (one) for every Telecom Italia savings share with a par value of Euro 0.55 each;

   with the effectiveness of the whole operation subject (i) to the adoption by the shareholders' meeting of Olivetti of a like resolution and (ii) to the admission to listing on the MTA electronic share market operated by Borsa Italiana S.p.A. of the savings shares to be issued by the Absorbing Company, taking note that the Olivetti shares with a par value of Euro 1 each (net of those for which the right of withdrawal has been exercised) will be withdrawn and that new ordinary and savings shares will be issued with a par value of Euro 0.55 each and regular dividend entitlement, in the number resulting from their assignment to Olivetti shareholders and Telecom Italia shareholders other than Olivetti in accordance with the following criteria:

   A. satisfaction of the exchange ratio between the economic values underlying the Olivetti and Telecom Italia shares by redistributing Olivetti's capital at the time of the implementation of the Merger, net of the Olivetti shares with a par value of Euro 1 (one) for which the right of withdrawal has been exercised, subsequent to the change in the par

value of the shares of the Absorbing Company from Euro 1 to Euro 0.55, and thus by applying the following assignment ratios:

- for every Olivetti share (with a par value of Euro 1) withdrawn and cancelled, assignment of "x" newly-issued ordinary shares of the Absorbing Company (with a par value of Euro 0.55 each);
- for every Telecom Italia ordinary share (with a par value of Euro 0.55) withdrawn and cancelled, assignment of "7x" newly-issued ordinary shares of the Absorbing Company (with a par value of Euro 0.55 each);
- for every Telecom Italia savings share (with a par value of Euro 0.55) withdrawn and cancelled, assignment of "7x" newly-issued savings shares of the Absorbing Company (with a par value of Euro 0.55 each);

where the number "x" is the ratio between

- ✓ the total number of shares of the Absorbing Company with a par value of Euro 0.55 each to be redistributed and
- ✓ the sum of (i) the total number of Olivetti shares with a par value of Euro 1 outstanding (for which the right of withdrawal has not been exercised) at the time of the implementation of the Merger and (ii) 7 times the total number of Telecom Italia shares to be exchanged at the time of the implementation of the Merger;

B. assignment, if necessary, to all the holders of the Absorbing Company's ordinary and savings shares, in proportion to their respective holdings following the redistribution and therefore on the basis of the above-mentioned exchange ratio, of up to a maximum of 11,103,237,961 new shares, of the same class as the shares already assigned under the redistribution, with a par value of Euro 0.55 each (and thus up to a total maximum amount of Euro 6,106,780,879.10) until the share capital of the Absorbing Company reaches a total of Euro 8,845,537,520.05.

A service will be provided to shareholders to handle any fractions of shares, without prejudice to any rounding deriving from the aforesaid assignment operations;

2. to grant severally to the Chairman, the Deputy Chairman and each of the Managing Directors the powers needed:
   (a) to complete all the formalities required for the resolutions adopted to obtain all the necessary authorizations, with the right to approve and introduce into such resolutions, the Merger Plan and the Bylaws of the Absorbing Company annexed thereto any amendments, additions or deletions that may be requested or suggested by administrative authorities and/or following the exercise of the special powers referred to in Article 5 of the bylaws of Telecom Italia S.p.A. or on the occasion of filings with the Company Register;

(b) to draw up and sign, *inter alia* by having ad hoc recourse to attorneys or agents, in conformity with the resolution of point 1, the public merger instrument, defining every agreement, condition, clause, time limit and procedure thereof in conformity with and in implementation of the Merger Plan;

(c) to do - *inter alia* by having ad hoc recourse to attorneys or agents - whatever else may be necessary for and conducive to the complete implementation of the foregoing resolutions, authorizing entries, transcriptions, annotations, amendments and corrections in public registers and every other competent seat.

Directors' Report on Operations

EVOLUTION OF THE OLIVETTI GROUP IN 2002

2002 opened with the presentation by the Olivetti/Telecom Italia Group of the 2002-2004 Strategic Plan, which was approved by the Board of Directors on 13 February 2002.
The guidelines for the three-year period 2002-2004 are a stronger focus on core businesses, development of market leadership positions through a customer-oriented strategy, enhancement of the products and services portfolio by leveraging Group assets and investing in technological innovation, competencies and skills.
Financial strategy goals through 2004 are strong cash generation and a sharp reduction in debt, while maintaining the Telecom Italia dividend policy and without penalising investments. Investments for the three years will amount to approximately 16 billion euros, and be divided between wireline and mobile network services, with specific attention to innovation: X-DSL, data services, fibre and, a top priority, development of broadband services for the wireline network; GPRS, UMTS, VAS on the mobile network.

During 2002 the Group pursued the targets set in the 2002-2004 industrial plan, in part by continuing the disposals programme introduced in the last quarter of 2001 to strengthen the focus on core businesses and improve the Group's financial position. This programme, which also envisages a select number of acquisitions, enabled the Group to reach the target set by the Plan of disposals for 5 billion euros a year earlier than expected:

- in February Olivetti and Finsiel accepted the public tender offer on Lottomatica launched by Tyche S.p.A. (De Agostini Group) on 23 November 2001 and tendered a combined stake of 34% of share capital to raise proceeds totalling 391 million euros; Tim International sold its equity investment in BDT (19.61%), the parent company of French operator Bouygues Télécom, raising proceeds of 750 million euros;
- in July Finsiel closed the sale of Sogei to the Fiscal Policies Department of the Ministry of the Economy and Finance, which had an impact of 176 million euros on the Telecom Italia Group's net financial indebtedness;
- August saw the closing of the sale of the Telecom Italia Group's equity investment in AUNA to Endesa, Union Fenosa and Banco Santander Central Hispano, which had originally been scheduled for December. The transaction raised proceeds of 1,998 million euros for the Telecom Italia Group and contributed 1,033 million euros to the Telecom Italia Group's consolidated net earnings. Also in August, the Telecom Italia Group closed the sale of Telemaco Immobiliare to Mirtus, a company indirectly held by the US property fund Whitehall, promoted by the Goldman Sachs Group, generating proceeds of 192 million euros and a net capital gain of 64 million euros; additionally, Telecom Italia signed an agreement with Finmeccanica for the sale of Telespazio (which was subsequently executed in November), with a positive impact on Telecom Italia Group debt of 239 million euros and a consolidated net capital gain of 36 million euros;
- in October, Telecom Italia reached an agreement with News Corporation to create a single Italian pay-TV company (a single platform) through the merger of Stream and Tele+; also in October TIM closed the preliminary contract signed on 7 August with the shareholders of Blu S.p.A. for the purchase of 100% of Blu, which was subsequently merged in TIM S.p.A. with effect from 23 December 2002. The final price was 83 million euros;

JJ 00137

- in November Telecom Italia International N.V. organised a placement of 75 million shares of Telekom Austria AG stock (repre senting 15% of capital). As a result of this operation, the Telecom Italia Group's stake in Telekom Austria decreased from 29.78% to 14.78%. Also in November, Telecom Italia sold its equity investment in IMMSI to the "Omniapartecipazioni" company for 68 million euros;
- in December Telecom Italia signed an agreement with Accenture for the sale of 100% of TE.SS – Tele Pay Roll Services, which handles payroll operations for the Telecom Italia Group. The selling price was approximately 10 million euros. Also in December Telecom Italia accepted an offer from PTT Serbia for the purchase of 29% of Telekom Srbija for 195 million euros, equivalent to the book value in Telecom Italia International, and spun off the "International Wholesale Services" business unit to the Telecom Italia Sparkle company (ex TMI - Telemedia International Italia), to which it also transferred its equity investments in PAN European Backbone and Telecom Italia of North America.

A key event in the disposals programme in 2002 was "Project Tiglio", a frame agreement between the Pirelli and Olivetti-Telecom Italia Groups for the integration and enhancement of the real-estate assets and property services providers of the companies involved in the project. Under the agreement, buildings, land and personnel involved in asset management were transferred by Olivetti, Telecom Italia and Seat Pagine Gialle to two newly established companies and subsequently to a closed-end real estate fund.
As envisaged by Project Tiglio, the Olivetti-Telecom Italia Group spun off real-estate operations and assets for an overall value of 1,585 million euros to Tiglio I and Tiglio II, two property companies controlled by The Morgan Stanley Real Estate Funds. The Olivetti Group retains an overall minority share in the two companies.
The operation brought Olivetti S.p.A. a gross capital gain of approximately 72 million euros and a net cash inflow of 165 million euros on an aggregate transferred-asset value of 225 million euros. The positive financial impact for the Telecom talia Group was 328 million euros, against an aggregate transferred-asset value of 1,360 million euros.
Additionally, the Olivetti Multiservices and Telecom Italia real-estate business units were spun off to the Pirelli & C. Real Estate Group, an operation involving the transfer of approximately 170 people to the Pirelli Group. The overall price was 18 million euros: 15 million euros relating to Telecom Italia and 3 million euros relating to Olivetti Multiservices.

2002 was also a year of intense financial activity, mainly for the purpose of re-financing existing debt by extending overall maturity. A key event was the issue by Telecom Italia in the first half of a 2.5 billion euro dual-tranche fixed rate bond (maturing in five and ten years), as part of the Group's "Global Note Programme".
An important operation at Olivetti was the placement of a 1.5 billion euro multi-tranche benchmark bond, divided into a 5-year tranche for 1,000 million euros and a 10-year tranche for 500 million euros by the subsidiary Olivetti Finance. This company also decided to call in the "Olivetti Finance N.V. 1999-2004" bond two years ahead of the original maturity date in 2004, for an amount equivalent to the nominal amount plus accrued interest. Both operations are part of the Olivetti Group's re-financing and debt-maturity extension plan.

JJ 00138

Financial operations intensified in the second half of the year. In July and August, Olivetti Finance N.V. launched and successfully placed a 385 million euro bond exchangeable for Telecom Italia ordinary shares, maturing on 19 March 2004. The bonds have a per-share conversion price of 9.30 euros, and correspond to 41,400,000 Telecom Italia ordinary shares (0.79% of capital).
In September Olivetti successfully re-opened three bonds, for an aggregate amount of 1,550 million euros, subdivided into three tranches:

- 400 million euros, raising the "Olivetti Finance N.V. floating-rate 2002-2006" bond to 1,000 million euros;
- 650 million euros, raising the "Olivetti Finance N.V. 6.5% 2002-2007" bond to 1,650 million euros;
- 500 million euros, raising the "Olivetti Finance N.V. 7.25% 2002-2012" bond to 1,000 million euros.

These operations raised the average life of Olivetti debt to 5.5 years (4.8 years in February 2002), with medium/long-term debt accounting for 93% of the total amount.
As part of its re-financing plans, Olivetti also undertook extensive buy-backs of its own securities on the market and consequently cancelled the following:

- "Olivetti S.p.A. Eonia linked notes 2001-2003" for 400 million euros; the issue was extinguished as a result;
- "Olivetti Finance NV 1% 2000-2005" notes exchangeable for Telecom Italia ordinary shares for 1,235 million euros, reducing the loan to 765 million euros;
- "Olivetti Finance NV 5,375% 1999-2004" notes for 750 million euros, reducing the loan to 4,200 million euros.

During 2002, as authorised by the Shareholders' Meeting of 7 November 2001, Telecom Italia S.p.A. commenced a share buy-back on the market for a total outlay of 287 million euros, of which 247 million euros for savings shares.
In December, the Telecom Italia and TIM Shareholders' Meetings approved early pay-out of part of the 2002 dividend from reserves, for a maximum amount of 1 billion euros and 1.6 billion euros respectively, for a dividend to Telecom Italia and TIM shareholders of 0.1357 euros and 0.1865 euros, respectively, per each ordinary and savings share. Payment took place on 19 December.

In 2002 all the Olivetti/Telecom Italia Group companies extended their Corporate Governance codes, well ahead of legal and regulatory requirements and recommendations.
In July a series of principles governing dealings with related parties (directors, statutory auditors, infragroup operations) was approved to guarantee correct and transparent procedures and conduct and at the same time ensure the full joint responsibility of all members of the Board of Directors with regard to resolutions adopted by the Board. The companies also adopted a Code of Conduct with regard to insider dealing drawn up in compliance with the recent directives of Borsa Italiana (Italian Stock Exchange), which requires regular disclosure of transactions on Olivetti and subsidiary securities by parties with access to price-sensitive information. The new Code, which took effect on 1 December 2002, is particularly flexible in identifying parties subject to the disclosure requirement and extends this requirement to security transactions by the controlling companies. It also brings down the quantitative thresholds regulating quarterly disclosure of transactions. Furthermore, the Code envisages a stringent system of penalties, which, in the most serious cases, provides for termination for just cause of Directors and Statutory Auditors.

JJ 00139

GROUP ACTIVITIES

The Olivetti Group's main activities are in the telecommunications sector, through Telecom Italia S.p.A. (owned 54.9% by Olivetti S.p.A.) and its subsidiaries (Telecom Italia Group).

Olivetti is also active in other industrial sectors, such as office and Internet products and services and facility management services.

Financial highlights by business sector for financial 2002 are set out below.

(in millions of euros)	OLIVETTI S.p.A.	Finance companies	Telecom Italia Group	Olivetti Tecnost Group	Olivetti Multi-services	Webegg Group (*)	Consol. adjust.	Total Group

JJ 00140

The Telecom Italia Group

In 2002 the Telecom Italia Group was principally active in the wireline telephony and mobile telephony sectors through, respectively, the Domestic Wireline Business Unit of Telecom Italia S.p.A. and the subsidiary TIM S.p.A. The Telecom Italia Group was also active in the Internet and Media sector through the Seat Pagine Gialle Group, in the information technology sector through the Market IT and Group IT Business Units, and in Other Activities, which mainly comprise the "Real Estate and General Services" Division, the Central Overseas Companies Function and the Telespazio Group (sold in November 2002). The International Operations Division was dismantled in May 2002 and the relevant companies and Telecom Italia business units were re-organised, without changes to the corporate control structure, under the Domestic Wireline Business Unit (Intelcom San Marino and Golden Lines) and the Central Overseas Companies Function (9Télécom Group, BBNed Group, AUNA Group, Telekom Austria Group, Telekom Srbija, Etec S.A., and the residual branch of the ex IOP unit); all the companies in the Latin American area were re-organised under Latin America Operations (LAO).

JJ 00141

Domestic Wireline

Revenues from sales and services decreased by 0.9% from the previous year (a decrease of 146 million euros), which was significantly smaller than the reduction reported in 2001 (-1.4% compared with 2000). The decrease in traffic revenues (down 533 million euros) and slowdowns in other items (sales and other revenues) were largely offset by the increase in standing charges and contributions (up 539 million euros). Specifically, the reduction in the average traffic yield (-8.3%) was offset in part by the rise in minutes (up 2.4%) as a result of the following:

- the success of commercial offers (mainly Teleconomy and Alice) offering lower call rates to boost customer retention, against a standing charge;
- changes to rates on 1 July 2001 and 1 February 2002, which cut the prices of domestic and international calls and increased standing charges;
- competitive conditions;
- the substantial increase in traffic carried on behalf of other operators.

The *gross operating margin* showed a significant increase from 2001 (up 2.8%), which was amplified by the *operating result* (up 7.8%), thanks to the action taken as from 2001 to contain costs and improve the efficiency of invested capital.

Capital expenditure decreased by 12.1% from 2001 due to careful selection of investments that ensure a combination of efficiency and technological growth.

Mobile Services

Revenues from sales and services in 2002 amounted to 10,867 million euros with an increase of 617 million euros (up 6% from 2001), despite the impact of currency devaluation in Brazil and Venezuela. Excluding the exchange rate effect, the revenue increase compared with 2001 was 11.9%. Revenue growth arose mainly in Italy (up 6.7%).
The Tim Brazil Group reported revenues of 39 million euros on the GSM service introduced in the fourth quarter of 2002.

The *gross operating margin* for 2002 rose by 279 million euros to 5,039 million euros (up 5.9% from 2001), giving a return on revenues of 46.4% (as in 2001). Excluding the exchange rate effect, gross operating margin growth against the previous year was 8.6%, due largely to positive performance at TIM S.p.A. (up 304 million euros) and Stet Hellas (up 67 million euros) and the improvement in the albeit still negative margin at TIM Peru (up 26 million euros).

The *operating result* for 2002 was 3,358 million euros, an increase of 222 million euros (up 7.1% from 2001), giving a return on revenues of 30.9% (30.6% in 2001). The operating result improvement was largely attributable to the positive results posted by TIM S.p.A. (up 213 million euros) and Stet Hellas (up 42 million ēūros), which offset the downturn in the operating result of the TIM Brasil Group (45 million euros) after start-up charges.
Since the 2002 book values of TIM S.p.A. include the full-year financial and business results of the former Blu S.p.A., the effects of transactions prior to the acquisition date were eliminated from the TIM S.p.A. income statement during consolidation. TIM S.p.A. financial statements were also re-stated to exclude tax postings relating to amortisation of the UMTS licence.

Capital expenditure for 2002 amounted to 1,715 million euros, with a decrease of 1,436 million euros

JJ 00142

compared with 2001, when the business unit invested heavily in telecommunications licences and in the start-up and development of international investee companies.

South America

Revenues from sales and services amounted to 1,409 million euros, a reduction of 81% (down 125 million euros in absolute value) compared with 2001; the decrease was largely due to the exchange rate effect, which had an overall negative impact of 212 million euros (182 million euros for the Chilean Peso and 29 million euros for the Boliviano). Excluding this effect, consolidated revenues rose by 5.7%, reflecting growth at the Entel Chile Group (up 12.3% in local currency) offset by the effects of market deregulation in Bolivia (the Entel Bolivia Group reported a revenue reduction of approximately 4.5% stated in local currency) and the suspension as from 1 April 2002 of the management fee agreement with Telecom Argentina.

The above trends affected earnings performance, Specifically, the gross operating margin decreased by 77 million euros (down 14.6%) from 2001, of which approximately 65 million euros was due largely to the exchange rate effect. Excluding this effect, the gross operating margin decreased by 2.3% against 2001, reflecting the suspension of the management fee from Telecom Argentina and the loss of profitability in Bolivia, set against a recovery in Chile, which increased profitability in the mobile business. The gross operating margin ratio to revenues was 31.9% in 2002 (against 34.4% in 2001).
The *operating result* confirmed the trends reported for the gross operating margin; the operating result ratio to revenues was 10.4% in 2002 (against 12.2% in 2001).

Capital expenditure decreased by 46.8% compared with 2001.

Internet and Media

Consolidated *revenues* for 2002 totalled 1,991 million euros, rising by 1.7% from 2001. The strongest contribution to growth came from telephone publishing, where revenues rose by 3.4%.

Gross operating margin grew by 33.6% to 593 million euros (a return on revenues of 29.8%), while the *operating esult* rose from 31 million euros in 2001 to 232 million euros in 2002. These results – achieved despite the persisting crisis on the advertising market – were achieved as a result of management action to rationalise operations, contain costs and focus on selected initiatives. Significant efficiency gains were achieved in 2002 in the Internet, Directories and Directory Assistance areas (which together account for 73% of aggregate revenues). For the first time, all activities reported a positive gross operating margin (with the sole exception of Television, although the area successfully reduced its losses from 2001).

The unit's more efficient capital allocation policy generated a 53.7% reduction in *capital expenditure* (from 175 million euros in 2001 to 81 million euros in 2002).

Market IT

Revenues from sales and services decreased by 48 million euros from the previous year on a consistent comparable basis, largely as a result of lower revenues at Finsiel, Consiel and Banksiel due to lower sales volumes and the general price reduction on sales to large accounts, offset by higher revenues at Intersiel and Insiel due to increased activity with core clients and acquisition of new clients on the Local Government market.

JJ 00143

The *gross operating margin* and the *operating result* decreased due to the price reductions on a number of contracts renewed during the year and to new contracts with lower fees, which were only partly offset by cost reductions and improved efficiency. The decrease was largely due to lower profit margins at *Finsiel*, *Consiel*, and on outsourcing activities at *Tele Sistemi Ferroviari* for the companies in the Italian State Railways Group.

Capital expenditure was substantially unchanged from the previous year.

Group IT

Consolidated *revenues* were largely stable, despite the effect of price reductions.
The *gross operating margin* and the *operating margin* reflected these reductions and decreased compared with 2001.
Capital expenditure was largely in line with 2001; 2002 *investments in goodwill* refer to purchase of a controlling stake in Webegg.

Real Estate and General Services (Other Activities)

In 2002 revenues from sales and services totalled 846 million euros, a decrease of 107 million euros from the previous year. This was largely due to the reduction in revenues from the other Telecom Italia Business Units and Functions as a result of space-re-organisation policies and the alignment of prices with improved market conditions. Operating costs decreased by 51 million euros from 2001, thanks to reduced spending on materials and external services and a reduction in payroll costs following a significant reduction in the headcount during the year; these effects offset in part the downturn in revenues, thus mitigating the decrease in the gross operating margin compared with the previous year.

The operating result, after depreciation and amortisation charges, provisions to the reserve for risks and charges and sundry charges (mainly taxes on own property), was negative, at 92 million euros (loss of 65 million euros in 2001).

JJ 00144

Other sectors directly controlled by Olivetti S.p.A.

Products, IT services and specialised systems: Olivetti Tecnost

The Olivetti Tecnost Group is active in office products and solutions (Office Products, Olivetti Advalia) and specialised applications for banking, retail and gaming automation (Vertical Division).
The Group operates on the main international geographical markets (which account for 68% of its aggregate revenues). While its primary focus is Europe (29%), Asia (12%) and Latin America (15%), it is also active in the consumer business in North America (11%) through the subsidiary Royal Consumer Information Product Inc.

In June, Olivetti Tecnost presented an industrial plan to the Trade Unions (fully illustrated in the 2002 Half-Year Report) which aims to return the Group to profitability through a series of business-specific measures.
The uncertain business climate existing before the presentation of the industrial plan had a negative impact on the year's results: revenues for the Olivetti Tecnost Group for financial 2002 amounted to 914 million euros (including 906 million euros from customers outside the Olivetti Group), a decrease of 16.7% from 2001(down 12.7% net of the exchange rate effect). Revenues comprised 588 million euros for hardware products, 154 million euros for supplies, 73 million euros for services and 99 million euros of other revenues.

In the Office sector covered by **Olivetti Advalia**, third-party revenues fell sharply (down 19%) due to the decision to curtail operations on the PC market and to the expected slowdown in fiscal cash register sales following the changeover to the euro.
With regard to other products, the ink-jet fax and MFP businesses (products and supplies) were stable and the copier business (products and supplies) expanded, with a marked shift in the product mix towards digital copiers and medium/high-end products.
In the first half of 2002 Olivetti Tecnost was awarded a contract by Consip, a company owned by the Italian Ministry of the Economy which draws up conventions with equipment and service suppliers for the public authorities, to supply 3000 digital photocopiers on a rental basis.
In the second half, Olivetti Tecnost introduced new laser printers and colour copiers to complete its offer for the professional channel and business users, renewed its laser and ink-jet fax range and expanded its digital copier offer.

2002 third-party revenues in the **Vertical Division** decreased from the previous year (down 11.6%), largely as a result of the second-half slowdown in sales to China at the Industrial Partnership division.
Gaming revenues, on a comparable basis, decreased compared with 2001 (down 5.7%) with a shift in the hardware/services mix towards hardware, reflecting the impact of the new contract to supply Lottomatica with M370 terminals and specialised printers.
As part of the diversification strategy, new initiatives were developed in the gaming sector, especially overseas, which open up excellent prospects for 2003: in Tunisia (contract with the Sport Commission to supply a turnkey solution for automation of the local football pools system), Peru (football pools automation, with supply of 1,500 terminals, of which 150 were delivered in 2002), India and China (with the launch of the new M380 family, which is expected to bring good results).
Revenues in the *banking and retail* sector were stable, confirming the importance of Tecnost Sistemi's products as the reference offer on the world market (PR2, PR2 Enhanced, PR4 for retail); the increase in revenues in Europe was offset by a decrease in China, where the PR2 E printer nevertheless continues to maintain an 80% market share.

JJ 00145

In the *special products* sector, revenues more than doubled in 2002, mainly as a result of the supply of TP Label automatic weighing and franking machines to the Italian Post Office.
In the *shop automation sector,* the new Net Shop initiative proceeded. Net Shop offers services for SMBs in the retail business.

***

After taxes and minority interests, the Olivetti Tecnost Group posted a net loss for Olivetti consolidation purposes of 87.1 million euros for financial 2002 (a loss of 54.7 million euros in 2001), after taking a net non-recurring charge of 76.5 million euros relating to the corporate restructuring, implementation of which is essential to ensure a return to profitability in the future.
Net financial indebtedness at 31 December 2002 was 60.4 million euros compared with 133.9 million euros at 31 December 2001, a decrease of 73.5 million euros which was largely due to the decrease in working capital (mainly receivables and inventories).

At 31 December 2002 the Olivetti Tecnost Group had 4,527 employees (4,896 at 31 December 2001), of whom 2,371 in Italy and 2,156 abroad.

On 7 January 2003 the Group closed the contract drawn up in the second half of 2002 with SMT Vertronic, a Mexican company in the SMT Group, for the sale of industrial assets held by the subsidiary Olivetti Tecnost de Mexico, which is active in office automation products.
The agreement provided for the sale of the Tlaxcala facility in Mexico and recruitment by SMT Vertronic of the workers in the plant (1,266 at 31 December 2002). SMT will introduce new industrial operations into the Mexican plant in addition to those currently performed, which Olivetti Tecnost will continue to use.

Facility Management: Olivetti Multiservices

During 2002 Olivetti Multiservices made sweeping changes in its operations. As part of Project Tiglio (approved by the Olivetti S.p.A. Board of Directors on 26 March 2002) for the enhancement of the real estate assets of the Pirelli, Olivetti and Telecom Italia groups, on 1 September 2002 the partial split-up of Olivetti Multiservices S.p.A. (as approved by the company Board of Directors on 21 June 2002) took effect, through the transfer at book value of the company's real estate assets, specifically 23 buildings and 10 development areas, to OMS2 s.r.l. (a wholly owned subsidiary of Olivetti S.p.A. which was sold to Tiglio I in October). The share capital of Olivetti Multiservices S.p.A. was reduced accordingly.
Aggregate revenues for 2002 were 119.3 million euros, of which 75.8 million euros from third parties and 43.5 million euros from the captive market.
Net income for consolidation purposes totalled 10.8 million euros (1.7 million euros in 2001) arising in part from non-recurring income (5.8 million euros) as a result of asset sales.
At 31 December 2002 the company had 302 employees, compared with 353 at the end of 2001. The reduction of 51 heads was due to implementation of Project Tiglio.

JJ 00146

HUMAN RESOURCES

At 31 December 2002 the employees of the Olivetti Group companies included in the consolidation numbered 106,620, a net decrease of 9,400 heads from 31 December 2001 (116,020 heads).

(employees)	31.12.2002	31.12.2001	Changes

Webegg Group (**)	-	718	(718)
Total	**106,620**	**116,020**	**(9,400)**

(*) property and services businesses

(**) the Webegg Group is consolidated in Telecom Italia Group from 30 June 2002

(***) including 1,266 units transferred on 7 January 2003 to SMT Vertronic

The headcount at the Telecom Italia Group at 31 December 2002 was 101,713, with a decrease of 8,243 heads from 2001. This reflected the changes in the consolidation area, which generated a net decrease of 2,883 heads, and the net decrease arising from staff turnover (5,360 heads). Specifically, the main changes in the consolidation area were: the exit of the 9Télécom Group (- 1,003 heads), the sale of the Telespazio Group (- 1,168 heads), the exit of Sogei and Consiel (an overall reduction of 1,538 heads) and other minor companies (- 711 heads), the entry of Blu (+ 618 heads), the Webegg Group (+ 719 heads), Netesi and Epiclink (an overall increase of 168 heads) and other minor companies (+ 32 heads).
With regard to staff turnover, the year saw 12,567 full departures (including 5,413 at Telecom Italia S.p.A.) and 7,207 new hirings.

The headcount at the Olivetti Tecnost Group decreased by 369 heads, reflecting a net decrease of 73 heads in Italy (136 departures and 64 new hirings) and a net decrease of 296 heads abroad: 1,898 departures (including 1,752 in Mexico) and 1,657 new hirings (1,542 in Mexico).

The headcount at Olivetti Multiservices decreased by 51 heads, mainly as a result of the spin-off of the Property and Project units to Pirelli Real Estate (47 heads) under Project Tiglio.

The average number of employees in the Olivetti Group in 2002 was 107,079, of which 101,789 with the Telecom Italia Group.

***

On 27 May a frame agreement was signed with the Telecom Italia Trade Unions to ensure the correct sizing of the workforce in relation to the 2002 – 2004 Industrial Plan. Accordingly, on 30 July a union agreement was signed to place 3,803 Telecom Italia S.p.A. employees on mobility schemes. Similar agreements were reached during the rest of the year for other Group companies, affecting a total of approximately 380 resources.

JJ 00147

Also in connection with the frame agreement, accords were drawn up for the recruitment of 350 young people in Telecontact Center and 110 young people in the Telecom Italia Domestic Wireline Business Unit.
On 12 December procedures for the transfer of Blu S.p.A. staff to TIM were completed.

On 25 June 2002, Olivetti Tecnost completed negotiations with the Trade Unions with regard to the Group Industrial Recovery Plan. The Plan includes special professional skills re-training programmes for approximately 300 employees involved in the Group's industrial re-organisation.

JJ 00148

FINANCIAL REVIEW

The Group

The Olivetti Group posted a net loss after taxes of 773 million euros for financial 2002 (3,090 million euros in 2001); before amortisation of consolidation goodwill relating to Telecom Italia, it had a positive net result of 520 million euros (a loss of 1,791 million euros in 2001).
The 2,317 million euros improvement in the net result was largely due to lower losses at Telecom Italia for 575 million euros and at the Parent Company Olivetti S.p.A. for 1,681 million euros, the latter improvement arising chiefly as the result of lower net financial charges for 158 million euros, net income from non recurring items of 449 million euros and the writedown of the Telecom Italia equity investment posted in the statutory accounts purely for tax purposes; this writedown generated an overall benefit on consolidated income of 1,078 million euros, including deferred tax assets of 609 million euros whose recovery is reasonably certain.

Group net financial indebtedness at 31 December 2002 totalled 33,399 million euros (18,118 million euros for the Telecom Italia Group), a decrease of 4,963 million euros against 31 December 2001 (38,362 million euros).

Olivetti Group total shareholders' equity at 31 December 2002 was 20,624 million euros (26,353 million euros at 31 December 2001); excluding minority interests, shareholders' equity attributable to the Parent Company was 11,640 million euros (12,729 million euros at 31 December 2001).
A significant factor in the decrease of 5,729 million euros in total shareholders' equity was the Telecom Italia Group dividend payout of 3,649 million euros to minority shareholders.

Aggregate capital investments amounted to 7,024 million euros – relating in the main to the Telecom Italia Group (6,921 million euros) – subdivided as follows: 3,291 million euros for tangible assets (3,258 million euros for the Telecom Italia Group), 1,956 million euros for intangible assets (1,930 million euros for the Telecom Italia Group) and 1,777 million euros for financial assets (1,708 million euros for the Telecom Italia Group).

JJ 00149

Group business performance

2002 business performance is reflected in the reclassified statement of income set out below, which also includes data for 2001. The statement classifies income components by nature, with separate disclosure of non-recurring income and expense items.

(in millions of euros)	Year 2002	%	Year 2001	%	Changes absolute	%

(*) the amounts concerning the Telecom Italia Group have been classified as extraordinary items in the consolidated accounts of this latter.

Group *revenues* amounted to 31,408 million euros, compared with 32,016 million euros in 2001, a decrease of 1.9% (up 3.1% on a comparable basis and net of the exchange-rate effect).
Revenues at the Telecom Italia Group, which accounted for 96.8% of the total, increased by 3.8% excluding the exchange rate effect and the changes in the consolidation area.

The revenue increase at the Telecom Italia Group reflected the positive performance of the Mobile Business Unit and revenue growth at the Internet and Media Business Unit, offset by a lower contribution from the Domestic Wireline Business Unit, where, despite a 2.4% increase in minutes, traffic revenues fell by 8.3% due to the lower average traffic yield.

JJ 06150

OLIVETTI GROUP - THIRD PARTY REVENUES

(in millions of euros)	Year 2002	Year 2001	Changes absolute	%
TELECOM ITALIA GROUP	30,400.4	30,817.6	(417.2)	(1.4)
OLIVETTI TECNOST GROUP	906.1	1,075.7	(169.6)	(15.8)

WEBEGG GROUP (*)	25.6	54.2	(28.6)	(52.8)
Total Group	**31,407.9**	**32,015.7**	**(607.8)**	**(1.9)**

(*) Consolidated in Telecom Italia Group from 30 June 2002

Operating costs and other net charges amounted to 25,392 million euros (22,985 million euros for the Telecom Italia Group), a reduction of 1,286 million euros on 2001 (26,678 million euros, of which 24,074 million euros for the Telecom Italia Group). As a percentage of revenues, excluding amortisation of consolidation goodwill, the heading decreased by 2.2 percentage points (74.0% in 2002 compared with 76.2% in 2001).

Labour costs at 4,727 million euros decreased by 150 million euros from 2001 (down 3.1%) and the ratio to revenues, despite the reduction in revenues from the previous year, also decreased slightly (from 15.2% in 2001 to 15.1% in 2002).
The decrease was due to the change in the consolidation area and also to the reduction in labour costs at Telecom Italia S.p.A. following the introduction of mobility schemes.

Costs of materials and services decreased by 790 million euros (down 5.9%), largely due to continuing action to improve efficiency, the impact of which was partly offset by higher costs, especially at the Brazilian companies being started up by the Mobile Business Unit.
The ratio of material and service costs to revenues was 40.3%, compared with 42.1% in 2001.

Depreciation and amortisation charges amounted to 7,269 million euros (7,641 million euros in 2001), comprising 3,462 million euros for amortisation of intangible assets (including 2,142 million euros relating to goodwill on the acquisition of equity investments in subsidiary companies) and 3,807 million euros for depreciation of tangible assets. The 136 million euros reduction in goodwill amortisation charges was mainly due to the goodwill writedowns applied in 2001. The ratio of this heading to revenues was 23.1%, down from 23.8% in 2001.

Provisions for writedowns and risks amounted overall to 776 million euros (758 million euros in 2001) as follows:

- 752 million euros for the Telecom Italia Group (733 million euros in 2001) including:

JJ 00151

- 599 million euros for writedowns on trade receivables (specifically, 339 million euros at Telecom Italia, 57 million euros at the Seat Pagine Gialle Group, 40 million euros at the Entel Chile Group and 51 million euros at TIM);
- 153 million euros of provisions for risks and charges;

. 24 million euros for provisions and writedowns at other Olivetti Group companies (25 million euros in 2001).

EBIT before non-recurring income and charges for 2002 was therefore positive, at 6,016 million euros, with an improvement of 678 million euros (up 12.7%) from the previous year (5,338 million euros).

Non-recurring income amounted to 2,990 million euros (999 million euros in 2001). It consisted of 2,553 million euros of capital gains from the year's disposals (465 million euros in 2001) and 437 million euros of sundry income (534 million euros in 2001).

Capital gains from disposals totalled 2,553 million euros, of which 2,413 million euros at the Telecom Italia Group, as follows:

. 1,245 million euros from the sale of the entire 26.89% shareholding in AUNA;
. 484 million euros from the sale of the 19.61% shareholding in Bouygues Décaux Télécom (BDT);
. 234 million euros from the sale of the entire 100% shareholding in EMSA and Telimm as well as of real estate and activities as part of Project Tiglio;
. 133 million euros from the acceptance by the Finsiel Group of the public tender offer on Lottomatica;
. 115 million euros from the sale to Telekom Austria (in which Telecom Italia indirectly holds 14.78%) of the entire 25% shareholding owned by the Mobile Business Unit in Mobilkom Austria;
. 110 million euros from the sale of the entire 40% shareholding in Telemaco Immobiliare;
. 70 million euros from the sale of 100% of Telespazio;
. 22 million euros from other minor sales.

The 140 million euros of capital gains posted by the other Group companies included:

. 107 million euros from the acceptance by Olivetti S.p.A. and Olivetti International S.A. of the public tender offer on Lottomatica;
. 26 million euros from the sale of the entire shareholding in OMS2, as part of Project Tiglio;
. 7 million euros from other disposals.

Other non-recurring income totalling 437 million euros included 401 million euros at the Telecom Italia Group, as follows:

. 131 million euros from recovery of pre-amortisation interest in respect of integration charges pursuant to Law no. 58/1992 paid on a conditional basis to the Italian National Insurance Board (INPS) until 1999, after the dispute was resolved in favour of Telecom Italia;
. 270 million euros of other income, including 77 million euros from use of reserves (essentially use of part of the reserve for risks and charges provided in 2001 by Telecom Italia S.p.A. to cover charges relating to the agreement for the sale of Stream to News Corp. and Vivendi Universal/Canal+, when the sale did not take place), 9 million euros of contributions and 184 million euros of sundry income.

The 36 million euros of other non-recurring income posted by the other Group companies included 21 million euros from the reversal of redundant reserves provided in previous years.

JJ 00152

Non-recurring charges amounted overall to 8,486 million euros (4,354 million euros in 2001) and included 8,375 million euros for the Telecom Italia Group (3,947 million euros in 2001), as follows:

- 6,237 million euros of equity investment writedowns to reflect enduring impairments of value (2,984 million euros in 2001), as follows:
  - writedown of goodwill and the call option on Seat Pagine Gialle shares for a total of 3,486 million euros; such items were written down to market value (based on the average ordinary share price for the last six months of 2002), following the Telecom Italia Group's decision to view the Seat Pagine Gialle Directories operation as a non-core business. In 2001, with regard to the call option, a provision of 569 million euros was posted under financial charges;
  - writedown of goodwill relating to consolidated companies for a total of 225 million euros, Blu (103 million euros), Digitel Venezuela (75 million euros), other subsidiaries (47 million euros);
  - the equity investment in Aria – Is Tim Turchia (2,341 million euros): the investment was written off in full (1,491 million euros) and a provision was made to the reserve for risks and charges to cover Group exposure to this associated company (850 million euros). The provision was commensurate to the guarantees provided by the Group in favour of international financial institutes that had granted loans to Aria – Is Tim and to the loan granted directly by the Group;
  - writedown of goodwill on Netco Redes (96 million euros) and other companies (46 million euros) and a provision to align the purchase price by Seat Pagine Gialle of an additional stake in Consodata to the value of the company as determined by an appraisal (43 million euros).

  The 2,984 million euros writedown on equity investments applied in 2001 referred to goodwill writedowns on consolidated companies (9Télécom Group, Entel Bolivia, Entel Chile Group, Maxitel Group, Tele Celular Sul Group, Tele Nordeste Celular Group, Tim Brasil, Med1 Group and some companies in the Seat Group) and on companies valued with the equity method (GLB Serviços Interativos, Solpart Participaçoes, Telekom Austria, Nortel Inversora Group) and to other provisions relating to equity investments.
- 316 million euros of charges incurred following the sale of the equity investment in the 9Télécom Group. Specifically, considering the loss recorded prior to the sale, the French 9Télécom Group generated an overall charge to Telecom Italia Group income for the first nine months of 2002 of 389 million euros (267 million euros after taxes);
- 135 million euros of capital losses on the sale of 75 million shares (representing 15% of capital) of Telekom Austria A.G. in November 2002. Following the sale, the Telecom Italia Group's stake in Telekom Austria A.G. decreased to 14.78%;
- 494 million euros of charges and provisions relating to personnel retirements and mobility schemes (including a 379 million euros charge at Telecom Italia);
- 235 million euros of charges relating to non-recurring operations on equity investments;
- 79 million euros of financial charges on the amount payable to the Italian National Insurance Board (INPS) for re-absorption of the ex Telephone Sector Employees Pension Fund (FPT) and 74 million euros for an extraordinary contribution to INPS to cover increased financial requirements following the integration of the FPT with the Employees Pension Fund;
- 190 million euros of writedowns on fixed assets relating in the main to mobile telephone companies in Brazil and 38 million euros for capital losses on fixed-asset disposals;
- 194 million euros of provisions, including 135 million euros for guarantees provided on the sale of equity investments and company businesses and 59 million euros for other provisions;
- 383 million euros of other sundry charges.

Non-recurring charges for the other Group companies amounted to 111 million euros (407 million euros in 2001) and included 62 million euros of capital losses on the sale of the Seat Pagine Gialle equity

JJ 00153

investment, 32 million euros of provisions relating to risks on equity investments, 4 million euros of charges relating to the public tender offer on Lottomatica and 13 million euros for miscellaneous charges.

The Group therefore posted positive *consolidated EBIT* of 520 million euros, compared with 1,983 million euros in 2001.

Net income from equity investments amounted to 57 million euros (221 million euros in 2001) and included 18 million euros for the Telecom Italia Group (154 million euros in 2001), 35 million euros for Olivetti S.p.A. from dividends on non-consolidated equity investments and 4 million euros for other Olivetti Group companies.

Interest expense and other financial charges, net, amounted to 2,307 million euros (3,105 million euros in 2001), of which 1,499 million euros related to the Telecom Italia Group (2,153 million euros in 2001) and 808 million euros to the other Group companies (952 million euros in 2001).
Net financial charges at the Telecom Italia Group decreased by 654 million euros (down 30.4%), for 85 million euros as a result of the decrease in net financial indebtedness, offset in part by exchange rate trends, (which had a negative impact on debt at a number of South American companies), and as a result of the provision for the call option on Seat Pagine Gialle shares (569 million euros in 2001) which in 2002 was classified under non-recurring charges.

Net financial charges for the other companies decreased by 144 million euros as a result of lower financial exposure and debt re-financing at less costly conditions.

Value adjustments to financial assets generated an overall charge of 786 million euros, including 682 million euros for the Telecom Italia Group as follows:

- 80 million euros for amortisation of goodwill arising on the purchase of equity investments in companies valued with the equity method, a reduction of 236 million euros compared with 2001, due to goodwill writedowns posted in 2001;
- the Group's share of income and losses of companies valued with the equity method, with a negative balance of 386 million euros (-1,300 million euros in 2001); this reflected losses at Stream for a total of 246 million euros (241 million euros in 2001), at Aria Is Tim (Turkey) for 171 million euros (334 million euros in 2001), and a positive balance of 31 million euros on the results of the other investee companies;
- a writedown of 176 million euros on securities and equity investments held as current assets (291 million euros in 2001) and of 40 million euros on securities held as fixed assets (49 million euros in 2001).

In 2001, this heading also reflected the results of the equity investments in the Nortel Inversora Group (238 million euros), the AUNA Group (203 million euros) and the Astrolink writedown (259 million euros) taken by Telespazio upon termination of the project. In 2002 the equity investment in Nortel Inversora was unchanged from the consolidated book value at 31 December 2001, when it was prudently written down to zero. The consolidated book value of the AUNA Group and Astrolink at 31 December 2001 was maintained until the sale of these investments, respectively, on 1 August 2002 and 30 November 2002.
Value adjustments at the other Group companies totalled 104 million euros, including 69 million euros relating to 41.4 million Telecom Italia shares held as current assets and valued at market prices at 31 December 2002.

Under the heading *income taxes* the Group posted income of 2,210 million euros for financial 2002 (a charge of 579 million euros in 2001). This referred to the Parent Company Olivetti S.p.A. for 1,603

JJ 00154

million euros (largely as a result of the writedown of the Telecom Italia equity investment solely for tax purposes; this produced a positive overall tax effect of 1,078 million euros, including deferred tax assets of 609 million euros) and to the Telecom Italia Group for 688 million euros (also largely as a result of deferred tax assets), offset by tax charges posted by the other Group companies for an overall amount of 81 million euros.

Income attributable to minority interests reflected a loss of 467 million euros (income of 586 million euros in 2001) and included 472 million euros of income attributable to Telecom Italia Group minority shareholders.

The *Group net result* for financial 2002 reflected a loss of 773 million euros (a loss of 3,090 million euros in 2001); excluding amortisation of goodwill on the acquisition of Telecom Italia, the Group had net income of 520 million euros (a loss of 1,791 million euros in 2001).

Analysis of the Group balance sheet

The reclassified balance sheet of the Group at 31 December 2002 is set out below:

(in millions of euros)	31.12.2002	%	31.12.2001	%	Changes
Short-term assets:					
Financial resources	7,894	9.4	8,641	9.2	(747)
Operating assets	14,981	18.0	15,250	16.2	(269)
Total short-term assets	**22,875**	**27.4**	**23,891**	**25.4**	**(1,016)**
Medium/long-term assets:					
Financial assets	495	0.6	705	0.7	(210)
Intangible fixed assets	34,561	41.4	39,220	41.6	(4,659)

Total assets	**83,384**	**100.0**	**94,227**	**100.0**	**(10,843)**
Short-term liabilities					
Short-term debt	7,984	9.6	9,961	10.6	(1,977)
Operating liabilities	18,396	22.1	17,010	18.0	1,386
Total short-term liabilities	**26,380**	**31.7**	**26,971**	**28.6**	**(591)**
Medium/long-term liabilities:					
Medium/long-term debt	33,804	40.5	37,747	40.1	(3,943)
Other medium/long-term liabilities	2,576	3.1	3,156	3.3	(580)
Total medium/long-term liabilities	**36,380**	**43.6**	**40,903**	**43.4**	**(4,523)**
Total liabilities	**62,760**	**75.3**	**67,874**	**72.0**	**(5,114)**
Total shareholders' equity	**20,624**	**24.7**	**26,353**	**28.0**	**(5,729)**
Total liabilities and shareholders' equity	**83,384**	**100.0**	**94,227**	**100.0**	**(10,843)**

Short-term assets at 31 December 2002 totalled 22,875 million euros compared with 23,891 million euros at 31 December 2001.

Specifically, the net decrease of 269 million euros in short-term operating assets arose from a decrease of 107 million euros at the Telecom Italia Group (largely due to the reduction in trade receivables) and from a decrease of 162 million euros at the other companies, mainly the Tecnost Group, also chiefly as a result of a reduction in trade receivables.

JJ 00155

Medium/long-term assets amounted to 60,509 million euros with a net decrease of 9,827 million euros from 70,336 million euros at 31 December 2001.

Specifically, medium/long-term financial assets at 31 December 2002 were 495 million euros and comprised 465 million euros for the prepayment of redemption premiums on the Olivetti 1.5% 2001-2004 and Olivetti 1.5% 2001-2010 bonds issued by the Parent Company in 2001 and on the Olivetti Finance 1% 2000-2005 bond exchangeable for Telecom Italia shares issued in 2000, for residual amounts not accruing in 2002.
The decrease of 210 million euros arose mainly from the portion of the prepayment on the above redemption premiums accrued in the year 2002 and from write off of the prepayment on the redemption premium on Olivetti Finance N.V. 1% 2000–2005 notes, which were bought back and subsequently cancelled.

Intangible fixed assets amounted to 34,561 million euros compared with 39,220 million euros at the end of 2001, a decrease of 4,659 million euros, which arose mainly from the amortisation charge of 3,462 million euros and goodwill writedowns of 1,903 million euros (including 1,544 million euros for the Seat equity investment), from other decreases of 1,250 million euros offset by additions totalling 1,956 million euros.

Tangible fixed assets decreased by 2,648 million euros of which 2,466 million euros for the Telecom Italia Group.

Other medium/long-term assets decreased by 2,310 million euros, reflecting a decrease of 3,001 million euros for the Telecom Italia Group (mainly for equity investment disposals and writedowns), offset in part by an addition of 691 million euros at the other Group companies, including 609 million euros of deferred tax assets at Olivetti S.p.A. as a result of the writedown of the Telecom Italia equity investment purely for tax purposes.

Short-term liabilities at 31 December 2002 amounted to 26,380 million euros, down by 591 million euros from 26,971 million euros at 31 December 2001.

Specifically, short-term debt (7,984 million euros at 31 December 2002) decreased by 1,977 million euros, reflecting a decrease for the Telecom Italia Group of 3,338 million euros offset by an increase of 1,361 million euros for the other Group companies.

Short-term operating liabilities increased by 1,386 million euros, reflecting a rise of 1,782 million euros at the Telecom Italia Group offset by a decrease of 396 million euros for the other companies (the latter consisting mainly of payment of previously provided charges of 125 million euros relating to Olivetti Finance financing operations and use of the Olivetti S.p.A. reserve for risks and charges for 167 million euros).

Medium/long-term liabilities amounted to 36,380 million euros with a decrease of 4,523 million euros from 40,903 million euros at 31 December 2001.
Specifically, medium/long-term debt amounted to 33,804 million euros (including 15,018 million euros for the Telecom Italia Group) with a decrease of 3,943 million euros including 1,065 million euros for the Telecom Italia Group.

Debt for the other Group companies decreased by 2,878 million euros, mainly as a result of operations to restructure debt and improve the maturity profile.

JJ 00156

Medium/long-term non-financial liabilities decreased by 580 million euros, of which 338 million euros for companies outside the Telecom Italia Group.

Capital invested at 31 December 2002 and related funding is illustrated in the table below:

(in millions of euros)	31.12.2002	%	31.12.2001	%	Changes
Short-term operating assets	14,981	26.5	15,250	22.5	(269)
Short-term operating liabilities	(18,396)	(32.5)	(17,010)	(25.1)	(1,386)
Operating working capital	(3,415)	(6.0)	(1,760)	(2.6)	(1,655)
Intangible fixed assets	34,561	61.0	39,220	57.8	(4,659)
Tangible fixed assets	19,449	34.4	22,097	32.6	(2,648)
Other assets	6,004	10.6	8,314	12.2	(2,310)
Capital invested (A)	**56,599**	**100.0**	**67,871**	**100.0**	**(11,272)**
Medium/long-term non financial liabilities	2,576	4.5	3,156	4.6	(580)
Minority interests	8,984	15.9	13,624	20.1	(4,640)
Group shareholders' equity	11,640	20.6	12,729	18.8	(1,089)
Total non financial sources (B)	**23,200**	**41.0**	**29,509**	**43.5**	**(6,309)**
Net financial indebtedness (A-B)	**33,399**	**59.0**	**38,362**	**56.5**	**(4,963)**

Capital invested (56,599 million euros) decreased by 11,272 million euros from the end of 2001. Of the total, 41% was funded by non-financial sources, mainly total shareholders' equity (20,624 million euros, a decrease of 5,729 million euros from 26,353 million euros at 31 December 2001 as analysed earlier in this Report). Net financial indebtedness funded the remaining 59% (56.5% at 31 December 2001).

Olivetti Group ***net financial indebtedness*** at 31 December 2002 amounted to 33,399 million euros, a decrease of 4,963 million euros from 38,362 million euros at 31 December 2001.

Financial surplus of other companies	**(1,139)**
Total net financial surplus	**(4,963)**

Disposals for the Telecom Italia Group (5,698 million euros) reflected 2002 disposals, net of related charges, for an overall 4,771 million euros. They consisted mainly of the sale of AUNA (1,998 million euros), Bouygues Décaux Télécom (750 million euros), Mobilkom Austria (756 million euros), Lottomatica (212 million euros), Sogei (176 million euros), Telemaco Immobiliare (192 million euros), Immsi (69 million euros), Tiglio (328 million euros), Telekom Austria (559 million euros), Telespazio (239 million euros), 9Télécom (529 million euros) and other minor sales (21 million euros).

Disposals for the other companies in the Olivetti Group reflected 2002 equity investment sales, mainly the sale of Lottomatica (179 million euros), Seat (131 million euros), Tiglio (223 million euros) and Webegg (57 million euros).

***

The main financial operations transacted by the Olivetti Group in 2002 are described below.

Telecom Italia Group

- *Bond issue*

  In February, a 2.5 billion euro bond was issued, divided into two fixed-rate tranches of 1.25 billion euros each, maturing on 1 February 2007 and 1 February 2012. The issue is part of the "Global Note Programme" for the restructuring of Group debt; the overall amount of the programme was raised from 10 to 12 billion dollars following a resolution adopted by the Board of Directors on 18 December 2001.

JJ 00159

- *Closure of the revised agreements for put/call options on Seat Pagine Gialle S.p.A. shares*

On 25 February, Telecom Italia and the JPMorgan Chase Group signed the final agreements relating to the re-negotiation of the put and call options on, respectively, approximately 711 million and approximately 661 million Seat Pagine Gialle shares. The preliminary agreements were originally stipulated on 4 December 2000.

Specifically, the option exercise price was reduced from 4.2 euros to 3.4 euros per share; in return, Telecom Italia will pay JPMorgan Chase an amount of approximately 569 million euros on the original expiry date in December 2005; alternatively it may make early payment of this amount after discounting back.

The revised agreements also eliminate early exercise of the options for both parties. The options therefore expire on 6 December 2005. Telecom Italia retains early exercise rights on a portion of its call options – approximately half of the overall amount – in blocks, as from December 2004.

The revised agreements achieve the aim of deferring exercise of the JPMorgan Chase put until the final expiry in December 2005, thus allowing Telecom Italia to avoid the possible impact of a single large outlay in 2003.

The economic effects of the reduction in the option exercise price were reflected in the 2001 financial statements.

- *Equity investment acquisitions and disposals*

Sale of Lottomatica

In February 2002 the Market IT Business Unit (Finsiel group) accepted the public tender offer on Lottomatica, raising proceeds of 212 million euros and a capital gain of 73 million euros for the Telecom Italia Group consolidated net result.

Sale of BDT - Bouygues Décaux Télécom

In March 2002 the Telecom Italia Group sold the TIM International equity investment in BDT (19.61%), which controls the French operator Bouygues Telecom, raising proceeds of 750 million euros and a capital gain of 266 million euros for the Telecom Italia Group consolidated net result.

Sale of Mobilkom Austria

On 28 June 2002, TIM International N.V. sold its entire stake (25%) in Mobilkom Austria to Telekom Austria (in which Telecom Italia International held a 14.78% stake at 31.12.2002), raising proceeds of 756 million euros and a capital gain of 64 million euros for the Telecom Italia Group consolidated net result

Sale of Sogei

On 31 July 2002 Finsiel closed the sale of Sogei to the Fiscal Policies Department of the Ministry of the Economy and Finance, with an impact of 176 million euros on Telecom Italia Group net financial indebtedness.

Sale of AUNA

On 1 August 2002 the Telecom Italia Group sold its equity investment in AUNA to Endesa, Union Fenosa and Banco Santander Central Hispano. The sale was originally planned for December. The transaction raised proceeds of 1,998 million euros for the Telecom Italia Group and a capital gain of 1,033 million euros for the Telecom Italia Group consolidated net result.

JJ 00160

Sale of Telemaco Immobiliare
On 1 August 2002 Telemaco Immobiliare was sold to Mirtus, a company indirectly controlled by the US Whitehall real estate fund promoted by the Goldman Sachs Group, raising proceeds of 192 million euros and a net capital gain of 64 million euros for the Telecom Italia Group.

Purchase of EPIClink
On 2 August 2002, having received approval from the Antitrust Authority, Telecom Italia purchased 86% of EPIClink S.p.A. for a price of 60.2 million euros. The equity was sold by Edisontel S.p.A.(30.3%), Pirelli S.p.A. (25.3%; Pirelli is a Telecom Italia related party through the Chairman and Chief Executive Officer Carlo Buora), IntesaBci S.p.A. (20%), E_voluzione (8%) and Camozzi Holding (2.4%). As a result of this transaction, EPIClink ownership is as follows: Telecom Italia 86%, Pirelli 5%, IntesaBci 5%, Camozzi 2%, E_voluzione 2%. Telecom Italia also committed to acquire the residual stake (14%) for an overall price of 10 million euros.

Sale of 9Télécom
On 26 August, the Telecom Italia Group closed the sale of the equity investment in 9Télécom and the simultaneous purchase of 7% of LDCom. The transactions had a net negative impact of 267 million euros on Telecom Italia Group income.

Sale of a portion of Solpart Participações
On 27 August the Telecom Italia Group reached an agreement with its partners in Solpart (which indirectly controls Brasil Telecom) to reduce its ordinary shareholding from 37.29% to 19% through the sale of 18.29% of ordinary share capital to Timepart Participações and Techold Participações. The transaction removed the regulatory obstacles blocking the start-up of a GSM 1800 commercial offer by the local TIM subsidiaries. Options have been agreed by both parties, to be exercised under certain conditions, that would restore the situation *quo ante*.

Purchase of an additional stake in Stet Hellas
In August, TIM International NV, a TIM subsidiary, acquired from the Verizon Europe Holding II group a 17.45% stake in Stet Hellas, in which it already held 63.95%, for a price of 108 million euros. The operation makes TIM International NV the sole industrial shareholder and the reference shareholder of Stet Hellas, and is part of the Group strategy to rationalise its international portfolio by consolidating its position in the Mediterranean.

Purchase of an additional stake in Netesi
In August, after receiving approval from the Antitrust Authority, the Telecom Italia Group purchased a 69.10% shareholding in Netesi, of which it already held 17.98%, for a price of 11 million euros.

JJ 00161

Purchase of Pagine Utili

On 11 September 2002 Telecom Italia reached an agreement with Pagine Italia S.p.A. for the purchase of the Pagine Utili directories business, which has approximately 60,000 subscribers.
Telecom Italia will pay Pagine Italia a consideration of 214 million Seat ordinary shares held by the Telecom Italia Group, representing 1.9% of Seat ordinary share capital.
Closing is subject to approval by the AGCM Authority (the Italian Antitrust Authorities). Following the observations in the report of the AGCM, on 16 January 2003 Telecom Italia and Pagine Italia S.p.A. agreed to withdraw the notice of acquisition of the Pagine Utili business unit.
They also agreed to extend the term of the contract in order to re-formulate the purchase with a view to possible re-presentation to the Authority.
The contract provides in any case for an exclusive consideration to Pagine Italia S.p.A., of 6.6% of the total number of Seat Pagine Gialle shares to be paid in the event of closure.
Procedures for the merger of the Pagine Utili unit with Seat Pagine Gialle will be drawn up once the transaction has closed.

Telecom Italia – News Corporation agreement

On 1 October, Telecom Italia signed contracts with the News Corporation Group ("News"), its partner in Stream, and with Vivendi Universal ("Vivendi"), currently the controlling shareholder of Telepiù, for the acquisition of Telepiù by Stream and the subsequent creation of a single pay TV platform in Italy. Under the agreements, Telecom Italia will hold 19.9% of the single platform and News Corporation will hold the remaining 80.1%.
At closing, Telecom Italia will pay 31.84 million euros for 19.9% of Tele più and will waive the receivables from Stream at the end of 2002 due to the Group companies, for approximately 147 million euros (the full amount was provided in 2001). By the same token, News Corporation will waive receivables due to Stream for a similar amount.
The contract is subject to approval by the European Antitrust Authority which will issue a ruling by the end of April 2003.

Sale of the equity investment in Consiel

On 3 October 2002 the sale – between Finsiel and World Investment Partners S.A. - of the shares representing the entire share capital of Consiel was completed with the endorsement of the shares in favour of the purchaser.
The total amount paid by World Investment Partners S.A. was equal to 1 million euros.

Purchase of 100% of Blu S.p.A.

On 7 October TIM closed the preliminary contract signed on 7 August for the purchase of 100% of Blu S.p.A., which was subsequently merged with TIM S.p.A. The operation had previously been approved by the Competition & Market Authority, after the favourable ruling issued by the Communications Authority. The merger deed was drawn up on 18 December 2002, when the final sale price of 83 million euros was set. The merger took effect on 23 December 2002.

Project Tiglio

On 29 October the frame agreement drawn up by the Pirelli, Olivetti-Telecom Italia and The Morgan Stanley Real Estate Funds groups closed, with the merger of the parties' respective real estate assets and property management services providers.
Under the agreement, the assets of Tiglio I and Tiglio II will be enhanced in 2003 through a market operation implemented as part of a strategy for the development of the real-estate market, opening up important opportunities for the Telecom Italia Group to optimise the value of its current shareholdings in the two vehicles.

JJ 00162

Specifically, through a series of transactions, the Telecom Italia Group transferred assets totalling 1,360 million euros to Tiglio I and Tiglio II. Of these assets, 50 million euros related to Seat Pagine Gialle, approximately 840 million euros related to property spun off to Emsa Immobiliare as a result of the non-proportional split-up of IM.SER, and 470 million euros related to other assets. The operation generated gross income of 229 million euros for Telecom Italia S.p.A. and 234 million euros for the Telecom Italia Group (with an impact of 150 million euros on the Telecom Italia Group net result).
The Pirelli Group companies involved in the operation are Pirelli S.p.A. (a related party of Telecom Italia through the Chairman and the Chief Executive Officer Carlo Buora) and Pirelli & C. Real Estate S.p.A. (a related party of Telecom Italia through the Chairman, the Chief Executive Officer Carlo Buora and the Director Carlo Alessandro Puri Negri).

Sale of Telespazio
In November Telecom Italia and Finmeccanica closed the agreement of 2 August 2002 for the sale of Telespazio. The transaction generated a positive impact of 239 million euros on Telecom Italia Group financial indebtedness, and a net capital gain of 36 million euros for Telecom Italia Group income.

Sale of the Viasat equity investment
On 18 November 2002, Seat Pagine Gialle S.p.A. and Finsatel sold their respective shareholdings of 33.54% and 16.46% in Viasat S.p.A. to Exe Fin S.p.A., for an aggregate amount of approximately 2.5 million euros; the transaction also eliminated the equity investment indirectly held in Viasat Assistance S.p.A.

Sale of Telekom Austria
In November Telecom Italia International N.V. organised placement of 75 million Telekom Austria AG shares (representing 15% of capital). The placement price was fixed at 7.45 per share. The operation raised gross proceeds of 559 million euros, with a loss of 135 million euros on the Telecom Italia Group's consolidated net result.
The operation reduced the Telecom Italia Group's equity investment in Telekom Austria from 29.78% to 14.78%.

Sale of the equity investment in Informatica Trentina
On 21 November, Finsiel disposed of its equity investment (40.41%) in Informatica Trentina in favour of DeDa Srl, a company controlled by Deltadator S.p.A. (Sequenza Group) for an amount equal to approximately 8.7 million euros, with a capital gain recorded in the Telecom Italia consolidated financial statements of 4 million euros.

Sale of IMMSI
On 22 November Telecom Italia sold its equity investment in IMMSI to the "Omniapartecipazioni" company. The selling price was 69 million euros, with a positive impact of 41 million euros for Telecom Italia S.p.A..

Sale of Fintech
On 20 December 2002, Telecom Italia Lab sold its shareholding in Fintech S.p.A. (50% of share capital) to the Belgian company Euroqube S.A., for an amount of 4.75 million euros, of which approximately half was settled at closing; the outstanding consideration will be paid over the following 12 months.

JJ 00163

Sale of Tele Pay Roll Services
On 20 December Telecom Italia signed an agreement with Accenture for the sale of 100% of TE.SS – Tele Pay Roll Services, which handles payroll services for the Telecom Italia Group. The selling price is approximately 10 million euros. The transaction, part of the Telecom Italia Group plan to dispose of non-core operations, closed on 28 February 2003, when title to the capital stock was transferred.

Purchase of an equity investment in Mediocredito Centrale S.p.A.
On 27 December 2002 in execution of an agreement signed in July, the purchase of a 3% stake in Mediocredito Centrale S.p.A. was finalised at a price of 36 million euros

Sale of Telekom Srbija
On 28 December 2002 the Telecom Italia Group announced an agreement for the sale to PTT Serbia of its 29% shareholding in Telekom Srbija. On 20 February 2003 the contract was signed and closing is expected to take place by the end of May.
PTT will pay a consideration of 195 million euros: 120 million euros are to be paid in four monthly amounts as from February 2003 and the remaining sum in 6 six-monthly amounts as from January 2006. The shares involved in the transaction will be deposited with an international bank until payment of the consideration has been completed.

Project Ortensia
On 24 December 2002 Telecom Italia and the other shareholders of Tiglio I (MSMC Italy Holding BV, Olivetti, Seat Pagine Gialle and Pirelli) and Tiglio II (POPOY Holding B.V.) drew up a binding agreement with the Marzotto company – which became effective on 4 March 2003 – for the formation of a jointly owned vehicle to hold the land assets of Tiglio I e Tiglio II and the land assets owned directly and indirectly by Marzotto. The agreement provides for the transaction to be executed during 2003 through the spin-off from Tiglio I and Tiglio II of land assets and other related assets and liabilities to a company to which, under the agreement, Marzotto transferred its land assets at the end of December 2002. Based on the asset valuations currently available, on completion of the spin-offs, Telecom Italia will hold a share of approximately 28% of the company (at Group level, Seat Pagine Gialle will own a 1% share).

Telecom Italia share buy-back
In connection with the share buy-back authorised by the Telecom Italia Shareholders' Meeting of 7 November which began in March 2002, during the year Telecom Italia purchased 45,647,000 savings shares and 5,280,500 ordinary shares, for a total outlay of 287 million euros.

JJ 00164

Other companies in the Olivetti Group

- In January 2002, Olivetti accepted the public tender offer for 100% of Lottomatica shares made by the De Agostini Group on 23 November 2001, at a price of 6.55 euros per share, after an improved bid.
  Olivetti tendered its equity in Lottomatica, which amounted overall to 27,451,550 shares representing 15.6% of the company's subscribed capital (of which 14.04% directly owned by Olivetti S.p.A. and 1.56% owned by the subsidiary Olivetti International S.A.).
  Also considering Finsiel S.p.A.'s 18.3% equity investment in Lottomatica, the overall cash inflow for the Olivetti –Telecom Italia Group was 391 million euros, with an aggregate capital gain of 367 million euros recorded in the statutory accounts of the companies.

- On 27 June 2002 the Telecom Italia and Olivetti Boards of Directors approved the acquisition by IT Telecom S.p.A. (100% Telecom Italia) of Olivetti S.p.A.'s 50% equity investment in Webegg S.p.A. The transaction price of 57.5 million euros was determined on the basis of assessments performed by KPMG Corporate Finance for Telecom Italia and UBM for Olivetti.
  The operation will allow Webegg's specific knowhow to be integrated with that of the Telecom Italia Group Information Technology division, with a view to forming competence centres providing services for the Group itself and on the open market.

***

- On 29 January 2002 (with settlement date 12 February 2002), through a private placement with a select group of institutional investors, Olivetti International Finance N.V. re-opened the bond maturing in July 2009 for an additional amount of 250 million euros. As a result, total notes outstanding amount to 2,350 million euros.

- On 14 March 2002, through a private placement, Olivetti Finance N.V. issued a 500 million euro floating-rate bond, guaranteed by Olivetti S.p.A. The bond pays a quarterly coupon linked to 3-month Euribor + 130 basis points. The term is 3 years, which may be extended at the bondholders' option for subsequent 21-month periods up to a maximum overall term of 10 years.

- In April, the subsidiary Olivetti Finance N.V. successfully issued a multi-tranche bond. The operation raised proceeds totalling 1.5 billion euros, subdivided into two tranches maturing in 5 and 10 years. The terms of the issue are as follows:

first tranche	
amount:	1,000 million euros
issue date:	24 April 2002
maturity:	24 April 2007
coupon:	6.50% per annum

JJ 00165

second tranche

amount:	500 million euros
issue date:	24 April 2002
maturity:	24 April 2012
coupon:	7.25% per annum

- On 22 April 2002, through a private placement, Olivetti Finance N.V. issued a 20 billion yen bond with a fixed 3.55% six-monthly coupon maturing in May 2032 (callable annually by the issuer after the 10th year).

- With a private placement, Olivetti Finance N.V. issued a bond for 300 million euros on 29 May and for an additional 300 million euros on 17 June. The bond bears a floating-rate quarterly coupon with a spread of 1.25%, and matures on 3 January 2006.

- On 24 June 2002, all outstanding notes of the "Olivetti Finance N.V. floating-rate 1999-2004" bond were early redeemed (as allowed by the bond regulation and in execution of the resolution adopted by the company's Board of Directors), for an amount corresponding to the nominal value of the notes (5,150 million euros), plus interest accrued to date.

- In the second half of 2002, Olivetti Finance N.V. launched additional euro bonds:
  1) a zero-coupon bond (with settlement date 20 September 2002) exchangeable for Telecom Italia ordinary shares for approximately 385 million euros (350 million euros issued on 29 July, followed on 27 August by exercise of the greenshoe option for a further amount of approximately 35 million euros by Lehman Brothers as global co-ordinator), maturing in March 2004; the bond is exchangeable for 41,400,000 Telecom Italia ordinary shares (at a price of 9.30 euros per share) representing approximately 0.79% of ordinary share capital;
  2) a bond placed privately on 7 August as part of the Euro Medium Term Note (EMTN) Programme for 200 million euros and bearing a floating-rate coupon of 1.45% over EONIA, maturing in February 2005;
  3) a bond placed privately on 9 August as part of the EMTN Programme for 250 million euros, with an annual 7.77% coupon, maturing in August 2032.
  4) the re-opening on 3 October of three bonds under the EMTN Programme, to re-finance and extend the repayment profile of existing debt.
     The overall gross proceeds of 1,550 million euros were as follows:
     - 400 million euros on the "Olivetti Finance N.V. floating-rate 2002-2006" bond for an original amount of 600 million euros, increased to 1,000 million euros;
     - 650 million euros on the "Olivetti Finance N.V. 6.5% 2002-2007" bond for an original amount of 1,000 million euros, increased to 1,650 million euros;
     - 500 million euros on the "Olivetti Finance N.V. 7.25% 2002-2012" bond for an original 500 million euros, increased to 1,000 million euros.

     Additionally, the above issues maturing in 2006 and 2007 were increased through private placements for 100 million euros each, thus raising the overall amounts to 1,100 million euros and 1,750 million euros respectively.

- On 18 December 2002 a debt-transfer operation took place by which Olivetti Finance N.V. (Netherlands) replaced Olivetti International Finance N.V. (Dutch Antilles) as the issuer of all the bonds already issued by the Antillean company under the EMTN Programme guaranteed by Olivetti S.p.A., as follows: the 4,950 million euro bond denominated "Euro Medium Term Note

06166

Programme 5.375% due 2004" and the 2,350 million euros bond denominated "Euro Medium Term Note Programme 6.125% due 2009".

On 23 December 2002 the following bonds were extinguished:

- "Olivetti S.p.A. EONIA Linked notes 2001-2003" for a value of 400 million euros;
- "Olivetti Finance N.V. 1% 2000-2005", exchangeable for Telecom Italia ordinary shares, for a nominal value of 1,235 million euros. As a result, the residual nominal loan amount decreased to 765 million euros;
- "Olivetti Finance N.V. 5.375% 1999-2004" (originally issued by Olivetti International Finance N.V. for a nominal value of 750 million euros). As a result, the residual nominal loan amount decreased to 4,200 million euros.

***

All bonds issued by Olivetti Finance N.V. and Olivetti International Finance N.V. are guaranteed by the Parent Company Olivetti S.p.A..

Information by sector (CONSOB communication no. 98084143)

A) Information by business sector

The consolidated statement of income showing the results of the operating companies adjusted for consolidation purposes and the consolidated reclassified balance sheet showing the balances of these companies adjusted for consolidation purposes are set out on the following pages. The results and balances for consolidation purposes differ from those disclosed in the companies' respective statutory financial statements at 31 December 2002. The main consolidation adjustments are the elimination of intercompany gains and depreciation charges on assets transferred within the Group, the reversal of tax-related entries made largely in respect of depreciation, the valuation of equity investments (equity investments in subsidiary companies, by definition, appear in the consolidated accounts as the appropriate portion of the company's net equity used for consolidation purposes) and other adjustments made to align the results of the individual companies with the accounting policies adopted by the Group.

JJ 00171

Research & Development

In 2002 most of the Telecom Italia Group's R&D operations were conducted by TILAB, in some cases in co-operation with Pirelli Lab. R&D staff totalled 1,081 heads.
Activities consisted of study and testing in the wireline and mobile telecommunications areas and in the Internet area.
Research on Internet and mobile applications focused on testing of integrated technological and application solutions for the multimedia offer, development of access solutions and solutions for management of broadband users, development and assessment of advanced solutions for user environments (terminals, domestic cabling, application platforms).
Switching and networking research focused on IP networks with the development of Content Delivery Networks. Other special areas of interest were Wireless LANs and innovative telephony solutions on packet-switching networks.
In the area of network infrastructures, work was concerned with the metropolitan and transportation network, new automatic switching fibre networks, and the access network, where innovative solutions based on copper and fibre links are being developed.
During 2002, 45 patents were filed, an increase of 13% from 2001.
Total R&D expenditure for the year amounted to approximately 109 million euros. Subsidies and low-interest loans for R&D expenses collected during the year or due to be collected by TILAB amounted to approximately 12 million euros.

JJ 00172

The Parent Company

In 2002, the Parent Company Olivetti S.p.A. operated purely as a holding, mainly in the wireline and mobile telecommunications sector, through its equity investment in the Telecom Italia Group, and, through controlling equity investments, in other industries, including office and Internet products and services (Olivetti Tecnost S.p.A.), and real-estate services (Olivetti Multiservices S.p.A.).

The Company closed financial 2002 with a net loss of 6,240 million euros (a net loss of 871 million euros in 2001) after equity investment writedowns of 8,400 million euros (175 million euros in 2001), including a writedown of 8,051 million euros on Telecom Italia S.p.A. shares made exclusively for tax purposes.

Capital investments for 2002 totalled 225 million euros and referred to equity investments. This compared with 584 million euros in 2001, of which 430 million euros for equity investments and 153 million euros for intangible assets and 1 million for tangible assets.

At 31 December 2002 shareholders' equity totalled 9,031 million euros, a decrease of 6,204 million euros against 15,235 million euros at 31 December 2001. The decrease arose as a result of the loss of 6,240 million euros posted for 2002, offset by share capital increases for 36 million euros following the conversion of bonds and exercise of warrants, net of use of restricted reserves tied to bond conversion/warrant exercise.

Net financial indebtedness at the end of 2002 totalled 15,195 million euros, a decrease of 1,127 million euros from the end of 2001 (16,322 million euros), which arose largely as a result of collection of dividends and equity investment disposals set against outlays mainly for financial charges.

JJ 00173

Business performance for 2002 is reflected in the income statement set out below, reclassified in compliance with the Consob model for industrial holding companies pursuant to communication no. 94001437 of 23 February 1994:

(in millions of euros)	Year 2002	Year 2001	Changes

15. Taxation	892	450	442
Net income (loss) for the year	**(6,240)**	**(871)**	**(5,369)**

The year's *ordinary operations* closed with a loss of 7,296 million euros compared with a loss of 1,328 million euros in 2001.

This result arose as follows:

- 2,020 million euros of financial income (122 million euros in 2001) including:
  - 1,979 million euros of dividends and related tax credits (85 million euros in 2001), of which 1,952 million euros from Telecom Italia (73 million euros in 2001, recorded as accrued), 14 million euros from Olivetti Multiservices, 7 million euros from Olivetti Finanziaria Industriale S.p.A., 4 million euros from Mediobanca and 2 million euros from other investee companies;
  - 41 million euros of other financial income (37 million euros in 2001) including:
    * 3 million euros from securities and reverse repurchase agreements classified under current assets (largely investments in government securities);
    * 7 million euros of interest income from subsidiary companies (on borrowings and interest-bearing current accounts);
    * 4 million euros of interest income on bank current accounts;
    * 10 million euros of interest income on receivables from tax authorities ceded without recourse in previous years;
    * 11 million euros for exchange rate gains;

JJ 00174

* 6 million euros of income on swaps;

- 813 million euros of interest expense and other financial charges (966 million euros in 2001), including:
  - 607 million euros to subsidiaries (814 million euros in 2001) in respect of borrowings and interest-bearing current accounts (of which 498 million euros to Olivetti Finance N.V. and 107 million euros to Olivetti Holding B.V.), with a decrease of 207 million euros from 2001;
  - 149 million euros on bond loans (62 million euros in 2001);
  - 3 million euros on medium/long-term borrowings (28 million euros in 2001);
  - 5 million euros for exchange rate losses (19 million euros in 2001);
  - 24 million euros from use of bank credit lines (29 million euros in 2001);
  - 14 million euros of swap charges;
  - 11 million euros on other financial operations (14 million euros in 2001);
- 8,400 million euros for writedowns of equity investments in subsidiary companies (175 million euros in 2001), including:
  - 8,051 million euros relating to Telecom Italia S.p.A. shares held as financial fixed assets, which were written down to the average market share price for the last six months in order to be eligible for tax benefits;
  - 69 million euros relating to Telecom Italia S.p.A. shares held as current assets, which were written down to market share prices at 30 December 2002;
  - 182 million euros relating to the equity investment in Olivetti Finance;
  - 98 million euros for writedowns and provisions on other equity investments.
- 14 million euros of other income from operations (15 million euros in 2001) consisting mainly of cost recoveries;
- 117 million euros in other costs of operations (324 million euros in 2001), including:
  - 26 million euros for non-financial services (49 million euros in 2001);
  - 72 million euros for depreciation and amortisation (63 million euros in 2001); this included 71 million euros in respect of intangible assets (62 million euros in 2001), of which 70 million euros for charges relating to share-capital increases and bonds subscribed in 2001;
  - 14 million euros for payroll costs (13 million euros in 2001);
  - 5 million euros in other costs of operations (6 million euros in 2001).

Extraordinary operations generated net income of 164 million euros, compared with net income of 7 million euros in 2001.

Extraordinary income amounted to 240 million euros, as follows:
- approximately 158 million euros from the sale of the Lottomatica equity investment;
- 72 million euros from the sale of the OMS2 equity investment;
- 9 million euros from the sale of the Webegg equity investment to the Telecom Italia Group;
- 1 million euros of other income.

Extraordinary charges amounted to 76 million euros (16 million euros in 2001), as follows:
- 71 million euros on the sale of Seat Pagine Gialle shares;
- 4 million euros on the sale of the Lottomatica equity investment;
- 1 million euros of other costs.

The heading *Taxation* reflects income of 892 million euros arising mainly from deferred tax assets (609 million euros) whose recovery is reasonably certain, booked as a result of the writedown of the Telecom Italia equity investment, and from the reversal of the reserve for deferred taxes provided in 2001, which became redundant (283 million euros).

Medium/long-term liabilities					
Medium/long-term debt	12,893	48.9	10,788	32.4	2,105
Other liabilities	3	-	349	1.0	(346)
Total medium/long-term liabilities	**12,896**	**48.9**	**11,137**	**33.4**	**1,759**
TOTAL LIABILITIES	**17,345**	**65.8**	**18,060**	**54.2**	**(715)**
SHAREHOLDERS' EQUITY	**9,031**	**34.2**	**15,235**	**45.8**	**(6,204)**
TOTAL LIABILITIES AND SHAREHOLDERS' EQUITY	**26,376**	**100.0**	**33,295**	**100.0**	**(6,919)**

Short-term assets at 31 December 2002 amounted to 2,221 million euros, an increase of 1,146 million euros from 1,075 million euros at 31 December 2001; this comprised an increase of 392 million euros in operating assets and an increase of 754 million euros in financial resources (mainly cash of 379 million euros, financial assets and financial receivables due from third parties for 271 million euros and financial receivables due from subsidiary companies for 104 million euros).

Medium/long-term assets at 31 December 2002 amounted to 24,155 million euros, reflecting a net decrease of 8,065 million euros compared with 32,220 million euros at 31 December 2001, of which 8,521 million euros referred to equity investments; the decrease arose from the writedown of Telecom Italia shares to average market value in the second half of 2002 in order to be eligible for tax benefits (8,051 million euros) and from the sale of the Webegg, OMS2 and Seat Pagine Gialle equity investments.

Medium/long-term interest accruals and prepayments decreased by 90 million euros, mainly for the accrued portion of the redemption premium on the "Olivetti 1.5% 2001-2004" and "Olivetti 1.5% 2001-2010" bonds.

JJ 00176

Other medium/long-term non-financial assets increased by 530 million euros (mainly reflecting deferred tax assets).

Short-term liabilities at 31 December 2002 amounted to 4,449 million euros, with a decrease of 2,474 million euros compared with 6,923 million euros at 31 December 2001.
This reflected a decrease of 2,552 million euros in debt offset in part by an increase of 78 million euros in operating liabilities.
Specifically, the decrease of 2,552 million euros in debt arose mainly from a reduction of 2,890 million euros in amounts due to subsidiaries (including 1,905 million euros on interest-bearing current accounts) offset by an increase of 392 million euros in amounts due to banks and other lenders.

Medium/long-term liabilities at 31 December 2002 amounted to 12,896 million euros, an increase of 1,759 million euros from 11,137 million euros at 31 December 2001; this reflected an increase of 2,105 million euros in debt offset by a decrease of 346 million euros in other liabilities.
Specifically, the 2,105 million euros increase in medium/long-term debt consisted of an increase of 3,496 million euros in bonds, offset in part by a decrease of 1,559 million euros in amounts due to subsidiaries and a decrease of 52 million euros in amounts due to banks.

The table set out below analyses **capital invested** at 31 December 2002 and relating funding:

(in millions of euros)	31.12.2002	%	31.12.2001	%	Changes
Short-term operating assets	1,153	4.7	761	2.4	392
Short-term operating liabilities	(658)	(2.7)	(580)	(1.8)	(78)
Operating working capital	495	2.0	181	0.6	314
Long-term assets	23,734	98.0	31,725	99.4	(7,991)
Capital invested (A)	**24,229**	**100.0**	**31,906**	**100.0**	**(7,677)**
Medium/long-term non financial liabilities	3	0.0	349	1.1	(346)
Shareholders' equity	9,031	37.3	15,235	47.7	(6,204)
Total non financial sources (B)	**9,034**	**37.3**	**15,584**	**48.8**	**(6,550)**
Net financial indebtedness (A-B)	**15,195**	**62.7**	**16,322**	**51.2**	**(1,127)**

Capital invested was financed by debt for 62.7% (51.2% at the end of 2001) and by shareholders' equity for 37.3% (47.7% at the end of 2001).
Specifically, shareholders' equity decreased by 6,204 million euros during 2002 as follows:

- a decrease of 6,240 million euros for the loss for 2002;
- share-capital increases of 36 million euros (net of 25 million euros arising from free issues effected through use of reserves following the re-denomination of share capital in euros) as a result of conversion of bonds and exercise of warrants.

JJ 00177

At 31 December 2002 the Company had **net financial indebtedness** of 15,195 million euros (16,322 million euros at 31 December 2001), as follows:

(in millions of euros)	31.12.2002	31.12.2001	Changes

Employee Stock Option Plans

1999-2001 Plan

During 1999, a "Three-Year 1999-2001" Stock Option Plan" for the benefit of approximately one hundred managers of Olivetti S.p.A. and its subsidiaries was approved as a tool to provide incentives and boost management loyalty. Authorised by a Directors' resolution of 9 June 1999 and supplemented with a subsequent resolution of 29 November 1999, the plan provided for a maximum of 48 million warrants, non-transferable *inter vivos*, to be assigned free of charge to the beneficiaries. Each warrant gave an option on one Olivetti ordinary share at an overall price (par value plus share premium) of 2,320 Italian lire (equivalent to 1.198 euros), for a maximum nominal share-capital increase of 48 billion Italian lire (approximately 24.8 million euros). This increase, resolved by the above-mentioned Board meetings in execution of the proxy pursuant to art. 2443 of the Italian Civil Code (granted by the Extraordinary Shareholders' Meeting of 7 April 1999) complied with the limits set by art. 134, par 2, of Legislative Decree 58/1998.
The warrants assigned could be exercised at pre-specified times during the three-year period and could be accumulated until the end of the plan (January 2002). The first tranche was exercised in December 1999 and the second and third tranches in 2001 and in January 2002 respectively.
The evolution of the plan in 2001 and 2002 is illustrated in the table set out below:

	Year 2002			Year 2001			
	No.shares	Average exercise price (euros)	Market price (euros)	No. shares	Average exercise price (euros)	Market price (euros)	Notes
Rights existing at 1st January	8,038,315	-	1.43	26,255,000		2.24	
New rights assigned	-			-	-	-	
Rights exercised in the year	(5,654,982)	1.000	1.38	(18,216,685)	1,198/1,040	2.31	(1) (2) (3)
Rights expired in 2002	(2,383,333)		2.36	-			
Rights existing at 31/12	-			8,038,315	-	1,44	

(1) Annual average share prices (Source: Bloomberg)

(2) Exercise price equivalent to 1 euro (as adjusted following the share capital increase in November 2001) for no. 5,654,982 rights, relating to year 2002

(3) Exercise price equivalent to 1.198 euro for 12,171,682 rights and 1,040 euros (as adjusted following the share capital increase in March 2001) for 6,045,003 rights, relating to year 2001

***

2002-2004 Plans

On 24 February 2000 the Board of Directors approved a three-year stock option Plan from 1 January 2002 to 31 December 2004, assigning 29,500,000 warrants free of charge to approximately one hundred managers of the Company and its subsidiaries The warrants entitled the beneficiaries to subscribe to an equal number of Olivetti ordinary shares at a price of 3.308 euros per share (after adjustment for the share-capital increases of 2001), corresponding to the fair value of Olivetti ordinary shares at the date of the Board meeting.
The warrants were to be exercised in three tranches between 1 November and 15 December of 2002, 2003 and 2004, and could be accumulated until the end of the plan.
The relevant Directors' resolution, like that of the previous 1999-2001 plan, executed the proxy pursuant to art. 2443 of the Italian Civil Code granted by the Extraordinary Shareholders' Meeting of 7 April 1999.

JJ 00180

The Company did not implement any operations that could encourage subscription of shares by its employees, pursuant to art. 2358 of the Italian Civil Code.

Subsequently, on 9 February 2001, after reversing its previous resolution of 24 February 2000 as untimely and no longer appropriate for the purpose for which it had been intended, the Board of Directors approved a share-capital increase for a total of 29 million euros through the issue of 29 million shares at a price of 2.515 euros per share (after adjustment for the share-capital increases of 2001). The capital increase services a stock option plan for managers of the Company and its subsidiaries for the three years 2002-2004; with regard to stock options already assigned to managers on the payroll as of 24 February 2000 who have since left the Group (1,330,000 options), the original terms and conditions apply.
The Company has not implemented any operations that could encourage subscription of shares by its employees, pursuant to art. 2358 of the Italian Civil Code.

At 31 December 2002, all the stock options assigned in connection with the two Directors' resolutions illustrated above (30,330,000 rights, of which 1,330,000 to be exercised at a unit price of 3.308 euros and 29,000,000 to be exercised at a unit price of 2.515 euros) were still unexercised. They entitled the beneficiaries to subscribe 30,330,000 Olivetti shares (the share price at 31 December 2002 was 0.969 euros).

Shares in Olivetti S.p.A. and its subsidiaries held by Directors, Statutory Auditors and Chief Operating Officer of Olivetti S.p.A. (CONSOB Regulation no. 11971/1999 and subsequent amendments)

In compliance with CONSOB Regulation no. 11971/1999 and subsequent amendments, shares issued by Olivetti S.p.A. and its subsidiaries that are owned by Company Directors, Statutory Auditors and Chief Operating Officer are detailed below.

JJ 00182

Other information

At 31 December 2002 Olivetti S.p.A. treasury stock comprised 2,697,500 ordinary shares with a par value of 1 euro per share, arising from the conversion of an equal number of savings shares following approval by the Extraordinary Shareholders' Meeting of 4 July 2000 of the compulsory conversion of preferred and savings shares into ordinary shares. The shares, which are stated in the accounts at a unit carrying value of 0.852 euros, also arise from shareholder-approved purchases of stock from employees of the Company and its subsidiaries as a result of fulfilment of the conditions of the relative share offer regulations requiring that the shares be sold back to the Company.
The Shareholders' Meeting of 4 October 2000 authorised the Board of Directors, pursuant to art. 2357 ter, par 1, to dispose of all the above-mentioned treasury shares by 31 December 2002 through the distribution, in one or more operations, of non-compulsory purchase options to former employees of the Company and its subsidiaries who continue to provide services for the Group.

Equity investment writedowns pursuant to current tax laws

The Telecom Italia equity investment writedown (8,051.1 million euros), pursuant to art. 2426 par 2 of the Italian Civil Code, was recorded in the Company's Statutory Financial Statements in compliance with tax laws in order to obtain tax benefits for which the Company would not otherwise be eligible; the writedown reduced carrying value by an amount equivalent to the difference between the book value and the arithmetic mean value of daily share prices in the second half of the year, as envisaged under art. 66, par 1 bis of Presidential Decree no. 917/1986.
Had this writedown not been applied, Olivetti S.p.A. would have posted positive result before taxes for financial 2002 of 919 million euros, reflecting an improvement equal to the writedown amount; its result, net of the taxation that would otherwise have been applied, would have been positive (733.1 million euros), reflecting an improvement of 6,973.1 million euros, which would also have been reflected in shareholders' equity at 31 December 2002.
Following the above equity investment writedown, the consolidated result reflected the combined benefit of the lower tax payable by Olivetti S.p.A. and the deferred tax assets posted by Olivetti S.p.A., for a total of 1,078 million euros; had the writedown not been applied, the Olivetti Group consolidated net result and shareholders' equity would have been worse by a similar amount.

Since the above differences arose, as illustrated above, from the writedown of equity investments applied pursuant to art. 2426 par 2 of the Italian Civil Code, they will be retained unchanged in future financial statements, as will the related tax benefits.

JJ 00183

ANNUAL REPORT ON THE COMPANY'S SYSTEM OF CORPORATE GOVERNANCE

The Company's system of corporate governance has been gradually enhanced to ensure maximum transparency and efficient management. It takes the Voluntary Code of Conduct drawn up by Borsa Italiana as its frame of reference.

Composition and duties of the Board of Directors

The 16-member Board of Directors acting in 2002 was elected by the ordinary Shareholders' Meeting of 13 October 2001; later, two Directors were co-opted to replace outgoing Directors who resigned. The table below showing the composition of the Board of Directors specifies for each Director the position held, the expiry of his or her mandate and important positions held other than in the Company.

Name	Office	Date of appointment	Expiry date	Other offices
Antonio Tesone	Chairman	13 October 2001	2003 Annual Report approval	Chairman Olivetti International S.A.; Director Sogefi S.p.A and Sema S.p.A.

JJ 00187

The powers attributed to the Company officers by the Board of Directors are as follows:

Chairman Antonio Tesone – legal representation and signature on the Company's behalf. No management powers were attributed to the Chairman.

Deputy Chairmen – Deputy Chairman Marco Tronchetti Provera was granted the same powers as the Chairman. Deputy Chairman Gilberto Benetton was granted the same powers as the Chairman and the Deputy Chairman Tronchetti Provera, to be exercised in the absence of the Chairman or of the other Deputy Chairman.

In his capacity as Chief Executive Officer, Marco Tronchetti Provera may carry out all Company business with the following restrictions: power to issue, with a single signature, personal guarantees up to 50 million euros for Group companies and up to 20 million euros for third parties; power to invest, dispose of and acquire controlling and associated interests and to dispose of companies or businesses thereof in any manner, for amounts no greater than 250 million euros;

Chief Executive Officer Carlo Buora: management powers regarding ordinary Company business.

The Board of Directors, in accordance with the bylaws, has the widest powers for the ordinary and extraordinary administration of the Company, since it is empowered to carry out any business which is not expressly the domain of the shareholders, whether by law or under the bylaws.

Even in the absence of a specific bylaw, but as accepted practice, the following are the exclusive domain of the Board :

- examination and approval of the industrial, financial and strategic planning of the Company, as well as the corporate structure of its Group;
- granting and withdrawal of powers to the Chief Executive Officers and the definition of any limits and operating procedures;
- determination, after examining the proposals of the specific Committee and the opinion of the Board of Statutory Auditors, of the remuneration of the Chief Executive Officers and those Directors with specific mandates;
- supervision of operations in general, with a particular focus on any situations involving conflicts of interest, taking into account the information received from the Chief Executive Officers and the Internal Control Committee and regularly comparing results achieved with those forecast;
- examination and approval of any transactions of financial significance, particularly with related parties;
- verification of the suitability of the general administrative and organisational structure of the Company and of the Group as set up by the Chief Executive Officers;
- reporting to the Shareholders' Meetings.

In accordance with point 2.1 of the Voluntary Code of Conduct, the Deputy Chairman and Chief Executive Officer Marco Tronchetti Provera and the Chief Executive Officer Carlo Buora are deemed to be executive Directors, in that they have operational/managerial powers further to the granting of the above-mentioned powers.

Point 3.1 of the Voluntary Code of Conduct establishes that "independent Directors" are those who:

a) do not carry out business, directly, indirectly or on behalf of third parties, nor have recently carried out such business with the Company, its subsidiaries, its executive Directors, the

JJ 00188

shareholder or group of shareholders who control the Company, such as would affect their independence of judgement;

b) do not own, directly or indirectly or on behalf of third parties, equity interests of a size to enable them to exercise control or significant influence over the Company, nor are party to private shareholder agreements regarding the control of the Company;

c) are not closely related to the Company executive Directors or to parties as in points a) and b) above.

In light of the above definition, 6 of the remaining 14 Directors (the Chairman Antonio Tesone and the Directors Lorenzo Caprio, Giorgio Cirla, PierLuigi Fabrizi, Cesare Geronzi and Dario Trevisan) qualify as "independent".

The Chairman, as part of the functions attributed to him by the bylaws, supervises the activities of the Board, ensuring that the statutory and legal regulations in force are properly applied, using the powers granted to him by law and the Articles of Association, chairs and supervises the Company's Shareholders' Meetings.

The Board of Directors held nine meetings in 2002; the overall attendance was more than 76% (76.39). The Board has also already met twice in 2003. The Company has approved the calendar of corporate events for 2003, which has been announced to the market, on the basis of which at least six Board meetings are envisaged.

In applying article 19 of the Bylaws, those Directors with powers granted pursuant to article 2381 of the Italian Civil Code report at least quarterly to the Board of Directors and the Board of Statutory Auditors (also pursuant to article 150 of Legislative Decree 58/1998) on their activities, on extraordinary transactions as well as on those where there could be a potential conflict of interest, following a specific Procedure illustrated later in this report.

Appointment and remuneration of the Directors

The list vote mechanism is not envisaged when electing Directors.

The Board of Directors did not deem it necessary to establish an internal committee to propose Directors for election.

At the aforementioned Shareholders' Meeting held on 13 October 2001, all shareholders, upon entering the hall, were provided with a printed document containing the names of the proposed candidates and a detailed *curriculum vitae* for each one.

The same meeting, pursuant to article 2389, par 1, of the Italian Civil Code, voted to grant the Board of Directors overall annual emoluments of 826,331.04 euros, to be divided equally among the Directors, which will be computed before the net profit in the financial statements.

On 13 October 2001, the Board of Directors formed a **Remuneration Committee** (expanding the duties of the already existing Emoluments Committee) and provided that part of its duties is to formulate proposals to the Board for the remuneration of the Chief Executive Officers and those Directors with specific mandates, to formulate proposals, at the request of the Chief Executive Officers, for determining the criteria used for the remuneration of the top management of the Company, and to conduct preliminary examinations of stock option proposals. As regards composition, the Board voted

JJ 00189

that the Committee comprise at least three Directors, who elect the Chairman and, even if not one of them, a Secretary, with the members of the Board of Statutory Auditors as well as the Chief Executive Officers being entitled to attend the meetings.

The Committee meets whenever the Chairman deems it appropriate or upon the request of another member or Chief Executive Officer.

The Board also voted that notice of the meetings of the Committee as well as the validity of the meetings and the decisions thereof shall be governed by the same regulations stated in the Bylaws regarding Board meetings of the Company.

The Board elected to the Committee Lorenzo Caprio, Pietro Modiano and Antonio Tesone, all non-executive and independent Directors.

At the meeting held on 13 November 2001, the Committee elected the Chairman (Antonio Tesone) and the Secretary (Piera Rosiello). It also formulated proposals regarding the emoluments for those Directors with specific mandates, as per article 2839, par 2, of the Italian Civil Code, expressing the opinion that, since the Company is a pure holding company (which therefore reflects the results of the operating subsidiaries), it was not appropriate to envisage a variable element in the emoluments, only a fixed one.

The Committee's proposals were approved by the Board of Directors (in the meeting held on 13 November), which therefore voted to grant those Directors with specific mandates the emoluments which are stated next to each name in the Report on Operations.

On 7 November 2002, the Director Paola Pierri was elected to the Committee to replace Pietro Modiano who resigned.

No stock options are envisaged for Directors in service.

Internal control system

1) For a number of years, the Company has had an internal control function, one of whose duties is to ensure, with regard to Olivetti itself and also to its unlisted subsidiaries, the adequacy of the corporate regulations regarding processes as well as the reliability and correctness of the accounts and compliance with relevant laws and regulations.

   In 2002, the Board of Directors adopted a proposal by the Internal Control Committee to designate the consortium In.Tel.Audit, originally formed by the subsidiaries Telecom Italia, TIM and Seat Pagine Gialle, and in which Olivetti had in the meantime become a member, as the Head of Internal Control (pursuant to article 9.4 of the Voluntary Code of Conduct) for the purpose of verifying the adequacy and efficiency of the current internal control system.

   With reference to Legislative Decree 231/2001 (Administrative liability of bodies for offences committed by its collaborators), the consortium will also, on behalf of all its member companies, identify and assess areas of operation that are at risk and draw up an appropriate "dispensing organisational model" that takes account of the particular characteristics of each member company.

   The Board deems the Company's internal control system as a whole to be adequate.

JJ 06190

2) The Board of Directors has set up, within its ambit, an "Internal Control Committee", establishing that:

a) as regards consultative and proposing duties vis-à-vis the Board of Directors, the Committee should in particular:
- evaluate the adequacy of the internal control system;
- evaluate the work schedule prepared by the internal control officers and receive regular reports from them;
- evaluate the proposals of the external auditors for their audit services as well as the work schedule for the audit and the results stated in the Audit Report and in the Suggestions Report;
- report to the Board at least once every six months, when the annual accounts and the half-year report are approved, regarding the activities carried out and the adequacy of the internal control system;
- carry out any further duties which it may be assigned by the Board of Directors, particularly regarding relations with the external auditors;

b) as regards composition, that:
- the Committee comprise non-executive directors, who shall elect a Chairman and, even if not one of them, a Secretary;
- the Board of Statutory Auditors, the Chief Executive Officers as well as, if invited, the head of the Internal Auditing Department and one or more Chief Operating Officers may attend the meetings;

c) as regards activities, that:
- the Committee meet at least twice a year, before the Board meetings for the approval of the Annual Report and the Half-Year Report, or whenever the Chairman deems it appropriate or upon the request of another member or Chief Executive Officer;
- notice of the meetings as well as the validity of the meetings and the decisions thereof shall be governed by the same regulations stated in the Bylaws regarding meetings of the Company Board of Directors .

The Company is updating the duties attributed to the Internal Control Committee and its composition in line with the new provisions of the revised July 2002 edition of the Code of Voluntary Conduct.

In 2002 the Internal Control Committee met six times; as of the date of approval of this Report, it has already held two meetings in 2003.

The members of the Internal Control Committee are:
Antonio Tesone (Chairman), Lorenzo Caprio and Alberto Varisco.

The Committee evaluated the suitability of Olivetti's membership of the consortium In.Tel.Audit Scrl; during the year. It also conducted a detailed examination of the specific characteristics of the "Head of Internal Control", as a result of which, as already mentioned in heading 1) above, it drew up a proposal for the consortium to be designated to this duty; t established a continuous flow of information with the Independent Auditors, also with regard to the audit plan drawn up by them; it examined the half-year report and the quarterly reports for financial 2002.

With regard to corporate governance, the Committee analysed the Code and the Procedures that the Company intended to adopt (see the specific sections in this Report) and expressed a positive opinion thereof.

JJ 00191

Dealings with related parties

In order to ensure proper conduct and management transparency, at its meeting of 25 July 2002, the Board of Directors approved a set of "Principles of Conduct" to be observed in the execution of operations, including infragroup operations, with "related parties" (as defined by International Accounting Standard - IAS - 24).

At the same meeting, the Board also adopted a special Procedure ("Procedure for compliance with the requirements of article 150, par 1. of Legislative Decree no. 58 of 1998"), to be observed by all Directors and Statutory Auditors, in order to guarantee complete and effective information flows pursuant to the above-mentioned article 150, to article 19 of the Bylaws and to CONSOB recommendations concerning corporate governance. The Procedure is designed to ensure that activities performed, operations of particular importance, non-typical or unusual operations and operations transacted with related parties are fully transparent in substance and at procedural level, and makes the entire Board responsible for the resolutions adopted in connection with such operations.

The Procedure was amended at the Board meeting of 13 February 2003 to take account of the notion of "related parties" adopted by CONSOB with effect from 1 January 2003 and is now consistent with the pronouncements of CONSOB where CONSOB adopts definitions of a more stringent nature; it remains unchanged where the original text drawn up by the Company is more stringent.

The Principles and the Procedure may be consulted on the Company web site, www.olivetti.it, under the heading "Investor Relations", sub-heading "Corporate Governance", and will be sent in hard copy to any person who may request a copy.

Code of Conduct with regard to Insider Dealing

On 7 November 2002, the Company implemented the relevant regulations issued by Borsa Italiana and adopted a "Code of Conduct with regard to Insider Dealing", which governs disclosure to the Company and to the market of transactions on Group listed securities executed by so-called "relevant persons".

The Code adopts a more rigorous approach than the regulations drawn up by the Market Authority with regard to insider dealing, compared with which it presents a number of significant differences (including: reduction of the quantitative thresholds for market disclosure of transactions on a quarterly basis or at the time of the transaction; indication of periods during which Relevant Persons may not transact operations on Group securities; extension of disclosure requirements to cover financial instruments issued by controlling companies as well as by subsidiary companies; considerable flexibility in the identification of Relevant Persons in order to take account of contingencies in which additional parties may have access to company strategy).

The Code took effect earlier than the term established by Borsa Italiana (1 December 2002 instead of 1 January 2003) and also comprises a particularly severe system of penalties. The document may be consulted on the Company web site, www.olivetti.it, under the heading "Investor Relations", sub-heading "Corporate Governance", and will be sent in hard copy to any person who may request a copy.

Treatment of confidential information

Management of confidential information is supervised directly by the Chairman or by the Deputy Chairman and Chief Executive Officer.

J 00192

With regard to communication of price-sensitive information to the public, the Company recently approved a special Procedure, which specifies, among other things, the measures to be taken in the event of rumours or requests for information from the market control and supervisory bodies and the conduct to be observed to ensure non-selective use of company information during meetings with the shareholders, with the financial community and with the Press.

Investor relations (in particular relations with institutional investors)

The company has a special unit (investor.relations@olivetti.com) which is responsible for relations with shareholders and institutional investors.

The Board of Directors has not deemed – and in the present circumstances does not deem – it necessary to adopt rules for Shareholders' Meetings since it believes that the powers assigned to the Chairman of the Board of Directors in this respect are amply sufficient for the normal business of Shareholders' Meetings.

Statutory Auditors

In accordance with article 20 of the Company Bylaws, the election (or integration following substitution or forfeiture) of the Board of Statutory Auditors occurs by means of a list vote. Those shareholders who alone or together own voting shares equivalent to at least 5% of the corresponding share capital may present one (and only one) list.

Each candidate may be presented in one list only, pain of ineligibility; candidates who are Statutory Auditors in another five listed companies (excluding Olivetti S.p.A.'s controlling or subsidiary companies) or who do not possess the necessary requirements of character and professional background may not be listed.

The lists (together with, pain of inadmissibility, the acceptances of the individual candidates, the statements declaring absence of reasons of ineligibility and incompatibility and the statements declaring existence of the conditions required by law and the bylaws) must be presented at the Company's registered offices at least five days prior to the date of the first calling of the Shareholders' Meeting.

00193

LEGAL PROCEEDINGS

Olivetti S.p.A.

The legal proceedings involving the Parent Company are described below:

1. Currently under preliminary examination by magistrates in Rome are the criminal charges of corruption and peculation brought by the Rome State Prosecutor against former representatives and former employees of Olivetti (and of the Italian Post Office) regarding products and services provided by Olivetti to the Post Office in the early 1990s; the Rome magistrates acquitted all the Olivetti people involved in the investigation of the charge of peculation, since the fact did not amount to a crime. The State Prosecutor lodged an appeal against the sentence. Recently the Rome magistrates fully acquitted all the former Olivetti managers involved in the investigation of charges of corruption
2. With regard to the dispute in the Rome courts between Olivetti and Poste Italiane S.p.A. for non-payment by Poste Italiane S.p.A. of products and/or technical assistance, sentences passed to date are in favour of Olivetti and have been appealed by Poste Italiane S.p.A..
3. In relation to the disposal of the personal computers business in April 1997, lawsuits have been brought before the Ivrea courts against Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A. (which had merged Sy.F.A. S.p.A., which had in turn merged Olivetti Personal Computers S.p.A) by:
   a) Centenary Corporation and Centenary International, for damages (250 billion Italian lire equivalent to 129.1 million euros claimed but lacking evidence) which the plaintiffs allege they suffered as a consequence of the acquisition of the Olivetti Group's personal computers business (through acquisition of the specific business unit, which was spun off to OP Computers S.p.A., established for that purpose);
   b) ex-employees of OP Computers S.p.A., to ascertain that the contracts relating to the aforementioned disposal of the personal computers business are null and void, to obtain reinstatement as employees of Olivetti, with payment of salary differences and damages (calculated at 310 billion Italian lire, 160.1 million euros, and lacking evidence);
   c) the receiver of OP Computers S.p.A. (which is in bankruptcy proceedings), to ascertain that the contract of sale of the personal computers business by Olivetti Personal Computers to OP Computers is either null and void, or to be annulled or revoked, claiming damages (again, lacking evidence and calculated at 158 billion Italian lire, 81.6 million euros).
   d) a group of ex-employees of OP Computers S.p.A., who have filed a complaint against former legal representatives of the company; the Ivrea State Prosecutor has opened an investigation into the former legal representatives.

   Olivetti and its external advisors believe that the transactions carried out regarding the disposal of the personal computers business were legal and proper, and therefore consider the above legal actions to be essentially groundless in fact and in law.
4. Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A., on their part, have taken legal action in the Milan courts against Piedmont International S.A. (a Centenary Group company) for the recovery of 100 billion Italian lire (51.6 million euros) due by the latter or for a greater amount to be proven in court.

JJ 00194

Disputes regarding Telecom Italia shareholder resolutions

Still pending is the claim for damages of 18.9 million euros brought against Olivetti, Telecom Italia and the Chairman and Deputy Chairman *pro-tempore*, alleging non-fulfilment of the undertakings in the "Offer document" concerning the public tender and exchange offer made by Olivetti and Tecnost on Telecom Italia in 1999, and of the resolutions carried by the Shareholders' Meeting of 14 January 2000 regarding purchases of own savings shares.

Universal service

In January 2002 the Regional Administrative Court of Lazio accepted Omnitel's appeal for the annulment of the Telecommunications Authority' decision regarding the "applicability of the mechanism for the division of the net costs of the universal service for 1999", which had also been contested by Infostrada. Specifically, the court upheld the complaint alleging defects in the administrative procedure, but did not accept the appeal against the merits of the decision, which will in any case have to be renewed.

In the meantime, Infostrada and Omnitel have not paid their respective portions (set at 9 million euros overall), thereby preventing the Ministry of Communications from transferring the amount globally assessed in favour of Telecom Italia for costs sustained in 1999 for the universal service (27 million euros).

* * *

In early 2002 Telecom Italia was served with notice of Omnitel's appeal to the Regional Administrative Court of Lazio and Wind's extraordinary appeal to the Head of State for the annulment of the resolution setting out regulations for the "Universal Service: applicability of the mechanism for the division and assessment of the net costs for 2000". In addition to suspension of the resolution, Omnitel also requested prior referral to the European Court of Justice to ascertain whether community directives have been correctly interpreted.

Data transmission and Internet access services using X-DSL technology

Following the opening of an investigation into the supply by Telecom Italia of direct baseband circuits and the offer to its business customers of broadband Internet access and data transmission services based on X-DSL technology without a corresponding wholesale offer to competitors, in April 2001 the Competition and Market Authority imposed a fine of 59 million euros on Telecom Italia. In November 2001, the Regional Administrative Court of Lazio reduced the fine to 29 million euros, which was paid in January on a conditional basis, given Telecom Italia's intention of lodging an appeal with the Administrative Supreme Court. This appeal, for the annulment of the entire fine, on the grounds of a general lack of logic and defects in motivation and investigation, was subsequently filed.

Meanwhile, Albacom, Infostrada, AIIP, Unidata, Data Service and other operators filed claims for damages before the civil courts, alleging abuse of a dominant position by Telecom Italia in connection with the practices challenged by the Competition and Market Authority.

In January 2003, the Rome Court of Appeal sentenced Telecom Italia to pay damages totalling approximately 2 million euros to Albacom, Wind (formerly Infostrada), Cable & Wireless (formerly Unidata) and Data Service.

Similar claims for damages presented by other operators are still pending.

JJ 00195

Galactica dispute

In May 2001, a dispute arose between Telecom Italia and the Internet Service Provider Galactica S.p.A. (currently being wound up) for the non-renewal of an agreement regarding an experimental Internet access service at a flat rate. Claiming that failure to renew was unlawful, Galactica sued Telecom Italia for damages and filed an injunction against Telecom Italia interrupting the service.

In February 2002, Galactica filed another writ of summons for damages relating to alleged anti-competitive practices of Telecom Italia

In May 2002 the investigating magistrate unified the two lawsuits.

On 16 October 2002, the Servinternet S.p.A. company (formerly Galactica S.p.A.), which is being wound up, filed a third writ of summons on Telecom Italia in the Milan courts. This third suit has been unified with the other two being investigated by the same judge.

Alleged anti-competitive strategies of Telecom Italia

Following the complaint filed by 27 competing operators alleging anti-competitive market strategies by Telecom Italia, the Telecommunications Authority issued decision no. 179/01/CONS charging the Company with a series of breaches and commenced sanction proceedings with specific resolutions.

A counter-action against the decision and the subsequent resolutions has been filed with the Regional Administrative Court of Lazio.

In the meantime the Authority ordered Telecom Italia to pay two administrative fines for a total of approximately 150,000 euros; the Company has filed an appeal against the orders with the Regional Administrative Court of Lazio.

Seat Pagine Gialle/De Agostini

Arbitration is underway on the dispute referred by De Agostini against Seat Pagine Gialle, Finanziaria Web, Matrix and the Buffetti Group for alleged breaches of the agreement signed in 2000, which among other things regulates the acquisition of shareholdings in Finanziaria Web (which controls Matrix) by Seat and De Agostini. Claiming that the conditions required under the agreement had occurred, De Agostini is requesting the transfer to Seat of its Finanziaria Web shares for a price of 700 million euros, with payment beginning as from 30 June 2003.

Seat Pagine Gialle/Cecchi Gori

On 13 June 2002 the Rome courts dismissed the applications filed by Cecchi Gori Group Media Holding and Fin.Ma.Vi. to ascertain the nullity of the financial statements and related balance sheet as at 31 December 2000 of Cecchi Gori Communications - CGC (now Holding Media Communications) and to declare null the resolutions carried by the company's Shareholders' Meeting on 27 April 2001. Cecchi Gori Group Media Holding and Fin.Ma.Vi have appealed the dismissal and re-presented the applications filed in the first instance.

Still pending are: i) a ruling on the annulment of the contract pledging CGC shares to guarantee fulfilment of the undertakings set out in the contract under which Seat Pagine Gialle acquired control of CGC on 7 August 2000; ii) a ruling on the annulment of the resolution adopted by the extraordinary Shareholders' Meeting of CGC, to modify the quorums for resolutions adopted by the Board of Directors and the Shareholders' Meeting. Cecchi Gori Group Media Holding and Fin.Ma.Vi. have also begun arbitration proceedings on both matters.

JJ 00196

FastWeb

On 11 July 2001, Telecom Italia and FastWeb drew up a "Contract for access to and use of civil infrastructures" in compliance with the Competition & Market Authority ruling requiring Telecom Italia to make its civil infrastructures available to competitors for the supply of interactive and multimedia services, on non-discriminatory conditions and at cost-oriented prices.

On 29 August 2002, Fastweb filed a writ of summons against Telecom Italia requesting the determination and declaration of the exact consideration due for access to and use of such infrastructures in order to clarify interpretation of the clause regulating the price determination procedures.

With a counter-summons, Telecom Italia has requested payment of a consideration of approximately 46 million euros for the services pursuant to the contract.

Contribution as per art. 20, par 2 of Law no. 448 of 23.12.1998

Before the Regional Administrative Court of Lazio, Telecom Italia, TIM, Wind and Omnitel challenged the Ministerial Decree of 21 March 2000, implementing Law no. 448 of 23 December 1998, which, from 1 January 1999, introduced a new contribution to replace the concession fee. Infostrada and Albacom have presented extraordinary appeals to the Head of State against the same Decree.

With regard to the extraordinary appeals to the Head of State, the Administrative Supreme Court has raised the preliminary issue before the European Court of Justice of whether the contribution was compatible with EU directives concerning telecommunications.

Stet Hellas

In 1996 Mobitel, a company in the Greek Interamerican Group (now Demco Reinsurance) and at that time the sole agent of Stet Hellas, initiated arbitration proceeding to ascertain its right to receive fees not only on outgoing traffic generated by the subscribers it introduced, but also on incoming traffic and on traffic generated by late-paying customers. It also claimed payment of relevant damages and of damages relating to resolution of the sole agency by Stet Hellas.

Stet Hellas and Telecom Italia (which replaced Stet International, the former guarantor of Stet Hellas and as such party to the agreements signed at the time) filed a counter-claim for damages suffered as the result of non-acquisition of market share due to breach of contract by Mobitel.

An initial partial award (October 2000) was made in favour of Mobitel's claim for recognition of fees on incoming traffic; in November 2001 the arbitration panel asserted its competence regarding quantification of damages as well as the existence of a due amount. The parties notified their final compensation claims, which are approximately 140 million euros by Mobitel and approximately 890 million euros by Stet Hellas and Telecom Italia.

Nortel Inversora

In August 2001, a minority shareholder applied for a writ of summons for Nortel to appear before the Buenos Aires courts for a conciliation attempt (which proved unsuccessful), alleging irregularities in the shareholders' resolution approving the financial statements for the year closed on 31 December 2000.

The same shareholder had previously contested the shareholders' resolution approving the financial statements for the year closed on 30 September 2000. In September 2001 the Buenos Aires courts

JJ 00197

therefore issued a precautionary ruling suspending the effectiveness of the above-mentioned shareholders' resolutions .
In August 2002, at the request of the same shareholder, two additional but unsuccessful conciliation hearings were held with regard to alleged irregularities in the resolutions carried by the Nortel ordinary and special Shareholders' Meetings of 25 April 2002, which, among other things, approved the Nortel financial statements for financial 2001.
On 3 March 2003 a settlement was reached under which the minority shareholder has undertaken to desist from continuation of the suits filed against Nortel and its representatives and to not file other similar suits against Nortel and/or its representatives. The agreement is due to be submitted to the Buenos Aires courts for approval.

Brasil Telecom
Still pending are two lawsuits filed by Brasil Telecom in 2001 before the Rio de Janeiro civil courts (Brazil), respectively against Telecom Italia and Telecom Italia International and against two directors of Brasil Telecom appointed by Telecom Italia International. The plaintiff claims compensation for damages suffered as a result of the acquisition of CRT and non-participation in the SMP tender.

Chase Manhattan Bank dispute
On 5 April 2002, the US District Court judge for the District of Delaware dismissed Telecom Italia (on the grounds that it was no longer a direct shareholder of Iridium LLC) from the action initiated in June 2000 by Chase Manhattan Bank (now JP Morgan Chase Bank) with regard to the 800 million US dollar loan granted in 1998 to Iridium Operating LLC (a subsidiary of Iridium LLC).
Chase has appealed against the judge's ruling and has also summoned Iridium Italia S.p.A, in which Telecom Italia has a 30% shareholding (the remaining equity is equally owned by TIM and Telespazio) and which is a direct shareholder of Iridium LLC.

TIM PCS companies in Brazil
Following the dismissal of applications filed by local operators Telesp Celular and BCP for the precautionary suspension of the transfer of approximately 18.3% of the equity of Solpart from Telecom Italia International to Techold and Timepart, and of related administrative measures, BCP took out a suit against Anatel in the Brazilian Federal Court requesting that the assignment of PCS frequencies to TIM's Brazilian subsidiaries be annulled.

Bancomext/Etec S.A. dispute
On 12 August the Turin civil court issued a cautionary attachment on all the assets of Etec S.A. (a Cuban investee company of Telecom Italia) and Telan (the majority shareholder of Etec S.A., which is controlled by the Cuban government), including receivables due from third parties, up to an amount of 33 million euros.
This followed a complaint filed by Banco Nacional de Comercio Exterior ("Bancomext") that Etec S.A. and Telan had failed to comply with repayment and guarantee obligations – for a value to date of approximately 300 million US dollars – stipulated in a financing contract drawn up by Etec S.A., Telan, Bancuba (Cuba's central bank) and Bancomext. The attachment was subsequently notified to Telecom Italia, TIM, Intesa BCI and Deutsche Telekom, who have received a garnishment in respect of all payments to Etec S.A., up to an amount of 33 million euros.
TIM has already presented a negative third-party debtor declaration, pursuant to article 547 of the

JJ 00198

Italian code of civil procedure.
On 6 February 2002 Telecom Italia presented its positive third-party debtor declaration, pursuant to article 547 of the Italian code of civil procedure.

Teleque Communications S.p.A.
On 6 November 2002, Teleque Communications S.p.A. , which offers prepaid solutions for international telephone services, served a summons on Telecom Italia before the Rome Court of Appeal alleging anti-competitive practices and claiming damages of 65 million euros. Teleque Communications alleges that Telecom Italia obtained a competitive advantage by imposing additional costs on supply of its interconnection services, whereas Telecom Italia did not charge such costs to its end clients for prepaid international services.

Request of refund for Ministry of Defence charges for 900 band frequency release
With formal decrees issued in 2001, the Italian Ministries of Defence and of Communications quantified charges for the release of the band frequencies in question and debited such charges largely to TIM as the licensee of the TACS service. The band frequency release, however, was intended to broaden GSM frequencies, which were to be shared out among all operators.
The ministerial quantifications are deemed illegitimate since they are based on an incorrect interpretation of Ministerial Decree 113/98 governing these matters. An application for their annulment has therefore been filed with the Regional Administrative Court of Lazio.

Dispute with INPS
In compliance with Law no. 58/1992, Telecom Italia is required to provide full national insurance coverage for all persons employed as at 20 February 1992 by STET S.p.A., SIP S.p.A., Italcable S.p.A. and Telespazio S.p.A., as well as persons transferred from the Public Administration to IRITEL, including periods previously worked in other companies, through the "Fondo Previdenza Telefonici" (Telephone Sector Employees Pension Fund), which merged into the "Assicurazione generale obbligatoria" (compulsory general insurance scheme) on 1 January 2000. The contributions due are calculated by INPS (Italian National Insurance Board) and must be paid in 15 annual instalments.
The amount of the liability regarding the payments due is uncertain, in that Telecom Italia and INPS disagree on the method of calculating such amounts.
However, 595 million euros of outstanding amounts due to INPS relating to ex-IRITEL employees are included in the Telecom Italia Group financial statements at 31 December 2002.
Concerning the application and interpretation of the regulation, there is an ongoing dispute with INPS regarding both the starting date for the calculation of interest due, as per the aforementioned Law no. 58/1992, for the deferred payment of the amount, as well as the exclusion from the provisions of Law 58/1992 of all those employees (except for ex-IRITEL personnel) who had already requested full insurance coverage prior to 20 February 1992.
Telecom Italia has undertaken to pay on a conditional basis the amounts claimed by INPS according to its calculations, subject to adjustment in the event that the courts' final ruling should uphold the company's position.
According to Telecom Italia's estimates, the principal amount payable (excluding, as stated above, the portion relating to ex-employees of IRITEL) could vary, depending on the opposing interpretations and on evaluations which take account of all the employees involved, between 964 million euros and 1,289 billion euros approximately, of which an amount of 409 million euros has already been paid.

JJ 00199

In compliance with accepted accounting principles, a provision for an amount in line with the minimum estimated liability has been stated in the consolidated financial statements of the Olivetti Group at 31 December 2002, as a component of the goodwill arising on the acquisition of Telecom Italia.
Following an agreement between INPS and Telecom Italia, pre-amortisation interest (including interest relating to ex-IRITEL employees) was paid by Telecom Italia – on a conditional basis – in fifteen equal annual deferred instalments, inclusive of interest at 5% per annum, up to the end of 1999, for a total amount of 110 million euros, net of adjustment interest and some refunds paid by INPS.
The dispute was settled in the first half of 2002 with Supreme Court sentence no. 3398/2002 which found in favour of Telecom Italia, in conformity with the previous sentence no. 4242/2000 (following which payment of the above interest and the deferred interest relating thereto was suspended as from June 2000). A receivable of 131 million euros (including interest calculated at the conventional annual rate of 5%) therefore arose for the Telecom Italia Group, which has been fully offset on payment of the usual instalments.

JJ 00209

EVENTS SUBSEQUENT TO THE END OF THE FINANCIAL YEAR

Telecom Italia Group

Sale of Globo.com

On 15 January Telecom Italia Finance sold its 28.57% shareholding in Brazilian company Glb Serviços Interativos ("Globo.com") to TIM Brasil, for 15 million dollars. At the end of January, TIM Brasil in turn sold the shareholding to the Globo television group. The sale generated a net capital gain of 4 million euros for the Telecom Italia Group.

Renewal of first tranche of 2001 securitisation programme

On 22 January, the TI Securitisation Vehicle company renewed the first 100 million euro tranche of the asset-backed securities issued on 29 January 2001. The operation, which is part of the Telecom Italia telephone bill securitisation programme, is described in full in the Telecom Italia S.p.A. Explanatory Notes.

Early purchase of leased buildings

On 27 January procedures were completed for the early purchase from Teleleasing S.p.A. of 12 buildings (for approximately 300,000 m^2) used by Telecom Italia S.p.A. and other Group companies on a financial leasing basis. The operation generated a total financial outlay for the Telecom Italia Group of approximately 369 million euros.

Sale of Telecom Italia logistics business

On 27 January, Telecom Italia announced an agreement for the sale to TNT Logistics Italia of Telecom Italia customer wireline telephony product warehousing and distribution operations and network assistance and installation operations. The Telecom Italia business being sold to TNT Logistics includes 6 central warehouses and 100 advanced warehouses, which handle more than 4.5 million items annually (handsets and telephone parts). The agreement, designed to strengthen Telecom Italia's focus on its core business, became operational on 5 March 2003 following approval by the Antitrust Authority and completion of consultations with the trade unions.

LISIT Informatica

On 4 February 2003, as part of a temporary grouping of companies with Finsiel and Lutech (Lucchini Group), Telecom Italia was awarded a tender organised by the Regional Authority of Lombardy (through its subsidiary Lombardia Informatica S.p.A.) to supply goods and services for region-wide introduction and management of the "Regional Services Card".
The aggregate value of the contract awarded to the grouping led by Telecom Italia, over the term of the agreement, which expires in 2009, is approximately 350 million euros.
As required under the terms of the contract, Telecom Italia and Finsiel have purchased 35.2% of the share capital of LISIT, for a total outlay of 54 million euros.

Consodata stock purchase

On 12 February, Seat Pagine Gialle purchased 1,108,695 shares of ordinary stock of the French subsidiary Consodata S.A. – which is listed on the Nouveau Marché of the Paris Stock Exchange – after the founding partners exercised their put option as envisaged by the agreement signed by the previous management of Seat PG on 31 July 2000. As a result of the purchase, for an agreed price of 44 euros per share and a total value of approximately 48.8 million euros, Seat PG acquired a further 8.17% of the capital and voting rights in Consodata S.A., thereby increasing its stake to 98.60%.

JJ 00201

Bond reserved for employees

On 13 February 2003, the Telecom Italia Board of Directors adopted a resolution to reduce the bond reserved for employees from 1 billion euros to 400 million euros, by revoking the issue resolution for the part that had not yet been implemented.

Sale of Telekom Srbija

On 28 December 2002, the Telecom Italia Group announced an agreement for the sale of its 29% shareholding in Telekom Srbija to PTT Srbija. The agreement was finalised on 20 February 2003 and closing is expected to take place in June.

PTT Srbija will pay Telecom Italia 195 million euros, of which 120 million euros in four monthly instalments starting from February 2003, and the remaining amount in six half-yearly instalments beginning in January 2006. The stock involved in the transaction will be deposited with an international bank until payment is complete.

Telecom Italia – Hewlett-Packard agreement

On 21 February, Telecom Italia and Hewlett-Packard signed a five-year management services and outsourcing agreement worth 225 million euros. Under the agreement, HP is to provide asset management, help desk, maintenance and management services for 90,000 Telecom Italia workstations, leveraging the skills of approximately 600 specialists from IT Telecom, who will join a new HP unit specialised in the delivery of these services. IT Telecom will host the systems and manage HP operations for SAP environments.

The agreement is designed to help Telecom Italia strengthen its focus on its core business and achieve cost savings in distributed environment management. It will become operational once consultations with the unions have been completed and approval has been received from the Italian Antitrust authorities.

Approval of the 2002 interconnection price list by the Communication Authority

On 27 February 2003 the Infrastructures & Networks Commission of the Communication Authority approved the 2002 Reference Offer, now being notified, which Telecom Italia is to apply to competitors for use of its network as regards traffic interconnection services, the "billing and insolvency risk for Telecom Italia subscriber access to non-geographical numbers of other operators" service, unbundled access services. 2002 income takes account of the impact of this price list.

Megabeam acquisition agreement

In March 2003 Telecom Italia signed an agreement to purchase 100% of the share capital of Megabeam Italia S.p.A., Italy's first wireless Internet service provider, for an outlay of 11.5 million euros.

The acquisition is part of Telecom Italia's broadband strategy, where Wi-Fi wireless technology plays a key role in both residential and business solutions, since it enhances the functionality and flexibility of the company's innovative wireline access offer.

Megabeam provides Wi-Fi networking services to private locations and is currently running Wi-Fi service trials in public locations – major Italian airports and a leading hotel chain – through Wireless-LANs on the 2,400-2,483.5 bandwidth.

The execution of the agreement is subject to the approval of the Antitrust Authority.

Telecom Italia share buy-back

In connection with the share buy-back authorised by the Telecom Italia Shareholders' Meeting of 7 November 2001, from 1 January through 11 March 2003 Telecom Italia purchased 8,662,500 own savings shares for an average per-share price of 4.73 euros and a total outlay of 41 million euros, and 915,000 ordinary shares for an average per-share price of 6.83 euros and a total outlay of 6 million

JJ 00202

euros.
Therefore, until 11 March 2003 Telecom Italia purchased overall 54,309,500 own savings share for an average per-share price of 5.24 euros and a total outlay of 285 million euros, and 6,195,500 own ordinary shares for an average per-share price of 8 euros and a total outlay of 50 million euros.

Bond buy-back and subsequent cancellation
On 11 March 2003, the Telecom Italia Board of Directors carried a resolution for the buy-back, at the market price, and subsequent cancellation of a portion of the bonds subscribed by the subsidiary Telecom Italia Finance, up to a maximum amount of 2 billion euros. The purpose of the operation is to restore the balance between shareholders' equity and bond loans and finance bills, in connection with the proposal to distribute reserves up to a maximum of 1,333 million euros.

Other companies in the Olivetti Group

- On 10 January 2003, the multi-tranche benchmark bond issued by Olivetti Finance N.V. and guaranteed by Olivetti S.p.A. was successfully placed. The bond is part of the operations to re-finance debt and extend average maturity and does not imply any change in net financial indebtedness.

  As a result of solid investor demand, for approximately 4 billion euros, which reflected strong market interest, the bond amount was set at 3 billion euros to be divided into three tranches, for five, ten and thirty years. The 30-year eurobond, a novelty in the corporate sector, is the first public euro-denominated bond with such long maturity.

  The terms of the bond are as follows:

  first tranche

amount:	1,750 million euros
issue date:	24 January 2003
maturity:	24 January 2008
term:	5 years
coupon:	5.875% per annum
issue price:	98.937%
effective yield on maturity:	5.89% per annum, corresponding to a yield of + 225 basis points over the mid-swap rate

  second tranche

amount:	850 million euros
issue date:	24 January 2003
maturity:	24 January 2013
term:	10 years
coupon:	6.875% per annum
issue price:	99.332%
effective yield on maturity:	6.97% per annum, corresponding to a yield of + 255 basis points over the mid-swap rate

JJ 00203

third tranche

amount:	400 million euros
issue date:	24 January 2003
maturity:	24 January 2033
term:	30 years
coupon:	7.75% per annum
issue price:	98.239%
effective yield on maturity:	7.905% per annum, corresponding to a yield of + 300 basis points over mid-swap rate

The issue is part of Olivetti's Euro Medium Term Note (EMTN) programme.

On 28 January 2003, in response to the large number of applications and strong market interest, the thirty-year "Olivetti Finance N.V. 7.75% 2003-2033" bond issued on 24 January and guaranteed by Olivetti S.p.A. was re-opened. The bond is part of the operations to re-finance debt and extend average maturity and does not imply any change in net financial indebtedness.
The size of the operation was set at 400 million euros, bringing the total issue amount to 800 million euros; this made the bond eligible for inclusion in the top market indices and significantly improved liquidity to the benefit of investors.

The coupon and term are the same as the original loan and the issue price was set at 102.142% corresponding to an effective yield at maturity of + 287 basis points over the mid-swap rate.
The issue is part of Olivetti's Euro Medium Term Note (EMTN) programme.

* * *

Telecom Italia / Olivetti merger project

On 11 March 2003, the Boards of Directors of Olivetti and Telecom Italia adopted a project to simplify the Group's corporate structure by merging the two companies. Specifically, the project envisages the merger of Telecom Italia into Olivetti and is a key step in the industrial and financial restructuring process launched in July 2001 to create shareholder value.

JJ 00204

OPERATING OUTLOOK FOR 2003

Assuming that the dividend payout policy of the subsidiary Telecom Italia continues, Olivetti S.p.A. expects to post a positive full-year net result for financial 2003, before accounting for the impact of any extraordinary operations.

Group earnings, before amortisation of goodwill on the acquisition of Telecom Italia, will depend on the results reported by the Telecom Italia Group, which expects profitability to be substantially unchanged from financial 2002.

JJ 00205

PROPOSAL FOR THE COVERAGE OF THE PARENT COMPANY LOSS FOR 2002

The 2002 financial statements of the Parent Company Olivetti S.p.A. show a net loss of 6,239,962,549 euros and shareholders' equity at 31 December 2002 of 9,031,365,025 euros, as follows:

(in euros)		31.12.2002
I.	Share capital	8,845,239,632
I.bis	Share capital increase to be filed with the Companies Register	200,198
II.	Adfditional paid-in capital	3,765,365,301
II.bis	Additional paid-in capital in respect of capital increases to be filed with the Companies Register	126,941
III.	Revaluation reserves	1,128,827
IV.	Legal reserve	920,809,760
V.	Reserve for treasury stock	2,298,156
VII.	Other reserves	2,036,088,939
VIII.	Retained earnings and accumulated losses	(299,930,180)
	Total Share Capital and Reserves	15,271,327,574
IX.	Net loss for the year	(6,239,962,549)
Total		**9,031,365,025**

The Board of Directors proposes that the 2002 net loss of 6,239,962,549 euros be covered as follows:

- 1,888,261,068 euros through use of the Extraordinary Reserve (included under the heading Other reserves);
- 10,217,010 euros through use of Non-taxable reserves (including under the heading Other reserves), specifically:
  - 8,741,403 euros from the Reserve for research grants (law no. 346/1988)
  - 685,713 euros from the Reserve for technological innovation grants (law no. 46/1982)
  - 695,110 euros from the Reserve for capital investment grants (law no. 64/1986)
  - 94,784 euros from the Reserve for VAT deductions on capital investments;
- 18,598,579 euros through use of reserves previously tied to conversion of bonds and exercise of warrants, which have become available upon expiry of the relevant rights (included under the heading Other reserves), specifically:
  - 927,188 euros from the Reserve tied to conversion of Olivetti floating-rate 1998-2002 bonds
  - 163,110 euros from the Reserve tied to exercise of Olivetti 1998-2002 ordinary share warrants
  - 3,886,872 euros from the Reserve tied to exercise of Olivetti 1999-2001 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries;
  - 13,621,409 euros from the Reserve tied to exercise of Olivetti 2002-2004 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries.
- 1,128,827 euros through use of the Revaluation reserves;
- 920,809,760 euros through use of the Legal reserve;
- 126,941 euros through use of the Additional paid-in capital reserve in respect of share capital increases to be filed with the Companies Register;
- 3,400,820,364 euros through partial use of the Additional paid-in capital reserve, which will therefore reflect a residual balance of 364,544,937 euros.

Additionally, the Board of Directors proposes that the Accumulated losses of 299,930,180 euros be covered through partial use of the Additional paid-in capital reserve, which will therefore reflect a residual balance of 64,614,757 euros.

The Board of Directors

JJ 00213

Explanatory Notes

Form and content of the financial statements

The financial statements for the year closed at 31 December 2002 have been prepared and presented in accordance with the Italian Civil Code interpreted by the accounting principles established by the Italian Accounting Profession ("Consigli Nazionali dei Dottori Commercialisti e dei Ragionieri"). They comprise the Balance Sheet (prepared in accordance with the formats specified in articles 2424 and 2424 bis of the Italian Civil Code), the Income Statement (prepared in accordance with the formats specified in articles 2425 and 2425 bis of the Italian Civil Code) and these Explanatory Notes.

The Explanatory Notes are provided to illustrate, analyse and supplement the data reported in the financial statements with the information required by article 2427 of the Italian Civil Code, by other provisions of Legislative Decree no. 127/1991, or by other laws; they also provide additional information, even where not required by specific legislation, if deemed necessary to present a true and fair view.

The Explanatory Notes also include information relating to holding companies requested by the Italian Securities and Investment Board (CONSOB) in communication no. 94001437 of 23 February 1994.

Accounting policies in the valuation of financial statement items, in value adjustments and in translation of values not originally denominated in euros

The most significant accounting policies adopted for the financial statements for the year to 31 December 2002, in compliance with article 2426 of the Italian Civil Code, are as follows:

1) Intangible fixed assets

Intangible fixed assets are stated at purchase or production cost including related accessory charges, and are amortised over their residual useful life.
Start-up and expansion costs and purchased goodwill are amortised over five and ten years respectively. Intangible fixed assets are written down to reflect any other than temporary impairment in value; their book value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

2) Tangible fixed assets and depreciation

Tangible fixed assets are stated at purchase or construction cost, which includes financial charges incurred over the period of construction of the asset, if this period is of significant duration, up to the time the asset enters service. Assets are written down to reflect any other than temporary impairment in value; the original value is reinstated in subsequent periods if the reasons for such writedowns no longer exist.

00214

Ordinary depreciation is provided on a straight-line basis using rates that reflect the residual useful life of the assets concerned.
The Company also provides accelerated depreciation for some categories of assets in order to obtain the benefits deriving from deferred taxation, as allowed by current tax legislation.
Ordinary maintenance costs are charged in full to income; costs incurred that extend the useful life of assets are capitalised as part of the said assets and depreciated over the remaining useful life thereof.

3) Equity investments and securities held as financial fixed assets

Equity investments held as fixed assets are stated at purchase cost (LIFO method with annual layers), written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such writedowns no longer apply.
Securities held as fixed assets are valued at purchase cost (LIFO method with annual layers), adjusted on an accrual basis for the difference between such cost and the redemption value, written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

4) Accounts receivable and payable

Accounts receivable are stated at estimated realisable value and classified under financial fixed assets or current assets. Accounts payable are stated at face value.

5) Equity investments and securities not held as financial fixed assets

Securities and equity investments in listed companies held as current assets are valued at the lower of cost and market value, the latter being determined on the basis of the stock market prices at the end of December; if the reasons for writedowns no longer apply, the original value is reinstated in subsequent years to the extent that it does not exceed the original cost.

Securities purchased through reverse repurchase agreements with an obligation of resale on maturity are classified as financial assets not held as fixed assets and stated at purchase cost.
Income and charges relating to such transactions are calculated taking into account both the difference between the spot and forward prices and the income generated by such assets over the duration of the operation and are recorded on an accrual basis.

6) Accruals, prepayments and deferrals

Costs and income common to two or more financial years are recorded under this heading to reflect the accrual accounting principle.

7) Reserves for risks and charges

Specific reserves are provided to cover known or likely losses or liabilities of a given nature, the extent or timing of which are uncertain at the end of the year; the provisions reflect, therefore, the best estimate based on the information available.

00215

8) Employee severance indemnities

This provision is formed in accordance with current legislation and labour contracts and reflects the liability accrued to all employees at the balance-sheet date.

9) Revenues

Revenues from services are credited to income at the time the services are provided.

10) Research and development

Interest-relief grants on financial charges accruing on research loans are accounted on an accrual basis and credited directly to income for the year against financial charges.

11) Exchange rate differences arising on transactions in foreign currency and translation criteria for foreign currency items

Receivables and payables denominated in non-EMU currencies are originally translated into euros by adopting the accounting rates at the date of the respective transactions. Exchange rate differences arising at the time of collection of receivables or settlement of payables in non-EMU currencies are credited or charged to income.
Gains or losses on payables and receivables arising from application of the exchange rates in force in December are credited or charged to income for the year.
Total exchange rate differences are illustrated in the specific comment on financial income and charges.

12) Forward currency transactions

As regards forward purchase or sale transactions of foreign currency at pre-arranged exchange rates in respect of specific receivables and payables expressed in foreign currency, i.e., in respect of a net exposure in foreign currency, the difference between the exchange rate at the transaction date and the pre-arranged forward exchange rate is charged to income for the duration of the said transaction; furthermore, gains or losses arising from differences between the spot exchange rate at the transaction date and the spot exchange rate at the balance-sheet date are credited or charged to income, if gains or losses in respect of the foreign-currency assets and liabilities to which the transactions refer are also credited or charged to income.

Gains or losses arising from other forward purchases or sales of foreign currency at pre-arranged exchange rates, determined by reference to the comparable forward rates at the balance-sheet date, are credited or charged to income.

13) Forward interest rate transactions

Interest rate differentials to be paid or received on interest rate swaps and similar transactions accruing at the balance-sheet date are posted to income on an accrual basis under financial income and charges.
Considerations for options acquired or sold in connection with forward interest rate transactions are posted to income over the duration of the options.

00216

14) Dividends

Dividend income and the relative tax credit from subsidiary companies are entered on accrual, that is, in the year such income is formed; dividends from other equity investments are recorded on collection.

15) Capital gains from contributions in kind

Capital gains from corporate demergers and subsequent contributions are classified as extraordinary income.

16) Value adjustments and provisions charged exclusively for tax purposes

Value adjustments and provisions charged exclusively for tax purposes, comprising accelerated depreciation as allowed under specific tax laws and writedowns on equity investments, are carried in the respective income headings.

17) Income taxes

Current tax liabilities are provided, where applicable, as amounts due to tax authorities, based on a reasonable estimate of taxation for the year. In addition, in accordance with the tax liability method, deferred taxes or prepaid taxes are recognised on all temporary differences between the book values of assets and liabilities and their corresponding tax values, applying tax rates expected in the periods in which the temporary differences will be reversed.
The benefit of tax-loss carryforwards is recognised when a reasonable certainty exists that future taxable income will be available against which such carryforwards can be utilised, in accordance with current legislation.

18) Grouping of financial statement headings

The financial statements at 31 December 2002 do not include any groupings of headings.

20) Exceptions allowed under paragraph 4, article 2423 of the Italian Civil Code.

No exceptions were applied in the attached financial statements pursuant to paragraph 4, art. 2423 of the Italian Civil Code.

JJ 00217

Comments on assets

B) Fixed assets

I. Intangible fixed assets

Net intangible fixed assets at 31 December 2002 amounted to 179.4 million euros (249.7 million euros at 31 December 2001).

	Net value at 31.12.2001	New costs	Amortisation charges	Net value at 31.12.2002
1) Start-up and expansion costs	81,096,623	-	(30,600,392)	50,496,231
3) Industrial patents and intellectual property rights	1,033	-	(1,033)	-
7) Other				
- Extraordinary maintenance and leasehold improvements	3,197,051	171,833	(1,006,708)	2,362,176
- Costs relating to the issue of bonds	85,100,888	-	(17,385,222)	67,715,666
- Costs relating to borrowings, sustained by Tecnost S.p.A. (merged into Olivetti in 2000)	80,327,011	-	(21,532,049)	58,794,962
	168,624,950	171,833	(39,923,979)	128,872,804
Total	**249,722,606**	**171,833**	**(70,525,404)**	**179,369,035**

Start-up and expansion costs at 31 December 2002 amounted to 50.5 million euros and included guarantee commissions connected with share capital increases. These costs are amortised over five years.

Extraordinary maintenance and leasehold improvements included expenses incurred for the renovation of the building provided on a free loan basis, as a contribution in kind, to the "Associazione Interaction Design Institute" of Ivrea; these costs are amortised over the term of contracts. Net value at 31 December 2002 was 2.4 million euros.

Costs relating to the issue of bonds and to borrowings amounted to 126.5 million euros at 31 December 2002 and referred to bonds issued in previous years including bonds issued by Tecnost S.p.A. (merged with Olivetti in 2000).

Total accumulated depreciation	**23,149,426**	**1,194,871**	**(294,438)**	**24,049,859**

Ordinary depreciation was provided at rates deemed to reflect the residual useful life of the tangible fixed assets in question.

The rates applied, reduced by 50% for assets acquired during the year, were as follows:

Plant and machinery	10% - 20%
Industrial and commercial equipment	20% - 40%
Other assets:	
Electronic office machines	20%
Office furniture and fittings	12%
Motor vehicles	25%

JJ 00220

At 31 December 2002 fixed assets were depreciated by 95.71%, compared with 91.29% at the end of 2001.
Accelerated depreciation for the year and previous years, charged in accordance with current tax laws, was classified as a deduction of the relevant asset items.

III. Financial fixed assets

Equity investments

Equity investments at 31 December 2002 totalled 22,887.5 million euros, a decrease of 8,521.8 million euros from 31 December 2001, as analysed below:

	Net book value
As of 31 December 2001	**31,409,304,298**
Acquisitions, capital subscriptions, replenishment of losses and other disbursements	224,595,924
Disposals	(405,281,584)
Write-downs	(8,341,081,271)
	(8,521,766,931)
As of 31 December 2002	**22,887,537,367**

Changes were as follows:

. acquisitions of shares or quotas in the following companies for 67.3 million euros:
- 7.5 million euros Thema S.p.A.
- 14.9 million euros Mediobanca S.p.A.
- 44.6 million euros Tiglio I S.r.l.
- 0.3 million euros In.Tel. Audit S.c.r.l.

. share capital increases and other disbursements for 20.6 million euros relating to:
- 20.0 million euros Olivetti Multiservices S.p.A.
- 0.5 million euros Eurofly Services S.p.A.
- 0.1 million euros OMS 2 S.r.l.

. replenishment of losses and capital increase for 136.7 million euros relating to Olivetti Finance N.V.;

. disposals of equity investments in the following companies for 405.3 million euros:
- 150.2 million euros OMS 2 S.r.l.
- 192.0 million euros SEAT Pagine Gialle S.p.A.
- 49.1 million euros Webegg S.p.A.
- 14.0 million euros Tredicimarzo S.r.l.

. writedowns totalling 8,341.1 million euros on the following equity investments:
- 106.4 million euros Olivetti Tecnost S.p.A.

JJ 00221

- 183.6 million euros Olivetti Finance N.V.
- 8,051.1 million euros Telecom Italia S.p.A.

During the year the OMS 2 s.r.l. company was formed and the real-estate assets of Multiservices S.p.A. were transferred to the new company under Project Tiglio. OMS 2 s.r.l. was subsequently sold to Tiglio I generating a capital gain of 71.9 million euros.

The equity investment in Telecom Italia S.p.A. during the year 2002 was written down by approximately 8,051 million euros, in compliance with current tax regulations, for tax benefit purposes only.
Likewise, during 1999 the same investment in Telecom Italia and that in Olivetti International were written down by 2,166 million euros. The Company collected, during 2002, from Telecom Italia S.p.A. dividends amounting to approximately 832 million euros (392 million of which in December) deriving from the distribution of income reserves formed prior to the acquisition of Telecom Italia. Such dividends were credited to income and not considered as a reduction of the equity investment.
Subsequently, as a result of the afore-mentioned writedowns, the higher equity investment would be considered reduced from 10,217 million euros to 9,385 million euros as the writedown applied in 1999, in compliance with tax regulations, can be considered partially reduced by the amount of the dividends themselves.
If all the above-mentioned operations would have not been effected, the net shareholders' equity at 31 December 2002 would have shown an increase of approximately 8,217 million euros (net of the relevant tax effect equal to about 1,168 million euros) and the financial years' net result would have shown an improvement of approximately 6,300 million euros (net of the relevant tax effect equal to about 919 million euros).

The breakdown of the opening balances for equity investments classified as financial fixed assets was as follows:

	Shares/quotas at 31.12.2001	Original cost	Losses and write-downs	Replenishments and value restorations	Book value at 31.12.2001

(**) 39.52% (54.94% of the voting rights) taking account of the shares classified as current assets.

(***) The share capital is denominated in Italian Lira

(0) Controlled indirectly through Telecom Italia S.p.A.

JJ 00224

A comparison of the book values of equity investments in subsidiary companies and the corresponding portions of shareholders' equity adjusted for consolidation purposes shows aggregate equity investment book value to be 18,845.3 million euros higher than aggregate shareholders' equity portions:

(in millions of euros)	Book value of equity investments (a)	Portion of net equity as adjusted for consolidation purposes attributable to the Parent Company (b)	Differences (a-b)
Equity investments the book values of which are lower than the pro-quota net equity of the relevant subsidiaries, as adjusted for consolidation purposes:			
Olivetti Multiservices S.p.A.	36.9	44.3	(7.4)
Olivetti Finanziaria Industriale S.p.A.	35.1	37.0	(1.9)
Thema S.p.A.	7.5	7.7	(0.2)
	79.5	89.0	(9.5)
Equity investments the book values of which are higher than the pro-quota net equity of the relevant subsidiaries, as adjusted for consolidation purposes:			
Telecom Italia S.p.A.	22,089.5	3,345.4	18,744.1
Olivetti International S.A.	420.9	373.9	47.0
Olivetti Finance N.V.	-	(24.3)	24.3
Olivetti Tecnost S.p.A.	101.6	62.5	39.1
Global Gaming Investments S.p.A. (in winding-up)	1.3	1.0	0.3
	22,613.3	3,758.5	18,854.8
	22,692.8	**3,847.5**	**18,845.3**

The difference between the book value of the Telecom Italia S.p.A. equity investment and the corresponding portion of shareholders' equity adjusted for consolidation purposes (18,744.1 million euros) is 6,363.7 million euros lower than the difference in 2001. This is due to the writedown of 8,051.1 million euros applied purely for fiscal purposes pursuant to article 2426 par 2 of the Italian Civil Code, offset by the effect of the dividends distributed during the year.
The liabilities arising from the risk of uncollectibility of the higher amount of the other investments (110.7 million euros) are included in the reserve for risks and charges.

Total amounts due after 12 months	**70,060,997**	**61,424,000**	**8,636,997**

The 4.6 million euros decrease in receivables due within 12 months from third parties compared with 31 December 2001 (13.6 million euros) was largely due to collection of receivables from Getronics Solutions Italia S.p.A. (2.6 million euros) and receivables for grants pursuant to Law 346/1998 (1.8 million euros).

Amounts due after 12 months totalled 70.1 million euros (61.4 million euros at 31 December 2001) and related in the main to a long-term loan granted to Tiglio I S.r.l. (15.8 million euros) due in December 2009 and an interest-bearing restricted deposit (40.5 million dollars at 31 December 2002), established with a leading bank to guarantee cover for any residual liabilities, in favour of Getronics (formerly Wang Laboratories).

A currency hedging contract was arranged on the deposit through a forward sale of dollars against euros. It totalled 40.5 million euros at 31 December 2002.

Treasury stock

At 31 December 2002 the Parent Company held 2,697,500 own ordinary shares (formerly savings shares converted into ordinary shares in 2000), including shares acquired from employees, for a par value, following the re-denomination of share capital in euros, of 2.7 million euros, and recorded at cost at 2.3 million euros; a special restricted reserve is carried under shareholders' equity for the same amount.

JJ 00227

Receivables due within 12 months amounted to 1,333.9 million euros, a net increase of 496,4 million euros compared with 31 December 2001.

The change arose largely as a result of an increase in receivables due from subsidiaries (81.4 million euros) in respect of ceded tax credits, an increase in financial receivables due from subsidiaries (104.2 million euros) and an increase in amounts due from tax authorities (205.2 million euros) mainly in connection with tax credits on dividends.

With the participation of Telecom Italia S.p.A. to the Group VAT system in 2002, Olivetti S.p.A. also had a receivable of 213.9 million euros due from Telecom Italia S.p.A. for VAT payables.
These higher receivables were offset by decreases in amounts due from accrued dividends (37.7 million euros), related tax credits (21.2 million euros) and amounts due from insurance companies (18.2 million euros).

Receivables due after 12 months

The balance on this heading at 31 December 2002 was 609 million euros and referred entirely to prepaid taxes arising largely from the allocation on five years of the tax benefit on the Telecom Italia S.p.A. investment writedown (8,051.1 million euros).

III. Financial assets not held as fixed assets

Other equity investments

These assets amounted to 2.7 million euros at 31 December 2002, and referred to equity investments acquiring for trading purposes in:
- Biesse S.p.A. 0.6 million euros;
- Datalogic S.p.A. 2.1 million euros;

The decrease of 4.5 million euros compared with 31 December 2001 was largely due to the sale of the equity investment in Lottomatica S.p.A. (3.3 million euros).

Miscellaneous securities

	31.12.2002	31.12.2001	Changes	Market value
Treasury Certificates (C.C.T.)	31,559,665	46,716,156	(15,156,491)	31,488,810

Total	**414,077,727**	**502,990,178**	**(88,912,451)**

Prepaid expenses in respect of financial charges (405.2 million euros) consist mainly of future-year portions of the redemption premium on the convertible bonds issued in 2001.

JJ 00229

Comments on liabilities and shareholders' equity

A) Shareholders' equity

I. Share capital

The share capital of Olivetti S.p.A. at 31 December 2002, fully subscribed, paid-up and filed with the Companies Register, was represented by 8,845,239,632 ordinary shares with a par value of 1 euro each (8,783,701,564 ordinary shares at 31 December 2001) for an aggregate value of 8,845,239,632 euros (8,783,701,564 euros at 31 December 2001).

The following operations determined the net increase of 61,538,068 euros during 2002:

- share capital increases subscribed by 31 December 2001 for an aggregate amount of 839,593 euros through the issuance of 839,593 ordinary shares filed with the Companies Register in 2002, in accordance with article 2444 of the Italian Civil Code, as follows:
  - share capital increase of 780,895 euros par value through the issuance of 780,895 ordinary shares, following conversion of a similar number of "Olivetti floating rate1998-2002" bonds;
  - share capital increase of 52,575 euros par value through the issuance of 52,575 ordinary shares following exercise of a similar number of "Olivetti 1998-2002 ordinary share warrants";
  - share capital increase of 6,123 euros par value through the issuance of 6,123 ordinary shares, following exercise of 12,246 "Olivetti 2001-2002 share warrants";

- share capital increases for 26,954 euros par value through the issuance of 26,954 ordinary shares following exercise in December 2001 of 21,033 "Olivetti 1998-2002 ordinary share warrants" and 11,842 "Olivetti 2001-2002 share warrants" in respect of which the corresponding shares had not yet been issued at 31 December 2001;

- share capital increases for 28,797,733 euros par value through the issuance of 28,797,733 ordinary shares following conversion of a similar number of "Olivetti floating-rate 1998-2002" bonds with a par value of 1,000 Italian each (equivalent to 0.5165 euro), after utilisation of 13,924,945 euros from the "Reserve tied to conversion of Olivetti floating rate 1998-2002 bonds" formed following re-denomination of share capital in euros;

- share capital increases for 22,831,828 euros par value through the issuance of 22,831,828 ordinary shares following exercise of a similar number of "Olivetti 1998-2002 ordinary share warrants"; the shares were issued:
  - for 11,791,655 euros against payment of 0.5165 euros (equivalent to 1,000 Italian lire) per share;
  - for 11,040,173 euros on a free basis through use of the "Reserve tied to exercise of Olivetti 1998-2002 ordinary share warrants" formed following re-denomination of share capital in euros;

- share capital increases for 134,430 euros par value (in addition to a share premium of 215,088 euros) through the issuance of 134,430 ordinary shares following conversion of a similar number of "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium";

JJ 00230

- share capital increases for an aggregate amount of 5,654,982 euros par value through the issuance at par of 5,654,982 ordinary shares reserved for managers of the Parent Company and its subsidiaries following exercise of a similar number of "Olivetti 1999-2001 share warrants";

- share capital increases for 2,688 euros par value (in addition to a share premium of 8,114 euros) through the issuance of 2,688 ordinary shares following exercise of 2,400 "Olivetti ex Tecnost 1999-2004 warrants" on an exchange basis of 1.12 Olivetti shares per warrant; the issuance was effected:
  - for 620 euros against payment;
  - for 2,068 euros on a free basis through use of the "Reserve tied to exercise of ex Tecnost 1999-2004 warrants" formed following re-denomination of Tecnost S.p.A. share capital in euros;

- share capital increases for 20,460 euros par value (in addition to a share premium of 17,739 euros) through the issuance of 20,460 ordinary shares following exercise of 40,920 "Olivetti 2001-2002 ordinary share warrants";

- share capital increases for 3,229,400 euros par value through the issuance at par of 3,229,400 ordinary shares following conversion of a similar number of "Olivetti 1.5% 2001-2010 convertible bonds with redemption premium".

Future potential changes in share capital

The following were still outstanding at 31 December 2002:

- 137,355,625 "Olivetti ex Tecnost 1999-2004 warrants" for subscription of 153,838,300 Olivetti ordinary shares (at a rate of 1.12 Olivetti shares for each warrant exercised) at the originally planned price per share of 2.80 euros with a 15% annual increment, for the period between 20 August 1999 and the execution date of the respective applications; the price therefore ranges (following adjustment in respect of the share capital increases executed in 2001) from 3.780 euros in the case of warrants exercised in January 2003 to 4.626 euros in relation to warrants that will be exercised in June 2004.
  Consequently, should all warrants outstanding at 31 December 2002 be exercised, the aggregate value of the share capital increase, including the share premium, would vary from a minimum of 581,508,774 euros (January 2003) to a maximum of 711,655,976 euros (June 2004), with an additional amount of 118,369,170 euros from utilisation of pre-established free share capital increase reserves;
- 487,409,258 "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium" net of 2,618 bonds for which applications for conversion into shares had been received at 31 December 2002, thus reducing the value of outstanding bonds with counter-item represented by a payable due to future shareholders (the corresponding shares were issued on 15 January 2003). A total of 487,409,258 Olivetti ordinary shares could still be issued in respect of the outstanding bonds, for an aggregate par value of 487,409,258 euros (plus a share premium of 779,854,813 euros);
- 2,409,663,062 "Olivetti 1.5% 2001-2010 convertible bonds with redemption premium" net of 14,210 bonds for which applications for conversion into shares had been received at 31 December 2002, thus reducing the value of outstanding bonds with counter-item represented by a payable due to future shareholders (the corresponding shares were issued on 15 January 2003). A total of 2,409,663,062 Olivetti shares could still be issued at par in respect of the outstanding bonds for an aggregate par value of 2,409,663,062 euros.

JJ 00231

The Board of Directors' meeting of 24 February 2000 implemented the proxy granted pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Shareholders' Meeting of 7 April 1999 to carry a resolution for a Three-Year Stock Option Plan from 1 January 2002 to 31 December 2004, assigning to approximately one hundred managers of the Parent Company and its subsidiaries 29,500,000 free warrants for subscription of an equal number of Olivetti ordinary shares at a price of 3.308 euros per share (after adjustment for the share capital increases of 2001) corresponding to the fair value of Olivetti ordinary shares at the date of the Board of Directors' meeting.
The stock options were to have been exercised in three groups in the period between 2 November and 15 December of 2002, 2003 and 2004 and could be accumulated until the end of the Plan. Subsequently, the Board of Directors' meeting of 9 February 2001 passed a resolution to reverse the previous resolution of 24 February 2000 and to raise share capital by an aggregate amount of 29 million euros through issue of 29 million shares at a subscription price of 2.515 euros per share (after adjustment for the share capital increases of 2001). The shares are reserved for managers of the Parent Company and its subsidiaries and service the warrants to be assigned to such managers under the "February 2002 – December 2004 Three-Year Stock Option Plan", with no changes to terms and conditions applying to stock options already assigned to managers on the payroll as of 24 February 2000 who had since left the Group's employ (a total of 1,330,000 rights).

Proxies assigned to Directors

The Extraordinary Shareholders' Meeting held on 7 April 1999 granted the following powers to the Directors, pursuant to arts. 2443 and 2420 ter of the Italian Civil Code, for a period of five years as from the date of the resolution:

a) to increase share capital in one or more tranches, for a maximum par value of 5 thousand billion Italian lire (2,582.3 million euros), on a free and/or payment basis, with or without share premium, through the issuance of ordinary shares and/or shares serviced with various rights, with the same characteristics as the outstanding shares, to be assigned or offered to parties with entitlement thereto, giving the Directors the right to establish, case by case, the categories of the shares, the issue price thereof, the dividend due date, the appropriation of share capital increase to service the conversion of bonds including bonds issued by third parties, both in Italy and abroad, and/or warrants, as well as the right to appropriate the increase or the increases (within the time limits set forth in art. 134 of Legislative Decree no. 58/1998), also via options, warrants, or similar rights, to employees of the Company, its controlling company and its subsidiary companies;

b) to issue bonds, in one or more tranches, and/or bonds convertible into ordinary shares and/or serviced with various rights, with the same characteristics as the outstanding bonds, with or without warrants, also issued in foreign currency, to be offered with pre-emptive rights to parties with entitlement thereto, for a maximum amount of 8 thousand billion Italian lire (4,131.7 million euros), within the limits permitted under law, on a case-by-case basis, with the consequent share capital increase to service the conversion of bonds and/or exercise of warrants, establishing the procedures, terms, conditions and regulations thereof.

On 13 October 2001, the Extraordinary Shareholders' Meeting resolved to grant proxies authorising the Directors, in accordance with article 2443 of the Italian Civil Code, to raise share capital on one or more occasions over a five-year period from the date of the resolution, by a maximum of 7 billion euros (par value) through the issuance of shares to be assigned or offered with pre-emptive rights to entitled parties and to issue bonds and/or convertible bonds – in accordance with article 2420 ter of the Italian Civil Code – up to a maximum of 10 billion euros (par value), on one or more occasions over a five-year period from the date of the resolution. These proxies are additional to existing proxies for remaining sums.

JJ 00232

The Shareholders' Meeting of 8 May 2002 upheld the Board of Directors' proposal of 13 October 2001 and passed a resolution to revoke the non-utilised portions of the proxies pursuant to articles 2443 and 2420 ter granted with the resolutions carried by the Shareholders' Meetings of 7 April 1999 and 13 October 2001 (amounting respectively to a maximum of 6,740 million euros and 10,051 million euros). Therefore any future operation on capital or any operation that may have an effect on capital (to be executed directly or through a request for new proxies, by means of issuance of shares, convertible bonds or bonds with warrants, warrants, options or other similar rights to the Company shares) will be submitted for Shareholder approval on a case-by-case basis.
The Shareholders' Meeting of 8 May 2002 also passed a resolution empowering the Directors, pursuant to article 2420 ter of the Italian Civil Code, to issue bonds in euros or foreign currency, in one or more instances, over a maximum period of five years as from the date of the resolution, for a maximum aggregate amount of 9 billion euros, within the limits permitted under law on a case-by-case basis, and to establish the procedures, terms, conditions and regulations thereof. These bonds might be convertible into the shares of other companies, and might or might not bear warrants for the purchase of shares of other companies.

I. bis Share capital increases to be filed with the Companies Register pursuant to art. 2444 of the Italian Civil Code

The balance on this heading amounted to 200,198 euros at 31 December 2002 (839,593 euros at 31 December 2001). It reflects the par value of the shares issued by the Company in respect of share capital increases effected in 2002, which had not been filed with the Companies Register by the end of the year (141,134 shares from the exercise of 282,268 "Olivetti 2001-.2002 ordinary share warrants", 2,861 shares from the conversion of a similar number of "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium" and 56,203 shares from the conversion of a similar number of "Olivetti 1.5% 2001-2010 convertible bonds with redemption premium").

I.ter Share capital increase payments relating to shares to be issued

At 31 December 2002 the balance on this heading was zero, compared with 26,954 euros at 31 December 2001.

II. Additional paid-in capital

This reserve amounted to 3,765,365,301 euros at 31 December 2002 compared with 3,765,113,918 euros at 31 December 2001, a net increase of 251,383 euros which reflected the following movements:

- 10,442 euros relating to 12,044 shares (issued at 1.867 euros per share) arising from the exercise in December 2001 of a similar number of "Olivetti 2001-2002 share warrants", for which the relevant shares were issued in 2001 and registered in 2002 (6,123 shares) or issued and registered in January 2002 (5,921 shares);
- 215,088 euros relating to 134,430 shares issued following conversion of a similar number of bonds (with a par value of 2.60 euros per bond) of the series "Olivetti 1.5% 2001-2004 convertible with redemption premium";
- 17,739 euros relating to 20,460 shares issued (at a price of 1.867 euros per share) following exercise of 40,920 "Olivetti 2001-2002 share warrants";
- 8,114 euros relating to 2,688 shares issued following exercise of 2,400 "Olivetti ex Tecnost 1999-2004 warrants" at a price of 3.249 euros per share.

06283

II. bis Additional paid-in capital in respect of share capital increases to be filed with the Companies Register and of shares to be issued

This reserve amounted to 126,941 euros at 31 December 2002 (10,442 euros at 31 December 2001) and comprised 122,363 euros for 141,134 shares arising from the exercise (at a price of 1.867 euros per share) of 282,268 "Olivetti 2001-2002 share warrants" and 4,578 euros for 2,861 shares arising from the conversion of a similar number of bonds with a par value of 2.60 euros per bond from the series "Olivetti 1.5% 2001-2004 with redemption premium".

III. Revaluation reserves

This heading refers to the Revaluation reserve previously stated in the books of the merged company Tecnost S.p.A. and re-formed in the books of Olivetti S.p.A. following the merger with effect from 31 December 2000; at 31 December 2002 it amounted to 1,128,827 euros, unchanged from 31 December 2001.

IV. Legal reserve

This reserve amounted to 920,809,760 euros at 31 December 2002 (unchanged from 31 December 2001).

V. Reserve for treasury stock

This reserve of 2,298,156 euros reflects the value of 2,697,500 shares issued and held by the Company and carried in the balance sheet under the appropriate financial fixed assets heading, in accordance with art. 2357 ter of the Italian Civil Code: it cannot be distributed while own shares continue to be held.

VII. Other reserves

At 31 December 2002 these reserves reflected an aggregate amount of 2,036,088,939 euros compared with 2,061,056,125 euros at 31 December 2001, a total net decrease of 24,967,186 euros.

a) Extraordinary reserve
At 31 December 2002 this reserve amounted to 1,888,261,068 euros (unchanged from 31 December 2001).

b) Restricted reserve tied to exercise of Olivetti ex Tecnost 1999-2004 warrants
This reserve is irrevocably tied to exercise of "Olivetti ex Tecnost 1999-2004 warrants". At 31 December 2001 it amounted to 118,369,170 euros compared with 118,371,238 euros at 31 December 2001; the decrease of 2,068 euros was due to the exercise of 2,400 warrants during the year. The reserve was formed following the free share capital increase at Tecnost S.p.A. and the simultaneous re-denomination of share capital in euros; at the moment of exercise of the warrants, the unit amount of 1,436.27 Italian lire (equal to the difference between the unit counter-value of 1 euro, namely 1,936.27 Italian lire, and the pre-existing par value of 500 Italian lire per share) will be transferred to share capital in the form of a free share capital increase, as well as to take account of the joint exchange ratio of 1.12 Olivetti shares for each ex-Tecnost warrant following the merger of Tecnost S.p.A. into and with Olivetti S.p.A..

JJ 00234

c) *Restricted reserves tied to conversion of Olivetti bonds and exercise of Olivetti warrants*
These reserves (formed following the re-denomination of Olivetti share capital in euros) amounted to an aggregate 19,241,691 euros at 31 December 2002 compared with 44,206,809 euros at 31 December 2001. The decrease of 24,965,118 euros reflects:

- for 13,924,945 euros, use of the "Reserve for conversion of Olivetti floating rate 1998-2002 bonds" (which decreased from 14,852,133 euros to 927,188 euros) following conversion of 28,797,733 bonds;
- for 11,040,173 euros, use of the "Reserve for exercise of Olivetti 1998-2002 ordinary share warrants" (which decreased from 11,203,283 euros to 163,110 euros) following exercise of 22,831,828 warrants.

At 31 December 2002 the heading also included the "Reserve for exercise of Olivetti 2002-2004 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries" for 14,264,521 euros, unchanged from 31 December 2001, (and for 643,112 euros still restricted as tied to the exercise of no. 1,330,000 warrants still outstanding) and the "Reserve for exercise of Olivetti 1999-2001 subscription rights (warrants or options) reserved for managers of Parent Company and its subsidiaries" for 3,886,872 euros, also unchanged from 31 December 2001.
After closure of the conversion period for Olivetti 1998-2002 floating rate bonds and the exercise periods for Olivetti 1998-2002 share warrants, Olivetti 1999-2001 subscription rights, and no. 28,170,000 Olivetti 2002-2004 subscription rights (stock options) at 31 December 2002 the corresponding reserves reflected an aggregate balance of 18,598,579 euros and were no longer restricted.

d) *Non-taxable reserves*
These reserves, amounting overall to 10,217,010 euros (unchanged from 31 December 2002), were originally carried by Tecnost S.p.A. They were re-formed in the Olivetti balance sheet following the merger of Tecnost into and with Olivetti; the breakdown of these reserves is as follows:

- Reserve pertaining to research grants (Law no. 346/1988) for 8,741,403 euros
- Reserve pertaining to Technological Innovation grants (Law no. 46/1982) for 685,713 euros
- Reserve pertaining to capital investment grants (Law no. 64/1986) for 695,110 euros
- Reserve pertaining to VAT deductions on capital investments for 94,784 euros.

Taxes are not provided for these reserves since operations that would make them liable for taxation are not planned at the present time.

VIII. Retained earnings (accumulated losses)

At 31 December 2002 this heading reflected accumulated losses totalling 299,930,180 euros (retained earnings of 571,549,306 euros at 31 December 2001). The difference arose after the loss of 871,479,486 euros posted in 2001 was carried forward with the approval of the Shareholders' Meeting of 8 May 2002.

00235

B) Reserves for risks and charges

2.a) Reserves for taxation

The following years are still subject to adjustment or to assessment by the tax authorities: the financial years from 1997 onwards as regards income taxes; the financial years from 1998 onwards as regards value added tax.

In 1999 the Parent Company underwent a general tax inspection conducted by the Regional Corps of the Turin Tax Police, with specific reference to the years 1994, 1995 and 1996. At the end of the inspection, the tax authorities were notified of hypothetical administrative anomalies regarding both value added tax and (predominantly) income tax. The objections regarding income tax were resolved as a result of the tax settlement agreed on 23 July 2001.

On 15 December 2000 adjustment notices were received regarding value added tax for 1994 and 1995 as a consequence of the findings of the Tax Police's report. The Company promptly presented a well-argued appeal, which was substantially accepted by the Provincial Tax Commission.

In 1994, 1995 and 1996 the Company received assessment notices relating to the income tax returns from 1988 to 1992.

With regard to the assessment relating to 1988, the authorities objected, in view of the consequent tax regime, to the treatment of lease-back contracts as financial leasing contracts. The assessments relating to 1991 and 1992 stemmed from the findings of the Regional Corps of the Trieste Tax Police with regard to usufruct on share contracts entered into by the Company in previous years, while the assessments for 1989 and 1990 concerned both matters.
With regard to usufruct on share contracts, the authorities, in separate assessments, questioned the legitimacy of the deduction of tax credits and withholdings relating to dividends collected from resident companies by the Company as usufructuary. It also alleged the joint responsibility of the Company for the failure to apply to such dividends the higher withholdings tax due on payment of share income to non-residents.
Well-argued appeals have been made against all these assessments.

The objections raised with regard to lease-back contracts have been resolved in favour of the Company and the tax authorities have not proceeded with the matter.

All the objections raised by the authorities regarding usufruct on shares for 1989, 1991 and 1992, as well as that relating to the alleged non-deductibility of tax credits and withholdings on dividends for 1990, have been rejected by the first and second degree tax commissions. Only the appeal lodged by the Company against the 1990 assessment alleging joint responsibility for lower tax withholdings has been rejected by both the provincial and regional tax commissions.

The tax authorities have submitted appeals to the Supreme Court as regards all the decisions in favour of the Company concerning the objections to usufruct on shares and the Company has lodged counter-appeals. With regard to the adverse ruling of the regional tax commission regarding the assessment of tax withholdings for 1990, the Company has lodged an appeal to the Supreme Court and the tax authorities have submitted a counter-appeal.

00236

The Company's tax advisors believe that the dispute regarding usufruct on shares will be settled in favour of the Company since the objections raised on both matters lack any juridical basis, and the Supreme Court has already issued favourable jurisprudence in this area.

2.b) Reserve for deferred taxation

The entire reserve for deferred taxation (344.4 million euros at 31 December 2001) was reversed to income in relation to taxable result for the year and the reduction in the taxable temporary differences for which the reserve was formed in 2000; these differences were more than offset by the deductible temporary differences that arose in the year, as described in the note on prepaid tax receivables.

3) Other provisions

Other provisions at 31 December 2002 amounted to 336.3 million euros (429.5 million euros at 31 December 2001), following increases of 121.8 million euros and uses totalling 215.0 million euros.

The heading includes 23.4 million euros for deferred social security charges arising as a result of reductions in the workforce pursuant to Law 223/1991, 71.5 million euros for charges relating to commitments and possible future risks associated with the sale of OliMan Holding B.V., 222.1 million euros for risks and charges relating to investee companies and 19.3 million euros for charges relating to guarantees given in connection with the sale of subsidiary companies.

C) Reserve for employee severance indemnities

	31.12.2002	31.12.2001	Changes
Beginning balance	**3,857,916**	**4,126,520**	**(268,604)**
Provision for the year	24,045	1,050,599	(1,026,554)

JJ 00238

Payables due within 12 months amounted to 3,617.5 million euros at 31 December 2002 (5,050.9 million euros at 31 December 2001)
The change of 1,433.4 million euros arose largely from the decrease in the current portion due on borrowings from foreign subsidiary companies (1,908.2 million euros) set against the increase in amounts due to banks (352.1 million euros) and in non-financial payables (177.6 million euros). Payment of the current portion of the borrowing from Olivetti Holding B.V. amounting to 2,147 million euros was extended to 30 June 2003.

Payables due after 12 months

1) Bonds

Amounts due to third parties:

	31.12.2002	31.12.2001	Changes
Olivetti S.p.A. EONIA linked notes 2001-2003 bond	-	400,000,000	(400,000,000)

The "Olivetti S.p.A. EONIA linked notes 2001-2003" bond for a par value of 400 million euros was cancelled in full as part of the debt re-financing and maturity profile improvement plan.

Amounts due to subsidiary companies:

	31.12.2002	31.12.2001	Changes
Olivetti 2002-2012 fixed rate bond issued on 26 June 2002	2,500,000,000	-	2,500,000,000
Olivetti 2002-2012 fixed rate bond issued on 23 December 2002	1,400,000,000	-	1,400,000,000
Total	**3,900,000,000**	**-**	**3,900,000,000**

2) Convertible bonds

	31.12.2002	31.12.2001	Changes
Olivetti 1,5% 2001-2004 convertible bond with premium upon redemption			
- par value	1,267,627,834	1,267,627,834	-
- less: conversions into ordinary shares	(363,763)	-	(363,763)
- premium upon redemption	64,346,474	64,364,944	(18,470)
	1,331,610,545	1,331,992,778	(382,233)
Olivetti 1,5% 2001-2010 convertible bond with premium upon redemption			
- par value	2,412,962,875	2,412,962,875	-
- less: conversions into ordinary shares	(3,299,813)	-	(3,299,813)
- premium upon redemption	442,853,902	443,460,350	(606,448)
	2,852,516,964	2,856,423,225	(3,906,261)
Total	**4,184,127,509**	**4,188,416,003**	**(4,288,494)**

The premiums on the 2001-2004 and 2001-2010 bonds, determined on the basis of 5.07759% and 18.37825% redemption increments respectively, were recorded under financial charges and deferred for amounts accruing to future years.

JJ 00239

3) Amounts due to banks

	31.12.2002	31.12.2001	Changes
Ordinary loans	25,000,000	90,189,979	(65,189,979)
Loans for research	46,798,098	71,957,868	(25,159,770)
less: current portion	(51,527,994)	(90,349,749)	38,821,755
Total	**20,270,104**	**71,798,098**	**(51,527,994)**

Other lenders	24,130,742	12,234,341	11,896,401
less: current portions	(2,778,871)	(5,762,176)	2,983,305
Total	**34,489,703**	**25,372,174**	**9,117,529**

5) Amounts due to subsidiary companies

	31.12.2002	31.12.2001	Changes
Amounts due to subsidiary companies			
- Olivetti Finance N.V.	3,743,567,709	5,302,415,417	(1,558,847,708)
	3,743,567,709	**5,302,415,417**	**(1,558,847,708)**
Total amounts due after 12 months	**11,882,455,025**	**9,988,001,692**	**1,894,453,333**

With regard to amounts due to Olivetti Finance N.V., two 20 billion yen loans have been arranged at a six-monthly floating rate, expiring respectively in 2029 (referring to a capital of 174.2 million euros) and 2032 (referring to a capital of 171.5 million euros).
On both loans, cross currency and interest rate swaps have been arranged to nullify yen/euro exchange and interest risks. The hedging structure is applicable as long as Olivetti S.p.A. is *in bonis*.

***

At 31 December 2002 financial payables secured by guarantees on assets owned by the Company amounted to 20.9 million euros; these guarantees, for 22.7 million euros (34.5 million euros at 31 December 2001), consisted of pledges on securities and were provided in connection with research loans granted by San Paolo IMI.

JJ 00240

The breakdown of medium/long-term debt, including portions due within 12 months, was as follows:

(in millions of euros)	31.12.2002	31.12.2001
Amounts due to subsidiary companies:		
Loan from Olivetti Holding B.V., floating rate 4.74361% at 31.12.2002, extended to 30 June 2003	2,147.0	2,147.0
Loan from Olivetti Finance N.V., repaid on 26 June 2002	-	1,908.2

Premium upon redemption "Olivetti 1.5% 2001-2010": 18.37825% of bond par value, payable upon bond redemption on 1st January 2010	442.9	443.5
IMI loans for research pursuant Law 346/1988, average interest rate 12.4742% (gross of interest relief grants) at 31 December 2002, repayable by 2004	46.8	71.9
Subsidized loans for technological innovation, average interst rate 4.0994% at 31 December 2002, repayable by 2012	13.1	18.9
Other loans, average interest 3.638% at 31 December 2002, repayable by 2003	25.0	90.2
Other lenders	24.1	12.2
Total	**14,083.8**	**14,155.0**
of which:		
Portions expiring within 12 months	2,201.3	4,167.0
Portions expiring after 12 months	11,659.5	9,988.0

JJ 00241

Payables due after 12 months were as follows:

(in millions of euros)	31.12.2002	31.12.2001
within 2 years	4,556.2	465.7
within 5 years	3,080.5	6,487.7
after 5 years	4,245.8	3,034.6
Total	**11,882.5**	**9,988.0**

At 31 December 2002 the Company had unused overdraft facilities on current accounts of 129.5 million euros (315.4 million euros at 31 December 2001) and other unused standby lines of credit for 61 million euros (46.7 million euros at 31 December 2001).

Analysis of the financial position

	31.12.2002	31.12.2001	Changes
Financial liabilities:			
Due within 12 months	3,791,075,585	6,343,665,953	(2,552,590,368)
Due after 12 months	12,892,671,729	10,788,241,009	2,104,430,720
Total financial liabilities (A)	**16,683,747,314**	**17,131,906,962**	**(448,159,648)**
Medium/long-term financial assets	421,020,975	495,022,174	(74,001,199)
Financial current assets	1,062,103,484	308,724,693	753,378,791
Accrued interest income	5,511,892	5,708,279	(196,387)
Total financial resources (B)	**1,488,636,351**	**809,455,146**	**679,181,205**
Net financial indebtedness (A-B)	**15,195,110,963**	**16,322,451,816**	**(1,127,340,853)**

Net financial indebtedness at 31 December 2002 amounted to 15,195.1 million euros, a decrease of 1,127.3 million euros compared with 31 December 2001.
The change (reflecting an increase in medium/long-term debt of 2,178.4 million euros and a decrease in short-term debt of 3,305.8 million euros) was largely due to collection of dividends, disposal of equity investments, assignment of receivables due from tax authorities to Group companies, net of costs incurred mainly for financial charges.

JJ 00242

E) Accrued expenses and deferred income

Memorandum accounts

A) Personal guarantees given and counter-securities received

At 31 December 2002 suretyships and other personal securities given directly or indirectly through banks and insurance companies totalled 15,387 million euros (17,634.5 million euros at 31 December 2001), as follows:

(in millions of euros)	31.12.2002	31.12.2001	Changes
To third party holders of securities issued by subsidiary companies	15,032	17,136	(2,104)
To banks and finance companies for credit lines and financings given to subsidiary and associated companies	14	137	(123)
Counter-securities given to third parties for guarantees given on behalf of:			-
subsidiary companies	72	72	-
associated and unconsolidated subsidiary companies	3	3	-
third parties	32	34	(2)
	15,153	17,382	(2,229)
Other personal guarantees given	234	253	(19)
Total personal guarantees given	**15,387**	**17,635**	**(2,248)**

The decrease of 2,104 in guarantees to third-party holders of securities issued by subsidiary companies refers in particular to guarantees given in respect of bond loans issued by Olivetti International Finance N.V. and Olivetti Finance N.V.

Counter-securities given to third parties for guarantees given on behalf of subsidiary companies included 52.8 million euros in favour of Telecom Italia.

Other personal guarantees, amounting to 234 million euros at 31 December 2002, referred to:
- suretyships for 3.6 million euros to guarantee fulfilment of trade supplies by Getronics S.p.A.;
- guarantees of 228.1 million euros given to the Italian State Railways in the interest of Wind S.p.A. (ex Infostrada S.p.A.);
- other guarantees for 2.3 million euros.

In respect of the above guarantees, at 31 December 2002 the Company had counter-securities totalling 290 million euros (315 million euros at 31 December 2001), including 213 million euros from Mannesmann A.G., in respect of guarantees given to the Italian State Railways, and 52.8 million euros from Telecom Italia.

B) Guarantees on company assets

Guarantees on Company assets relating to financial operations are analysed under financial payables.

JJ 00244

C) Commitments

At 31 December 2002 contractual commitments totalled 8 million euros overall (11 million euros at 31 December 2001), down by 3 million euros.
On the same date, the heading also included a letter of indemnity in favour of Olivetti Finanziaria Industriale S.p.A. in respect of potential risks from on-going disputes.

D) Other memorandum accounts

Other memorandum accounts at 31 December 2002 amounted to 3.8 million euros relating to third-party assets held as guarantee deposits (unchanged from 31 December 2001).

JJ 00245

Comments on the income statement

A) Value of production

5) Other revenues and income

Other revenues amounted to 13.6 million euros (15.2 million euros in 2001). They referred to services supplied and to the recovery of costs in relation to subsidiary companies.

B) Costs of production

7) Services

The amount of 26.4 million euros (49.1 million euros in 2001) consisted largely of costs incurred for services and consultancy.

9) Personnel

Payroll costs in 2002 were 13.8 million euros (13.1 million euros in 2001). The increase of 0.7 million euros arose from higher costs for retirement incentives (7.4 million euros) offset in part by the decrease in costs as a result of the reduction in the average number of employees, from 107 heads in 2001 to 78 heads in 2002 (22 managers, 12 supervisors, 44 office staff).
At 31 December 2002 there were 70 employees (89 at 31 December 2001).

10) Amortisation, depreciation and writedowns

Amortisation of intangible fixed assets

The charge for the year amounted to 70.5 million euros, of which 30.6 million euros for amortisation of costs incurred for share capital increases and 38.9 million euros for amortisation of costs relating to issuance of bond loans.

Depreciation of tangible fixed assets

Depreciation for the year (1.2 million euros) was determined on a straight-line basis by adopting rates that reflect the residual useful life of the assets.

JJ 00246

As illustrated in the note on tangible fixed assets, accelerated depreciation was also provided, as allowed under tax laws:

(in millions of euros)	Year 2002	Year 2001	Changes
Ordinary depreciation	0.6	0.7	(0.1)
Accelerated depreciation	0.6	0.6	-
Total depreciation	**1.2**	**1.3**	**(0.1)**

Writedowns of receivables classified as current assets

No provision for doubtful accounts was deemed necessary in 2002; the 2001 provision was 1.5 million euros.

14) Other operational expenses

Other operational expenses amounted to 2.7 million euros in 2002 (3 million euros in 2001) and largely comprised duties and taxes other than income taxes of 0.7 million euros and contributions to public and private institutions of 0.8 million euros.

JJ 00247

C) Financial income and charges

15) Income from equity investments

Gains from swap	6,142,461	-	6,142,461
Other	9,496,658	9,703,101	(206,443)
Total	**41,396,399**	**37,334,810**	**4,061,589**

JJ 00249

17) Interest expense and other financial charges

	Year 2002	Year 2001	Changes
Interest payable to subsidiary companies			
Olivetti Tecnost S.p.A.	311,248	7,920,376	(7,609,128)
Olivetti Finanziaria Industriale S.p.A.	481,740	789,342	(307,602)
TechnoProduzioni S.p.A.	-	527,357	(527,357)
Olivetti Holding B.V.	107,315,195	81,641,655	25,673,540
Tecnost Sistemi S.p.A.	-	301,323	(301,323)
Olivetti Finance N.V.	497,774,288	722,416,961	(224,642,673)
other subsidiary companies	1,281,472	607,561	673,911
Interest payable to third parties			
Bonds	148,952,776	62,139,142	86,813,634
Medium/long-term loans	3,468,402	28,089,997	(24,621,595)
Bank current accounts	23,834,480	29,281,339	(5,446,859)
Interest rate swap	14,206,634	2,116,366	12,090,268
Losses on exchange rate fluctuations	5,400,706	18,800,340	(13,399,634)
Interest, commissions and charges on other finance operations	10,062,870	11,996,663	(1,933,793)
Total	**813,089,811**	**966,628,422**	**(153,538,611)**

Financial charges totalled 813.1 million euros, a decrease of 153.5 million euros compared with 2001. The reduction reflected lower charges on borrowings from Olivetti Finance N.V. (224.6 million euros), due to the fact that interest rates on new borrowings were lower than those on loans discharged during the year, set against higher charges for bonds issued in 2001 which had only a partial impact on 2001 income.

JJ 00250

D) Value adjustments to financial assets

19) Writedowns

The writedown of 8,400.4 million euros (175.2 million euros in 2001) referred mainly to the fixed-asset equity investment in Telecom Italia S.p.A., which was written down by 8,051.1 million euros, and to Olivetti Finance N.V., which was written down by 182.5 million euros.

The heading also includes a writedown of 69.3 million euros on Telecom Italia S.p.A. shares acquired by Olivetti Finance N.V. during the year and classified as current assets, to reflect the difference between the purchase price and stock market value at 31 December 2002.

E) Extraordinary income and charges

20) Extraordinary income

	Year 2002	Year 2001	Changes
Gains on disposals			
Equity investments			
subsidiary companies	80,328,447	1,032,155	79,296,292
associated companies	-	10,106	(10,106)
other companies	158,468,340	-	158,468,340
Tangible fixed assets	53,100	3,313	49,787
	238,849,887	**1,045,574**	**237,804,313**
Other income	**1,447,518**	**22,622,268**	**(21,174,750)**
Total	**240,297,405**	**23,667,842**	**216,629,563**

Gains on disposals of equity investments in subsidiaries (80.3 million euros) include 71.8 million euros arising from the sale of OMS2 and 8.5 million euros arising from the sale of Webegg to Telecom Italia S.p.A.

Other income (1.4 million euros) included collection of amounts in excess of the price paid for the re-purchase of receivables by Wang Global S.p.A., now Getronics S.p.A. (0.5 million euros), the portion of the sale price of equity investments disposed of in previous years that related to the collection of research grants (0.5 million euros) and other items (0.4 million euros).

21) Extraordinary charges

Extraordinary charges amounted to 76.0 million euros (16.5 million euros in 2001) and referred to a capital loss of 70.5 million euros on the sale of Seat Pagine Gialle shares, and a charge of 3.6 million euros for costs incurred on the sale of the equity investment in Lottomatica.

06251

22) Income taxes for the year

The overall tax benefit of 892.1 million euros arose from deferred tax assets of 609 million euros and reversal of the previously provided reserve for deferred taxes of 344.4 million euros, set against current income tax for 2002 of 61.3 million euros.

The table below illustrates the difference between effective corporate income tax (IRPEG) for the year and the theoretical tax computed with the tax rates applicable for 2002; no provisions were made with regard to the local tax on production activities (IRAP), since both the theoretical and the effective taxable amounts were negative.

Reconciliation between theoretical taxes and effective taxes reported in the income statement

IRPEG

(in millions of euros)	Result for the year	Temporary differences	Tax charge (benefit) Current	Deferred
Result before taxes	**(7,132.0)**			
Theoretical income tax charge (benefit)			**(1,355.0)**	
Temporary differences taxable in the following years	(19.3)	19.3	(3.7)	3.7
Temporary differences deductible in the following years	6,574.2	(6,574.2)	1,249.1	(770.9)
Reversal of temporary differences arisen in prior years	715.6	834.9	135.9	158.2
Permanent differences	184.3	-	35.0	-
Increase (decrease) of taxable income	7,454.8	(5,720.0)	1,416.3	(609.0)
Taxable income (tax loss)	**322.8**	**(5,720.0)**		
less: Reserve for deferred taxation as of 31 December 2001				344.4
Total income tax charge (benefit) for the year 2002			**61.3**	**(953.4)**

The temporary differences deductible in subsequent years arose largely from the equity investment writedowns applied during the year as a result of compulsory allocation of the allowance over five years pursuant to Legislative Decree 209/2002.
The temporary differences from previous years related mainly to the capital gains recorded in 1999 (4,155.8 million euros, of which 2,493.5 million euros already taxed in previous years) on the sale of 31.5% of the equity investment in OliMan Holding B.V., taxation of which was allocated over five annual instalments.
The year's taxable income of 322.8 million euros generated a current tax charge of 61.3 million euros (19% tax rate).
The deferred tax credit of 609 million euros was determined by calculating taxes on temporary differences that will be reversed in respect of future expected taxable income (2,880 million euros) and taking account of DIT benefits.

JJ 00252

Other information

Remunerations to Parent Company Directors, Statutory Auditors and Chief Operating Officer

In compliance with CONSOB resolution no. 11971/1999, details are provided below of the remunerations payable in 2002 by the Parent Company and also by subsidiary companies, on whatever basis and in whatever form, to Directors, Statutory Auditors and the Chief Operating Officer.

Tax regime in the event of distribution of reserves

. Additional paid-in capital reserve (3,765,365,301 euros). This is a capital reserve and therefore, in the event of distribution, does not contribute to the formation of shareholders' taxable income.

. Revaluation reserve (1,128,827 euros).
In the event of distribution, this reserve contributes to the formation of Company and shareholders' taxable income.

. Reserve for treasury stock (2,298,156 euros).
Should this reserve be made available and distributed, it would contribute to the formation of shareholders' taxable income. The shareholders would attract tax credits within the limits of the taxes paid by the Company pursuant to article 105, par 1, subheads a and b of the Income Tax Consolidated Text.

. Extraordinary reserve (1,888,261,068 euros).
In the event of distribution, this reserve contributes to the formation of shareholders' taxable income. The shareholders would attract tax credits within the limits of the taxes paid by the Company pursuant to article 105, par 1, subheads a and b of the Income Tax Consolidated Text.

. Non-taxable reserves.
These comprise:
- a reserve for research grants (Law 346/1988) for 8,741,403 euros;
- a reserve for Technology Innovation grants (Law 46/1982) for 685,713 euros;
- a reserve for capital investment grants (Law 64/1986) for 695,110 euros;
- a reserve for VAT deductions on capital investments for 94,784 euros.

In the event of distribution, these reserves would contribute to the formation of Company and shareholders' taxable income; should they be used for purposes other than replenishment of losses for the year, they would be treated as contributing to the formation of the Company's taxable income.

Explanatory Notes

Basis of presentation

The consolidated financial statements for the year ended 31 December 2002 have been prepared in accordance with Legislative Decree no. 127 of 9 April 1991. They comprise the Consolidated Balance Sheet (prepared in accordance with the formats specified in articles 2424 and 2424 bis of the Italian Civil Code with suitable adaptations), the Consolidated Income Statement (prepared in accordance with the formats specified in articles 2425 and 2425 bis of the Italian Civil Code with suitable adaptations) and these Explanatory Notes.

The Explanatory Notes are provided to illustrate, analyse and, in some cases, supplement the data reported in the financial statements. They include the information required by article 38 of Legislative Decree no. 127/1991 and by other provisions contained therein, as well as by provisions issued by the Italian Securities and Investments Board (CONSOB); they also provide additional information, even where not required by specific legislation, if deemed necessary to present a true and fair view.

The financial statements used for consolidation purposes are those at 31 December 2002 approved by the Shareholders' Meetings of the individual companies or prepared by the respective Boards of Directors for such approval, adjusted, where necessary, to eliminate entries recorded solely for fiscal purposes and to align the statements with the accounting policies adopted by the Group. Such accounting policies are consistent with legislation governing consolidated financial statements, interpreted by the accounting principles established by the Italian Accounting Profession.

Consolidation area

The consolidated financial statements at 31 December 2002 were prepared using the financial statements of the Parent Company Olivetti S.p.A. and those of the Groups and companies it controls directly and indirectly (that is to say, in which, at 31 December 2002, the Parent Company directly or indirectly held the majority of voting rights at ordinary Shareholders' Meetings, or sufficient votes to exercise a dominant influence), with the exception of a number of minor subsidiary companies and of companies sold since 31 December 2002. Specifically, Telecom Italia S.p.A. and its subsidiary companies (hereinafter referred to as the Telecom Italia Group), which contributed approximately 97% of consolidated revenues, were included through line-by-line consolidation of the consolidated financial statements of the Telecom Italia Group (approved by the Board of Directors and audited by Reconta Ernst & Young S.p.A.), after the necessary consolidation adjustments.

The complete list of investee companies is contained in the Exhibit to these Explanatory Notes ("List of companies included in the consolidated financial statements at 31 December 2002 and of equity investments, pursuant to articles 38 and 39 of Legislative Decree no. 127/1991").

The main changes in the Telecom Italia Group consolidation area compared with 31 December 2001 are as follows:

a) inclusion in the consolidation area:
   - for *Domestic Wireline*: Mediterranean Nautilus Telekomunikasyon Hizmetleri Ticaret Anonim Sirketi, Latin American Nautilus Saint Croix, Latin American Nautilus Colombia Limitada and Latin American Nautilus Bolivia;

JJ 00268

- for *Mobile*: Timnet Usa, Starcel, Blu;
- for *Market IT*: Agrisian;
- for *Group IT*: Teco Soft Argentina;
- for "Others": EMSA Servizi Immobiliari, IN.TEL.AUDIT; Epiclink, Netesi.

b) exclusion from the consolidation area:
- for *Domestic Wireline*: Euro Datacom, TMI Italy-Canada and TMI do Brasil;
- for *Mobile*: Autel;
- for *Internet and Media*: Data House Group and some companies in the Internet Business Area;
- for *Market IT*: Consiel, Sogei;
- for *Group IT*: Teco Soft Espana;
- for "Others": the Telespazio Group, Emsa, Immsi, Telimm, Trainet, the 9Télécom Group, Indian Telecommunication Holding, Telecom Italia de Espana and Telecom Italia GmbH.

Telecom Italia S.p.A. spun off the International Wholesale Services business to Telecom Italia Sparkle S.p.A. (ex TMI Telemedia International Italia S.p.A.) and the Training business to Telecom Italia Learning Services S.p.A.

Consolidation principles

The most significant consolidation principles adopted for the consolidated financial statements at 31 December 2002 are as follows:

a) the assets and liabilities of the companies consolidated on a line-by-line basis are stated by eliminating the book value of each consolidated equity investment against the related portion of shareholders' equity.

b) unrealised gains and losses deriving from operations between Group companies are eliminated, as are all receivables, payables, dividends and transactions between companies in the consolidation area.

c) goodwill (or consolidation difference), defined as the difference between the purchase price of subsidiary companies and their current value at the time of acquisition, if positive, is classified under the asset heading "Consolidation differences", which represents the future earnings capacity of the company, and amortised over the period in which such goodwill is expected to provide benefit; if negative, it is classified under the equity reserve "Consolidation reserve". The income statements of subsidiaries acquired during the year are consolidated for the full year; pre-acquisition results not accruing to the Group are reversed under a specific income statement heading.
Consolidation differences relating to equity investments in associated companies, if positive, are included in the investment cost and amortised over the period in which they are expected to provide benefit.

d) minority shareholders' interests in the equity and net result for the year of the consolidated subsidiaries are disclosed separately under specific headings of consolidated shareholders' equity and consolidated income respectively.

e) capital gains and losses arising from the sale of shares in Group companies to third parties are recorded under income. In the event of a share capital increase at a Group company subscribed by

JJ 00269

a minority shareholder only, any capital gains or losses arising as the difference between the value of the Group's share of equity before and after the various operations are recorded under income.

f) provisions and value adjustments recorded by consolidated companies to obtain tax benefits allowed under current legislation are eliminated from the consolidated financial statements, taking due account of any related tax effects.

Translation into euro of financial statements denominated in foreign currency

The financial statements of foreign subsidiary companies resident in non-European Monetary Union (EMU) countries are translated into euro by applying the year-end exchange rates to balance sheet headings and the average exchange rates for the year to income statement headings. Any differences arising in respect of the rates at the end of the previous financial year are reported separately under a specific consolidated shareholders' equity heading "Sundry reserves, retained earnings and accumulated losses".

JJ 00270

The exchange rates used for currencies of non-EMU countries are set out below:

Exchanges rates Euro/Local Currency

The financial statements of companies operating in highly inflationary economies have been adjusted in accordance with inflation accounting procedures by restating historical book values on the basis of indices that reflect the real change in the purchasing power of local currencies. In order to avoid distortions to results, the year-end exchange rates have been used to translate the income statements of these companies, rather than the average rates for the year. The following companies adopt inflation accounting procedures: Corporacion Digitel C.A. (Venezuela), Finsiel Romania S.r.l. (Romania), IS Tim Telekomunikasyon Hitzmetleri A.S. (Turkey), TECO Soft Argentina and Olivetti Argentina S.A.C.é.I..

JJ 00271

Accounting policies

The accounting policies adopted for the preparation of the consolidated financial statements comply with those established by law and are consistent with those adopted in the previous financial year.
The accounting policies adopted for the various headings are illustrated below.

Intangible fixed assets

Intangible fixed assets are stated at purchase or production cost including related accessory charges, and are amortised over their residual useful life; intangible fixed assets are written down to reflect any other than temporary impairment in value; their book value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

Start-up and expansion costs are amortised over five years.

Industrial patents and intellectual property rights are amortised in respect of their expected useful life, over five years (for industrial patents) or predominantly over three years (software), as from the year in which they enter service.

Concessions, licences, trademarks and similar rights are amortised in respect of their expected useful life (licences are amortised over the term of the relevant contracts).

Purchased goodwill relating to the acquisition of businesses or business units is capitalised and generally amortised over five years.

Assets in process of formation and advance payments refer to costs sustained for current software development projects. Due to their nature and value, these projects are of high economic and management importance and offer significant prospects of future revenues or containment of costs.

The heading Other includes leasehold improvements (generally amortised over the term of the relevant leases), rights of way acquired by Telecom Italia to ensure extension of its transmission capacity over non-Italian territory (amortised over the residual life of the contracts with the foreign operators who own the facilities to which the rights refer).

Tangible fixed assets

Tangible fixed assets are recorded at purchase or construction cost restated in accordance with specific monetary revaluation laws and amortised over their residual useful lives.
Assets are written down to reflect any other than temporary impairment in value; the original value is reinstated in subsequent periods if the reasons for such writedowns no longer exist.

Depreciation rates applied are as follows:

Buildings	3 – 7%
Telecommunication plant and systems	3 – 33%
Plant and machinery	20 – 33%
Industrial and commercial plant	15 – 25%
Other assets	6 – 33%

Tangible fixed assets under construction are stated at the direct costs incurred.

JJ 00272

Ordinary maintenance costs are charged in full to income.

Equity investments

Long-standing equity investments are classified as financial fixed assets; equity investments acquired for subsequent sale are classified as financial assets not held as fixed assets.
Equity investments classified as financial fixed assets in unconsolidated companies in which at least 20% of voting rights are held are valued with the equity method. Other equity investments classified as financial fixed assets in unconsolidated companies are recorded at cost written down to the corresponding portion of shareholders' equity resulting from the latest financial statements of the investee company in order to reflect other than temporary impairments in value. Losses in value in excess of the corresponding book values are recorded under reserves for risks and charges. In any case the book value of such equity investments is determined on the basis of reasonable expectations of utility and recovery in future financial periods, if lower.
Equity investments purchased for trading purposes and consequently classified under current assets, in consolidated or unconsolidated listed companies, are stated at the lower of purchase cost and realisable value based on year-end stock market prices.
Writedowns of equity investments (both those held as financial fixed assets and those held as current assets) are eliminated in subsequent years if the reasons for such writedowns no longer exist.

Other securities (other than equity investments)

Securities to be held until maturity are classified as financial fixed assets; marketable securities are classified as financial assets not held as fixed assets.
Securities held as fixed assets are stated at purchase cost adjusted on an accrual basis to reflect the difference between purchase cost and redemption value, and written down to reflect any other than temporary impairment in value.
Securities held as current assets are recorded at the lower of purchase cost, adjusted on an accrual basis to reflect the issue spread, and presumed realisable value based on market trends.
Writedowns of securities are eliminated in subsequent years if the reasons for such writedowns no longer exist.

Securities purchased through reverse repurchase agreements with an obligation of re-sale on maturity are classified as financial assets not held as fixed assets and stated at purchase cost. The differences between the spot and forward prices are charged or credited to income on an accrual basis, with a counter-item under accrued income/expenses.

Inventories

Inventories are valued at the lower of purchase or production cost and market value.
The chief methods used to determine cost are as follows:

- raw materials and finished products: LIFO based on annual layers for the Telecom Italia Group and weighted average for the Olivetti Tecnost Group;
- goods: weighted average;
- work-in-progress and semi-finished products: production cost;
- short-term contract work-in-progress: industrial cost;

JJ 00273

- long-term contract work-in-progress: percentage of completion method, based on the agreed considerations, also taking account of presumed losses until completion and other possible related risks.

Raw materials, finished products and goods in excess of foreseeable production requirements, slow-moving items or items subject to obsolescence are written down to presumed realisable value.

Accounts receivable and payable

Accounts receivable are stated at estimated realisable value and classified under financial fixed assets or current assets.
Accounts payable are stated at face value.
Foreign currency receivables and payables are stated on the basis of year-end exchange rates; any translation gains or losses arising in respect of the original exchange rates are recorded under "*financial income*" and "*financial charges*" respectively.
Receivables due to the consolidated subsidiary TIM from almost all its dealers are transferred to a factoring company (without recourse, within the agreed limits). As each receivable falls due, the factoring company pays TIM the relative face value, minus amounts due to dealers for services rendered. TIM has not provided guarantees in respect of this operation.

Telephone Companies Employees Social Security Fund

Pursuant to law no. 58/1992, Telecom Italia is required to provide full national insurance coverage for all employees on the payrolls of STET, SIP, Italcable and Telespazio as at 20 February 1992, as well as for all employees transferred from the Public Administration to IRITEL, through the Telephone Companies Employees Social Security Fund (Fondo Previdenza Telefonici, FPT). This coverage also extends to previous periods of employment in other companies. The amounts due were calculated by the Italian National Social Security Board (INPS) and are to be paid in 15 annual instalments. Subsequently, article 66 of Law no. 427/1993 ruled that these costs be recorded in the financial statements and deducted against taxes for the years in which the payments are made.
The amount of the liability is uncertain, since Telecom Italia and the INPS do not agree on the calculation methods to be used.
The matter is being examined in the Courts. Telecom Italia believes that the total liability at 31 December 2002 in respect of the above payments is between 964 million euros and 1,289 million euros (of which 409 million have already been paid), net of the residual amount already recorded by IRITEL and currently carried in the financial statements of Telecom Italia and TIM following the merger of IRITEL.
In accordance with accepted accounting principles, a payable for an amount equivalent to the minimum estimated liability has been recorded in the Olivetti Group's consolidated financial statements for the purposes of determining consolidation goodwill.

Accruals, prepayments and deferrals

Accruals, prepayments and deferrals are determined to reflect the correct apportionment of costs and revenues applicable to two or more financial periods.

Reserves for risks and charges

Taxation: reserves are provided to cover presumed tax liabilities (including any surcharges and arrears interest) in respect of open or disputed positions, and also to cover deferred taxes.

JJ 00274

In addition, deferred and prepaid taxes are recognised for temporary differences between the book value and the tax value of the assets and liabilities of the individual consolidated companies, and also for consolidation adjustments.
In accordance with prudent accounting principles, prepaid tax assets are not recognised unless there is a reasonable certainty that future taxable income will be available in the years in which the temporary differences will be reversed.
Prepaid and deferred taxes are recorded in the consolidated financial balance sheet under, respectively, the current assets heading "receivables due from others" and the "reserve for taxation" as a counter-item to "income taxes for the year".
The tax benefit of tax loss carry-forwards is recognised to the extent that there is a reasonable expectation of realising the said benefit.
Deferred taxes on equity reserves not subject to taxation of consolidated companies or companies valued with the equity method are recognised when such reserves are distributed or utilised and are thus liable for taxation.

Other provisions: these amounts are provided largely to cover likely known charges whose timing and extent are however uncertain at year-end. The provisions reflect best estimates based on the commitments undertaken and the information available.

Employee severance indemnities

This provision is formed in accordance with current legislation and labour contracts and reflects the liability accrued to all employees of the consolidated companies at the balance-sheet date. Receivables arising as a result of advance tax payments on employee severance indemnities pursuant to Law no. 662 of 23 December 1996 and subsequent amendments are shown under the financial fixed assets heading "other receivables". These receivables are re-valued in compliance with the provisions of the said law.

Grants

Grants related to income (directly credited to the income statement) and grants related to assets are recognised in the period in which the documents confirming payment are filed, or in the period in which the related costs are sustained in cases when payment is based on established procedures.
Specifically, grants related to assets are recognised on an accrual basis: they are classified as deferred income and subsequently credited to income as the assets to which they refer are amortised.

Revenues

Revenues are recognised as they arise, as follows:
a) *telecommunications services:* in the year the services are provided; since 1999, traffic revenues have been stated gross of amounts due to third-party operators;
b) *IT operations, innovative network services and other operations:* to the extent that the relevant services are provided during the year;
c) *manufacturing and installation operations:* on delivery of goods in the case of supplies or on completion of work in the case of services, consistently with contractual commitments;
d) *office products:* on delivery.

JJ 00275

Leased assets

Assets held under finance lease contracts are classified under fixed assets and depreciated beginning from the contract date at the rates applied to proprietary assets of a similar nature. A financial payable is recorded for an equivalent amount and gradually written down as payment is made. Financial charges and amortisation charges provided in respect of leased asset values are charged to income on an accrual basis. Capital gains realised on the sale of assets to leasing companies that are immediately leased back through finance lease contracts are deferred in financial statements and credited to consolidated income over the lease term.

Dividends

Dividend income from subsidiaries is recorded on accrual (i.e., in the year in which the corresponding income is earned) and eliminated during consolidation. Deferred taxes are provided in respect of such income.
In line with accrual accounting procedures, tax credits arising on collection of dividends are also classified as deferred tax assets in the year the dividends accrue, with a balance-sheet counter-item under the heading "Prepaid taxes" in other receivables.
Dividends from non-subsidiary companies and related tax credits are recorded in the year in which such dividends are declared, which generally coincides with the year of collection.

Memorandum accounts

Guarantees given – referring in the main to suretyships – are stated for an amount reflecting the value of securities, net of counter-securities received.
Purchase and sale commitments reflect year-end contractual amounts which have not been included in the normal "operating cycle" and portions not yet executed.

Derivative instruments

Financial derivative contracts are used by the Group to hedge exposure to interest rate and exchange rate risks. They are valued consistently with the underlying asset and liability positions and any net expenses connected with each single transaction are recognized in the statement of income.

For financial instruments used to hedge interest rate risks, the interest differentials are recorded in the statement of income in "financial income and expense" based on the accrual principle.
For financial instruments used to hedge exchange rate risks, the cost (or "financial component" calculated as the difference between the rate at the date of stipulating the contract and the forward rate) is recorded in the statement of income in "financial income and expense" based on the accrual principle.

Non-hedging derivatives are assessed by comparing the instrument value at the contract date and its year-end value. Any losses are charged to income, while gains are not recorded since they are not realised.

Premiums collected (paid) on the sale or purchase of put and call options on listed portfolio shares are classified under "other payables" or "receivables due from others". If the option is exercised, the premium collected (paid) is treated as an accessory component of the strike price of the underlying instruments; if the option is not exercised, the premium collected (paid) is recorded under financial

JJ 00276

income (financial charges). Purchase or sale commitments in respect of the sale of put and call options are illustrated in these notes, in the section "Hedging instruments and other derivatives".

Exceptions allowed under article 2423, paragraph 4, of the Italian Civil Code

No exceptions pursuant to article 2423, par 4, of the Italian Civil Code have been made in the financial statements as at 31 December 2002.

Changes in the application of accounting policies

No changes have been adopted in accounting or evaluation policies for financial statement items in 2002.

Comments on consolidated assets

B) Fixed assets

I. Intangible fixed assets

Net intangible fixed assets at 31 December 2002 amounted to 34,561 million euros (39,220 million euros at 31 December 2001).

(in millions of euros)	Net book value at 31.12.2001	Increases	Amortisations	Other changes	Net book value at 31.12.2002
Start-up and expansion costs	126	14	(46)	(11)	83
Industrial patents and intellectual property rights	1,291	581	(1,013)	410	1,269
Concessions, licenses, trademarks and similar rights	4,452	117	(107)	(467)	3,995
Goodwill	50	3	(9)	(27)	17
Assets in process of formation and advance payments	874	817		(859)	832
Other	590	78	(145)	(35)	488
Consolidation differences	31,837	346	(2,142)	(2,164)	27,877
Total	**39,220**	**1,956**	**(3,462)**	**(3,153)**	**34,561**

Start-up and expansion costs comprised costs relating to share capital increases.

Industrial patents and intellectual property rights essentially related to application software owned or licensed indefinitely, largely attributable to the Telecom Italia Group.

Concessions, licences, trademarks and similar rights amounted to 3,995 million euros, a decrease of 457 million euros caused mainly by exchange rate changes in South American countries (-650 million euros). They referred chiefly to the residual cost of UMTS and PCS licences.

Assets in process of formation and advance payments amounted to 832 million euros and reflected costs sustained by Telecom Italia for current software development projects.

The heading *Other* reflected a balance of 488 million euros, including:
a) 222 million euros for leasehold improvements;
b) 42 million euros for bank fees and commissions in respect of the public tender offer on Telecom Italia;
c) 148 million euros for bond issuance expenses.

Consolidation differences at 31 December 2002 amounted to 27,877 million euros (31,837 million euros at 31 December 2001) and included:

JJ 00278

* 20,692 million euros for the acquisition of 52.12% of the ordinary share capital of Telecom Italia, net of amortisation totalling 4,446 million euros.
  Aggregate consolidation goodwill was originally stated at 25,534 million euros (justified by stock market prices, availability of the majority of voting rights and earnings expectations as a result of implementation of the Industrial Business Plan drawn up at the time of the public tender offer), to be amortised over 20 years beginning from the second half of 1999;
* 659 million euros for Telecom Italia shares purchased since the public tender offer, net of amortisation of 102 million euros;
* 6,509 million euros for the acquisition by the Telecom Italia Group of the equity investment in Seat Pagine Gialle and other companies.

The balance on the heading decreased by 3,960 million euros from 2001 as a result of writedowns of 1,903 million euros generated by the Telecom Italia Group, current amortisation charges totalling 2,142 million euros and the impact of Latin American currency devaluation on goodwill denominated in such currencies.

II. Tangible fixed assets

At 31 December 2002 net tangible fixed assets amounted to 19,449 million euros (22,097 million euros at 31 December 2001) and comprised:

(in millions of euros)	Gross value at 31.12.2002	Accumulated depreciation at 31.12.2002	Net book value at 31.12.2002 (a)	Net book value at 31.12.2001 (b)	Changes (a-b)
Land and buildings	3,712	1,467	2,245	3,137	(892)
Plant and machinery	56,801	41,843	14,958	16,695	(1,737)
Equipment	1,043	983	60	83	(23)
Other assets	2,101	1,410	691	746	(55)
Assets under construction	1,495	-	1,495	1,436	59
Total	**65,152**	**45,703**	**19,449**	**22,097**	(2,648)

Changes in tangible fixed assets during 2002 were as follows:

(in millions of euros)	
Net book value as of 31 December 2001	**22,097**
Additions	3,291
Depreciation charges	(3,807)
Changes in the consolidation area	(313)
Disposals	(541)
Translation differences and other changes	(1,278)
Net book value as of 31 December 2002	**19,449**

Additions totalled 3,291 million euros, of which 3,258 million euros for the Telecom Italia Group and 33 million euros for the other Group companies.

JJ 00279

Additions at the Telecom Italia Group were as follows:

(in millions of euros)	Year 2002
Domestic Wireline	1,828
Mobile	1,075
South America	201
Internet and Media	28
Market IT	12
Group IT	85
Sundry operations and consolidation adjustments	29
Total	**3,258**

Additions for the other Group companies totalled 33 million euros and related to the Olivetti Tecnost Group for 26 million euros and the Olivetti Multiservices Group for 7 million euros.

Depreciation was provided at rates deemed to reflect the residual useful life of the assets concerned and related to the period of utilisation as regards additions for the period.

III. Financial fixed assets

Financial fixed assets at 31 December 2002 amounted overall to 4,046 million euros compared with 7,750 million euros at 31 December 2001, as follows:

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Equity investments	2,576	5,057	(2,481)
Advances on future capital contributions	-	1,659	(1,659)
Financial receivables	46	82	(36)
Other receivables due from:			
subsidiary companies	5	2	3
associated companies	435	117	318
other companies	287	353	(66)
Other securities	304	87	217
Treasury stock	393	393	-
Total	**4,046**	**7,750**	**(3,704)**

JJ 00280

Equity investments

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Equity investments in unconsolidated subsidiary companies	19	19	-
Equity investments in associated companies	2,101	4,651	(2,550)
Equity investments in other companies	456	387	69
Total	**2,576**	**5,057**	**(2,481)**

Equity investments in associated companies (2,101 million euros as of 31 December 2002) comprised:

(in millions of euros)	Net book value as of 31.12.2002	Net book value as of 31.12.2001	Changes
- Telekom Austria	708	1,460	(752)
- GLB Serviços Interativos	13	24	(11)
- Solpart Participaçoes	142	238	(96)
- Mobilkom Austria	-	544	(544)
- AUNA	-	690	(690)
- Etec S.A.	467	551	(84)
- Telekom Srbija	187	195	(8)
- IS TIM	-	81	(81)
- B.D.T.	-	158	(158)
- IM.SER	12	141	(129)
- Netco Redes	22	125	(103)
- Telemaco immobiliare	-	91	(91)
- Tiglio I	242	-	242
- Tiglio II	74	-	74
- Mirror International Holding	94	94	-
- Italtel Holding	43	65	(22)
- Stream	19	32	(13)
- Other	78	162	(84)
Total	**2,101**	**4,651**	**(2,550)**

The aggregate value of these equity investments includes the residual amount to be amortised (504 million euros at 31 December 2002 and 1,688 million euros at 31 December 2001) of the positive consolidation difference arising at the time of acquisition between the purchase cost and the value of the corresponding net equity portion of the investee companies. The consolidation difference mainly referred to Telekom Austria (315 million euros) and Etec S.A. (100 million euros).

JJ 00281

Other receivables

Other receivables classified as financial fixed assets (but not included in the net financial position) amounted to 727 million euros at 31 December 2002 (of which 62 million euros short-term and 665 million euros medium/long-term). They included 94 million euros for receivables, including revaluations, arising from advance tax payments on employee severance indemnities, 435 million euros due from associated companies, mainly for borrowings granted by the Telecom Italia Group to its foreign investee companies, and 85 million euros for loans to personnel.
At 31 December 2001 other receivables amounted to 472 million euros, of which 82 million euros short-term and 390 million euros medium/long-term.

Other securities

The balance on this heading at 31 December 2002 totalled 304 million euros (87 million euros at 31 December 2001).

Treasury shares held by the Parent Company and by its subsidiary Olivetti International S.A.

At 31 December 2002 Olivetti S.p.A. and Olivetti International S.A. held a total of 214,628,828 Parent Company ordinary shares, carried at a book value of 393 million euros. Treasury shares held by the Parent Company Olivetti S.p.A. (2,697,500) are carried at 2 million euros and arose partly from purchases authorised by the Shareholders' Meeting of stock held by employees of the Parent Company and its subsidiaries. The shares held by Olivetti International S.A. (211,931,328) were obtained in joint exchange with Tecnost S.p.A. shares following the upstream merger of Tecnost into Olivetti and are carried at an aggregate value of 391 million euros, the original book value of the Tecnost shares.

JJ 00282

C) Current assets

I. Inventories

Net inventories at 31 December 2002 amounted to 584 million euros (861million euros at 31 December 2001):

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Raw, ancillary and consumable materials	30	42	(12)
Work-in progress and semifinished products	27	29	(2)
Total manufactoring inventories	57	71	(14)
Finished products and goods for resale:			
- in respect of group core business	323	409	(86)
- property for sale	23	27	(4)
	346	436	(90)
Contract work-in progress	179	352	(173)
Advance payments	2	2	-
Total	**584**	**861**	**(277)**

Long-term contract work-in-progress reflected considerations due under contractual terms, according to the percentage of completion method.
Property for sale comprised land and buildings already owned by the Olivetti Group, as well as residential real estate whose construction or restructuring had not been completed by the contractors at 31 December 2002.

II. Receivables

Accounts receivable not held as fixed assets amounted to 16,735 million euros at 31 December 2002 (14,488 million euros at 31 December 2001).

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Receivables due within 12 months	14,669	13,760	909
Receivables due after 12 months	2,066	728	1,338
Total	**16,735**	**14,488**	**2,247**

00263

Receivables due within 12 months

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Financial receivables:			
Interest-bearing current accounts and loans			
- subsidiary companies	23	7	16
- associated companies	12	206	(194)
- third parties	960	599	361
	995	812	183
Non financial receivables due from:			
- subsidiary companies	18	25	(7)
- associated companies	202	363	(161)
- trade customers	8,967	9,081	(114)
- others	5,374	4,354	1,020
	14,561	13,823	738
less: allowance for doubtful accounts	(887)	(875)	(12)
Total	**14,669**	**13,760**	**909**

Trade receivables before allowances for bad debts amounted to 8,967 million euros and referred in the main to amounts due for telecommunications services and supplies of office products. They related to Telecom Italia (3,753 million euros), TIM (1,404 million euros) and the Seat Pagine Gialle Group (894 million euros). They also included 1,107 million euros for amounts due from other telecommunications services providers.
Receivables were written down to estimated realisable value. Such writedowns mainly concerned amounts due to the Group's telecommunications companies.

During 2002, Telecom Italia S.p.A. transacted securitisation operations which generated a decrease of 849 million euros in trade receivables at 31 December 2002, of which 757 million euros were not yet due, and a decrease of 826 million euros in net financial indebtedness.
Factoring operations totalling 3,969 million euros were also arranged, of which 3,843 million euros relating to the Telecom Italia Group and 126 million euros to other Group companies; ceded receivables not yet due at 31 December 2002 amounted to 585 million euros.

Other short-term non-financial receivables amounted to 5,374 million euros (4,354 million euros at 31 December 2001), as follows:

JJ 00284

(in millions of euros)	31.12.2002	31.12.2001	Changes
Subsidies and grants due from the State and other public bodies	59	43	16
Amounts collected from customers, currently being credited	98	210	(112)
Amounts due from tax authorities	2,092	2,215	(123)
Prepaid taxes	2,151	991	1,160
Amounts due from employees	95	94	1
Sundry amounts due (from the State and other public bodies)	879	801	78
Total	**5,374**	**4,354**	**1,020**

Receivables due after 12 months

Receivables due after 12 months amounted to 2,066 million euros at 31 December 2002 (728 million euros at 31 December 2001), as follows:

- 2,039 million euros for prepaid taxes (704 million euros at 31 December 2001), of which 210 million euros for the entry in the Olivetti consolidated financial statements only of the Telephone Companies Employee Social Security Fund payable (which the Telecom Italia Group accounts for on a cash basis);
- 27 million euros for other receivables (24 million euros in 2001).

III. Financial assets not held as fixed assets

These assets totalled 2,156 million euros at 31 December 2002 (4,013 million euros at 31 December 2001).

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Equity investments in subsidiary companies	169	247	(78)
Equity investments in associated companies	-	134	(134)
Other equity investments	4	12	(8)
Securities	1,927	3,616	(1,689)
Receivables for securities held under reverse repurchase agreements	56	4	52
Total	**2,156**	**4,013**	**(1,857)**

Equity investments available for future divestments are classified under current assets and carried at the lower of purchase cost and estimated realisable value based on December stock market prices.

At 31 December 2002, equity investments in subsidiary companies amounted to 169 million euros and related primarily to shares held by companies in the Telecom Italia Group. The reduction was largely due to the Telecom Italia writedown on TIM shares.

Equity investments acquired for trading purposes relating to listed companies, including companies consolidated on a line-by-line basis, are classified as Securities and carried at the lower of purchase cost and estimated realisable value based on year-end stock market prices.

JJ 00285

Securities amounted overall to 1,927 million euros at 31 December 2002 and were held in the main by Group finance companies in connection with trading activities; they included 278 million euros for securities held by the Telecom Italia Group and 1,649 million euros for securities held by other Olivetti Group companies, in particular bonds (517 million euros), own bonds (649 million euros) and other securities (483 million euros).

IV. Liquid funds

At 31 December 2002 liquid funds amounted to 4,370 million euros (3,702 million euros at 31 December 2001), including 1,255 million euros for the Telecom Italia Group. They consisted mainly of cash held in bank current accounts.

D) Accrued income and prepaid expenses

Accrued income and prepaid expenses amounted to 1,480 million euros at 31 December 2002 (2,095 million euros at 31 December 2001).

(in milions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Accrued income:			
- interest income			
within 12 months	358	366	(8)
after 12 months	-	12	(12)
- other	9	100	(91)
Total accrued income	367	478	(111)
Prepaid expenses:			
- interest charges			
within 12 months	22	59	(37)
after 12 months	465	693	(228)
- other	476	734	(258)
Discounts on bond issues and other similar charges on loans	150	131	19
Total prepaid expenses and discounts	1,113	1,617	(504)
Total	**1,480**	**2,095**	**(615)**

Prepaid expenses in respect of financial charges due after 12 months amounted to 465 million euros at 31 December 2002 and consisted of the redemption premium on the Olivetti 1.5% 2001-2004 and Olivetti 1.5% 2001-2010 bonds issued by the Parent Company in 2001 and on the 2000-2005 1% Bond exchangeable for Telecom Italia shares issued by Olivetti Finance N.V., for the portions not accruing in 2002.

JJ 00286

Comments on liabilities and shareholders' equity

A) Shareholders' equity

I. Share capital

The share capital of Olivetti S.p.A. at 31 December 2002, fully subscribed, paid-up and filed with the Companies Register, was represented by 8,845,239,632 ordinary shares with a par value of 1 euro each (8,783,701,564 ordinary shares at 31 December 2001) for an aggregate value of 8,845,239,632 euros (8,783,701,564 euros at 31 December 2001).

The following operations determined the net increase of 61,538,068 euros during 2002:

- share capital increases subscribed by 31 December 2001 for an aggregate amount of 839,593 euros, filed with the Companies Register in January 2002, as follows:
  - 780,895 euros following conversion of 780,895 "Olivetti floating rate 1998-2002" bonds;
  - 52,575 euros following exercise of 52,575 "Olivetti 1998-2002 ordinary share warrants";
  - 6,123 euros following exercise of 12,246 "Olivetti 2001-2002 share warrants";

- share capital increases for an aggregate 26,954 euros following exercise in December 2001 of 21,033 "Olivetti 1998-2002 ordinary share warrants" and 11,842 "Olivetti 2001-2002 share warrants" in respect of which the corresponding shares were issued and filed with the Companies Register in 2002;

- share capital increases for an aggregate 32,161,563 euros following the conversion of bonds, comprising:
  - 28,797,733 euros following conversion of 28,797,733 "Olivetti floating rate 1998-2002" bonds with a par value of 1,000 Italian lire each (equivalent to 0.5165 euro), after utilisation of 13,924,945 euros from the "Reserve tied to conversion of Olivetti floating rate 1998-2002 bonds" formed following re-denomination of share capital in euros;
  - 134,430 euros following conversion of 134,430 "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium" (in addition to a share premium of 215,088 euros);
  - 3,229,400 euros following conversion of 3,229,400 "Olivetti 1.5% 2001-2010 convertible bonds with redemption premium";

- share capital increases for an aggregate 28,509,958 euros following exercise of warrants, comprising:
  - 22,831,828 euros par value following exercise of "Olivetti 1998-2002 ordinary share warrants"; this increase consisted of 11,791,655 euros against payment of 0.5165 euros (equivalent to 1,000 Italian lire) per share and 11,040,173 euros on a free basis (through use of the "Reserve tied to exercise of Olivetti 1998-2002 ordinary share warrants" formed following the re-denomination of share capital in euros);

JJ 00287

- 5,654,982 euros par value following exercise of a similar number of "Olivetti 1999-2001 share warrants" assigned to Parent Company and subsidiary managers;

- 2,688 euros par value (in addition to a share premium of 8,114 euros) following exercise of 2,400 "Olivetti ex Tecnost 1999-2004 warrants" on an exchange basis of 1.12 Olivetti shares per warrant; the issue was effected for 620 euros against payment and for 2,068 euros on a free basis through use of the "Reserve tied to exercise of ex Tecnost 1999-2004 warrants" formed following the re-denomination of Tecnost S.p.A. share capital in euros;
- share capital increase for 20,460 euros par value (in addition to a share premium of 17,739 euros) following exercise of 40,920 "Olivetti 2001-2002 ordinary share warrants".

Future potential changes in share capital and proxies assigned to Directors

The following were still outstanding at 31 December 2002:
- 137,355,625 "Olivetti ex Tecnost 1999-2004 warrants" with a floating exercise price. Exercise of these warrants would determine an aggregate share capital increase including the share premium varying from a minimum of 581.5 million euros (January 2003) to a maximum of 711.7 million euros (June 2004), as well as 118.4 euros from utilisation of pre-established free share capital increase reserves;
- 487,409,258 "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium" which would generate a share capital increase for an aggregate par value of 487.4 million euros (in addition to a share premium of 779.9 million euros);
- 2,409,663,062 "Olivetti 1.5% 2001-2010 convertible bonds with redemption premium" in respect of which a similar number of Olivetti ordinary shares could still be issued at 31 December 2002 for an aggregate par value of 2,409.7 million euros.

The Board of Directors' meeting of 24 February 2000 implemented the proxy granted pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Shareholders' Meeting of 7 April 1999 to carry a resolution for a Three-Year Stock Option Plan from 1 January 2002 to 31 December 2004, assigning to approximately one hundred managers of the Parent Company and its subsidiaries 29,500,000 free warrants for subscription of an equal number of Olivetti ordinary shares at a price of 3.308 euros per share (after adjustment for the share capital increases of 2001) corresponding to the normal value of Olivetti ordinary shares at the date of the Board of Directors' meeting.
The warrants were to have been exercised in three groups in the period between 1 November and 15 December of 2002, 2003 and 2004 and could be accumulated until the end of the Plan.

Subsequently, the Board of Directors' meeting of 9 February 2001 passed a resolution to revoke the previous resolution of 24 February 2000 and to raise share capital by an aggregate amount of 29 million euros through issue of 29 million shares at a subscription price of 2.515 euros per share (after adjustment for the share capital increases of 2001). The shares are reserved for managers of the Parent Company and its subsidiaries and service the warrants to be assigned to such managers under the "February 2002 – December 2004 Three-Year Stock Option Plan", with no changes to terms and conditions applying to stock options (a total of 1,330,000) already assigned to managers on the payroll as of 24 February 2000 who had since left the Group's employ.

JJ 00288

The Shareholders' Meeting of 8 May 2002 upheld the Board of Directors' proposal of 13 October 2001 and passed a resolution to revoke the non-utilised portions of the proxies pursuant to articles 2443 and 2420 ter granted with the resolutions carried by the Shareholders' Meetings of 7 April 1999 and 13 October 2001 (amounting respectively to a maximum of 6,740 million euros and 10,051 million euros). Therefore any future operation on capital or any operation that may have an effect on capital (to be executed directly or through a request for new proxies, by means of issuance of shares, convertible bonds or bonds with warrants, warrants, options or other similar rights to the Company shares) will be submitted for Shareholder approval on a case-by-case basis.
The Shareholders' Meeting of 8 May 2002 also passed a resolution empowering the Directors, pursuant to article 2420 ter of the Italian Civil Code, to issue bonds in euros or foreign currency, in one or more instances, over a maximum period of five years as from the date of the resolution, for a maximum aggregate amount of 9 billion euros, within the limits permitted under law on a case-by-case basis, and to establish the procedures, terms, conditions and regulations thereof.

I bis. Share capital increases to be filed with the Companies Register pursuant to art. 2444 of the Italian Civil Code

The balance on this heading amounted to 200,198 euros at 31 December 2002 (839,593 euros at 31 December 2001). It reflects the par value of the shares issued by Olivetti S.p.A. in respect of share capital increases effected in 2002, which had not been filed with the Companies Register by the end of the year.

I ter. Share capital increase payments relating to shares to be issued

At 31 December 2002 the balance on this Parent Company heading was zero (26,954 euros at 31 December 2001).

II. Additional paid-in capital

This Parent Company reserve amounted to 3,765,365,301 euros at 31 December 2002 compared with 3,765,113,918 euros at 31 December 2001, a net increase of 251,383 euros which reflected the following movements:

- 10,442 euros relating to 12,044 shares (issued at 1.867 euros per share) arising from the exercise in December 2001 of a similar number of "Olivetti 2001-2002 share warrants" for which the relevant shares were issued in 2001 and registered in 2002 (6,123 shares) or issued and registered in January 2002 (5,921 shares);
- 215,088 euros relating to 134,430 shares issued following conversion of a similar number of bonds (with a par value of 2.60 euros per bond) of the series "Olivetti 1.5% 2001-2004 convertible with redemption premium";
- 17,739 euros relating to 20,460 shares issued (at a price of 1.867 euros per share) following exercise of 40,920 "Olivetti 2001-2002 share warrants";
- 8,114 euros relating to 2,688 shares issued following exercise of 2,400 "Olivetti ex Tecnost 1999-2004 warrants" at a price of 3.249 euros per share.

JJ 00289

II bis. Additional paid-in capital in respect of share increases to be filed with the Companies Register and of shares to be issued

This Parent Company reserve (which is not shown in the Consolidated Balance Sheet given the immaterial amount involved) amounted to 126,941 euros at 31 December 2002 (10,442 euros at 31 December 2001).

III. Revaluation reserves

This Parent Company reserve of 1,128,827 euros (unchanged from 31 December 2001) consists of the revaluation reserve originally stated in the books of the merged company Tecnost S.p.A. and re-formed in the books of Olivetti S.p.A..

IV. Legal reserve

This Parent Company reserve amounted to 920,809,760 euros at 31 December 2002 (unchanged from 31 December 2001).

V. Reserve for treasury stock

This Parent Company reserve of 2,298,156 euros reflects the value of 2,697,500 shares issued and held by Olivetti S.p.A. and carried in the balance sheet under the appropriate financial fixed assets heading.

VII. Other reserves

a) Other Parent Company reserves

At 31 December 2002 these reserves reflected an aggregate amount of 2,036,088,939 euros compared with 2,061,056,125 euros at 31 December 2001, a total net decrease of 24,967,186 euros.

1) Extraordinary reserve

At 31 December 2002 this reserve amounted to 1,888,261,068 euros (unchanged from 31 December 2001).

2) Restricted reserve tied to exercise of Olivetti ex Tecnost 1999-2004 warrants

This reserve was formed following the free share capital increase at Tecnost S.p.A. and the simultaneous re-denomination of share capital in euros. It is irrevocably tied to exercise of "Olivetti ex Tecnost 1999-2004 warrants". At 31 December 2002 it amounted to 118,369,170 euros, down by 2,068 euros from 31 December 2001 due to exercise of 2,400 warrants during the year.

JJ 00290

3) Restricted reserves tied to conversion of Olivetti bonds and exercise of Olivetti warrants

These reserves (formed following the re-denomination of Olivetti share capital in euros) amounted to an aggregate 19,241,691 euros at 31 December 2002 compared with 44,206,809 euros at 31 December 2001. The decrease of 24,965,118 euros reflects:

- for 13,924,945 euros, use of the "Reserve for conversion of Olivetti floating rate 1998-2002 bonds" (which decreased from 14,852,133 euros to 927,188 euros) following conversion of 28,797,733 bonds;
- for 11,040,173 euros, use of the "Reserve for exercise of Olivetti 1998-2002 ordinary share warrants" (which decreased from 11,203,283 euros to 163,110 euros) following exercise of 22,831,828 warrants.

At 31 December 2002 the heading also included the "Reserve for exercise of Olivetti 2002-2004 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries" for 14,264,521 euros, unchanged from 31 December 2001, (and for 643,112 euros still restricted as tied to the exercise of no.1,330,000 warrants still outstanding), and the "Reserve for exercise of Olivetti 1999-2001 subscription rights (warrants or options) reserved for managers of Parent Company and its subsidiaries" for 3,886,872 euros, also unchanged from 31 December 2001.

After closure of the conversion period for Olivetti 1998-2002 floating rate bonds and the exercise period for Olivetti 1998-2002 share warrants, Olivetti 1999-2001 subscription rights and no. 28,170,000 Olivetti 2002-2004 subscription rights (stock options), at 31 December 2002 the corresponding reserves, which reflected an aggregate balance of 18,598,579 euros, were no longer restricted.

4) Non-taxable reserves

These reserves, amounting overall to 10,217,010 euros (unchanged from 31 December 2002), were originally carried by Tecnost S.p.A. They were re-formed in the Olivetti balance sheet following the merger of Tecnost into and with Olivetti. Taxes are not provided for these reserves since operations that would make them liable for taxation are not planned at the present time.

a) Reserve for Parent Company shares held by subsidiary companies

This reserve amounted to 391 million euros at 31 December 2002 (unchanged from 31 December 2001) in respect of 211,931,328 Olivetti shares held by the subsidiary Olivetti International S.A., and received in exchange for Tecnost S.p.A. shares following the merger of Tecnost into and with Olivetti.

VII. Sundry reserves, retained earnings and accumulated losses

At 31 December 2002 this heading reflected a negative balance of 3,548 euros (a negative balance of 107 million euros at 31 December 2001). It included sundry reserves, retained earnings/accumulated losses, exchange rate differences from the translation of financial statements denominated in foreign currency and other net equity headings relating to subsidiaries that were not eliminated during consolidation.

JJ 00291

Total Group shareholders' equity

At 31 December 2002 consolidated shareholders' equity pertaining to the Group amounted to 11,640 million euros (12,729 million euros at 31 December 2001).
The reconciliation of the consolidated net result pertaining to the Group and the Parent Company net result for 2002 is set out below:

(in millions of euros)	Net result for the year
Net result shown in the Olivetti S.p.A. statutory financial statements as of 31 December 2002	(6,240)
Elimination of dividend income from subsidiary companies	(1,245)
Elimination of the writedown of Telecom Italia equity investment recorded by the Parent Company for tax purposes only	8,051
Amortization of consolidation goodwill on the acquisition of Telecom Italia shares	(1,293)
Results as adjusted for consolidation purposes of subsidiary companies and other changes	(46)
Net result shown in the consolidated financial statements of the Olivetti Group as of 31 December 2002	(773)

The reconciliation of consolidated shareholders' equity pertaining to the Group and Parent Company shareholders' equity at 31 December 2002 is set out below:

(in millions of euros)	Shareholders' equity
Amount shown in the Olivetti S.p.A. statutory financial statements as of 31 December 2002	9,031
Lower carrying value in Olivetti S.p.A. statutory accounts of equity investment in Telecom Italia	2,607
Higher carrying value in Olivetti S.p.A. statutory accounts of other equity investments with respect to the relevant shareholders' equity portions (as adjusted for consolidation purposes)	(101)
Other differences	103
Amount shown in the consolidated financial statements of the Olivetti Group as of 31 December 2002	**11,640**

X. Minority interests

Minority interests at 31 December 2002 and 2001 were as follows:

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Reserves	8,517	14,210	(5,693)
Result of the year	467	(586)	1,053
Total	8,984	13,624	(4,640)

JJ 00292

Total shareholders' equity

Total shareholders' equity at 31 December 2002 and 2001 (Group shareholders' equity and minority interests) amounted to 20,624 million euros and 26,353 million euros respectively, and comprised:

(in millions of euros)	31.12.2002 (a)	31.12.2001 (b)	Changes (a-b)
Capital and reserves			
Group	12,413	15,819	(3,406)
minority interests	8,517	14,210	(5,693)
	20,930	**30,029**	**(9,099)**
Net result of the year			
Group	(773)	(3,090)	2,317
minority interests	467	(586)	1,053
	(306)	**(3,676)**	**3,370**
Total	**20,624**	**26,353**	**(5,729)**

B) Reserves for risks and charges

Reserves for risks and charges at 31 December 2002 and 2001 amounted to 5,826 million euros and 4,158 million euros respectively and comprised:

1) Employee pensions and similar obligations

This reserve includes liabilities accruing to the employees of a number of Group companies operating abroad. At 31 December 2002 it amounted to 47 million euros, compared to 66 million euros at 31 December 2001.

2) Taxation

This reserve includes the provision for tax risks and the provision for deferred taxes.
The reserve for tax risks is provided in relation to potential charges on open or disputed tax positions. At 31 December 2002 it amounted to 344 million euros (378 million euros at 31 December 2001), of which 198 million euros relating to the Telecom Italia Group (154 million euros at 31 December 2001), 103 million euros to Olivetti Finance N.V. (202 million euros at 31 December 2001) and 43 million euros to other Olivetti Group companies.
The tax position of the Parent Company Olivetti S.p.A. is illustrated in the Explanatory Notes to the Olivetti S.p.A. Financial Statements.

Deferred taxes and prepaid taxes are calculated on temporary differences between the tax values of assets and liabilities and the corresponding book values carried in the Group companies' balance sheets used for consolidation purposes, as well as on consolidation adjustments, based on local tax rates in each country.

JJ 00293

Deferred taxes and prepaid taxes are set off only when permitted under tax laws and for each financial year in which temporary differences are expected to be reversed.

Deferred tax liabilities which are not set off against prepaid taxes are included in the Reserve for deferred taxes, while prepaid taxes which are not set off against deferred taxes are classified under the current assets heading Other receivables.

The balance on deferred and/or prepaid taxes at 31 December 2002 reflected a net tax asset of 4,150 million euros, compared with a net tax asset of 1,314 million euros at 31 December 2001, and comprised:

(in millions of euros)	31.12.2002	31.12.2001	Changes
Reserves for deferred taxes	40	381	(341)
Prepaid tax assets	(4,190)	(1,695)	(2,495)
Net tax liability (asset)	**(4,150)**	**(1,314)**	**(2,836)**

Prepaid tax assets referred to the Telecom Italia Group for 3,546 million euros and to Olivetti S.p.A. for 624 million euros.
As of 31 December 2002 Olivetti Group companies had tax losses brought forward, not utilised to post deferred tax assets, representing an aggregate amount of approximately 2,200 million euros.

3) Other provisions

At 31 December 2002 these reserves amounted to an overall total of 5,395 million euros (3,333 million euros at 31 December 2001). They included reserves provided by Telecom Italia Group companies for 4,950 million euros, as follows:

- provisions of 293 million euros for risks relating to investee companies, consisting largely of extraordinary charges relating to the new strategic guidelines;
- a provision of 1,942 million euros relating to forward purchase commitments on Seat Pagine Gialle shares, for the estimated unrecoverable amount of the original strike price: following re-negotiation of the strike price on 25 February 2002, the entire 2001 provision of 569 million euros was re-classified under payables due to other lenders; in November the payable was early repaid to JP Morgan Chase with a consideration of 500 million euros, equivalent to the present value of the payable;
- a provision of 43 million euros at Seat Pagine Gialle, for charges relating to the exercise of put options by the founder shareholders of Consodata S.A.;
- provisions of 850 million euros at TIM, to cover guarantees given by the Group in favour of Is Tim bank creditors and the loan granted directly by the Group;
- provisions for contractual and sundry risks totalling 946 million euros, mainly at Telecom Italia; these included current and prior-year provisions relating to the spin-off of the "Grandi Immobili" business and the disposals of Italtel, Telespazio and the satellite consortia; the amounts reversed to income related almost entirely to the termination of the agreement for the sale of Stream to News Corporation and Vivendi Universal/Canal+ (59 million euros);

JJ 00294

- provisions of 299 million euros for restructuring charges, including 194 million euros at Telecom Italia;
- provisions of 453 million euros for technological upgrades and charges relating to Tim's regulatory position;
- provisions of 124 million euros at Telecom Italia Finance (ex Sogerim) for financial charges on the bond loan.

The other reserves of 445 million euros for the other Olivetti Group companies included provisions of 201 million euros for contractual risks arising from the disposal of equity investments.

C) Reserve for employee severance indemnities

This heading reflects accrued severance liabilities pursuant to current legislation and employment contracts in the countries in which the consolidated companies operate.

The movements on the reserve during 2002 were as follows:

(in millions of euros)	
Balance as of 31 December 2001	**1,414**
Indemnity accrued	216
Indemnities paid in the year	(168)
Other changes, net	(98)
Balance as of 31 December 2002	**1,364**

D) Payables

Payables at 31 December 2002 totalled 53,243 million euros (60,251 million euros at 31 December 2001), of which 40,631 million euros were financial payables (46,819 million euros at 31 December 2001) and 12,612 million euros were trade and other payables (13,432 million euros at 31 December 2001).

JJ 00296

The Olivetti Group's main debt positions are illustrated below:

Telecom Italia Group

Bonds amounted to 10,624 million euros, an increase of 2,441 million euros compared with 31 December 2001. They were as follows:

- an international bond issued by the subsidiary company Sogerim (merged with Telecom Italia Finance) for a total of 6,000 million euros. The issue was subdivided into three tranches: one, floating rate notes for 1,000 million euros maturing 20 April 2004; two, fixed rate bonds for 3,000 million euros maturing 20 April 2006; three, fixed rate bonds for 2,000 million euros maturing 20 April 2011;
- floating rate notes for a total of 1,500 million euros issued by Telecom Italia (the first issue in the Global Medium Term Note Programme with Telecom Italia as issuer). The bond matures on 21 June 2005, and is callable at par by the issuer as from the end of second year and with each subsequent coupon;
- bonds maturing in 2003 issued by Brazil's Tele Nordeste Celular and Tele Celular Sul for an aggregate amount of 108 million euros;
- bonds maturing between 2007 and 2023 issued by Entel Chile for an aggregate amount of 208 million euros;
- bonds issued by the TDL Infomedia Ltd. Group, maturing between 2009 and 2010, for an aggregate amount of 116 million euros.
- a 2,500 million euro fixed rate bond issued by Telecom Italia on 1 February 2002 and subdivided into two 1,250 million euro tranches maturing on 1 February 2007 and 1 February 2012 respectively. The issue is part of the "Global Note Programme";
- a 2002 – 2022 bond reserved for current and retired employees of Italian companies controlled directly and indirectly by Telecom Italia, for 192 million euros.

Convertible bonds refer to a bond issued in March 2001 by Sogerim (merged with Telecom Italia Finance) for 2,500 million euros, exchangeable into TIM or Seat Pagine Gialle shares, with the issuer having the right to make a cash settlement. The bond matures after five years, with early redemption rights for investors as from the end of the third year. The bond was reduced by 536 million euros due to the bond buy-back by Telecom Italia Finance, which subsequently cancelled the notes.

Amounts due to banks amounted to 5,028 million euros and were collateralised by mortgages for 25 million euros and pledges for 229 million euros; the decrease in respect of 31 December 2001 was 5,207 million euros.

Amounts due to other lenders totalled 1,419 million euros, a decrease of 744 million euros from 31 December 2001. They include amounts due at Seat Pagine Gialle for a loan granted by Seat Pagine Gialle Finance s.r.l., a corporate securitisation vehicle wholly owned by third parties, which operates pursuant to law no. 130/99 (780 million euros), amounts due at Telecom Italia for short-term loans granted by T.I. Securitisation Vehicle s.r.l. for surplus liquidity generated in connection with the securitisation operation (165 million euros), and loans granted to Telecom Italia by the Cassa Depositi e Prestiti (284 million euros).

JJ 00297

Amounts due to associated companies amounted to 398 million euros, and included 393 million euros for amounts due to Teleleasing in respect of finance lease contracts.

Amounts due to tax authorities totalled 32 million euros and referred to the agreements with the tax authorities regarding the notices of assessment served on Telecom Italia in 2001.

Amounts due in respect of notes payable totalled 241 million euros. They comprised investment certificates of 221 million euros maturing in June 2003 issued by Seat Pagine Gialle as part of the securitisation operation with Seat Pagine Gialle Finance s.r.l. and short-term finance bills for 20 million euros issued by Telecom Italia.

Other payables amounted to 372 million euros. They included 181 million euros at Telecom Italia (including 176 million euros for security lending operations) and 161 million euros at the TIM Group for residual amounts due to the Ministry of Communications for acquisition of the UMTS licence in Italy and Greece.

Other companies

Bonds amounted overall to 13,780 million euros. For each one, the original rate and any credit protection step-ups are disclosed separately below. All hedging operations are analysed in the section "Hedging instruments and other derivatives".

* Olivetti International N.V. - 700 million euros
  - bond (1998-2003) with a fixed annual 5.875% coupon + 0.15% step-up maturing in May 2003;
* Olivetti International N.V. – 1,500 million euros
  - bond (1999-2009) with a fixed annual 5% coupon + 0.15% step-up maturing in February 2009 ;
* Olivetti International N.V. - 100 million Swiss francs equivalent to 69 million euros
  - Swiss franc bond (1986-2046) with a fixed annual 5.625% coupon maturing in June 2046;
* Olivetti Finance N.V. (originally Olivetti International Finance N.V.) – 4,200 million euros
  - bond (1999-2004) with a fixed annual 5 3/8% coupon + 0.45% step-up maturing in July 2004;
* Olivetti Finance N.V. – 200 million euros
  - bond (2002-2005) with a floating rate coupon of 1.45% over the EONIA maturing in February 2005;
* Olivetti Finance N.V. – 500 million euros
  - bond (2002-2005) with a floating rate coupon linked to quarterly EURIBOR + 130 basis points. Bondholders may extend maturity for subsequent periods of 21 months up to an overall maximum term of 10 years;
* Olivetti Finance N.V. –1,100 million euros
  - bond (2002-2006) with a floating rate quarterly coupon + 1.25% spread maturing in January 2006;
* Olivetti Finance N.V. –1,750 million euros
  - bond (2002-2007) with a fixed annual 6.5% coupon maturing in April 2007;

JJ 00298

* Olivetti Finance N.V. (originally Olivetti International Finance N.V.) – 2,350 million euros
  – bond (1999-2009) with a fixed annual 6 1/8% coupon + 0.45% step-up maturing in July 2009;
* Olivetti Finance N.V. – 1,000 million euros
  – bond (2002-2012) with a fixed annual 7.25% coupon maturing in April 2012;
* Olivetti Finance N.V. – 20 billion yen equivalent to 161 million euros
  – bond (2002-2032) with a fixed six-monthly 3.55% coupon maturing in May 2032 (callable by the issuer annually as from the tenth year);
* Olivetti Finance N.V. – 250 million euros
  – bond (2002-2032) with a fixed annual 7.77% coupon maturing in August 2032.

All the above Olivetti Finance N.V. bonds were issued under the Euro Medium Term Note programme (EMTN).

Convertible bonds amounted overall to 5,437 million euros, as follows:

* Olivetti Finance N.V.: 2000-2005 bond for 765 million euros exchangeable for Telecom Italia ordinary shares, with a fixed annual 1% coupon and redemption premium of 113.41% of the issue price (approximately 15.22 euros per bond) maturing in November 2005. The loan determined an aggregate payable of 868 million euros. The yield on maturity is 3.5% per annum and the exchange will be one Telecom Italia share for each bond;
* Olivetti S.p.A.: 2001-2004 bond for 1,267 million euros convertible into Olivetti S.p.A. shares, with a fixed annual 1.5% coupon and redemption premium of 105.07759% of the issue price (2.6 euros per bond) maturing in January 2004. The loan determined an aggregate payable of 1,331 million euros. The yield on maturity is 3.25% per annum and the conversion rate is one Olivetti share for each bond.
* Olivetti Finance N.V.: 2002-2004 zero-coupon bond for 385 million euros maturing in March 2004. The loan is convertible into 41,400,000 Telecom Italia ordinary shares (at an exercise price of 9.30 euros per share);
* Olivetti S.p.A.: 2001-2010 bond for 2,410 million euros convertible into Olivetti S.p.A. shares, with a fixed annual 1.5% coupon and redemption premium of 118.37825% of the issue price (1.0 euros per bond) maturing in January 2010. The loan determined an aggregate payable of 2,853 million euros. The yield on maturity is 3.5% per annum and the conversion rate is one Olivetti share for each bond.

Amounts due to banks amounted to an aggregate 748 million euros (630 million euros at 31 December 2001). The main items were as follows:

* Olivetti S.p.A.:
  – IMI research loans pursuant to law no. 346/1988, for 47 million euros, average rate of 12.4742% at 31 December 2002 before interest-relief grants, to be repaid by the end of 2004 (27 million euros falling due by 31.12.2003);
  – other loans totalling 644 million euros, average rate of 3.886% at 31.12.2002, to be repaid by the end of 2003.
* Olivetti Tecnost Group:
  – loans totalling 40 million euros (13 million euros falling due by 31.12.2003);
  – other short-term payables for 17 million euros.

JJ 00299

Amounts due to other lenders amounted to an aggregate 551 million euros, as follows:

* Olivetti S.p.A.: subsidised loans for technological innovation (FIT) totalling 13 million euros (3 million euros falling due by 31.12.2003), average rate of 4.0994% at 31.12.2002, to be repaid by 2012;
* other loans for 32 million euros;
* other companies:
  - a financing contract for 174 million euros due 29.10.2029 granted to Olivetti International Finance N.V. by a Japanese investor; the borrowing previously took the form of a bond loan; this 20 billion yen loan bears a fixed 5% coupon + 0.45% step-up in relation to a notional capital of 185.6 million US dollars;
  - other loans totalling 31 million euros (5 million euros falling due by 31.12.2003);
  - short-term payables due to other lenders for 301 million euros.

***

Financial payables totalling 40,631 million euros may be analysed by currency as follows:

(in millions of euros)	31.12.2002	31.12.2001
EMU currencies	35,465	42,502
Other currencies	5,166	4,317
Total	**40,631**	**46,819**

At 31 December 2002 financial payables due after five years amounted to 12,703 million euros, as follows:

(in millions of euros)	31.12.2002	31.12.2001
Bonds	12,408	8,804
Amounts due to banks	4	350
Amounts due to other lenders	291	597
Total	**12,703**	**9,751**

Overall net financial indebtedness at 31 December 2002 amounted to 33,399 million euros (38,362 million euros at 31 December 2001) as shown in the table below:

Amounts due to suppliers totalled 5,649 million euros and included 513 million euros due to other telecommunications services providers.

Amounts due to tax authorities totalled 887 million euros (969 million euros at 31 December 2001) and included current income taxes, indirect duties and taxes and withholdings to be paid.
The current tax payable of 244 million euros reflects a reasonable estimate of the current income tax liabilities of Group companies computed with reference to local tax regulations; the payable for other taxes at 31 December 2002 refers in the main to tax withholdings applied by Group companies in their capacity as withholding agents.

00302

The tax position of Olivetti S.p.A. is illustrated in the Explanatory Notes to the Parent Company financial statements.

Amounts due to social security authorities totalled 1,359 million euros and referred to contributions accrued and due to social security authorities; the heading includes 595 million euros in respect of the residual Telecom Italia payable due to the INPS in connection with the estimated re-absorption charge for former ASST personnel, pursuant to law no. 58/1992.
The heading also includes the payable of 568 million euros to the former Telephone Companies Employee Social Security Fund (FPT) for Telecom Italia Group employees, which was incorporated under compulsory national insurance on 1 January 2001. The amount was recorded in the Olivetti Group consolidated financial statements at the time of determination of consolidation goodwill on the acquisition of the Telecom Italia Group.

Other payables amounted to 4,188 million euros and included:
- 1,604 million euros for customer-related items: subscriber payments for conversations, prepaid rentals and prepaid traffic charges;
- 1,394 million euros for contributions regarding operation of telecommunications services;
- 720 million euros for payables relating to staff management;
- 470 million euros for other items of a miscellaneous and recurring nature.

Hedging instruments and other derivatives

The Olivetti Group enters into forward contracts to hedge risks associated with exchange rate fluctuations among the currencies of denomination of commercial and financial transactions undertaken by Group companies.

At 31 December 2002, the Olivetti Group companies had forward contracts and options for the purchase or sale of foreign currency at pre-arranged rates of exchange for the equivalent of 702 million euros, comprising hedging contracts for 537 million euros on financial operations transacted by Olivetti International S.A. and exchange-risk hedges for 165 million euros arranged by Olivetti Finance N.V. (on the 20 billion yen 2002/2032 bond issued by Olivetti Finance N.V.).

The Olivetti Group enters into Interest Rate Swaps (IRS), Currency and Interest Rate Swaps (CIRS) and other hedging agreements to mitigate the possible effects of interest rate fluctuations. At 31 December 2002, the Group companies had short- and long-term forward contracts covering financial liabilities based on a total notional capital amount for the equivalent of 16,735 million euros (5,881 million euros relating to Telecom Italia Group companies and 10,854 million euros relating to other Olivetti Group companies), as illustrated below:

(in millions of euros)	31.12.2002

Telecom Italia Group

The Telecom Italia Group used derivatives mainly for the management of its debt positions, primarily interest rate swaps (IRS) and interest rate options (IRO) to reduce interest rate exposure on fixed rate and floating rate bank loans and bonds, and cross currency and interest rate swaps (CIRS) and currency forwards to convert currency loans – mainly in dollars and euros – into the accounting currencies of the various Group companies.
IRSs and IROs respectively involve or may involve the exchange, with the counterparts, of interest flows calculated on the reference notional value at the agreed fixed or floating rates, at the specified maturity dates. The notional value does not represent the amount exchanged and therefore does not constitute a measure of exposure to credit risk, such exposure being limited instead to the amount of interest or interest differentials to be received at the interest date.
The same also applies to CIRSs, which involve the exchange of the principal, in the respective currencies of denomination, at maturity and eventually for cash, in addition to the settlement of periodic interest flows. Counterparts to derivative contracts are selected from among the top rated banks and financial institutions and are continually monitored in order to minimise the risk of default.

Other companies

The main hedging agreements with regard to the medium/long-term debt positions of the other companies in the Olivetti group are analysed below.

With regard to the 1986/2046 100 million Swiss franc 5.625% fixed rate bond (69 million euros) expiring in June 2046 issued by Olivetti International N.V., Olivetti International S.A. has arranged an IRS for the full amount and maturity, to convert the annual fixed rate into a six-monthly floating rate in Swiss francs.

With regard to the 1999/2009 1,500 million euro 5%+0.15% step-up fixed rate bond maturing in February 2009 issued by Olivetti International N.V., Olivetti International S.A. and Olivetti Finance N.V. have arranged the following hedging contracts for the full amount and maturity:

- IRS for 500 million euros to convert the annual fixed rate into a quarterly floating rate with a protection structure applicable until the 1-year swap rates exceed the 5-year swap rates and simultaneous floor sale at 2.50%;
- IRS for 500 million euros to convert the annual fixed rate into a quarterly 4.30% fixed rate (if 3-month Euribor remains under 5.80%), or into a quarterly floating rate less 0.50% (if 3-month Euribor exceeds 5.80%), and simultaneous cap sale for 500 million euros at the USD six-monthly rate of 7.10%;
- IRS for 250 million euros to convert the annual fixed rate into a fixed 4.15% rate (if 6-month Euribor fixed in arrears remains under 6.65%) or into a six-monthly floating rate fixed in arrears (if 6-month

JJ 00366

Euribor exceeds 6.65%), with a protection structure applicable until the USD 5-year swap rates exceed the GBP 5-year swap rates with a 1% increment;
- IRS for 250 million euros to convert the annual fixed rate into a six-monthly floating rate fixed in arrears, with a protection structure applicable until the USD 5-year swap rates exceed the GBP 5-year swap rates with a 1% increment.

With regard to the 1998/2003 700 million euros annual 5.875%+0.15% step-up fixed-rate bond maturing in May 2003 issued by Olivetti International N.V., Olivetti International S.A. has arranged IRS for a similar amount and maturity to convert the annual fixed rate into a rate linked to the six-monthly and two-year rates in Swiss francs, fixed in arrears.

With regard to the fixed-rate 20 billion yen borrowing expiring in October 2029 received by Olivetti International Finance N.V., Olivetti S.p.A. has arranged a CIRS for the full amount and similar expiration, to convert the rate into an annual 5.525% fixed rate until 2004 and subsequently into an annual 6.08% fixed rate (or into a floating rate, as the counterpart prefers) until maturity (on a principal of 174.2 million euros). The interest rate and currency risk hedging structure is applicable as long as Olivetti S.p.A. is *in bonis*.

With regard to the 2002/2032 bond for 20 billion yen (equivalent to 161 million euros) with a 3.55% fixed-rate coupon maturing in May 2032 issued by Olivetti Finance N.V., Olivetti Finance N.V. has arranged an IRS with similar maturity to convert the annual fixed rate into a 1.68% fixed rate until 2012 and subsequently into a six-monthly floating rate until maturity. The interest-rate and currency risk hedging structure is applicable as long as Olivetti S.p.A. is *in bonis*.

With regard to the Olivetti Finance N.V. 1999/2009 bond for 2,350 million euros with an annual 6.125%+0.45% step-up fixed rate (originally issued by Olivetti International Finance N.V.), Olivetti Finance N.V. has arranged IRS for the full amount and similar maturity to convert the annual fixed rate as follows:

a) into a 3.55% fixed rate until January 2003 and subsequently into a floating rate linked to the US six-monthly rates fixed in arrears for 1,000 million euros with the following additional hedges:
   - cap purchase at 5.17%
   - cap sale at 6.44%
   - floor sale at 1.50% until July 2003 and subsequently at 3.25% until maturity;
b) into a 4.1475% fixed rate until January 2003 and subsequently into a floating rate linked to six-monthly Euribor fixed in arrears for 750 million euros with the following additional hedges:
   - cap purchase at 5.50%
   - cap sale at 7.125% on the USD 6-month rate fixed in arrears as from July 2005
   - floor sale at 2.375% as from July 2003;
c) into a six-monthly 5.55% fixed rate for 250 million euros until 30 January 2003, subsequently into a 5.5745% fixed rate if 6-month Euribor remains below 7%, or into a six-monthly floating rate if 6-month Euribor exceeds 7%, with a protection structure application until the 1-year swap rates exceed the 5-year swap rates;
d) into a six-monthly 5.0025% fixed rate for 350 million euros until 30 January 2003 and subsequently into a 5.12% fixed rate until July 2003, into a floating rate linked to quarterly Euribor fixed in arrears until July 2004 and subsequently until maturity into a floating rate linked to quarterly USD Libor and Euribor, whichever is the higher.

JJ 00367

With regard to the Olivetti Finance N.V. 1999/2004 bond for 4,200 million euros with an annual 5.375%+0.45% step-up fixed rate (originally issued by Olivetti International Finance N.V.) maturing in July 2004, Olivetti Finance N.V. has arranged the following hedges with similar maturity for a total of 4,000 million euros:

a) for 500 million euros, conversion of the annual fixed rate into a six-monthly fixed rate of 4.1829% until January 2003 and subsequently of 4.63% until maturity;
b) for 1,000 million euros, conversion of the annual fixed rate into 12-month Euribor fixed in arrears (of which 500 million euros already fixed at 5.375% until July 2003) with a floor sale for a similar amount at 3.15% fixed in arrears (to be applied if at fixing 12-month Euribor is below 2.65%);
c) conversion of the annual fixed rate until January 2003 into a six-monthly fixed rate of 4.83% for 500 million euros and of 4.4675% for a further 1000 million euros, with conversion of the annual fixed rate into a six-monthly floating rate fixed in arrears;
d) for 500 million euros, conversion of the annual fixed rate (4.8 % until January 2003) into quarterly Euribor fixed in arrears with floor sale at 3.25% for 450 million euros (applicable if at fixing 3-month Euribor is below 2.75%);
e) for 500 million euros, conversion of the annual fixed rate into a six-monthly floating rate linked to the CHF 2-year swap rate with six-monthly fixing in arrears.

With regard to the 2002/2005 bond for 500 million euros with a quarterly floating rate maturing in March 2005 issued by Olivetti Finance N.V., Olivetti Finance N.V. has arranged IRS with similar maturity to convert the floating rate into an average quarterly fixed rate of 4.0865%.

With regard to the 2002/2006 bond for 1,100 million euros with a quarterly floating rate maturing in January 2006 issued by Olivetti Finance N.V., Olivetti Finance N.V. has arranged RS for 800 million euros with similar maturity to convert the floating rate as follows:

a) into a quarterly floating rate for 200 million euros linked to the quarterly USD or euro rate, whichever is the higher, with a protection structure applicable until the CHF quarterly rates are below the USD rates;
b) into a six-monthly floating rate fixed in arrears for 600 million euros with the following additional hedges:
   - floor sale at 3% (to be activated if at fixing six-monthly Euribor is below 2.50%)
   - cap sale at 5%
   - digital cap purchase to be activated if the six-monthly rate fixed in arrears exceeds 4%.

With regard to the 2002/2007 bond for 1,750 million euros with a 6.50% fixed rate maturing in April 2007 issued by Olivetti Finance N.V., Olivetti Finance N.V. has arranged IRS for 250 million euros with similar maturity to convert the annual fixed rate as follows: for 250 million euros into a six-monthly fixed rate of 5.75% until April 2003, 5.774% until April 2005, with a protection structure applicable as long as the 30-year euro swap rate exceeds the 5-year swap rate.

With regard to the 2002/2012 bond for 1,000 million euros with a 7.25% fixed rate maturing in April 2012 issued by Olivetti Finance N.V., Olivetti Finance N.V. has arranged IRS contracts with similar maturity and with the following protection structure applicable as long as the 10-year euro swap rate exceeds the two-year swap rate, to convert the annual fixed rate as follows:

- for 250 million euros, into a quarterly 5.85% fixed rate unless Euribor fixed in advance exceeds 6% or into a quarterly floating rate;
- for 100 million euros, into a quarterly 5.61% fixed rate unless the USD Libor rate exceeds 7% or into a quarterly floating rate tied to USD Libor.

11 0636

***

The following operations have also been arranged to hedge securities or other portfolio assets:

- IRS and CIRS arranged by Telecom Italia Finance and TIM Celular on financial assets for 150 million euros;
- treasury hedging contracts for a notional capital of 1,433 million euros;
- IRS arranged by Olivetti International S.A. and Olivetti Finance N.V. on securities for a nominal value of, respectively, 50 million euros and 300 million euros;
- contracts arranged by Olivetti S.p.A. to hedge the currency risk on the restricted deposit denominated in USD, for 41 million euros.

Memorandum accounts

A. Personal guarantees given and counter-securities received

At 31 December 2002 personal guarantees given directly or indirectly through banks and insurance companies amounted to 1,823 million euros (2,344 million euros at 31 December 2001), of which 965 million euros in respect of unconsolidated subsidiaries and associated companies (1,656 million euros at 31 December 2001).

Personal guarantees given at 31 December 2002 were as follows:

- guarantees given by the Telecom Italia Group in the interest of unconsolidated subsidiaries and associated companies (957 million euros), consolidated subsidiaries (5 million euros), and third parties (529 million euros) in respect of medium/long-term financial operations, supply contracts and telephony licences abroad, for a total of 1,491 million euros;
- suretyships and counter-securities given by other companies in the Olivetti Group in the interest of unconsolidated subsidiaries and associated companies (8 million euros), consolidated subsidiaries (69 million euros) and third parties (32 million euros), for a total of 109 million euros;
- 213 million euros for guarantees given by Olivetti S.p.A. to the Italian State Railways in the interest of Wind S.p.A. (formerly Infostrada S.p.A.);
- 1 million euros for guarantees given by Olivetti S.p.A. with regard to fulfilment of trade supplies by Getronics S.p.A. (formerly Wang Global S.p.A.);
- 9 million euros for other guarantees.

At 31 December 2002, the Olivetti Group had counter-securities in respect of the above guarantees for an amount totalling 596 million euros (806 million euros at 31 December 2001), as follows:

- counter-securities from third parties for 378 million euros relating to guarantees given by Telecom Italia S.p.A.;
- counter-securities from Mannesmann AG for 213 million euros relating to the guarantees given by Olivetti S.p.A. to the Italian State Railways;
- counter-securities from Getronics for 1 million euros.

JJ 00310

B. Guarantees on Group assets

These guarantees related to pledges and mortgages set up on Telecom Italia Group assets in respect of non-financial operations for an amount totalling 111 million euros at 31 December 2002 (163 million euros at 31 December 2001). They included pledges on IS Tim shares given by TIM International to guarantee fulfilment of obligations stipulated in IS Tim's supply contracts with Ericsson and Siemens.
Guarantees on Group assets securing financial operations are analysed in the section on financial payables.

C. Commitments

At 31 December 2002 the Olivetti Group had contractual commitments for an aggregate amount of 3,124 million euros (5,431 million euros at 31 December 2001), of which 3,077 million euros for the Telecom Italia Group and 47 million euros for the other companies.

Telecom Italia Group commitments amounted to 3,077 million euros (5,369 million euros at 31 December 2001) as follows:

- a commitment of 2,417 million euros for the Telecom Italia put option on Seat Pagine Gialle shares, which was updated following the re-negotiation on 25 February 2002 of the put and call options agreed with JP Morgan Chase on Seat Pagine Gialle shares; the revised agreement reduced the original strike price (from 4.2 euros to 3.4 euros per share). To guarantee fulfilment of the put on Seat Pagine Gialle shares, Telecom Italia Finance provided a Direct Participation Letter of Credit, in favour of JP Morgan Chase Equity Limited, for 1,940 million euros.
  Additionally, the 2002 year-end valuation of the call option on Seat Pagine Gialle shares generated a provision of 1,942 million euros to the reserve for risks and charges, for the estimated non-recoverable strike price following the decision to view the Seat P.G. Directories operations as a non-core business;
- 195 million euros for the Group commitment on the sale of the equity investment in Telekom Srbija to PTT Serbia;
- 55 million euros for the Seat Pagine Gialle commitment to purchase 9,122,733 Seat Pagine Gialle shares from shareholder-managers of TDL Infomedia Ltd. and the residual 0.27% of TDL Infomedia Ltd.;
- 34 million euros for leases of which 17 million towards Teleleasing;
- 20 million euros for the TIM commitment to purchase Blu core network assets from Wind;
- 10 million euros for the Telecom Italia S.p.A. commitment to purchase the residual 14% shareholding in Epiclink from Pirelli and the other shareholders;
- 10 million euros for the commitment to sell Tess to Accenture;
- 7 million euros for the commitment on the sale of Siteba to the other shareholders;
- 329 million euros for other commitments.

The commitments of the other Olivetti Group companies amounted to an aggregate 47 million euros (62 million euros at 31 December 2001), as follows:

- 35 million euros for leases;

JJ 00311

- 6 million euros for trade receivables guaranteed by Olivetti S.p.A. in respect of the sale of the O.i.S. group to GFI Informatique S.A.;
- 6 million euros for other commitments.

D. Other memorandum accounts

At 31 December 2002, other memorandum accounts totalled 93 million euros (295 million euros at 31 December 2001), of which 88 million euros for the Telecom Italia Group (287 million euros at 31 December 2001). They related to third-party assets deposited with consolidated companies, mainly in the IT sector.
The reduction of 199 million euros at the Telecom Italia Group arose as a result of the deconsolidation of Sogei and the Telespazio group.

E. Other information

At 31 December 2002 the aggregate value of Telecom Italia commitments for leases on buildings payable to IMSER 60, Tiglio I and Tiglio II under the terms of 21-year contracts was 3,818 million euros. The amount accruing to each year is 209 million euros.

TIM is drawing up a purchase and sale commitment with H3G, regarding the transfer of certain equipment and property lease contracts as a result of the new valuation of the Blu unit sold to H3G.

JJ 00312

Comments on the consolidated income statement

A) Value of production

1) Net revenues from sales and services

Net revenues from the sale of products and supply of services in 2002 amounted to 31.408 million euros compared with 32,016 million euros in 2001, a decrease of 608 million euros, or –1.9%.

The revenue breakdown by business sector is set out in the table below:

(in millions of euros)	Year 2002 (a)	%	Year 2001 (b)	%	Changes (a-b)	%
Telecom Italia Group Business Units						
Domestic Wireline	17,022	54.2	17,168	53.6	(146)	(0.9)
Mobile	10,867	34.6	10,250	32.0	617	6.0
South America	1,409	4.5	1,534	4.8	(125)	(8.1)
Internet and Media	1,991	6.3	1,957	6.1	34	1.7
IT Market	912	2.9	1,198	3.8	(286)	(23.9)
IT Group	1,215	3.9	1,198	3.7	17	1.4
Other operations and consolidation adjustments	(3,016)	(9.6)	(2,487)	(7.8)	(529)	21.3
Total Telecom Italia Group	**30,400**	**96.8**	**30,818**	**96.3**	**(418)**	**(1.4)**
Other Olivetti Group activities						
Information Technology	932	3.0	1,130	3.5	(198)	(17.5)
Real estate and services	76	0.2	68	0.2	8	11.8
Total Olivetti Group	**31,408**	**100.0**	**32,016**	**100.0**	**(608)**	**(1.9)**

4) Capitalised production

Capitalised production amounted to 675 million euros, and related entirely to the Telecom Italia Group.

5) Other revenues and income

Other revenues and income for 2002 amounted to 504 million euros (476 million euros in 2001) and included:

- 20 million euros in grants relating to costs for research, development and technological innovation;
- 65 million euros for the portion of capitalised grants credited to income as accrued, relating entirely to the Telecom Italia Group;
- 106 million euros for charges to customers for late bill payments;
- 313 million euros of other income from ordinary operations, arising mainly from indemnities and refunds, recovery of expenses and sundry income.

JJ 00313

B) Costs of production

6) Purchases of raw, ancillary and consumable materials and goods for resale

In 2002 this heading totalled 2,315 million euros (1,779 million euros for the Telecom Italia Group) compared with 2,640 million euros in 2001 (1,972 million euros for the Telecom Italia Group) and included costs for the supply of materials relating to the Group's core businesses.

7) Costs of services

These costs amounted to 9,407 million euros in 2002 compared to 9,782 million euros in 2001.
The decrease of 375 million euros related to the Telecom Italia Group for 323 million euros and to the other Group companies for 52 million euros.

8) Leases and rentals

This heading included rentals for buildings and other asset lease and hire charges. In 2002 it amounted to 1,166 million euros, compared to 1,096 million euros in 2001. The increase of 70 million euros reflected higher costs of 76 million euros at the Telecom Italia Group.

9) Personnel

Payroll costs in 2002 amounted to 4,737 million euros (4,919 million euros in 2001) and included 4,540 million euros for the Telecom Italia Group, of which 3,373 million euros relating to the companies that provide telecommunications services.

In 2002 the aggregate average number of staff employed by the Olivetti Group was 107,079 equivalent units, compared with 113,974 equivalent units in 2001.
In terms of geographical distribution, in 2002 the average number of employees was 87,737 heads in Italy (93,610 in 2001) and 19,342 heads abroad (20,364 in 2001).

The staff breakdown by category in Italy (different categories apply in other countries) was as follows:

(employees)	Year 2002	Year2001
ITALY		
Managers	2,058	2,214
Supervisors	5,271	5,031
White collars	71,608	76,092
Blue collars	8,800	10,273
Total average in Italy	**87,737**	**93,610**
Average abroad	**19,342**	**20,364**
Total average	**107,079**	**113,974**

JJ 00314

10) Amortisation, depreciation and writedowns

Depreciation and amortisation charges in 2002 totalled 7,269 million euros and included 3,462 million euros relating to intangible fixed assets and 3,807 million euros relating to tangible fixed assets. Charges in 2001 amounted to 7,645 million euros and included 3,565 million euros relating to intangible fixed assets and 4,080 million euros relating to tangible fixed assets.

Amortisation of intangible fixed assets (3,462 million euros) included 1,293 million euros in respect of consolidation goodwill on the acquisition of Telecom Italia (1,299 million euros in 2001) and 2,056 million euros for amortisation charges at the Telecom Italia Group.

Writedowns in 2002 amounted to 604 million euros and included 58 million euros relating to fixed assets and 546 million euros relating to receivables classified under current assets. Writedowns in 2001 totalled 465 million euros.

12-13) Provisions for risks and Other provisions

Provisions for risks and Other provisions amounted overall to 172 million euros in 2002 (486 million euros in 2001). They included 153 million euros of provisions for Telecom Italia Group contractual risks and risks relating to legal disputes and 19 million euros of provisions at other Olivetti Group companies, mainly in respect of risks on equity investments.

14) Other operational expenses

Other operational expenses amounted to 839 million euros (858 million euros in 2001) and included:

(in millions of euros)	Year2002 (a)	Year 2001 (b)	Changes (a-b)
Duties for communications activities	431	524	(93)
Losses on disposal of intangible and tangible assets	36	29	7
Taxes other than on income and duties accrued in the year, including ICI (local tax on real estate)	123	125	(2)
Other charges	249	180	69
Total	**839**	**858**	**(19)**

C) Financial income and charges

15) Income from equity investments

Income from equity investments amounted to 57 million euros (221 million euros in 2001) and included:

JJ 00315

(in millions of euros)	Year 2002 (a)	Year 2001 (b)	Changes (a-b)
Dividends and tax credits	51	30	21
Other income from equity investments	6	191	(185)
Total	**57**	**221**	**(164)**

16) Other financial income

Other financial income amounted to 1,512 million euros in 2002 (1,225 million euros in 2001) and included:

(in millions of euros)	Year 2002 (a)	Year 2001 (b)	Changes (a-b)
Interest income and gains on fixed income securities	125	295	(170)
Interest income and commissions from:			
- unconsolidated subsidiary companies	1	1	-
- associated companies	13	23	(10)
- banks	185	197	(12)
- customers	2	2	-
Exchange rate gains	508	257	251
Other	678	450	228
Total	**1,512**	**1,225**	**287**

17) Interest expense and other financial charges

Interest expense and other financial charges amounted to 3,819 million euros (4,330 million euros in 2001), of which 2,717 million euros for the Telecom Italia Group (3,075 million euros in 2001). The heading comprised:

(in millions of euros)	Year 2002 (a)	Year 2001 (b)	Changes (a-b)
Interest and other charges on bonds	1,751	1,501	250
Exchange rate losses	905	392	513
Banks and other	1,163	2,437	(1,274)
Total	**3,819**	**4,330**	**(511)**

D) Value adjustments to financial assets

18) Revaluations

Revaluations amounted to 121 million euros, reflecting upward adjustments on unconsolidated equity investments valued with the equity method.
The heading amounted to 198 million euros in 2001.

JJ 00316

19) Writedowns

This heading totalled 907 million euros (2,394 million euros in 2001), reflecting writedowns for other than temporary impairments of value on equity investments valued at cost, downward adjustments of equity investments valued with the equity method and writedowns of securities to reflect other than temporary impairments of value (on securities classified under fixed assets) and to reflect market value (on securities held as current assets). It also included amortisation of goodwill arising on the acquisition of equity investments valued with the equity method.
Writedowns arose as follows:

- amortisation of goodwill arising on the acquisition of equity investments valued with the equity method for 80 million euros (316 million euros in 2001), a reduction of 236 million euros compared with 2001, as a result of the goodwill writedowns applied in 2001;
- writedowns for 259 million euros on securities and equity investments held as current assets (509 million euros in 2001) and for 40 million euros on securities held as fixed assets (49 million euros in 2001), with an overall reduction of 123 million euros compared with 2001;
- the Group's share of losses at investee companies valued with the equity method, for 528 million euros (1,569 million euros in 2001); specifically, Stream for 246 million euros (241 million euros in 2001), Is Tim Turchia for 171 million euros (334 million euros in 2001).

The heading was not affected by the results of the equity investments in Astrolink, Nortel Inversora (Telecom Argentina) and the AUNA Group, which had a negative impact of 700 million euros in 2001. No change was made in the Nortel Inversora equity investment which, in accordance with prudent accounting policies, was written off in the consolidated balance sheet at 31 December 2001. The consolidated book values of the AUNA Group and the Astrolink company at 31 December 2001 were retained until the equity investments were sold, on 1 August 2002 and 30 November 2002 respectively, as a result of the sale of the Telespazio Group.

(in millions of euros)	Year 2002 (a)	Year 2001 (b)	Changes (a-b)
Equity investments	759	2,157	(1,398)
Financial fixed assets other than equity investments	40	49	(9)
Securities classified as current assets other than equity investments	108	188	(80)
Total	**907**	**2,394**	**(1,487)**

E) Extraordinary income and charges

20) Extraordinary income

Extraordinary income, at 2,990 million euros (996 million euros in 2001), included 2,553 million euros of capital gains from disposals during the year (465 million euros in 2001) and 437 million euros from sundry and other income (531 million euros in 2001).

Capital gains from disposals amounted to 2,553 million euros, of which 2,413 million euros at the Telecom Italia Group, including:

- 1,245 million euros from the sale of the full 26.89% shareholding in AUNA;
- 484 million euros from the sale of the 19.61% shareholding in Bouygues Décaux Télécom (BDT);

JJ 00317

- 34 million euros from the sale of the full 100% shareholding in EMSA, Telimm as well as of real estate and activities as part of Project Tiglio;;
- 133 million euros from the acceptance by the Finsiel Group of the public tender offer on Lottomatica;
- 115 million euros from the sale to Telekom Austria (in which Telecom Italia indirectly holds 14.78%) of the entire 25% shareholding in Mobilkom Austria;
- 110 million euros from the sale of the entire 40% shareholding in Telemaco Immobiliare;
- 70 million euros from the sale of 100% of Telespazio;
- 22 million euros from other minor sales.

The capital gains totalling 140 million euros posted by the other Group companies included:
- 107 million euros from the acceptance by Olivetti S.p.A. and Olivetti International S.A. of the public tender offer on Lottomatica;
- 26 million euros from the sale of the entire shareholding in OMS2, as part of Project Tiglio;
- 7 million euros from other disposals.

Other extraordinary income totalling 437 million euros included 401 million euros at the Telecom Italia Group, as follows:
- 131 million euros from recovery of pre-amortisation interest in respect of integration charges pursuant to Law no. 58/1992 paid on a conditional basis to the Italian National Insurance Board (INPS) until 1999, after the dispute was resolved in favour of Telecom Italia;
- 270 million euros of other income, including 77 million euros from use of reserves (essentially use of part of the reserve for risks and charges provided in 2001 by Telecom Italia S.p.A. to cover charges relating to the agreement for the sale of Stream to News Corp. and Vivendi Universal/Canal+, when the sale did not take place), 9 million euros of contributions and 184 million euros of sundry income.

The 36 million euros of other extraordinary income posted by the other Group companies included 21 million euros from use of surplus reserves provided in previous years.

21) Extraordinary charges

Extraordinary charges amounted overall to 8,486 million euros (4,105 million euros in 2001) and included 8,375 million euros for the Telecom Italia Group (3,947 million euros in 2001), as follows:
- 6,237 million euros of equity investment writedowns to reflect other than temporary impairments of value (2,984 million euros in 2001), as follows:
  - writedown of goodwill and the call option on Seat Pagine Gialle shares for a total of 3,486 million euros; goodwill was written down to market value (based on the average ordinary share price for the last six months of 2002), following the Telecom Italia Group's decision to view the Seat Pagine Gialle Directories operation as a non-core business. In 2001, with regard to the call option, a provision of 569 million euros was posted under financial charges;
  - writedown of goodwill relating to consolidated companies for a total of 225 million euros, Blu (103 million euros), Digitel Venezuela (75 million euros), other subsidiaries (47 million euros);
  - the equity investment in Aria – Is Tim (2,341 million euros): the investment was written off in full (1,491 million euros) and a provision was made to the reserve for risks and charges to cover Group exposure to this associated company (850 million euros). The provision was commensurate to the guarantees provided by the Group in favour of international financial institutes that had granted loans to Aria – Is Tim and to the loan granted directly by the Group;

JJ 00318

– writedown of goodwill on Netco Redes (96 million euros) and other companies (46 million euros) and a provision to align the purchase by Seat Pagine Gialle of an additional stake in Consodata with the value of the company as determined by an appraisal (43 million euros).

The 2,984 million euros equity investment writedown applied in 2001 referred to goodwill writedowns on consolidated companies (9Télécom Group, Entel Bolivia, Entel Chile Group, Maxitel, Tele Celular Sul Group, Tele Nordeste Celular Group, Tim Brasil, Med1 Group and other companies in the Seat Group) and on companies valued with the equity method (GLB Serviços Interativos, Solpart Participaçoes, Telekom Austria, Nortel Inversora Group) and to other provisions relating to equity investments.

- 316 million euros of provisions relating to the sale of the equity investment in the 9Télécom Group. Specifically, considering the loss recorded prior to the sale, the French 9Télécom Group generated an overall charge to Telecom Italia Group income for the first nine months of 2002 of 389 million euros (267 million euros after taxes);
- 135 million euros of capital losses on the sale of 75 million shares (representing 15% of capital) of Telekom Austria A.G. in November 2002. Following the sale, the Telecom Italia Group's stake in Telekom Austria A.G. decreased to 14.78%;
- 494 million euros of charges and provisions relating to personnel retirements and mobility schemes (including a 379 million euros charge at Telecom Italia);
- 235 million euros of charges relating to extraordinary operations on equity investments;
- 79 million euros of financial charges on the amount payable to the Italian National Insurance Board (INPS) for re-absorption of the ex Telephone Companies Employees Pension Fund (FPT) and 74 million euros for an extraordinary contribution to INPS to cover increased financial requirements following the integration of the FPT with the Employees Pension Fund;
- 190 million euros of writedowns on fixed assets relating in the main to mobile telephone companies in Brazil (142 million euros) and 38 million euros for capital losses on fixed-asset disposals;
- 194 million euros of provisions to reserves, including 135 million euros for guarantees provided on the sale of equity investments and company units and 59 million euros for other provisions;
- 383 million euros of other sundry charges.

Extraordinary charges for the other Group companies amounted to 111 million euros (158 million euros in 2001) and included 62 million euros of capital losses on the sale of the Seat Pagine Gialle equity investment, 32 million euros of provisions relating to risks on equity investments, 4 million euros of charges relating to the public tender offer on Lottomatica and 13 million euros for miscellaneous charges.

JJ 00319

22) Income taxes for the year

Income taxes for financial 2002 reflected a benefit of 2,210 million euros compared with a tax charge of 579 million euros in 2001.

(in millions of euros)	Year 2002	Year 2001
Current taxes	1,585	1,291
Deferred (prepaid) taxes, net	(3,795)	(712)
Total	**(2,210)**	**579**

Net prepaid taxes arose mainly from deferred tax assets and use of deferred tax reserves (provided in previous years) as a result of the writedown of Olivetti and Telecom Italia Group equity investments for 964 million euros and 2,167 million euros, respectively, as well as from the Olivetti tax credit on dividends collected from Telecom Italia for 700 million euros.

Loss per share

The primary loss per share for fiscal 2002 determined in compliance with International Financial Reporting Standard (IFRS) no. 33, is set below:

Year 2002	Net loss (in millions of euros)	Number of shares	Loss per share (in euros)
Loss for the year, wholly attributable to outstanding shares	(773)		
Average number of outstanding ordinary shares		8,600,047,643	
Primary loss per share			(0.090)

JJ 00320

Other information

1) Transactions with related parties

The operations transacted by consolidated companies of the Olivetti Group with related companies and entities are all normal operations and are conducted according to market conditions or in compliance with specific laws; no non-typical or unusual operation has been effected.

The main operations with unconsolidated subsidiaries and with associated companies are detailed below:

(in millions of euros)	Telecom Italia Group			
Main income and financial items for the year 2002	Unconsolidated subsidiary and associated companies	Subsidiary and associated companies of the controlling company	Other Olivetti Group companies	Description
Revenues from sales	299	3	4	They include revenues from Teleleasing (euro 105 million), Brasil Telecom (euro 48 million), Stream (euro 42 million), AUNA Group (euro 18 million), Telecom Argentina (euro 18 million), Telecom Srbija (euro 17 million)
Consumption of materials and services	445	24	6	They include principally costs for rentals paid to IM.SER (euro 153 million), Telemaco Immobiliare (euro 37 million) and costs for Tlc services to Etecsa Cuba (euro 77 million) and for maintenance and technical asistance to Italtel (euro 40 million) and Siemens Informatica (euro 24 million)
Other income, net	9	-	-	They refer principally to recoveries of payroll costs for personnel moved temporarily to some foreign subsidiaries
Financial charges, net	9	-	-	They include interest income accrued on loans granted to some overseas group companies (euro 14 million) and interest payable to Teleleasing accrued on financial lease contracts (euro 23 million)
Credits of financial fixed assets	440	-	16	They include medium/long-term loans to Is Tim (euro 313 million), Tiglio I (euro 70 million) , Telegono (euro 34 millioni) and Tiglio II (euro 30 million)
Financial receivables	35	-	-	They include short-term loans to TMI Group companies (euro 14 million) and to Golden Lines (euro 10 million net of allowances)
Financial payables	406	-		They refer principally to amounts due to Teleleasing for financial lease contracts (euro 393 million)

Notes: - This statement does not include companies in winding-up, dormant companies and those companies intended to be disposed of to third parties.
- Percentages of ownership do not consider securities classified as current assets (in particular the share of 0.57% of Telecom Italia S.p.A. owned by Olivetti S.p.A.).

(*) Equity investments held by Telecom Italia S.p.A. are listed in the following pages, as shown in the Exibits of Telecom Italia itself's Annual Report.

(*) Equity investments held also by Telecom Italia Group companies.

(°) Companies whose share percentage computed on voting rights is different from that computed on ownership.

In the following pages subsidiary and associated companies of the Telecom Italia Group are listed with format of the Exhibit to the "2002 Annual Report" of the Telecom Italia Group itself.

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Olivetti S.p.A.

1. We have audited the financial statements of Olivetti S.p.A. as of and for the year ended December 31, 2002. These financial statements are the responsibility of the Olivetti S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to our report dated April 16, 2002.

3. In our opinion, the financial statements of Olivetti S.p.A. comply with the Italian regulations governing financial statements; accordingly, they clearly present and give a true and fair view of the financial position of Olivetti S.p.A. as of December 31, 2002, and the results of its operations for the year then ended.

4. We draw your attention to the following:

   a) The company holds investments in subsidiary companies and has therefore prepared (as required by law) consolidated financial statements. These consolidated financial statements form an integral part of the annual financial statements for the purpose of providing adequate information on the financial position and the results of operation of the company and the Group. We have audited the consolidated financial statements which, together with our audit report thereon, are presented together with these financial statements.

P.I. 00891231003
(vecchio numero R.I. 6697/89 - numero R.E.A. 250904)

b) In 2002, the company wrote-down its investment in Telecom Italia S.p.A., in order to obtain tax benefits provided by the tax legislation. The purpose and the effects of such accounting treatment, allowed by the Italian regulations governing financial statements, are illustrated in the explanatory notes.

c) On April 15, 2003 the board of directors of the company adopted the plan for the merger of the subsidiary Telecom Italia S.p.A. into Olivetti S.p.A., which will be submitted for approval to the extraordinary shareholders' meetings of the respective companies called for this purpose.

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Olivetti S.p.A.

1. We have audited the consolidated financial statements of Olivetti S.p.A. as of and for the year ended December 31, 2002. These financial statements are the responsibility of the Olivetti S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the consolidated financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries and associated companies, which represent respectively 4% and 7% of consolidated total assets and consolidated total revenues, have been examined by other auditors, whose reports have been furnished to us. Our opinion, expressed herein, insofar as it relates to the data relating to these subsidiaries and associated companies included in the consolidated financial statements, is based also on the reports of the other auditors.

   For the opinion on the consolidated financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to our report dated April 16, 2002.

3. In our opinion, the consolidated financial statements of Olivetti S.p.A. comply with the Italian regulations governing consolidated financial statements; accordingly, they clearly present and give a true and fair view of the consolidated financial position of Olivetti S.p.A. as of December 31, 2002, and the consolidated results of its operations for the year then ended.

■ KEY DATA - TELECOM ITALIA BUSINESS UNITS /OPERATING ACTIVITIES

In May 2002, the International Operations (IOP) "Operating Activity" was disbanded. Although maintaining the same corporate control structure, the relative companies and business segments of Telecom Italia organizationally became part of the following: the Domestic Wireline BU (Intelcom San Marino and Golden Lines), the Foreign Holdings Central Function (9 Telecom group, BB Ned group, Auna group, Telekom Austria group, Telekom Srbija, Etec S.A. and what remains of the ex IOP) and the companies in the South American area report to Latin America Operations (LAO).

Telecom Italia Group thus operated with the following Business Unit/Operating Activities structure:

(in millions of euro)		Domestic Wireline (1)	Mobile	South America (1) (2)	Internet and Media	IT Market (3)	IT Group (3)	**Sub-total**	Other activities and eliminations (4)	**Consolidated total**
Sales and services revenues	2002	17,022	10,867	1,409	1,991	912	1,215	**33,416**	(3,016)	**30,400**
	2001	17,168	10,250	1,534	1,957	1,198	1,198	**33,305**	(2,487)	**30,818**
Gross operating profit	2002	7,965	5,039	450	593	104	140	**14,291**	(327)	**13,964**
	2001	7,750	4,760	527	444	166	188	**13,835**	(216)	**13,619**

(1) For purposes of a more meaningful comparison, the data relating to 2001 has been restated.

(2) The data relates to the Entel Chile group, the Entel Bolivia group, the companies Telecom Italia America Latina and the South American business segment of Telecom Italia.

(3) In the early months of 2002, the IT Services Business Unit was split into two distinct units: Information Technology Market and Information Technology Group; beginning January 1, 2002, Saritel S.p.A. has been consolidated in the Information Technology Group BU instead of the Domestic Wireline BU.

(4) The data presented above includes the Foreign Holdings Central Function and the Telespazio business unit, sold in the last quarter of 2002 and consolidated only with respect to the statement of income for the first nine months of 2002.

[1] The Index is calculated on a geographical basis that includes all European countries.

■ DISTRIBUTION OF INCOME RESERVES

Mention should made of the fact that:

- ✓ the TIM Shareholders' Meeting on December 11, 2002 voted to distribute reserves to the shareholders up to a maximum of euro 1,600 million, equal to euro 0.1865 per each ordinary and savings share. Payment was made from these reserves starting from December 19, 2002; the amount paid out amounted to euro 1,597 million, of which euro 711 million was to minority shareholders.
- ✓ the Telecom Italia Shareholders' Meeting on December 12, 2002 voted to reclassify reserves by the transfer of euro 2,160 million from "miscellaneous reserves" to "additional paid-in-capital ", the transfer of euro 820 million from "additional paid-in-capital" to the "legal reserve", the transfer of euro 660 million from the "legal reserve" to "miscellaneous reserves" with the contextual change in the name to "miscellaneous income reserves".
  This reclassification immediately identifies the nature of the reserves in the financial statements, namely whether they are profit or capital reserves.
  The same Shareholders' Meeting resolved to distribute reserves for a maximum amount of euro 1,000 million, paying euro 0.1357 to the shareholders per each ordinary and savings share. On December 19, 2002, a payment of euro 987 million was made.

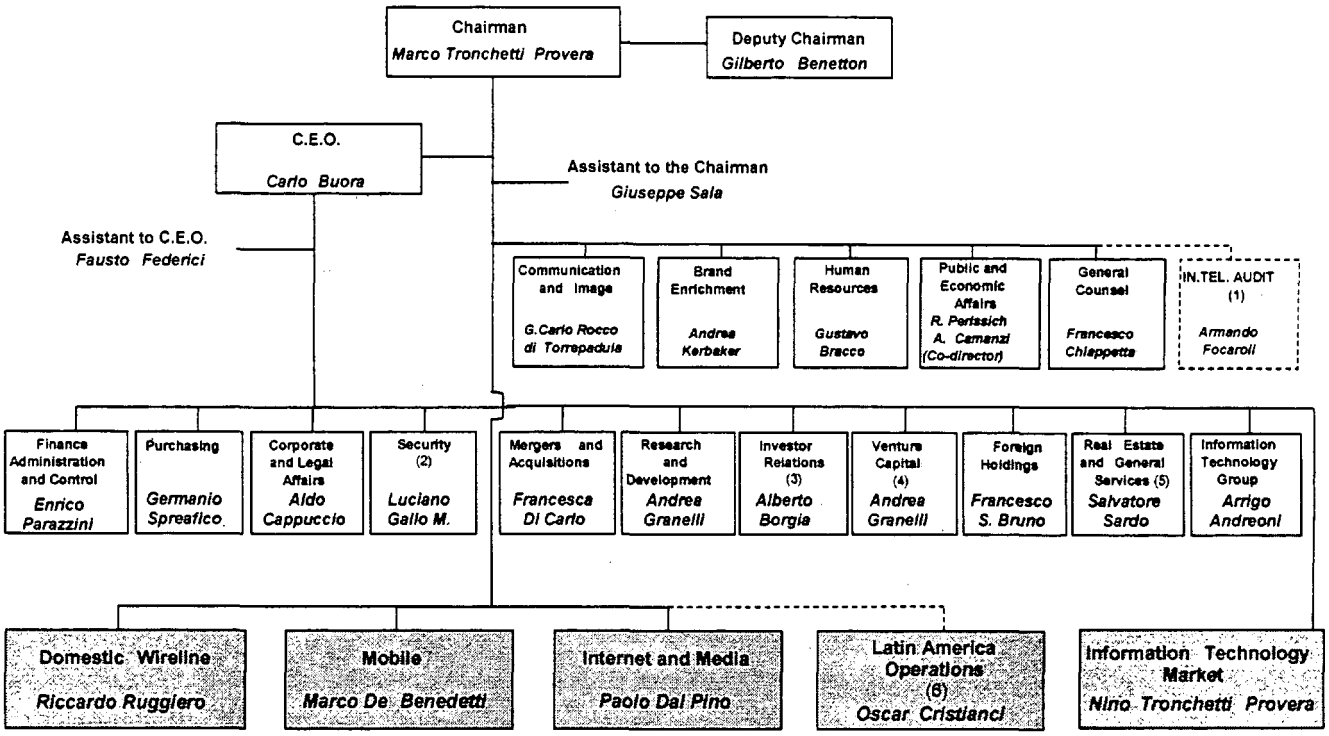
Ratings at 12/31/2002		**Outlook**
STANDARD&POOR'S	BBB+	Positive
MOODY'S	Baa1	Positive
FITCH IBCA	A-	Stable

The positive outlook expressed by both Moody's and Standard & Poor's is confirmation of the Company's credibility to reduce its debt and sell its non-core businesses, as established by the Industrial Plan. The opinion expressed by the rating agencies also reflects expectations that the Company will remain the leading operator in Italy in both wireline and mobile telephone services with the ability to continue to generate cash flows.

(°) In line with the objective of ensuring shareholders dividends commensurate with those paid out for 2001, in December 2002, reserves were distributed corresponding to a per share dividend of euro 0.1357. A motion will be put before the Shareholders' Meeting for the approval of the financial statements for the year ended December 2002 to pay out the residual dividends of euro 0.1768 euro per ordinary share and euro 0.1878 per savings share, by drawing from the income and capital reserves.

JJ 00361

■ MACRO-ORGANIZATION CHART OF TELECOM ITALIA GROUP AT DECEMBER 31, 2002



(1) Consortium company which carries out Internal Auditing activities in the Telecom Italia Group and Olivetti.

(2) Starting March 1, 2003, Giuliano Tavaroli took over responsibility for the Security function.

(3) Starting February 1, 2003, Olimpia Cuomo took over responsibility for the Investor Relations function.

(4) In January 2003, the Venture Capital function was disbanded.

(5) In February 2003 the Real Estate and General Services Operating Activity was disbanded; its activities and resources were reassigned to other corporate functions of the Group.

(6) The function coordinates the activities of the Telecom Italia Group in Latin America, to be developed in accordance with the strategic plan. It reports to the International Steering Committee, composed of the Chairman and CEO. Permanent invitations to the Steering Committee meetings are extended to those in charge of the Domestic Wireline and Mobile Business Units; the assistant to the Chairman is the Secretary. Beginning February 2003, Latin America Operations reports directly to the CEO Carlo Buora for wireline TLC and to the manager of the Mobile Business Unit Mobile for Mobile TLC.

(1) In May 2002, the International Operations (IOP) "Operating Activity" was disbanded. Although maintaining the same corporate control structure, the relative companies became part of the following: the Domestic Wireline BU (Intelcom San Marino and Golden Lines), the Foreign Holdings Central Function (9Telecom Reseau group, BB Ned group, Auna group, Telekom Austria group, Telekom Srbija, Etec S.A. and what remains of the ex IOP) and the companies in the South American area report to Latin America Operation (LAO).

* Comments on the main economic and financial performance of these companies are provided in the report.

■ ECONOMIC AND FINANCIAL PERFORMANCE - TELECOM ITALIA GROUP

RESULTS OF OPERATIONS

The **consolidated net result of the Group** for 2002 is a loss of euro 322 million (net income of euro 297 million *before minority interest).* In 2001, the consolidated net result of the Group was a loss of euro 2,068 million (loss of euro 1,658 million *before minority interest*).
The *pretax result* was a loss of euro 419 million. The improvement of euro 314 million compared to the prior year was due to:

- a notable increase in the *operating income* (+euro 707 million);
- an improvement in *net investment and financial income (expense)* (+euro 1,792 million)
- a deterioration in *net extraordinary income (expense)* (-euro 2,185 million).
  The latter, as detailed later in the report, includes:
  - gains from the disposal of investments for euro 2,413 million (euro 264 million in 2001) following the sales of Auna, Bouygues Decaux Telecom (BDT), Mobilkom Austria, Lottomatica, Telemaco Immobiliare, Telespazio and the Tiglio transaction;
  - writedown of Seat Pagine Gialle goodwill and provision to the reserve for charges in respect of the forward commitment to purchase Seat Pagine Gialle shares for a total of euro 3,486 million, following the decision - taken within the framework of the redefinition of Telecom Italia Group's strategies - of no longer considering the "Directories" business of Seat Pagine Gialle to be of strategic interest. In 2001, with regard to the purchase commitment, a provision of euro 569 million had been aside and was included in net investment and financial income and expense;
  - writedowns of investments and goodwill on investments for euro 2,751 million (euro 2,984 million in 2001) mainly with regard to Aria - Is Tim Turchia, Netco Redes, Corporacion Digitel and Blu;
  - other extraordinary expense for euro 1,813 million (euro 732 million in 2001) relating in 2002, among other things, to the expenses incurred on the sale of the investment in the 9Telecom group, the loss on the sale of Telekom Austria AG shares, the expenses connected with extraordinary investment transactions, the expenses and provisions for employee cutbacks and layoffs and provisions to reserves.

Sales and service revenues in 2002 amounted to euro 30,400 million, with a reduction of 1.4% compared to 2001. Excluding the effect of the changes in the exchange rates (euro 763 million), the increase was 1.1%, while the effect of the change in the scope of consolidation was euro 755 million. Excluding such effects, the organic growth was +3.8%. Particularly affecting the change in the scope of consolidation are the exclusion of the 9Telecom group and Sogei (both consolidated for the first six months of 2002) and the exit of the Telespazio group from October 1, 2002.
The increase in revenues reflected the positive contribution made by the Mobile BU and higher revenues from the Internet and Media BU, contrasting a reduction in the revenues contributed by the Domestic Wireline BU where traffic revenues, despite a 2.4% increase in terms of minutes, fell by euro 533 million (-6.0%). In spite of an increase in minutes, the average return of retail and wholesale traffic fell by 8.3%. Such phenomena were partly compensated by higher basic charges and activation fees.

The breakdown of sales and service revenues is as follows:

Geographical area (millions of euro)	**2002**		**2001**	
Italy	24,652	81.1%	24,456	79.4%
Rest of Europe	2,182	7.2%	2,169	7.0%
North America	354	1.2%	968	3.1%
Central and South America	2,638	8.7%	2,592	8.4%
Australia, Africa and Asia	574	1.9%	633	2.1%

Gross operating profit, equal to euro 13,964 million, rose in comparison to 2001 by euro 345 million (+2.5%). As a percentage of revenues, the gross operating profit was 45.9% (44.2% in 2001). Excluding the effect of exchange rates (euro 186 million) and the effect caused by the change in the scope of consolidation (euro 120 million), the increase was 4.9% (euro 651 million).

JJ 00364

In particular, the percentage of the Domestic Wireline BU's gross operating profit to revenues rose from 45.1% in 2001 to 46.8% in 2002, while the Mobile BU confirms its position at over 46%.

In greater detail, gross operating profit was impacted in 2002 by the following:

- **raw materials and outside services,** equal to euro 12,558 million, were down by 3.7% compared to 2001. The reduction was principally due to action taken to improve the level of efficiency. The percentage of raw materials and outside services to revenues was 41.3%, a decrease from 2001 (42.3%).

- **Labor costs**, equal to euro 4,532 million, were lower by euro 115 million compared to 2001 (2.5%). The decrease was connected to the change in the scope of consolidation as well as the headcount reduction in Telecom Italia. As a percentage of revenues, labor costs were 14.9%, in line with 2001. Employees at December 31, 2002 numbered 101,713 (109,956 at December 31, 2001). A breakdown is presented below:

	12/31/2002 (a)	12/31/2001 (b)	Change (a – b)
Italy	83,541	90,628	(7,087)
Outside Italy	18,172	19,328	(1,156)
Total employees	**101,713**	**109,956**	**(8,243)**

Contributing to this decrease were the changes in the scope of consolidation, with a net headcount reduction of -2,883, and the drop in the number of employees due to turnover (-5,360). The headcount variation caused by changes in the scope of consolidation specifically refer to the exclusion of the 9Telecom group (-1,003), the sale of the Telespazio group (-1,168), the exit of Sogei and Consiel (a total of -1,538) and other minor companies (-711), as well as the inclusion of Blu (+618), the Webegg group (+719), Netesi and Epiclink (a total of +168) and other minor companies (+32).
As regards turnover, during the year 12,567 employees left and 7,207 were hired.

Operating income, equal to euro 7,381 million, increased by euro 707 million (+10.6%) compared to 2001, and as a percentage of revenues rose from 21.7% in 2001 to 24.3% in 2002. Excluding the effect of exchange rates and the consequence of the change in the scope of consolidation, the gain was 9.9%.
The increase in the absolute amount reflects higher gross operating profit, in addition to the decrease in amortization and depreciation charges.

In particular:

- **Depreciation and amortization**, equal to euro 5,877 million (euro 6,275 million in 2001), recorded a reduction of euro 398 million. Details are as follows:

(millions of euro)	2002 (a)	2001 (b)	Change (a – b)
Fixed assets	3,783	4,034	(251)
Intangibles	2,094	2,241	(147)
of which goodwill	*844*	*1,022*	*(178)*
Total depreciation and amortization	**5,877**	**6,275**	**(398)**

The reduction in the *amortization of goodwill* (-euro 178 million) was primarily due to the goodwill writeoffs taken in 2001.
As a percentage of revenues, depreciation and amortization charges were 19.3%, down from 20.4% in 2001.

- **Other valuation adjustments,** equal to euro 599 million (euro 455 million in 2001), increased by euro 144 million compared to 2001. Such adjustments were principally for writedowns to reduce receivables from customers to their estimated realizable value. They referred, in particular, to:
  - Telecom Italia: euro 356 million
  - Seat Pagine Gialle group: euro 57 million
  - Tim: euro 51 million
  - Entel Chile group: euro 40 million

JJ 00365

Provisions to reserves for risks and charges, amounting to euro 153 million (euro 278 million in 2001), presented a reduction of euro 125 million, which was partly due to the amount provided in 2001 for the closing of the Astrolink contract (euro 54 million).

Net other income (expense) showed an income balance of euro 46 million (an income balance of euro 63 million in 2001). Details are as follows:

(millions of euro)	2002 (a)	2001 (b)	Change (a – b)
Indirect duties and taxes	(115)	(120)	5
Net loss on sale of fixed assets and intangibles	(30)	(17)	(13)
Expenses connected with credit management	(60)	(37)	(23)
Late payment fees charged by TLC companies to customers	106	112	(6)
Portion of capital grants credited to income during the year	65	73	(8)
Sundry other income and expense	80	52	28
Total	**46**	**63**	**(17)**

Net investment and financial income (expense) is composed of the following:

(millions of euro)	2002 (a)	2001 (b)	Change (a – b)
Net investment income	18	154	(136)
Net financial expense	(1,499)	(2,153)	654
Value adjustments to financial assets	(682)	(1,956)	1,274
Total	**(2,163)**	**(3,955)**	**1,792**

Details are as follows:

- The reduction in net investment income was due to lower net gains realized on the listed stocks classified in current assets.
- The reduction in net financial expenses, for euro 569 million, can be ascribed to the provision that was set aside in 2001 for the forward commitment to purchase Seat Pagine Gialle shares that, in 2002, instead, was recorded in extraordinary expense. Excluding such effect, the improvement in net financial expenses (+euro 85 million) came from a lower average debt exposure of the Group during the period and lower interest rates and fees that was mainly countered by a worsening of the exchange rates which negatively affected certain South American economies, particularly Venezuela and Brazil.
- Value adjustments to financial assets, equal to euro 682 million, refer to:
  - amortization of goodwill arising at the time of the purchase of the investments in companies accounted for using the equity method, equal to euro 80 million (euro 316 million in 2001). The reduction is due to the writeoffs of goodwill taken in the 2001 financial statements;
  - writedowns of securities and investments included in current assets of euro 176 million (euro 291 million in 2001) and long-term securities of euro 40 million (euro 49 million in 2001), with a total reduction of euro 124 million compared to 2001;
  - the Group's share of the equity in the earnings and losses of the unconsolidated companies accounted for using the equity method which produced a loss of euro 386 million (-euro 1,300 million in 2001). This refers to the losses of Stream of euro 246 million (euro 241 million in 2001), Aria -Is Tim Turchia of euro 171 million (euro 334 million in 2001) and the earnings balance relating to the earnings and losses of the other unconsolidated companies of euro 31 million.

Moreover, in 2001, this caption had included the results of the investments in the Nortel Inversora group (euro 238 million) and the Auna group (euro 203 million) and the writedown of Astrolink (euro 259 million) effected by Telespazio as a consequence of the interruption of the relative contract. The investment in Nortel Inversora, the carrying value of which had been prudently written off in the consolidated financial statements at December 31, 2001, has remained unchanged.

Net extraordinary income (expense) showed an expense balance of euro 5,637 million (-euro 3,452 million in 2001), with a deterioration of euro 2,185 million compared to 2001. In particular:

Extraordinary income of euro 2,814 million comprised:

- euro 2,413 million of gains from disposals relating to:

JJ 00366

- the sale of the entire 26.89% interest held by the Telecom Italia Group in Auna, realizing a gross gain of euro 1,245 million, which contributed – net of selling expenses – euro 1,033 million to the consolidated net result of the Telecom Italia Group;
- sale of the entire 19.61% interest held by the Mobile BU in Bouygues Decaux Telecom (BDT), realizing a gross gain of euro 484 million, which contributed euro 266 million to the consolidated net result of the Telecom Italia Group;
- the acceptance of the tender offer for Lottomatica shares by the Information Technology Market BU (Finsiel group), realizing a gross gain of euro 133 million (euro 93 million net of income taxes), which contributed euro 73 million to the consolidated net result of the Telecom Italia Group;
- the sale to Telekom Austria (a company in which Telecom Italia International has a 14.78% interest at December 31, 2002) of the entire 25% interest held by the Mobile BU in the Mobilkom Austria group, realizing a gross gain of euro 115 million, which contributed 64 million to the consolidated net result of the Telecom Italia Group;
- the sale of the entire 40% interest held in Telemaco Immobiliare, realizing a gross gain of euro 110 million, which contributed euro 64 million to the consolidated net result of the Telecom Italia Group;
- the sale of the entire 100% interest held in Telespazio, realizing a gross gain of euro 70 million, which contributed euro 36 million to the consolidated net result of the Telecom Italia Group;
- the sale of the entire 100% interest held in Emsa and Telimm, in addition to the properties and business segment in the Tiglio transaction, realizing a total gross gain of euro 234 million, which contributed euro 150 million to the consolidated net result of the Telecom Italia Group;
- the disposal of other investments, fixed assets, intangibles and business segments for a total of euro 22 million.

- prior period income of euro 131 million arising from the recovery of accrued pre-amortization interest - on the expenses for employee benefit obligations under Law 58/1992 that were paid, with reserve, to INPS up to 1999 - following the termination of litigation after the courts ruled in Telecom Italia's favor;
- the release of euro 77 million, primarily to absorb a portion of the reserve for risks and charges set up in 2001 by Telecom Italia to cover the expenses connected with the agreement to sell Stream to News Corporation and Vivendi Universal/Canal+ after the parties did not go through with the agreement
- grants of euro 9 million and other income of euro 184 million.

Extraordinary expenses of euro 8,451 million comprised:

- writedowns, for permanent impairments in value, and other provisions relating to investments for a total of euro 6,237 million (euro 2,984 million in 2001), referring to:
  - the writedown of goodwill and the provision to the reserve for charges in respect of the forward commitment to purchase Seat Pagine Gialle shares for a total of euro 3,486 million. The writedown and the provision were effected on the basis of market value (average market price of ordinary shares for the last six months of 2002) within the framework of Telecom Italia Group's decision of no longer considering the "Directories" business of Seat Pagine Gialle to be of strategic interest. In 2001, with regard to the purchase commitment only, a provision of euro 569 million had been set aside and was included in net investment and financial income (expense);
  - the writedown of goodwill on the subsidiaries and affiliated companies for a total of euro 225 million in respect of Blu (euro 103 million), Digitel Venezuela (euro 75 million) and other subsidiaries (euro 47 million);
  - the writeoff of the investment in Aria - Is Tim Turchia (euro 2,341 million), arising from the writeoff of the carrying value (euro 1,491 million) and the provision to the reserves for risks and charges to cover the Group's exposure with the same affiliated company (euro 850 million). The provision is commensurate with the guarantees provided by the Group to the international financial institutions that are creditors of Aria - Is Tim and the loan in financial receivable granted directly by the Group.
  - the writedown of goodwill on Netco Redes (euro 96 million), writedowns of other companies (euro 46 million) and the provision relating to the purchase of an additional stake in Consodata by Seat Pagine Gialle in order to adjust the value of the company to that determined on the basis of an appraisal (euro 43 million).

  The writedowns in 2001 had referred to the goodwill relating to both the consolidated companies (9 Telecom group, Entel Bolivia, Entel Chile group, Maxitel group, Tele Celular Sul group, Tele Nordeste Celular group, Tim Brasil, Med-1 group and certain companies in the Seat Pagine Gialle group) and companies valued using the equity method (Globo.com, Solpart Participaçoes, Telekom Austria and Nortel Inversora group), as well as other provisions related to investments.

JJ 00367

- the expenses of euro 316 million incurred in conjunction with the disposal of the investment in the 9Telecom group. In particular, in view of the loss reported prior to the sale, the French group 9Telecom produced a negative effect on the nine-months 2002 statement of income of the Telecom Italia Group for a total of euro 389 million (euro 267 million net of income taxes);
- the loss of euro 135 million on the sale of 75 million (equal to 15% of share capital) Telekom Austria AG shares during the month of November 2002. As a result of this sale, Telecom Italia Group's holding in Telekom Austria AG has been reduced to 14.78% and the investment value is aligned with the market value;
- the expenses of euro 235 million connected with extraordinary investment transactions;
- the provisions to reserves for euro 194 million, of which euro 135 million refer to guarantees provided for the disposal of investments and business segments and euro 59 million for other provisions to reserves;
- the expenses and provisions of euro 494 million for employee cutbacks and layoffs (of which euro 379 million is borne by Telecom Italia S.p.A.);
- the expenses of euro 155 million under Law 58/1992 to cover employees under the former fund "Telephone Employees Pension Fund" (FPT) and euro 74 million for the extraordinary contribution to INPS to meet the higher financial requirements covered by the rules of the former fund "Telephone Employees Pension Fund" (FPT) which became part of the general "Employees Pension Fund";
- the writedowns of euro 190 million to fixed assets, intangibles and long-term investments, mainly in reference to the mobile telephone companies in Brazil, and euro 38 million for losses on the sale of fixed assets, intangibles and long-term investments;
- other prior period expenses of euro 383 million.

Income taxes had a positive effect on the result of euro 716 million and decreased by euro 1,641 million compared to 2001. This was due to the loss for the year that was principally caused by the aforementioned investment writedowns, which contributed to the increase in deferred tax assets, as well as the utilization of tax loss carryforwards deriving from the merger of TIM and Blu.

FINANCIAL CONDITION

Intangibles, fixed assets and long-term investments, amounting to euro 35,586 million, decreased by euro 9,432 million from the end of 2001.
Details are as follows:

- **fixed assets** decreased from euro 21,757 million at the end of 2001 to euro 19,291 million at the end of 2002 and **intangibles** fell from euro 16,197 million at the end of 2001 to euro 13,052 million at December 31, 2002. The reduction is due overall to the depreciation and amortization charge for the year that was only partly compensated by the investments made during the same period, the fall in exchange rates compared to the end of 2001, as well as the contributions of business segments under the "Tiglio" transaction and the writedowns of the goodwill on consolidated companies effected in 2002 and recorded in extraordinary expense.
- **long-term investments** decreased from euro 7,064 million at the end of 2001 to euro 3,243 million al December 31, 2002. The reduction is principally due to the disposal of investments and writedowns for permanent impairments in value carried out during the year.

Investments made during the year amounted to euro 6,919 million (compared to euro 11,257 million in 2001). The breakdown is as follows:

(millions of euro)	2002 (a)	2001 (b)	*Change* (a-b)
Industrial investments	4,842	6,990	(2,148)
Goodwill	369	1,174	(805)
Financial investments	1,708	3,093	(1,385)
Total investments	**6,919**	**11,257**	**(4,338)**

The reduction of investments by euro 4,338 million was mainly due to:

- industrial investments:
  - to lower investment made by the Mobile BU for euro 1,436 million, chiefly relating to mobile phone licenses acquired in 2001 in Brazil and Greece (about euro 1,080 million);

JJ 00368

- to lower investments made by the Domestic Wireline BU (-euro 339 million), by other companies in South America (-euro 190 million) and by the Seat group (-euro 94 million) partly as a result of the implementation of the selective investment program;

- for goodwill: to the acquisitions which occurred in 2001 in respect of Entel Chile (euro 731 million), Holding Media e Comunicazione (euro 66 million), NetCreations (euro 93 million) and the increase in the investment in Stet Hellas (euro 31 million), compared to those in 2002 which referred mainly to the increase in the investment in Stet Hellas (euro 66 million) and in Digitel Venezuela (euro 27 million), to the acquisition of Epiclink (euro 49 million) and Netesi (euro 14 million), the acquisition of Blu (euro 103 million) and the increase in the investment holding in the Webegg group (euro 24 million);
- for financial investments: to capital injections made in 2001 in the company Aria - Is Tim Turchia (euro 1,906 million) and in Auna (euro 276 million).

Financial investments made in 2002 mainly regarded transactions involving the share capital of Stream (euro 234 million) and Auna (euro 193 million, repaid on August 1, 2002), the investment in the share capital of Tiglio I (euro 197 million), the purchase of LDCom within the framework of the 9Telecom deal (euro 172 million), the disbursement of loans to subsidiaries and affiliated companies (euro 351 million), as well as the buy-back of treasury stock (euro 287 million), acquisitions of other investments and share capital increases for a total of euro 274 million.

Working capital showed a negative balance of euro 3,340 million (a negative balance of euro 2,418 million at December 31, 2001), with a change of euro 922 million.

Shareholders' equity amounted to euro 12,823 million (euro 19,308 million at the end of 2001), of which euro 9,049 million was Telecom Italia, the Parent Company's interest (euro 13,522 million al December 31, 2001), and euro 3,774 million was the minority interest (euro 5,786 million at December 31, 2001).

The reduction of euro 6,485 million can be analyzed as follows:

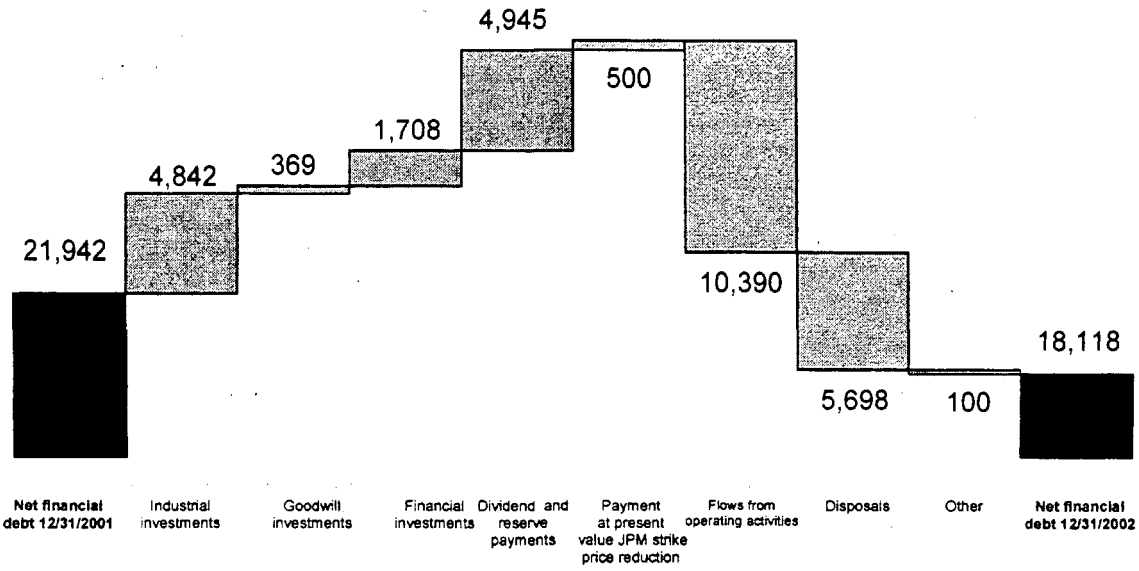
(millions of euro)	2002	2001
At beginning of year	**19,308**	**24,690**
Net income (loss) of the Parent Company and minority interest	297	(1,658)
Dividends to third parties paid by:	(3,247)	(3,097)
- *Telecom Italia S.p.A.*	*(2,306)*	*(2,309)*
- *TIM S.p.A.*	*(895)*	*(743)*
- *Other Group companies*	*(46)*	*(45)*
Extraordinary distribution of reserves to third parties:	(1,698)	-
- *Telecom Italia S.p.A.*	*(987)*	
- *TIM S.p.A.*	*(711)*	
Cancellation of Telecom Italia S.p.A. treasury stock	-	(711)
Change in scope of consolidation	(95)	358
Translation adjustments and other changes	(1,742)	(274)
At end of year	**12,823**	**19,308**

Translation adjustments and other changes, in particular, are primarily the result of the deterioration in exchange rates of certain South American countries such as Brazil, Chile and Bolivia.

Net debt of euro 18,118 million decreased from euro 21,942 million at the end of 2001 by euro 3,824 million subsequent to the payment of dividends and the distribution of reserves for a total of euro 4,945 million.
Indebtedness at December 31, 2002 particularly benefited from the investment disposals made in 2002, net of the related expenses, for a total of euro 4,771 million mainly in connection with the sale of Auna (euro 1,998 million), Bouygues Decaux Telecom (euro 750 million), Mobilkom Austria (euro 756 million), Lottomatica (euro 212 million), Sogei (euro 176 million), Telemaco Immobiliare (euro 192 million), Immsi (euro 69 million) Tiglio (euro 328 million), Telekom Austria (euro 559 million), Telespazio (euro 239 million), 9Telecom (-euro 529 million) and other minor companies (euro 21 million).
Transactions for the securitization and factoring of trade accounts receivable were also carried out which led to an improvement in net debt at December 31, 2002 of euro 1,038 million (euro 848 million at the end of 2001).

JJ 00369

The following chart summarizes the major items which had an impact on the change in net debt during the course of 2002.



The portion of debt due beyond one year rose from 64% at December 31, 2001 to 75% at December 31, 2002. When also considering the current portion due next year (euro 2,677 million) as medium/long-term, the percentage rises to 88% (70% in 2001). The increase is the result of the issue of fixed-rate notes for euro 2,500 million by Telecom Italia S.p.A. on February 1, 2002, divided into two tranches of euro 1,250 million each, expiring, respectively on February 1, 2007 and February 1, 2012. This issue falls under the "Global Note Program".

Gross debt is detailed in the following table:

	At 12/31/2002						At 12/31/2001	
(millions of euro)	*euro*	%	*Foreign currency*	%	Total	%	Total	%
Medium/long-term debt	13,684	76	1,334	63	15,018	75	16,083	64
Short-term borrowings	4,320	24	769	37	5,089	25	9,114	36
Total	**18,004**	**100**	**2,103**	**100**	**20,107**	**100**	**25,197**	**100**

JJ 00370

■ ACQUISITIONS AND SALES OF EQUITY INVESTMENTS

Sale of Lottomatica
In February 2002, the Information Technology Market BU (Finsiel group) tendered its Lottomatica shares to the tender offer for Lottomatica for proceeds of euro 212 million, realizing a gain that contributed euro 73 million to the consolidated net result of the Telecom Italia Group.

Sale of BDT - Bouygues Decaux Telecom
In March 2002, the Telecom Italia Group sold the investment (19.61%) held by TIM International in BDT, the holding company of the French operator Bouygues Telecom for proceeds of euro 750 million, realizing a gain that contributed euro 266 million to the consolidated net result of the Telecom Italia Group.

Sale of Mobilkom Austria
On June 28, 2002, TIM International N.V. sold the entire investment (25%) held in Mobilkom Austria to Telekom Austria (a 14.78%-owned affiliate of Telecom Italia International at December 31, 2002) for proceeds of euro 756 million, realizing a gain that contributed euro 64 million to the consolidated net result of the Telecom Italia Group.

Sale of Sogei
On July 31, 2002, Finsiel concluded the sale of Sogei to the Ministry of Economy and Finance – Department of Fiscal Policy. This had a positive impact of euro 176 million on the net debt of the Telecom Italia Group.

Sale of Auna
On August 1, 2002, the transaction was finalized for sale of the investment in Auna by the Telecom Italia Group to Endesa, Union Fenosa and Banco Santander Central Hispano, that had initially been planned for December. The transaction gave rise to proceeds of euro 1,998 million for Telecom Italia Group that contributed 1,033 million to the consolidated net result.

Sale of Telemaco Immobiliare
On August 1, 2002, Telemaco Immobiliare was sold to Mirtus, a company indirectly controlled by the American real estate fund Whitehall, promoted by the Goldman Sachs group, for net proceeds of euro 192 million, realizing a net gain of 64 million for the Telecom Italia Group.

Acquisition of EPIClink
On August 2, 2002, after having received approval from the Antitrust Authority, Telecom Italia purchased 86% of EPIClink S.p.A. for a price of euro 60.2 million. The shares were sold by Edisontel S.p.A. (30.3%), Pirelli S.p.A. (25.3%; Pirelli is considered a related party of Telecom Italia through the persons of the Chairman and the CEO Carlo Buora), IntesaBci S.p.A. (20%), E_voluzione (8%) and Camozzi Holding (2.4%). After this transaction, EPIClink's shareholder base was as follows: Telecom Italia 86%, Pirelli 5%, IntesaBci 5%, Camozzi 2% and E_voluzione 2%. Furthermore, Telecom Italia is committed to the purchase of the remaining stake (14%) at a total price of euro 10 million.

Sale of 9Telecom
On August 26, 2002, the transaction was concluded for sale of the investment in 9Telecom and the simultaneous purchase of a 7% stake in LDCom. The net impact on the net result of the Telecom Italia Group was a loss of euro 267 million.

Sale of a stake in Solpart Participações
On August 27, 2002, the Telecom Italia Group reached an agreement with the other shareholders of Solpart (indirect parent company of Brasil Telecom) to reduce its stake in ordinary share capital from 37.29% to 19% by the sale of 18.29% of ordinary share capital to Timepart Participações and to Techold Participações. This reduction, among other things, removed the regulatory obstacles that prevented TIM's local subsidiaries from offering GSM 1800 commercial service. Within the framework of this transaction, both parties have an option which can be exercised in the event certain conditions are met that will restore the shareholder position quo ante.

JJ 00371

Acquisition of another stake in Stet Hellas
In August, TIM International N.V., a subsidiary of TIM, purchased, from the Verizon Europe Holding II group, a 17.45% stake in the share capital of Stet Hellas, in which it already had a 63.95% interest, at a price of euro 108 million. The deal, which in effect makes TIM International N.V. the only industrial partner and strategic shareholder in the company, falls within the framework of the Group's strategy to rationalize its international portfolio and consolidate its position in the Mediterranean Basin.

Acquisition of another stake in Netesi
In August, following the authorization received from the Antitrust Authority, the Telecom Italia Group purchased a 69.10% stake in the share capital of Netesi, in which it already held a 17.98% interest, at a price of euro 11 million.

Acquisition of Pagine Utili
On September 11, 2002, Telecom Italia reached an agreement with Pagine Italia S.p.A. for the acquisition of the assets of the Pagine Utili directories, the business segment represented principally by the so-called pocket pages with about 60,000 advertisers.
The transaction involves the payment of consideration to Pagine Italia equal to 214 million Seat Pagine Gialle ordinary shares held by the Telecom Italia Group, corresponding to 1.9% of the Seat Pagine Gialle ordinary share capital.
The execution of this transaction is subject to the approval of the Italian Antitrust Authority. After the observations formulated by the Antitrust Authority during the preliminary investigation, on January 16, 2003, Telecom Italia and Pagine Italia S.p.A. agreed to formally withdraw the announcement about the acquisition of the Pagine Utili business segment.
The parties further agreed to extend the contract period in order to be able to re-design the transaction so that it can eventually be re-submitted to the Antitrust Authority.
Moreover, the agreement between the parties provides for exclusive consideration which would, in any case, involve the payment to Pagine Italia S.p.A. of a percentage equal to 6.6% of the 214 million of Seat Pagine Gialle shares already said.
After execution of the transaction, a decision will be made as to how the purchased business segment will be integrated in Seat Pagine Gialle.

Telecom Italia – News Corporation agreement
On October 1, 2002, Telecom Italia signed agreements with the News Corporation group ("News"), partner of Telecom Italia in Stream, and Vivendi Universal ("Vivendi"), current shareholder of Tele+, in order to allow Stream to purchase Tele+ and to subsequently create a single platform for pay-TV in Italy. On the basis of this agreement Telecom Italia will hold a 19.9% stake in the single platform and News Corporation will own the remaining 80.1%.
Telecom Italia will pay euro 31.84 million at the closing for a 19.9% stake in Tele+ and will waive receivables owed by Stream to the Telecom Italia Group companies due at the end of 2002 for euro 147 million (a figure entirely provided for in the 2001 financial statements). At the same time, News Corporation will waive receivables from Stream for the same amount.
The execution of the contract is subject to the approval by the European Antitrust Authority which should announce a decision by the end of April 2003.

Sale of Consiel investment
On October 3, 2002, the agreement was concluded for the sale of the shares representing the entire share capital of Consiel by Finsiel to World Investment Partners S.A.. The total amount paid by World Investment Partners S.A. amounted to euro 1 million.

Acquisition of 100% of Blu S.p.A. shares
On October 7, 2002, TIM finalized the preliminary contract signed on August 7, 2002 with Blu S.p.A. shareholders for the purchase of 100% of the company, later merged with TIM S.p.A.. The authorizations for this transaction had been previously granted by the Antitrust Authority in view of the approval by the Telecommunications Regulatory Agency. The merger plan was signed on December 18, 2002. On that date the final price of the sale was set at euro 83 million. The merger became effective on December 23, 2002.
Other sellers of Blu S.p.A. include Edizione Holding S.p.A. (the Chairman and Deputy Chairman of which are, respectively, the Deputy Chairman of Telecom Italia Gilberto Benetton and the Director Gianni Mion) and Autostrade S.p.A. (where the same Gilberto Benetton and Gianni Mion are members of the Executive Committee)

JJ 00372

Progetto Tiglio
On October 29, 2002, the transaction envisaged by the framework agreement between the Pirelli, Olivetti-Telecom Italia Groups and The Morgan Stanley Real Estate Funds was finalized and integration was thus achieved for the real estate properties of the companies involved as well as the entities that provide real estate services to the same companies or to their subsidiaries.
The agreement also calls for leveraging, during 2003, the assets of Tiglio I and Tiglio II through a market transaction within the framework of a strategy that could contribute to the development of the real estate financial market, with consequent significant opportunities for the Telecom Italia Group to leverage the investments currently held in the two companies.
In particular, Telecom Italia Group transferred assets worth euro 1,360 million to Tiglio I and Tiglio II, in various corporate forms. Euro 50 million of the total relates to Seat Pagine Gialle, about euro 840 million to real estate that was contributed to Emsa Immobiliare after the non-proportional spin-off of IM.SER and euro 470 million to other assets. The transaction had a gross economic impact of about euro 229 million on Telecom Italia S.p.A. and euro 234 million on the Telecom Italia Group (a net impact of euro 150 on the net result of the Telecom Italia Group).
The companies in the Pirelli Group involved in the transaction were Pirelli S.p.A. (a related party of Telecom Italia through the Chairman and the Managing Director Carlo Buora) and Pirelli & C. Real Estate S.p.A. (a related party of Telecom Italia through the Chairman, the Managing Director Carlo Buora and the Director Carlo Alessandro Puri Negri).

Sale of Telespazio
In November, Telecom Italia executed the sale of Telespazio to Finmeccanica on the basis of the agreement signed on August 2, 2002. The positive impact on the financial indebtedness of the Telecom Italia Group was euro 239 million and the net gain was euro 36 million for the Telecom Italia Group.

Sale of Viasat
On November 18, 2002, Seat Pagine Gialle S.p.A. and Finsatel sold their respective 33.54% and 16.46% investments in Viasat S.p.A. to Exe Fin S.p.A. for a total of some euro 2.5 million. As a result of this sale, the company no longer holds an indirect interest in the company Viasat Assistance S.p.A.

Sale of Telekom Austria
In November 2002, Telecom Italia International N.V. placed 75 million Telekom Austria AG shares on the market (equal to 15% of share capital). The price of the placement was set at euro 7.45 per share. Gross proceeds from the sale were euro 559 million. The impact on the consolidated net result of the Telecom Italia Group was a loss of -euro 101 million.
After this transaction, Telecom Italia Group's stake in Telekom Austria decreased from 29.78% to 14.78%.

Sale of Informatica Trentina
On November 21, 2002, Finsiel sold the 40.41% stake held in Informatica Trentina to DeDa S.r.l., a company controlled by Deltadator S.p.A. (Sequenza Group), for some euro 8.7 million, realizing a gain of euro 4 million in the consolidated financial statements of Telecom Italia.

Sale of IMMSI
On November 22, 2002, Telecom Italia sold its stake in IMMSI to the company Omniapartecipazioni. The sales price was euro 69 million, with a positive impact of euro 41 million for the Parent Company, Telecom Italia.

Sale of Fintech
On December 20, 2002, Telecom Italia Lab sold its investment in Fintech S.p.A. (equal to 50% of share capital) to the Belgium-registered company Euroqube S.A., for consideration of euro 4.75 million, of which about half will be paid at the closing and the remainder within 12 months thereafter.

Acquisition of a stake in Mediocredito Centrale S.p.A.
On December 27, 2002, in execution of the contract signed in July, a 3% stake was purchased in the share capital of Mediocredito Centrale S.p.A. for a price of euro 36 million.

In conclusion, the following chart depicts the impact that the sales had on the net debt of the Telecom Italia Group in the two-year period 2001-2002, reaching the objective of the divestiture program earlier than anticipated.

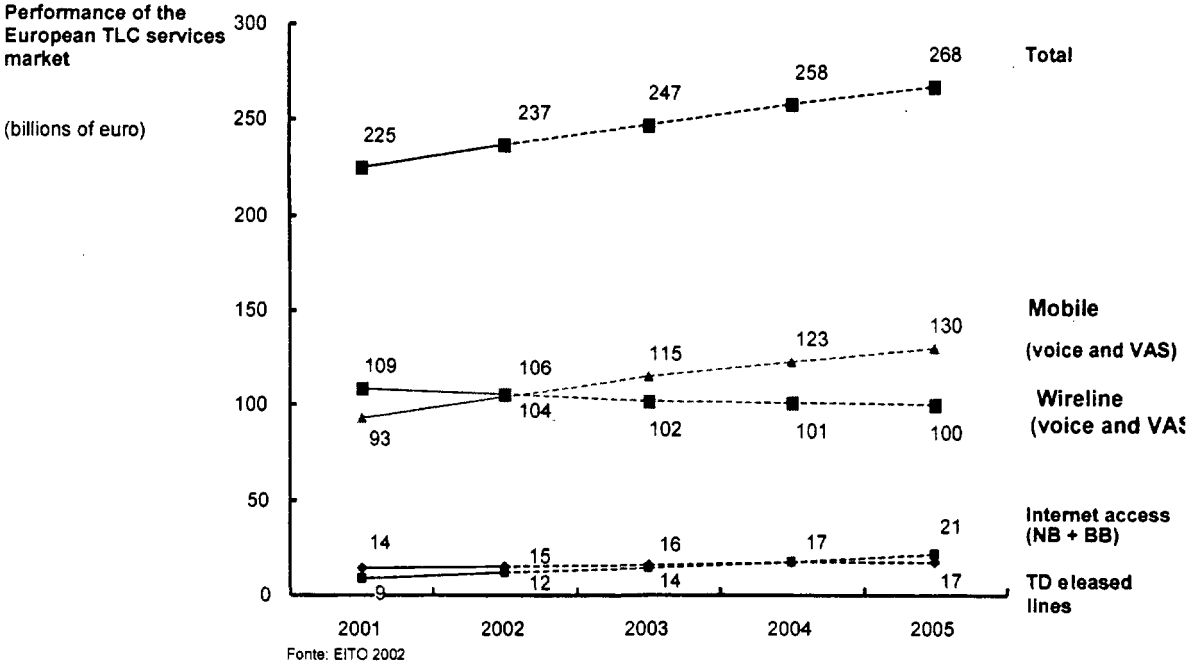
JJ 00374

■ MARKET SCENARIO

The projections for the world market of telecommunications services for the next few years suggest average annual growth of approximately 5.7%, lower than the growth of 7.7% reported in 2002.

In Europe, in 2002, the market grew by 5.4% and, over the next few years, annual average growth is expected to be in the order of 4.1%, and impacted by a slowdown in the growth of revenues from mobile services.



In Italy, growth over the next few years is expected to be higher than in the European market as a whole, with annual average growth of 5%. In particular, revenues from mobile services will increase at an annual average of 9%, particularly as a result of the development of innovative services, broadband and VAS on wireline networks, especially thanks to the spread of ADSL, at an annual average of approximately 18%.

In South America, annual average growth over the next few years is expected to be 11.6%. In particular, the mobile telephone services market in Brazil is expected to grow at an annual average of approximately 12%, and will be marked by a growing consolidation and by a regulatory framework that will favor the evolution of the SMC model over the SMP model, with higher standards of quality and fiercer competition.

From the point of view of the range of services available, it is probable that, over the next few years, the trend towards the consolidation of operators will continue, especially on a national level. This may prove to be to the advantage of large operators which will be able to exploit a broad customer base and control over the infrastructures.

From the point of view of technological development, there is likely to be innovation geared to expanding the bandwidth for wireline services and the development of "seamless" solutions for mobile services.

The development strategies of the larger operators are mainly focused on defending the domestic core business, launching broadband and value-added services and on reducing the level of indebtedness.

JJ 00375

■ STRATEGIC GUIDELINES

The fundamental objective declared by management for the next few years (as it was last year) will continue to be the creation of value. This must be ensured by capitalizing on the assets and on the distinctive competences and by further strengthening the financial structure to sustain development.

The priorities of industrial operations as described by the management are as follows:

- to consolidate its leadership of the domestic market: in wireline services, by encouraging customer loyalty with innovative products and stimulating the market of VAS and broadband, particularly through ASL access technology; in mobile services, by augmenting traffic volumes and developing a range of value-added services consistent with market expectations (MMS, community, videotelephone services), and by effectively introducing UMTS technology; in Internet and Media, by developing broadband and portals, directories and office products.

- to develop corporate presence abroad in markets where the Group can enhance its commercial and technological expertise: in the mobile sector, in South American countries, and particularly in Brazil; in the wireline sector, through the development of the pan-European broadband network.

- to continue to manage the Group according to strict criteria of efficiency thanks to the synergies activated by the organizational model based on professional categories and service centers, systems that control expenditure and results, and a careful selection of investments targeting innovation and development.

Over the next few years, the exacting dynamics in the economic and financial field will generate cash flows that will lead to a reduction in consolidated indebtedness that is expected to fall by more than euro 5 billion by the end of 2005, compared to the end of 2002.

The Group will also further develop initiatives associated with sustainability, which for the first time constitutes an integral part of corporate planning.

■ ECONOMIC AND FINANCIAL PERFORMANCE - TELECOM ITALIA S.p.A.

RESULTS OF OPERATIONS

The Parent Company, **Telecom Italia S.p.A.,** closed the year 2002 with a **net loss** of euro 1,645 million (a net income of euro 151 million in 2001).
The result was mainly caused by a higher expense balance of *net extraordinary income (expense)* (-euro 3,200 million) that was partly offset by an improvement in the operating income (+euro 62 million) and the income balance of *net investment and financial income (expense)* (+euro 754 million), and lower *income taxes* (-euro 588 million).
The increase in the net expense balance of extraordinary income (expense), in particular, was caused, on one hand, by the provisions made with respect to the value of the Seat Pagine Gialle investment (euro 2,691 million) and to the forward commitment for the purchase of Seat Pagine Gialle shares (euro 1,942 million), to adjust them to the market value of the shares (based on the average of the last six months of 2002), as a result of the decision of no longer considering the "Directories" business of Seat Pagine Gialle to be of strategic interest, and, on the other hand, to the lower writedown, compared to the prior year, made in respect of Telecom Italia International (-euro 882 million) and the writedown of TI WEB (euro 542 million) effected in 2001.

As far as dividends are concerned, with a view towards meeting the objective of paying dividends to the shareholders that are substantially in line with 2001, in December 2002, reserves were distributed for euro 987 million.. A motion for the residual amount of dividends will be submitted to the Shareholders' Meeting convened to approve the 2002 financial statements.

Sales and service revenues of euro 17,055 million decreased by euro 254 million, -1.5%, compared to 2001.
The reduction can principally be attributed to traffic, the equivalent amount of which, despite an increase of 2.4% in term of minutes, declined by euro 533 million (-6.0%) as a result of a reduction in the average retail and wholesale return of 8.3%.
Such phenomena were partly compensated by the increase in basic charges and activation fees.

Sales and service revenues, net of the amounts due to other telecommunications operators, totaled euro 13,409 million and decreased by euro 485 million (-3.5%) compared to the prior year.

Gross operating profit of euro 7,549 million decreased by euro 22 million compared to 2001 (euro 7,571 million). The percentage of gross operating profit to sales and service revenues was 44.3% (43.7% in the previous year).
The change is due to the reduction in the costs of raw materials and outside services (-euro 143 million) and the reduction in labor costs, which fell by euro 65 million compared to 2001, thus compensating the aforementioned decrease in revenues.

Total raw materials and outside services, net of the amount due to other operators, amounted to euro 3,320 million, and decreased by euro 374 million compared to the prior year.

Operating income, amounting to euro 4,045 million, increased by euro 62 million compared to 2001 (+1.6%), and represents 23.7% of revenues, compared to 23.0% in 2001. The increase was essentially attributable to lower depreciation and amortization charges (-euro 301 million) that were partly compensated by expenses connected with credit management (+euro 255 million).

Net investment and financial income (expense) is composed as follows:

(millions of euro)	2002 (a)	2001 (b)	Change (a-b)
Net investment income	2,118	2,022	96
Net financial expense	(1,087)	(1,624)	537
Value adjustments to financial assets	(654)	(775)	121
Total	**377**	**(377)**	**754**

JJ 00380

In particular:

- the increase in net investment income (+euro 96 million) is primarily due to higher dividends from the subsidiaries TIM (+euro 247 million) – following the distribution of reserves in December 2002 – and Finsiel (+euro 126 million), partly offset by the fact that in 2001 Telecom Italia had benefited from a distribution of reserves by Saiat (euro 249 million);
- the reduction in net financial expenses (-euro 537 million) was almost entirely due to the fact that a provision was set aside in 2001 (euro 569 million) for the forward commitment to purchase Seat Pagine Gialle shares; the provision in 2002, as previously described, was recorded in extraordinary expense;
- the reduction in value adjustments to financial assets (-euro 121 million) was due to the increase in the writedowns of other investments for a total of euro 131 million and to the fact that in 2001 writedowns were made to the investments in Telespazio (euro 91 million) and in TMI – Telemedia International Italia (euro 161 million).

Net extraordinary income (expense) showed an expense balance of euro 6,093 million (-euro 2,893 million in 2001), with an decrease of euro 3,200 million. Specifically:

Extraordinary income of euro 884 million comprised:

- the gains realized on the sales of investments in Telemaco Immobiliare (euro 134 million), Telespazio (euro 47 million), IMMSI (euro 51 million), EMSA (euro 70 million), the contribution of the "Asset Management" business segment to Tiglio II (euro 126 million), the sale of the non-facility business segments (property, project and agency) to the Pirelli & C. Real Estate group (euro 15 million), the sale of the "Training" segment to Telecom Italia Learning Services (euro 2 million) and the disposal of buildings (euro 7 million);
- the prior period income arising from the recovery of accrued pre-amortization interest (euro 131 million) on the expenses for employee benefit obligations under Law 58/1992 that were paid, with reserve, to INPS up to 1999 following the termination of litigation after the courts ruled in Telecom Italia's favor;
- the recovery of expenses connected with extraordinary transactions (euro 192 million) incurred by Telecom Italia on behalf of subsidiaries (principally Telecom Italia International and TIM International);
- the release to income (euro 59 million) of a part of the reserve for risks and charges, set up in 2001 to cover the expenses connected with the agreement for the sale of Stream to News Corporation and Vivendi Universal/Canal+, after the parties did not go through with the agreement;
- other prior period income of euro 50 million.

Extraordinary expenses of euro 6,977 million comprised:

- the writedown of the investment in Seat Pagine Gialle (euro 2,691 million) and the provision for the forward commitment to purchase Seat Pagine Gialle shares (euro 1,942 million);
- the extraordinary provisions regarding the investments in Netesi (euro 31 million) and Telecom Italia International (euro 1,102 million) mainly in conjunction with the expenses on the sale of the investment in 9Telecom to LDCom (euro 389 million), the loss on the sale of Telekom Austria (euro 189 million), the writedown of Netco Redes (euro 103 million) and the writeoff of the carrying value of the investment in Nortel Inversora (euro 37 million);
- the expenses and provisions (euro 379 million) for corporate restructuring relating to employees cutbacks and layoffs;
- expenses under Law 58/1992 (euro 154 million) to cover employees under the former fund "Telephone Employees Pension Fund" (FPT), which became part of the general "Employees Pension Fund", in accordance with the 2000 Finance Bill;
- the aforementioned expenses incurred on behalf of Group companies and recovered from the same companies (euro 192 million);
- the extraordinary contribution to INPS, euro 71 million (established by the 2000 Finance Bill for the three years 2000 – 2002);
- the provisions of euro 111 million following the guarantees provided upon the disposals of Italtel (euro 15 million) and Telespazio (euro 38 million) and at the time of the reorganization of real estate assets (Progetto Tiglio, euro 30 million), as well as for other matters totaling euro 28 million, of which euro 22 million refers to relations with Stream;
- the prior period expense (euro 158 million) relating to the adjustment of the estimated value of unused prepaid telephone cards following the introduction of technical data collection procedures;

JJ 00381

- other prior period expenses of euro 146 million relating mainly to expenses connected with extraordinary transactions, damage compensation to third parties and sundry charges.

Income taxes had a positive effect on the result for the year of euro 26 million and decreased by euro 588 million compared to 2001. This was due to the loss for the year that was principally caused by the aforementioned investment writedowns, which contributed to the increase in deferred tax assets.

FINANCIAL CONDITION

As far as **intangibles, fixed assets and long-term investments** are concerned, the reduction in industrial assets compared to December 31, 2001 (-euro 1,462 million) can be ascribed to the balance between investments (euro 2,322 million), depreciation and amortization (euro 3,020 million), disposals (euro 84 million), writedowns (euro 39 million) and the contributions of Telecom Italia's "Asset Management" business to Tiglio II (euro 245 million) and the "International Wholesale Services" business segment to TI Sparkle (euro 396 million). Long-term investments totaled euro 15,598 million and decreased by euro 2,772 million from December 31, 2001. The reduction is principally due to:

- new investments and recapitalizations of euro 860 million of which:
  - ✓ euro 186 million for the purchase of a 36.85% interest in the share capital of Tiglio I;
  - ✓ euro 60 million for the purchase of an 86% interest in EPIClink;
  - ✓ euro 29 million for the purchase of a 69.10% interest in the share capital of Netesi and for its successive recapitalization;
  - ✓ euro 234 million for the recapitalization and replenishment of the share capital of Stream;
  - ✓ euro 87 million for the recapitalization of Telecom Italia Sparkle;
  - ✓ euro 166 million for payments against future capital increases in investments made principally to IT Telecom;
  - ✓ euro 98 million for the purchase/recapitalization of other holdings;
- acquisition of investments, as a result of the aforementioned contributions of business segments, in Telecom Italia Sparkle (euro 698 million) and Tiglio II (euro 74 million);
- writedowns for euro 4,396 million, including extraordinary writedowns (euro 3,939 million) made to the value of investments in Seat Pagine Gialle, Telecom Italia International and Netesi;
- disposals of investments for euro 376 million, of which euro 330 million principally relates to the sale of EMSA (euro 155 million), Telespazio (euro 80 million) and Telemaco Immobiliare (euro 76 million) and euro 46 million for the disposal of investments within the framework of the contribution of the "International Wholesale Services" business segment to Telecom Italia Sparkle;
- loans made primarily to Tiglio I, Tiglio II and Telegono for a total of euro 117 million;
- euro 287 million for the purchase of 5,280,500 ordinary shares of treasury stock and 45,647,000 savings shares of treasury stock.

Working capital was a negative balance of euro 2,511 million (a positive balance of euro 12 million at December 31, 2001) and decreased by euro 2,523 million. The reduction is due to lower "trade accounts receivable" (-euro 812 million) and "other assets" (-euro 400 million) and higher "reserves for risks and charges" (+euro 1,532 million) – especially with regard to the provision for the forward commitment to purchase Seat Pagine Gialle shares of euro 1,942 million and the provisions to the reserve for corporate restructuring – and higher other liabilities (+euro 363 million). Such effects were partly compensated by the reduction in trade accounts payable (-euro 591 million).
In 2002, transactions for the securitization of trade accounts receivable from residential customers and the sale of receivables to factoring companies led to a reduction in trade accounts receivable from customers at December 31, 2002 of euro 1,031 million.

Net invested capital of euro 26,084 million (euro 32,784 million at December 31, 2001) was financed by shareholders' equity for 42% and net debt for 58%.

Shareholders' equity went from euro 15,871 million at December 31, 2001 to euro 10,956 million at the end of 2002. The reduction, equal to euro 4,915 million, was due to:

(millions of euro)	2002	2001
At January 1	**15,871**	**18,714**
Net income (loss) for the year	(1,645)	151
Retained earnings	1	-
Portion of capital grants available	13	15
Distribution of profits	(142)	(2,309)
Distribution of income reserves	(3,151)	-
Cancellation of the reserve for treasury stock in portfolio	-	(711)
Increase in additional paid-in-capital	8	10
Increase in share capital	1	188
Reduction in revaluation reserve Law 72, 3/19/83	-	(187)
At December 31	**10,956**	**15,871**

The Telecom Italia Shareholders' Meeting on December 12, 2002 passed a resolution to reclassify reserves by the transfer of euro 2,160 million from "miscellaneous reserves" to "additional paid-in-capital ", the transfer of euro 820 million from "additional paid-in-capital" to the "legal reserve", the transfer of euro 660 million from the "legal reserve" to "miscellaneous reserves" with the contextual change in the name to "miscellaneous income reserves".
This reclassification immediately identifies, in the financial statements, the nature of the reserves, namely whether they are profit or capital reserves.
The same Shareholders' Meeting resolved to distribute reserves for an amount of euro 987 million, paying euro 0.1357 to the shareholders for each ordinary and savings share, which is in line with the objective of ensuring the shareholders an amount corresponding to the dividends paid out for 2001.

Net debt of euro 15,128 million (euro 16,913 million at December 31, 2001) decreased by euro 1,785 million from December 31, 2001.
The improvement from the end of 2001 was due to the monetary flows provided by operating activities (euro 7,845 million) which more than compensated the flows used for investing activities (euro 2,799 million), for the payment of 2001 dividends and for the distribution of income reserves totaling euro 3,293 million.
Net financial debt benefited from the effects of the securitization and factoring transactions for a total amount, at December 31, 2002, of euro 1,008 million, of which euro 826 million refers to securitization (euro 848 million at December 31, 2001).

Gross debt at December 31, 2002 totals euro 17,299 million (euro 17,909 million at December 31, 2001). Details are provided in the following table:

(millions of euro)	At 12/31/2002						At 12/31/2001	
	euro	%	*Foreign currency*	%	Total	%	Total	%
Medium/long-term debt	11,767	69	81	26	11,848	68	10,371	58
Short-term borrowings	5,216	31	235	74	5,451	32	7,538	42
Total	**16,983**	**100**	**316**	**100**	**17,299**	**100**	**17,909**	**100**

The portion of medium/long-term debt rose from 58% at December 31, 2001 to 68% at December 31, 2002 following the issue of Telecom Italia fixed-rate notes under the "Global Note Program" for a total of euro 2,500 million.

■ SUBSEQUENT EVENTS

There follows a description of the significant events subsequent to December 31, 2002.

Sale of Globo.com

On January 15, 2003, Telecom Italia Finance sold its 28.57% investment in the Brazilian company Glb Servicos Interativos ("Globo.com") to TIM Brasil for US $15 million. At the end of January, TIM Brasil then sold that investment to the Globo television group. The net gain for the Telecom Italia Group was about euro 4 million.

Renewal of the first securitization tranche 2001

On January 22, the company TI Securitisation Vehicle renewed the first tranche of euro 100 million of asset backed securities issued on January 29, 2001. The transaction falls under the securitization program of Telecom Italia telephone bills and is described in greater detail in the notes to the financial statements of Telecom Italia S.p.A..

Early purchase of leased assets

On January 27, 2003, the procedures were completed for the early purchase of 12 property units (for about 300,000 square meters) from Teleleasing S.p.A. that are used by Telecom Italia S.p.A. and other Group companies under financial leasing contracts. The deal involved a total financial payment of some euro 369 million for the entire Group.

Sale of the TI Logistic business segment

On January 27, 2003, Telecom Italia announced an agreement with TNT Logistics Italia whereby this company would take over the warehouse and distribution operations of wireline telephone products for customers and for assistance and installation for the Telecom Italia network. The agreement also provides for the sale to TNT Logistics of the relative business segment of Telecom Italia, including six central warehouses, 100 advance warehouses and over 4.5 million pieces of telephone equipment and parts a year. The understanding, finalized with the aim of concentrating on the core business, became operative on March 5, 2003 following the authorization of the Antitrust Authority and the experiment with the labor consultation procedure.

Acquisition of Consodata shares

On February 12, 2003, Seat Pagine Gialle purchased 1,108,695 ordinary shares of the French subsidiary Consodata S.A. - listed on the Nouveau Marché of the Paris Stock Exchange - following the sale option exercised by the founding shareholders to which they were entitled on the basis of the agreement signed originally with the previous management of Seat Pagine Gialle on July 31, 2000. As a result of this transaction, after payment of the agreed consideration of euro 44 per share - for a total amount some euro 48.8 million - Seat Pagine Gialle acquired a further 8.17% stake and voting rights in the company, thus increasing its holding in Consodata S.A. to 98.60%.

Sale of Telekom Srbija

On December 28, 2002, the Telecom Italia Group announced that it had reached an agreement for the sale of its 29% stake in Telekom Srbija to PTT Srbija. The agreement for the sale was finalized on February 20, 2003 and the closing is scheduled to take place by the end of June.
PTT will pay euro 195 million, 120 million of which will be paid in four installments beginning February 2003. The remaining amount will be paid in six semi-annual installments beginning January 2006. The shares sold will be deposited with an international bank until full payment of the price.

Sale of Tele Pay Roll Services

On February 28, 2003, Telecom Italia sold to Accenture group the 100% interest in TE.SS – Tele Pay Roll Services, a company responsible for the administration activities connected with human resources management of the Telecom Italia Group. The sales price was euro 10 million. The transaction falls under the program for the divestiture of non-core businesses by the Telecom Italia Group.

Telecom Italia – Hewlett Packard agreement

On February 21, 2003, Telecom Italia and Hewlett-Packard signed a five-year agreement for management services and outsourcing worth a total of euro 225 million. Under the agreement, HP will supply asset management, help desk, maintenance and administration services for 90,000 Telecom Italia workstations,

JJ 00387

drawing upon the skills of around 600 IT Telecom specialists, who will be absorbed by a new HP company specialized in these services. For its part, IT Telecom is to house the systems and manage HP Italia's operating activities in the SAP environment.
The agreement will lead to a closer focus on the core business and efficiency needs in terms of savings in the operation of the distributed environment. The deal becomes binding and operational once the consultations with the labor unions have been concluded and authorization has been received from the Italian Antitrust Authority.

Bonds reserved for employees

On February 13, 2003, the Board of Directors of Telecom Italia resolved, by partially revoking the resolution for the issue of bonds for the part not yet executed, to reduce the bond issue reserved for employees from euro 1 billion to euro 400 million.

Repurchase and subsequent cancellation of notes

On March 11, 2003, the Board of Directors of Telecom Italia voted to repurchase, at market price, and subsequently cancel, a part of the notes subscribed by the subsidiary Telecom Italia Finance up to a maximum amount of euro 2 billion. This decision was taken in order to regulate the ratio of net equity to notes and bonds, in view of the motion for the distribution of reserves up to a maximum amount of euro 1,333 million.

Approval of the 2002 interconnection price list by the National Regulatory Agency

On February 27, 2003, the Infrastructures and Networks Commission of the National Regulatory Agency approved the interconnection price list for 2002, currently being announced, which Telecom Italia must apply to competing operators for the use of its network with regard to Interconnection Services for traffic, Billing Services with the risk of non-payment by Telecom Italia subscribers for access to non-geographical numbers and Unbundling Local Loop Access Services. The economic effects are included in the 2002 financial statements.

LISIT Informatica

On February 4, 2003, Telecom Italia, in a temporary association of companies with Finsiel and Lutech (Lucchini group), won the bid held by the Lombardy Region (through the subsidiary Lombardia Informatica S.p.A.) for the supply of the goods and services needed to disseminate and manage the "Regional Services Card" throughout the Lombardy Region.
The total value of the bid won by the association led by Telecom Italia, scheduled to last until 2009, is approximately euro 350 million.
Within the framework of the obligations undertaken, Telecom Italia and Finsiel acquired 35.2% of the share capital of LISIT, for a total of euro 54 million.

Agreement for the acquisition of Megabeam

In March 2003, Telecom Italia signed the agreement for the acquisition of 100% of the share capital of Megabeam Italia S.p.A., the first Italian wireless internet service provider, for consideration of euro 11.5 million.
Megabeam's acquisition falls under Telecom Italia's broadband strategy, in which wireless technology, such as Wi-Fi, occupies a fundamental role in solutions both for the family and for business, since it enhances the innovative connectivity services on fixed networks with functions and flexibility.
Megabeam offers Wi-Fi networking services in private sites and is experimenting the same Wi-Fi service in public places – in the main Italian airports and in an important hotel chain – using Wireless-Lan which operates on the 2400-2483.5 frequency.
The execution of the agreement is subject to the approval of the Antitrust Authority.

Buy-back of treasury stock by Telecom Italia

Under the transaction for the buy-back of treasury stock authorized by the Ordinary Shareholders' Meeting of Telecom Italia shareholders on November 7, 2001, during the period January 1, 2003 to March 11, 2003, 8,662,500 savings shares were purchased at an average price of euro 4.73 per share, for an investment of euro 41 million, and 915,000 ordinary shares at an average price of euro 6.83 per share, for an investment of euro 6 million. The total treasury stock purchased up to March 11, 2003 amounted to 54,309,500 savings shares at an average price of euro 5.24 for an investment of euro 285 million and 6,195,500 ordinary shares at an average price of euro 8.00 for an investment of euro 50 million.

JJ 00388

Sale of SITEBA
On March 12, 2003, Telecom Italia sold, to the other shareholders which exercised their pre-emptive right, the 30% investment held in the share capital of the company SITEBA Sistemi Telematici Bancari S.p.A., for a total amount of some euro 7.2 million.

Merger by incorporation of Telecom Italia Lab in Telecom Italia
As voted by the Extraordinary Shareholders' Meetings of Telecom Italia and Telecom Italia Lab on December 12, 2002, the 100%-controlled company Telecom Italia Lab was merged by incorporation in Telecom Italia. The deed of merger was signed on March 18, 2003, effective for accounting and fiscal purposes on January 1, 2003.
Project to merge Telecom Italia and Olivetti
On March 11, 2003, the Boards of Directors of Olivetti and Telecom Italia passed resolutions on the project directed to the simplification of the corporate structure of the Group via the merger of the two companies. The project specifically calls for the merger by incorporation of Telecom Italia in Olivetti and constitutes a fundamental step in the industrial and financial reorganization process begun in July 2001 and aimed at the creation of value for the shareholders.

■ BUSINESS OUTLOOK

In 2003, the Telecom Italia Group expects to substantially maintain operating income at this year's level and further reduce net debt.

■ RELATED PARTY TRANSACTIONS

With reference to related party transactions, the effects of such transactions on the balance sheet and statement of income in the consolidated financial statements of the Telecom Italia Group at December 31, 2002 are reported in the following table.
The effects of transactions between Telecom Italia S.p.A. and the relative parent companies, subsidiaries and affiliated companies are reported, as a supplement to this disclosure, in the individual notes to the statutory financial statements of Telecom Italia S.p.A..
In the consolidated financial statements, the effects of intercompany transactions on the balance sheet and statement of income, that is, all transactions among consolidated companies, have been eliminated.
All related party transactions, including intercompany transactions, fall within the normal business operations of the group, are governed by market terms or on the basis of specific laws; there aren't atipic or unusual transactions.

JJ 00389

Major statement of income and balance sheet components	*Transactions with:*		Nature of transaction
(millions of euro)	unconsolidated subsidiaries and affiliates	parent companies, subsidiaries and affiliates of parent companies	
Sales and service revenues	299	3	These comprise revenues from Teleleasing (euro 105 million), Brasil Telecom (euro 46 million), Stream (euro 42 million), Auna group (euro 18 million), Telecom Argentina (euro 18 million), Telekom Srbija (euro 17 million)
Raw materials and outside services	445	24	These mainly comprise rent payable to IMSER (euro 153 million) and Telemaco Immobiliare (euro 37 million) as well as TLC service costs from Etecsa Cuba (euro 77 million) and maintenance and assistance contracts from Italtel (euro 40 million) and Siemens Informatica (euro 24 million)
Net other (income) expense	9	-	These mainly relate to cost recoveries for personnel on loan to certain foreign subsidiaries and affiliates
Net financial (income) expense	(9)	(11)	These include accrued interest income on loans made to certain subsidiaries and affiliates (euro 14 million), interest expense payable to Teleleasing for financial leasing transactions (euro 23 million) and interest on the payable by Softe to Olivetti Finance NV (euro 11 million)
Loans in long-term investments	440	-	These comprise medium/long-term loans made to IS TIM (euro 313 million), Tiglio I (euro 54 million), Telegono (euro 34 million) and Tiglio II (euro 30 million)
Financial receivables	35	-	These comprise short-term loans made to TMI group companies (euro 14 million) and Golden Lines (euro 10 million net of provisions)
Financial payables	406	-	These refer mainly to payables for finance leases to Teleleasing (euro 393 million)
Trade and other accounts receivable	219	2	They mainly regard receivables from Stream (euro 71 million), Telekom Srbija (euro 21 million net of provisions), Teleleasing (euro 38 million) and Consorzio Telcal (euro 14 million)
Trade and other accounts payable	386	311	These refer to payables to Olivetti for the settlement of Group VAT and receivables from the tax authorities transferred (euro 296 million) and supply contracts connected with operating and investment activities: they include payables to the Italtel group (euro 150 million), Siemens Informatica (euro 40 million), Teleleasing (euro 17 million) and advances from Consorzio Telcal (euro 103 million)
Contract work in process	110	-	These refer mainly to activities on behalf of Consorzio Telcal for the Telematico Calabria Plan
Guarantees and collateral provided	908	-	These comprise sureties provided on behalf of Is Tim (euro 537 million), Consorzio Csia (euro 85 million) and Stream (euro 72 million) as well as collateral on behalf of Is Tim (euro 110 million)
Purchases and sales commitments	17	-	They refer to commitments with Teleleasing under operating leases.
Investments in fixed assets and intangibles	455	-	These mainly consist of acquisitions of telephone exchanges from the Italtel group (euro 406 million) and computer projects from Webegg (euro 14 million) and Siemens Informatica (euro 19 million)
Acquisition of investments	-	58	*50% of Webegg from Olivetti*
Disposal of investments	690	-	25% of Mobilkom Austria, through the disposal of the Autel holding to Telekom Austria
Contribution and sale of business segments	219	-	They refer to gains realized on the concentration of real estate assets in Tiglio I (euro 159 million) and the contribution of the "asset management" business segment to Tiglio II (euro 60 million) (1).

Related party transactions, excluding transactions among Group companies, also comprise those by the Telecom Italia Group with the Pirelli group and the Edizione Holding group in 2002 as follows:

(millions of euro)	2002	
Sales and service revenues	26	These mainly refer to telephone services to Pirelli group (euro 8 million) and to Edizione Holding (euro 16 million) and to information services to Pirelli group (euro 2 million).
Raw materials and outside services	23	These essentially refer to R & D expenditures and the supply of services in the IPR field to Pirelli group (euro 21 million) and to Edizione Holding group (euro 2 million).
Trade and other accounts receivable	3	These mainly refer to the above-mentioned telephone services to Pirelli group (euro 1.6 million) and to Edizione Holding group (euro 1.5 million).
Trade and other accounts payable	9	These mainly refer to the supply contracts connected with investment activities to Pirelli group (euro 8 million) and to Edizione Holding group (euro 1 million).
Investments in fixed assets and intangibles	32	These mainly refer to purchases of telecommunications cables from Pirelli group.
Acquisition of investments and purchases commitments	21	Purchase of 25.3% stake in EPIClink by Telecom Italia S.p.A. from Pirelli S.p.A. (euro 18 million) purchase commitment for remaining 5% (euro 3 million) (2)
	35	Purchase by TIM of Blu S.p.A. shares, stake from Edizione Holding S.p.A. e Autostrade S.p.A.. (2)
Acquisition of business segments	3	Purchase of a business segment by EPIClink S.p.A. from Pirelli Informatica
Disposal of business segments	15	Gain on the sale of non-facility business segments to Pirelli Real Estate (1)

Moreover, during the year 2002, TIM sold telephone cards for an equivalent amount of some euro 20 million to Autogrill (Edizione Holding Group) for subsequent resale to the public.

(1) The acquisition and sale transactions of equity investments is fully described in the section "Acquisitions and sales of equity investments" and in the section "Economic and financial performance - Telecom Italia Business Units/Operating Activities – Other activities".

(2) The transaction is extensively described in the section "Acquisitions and sales of equity investments".

JJ 00390

ECONOMIC AND FINANCIAL PERFORMANCE - TELECOM ITALIA BUSINESS UNITS/OPERATING ACTIVITIES

DOMESTIC WIRELINE

- **Growth of profit margins**
- **Innovation of products and service and in the field of Customer Care**
- **Efficiency in costs and investments**
- **Development of fiber optic networks for operators**
- **Corporate reorganization for international services management**

■ THE BUSINESS UNIT

The Domestic Wireline Business Unit operates on a national level as the consolidated market leader in wireline telephone and data services and call centers, for final (retail) customers and other (wholesale) operators. On an international level, Domestic Wireline develops fiber optic networks for wholesale customers, mainly in Europe and Latin America.
During the year, strong competition in the market continued. It was more accentuated in the case of national traffic and was countered with new rate plans offered as part of the action to win back and retain customers.

■ THE STRUCTURE BUSINESS UNIT

The Business Unit is organized as follows:

Telecom Italia DW	National Subsidiaries	International Subsidiaries
Wireline TLC services: . Traffic and Access . Data Business . National Wholesale . International Wholesale (1) . Public Telephone Services	Atesia S.p.A. Path.Net S.p.A. Telecom Italia Sparkle Group (1) - Telecom Italia Sparkle S.p.A. - Pan European Backbone - Telecom Italia of N.A.Inc. - Telemedia Int.Lux. Group	Latin American Nautilus Group Mediterranean Nautilus Group Med-1 Group Intelcom San Marino S.p.A.

(1) "International Wholesale Services" became part of Telecom Italia Sparkle on December 31, 2002

■ MAJOR CORPORATE EVENTS/SCOPE OF CONSOLIDATION

In 2002, changes in the scope of consolidation were due to the transfer of Saritel S.p.A. to the Information Technology Group Operating Activity and the addition of the company Intelcom San Marino S.p.A. (previously part of the International Operations Operating Activity) following the reorganization of the international operations of the Telecom Italia Group. 2001 figures have been restated accordingly.

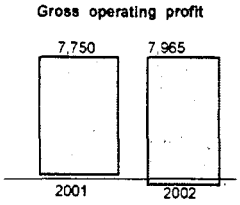
On December 31, 2002, Telecom Italia's "International Wholesale Services" business was contributed to Telecom Italia Sparkle (ex TMI - Telemedia International Italia), to which the investments in the companies headed by Pan European Backbone and Telecom Italia of North America were also conferred at the same time. Telecom Italia Sparkle will have the task of developing the international services market aimed at "heavy users", these being wireline and mobile operators, ISPs (Internet Service Providers) and multinational companies. This initiative will enable Telecom Italia to step up its competitive position on the international market by focusing on high-value Data and Internet services with a high growth potential, operated on infrastructures owned by the Group in Italy and abroad.

JJ 00391

■ ECONOMIC AND FINANCIAL DATA

The following table shows the key results in 2002 compared to those in 2001, restated for purposes of comparison.

(millions of euro)	2002 (a)	2001 (b)	Change (a - b) amount	Change (a - b) %
Sales and service revenues	17,022	17,168	(146)	(0.9)
Gross operating profit	7,965	7,750	215	2.8
% of revenues	*46.8%*	*45.1%*		
Operating income	4,700	4,361	339	7.8
% of revenues	*27.6%*	*25.4%*		
Investments:				
. industrial	2,462	2,801	(339)	(12.1)
. goodwill	-	-	-	-
Employees at year-end (number)	53,682	57,895	(4,213)	(7.3)



For comments on the performance of operations please refer to the section "Economic and financial review of Telecom Italia S.p.A.".

Compared to the prior year, *Sales and service revenues* reported a reduction of 0.9% (-euro 146 million). This slight fall, which was considerably lower than that reported in 2001 (-1.4% compared to 2000), constitutes a very important result that was achieved thanks to an effective focus on the telephony market, the core market of the Business Unit, and to the notable growth of the broadband markets. Growth in the segment of innovative Data services and Web services was particularly significant. This compensated the decline recorded in traditional data and leased line services, which were affected by a regimented price regime, and the effect of migration towards innovative solutions.
In particular, the reduction in revenues can be mainly attributed to traffic (-euro 533 million) and other components reporting a decline (sales and other revenues), and was offset to a large extent by the increase in charges and fees (+euro 539 million).
In greater detail, the reduction in the average yield of traffic (-8.3%) was partially compensated by an increase in minutes (+2.4%), with greater stability of the market share and growth of 0.1% compared to 2001. The main phenomena which influenced these figures were as follows:

- the spread of commercial rate plans (mainly Teleconomy and Alice) offering rate discounts on traffic in order to build customer loyalty, with payment of subscription charges;
- the rate adjustments of July 1, 2001 and February 1, 2002 which reduced the prices of national and international communications and, at the same time, led to an increase in subscriber line charges for the network;
- the competitive context;
- the sharp growth of "carried" traffic on behalf of other operators.

There was a considerable increase in the *gross operating profit* compared to the prior year (+2.8%), which was amply confirmed by the *operating income* (+7.8%), as a result of steps taken to curb costs and improve the level of the efficiency of invested capital begun in 2001.

Investments fell by 12.1% compared to the prior year, as a result of a selective policy of investments designed to combine efficiency with technological development.

The number of *employees* fell by 4,213 due to cutbacks under Law 223/1991 (3,298), other resignations (2,040), new recruits (1,104) and an increase as a result of transfers of employees from other companies in the Group (21).

■ INFORMATION ON OPERATIONS

The following table shows the operating highlights in 2002, compared to those in 2001:

JJ 00392

Operating data	12.31.2002	12.31.2001
Fixed network connections (in thousands)	27,142	27,353
- of which ISDN	5,756	5,403
Annual increase in minutes of traffic on the fixed network (%)	2.4	22.5
• national traffic	1.8	22.8
• international traffic	17.9	16.9
- outgoing	13.0	11.4
- incoming	(0.1)	12.6
- in transit	64.1	39.3

■ Traffic and access

During 2002, new commercial rate plans were launched for Residential and Business Phone services, including:

Residential telephone services	Ricomincio da Te	Generalized plan combining minutes of free calls (local and long-distance) included in the monthly basic telephone subscription charge
	Teleconomy Forfait	Customized package offering free national calls (local and long-distance calls) of unlimited duration for a fixed monthly cost
	Teleconomy Zero	Customized package offering calls to anywhere in Italy (local and long-distance calls) at a fixed cost per call (regardless of the duration of the call) with a monthly subscription charge
Business telephone services	Ricomincio da Te	In the second half, the plan combining minutes of free calls with a simultaneous adjustment of the monthly basic subscription charge was also introduced to the Business segment
	Business and Corporate Rate Plans	Plan directed at companies with a high volume of traffic detailed into 9 variable rate plans according to the customer's commitment for expenditure, with the expense subdivided into six installments
	Teleconomy Professional Plan	Plan enabling customers to acquire a maximum number of minutes of national traffic included in the monthly subscription charge
	Teleconomy Zero Business	Package offering calls to anywhere in Italy (local and long-distance calls) at a fixed cost per call (regardless of the duration of the call) with a monthly subscription charge

With reference to Public Telephone Service installations, terminals using ISDN technology numbered 104,635 at year-end (+50% compared to year-end 2001).

■ Data business

During 2002, the commercial range of data packages was expanded by the introduction of new plans in both the data transmission segment of corporate networks and Internet access, offered to Companies and Private Customers alike. These included:

Data transmission services	• Development of new fiber optic solutions for both point-to-point connections and IP services, with new rate plan profiles especially for the small/medium size business segment • Extension of geographical coverage in broadband with 600 new ADSL exchanges, and extension of the ATM service to 80 POP with consequent repricing • Consolidation of the range of value-added services offered through the launch of security solutions for the small/medium-size business segment and enhancement of the range of outsourcing services
Web services	• Launch of the web-wizard rate plan for helping users create websites on the Broadway platform • Launch of storage services which make a secure, confidential space available to companies for keeping and conserving sensitive documents in Internet Data Centers • Enhancement of messaging services through integration with SMS and Fax services and of streaming services on Internet WebStudios with the introduction of hi-tech production and operation tools • Expansion of the IES rate plan with customized e-learning environments for companies • New services for the Full Business Management plan (Housing, Hosting and Colocation)

■ National wholesale

In 2002, Telecom Italia expanded its activities in the national wholesale area as follows:

- at year-end approximately 131,000 phone lines had been connected directly to the networks of other operators, through Local Loop Unbundling.
- approximately 220,000 ADSL Wholesale lines were acquired by other operators and ISPs.
- an increase of approximately 20% of traffic from traditional interconnection services compared to the prior year.
- an increase of approximately 8% of access lines compared to 2001.
- construction of long-distance fiber optic networks for some leading mobile and wireline operators in 2002.

From the commercial point of view, in 2002 the activities of the Wholesale market were expanded through the following products:

Access to broadband	*Wholesale ADSL*: The plan, which was already available the prior year, was enhanced through the addition of new features in terms of services and economic incentives. A new plan was introduced whereby the ADSL connection is invoiced based on consumption, according to the traffic involved. Finally, promotional offers were introduced for activation fees and discounts on monthly subscription rates *Permanent Virtual Channel*: new technological (SHDSL technology) and commercial (flat-rate charges applied to symmetrical connections) features have also been introduced for this type of connection
Dedicated carrier services	*Giganet:* the service for carrying data on optic connections, already available at the speed of 2.5 Gbit/s, has been expanded with the introduction of the speed of 10 Gbit/s
Unbundling Local Loop Services	*ULL Provisioning*: A new plan has been created to enable operators to obtain additional processing capacity of ULL orders from Telecom Italia compared to the standard capacity. In addition, significant economic incentives were introduced on ULL and Shared Access services
Housing and hosting	There have been significant developments in the offering to accommodate apparatus on Telecom Italia premises. It has been extended to various types of systems and includes the option of maintenance of the apparatus concerned
Internet interconnection traffic	*Decade 7*: OLOs (Other Licensed Operator) and ISPs have initiated the large-scale introduction of the new numbering system for access to Internet through the telephone network. This interconnection service makes it possible to use single numbers on a national scale to dial the access supplier, and also makes it possible to charge the final customer for the traffic in various ways *"Flat collection"*: This new offer has been introduced whereby, in addition to the minute collection system already available, operators can acquire a certain "capacity" of traffic collection at various levels of the network, in blocks of 30 lines

■ International wholesale

With regard to international wholesale services (which, as described above, were contributed to Telecom Italia Sparkle at the end of 2002 by Telecom Italia - Domestic Wireline), growth was steady both in Telephony services and in IP and Data transmission services:

- With regard to wholesale volumes there was growth (+26.2% compared to the prior year) thanks to interconnection with new international carriers, to greater collection by Italian OLOs on the domestic market and the competitiveness of the Telecom Italia offering in the transit segment.
- In the area of IP and data transmission, there was an increase in the sales of innovative international connectivity services, (+6.7% compared to 2001), in line with the growth trend of the market.

■ National network

The national network in statistics at December 31, 2002 is as follows.

Exchange areas	about 10,400
Switching areas	615, served by 628 Line Stages (LS)
Gateway areas	33, served by 66 Transit Group Stages (TGS)
Copper access network	104.3 millions of kilometers-pair
Fiber optic access network	417,000 kilometers-line
Fiber optic carrier network	3.18 million of kilometers-line
Direct dialing circuits	3.6 million
Network for direct digital circuits	511,600 access points with speed up to 2 Mbit/s
Frame Relay accesses	about 71,500 gates at 2 Mbit/s
PoP main data networks	32

As far as the national network is concerned, during 2002, infrastructures and operation systems were improved, in particular, by the development of the infrastructure supporting broadband services. The following activities are worthy of note:

National Backbone	The migration of long-distance phone traffic from a backbone based on circuit technologies to the innovative one based on IP technologies began. In 2002, work began to integrate the voice and data network platforms with the migration of voice traffic to the Rome-Milan route on the innovative IP network; the project is scheduled for completion in 2004
ADSL	In 2002, the ADSL network was extended to increase the coverage of the ADSL service to more than 74% of Internet users in 1,300 towns with 2,120 exchanges
SHDSL	New technology is making it possible to supply services at up to 2 Mbit/s by using a single two-pair copper cable
Gigabit Ethernet	Work continued to create a network to support the marketing of services based on Gigabit Ethernet technology (Ethernity and Hyperway MPLS services)
W-LAN	The broadband wireless LAN service for private users was introduced
Open Multimedia Platform	The Open Multimedia Platform (Content Delivery Network) was introduced, making it possible to accelerate the distribution time of Web content by repetition on the network server
Carrier network	17 more SDH rings were realized for the network infrastructure called Arianna involving links between the regional networks and the national transmission backbone. The national 96-fiber T-bone fiber optic cable infrastructure using new technology linking the largest Italian cities has been completed along the main line of Turin-Venice and Milan-Palermo via Genoa-Florence-Rome-Naples, and via Bologna-Ancona-Bari. 32-fiber optic wavelength division multiplexer systems (DWDM) have been introduced at the speed of 40 times 10 Gbit/s
Organization of operating activities	Within the framework of striving to improve the efficiency and quality of service, the Single Work Center (CLU) project has been completed for the integration of work centers (which are no longer specialized according to the type of activity) and the reduction of the number of centers from 331 to 148. The Work Force Management (WFM) and Trouble Ticket Management (TTM) platform has now been spread to all the work centers. The organization of network platform supervision and control has been centralized and the number of national centers has been reduced from 11 to 5. The delivery and assurance processes were re-engineered and optimized
Value-added voice services	With regard to VAS voice services, implemented through the Intelligent Network, numerous new services were created, particularly in the field of Public Telephone Services, games and Customer Operation

- **International network**

The international network in statistics at December 31, 2002 is as follows.

Network operator directly connected	237
- Countries connected by direct dialing	220 (more than 9 satellite destinations)
- Countries connected by ISDN	53
Switching exchanges	9 (5 in Milan, 3 in Rome and 1 in Palermo)
Extent of European backbone	36,600 kilometers-line
Bands	2 rings of 60,000 Mbit/s

As far as the international network is concerned, services continued to be activated on the new infrastructures and operating systems developed in 2001. These were carried out in geographical areas with a strong growth in demand for capacity and of strategic importance, thanks partly to interconnection with MED and LAN networks.

At the end of 2002, integrated voice/data POPs in Europe and the U.S.A. were nine, in Amsterdam, Brussels, Frankfurt, London, Milan, Paris, Vienna, Zürich and Newark. The submarine cable network is now approximately 360,000 km long. Highlights during the year include:

Pan-European Backbone	Activation of the pan-European regional network, which connects nine countries (Austria, Belgium, France, Germany, Italy, Holland, Spain, Switzerland and Great Britain) with high-speed optical fibers and a ring structure which will guarantee the self-protection of traffic should a fault occur on any given section. Activation of cross-border services for wholesale customers such as Managed Bandwidth (transmission capacity services), IP connectivity (international IP connectivity services), international phone services (transport and delivery of international phone traffic, also using ATM technology) and GRX (GPRS Roaming eXchange for IP interconnection between GPRS mobile operators) which are now fully operational.
LAN (Latin American Nautilus)	Activation of the final configuration of the LAN ring network, which connects eight junctions in Latin America, including Rio de Janeiro, São Paulo, Buenos Aires and Santiago, to the American junctions in Miami and New York.

MED (Mediterranean Nautilus)	Work continued on the "Mediterranean Nautilus" project, the submarine optical fiber ring network which will connect Italy, Greece, Turkey and Israel, with the completion (in the configuration which ensures self-protection of the traffic) of the ring which connects the points of Catania (Sicily), Chania (Crete), Haifa (Israel) and Tel Aviv (Israel).
TINA (Telecom Italia of North America)	Within the framework of the international development of the Telecom Italia network, POPs were installed in Newark (NJ) and Miami, making it possible to expand and extend the commercial range of services currently active on the Pan-European PEB network (IP connectivity, wholesale phone services and Managed bandwidth) to North America and, through Miami, also to those of South America (LAN). Furthermore, work began to augment capacity on the trans-Atlantic route (EU-USA).

- **Events subsequent to December 31, 2002**

Events already described in the section "Subsequent events" are listed below :

- **New broadband network infrastructure:** in February 2003, Telecom Italia announced the start of an important project to create a new broadband network infrastructure able to distribute hi-tech multimedia services. This initiative will make it possible to adapt telephone exchanges to new technologies through the gradual replacement of current connection systems with apparatus of the new generation.
  The construction of this project was awarded by Telecom Italia to Marconi which won the bid worth more than euro 80 million under a two-year agreement, in keeping with the wide-ranging investment plan that Telecom Italia has set up for developing broadband technologies. Marconi will build the new network infrastructure together with Italtel which will supply its switching technologies and professional services. Thanks in particular to its Access Hub technology, Marconi will make it possible to distribute many services to the clientele, including xDSL, conventional and ISDN telephone services that are able to interact both with conventional exchanges and with new-generation systems based on IP protocols.

- **Approval of the 2002 interconnection price list by the National Regulatory Agency**
  On February 27, 2003, the Infrastructures and Networks Commission of the National Regulatory Agency approved the interconnection price list for 2002, currently being announced, which Telecom Italia must apply to competing operators for the use of its network with regard to Interconnection Services for traffic, Billing Services with the risk of non-payment by Telecom Italia subscribers for access to non-geographical numbers and Unbundling Local Loop Access Services. The economic effects are included in the 2002 financial statements.

- **MAJOR SUBSIDIARIES**

Atesia S.p.A.

Held by: Telecom Italia 100.0%

The company operates in the sector of telemarketing and market research.
The table shows the key economic highlights:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	98	83	18.1
Gross operating profit	38	40	(5.0)
Operating income	32	36	(11.1)

Activities during 2002:

- creation and operation of the first CRM platform and opening of two new Call Centers (about 700 operating stations) to manage the growth of Telecom Italia's business

Path.Net S.p.A.

Held by: Telecom Italia 99.99%, IT Telecom 0.01%

The company is responsible for the development and management of the single Public Administration (R.U.P.A.) network.
The table shows the key economic highlights:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	98	79	17.7
Gross operating profit	4.5	3	66.7
Operating income	1	1	°

JJ00396

Activities during 2002:
- growth of access and transmission band services compared to 2001
- stipulation of eight important new contracts with the Public Administration (at year-end there were 64 active contracts)

TMI group – Telemedia International Italia (Telecom Italia Sparkle as from December 31, 2002)

Held by: Telecom Italia 100.0%

During 2002, the group was reorganized as a result of the contribution of the "International Wholesale Services" business segment of Telecom Italia – Domestic Wireline. It also changed its name to Telecom Italia Sparkle.

The table shows the key economic highlights, which refer exclusively to the former TMI – Telemedia International Italia group, since the contribution of the business segment took place on December 31, 2002:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	19	91	(79.1)
Gross operating loss	(30)	(53)	43.4
Operating loss	(43)	(126)	65.9

Activities during 2002:
- With reference to the reorganization described above, the economic and financial data for 2002 are not significant

Latin American Nautilus Group

Held by: Telecom Italia 70.0%, Entel Bolivia 10.0%, Entel Chile 10.0%. Tel. Arg. 10.0%

The group ensures the transport of traffic and the supply of transmission capacity for wholesale customers in Latin America.

The table shows the key economic highlights:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of US$)	2001 (millions of US$)	Change in US$ (%)
Sales and service revenues	29	3	28	3	°
Gross operating profit (loss)	11	(26)	11	(24)	°
Operating loss	(6)	(27)	(6)	(24)	75.0

Activities during 2002:
- The group network has been fully operational since the first quarter of 2002. Activities during the year focused on extending the customer base and developing new products and services

Mediterranean Nautilus Group

Held by: Telecom Italia 62.51%, Telecom Italia International 7.49%

The group ensures the transport of traffic and the supply of transmission capacity for wholesale customers in the Eastern Mediterranean.

The table shows the key economic highlights:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of US$)	2001 (millions of US$)	Change in US$ (%)
Sales and service revenues	64	54	61	48	27.1
Gross operating profit	26	20	24	18	33.3
Operating income (loss)	56	(20)	53	(17)	°

Activities during 2002:
- completion of the creation of the submarine fiber optic link being built between Catania, Chania (Crete), Haifa and Tel Aviv (Israel) and the start of traffic carrier activities
- completion of the landing stations in Catania, Athens, Crete and of a Telehouse in Athens
- delivery of a new cable-laying vessel to update the fleet

JJ 00397

Med-1 Group

Held by: Telecom Italia 23.17%, Telecom Italia International 27.83%

The group is responsible for installing land-based and submarine networks in the area of the Middle East.

The table shows the key economic highlights:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of US$)	2001 (millions of US$)	Change in US$ (%)
Sales and service revenues	20	13	19	12	58.3
Gross operating profit	12	2	12	1	°
Operating income (loss)	4	(5)	4	(5)	°

Activities during 2002:

- management of the laying of the Lev-1 (Israel-Cyprus-Italy) fiber optic submarine network and integration of the land network

Pan European Backbone

Held by: Telecom Italia Sparkle 100.00%

This is a group of companies responsible for the transport of traffic and the supply of transmission capacity for wholesale customers in Europe.

The table shows the key economic highlights:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	27	19	42.1
Gross operating profit	18	13	38.5
Operating income	6	7	(14.3)

Activities during 2002:

- completion of the Vienna junction and consolidation of commercial activities with the aim of supplying wholesale customers with Managed Bandwidth services (transmission capacity services), IP Connectivity, international phone services and GRX (GPRS Roaming eXchange)

Intelcom San Marino S.p.A.

Held by: Telecom Italia International 70.00%

The company operates under a concession for international telephone services in the Republic of San Marino. In addition, it offers value-added services connected with the sale of international connections, as well as data-transmission, hosting and housing and Internet-access services.

The table shows the key economic highlights:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	**25**	41	(39.0)
Gross operating profit (loss)	**(1)**	2	°
Operating income (loss)	**(11)**	1	°
Volume of traffic handled (millions of minutes)	**166**	304	(45.4)
Internet customers at year-end (thousands)	**5.3**	4.6	15.2

Activities during the 2002:

- The company is currently working out an organizational restructuring plan and a commercial repositioning plan

JJ 00398

MOBILE

- **Growth of revenues and improvement in profitability margins**
- **Confirmation of leadership on the domestic market**
- **Launch of GSM service in Brazil**
- **Completion of non-core asset divestiture program**
- **Completion of integration of the former company Blu S.p.A.**

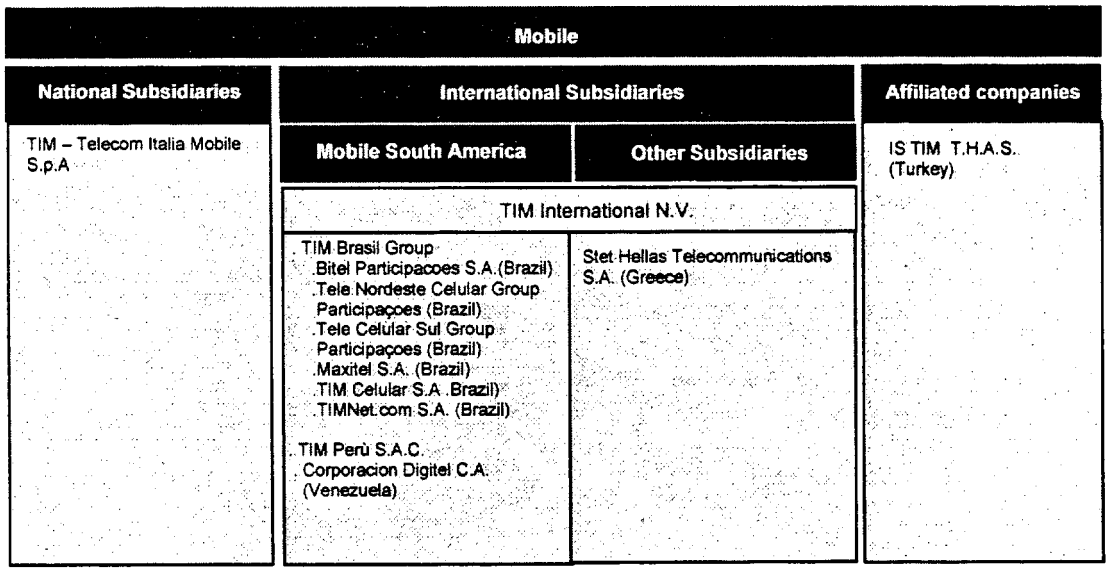
■ THE BUSINESS UNIT

The Mobile Services Business Unit (TIM group) operates in the sector of national and international mobile telecommunications. Its international presence is concentrated in Latin America and in the Mediterranean Basin.

During 2002, the spread of wireless telephone services throughout the world continued at a steady pace. The number of customers exceeded the billion mark, with penetration of the population at close to 20%. In this scenario, Italy is a market that can now be considered saturated (with a penetration rate of more than 90%) whereas Latin America, with approximately 100 million customers and a level of penetration of approximately 20%, is a market with enormous potential (growth in 2002 was higher than 20%).

■ THE STRUCTURE OF THE BUSINESS UNIT

The Business Unit is organized as follows:



■ MAJOR CORPORATE EVENTS/SCOPE OF CONSOLIDATION

The year 2002 was marked by:

- the sale of BDT (Bouygues Decaux Telecom, a 19.61%-owned affiliate, the group holding company of the French operator Bouygues Telecom), for proceeds of euro 750 million and a gain of euro 484 million;
- the sale of Autel (a 100%-owned subsidiary which holds a 25% stake in the Mobilkom Austria group) to Telekom Austria, for proceeds of euro 756 million and a gain of euro 163 million;
- the sale of Auna, for proceeds of euro 240 million and a gain of euro 198 million;
- the purchase of 17.45% of the ordinary share capital of Stet Hellas for euro 108 million, bringing the stake held by TIM International to 81.40%;
- the purchase of 10% of the ordinary share capital of Digitel for euro 32 million, bringing the stake held by TIM International to 66.56%;
- the purchase of 100% of the share capital of Blu, later absorbed by TIM S.p.A.

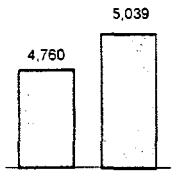
These transactions had no significant effect on the scope of consolidation in that the companies sold had been valued using the equity method, whereas the acquisition of Blu, consolidated in the Mobile Business Unit for the fourth quarter of 2002 only, had no meaningful impact on the results of operations or on the financial condition.

■ ECONOMIC AND FINANCIAL DATA

The following table shows the key results in the 2002, compared to those in 2001.

(millions of euro)	2002 (a)	2001 (b)	Change (a - b) amount	Change (a - b) %
Sales and service revenues	10,867	10,250	617	6.0
Gross operating profit	5,039	4,760	279	5.9
% on Revenues	*46.4%*	*46.4%*		
Operating income	3,358	3,136	222	7.1
% on Revenues	*30.9%*	*30.6%*		
Investments:				
. industrial	1,715	3,151	(1,436)	(45.6)
. goodwill	196	31	165	°
Employees at year-end (number)	18,702	16,721	1,981	11.8

Gross operating profit



In 2002, *sales and service revenues* amounted to euro 10,867 million, an increase of euro 617 million (+6% compared to 2001) despite the effects deriving from the weakness of the Brazilian and Venezuelan currencies. Excluding the effect of the changes in the exchange rates, the increase in revenues would be +11.9% compared to the prior year.
The growth in revenues can mainly be attributed to Italy (+6.7%).
In addition, the TIM Brasil group reported revenues of euro 39 million generated by the GSM service launched in the fourth quarter of 2002.

In 2002, the *gross operating profit* was euro 5,039 million, with an increase of euro 279 million (+5.9% compared to 2001). As a percentage of revenues, the *gross operating profit* was 46.4% (46.4% in 2001). Excluding the effect of the changes in the exchange rates, the growth of the gross operating profit would be +8.6% compared to the prior year, and can mainly be attributed to the positive performance reported by TIM S.p.A. (+euro 304 million), Stet Hellas (+euro 67 million) and to the improvement in the results, albeit still negative, of TIM Perù (+euro 26 million).

Operating income in 2002 was euro 3,358 million, an increase of euro 222 million (+7.1% compared to 2001) and, as a percentage of revenues was 30.9% (30.6% in 2001). The increase in the operating income can mainly be attributed to the positive results of TIM S.p.A. (+euro 213 million) and Stet Hellas (+euro 42 million) which compensates for the deterioration in the operating income of the TIM Brasil group (euro 45 million) due to expenses incurred for start-up operations.
Since the financial statements of TIM S.p.A. include the economic and financial results for the whole of 2002 of the former company Blu S.p.A., for the purposes of consolidation the economic and equity situation of TIM S.p.A. has been adjusted to eliminate the effects of the merger with Blu as regards pre-acquisition transactions. Furthermore, the economic and equity situation of TIM S.p.A. has been adjusted to account for tax interference mainly for the amortization taken on the UMTS licenses.

Industrial investments in 2002 amounted to a total of euro 1,715 million, with a decrease compared to 2001 of euro 1,436 million, relating to the considerable investments made in 2001 for the acquisition of telecommunications licenses and for the start-up and development of foreign subsidiaries and affiliates.

At December 31, 2002, *employees* numbered 18,702 with an increase of 1,981 compared to December 31, 2001 due both to the acquisition of Blu S.p.A. and the increase in the number of employees of the South American companies connected, amongst other things, with the launch of the GSM service in Brazil.
For a description of operations, please refer to the comment on the parent company TIM and the individual consolidated companies.

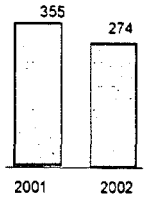
JJ 00400

■ ECONOMIC AND FINANCIAL DATA FOR MOBILE OPERATIONS IN SOUTH AMERICA

The following table shows the key economic and financial highlights of the Mobile BU operations in Latin America, coordinated by Latin America Operations (LAO).

(millions of euro)	2002 (a)	2001 (b)	Change (a - b) amount	Change (a - b) %
Sales and service revenues	1,298	1,403	(105)	(7.5)
Gross operating profit	274	355	(81)	(22.8)
% on Revenues	*21.1*	*25.3*		
Operating loss	(98)	(72)	(26)	(36.1)
% on Revenues				
Investment:				
. industrial	541	1,662	(1,121)	(67.4)
. goodwill				
Employees at year-end (number)	7,050	5,678	1,372	24.2

Gross operating profit



In 2002, the operations of the Mobile Business Unit in Latin America generated *revenues* of euro 1,298 million, with a decrease of 7.5% compared to 2001, and can mainly be attributed to the effect of changes in the exchange rates resulting from the weakening of the Brazilian and Venezuelan currencies.

Gross operating profit for 2002 amounted to euro 274 million, with a decrease of 22.8% compared to 2001. This was due mainly to expenses incurred for start-up activities.

Operating income for 2002 was a loss of euro 98 million.

In 2002, *industrial investments* amounted to euro 541 million, with a decrease compared to 2001 of euro 1,121 million. The decrease can be correlated to the aforementioned investments made in 2001 to acquire PCS telecommunications licenses in Brazil and the start-up and development of foreign subsidiaries. In particular, on October 18, following the concession of authorization from Anatel, the Brazilian Regulatory body for telecommunications, the TIM group launched a commercial plan for the GSM mobile telephone service throughout the Brazilian territory.

At December 31, 2002, *employees* numbered 7,050, an increase of 1,372 compared to December 31, 2001 which can mainly be attributed to the increase of employees associated with the above-mentioned launch of the GSM service in Brazil.

■ TELECOM ITALIA MOBILE S.p.A. (PARENT COMPANY)

Held by: Telecom Italia 54.82%, TI Finance 0.17%

The following table shows the key economic highlights. Since the 2002 economic results of TIM S.p.A. also include those of the merged company Blu, for purposes of comparison with the figures of the prior year, the results are also shown net of Blu.

(millions of euro)	2002 TIM EXCLUDING BLU (a)	2002 BLU (b)	2002 TIM POST-MERGER (*) (a+b)	2001 TIM (c)	Change (%) (a-c)
Sales and service revenues	8,915	213	9,022	8,357	6.7
Gross operating profit (loss)	4,529	(125)	4,404	4,225	7.2
Operating income (loss)	3,323	(170)	3,153	3,231	2.8

(*) The figures are net of any intercompany eliminations.

JJ 00401

The comments on the key economic and financial results refer to data excluding the effects of Blu's operations.

The increase in *sales and service revenues* stems from higher service revenues, the VAS component of which increased by more than 41% to euro 752 million, thanks to the growth of SMS (+32.6%) and the increase in traffic to euro 6,845 million (+3.5%) especially as a result of the growth of Internet traffic.
Revenues from prepaid cards showed an increase of 19.3%.
Revenues from sales of phones, spurred on by the launch of MMS services, led to overall growth of approximately 9%.

Gross operating profit increased more than revenues, as a result of efforts to curb expenses, achieved also thanks to the considerable efforts made to improve efficiency in operating and administrative expenses.

Operating income rose by 2.8% and was affected by higher amortization and depreciation charges for the year which included:

- the amortization of the UMTS license, recorded beginning from the month of January for purposes of tax deductibility. The charge was some euro 121 million, gross of the tax effect of some euro 49 million;
- higher depreciation of fixed assets following the review of the estimates for the useful lives of the assets. Such higher depreciation, compared to the depreciation charge that would have been recorded if the previous estimated useful lives had been used, amounted to about euro 53 million.

Activities during 2002:
The following table shows the key operating highlights for 2002, compared to 2001, and the main activities carried out by each sector:

TIM – operating highlights (excluding BLU)	12.31.2002	12.31.2001
TIM lines in Italy (thousands)	25,302	23,946
Mobile traffic (millions of minutes)	36,432	33,784
GSM penetration in Italy (% of population)	99.8	99.7
E-TACS penetration in Italy (% of population)	98.0	98.0

In 2002, TIM continued to develop innovative services with the aim of building customer loyalty and giving users greater incentives for using mobile phones. The most important initiatives are discussed below:

- TIM was the first mobile operator in Europe to launch the new MMS (Multimedia Messaging Service), the multimedia evolution of SMS, making it possible to send and receive, directly from and on cell phones or on PCs, messages composed by photos, images, sound and texts.
- Presentation of the Extended memory SIM Card (64K/byte).
- Launch of the exclusive "4888 Pay For Me" service, which enables customers to charge the cost of a call to the receiver of the call (TIM cell phones and all Telecom Italia fixed phones).

00402

- MAJOR SUBSIDIARIES
- EUROPE

Stet Hellas Telecommunications S.A.

Held by: TIM International N.V. 81.40%, TI Finance 0.13%

The company operates the GSM service in Greece.
The table shows the main economic and operating data:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	689	523	31.7
Gross operating profit	255	188	35.6
Operating income	131	89	47.2
Number of lines at year-end (thousands)	2,514	2,135	17.8
Market share	27%	27%	

The results achieved in 2002 confirm the positive market performance of Stet Hellas. Revenues increased by 31.7% compared to the prior year, mainly as a result of the increase in outgoing traffic and VAS services. The gross operating margin rose by 35.6% as a result of market growth, with an increase in industrial costs that was lower than the increase in revenues. The operating income was euro 131 million, an increase of 47.2%.
Activities during 2002:

- Launch of the TELEST E-bill, a service offered to subscribers through Internet
- Development of TELESTET Centers, which helped to encourage the growth of the distribution network
- Launch of the new "B Best Web SMS" service for business clientele
- Experiments with the UMTS infrastructure, currently at the testing stage

- LATIN AMERICA

As previously pointed out, the activities of the Mobile BU in Latin America are coordinated by Latin America Operations.

Tele Nordeste Celular Participaçoes Group

Held by: Bitel Participaçoes S.A. 21.18%

The group operates mobile network services in the northeast of Brazil using TDMA technology.
The table shows the main economic and operating data:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of reais)	2001 (millions of reais)	Change in reais (%)
Sales and service revenues	355	416	984	876	12.3
Gross operating profit	189	198	521	416	25.7
Operating income	98	102	271	215	26.0
Number of lines at year-end (thousands)			1,926	1,758	9.6
Market share			59%	65%	

The economic results achieved in 2002 reflect a general increase compared to 2001. Revenues increased by 12.3% thanks to the expansion of telephone traffic and growth in interconnection rates which were updated by Anatel in February. The gross operating profit increased by 25.7% compared to the prior year as a result of an improvement in cost control policies. The operating income rose by 26% compared to 2001.
Activities during 2002:

- Strategy aimed at pursuing profitability and focused on the corporate segment
- Launch of programs to encourage customer loyalty and retention
- Rationalization in the operation of points of sale and with the aim of pursuing a continuous reduction of costs
- Control of investments, while pursuing the objective of maintaining an optimum level of efficiency of service

JJ 00403

Tele Celular Sul Participaçoes Group

Held by: Bitel Participaçoes S.A. 20.68%

The group operates mobile network services in the south of Brazil using TDMA technology.
The table shows the main economic and operating data:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of reais)	2001 (millions of reais)	Change in reais (%)
Sales and service revenues	364	423	1,010	889	13.6
Gross operating profit	152	179	422	376	12.2
Operating income	69	88	192	185	3.8
Number of lines at year-end (thousands)			1,724	1,604	7.5
Market share			61%	65%	

Positive results were reported in 2002. As in the case of Tele Nordeste Celular, revenues increased compared to 2001 (+13.6%) thanks to higher interconnection rates and greater telephone traffic. Cost control policies led to an increase in the gross operating profit of 12.2% and an improvement in the operating income of 3.8%.
Activities during 2002:

- Implementation of strategies focused on the clientele
- Repositioning of the commercial product range for the business segment
- Growth of revenues from SMS and from value-added services
- Development of diversified sales channels

Maxitel S.A.

Held by: TIM International N.V. 58.70%, Bitel Participaçoes S.A. 37.97%, TIM Brasil S.A. 3.33%

The group handles mobile telephone services in Brazil in the areas of Bahia Sergipe and Minas Gerais using TDMA technology.
The table shows the main economic and operating data:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of reais)	2001 (millions of reais)	Change in reais (%)
Sales and service revenues	274	277	755	582	29.7
Gross operating profit	106	86	293	181	61.9
Operating income (loss)	27	(21)	74	(44)	°
Number of lines at year-end (thousands)			1,392	1,196	16.4
Market share			30%	33%	

During 2002, Maxitel reported an increase in revenues of 29.7% compared to 2001, attributed to a significant increase in telephone traffic and to the review of interconnection rates. The increase in revenues, together with a more careful control of costs, led to growth in the gross operating profit of 61.9% and to a positive operating income.
Activities during the year:

- Special offers for subscriber customers to encourage migration to new rate plans
- Commercial strategies focused on customer acquisition and retention of high-profile customers
- Expansion of the range of value-added services

Tim Celular S.A.

Held by: TIM Brasil S.A. 100.00%

The company operates mobile network services using GSM technology in the north of Brazil and in the states of São Paulo, Rio de Janeiro and Espirito Santo.
Within the framework of the corporate reorganization process, Portale Rio Norte and TIM Celular Centro Sul were merged by absorption in Portale Sao Paulo, which subsequently changed its name to Tim Celular.
The table shows the main economic and operating data:

JJ 00404

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of reais)	2001 (millions of reais)	Change in reais (%)
Sales and service revenues	39	0	108	0	-
Gross operating loss	(170)	(16)	(472)	(33)	°
Operating loss	(188)	(16)	(521)	(34)	°
Number of lines at year-end (thousands)			293	0	-

Revenues in 2002 were generated by the launch of the GSM service in the fourth quarter of 2002. The company reported a gross operating loss and an operating loss because of start-up expenses.
Activities in 2002:

- Implementation of the roll-out of the network and IT systems
- Organization of the sales force and the distribution channel
- Strategy focused on innovative features of the GSM service and the SIM card
- Activation of call center services

TIM Perù S.A.C.

Held by: TIM International N.V. 100.00%

The company operates mobile telephone services in Peru.
The table shows the main economic and operating data:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of nuevo soles)	2001 (millions of nuevo soles)	Change in nuevo soles (%)
Sales and service revenues	93	34	306	105	193.3
Gross operating loss	(29)	(55)	(95)	(173)	45.1
Operating loss	(61)	(76)	(201)	(238)	15.5
Number of lines at year-end (thousands)			396	173	128.3
Market share			17%	10%	

In 2002, revenues increased by approximately 193% compared to the prior year, particularly as a result of the intensification of telephone traffic generated by the increase in the customer base. The gross operating result improved by 45.1% compared to 2001 thanks to higher revenues and more careful cost control. Despite the fact that the company again reported an operating loss, it improved considerably compared to the prior year.
Activities during 2002:

- Launch of new products and services, with the aim of developing voice and data traffic
- Expansion of the distribution chain and phone recharging points

Corporacion Digitel C.A.

Held by: TIM International N.V. 66.56%

The company operates mobile telephone services in Venezuela.
The table shows the main economic and operating data:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of bolivares)	2001 (millions of bolivares)	Change in bolivares (%)
Sales and service revenues	177	255	260,378	173,328	50.2
Gross operating profit	35	15	51,355	10,139	°
Operating loss	(20)	(32)	(30,070)	(21,466)	40.1
Number of lines at year-end (thousands)			892	667	34.0
Market share (*)			15%	18%	

(*)The market share in 2001 cannot be compared to that in 2002 because the latter refers to the whole of Venezuela whereas the 2001 figure refers only to the central region.

JJ 00405

In 2002, revenues increased by 50.2% compared to 2001, thanks to an increase in the number of lines. The gross operating profit improved compared to the prior year as a combined result of a decrease in the costs of services and an increase in revenues. The operating loss shows a deterioration of 40.1% which can mainly be attributed to the impact of the writedown of assets with out-of-date technology.
Activities during 2002:

- Significant changes in the architecture of the network with the choice of Nokia as the main infrastructure supplier
- Updates of prepaid services technology
- Launch of the GPRS and MMS services

■ AFFILIATED COMPANIES

■ MEDITERRANEAN BASIN

IS TIM T.H.A.S.

Held by: TIM International N.V. 49.00%

The company operates mobile telephone services in Turkey, under the Aria trademark.
The table shows the main economic and operating data:

	2002 (millions of euro)	2001 (millions of euro)	2002 (billions of Turkish lire)	2001 (billions of Turkish lire)	Change in Turkish lire (%)
Sales and service revenues	83	46	141,276	58,753	140.5
Gross operating loss	(122)	(181)	(207,609)	(229,154)	9.4
Operating loss	(420)	(382)	(715,735)	(484,897)	(47.6)
Number of lines at year-end (thousands)			1,161	540	115.0
Market share			5%	3%	

The results for 2002 cannot be compared with those of 2001 because some of the revenues and costs date from the start of the operations, that is, from March 21, 2001, and thus refer to a shorter period than the twelve months of 2002.
The growth of revenues was negatively influenced by the deterioration of the macroeconomic scenario which was already in place in 2001 and by a regulatory framework which made it impossible to conclude national roaming agreements with other operators. The company succeeded in limiting the growth of consumption costs. As a percentage of revenues, the company reported a gross operating loss, but with a considerable improvement over that of the prior year. The operating loss deteriorated primarily as a result of the higher amortization and depreciation charges.
Activities during 2002:

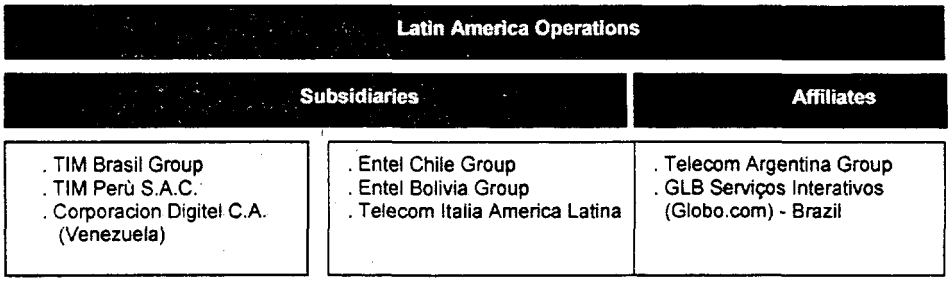
- New rate plans aimed at corporate clientele and the introduction of rates based on time frames
- Launch of new services including "pay for me"
- Continuation of the network roll-out with a significant increase in radio base stations

JJ 00406

SOUTH AMERICA

In May 2002, the International Operations (IOP) "Operating Activity" was disbanded. While the companies involved maintained the same corporate control structure, the companies and business segments of Telecom Italia which formerly reported to the IOP have been transferred to Domestic Wireline (Intelcom San Marino and Golden Lines), the Foreign Holdings Corporate Function (9Telecom Reseau group, BBNed group, Auna group, Telekom Austria group, Telekom Srbija, Etec S.A. and what remains of the ex IOP), while all the companies situated in Latin America are now coordinated by Latin America Operations (LAO).

LAO's structure is organized as follows:



The following comments present the key consolidated economic and financial highlights of the Entel Chile group, the Entel Bolivia group, the company Telecom Italia America Latina and the South America business segment of Telecom Italia.
The economic and financial highlights of the companies in the Tim Brasil group, Tim Perù and Corporacion Digitel are described in the section pertaining to the Mobile BU.

■ MAJOR CORPORATE EVENTS/SCOPE OF CONSOLIDATION

2002 was marked by the following transactions:

- Sale, by Telecom Italia Group of a stake in Solpart Participacoes S.A. (indirect parent company of Brasil Telecom) to other shareholders for a price of US $47,000, which takes into account the value of the ordinary shares compared to the preferred shares based on the economic value of Solpart. Following this transaction, the Group's stake in ordinary share capital fell from 37.29% to 19.0%. As a result, the regulatory obstacle preventing the TIM group from launching a mobile telephone service based on GSM technology throughout Brazil was removed. Within the framework of this transaction, both parties have an option which can be exercised in the event certain conditions are met that will restore the shareholder position quo ante.

- on August 19, as a result of the transformation of the subsidiary Telecom Italia do Brasil Ltda, the company Telecom Italia America Latina S.A. came into being. Subsequently, on September 26, Telecom Italia S.p.A. subscribed to the share capital increase of euro 11 million voted by the subsidiary.

■ ECONOMIC AND FINANCIAL DATA

The following table shows the key highlights, restated for the purposes of comparison, of the Entel Chile group, the Entel Bolivia group, the company Telecom Italia America Latina and the South America business segment of Telecom Italia in 2002, compared to those of 2001.

(millions of euro)	2002 (a)	2001 (b) (1)	Change (a - b) amount	Change (a - b) %
Sales and service revenues	1,409	1,534	(125)	(8.1)

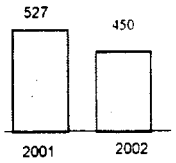
% on Revenues	*31.9%*	*34.4%*		
Operating income	146	187	(41)	(21.9)
% on Revenues	*10.4%*	*12.2%*		
Investments:				
. industrial	216	406	(190)	(46.8)
. goodwill	-	-		
Employees at year-end (number) (1)	5,461	5,746	(285)	(5.0)

(1) Figures restated for the purposes of comparison.

JJ 00407

Gross operating profit



Sales and service revenues amounted to euro 1,409 million, with a decrease of 8.1% (-euro 125 million in absolute terms) compared to 2001. The decrease can be attributed mainly to exchange rate fluctuations (which generated a total impact of -euro 212 million, of which euro 182 million refer to the Chilean peso and euro 29 million to the Bolivian boliviano). Had this effect not been considered, consolidated revenues would have increased by 5.7%, as a result of the increase in revenues of the Entel Chile group (+12.3% in local currency). This was offset by the effects of the deregulation of the Bolivian market (Entel Bolivia reported a reduction of approximately 4.5% in local currency), and the suspension with effect from April 1, 2002 of the contribution of the management fee under the terms of the contract with Telecom Argentina.

The fluctuations described affected profitability performance. In particular, the *gross operating profit* decreased by euro 77 million (-14.6%) compared to 2001, of which approximately euro 65 million can be attributed to the exchange effect. Excluding the exchange effect, the reduction in the gross operating profit compared to 2001 would have been 2.3% and can be ascribed to the suspension of the payment of the management fee by Telecom Argentina and lower profit margins in Bolivia that were offset by a recovery in Chile that can be attributed to improved profit margins in the mobile sector. As a percentage of revenues, the gross operating profit was 31.9% in 2002 (34.4% in the prior year).

Operating income confirms the trends already described with regard to the gross operating profit. As a percentage of revenues, the operating income was 10.4% in 2002 (compared to 12.2% in 2001).

Industrial investments show a declining trend compared to December 31 2001, with a reduction of 46.8%.

Employees numbered 5,461, with a decrease of 285 (-5.0%) compared to December 31, 2001. This can mainly be attributed to rationalization measures adopted by the Entel Chile group and the Entel Bolivia group (reductions of -180 and -122 respectively compared to December 31, 2001).

Entel Chile Group

Held by: Telecom Italia International 54.76%

The group operates in the sectors of fixed and mobile telephone services, data transmission and Internet access services in Chile.

The table shows the key economic and operating highlights 2002, compared to those of 2001:

	2002 (millions of euro)	2001 (millions of euro)	2002 (billions of pesos)	2001 (billions of pesos)	Change in pesos (%)
Sales and service revenues	1,223	1,251	791	710	12.3
Gross operating profit	381	374	246	212	17.0
Operating income	151	128	99	72	37.5
No. of fixed lines at year-end (thousands)			98	95	
No. of mobile customers at year-end (thousands)			2,293	1,936	
Internet customers at year-end (thousands)			513	326	

JJ 00408

Activities during 2002:

- Despite the persisting recessive macroeconomic context in South America, in 2002, the Entel Chile group considerably improved all the economic indicators of operational profitability, consolidating its leadership position as a mobile telephone services operator and successfully implementing a fast Internet-access service using WLL technology in Chile and long distance services in Peru and Venezuela
- In August 2002, the Entel Chile group reduced the number of its employees (468 between staff and outsourcing) incurring extraordinary expenses of approximately euro 10 million

Entel Bolivia Group

Held by: Telecom Italia International through ICH/ETI 50.00%

The group operates in the sectors of wireline and mobile telephone services, Internet, data transmission, telex and telegraphy services in Bolivia.
The table shows the economic and operating highlights for 2002, compared to those of 2001:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of bolivianos)	2001 (millions of bolivianos)	Change in bolivianos (%)
Sales and service revenues	186	224	1,260	1,320	(4.5)
Gross operating profit	72	92	489	545	(10.3)
Operating income	2	15	15	91	(83.5)
Number of fixed lines at year-end (thousands)			50	53	
Number of mobile customers at year-end (thousands)			462	368	
Internet customers at year-end (thousands)			15	12	

Activities during 2002:

- Following the deregulation of the market in November 2001, there are now 7 Long Distance and 4 mobile competitors operating in Bolivia, whereas local traffic continues to be operated mainly by pre-existing operators ("cooperativas")
  In this scenario, the operating performance of the group (which formerly held the monopoly for long distance service) shows a significant reduction in revenues from wireline services (-23% in local currency, as a result of lower volumes and price fluctuations) and a decline in profitability (the gross operating profit in local currency was -10% compared to 2001). There was also a reduction in the market share which fell to 87% on long distance service and 71% on international long distance service. Conversely, the mobile sector showed marked growth. Revenues increased by 50% thanks to the dynamics of customers. The company now leads the field with 52% of the market
- During 2002, the group implemented a radical rationalization plan to reduce labor costs (-7%) and investments (-61% compared to 2001), giving priority to the development of GSM technology in keeping with the strategies decided for South America. 2002 also saw the start-up of the xDSL service

Affiliated companies

Telecom Argentina Group

Held by: Telecom Italia and Telecom Italia International through Nortel Inversora 13.97%

The group operates in the sector of fixed and mobile telephone services, data-transmission and Internet-access services in Argentina.
The table shows the key economic and operating highlights:

	2002 (millions of euro)	2001 (millions of euro)	2002 (millions of pesos)	2001 (millions of pesos)	Change in pesos (%)
Sales and service revenues	1,115	3,558	3,940	3,188	23.6
Gross operating profit	672	1,904	2,374	1,705	39.2
Operating income	6	636	21	570	(96.3)
Number of fixed lines at year-end (thousands)			3,295	3,584	
Number of mobile lines at year-end (thousands)			2,725	2,636	
Internet customers at year-end (thousands)			181	247	

The figure for mobile lines at December 31, 2001 includes Nucleo customers.

JJ 00409

Activities during 2002:

- The group is implementing a plan to optimize costs and investments and is making efforts to restructure the debt resulting from the serious crisis prevailing in the country
- The group maintained its leadership in the mobile sector, whereas the development of ADSL services has been slowed down by the weakness in the demand for domestic consumption

In the 2002 financial statements, the value of the investment held by Telecom Italia Group in Nortel Inversora, written off in the consolidated financial statements at December 31, 2001, has remained unchanged.

Furthermore, the Telecom Italia Group, as a result of the Nortel Inversora Shareholders' Meeting on April 25 and September 13, 2002 which gave voting rights in the shareholders' meeting to the savings shareholders and the right to appoint their own representative on the Board of Directors, has reduced its percentage of vote in the shareholders' meeting to 33.89%. The percentage holding of ordinary share capital has remained unchanged at 50%, as well as the economic rights thereto.
Finally, as part of the plan to restructure debt, on February 12, 2003, Telecom Argentina and its subsidiary Telecom Personal announced the intention to launch an offer for a portion of its financial debt for cash and to effect a partial payment of the interest due. The offer will be launched after the necessary approvals are received from the competent regulatory authorities.

JJ 00410

****

In order to present an overall view of **Latin America Operations (LAO)**, the following table shows the key economic and financial highlights of all the companies operating in wireline and mobile telephone services in South America in 2002, compared to those in 2001, restated for the purposes of comparison.

(millions of euro)	2002 (a)	2001 (b)(1)	Change (a - b) amount	Change (a - b) %

(1) Figures restated for the purposes of comparison.

JJ 00411

INTERNET AND MEDIA

- **Sharp increase in profitability, gross operating profit reaches 29.8% of revenues**
- **Revenues gain 1.7% thanks to the positive trend of telephone publishing**
- **Rationalization of activities and focus on core business areas**

THE BUSINESS UNIT

The Internet and Media Business Unit is responsible for the whole chain of value in the media sector, satisfying the public's need for information and entertainment, and the communication requirements of the business sector, through the production of traditional products on paper, and innovative products through the media of Internet, the telephone and television.
In the field of telephone publishing, the group leads the field in Italy and is the second largest telephone publishing group in the United Kingdom with a market share of 14%. In the Internet sector, Seat Pagine Gialle promotes the development of all Internet services for residential customers and for small and medium-size companies: access, portals and web services. In Directory Assistance, the group handles the 89.24.24 Pronto Pagine Gialle 24-hour service in Italy and has a market share of more than 30% in Germany. Furthermore, in Italy, Seat Pagine Gialle is the top company in the marketing of services and products for the office and is present in the television sector with La7 and MTV Italia.

THE STRUCTURE OF THE BUSINESS UNIT

The Business Unit consists of the Seat Pagine Gialle group, which is organized as follows (the table shows the main consolidated companies/areas of consolidated operations):

Seat Pagine Gialle Group					
Directories	**Directory Assistance**	**Internet**	**Office Products & Services**	**Business Information**	**TV and Other**
. Seat Pagine Gialle – Directories Division Italia . TDL Infomedia Group	. Telegate Group . Seat Pagine Gialle – Directory Assistance Division	. Seat Pagine Gialle - Tin.it . Matrix	. Buffetti Group . CIPI	. Consodata Group . Pan-Adress . NetCreations	. Holding Media e Comunicazione Group

MAJOR CORPORATE EVENTS/SCOPE OF CONSOLIDATION

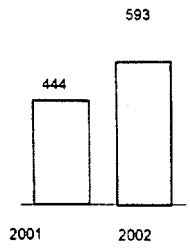
There were no significant changes in the scope of consolidation compared to 2001.
Major corporate transactions during the year comprised the sale of Datahouse (Business Information) and Neoexpo (Directories) and the investments in the affiliated companies Mondus, Viasat and Roncadin. Transactions were also concluded for the rationalization and simplification of the corporate structure, particularly in the TV sector.

ECONOMIC AND FINANCIAL DATA

The table shows the key highlights for 2002, compared to those for 2001.

JJ 00412

Gross operating profit



(millions of euro)	2002 (a)	2001 (b)	Change (a - b) amount	Change (a - b) %
Sales and service revenues	1,991	1,957	34	1.7
Gross operating profit	593	444	149	33.6
% on Revenues	*29.8%*	*22.7%*		
Operating income	232	31	201	°
% on Revenues	*11.7%*	*1.6%*		
Investments:				
. industrial	81	175	(94)	(53.7)
. goodwill	40	203	(163)	(80.3)
Employees at year-end (number)	7,715	9,264	(1,549)	(16.7)

Consolidated *revenues* of the Seat Pagine Gialle group for 2002 showed an increase of 1.7% to euro 1,991 million compared to 2001. The largest contributor to the increase was telephone publishing activities, which rose by 3.4%.

revenues), while *operating income* rose from euro 31 million in 2001 to euro 232 million in 2002. These figures – despite the persisting crisis in the advertising market - are the result of the initiatives launched by management which, in a particularly difficult economic context, concentrated on rationalizing activities, curbing costs and applying selectivity in its initiatives. In particular, during 2002, important improvements in efficiency were achieved in the areas of Internet, Directories and Directory Assistance (which, together, constitute 73% of aggregate revenues). For the first time, all the areas of operations generated a gross operating profit (with the sole exception of Television, where, however, there were lower losses than in 2001).

A more effective capital allocation policy made it possible to reduce *industrial investments* by 53.7% (from euro 175 million in 2001 to euro 81 million in 2002). The reduction of 80.3% in *investments in goodwill* (from euro 203 million in 2001 to euro 40 million in 2002) reflects fewer purchases of consolidated investments effected in 2002.

Rationalization measures led to a reduction in the number of *employees* of 1,549 compared to December 31, 2001, from 9,264 to 7,715.

■ INFORMATION ON OPERATIONS

During 2002, in addition to achieving significant improvements in efficiency, Seat Pagine Gialle strengthened its position on the markets in which it operates thanks to a dynamic sales strategy and to its portfolio of highly acclaimed trademarks. The business of the group was characterized by:

- New definition of internal activities and processes and the introduction of a new commercial group structure;
- Launch of new telephone publishing products on paper and the constant development of on-line products (telephone and Internet) as part of the process of integrating the various media;
- Revision of the range of text products proposed by the Virgilio portal and a more effective use of its search tool by offering outgoing priority and listing on the results of searches (PG Net product);
- Entry of Telegate on the British Directory Assistance market, in collaboration with Thomson;
- Collaboration with Telecom Italia Domestic Wireline for the range of integrated content and services in the Alice ADSL subscription package;
- Collaboration on content between the areas of Internet and Television.

For a description of operations during 2002, please refer to the comments on the parent company Seat Pagine Gialle and its main consolidated companies, presented below.

■ EVENTS SUBSEQUENT TO DECEMBER 31, 2002

- In January 2003, the remaining 34% stake was acquired in Teleprofessional. As a result of this transaction, the company is now 100%-owned by Seat Pagine Gialle.
- On February 12, 2003, Seat Pagine Gialle purchased 1,108,695 ordinary shares of the French subsidiary Consodata S.A. - listed on the Nouveau Marché of the Paris Stock

Exchange - following the sale option exercised by the founding shareholders to which they were entitled on the basis of the agreement signed originally with the previous management of Seat Pagine Gialle on July 31, 2000. As a result of this transaction, after payment of the agreed consideration of euro 44 per share - for a total amount of some euro 48.8 million - Seat Pagine Gialle acquired a further 8.17% stake and voting rights in the company, thus increasing its stake in Consodata S.A. to 98.60%.

■ SEAT PAGINE GIALLE (PARENT COMPANY)

Held by: Telecom Italia 53.21%, TI Finance 2.03%, IT Telecom 0.02%

The company operates in the sectors of telephone publishing and the Internet.
The table shows the economic highlights for 2002, compared to those for 2001.

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	1,152	1,090	5.7
Gross operating profit	545	505	8.0
Operating income	348	285	22.2

Activities during 2002:

Telephone publishing	Pagine Bianche	Introduction of the Pagine Bianche name to replace the old directories
	Pagine Gialle	Launch of graphics restyling and innovations in content
	PG on line	Sharp increase in the customer base (+18%), integration with PG Net, a new product offering listing on the Virgilio search engine
	Tuttocittà	Service supplying maps of Italian cities on-line
Internet	Dial up	Growth of 6.3% in the number of users to 1.8 million despite migration towards ADSL
	ADSL	Extension of the product range, introduction of ADSL based on consumption and marked increase in the customer base (Alice+Tin.it), more than tripled compared to 450,000

■ MAJOR SUBSIDIARIES

TDL Infomedia Group

Held by: Seat Pagine Gialle 99.73%

The group operates in the telephone publishing sector and is the second-largest publisher of directories in the United Kingdom.
The table shows the economic highlights for 2002, compared to those for 2001.

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	154	151.2	1.8
Gross operating profit	52	48.4	8.1
Operating income	20	19	2.1

Activities during 2002:

- 173 Thomson Local editions were published and distributed, the same number as in 2001
- Growth in the customer base of paper editions by 4% to 92,791
- Development of the plan to relaunch the yellow pages activities on line (Thomweb)
- Growth of business information services

Telegate Group

Held by: Seat Pagine Gialle 78.44%

The group operates in the sector of Directory Assistance, mainly in Germany and Italy.
The table shows the key economic highlights for 2002, compared to those for 2001.

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	116	135	(14.4)
Gross operating profit	14	(12)	214.3
Operating loss	(3)	(32)	90.4

Activities during 2002:

- Rationalization of Telegate activities in Germany, given the very difficult market situation
- Start-up of operations in the United Kingdom following deregulation and in collaboration with Thomson

Matrix S.p.A.

Held by: Finanziaria WEB 66.0%, Seat Pagine Gialle 0.7%, NV Vertico 33.3%

The company operates in the Internet sector.
The table shows the key economic highlights for 2002, compared to those for 2001.

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	28	26	7.7
Gross operating loss	(7)	(39)	82.1
Operating loss	(15)	(46)	67.4

Activities during 2002:

- New definition of range of activities and strengthening of the company's competitive position (reach of 63% compared to approximately 61% the prior year)
- Complete review of the text and graphics of the Virgilio portal and the launch of the pay-service Virgilio Più
- Introduction of PG Net (a new service offering outgoing priorities and listing on the Virgilio search tool for a fee) with almost 33 thousand on-line customers after 6 months of activity

Buffetti Group

Held by: Seat Pagine Gialle 100.0%

The group operates in the sector of products and services for the office.
The table shows the key economic highlights for 2002, compared to those for 2001.

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	253	239	5.9
Gross operating profit	11	11	-
Operating income	5	4	25.0

Activities during 2002:

- Repositioning towards products with greater added value, with the introduction of print on demand and the digital signature, development of software and the ADSL subscription plan
- Strengthening of the market position of Cipi (promotional gifts), generating revenues of euro 27 million

Consodata Group

Held by: Seat Pagine Gialle 90.42%

The group operates in the sector of business information in the French market.
The table shows the economic highlights for 2002, compared to those for 2001. (Figures restated for the purposes of comparison):

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	83	82	1.2
Gross operating profit	7	4	75.0
Operating loss	(5)	(13)	61.5

Activities during 2002:

- During the first half of the year a plan was started to rationalize operations and relaunch commercial activities

Holding Media e Comunicazione Group

Held by: Seat Pagine Gialle 100.0%

The group operates in the sector of radio and television broadcasting.
The table shows the key economic highlights for 2002, compared to those for 2001.

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	88	85	3.5
Gross operating loss	(45)	(75)	40.0
Operating loss	(64)	(99)	35.4

Activities during 2002:

JJ 00415

- Repositioning of the television broadcasting channel La7 with new programming and programs starting March 2002, and significant development of MTV Italia
- Consolidation of geographical coverage and the percentage of the population served by the signal distribution network
- Agreement with Cairo Communication to collect advertising business with a guaranteed minimum on channel La7 with effect from 2003
- Collaboration with the Virgilio portal for news

INFORMATION TECHNOLOGY MARKET

- **Action to improve efficiency and reduce the cost of orders in a shrinkage market with falling prices**
- **Relaunching of commercial dealings with all high-profile customers and acquisition of strategic new customers in the sphere of the Public Administration, banks, insurance companies and transport**

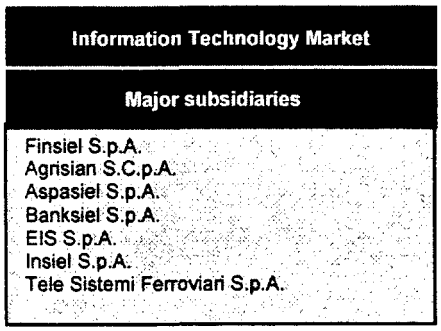
■ INTRODUCTION

The Information Technology Market Business Unit was created in the early months of 2002 with the aim of focusing the activities previously concentrated in the Information Technology Services BU according to the type of customer.
The BU is responsible for organizing the information technology activities of the Group towards the external market, in particular, Central and Local Public Administrations moving towards decentralization and e-government, as well as banks, insurance companies and industry. Its product range covers the whole chain of value of information services. The IT Market BU creates solutions and services around platforms and products of the main market vendors. Customers' problems are solved in one of three possible ways: by acquiring existing solutions on the market, developing special solutions, or by integrating components offered by Finsiel with typical market platforms (including Microsoft, SAP and Oracle).

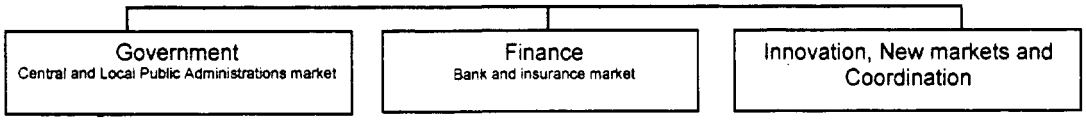
The year 2002 was marked by growth in the IT services market on a global scale, although growth was more restrained and tended to contract more compared to the prior year. The negative economic situation and the stagnation of the IT market, which affected all operators, and the acquisition of new orders and new customers at lower prices than in the past, obliged companies in the Finsiel group to adopt far-reaching measures to reduce costs and improve efficiency.

■ THE STRUCTURE OF THE BUSINESS UNIT

The Business Unit, which is represented by the Finsiel group, is organized as follows:



On October 22, 2002 a new organizational structure became operational in the IT Market BU, organized according to the following functions which have the task of guaranteeing activities relating to the design, development, operation and marketing of IT products/solutions for each respective reference market:



■ MAJOR CORPORATE EVENTS/SCOPE OF CONSOLIDATION

The following major corporate events and changes in the scope of consolidation took place during the year:

- Sale, in February 2002, of the investment in Lottomatica (18.33%) by Finsiel to Tyche S.p.A., through the tender of its shares in the tender offer.
- Creation, in May 2002, of Sogei Servizi Innovativi and Tecnologici S.p.A. (Sogei 51% and Finsiel 49%). The business purposes of these companies is to obtain and realize initiatives geared to the operation and development of businesses connected with Information Communication Technology (ICT) in the fiscal sector. Furthermore, on July 25, 2002, the company voted a capital increase to be paid partly in cash and partly in kind. The cash

increase was subscribed to by Finsiel while the increase in kind was carried out by Sogei by contribution of its "ETI" business segment. Sogei IT, as a result of the sale of Sogei S.p.A., became an affiliated company and is valued using the equity method.

- Sale, in June 2002, of the investments held by Finsiel in Netikos (75%), Netsiel (31.35% and Telesoft (40%) to IT Telecom.
- On July 10, 2002, Finsiel sold the investment (40.41%) in the affiliated company Informatica Trentina to Deda S.r.l.. The transfer of the shares took place on November 21, 2002.
- On July 31, 2002, Finsiel sold 100% of the share capital of Sogei to the Ministry of Economy and Finance – Department of Fiscal Policy, with the relative transfer of the shares. For purposes of the consolidation of the ITM Business Unit, Sogei's statement of income was consolidated up to June 30, 2002.
- On August 2, 2002, the company AGRISIAN - Consulenza e Servizi per l'Agricoltura S.C.p.A., was set up; Finsiel has a 50.86% stake. The company administers a five-year contract with the Ministry for Agriculture and Forestry Policy also on behalf of AGEA (Agency for Agriculture Disbursements). The company was consolidated from the month of August.
- On August 2, 2002, Finsiel signed a contract for the sale of 100% of the capital of Consiel to World Investment Partners S.A. The company was deconsolidated beginning September 1, 2002, while the transfer of shares took place on October 3, 2002.

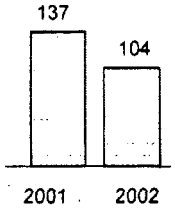
■ ECONOMIC AND FINANCIAL DATA

The table shows the key highlights for 2002, compared to those for 2001, restated for the purposes of comparison.

(millions of euro)	2002 (a)	2001 (b)(1)	2001	Change (a - b) amount	Change (a - b) %
Sales and service revenues	912	960	1,198	(48)	*(5.0)*
Gross operating profit	104	137	166	(33)	*(24.1)*
% on Revenues	*11.4%*	*14.3%*	*13.9%*		
Operating income	62	100	123	(39)	*(39.0)*
% on Revenues	*6.8%*	*10.4%*	*10.3%*		
Investments:					
. industrial	30	28	30	2	*7.1*
. goodwill		1	1	(1)	*(100.0)*
Employees at year-end (number)	4,495	4,810	6,441	(317)	*(6.6)*

(1) Restated for the purposes of comparison. Note that Sogei is included in the scope of consolidation for only the first six months of 2001 and Consiel for only the first eight months of 2001.

Gross operating profit



Sales and service revenues, in 2002, decreased by euro 48 million compared to the prior year which was restated for purposes of comparison. A contributory factor to the decrease was a contraction in the revenues of Finsiel, Consiel and Banksiel, resulting from both lower volumes and a reduction in prices with the most important customers. This was offset by an increase in the operations of Intersiel and Insiel both for core customers and as a result of the acquisition of new customers in the Local Public Administration market.

The profitability of the IT Market BU, both in terms of the *gross operating profit* and the *operating income*, decreased as a result of the already-mentioned reduction of prices on some contracts which were renewed during the year, and the new bids won with lower contract prices, that were only partly offset by cost cuts and improved levels of efficiency. The reduction can mainly be attributed to the lower profit margins of Finsiel, Consiel and Tele Sistemi Ferroviari on outsourcing activities for companies in the Ferrovie group.

Industrial investments were much in line with those in the prior year.

The number of *employees* of the IT Market BU fell by 317 compared to the figure at December 31, 2001, adjusted for the purposes of comparison, and can mainly be attributed to Finsiel. The reduction was the result, on the one hand, of the sale by Finsiel of the "Personnel Administration" business segment to Tess S.p.A., and, on the other, to rationalization activities and measures aimed to improve efficiency.

JJ 00418

■ INFORMATION ON OPERATIONS

During 2002, the range of services was rationalized through an organization focusing on the vertical markets (government, finance and enterprises).

Numerous contracts were acquired, including the following:

- **Finsiel** stepped up its collaboration with Inps by winning the bid for new e-service services, with Consip for the document system of the Ministry of Economy and Finance and for the public employment information system. Collaboration continued with MIFAP to create the new National Agricultural Information System and with the Ministry of the Interior on the electronic identity card; at the end of 2002 Emilia Romagna and the Veneto were added to the list of customers in the field of local health services.
- **Insiel** devoted itself to new e-government initiatives: electronic personal Health Records, which can also be consulted via Internet; a system of health-care administration, based on an epidemiological and economic datawarehouse; regional CUP; a regional Coordination and Compensation Center for the Blood Plan; completion of the Territorial and Hospital Information System.
- **Banksiel**, the leading Italian company specializing in IT solutions and services for finance, has supervised the migration of information systems of banks involved in processes of combining or merging with other banks, such as Sanpaolo IMI, Banca Antoniana Popolare Veneta and Banca Popolare di Milano; it has acquired the first important customer in the sphere of insurance (Cattolica group); it has created innovative projects in the area of derivatives (Cassa Risparmio di Firenze) and Wealth Management for Monte dei Paschi di Siena.
- **Tele Sistemi Ferroviari**, the technological partner of the companies of the Ferrovie dello Stato group, has stepped up its presence in local public transport with projects that are highly innovative from a technological point of view; in 2002 the company won three bids for electronic ticketing systems for CIVA (the consortium of companies providing transport in the Province of Varese), ASM of Pavia and the Autonomous Province of Trento. It was also involved in numerous activities for the Italian national rail network, including the electronic system for managing investment projects on the SAP platform, the start of the Traffic Information Platform for planning and operating the rail network; the extension and integration of traffic control and public information systems and development over new companies in the FS group (Centostazioni).

■ EVENTS SUBSEQUENT TO DECEMBER 31, 2002

- Finsiel with RTI was awarded the bid to develop and operate the new **Ministry of Education Information System** in full outsourcing for five years. The group will create an information system which will be disseminated to teachers, families and students who will be able to interact with the system wherever they are, at school or at home.
- The bid was won for the creation of an **Information System for Social Services and Health Care** and a **Regional Services Card for the Lombardy Region**, under a seven-year contract, which involves the design of a network incorporating all the facilities and operators of health care and social services, as well as new services which the public can access through a Regional Health Care Card;
- Still in the field of health care, the Ministry of Health has entrusted Finsiel with the operation of the information system of the **National Transplant Center**, which Finsiel has been involved in developing over the last three years;
- The bid was awarded for the whole project to create the **portal for Italy's six-month Presidency of the European Union.**
- In mid-January, Finsiel and Oracle Italia (a subsidiary of Oracle Corporation, a world leader in creating software for businesses) signed **an agreement to use and develop vertical applications on the innovative Oracle HTB** (Healthcare Transaction Based) **platform**. Finsiel aims to use the HTB platform for designing new solutions for information systems of clinics and hospitals, and intends to develop approximately 60 specialized resources using Oracle technologies.

JJ 00419

■ MAJOR SUBSIDIARIES

Finsiel S.p.A.

Held by: Telecom Italia 77.92%

The company supplies systems integration and Internet services for the Public Administration and large businesses.
The table shows the key economic highlights for 2002, compared to those for 2001:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	244	296	(17.6)
Gross operating profit	3	24	(87.5)
Operating income (loss)	(14)	16	°

Activities during 2002:

- There was a reduction in sales and service revenues in 2002, leading to a contraction of profitability indicators. This can almost exclusively be attributed to a revision of the prices applied to important customers and to the acquisition of new orders at lower prices
- The award of numerous bids and the renewal of some important contracts
- The start of initiatives geared to considerably improving the level of efficiency, by taking measures to reduce purchase costs and improve performance through a review of the organizational structure

Banksiel S.p.A.

Held by: Finsiel 55.5%

The company is the leading Italian company in information technology for banking and finance.
The table shows the key economic highlights for 2002, compared to those for 2001:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	114	118	(3.4)
Gross operating profit	17	16	6.3
Operating income	15	11	36.4

Activities during 2002:

- Consolidation of its market share in the sphere of banking and finance through the rationalization of its range of services
- Start of a service directed at insurance companies, and acquisition of the first important customer in this new market (Cattolica Assicurazioni group)
- New organization with the aim of improving the level of efficiency and capacity to follow its clientele effectively

Insiel S.p.A.

Held by: Finsiel 52.0%

Insiel is the leading company in Italy for solutions and information services for local Public Administrations.
The table shows the key economic highlights for 2002, compared to those for 2001:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	84	81	3.7
Gross operating profit	18	17	5.9
Operating income	12	11	9.1

Activities during 2002:

- Acquisition of new contracts in the sphere of the Public Administration and Health Care Services, including the electronic identity card project for the Bolzano City Council, the Territorial Information System for Friuli-Venezia Giulia, virtual Records and, in the field of health care, the development of an information system for the administration and operation of health-care services in Friuli-Venezia Giulia, Health Care Records and the citizens Card

JJ 00420

Tele Sistemi Ferroviari S.p.A.

Held by: Finsiel 61.0%

The company specializes in the sector of transport and logistics and is a partner of the Italian national railways, the Ferrovie dello Stato group.

The table shows the key economic highlights for 2002, compared to those for 2001:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	156	157	(1.3)
Gross operating profit	30	35	(14.3)
Operating income	20	28	(28.6)

Activities during 2002:

- Renewal of the ten-year outsourcing contract for the period 2002-2006 for ICT services for the companies of the Ferrovie dello Stato group, with lower contract payments, obliging the company to achieve higher levels of efficiency in order to maintain its levels of profitability;
- Development and innovation of its range of products with the acquisition of important customers in the local public transport sector and new companies in the Ferrovie dello Stato group (Centostazioni)

JJ 00421

INFORMATION TECHNOLOGY GROUP

- **Creation of a new Operating Activity directed towards Group services**

THE OPERATING ACTIVITY

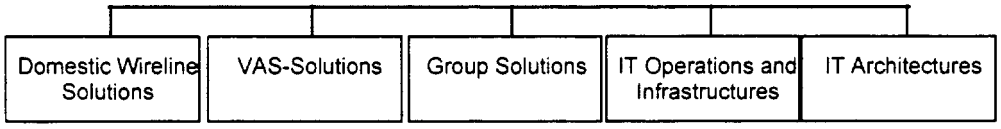
The Information Technology Group Operating Activity was created in the early months of 2002 as a result of rationalizing the activities previously included in the Information Technology Services BU. It also incorporates operations of the TILAB group [1].

The unit is responsible for organizing technological innovation and service information technology activities within the Telecom Italia Group, pursuing objectives that will augment efficiency, improve quality and stimulate innovation.

THE STRUCTURE OF THE OPERATING ACTIVITY

The Operating Activity is responsible for the companies dedicated to the Group's information systems within the framework of the plan to integrate the various companies involved.

The Operating Activity is organized as follows:



The new operating activity is organized into five production divisions:

Domestic Wireline Solutions – design and development of systems, solutions and IT applications required to oversee the Domestic Wireline business of Telecom Italia;

VAS Solutions – basic systems integrator and technological support in the evolution of innovative services for the Telecom Italia Group;

Group Solutions – design and development of systems, solutions, and IT applications required to monitor the transversal processes of the Business Units and support activities for the information systems of the Mobile Business Unit;

IT Operations and Infrastructures – creation of the IT infrastructures required for running systems, Group applications and the delivery of investment-based services for the market;

IT Architectures – design and creation of applications and infrastructure architectures, ensuring their creation and standardization.

MAJOR CORPORATE EVENTS/SCOPE OF CONSOLIDATION

The following major corporate events and changes in the scope of consolidation took place during the year:

- On December 2, 2002, the following companies were merged by absorption in IT Telecom S.p.A. effective January 1, 2002 for accounting and tax purposes: Netsiel S.p.A., Saritel S.p.A., Sodalia S.p.A. and Telesoft S.p.A.. The transactions previously entered into in order to the execute the mergers were the following:
  - contribution by Telecom Italia S.p.A. to IT Telecom S.p.A. of the holdings in Netsiel S.p.A.

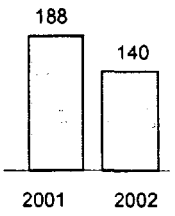
[1] With effect from October 2002, the TILab Group came under the direct control of the Managing Director of Telecom Italia, Carlo Buora.

(68.65%), in Saritel S.p.A. (100%), in Sodalia S.p.A. (100%) and in Telesoft S.p.A. (60%);
  - purchase by IT Telecom S.p.A. of the holdings held by Finsiel S.p.A. in Netikos S.p.A. (75%), in Netsiel S.p.A. (31.35%) and in Telesoft S.p.A. (40%).
- purchase by IT Telecom S.p.A., at the end of June, of the 50% stake in Webegg S.p.A. held by Olivetti S.p.A.; Webegg S.p.A. is now 69.8% controlled. The Webegg group was consolidated beginning July 1, 2002.
- Teco Soft España (100%-controlled by Telesoft S.p.A.) was sold on July 31, 2002 after the Telecom Italia group disbanded operations in Spain following the sale of Auna.

■ ECONOMIC AND FINANCIAL DATA

The table shows the key highlights for 2002, compared to those for 2001, restated for the purposes of comparison.

Gross operating profit



(millions of euro)	2002 (a)	2001 (b)	Change (a - b) amount	Change (a - b) %
Sales and service revenues	1,215	1,198	17	1.4
Gross operating profit	140	188	(48)	(25.5)
% on Revenues	*11.5%*	*15.7%*		
Operating income	(21)	22	(43)	°
% on Revenues	*(1.7%)*	*1.8%*		
Investments:				
. industrial	158	162	(4)	(2.5)
. goodwill	28	6	22	°
Employees at year-end (number)	7,327	6,844	483	7.1

Consolidated *revenues* remained fairly stable and were affected by the fall in prices.
Gross operating profit and *operating income* were also affected by the fall in prices and showed a reduction compared to 2001.
Industrial investments are much in line with those of 2001. *Investments in goodwill* in 2002 refers to the acquisition of the majority stake in Webegg.
The number of *employees* increased as a result of the change in the scope of consolidation, and was particularly affected by the acquisition of the Webegg group (+701 at December 31, 2002, and +719 at June 30,2002).

■ INFORMATION ON OPERATIONS

2002 was marked by the completion of the merger plan for absorption of Netsiel, Saritel, Sodalia and Telesoft by IT Telecom S.p.A., within the framework of a broader reorganization of the investments of the Telecom Italia Group, with the aim of significantly streamlining the decision-making and control chain of the Information Technology segment, in order to achieve single operations, business and organization in a unitary stand for captive TLC supplying and group factories.
In 2002 it proved possible to focus the Business Unit on its core business, TLC, ensuring the development and application of the solutions needed for the functioning of the business and the monitoring of the technological innovation of the information systems as drivers for the development of Telecom Italia.

During the year, operations were marked by a series of initiatives geared to the following objectives:
- increasing efficiency and improving performance;
- reducing the disparate architecture and infrastructure solutions, with obvious economies of scale, strengthening the operational tool and making the best possible use of existing specific professional skills.

JJ 00423

■ EVENTS SUBSEQUENT TO DECEMBER 31, 2002

These transactions are described in the section "Significant events":

- following the Extraordinary Shareholders' Meetings of TILAB S.p.A. and Telecom Italia, held on December 12, 2002 and December 13, 2002 respectively, TILAB S.p.A. will be merged by absorption in Telecom Italia S.p.A. The merger of Tilab and Telecom Italia is scheduled for March 2003, with effect from January 1, 2003;
- On January 27, 2003, as decided by the Board of Directors on December 19, 2002, IT Telecom acquired the real estate complex in Pomezia (Rome) S.S. 148 Pontina Km. 29,100, by paying off the lease contract with Teleleasing S.p.A. before the expiration date. The purchase price was euro 32.6 million.
- On February 21, 2003, Telecom Italia signed an outsourcing agreement with Hewlett Packard to supply asset management, help desk and maintenance and administration operations regarding 90,000 workstations. The contract, which will last for five years, will draw upon the skills of about 600 IT Telecom specialists who will be transferred to a new HP entity specialized in these services. The strategic importance of this agreement, which is worth euro 255 million and will become binding and operational once consultations have been completed with the unions and a go-ahead has been received from the Italian Antitrust Authority, will generate significant savings in the management of the distributed environment and will lead to a greater focus of the resources on Telecom Italia's core business.

■ MAJOR SUBSIDIARIES

IT Telecom S.p.A.

Held by: Telecom Italia 100.0%

The table shows the key economic highlights for 2002, compared to those for 2001:

(millions of euro)	2002	2001 (1)	Change (%)
Sales and service revenues	974	967	0.7
Gross operating profit	114	198	(42.4)
Operating income (loss)	(13)	56	°

(1) Proforma figures

Activities during 2002:

Revenues remained virtually unchanged despite being negatively influenced by the redefinition of commercial dealings with the Domestic Wireline BU, which led to a significant reduction in prices both for IT Operations and Infrastructures, and for Domestic Wireline Solutions. This phenomenon, associated with an increase in labor costs and an increase in the consumption of raw materials and external services, led to a reduction in the gross operating profit and an operating loss.

Webegg Group

Held by: IT Telecom 69.8%, Finsiel 30.2%

The Webegg group operates in many different spheres with a network of international partners that aims its business at positioning companies on the Internet.

The group operates mainly as a supplier of CRM systems, particularly for Telecom Italia Mobile and for third-party customers, especially Software Factory, exclusively in the banking and insurance sector.

The table shows the key economic highlights for 2002, compared to those for 2001:

(millions of euro)	2002 (*)	2001 (*)	Change (%)
Sales and service revenues	80	92	(13.0)
Gross operating profit	8	13	(38.5)
Operating income	2	7	(71.4)

(*) In 2001, the Webegg group was not consolidated in the Telecom Italia Group, whereas, in 2002, the Webegg group was included in the scope of consolidation with effect from July 1, 2002

JJ 00424

Activities during 2002:
Revenues showed a marked reduction, particularly in the area of Web and Internet applications owing to the performance of the reference market. Despite this, thanks to constant efforts to improve corporate efficiency, it proved possible to maintain positive profit margins. Personnel costs were the target of a far-reaching and incisive cost-saving policy, through outplacements in the areas of business which had reported the highest decline in operations.

NETikos Group

Held by: IT Telecom 100.0%

The NETikos group was founded by Telecom Italia to respond to the growing need for Internet and wireless solutions, with the aim of being a "one-stop-shop partner" that would satisfy every need with regard to Mobile Internet in such a way that would enable companies, institutions and final users to be permanently on-line and to obtain better results by using wireless applications.

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	21	17	23.5
Gross operating profit	2	2	-
Operating profit	0	1	°

Activities during 2002:
The NETikos group suffered from the uncertainty prevailing on the market and from the postponement of important projects by its main customers, although, during the second half of the year there was a considerable improvement in revenues and a substantial growth of international activities through the affiliated company NETikos Finland, especially in the area of Wireless Lab.

TILAB Group

Held by: Telecom Italia 100.0%

The TILAB group identifies and manages innovative initiatives, creating new business opportunities both for companies within the Group and for the external market.
The table shows the key economic highlights for 2002, compared to those for 2001:

(millions of euro)	2002	2001	Change (%)
Sales and service revenues	166	134	23.9
Gross operating profit (loss)	31	(14)	°
Operating income (loss)	7	(34)	°

Activities during 2002:
Operations which focused on R&D, and which also involved collaboration with Pirelli Lab concerned the following projects:
- study of enabling techniques in mobile and wireless sectors
- definition of network design, planning and management tools
- definition and testing of local access techniques
- development of solutions, architectures and products integrated in silicon
- development of modular products, created in software and able to be transformed into firmware for specific solutions or hardware components
- implementation of interactive TV services

00425

There follows a description of the most significant activities of TILAB in 2002:

- completion of the first phase of the "Network Development" project to support the Group in making strategic decisions about the evolution of the network;
- testing in the field of the localization platform, in collaboration with TIM;
- completion of the economic evaluation of a business disaster recovery service with a "storage" services center operated through fiber-optic connections;
- definition of a new release of equipment for interconnecting GSM and the Internet operating with the UCP (Universal Communication Protocol) Gateway protocol, so that SMS text messages on mobile networks can be interchanged in a Web environment;
- creation of content protection functions within the framework of the Easy Video streaming platform, based on multimedia techniques developed by TILAB for the mobile network;
- creation of the "Video Intervention" service based on video communication technologies on the Internet used for TV programming (for example, the program "Processo del lunedì");
- definition of new cost models for the broadband access network;
- definition of the functional specifications of the virtual ADSL platform to design Systems Intellectual Properties on Chips;
- testing of a prototype of a cryogenic filter to increase the efficiency of the base stations of the mobile network, in collaboration with Pirelli Labs;
- creation of an updated version of the prototype of an emulator of the UMTS network in order to assess the impact of the quality of service on Internet multimedia applications;
- creation of the specification and prototype of some OSA-Parlay components for a network intelligence architecture with standard open interfaces for the introduction of new services;
- testing on the DW and TIM networks of the StarSip platform for the delivery of integrated voice – data services on the network;
- integration of data network backbone functions on the OPB infrastructure and OPB-BBN (national backbone) cross-work;
- definition and creation of wholesale services directed at OLO and ISP customers;
- testing of the interactive TV service within TV broadcasts (LA7);
- evolution of the Mobile Amico instant messaging system used in TIM@Cafè;
- download&play and videostreaming services on a mobile terminal;
- preparation and inauguration of the "Exhibition on the Future of Telecommunications" at the Future Centre in Venice.

J 00426

OTHER ACTIVITIES

The "Other Activities" of the Telecom Italia Group are principally constituted by the "Real Estate and General Services" Operating Activity, by the companies formerly in ex-International Operations which, following the reorganization of international activities, were transferred to the Foreign Holdings Function, by the Telespazio BU, by subsidiaries which supply support activities to the Group and by the affiliated company Stream.

■ REAL ESTATE AND GENERAL SERVICES

In addition to leveraging the net asset value of the Group, up to December 31, 2002, the "Real Estate and General Services" Function constituted an interface for the various corporate Functions/Business Units in order to satisfy the needs of the real estate and general services area. In particular, the activity operated by the Real Estate and General Services Function concerns the planning of the sites and locations of the Group, the design and construction of civil works, the maintenance of the properties and technological plant, in addition to providing real estate and general services.
The Function operates through the internal structures of Telecom Italia S.p.A. – mainly for the activities conducted on behalf of the Telecom Italia BU/Functions - and through the subsidiary Emsa Servizi S.p.A., which, for the most part, gears its activities towards the other companies in the Group.

In February 2003 the Real Estate and General Services Operating Activity was disbanded; its activities and resources were reassigned to other corporate functions of the Group.

The following table shows the key highlights for 2002, compared to those for 2001, restated for purposes of comparison. The figures take into account the exchanges between the Real Estate and General Services operating activity and the other functions of Telecom Italia S.p.A.

(millions of euro)	2002 (a)	2001 (b)	Change (a - b) amount	Change (a - b) %
Sales and service revenues	846	953	(107)	(11.2)
Operating costs	(758)	(809)	51	6.3
Gross operating profit	88	145	(57)	(39.3)
% on Revenues	*10.4%*	*15.2%*		
Operating loss	(92)	(65)	(27)	(41.5)

In 2002, *sales and service revenues* decreased by euro 107 million to euro 846 million compared to the prior year. The reduction can be attributed mainly to a reduction of revenues from other corporate BU/Functions resulting both from the continuation of the policy of rationalizing the space occupied, and to the process of bringing prices into line with the best market terms. Operating costs benefited from a reduction of euro 51 million compared to 2001, following efforts to curb expenditures for materials and external services and from the reduction in labor costs following a marked cutback in the workforce during the year; these effects partially compensated the above-mentioned reduction in revenues, thus attenuating the decline in the *gross operating profit* compared to the prior year .
The *operating loss*, which includes amortization and depreciation, provisions to the reserves for risks and charges and various expenses that are mainly in reference to property taxes, amounted to euro 92 million (-euro 65 million in 2001).

With reference to the core activities of the Function aimed at leveraging the value of the Group's real estate assets, during 2002 some important new extraordinary transactions were completed, and are described below.

Tiglio project
Following the framework agreement signed May 2002 between the Pirelli, Olivetti-Telecom Italia Groups and The Morgan Stanley Real Estate Funds for the integration of the relative real estate properties as well as the entities that provide real estate services to the same companies or to their subsidiaries, in the second half of 2002, the transactions were finalized for the concentration of the assets in the two new vehicles companies set up for this purpose (Tiglio I and Tiglio II). Such

00427

concentration is functional to specific development actions to be started in the real estate market in 2003, including the possibility of a contribution of the properties to real estate investment funds. Among the preliminary transactions for the concentration of the real estate assets in Tiglio I and Tiglio II, on October 24, 2002, the non-proportional partial spin-off IM.SER (60% Beni Stabili and 40% Telecom Italia) was effected by which the relative real estate assets were contributed to the company IMSER 60 (98% Beni Stabili group and 2% Telecom Italia) and to the company EMSA Immobiliare (100% controlled by Telecom Italia) in proportion to the stakes held in IM.SER, respectively, by Beni Stabili and Telecom Italia. Following this transaction, which came after the positive conclusion of the securitization of IMSER 60's debt, and also to the effect of certain fixed asset acquisitions by companies in the Seat Pagine Gialle group, EMSA Immobiliare had a conspicuous portfolio constituted by a total 169 real estate properties
On October 29, 2002, having met all the preliminary conditions for the deal, a series of acts were therefore finalized whereby the first stage of the Progetto Tiglio was concluded which, for Telecom Italia regarded:

- the subscription, simultaneously with all the other participants in the initiative, to a capital increase by Tiglio I for cash, with the consequent stake in the company equaling 36.85% (in addition, at Telecom Italia Group level, to the 2.1% subscribed to by Seat Pagine Gialle), in proportion to the value of the assets transferred by Telecom Italia (and by Seat Pagine Gialle) to Tiglio I to the total assets that were taken over by the latter company;
- the subscription to a capital increase by Tiglio II paid for in kind by the contribution of its "Asset Management" business segment with the consequent stake in the company equaling 49.47%;
- the sale of the investment in EMSA Immobiliare to OMS2 (100% controlled by Tiglio I);
- the sale – directly and through the subsidiary Saiat – of the investment in Telimm S.r.l. to the company MSMC Immobiliare Holding (entirely controlled by Tiglio I).

With reference to the part of the Progetto Tiglio regarding the optimization of the service activities, in November, Telecom Italia sold the "Property Management", "Project Management" and "Agency" business segments to the Pirelli & C. Real Estate group.

These transactions gave rise to a total gross economic impact (gross gain and extraordinary dividend) for the Parent Company, Telecom Italia of euro 229 million. The impact for the Telecom Italia Group was euro 234 million.

Finally, as agreed between the parties, December 24, 2002 marked the completion of the merger by absorption, in Tiglio I and Tiglio II, of the real estate investment holdings owned by them – falling under Progetto Tiglio and already 100% controlled, directly or indirectly – so that the corporate structure of the two subjects could be optimized, in view of the successive actions to leverage the assets on the market.

Sale of IMMSI
On November 22, 2002, Telecom Italia sold its stake in IMMSI to the company Omniapartecipazioni. The sales price was euro 68 million, with a gross gain of 51 million for the Parent Company and euro 1 million for the Group.

Sale of Telemaco Immobiliare
On December 20, 2002, the final price was fixed for the sale, which took place in July, of Telecom Italia's investment in Telemaco Immobiliare to the company Mirtus.
The net proceeds were euro 192 million for the Telecom Italia Group with a gross gain of euro 134 million for the Parent Company, Telecom Italia, and euro 110 million for the Group.
On October 31, 2002, Telemaco Immobiliare exercised a put option on 28 real estate properties owned by Telegono (a company which is held 40% by Telecom Italia, 45% by the Beni Stabili group and 15% by Lehman Brothers, analogously to the original shareholder base of Telemaco Immobiliare) based on agreements formalized in July 2002 between Mirtus and the three sellers of the company. For purposes of the acquisition of such assets, Telegono signed a loan agreement that will be extinguished partly by the consideration from the sale in progress of such properties.

Ortensia project
On December 24, 2002, Telecom Italia and the other shareholders of Tiglio I (MSMC Italy Holding BV, Olivetti, Seat Pagine Gialle and Pirelli) and Tiglio II (POPOY Holding B.V.) formalized a binding agreement with the company Marzotto – which became executive on March 4, 2003 – to set up a common vehicle company for the land owned by Tiglio I and Tiglio II together with the portfolio of areas owned, directly and indirectly, by Marzotto. The agreement calls for the deal to be finalized in 2003 through the spin-off of the land owned by Tiglio I and Tiglio II and other assets and liabilities related thereto to a company in which Marzotto, at the end of December 2002, on the

basis of formalized agreements, had contributed a business segment inclusive of the land earmarked for the initiative. Given the valuation of the assets available at this time, it is expected that, when the spin-offs are completed, Telecom Italia will hold about a 28% stake in the company (in addition, at Group level, of the 1% stake that will be held by Seat Pagine Gialle).

Events subsequent to December 31, 2002

On January 27, 2003, the procedures were completed for the early purchase of 12 property units (for about 300,000 square meters) from Teleleasing S.p.A. that are used by Telecom Italia S.p.A. and other Group companies under financial leasing contracts. The deal involved a total financial payment of some euro 369 million for the entire Group.

JJ 00429

■ FOREIGN HOLDINGS

The corporate function Foreign Holdings, operating under the corporate control structure, heads up the companies Telecom Italia International, 9Telecom group (consolidated up to June 30, 2002), the BBNed group, the Telekom Austria group, Telekom Srbija, Etec S.A. and Netco Redes. The function ensures the coordination, leveraging and rationalization of the foreign holdings held by Telecom Italia operating in the fixed and integrated fixed-mobile TLC business.

The table shows the key highlights for 2002, compared to those for 2001, restated for the purposes of comparison.

(millions of euro)	2002	2001
Sales and service revenues	214	292
Gross operating loss	(49)	(149)

The above data refers to the BBNed group and Telecom Italia International and the 9 Telecom group, consolidated line-by-line for the first six months of 2002 only since they were sold in August 2002, as described below. The two years are therefore not comparable.

As far as the principal corporate transactions are concerned, the following can be said:

- on August 1, 2002, the Telecom Italia group finalized the sale of the investment in Auna and Multimedia Cable to Endesa, Union Fenosa and Banco Santander Central Hispano, realizing a total consolidated gross gain of euro 1,245 million, including the stake sold through TIM International.
- On August 26, 2002, the French group 9Telecom was sold to LDCom with the simultaneous purchase on the part of Telecom Italia International of a 7.22% stake in LDCom (euro 172 million). At December 31, 2002, the stake was reduced to 6.99% after the company effected a reserved capital increase in November. In the 2002 financial statements, the Telecom Italia Group adjusted the carrying value to euro 51 million.
- Telecom Italia International, following the agreement reached in June with OIAG, in the month of November, sold 75,000,000 Telekom Austria shares at a price of euro 7.45 per share, reducing its investment from 29.78% to 14.78%. The transaction resulted in gross proceeds of euro 559 million with a loss of euro 135 million. The carrying value of the investment in the 2002 financial statements is in line with market value; the residual holding is gradually being sold.
- On December 28, 2002, the Telecom Italia Group announced that it had reached an agreement for the sale of its 29% stake in Telekom Srbija to PTT Srbija. The agreement for the sale was finalized on February 20, 2003 and the closing is scheduled to take place by the end of June.
  PTT will pay euro 195 million, 120 million of which will be paid in four installments beginning February 2003. The remaining amount will be paid in six semi-annual installments beginning January 2006. The shares sold will be deposited with an international bank until full payment of the price.

Finally, as regards the investment in Netco Redes (Spain), the carrying value of the investment was adjusted to market value as at December 31, 2002, with an impact on the consolidated financial statements of the Telecom Italia Group of euro 96 million.

JJ 00430

■ TELESPAZIO

In 2002, the Telespazio Business Unit included the Telespazio group, sold in November 2002 and with only the statement of income consolidated up to September 30, 2002, and the "Satellite Telecommunications" business segment of Telecom Italia.

The following table shows the key highlights of the Telespazio Group (included in the scope of consolidation until September 30, 2002) and the Satellite Telecommunications business segment of Telecom Italia, compared to the whole of 2001, which included the effects of the interruption of the Astrolink initiative.

(millions of euro)	2002	2001
Sales and service revenues	237	648
Gross operating profit	12	159
Operating income (loss)	(6)	60

■ OTHER SUBSIDIARIES

Telecom Italia Finance S.A.

Held by: Telecom Italia 100.00%

Under the reorganization of the Telecom Italia Group companies in Luxembourg, in October 2002, Sogerim S.A. was absorbed by its sole shareholder Softe S.A., and Huit II was absorbed by its sole shareholder TI Media S.A..
On December 16, 2002, Softe S.A. incorporated TI Media S.A. and the new company was merged with TI WEB S.A., which, on the same date, changed its name to Telecom Italia Finance. The financial statements used in the merger were those as at October 31, 2002.
Following the merger, beginning November 1, 2002, TI Finance took over responsibility of the international treasury function operating in support of the financial needs of the foreign companies of the Telecom Italia Group, a task previously carried out by Softe.

From an economic standpoint, TI Finance's financial statements for the year ended December 31, 2002 include the former TI WEB, and beginning November 1, 2002, Softe and TI Media. Therefore, a comparison with the corresponding prior year's figures would not be meaningful.

The company ended the year 2002 with a loss of euro 85 million, due principally to writedowns for euro 80 million. The writedowns specifically refer to euro 24 million for the adjustment of third-party bonds in portfolio to market price, euro 56 million for the adjustment of investments to market value and the adjustment of the investment in GLB Serviçoes Interativos S.A. (Globo.com). to the sales price.

Saiat S.p.A.

Held by: Telecom Italia 100.00%

The company carries out support services for the Parent Company, Telecom Italia, in the financial area and in investment management.
In 2002, in particular, the company continued to provide services under the program for the securitization of Telecom Italia trade accounts receivable. Under the "Progetto Tiglio", the company sold its interest (99.42%) in TELIMM to MSMC Immobiliare and, as part of the reorganization of the Luxembourg companies of the Group, sold its stakes in Softe (0.01%) and Sogerim (0.05%).

JJ 00431

TI Learning Services S.p.A.

Held by: Telecom Italia 100.00%

The company operates in the sector of training with the aim of achieving a leadership position in the market of Learning & Knowledge Management. Thanks to the technologies at its disposal and the experience gained in this field, the company is able to design complex and customized training systems that can be used by large numbers of people. Its product range includes more than 1,000 courses for continuous training, particularly on topics associated with ICT and Business Management.

At December 31, 2002 the conferral of the "Training" business segment of Telecom Italia was completed, concluding the project to rationalize the companies of Telecom Italia operating in the field of traditional and web-based training approved by the Board of Directors of Telecom Italia on December 18, 2001. The following table shows the key highlights for 2002, compared to those for 2001:

(millions of euro)		2001	Change (%)
Sales and service revenues	41	23	78.3
Gross operating profit	3	4	(25.0)
Operating income	-	2	-

Activities during 2002:

- Strengthening of commercial action, on internal and external markets, regarding the services industry and the Public Administration, as well as participation in bids for training with financial backing
- Harmonization of production, rationalization and cost-cutting processes

■ OTHER AFFILIATED COMPANIES

STREAM S.p.A.

Held by: Telecom Italia 50.00%

On October 1, 2002, Telecom Italia reached an agreement with News Corporation over the creation of a single Italian pay-TV company (single platform) born of the integration Stream and Tele+. Under this agreement, Telecom Italia will hold a 19.9% stake in the single platform and News Corporation the remaining 80.1% stake.

Telecom Italia, at the closing, will pay a price of euro 31.84 million for the 19.9% interest in Tele+ and will waive the receivables due to the Group companies from Stream accrued up to the end of 2002 for some euro 147 million (a figure entirely set aside in the 2001 financial statements). In the meantime, News Corporation will waive the receivables due from Stream for the same amount.

Execution of the contract is subject to the approval of the European Antitrust Authority which will announce its decision by the end of April 2003.

***

Furthermore, in 2002, the following transactions were carried out:

- under the project to create the Administrative Services Center (ASC) of the Telecom Italia Group, in December, the ASC business segment of Telecom Italia absorbed the business segments performing administrative and accounting activities of the companies Holding Media e Comunicazione (effective December 31, 2002) and TIM (effective January 1, 2003). The TIM business segment comprises 96 human resources and the Holding Media e Comunicazione business segment has 13 resources;
- on December 20, 2002, Telecom Italia reached an agreement for the sale to the Accenture group of 100% of TE.SS – Tele Pay Roll Services, a company responsible for the administration activities connected with human resources management of the Telecom Italia Group. The sales price was set at euro 10 million. The transaction, which is part of the divestiture program for the non-core businesses of the Telecom Italia Group, was executed on February 28, 2003, with delivery of the shares.

JJ 004332

■ SUSTAINABILITY SECTION

INTRODUCTION

As from this year the Annual Report will include a Sustainability Section, which shows the Group's attention to its stakeholders, stakeholder satisfaction being fundamental to its reputation and ability to compete in the market in the medium-to-long term. The section covers the same information reported last year under Other Relevant Information about Telecom Italia Group but is organized by pertinent shareholder.

Accordingly, the Corporate Governance report is included in the section on shareholders and new information is provided specifically regarding customers, suppliers, competitors, future generations, the Community, and the State, and in greater depth in the attached Sustainability Report.

■ SUSTAINABILITY PROGRESS IN 2002

The Sustainability Report was already updated in 2001 when it was produced as a joint publication with the Annual Report.

In March 2002, the Telecom Italia Group signed up to the Global Compact's nine principles set by the UN Secretary General, Kofi Annan, concerning human rights, labor and the environment.

During 2002, a new Sustainability reporting system was developed allowing around 380 Key Performance Indicators, both quantity and quality related, to be monitored at Group level. This set of information will make it possible to measure the impact of Sustainability in relation to all stakeholders inside and outside the Group.

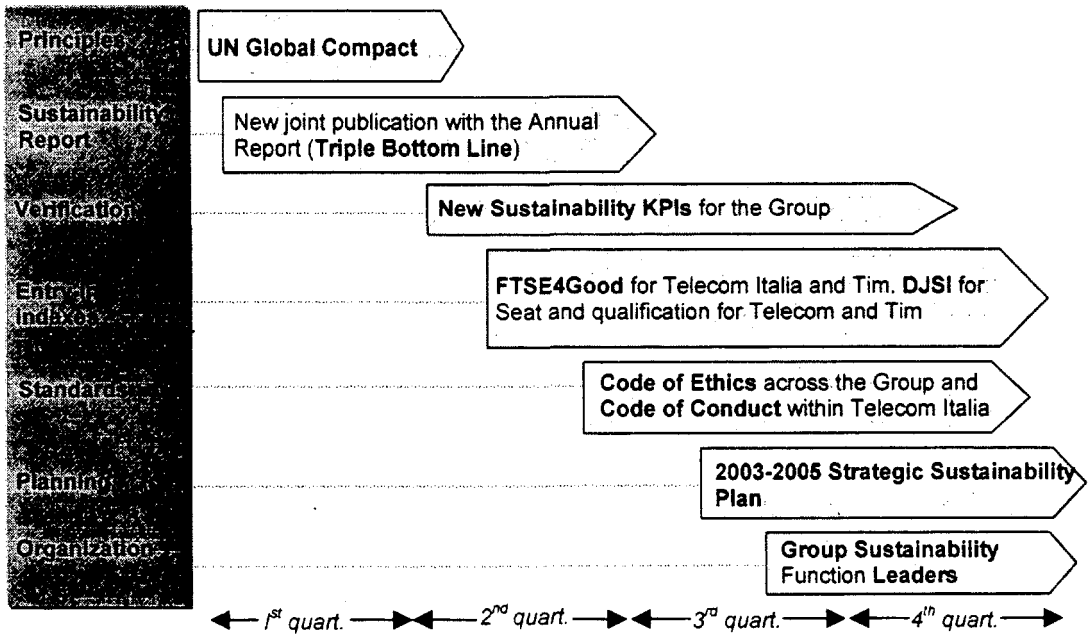
Telecom Italia and TIM were admitted to the FTSE4Good Global 100 Sustainability Index and Seat Pagine Gialle to the Dow Jones Sustainability Group Index, for which Telecom Italia and TIM have gained qualification.

- The Code of Ethics and Code of Conduct for Insider Dealing were introduced across the Group, joining the Charter of Values, the Environmental Charter and Charter of Services already in place [the texts can be viewed on www.telecomitalia.it]

The first version of the Strategic Sustainability Plan was also prepared, forming an integral part of the 2003-2005 Industrial Plan presented to the Financial Community on February 14, 2003.

The office of Sustainability Manager was established and organizational mechanisms were introduced for management of Sustainability at Group level.

Sustainability governance actions in 2002 were therefore:



JJ 00433

CHARTERS AND CODES

■ CODE OF ETHICS

The Group Code of Ethics, adopted on November 7, 2002, is the charter of fundamental values with which the Group identifies and which forms the framework for the whole corporate governance system. The Code is of basic importance in programmatic terms as the *corpus* of principles necessary for the ethically-oriented conduct of affairs and states the information objectives and values of business activities, with reference to the principal stakeholders with which the Group companies interact on a daily basis: shareholders, the financial market, customers, the community and employees.

Under the Code, Group companies are committed to:

- observing, and ensuring compliance within their organizations with, the laws in force in the countries in which they operate and the ethical principles commonly accepted in the conduct of business: transparency, correctness and fairness;
- ensuring equal treatment for all classes of shareholders and avoiding biased behavior;
- pursuing their business objectives exclusively through the excellence of their products and services rejecting recourse to illegal and improper conduct;
- conducting their activities in accordance with the principles of transparency and fair competition, being aware of the importance to the market, investors and the community in general, of correct information on their operations;
- contributing to the economic well-being and growth of the communities in which they operate by providing efficient and technologically advanced services; the Group companies also support social, cultural and educational initiatives aimed at personal development and improving standards of living;
- employing resources responsibly, recognizing the central role of human resources, in the belief that the principal factor in the success of every business is the professional contribution of its employees, in a context of fairness and mutual trust;
- forming investment and business decisions with respect for the environment and public health, considering environmental issues.

Telecom Italia promoted adoption of the Code of Ethics in all companies belonging to the group.

The governing bodies of all Group companies, their management and all those who work for them are required to observe the code in order to enforce the principles and commitments set by the Code and each company has the duty to make provision for appropriate procedures and, where necessary, sanction systems for violations.

■ CODE OF CONDUCT

The Code of Conduct for insider dealing, adopted on November 7, 2002, was drawn up in compliance with the regulation recently introduced by the Italian Stock Exchange, which requires listed companies to regularly disclose transactions in the listed stocks of the Company and its subsidiaries entered into by persons who may have access to price-sensitive information.

The criteria assumed in drawing up the Code of Conduct are consistent with the fundamental choices of Telecom Italia's corporate governance: stringency, transparency and alignment with the best international practices. Additional information on the Code of Conduct regarding insider dealing is contained in the section on corporate governance.

JJ 00434

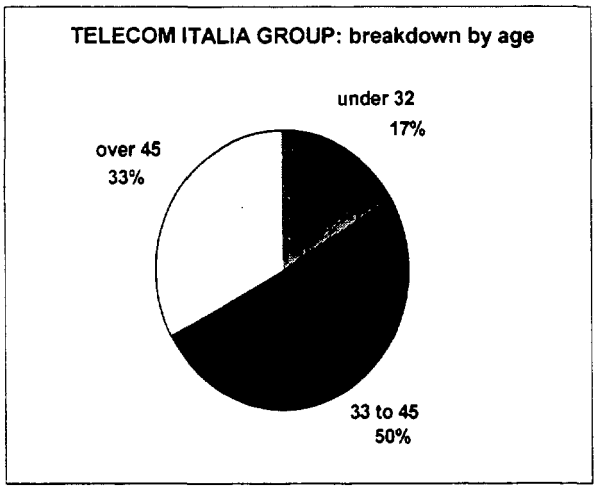
HUMAN RESOURCES

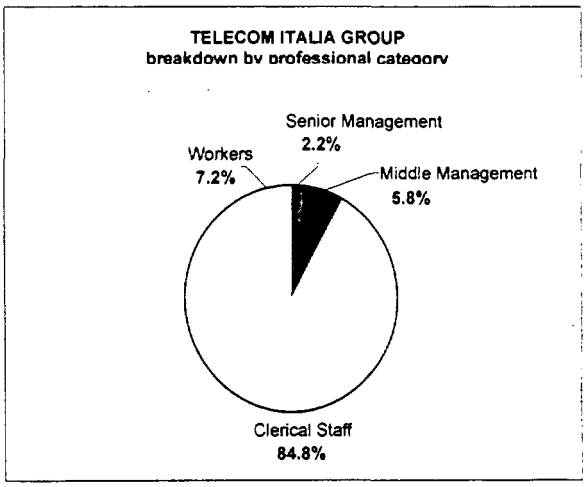
■ TELECOM ITALIA GROUP

Dec. 31, 2001	Employees at Dec. 31, 2002	Change	Hired	Left	Change in scope of consolidation
109,956	101,713	(8,243)	7,207	(12,567)	(2,883)

On December 31, 2002, Telecom Italia Group employed 101,713 people, 8,243 less than at year-end 2001. This reduction was the result of the change in the scope of consolidation (-2,883 people) and employee turnover (-5,360 people). The more significant movements in the Group from the change in the scope of consolidation were: exclusion of the 9Telecom group (-1,003 people), sale of Telespazio (-1,168 people), exclusion of Sogei and Consiel (in total – 1,538 people) and other minor movements (-711), as well as the addition of BLU (+618 people), the Webegg group (+719 people), Netesi and Epiclink (in total +168 people) and other minor companies (+ 32 people).
With regard to employee turnover, during the year a total of 12,567 people left the Group and 7,207 people joined the workforce.

The number of people employed in Italy is 82% of the overall workforce.





■ TELECOM ITALIA S.p.A.

JJ 00435

DEVELOPMENT AND TRAINING

Around 2 million hours were spent in training activities in 2002 (classroom and on-line learning and on-the-job training for employees in Italy) and around euro 35 million in actual costs. These activities were largely delivered by Telecom Italia Learning Services, the Group company appointed with development and marketing of learning packages, and primarily addressed:

- specialist issues to meet the needs of specific businesses, with particular attention to development of customer focus and to training for front-end personnel (e.g., Info 12, Customer Relationship Management, Progetto Coaching, Progetto Concorde, Progetto CuORE, Progetto Fish);
- management development initiatives for the Group's management, targeted both for change management according to the managerial model defined for the Group and for enhancement of skills and behaviors essential to creating value (e.g., Progetto Economics aimed at rapidly spreading knowledge about the economic value of an enterprise);
- learning packages for professional groups, to integrate and develop activity-specific knowledge and skills (e.g., Human Resources, Investor Relations);
- institutional training for new employees in management roles.

EMPLOYEE SATISFACTION

In the first six months of the year 2002, the quantitative phase of the survey on employee attitudes across the group, known as the "Group Photo", was carried out via Intranet. A total of 33,919 questionnaires were completed.

The results were communicated through the Group Intranet portal and focus group meetings. In October 2002, the qualitative phase of the survey was run with 19 focus groups, counting around one hundred participants selected from senior and middle managers, workers and clerical staff. Based on this feedback, the general picture of employee satisfaction and motivation shows steady improvement.

INTERNAL COMMUNICATION

In 2002, Internal Communication implemented a number of initiatives for Telecom Italia Group employees, including:

- continuing the process of implementing the Group Intranet, which connected 75% of the Group companies at year-end 2002;
- organizing a convention transmitted by satellite business TV to the 35 offices in Italy and worldwide, during which the Chairman, Marco Tronchetti Provera, illustrated the Industrial Plan to the Group's management;
- making a calendar entitled "noi" (us), featuring 12 employees from different companies belonging to the Group, with the objective of developing a sense of belonging and integration between different cultures and businesses;
- producing a newsletter e-mailed to all Group employees on the occasion of Telethon, the fundraising marathon broadcast by the RAI networks.

INDUSTRIAL RELATIONS

During the year, negotiations in the Group mainly covered the following areas:

Employment

On May 27, the Group framework agreement was signed with the labor unions to guarantee the correct number of the workforce in relation to the 2002-2004 Industrial Plan. In implementation of the understanding, a union agreement was signed on July 30, downsizing the Telecom Italia workforce by 3,803. Similar agreements were signed in the following months for other Group companies for a further reduction in force of 380.

Under the same framework agreement, on October 8, Telecontact Center signed a union agreement for 350 new entrants and on November 13, an understanding was signed between Telecom Italia and the labor unions to recruit 110 young people in Domestic Wireline.

Lastly, on December 12, the procedure transferring Blu employees to TIM was completed.

Performance bonus

On June 3, Telecom Italia and the labor unions reached agreement over the Performance Bonus for 2002, paid in relation to the Gross Operating Profit for financial year 2001. For the years 2003-2005 the bonus will be determined also considering a Customer Loyalty rating.

JJ 00436

- **Corporate reorganization**
  Procedures were carried out for the sale of the business segments of Telecom Italia responsible for management and development of corporate real estate to the companies Pirelli & C. Commercial Agency, Pirelli & C. Project Management, Pirelli & C. Property Management and Tiglio II.
  Procedures were also completed for assigning organization units within the Group according to the missions of the various companies.

■ TRANSFERS WITHIN THE GROUP

Transfers of resources between the Business Units was particularly intensified during the year with a view to developing loyalty to the Group, creating new opportunities for professional development and balancing recourse to external recruitment. Around 1,300 resources were transferred at Group level.

■ STOCK OPTION PLANS

In 2002, two stock option plans were introduced, one for top management and one for middle management.

The 2002 TOP plan, voted by the Board of the Directors of the Company by the power vested in it by the Extraordinary Shareholders' Meeting of June 12, 2001, was introduced in February 2002 and 11,800,000 options were granted to sixteen top managers. The strike price, defined as the normal value of the share at the time of the grant, in agreement with existing fiscal legislation, was € 9.203. The plan covers a period of three years.

The 2002 plan, instead, was reserved for Group management who already held options from the 2000 stock option plan and other executives hired after July 27, 2001 (the date of the start of the 2001 stock option plan). This plan was deemed necessary since, as a result of the general performance of the stock market during recent years, the 2000 plan had lost its effectiveness as a tool through which to encourage and retain management staff. The new plan was financed through the voluntary relinquishment of the 2000 plan by executives still working for the Group.

The 2002 plan, at December 31, 2002, covered 440 managers of the Group, 398 of whom were already covered by the 2000 plan which, as stated, they voluntarily renounced.

The options were granted in March, August and October. The strike price was defined as the normal value of the share in the month prior to the grant, in agreement with existing fiscal legislation. The weighted average price was € 9.606. The plan covers a period of three years.

JJ 00437

In compliance with the recommendation contained in Consob Communication No. 11508 dated February 15, 2000, the following table summarizes the key features of the stock option plans in force in 2002:

	Amount (in euro)	Options existing at 1/1/2002	New options granted during the year	Options exercised during the year	Options expired and not exercised during the year	Options extinguished during the year due to renouncement	Options expired during the year due to termination of service/other reason	Options existing at 12/31/2002	of which exercisable at 12/31/2002
1999 Plan	No.options	9,846,650	-	1,375,150	-	-	-	8,471,500	8,471,500
	Exercise price	6.79	-	6.79	-	-	-	6.79	6.79
	Market price	9.713	-	9.325	-	-	-	7.202	-
2000 Plan	No.options	50,570,000	-	-	-	29,820,000	150,000	20,600,000	10,699,996
	Exercise price	13.815	-	-	-	13.815	13.815	13.815	13.815

JJ 00438

SHAREHOLDERS: CORPORATE GOVERNANCE

CODES, PRINCIPLES AND PROCEDURES

During 2002, the Company and the Group continued to improve the instruments used for corporate governance. In this context, the Group's fundamental decision to comply with the principles formulated by the Corporate Governance Committee (encompassed in the "Preda Code") was accomplished through the adoption of practices and principles of conduct, formalized in specific codes and procedures aimed at realistically putting into practice the principles of the Preda Code and adapting the system of corporate governance to the specific realities of the Company and Group. Contemporaneously, the review of certain previously adopted instruments was, for the most part, completed in accordance with the principle that governance practices should be constantly subject to verification and updating, in order to respond in a timely and effective manner to the demands arising from changes in operating practices and the evolution of the overall internal and external regulatory context. Within that framework, an overall review of the Company's Code of Self-discipline is being planned and a Group project is being developed that is aimed at verifying the suitability of the organizational models already in place in respect of the regulations set forth by Legislative Decree No. 231 of 2001, regarding the administrative responsibility of entities for violations committed by their associates, with consequent adjustment, where necessary, to the internal control system.
The documents related to the corporate governance instruments adopted by Telecom Italia during 2002 and summarized below, are, for the most part, available for consultation on the Company's website: www.telecomitalia.it.

Code of Ethics
The system of corporate governance of the Telecom Italia Group was implemented during 2002 with the adoption of the Code of Ethics that ideally is the foundation of the entire system and represents the "charter of values" of the Group, establishing, in programmatic terms, the *corpus* of principles for the ethically-oriented conduct of affairs to which the Group aspires. The Code of Ethics, adopted by Telecom Italia and to be gradually adopted by all Group entities, sets out the objectives and guiding values of the business activities, with reference to the principal stakeholders with which Group companies find themselves interacting on a daily basis: shareholders, the financial market, customers, the community and employees.

Transactions with related parties and information flows
During 2002, the Company adopted a series of principles of conduct concerning the manner in which transactions with related parties, including intra-group transactions, are carried out. The principles of conduct are directed towards guaranteeing true accuracy and transparency in these transactions, both in substance and in form, with full joint responsibility being assumed the entire Board of Directors in the related decisions.
At the same time, internal rules were formalized, through a specific procedure, for the collection and communication to the Board of Statutory Auditors – in accordance with Article 150, paragraph 1, of Legislative Decree No. 58 of 1998 ("Testo Unico of Finance") – of the most exhaustive information inherent to the activities being carried out, to the most significant economic, financial and equity transactions, to transactions with related parties (including intra-group transactions) and to atypical or unusual transactions. Contemporaneously, that procedure ensures the completeness of information flows – also recommended by the Preda Code – from the Directors responsible for those activities to all members of the Board of Directors.

Code of Conduct on insider dealing
In accordance with the regulations recently introduced in the Regulation of Markets Organized and Managed by Borsa Italiana, Telecom Italia has adopted a Code of Conduct on insider dealing aimed at disciplining the obligatory regulations concerning disclosure requirements and conduct inherent to transactions on the Group's listed securities carried out by persons who, by virtue of their positions held in the Group, have access to confidential "price sensitive" information. The criteria adopted in the drafting of the Code are consistent with Telecom Italia's fundamental decisions regarding governance: stringency, transparency and alignment with the best international practices.

Procedure for the communication of price sensitive information to the market
At the beginning of the current year, the Company formalized a specific Procedure containing the practices to be followed in the communication of price sensitive information to the market. The Procedure establishes the operating procedures for the circulation of that type of information to the market, identifies the Company Functions and Structures involved in the process, and also regulates the procedures to be followed in the event of rumors or requests for information by those responsible for the surveillance and management of the

03 00459

market. Furthermore, the Procedure regulates the activities to be carried out for meetings with the financial community and the Press, so as to guarantee a non-selective use of Company information.
With regard to the internal management of information relating to Telecom Italia, specific guidelines have been adopted for some time regarding the classification and management of information from the viewpoint of Company confidentiality and privacy.

BOARD OF DIRECTORS

Composition
The number of members of the Board of Directors has not changed during 2002 compared to that fixed during the Shareholders' Meeting of November 7, 2001. The Board of Directors is thus comprised of fifteen members.
During the year, following the resignations of the Directors Paolo Maria Grandi and Enrico Bondi (in July and September 2002, respectively), Pietro Modiano and Riccardo Ruggiero (already General Manager of the Company) were nominated as Directors of Telecom Italia. Consequently, the present members are: Gilberto Benetton (Deputy Chairman), Carlo Orazio Buora (Managing Director), Umberto Colombo, Francesco Denozza, Luigi Fausti, Guido Ferrarini, Natalino Irti, Gianni Mion, Pietro Modiano, Massimo Moratti, Carlo Alessandro Puri Negri, Riccardo Ruggiero (Managing Director and General Manager), Pier Francesco Saviotti, Marco Tronchetti Provera (Chairman) and Roberto Ulissi. The Board's term of office was set for three years, expiring at the time of approval of the 2003 financial statements.

As recommended by the Preda Code, the offices held by the Directors in other listed companies, in financial, banking or insurance companies or in companies that are significant in size are set out below:

Chairman	Marco Tronchetti Provera	Chairman of CAMFIN S.p.A., Chairman and CEO of Pirelli S.p.A., Chairman of Pirelli & C. S.a.p.A., Olimpia S.p.A. and Pirelli & C. Real Estate S.p.A., and Deputy Chairman and Managing Director of Olivetti S.p.A..
Deputy Chairman	Gilberto Benetton	Chairman of Edizione Holding S.p.A., Autogrill S.p.A., Ragione S.a.p.A. and Verde Sport S.p.A., Deputy Chairman of the Benetton Foundation, Olimpia S.p.A. and Olivetti S.p.A., Director of Area Nord Concessionaria di Pubblicità, Autopistas C.E.S.A., Autostrade S.p.A., Banca Antoniana Popolare Veneta, Benetton Group S.p.A., Beni Stabili S.p.A., HMS Host Corp., Lloyd Adriatico S.p.A., Pirelli S.p.A., Mediobanca S.p.A., Schemaventotto S.p.A. and Sep S.p.A..
Managing Director	Carlo Buora	Director of Pirelli & C., Managing Director and General Manager of Pirelli S.p.A., Director of Pirelli & C. Real Estate S.p.A. and Olimpia S.p.A., Managing Director of Olivetti S.p.A., Chairman of Tim S.p.A., Director of HDP Holding di Partecipazioni S.p.A., Ras S.p.A., Mediobanca S.p.A., Olivetti Tecnost and F.C. Internazionale.
Managing Director – General Manager	Riccardo Ruggiero	Deputy Chairman of Banca della Rete, Director of Telecom Italia America Latina and Sia S.p.A..

JJ 00440

Director	Umberto Colombo	Chairman of Novamont S.p.A., Alcantara S.p.A. and Kemyx S.p.A., and Director of ACEA S.p.A., Impregilo S.p.A., Snia S.p.A. and Energy Conversion Devices.
Director	Francesco Denozza	
Director	Luigi Fausti	Chairman of Patrimonio Immobiliare dello Stato S.p.A., and Director of MONRIF S.p.A..
Director	Guido Ferrarini	Independent Director of Erg S.p.A. and Grandi Navi Veloci S.p.A..
Director	Natalino Irti	
Director	Pietro Modiano	Director of Borsa Italiana S.p.A., E-Mid S.p.A., Euro Capital Structures Ltd, Equinox Inv. Comp. S.c.p.a., TLX S.p.A., Mts S.p.A. and Locat S.p.A., Deputy General Manager of Unicredito Italiano S.p.A., Chairman of Pioneer Global Asset Management S.p.A. and TradingLab Banca S.p.A., and Deputy Chairman of Unicredit Fondi SGR p.A., Pioneer Inv. Management USA Inc. and MonteTitoli S.p.A..
Director	Gianni Mion	Managing Director of Edizione Holding S.p.A. and Schemaventotto S.p.A., Deputy Chairman of Telecom Italia Mobile S.p.A., Director of Benetton Group S.p.A., Autogrill S.p.A., 21 Investimenti S.p.A., Autostrade S.p.A., Sagat S.p.A., Olimpia S.p.A., Olivetti S.p.A., Seat PG S.p.A., Interbanca S.p.A., Banca Antonveneta S.p.A. and 21 Partners Società di Gestione del Risparmio S.p.A..
Director	Massimo Moratti	Managing Partner of Angelo Moratti di Gian Marco e Massimo Moratti & C. S.a.p.a., Managing Director and Deputy Chairman of Saras S.p.A. Raffinerie Sarde, Chairman of F.C. Internazionale Milano S.p.A. and Sarint S.A., and Director of Interbanca.
Director	Carlo Alessandro Puri Negri	Director of Aon Italia S.p.A., Deputy Chairman and Managing Director of Pirelli & C. Real Estate S.p.A., Deputy Chairman of CAMFIN S.p.A. and Pirelli & C. Ambiente S.p.A., Director of Pirelli S.p.A., Olimpia S.p.A., Olivetti S.p.A., Pirelli & C. S.a.p.A. and Parmasteelisa S.p.A., General Manager of Pirelli & C. S.a.p.A., and Management Representative of Voting Trust of Pirelli & C. S.a.p.A..
Director	Pier Francesco Saviotti	Director of Stefanel S.p.A., TOD'S S.p.A., Danieli S.p.A. and Linificio e Canapificio Nazionale S.p.A., and General Manager of Intesa BCI S.p.A., with responsibility for the credit area.
Director	Roberto Ulissi	General Manager Responsible for the 4th Directorate of the Department of Treasury of the Ministry of Economy and Finance (Banking and Financial Sector and Legal Affairs).

Independent Directors

Members of the Board of Directors that are considered independent, in accordance with the guidelines set down by the Preda Code, are those that (i) do not have, nor have they recently had, either directly, indirectly or on behalf of third-parties, economic relationships of such significance as to influence the independence of their judgment with regard to the Company, its subsidiaries, its Executive Directors, or its controlling shareholder or group of shareholders; (ii) do not hold directly, indirectly or on behalf of third parties equity investments of such magnitude as to allow them to exercise control or significant influence over the Company, nor do they participate in shareholder agreements for control over the Company and (iii) are not close family members of Executive Directors of the Company or of persons that find themselves in the above situations.

Furthermore, Telecom Italia has adopted as a further condition of independence the requirement that Directors not participate in shareholder agreements containing clauses concerning the composition and the resolutions of the Board of Directors.

In light of the declarations given by the members of the Board of Directors, the Directors Umberto Colombo, Francesco Denozza, Luigi Fausti, Guido Ferrarini, Natalino Irti and Roberto Ulissi are considered independent.

JJ 00441

Executive Directors

In September 2002, the Board of Directors reviewed the overall system of mandates of the Company's Executive Directors' (Chairman and Managing Directors), which are as follows:

- the Chairman Marco Tronchetti Provera is granted the powers necessary to execute all acts pertaining to the corporate activity in its various forms, with the exception of investments and acts to dispose of investments in subsidiaries and associated companies, and companies or businesses thereof, of amounts in excess of euro 250 million per transaction. Furthermore, the signature of the Chairman must be joined by that of a Managing Director for the issue of guarantees against obligations of Telecom Italia or its subsidiaries in excess of euro 250 million or against the obligations of third parties in excess of euro 100 million. The Chairman is further granted emergency powers regarding matters under the Board of Directors' responsibility, the duty of reporting to the Board of Statutory Auditors in the manner and under the terms required by Article 13 of the by-laws, the mandate to provide for the management of confidential information and ensure the functioning and adequacy of the internal control system, and the power to appoint one or more persons in charge;
- the Managing Director Carlo Orazio Buora is granted the powers necessary to execute all acts pertaining to the corporate activity in its various forms, with the exception of investments and acts to purchase, sell and dispose of investments in subsidiaries and associated companies, and companies or businesses thereof, and of goods and services in general of amounts in excess of euro 150 million per transaction. The Managing Director Carlo Orazio Buora may issue guarantees against the obligations of Telecom Italia or its subsidiaries not in excess of euro 150 million, or against the obligations of third parties not in excess of euro 50 million;
- the Managing Director Riccardo Ruggiero is granted the powers necessary to execute all acts pertaining to the corporate activity in its various forms, with the exception of investments and acts to purchase, sell and dispose of investments in subsidiaries and associated companies, and companies or businesses thereof, and of goods and services in general of amounts in excess of euro 75 million per transaction, and with the exception of the issue of guarantees. The powers of the Managing Director Riccardo Ruggiero exclusively relate to the activities of the Domestic Wireline Business Unit.

In respect of the limits of value described above, an individual transaction is intended to mean the aggregate of transactions that, while individually may be below the thresholds indicated, prove to be linked together within the same strategic or executive structure and therefore, when considered together, exceed the materiality threshold.

During 2002 the Company, as mentioned previously, adopted a procedure to formalize the rules for the collection and communication to the Board of Statutory Auditors and Board of Directors of the most exhaustive information inherent to the activities carried out, to the most significant economic, financial and equity transactions, to transactions with related parties (including intra-group transactions) and to atypical or unusual transactions. This procedure sets in motion the information flows recommended by the Preda Code through which the appointed Directors periodically report to the Board of Directors and the Board of Statutory Auditors on the activities they have carried out in exercising the mandates conferred upon them. That information includes executive activities and the status of transactions already approved by the Board of Directors; in particular, Executive Directors report on the activities carried out by them – also through the Company's and its subsidiaries' structures – in exercising the mandates conferred upon them, including the initiatives adopted and projects launched.

Roles and Activities of the Board of Directors

In accordance with Telecom Italia's by-laws, the Board of Directors has full and ample powers for the ordinary and extraordinary administration of the Company, including all responsibilities that are not, under the law and the by-laws, expressly reserved for the general Shareholders' Meeting. Furthermore, the Board – in accordance with paragraph 1.3 of Telecom Italia's Code of Self-discipline – is exclusively responsible for (i) the examination and approval of the Company's and Group's strategic, industrial and financial plans; (ii) the examination and approval of transactions (including, for example, the acquisition and divestiture of direct or indirect controlling interests) of particular economic or strategic significance, with particular reference to transactions with related parties; (iii) the granting and revoking of the mandates of the Managing Director and the Executive Committee, if established, defining the limits, operating procedures and frequency, normally not less than every three months, with which they should report to the Board on the activities they have carried out in exercising their mandates; (iv) the determination, after having examined the proposals of the specific committee and consulted the Board of Statutory Auditors, of the compensation of the Managing Directors and those who hold particular offices, and, providing that the Shareholders' Meeting has not already taken steps to do so, the breakdown of the overall compensation due to individual members of the Board and committees; (v) the supervision of the general management performance, with particular attention to situations of conflict of interest, taking into consideration information received from the Managing Director and the Audit and Corporate Governance Committee, and periodically comparing the results achieved with those planned; (vi) the verification of the adequacy of the Company's and Group's general organizational and administrative structure drawn up by the Managing Director;

00442

In addition to the above matters, that are also recommended by the Preda Code, the Board – based on the provisions of paragraph 1.3 of the Code of Self-discipline – is responsible for (vii) the preparation and adoption of the Company's rules of corporate governance and the definition of the Group's corporate governance guidelines; (viii) the evaluation and approval of the Company's and Group's annual budgets; (ix) the evaluation and approval of the periodic accounting documentation as provided by the existing regulations; (x) the examination and approval of investments and divestitures (also in real estate) of amounts exceeding Lire 500 billion (approximately euro 258.2 million); (xi) the nominating, revoking and conferring of powers of the General Managers of the Company, by proposal of the Managing Director; (xii) the appointments for the offices of Managing Director and Chairman in subsidiaries with sales equal to or higher than Lire 2,000 billion (approximately euro 1,033 million) – as per the latest available financial statements – and (xiii) reporting to the Shareholders during Shareholders' Meetings.
The criteria adopted by Telecom Italia to identify transactions that should be examined, in advance, by the Board of Directors are both quantitative and qualitative, in that – in addition to an assessment of relevance based on the value of the transaction – an evaluation is carried out of the actual impact of the transaction on the performance of the Company. This may result in the requirement for advance Board approval of transactions that, while being lower than the defined materiality thresholds, exhibit particular critical elements, such as the nature of the counterparty, the time-frame of execution or the potential risks deriving from the transaction. In this regard, during 2002 the Company adopted – as previously highlighted – a series of principles on the execution of transactions with related parties, by virtue of which the Board of Directors approves, in advance, transactions with related parties, including intra-group transactions, with the exception of typical or usual transactions or those to be concluded under standard conditions.
During 2002, the Board met nine times, more than double that required by the Company's Code of Self-discipline (paragraph 3.3 indicates a frequency of at least four meetings per year) and a greater number than communicated beforehand in disclosure to the market (eight meetings).
Attendance at the meetings by Directors was always very high, with a percentage attendance that was never below 73% of Directors; statistically, even the independent Directors participated in the Board's activities with notable regularity, always ensuring an overall minimum presence of above 66% of independent Directors.
As provided by the Company's Code of Self-discipline, it is normal practice for the Directors to be provided, sufficiently in advance of the Board meetings, with the documentation and information necessary to allow them to effectively participate in the Board's business.
In December 2002, the Company distributed a calendar of Company events for 2003, which included the planned Board meetings. In particular, Telecom Italia will, again in 2003, anticipate the publication of the annual and semiannual financial statements, in order to take advantage of the possibility, provided by Consob Regulation 11971 of 1999, to be exempted from the preparation of the second and fourth quarter accounts.

DIRECTORS' NOMINATION AND COMPENSATION

Nomination of Directors

Telecom Italia S.p.A.'s by-laws provide that the nomination of members of the Board of Directors occur through a ballot based on lists of candidates. That system, in place since 1997, is intended to ensure adequate representation of minority shareholders on the Board and has rendered the establishment of a nominating committee unnecessary. For the nomination of the Directors, it is now common practice in Telecom Italia to make the profiles of each candidate available to the shareholders, at the registered office, the secondary office and the premises where Shareholders' Meetings are held, so as to enable shareholders to become acquainted with their personal and professional characteristics and exercise their voting rights more knowledgeably.

Directors' Compensation Committee

As already highlighted in the annual report on Corporate Governance in the 2001 financial statements, the Board of Directors has a Directors' Compensation Committee with investigative and advisory functions. No changes were made during 2002 to the composition or responsibilities of the Directors' Compensation Committee, which has particular responsibility for formulating proposals to the Board in respect of the compensation of the Managing Directors and of those Directors who hold specific offices, and, at the Managing Directors' indication, in respect of the determination of criteria for the compensation of top management of the Company. The Committee is composed of the independent Directors Luigi Fausti (Chairman) and Umberto Colombo, and of Pier Francesco Saviotti.
During 2002, the Committee held six meetings, during which it examined subjects related to the start-up of new stock option plans, the criteria to be utilized for the compensation of management and the incentive

JJ 00444

formulas. Furthermore, the Committee identified the reference parameters for the variable component of Executive Directors' compensation, in accordance with Article 2389, paragraph 2, of the Italian Civil Code.
With reference to the choices made by the Company regarding the compensation of top management of the Company, the current system provides for the allocation of compensation broken down into a fixed component and a variable component, contingent upon the achievement of predetermined budget objectives. The system is similar to that used for the rest of management which – in addition to the base salary – provides for the presence of incentive and loyalty systems by means of stock options. More detailed information on the stock option plans are contained in the "Human Resources" paragraph, above.
During its meetings the Committee has availed itself of the assistance of external consultants, in addition to Company personnel.

INTERNAL CONTROL SYSTEM

The system of internal controls – briefly outlined in the Company's Code of Self-discipline – is a process aimed towards guaranteeing the efficiency of administrative and operational management, its understanding and verification, the reliability of the accounting and management data, the observance of the laws and regulations from every source and the safeguarding of the Company's integrity, also to prevent fraud that may damage the Company and the financial markets.
As disclosed in the previous year's report on Corporate Governance, the Telecom Italia Group has approved the organizational decision to concentrate the so-called internal audit activities in a specific consortium company, with the formation of In.Tel.Audit – S.c.a r.l..
That solution, which was born out of the need to take into consideration the objective complexity of the Group (while at the same time evaluating the professional resources within), as well as the new requirements set forth by Legislative Decree No. 231/2001, was further implemented during 2002. Having taken into consideration the approach, now common in international doctrine and practice, by which the functions of those in charge of internal control should be the verification of the adequacy and efficiency (i.e. proper functioning) of the internal control system and – where anomalies are discovered – the proposal of necessary corrective solutions, In.Tel.Audit – S.c.a.r.l. was identified as being in charge of internal control, responsibility for internal auditing.
This organizational solution permits the maximization of independence of the those in charge of internal control from the Company's organizational structure, from which they work in complete autonomy, reporting their findings to the Chairman, the Audit and Corporate Governance Committee and the Board of Statutory Auditors. The execution of any "maintenance" interventions on the internal control system recommended by those in charge of internal control is then, depending on the occasion, the responsibility of the various sectors of the Company or Group companies, based on the recommendations drawn up by the Board of Directors. Furthermore, the Company, in order to facilitate the overall operation of the system, will identify an "individual in charge of execution" of the above-mentioned interventions.
The Board of Directors – based on the checks carried out and having taken account of the improvement initiatives undertaken – considers the system of internal control to be adequate for the needs of the Company and in respect of the regulations in force.

Audit and Corporate Governance Committee
Telecom Italia's Audit and Corporate Governance Committee, in its composition and in the activities carried out by it, has already adapted to the regulations of the Code of Self-discipline adopted by Borsa Italiana in July 2002.
The Committee is, in fact, composed exclusively of independent non-executive Directors, including the Directors Roberto Ulissi (Chairman), Guido Ferrarini and Natalino Irti. The Chairman of the Board of Statutory Auditors or, when it was considered appropriate to hold a joint meeting, all members of the Board participated in the meetings of the Committee, of which in 2002 there were eight.
The Audit and Corporate Governance Committee, based on the provisions of Telecom Italia's Code of Self-discipline, carries out the following activities: (i) evaluates the adequacy of the internal control system; (ii) evaluates the work plan prepared by those in charge of internal control and receives periodic reports from the same; (iii) evaluates proposals formulated by independent audit firms wishing to be appointed as auditors, and the audit plan and results expressed in the letter of recommendations; (iv) discloses to the Board, at least every six months, at the time of the approval of the annual and semiannual financial statements, the work carried out by it and the adequacy of the system of internal control; and (v) monitors compliance with and periodic updating of the corporate governance regulations.
During 2002, the Committee contributed to the process of implementation of the corporate governance instruments, participating in the analysis and the definition of the documents that were subsequently adopted by the Company in the above-mentioned period. Furthermore, in adopting the new recommendations of the Preda Code, the Committee examined, with the aid of the Company's Offices and the independent auditors

Reconta Ernst & Young, the appropriateness of the accounting principles used and their uniformity in the preparation of the consolidated financial statements, following the evaluation and verification activities undertaken by management on the reasonableness of the carrying values of the Group's investment portfolio.
The Committee placed particular attention on the evolution of the American corporate regulations (i.e. Sarbanes Oxley Act 2002).

TRANSACTIONS WITH RELATED PARTIES

As previously indicated, during 2002 the Company adopted a series of principles for the execution of transactions with related parties. On the basis of those principles the Board of Directors approves in advance transactions with related parties, including intra-group transactions, with the exception of transactions that are typical or usual or to be finalized at standard conditions. To this end, the Board of Directors receives adequate information on the nature of the relationship, the manner in which the transaction is to be executed, the conditions, even economic, for its realization, the valuation technique followed, the interests and underlying motivations and any risks to the Company. Furthermore, in the event that the relationship is with a Director or with a party related through a Director, the interested Director will be limited to providing clarification and will leave the Directors' meeting at the time of the deliberations.
In relation to the nature, value or other characteristics of the transaction, the Board of Directors, in order to avoid that the transaction is realized at unreasonable conditions, is assisted by one or more experts who, depending on the circumstances, expresses an opinion on the economic conditions, and/or the objectivity, and/or the technical aspects of the transaction.

HANDLING OF CONFIDENTIAL INFORMATION

With regard to the internal management of information relating to Telecom Italia, some time ago the Company adopted specific guidelines regarding the classification and management of information from the viewpoint of Company confidentiality and privacy, in the knowledge that information represents a strategic component of corporate wealth and a fundamental asset for the success of all organizations that operate in the Telecom Italia Group. However, the protection of information is not only an instrument to support the business, it is also a legal obligation in the event that it deals with personal data related to customers, employees, suppliers or other persons (either physical or juridical) external to or within the Company's organization.
At the end of 2002, in compliance with the regulations of Borsa Italiana, a Code of Conduct was adopted relating to insider dealing, that regulates the requirements for information and conduct in relation to transactions regarding the listed stocks of the Group carried out by "relevant persons" who operate within the Company. The criteria assumed in the drafting of the Code are consistent with the Telecom Italia's fundamental decisions regarding governance: stringency, transparency and alignment with the best international practices.
The Code goes beyond the regulations prescribed by Borsa Italiana, providing flexibility in the identification of persons subject to the disclosure obligation and extending the communication requirement to transactions executed on listed financial instruments issued by the Parent Company (in addition to the subsidiaries), even if carried out within an individual investment portfolio relationship, in which the client foregoes the right to give instructions.
Furthermore, Telecom Italia has significantly reduced the materiality thresholds, compared to those indicated by Borsa Italiana, on the transactions to be periodically communicated to the market (from euro 50,000 to euro 35,000) or to be immediately communicated at the time the transaction is carried out (from euro 250,000 to euro 80,000), assuming a flexible period of time for the verification of whether the materiality threshold for communication without delay has been attained. Finally, Telecom Italia's Code of Conduct – which came into force (on December 1, 2002) in advance of the obligatory deadline set by the Regulation of Borsa Italiana (of January 1, 2003) – limits the period of free trading of Group stocks by "relevant persons" and provides for a particularly stringent system of sanctions.
At the beginning of 2003, the Company formalized a specific Procedure containing the operating procedures for communication of price sensitive information to the market, identifying the Functions and Structures involved in the process and also regulating the procedures to be followed in the event of rumors or requests for information by those responsible for the surveillance and management of the market. Furthermore, the Procedure regulates the activities to be carried out for meetings with the financial community and the media, so as to guarantee a non-selective use of Company information.

BOARD OF STATUTORY AUDITORS

The Board of Statutory Auditors of Telecom Italia, appointed by the Shareholders' Meeting of July 2000, is composed of five Acting Auditors (Paolo Germani - Chairman, Mario Boidi, Paolo Golia, Fabrizio Quarta and Gianfranco Zanda), of which two (Paolo Germani - Chairman and Fabrizio Quarta) are appointed by the government and one (Paolo Golia) was elected from the list presented by the minority shareholders.
In accordance with paragraph 13.1 of the Code of Self-discipline, proposals put to the Shareholders' meeting for the appointment of Statutory Auditors, accompanied by comprehensive information concerning the personal and professional characteristics of the candidates, are normally deposited at the Company's registered office at least ten days prior to the date set for the meeting, or at the time the lists are deposited.
The Board of Statutory Auditors conducted 24 meetings during 2002, in addition to meetings with the Audit Committee, the internal auditors, and the external auditors and Company management.
As previously highlighted, during 2002 the Company formalized, through a specific procedure, internal rules for the collection and communication to the Board of Statutory Auditors – in accordance with Article 150, paragraph 1, of the Testo Unico of Finance – of information on the activities and significant transactions carried out by the Company and its subsidiaries, as well as on transactions that are potentially in conflict of interest. Through that procedure – which also ensures, as already noted, the completeness of information flows recommended by the Preda Code from the Directors responsible for those activities to all members of the Board of Directors – the Chairman, by the mandate delegated to him for this purpose, reports, in writing, to the Board of Statutory Auditors:

a) on the activities carried out by the Company, with particular reference to executive activities and the status of transactions already approved by the Board of Directors, as well as to activities carried out by Executive Directors, also through the Company's and its subsidiaries' structures, in exercising their mandates, including the initiatives adopted and the projects begun;
b) on the most significant economic, financial and equity transactions, highlighting, in particular, the strategic aims, the consistency with the budget and industrial plan, the terms of execution (including the terms and conditions, also economic, of their realization) and the developments, and any conditions and implications that they carry on the Group's activities;
c) on transactions that are potentially in conflict of interest, that is to say on intra-group transactions and on transactions with related parties that are not intra-group transactions. The information concerning those types of transactions illustrates the underlying interests (and, for intra-group transactions, their rationale in the Group context) as well as the terms of execution of the transaction (including the terms and conditions, also economic, of their realization) with particular regard to the valuation methods followed. The concept of related parties utilized in this procedure was adapted during 2002 to that prescribed by Consob in its Communication No. 2064231 dated September 30, 2002, whilst maintaining the remaining parts of the definition utilized in the Telecom Italia procedure, where they conform to more stringent criteria than prescribed by Consob;
d) on the atypical or unusual transactions, by which it is intended those transactions whose subject or nature are outside the normal course of the Company's business or that present particular critical elements due to their characteristics and to the risks inherent to the nature of the counterparty or to the time of their completion. Also in this case, the information provided about those transactions highlights the underlying interests and illustrates the terms of execution of the transactions (including the terms and conditions of their realization) with particular regard to the valuation methods followed.

Set out below are the offices held by the statutory auditors in other listed companies, in financial, banking or insurance companies or in companies that are significant in size:

JJ 00448

Chairman	Paolo Germani	General Manager, General Inspectorate of Finance of the National Department of General Accounting – Ministry of Economy and Finance, and Chairman of the Supervisory Committee of EFIM - in forced administrative liquidation.
Acting Auditor	Mario Boidi	
Acting Auditor	Paolo Golia	Chairman of the Board of Statutory Auditors of Banco di Brescia S. Paolo S.p.A., Acting Statutory Auditor of C.B.A. Vita and C.B.I. Factor, Chairman of the Board of Statutory Auditors of Cosidis S.p.A., Acting Statutory Auditor of Criterium S.p.A., Chairman of the Board of Statutory Auditors of Ergon Finanziaria S.p.A., General Partner of Gami S.a.s., Chairman of the Board of Statutory Auditors of Interdis S.p.A. and Mercati Finanziari SIM S.p.A., Acting Statutory Auditor of Multiutility S.p.A., Chairman of the Board of Statutory Auditors of Riva Acciaio S.p.A., Acting Statutory Auditor of Sara Ass.ni S.p.A., Sara Vita S.p.A., Schemaventotto S.p.A. and TSP S.p.A., and Chairman of the Board of Statutory Auditors of Vegè Italia S.c.a.r.l. and Vegè Leasing S.p.A., in liquidation.
Acting Auditor	Fabrizio Quarta	
Acting Auditor	Gianfranco Zanda	Member of the Board of Statutory Auditors of AGIP Petroli S.p.A., AGIP S.p.A., Banca d'Italia, Ufficio Internazionale Cambi, Finsiel S.p.A., Telespazio S.p.A., Tim S.p.A., Sangemi S.p.A., and Immsi S.p.A..

SHAREHOLDERS

Shareholders' Meetings

During 2002, two Shareholders' Meetings took place. During the first, on May 7, the 2001 financial statements were examined, whereas on December 12, during the ordinary session of the Shareholders' Meeting the nomination of two Directors (Modiano and Ruggiero) and the reclassification and distribution of certain reserves were approved, and during the extraordinary session the merger through incorporation of TILab into Telecom Italia was approved. Again during the Shareholders' Meetings in 2002, which the Company views as a constant commitment on its part, shareholders were encouraged and supported to participate in direct discussions with management and shareholders, with a view towards a productive exchange of opinions.

Furthermore, with a view to carrying out its responsibilities in a more orderly and productive manner, the Company, in 2001, adopted regulations for Shareholders' Meetings that are applicable to ordinary and extraordinary meetings of the Shareholders.

Finally, a specific function within Telecom Italia's organizational structure (Investor Relations) is dedicated to relations with the national and international financial communities. More detailed information is contained in the paragraph relating to "Financial Communications".

Shareholders' agreements

During 2001, shareholders' agreements were signed among the shareholders of Olimpia S.p.A. (Pirelli S.p.A., Edizione Holding S.p.A., Unicredito Italiano S.p.A. and Intesa BCI S.p.A.) that contain certain clauses concerning, amongst other things, the composition and resolutions of Telecom Italia's Board of Directors. The cited agreements and any variations thereto were communicated to the market in accordance with the regulations in force.

In December 2002, a new shareholders' agreement was signed among Pirelli, Edizione Holding, Unicredito Italiano, IntesaBCI, Olimpia and Hopa S.p.A., that provides for a change in the shareholder base of Olimpia upon the conclusion of certain transactions (amongst which the merger of Holy S.p.A., 100%-controlled by Hopa, into Olimpia). The shareholder base of Olimpia will then comprise Pirelli, 50.40%, Edizione Finance International 16.80%, UniCredito 8.40%, IntesaBCI 8.40% and Hopa 16.00%.

After the aforementioned merger, Olimpia S.p.A. will hold 28.5% of the share capital of Olivetti, the parent company of Telecom Italia.

JJ 00449

■ FINANCIAL COMMUNICATIONS

Since the end of 2001 and throughout 2002, the Telecom Italia Group has wanted to provide information about financial matters that is ever-more accurate, continuous and timely, with the aim of achieving greater transparency and reliability both in terms of the business results and corporate governance of Telecom Italia S.p.A. and its subsidiaries, in order to meet in full the requirements of investors and the regulations established by the official bodies involved.

Moreover, this high level of commitment is recognized by the financial market which, through a study conducted by Deutsche Bank in collaboration with DWS Investment, ranked Telecom Italia in first place among European telecommunications companies in terms of respecting corporate governance regulations. It should be pointed out that the operations of Investor Relations have been entrusted to an independent Corporate Function which reports directly to the Managing Director, with key accounts devoted to the various categories of internal and external interlocutors, with the aim of ensuring that communication will be more timely, complete and effective.

With this in mind, it has been decided to disseminate precise, exhaustive information through the delivery of communiqués and the publication of institutional bulletins (compulsory and optional periodical reports, such as the Sustainability Report, and disclosure giving details of shareholders' meetings and individual transactions on the market) and by taking advantage of both traditional paper and innovative on-line tools.

In fact, the Telecom Italia website www.telecomitalia.it has been renovated with a special area devoted to institutional investors and the retail sector. In addition to the continuous enhancing and updating of the content of the website, special care has been taken to provide information on the performance of shares and corporate events.

In 2002, the company organized more than 25 formal encounters with the market (with analysts, institutional investors and members of the national and international specialized Press). They took the form of quarterly conference calls, road shows, participation in conventions, Press conferences, to which must be added daily dealings with all the financial analysts and investors both through direct meetings or by phone, to supply them with the information they need for their activities.

In addition, the annual meeting was held in Milan on February 14 and 15, to present the guidelines of the Group's industrial and financial plan for 2002-2004 and, for the first time, a special event was organized in Rome on July 18 and 19 called "Technology Day", to illustrate the development of innovative technologies and services of the Telecom Italia Group to the financial community.
Finally, on February 13, 2003, within the framework of the activities undertaken to implement the rules of Corporate Governance, the Board of Directors of Telecom Italia also approved the "Procedure for the communication of price-sensitive information to the market". The document establishes ways of operating with the aim of disseminating this kind of information to the market, identifies the Functions and Structures involved in the process, and also lays down the procedure that must be observed in the presence of rumors or requests for information from people involved in the supervision or management of the market. Furthermore, the procedure lays down rules about activities to be conducted whenever there are encounters between the Company and the financial community or the Press, so as to ensure a non-selective use of corporate information.

JJ 00450

CUSTOMERS

■ CUSTOMER SATISFACTION

Customer satisfaction and direct, ongoing business with customers were the cornerstone of Telecom Italia Group's loyalty policy also in 2002. Despite the diversity of operations of the various businesses, the **customer relationship management** tools are quite similar (call centers, toll-free numbers, service centers, websites, regular customer satisfaction surveys – the latter often in collaboration with independent agencies), although tailored to the type of customer and service delivered.

In 2002, customer care at Telecom Italia S.p.A. - **Domestic Wireline** was based on 169 toll-free numbers, 100 service centers and the company website. The helpdesks answered nearly 64 million calls, while the website was visited around 4 million times. Monthly surveys on customer satisfaction produced the following feedback:

- customers satisfied with line operations were on average over 90% (90.9% residential customers and 89.2% business customers);
- 64% of residential customers and 50% of business customers receive a solution to their problems in a single telephone call, a one-call solution;
- 77% of residential customers' repairs and 74.6% of business customers' are carried out within the 2nd day after being reported;
- Residential customer satisfaction with fault repairs measures 92.7% and business customer satisfaction 83%;
- Executive customer satisfaction levels are high and, on average, over 80%.

The other companies belonging to the Domestic Wireline Business Unit, operating in various markets, use similar tools, adapting them according to their specific customers.

The organizational model of the TIM group (**Mobile** Business Unit) consists in extending the controlling company's model to all affiliates. Its customer care policies are underpinned by nationwide sales and service networks and services (toll-free numbers, call centers, websites) that are easily and regularly used by customers, who particularly appreciated the effectiveness of these services in 2002. Customer satisfaction was 83.9% for the TIM call center, 90.3% for the Stet Hellas call center and, on average, around 70% for the call centers run by the companies operating in South America.

To improve customer satisfaction, both Entel Chile and Entel Bolivia (**Latin America Operations**) set up call centers, toll-free numbers dedicated to segments of its customer base, sales points, service centers and websites; the call centers were the most successful service with as many as 3.2 million calls in Bolivia.

All companies in the Seat group (**Internet & Media** Business Unit) employ dedicated toll-free numbers and call centers, greatly used by customers, and corporate websites for customer relationship management. Seat Tin.it also uses innovative web-based forms of contact with customers. The La7 call center and MTV toll-free number are dedicated to customers who have signal reception problems.

As regards the **Information Technology Market** Business Unit, the group leader, Finsiel, manages customer relations through dedicated toll-free numbers, websites/e-mail (with more than 70,000 hits in 2002) and automatic call centers. The help desk – the main service for customer satisfaction - was used to interview customers by telephone in order to monitor customer satisfaction.

In the companies forming the **Information Technology Group** Business Unit, customer service was guaranteed by toll-free numbers, service centers and websites/e-mail; in 2002, Sodalia and Webegg's sites had a very high viewing rate. Saritel's service procedures are diversified according to the services delivered. Customer satisfaction with Sodalia's communication and supply of service was around 70%.

ISO 9000 **certifications** were obtained by companies belonging to all Business Units and operating activities in the Group, including Telecom Italia S.p.A. – Domestic Wireline, TIM, Stet Hellas, Maxitel, Entel Bolivia, Banksiel, Saritel and TILab. Digitel Venezuela and Entel Chile expect to obtain them in 2004. Part of TIM's network operations are certified according to the ISO 14001 standard concerning the environmental management system. The same certification is pending for Telecom Italia's network; TILab has already obtained it for its Environment, Health & Safety system. A number of companies obtained special certifications for specific activities.

JJ 00451

SUPPLIERS

■ CONTRIBUTION TO SUPPLIERS OF THE TELECOM ITALIA GROUP

To quantify Telecom Italia Group's business with suppliers, consumption of outside supplies and services and industrial investments are shown below:

(millions of euro)	2002		2001	
TELECOM ITALIA GROUP				
* Consumption of raw materials and outside services (net of the telecommunications license fee or charge) **(A)**		12,127		12,518
- *of which related parties* ***(a)***	*469*		*586*	
* Industrial investments **(B)**		4,842		8,164
- *of which related parties and capitalized internal construction costs* ***(b)***	*1,130*		*665*	
*** Total contribution (C=A+B)**		**16,969**		**20,682**
- *of which related parties and capitalized internal construction costs* ***(c=a+b)***	*1,599*		*1,251*	
*** Net total contribution (C-c)**		**15,370**		**19,431**

■ QUALIFICATION

The supplier qualification process is centralized for all Telecom Italia Group companies through application of common general criteria, but taking into account product/service-specific parameters or checklists.

Qualification can be of three typologies, each preliminary to the subsequent assessment:

- Basic (sales, safety, social responsibility, compliance with environmental policies, etc.);
- Economic-Financial (examination of financial statements and evaluation of specific indicators);
- Technical-Organizational (actual capability to produce or supply products and services).

Qualified suppliers are listed in the Telecom Italia Group Register of Vendors by product category.

The Group's procurement policy is based on competition between qualified Vendors in terms of purchase cost, procurement time, and quality of supplies.

A similar, but more simplified, selection process is applied to subcontractors, the results of which determine authorization to subcontract.

■ VERIFICATION

The quality of supplies/services is monitored by means of the product/service-specific Vendor Rating based on technical, commercial and administrative evaluations.

Assessments are made both at centralized level during supplier qualification and by the individual companies in the Telecom Italia Group during the term of contract.

The latter assessments may be annual or six-monthly and the number of assessments can vary according to performance resulting from the Vendor Rating.

■ TRANSPARENCY

Transparency is assured in relationships with suppliers by:

- informing suppliers of the results of the Vendor Rating in order to agree on improvements;
- informing suppliers of the verification system, illustrating all aspects related to the specific monitoring procedure in documents enclosed with contracts;
- on-line bids via the Corporate Internet site, allowing suppliers to know developments and the final results in real time;
- including health & safety and environmental standards in bidding documents and related specifications.

JJ 00452

COMPETITORS AND REGULATORY FRAMEWORK

APPROACH

OLO (Other Licensed Operators), ISP (Internet Service Providers) and other television licensees can - at one and the same time - be for Telecom Italia:

- **Competitors** and participate in defining rules for fair competition and for achieving convergence in communications. Creation of balanced, stable, predictable rules is a target shared by all businesses in the sector.
- **Partners** in development of new services and new business models. In the recent past, development first in mobile telephony followed by Internet was also the result of innovations proposed by various businesses.
- **Customers.** Telecom Italia's organization comprises a Wholesale Division, which sells a wide range of services. Telecom is one of the first operators in Europe to have offered services such as the permanent virtual channel, partial lines, wholesale direct lines, and shared access.

PARTNERSHIPS

The Telecom Italia Group joined the digital TV sector with La7 and MTV, actively participating in television associationism and starting experimentation on its own sites.

At European level, relations with institutions in the industry increased. Telecom Italia supports various initiatives, including a market and investments strategy for e-Europe.

Group companies operating in South America, such as TIM Perù and Wireline Bolivia, collaborated with competitors in numerous projects.

The principal associations in which the Group actively participates are:

- **ETNO** (European Telecommunications Network Operators' Association) founded to promote development of a competitive and efficient European market for telecommunications. Telecom Italia is a member of the Executive Board of the Association and chairs the Sustainability Task Force;
- **ITU** (International Telecommunications Union) which aims to support development of the industry internationally through cooperation between the public and private sectors. Telecom Italia, TIM and TILab participate in, and often lead or coordinate, many study groups.
- **GSM Association** which promotes global development of wireless communications guaranteeing interoperability between operators, equipment, services and roaming, in which TIM was recognized technological leadership in addressing and defining strategies for development of global radiomobile services worldwide.

Participation in the Task Forces EIRUS (European Ipqm and Rqms UserS) in Europe and QuEST (Quality Excellence for Suppliers of Telecommunications) in North America allows the Telecom Italia Group to be informed of developments in technical quality monitoring processes applied by the leading operators and manufacturers of telecommunications products and systems.

JJ 00453

REGULATORY FRAMEWORK

The new regulatory framework will be governed by new standards which will be introduced in national regulations by incorporating the EC Directives in the "'99 Review" relating to electronic communication networks and services (directives concerning "Access", "Authorization", "Framework", "Universal Service" and "Data Protection"). The new standards will be included in the national regulatory framework by July 24, 2003. In this connection, Law No. 166 of August 1, 2002 gave the Government a mandate to implement the new directives, and to adopt a code of legal and regulatory measures in the field of TLC. Furthermore, the European Commission published Recommendations on important product and services markets in electronic communications, as well as Guidelines for market analysis and the evaluation of significant market power.

There follows a brief description of the standards adopted during 2002.

RATE REBALANCING

Within the framework of the price cap formulas and in observance of Resolution No. 847/00/CONS of December 11, 2000, the price adjustments of February 1, July 1, and December 30, 2002 became effective and further reduced telephone expenses for residential and business customers. The adjustment of basic subscription charges was accompanied by further price reductions for local, inter-district and international calls.

On August 5, 2002, the National Regulatory Agency began a public consultation with Resolution No. 183/02/CONS on the review of the price-cap formulas with effect from 2003.

INTERCONNECTION AND LOCAL LOOP UNBUNDLING

In compliance with the rules laid down in Resolution No. 4/02/CIR, on April 18, 2002 Telecom Italia published the Interconnection Reference Plan (OIR) which contains technical and economic conditions for using the network, both in terms of switched transport and local loop unbundling to the last mile. The new plan offers generalized reductions on the services distributed to interconnected operators. On February 27, 2003, the National Regulatory Agency approved the OIR together with the criteria for changing the charges of the OIR for the next 4 years (the so-called network cap). In compliance with Resolution No. 5/02/CIR, on April 30, 2002 Telecom Italia published the new flat-rate interconnection rate for Internet access known as FRIACO. The terms of supplying Partial lines according to the 2002 price list were published on the same date.

ADSL BROADBAND ACCESS SERVICES

On September 30, 2002, Telecom Italia presented a new ADSL wholesale rate plan, based on a flat rate, which enables an operator to separately acquire access and "carry" data traffic to its point of presence. These changes, together with simultaneous price reductions for unbundling and shared access services led the National Regulatory Agency to grant approval of Telecom Italia's new "Alice time" rate plan, on September 25, 2002.

EQUALITY IN INTERNAL/EXTERNAL TREATMENT

In Resolution No. 152/02/CONS, the National Regulatory Agency approved measures that are intended to ensure the full application of the principle of equality in internal and external treatment on the part of fixed telephone operators with significant market power. These measures concern accounting reports, the ways in which services are offered to other operators, the application of the Network Cap model to the interconnection price list and *unbundling*, and ways of verifying the terms of the plans offered to the public.

GENERAL TELEPHONE DIRECTORY

In Resolutions No. 36/02/CONS and 180/02/CONS, the National Regulatory Agency established the rules and organizational methods for the creation and supply of a general telephone directory containing the numbers of subscribers to the services of all fixed and mobile telephone operators. The creation of the single database will be organized within the regulatory framework agreements stipulated among the various operators.

MOBILE NUMBER PORTABILITY

In Resolution No. 7/02/CIR, the National Regulatory Agency issued the regulations for the pricing of Mobile Number Portability. The prices which the Recipient (the operator who acquires the customer with the same number) must pay to the Donor (the operator who gives up the customer) will be established by the National Regulatory Agency and must not, in any case, be higher than the prices for Number

Portability on fixed networks. In addition, the customer migrating to another operator has the right to use up any credit remaining on prepaid cards.

- **UNIVERSAL SERVICE**

  Telecom Italia continues to maintain its obligation to provide certain services – including phone services - at "accessible" prices. Such services, which are guaranteed in unprofitable geographical areas to low-profile customers, constitute the so-called "Universal Service", for the supply of which Telecom Italia sustains a "net cost". On December 23, 2002, the Infrastructures and Networks Commission of the National Regulatory Agency approved the measure in which the net cost sustained by Telecom Italia to provide the Universal Service in 2001 was estimated at euro 40.28 million, to which Telecom Italia itself contributes 42.68% (euro 17.19 million).

- **EQUALITY FOR ISP/OLO**

  In its implementation of Law No. 59/02, the National Regulatory Agency declared that Internet Service Providers (ISP) are to be considered on an equal basis with other licensed operators, granting ISPs the right of access to the prices on the Interconnection Reference Plan (OIR), and to ask the Ministry of Communications to grant them the right to use numbering resources for Internet services and for the routing of the traffic involved. In implementation of the above-mentioned law, the National Regulatory Agency made known that Telecom Italia and Wind were "Significant Market Power" (SMP) operators in the intermediate market for the termination of calls destined for Internet, and Telecom Italia was an SMP in the market of final Internet access services from the wireline network using dial-up technology.

- **LEASED LINES**

  In Resolution No. 59/02/CONS, the National Regulatory Agency approved the wholesale plan of charges for leased lines for OLO and ISP in compliance with the obligation to levy charges based on the "retail-minus" principle established in Resolution No. 393/01/CONS.

- **LICENSES**

  DPR No. 211 of August 1, 2002 changed the period of individual licenses in the TLC sector from 15 to 20 years (with an extension for those already issued).

- **TLC INFRASTRUCTURES**

  Legislative Decree No. 198 of September 4, 2002 establishes the fundamental principles with regard to the installation and alteration of TLC infrastructures that are regarded as being strategic, and fixing precise terms for the issue of authorizations, abrogating the procedure of environmental impact assessment (VIA) and limiting the financial responsibility of companies to expenses associated with installation operations, digging and occupation of public property. Law No. 166 of August 1, 2002, also defined the new standards relating to the installation, access and sharing of multi-service cables and cable ducts that need to be built following construction and maintenance work on civil works.

- **EVOLUTION OF THE EC REGULATORY FRAMEWORK**

  New directives have been published and are in the "99 Review":

  - ✓ Directive 2002/19/CE concerning access to electronic communications networks and related resources, and interconnection of the said networks (known as the "Access" directive);
  - ✓ Directive 2002/20/CE concerning authorizations for electronic communications networks and services (known as the "Authorizations" directive);
  - ✓ Directive 2002/21/CE which establishes a common regulatory framework for electronic communications networks and services (known as the "Framework" directive);
  - ✓ Directive 2002/22/CE concerning the universal service and the rights of users with regard to electronic communications networks and services (known as the "Universal Service" directive).
  - ✓ Directive 2002/58/CE on the treatment of personal information and on the safeguarding of privacy (known as the "Data Protection" directive)

  The new standard must be incorporated in national regulations by July 24, 2003 and, in this context, Law No. 166 of August 1, 2002 gave the Government a mandate to introduce the new directives and to adopt a code of legal and regulatory measures for TLC. In addition, the European Commission is in the process of defining a recommendation concerning important markets for services and products with the aim of imposing, changing or revoking the observance of regulations.

THE STATE AND OTHER INSTITUTIONS

In 2002 the contribution of Telecom Italia Group to Public Administrations, in Italy and internationally, was euro 1,090 million.

Telecom Italia Group (millions of euro)	2002	2001
Social security and national health insurance contributions	1,199	1,225
Direct taxes	(716)	925
Indirect taxes	115	120
TLC license fees	431	524
Ministry of Economy and Finance (dividends)	61	61
	1,090	2,855

In 2002, the Group received capital grants from Italian Public Administrations only amounting to euro 42 million (euro 22 million in 2001), including euro 23 million pertaining to Telecom Italia S.p.A. .

FUTURE GENERATIONS

Respect for the environment, which is an integral part of Telecom Italia Group's commitment in adopting Sustainability as one of its principal values of reference, ranks among the Group's strategic objectives and is the subject of continuous verification.

■ ENVIRONMENTAL PERFORMANCE INDICATORS

The Group identified four major elements by which it measures the effectiveness of its environmental management system and establishes programs to improve performance:

- waste management;
- consumption of natural resources and energy;
- air quality and climate changes;
- electromagnetic emissions.

All information reported herebelow has been obtained by processing appropriately reclassified management accounting data.

■ Waste management

The waste generated by Telecom Italia derives from constant innovation and development of its infrastructures and from day-to-day business operations.

Waste, primarily consisting of telecommunications materials and products, has been managed by a single company at national level since 1999. Disposal processes favor reuse and recycling options, whenever possible.

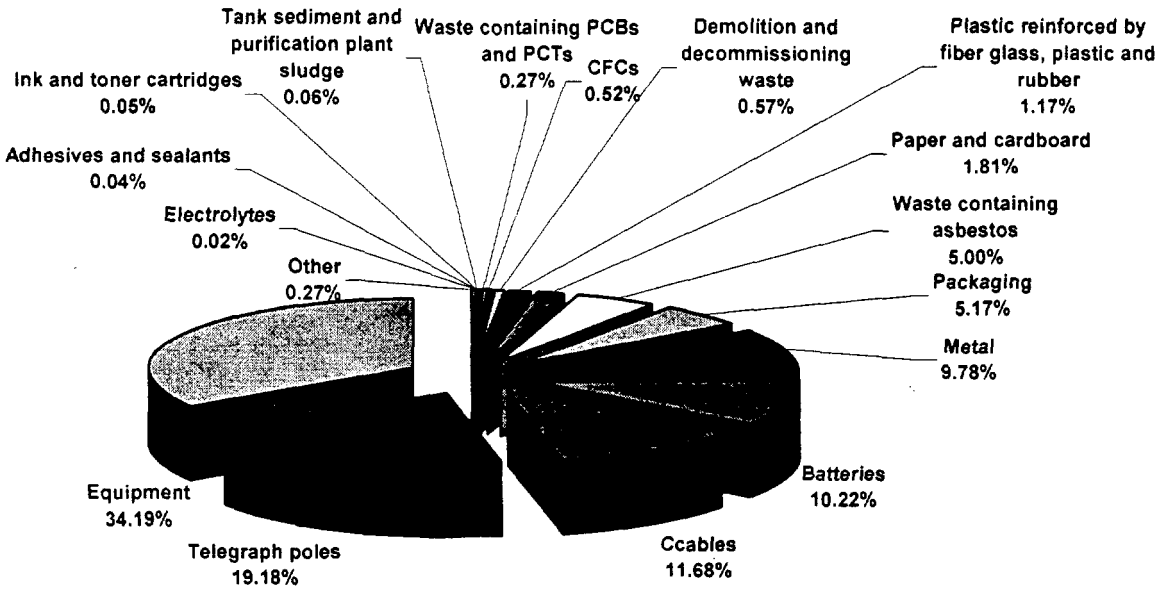
The data reported herebelow refer to the financial year 2001 and Telecom Italia S.p.A..

In 2001, generated waste totaled 27,915 tons, a decrease of nearly 34% over the previous year. Compared with the year 2000, there was a significant reduction in disposal of equipment and batteries, which were related to decommissioning of analog telephone exchanges, poles and cables.

Hazardous waste accounted for 29.7% of the total amount of waste (against 36.9% in 2000) while the percentage of waste destined for recovery was 83% (89% in 2000).

JJ 00456

Types of waste produced by Telecom Italia S.p.A. in 2001



■ Consumption of natural resources and energy

The natural resources used directly by the company include materials employed in material manufacturing processes and products acquired and operated directly or made available to the public:

- **water**, for civil use. In 2002, consumption rose 19%.
- **diesel oil and natural gas** used in heating systems. In 2002, diesel oil consumption decreased by more than 14%, whereas natural gas consumption increased by just over 4.3%; from an energy standpoint, this means a global reduction of 0.68% (from consumption of 825,151 GJ in 2001 to 819,540 GJ in 2002). Thanks to an optimization plan currently underway diesel oil consumption for heating purposes is expected to be reduced by 3% in 2003.
- **fuel** for corporate fleet vehicles. Consumption was reduced by around 11.5% compared with 2001, as a result of a reduction in vehicle numbers and distances covered. A project is in place that should lead to the reduction of the corporate fleet by approx. 4,000 vehicles in 2003 and the introduction of a certain number of vehicles using a gasoline and methane fuel mixture aimed at reducing polluting atmospheric emissions.

Electricity for power for corporate infrastructures and buildings is classed as indirect consumption of natural resources as the majority of electric power generation in Italy utilizes fossil fuels (approx. 76%).
As a result of action to improve the energetic efficiency of infrastructures over the last three years, the Group succeeded in achieving an annual reduction in the consumption of electricity used to power the telecommunications network exceeding 3%. The action plans should also make it possible to continue the declining trend in 2003.
The Group is experimenting alternative sources of electric power generation to power the Base Radio Stations (SRB) including photovoltaic and wind power production. In 2002, a program was launched to produce four SRBs in Calabria able to produce a total of 80KW. It is estimated that for every SRB with a power of 18KW there will be a daily saving of 110 liters of diesel oil; this significantly reduces pollutant emissions to air (particulate, carbon monoxide, nitric oxide).

2003 Targets for Telecom Italia S.p.A.:

a) to reduce consumption by 3% (diesel oil and natural gas);
b) to reduce the corporate fleet by approx. 4,000 vehicles;
c) to reduce wireline network electric power consumption by 3%.

■ Air quality and climate change

The Group's contribution to greenhouse emissions, primarily carbon dioxide (CO_2), is basically due to use of fuels for heating and transport and, indirectly, to consumption of electricity.
In 2002, Telecom Italia S.p.A.'s emissions amounted to 950,304 tonnes of CO_2; the estimated net reduction compared with the previous year was above 13.0%.

JJ 00457

Electricity consumption [GWh]	2002	2001

■ Electromagnetic emissions

The Telecom Italia Group's attention to the issue of electromagnetic emissions can be summed up in the following commitments and actions:

- absolute compliance with the legislation in force in the countries in which it operates. The corporate process is structured on rigorous management of project engineering, of the selection of sites, and of installation of systems;
- careful and scrupulous management of company installations throughout the whole life cycle, in compliance with additional internal efficiency and safety standards;
- use of, and constant research for, leading-edge technology tools for control and investigation activities. Specifically, as far as regards GSM, a procedure for monitoring the fraction of power emitted with respect to the maximum rated power is currently in an advanced stage of development.
  Regarding UMTS, definition of methodologies of analysis and simulation for estimation of radioelectric power in various propagating environments and multimedia traffic contexts is in the process of refinement. The first results have already been presented at a number of international conferences. The technology developed by TILab for measurement of radiofrequency power generated by a base radio station will shortly be integrated by a sensor that will allow direct measurement of electromagnetic pollution.
  In 2002, TIM monitored 2,896 transmission installations out of 4,059, spending euro 3,936,064.
  As far as regards cell phones marketed through its sales network, TIM makes a selection based on level of technological innovation and Standard Absorption Rate (SAR) measurements, to guarantee reduced electromagnetic emissions levels.
- cooperation and support in medical-scientific studies. Specifically, Telecom Italia S.p.A., in cooperation with a number of Italian universities and national and international organizations, promoted investigations to check the emission values of electromagnetic radiations and possible impacts.

■ ENVIRONMENTAL MANAGEMENT

An Environmental Management System (EMS) is under development; implementation of the system is a target to be progressively extended across the Group.

[1] The consumption figures for Seat S.p.A. refer to the 7 company offices where electricity supplies are registered in the name of the company.

Telecom Italia Lab developed an integrated system for environmental management in accordance with the standard UNI EN ISO 14001 and for Health & Safety management in accordance with standard OHSAS 18001. The Environmental Management System obtained certification by DNV (Det Norske Veritas, an internationally accredited certification agency) in 2001.
Additionally, Telecom Italia Lab conducted research on behalf of Telecom S.p.A. and TIM, to promote the improvement process in terms of sustainable development.
The project for UNI EN ISO 4001 certification of the Environmental Management System of the **Network Function** of the **Domestic Wireline** (DW) Business Unit is in the stage of completion. In 2002, audits were carried out by the certification agency IMQ-CSQ, all with positive results, in the Network's territorial structures "Centro 2" (which covers Lazio, Abruzzo, Molise and Sardinia), Milan, "Centro-Nord" (which covers Emilia Romagna, the Marches and Umbria), "Sud 2" (which covers Calabria and Sicily), Piemonte-Valle d'Aosta, plus Network's central Function SQ, which coordinates the project.
Audits at the remaining structures will be finished by July 2003. On completion of the project, all certificates issued for the individually certified structures will go to form a single ISO 14001 certificate applying to the whole Network Function.
TIM is carrying on the project, begun in 2001, for implementation and certification of the integrated system for Quality Management and Environmental Management, respectively developed to standard UNI EN ISO 9001 and UNI EN ISO14001, in its territorial organizations of the Network Function. To date, IMQ-CSQ awarded certification to the Network organizations in Piedmont, Liguria, Valle d'Aosta, Calabria and Sicily; certification is expected to be extended to Campania, Basilicata and Apulia by April 2003. The project will be completed in 2004.

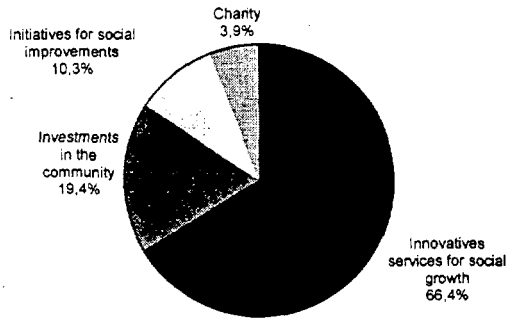
THE COMMUNITY

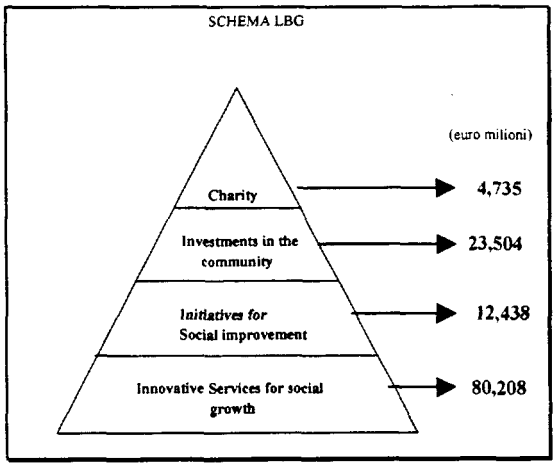
In 2002, the Telecom Italia Group companies' commitment to the community was estimated at euro 120,885 million, equal to 1.6% of the Group's operating income.
This was calculated using appropriately reclassified management accounting data and is a partial quantitative estimate of the cost of community projects and initiatives recorded in the accounts according to several criteria.

■ CONTRIBUTION CLASSIFICATION (LONDON BENCHMARKING GROUP MODEL)

The London Benchmarking Group (LBG), established in 1994, comprises 60 leading international companies and is currently the European benchmark in evolution of social-environmental reporting.

Distribution of the social and enviromental contribution of the Telecom Italia Group euro 120,885 milion





This model reclassifies contributions into four different categories. The pyramid diagram reflects the possibility of measuring the benefits and business returns arising from the various activities:
- at the base of the pyramid, the return can easily be measured since it is connected to the core business;
- at the apex, donations are strictly linked to the Group's sense of social and moral responsibility.

The four category classification proposed by the LBG model is not straightforward as a single initiative may have effects in more than one different category. As a general rule, preference has been given to comparability with previous years.

Classification according to this model, compared with 2001, shows a general increase in the contribution also as a result of introducing a more analytical data entry system. Nevertheless, the share of investment in each category is basically the same as in 2001.

COMMUNITY ACTIVITIES SELECTED TO FORM THE CATEGORIES ACCORDING TO THE LBG MODEL

CHARITY	Funding to Associations and liberal grants Humanitarian projects [CRALT] Donations
COMMUNITY INVESTMENTS	Scholarships, internships Education and employment projects Environmental Management Development Electromagnetic emissions – monitoring and measurement Health & Safety Management System – improvement Environment, Health & Safety research Energy saving schemes Territorial safety plans Civil Protection
SOCIAL INITIATIVES	Projects in the social field Health and social solidarity related events Culture, arts and sports events
INNOVATIVE SERVICES FOR SOCIAL GROWTH	Research and development for innovative services Support for university research Technological innovation projects Initiatives and projects promoting social growth E-learning platform project

- **Charity**

Group companies in Italy and other countries supported various initiatives including "Telefono Azzurro" (helpline for children), AIRC (cancer research), Telethon, San Patrignano (community for recovery of drug addicts), donation of medicines to the needy and surgical equipment to public hospitals in Bolivia, support for the populations hit by the earthquake in Molise and by flooding in Brazil and for the victims of domestic violence in South America.

- **Community investments**

Group activities to improve infrastructures (building and technological infrastructures) from a safety and environmental viewpoint continued in 2002.
Numerous scholarships were offered by the Group ("Master Bocconi MEGeS", "Borsa Scuola Superiore di Specializzazione in TLC", "Borsa di studio Master LUISS"; "Consorzio ELIS" (CONSEL); "Federazione Nazionale Cavalieri del Lavoro"). Additionally, the "TIM Fellowship Programme", conceived with the aim of creating a preferential channel for identifying the best candidates, through promoting lifelong learning and professional development of university students in the new economy, mobile business and ICT, was started up.
The Project "Telecom alleniamoci alla Vita" (Telecom let's train for life) is conceived with the aim of promoting social and individual growth of the young through the values of sport. It is a three-year, nation-wide project for schools of all types and levels, targeted and diversified for students, teachers and families by an integrated package of educational materials and aids: teaching cards, posters, films, CD-Roms, guides and booklets.
Support for the Children's Hospital "Ospedale Pediatrico Bambino Gesù" in Rome for a research project to set up human endothelial cell banks to treat diseases and pathological injuries resistant to pharmacological therapy.

JJ 00460

Social initiatives

Participation of the Telecom Italia Group in the 13th edition of the television marathon Telethon, providing Group facilities and technology to raise awareness for and most successfully support fundraising for muscular dystrophy and other genetic diseases. The Group also provided support in the form of an important press campaign in the leading national and regional newspapers to maximize circulation of the message of the appeal.

Support for the 19th edition of "ViviCittà", recognized as a major social and sports event, with stops in 60 cities in Italy (and 30 prisons and juvenile detention centers) and 50 cities worldwide, covering a total distance of 14,535 km and involving one million participants. Africa was chosen as the testimonial for the 2002 edition, named "Run for rights".

Support for the "Bread project", an educational program for alternative nutrition in the poor regions in Brazil aimed at eliminating infantile malnutrition through education for 10,000 people.

Innovative services for social growth

These basically refer to research and development activities by TILab for the Group companies in ICT, which have reverberations of great social importance.

The E-Learning platform, begun in 2001, was completed. This service has made it possible to deliver "distance" learning and mixed learning (traditional classroom teaching supported by and/or replaced by on-line learning). In the distance learning field, the "Application Service Provider" facility (interactivity with the customer's IT structure or setting up the learning package on the customer's premises) proved the key solution for the future of training. Teaching packages were designed and produced and put into operation, as well as the E-Educational branch for formative services for Schools and Universities.

In 2003, " **PROGETTO ITALIA**" was launched programming community investment initiatives.

Progetto Italia, publicly presented on January 21, 2003, is a further sign of the will to give a unitary and strategic sense to all the resources and energies spent by the Group on various fronts of activities in the cultural, social and sports field.

Specifically, the aim of the program is to promote growth of the country through improving diffusion of culture and cultural values.

With a budget of euro 30 million, Progetto Italia comprises more than 30 initiatives. Each of them is conceived and realized directly by Telecom Italia, either independently or in partnership allowing the Group to actively participate with a contribution of ideas and technologies.

JJ 00461

RESEARCH & DEVELOPMENT

During 2002, the R&D activities of the Telecom Italia Group were largely conducted by TILAB, also in collaboration with Pirelli Lab, dedicating 1,081 employees

The activities involved research and testing in the field of fixed, mobile and Internet telecommunications.

As far as Internet and mobile applications are concerned, research activities were focused on testing integrated applications and technological solutions for multimedia, the definition of the manner and methods of accessing contents and managing broadband users, creating and evaluating hi-tech solutions for user environments (terminals, domestic cabling and applications platforms).

Activities in the sphere of switching and networking were geared to the evolution of IP networks, developing Content Delivery Network architectures for an efficient distribution of multimedia content. Particular attention was also focused on Wireless LAN and on innovative solutions for telephone services on package networks.

Research into network infrastructures involved both the metropolitan and transport network, with the testing of new automatic fiber optic switching architectures, and the access network, with the proposal of innovative solutions based on copper wire and fiber optic connections.

In 2002, these research activities led to the registration of 45 patents, an increase of 13% compared to the prior year.

Overall R&D expenditures incurred during the year amounted to approximately euro 121 million. The total of grants and low-interest loans to support R&D costs, already received or awaiting receipt by TILAB, amounted to approximately euro 12 million.

JJ 00463

LITIGATION

There follows a description of the main disputes and litigation in which the Telecom Italia Group is involved at December 31, 2002. Except where specifically mentioned, the Telecom Italia Group did not make any provision to the risk reserves because of the absence of definite and certain elements and/or because a negative outcome to the litigation is not considered probable.

- **DISPUTE CONCERNING RESOLUTIONS PASSED AT TELECOM ITALIA SHAREHOLDERS' MEETINGS**
  Personal action is pending for damages claimed for a total of euro 18.9 million brought against Olivetti, Telecom Italia and the Chairman and Deputy Chairman pro tempore. The claim is based upon the alleged non-fulfillment of the commitments contained in the "Offer Document" relating to the takeover and exchange bid by Olivetti and Tecnost for Telecom Italia in 1999, and also for the resolution passed by the Shareholders' Meeting of January 14, 2000 for the buy-back of savings treasury stock.

- **UNIVERSAL SERVICE**
  In January 2002, the Regional Administrative Court (TAR) of Lazio ruled in favor of the appeal presented by Omnitel to obtain the annulment of the resolution passed by the National Regulatory Agency on the subject of the "Applicability of the formula for sharing the net cost of the universal service for the year 1999", that was also contested by Infostrada. In particular, the TAR ruled that the dispute concerning the errors in the administrative proceedings was valid whereas it turned down the plea over the merits of the regulation, which in any case will be updated.
  Meanwhile, Omnitel did not pay its share of the universal service (some euro 9 million) and the Ministry of Communication was thus unable to pay the amount due to Telecom Italia for the costs it incurred in 1999 to supply the universal service.

  ***

  In the early months of 2002, Telecom Italia was notified of the appeal presented by Omnitel to the TAR of Lazio and the extraordinary appeal filed by Wind to the Head of State to annul the resolution containing the regulations on the "Universal Service: Applicability of the formula for sharing the net cost of the universal service for the year 2000".
  In addition to the suspension of the efficacy of the law, Omnitel also requested that the case be referred to the Court of Justice of the European Community for a preliminary opinion on the correct interpretation of the EC directives. This being the case, Omnitel and Wind did not pay their share of the contribution for supplying the universal service for the year 2000 which amounted to euro 12 million.

- **DATA TRANSMISSION SERVICES AND INTERNET ACCESS BASED ON X-DSL TECHNOLOGY**
  Following a preliminary investigation into Telecom Italia's conduct with regard to the supply of basic band direct lines and the offer to its business users of broadband data-transmission and Internet access services based on x-DSL technology, without any corresponding wholesale rate plan for its competitors, in April 2001 the Antitrust Authorities imposed a fine of euro 59 million on Telecom Italia. In November, the TAR of Lazio reduced the fine to euro 29 million which was paid, with reserve, in January, in relation to a proposed appeal to the Council of State. The appeal was then filed to obtain the integral annulment of the contested proceedings, which was disputed on the basis of general unreasonableness and lack of motivation and preliminary investigation.
  In the meantime, claims for the payment of damages have been brought before the competent civil courts by Albacom, Infostrada, AIIP, Unidata, Data Service and other operators, for the alleged abuse of a dominant position on the part of Telecom Italia for the same conduct contested by the Antitrust Authorities.
  In January 2003, the Court of Appeals of Rome sentenced Telecom Italia to pay a total of about euro 2 million as compensatory damages to Albacom, Wind (formerly Infostrada), Cable & Wireless (formerly Unidata) and Data Service.
  Similar actions are pending for claims brought by other operators.

- **GALACTICA DISPUTE**
  At the end of May 2001 a dispute arose between Telecom Italia and the Internet Service Provider Galactica S.p.A. (currently in liquidation) for failure to renew the agreement concerning the testing of an Internet access service, at a flat rate. Assuming the alleged illegality of not renewing the agreement, Galactica claimed damages, challenging Telecom Italia not to interrupt the distribution of the service.
  In February 2002, Galactica therefore presented a new summons in action for damages suffered as a result of the alleged unfair trade practices of Telecom Italia.
  In May 2002, the magistrate judge combined the two cases.

JJ 00464

On October 16, 2002, the company Servinternet S.p.A. (formerly Galactica) in liquidation, presented a third summons in action against Telecom Italia to appear before the Milan Courts. This case has also been combined with the other two cases pending before the same magistrate judge.

- **ALLEGED UNFAIR TRADE PRACTICES BY TELECOM ITALIA**

  Following a petition by 27 operators of the competition in which Telecom Italia was denounced for alleged market strategies hurting market development, in regulation No. 179/01/CONS, the National Regulatory Agency objected to violations committed by the Company, and proceeded to commence the relative procedures for sanctions with independent and specific resolutions.
  A counter-action is pending before the TAR of Lazio for both the presumed procedure and the successive resolutions.
  In the meantime, the National Regulatory Agency notified Telecom Italia of certain proceedings relating to administrative sanctions which were contested by the Company before the TAR of Lazio.

- **SEAT PAGINE GIALLE/DE AGOSTINI**

  Arbitration proceedings initiated by De Agostini are pending against Seat Pagine Gialle, Finanziaria Web, Matrix and Buffetti group for the alleged non-fulfillment of the agreement signed in 2000 governing – among other things, the sale of the 40% stake in Finanziaria Web (which, in turn, controls Matrix) by De Agostini to Seat. Maintaining that all the conditions stipulated in the contract were met, De Agostini is asking for the specific execution of the agreement and, therefore, the transfer of its Finanziaria Web shares to Seat at the price of euro 700 million, with payment beginning on June 30, 2003.

- **SEAT PAGINE GIALLE/CECCHI GORI**

  On June 13, 2002, the Rome Court rejected the complaint filed by Cecchi Gori Group Media Holding and Fin.Ma.Vi. to find the financial statements and related balance sheet at December 31, 2000 of Cecchi Gori Communications - CGC (now Holding Media Communications) null and void and to find the resolutions passed by the Shareholders' Meeting of April 27, 2001 invalid. Cecchi Gori Group Media Holding and Fin.Ma.Vi appealed the decision, re-proposing the complaint in the first degree court.
  Pending at this date is i) the case for the annulment of the pledge of the CGC shares to guarantee the proper fulfillment of all the obligations covered by the contract under which, on August 7, 2000, Seat Pagine Gialle acquired control of CGC ii) the case for a declaratory judgement finding the resolution passed by the CGC Extraordinary Shareholders' Meeting invalid and to change the quorum for voting in the Board of Directors' Meeting and the Shareholders' Meeting. In August 2001, Cecchi Gori Group Media Holding and Fin.Ma.Vi. also initiated arbitration proceedings to find for the rescission or the invalidity of the contract for the acquisition of Cecchi Gori Communications dated August 7, 2000, signed between Seat Pagine Gialle and the Cecchi Gori Group, and to sentence Seat Pagine Gialle to return 75% of the share capital of Cecchi Gori Communication or to pay damages for breach of contract.

- **FASTWEB**

  On July 11, 2001, Telecom Italia and Fastweb signed the "Contract for access and utilization of civil infrastructures" in compliance with the ruling handed down by the Antitrust Authority, which obliged Telecom Italia to make its civil infrastructures available to competing operators for the supply of interactive and multimedia services, at non-discriminatory terms and prices aligned to costs.
  Telecom Italia was subpoenaed on August 29, 2002 to appear before courts in action brought by Fastweb so that the judge could ascertain and state the precise amount of consideration due for the access and the utilization of said infrastructures, eliminating any doubts arising from the interpretation of the clause governing the determination of price.
  Telecom Italia asked, by way of a counterclaim, the payment of some euro 46 million as consideration for the services contained in above said contract.

- **FEE CONCERNING ARTICLE 20, PARAGRAPH 2 OF LAW NO. 448 OF DECEMBER 23 1998**

  The Ministerial Decree of March 21, 2000 introducing Italian Law No. 448 of December 23, 1998, which, on January 1, 1999, established a new license fee in place of the concession fee was contested by Telecom Italia, Tim, Wind and Omnitel, before the TAR of Lazio and extraordinary appeals were presented by Infostrada and Albacom to the Head of State. Furthermore, with regard to extraordinary appeals presented to the Head of State, asking for the annulment of the above-mentioned decree, the Council of State brought the case before the European Court of Justice, raising the preliminary question of the non-compatibility of the fee with Community regulations relating to telecommunications.
  Following the dispute, Telecom Italia and Tim did not proceed to pay the fee for 2000, 2001 and 2002, although the corresponding costs, included interest, were recorded in the financial statements in the pertinent years.

■ **STET HELLAS**

In 1996, Mobitel - a company in the Greek Interamerican group (now Demco Reinsurance), and, at that time, the exclusive representative of Stet Hellas - initiated arbitration proceedings to ascertain its right to receive commissions not only on outgoing traffic generated by the subscribers it had signed up, but also on incoming traffic and on that generated by customers in default of payment. It also requested the payment of the corresponding damages in addition to damages generated by the cancellation of the exclusive agency agreement with Stet Hellas.

The latter and Telecom Italia (which took over from Stet International which was already the guarantor of Stet Hellas and, as such, a party to the contracts at one time signed) presented a counterclaim seeking damages suffered as a result of the loss of the acquisition of market share caused by non-fulfillment on the part of Mobitel.

In October 2000, a partial award was ruled which, in principle, agreed with Mobitel's request for recognition of a commission also on Stet Hellas's revenues from incoming traffic; in November 2001, the Board of Arbitration affirmed its jurisdiction over the quantification of the amount of damages, besides its payment. The parties therefore indicated their final claims which can be summarized in damages for some euro 140 million on the part of Mobitel and some euro 890 million on the part of Stet Hellas and Telecom Italia.

■ **NORTEL INVERSORA**

In August 2001, a minority shareholder of Nortel filed a complaint summoning the company's appearance before the Civil Court of Buenos Aires to try and reach an agreement (which did not have a positive outcome) over the alleged irregularities in the resolution passed by the Nortel Shareholders' Meeting approving the financial statements for the year ended December 31, 2000.

The same shareholder had previously contested the resolution passed by the Nortel Shareholders' Meeting approving the financial statements at September 30, 2000. In September 2001, the effectiveness of both the aforementioned shareholders' resolutions was suspended by the Buenos Aires Court with a precautionary relief order.

In August 2002, based on complaints filed by the same shareholder, two further hearings were held to attempt reconciliation (which proved inconclusive) regarding the alleged irregularities in the resolution passed by the Nortel Ordinary and Extraordinary Shareholders' Meeting on April 25, 2002, concerning, among other things, the approval of the financial statements at December 31, 2001.

On March 3, 2003, a settlement agreement was reached with the aforesaid minority shareholder in which the same shareholder has agreed to desist from continuing with the pending legal cases against Nortel and its representatives and not to bring other similar actions against Nortel and/or its representatives. The agreement was validated by the Buenos Aires Court on March 5, 2003.

■ **BRASIL TELECOM**

There are two cases pending from 2001 brought by Brasil Telecom before the Civil Court of Rio de Janeiro (Brazil), against, respectively, Telecom Italia and Telecom Italia International and against two directors of Brasil Telecom nominated by Telecom Italia International. The suits request compensation for the damages suffered by Brasil Telecom as a result of the acquisition of CRT and the failure to participate in the auction of the SMP licenses.

■ **CHASE MANHATTAN BANK DISPUTE**

On April 5, 2002, the magistrate judge of the U.S. District Court for the District of Delaware dismissed the case against Telecom Italia (since it is no longer a direct shareholder of Iridium LLC) begun in June 2000 by Chase Manhattan Bank (now JP Morgan Chase Bank) over the U.S. $800 million loan given to Iridium Operating LLC (a subsidiary of Iridium LLC) in 1998.

The above decision was appealed by Chase, which also decided to sue Iridium Italia S.p.A., a 30%-owned affiliate of Telecom Italia (with the remaining stake divided equally between TIM and Telespazio), and the direct shareholder of Iridium LLC.

■ **TIM PCS IN BRASILE**

Following the denial of the request for precautionary measures presented by the local operators, Telesp Celular and BCP, to obtain suspension of the effect of the share transfer of about 18.3% of the capital of Solpart by Telecom Italia International to Techold and to Timepart, as well as the administrative regulations related thereto, BCP brought ordinary action against Anatel, before the Brazilian Federal Court, to obtain the nullification of the assignment of PCS frequencies to the Brazilian subsidiaries of TIM.

■ **BANCOMEXT/ETEC S.A. DISPUTE**

By order of August 12, 2002, the Civil Court of Turin issued a cautionary attachment order for all the assets of Etec S.A. (a Cuban affiliated company of Telecom Italia) and Telan (a majority shareholder of Etec S.A., a subsidiary of the Cuban government), also including the receivables from third parties up to the amount of

JJ 00466

euro 33 million.
This ruling follows an appeal presented by Banco Nacional de Comercio Exterior ("Bancomext") which claims breach of contract, on the part of Etec S.A. and Telan, concerning alleged obligations for the restitution and guarantee – to date, of an amount of about U.S. $300 million – established in a loan contract stipulated between Etac S.A., Telan, Bancuba (Central Bank of Cuba) and Bancomext. Notice of the attachment was successively served to Telecom Italia, TIM, Intesa BCI and Deutsche Telecom, which were ordered to suspend any payment to Etec S.A., up to euro 33 million.
TIM has already made a negative statement as third party pursuant to art. 547 of the Italian Civil Code.
Telecom Italia, on February 6, 2003, again pursuant to art. 547 of the Italian Civil Code, made a positive statement as third party.

- **TELEQUE COMMUNICATIONS S.P.A.**
Under the summons of November 6, 2002, Teleque Communications S.p.A., a company operating in the sector of prepaid telephone cards for international telephone services, has brought suit to summon Telecom Italia before the Rome Court of Appeals to find for alleged unfair trade practices and to obtain damages quantifiable in euro 65 million. Teleque Communications claims that Telecom Italia acquired a competitive advantage by adding, for the supply of its interconnecting services, additional costs which, vice-versa, would not have been charged to Telecom Italia's final customers of prepaid international services.

- **EXPENSE COMPENSATION TO THE MINISTRY OF DEFENSE FOR THE LIBERATION OF THE 900 BAND FREQUENCY**
The Ministry of Defense and the Ministry of Communications, with the regulations formalized in 2001, have quantified the expenses to liberate the frequency band in question, charging such expenses mainly to TIM as the licenseholder of the TAC mobile service. The liberation of the band in question, instead, was aimed at amplifying the frequency resources to be destined to GSM and, as such, to be allocated among all the beneficiary operators.
Maintaining that such judgements are not legal, since they are based upon an incorrect interpretation of Ministerial Decree 113/98 which governs the matter, said judgements have been contested before the TAR of Lazio, asking for their annulment.

- **DISPUTE CONCERNING RESOLUTION 399/02**
On March 3, 2003, the National Regulatory Agency and Wind were notified of the appeal presented to the TAR against Resolution 399/02/CONS regarding the "Current cost accounting guidelines for notified operations of wireline and wireless networks" which constitutes the presupposition for establishing the prices to be applied to operators which ask to use of the network.
Telecom Italia has contested the part of the resolution in which the National Regulatory Agency establishes that the current cost method, adopted to replace the historical cost method, should not be applied equally to the copper network, that is, the so-called "access network", for which the National Regulatory Agency has reserved the right to make future judgement and with reference to which it should continue, therefore, to apply the historical cost method.

JJ 00467

■ INTERBUSINESS SERVICES

As required by the Antitrust Authority, the accounting principles used to determine the economic values for Interbusiness services are described below. These accounting principles have been audited starting from the year 1996.
In 2002, this examination was performed by the firm of Reconta Ernst & Young S.p.A..

• ***Revenues*** are stated at market prices for competitive services and at rates established by law for services granted by license and are recorded on the accrual basis. In the case of services provided that imply the use of dedicated access lines by the final customer, the revenues also include the income from leasing such lines (valued on the basis of the rates defined in the ministerial decrees), with the consequent recognition of the same amount in costs.

• ***Direct costs***
- *labor costs* represent the cost of personnel who worked to provide such services; the cost includes salary and wages, social security costs, provisions for employee termination indemnities and other sundry costs recorded on the basis of the number of persons in the dedicated operating structures and using cost accounting standards;
- *network utilization costs* include the cost to use the regulated carrier services (usually direct connections) and the cost to use the carrier products/services offered in a competitive environment; they are therefore valued, respectively, using the rates established by law and the rates applied to all third-party customers, the same as that which occurs in the cost structure of other carriers in the sector;
- *other direct costs* refer to direct costs (advertising, marketing, service connection, operating and maintenance, etc.) and indirect costs (corporate structure costs supporting the operating lines) valued using cost accounting standards and applying specific allocation methods.

• *Depreciation:* of fixed assets directly employed in providing the services in question are determined on the basis of the estimated useful lives of the assets of Telecom Italia.

The economic results of the interbusiness services are reported as follows:

(thousands of euro)	2002 (a)	2001 (b)	Change (a-b)	
			amount	%
Revenues	70,157	88,913	(18,756)	(21.1)
Costs	(56,286)	(80,810)	24,524	(30.3)
Of which:				
Labor cost	(2,871)	(5,920)	3,049	(51.5)
Network utilization costs	(36,023)	(44,878)	8,855	(19.7)
Other costs	(17,392)	(30,012)	12,620	(42.0)
Gross operating profit	13,871	8,103	5,768	71.2
Depreciation and amortization	(17,696)	(18,439)	743	(4.0)
Operating loss	(3,825)	(10,336)	6,511	n.s.

The results for 2002 show an operating loss of euro 3.8 million compared to a loss of euro 10.3 million in 2001. Such result is due to the combined effect of the reduction in revenues that was more than offset by the reduction in costs. The impact on revenues (-21.1%) is mainly on account of a decline in customers who switched to other alternative plans. The reduction of resources absorbed by the service is due to a decline in the clientele and, in some cases, a reduction in the unit cost; in total, therefore, costs decreased by 30.3%. Depreciation and amortization show a reduction of 4.0%.

Notes to consolidated financial statements

The consolidated financial statements have been prepared in accordance with the provisions of the Italian Civil Code and are also accompanied by the Report on the Group's operations together with the Report on Telecom Italia. At December 31, 2002, a 54.94% stake is held in Telecom Italia by Olivetti S.p.A..
Reclassifications made to certain captions of the consolidated financial statements have also been made to the consolidated financial statements at December 31, 2001 for purposes of comparison.
The consolidated statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these Notes to consolidated financial statements pursuant to Article 29, paragraph 3 of Legislative Decree No. 127/1991.
The scope and principles of consolidation, the summary of significant accounting policies, along with the composition and changes in the individual components of the consolidated financial statements are set out below.

SCOPE OF CONSOLIDATION

The scope of the consolidation at December 31, 2002, which was affected by the far-reaching reorganization of the Business Units compared to December 31, 2001, includes the Italian and foreign companies listed in Annex 5, in which the Telecom Italia holds a majority of voting rights, and all other companies in which it exercises a dominant influence.

The companies in which Telecom Italia holds between a 20% and 50% investment in share capital, with voting rights, including jointly controlled companies and companies in which a significant influence is exercised, have been accounted for using the equity method.

The following changes have taken place in the scope of consolidation since December 31, 2001:

a) added to the scope of consolidation:
   - for *Domestic Wireline*: Mediterranean Nautilus Telekomunikasyon Hizmetleri Ticaret Anonim Sirketi, Latin American Nautilus Saint Croix, Latin American Nautilus Colombia Limitada and Latin American Nautilus Bolivia;
   - for *Mobile*: Timnet Usa, Starcel and Blu;
   - for *IT Market*: Agrisian;
   - for *IT Group*: Webegg group and Teco Soft Argentina;
   - for *Other Activities*: EMSA Servizi Immobiliari, IN.TEL.AUDIT, Epiclink and Netesi.

b) eliminated from the scope of consolidation:
   - for *Domestic Wireline*: Euro Datacom, TMI Italy-Canada and TMI do Brasil;
   - for *Mobile*: Autel;
   - for *Internet and Media*: Data House Group and certain minor companies in the Internet Business Area;
   - for *IT Market*: Consiel, Sogei;
   - for *IT Group*: Teco Soft Espana;
   - for *Other Activities*: Telespazio group, Emsa, Immsi, Telimm, Trainet, 9Telecom group, Indian Telecommunication Holding, Telecom Italia de Espana and Telecom Italia GmbH.

c) merged:
   - for *Mobile*: Blu in TIM, Telepolis in Stet Hellas, and Tim Celular Centro Sul and Portale Rio Norte in Tim Celular (ex Portale Sao Paulo);
   - for *Internet and Media:* H.M.C. Broadcasting and H.M.C. Produzioni in TV Internazionale;
   - for *IT Group*: Sibisiel in Netsiel; Sodalia, Telesoft, Saritel and Netsiel in IT Telecom;
   - for *Other Activities*: Softe, Sogerim, Huit II and TI Media in Telecom Italia Finance (ex TI Web).

Telecom Italia S.p.A. also conferred the "International Wholesale Services" business segment to Telecom Italia Sparkle S.p.A. (ex TMI Telemedia International Italia S.p.A.) and the "Training" business to Telecom Italia Learning Services S.p.A..
At December 31, 2002, Telecom Italia's subsidiaries and affiliates listed in Annexes 5 to 7, were categorized as follows:

	Subsidiaries			Affiliates			Total
	Italy	Abroad	Total	Italy	Abroad	Total	
Companies:							
• consolidated line-by-line	80	155	235				235
• valued by the equity method	2	7	9	32	38	70	79
• valued at cost	31	16	47	20	7	27	74
Total companies	**113**	**178**	**291**	**52**	**45**	**97**	**388**

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements used in consolidation are those of each consolidated company at December 31, 2002, approved by the respective boards, and adjusted where necessary to conform to the accounting policies adopted by the Parent Company, Telecom Italia.
The financial statements expressed in foreign currency have been translated into euro by applying the average annual exchange rate to the individual items of the statement of income and the year-end exchange rate to the items of the balance sheet.
The difference arising from the translation of beginning shareholders' equity and the net result for the year at the year-end exchange rate is recorded in the reserves under consolidated shareholders' equity.
For the consolidated subsidiaries and affiliates which use inflation accounting to eliminate distorting effects on the results for the year, the statements of income have been translated at the year-end exchange rates instead of at the average rates. The companies in the Group which apply inflation accounting principles are Corporacion Digitel C.A. (Venezuela), Finsiel Romania S.r.l. (Romania), IS Tim Telekomunikasyon Hizmetleri A.S. (Turkey) and Teco Soft Argentina (Argentina).

The exchange rates used are those presented in "Other information".

All subsidiaries included in the scope of consolidation have been consolidated using the line-by-line method, which can be summarized as follows:

a) assumption of the total amount of assets, liabilities, revenues and expenses, regardless of the interest held, separately showing the minority interest in shareholders' equity and net income;
b) the difference arising from the elimination of the carrying value of an investment in a company included in the scope of consolidation against the underlying share of the shareholders' equity at the date of acquisition is allocated, where possible, to the assets and liabilities of the company. Any residual amount is treated as follows:
   - if positive, it is recorded in "consolidation difference" under "intangible assets" and is amortized on the straight-line method over the estimated time required to recover the amount and, in any case, not more than a period of 15 years;
   - if negative, it is recorded in shareholders' equity as "consolidation reserve", or, when the amount is due to expectations of unfavorable financial results, to "consolidation reserve for future risks and charges";
c) elimination of receivables and payables, as well as expenses and revenues among consolidated companies;
d) elimination of profit included in fixed assets and intangible assets which stem from intra-Group purchases of goods and services at market prices. The portion of intra-Group revenues referring to the above goods and services has been reclassified, net of intra-Group profit, to the item "increase in capitalized internal construction costs".

Provisions and value adjustments made by individual consolidated companies exclusively for the purpose of securing tax benefits allowed by law have also been eliminated from the consolidated financial statements.

ACCOUNTING POLICIES

The accounting policies adopted in preparing the consolidated financial statements conform to the law and have been applied on a basis consistent with the prior year.
The accounting policies are set out below:

Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit, as follows:

Licenses, trademarks and similar rights	Contract term
Goodwill	Years expected to be benefited
Software	Generally 3 years
Leasehold improvements	Lease period

Capitalized software costs only represent costs for the development of new software or improvements to software for the introduction of new features. The Group applies the same principle to website development costs and software development costs for internal use. All costs for software maintenance, for software development of new features that are not introduced and for the preliminary stages of software development are expensed in the statement of income in the year incurred.

Fixed assets

Fixed assets are recorded at acquisition or production cost, including incidental purchase costs and expenses directly attributable to construction. They are depreciated on the straight-line method over their estimated useful lives or possibility of utilization. They include inflation adjustments required or allowed by specific laws in the countries in which the fixed assets are located.
Construction in progress is stated at the amount of direct costs incurred. Ordinary maintenance is expensed in the statement of income in the year incurred. The elimination, disposal or sale of fixed assets is recorded in the financial statements by eliminating the cost and accumulated depreciation from the balance sheet and booking the related gain or loss in the statement of income.

Equity investments

Equity investments considered long-term in nature are recorded in long-term investments or, if acquired for subsequent sale, recorded in short-term financial assets.
Long-term equity investments in unconsolidated subsidiaries and affiliates are generally valued by the equity method; positive differences arising upon acquisition, between the carrying value of the investments in said companies and the underlying share of net equity at current values, are included in the value of the investments and amortized on the straight-line method over their expected period of recoverability and, in any case, for a period not exceeding 15 years. Such amortization is charged to the statement of income in "value adjustments to financial assets" under writedowns of equity investments.
Other long-term investments in unconsolidated companies are recorded at acquisition or subscription cost, including incidental costs, adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.
In the case of a permanent impairment, the value of such investments is written down and the impairment in value in excess of the corresponding carrying value is recorded in "reserves for risks and charges".
Contracts for the loan of securities are represented in the financial statements as two functionally related transactions: a loan and a "repurchase transaction" on the securities with the obligation of the borrower to resell them at maturity. Accordingly, "Other receivables" and "Other liabilities" include, respectively, a receivable and a payable of the same amount at the fixed amount of the contract (market price of stock at the date of delivery of the securities).
Equity investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost and realizable value, based on the year-end stock market prices.

Writedown of long-term assets

Long-term assets (intangibles, including goodwill, fixed assets and equity investments) are written down when there is a permanent impairment to below their net book value. The lower value is not maintained in subsequent financial statements whenever the reasons for the adjustment no longer apply. The Group periodically evaluates its long-term assets for any permanent impairments in value. The writedown is recorded when the recoverable value of the asset is below the net book value and, in this case, the amount

of the writedown is given by the difference between the two amounts, as stated in Article 2426, paragraph 1, paragraph 3 of the Italian Civil Code.

Other securities (other than equity investments)

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.
Securities held as long-term investments are valued at cost, adjusted by any permanent impairment in value.
Securities included in current assets are valued at the lower of cost of acquisition and realizable value based on market prices.
Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.
Securities acquired under "repurchase agreements", for which the obligation exists to resell them at maturity, are included at purchase cost in receivables under short-term financial assets. The difference between the sales price and the purchase price is allocated to income as it accrues with a contra-entry to accrued income/expense in the balance sheet.

Inventories

Inventories are valued at the lower of purchase or production cost and market.
The methods mainly used in computing cost are the following:
- raw materials and finished goods: LIFO with annual adjustments;
- merchandise: weighted average;
- work in progress and semifinished goods: production cost;
- contract work in process:
  - contracts covering less than 12 months: industrial cost;
  - contracts covering more than one year: at estimated revenues using the percentage of completion method.

In determining the value of contract work in process, anticipated losses upon completion and any other risks are also taken into account. Inventories of raw materials, finished goods and merchandise which exceed foreseeable manufacturing requirements or have become obsolete are written down to their estimated realizable value.

Accounts receivable and liabilities

Receivables are stated at estimated realizable value and classified under long-term investments or current assets. Estimated realizable value is based upon an analysis of receivables at year-end. Uncollectible receivables are accounted for in the year they are identified. Liabilities are shown at their nominal value.

Transactions in foreign currency

Monetary assets and liabilities are accounted for at the exchange rate as of the transaction date and updated to the exchange rates prevailing at year-end, taking into account hedging contracts. Unrealized positive and negative differences arising from recording foreign currency assets and liabilities at the exchange rates at the transaction date and at year-end date are recorded in the statement of income, respectively, in "financial income" and "financial expense".

Accruals and deferrals

These items are recorded on the accrual basis.

Reserves for risks and charges

"For taxes": this reserve includes prudent provisions for estimated tax charges, including any surtaxes and late payment interest, on positions not yet agreed or in dispute.

"For deferred taxes": this reserve includes deferred taxes calculated as described in the note on income taxes.

"Other reserves" relate primarily to provisions to cover risks and charges for losses or liabilities of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data.

Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws and collective bargaining agreements and includes the liability matured at the end of the year in favor of all personnel employed by the Italian consolidated companies, net of advances paid.

Employee benefit obligations under Law No. 58/1992

Employee benefit obligations, as required by Law No. 58/1992, are accounted for on a cash basis, as described in the notes to financial statements of Telecom Italia. The remaining liability for such obligations, payable in fifteen deferred annual installments on the basis of the statement updated to December 31, 2002 by the National Social Security Institute (INPS) and according to its interpretation, amounts to euro 1,227 million, divided as follows:

a) euro 859 million for the principal amount (except for the portion attributable to former Iritel employees);
b) euro 368 million for accrued interest.

As regards pre-amortization interest and the related accrued interest, as described in the notes of Telecom Italia, the dispute with INPS was won by Telecom Italia and the ensuing credit of euro 131 million has been completely offset against the payment of the regular expense installments.

The consolidated balance sheet also includes euro 595 million due to INPS for the residual liability relating to the estimate for the employees of the former State Company for Telephone Services (ASST) made by the special Ministerial Commission established under Law No. 58/1992, upon the contribution of the assets of the Post and Telecommunications Administration to Iritel.

The employee benefit obligations to guarantee uniform insurance status recorded in the consolidated statement of income for the year 2002 (under "extraordinary expense") amount to euro 155 million inclusive of accrued and pre-amortization interest.

Grants

Both operating grants (directly credited to the statement of income) and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures. Such grants are not subject to restrictions regarding their use and are not subject to reimbursement.

Specifically, capital grants are recorded in deferred income and recognized in future years in the statement of income in relation to the amount of depreciation taken on the underlying assets to which the grants refer.

Revenues and expenses

Revenues and expenses are recorded on an accrual basis.

In particular, revenue are recognized in the consolidated statement of income as follows:

a) telecommunications services (wireline and mobile): in the year in which the services are rendered; in particular, traffic revenues are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production costs. Certain services deriving from wireline and mobile telephony are invoiced in advance and recognized as revenues when they are used. The revenues deriving from other telecommunications services, principally those related to network access, long-distance calls and the

use of local and wireless networks, are recognized in the statement of income on the basis of the minutes of traffic used or on the basis of fixed rates by contract. The revenues deriving from installations or activations are recognized in the statement of income at the date of installation or activation. The revenues and costs relating to sales of wireless equipment and related accessories are recognized in the statement of income at the time of delivery and acceptance on the part of the customers in that these revenues are considered separate from the revenues deriving from the use of wireless services;

b) information technology and innovative network services, other activities: to the extent to which the related services were carried out during the fiscal year.

c) revenues from the segments Internet and Media, which principally derive from advertising and publishing, the sale of office and similar products and internet access (including related services) are recognized in the statement of income as follows: i) the revenues from advertising and publishing sales are recognized in the income statement on the basis of the date of publication which corresponds to the date the telephone directories are printed and distributed ii) revenues from advertising sales from on-line services are recognized in revenues when the advertising appears on the website iii) revenues from TV advertising are recognized when the advertising is broadcast and iv) the sales of office and similar products are recognized in revenues when passage of title takes place, usually upon delivery of the products.

Provisions for returns and other sales-related provisions are recorded in the year of the relative sales. Revenues for internet access and related services, mainly subscriber revenues, are recognized in the period in which the subscription is in effect, using the straight-line method.

Leased assets

Assets covered by finance lease contracts with a purchase option are recorded in fixed assets and depreciated from the date of the lease contract using rates consistent with those used for similarly owned assets. At the same time, a liability is recorded for the same amount, adjusted by the principal lease payments. The statement of income is charged for the financial expenses for the period and the depreciation charge on the assets acquired in leasing.

Income taxes

Current income taxes are computed on the basis of a realistic estimate of the income tax charge according to the tax laws of the country; the related income tax payable is shown net of payments on account, withholding taxes and tax credits in "income taxes payable". Any net receivable position is shown in "other receivables". Deferred income taxes are calculated in the financial statements of the individual consolidated companies on the basis of the temporary differences between the value attributed to the assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes, as well as on the consolidation adjustments in the consolidated financial statements. Deferred tax assets, including benefits from tax loss carryforwards, are booked in "other receivables" in current assets. The tax benefit relating to tax loss carryforwards is recorded only when there is reasonable certainty of recovery.

Deferred tax assets and liabilities are offset, whenever the assumptions for doing so exist. Deferred taxes on the reserves and funds in abeyance of taxation carried by the consolidated companies or the companies accounted for using the equity method are book if such reserves will be distributed or, in any case, utilized and their distribution or utilization gives rise to a tax charge.

Capitalization of interest

Interest on construction projects is capitalized only when loans have been taken out that can be specifically attributed to the project.

Memorandum accounts

"Collateral and guarantees provided" are recorded for an amount equal to the guarantee provided; those in foreign currencies are translated at year-end exchange rates.
"Purchases and sales commitments" are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".

Derivative financial instruments

Derivative financial instruments are used by the Group to hedge exposure on interest rate and exchange rate risks. They are valued consistently with the underlying asset and liability positions and any net expenses connected with each single transaction are recognized in the statement of income.
For financial instruments used to hedge interest rate risks, the interest differentials are recorded in the statement of income in "financial income and expense" based on the accrual principle.
For financial instruments used to hedge exchange rate risks, the cost (or "financial component" calculated as the difference between the rate at the date of stipulating the contract and the forward rate) is recorded in the statement of income in "financial income and expense" based on the accrual principle.

Receivables transactions

o Securitization
As a result of the sale of receivables (securitization) to TI Securitization Vehicle S.r.l., such receivables are reversed from the balance sheet and the difference between the carrying value of the receivables sold and consideration received on the sale (including the deferred consideration provided on the deferred purchase price) is charged on the accrual basis to the statement of income in "miscellaneous operating costs". All expenses incurred for the securitization program are recorded in "costs for services".
The securities issued under the securitization program are not recorded in the balance sheet of the Group since these represent legal obligations of TI Securitization Vehicle S.r.l.
The program for the securitization of trade accounts receivable generated by the services rendered to the clientele of Telecom Italia Domestic Wireline (*TIDW*) begun during 2001 has continued into 2002. Reference should be made to the 2001 annual report for a description of the program.
In 2002, the total amount of trade accounts receivable sold under the securitization program was equal to euro 9 billion and referred to Telecom Italia's receivables from residential customers. At December 31, 2002, receivables sold amounted to euro 849 million (of which euro 757 was not yet due).
The securitization transaction led to an improvement in net financial debt of euro 826 million at December 31, 2002.
At December 31, 2002, Telecom Italia showed financial payables of euro 165 million due to TI Securitisation Vehicle for the investment of excess temporary liquid resources by the latter in Telecom Italia.
o Factoring
In 2002, Telecom Italia, Seat Pagine Gialle and TIM sold trade accounts receivables without recourse for a total of euro 3,843 million.
These factoring transactions led to a reduction in net financial debt at December 31, 2002 of euro 212 million.

CONSOLIDATED BALANCE SHEETS

ASSETS

INTANGIBLES, FIXED ASSETS AND LONG-TERM INVESTMENTS

INTANGIBLE ASSETS

euro 13,052 million

(euro 16,197 million at December 31, 2001)

Intangible assets decreased by euro 3,145 million compared to December 31, 2001. A breakdown of the composition and the changes in this account are provided below:

(in millions of euro)	12/31/2001	Additions	Amortization	Other changes	12/31/2002
Start-up and expansion costs	104	14	(37)	(8)	73
Industrial patents and intellectual property rights	1,274	578	(1,007)	411	1,256
Concessions, licenses, trademarks and similar rights	4,452	117	(107)	(467)	3,995
Goodwill	47	3	(8)	(27)	15
Consolidation difference	9,094	369	(844)	(2,022)	6,597
Work in progress and advances to suppliers	874	816		(859)	831
Other intangibles	352	56	(91)	(32)	285
Total	**16,197**	**1,953**	**(2,094)**	**(3,004)**	**13,052**

The other changes include writedowns for euro 2,004 million and translation adjustments, for euro 933 million, referred to foreign companies, in particular South American.

Start-up and expansion costs

Start-up and expansion costs referred primarily to registration fees paid when consolidated companies were established or when their capital was increased.

Industrial patents and intellectual property rights

Industrial patents and intellectual property rights consisted mainly of applications software either owned outright or acquired under a license for an unspecified period of time.

Concessions, licenses, trademarks and similar rights

Concessions, licenses, trademarks and similar rights decreased by euro 457 million mainly as a result of the variation in the exchange rates of South American countries (-euro 650 million). They refer to the Mobile BU for euro 3,446 million, principally for the residual cost on UMTS and PCS licenses (of which euro 2,417 million relates to TIM), and to other Telecom Italia Group companies for euro 549 million, mainly Indefeasible Rights Of Use - IRU.

Consolidation difference

The consolidation difference decreased by euro 2,497 million from the end of 2001 mainly due to the amortization taken during the year (euro 844 million), the writedown of residual goodwill of 9Telecom relating to the subsidiary JetMultimedia (euro 134 million), the goodwill relating to the companies Seat Pagine Gialle (euro 1,544 million), Blu (euro 103 million), Corporacion Digitel (euro 75 million) and other minor companies (euro 47 million) and the negative performance of the Brazilian real and the Chilean peso (euro 84 million) in respect of the goodwill in those currencies.

Additions during the year mainly referred to the purchase of Blu by Tim (euro 103 million) and Netesi and Epiclink by Telecom Italia (euro 67 million), the increase in the stake in Webegg (euro 24 million) by ITTEL and in Stet Hellas (euro 66 million) and in Digitel (euro 27 million) by Tim International.

The remaining amount of euro 6,597 million mainly referred to:

(in millions of euro)	12/31/2002
Seat Pagine Gialle	3,780
TIM	748
Entel Chile	739
Corporacion Digitel	266
TDL Infomedia	252
Holding Media e Comunicazione	163
Other companies	649
Total	**6,597**

Work in progress and advances to suppliers
Work in progress and advances to suppliers decreased by euro 43 million, compared to December 31, 2001, and represented the difference between the capitalization of costs incurred mainly by Telecom Italia for software development projects in progress and the projects which came into use during the year.

Other intangibles
Other intangibles, totaling euro 285 million (euro 352 million at December 31, 2001) mainly referred to leasehold improvements.

FIXED ASSETS — euro 19,291 million

(euro 21,757 million at December 31, 2001)

Fixed assets decreased by euro 2,466 million compared to the end of 2001. They are shown net of accumulated depreciation and writedowns and have been adjusted to eliminate intra-Group profits generated by purchases of internally produced goods and services by the Group. An analysis of fixed assets is provided in the following table:

(in millions of euro)	Owned assets			Leased assets			12/31/2002 Total	12/31/2001 Net book value
	Gross value	Accumulated depreciation	Total	Gross value	Accumulated depreciation	Total		
Land and buildings	2,998	(1,305)	1,693	565	(113)	452	2,145	2,877
Plant and machinery	56,644	(41,716)	14,928	22	(17)	5	14,933	16,649
Manufacturing and distribution equipment	955	(906)	49	2	(2)		49	73
Other fixed assets	1,987	(1,365)	622	82	(27)	55	677	731
Construction in progress and advances to suppliers	1,462		1,462	25		25	1,487	1,427
Total	**64,046**	**(45,292)**	**18,754**	**696**	**(159)**	**537**	**19,291**	**21,757**

The gross value of fixed assets included euro 1,167 million of monetary revaluations made by the Italian companies. Accumulated depreciation covered 71.9% of gross fixed assets, compared to 70.4% at the end of last year.
Certain fixed assets leased by Telecom Italia and other Group companies were purchased in January 2003, before the expiration date.

A summary of the changes in fixed assets during the year is shown in the following table:

(in millions of euro)	2002	2001
At January 1	**21,757**	**20,721**
- Additions	3,258	4,254
- Disposals and contributions	(533)	(172)
- Depreciation for the year	(3,783)	(4,034)
- Writedowns	(88)	(11)
- Change in the scope of consolidation	(313)	1,345
- Translation adjustment and other	(1,007)	(346)
At December 31	**19,291**	**21,757**

Translation adjustments equal to euro 1,154 million referred to the Mobile BU for euro 674 million, the Entel Chile group for euro 305 million, the Entel Bolivia group for euro 111 million and other minor companies (euro 64 million).

Additions for the year amounted to euro 3,258 million (euro 4,254 million in 2001), with a decrease of euro 996 million compared to 2001. Details by Business Unit are as follows:

(in millions of euro)	2002	2001
Domestic Wireline	1,828	1,949
Mobile	1,075	1,547
South America	201	351
Internet and Media	28	82
IT Market	12	19
IT Group	85	111
	3,229	**4,059**
Other operations and intra-Group eliminations	29	195
Total	**3,258**	**4,254**

LONG-TERM INVESTMENTS **euro 3,243 million**

(euro 7,064 million at December 31, 2001)

Long-term investments, which decreased by euro 3,821 million from December 31, 2001, comprised the following:

(in millions of euro)	12/31/2002	12/31/2001
Equity investments in:		
• unconsolidated subsidiaries	18	18
• affiliated companies	2,051	4,764
• other companies	217	145
	2,286	4,927
Advances on future capital contributions		1,659
	2,286	6,586
Accounts receivable:		
• unconsolidated subsidiaries	5	2
• affiliated companies	435	117
• other receivables	215	273
	655	392
Other securities	15	86
Treasury stock	287	-
Total	**3,243**	**7,064**

Equity investments in affiliated companies

Equity investments in affiliated companies, amounting to euro 2,051 million, decreased by euro 2,713 million from December 31, 2001 chiefly due to the sale of equity investments made during the year.
Equity investments in affiliated companies refer to the following:

(in millions of euro)	12/31/2001	Additions	Disposals	Valuation using equity method (*)	12/31/2002
Auna	690	193	(883)		-
BDT	158		(158)		-
Etec S.A.	551			(84)	467
GLB Serviços Interativos	24			(11)	13
IM.SER	141		(126)	(3)	12
IS Tim	81			(81)	-
Italtel Holding	65			(22)	43
Lottomatica	78		(78)		-
Mirror International Holding	94				94
Mobilkom Austria	544		(553)	9	-
Mondus	18		(18)		-
Netco Redes	125			(103)	22
Solpart Participaçoes	238		(7)	(89)	142
Stream	32	234		(247)	19
Telemaco Immobiliare	91		(109)	18	-
Telekom Austria	1,460		(718)	(34)	708
Telekom Srbija	195			(8)	187
Tiglio I		197			197
Tiglio II		74			74
Other	179	6	(85)	(27)	73
Total	**4,764**	**704**	**(2,735)**	**(682)**	**2,051**

(*) Includes the share of earnings or losses for the period, amortization of goodwill and adjustments on the translation of foreign currency financial statements.

The investments valued using the equity method include the unamortized portion of the excess, euro 504 million (euro 1,688 million at December 31, 2001), of book values over the corresponding share of the underlying net equity at the time of purchase. The excess mainly referred to Telekom Austria, euro 315 million, and Etec S.A., euro 100 million.

A list of the companies valued using the equity method is provided in Annex 6; equity investments in unconsolidated subsidiaries and affiliates are listed in Annex 7.

Advances on future capital contributions
Advances on future capital contributions at December 31, 2001 mainly referred to advances made by Tim International to IS TIM. The advances have been completely written off due to the worsening of the prospects for the recoverability of the investment.

Accounts receivable from affiliated companies
Accounts receivable from affiliated companies mainly referred to loans made to IS Tim (euro 313 million), Tiglio I (euro 54 million), Telegono (euro 34 million), Tiglio II (euro 30 million) and other minor companies (euro 4 million). Relating to the loan made to IS Tim, the relative allowance for doubtful accounts has been set aside for uncollectible receivables.

Other receivables
Other receivables included the revalued amount of the tax receivable from the prepayment of the taxes on the reserve for employee severance indemnities (euro 89 million), loans to employees (euro 85 million), loans to other companies and security deposits (euro 41 million).

Other securities
Other securities decreased by euro 71 million from December 31, 2001, and mainly referred to the closed investment fund Saturn Venture Partners LLC held by TIM and TILAB (euro 9 million) and other investments in securities (euro 6 million).

Treasury stock
Treasury stock referred to 45,647,000 Telecom Italia ordinary shares and 5,280,500 Telecom Italia savings shares purchased by authorization of the Ordinary Shareholders' Meeting held on November 7, 2001.

CURRENT ASSETS

INVENTORIES **euro 411 million**
(euro 636 million at December 31, 2001)

Inventories include the following:

(in millions of euro)	12/31/2002	12/31/2001
Raw materials and supplies	19	22
Merchandise	202	253
	221	275
Work in progress and semifinished goods	8	6
Finished goods	2	2
	10	8
Contract work in process	179	352
Advances to suppliers	1	1
	180	353
Total	**411**	**636**

Inventories were held by companies providing telecommunications services for euro 193 million (euro 245 million at December 31, 2001), the companies in the information technology BU for euro 170 million (euro 234 million at December 31, 2001) and the Seat Pagine Gialle group and other minor companies for euro 48 million. The reduction from December 31, 2001 is substantially due to the sale of Sogei and the Telepspazio group (- euro 133 million). Contract work in process included work on behalf of Consorzio Telcal for the Piano Telematico Calabria (euro 110 million).
Raw materials and supplies and work in progress and semifinished goods are in line with current costs.

ACCOUNTS RECEIVABLE **euro 14,393 million**
(euro 13,027 million at December 31, 2001)

A breakdown of accounts receivable, which increased by euro 1,366 million, is provided below:

(in millions of euro)	12/31/2002	12/31/2001
Trade accounts receivable	8,731	8,712
• allowance for doubtful accounts	(830)	(808)
Total trade accounts receivable	7,901	7,904
Accounts receivable from unconsolidated subsidiaries	41	31
Accounts receivable from affiliated companies	213	567
Accounts receivable from parent companies	2	1
Other receivables	6,236	4,524
Total	**14,393**	**13,027**

Trade accounts receivable

Gross trade accounts receivable totaled euro 8,731 million and consisted, for the most part, of receivables for telecommunications services. Receivables have been adjusted to estimated realizable value by writedowns and they, too, refer mostly to telecommunications companies. Trade accounts receivable referred, in particular, to Telecom Italia (euro 3,753 million), TIM (euro 1,404 million) and the Seat Pagine Gialle group (euro 894 million).

The balance is in line with that at December 31, 2001 owing to the fact that the increase in Tim (euro 487 million) and Telecom Italia (euro 91 million net of the contribution to Telecom Italia Sparkle) is compensated by the exit from the scope of consolidation of the 9 Telecom group, Sogei and the Telespazio group (euro 487 million) and by the negative performance of the currencies of the South American countries (euro 208 million).

This caption also includes euro 1,107 million of receivables from other telecommunications carriers and euro 113 million of services to be performed by Seat Pagine Gialle, with a contra-entry to other liabilities for the same amount, representing advertising commitments undertaken and invoiced by the company for directories that will be published in 2003.

Furthermore, the securitization of receivables by Telecom Italia led to a reduction in trade accounts receivable at December 31, 2002 of euro 849 million, of which euro 757 million refer to receivables not yet due.

During 2002, the Group sold trade accounts receivable without recourse under factoring arrangements for euro 3,843 million. At December 31, 2002, such receivables sold and not yet due totaled euro 573 million.

Accounts receivable from unconsolidated subsidiaries

Accounts receivable from unconsolidated subsidiaries included loans of euro 23 million and trade accounts receivables and other receivables from subsidiaries of euro 18 million.

Accounts receivable from affiliated companies

Accounts receivable from affiliated companies of euro 213 million decreased by euro 354 million and referred to financial receivables of euro 12 million and trade and other receivables of euro 201 million. Trade and other receivables chiefly referred to Stream (euro 106 million, of which euro 35 million was completely written off following the enforcement of the guarantees provided by Telecom Italia to Italtel) and Teleleasing (euro 38 million).

Other receivables

Other receivables of euro 6,236 million (euro 4,524 million at December 31, 2001) included the following:

- financial receivables of euro 648 million (euro 591 million at December 31, 2001), almost entirely in reference to Telecom Italia for the loan of securities transactions on Seat Pagine Gialle shares (euro 176 million) that was concluded in February and March 2003, and receivables for the "deferred purchasing price" connected with the securitization transaction (euro 370 million);
- other receivables totaling euro 5,588 million (euro 3,933 million at December 31, 2001), which referred to the following:

(in millions of euro)	12/31/2002	12/31/2001
Government and other public entities for subsidies and grants	68	45
Customer payments in transit	98	95
Due from the Tax Administration	1,262	1,544
Deferred tax assets	3,336	1,410
Employees	94	93
Other receivables (from the Government, other public entities and items)	730	746
Total	**5,588**	**3,933**

The increase in deferred tax assets of TIM (euro 928 million) and Telecom Italia (euro 1,080 million) was due to the writedowns of investments recorded in long-term investments and provisions made to the reserves for risks and charges whereas the decrease in receivables from the Tax Administration was caused by lower VAT receivables and direct income taxes of Telecom Italia (euro 596 million) that were partly offset by the increase in TIM receivables (euro 376 million) due primarily to the utilization of Blu's tax loss carryforwards.

Net deferred tax assets were composed as follows:

(in millions of euro)	12/31/2002	12/31/2001
Deferred tax assets	3,336	1,410
Reserve for deferred taxes	(34)	(35)
Total	**3,302**	**1,375**

Deferred tax assets mainly referred to the writedown of investments, reserves for risks and the writedown of receivables; deferred tax liabilities mainly originated from gains.
No deferred tax assets have been set aside because of uncertainty over their recoverability against future taxable profits. In particular, tax losses carryforwards, which have not been considered in the determination of deferred tax assets, amount to some euro 2,830 million.

SHORT-TERM FINANCIAL ASSETS **euro 504 million**
(euro 2,194 million at December 31, 2001)

This item, which decreased by euro 1,690 million compared to December 31, 2001, included the following:

(in millions of euro)	12/31/2002	12/31/2001
Equity investments in unconsolidated subsidiaries	170	247
Other equity investments	1	9
Other securities	278	1,935
Receivables for sales of securities	55	3
Total	**504**	**2,194**

Equity investments in unconsolidated subsidiaries mainly referred to listed shares purchased for trading; the reduction from December 31, 2001 is chiefly attributable to the writedown of TIM shares by Telecom Italia (euro 75 million).

Other securities consist of bank certificates of deposit held by the Tele Nordeste Celular group and bonds held by Telecom Italia Finance. Other securities decreased by euro 1,657 million compared to December 31, 2001 mainly with regard to those held by Softe and Sogerim which, before their merger with Telecom Italia Finance, had reduced their bond portfolios.

The carrying values of both equity investments and other securities have been adjusted by euro 177 million to approximate market values at year end.

LIQUID ASSETS **euro 1,255 million**
(euro 762 million at December 31, 2001)

Liquid assets increased by euro 493 million. They consist mainly of funds on deposit in Italian and foreign banks in current accounts. Euro 300 million, due in the first months of 2003, are lodged for the creditors of the companies Netsiel, Saritel, Sodalia and Telesoft due to their mergers and absorption in IT Telecom, for the creditors of Blu due to its merger and absorption by TIM and for the creditors of the companies H.M.C. Broadcasting and H.M.C.Produzioni for their mergers and absorption in TV Internazionale. Euro 198 million are lodged for a guarantee provided by Royal Bank of Scotland on behalf of Mediobanca in the interest of IS Tim.

JJ 00487

ACCRUED INCOME AND PREPAID EXPENSES **euro 633 million**
(euro 1,032 million at December 31, 2001)

This item, which decreased by euro 399 million, can be analyzed as follows:

(in millions of euro)	12/31/2002	12/31/2001
Issue discounts and similar charges	108	94
Accrued income:		
• *production value*	8	95
• financial income	31	57
• other	-	-
	39	152
Other prepaid expenses:		
• production costs	85	127
• financial expense	20	60
• other	381	599
	486	786
Accrued income and other prepaid expenses	525	938
Total	**633**	**1,032**

Other prepaid expenses referred to the deferral of the put option on Seat Pagine Gialle shares.

An analysis of accounts receivable and accrued income by maturity and type is provided in Annex 1.

CONSOLIDATED BALANCE SHEETS

LIABILITIES AND SHAREHOLDERS' EQUITY

SHAREHOLDERS' EQUITY **euro 12,827 million**
(euro 19,309 million at December 31, 2001)

A breakdown of shareholders' equity is presented below:

(in millions of euro)	12/31/2002	12/31/2001
Parent company interest	9,049	13,522
Minority interest	3,778	5,787
Total	12,827	19,309

Telecom Italia's interest in shareholders' equity decreased by euro 4,473 million compared to December 31, 2001. The reduction was due mainly to the payment of 2001 dividends (euro 2,306 million), the distribution of reserves (euro 987 million), the loss for the year (euro 322 million), as well as the decrease in the net equities of some foreign companies as a result of the unfavorable performance of the local currency against the euro.

Share capital
The *share capital* of Telecom Italia consists of 5,262,908,631 ordinary shares and 2,053,122,025 savings shares, both with a par value of euro 0.55 each.

Parent Company interest in reserves and retained earnings
The Parent company interest in reserves and retained earnings includes Telecom Italia's own retained earnings and reserves, as well as the consolidated companies' retained earnings and inflation adjustment reserves and tax-deferred reserves. No deferred taxes have been provided on the latter reserves since, based on current plans, no transactions are expected to be entered into that would warrant their taxation.

The reconciliation of Telecom Italia's financial statements with the consolidated financial statements as regards shareholders' equity and net result for the year, and the changes in the components of consolidated shareholders' equity, are provided in Annexes 3 and 4.

RESERVES FOR RISKS AND CHARGES **euro 5,214 million**
(euro *3,053 million at December 31, 2001*)

These reserves increased by euro 2,161 million from December 31, 2001 and referred to the following:

Reserve for taxes
The reserve for taxes, amounting to euro 198 million (euro 154 million at December 31, 2001), consisted of estimated tax liabilities on positions still to be agreed or in dispute.

Reserve for deferred taxes
The reserve for deferred taxes, amounting to euro 34 million (euro 35 million compared to December 31, 2001), included deferred taxes provided by the individual consolidated companies on the income components subject to deferred taxation and on consolidation adjustments.

Other reserves
Other reserves, amounting to euro 4,982 million, increased by euro 2,118 million compared to December 31, 2001.

They comprised:

- the reserve for the forward commitment to purchase Seat Pagine Gialle shares of euro 1,942 million provided to cover the estimate of the non-recoverability of the original price to exercise the option. The amount set aside in 2001 of euro 569 million was completely utilized following the renegotiation of the put and call option exercise price on February 25, 2002, reclassifying the amount to "due to other lenders" under liabilities. In November, this liability was extinguished before the expiration

date by paying JP Morgan Chase consideration equal to euro 500 million, corresponding to the present value of the liability;
- Seat Pagine Gialle's reserve totaling euro 43 million, for expenses connected with the exercise of the put option by the founding shareholders of Consodata S.A.;
- TIM's reserves totaling euro 850 million, set aside to cover the guarantees provided by the group to the creditor financial institutions of IS TIM and the loan made directly by the group;
- the reserves for contractual risks and other risks, mainly in respect of Telecom Italia, for a total of euro 978 million provided in previous years and in the current year, relating to the contribution of the business segment "Large Buildings", the sales of Italtel, Telespazio and the satellite consortia. The release to income is mainly connected to the agreement for the sale of Stream to News Corporation and Vivendi Universal/Canal+ (euro 59 million) which did not go through;
- the reserves for corporate restructuring of euro 299 million, of which euro 194 million, related to Telecom Italia, for the framework agreement with the labor unions concerning the layoffs for the month of May 2002;
- the reserves for the risks of technological revisions and future risks inherent to the regulatory framework of TIM for euro 453 million;
- Telecom Italia Finance's (ex Sogerim) reserve totaling euro 124 million, relating to the financial expenses connected with the notes;
- reserve for losses of subsidiaries and affiliates of euro 293 million.

RESERVE FOR EMPLOYEE TERMINATION INDEMNITIES **euro 1,305 million**

(euro 1,350 million at December 31, 2001)

A breakdown of the changes which occurred during the year are provided below:

(in millions of euro)

January 1	**1,350**
Change during the period:	
• provisions charged to income	208
• utilizations for:	
. indemnities paid to employees	(159)
. advances	(19)
. pension funds	(30)
• other changes	(45)
December 31	**1,305**

"Other changes" mainly refer to the change in the scope of consolidation.

LIABILITIES **euro 31,870 million**

(euro 37,482 million at December 31, 2001)

A breakdown of liabilities, which increased by euro 5,612 million from December 31, 2001, is as follows:

	12/31/2002		12/31/2001	
(in millions of euro)	Financial payables	Trade accounts payable and other payables	Financial payables	Trade accounts payable and other payables
Debentures	10,624	-	8,183	-
Convertible debentures	1,964	-	2,500	-
Due to banks	5,028	-	10,235	-
Due to other lenders	1,419	-	2,163	-
Advances	-	263	-	388
Trade accounts payable	21	5,456	168	6,058
Notes payable	241	-	221	-

Accounts payable to affiliated companies	398	247	553	349
Accounts payable to parent companies	-	296	-	1
Taxes payable	32	565	50	872
Contributions to pensions and social security institutions	-	784	-	865
Other liabilities	372	4,144	1,107	3,744
Total	**20,107**	**11,763**	**25,197**	**12,285**

Debentures
Debentures totaled euro 10,624 million and increased by euro 2,441 million compared to December 31, 2001; details are as follows:

- notes issued by the subsidiary Sogerim (merged in Telecom Italia Finance) on international markets for euro 6,000 million. The issue was divided in three tranches: the first, for euro 1,000 million of floating rate notes, maturing on April 20, 2004; the second, for euro 3,000 million of fixed-rate notes, maturing on April 20, 2006; the third, for euro 2,000 million of fixed-rate notes, maturing on April 20, 2011;
- floating rate notes of euro 1,500 million issued by Telecom Italia (this is the first issue under the Global Medium-Term Note Program with Telecom Italia as the issuer). The maturity date is June 21, 2005 and the issuer can call in the notes at an earlier date at face value beginning from the second year and at every coupon date for interest thereafter;
- notes maturing in 2003 issued by the Brazilian companies Tele Nordeste Celular and Tele Celular Sul for a total of euro 108 million;
- notes maturing between 2007 and 2023 issued by Entel Chile for a total of euro 208 million;
- notes maturing between 2009 and 2010 issued by the TDL Infomedia Ltd group for a total of euro 116 million;
- notes issued by Telecom Italia on February 1, 2002 for euro 2,500 million, divided into two tranches of euro 1,250 million each, at fixed interest rates, maturing, respectively on February 1, 2007 and February 1, 2012. The issue is part of the "Global Note Program";
- notes 2002 – 2022 reserved for subscription by employees, in service and retired, of companies, directly and indirectly, controlled by Telecom Italia with headquarters in Italy, for euro 192 million.

Convertible debentures
Convertible debentures included notes issued by Sogerim (merged with Telecom Italia Finance) in March 2001, for euro 2,500 million convertible into TIM or Seat Pagine Gialle shares, with the right of the issuer to pay off the amount due in cash.
These are five-year notes and can be redeemed by the noteholders before maturity at the end of the third year after issue. Debentures decreased by euro 536 million due to the purchase of own notes by Telecom Italia Finance, subsequently cancelled.

Due to banks
Due to banks, totaling euro 5,028 million, were secured by euro 254 million including mortgages of euro 25 million and liens and pledges of euro 229 million mainly referring to Maxitel. The balance decreased by euro 5,207 million compared to December 31, 2001. It should be pointed out that TIM pledged Digitel shares to guarantee the credit facility granted to Digitel.

Due to other lenders
Due to other lenders, totaling euro 1,419 million, decreased by euro 744 million compared to December 31, 2001. This caption refers to payables for a loan received by Seat Pagine Gialle (euro 780 million) from Seat Pagine Gialle Finance S.r.l., a corporate vehicle entirely owned by third parties, operating under Law No. 130/99 on securitization, short-term loans received by Telecom Italia from TI Securitisation Vehicle S.r.l., from the excess liquidity generated by the securitization of receivables (euro 165 million), and loans received by Telecom Italia from the Cassa Depositi e Prestiti (euro 284 million) .

Advances
Advances, which totaled euro 263 million, decreased by euro 125 million compared to December 31, 2001 and included advances received from customers, of which euro 103 million referred to Consorzio Telcal.

Trade accounts payable
Trade accounts payable amounted to euro 5,477 million and decreased by euro 749 million from December 31, 2001, mainly as a result of the reduction in payables by Telecom Italia (-euro 146 million net of payables transferred to Telecom Italia Sparkle), the change in the scope of consolidation (-euro 368 million) and the negative performance of the currencies of the South American companies (euro 282 million).
This item also included euro 513 million of amounts due to other telecommunications operators.
It should be pointed out that Tim Group pledged its Maxitel shares to guarantee the supply contract between Maxitel and Ericsson.

JJ 00491

Notes payable
Notes payable, totaling euro 241 million, increased by euro 20 million compared at December 31, 2001. They refer to investment certificates, maturing in June 30, 2003, issued by Seat Pagine Gialle as part of the securitization transaction with Seat Pagine Gialle Finance S.r.l. for euro 221 million and short-term financial notes issued by Telecom Italia for euro 20 million.

Accounts payable to unconsolidated subsidiaries
Accounts payable to unconsolidated subsidiaries amounted to euro 16 million and decreased by euro 9 million from December 31, 2001. The balance included financial payables of euro 8 million and trade accounts payable and other payables of euro 8 million.

Accounts payable to affiliated companies
Accounts payable to affiliated companies, totaling euro 645 million, decreased by euro 257 million compared to December 31, 2001. They included financial payables of euro 398 million, mainly to Teleleasing (euro 393 million) for financial lease contracts, some of which were paid off before the expiration date in January 2003 (euro 369 million) and trade accounts payable and other payables for euro 247 million due to the Italtel group (euro 150 million), Siemens Informatica (euro 40 million), Teleleasing (euro 17 million) and Etec S.A. (euro 12 million).

Accounts payable to parent companies
Accounts payable to parent companies of euro 296 million referred to the payable to Olivetti for Group VAT (euro 214 million) and the sale of Irpeg receivables (euro 82 million).

Taxes payable
Taxes payable amounted to euro 597 million and decreased by euro 325 million compared to December 31, 2001. Taxes payable included euro 162 million for income taxes and euro 403 million for indirect taxes and withholdings made by the companies as substitute taxpayers, as well as euro 32 million for medium/long-term financial debt relating to the agreement reached with the Tax Administration over the assessments received in 2001 by Telecom Italia.

Contributions to pensions and social security institutions
Contributions to pensions and social security institutions totaled euro 784 million and decreased by euro 81 million compared to December 31, 2001; they included amounts owed to social security and health institutions. This item includes euro 595 million payable to INPS for the remaining balance of the estimated charges assessed for employees of the former ASST pursuant to Law No. 58/1992.

Other liabilities
Other liabilities, of euro 4,516 million, decreased by euro 335 million compared to December 31, 2001. A breakdown is provided below:

(in millions of euro)	12/31/2002	12/31/2001
Customer-related items	1,604	1,650
Employee-related items	707	631
Telecommunications license fee	1,394	1,034
Other financial items	372	1,108
Other recurring and miscellaneous items (contra-entries for accrued costs, accrued interest expense at December 31 and payable the following year, sundry payables, etc.)	439	428
Total	**4,516**	**4,851**

In particular, customer-related items consisted of deposits paid by customers and basic subscriber charges (mainly for January and February), as well as prepaid traffic. The item also included other liabilities for services to be performed by Seat Pagine Gialle (euro 113 million). The financial items payable principally comprised euro 181 million payable by Telecom Italia and include the transaction for the loan on securities to Morgan Stanley (euro 176 million), and euro 161 million by the Mobile BU, for the remaining amount due on the UMTS licenses acquired in Italy and Greece. Such liabilities are considerably lower as a result of the payment of the residual liability for the purchase of the PCS licenses by Tim Celular.

JJ 00492

ACCRUED EXPENSES AND DEFERRED INCOME

euro 1,570 million

(euro 1,476 million at December 31, 2001)

A breakdown of accrued expenses and deferred income, which increased by euro 94 million, is provided below:

(in millions of euro)	12/31/2002	12/31/2001
Accrued expenses:		
. production costs	24	51
. financial expense	431	352
. other charges	-	-
	455	**403**
Deferred income:		
. capital grants (unavailable amount)	325	349
. production value	526	452
. financial income	10	14
. other income	254	258
	1,115	**1,073**
Total	**1,570**	**1,476**

An analysis of liabilities and accrued expenses by maturity and type is provided in Annex 2.

JJ 00493

MEMORANDUM ACCOUNTS

Memorandum accounts at December 31, 2002 totaled euro 4,389 million and decreased, compared to December 31, 2001, by euro 2,852 million.

Memorandum accounts are detailed as follows:

(in millions of euro)	12/31/2002	12/31/2001
Guarantees provided	1,113	1,422
Collateral provided	111	163
Purchases and sales commitments	3,077	5,369
Other	88	287
Total	**4,389**	**7,241**

GUARANTEES PROVIDED

Guarantees provided, net of counter-guarantees received of euro 378 million, totaled euro 1,113 million and mainly consisted of sureties provided by Telecom Italia and TIM on behalf of affiliated companies (of which euro 537 million was in the interests of IS Tim, set aside in the reserves for risks and charges) and others for medium/long-term loan transactions and guarantees on bids to acquire fixed line and mobile licenses abroad.

COLLATERAL PROVIDED

Collateral provided of euro 111 million referred mainly to the Is Tim shares pledged as guarantees by TIM International for the performance of the obligations covered by the supply contracts signed by IS TIM with Ericsson and Siemens.

PURCHASES AND SALES COMMITMENTS

Purchases and sales commitments at the end of the year, respectively, of euro 2,858 million (euro 3,305 million at December 31, 2001) and euro 219 million (euro 2,064 million at December 31, 2001), referred to commitments, for the portion still to be executed, which do not fall within the normal "operating cycle" of the individual consolidated companies.

In particular, the purchases commitments refer to:

- Telecom Italia's commitment for the put option on Seat Pagine Gialle shares (euro 2,417 million), revised in relation to the renegotiation with JP Morgan Chase of the put and call options on Seat Pagine Gialle shares on February 25, 2002. This renegotiation is fully described in the notes to the financial statements of Telecom Italia S.p.A. and led to the reduction of the original option exercise price (from euro 4.2 to euro 3.4 per share). To guarantee the performance of the obligations relating to the put option on Seat Pagine Gialle shares, Telecom Italia Finance provided a guarantee (euro 1,940 million) in the form of a Direct Participation Letter of Credit to JPMorgan Chase Equity Limited.
  Furthermore, the valuation of the forward commitment to purchase Seat Pagine Gialle shares at year-end 2002 led to a provision set aside in the reserve for risks and charges of euro 1,942 million to account for the estimated non-recoverability of the exercise option price as a result of the decision, taken within the framework of the redefinition of Telecom Italia Group's strategies, of no longer considering the "Directories" business of Seat Pagine Gialle to be of strategic interest;
- commitment by Seat Pagine Gialle (euro 55 million) to purchase 9,122,733 Seat Pagine Gialle shares and the remaining 0.27% stake in TDL Infomedia Ltd from the manager shareholders of TDL Infomedia Ltd;
- commitment by Telecom Italia (euro 10 million) to purchase the remaining 14% stake in Epiclink from Pirelli and other shareholders;
- commitment by Tim (euro 20 million) to purchase the assets of the ex Blu core network from Wind;
- future operating lease obligations including the purchase option price (euro 34 million, of which euro 17 million refers to Teleleasing).

Sales commitments mainly included the Group's commitment for the sale of the investment in Telekom Srbija to PTT Srbija (euro 195 million), the sale of TESS to Accenture (euro 10 million) and the sale of Siteba to other shareholders (euro 7 million).

Purchases and sales commitments include commitments by Telecom Italia International, for the same amount (euro 7 million), by which, if the transfer of the investment in Mediterranean Broadband Access by Forthnet has not occurred by the date of June 30, 2003 in exchange for the capital increase by Forthnet reserved for Telecom Italia International, beginning July 1, 2003, the transfer of said investment will be effected for the same amount in cash.
Furthermore, there are purchase commitments for the stakes held by the minority shareholders (equal to 49% of the companies) of Mediterranean Nautilus Ltd and Med-1 Submarine Cables Ltd based on the market value of the companies at the option expiration date.

OTHER MEMORANDUM ACCOUNTS

Other memorandum accounts of euro 88 million referred mainly to third-party assets held by the individual consolidated companies, principally those in the information technology sector. They decreased by euro 199 million as a result of the deconsolidation of Sogei and Telespazio Group.

Furthermore:

- the consolidated companies of the Group issued weak letters of patronage totaling euro 241 million chiefly on behalf of unconsolidated subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements;
- assets held by third parties on loan, on deposit for safekeeping or for similar purposes amounted to euro 261 million and consisted mainly of equipment leased to customers;
- collateral received amounted to euro 2 million;
- guarantees received amounted to euro 18 million;
- guarantees provided by others for obligations of the Group companies, which consisted primarily of sureties to guarantee the proper performance of non-financial contractual obligations, totaled euro 1,752 million. They comprised euro 1,110 million of bank guarantees provided for the merger by absorption of Blu in TIM, euro 123 million of bank guarantees for the merger of Netsiel, Saritel, Sodalia Telesoft in ITTEL. They also comprised euro 207 million for the surety policy replacing the security deposit for contracts with public agencies, issued by Fondiaria Assicurazioni S.p.A. on behalf of the temporary association of companies, of which Finsiel is the principal on behalf of the guaranteed agency (MIPAF – Ministry of Agriculture and Forest Policies) after having won the bid for the contract, euro 208 million for sureties provided by insurance companies to guarantee Agrisian's contractual commitments with MIPAF and AGEA and euro 7 million for the bank surety provided in order to take part in a bid set up by the Lombardy Region for the Regional Service Card-Health Care Information System;
- the value of the shares of employees and private shareholders deposited on December 31, 2002 at the companies of the Group amounted to about euro 99 million;
- the total amount of Telecom Italia commitments at December 31, 2002 for building lease obligations to be paid to IMSER 60, Tiglio I and Tiglio II, under 21-year contracts was euro 3,818 million. The amount for each single year is euro 209 million. Furthermore, Telecom Italia provided guarantees to IMSER 60 for contractual risks on previously sold buildings for a maximum amount of euro 450 million.
- a purchase and sale commitment is currently being set up by TIM with H3G for the transfer of certain equipment and property lease contracts arising from the revision of the value of the Blu business segment sold to H3G.

JJ 00495

DERIVATIVE FINANCIAL INSTRUMENTS

The Group uses derivative financial instruments mainly for the management of its debt positions, primarily interest rate swaps (IRS) and interest rate options (IRO) to reduce the interest rate exposure on fixed-rate and floating-rate bank loans and bonds, and the use of cross currency and interest rate swaps (CIRS) and currency forwards to convert various currency loans – mainly in US dollar and euro – into the functional currencies of the various subsidiaries of the Group.
The following table gives a description of the derivative financial instruments used to hedge medium/long-term debt positions of the Group at December 31, 2002.

(in millions of euro)	**Notional amount/ Capital exchanged at 12/31/2002**
Interest rate swaps and interest rate options	5,054
Cross currency and interest rate swaps	827

IRSs and IROs involve or can involve the exchange of flows of interest calculated on the notional amount of reference at the agreed fixed or variable rates at the specified maturity date with the counterparts. This amount does not represent the amount exchanged between the parties and therefore does not constitute a measure of exposure to credit risk, which is instead limited to the amount of interest or interest differentials to be received at the interest date.
The same also applies to CIRSs which involve the exchange of capital, in the respective currencies of denomination, in addition to the settlement of periodic interest flows, at maturity and at another date.
The counterparts to derivative contracts are only the best rated banks and financial institutions and continually monitored in order to minimize the risk of non-performance.

Besides the derivative contracts for the management of debt exposure, at December 31, 2002, IRSs and CIRSs were in place at the subsidiaries Telecom Italia Finance and Tim Celular to hedge financial assets of euro 150 million. There are also currency forwards to hedge exchange rate risks on short-term cash management transactions for a total of euro 1,433 million.

JJ 00496

CONSOLIDATED STATEMENTS OF INCOME

PRODUCTION VALUE **euro 31,514 million**
(euro 31,701 million in 2001)

Production value decreased by euro 187 million (-0.6% compared to 2001) and included the captions below.

Sales and service revenues
Sales and service revenues amounted to euro 30,400 million and decreased by euro 418 million compared to 2001 (-1.4% compared to 2001). This growth is due to the positive performance of mobile telephone services and the increase in revenues from the Internet area countered by a reduction in wireline telephone services and exclusion from the scope of consolidation of the 9 Telecom group and Sogei, beginning from July 1, 2002, and the Telespazio group, beginning from October 1, 2002.
A breakdown by Business Unit is presented below:

(in millions of euro)	2002	2001	Change Amount	%
Domestic Wireline	17,022	17,168	(146)	(0,9)
Mobile	10,867	10,250	617	6,0
South America	1,409	1,534	(125)	(8,1)
Internet and Media	1,991	1,957	34	1,7
IT Market	912	1,198	(286)	(23,9)
IT Group	1,215	1,198	17	1,4
	33,416	**33,305**	111	0,3
Other activities and Intra-Group eliminations	(3,016)	(2,487)	(529)	(21,3)
Consolidated Group revenues	**30,400**	**30,818**	**(418)**	**(1,4)**

Revenues from telecommunications services are shown gross of the amount due to other carriers of euro 4,159 million (euro 3,714 million in 2001).
Revenues from foreign operations totaled euro 5,748 million (euro 6,362 million in 2001) and decreased mainly as a result of the weakness of the currencies of the South American countries against the euro and the end of the Astrolink contract in 2001.

Increases in capitalized internal construction costs
Increases in capitalized internal construction costs totaled euro 675 million, with an increase of euro 94 million compared to 2001; they may be analyzed as follows:

(in millions of euro)		2002		2001	Change
. intra-Group revenues from sales of systems		643		549	94
- personnel	19		14		
- financial expenses	1		3		
- materials and other costs	12	32	15	32	-
Total		**675**		**581**	**94**

The financial expenses were charged to "construction in progress and advances to suppliers" in fixed assets.

Other revenues and income
Other revenues and income of euro 479 million (euro 417 million in 2001) included the following:

(in millions of euro)	2002	2001	Change
. operating grants	19	24	(5)
. gains on disposal of intangibles and fixed assets	6	12	(6)
. portion of capital grants recorded in income	65	73	(8)
. other income	389	308	81
Total	**479**	**417**	**62**

JJ 00497

In particular:

- operating grants, for the most part, referred to the amounts bestowed by public institutions to defray the costs incurred for research, development and technological innovation;
- the portion of capital grants recorded in income represents the portion that became available during the year;
- other income from operations mainly included charges to customers by the telecommunications services companies for the late payment of telephone bills (euro 106 million compared to euro 112 million in 2001).

PRODUCTION COST **euro 24,133 million**
(euro 25,027 million in 2001)

Production cost increased by euro 894 million compared to 2001 (-3.6.% compared to 2001) and included the following captions.

Raw materials, supplies and merchandise
Raw materials, supplies and merchandise amounted to euro 1,579 million (euro 1,767 million in 2001) and *semifinished and finished goods* amounted to euro 200 million (euro 205 million in 2001). These costs, which principally represented purchases of raw materials and other goods to be used in operations, decreased by a total of euro 193 million.

Services
Service costs totaled euro 9,229 million (euro 9,552 million in 2001) and the *cost for the use of property not owned* amounted to euro 1,145 million (euro 1,069 million in 2001). Overall, these two items increased by euro 247 million, mainly due to higher costs for the operation and development of mobile telecommunications (euro 187 million) and the exclusion from the scope of consolidation of the Telespazio group, the 9 Telecom group and Sogei (-euro 252 million).

Personnel costs
Personnel costs amounted to euro 4,540 million (euro 4,666 million in 2001), including euro 3,373 million relating to companies which provide telecommunications services. The decrease from 2001 is due to the reduction in Telecom Italia's personnel costs following layoffs and the change in the scope of consolidation due to the exclusion from the scope of consolidation of the Telespazio group, the 9 Telecom group and Sogei and the addition of the Webegg group, of Blu, Epiclink and Netesi.
The average cost per capita for the Group was euro 45 thousand (euro 43 thousand in 2001).
At December 31, 2002, employees of the Group numbered 101,713 (109,956 at December 31, 2001), a decrease of 8,243, owing to personnel turnover (-5,360) and the effect of the change in the scope of consolidation (-2,883). A breakdown of personnel by Business Unit is presented as follows:

	12/31/2002	12/31/2001	Change
Domestic Wireline	53,682	57,895	(4,213)
Mobile Services	18,702	16,721	1,981
South America	5,461	5,746	(285)
Internet and Media	7,715	9,264	(1,549)
IT Market	4,493	6,441	(1,948)
IT Group	7,327	6,844	483
Other activities	4,333	7,045	(2,712)
Total	**101,713**	**109,956**	**(8,243)**

The equivalent average number of salaried employees was 101,789 in 2002 (107,491 in 2001).

A breakdown by category follows:

	2002	2001
Executives	2,317	2,454
Middle management	6,648	6,379
Clerical staff	84,841	89,066
Technicians	7,983	9,592
Total	**101,789**	**107,491**

JJ 00498

Amortization, depreciation and writedowns
Amortization, depreciation and writedowns amounted to euro 6,476 million (euro 6,730 million in 2001), with a decrease of euro 254 million. Details are as follows:

- amortization of intangible assets totaled euro 2,094 million, compared to euro 2,241 million in 2001, with a decrease of euro 147 million. The change is due to the writeoff of goodwill in 2001 of euro 1,303 million;
- depreciation of fixed assets totaled euro 3,783 million, compared to euro 4,034 million in 2001, with a decrease of euro 251 million. A breakdown of depreciation expense by asset category is provided below:

(in millions of euro)	2002	2001	Change
Non-industrial and industrial buildings	147	152	(5)
Plant and machinery	3,331	3,542	(211)
Manufacturing and distribution equipment	32	34	(2)
Other fixed assets	273	306	(33)
Total	**3,783**	**4,034**	**(251)**

Depreciation decreased as a result of the change in the scope of consolidation, a reduction in the depreciation expense of Telecom Italia (euro 250 million) owing to a lower amount of depreciable assets and a change in the mix of depreciable assets.

- other writedowns of intangibles and fixed assets totaled euro 57 million (euro 16 million in 2001), of which euro 18 million refer to the writedoff of IRU.

- writedowns of receivables included in current assets and liquid assets amounted to euro 542 million (euro 439 million in 2001) and represent the provisions made during the year to adjust receivables to their estimated realizable value.

Provisions for risks and other provisions
Provisions for risks and other provisions totaled euro 153 million (euro 278 million in 2001) and consisted of provisions made during the year to the various reserves for contractual risks and pending disputes.

Miscellaneous operating costs
Miscellaneous operating costs amounted to euro 823 million compared to euro 817 million in 2001. They referred to the following:

(in millions of euro)	2002	2001
. TLC license fee	431	524
. losses on disposal of intangibles and fixed assets	36	29
. expenses connected with receivables management	60	37
. indirect duties and annual taxes, including the local property tax (I.C.I.)	115	120
. membership dues and other costs	181	107
Total	**823**	**817**

FINANCIAL INCOME AND EXPENSE **-euro 1,481 million**
(-euro 1,999 million in 2001)

Financial income and expense refers to the following items:

(in millions of euro)	2002	2001	Change
Income from equity investments, net	18	154	(136)
Other financial income	1,218	922	296
Interest and other financial expense	(2,717)	(3,075)	358
Total	**(1,481)**	**(1,999)**	**518**

Income from equity investments
Income from equity investments, net, totaled euro 18 million (euro 154 million in 2001) and mainly included dividends from unconsolidated companies.

Other financial income

Other financial income of euro 1,218 million (euro 922 million in 2001), included the following:

(in millions of euro)	2002		2001		Change
Interest and capital gains on fixed-income securities		93		138	(45)
Interest and fees from:					
- unconsolidated subsidiaries	1		1		
- affiliated companies	13		23		
- banks	84		110		
- customers	2	100	2	136	(36)
Foreign exchange gains		478		217	261
Other		547		431	116
Total		**1,218**		**922**	**296**

Interest and capital gains on fixed-income securities referred to interest on long-term investment securities for euro 4 million (euro 3 million in 2001) and interest and capital gains on marketable securities for euro 89 million (euro 135 million in 2001).
Foreign exchange gains referred essentially to the TIM group. "Other" included euro 392 million of income on hedging contracts and income from the application of inflation accounting principles.

Interest and other financial expense

Interest and other financial expense of euro 2,717 million (euro 3,075 million in 2001), included the following:

(in millions of euro)	2002		2001		Change
Interest and fees paid to:					
- affiliated companies	23		31		
- banks	257		815		
- suppliers and other lenders	181	461	165	1,011	(550)
Interest and other charges on note issues		765		449	316
Foreign exchange losses		874		348	526
Other financial expense		617		1,267	(650)
Total		**2,717**		**3,075**	**(358)**

The reduction in financial expense can mainly be ascribed to the provision of euro 569 million set aside, in 2001, for the forward commitment to purchase Seat Pagine Gialle shares in connection with the estimated nonrecoverability of the original option exercise price whereas the improvement in net financial expense came from a lower average debt exposure of the Group that was partly neutralized by a worsening of the exchange rates of the South American countries.
Foreign exchange losses referred mainly to the TIM group. "Other" included euro 153 million of expenses on hedging contracts and expenses from the application of inflation accounting principles.

VALUE ADJUSTMENTS TO FINANCIAL ASSETS **-euro 682 million**
(-euro 1,956 million in 2001)

These include:

(in millions of euro)	2002	2001	Change
. Upward adjustments of:			
- equity investments	121	167	(46)
	121	167	(46)
. Writedowns of:			
- equity investments	(668)	(1,933)	1,265
- long-term investments other than equity investments included in current assets	(40)	(49)	9
- securities included in current assets other than equity investments	(95)	(141)	46
	(803)	(2,123)	1,320
Total	**(682)**	**(1,956)**	**1,274**

Value adjustments to financial assets amounted to a net expense balance of euro 682 million. They refer to:

- amortization of goodwill arising at the time of the purchase of the investments in companies accounted for using the equity method, equal to euro 80 million (euro 316 million in 2001), with a reduction of euro 236 million from the writeoffs of goodwill taken in the 2001 financial statements;
- writedowns of securities and investments included in current assets of euro 176 million (euro 291 million in 2001) and long-term securities of euro 40 million (euro 49 million in 2001), with a total reduction of euro 123 million compared to 2001;
- the Group's share of the equity in the earnings and losses of the unconsolidated companies accounted for using the equity method which produced a loss of euro 386 million (-euro 1,300 million in 2001). This refers to the losses of Stream of euro 246 million (euro 241 million in 2001), Aria -Is Tim Turchia of euro 171 million (euro 334 million in 2001) and the earnings balance relating to the earnings and losses of the other unconsolidated companies of euro 32 million (a loss balance of 725 million in 2001).

Moreover, this caption was not affected by the results of the investments in Astrolink, Nortel Inversora (Telecom Argentina) and the Auna Group which, in 2001, reported losses of euro 700 million. The investment in Nortel Inversora, the carrying value of which had been prudently written off in the consolidated financial statements at December 31, 2001, has remained unchanged. As for the Auna Group and the company Astrolink, the carry values recorded in the 2001 consolidated financial statements were maintained until their sale on, respectively, August 1, 2002 and November 30, 2002, with the divestiture of the Telespazio group.

EXTRAORDINARY INCOME AND EXPENSE **-euro 5,637 million**
(-euro 3,452 million in 2001)

Extraordinary income and expense showed a net expense balance of euro 5,637 million (-euro 3,452 million in 2001) which included euro 2,814 million of income and euro 8,451 million of expense.

Extraordinary income of euro 2,814 million comprised:

- euro 2,391 million for gains on the disposals of the investments and business segments, detailed as follows:
  - euro 1,245 million for the sale of the 26.89% stake in Auna;
  - euro 484 million for the sale of the 19.61% stake in Bouygues Decaux Telecom (BDT);
  - euro 133 million for the shares tendered in the tender offer for Lottomatica;
  - euro 115 million for the sale of the 25% stake in the Mobilkom Austria group to Telekom Austria;
  - euro 110 million for the sale of the 40% stake in Telemaco Immobiliare;
  - euro 70 million for the sale of the 100% stake in Telespazio ;
  - euro 159 million for the concentration of the real estate assets in Tiglio I through the companies Imser, Emsa and Telimm;

- euro 60 million for the contribution of the "Asset Management" business segment to Tiglio II;
- euro 15 million for the sale of the non-facility business to Pirelli Real Estate;

- euro 22 million for the disposal of other investments, fixed assets and business segments;
- euro 131 million for prior period income arising from the recovery of accrued pre-amortization interest - on the expenses for employee benefit obligations under Law 58/1992 that were paid, with reserve, to INPS up to 1999 - following the termination of litigation after the courts ruled in Telecom Italia's favor;
- euro 270 million, of which euro 77 million was for the release of reserves primarily to absorb a portion of the reserve for risks and charges set up in 2001 by Telecom Italia to cover the expenses connected with the agreement to sell Stream to News Corporation and Vivendi Universal/Canal+ after the parties did not go through with the agreement, grants of euro 9 million and other income of euro 184 million.

Extraordinary expense of euro 8,451 million comprised:

- writedowns for impairment losses of investments for a total of euro 6,237 million (euro 2,984 million in 2001), for:
  - the investment held in IS Tim (euro 1,491 million), owing to the changed conditions of the macroeconomic scenario and the difficulties in supplying services independent of the company and the provisions (euro 850 million) connected with the loans made and the guarantees provided on behalf of the company;
  - the goodwill relating to the consolidated companies Seat (euro 1,544 million), Blu (euro 103 million), Corporacion Digitel (euro 75 million) and other minor companies (euro 47 million);
  - the goodwill relating to Netco Redes (euro 96 million) and writedowns of other investments (euro 46 million);
  - the provision for the forward commitment to purchase Seat Pagine Gialle shares (euro 1,942 million) that had already been partly written down in 2001 by a charge to "financial expense" of euro 569 million and the provision for the purchase of an additional 8.17% holding in Consodata (euro 43 million) to adjust it to the current value of the company as determined on the basis of an appraisal.

The writedowns of euro 2,984 million in 2001 had referred to the writedowns of goodwill relating to both the consolidated companies (9 Telecom group, Entel Bolivia, Entel Chile group, Maxitel, Tele Celular Sul group, Tele Nordeste Celular group, Tim Brasil, Med-1 group and certain companies in the Seat Pagine Gialle group) and companies valued using the equity method (GLB Servicos Interativos, Solpart Participaçoes, Telekom Austria and Nortel Inversora group), as well as other provisions related to investments.

- euro 316 million relating to the provisions effected in conjunction with the disposal of the investment in the 9Telecom group. In particular, in view of the loss reported prior to sale, the French group 9Telecom produced a negative effect on the nine-months 2002 statement of income of the Telecom Italia Group for a total of euro 389 million;
- euro 135 million of losses for the sale of the 15% stake in Telekom Austria;
- euro 494 million of expenses and provisions for employee cutbacks and layoffs (of which euro 379 million was borne by Telecom Italia);
- euro 235 million of expenses in connection with extraordinary investment transactions;
- euro 155 million of expenses under Law 58/1992 to cover employees under the former fund "Telephone Employees Pension Fund" (FPT) and euro 74 million for the extraordinary contribution to INPS to meet the higher financial requirements covered by the rules of the former fund "Telephone Employees Pension Fund" (FPT) which became part of the general "Employees Pension Fund";
- euro 190 million of writedowns of intangibles and fixed assets, of which euro 142 million related to the Brazilian companies;
- euro 194 million of provisions to reserves, of which 135 million referred to guarantees provided upon the sale of investments and business segments;
- euro 158 million for the adjustment of Telecom Italia's liability to customers for prepaid telephone cards;

JJ 00502

- euro 38 million of losses relating to intangibles, fixed assets and long-term investments and euro 225 million of other expenses.

INCOME TAXES **-euro 716 million**
(euro 925 million in 2001)

Income taxes decreased by euro 1,641 million due to the investment writedowns which contributed to the increase in deferred tax assets, as well as the benefit from the utilization of tax loss carryforwards deriving from the merger of TIM and Blu.
Income taxes included current taxes for euro 1,451 million and deferred tax assets for euro 2,167 million, of which euro 1,900 million deriving from the application of D.L. 209/02 (turned ex L. n. 265/02) to writedowns of equity investments.

OTHER INFORMATION

Compensation to directors and statutory auditors

The compensation to which the directors and statutory auditors of Telecom Italia are entitled for fiscal 2002 for carrying out their responsibilities and functions in Telecom Italia and also in other consolidated companies, totaled euro 7,887 thousand for directors and euro 748 thousand for statutory auditors.

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Telecom Italia S.p.A.

1. We have audited the consolidated financial statements of Telecom Italia S.p.A. as of and for the year ended December 31, 2002. These financial statements are the responsibility of the Telecom Italia S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the consolidated financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries and associated companies, which represent respectively 6% and 8% of consolidated total assets and consolidated total revenues, have been examined by other auditors, whose reports have been furnished to us. Our opinion, expressed herein, insofar as it relates to the data relating to these subsidiaries and associated companies included in the consolidated financial statements, is based also on the reports of the other auditors.

   For the opinion on the consolidated financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to our auditors' report dated April 15, 2002.

3. In our opinion, the consolidated financial statements of Telecom Italia S.p.A. comply with the Italian regulations governing consolidated financial statements; accordingly, they clearly present and give a true and fair view of the consolidated financial position of Telecom Italia S.p.A. as of December 31, 2002, and the consolidated results of its operations for the year then ended.

JJ 00524

4. We draw your attention to the information presented in the explanatory notes, "Summary of significant accounting policies", regarding the accounting criteria utilized for the employee benefit obligations as required by Law no. 58/1992.

5. On March 11, 2003, the Board of Directors of Telecom Italia S.p.A., approved the proposal for a project aimed to shorten the corporate structure through the merger of Telecom Italia S.p.A. into Olivetti S.p.A and subsequently, on April 15, 2003 it approved the related plan for the merger, prepared in accordance with art. 2501 – *bis* of the Italian Civil Code.

Turin, April 18, 2003

Reconta Ernst & Young S.p.A.

signed by: Felice Persico (Partner)

FINANCIAL STATEMENTS AT DECEMBER 31, 2002 OF TELECOM ITALIA S.p.A.

NOTES TO FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with the provisions of the Italian Civil Code.
The accounting policies adopted in the preparation of the financial statements have been applied on a basis consistent with the prior year and are described below.
No special situations arose during the year that would require the use of the waivers allowed under Article 2423, paragraph 4, of the Italian Civil Code.
Reclassifications made to certain captions of the financial statements have also been made to the consolidated financial statements at December 31, 2001 for purposes of comparison.
As required by Legislative Decree No. 127/1991, consolidated financial statements have also been prepared and are presented together with the financial statements of Telecom Italia.
The statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these Notes to financial statements pursuant to Article 2423, paragraph 3 of the Italian Civil Code.
Unless otherwise specified, all figures are stated in thousands of euro.
It should be pointed out that as a result of the sale and contribution transactions carried out during 2002, the balance sheet does not include the assets and liabilities that were transferred, whereas the statement of income takes into account the results of the companies sold/contributed up to the date the transactions went into effect.

Summary of significant accounting policies

Intangible assets
Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit. Intangible assets are written down when there is a permanent impairment to below their net book value, in accordance with article 2426, paragraph 1, item 3 of the Italian Civil Code.

Intangible assets refer to the following:
"Industrial patents and intellectual property rights" are amortized over their estimated period of benefit on a five-year basis (industrial patents) or on a three-year basis (software), starting from the year of their initial use.
"Concessions, licenses, trademarks and similar rights" refer mainly to satellite utilization rights and are amortized over the contract period. Amortization also includes the amortization charge, calculated over the contract period, on the rights of way (DDP) and indefeasible rights of use (IRU), conferred to Telecom Italia Sparkle on December 31, 2002 upon the contribution of the "International Wholesale Services" business segment.
"Goodwill relates to the acquisition of the "administrative services" business segment from Holding Media e Comunicazioni and is amortized over five years;
"Others" refer almost entirely to leasehold improvements. Amortization is calculated on the basis of the remaining period of the lease contracts.
"Research, development and advertising costs" are charged to income in the year incurred.

Fixed assets
Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include monetary revaluations made on the basis of the special laws regarding assets existing on or before December 31, 1981, entries required under Law No. 823 of December 19, 1973, regarding the settlement of tax liabilities, as well as mandatory inflation adjustments of buildings as required by Law No. 413 of December 30, 1991.
Fixed assets are written down when there is a permanent impairment to below their net book value, in accordance with article 2426, paragraph 1, item 3 of the Italian Civil Code.
Construction in progress is stated at the amount of direct costs incurred (materials used for or intended for installations, third-party services, miscellaneous expenses, as well as company labor). The value of fixed assets does not include maintenance costs incurred for their upkeep to guarantee their expected useful life, their original capacity and productivity, and costs borne to repair malfunctions and failures; such expenses are charged to the statement of income in the year incurred.
Depreciation is calculated on the basis of the estimated useful lives of the installations.
Total accumulated depreciation for fixed assets was upwardly adjusted where called for by the previously mentioned special laws.

JJ 00531

The elimination, disposal or sale of fixed assets is recorded in the financial statements by eliminating the cost and accumulated depreciation from the balance sheet and booking the related gain or loss in the statement of income.

Equity investments

Equity investments in subsidiaries, affiliated companies and other companies considered long-term in nature are recorded in long-term investments or, if acquired for subsequent sale, recorded in short-term financial assets.

Long-term equity investments in "*subsidiaries*, *affiliated companies* and *other companies*" are valued at acquisition or subscription cost – determined according to the continuous LIFO method – increased by the statutory inflation adjustments, as well as the voluntary one made to several investments during the preparation of the financial statements at December 31, 1981.

The carrying value of investments recorded in long-term investments is adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.

In the case of a permanent impairment, the value of such equity investments is written down and the impairment in value in excess of the corresponding carrying value is recorded among "*reserves for risks and charges*".

Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.

Contracts for the loan of securities are represented in the financial statements as two functionally related transactions: a loan and a repurchase transaction on the securities with the obligation of the borrower to resell them at maturity. Accordingly, "Other receivables" and "Other liabilities" include, respectively, a receivable and a payable of the same amount at the fixed amount of the contract (market price of stock at the date of delivery of the securities).

Equity investments included under current assets, consisting mainly of shares of subsidiaries listed companies purchased for trading purposes, are stated at the lower of cost – determined according to the continuous LIFO method – and realizable value, based on the year-end prices on the Italian Online Stock Market.

The costs of investments in foreign companies have been translated at historical exchange rates prevailing at the time of acquisition or subscription.

Inventories

Inventories – consisting of goods intended for sale, as well as stock on hand of technical materials and replacement parts to be used in the business during the year and for maintenance – are valued at the lower of cost, calculated using the weighted-average method, and realizable value.

The carrying value of goods in stock is reduced, through appropriate writedowns, for obsolete materials.

Inventories include the amount of work on behalf of third parties in progress at the end of the year, valued according to the "costs" already incurred.

Accounts receivable and liabilities

Accounts receivable are stated at estimated realizable value and classified under long-term investments or current assets. Estimated realizable value is based upon an analysis of receivables at year-end. They include – as far as telecommunications services are concerned – the amount of services already rendered to customers and other carriers, already billed or still to be billed, as well as invoices for the sale of telephone and on-line products.

Liabilities are shown at their nominal value.

Transactions in foreign currency

Monetary assets and liabilities are accounted for at the exchange rate as of the transaction date and updated to the exchange rates prevailing at year-end, taking into account hedging contracts. Unrealized positive and negative differences arising from recording foreign currency assets and liabilities at the exchange rates at the transaction date and at year-end date are recorded in the statement of income, respectively, in "financial income" and "financial expense".

Receivables transactions

Securitization

The program for the securitization of trade accounts receivable generated by the services rendered to the clientele of Telecom Italia Domestic Wireline (*TIDW*) begun during 2001 has continued into 2002. Reference should be made to the 2001 annual report for a description of the program.

In 2002, the total amount of trade accounts receivables sold under securitization transactions amounted to euro 9 billion and only took into account the receivables due by Telecom Italia from residential customers. At December 31, 2002, trade receivables sold totaled euro 849 million (of which euro 757 million were not yet due).

As far as the accounting treatment of securitization transactions is concerned, the total amount of receivables sold is reversed from the balance sheet with a contra-entry for the consideration received on the sale: the amount paid is represented by the non-repeatable amount received immediately (without recourse) whereas the deferred portion is recorded in *Other receivables (financial)* in current assets. This balance sheet caption is presented net of the relative allowance for doubtful accounts calculated on the basis of estimated realizable value; the change in the allowance account is recorded in *financial expense* in the statement of income. The difference between the accounting value of the receivables sold and the consideration on the sale, for the commercial portion, is charged to *Miscellaneous operating costs,* and for the financial portion, to *interest and other financial expense* in the statement of income. The costs and expenses relating to the start-up and completion and implementation of the securitization program (arrangement, underwriting, legal, rating, audit and other expenses) were charged directly to the 2001 statement of income in *Costs for Services.*

The securitization transaction led to an improvement in net financial debt at December 31, 2002 of euro 826 million.

At December 31, 2002, Telecom Italia showed financial payables of euro 165 million due to TI Securitisation Vehicle for the investment of excess temporary liquid resources by the latter in Telecom Italia.

Lastly, under the securitization program, in January 2003, TI Securitisation Vehicle S.p.A. (TISV) reimbursed the first tranche of securities denominated Series 2001-1, Class A1, issued in June 2001 for an amount of euro 100 million. At the same time, TISV issued a new tranche of securities for the same amount denominated Series 2003-1, Class A1, at a variable interest rate with a 27 basis point margin on the 3-month Euribor maturing July 25, 2004. The placement price was above face value with a yield of 24 basis points over the 3-month Euribor. Therefore, the total securities currently outstanding under the securitization program continue to be equal to euro 700 million. As was the case for the securities issued in 2001, this new tranche was awarded the highest ratings by Fitch, Moody's and Standard & Poors of AAA/Aaa/AAA.

Factoring

In 2002, Telecom Italia entered into certain transactions with leading factoring companies for the sale of trade accounts receivables without recourse for a total of euro 414 million. These factoring transactions led to a reduction in net financial debt at December 31, 2002 of euro 182 million.

Accruals and deferrals

These items are recorded on the accrual basis. "*Issue discounts and similar charges*" consist of costs in connection with long-term loans, which are charged to the statement of income over the duration of the loan in proportion to the accrued interest.

Reserves for risks and charges

"*For taxes*": this reserve includes prudent provisions for estimated tax charges (including any surtaxes and late payment interest) on positions not yet agreed or in dispute.

"*For deferred taxes*": this reserve includes deferred taxes calculated as described in the note on income taxes.

"*Other reserves*" relate primarily to provisions to cover risks and charges for losses or liabilities of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data.

Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws (in particular Law No. 297 of May 29, 1982, which provides for fixed and variable cost-of-living adjustments) and collective bargaining agreements. The reserve is adjusted to the liability matured at the end of the year for personnel in force at that date and is net of advances paid.

Employee benefit obligations under Law No. 58/1992

With regard to Telecom Italia's obligation required by Law No. 58/1992 to guarantee a uniform insurance status under the Telephone Workers' Social Security Fund – FPT (part of the general "Employees Pension Fund" beginning January 1, 2000) to all employees in service in the Group's telephone companies (Stet, Sip, Italcable and Telespazio) as of February 20, 1992, as well as those who moved from the Public Administration to Iritel, Article 66, paragraph 1 of Law 331/1993 and converted into Law No. 427/1993 specifies that the sums due to the Fund should be recorded in the financial statements and are tax deductible in the years in which the fifteen equal annual deferred installments are paid to discharge this obligation.

At the present time, the amount of the liability, which will be determined by the National Social Security Institute (Istituto Nazionale della Previdenza Sociale - INPS), can be estimated only roughly, due to problems relating to the interpretation and application of the social security legislation and to the lack of certain data which only the social security institutions currently possess (at December 31, 2002, INPS had notified the Company of around 97% of the positions, the uniform insurance status of which gives rise to expenses for Telecom Italia).

Nevertheless, these financial statements include euro 590 million of residual payables to INPS, (net of the amount attributed to Group companies for the employees transferred to those companies), relating to the estimate made for the employees of the former State Company for Telephone Services (ASST) by the special Ministerial Commission established under Law No. 58/1992 upon the transfer of the assets of the Post and Telecommunications Administration to Iritel, and recorded by the latter company in its financial statements at December 31, 1993. As a result, these charges will have no impact on the results of future years, since they were already included in the aforementioned calculation.

A dispute concerning the application and interpretation of this law arose with INPS regarding, firstly, the effective date for the computation of the accrued interest due under Law No. 58/1992, in view of the fact that the liability is paid in installments. Telecom Italia maintains that interest should accrue from the time INPS notifies it of the actual amount of the liability, while INPS claims that the computation should be made as from February 20, 1992 or from the date of the transfer to Iritel, thus giving rise to pre-amortization interest. The second issue is the exclusion from the estimates under Law No. 58/1992 of all employees (except for employees of the former Iritel) who had filed an application to join pursuant to Law No. 29/1979 before February 20, 1992, unless that application had not been processed by INPS. The position of the Company is that the criteria set forth in Law No. 29/1979 – and, therefore, payment of the respective obligations – apply to these employees.

At the present time, the parties have agreed that the differences in interpretation shall be settled through test appeals, with recourse to the Court of Appeals being waived for a final determination of the correct interpretation of the law in question.

While the proceedings are pending, Telecom Italia has agreed to pay, with reservation, the amounts requested by INPS based on the criteria determined by the latter, subject to subsequent equalization adjustments, if the Courts ultimately accept the Company's interpretation.

As stated later in the report, the dispute concerning pre-amortization interest was settled in the first half of the year.

Having said that, a reasonable estimate of the principal amount of the liability attributable to Telecom Italia (excluding, as mentioned earlier, the part relating to the former Iritel employees) could vary between euro 964 million and euro 1,289 million (euro 409 million of which has already been paid), depending on conflicting interpretations and taking into account all personnel involved.

In either case, the impact of the charge should definitely be compatible with the income of future years, since, as allowed under Article 5, paragraph 3 of Law No. 58/1992, the payments requested by INPS will be made in fifteen equal annual deferred installments (including annual interest of 5%), starting when INPS formally submits its requests.

The remaining liability for obligations under Law No. 58/1992, to be paid in fifteen annual installments on the basis of the formal requests made by INPS up to December 31, 2002 and the interpretation of said requests, amounts to euro 1,227 million, divided as follows:

- euro 859 million for the principal amount (except for the portion attributable to former Iritel employees);
- euro 368 million in accrued interest.

Pre-amortization interest (including that relating to the employees of the former Iritel), subsequent to the agreement between INPS and Telecom Italia, was paid by the latter - with reservation - in fifteen equal annual deferred installments, including interest at an annual rate of 5%, up to the end of 1999, for a total amount of euro 110 million, net of equalization interest and certain refunds made by INPS. As previously mentioned, Telecom Italia won the case under the ruling issued by the Court of Cassation No. 3398/2002, in keeping with the previous ruling No. 4242/2000 (as a result of which, from June 2000, the payment of the aforementioned interest and accrued interest was suspended). Consequently,

Telecom Italia has a credit of euro 131 million (inclusive of an additional amount at the conventional annual rate of 5%) that was completely offset against the payment of the regular expense installments.
During 2002, Telecom Italia paid INPS the above-mentioned expenses also on behalf of other Group companies - mainly TIM and TI Lab - for those employees transferred and covered by the obligation of a uniform insurance status under Law No. 58/1992, recovering the amounts paid from these same companies. The recovery is recorded in the statement of income under "extraordinary income" and amounts to euro 2 million.

Grants

Operating grants (directly credited to the statement of income) and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures.
The treatment of capital grants and grants for installations in the balance sheet is as follows:

a) grants received through December 31, 1992, are included under "*reserves for risks and charges*". The portions equivalent to the depreciation taken on assets financed with the grants in question (the so-called "available" portion) are transferred to a special equity reserve in order to obtain the benefits allowed under the tax law;
b) for grants received from January 1, 1993 to December 31, 1997, 50% of the amount received is recorded in a special reserve of shareholders' equity in order to take advantage of the benefits available under the tax laws, and the remaining 50% is recorded under "*deferred income*". These amounts are gradually credited to income in accordance with the pertinent laws;
c) for grants received from January 1, 1998, the amount is recorded under "*deferred income*" and progressively credited to the statement of income in relation to the depreciation taken on the assets to which the grants refer.

Revenues and expenses

Revenues and expenses are recorded on an accrual basis. Revenues relating to telecommunications services are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost.
Fees for new access lines and line transfers are recorded as income when the service is provided.
Dividends from subsidiaries are recorded on the maturity principle, that is, in the year when the income from which they are paid is earned by the subsidiaries, providing there is a substantial certainty that they will be paid, and, in any event, when the shareholders' resolution declaring the dividend is passed or when the appropriation of net income is set forth in the preliminary financial statements prepared by the management of the subsidiaries prior to the Board Meeting of the parent company that resolves upon the financial statements.
Dividends from affiliated companies and other companies, on the other hand, are recognized in the statement of income according to the accrual principle, that is, in the year in which the respective right to the receivable arises, following the declaration of dividends approved by the shareholders' resolution of those companies. The tax credits are recorded in the same manner as the dividends to which they refer.

Leased assets

Capital goods acquired under leasing agreements are recorded in the financial statements by a method consistent with current legislation, which requires that leasing payments be recorded as operating costs.

Income taxes

Current income taxes are computed on the basis of a realistic estimate of the income tax charge according to the tax law; the related income tax payable is shown net of payments on account, withholding taxes and tax credits in "income taxes payable". Any net receivable position is shown in "other receivables".
Deferred income taxes are calculated in the financial statements on the basis of the temporary differences between the value attributed to the assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes. Deferred tax assets, including benefits from tax loss carryforwards, are booked in "other receivables" in current assets. The tax benefit relating to tax loss carryforwards is recorded only when there is reasonable certainty of recovery.

Deferred tax assets and liabilities are offset, whenever the assumptions for doing so exist. Deferred taxes on the reserves and funds in abeyance of taxation are book if such reserves will be distributed or, in any case, utilized and their distribution or utilization gives rise to a tax charge.

JJ 00535

Memorandum accounts

"*Guarantees provided*" are shown for the amount of the remaining liability or other obligation guaranteed; those provided in foreign currencies are translated at year-end exchange rates.

"*Purchases and sales commitments*" are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".

Derivative financial instruments

Derivative financial instruments are used by the Company to hedge exposure to interest rate and exchange rate risks. They are valued consistently with the underlying asset and liability positions and any net expenses connected with each single transaction are recognized in the statement of income.

For derivative financial instruments used to hedge interest rate risks, the interest differentials are recorded in the statement of income in "financial income and expense" based on the accrual principle.

For financial instruments used to hedge exchange rate risks, the cost (or "financial component" calculated as the difference between the rate at the date of stipulating the contract and the forward rate) is recorded in the statement of income in "financial income and expense" based on the accrual principle.

(*) of which					
Leasehold improvements	412,120			(298,073)	*114,047*

In particular:

"Industrial patents and intellectual property rights" consisted almost entirely of applications software. Eliminations referred mostly to software projects contributed to Telecom Italia Sparkle (at the time of the contribution of the "International Wholesale Service" business) and sold to Telecom Italia Learning Services (at the time of the sale of Telecom Italia's "Training" business).

"*Concessions, licenses, trademarks and similar rights"* referred to satellite utilization rights. Eliminations refer almost entirely to the rights of way (DDP) and indefeasible rights of use (IRU) that guarantee the extension of the Company's transmission capacity over a foreign territory. Such rights were contributed to Telecom Italia Sparkle upon the contribution of the "International Wholesale Services" business segment. Amortization also included the amortization charge on the above rights of way (DDP) and indefeasible rights of use (IRU) calculated over the period of the contracts.

JJ 00538

"Work in progress and advances to suppliers" mainly referred to software projects for network and operating program applications. All acquisitions of intangibles are managed through specific work orders and recorded in this caption. Reclassifications refer to intangible assets that went into operation during the year.

"Other intangibles" almost completely comprised leasehold improvements made to properties owned by third parties and included the costs incurred to meet the operating requirements of the Company in the rented premises.

In particular, the acquisitions of intangibles from subsidiaries, affiliated companies and parent companies amounted to euro 522,728 thousand and principally referred to software projects from Telesoft (euro 400,171 thousand), Italtel (euro 60,681 thousand), Siemens Informatica (euro 18,756 thousand) and TILAB (euro 18,000 thousand).

Fixed assets ***euro 12,678,035 thousand***

(euro 14,091,384 thousand at December 31, 2001)

A summary of the changes in fixed assets during the year is presented as follows:

(in thousands of euro)	2002
- additions	1,674,275
- disposals	(57,780)
- sales and contributions of business segments	(556,103)
- provisions to reserve for writedowns	(21,101)
- utilization of the reserve for writedowns	1,235
- depreciation	(2,453,875)
Total	**(1,413,349)**

An analysis of the composition and the changes in fixed assets during the period is shown below:

Total	50,155,551	1,143,385	(732,887)	(37,888,014)	12,678,035

Acquisitions of fixed assets are managed using specific work orders, recorded in "construction in progress and advances to suppliers". The reclassifications refer to fixed assets that went into use during the year. *In 2002, the acquisitions of fixed assets from subsidiaries, affiliated companies and parent companies amounted to euro 371,995 thousand and referred almost entirely to the acquisition of telephone exchanges from Italtel (euro 341,428 thousand).*
Furthermore, transactions with other related parties totaled euro 32,152 thousand and referred to the purchases of network cables from Pirelli.
The reduction in the gross value of fixed assets due to transactions for the contribution and sale of business segments totaled euro 1,257,075 thousand (of which euro 791,415 thousand related to the contribution of the "International Wholesale Service" business segment to Telecom Italia Sparkle and euro 431,703 thousand in connection with the contribution of the "Asset Management" business segment to Tiglio II). The relative accumulated depreciation amounted to euro 700,972 thousand (of which euro 486,311 thousand was for the contribution to Telecom Italia Sparkle and euro 186,634 thousand for the contribution to Tiglio II).

Accumulated depreciation at December 31, 2002, as a whole, was considered sufficient in relation to the remaining period of utilization of the assets, determined on the basis of the estimated useful lives of the installations making up the domestic telecommunications network. Depreciation is calculated by the rates used in the previous year. Accumulated depreciation, net of writedowns, covered 74.9% of fixed assets at December 31, 2002, compared to 72.5% at December 31, 2001.

At December 31, 2002, the upward adjustments made to fixed assets in 1952, 1975, 1983 and 1991 as well as those made under Law No. 823/1973 have been depreciated by an average of 80%.

The Company has fixed assets purchased through lease contracts stipulated at market terms with its affiliate Teleleasing and with Intesa BCI, as disclosed in the memorandum accounts and related notes. Had these contracts been accounted for using the financial method, entries would have been made in the statement of income for the interest on the financed principal and for the depreciation charge attributable to the leased assets and assets would have been recorded in fixed assets and the residual debt under liabilities. The use of this method, however, would have had no material economic effect on the financial statements.
In January 2003, the Company proceeded to purchase the buildings leased from Teleleasing under financial leasing contracts before the expiration date.

Long-term investments ***euro 15,597,488 thousand***
(euro 18,370,044 thousand at December 31, 2001)

Long-term investments decreased by euro 2,772,556 thousand compared to December 31, 2001. They comprise the following:

(in thousands of euro)	12/31/2002	12/31/2001
Equity investments in:		
• subsidiaries	14,399,646	17,659,160
• affiliated companies	388,273	386,923
• other companies	55,233	24,327
	14,843,152	**18,070,410**
Advances on future capital contributions	**166,184**	**78,896**
Accounts receivable:		
• subsidiaries	60,000	60,000
• affiliated companies	117,406	-
• other receivables	123,533	160,738
	300,939	**220,738**
Treasury stock	**287,213**	**-**
Total	**15,597,488**	**18,370,044**

Equity investments *euro 14,843,152 thousand*

Annex 1 presents the changes in each investment during the period together with the corresponding amount at the beginning of the year and at December 31, 2002. Overall, investments in subsidiaries, affiliates and other companies decreased by euro 3,227,258 thousand compared to December 31, 2001, as shown below:

(in thousands of euro)		
Increases:		
• **Subscription to capital increases, recapitalizations and loss coverage of:** Tiglio I (185,985), TILAB (5,600), IN.TEL.AUDIT (1,500), Emsa Servizi (7,001), Nordcom (2,062), Stream (233,541), TI Sparkle (92,696), Edotel (8,436), Telegono (413), Sistemi Formativi Confindustria (12), I.T. Telecom (376), EPIClink (60,254), Netesi (29,182), TI Austria (650), TI United Kingdom (602), Telecom Italia of North America (9,730) Telecom Italia America Latina (11,100), Consorzio Energia Gruppo Telecom Italia (5), Telecom Italia Capital (6,826), TE.SS (1,368), Telenergia (40), IMSER 60 (60), Consorzio TOPIX (100) and Mediocredito Centrale (36,018).		693,557
• **Subscription to shares** of **I.T. Telecom** following the contribution in kind, to the same company, of the investments in Netsiel, Telesoft, Saritel and Sodalia.		142,906
• **Subscription to shares of TI Sparkle** (ex TMI - Telemedia International Italia) following the contribution, to the same company, of the "International Wholesale Services" business segment.		697,768
• **Final share capital purchase** from payments against future capital increases in investments relating to Telecom Italia International (78,896) and Tiglio I (26).		78,922
• **Subscription to quotas of Tiglio II** following the contribution, to the same company, of the "Asset Management" business segment.		74,281
• **Subscription to shares of Softe** following the contribution, to the same company, of the investment in TI Media.		51,005
• **Subscription to shares of TI Finance (ex TI Web)** following the contribution, to the same company, of the investment in Softe.		8,050
• **Acquisition of investment in EMSA** following the partial non-proportional spin-off of IM.SER		126,118
Total increases	**(A)**	**1,872,607**

JJ 00542

Decreases:		
• **Sale/reduction of shares/quotas in:** IMMSI (18,228), Emsa (155,494), Telespazio (80,444), Telemaco Immobiliare (75,798), Consorzio Stet Italia 90 Group (41), Telimm (18), Sistemi Formativi Confindustria (12), IMSER 60 (1).		330,036
• **Writedown for losses of value charged to the statement of income to the following investments:** Seat Pagine Gialle (2,690,503), Telecom Italia International (1,101,893), Stream (246,355), Finsiel (115,000), Netesi (31,227), Nordcom (26,902), Nortel Inversora (19,114), Latin American Nautilus (15,054), I.T. Telecom (26,959), Telecom Italia of North America (1,337), TILAB (38,468), Telecom Italia America Latina (695), TI Finance (ex TI Web) (16,413), Telecom Italia Learning Services (884) and Cartesia (516).		4,331,320
• **Writedown for losses of value covered by the reserve for losses of subsidiaries and affiliated to the following investments:** Fratelli Alinari (2,400), TI Sparkle (ex TMI - Telemedia International Italia) (5,698), Emsa Servizi (2,001), Eurescom (9), Telecom Italia America Latina (6,941), Telecom Italia Capital (4,438), Softe (42,955), Consorzio RES (155) and Ertico (1).		64,598
• **Investments contributed to I.T. Telecom:** Netsiel (108,486), Telesoft (12,550), Saritel (17,783) and Sodalia (4,087).		142,906
• **Investments contributed to TI Sparkle:** TI Austria (1,835), TI Belgium (3,000), TI France (10,308), TI Germany (9,325), TI Netherlands (3,518), TI Spain (703), TI Switzerland (2,631), TI United Kingdom (4,305) and Telecom Italia of North America (10,207).		45,832
• **Partial non-proportional spin-off** of IM.SER to EMSA and IMSER 60.		126,118
• **Contribution of the investment in TI Media to Softe**		51,005
• **Contribution of the investment in Softe to TI Finance (ex TI Web)**		8,050
Total decreases	**(B)**	**5,099,865**
Net change for the year	**(A-B)**	**(3,227,258)**

In particular:

- writedowns were made to the investment held in Telecom Italia International by euro 1,101,893 thousand mainly for the expenses connected with the sale of 9Telecom to LDCom (euro 388,328 thousand), for the loss on the sale of Telekom Austria (euro 187,951 thousand), for the writedown of Netco Redes (euro 102,727 thousand) and for the writeoff of the carrying value of the investment in Nortel Inversora (euro 37,000 thousand);
- writedowns were made to the investment held in Seat Pagine Gialle by euro 2,690,503 thousand following the adjustment of the shares of this company to market value as a result of the decision, taken in conjunction with the re-definition of Telecom Italia Group's strategy, of no longer considering the "Directories" business of Seat Pagine Gialle to be of strategic interest to the Group. The adjustment of the aforementioned shares (recorded in the financial statements at a carrying value of euro 1.11 per shares) was made on the basis of the average market price of the shares over the last six months of 2002 (euro 0.668);
- writedown of the investment in Finsiel by euro 115,000 thousand. Since the company realized gains on the sale of Lottomatica and Sogei in 2002, the Board of Directors of Finsiel submitted a motion to the Shareholders' Meeting for the payment of dividends including the aforementioned gains. Since Telecom Italia, as usual, recorded the dividends from subsidiaries on the maturity principle in 2002, effect was given to the writedown;
- under the project for the reorganization of the Information Technology Group BU, Telecom Italia, in June, subscribed to 14,370,600 I.T. Telecom shares of par value euro 5 each and the share premium capital of euro 4.944 by contributing – at book value – the investments held in Netsiel (68.65%), Saritel (100%), Sodalia (100%) and Telesoft (60%). The total amount of the contribution was euro 142,906 thousand;
- on August 1, 2002, Telecom Italia proceeded to sell the 40% investment held in Telemaco Immobiliare to Mirtus, a company indirectly controlled by the American real estate fund Whitehall, promoted by the Goldman Sachs Group;
- on December 18, 2002, Telecom Italia subscribed to the capital increase of 2,269,774 shares of TI Sparkle (ex TMI – Telemedia International Italia) at the par value of euro 50 each for a total of euro 697,768 thousand (of which euro 584,279 thousand was for the share premium), by contributing, to the same company, the "International Wholesale Services" business segment in the Domestic

Wireline BU. This contribution also included the investments held by Telecom Italia in: TI Austria, TI Belgium, TI France, TI Germany, TI Netherlands, TI Spain, TI Switzerland, TI United Kingdom and Telecom Italia of North America;

- under the "Progetto Tiglio", details of which are provided in the report on operations, the following corporate transactions took place:
  - ✓ on October 24, 2002, the partial non-proportional spin-off of IM.SER to EMSA and IMSER 60. As a result of this transactions, EMSA, a 100%-owned subsidiary of Telecom Italia, received 40% of the shareholders' equity at December 31, 2001 of IM.SER and IMSER 60 received the remaining 60%. After this transaction, Telecom Italia's investment in EMSA was equal to euro 155,494 thousand;
  - ✓ on October 29, 2002, the sale of the investments in EMSA to OMS 2 at a price of euro 219,665 thousand, with a gain of euro 69,524 thousand, and in TELIMM to MSMC Immobiliare;
  - ✓ on October 29, 2002, the subscription to quotas amounting to a 36.74% interest in the share capital of Tiglio I for a total of euro 185,985 thousand, of which euro 184,074 thousand is a share premium, and advances on future capital contributions of euro 26 thousand. This advance was converted into share capital in December, raising the total ownership to 36.85% of share capital;
  - ✓ on October 29, 2002, the subscription to quotas amounting to 49.47% of the share capital of Tiglio II by contribution of the "Asset Management" business segment at market value, with a gain of euro 126,355 thousand;
- on November 22, 2002, the sale of the investment in IMMSI to Omniapartecipazioni at a price of euro 68,310 thousand, with a gain of euro 50,206 thousand;
- on November 29, 2002, the sale of the investment in Telespazio to Finmeccanica at a price of euro 127,210 thousand, with a gain of euro 46,767 thousand;
- on December 16, 2002, the merger of TI Media and Softe by contribution of the shareholders' equity in TI Media to Softe in exchange for the issue of 36,936,740 shares of par value euro 4.07 by the latter company to Telecom Italia, shareholder of TI Media. Subsequent merger of the "new" Softe and TI Web against the issue of 3,193,533 shares of par value US $10 by the latter company to Telecom Italia, shareholder of Softe. The new company thus formed took the name of Telecom Italia Finance;
- at December 31, 2002, the Seat Pagine Gialle shares loaned to Morgan Stanley numbered 58,000,000.
  In February and March, all the Seat Pagine Gialle shares on loan to Morgan Stanley were returned;
- certain investments in subsidiaries and affiliated companies are recorded at an amount in excess of the corresponding share of the underlying shareholders' equity, net of dividends and after consolidation adjustments. These investments are maintained at their carrying values since they are expected to show future earnings and their assets are worth more than their respective book values.

A comparison between the market price of listed shares at December 31, 2002 and their carrying value shows an unrealized gain of euro 15,888 million. Further details are given in Annex 3.

Advances on future capital contributions *euro 166,184 thousand*

Advances on future capital contributions increased by euro 87,288 thousand compared to December 31, 2001, following payments made to I.T. Telecom for the acquisitions, from Finsiel, of the interests in the companies Netsiel, Telesoft and Netikos (euro 83,401 thousand) and, from Olivetti, of the interest in Webegg (euro 57,500 thousand). Furthermore, euro 78,896 thousand was converted into capital and referred to advances made in previous years to Telecom Italia International for the acquisition of foreign investment holdings.

Accounts receivable *euro 300,939 thousand*

Accounts receivable increased by euro 80,201 thousand compared to December 31, 2001, and are analyzed as follows:

(in thousands of euro)	12/31/2001	Changes during the year				12/31/2002
		Disbursements	Reimburse-ments	Reclassifications/ Other	Total	
Subsidiaries	**60,000**	-	-	-	-	**60,000**
Affiliated companies	-	117,406	-	-	117,406	**117,406**
Other receivables	**160,738**	21,690	(56,029)	(2,866)	(37,205)	**123,533**
Total	**220,738**	**139,096**	**(56,029)**	**(2,866)**	**80,201**	**300,939**

Subsidiaries euro 60,000 thousand

Accounts receivables from subsidiaries refer to a loan made in 2001 to *Stet Hellas for the acquisition of UMTS licenses.*

Affiliated companies euro 117,406 thousand

Accounts receivable from affiliated companies refer mainly to loans made to the companies *Tiglio I, Tiglio II, Telegono and Mirror International Holding.*

Other receivables euro 123,533 thousand

These mainly refer to:

- the remaining loans receivable from employees (euro 45,306 thousand);
- the prepayment of the tax on the reserve for employee termination indemnities (euro 71,350 thousand), required under Law No. 662 of December 23, 1996 and subsequent amendments, revalued as required by law.

As regards accounts receivable included in long-term investments, the portion due within and beyond five years is presented in the attached Annex 4, as required by art. 2427, point 6, of the Italian Civil Code.

Treasury stock euro 287,213 thousand

"Treasury stock" purchased up to December 31, 2002 totaled 5,280,500 ordinary shares and 45,647,000 savings shares, for an equivalent amount of euro 287,213 thousand. Moreover, the Telecom Italia Ordinary Shareholders' Meeting on November 7, 2001, in authorizing the Board of Directors of the Company to buy-back ordinary and/or savings shares for a maximum amount of euro 1,500,000,000, within the limits established by law, also authorized the directors to dispose of, for an unspecified period of time, the shares purchased for any stock option plans.

* * * * *

As required by Article 10 of Law No. 72/1983 the table below sets forth a breakdown of upward adjustments by type of asset held at December 31, 2002.

(in thousands of euro)

Description	Fixed assets						Investments	
	Land and buildings	Plant and machinery	Manufacturing and distribution equipment	Other assets	Construction in progress and advances to suppliers	Total	Subsidiaries	Affiliates

CURRENT ASSETS

Inventories ***euro 69,572 thousand***

(euro 76,894 thousand at December 31, 2001)

Inventories, which decreased by euro 7,322 thousand compared to December 31, 2001, consist of "contract work in process" (euro 16,868 thousand) and "merchandise " (euro 52,704 thousand).

Accounts receivable ***euro 9,632,258 thousand***

(euro 9,220,393 thousand at December 31, 2001)

Accounts receivable increased by euro 411,865 thousand compared to December 31, 2001. A breakdown and the changes that occurred during the year are given in the table below:

	12/31/2001	Changes during the year				12/31/2002
(in thousands of euro)		Utilizations	Provisions	Other	Change	
Trade accounts receivable	4,548,154				(446,824)	4,101,330
. allowance for doubtful accounts	(306,500)	225,682	(299,642)	32,598	(41,362)	(347,862)

. allowance for doubtful accounts of subsidiaries	(17,100)		(17,400)		(17,400)	(34,500)
Total accounts receivable from subsidiaries	**2,196,920**				599,703	**2,796,623**
. of which financial receivables	*496,989*				*1,403,610*	*1,900,599*
Accounts receivable from affiliated companies	324,870				(171,560)	153,310
. allowance for doubtful accounts of affiliated companies	(13,300)	13,300	(61,790)		(48,490)	(61,790)
Accounts receivable from affiliated companies	**311,570**				(220,050)	**91,520**
. of which financial receivables	*122,490*				*(121,769)*	*721*
Accounts receivable from parent companies	**1,090**				153	**1,243**
Other receivables	**2,469,159**				520,245	**2,989,404**
. Government and other public entities for grants and subsidies	1,265				-	1,265
. deferred tax assets	509,094				1,079,945	1,589,039
. other receivables	1,958,800				(559,700)	1,399,100
Total	**9,220,393**				411,865	**9,632,258**

Trade accounts receivable *euro 3,753,468 thousand*

Trade accounts receivable are shown net of the relative allowance accounts (euro 347,862 thousand, of which euro 299,642 thousand were provided in the year) and decreased by euro 488,186 thousand. They included euro 685,732 thousand of receivables from other wireline and mobile telecommunications carriers.

Following the contribution of Telecom Italia's "International Wholesale Services" business segment to Telecom Italia Sparkle on December 31, 2002, on that date, receivables from foreign correspondents were transferred to the latter company totaling euro 579,188 thousand, net of the related allowance for doubtful accounts of euro 32,598 thousand.

The securitization and factoring of receivables led to a reduction in trade accounts receivable at December 31, 2002 of euro 1,031,309 thousand.

Accounts receivable from subsidiaries *euro 2,796,623 thousand*

Accounts receivable from subsidiaries increased by euro 599,703 thousand, compared to December 31, 2001, and include trade, financial and other receivables.

The financial receivables, equal to euro 1,900,599 thousand, reflect current account transactions carried out at market rates for cash management purposes and short-term loans granted principally to *TIM (euro 1,252,321 thousand), TILAB (euro 174,460 thousand) and I.T. Telecom (euro 329.033 thousand).*

Trade accounts receivables (euro 453,164 thousand) related to TLC services rendered mainly to *TIM (euro 201,657 thousand), Seat Pagine Gialle (euro 29,667 thousand), Path.Net (euro 50,684 thousand)* and management fees from *Telecom Italia International (euro 48,899 thousand net of the relative allowance for doubtful accounts of euro 34,500 thousand, set aside for uncollectible receivables by Telecom Italia International from Telekom Srbija).* Other receivables (euro 442,860 thousand) represent accrued dividends from *subsidiaries (euro 333,536 thousand, the details of which are shown in the note on "income from equity investments" in the statement of income*, and other receivables connected with the Group's VAT settlement system (euro 87,863 thousand).

Accounts receivable from affiliated companies *euro 91,520 thousand*

Accounts receivable from affiliated companies decreased by euro 220,050 thousand compared to December 31, 2001, and mainly refer to financial and trade accounts receivable.
Financial receivables, equal to euro 721 thousand, consisted almost entirely of the loan receivable from *Stream (euro 27,887 thousand)* that is nearly completely covered by the allowance for doubtful accounts *of euro 27,166 thousand that was set aside purposely.* Trade accounts receivable (euro 83,239 thousand) refer to TLC services rendered principally to *Stream (euro 33,768 thousand)* and TLC products sold to *Teleleasing (euro 37,703 thousand).* Other receivables (euro 7,560 thousand) mainly refer to *Stream (euro 34,689 thousand)* - following the enforcement of the guarantee provided by Telecom Italia, at the time of the sale of Italtel, on receivables of the latter from Stream – almost entirely covered by the relative allowance for doubtful accounts, and receivables from Tiglio I (euro 5,707 thousand).

Accounts receivable from parent companies *euro 1,243 thousand*

These accounts receivable are trade in nature and are receivable from the parent company *Olivetti.*

Other receivables *euro 2,989,404 thousand*

Government and other public entities for grants and subsidies euro 1,265 thousand

These consist of the receivable from the Ministry of Industry, Commerce and Handicrafts for grants to defray the costs incurred for the realization of the telecommunications installations in Southern Italy.

Deferred tax assets euro 1,589,039 thousand

These are shown net of the reserve for deferred taxes (euro 215,680 thousand). The main items which gave rise to deferred tax assets are tax credits on dividends accrued but not yet received and provisions to the reserves for risks and charges. Deferred tax assets include the effects of applying Legislative Decree No. 209/2002, as well as the amendments made upon its conversion into Law No. 265/2002.
At December 31, 2002, about euro 305 million of deferred tax assets have not been recorded since their future recovery is not assured.
The balance of deferred tax assets and liabilities was made up as follows:

	12/31/2002				12/31/2001			
	Amount due				Amount due			
(in thousands of euro)	Within 1 year	From 2 to 5 years	Beyond 5 years	Total	Within 1 year	From 2 to 5 years	Beyond 5 years	Total
Deferred tax assets	932,309	872,410	-	**1,804,719**	988,499	108,831	-	**1,097,330**
Reserve for deferred taxes	(193,998)	(21,682)	-	**(215,680)**	(573,895)	(14,341)	-	**(588,236)**
Net balance	738,311	850,728	-	**1,589,039**	414,604	94,490	-	**509,094**

JJ 00547

Other receivables — euro 1,399,100 thousand

Other receivables decreased by euro 559,700 thousand compared to December 31, 2001 and can be analyzed as follows:

(in thousands of euro)	12/31/2002	12/31/2001
. receivables from the Tax Administration	390,167	986,212
. receivables relating to personnel	145,559	114,335
. transaction for the loan of securities	175,872	235,552
. customer payments in transit with the banking and postal banking system	94,281	89,670
• receivable from TISV for the "Deferred Purchasing Price"	369,958	308,049
• other items	223,263	224,982
Total	**1,399,100**	**1,958,800**

In particular, the receivables from the Tax Administration fell by euro 596,045 thousand, mainly due to lower receivables for direct income taxes and the VAT receivable positions that were transferred to the parent company Olivetti.

The contra-entry to transactions for the loan of securities, described under "Investments" in the accounting policies, is in "Other liabilities". As previously pointed out, in February and March 2003, all the Seat Pagine Gialle shares loaned to Morgan Stanley were returned. Therefore, as of March 7, 2003, there are no Seat Pagine Gialle shares surrendered under contracts for the loan of securities.

Short-term financial assets — ***euro 165,283 thousand***

(euro 240,457 thousand at December 31, 2001)

The composition and changes during the year are shown in the following table:

(in thousands of euro)	12/31/2001	Changes during the year				12/31/2002
		Acquisitions	Sales/Reim-bursements	Writedowns/ Reinstatements	Total	
Equity investments in subsidiaries	**240,457**	10,739	(10,711)	(75,202)	(75,174)	**165,283**
Total	**240,457**	**10,739**	**(10,711)**	**(75,202)**	**(75,174)**	**165,283**

"Equity investments in subsidiaries" refer to the value of *TIM and Seat Pagine Gialle* ordinary shares, purchased for later trading.

Further details are provided in Annex 3.

Liquid assets — ***euro 235,538 thousand***

(euro 80,613 thousand at December 31, 2001)

Liquid assets increased by euro 154,925 thousand compared to December 31, 2001 mainly for a guarantee provided by Royal Bank of Scotland on behalf of Mediobanca in the interest of IS Tim.

(in thousands of euro)	12/31/2002	12/31/2001
Bank and postal accounts	235,045	80,220
Checks	15	9

JJ 00548

Accrued income and prepaid expenses ***euro 479,926 thousand***
(euro 695,039 thousand at December 31, 2001)

These decreased by euro 215,113 thousand compared to December 31, 2001 and include the following:

(in thousands of euro)	12/31/2002	12/31/2001
Issue discounts and similar charges	40,952	25,097
Accrued income		
. financial income	9,669	11,944
	9,669	11,944
Other prepaid expenses		
. production costs	44,147	54,652
. financial expense	4,227	4,715
. other	380,931	598,631
	429,305	657,998
Accrued income and other prepaid expenses	438,974	669,942
Total	**479,926**	**695,039**

Issue discounts and similar charges *euro 40,952 thousand*

"Issue discounts and similar charges" increased by euro 15,855 thousand compared to December 31, 2001 owing to the issue, at below face value, of a new note on the market. See also the comment on "Debentures" in the liabilities. They also include consulting expenses incurred to connection with the transaction.

Accrued income and other prepaid expenses *euro 438,974 thousand*

Accrued income mainly includes the interest (euro 3,864 thousand) subsidized until 1991 by the government under Law No. 67/1988, equivalent to three percentage points of the cost of the loans which replaced those assigned to the Company, through Cassa Depositi e Prestiti, under Law No. 887/1984, interest income from subsidiaries and affiliated companies (euro 2,424 thousand) and income on derivative financial instruments (euro 1,384 thousand).
Prepaid expenses mainly pertain to building rents (euro 32,806 thousand) and financial expenses *(euro 380,919 thousand) relating to Telecom Italia International* for the deferral of the put option on Seat Pagine Gialle shares. See also "Purchases and sales commitments" in the memorandum accounts.

***

A breakdown of receivables and accrued income by maturity and type is given in Annex 4.

Share capital
Share capital amounted to euro 4,023,817 thousand and increased by euro 756 thousand compared to December 31, 2001 as a result of the subscription against payment, by executives of the Group, of 1,375,150 ordinary shares of par value euro 0.55 each, under the stock option plan.

Additional paid-in capital
Additional paid-in capital of euro 3,038,374 thousand increased by euro 1,226,091 thousand, compared to December 31, 2001, as a result of the following transactions:
- ✓ reclassifications of euro 2,159,995 thousand from "miscellaneous reserves" of euro 820,000 thousand to the "legal reserve" as voted by the Ordinary Shareholders' Meeting on December 12, 2002;
- ✓ increase of euro 8,582 thousand to service the aforementioned stock option plan;
- ✓ reclassification to the "reserve for treasury stock in portfolio" of euro 122,486 thousand for the purchases, made between October 1, and December 31, 2002, of 833,500 ordinary shares of treasury stock at the average price of euro 7.69 and 22,607,000 savings shares of treasury stock at the average price of euro 5.20 under the buy-back program authorized by the Ordinary Shareholders' Meeting on November 7, 2001.

Legal reserve
The legal reserve amounted to euro 820,000 thousand and increased by euro 167,974 thousand as a result of the following changes:
- ✓ reclassification of euro 820,000 thousand from "additional paid-in-capital" as described above;
- ✓ reclassification of euro 659,659 thousand to "miscellaneous reserves" – which, at the same time, were renamed "miscellaneous income reserves" – as voted by the Ordinary Shareholders' Meeting on December 12, 2002;

- ✓ appropriation of 5.1% of 2001 profits as voted by the Ordinary Shareholders' Meeting of May 7, 2002.

Reserve for treasury stock in portfolio
This reserve totaled euro 287,213 thousand. The amount referred to the following:
- ✓ reclassification of euro 164,727 thousand from "miscellaneous reserves" and purchases, between January 1 and September 30, 2002, of 4,447,000 ordinary shares of treasury stock at an average price of euro 8.30 and 23,040,000 savings shares of treasury stock at an average price of euro 5.55 under the buy-back program authorized by the Ordinary Shareholders' Meeting on November 7, 2001;
- ✓ reclassification of euro 122,486 thousand from the "reserve for treasury stock in portfolio" for the aforementioned purchases of treasury stock during the period October 1, to December 31, 2002.

Special reserve
The special reserve showed a nil balance after the distribution of the entire reserve to shareholders as voted by the Ordinary Shareholders' Meeting on May 7, 2002.

Reserve for capital grants
The reserve for capital grants totaled euro 485,703 thousand and increased by euro 13,756 thousand as a result of the transfer, from the "reserves for risks and charges", of the portion of grants received up to December 31, 1992 that became available during the year, in relation to the depreciation of the assets to which such grants refer.

Miscellaneous reserves
Miscellaneous reserves showed a nil balance after the aforementioned reclassifications of euro 2,159,995 thousand to the "reserve for additional paid-in-capital" and euro 164,727 thousand to the "reserve for treasury stock in portfolio".

Miscellaneous income reserves
The reserve came about by renaming "miscellaneous reserves", voted by the Ordinary Shareholders' Meeting on December 12, 2002, and was entirely formed by income reserves. The reserves have been reduced by euro 1,122,351 thousand as a result of the following changes:
- ✓ euro 795,431 thousand drawn for the distribution to shareholders as voted by the Ordinary Shareholders' Meeting on May 7, 2002;
- ✓ euro 986,579 thousand drawn for the distribution to shareholders as voted by the Ordinary Shareholders' Meeting on December 12, 2002;
- ✓ reclassification of euro 659,659 thousand from the "legal reserve" shareholders as voted by the same shareholders' meeting.

Reserves for risks and charges ***euro 3,144,986 thousand***
(euro 1,612,737 thousand at December 31, 2001)

These increased by euro 1,532,249 thousand, compared to December 31, 2001. The composition and changes in these reserves are described as follows:

		Change during the year					
(in thousands of euro)	12/31/2001	Provisions	Utilizations	Released to income	Reclassifications/ Other	Total	12/31/2002

Reserve for contractual risks and other risks	590,397	143,000	(87,156)	(64,827)	(26,212)	(35,195)	555,202
Total	**1,612,737**	**2,535,521**	**(1,315,594)**	**(65,355)**	**377,677**	**1,532,249**	**3,144,986**

Reserve for taxes *euro 134,682 thousand*

The reserve for taxes increased by euro 18,034 thousand compared to December 31, 2001 and refers entirely to income taxes and other duties and taxes. The reserve for deferred taxes shows a nil balance attributable to the set-off with deferred tax assets.

Other reserves *euro 3,010,304 thousand*

These include the following reserves:

- reserve for litigation (euro 129,838 thousand): this included prudent provisions - charged to various items of the statement of income - for probable expenses in connection with personnel disputes and litigation with third parties which had not yet been settled at the end of the year;
- reserve for capital grants (euro 101,757 thousand): this included the unavailable portion of capital grants received up to December 31, 1992. Utilizations during the year (euro 13,756 thousand) stem from the transfer to shareholders' equity of the portion of the capital grants which became available;
- reserve for losses of subsidiaries and affiliates (euro 87,767 thousand): this included the provisions to account for the losses in excess of the carrying value of certain investments, in particular Telecom Italia Finance (euro 66,902 thousand);
- reserve for corporate restructuring (euro 193,897 thousand): this included the provision (euro 194,614 thousand) for the framework agreement with the labor unions concerning the layoffs for the month of May 2002;
- reserve for purchase commitments (euro 1,941,843 thousand): the amount provided in 2002 related to the forward commitment to purchase Seat Pagine Gialle shares.
  The amount set aside in 2001 for this purpose (euro 568,622 thousand) was completely utilized following the renegotiation of the put and call option exercise price on February 25, 2002, reclassifying the amount to "due to other lenders" under liabilities. In November, this liability was extinguished before the expiration date by paying JP Morgan Chase consideration equal to euro 499,822 thousand, corresponding to the present value of the liability. The transaction had no impact on the statement of income;
- reserve for contractual risks and other risks (euro 555,202 thousand): this included provisions mainly to cover potential regulatory disputes (euro 40,189 thousand), expenses connected with the sale of Italtel (euro 15,000 thousand) and Telespazio (euro 38,200 thousand) and guarantees relating to the reorganization of real estate assets under Progetto Tiglio (euro 29,500 thousand); utilizations referred mainly to guarantees provided by Telecom Italia for the sale of Sirti (euro 21,781 thousand) and Italtel (euro 36,152 thousand); amounts released to income almost entirely referred to the failure to execute the agreement for the sale of Stream to News Corporation and Vivendi Universal/Canal+ (euro 59,360 thousand); reclassifications regarded mainly the transfer to the "allowance for doubtful accounts of affiliated companies" of euro 25,823 thousand to adjust to estimated realizable value, the receivable from Stream arising from the extinguishment of Stream's debt payable to Italtel, guaranteed by Telecom Italia.

Reserve for employee termination indemnities ***euro 968,553 thousand***

(euro 1,025,349 thousand at December 31, 2001)

This reserve decreased by euro 56,796 thousand, compared to December 31, 2001. The following changes took place during the year:

(in thousands of euro)	
Balance at December 31, 2001	**1,025,349**
Changes during the year:	
- Provisions charged to income for amounts to fund employee termination indemnities accrued in favor of employees during the year plus the fixed and variable cost-of-living adjustments required under Law No. 297/1982	138,991
- Utilizations for:	
• Indemnities paid to employees who took retirement or resigned during the year	(135,638)
• Advances	(14,566)
• Supplementary benefits (Telemaco)	(17,488)
• Substitute tax on the revaluation of the reserve	(3,572)
- Amounts transferred to/from subsidiaries	(24,523)
Balance at December 31, 2002	**968,553**

Liabilities ***euro 23,972,750 thousand***

(euro 24,898,003 thousand at December 31, 2001)

Liabilities, which decreased by euro 925,253 thousand compared to December 31, 2001, included the following:

(in thousands of euro)	12/31/2002			12/31/2001		
	Financial accounts payable	Trade accounts payable and other payables	Total	Financial accounts payable	Trade accounts payable and other payables	Total

Other liabilities	181,498	2,549,646	2,731,144	395,266	2,219,990	2,615,256
Total	17,299,445	6,673,305	23,972,750	17,908,873	6,989,130	24,898,003

Debentures *euro 10,941,662 thousand*

Debentures included euro 10,750,000 thousand of notes issued under the "Global Note Program" and euro 191,662 thousand for the issue of notes 2002 – 2022 reserved for subscription by employees, in service and retired, of companies, directly and indirectly, controlled by Telecom Italia with headquarters in Italy. The 20-year notes, with a face value of euro 50 each, issued at the same price, are not listed and can only be negotiated with Telecom Italia. The semi-annual deferred interest is payable on January 1 and July 1 of every year and is indexed at the 6-month Euribor.

Under the "Global Note Program", in February, Telecom Italia issued a new note on the market listed on the Luxembourg stock exchange for euro 2,500,000 thousand in two tranches of euro 1,250,000 thousand each, maturing February 1, 2007 and February 1, 2012.

Due to banks *euro 3,447,500 thousand*

These decreased by euro 3,860,920 thousand compared to December 31, 2001. They comprised medium/long-term debt totaling euro 1,801,152 thousand - of which euro 24,790 thousand is secured by collateral - and short-term borrowings totaling euro 1,646,348 thousand. Of the latter amount, euro 1,035,000 thousand refers to loans taken out to cover temporary liquidity requirements and euro 611,348 thousand to bank overdrafts.

Due to other lenders *euro 502,545 thousand*

These decreased by euro 155,232 thousand compared to December 31, 2001. They consisted of medium/long-term financing (euro 337,927 thousand), referring principally to loans made by the Cassa Depositi and Prestiti (euro 284,268 thousand), and short-term loans payable to TI Securitisation Vehicle S.r.l. for financing funded by the excess liquidity generated by the securitization of receivables (euro 164,618 thousand).

Trade accounts payable *euro 1,855,721 thousand*

These decreased by euro 384,933 thousand compared to December 31, 2001. At December 31, 2002, trade accounts payable due to foreign correspondents (euro 336,542 thousand) were transferred to Telecom Italia Sparkle following the contribution of Telecom Italia's "International Wholesale Services" business segment to the latter company on December 31, 2002.

The balance included euro 259,455 thousand due to other wireline and mobile operators.

Notes payable *euro 20,000 thousand*

There referred to 3-month notes issued by Telecom Italia on October 25, 2002 and subscribed by RAS S.p.A. (euro 10,000 thousand), RAS Asset Management SGR S.p.A. Ras Obbligazionario (euro 2,000 thousand), RAS Asset Management SGR S.p.A. Ras Cedola (euro 2,000 thousand) and RAS Asset Management SGR S.p.A. Ras Monetario (euro 6,000 thousand). The interest rate is equal to 3.52% plus a spread of 0.27% over the Euribor rate. Placement of the notes was carried out by RASFIN SIM S.p.A..

Accounts payable to subsidiaries *euro 3,181,937 thousand*

These increased by euro 831,207 thousand compared to December 31, 2001. They consisted of financial payables, trade accounts payable and other payables. Financial payables (euro 2,169,195 thousand), refer to current account transactions negotiated at market rates for cash management purposes and mainly include accounts payable to *Telecom Italia International (euro 1,200,000 thousand)*, *Seat Pagine Gialle (euro 529,198 thousand) and Finsiel (euro 215,273 thousand).* Trade accounts payable (euro 943,205 thousand) mainly consisted of accounts payable to *TIM (euro 256,975 thousand) and Seat Pagine Gialle (euro 37,962 thousand) for the portion of TLC services invoiced by Telecom Italia to customers, and I.T. Telecom (euro 462,467 thousand) and TILAB (euro 83,398 thousand)* for supply transactions. Other payables (euro 69,537 thousand) primarily referred to *capital contributions paid to the company PathNet (euro 18,074 thousand) and sundry payables to Telecom Italia Sparkle (euro 43,164 thousand).*

Accounts payable to affiliated companies *euro 156,023 thousand*

These decreased by euro 88,721 thousand, thousand, compared to December 31, 2001. They referred to financial payables, trade accounts payable and other payables. Financial payables (euro 5,125 thousand), referred to current account transactions negotiated at market rates for cash management purposes and mainly refer to accounts payable to *Teleleasing (euro 4,830 thousand).* Trade accounts payable (euro 148,908 thousand) mainly referred to payables to *Italtel (euro 112,257 thousand) and Siemens Informatica (euro 20,612 thousand).* Other payables (euro 1,990 thousand) almost entirely regarded amounts due to *Tiglio II.*

Accounts payable to parent companies *euro 213,969 thousand*

Accounts payable to parent companies referred almost entirely to the payable to Olivetti for Group VAT.

Taxes payable *euro 221,261 thousand*

These decreased by euro 239,291 thousand, compared to December 31, 2001, and mainly referred to:

- ✓ the payable to the Italian Treasury for withholding taxes of euro 79,750 thousand;
- ✓ the VAT liability totaling euro 57,459 thousand;
- ✓ medium/long-term taxes payable (euro 31,920 thousand) relative to the agreement reached with the Financial Administration over the assessments received in 2001.

Contributions to pension and social security institutions *euro 691,021 thousand*

These decreased by euro 76,391 thousand compared to December 31, 2001. They included amounts owed to social security and health institutions with regard to personnel. These specifically included euro 590,084 thousand payable to INPS for the remaining balance of the estimated charges assessed for employees of the former ASST pursuant to Law No. 58/1992, described under the accounting policies.

Other liabilities *euro 2,731,144 thousand*

These increased by euro 115,888 thousand compared to December 31, 2001. They included, in particular, liabilities for the:

- ✓ payable to customers totaling euro 1,151,549 thousand, including deposits by subscribers against telephone conversations and basic charges;
- ✓ employee-related items amounting to euro 405,485 thousand;
- ✓ payable for the TLC license fee totaling euro 849,077 thousand. Telecom Italia contested the Ministerial Decree dated March 21, 2000 that introduced Law No. 448/1998, which set forth a new license fee as from January 1, 1999 in lieu of the previous concession fee. Consequently, it did not pay the license fee for the years 2000, 2001 and 2002;
- ✓ loan of Seat Pagine Gialle ordinary shares to Morgan Stanley (euro 175,872 thousand); the contra-entry is to "Other receivables ".

JJ 00554

Accrued expenses and deferred income ***euro 1,103,990 thousand***
(euro 704,209 thousand at December 31, 2001)

These increased by euro 399,781 thousand, compared to December 31, 2001, and included the following:

(in thousands of euro)	12/31/2002	12/31/2001
Accrued expenses		
. production costs	119	3,109
. financial expense	578,929	265,069
	579,048	268,178
Deferred income		
. capital grants (unavailable portion)	132,854	134,975
. production value	389,403	297,368
. financial income	2,685	3,688
	524,942	436,031
Total	1,103,990	704,209

Accrued financial expenses mainly relate to interest accrued on notes (euro 552,592 thousand). Deferred income mainly includes basic charges and rentals of telephone equipment (euro 298,468 thousand), the unavailable portion of capital grants received after December 31, 1992, and financial items mainly connected to loans to employees.

***

An analysis of liabilities and accrued expenses by maturity and type is provided in Annex 5.

MEMORANDUM ACCOUNTS

Memorandum accounts totaled euro 13,613,376 thousand at December 31, 2002 and can be analyzed as follows:

Guarantees provided ***euro 10,804,761 thousand***

Guarantees provided consisted of sureties (net of counter-guarantees received totaling euro 1,299,953 thousand), of which euro 10,504,478 thousand were on behalf of subsidiaries, euro 157,028 thousand on behalf of affiliated companies and euro 143,255 thousand on behalf of third parties. The guarantees were given mainly in respect of the notes issued by Sogerim (merged with Telecom Italia Finance) for a total of euro 7,964,500 thousand (part of the Global Note Program which is completely guaranteed by Telecom Italia), other medium/long-term financial transactions, supply contracts and guarantees on bids to acquire licenses abroad.

Purchases and sales commitments ***euro 2,802,362 thousand***

Purchases commitments totaling euro 2,785,119 thousand mainly consisted of commitments for the purchase of Seat Pagine Gialle shares (euro 2,416,642 thousand) relating to the put option on these same shares, described below, the commitment of euro 263,639 thousand for the early purchase of two building complexes under financial leases held by Teleleasing, located in Rome (Parco dei Medici) and Lecce, future lease obligations plus the related purchase options (euro 72,195 thousand), Telecom Italia's five-year commitment with the "Interaction Design Institute" Association of Ivrea (euro 18,889 thousand), the commitment for the purchase, from Pirelli, Camozzi, Evoluzione and Intesa, of the entire interests held by each in EPIClink for euro 9,800 thousand.

Sales commitments of euro 17,243 thousand mainly referred to the agreement with Accenture for the sale of TESS (euro 10,043 thousand) and the agreement with the other shareholders of SITEBA to sell the stake held by Telecom Italia (euro 7,200 thousand).

Put option on Seat Pagine Gialle shares

Under the contract stipulated on March 15, 2000 (as subsequently amended and integrated), Telecom Italia gave Huit II a put option on No. 710,777,200 Seat Pagine Gialle shares at a strike price of euro 4.2 per share. The contract provided for the exercise of such option after the deed of merger between Seat Pagine Gialle and Tin.it was recorded in the Companies Register. Huit II later transferred the put option to JPMorgan Chase Equity Limited (JPCEL, at that time called Chase Equity Limited), together with the ownership of the corresponding Seat Pagine Gialle shares. On December 4, 2000, JPCEL renegotiated the contract with Telecom Italia, extending the period to five years, with the possibility of exercising the option at an earlier date in April and May 2003, 2004 and 2005. The time extension made it possible to defer the financial impact.

Telecom Italia International (at that time called Stet International Netherlands, a wholly-owned subsidiary of Telecom Italia) then purchased from JPCEL, through the Liberator Ltd. trust, a call option on 660,777,200 Seat Pagine Gialle ordinary shares with the same expiry date and strike price as the put option, paying a total premium of euro 747,016,226. Moreover, for the purpose of transferring the effects of this latter transaction to Telecom Italia, a call option was stipulated, with the same features, between the same Telecom Italia and Telecom Italia International.

On February 25, 2002, Telecom Italia concluded the renegotiation of the December 4, 2000 put and call options with the JPMorgan Chase group.

In particular, it was agreed to reduce the price to exercise the aforementioned options from euro 4.2 to euro 3.4 per share; in view of the reduction, Telecom Italia agreed to pay JPMorgan Chase an amount of euro 568,622 thousand at the original expiration date of December 2005, unless Telecom Italia's elected to pay the consideration earlier, in which case the consideration would be discounted to its present value at the time of payment.

It was also agreed to eliminate the right of either party to exercise the options at an earlier date, which therefore expire on December 6, 2005, except for Telecom Italia's right to exercise part of the call options beforehand; the early exercise of the option per tranche, beginning from December 2004, covers 355 million Seat Pagine Gialle shares.

As a result of this renegotiation, the aforementioned expense connected with the revision of the strike price of the options (euro 568,622 thousand) was recorded in the caption "due to other lenders" and had no effect on the statement of income for the period following the utilization of the reserve for risks and charges set aside, for the same amount, at the end of 2001 for the estimated nonrecoverability of the original price of the put option. In November, this liability was extinguished by Telecom Italia at an earlier date by paying JP Morgan Chase consideration equal to euro 499,822 thousand, corresponding to the present value of the liability.

Furthermore, the valuation of the forward commitment to purchase Seat Pagine Gialle shares at the end of 2002 led to a provision in the reserves for risks and charges (other reserves) of euro 1,941,843

11 00556

thousand. This was to account for the estimated nonrecoverability of the option exercise price as a result of the decision, taken in conjunction with the redefinition of the strategy of the Telecom Italia Group, of no longer considering the "Directories" business of Seat Pagine Gialle to be of strategic interest.

Other memorandum accounts ***euro 6,253 thousand***

These mainly referred to assets of third parties on loan, on deposit for safekeeping or for similar purposes (euro 5,289 thousand).

***

Moreover:

- the Company issued weak letters of patronage totaling euro 1,154,651 thousand, chiefly on behalf of subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements;
- assets held by third parties on loan, on deposit for safekeeping or for similar purposes amounted to euro 253,808 thousand and consisted of equipment leased to customers (euro 238,386 thousand), assets given on loan to the Telcal consortium (euro 50 thousand) and telephone cards owned by the company and held by third parties (euro 15,372 thousand);
- guarantees provided by others for Company obligations totaled euro 2,297,431 thousand and consisted of a guarantee provided by Telecom Italia Finance, in the form of a Direct Participation Letter of Credit (euro 1,940,000 thousand) to JPMorgan Chase Equity Limited to guarantee the performance of the obligations relating to the put option on Seat Pagine Gialle shares, sureties provided to guarantee the proper performance of non-financial contractual obligations (euro 349,931 thousand) and a banking surety (euro 7,500 thousand) provided in order to take part in a bid set up by the Lombardy Region for the Regional Service Card-Health Care Information System;
- the shares of employees and private shareholders deposited at December 31, 2002 with Telecom Italia, and therefore subdeposited with Monte Titoli S.p.A., were equal to euro 67,569 thousand, whereas those awaiting assignment or in the process of being replaced totaled euro 31,168 thousand;
- at December 31, 2002, the expense fund to safeguard the holders of savings shares, set up by resolution of the Shareholders' Meeting on June 21, 1999, amounted to euro 2,176 thousand; the compensation to the common Representative of said shareholders will be paid out of this fund, as voted by the Meeting of the Savings Shareholders on October 31, 2001;
- the total amount of commitments at December 31, 2002 for building rental obligations to be paid to IMSER 60, Tiglio I and Tiglio II, under 21-year contracts was euro 3,817,762 thousand. The amount for each single year is euro 209,218 thousand. Furthermore, Telecom Italia provided guarantees to IMSER 60 for contractual risks on previously sold buildings for a maximum amount of euro 450,000 thousand.

Derivative financial instruments

In 2002, transactions in derivatives mainly regarded the management of debt exposure through the use of instruments to hedge interest rate and exchange rate risks. The following table gives a description of the derivative financial contracts outstanding at December 31, 2002 used to hedge medium/long-term debt positions, compared to those at December 31, 2001.

(in millions of euro)	Notional amount/ Capital exchanged at December 31, 2002	Notional amount/ Capital exchanged at December 31, 2001
Interest rate swaps	1,097	1,437
Cross currency and interest rate swaps	313	390

The following table indicates the notional amount and the average interest rate to be paid/received for interest rate swaps by maturity date.

JJ 00557

(in millions of euro)	Maturity			
	2003	2004	2005	2006
Interest rate swaps:				
Fixed pay rate, variable receive rate:				
• notional amount	568	2	18	=
• weighted average pay rate	3.89%	4.25%	4.71%	=

• paid parameter	=	6 mo. Euribor	6 mo. Euribor	6 mo. Euribor
• received parameter	=	Rolint Robot	Rendint Rendibot Rolint Robot	Rendint Rendibot Rolint Robot

Currency forward agreements hedging exchange rate risks on short-term cash management transactions totaled euro 212 million (euro 311 million at December 31, 2001, of which euro 300 million related to forward rate agreements and euro 11 to currency forward agreements.

STATEMENTS OF INCOME

Production value ***euro 17,292,712 thousand***
(euro 17,537,266 thousand in 2001)

Production value, which decreased by euro 244,554 thousand compared to 2001, included the captions below.

Sales and service revenues *euro 17,055,185 thousand*

Sales and service revenues decreased by euro 253,881 thousand compared to 2001 and are shown gross of the amount due to other carriers (euro 3,646,360 thousand), which are recorded, for the same amount, in production cost.
A breakdown of sales and service revenues by type of business and geographical area, as required under Article 2427, paragraph 10 of the Italian Civil Code, is provided below:

Breakdown by *type of business*

(in thousands of euro)	2002	2001	Change
Sales:			
- telephone products	251,549	260,207	(8,658)
- other goods	344	3,751	(3,407)
	251,893	**263,958**	(12,065)
Services:			
- Traffic (*):	8,280,672	8,813,352	(532,680)
- Basic charges	7,740,044	7,270,113	469,931
- Activation fees	323,679	259,871	63,808
- Other	458,897	701,772	(242,875)
	16,803,292	**17,045,108**	(241,816)
Total	**17,055,185**	**17,309,066**	(253,881)

Breakdown by *geographical area*

(in thousands of euro)	2002	2001	Change
Italy	15,834,630	15,823,442	11,188
Rest of Europe	691,625	810,590	(118,965)
North America	230,833	231,612	(779)
Central and South America	100,626	215,307	(114,681)
Australia, Africa and Asia	197,471	228,115	(30,644)
Total	**17,055,185**	**17,309,066**	(253,881)

Traffic revenues, in particular, were composed of the following:

(in thousands of euro)	2002	2001	Change
• Traffic by Telecom Italia customers:			
- domestic	5,234,151	6,005,914	(771,763)
- outgoing non-domestic	419,355	482,584	(63,229)
- special services and other	580,947	480,553	100,394
	6,234,453	**6,969,051**	(734,598)

Total	**8,280,672**	**8,813,352**	(532,680)

Revenues for pre-billed basic charges were composed of the following:

(in thousands of euro)	2002	2001	Change
• Network access	4,390,525	4,073,343	317,182
• TLC operator interconnections	1,043,749	924,581	119,168
- mobile operators	554,581	563,147	(8,566)
- wireline carriers	489,168	361,434	127,734
• Transmission and outsourcing	610,197	675,207	(65,010
• Subscriptions to services	639,103	581,659	57,444
• Maintenance and rental	780,437	822,633	(42,196)
• Discount packages	276,033	192,690	83,343
Total	**7,740,044**	**7,270,113**	469,931

JJ 00559

As regards the geographical breakdown of revenues from sales and services, the "Rest of Europe", "North America", "Central and South America" and "Australia, Africa and Asia" referred almost entirely to revenues from traffic to and from these geographical areas.

Transactions for revenues from sales and services with subsidiaries, affiliated companies and parent companies totaled euro 1,308,364 thousand. In particular they refer to:

- *TIM (euro 723,280 thousand) - revenues for mobile-fixed interconnections and lines leased;*
- *Telespazio (euro 87,582 thousand) - sale of satellite capabilities;*
- *Path.Net (euro 82,774 thousand) - TLC services and infrastructures dedicated to the Public Administration;*
- *Seat Pagine Gialle (euro 57,894 thousand) - telecommunications services;*
- *Teleleasing (euro 105,222 thousand) - sales of products;*
- *I.T. Telecom (euro 36,313 thousand) - telecommunications services.*

Transactions for revenues from sales and services with other related parties totaled euro 20,445 thousand and refer to . In particular they refer to telecommunications services provided to Pirelli group (euro 5,448 thousand) and to Edizione Holding group (euro 14,997 thousand).

Changes in inventory of contract work in process *euro 275 thousand*

Changes in inventory of contract work in process represented the difference between the increase in work in progress and the decrease as a result of completed contracts.

Increases in capitalized internal construction costs *euro 10,583 thousand*

These consisted entirely of capitalized labor costs. The item increased by euro 4,968 thousand compared to 2001.

Other revenues and income *euro 226,669 thousand*

Other revenues and income included the following:

(in thousands of euro)	2002	2001	Change
Operating grants	-	278	(278)
Gains on disposal of production assets	1,761	2,532	(771)
Reimbursements for costs of employees on loan at Group companies	31,485	28,734	2,751
Capital grants recorded in income	24,897	29,941	(5,044)
Late payment fees	91,042	95,658	(4,616)
Indemnification, reimbursements and recoveries and other miscellaneous income	77,484	84,760	(7,276)
Total	**226,669**	**241,903**	**(15,234)**

Transactions involving other revenues and income with subsidiaries, affiliated companies and parent companies totaled euro 50,328 thousand. They referred to the recovery of costs for personnel on loan and sundry services, mainly in respect of:

- *TIM (euro 19,922 thousand);*
- *Seat Pagine Gialle (euro 5,356 thousand);*
- *TILAB (euro 4,331 thousand);*
- *I.T. Telecom (euro 4,089 thousand);*
- *Finsiel (euro 2,746 thousand);*

Production cost ***euro 13,247,421 thousand***
(euro 13,553,981 thousand in 2001)

Production cost, which decreased by euro 306,560 thousand compared to 2001, included the following captions:

Raw materials, supplies and merchandise *euro 244,546 thousand*

These decreased by euro 56,901 thousand, compared to 2001, mainly due to lower purchases of inventory items.

This item included euro 25,214 thousand of costs incurred on behalf of subsidiaries, affiliated companies and parent companies mainly in reference to Teleleasing (euro 11,423 thousand) per TLC products and Italtel (euro 7,223 thousand) for the maintenance costs of telephone exchanges.

Services *euro 5,906,772 thousand*

Service costs, which decreased by euro 39,189 thousand compared to 2001, included the following:

(in thousands of euro)	2002	2001	Change
Direct service costs	493,645	702,824	(209,179)
Operating costs	1,102,412	1,172,237	(69,825)
Marketing costs	522,738	574,541	(51,803)
Know-how development costs	141,617	81,484	60,133
Amounts due to other carriers	3,646,360	3,414,875	231,485
Total	**5,906,772**	**5,945,961**	**(39,189)**

An analysis of the composition of such costs shows the following:

a) "direct service costs" included the operating and maintenance costs of the TLC network (euro 184,782 thousand), operating and maintenance costs of customer installations (euro 80,193 thousand), public telephone installations (euro 61,867 thousand), the satellite systems (euro 49,164 thousand) and rented products (euro 49,200 thousand);
b) "operating costs" referred to the operating and maintenance costs of buildings, motor vehicles, information systems as well as general expenses. In particular, operating costs included euro 276,919 thousand for information systems, euro 80,024 thousand for the operating and maintenance of buildings and technological plant, euro 143,215 thousand for electricity for buildings and installations; euro 121,811 thousand for indirect personnel costs, euro 32,502 thousand for motor vehicle costs and euro 51,743 thousand for miscellaneous professional services;
c) "marketing costs" included selling expenses, after-sales assistance, customer relations, advertising and promotion. In particular, such costs included euro 148,304 thousand for advertising and promotions, euro 91,198 thousand for outsourcing costs from Postel for printing telephone bills and transportation costs for telephone books, euro 60,411 thousand for trade agreements with Internet Service Providers, euro 170,711 thousand for compensation to dealers and other commercial costs and euro 27,992 thousand for product sales costs;
d) "know-how development costs" consisted mainly of expenditures for studies and research (euro 61,401 thousand) and consulting fees (euro 60,337 thousand);
e) "amounts due to other carriers" mainly comprised euro 2,047,673 thousand due to Italian mobile operators, euro 808,814 thousand to domestic fixed carriers and euro 744,857 thousand to foreign correspondents.

The costs for services included euro 2,131,465 thousand regarding transactions with subsidiaries, affiliated companies and parent companies. They referred, in particular, to:

- *TIM (euro 1,292,480 thousand) - amounts due for telecommunications services;*
- *I.T. Telecom (euro 324,078 thousand) - operating information systems;*
- *Seat Pagine Gialle (euro 86,851 thousand), Etec S.A. (euro 39,291 thousand), Entel Chile (euro 37,089 thousand) - TLC services;*
- *TILAB (euro 52,145 thousand) - studies and research costs;*
- *Telespazio (euro 37,277 thousand) - use of satellite circuits;*
- *TESS (euro 25,819 thousand) - outsourcing of administration requirements for personnel.*

Use of property not owned *euro 599,807 thousand*

Use of property not owned, which decreased by euro 19,692 thousand, compared to 2001, included mainly "service costs " of euro 187,879 thousand (for the lease of TLC lines and satellite systems), and "operating costs" of euro 411,928 thousand (for building rentals, building and vehicle leases and equipment rentals). As regards lease installments, principal and interest totaled, respectively, euro 19,123 thousand and euro 19,393 thousand.

This item comprised euro 250,392 thousand of costs for the use of property not owned relating to subsidiaries, affiliated companies and parent companies. They regarded, in particular:

JJ 00561

- *IM.SER (euro 152,553 thousand), Telemaco Immobiliare (euro 36,776 thousand) and Tiglio I (euro 16,682 thousand) - building rentals;*
- *Teleleasing (euro 34,795 thousand) - mainly building leases.*

Personnel *euro 2,582,956 thousand*

Personnel costs decreased by euro 61,284 thousand. They comprised "wages and salaries" (euro 1,823,410 thousand), "social security contributions" (euro 577,147 thousand), "termination indemnities" (euro 138,991 thousand) and "other costs" (euro 43,408 thousand). Personnel costs include the costs of employees on loan to other Group companies (euro 31,485 thousand) and recovered from the same Group companies and the income from the recovery of such costs is recorded in "*Other revenues and income*".
A comparative breakdown of the average number of employees by professional category is given below:

	2002	2001	Change
Executives	948	1,005	(57)
Middle management	1,688	1,655	33
Clerical staff	47,223	49,953	(2,730)
Technicians	7,519	8,846	(1,327)
Total	**57,378**	**61,459**	**(4,081)**

Amortization, depreciation and writedowns *euro 3,359,117 thousand*

Amortization, depreciation and writedowns, which decreased by euro 120,664 thousand compared to 2001, included the following:

Amortization of intangible assets euro 566,495 thousand

Amortization of intangible assets decreased by euro 51,070 thousand and referred to the following assets:

(in thousands of euro)	2002	2001	Change
Industrial patents and intellectual property rights	528,084	578,542	(50,458)
Concessions, licenses, trademarks and similar rights	14,887	37	14,850
Goodwill	4	-	4
Other intangibles	23,520	38,986	(15,466)
Total	**566,495**	**617,565**	**(51,070)**

Depreciation of fixed assets euro 2,453,875 thousand

Depreciation of fixed assets decreased by euro 249,799 thousand compared to 2001 on account of the reduction in depreciable assets and the change in the mix of depreciable assets.
The average depreciation rate, calculated by taking into account the above depreciation charge and the assets being depreciated, is equal to 8.0% (8.4% in 2001).

The following table shows the depreciation charge for each asset category and the related depreciation rate:

(in thousands of euro)	2002		2001		Change
Land and building	3.3%	86,867	3.3%	89,888	(3,021)
Plant and machinery	8.3%	2,295,904	8.8%	2,548,024	(252,120)
Manufacturing and distribution equipment	19.4%	16,002	23.9%	18,806	(2,804)
Other fixed assets	22.7%	55,102	19.0%	46,956	8,146
Total		**2,453,875**		**2,703,674**	**(249,799)**

Other writedowns of intangibles and fixed assets — euro 39,307 thousand

Other writedowns of intangibles and fixed assets included euro 18,206 thousand for the writedoff of the Indefeasible Rights of Use - IRUs, transferred on December 31, 2002 to Telecom Italia Sparkle as part of the contribution of the "International Wholesale Services" business segment, euro 3,499 thousand for the writedown of industrial buildings and euro 17,206 thousand for the writedown of telephone exchanges.

Writedowns of receivables included in current assets and liquid assets — euro 317,042 thousand

This item comprises provisions to the allowance for doubtful accounts and includes euro 299,642 thousand in respect of trade accounts receivables from customers and euro 17,400 thousand in respect of trade accounts receivable from subsidiaries set aside in respect of the risk of uncollectibility of receivables from *Telecom Italia International verso Telekom Srbija*.

Changes in inventories of raw materials, supplies and merchandise — *euro 7,597 thousand*

The change is due to lower purchases in respect of supplies destined for sale and maintenance following the optimization of inventory levels and also takes into account writedowns for obsolete materials and materials with diminished utilization.

Provisions for risks — *euro 44,119 thousand*

These refer to provisions made to the "*reserve for litigation*" to cover expenses connected with the probable outcome of disputes with third parties of euro 3,150 thousand and to the "*reserve for contractual risks and other risks*" to cover risks stemming from the settlement of trade and regulatory questions of euro 40,969 thousand.

Miscellaneous operating costs — *euro 484,905 thousand*

Miscellaneous operating costs, which increased by euro 3,008 thousand compared to 2001, included the following:

Losses on disposal of assets — euro 31,386 thousand

These losses mainly refer to the disposal of fixed assets relating to public telephone installations.

License fee — euro 224,769 thousand

The TLC license fee decreased by euro 64,813 thousand compared to 2001, owing to a reduction in the revenue base and a reduction in the rate which decreased from 2.5% in 2001 to 2% in 2002; this item mainly includes the fee on amounts invoiced under Law No. 448/1998 (euro 203,826 thousand), the fee for the assignment of available numbers (euro 7,800 thousand) and the free for the use of radio frequencies (euro 8,746 thousand) established by the Ministerial Decree of February 5, 1998, in addition to the contribution for the operation of the regulatory body (euro 3,895 thousand).

Other miscellaneous costs — euro 228,750 thousand

Other miscellaneous costs, which increased by euro 61,182 thousand, include the following:

(in thousands of euro)	2002	2001	Change
• Other indirect duties and annual taxes, relating mainly to the local property tax, local duties, stamp and register tax, vehicle tax, Technical and Finance Office taxes and permits, license tax on mobile equipment	**84,991**	**87,857**	(2,866)
• contributions and membership fees	**15,842**	**14,601**	1,241
• losses due to settlements	**45,305**	**10,381**	34,924
• losses on the sale of receivables	**59,099**	**36,769**	22,330
• other costs, essentially relating to compensation due to customers under service regulations for delays in hookups or line transfers, damages paid to third parties for line installations and maintenance	**23,513**	**17,960**	5,553
Total	**228,750**	**167,568**	61,182

Financial income and expense ***euro 1,031,244 thousand***
(euro 397,336 thousand in 2001)

The income balance, net, of financial income and expense, which increased by euro 633,908 thousand, compared to 2001, included the following:

(in thousands of euro)		2002	2001	Change
Income from equity investments	(A)	**2,117,757**	**2,022,090**	95,667
Other financial income	(B)	**205,114**	**188,052**	17,062
Interest and other financial expense	(C)	**1,291,627**	**1,812,806**	(521,179)
Total	**(A+B-C)**	**1,031,244**	**397,336**	633,908

Income from equity investments referred to the following:

(in thousands of euro)	2002	2001	Change
Dividends from subsidiaries, affiliates and other companies	**1,413,709**	**1,304,634**	109,075
Other income from equity investments:			
• tax credits on dividends	702,440	717,456	(15,016)
• gains on sales of investments	1,608	-	1,608

Total	**(A-B)**	**(6,093,178)**	**(2,892,922)**	**(3,200,256)**

In particular:

Extraordinary income related to the following:

- gains realized on the sales of investments in *Telemaco Immobiliare (euro 134,420 thousand)*, Telespazio (euro 46,767 thousand), *IMMSI (euro 50,627 thousand), EMSA (euro 69,524 thousand),* the contribution of the "Asset Management " business segment to Tiglio II, (euro 126,355 thousand), the sale of the "non-facility" business segment (property, project e agency) to the Pirelli & C. Real Estate Group (euro 15,163 thousand), the sale of the "Training" business segment to *Telecom Italia Learning Services (euro 1,900 thousand)* and the disposal of buildings (euro 6,782 thousand);
- prior period income arising from the recovery of accrued pre-amortization interest (euro 131,188 thousand) on the expenses for employee benefit obligations under Law 58/1992 that were paid, with reserve, to INPS up to 1999 following the termination of litigation after the courts ruled in Telecom Italia's favor;
- recovery, from subsidiaries (mainly *Telecom Italia International and TIM International*), of expenses connected with extraordinary transactions (euro 191,997 thousand) incurred by Telecom Italia on their behalf;
- release to income (euro 59,360 thousand) of a part of the reserve for risks and charges, set up in 2001 to cover the expenses connected with the agreement for the sale of *Stream* to News Corporation and Vivendi Universal/Canal+, after the parties did not go through with the agreement;
- other prior period income of euro 48,942 thousand.

Extraordinary expenses comprised the following:

- writedown of the investment in *Seat Pagine Gialle (euro 2,690,503 thousand)* and the provision for the forward commitment to purchase Seat Pagine Gialle shares (euro 1,941,843 thousand);
- extraordinary provisions regarding the investments in *Netesi (euro 31,227 thousand) and Telecom Italia International (euro 1,101,893 thousand),* the latter mainly in conjunction with the expenses on the sale of the investment in 9Telecom to LDCom (euro 388,328 thousand), the loss on the sale of Telekom Austria (euro 187,951 thousand), the writedown of Netco Redes (euro 102,727 thousand), and the writeoff of the carrying value of the investment in Nortel Inversora (euro 37,000 thousand);
- expenses and provisions (euro 378,806 thousand) for corporate restructuring relating to employees cutbacks and layoffs;

JJ 00567

- expenses under Law 58/1992 (euro 153,615 thousand) to cover employees under the former fund "Telephone Employees Pension Fund" (FPT), which became part of the general "Employees Pension Fund", in accordance with the 2000 Finance Bill ;
- expenses incurred on behalf of Group companies and recovered from the same companies (euro 191,997 thousand);
- extraordinary contribution to INPS, euro 71,234 thousand, (established by the 2000 Finance Bill for the three years 2000 – 2002);
- provisions following the guarantees provided upon the disposals of Italtel (euro 15,000 thousand) and Telespazio (euro 38,200 thousand) and at the time of the reorganization of real estate assets (Progetto Tiglio) euro 29,500 thousand, as well as other matters, euro 28,780 thousand, of which euro 21,562 thousand refers to relations with Stream;
- prior period expenses (euro 157,963 thousand) relating to the adjustment of the estimated value of unused prepaid telephone cards as a result of the introduction of technical data collection procedures;
- other prior period expenses of euro 146,838 thousand relating mainly to expenses connected with extraordinary transactions, damage compensation to third parties and sundry charges.

Income taxes ***-euro 25,600 thousand***

(euro 562,022 thousand in 2001)

Income taxes showed a credit balance of euro 25,600 thousand and comprised current income tax expense of euro 919,471 thousand and deferred tax credits of euro 945,071 thousand.
The total reduction of euro 587,622 thousand compared to 2001 is the result of the loss for the year, which was mainly caused by the aforementioned writedowns of investments which contributed to the increase in deferred tax credits.
Income taxes can be broken down into a credit for taxes on income (IRPEG) of euro 325,049 thousand and the expense for the Regional Tax on Production Activities (IRAP) of euro 299,449 thousand.
Details used in the determination of income taxes in 2002 are as follows:

(in thousands of euro)		IRPEG	IRAP	TOTAL
Theoretical taxes	(A)	**(601,551)**	**297,549**	**(304,002)**

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Telecom Italia S.p.A.

1. We have audited the financial statements of Telecom Italia S.p.A. as of and for the year ended December 31, 2002. These financial statements are the responsibility of the Telecom Italia S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   For the opinion on the financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to our auditors' report dated April 15, 2002.

3. In our opinion, the financial statements of Telecom Italia S.p.A. comply with the Italian regulations governing financial statements; accordingly, they clearly present and give a true and fair view of the financial position of Telecom Italia S.p.A. as of December 31, 2002, and the results of its operations for the year then ended.

4. We draw your attention to the information presented in the explanatory notes, "Summary of significant accounting policies", regarding the accounting criteria utilized for the employee benefit obligations as required by Law no. 58/1992.

PLAN FOR THE MERGER OF

TELECOM ITALIA S.P.A.

INTO OLIVETTI S.P.A.

AUDITORS' REPORT
Relating to the exchange ratio of shares
pursuant to Art. 2501 quinquies of the Italian Civil Code.

(Translation from the original Italian text)

To the Shareholders of
Telecom Italia S.p.A.

1. OBJECTIVE, SUBJECT AND SCOPE OF THE ENGAGEMENT

We have been appointed by Telecom Italia S.p.A. to prepare our report on the exchange ratio of shares (hereinafter the "exchange ratio") of Telecom Italia S.p.A. (hereinafter "Telecom Italia" or the "company to be absorbed") and Olivetti S.p.A. (hereinafter "Olivetti" or the "absorbing company" and, together with Telecom Italia, the "Companies"), in accordance with Article 2501 quinquies of the Italian Civil Code. To this end, we have been provided by Telecom Italia with the plan for the merger, accompanied by the Directors' Report, which identifies, explains and justifies, pursuant to Article 2501 quater of the Italian Civil Code, the exchange ratio, as well as the Balance Sheet as of December 31, 2002 provided by Article 2501 ter of the Italian Civil Code.

The plan for the merger will be subject to approval at the Extraordinary General Meeting of the shareholders of Telecom Italia to be held on May 24, 2003, first meeting, or on May 25, 2003, second meeting.

Similarly, the shareholders of Olivetti will be required to approve the plan for the merger at the Extraordinary General Meeting to be held on May 24, 2003, first meeting, or on May 25, second meeting or, on May 26, 2003, third meeting if required.

Deloitte & Touche Italia S.p.A. has been appointed by Olivetti to prepare a similar report on the exchange ratio.

JJ 00584

In order to provide the shareholders with adequate information regarding the exchange ratio, this report illustrates the methods adopted by the Directors in determining the exchange ratio and the difficulties encountered by them; in addition, this report also indicates whether, under the circumstances, such methods are reasonable and not arbitrary, whether the Directors have considered the respective importance of such methods and whether the methods have been correctly applied.

In our examination of the valuation methods adopted by the Directors, also based on indications from their Professional Advisors, we have not made a valuation of the Companies participating to the merger. This was done solely by the Directors and the Professional Advisors appointed by them.

2. SUMMARY OF THE TRANSACTION

The Boards of Directors of Telecom Italia and of Olivetti have developed a plan, the purpose of which is to simplify the corporate structure of the Olivetti and Telecom Italia Group.

As indicated in the report of the Board of Directors of Telecom Italia, the proposed transaction provides for the merger of Telecom Italia into Olivetti, pursuant to Articles 2501 and following of the Italian Civil Code. Such transaction, with respect to its scope and main characteristics, was approved by the Boards of Directors of the companies participating to the merger, held on March 11, 2003.

On April 15, 2003, the Board of Directors of Telecom Italia approved the plan for the merger of Telecom Italia into Olivetti, confirming the exchange ratio preliminarily indicated by the Board of Directors on March 11, 2003.

The merger will be effected on the basis of the draft financial statements of Telecom Italia and of Olivetti as of December 31, 2002, adopted by the Boards of Directors of the Companies as the balance sheets required by Article 2501 ter of the Italian Civil Code.

As a result of the merger, the absorbing company will take the name and the corporate scope of Telecom Italia and will adopt new by-laws, based on the current by-laws of Telecom Italia.

As a consequence of the change in the corporate scope, the shareholders of Olivetti who are absent or contrary to the resolutions approving the transaction, will have the right to withdraw pursuant to Article 2437 of the Italian Civil Code.

In the context of the transaction, Olivetti announced the intention to proceed with a voluntary and partial tender offer on Telecom Italia's ordinary and savings shares. In particular, Olivetti intends to offer a consideration based on the average of the stock-market prices of Telecom Italia's ordinary and savings shares in the period between March 12, 2003 and the date of the shareholders' meeting called to approve the merger project, increased by a premium of 20%. In any case, the consideration will not be (i) higher than Euro 8.40 for each ordinary share and Euro 5.65 for each

savings share and (ii) lower than Euro 7 for each ordinary share and Euro 4.70 for each savings share.

Based on information already made public, the number of shares subject to the tender offer will be determined when the period to exercise the right of withdrawal pursuant to Article 2437 of the Italian Civil Code will expire and, accordingly, at the time Olivetti will have determined the total amount of disbursement to be incurred for such withdrawals. The maximum total amount for the tender offer will be Euro 9 billion, net of the amount of withdrawals. The financial resources allocated to the tender offer for each class of shares (ordinary and savings), if non totally utilized for a class will be assigned to the other class. If the acceptances of the tender offer by the holders of ordinary shares and savings shares were to exceed the quantity tendered for, they will be prorated with respect to each class.

The tender offer will start subsequent to the expiration of the term for the exercise of the right of withdrawal and will be completed prior to the execution of the merger deed. The offering will cease its effects in case the registration of the merger deed at the Companies' Register will not be completed.

The offering will be evaluated by the Board of Directors of Telecom Italia, pursuant to Article 39 of the Ruling for the Issuers on the Italian Stock Exchange.

The merger will result with the cancellation of Olivetti's investment in Telecom Italia. Olivetti's share capital, as resulting on the date the merger will become effective, will be re-determined on the basis of the reduction of the par value of the shares (from Euro 1.00 to Euro 0.55), of its allocation to ordinary and savings shares (the latter category being introduced in the new by-laws of the absorbing company as a result of the merger) and of the necessity to maintain its current level in terms of absolute value. After the allocation, the capital of the company resulting from the merger will be distributed to the shareholders of Olivetti and those of Telecom Italia on the basis of a distribution ratio which will reflect the exchange ratio of Olivetti's shares with the ordinary and savings shares of Telecom Italia. In particular, with respect to the criteria for the allocation of Olivetti's shares, the Directors propose to proceed to the exchange by adopting principally the method of the re-distribution of Olivetti's capital and issuing new shares only within the limits eventually required to maintain the share capital at the current level. The re-distribution method consists in the allocation of the absorbing company's share capital among the shareholders of the absorbing company and those of the company to be absorbed, on the basis of the so called "natural" exchange ratio. The determination of the share capital and the exchange transaction will be made in accordance with the following principles:

- Olivetti will set the par value of its shares – to the amount resulting from the conversions of the convertible bonds, the exercise of the warrants and the exercise of the stock options on one hand, and the exercise of the right of withdrawal on the other hand – at Euro 0.55 each (equal to the par value of Telecom Italia's shares), in place of the current par value of Euro 1. Therefore, the share capital of Olivetti will be divided in a greater number of shares. These shares, will be divided into ordinary and savings shares;

- the new shares, ordinary and savings, with a par value of Euro 0.55 each, representing the share capital of Olivetti at the time of the merger, will be distributed to Olivetti's ordinary shareholders and to ordinary and savings shareholders of Telecom Italia, respectively. This distribution will be made on the basis of the distribution ratios, which will reflect the so called "natural" exchange ratio, with reference to the actual number of shares to be distributed, not yet known as of to date. Paragraph 6.4 below indicates this ratio as 7 ordinary or savings shares of Olivetti for each of ordinary and savings shares of Telecom Italia.

Should the capital of the absorbing company at the time of the merger fall, as a result of the effect of the withdrawals in respect to those of the conversions, below the current amount of Euro 8,845,537,520, the distribution of the share capital will be accompanied by the issuance of new ordinary and savings shares of the company resulting from the merger, to service the exchange of shares, up to a maximum number of 11,103,237,962, with a par value of Euro 0.55 each, in respect to the assignment to capital of the portion of minority interests of the company to be absorbed. These additional shares will be allocated to the shareholders of the absorbing company as well as those of the company to be absorbed, in respect of their proportional ownership.

At the time of the exchange of shares, Olivetti will assign to the savings shareholders of Telecom Italia new savings shares with characteristics corresponding to those currently issued by Telecom Italia.

The transaction provides for the listing of savings shares that will be issued by the absorbing company to service the exchange of shares in favor of the savings shareholders of Telecom Italia. The new Olivetti savings shares will have a par value of Euro 0.55 each, corresponding to that of the current savings shares of Telecom Italia.

Pursuant to Articles 2504 bis, last paragraph and 2501 bis, first paragraph, n. 5 of the Italian Civil Code, the new shares of the company resulting from the merger will have regular dividend rights.

Pursuant to Article 2504 bis, last paragraph of the Italian Civil Code, the effects of the merger, except for those effects provided for by Article 2501 bis, numbers 5 and 6 of the Italian Civil Code, will start from the last of the registrations of the merger deed, or from such subsequent date provided for by the merger deed.

The operations of the company to be absorbed, including income taxes, will be imputed to the financial statements of the absorbing company, with effect from January 1 of the year in which the transaction will become effective.

3. DOCUMENTATION UTILIZED

In performing our work, we obtained from Telecom Italia and Olivetti, such documentation and information as was considered useful in the circumstances. We analyzed such documentation and, in particular:

a) the plan for the merger and the reports of the Boards of Directors of the two Companies addressed to the respective Extraordinary General Meetings which, on the basis of the Balance Sheet as at December 31, 2002, propose an exchange ratio as follows:

7 Olivetti ordinary shares, with a par value of Euro 1.00 (one) each for each Telecom Italia ordinary share, with a par value of Euro 0.55 each;

7 Olivetti savings shares, with a par value of Euro 1.00 (one) each for each Telecom Italia ordinary share, with a par value of Euro 0.55 each.

This exchange ratio, so called "natural", corresponds to the exchange ratio that would be applied, had the merger been realized without re-distribution, but issuing new shares to service the exchange ratio.

The ratio for the exchange of shares has been determined by the Directors also taking into account the valuation reports of the Professional Advisors indicated in points b) and c) below. The report of the Board of Directors sets out in detail the valuation criteria adopted, the reasons for their choice, the values resulting from their application and the related comments;

b) the appraisal report of the exchange ratio prepared by Lazard, as Professional Advisor of the Directors; this report, dated May 11, 2003, and prepared at the request of Telecom Italia, sets out the valuation criteria adopted, the reason for which they were chosen and the results of their application;

c) the fairness opinion issued by Goldman Sachs on March 11, 2003 at the request of Telecom Italia, with respect to the fairness of the exchange ratio;

d) the following documentation, used by the Professional Advisors to prepare their appraisal reports and, subsequently, within the scope of our engagement, also utilized by us:

- the financial statements and the consolidated financial statements of Telecom Italia and Olivetti as at December 31, 2001 accompanied by the Report of the Board of Directors, the Report of the Board of Statutory Auditors and the Independent Auditors' Report;
- draft financial statements and draft consolidated financial statements of Telecom Italia and of Olivetti as at December 31, 2002 accompanied by the Report of the Board of Directors;
- Telecom Italia's consolidated Business Plan 2003 – 2005 (version dated January 16, 2003) and related updates;
- Tecnost Group's condensed business plan;
- historical market prices and trading volumes of ordinary and savings shares of Telecom Italia and Olivetti;
- publicly available information about companies operating in the same sector;

JJ 00588

- financial research and analyses, published by specialized institutions and investment banks;

e) additional documentation, as follows, has been utilized by us:
   - data and information obtained from the Professional Advisors and used by them for the determination of the exchange ratio;
   - rulings of convertible bonds of Olivetti;
   - appraisal report of the exchange ratio dated March 11, 2003, issued by JP Morgan as Professional Advisor of Olivetti and the report prepared by Professor Angelo Provasoli, who reviewed and concurred with the valuation methodologies adopted by JP Morgan;
   - by-laws of the companies participating to the merger;
   - accounting elements and other information as deemed necessary for this report.

Finally, we obtained representation from Telecom Italia that, as to the Directors' best knowledge, no significant changes occurred in the data and information considered during our analysis. The same representation has been obtained by Deloitte & Touche Italia S.p.A. from the Directors of Olivetti.

4. VALUATION METHODS ADOPTED BY THE BOARDS OF DIRECTORS FOR THE DETERMINATION OF THE EXCHANGE RATIO

The Directors, also supported by their Professional Advisors, considering the importance and complexity of the merger transaction, deemed it appropriate to identify the valuation methods which, in addition to be in accordance with current best practice, would enable the two companies to be valued on a homogeneous basis.

4.1. Selection of the methods and valuation criteria

The Board of Directors of Telecom Italia determined the exchange ratio by selecting, among a number of valuation methods, those deemed more appropriate to express the value of the entities involved in the merger, considering the activities carried-out by the absorbing company and by the company to be absorbed.

In addition, as suggested by corporate doctrine and professional practice, the Directors compared the values attributed to the companies participating in the merger process under the assumption that they will continue as a going concern. These values cannot be considered representative of a valuation in absolute terms of the two companies participating to the merger, nor can they be compared with any acquisition or sale prices (which normally reflect majority premiums or minority discounts).

The Directors of Telecom Italia, supported by their Professional Advisors, selected the valuation methods and principles to be adopted taking into account:

a) the specific objectives attributed to the valuations with reference to the underlying transaction;

JJ 00589

b) the nature of the activities carried-out by each company participating to the merger.

In connection with the first aspect, in the selection of the valuation principles the Directors referred to the purpose of the valuation and to the relevant factors that allow to estimate the value of the entities being valued. As the objective is to express comparable values in order to determine the exchange ratio, the Directors adopted, for both companies participating to the merger, valuation methods based on homogeneous criteria.

As to the second aspect, the Directors considered on one hand the various areas of operations of Telecom Italia and, on the other hand, the circumstances that the controlling investment of Olivetti in Telecom Italia represents a significant component of total assets of Olivetti.

On the basis of the above, the Directors, for the purpose of determining the values of Olivetti and Telecom Italia, have utilized, given the equal significance level in the valuation process, the method of stock-market prices as the principal method and the sum-of-parts method as the control method.

Stock-market prices method: when the companies involved in the merger have shares listed on regulated markets, doctrine and professional practice suggest to consider the results deriving from the stock prices of the respective shares, averaged over an adequate period of time. In this case, the Directors deemed the stock prices particularly significant and, on the basis of the stock-market prices at March 7, 2003 (last date of stock trading prior to the announcement of the transaction by the Boards of Directors), they note that both companies show high levels of volumes exchanged, high capitalization and a high liquidity of their respective shares.

Sum-of-parts method: according to this method, the value of a company is determined as the sum of the values of each of its businesses (intended as economic entities which can be individually evaluated), adjusted to take into account the financial position of the company, minority interests and, where significant, other effects such as those relating to off-balance sheet items, if any, and to potential tax benefits.

In the application of the valuation methods described, the Directors considered the expected distribution of reserves by Telecom Italia, approved by the Board of Directors on March 11, 2003.

4.1.1. Stock-market prices method

The stock-market prices method estimates the value of the equity on the basis of stock-market prices during a significant period, that expires on a date close to which the valuation is prepared. The Directors believe that the stock-market prices following the announcement of the transaction are not relevant.

In order to mitigate short-term fluctuations that typically characterize financial markets, the Directors extended the analysis of stock-market prices to the average prices expressed by the market over sufficiently long periods.

Accordingly, in the application of the stock-market prices method, with reference to the date of March 7, 2003, the Directors proceeded to:

a) analyze the historical simple averages over a period covering the preceding 12 months;

b) analyze the historical averages weighted for volumes over a period covering the preceding 12 months;

c) analyze the mobile averages for 1, 3, 6 and 12 months;

d) adjust the value of Telecom Italia's shares, to take into account the expected distribution of reserves.

From the analysis of the historical trends, the Directors identified the averages for 1, 3, 6 and 12 months as those within a range of constant ratios of values.

4.1.2. Sum-of-Parts method

According to the sum-of-parts method, the value of Telecom Italia and Olivetti is determined as the sum of the values of the individual businesses of each company, considered as economic entities which can be individually evaluated. This sum, for each of the companies participating to the merger, is adjusted to reflect the financial position, minority interests and, where significant, other effects, such as off-balance sheet items, if any, and potential tax benefits.

On the basis of the significance of the investment in Telecom Italia in respect to Olivetti's total assets, the valuation process was concentrated on the estimated value of Telecom Italia, decisive element to identify Olivetti's value.

Taking into account the complexity of the company's structure and the various areas of the operations of the Telecom Italia Group, the individual businesses were evaluated on the basis of those methodologies, among those utilized by the practice, considered more suitable in the specific situation. In particular, the method of the discounted cash flow ("DCF") was utilized for the main businesses, such as for instance, the services connected to mobile and wire-line communications.

The remaining assets and liabilities of Telecom Italia have been valued principally on either book or market value basis, in consideration of their limited weight with respect to the entire value of Telecom Italia.

The DCF method has been applied by computing the present value of operating cash flows, gross of any component of financial nature ("Free Cash Flow" or "FCF"). According to this method, the economic value of an enterprise is equal to the sum of the following components:

- operating cash flows that the company will be able to generate in the future, discounted at a rate representing the weighted average cost of capital;

- net financial position and minority interests, which, in this case, refer to December 31, 2002.

In applying the DCF method, the Directors made reference to the operating cash flows connected to the main activities, as resulting from the economic and financial forecasts made for Telecom Italia.

For Olivetti, which is a holding company, the main asset of which is represented by the investment in Telecom Italia, the sum-of-parts method has been applied by evaluating this investment according to the principles described above and by evaluating the remaining assets and liabilities at book or market value, in light of their limited weight in respect to the valuation of the company taken as a whole.

In the valuation of Telecom Italia and Olivetti, the Directors have also taken into consideration the tax assets, for the portion deemed utilizable by the companies participating to the merger, regardless if the merger transaction will become effective or not, on the basis of expected taxable income on a stand alone basis. The Directors have also considered, for Telecom Italia, the expected distribution of reserves and, for Olivetti, the pro-forma effect of the conversion of convertible bonds consistent with the fully-diluted methodology.

4.2. Treatment of saving shares

With respect to the category of savings shares, which, as of to date are not issued by Olivetti, the Directors supported by their Professional Advisors assumed that, also considering the economic benefits that will be granted to Olivetti's savings shares, the discount currently recognized by the market to Telecom Italia's savings shares, with respect to the ordinary shares, may be utilized in the determination of the exchange ratio applicable to Olivetti's savings shares to be issued. The Directors therefore deemed appropriate to adopt the same exchange ratio, as that adopted for ordinary shares.

The Directors believe that, on the basis of a generally accepted principle, different methods of allocation between ordinary and savings shares would imply discretionary factors in the valuation, not supported by objective factors.

5. VALUATION DIFFICULTIES ENCOUNTERED BY THE BOARD OF DIRECTORS

In carrying out the valuations for the purpose of determining the exchange ratio, the Board of Directors of Telecom Italia encountered the following main difficulties:

a) *asset disposals during 2003, if any*: at present, it is not possible to precisely determine the outcome of the expected disposal of the new company that will be incorporated, as a result of the de-merger of Seat Pagine Gialle. In any case, the Directors, on the basis of the significance of the investment in Seat Pagine Gialle in respect of the total value of Telecom Italia, expect that the disposal should not have such effects that would require changes to the exchange ratio;

b) *taxation*: the valuation was made on the basis of current tax legislation; therefore, the Directors did not consider the tax reform currently in process, and not yet enacted, the effects of which are to date difficult to be quantified;

c) *valuation of savings shares*: as of to date there are no Olivetti savings shares; in order not to include in the analysis discretionary factors, not supported by objective factors, lacking historical data of reference for Olivetti, the Directors took into account the price differentials of ordinary and savings shares of Telecom Italia only.

The Directors, supported by their Professional Advisors, made a thorough analysis of the argumentations raised by some institutional investors, in connection with the application of the NAV method to Olivetti as holding company owing as its main asset the investment in Telecom Italia, and in particular in respect to the opportunity to value such investment at stock-market prices. In light of the purposes of the valuation, the Directors, even though recognizing the complexity of the subject, deemed to adopt homogeneous criteria for both companies and therefore to utilize for Olivetti the same method as that utilized for Telecom Italia (Sum-of-Parts).

6. RESULT OF THE VALUATION PERFORMED BY THE BOARDS OF DIRECTORS

6.1. Stock-market prices method

The results obtained with the application of the principal method led the Directors supported by their Professional Advisors to identify the following values:

	Values (Euro)		
Stock market prices	**Telecom Italia post dividend**	**Olivetti**	**Value Ratio**
Weighted averages			
March 7, 2003	5.7	0.86	6.7
Average 1 month	6.3	0.91	7.0
Average 3 months	6.8	0.99	6.9
Average 6 months	7.2	1.02	7.1
Average 12 months	7.6	1.11	6.9
Arithmetic averages			
March 7, 2003	5.7	0.86	6.7
Average 1 month	6.4	0.91	7.0
Average 3 months	6.9	0.99	7.0
Average 6 months	7.2	1.01	7.1
Average 12 months	7.7	1.11	6.9
Maximum and minimum prices			
Maximum price last 12 months	9.5	1.47	6.5
Minimum price last 12 months	5.7	0.84	6.8

JJ 00593

The Directors noted that the above results are confirmed also when expanding the time range to 18 months.

6.2. Sum-of-Parts method

As to the sum-of-parts method, the Directors of Telecom Italia supported by their Professional Advisors identified the following values for each ordinary share:

	Telecom Italia	Olivetti	Value Ratio
Value per each ordinary share (Euro)	8.8	1.27	6.9

6.3. Determination of the exchange ratio

On the basis of the valuations performed with the support of the respective Professional Advisors and in accordance thereto, the Directors defined the relative values of the companies participating to the merger, for the purpose of the exchange ratio.

The value ratios resulting from the application of the methods adopted by the Board of Directors of Telecom Italia are summarized as follows:

Method	Value ratio
Stock-maket prices method	
- March 7, 2003	6.7
Weighted averages:	
- Average 1 month	7.0
- Average 3 months	6.9
- Average 6 months	7.1
- Average 12 months	6.9
Sum-of-parts method	6.9

On the basis of the valuation methods applied to the companies participating to the merger described above, the Directors identified the following exchange ratio, so called "natural", corresponding to the exchange ratio that would result, had the merger been realized without re-distribution, but through the issuance of new shares to service the exchange:

7 ordinary shares of Olivetti, with a par value of Euro 1.00 (one) each, for each ordinary share of Telecom Italia with a par value of Euro 0.55 each;

7 savings shares of Olivetti, with a par value of Euro 1.00 (one) each, for each ordinary share of Telecom Italia with a par value of Euro 0.55 each.

JJ 00554

6.4. Procedures for assigning the shares and carrying out the share exchange

As previously described, the Directors considered advisable to leave the nominal capital of Olivetti basically unchanged at the completion of the transaction. Accordingly, they proposed that the share exchange be carried out primarily by redistributing Olivetti's capital, with recourse to the issue of new shares only insofar as this is required to maintain the share capital at the current level.

The redistribution technique consists of dividing the share capital of the absorbing company and hence the shares composing it among the shareholders of the absorbing company and those of the company to be absorbed, according to the so called "natural" exchange ratio between the shares.

The redistribution takes the share capital of the absorbing company at the time the merger is implemented as the baseline.

The amount of capital will be determined and the share exchange transaction will be carried out according to the following methodologies:

a) Olivetti will set the nominal value of its shares — in the amount resulting after the conversions and withdrawals — at Euro 0.55 (equal to the par value of Telecom Italia shares), in place of the current par value of Euro 1.00. Accordingly, Olivetti's share capital will be divided into a larger number of shares. Such shares will be divided into ordinary shares and savings shares, the latter category with the same rights and features of the Telecom Italia savings shares;

b) the new ordinary and savings shares with a par value of Euro 0.55 each constituting the share capital at the time of the merger of Olivetti will be redistributed, respectively, to the holders of Olivetti and Telecom Italia ordinary shares and the holders of Telecom Italia savings shares according to the assignment ratios reflecting, with reference to the actual number of shares to be redistributed, the so called "natural" exchange ratio of 7 Olivetti ordinary or savings shares for each Telecom Italia ordinary or savings share.

The variables represented by conversions, exercise of stock options, withdrawals and acceptances of the tender offer can only be quantified exactly at the time the merger is effective. Accordingly, the determination of the assignment ratio for the purpose of redistribution can be established precisely only at the time the merger becomes effective.

At the end of the merger transaction, the ratio between the shares assigned to the Olivetti shareholders and those assigned to the Telecom Italia shareholders will exactly reflect the "natural" exchange ratio between the shares of the two companies prior to the merger (1/7) determined above.

JJ 00651

7. WORK DONE

7.1. Work done on the "documentation utilized" as mentioned at point 3.

The valuation methods applied by the Directors, also on the basis of the indications of their Professional Advisors, take as a reference basis the draft financial statements of the Companies as at December 31, 2002, in accordance with art. 2501 ter of the Italian Civil Code. It should be noted that the statutory and consolidated financial statements of Telecom Italia and of Olivetti as at December 31, 2002, were audited by us.

In addition, we have performed the following activities:

- We have met with the Telecom Italia management to obtain information on the subsequent events with respect to the financial statements mentioned above that could have a significant effect on the amounts being examined here;

- With regard to the three-year plan 2003 – 2005 and cash flow forecasts of Telecom Italia, while considering the inherent uncertainty and limits of any type of forecast, we have discussed with the management of Telecom Italia the main characteristics of the forecasting process and the criteria used for their compilation.

The above activities have been performed to the extent necessary for the purpose of our engagement, indicated in paragraph 1 above.

7.2. Work done on the methods used to determine the exchange ratio

We have examined the methods followed by the Directors, also based on the indications given by their Professional Advisors, for the determination of the relative value of the Companies and, thus, of the exchange ratios, ascertaining their technical suitability under the circumstances.

We have also performed the following procedures:

- analysis of the Directors' report and of the Professional Advisors reports to verify the completeness and consistency of the processes followed by the Directors in the determination of the exchange ratio, as well as the homogeneity in the application of the valuation methods;

- sensitivity analyses within the valuation methods adopted, with the aim to verify to what extent the exchange ratio would be affected by changes in the assumptions and parameters, considered as significant, utilized in the reports of the Professional Advisors;

- verification of the consistency of data utilized, with respect to the reference sources and with the "Documentation used", described in paragraph 3 above;

JJ 00596

- verification of the mathematical correctness of the computation of the exchange ratio, by applying the valuation methods adopted by the Directors, also on the basis of the indications from their Professional Advisors;

- meetings with the Professional Advisors of Telecom Italia, to discuss the activities performed, the matters encountered and the solutions adopted.

We have also obtained representation that, to the management of Telecom Italia best knowledge, no significant changes occurred in the data and information considered in our analyses.

8. COMMENTS ON THE SUITABILITY OF THE METHODS USED AND THE ACCURACY OF THE ESTIMATES

With reference to this engagement we believe it is worth noting that the principal purpose of the decisional process used by the Directors was to make an estimate of relative values of the companies involved in the merger, by applying homogeneous criteria, in order to obtain comparable values. In fact, the main objective of valuations for mergers is to identify comparable values in order to determine the exchange ratio, rather than to determine absolute values of the companies involved. As such, valuations for merger transactions have a meaning solely in respect of their relative profile and cannot be regarded as estimates of the absolute values of the companies involved, for transactions different from the merger and for which they were not made.

In connection with the valuation methods adopted, we note that:

- they are widely spread in Italian and international practice, they have solid doctrinal bases and are based on parameters determined according to a rigorous methodology process;

- they appear adequate in the circumstances, in light of the characteristics of the companies involved in the merger;

- in conformity with the valuation context required for a merger, the methods have been developed on a stand alone basis;

- the methodology approach adopted by the Directors allowed to meet the criterion of homogeneity of valuation methods and thus that of comparability of values; -

- the application of a principal method and of a control method allowed, in any case, to enlarge the valuation process and to verify the results obtained.

With reference to the development of the valuation methodologies made by the Directors, we note that:

- the stock-market prices method is particularly suitable in connection with companies with a high capitalization, an ample and spread floating and high

volumes of exchange. In this case, the adoption of averages over a sufficiently long period of time allowed to mitigate the effect of shares fluctuations, connected to the general situation of the stock markets; the results are confirmed also by expanding the analysis over 18 months;

- the sum-of-parts method is generally applied by professional practice in the valuation of complex enterprises, characterized by various areas of business. In the specific case, the utilization of the DCF method allowed to appreciate the operational characteristics of the companies participating to the merger. The selection of the DCF method for the main business areas of Telecom Italia is justified by the activity carried on which turns both the balance sheet and the economic and financial aspects into relevant elements for the valuation process;

- the results obtained with the sum-of-parts method, utilized by the Directors for verification purposes, are supported by the analysis of the "consensus" expressed by financial analysts on target prices of Telecom Italia in the three months preceding the announcement of the transaction;

- lacking the historical data for Olivetti, the determination of the exchange ratio for the savings shares of Telecom Italia, provided for in the merger, even in consideration of the limits of the empirical process described in paragraph 4.2, is appropriate under the circumstances and in any case objective.

9. SPECIFIC LIMITATIONS ENCOUNTERED BY THE AUDITORS IN CARRYING OUT THE ENGAGEMENT

During our engagement we did not encounter limitations or difficulties that should be mentioned in this section of the report.

JJ 00598

10. CONCLUSION

Based on the documentation we have examined and on the procedures described above, and considering the nature and extent of our work as described in this report, we believe that the valuation methods adopted by the Directors, also based upon the advice of their Professional Advisors are, under the circumstances, reasonable and not arbitrary and they have been correctly applied by them in their determination of the following exchange ratio of shares:

7 Olivetti ordinary shares, with a par value of Euro 1.00 (one) each, for each ordinary share of Telecom Italia, with a par value of Euro 0.55 each,

7 Olivetti saving shares, with a par value of Euro 1.00 (one) each, for each savings share of Telecom Italia, with a par value of Euro 0.55 each,

indicated in the plan for the merger.

Deloitte
& Touche

To the Shareholders of
Olivetti S.p.A.:

1. OBJECTIVE, SUBJECT AND SCOPE OF THE ENGAGEMENT

In the context of the proposed merger of Telecom Italia S.p.A. (hereinafter also Telecom Italia or the Absorbed Company) into Olivetti S.p.A. (hereinafter also Olivetti or the Absorbing Company; Olivetti, subsequent to the effective date of the merger, is also defined as the "Company Resulting from the Merger"), on March 18, 2003, we were appointed by the President of the Ivrea Tribunal, following the petition presented by Olivetti, as experts for the preparation of the report on the fairness of the ratio for the exchange of the shares of the Absorbed Company with those of the Absorbing Company, in accordance with Article 2501 quinquies, last paragraph, of the Italian Civil Code.

To this end, we have received from the Board of Directors of Olivetti the proposed merger project together with the report prepared by the Board which identifies, explains and justifies in accordance with Article 2501 quater of the Italian Civil Code the exchange ratio as well as the Balance Sheet situation as of December 31, 2002, prepared in accordance with Article 2501 ter, last paragraph, of the Italian Civil Code.

The proposed merger project will be subject to approval at the Extraordinary General Meeting of the Shareholders of Olivetti called for the days of May 24, 25 and 26, 2003, in first, second and third convocation, respectively. In the same way, the Shareholders of Telecom Italia will also be required to be called to deliberate at an Extraordinary General Meeting.

The audit firm Reconta Ernst & Young S.p.A. has been appointed to prepare a similar report on the fairness of the ratio for the exchange of shares for Telecom Italia.

In order to provide the Shareholders with suitable information regarding the ratio for the exchange of shares, this report indicates the methods followed by the Directors for its determination and the valuation difficulties encountered by them; it also contains our evaluation of the adequacy in the circumstances of such methods, from the point of view of their reasonableness and non-arbitrariness, on the relative importance attributed to each method by the Directors and on their correct application.

In examining the valuation methods adopted by the Directors, also on the basis on the indications of the Advisor used by them, we have not performed an economic valuation of the Companies. Such valuation has been performed exclusively by the Directors and the Advisor.

JJ 00603

2. SUMMARY OF THE OPERATION

The Boards of Directors of Olivetti and Telecom Italia have prepared a project aimed at simplifying the corporate structure of the Olivetti Group, as summarized in the following points:

- Merger of Telecom Italia into Olivetti and adoption of the corporate object and name of Telecom Italia by Olivetti.

- Obtaining, on the part of Olivetti, of a credit line up to Euro 9 billion to meet the financial requirements deriving from eventual withdrawal requests by Olivetti Shareholders communicated in accordance with Article 2437 of the Italian Civil Code, and to promote the public offering discussed in the following point.

- The Euro 9 billion financing not eventually utilized for the aforementioned withdrawal of Olivetti Shareholders will then be destined to promote a voluntary and partial public offer by Olivetti to acquire Telecom Italia shares (OPA). The purchase price of the OPA will be equal to the average of the share price in the period between March 12 and the date of the Meeting of Olivetti called to approve the merger, increased by a premium of 20%, with a minimum and maximum, respectively, of Euro 7.0 and Euro 8.4 for each ordinary share and Euro 4.7 and Euro 5.65 for each savings share. The right of withdrawal and OPA are both subordinate to the realization of the merger.

- Distribution of reserves by Telecom Italia prior to the completion of the merger, up to a maximum amount estimated to approximate Euro 1,333 million.

- The merger will result in the elimination of the investment held by Olivetti in the capital of Telecom Italia, and the capital of Olivetti, which will result as of the effective date of the merger, will be re-determined in relation to the reduction in the nominal value of the shares (which will pass from Euro 1.00 to Euro 0.55), to their division between ordinary and savings shares (a category that will be introduced in the new articles of incorporation of the Absorbing Company subsequent to the merger) and to the eventual need to maintain the present consistency in terms of absolute value. After having been so divided, the capital of the Company Resulting from the Merger will be re-allocated between the Shareholders of Olivetti and the Shareholders of Telecom Italia on the basis of an allotment ratio which will reflect the ratio of exchange between the shares of Olivetti and the ordinary and savings shares of Telecom Italia. In particular, with regard to way of allotment of the Olivetti shares, the report of the Olivetti Board of Directors informs that considering the adequacy of Olivetti's share capital - in relation also to the overall size of the debt when this is measured against the cash generating capacity of the Company Resulting from the Merger, both in absolute terms and relative to the main European competitors - it was decided to carry out the share exchange primarily by redistributing Olivetti's capital and have recourse

to the issue of new shares only insofar as this proved necessary to maintain the share capital at the level currently subscribed. The redistribution technique consists in dividing the share capital of the Absorbing Company among the shareholders of the Absorbing Company and those of the Absorbed Company, in accordance with the "natural" exchange ratio between the shares. In the light of the method and principles described in paragraph 4 below, the share capital will be established and the share exchange operation carried out according to the following rules:

- Olivetti will fix the nominal value of its shares - in the amount resulting after conversions on the one hand and withdrawals on the other - at Euro 0.55 (equal to the par value of Telecom Italia shares), in place of the current par value of Euro 1. Consequently, Olivetti's share capital will be divided into a larger number of shares. Such shares will be divided into ordinary shares and savings shares;

- the new ordinary and savings shares with a par value of Euro 0.55 each making up the share capital of Olivetti at the time of the merger will be redistributed, respectively, to the holders of Olivetti and Telecom Italia ordinary shares and the holders of Telecom Italia savings shares according to assignment ratios reflecting, with reference to the actual number of shares to be redistributed, not known as of to-day, the "natural" exchange ratio, by which for each Telecom Italia share of par value Euro 0.55 will correspond 7 Olivetti shares of par value Euro 1.

3. DOCUMENTATION UTILIZED

In the performance of our work we have obtained the documents and the information considered useful in the circumstances. To this end we have analyzed the documentation and information received, and in particular:

- The merger project and the reports of the Boards of Directors of the two Companies addressed to the respective Extraordinary General Meetings which, on the basis of the draft financial statements as of December 31, 2002, taken as the basis for the reference financial position, propose a ratio for the exchange of 7 Olivetti shares for each Telecom Italia share, following the planned distribution of reserves. This ratio for the exchange of shares has been determined by the Directors also using the indications resulting from the reports discussed in the following point.

- The reports on the ratio for the exchange of shares prepared by JPMorgan appointed by Olivetti and by Lazard and Goldman Sachs for Telecom Italia (also described below as "Advisors"), dated March 11, 2003, and updated on April 15, 2003. These reports detail the valuation criteria adopted, the work performed and

the conclusions reached. In addition, we have examined the report of Prof. A. Provasoli, requested by Olivetti to check the consistency and relevancy with respect to the finalities of the operation of the valuation criteria applied by JPMorgan for the determination of the ratio for the exchange of shares.

- The following documentation, used by JPMorgan for the preparation of its report and subsequently also by us, for the performance of our engagement:

  - the consolidated financial statements and Company financial statements for 2001 and the draft financial statements for 2002 of Olivetti, Telecom Italia, Telecom Italia Mobile, Seat Pagine Gialle;

  - the half-year and quarterly reports of the years 2001 and 2002 of Olivetti, Telecom Italia, Telecom Italia Mobile, Seat Pagine Gialle;

  - the Group Business Plan of Telecom Italia 2003-2005 (January 2003 version) and the related updates ;

  - the condensed Business Plan 2003-2005 of Olivetti Tecnost;

  - research and financial analyses published by specialized institutes and investment banks;

  - research and analyses related to companies which are comparable or have similar operating characteristics;

  - stock market trends;

  - other detailed documentation on specific aspects which Olivetti provided to the Advisor in the course of their work.

- Further documentation obtained and information received are:

  - the reports of the audit firm Reconta Ernst & Young S.p.A. and analyses of certain work papers and information obtained verbally from the firm relating to the audit of the financial statements for 2002 of the Companies involved in the merger;

  - accounting and statistical elements as well as other information publicly available considered useful for the purposes of this report.

We have also obtained representation that, as far as the Management of the Company are aware, there have been no significant changes to the data and information taken into consideration in the performance of our analyses.

4. VALUATION METHODS ADOPTED BY THE BOARD OF DIRECTORS

The Directors of Olivetti, also on the basis of the indications of its Advisor, in consideration of the significance and complexity of the merger operation, considered it appropriate to identify valuation methods which, as well as having consolidated authoritative and applicative bases, would enable the two Companies to be valued in a homogeneous manner. In particular:

- Since the exclusive aim of the estimates is to establish significantly comparable values, the methods adopted in the context of valuations for merger purposes and the related results may differ from those used for valuations having a different purpose. On the basis of these assumptions and as a consequence of the adoption of the redistribution method for the assignment of the shares of the Company Resulting from the Merger, summarized in paragraph 2 above, it is first necessary to establish a "natural" exchange ratio between the shares of the two Companies, corresponding to the exchange ratio that would have been applied if the merger had involved the issue of new shares for the purpose of the exchange. This "natural" exchange ratio will correspond to a variety of assignment ratios, which will depend on other variables and in particular on the change in the nominal value of the shares, the number of withdrawals and conversions and total amount of share capital. With this premise, the "natural" exchange ratio was established by applying valuation methods that are commonly used, also internationally, for operations of this kind and for businesses in this sector. In particular, account was taken of the comparative valuation of the Companies involved and priority given to the homogeneousness and comparability of the methods used with respect to the simple estimate of the economic capital of each Company considered on its own. In this perspective, the valuations were carried out considering the two Companies as separate entities and therefore ignoring all the strategic, operational and financial synergies expected from the merger, as well as the question of control premiums/minority discounts associated with the possession of equity interests.

- Telecom Italia has been valued applying, as the basic method, the criterion known as the Sum of Parts (SOP) method, which it is standard market practice to use to estimate the value of a group operating in several sectors. Under this method the value of a company's economic capital is calculated as the sum of the values of its separate units, in the sense of economic entities that can be valued independently and suitably adjusted to take account of the company's net financial position and minority interests where material as well as other factors such as off-balance-sheet items and potential tax benefits. It was considered appropriate to use this method in view of the numerous areas in which Telecom Italia is active. As regards the single units, the Board of Directors of Olivetti

decided that it was advisable to value each of them using the methods deemed most appropriate to each situation. In particular, the valuation of the principal units was based primarily on the Discounted Cash Flow method, following the logic of determining the fundamental value for the financial investor, on the basis of the following methodological approach:

- reference was made to the cash flows of the individual units as set out in the economic and financial plans drawn up by Telecom Italia;

- the growth rates used for the financial projections beyond the time horizon of Telecom Italia's business plan and for the calculation of the terminal value reflect growth prospects consistent with the relevant market benchmarks; the terminal value, determined on the basis of the flows estimated in the manner indicated, is basically consistent with the multiples implicit in the current prices of comparable companies;

- the weighted average cost of capital (WACC) was calculated on the basis of a capital structure basically in line with the present one.

The remaining activities (not valued applying the Discounted Cash Flow method), which have a limited weight within the overall valuation, have been valued using the stock market price method for companies listed on regulated markets and/or the market multiples method, with use also made for testing and control purposes of financial statement values and the values published in analysts' research reports on such companies, where available.

- Olivetti has been valued applying, as the basic method, the Net Asset Value (NAV) criterion – an approach substantially equivalent to the Sum of Parts criterion from a methodological point of view – since commonly considered the most suitable for the valuation of a holding company without significant operations. At the basis of the NAV criterion, the value of the economic capital of a company is determined as the sum of the values of the equity investments and of its other assets, appropriately adjusted to take into account the net financial position of the company and third party interests where significant, as well as other-aspects, including those relative to the central costs of the holding, off-balance sheet items and potential tax benefits. In the specific case, for the purposes of such computation, the principal equity investment is that in Telecom Italia, which has been valued using the Sum of Parts method (described above), adjusted for the effect of the distribution of reserves planned for June 2003. The other equity investments and assets were valued using the Discounted Cash Flow method (Olivetti Tecnost), the stock market price method for

companies listed on regulated markets and/or the market multiples method, with use also made for testing and control purposes of financial statement values and the values published in analysts' research reports on such companies, where available. To the sum of the values of the assets and the Tax Asset, described more fully below, was added the value of the net financial position as of December 31, 2002, adjusted for the effect of Telecom Italia's distribution of reserves planned for June 2003. Finally, account was taken of the pro forma effect of the conversion of the "Olivetti 1.5% 2001-2010 convertibile con premio al rimborso" convertible bonds, consistently with the fully-diluted method, which assumes the conversion into ordinary shares (the price of such conversion, equal to Euro 1 per bond, is lower than the value of the economic capital per Olivetti ordinary share obtained using the Net Asset Value valuation method).

- In addition, the Board of Directors of Olivetti has tested the ratio of exchange for shares resulting from the application of the above methods by using, as the control method, the stock market prices method. This method expresses the value of the enterprise on the basis of the share prices negotiated on regulated stock markets. In particular, the stock market prices method is considered significant when the average volumes traded are large, since in such circumstances the value attributed by the market represents a reference which is certainly of significance in the relative assessment of profiles of profitability, patrimonial solidity, growth prospects and riskiness. In applying this method it is necessary to strike a balance between the need to mitigate the volatility of daily share prices by considering a sufficiently long period and the need to use recent data that are indicative of the market values of the companies in question. Since both Telecom Italia and Olivetti are listed on Borsa Italiana's MTA electronic share market and are among the largest Italian companies in terms of market value, the Board of Directors considered that the stock market prices of their securities constituted a reliable benchmark and reference was made to the average exchange ratio (Olivetti ordinary shares per Telecom Italia ordinary share) obtaining in the market in different periods prior to the day on which Borsa Italiana S.p.A. suspended trading in the Olivetti and Telecom Italia securities in view of the forthcoming announcement of the Operation (data as of March 7, 2003 and the weighted averages of the official prices in the preceding 1, 3, 6 and 12 months).

In the application of the valuation methods described above, the Directors of Olivetti have taken into account the following:

- The valuations of the tax assets generated from the adjustments to the values of the controlling equity investments held by Olivetti and Telecom Italia in, respectively, Telecom Italia itself and Seat Pagine Gialle have been made on the basis of the expected taxable income and limits effectively utilizable by the

Companies, independent of the realization of the merger operation. In this respect, it should be noted that: (a) the adjustments made to the investment in Telecom Italia were made to obtain tax benefits not otherwise available; (b) those regarding Seat Pagine Gialle, of an economic nature, are, among other things, the result of the decision of Telecom Italia to consider no longer strategic the Directories business of Seat Pagine Gialle. This has been taken into account in the application of the SOP and NAV methodologies used, respectively, for Telecom Italia and Olivetti.

- Since there are no Olivetti savings shares as of to-day, the hypothesis has been made that the quotations of the savings shares of the Company Resulting from the Merger may reflect a discount analogous to that recognized by the market to the Telecom Italia savings shares with respect to the ordinary shares. This discount was quantified in the measure of 33% as illustrated below in paragraph 6. This has been taken into account in the determination of the ratio for the exchange of shares applicable to the Telecom Italia savings shares, calculated applying both the basic SOP and NAV methods and the stock market price method.

- In the determination of the values attributed to Olivetti, the Directors decided not to calculate the NAV on the basis of the current stock market prices of the investment held by Olivetti in Telecom Italia since, in the contest of a valuation made to determine an exchange ratio, having considered appropriate the valuation of Telecom Italia on the basis of the fundamental methodology (SOP), the valuation of the investment Telecom Italia within the context of the valuation of Olivetti with the NAV method must also be based on a fundamental methodology, in order to assure the homogeneity of criteria adopted and the overall reliability of the valuation conclusions. On the contrary, the calculation of the NAV of Olivetti based on the stock market quotations of Telecom Italia would be characterized, apart from the lack of homogeneousness of the criteria adopted, also by the high volatility determined by the financial lever present in Olivetti, which would render the resulting valuation unreliable.

- The Olivetti own shares and the Olivetti shares held by the subsidiary Olivetti International S.A. have been valued at the implicit final value resulting from the Net Asset Value of Olivetti.

- The values attributed to Olivetti and Telecom Italia for the purpose of determining the ratio for the exchange of shares take account of the planned distribution of reserves by Telecom Italia up to a maximum of about Euro 1,333 million, since the timing of the merger provides that the share exchange will take place subsequent to the payment of these reserves.

- Lastly, account was taken in determining the exchange ratio of the eventuality of the exercise of financial instruments giving rise to the subscription of Olivetti and Telecom Italia shares (stock options, convertible bonds and warrants) exclusively to the extent that their exercise was reasonable likely in the light of the related economic and financial benefits.

The choice of the methods and valuation criteria adopted by the Board of Directors of Telecom Italia is substantially in line with that adopted by the Olivetti Board, with the clarification that the Telecom Italia Directors have used, with equal weight, the stock market price method (as the principal method) and the Sum of Parts method (as the control method).

5. VALUATION PROBLEMS ENCOUNTERED BY THE DIRECTORS

In making the valuations, as described in their report, the Olivetti Directors encountered the following main difficulties:

- The valuations were made assuming that the present tax system will remain in force in the future. The tax reform under way envisages a series of changes (including new rates, consolidation for tax purposes and the abolition of Dual Income Tax, etc.), whose effects are difficult to assess.

- The estimation of the value of the savings shares assigned by the Company Resulting from the Merger for the purpose of the exchange was based on the differential found between the stock market prices of Telecom Italia ordinary and savings shares. As explained in detail in the report, the decision to differentiate the estimated values of the shares of different classes according to the differences between their market prices is consistent with standard practice in this field. However, even though in the case in question there were no objective elements permitting any other solution, some empirical analyses have shown that the differentials between the prices of ordinary and savings shares tend to be larger for companies, such as the Company Resulting from the Merger, where control is contestable. In such cases, in fact, the importance of the administrative rights exceeds that of the property rights. This principle, however, is not applicable objectively to the case in question in the absence of historical data regarding Olivetti and it would only be possible to estimate its effects generically on the basis of data regarding comparable companies. Acting in the opposite direction to the foregoing, is both the increase in the property rights attached to the savings

shares as a result of the planned introduction of more extensive property rights which will be introduced with the Meeting called to deliberate the Merger and the fact that to each Savings Shareholder of Telecom Italia will be assigned, for each Telecom Italia savings share held, more than one savings share of the Company Resulting from the Merger (in proportion to the exchange ratio).

- The own shares held by Olivetti and the Olivetti shares held by the subsidiary Olivetti International S.A., which can be likened to own shares, were valued on the basis of the overall economic value of Olivetti itself. This approach assumes that the economic value is the same as the realizable value, i.e. the market value, of the shares in question, an assumption that has not always been true in practice. However, the valuation method adopted comes close to one of the technical solutions suggested by the literature and practice, which recommend treating own shares as early retirement of capital and accordingly setting their value equal to zero and calculating the value per share with reference to a smaller number of shares than the total issued, equal to those actually in circulation.

- At the present time it is not possible to make an accurate forecast of the outcome of the proposed disposal of the new company that will be created as a result of the spin-off of Seat Pagine Gialle. It is nonetheless considered, in view of the percentage of Telecom Italia's overall value accounted for by its equity investment in Seat Pagine Gialle, that the disposal cannot produce effects requiring the exchange ratio to be changed.

- In view of the size of the holding in Telecom Italia, the Directors of Olivetti, with the help of the Advisor, have made a careful analysis of the arguments put forward by some institutional investors regarding the application of the NAV method to Olivetti, as a holding company whose most important asset is the holding in Telecom Italia and with special reference to the appropriateness of valuing that holding on the basis of stock market prices. Given the purpose of the valuation, the Directors, whilst recognizing the complexity of the question, have decided to adopt uniform criteria for both the Companies and thus to use for the valuation of Olivetti the same method used for the valuation of Telecom Italia (Sum of Parts).

6. RESULTS OF THE VALUATION PERFORMED BY THE DIRECTORS

In the light of the indications provided by JPMorgan, the Board of Directors of Olivetti, using the principal method (SOP and NAV) has identified the following estimated interval of the ratio for the exchange of shares, calculated as a quotient between the value estimated per Telecom Italia shares and the value estimated per Olivetti shares (rounded data):

	Minimum	Mean	Maximum
		(Exchange ratio)	
Olivetti ordinary shares per Telecom Italia ordinary share	6.6	6.9	7.2
Olivetti savings shares per Telecom Italia savings share	6.6	6.9	7.2

In particular, the above reflects, allocated in the respective categories of "Minimum, Mean and Maximum", the ratios between the following values of the shares of the Companies involved in the merger (rounded data):

	Minimum	Mean	Maximum
		(Euro)	
Value per Telecom Italia ordinary share, after distribution of reserves (a)	8.1	8.6	9.1
Value per Telecom Italia savings share (b)	5.4	5.8	6.1
Value per Olivetti ordinary share (c)	1.13	1.26	1.39
Value per Olivetti savings share (d)	0.76	0.84	0.93

a) Minimum, mean and maximum values of Telecom Italia ordinary shares determined using the principal method SOP, adjusted for the effect of the distribution of the reserves planned for month of June 2003.

b) Minimum, mean and maximum values of Telecom Italia savings shares calculated on the basis of the average market discount of the last month prior to the announcement of the Operation (March 7, 2003), equal to circa 33%, which is in line with the discount on the last trading day of Olivetti and Telecom Italia shares before March 7, 2003, and substantially in line with the average discount of the last 3, 6 and 12 months.

c) Minimum, mean and maximum values of Olivetti shares determined using the NAV method.

d) Minimum, mean and maximum values of the savings shares of the Company Resulting from the Merger, calculated assuming the above discount of 33% relative to the savings shares of Telecom Italia.

The minimum, mean and maximum values of the Telecom Italia ordinary shares, determined using the principal method SOP, prior to the distribution of the reserves planned for the month of June 2003, are the following (rounded data):

	Minimum	Mean	Maximum
		(Euro)	
Value per Telecom Italia ordinary share	8.3	8.8	9.3

The above results were tested by analyzing the target prices identified by financial analysts. The research reports published by specialized institutes and investment banks available at March 7, 2003, which gave a sample of 20 target prices for the Telecom Italia ordinary share, showed a mean value of Euro 9.2 per Telecom Italia ordinary share, a value within the above range.

Moreover, in order to test the accuracy of the exchange ratio obtained in the manner described above, the Board of Directors of Olivetti, with the help of its Advisor, made a further test using the method based on stock market prices, on the basis of the ratio between the average exchange ratio (Olivetti ordinary shares per Telecom Italia ordinary share) obtaining in the market in different periods prior to the last trading day of Olivetti and Telecom Italia shares before the suspension of trading by Borsa Italiana S.p.A. in view of the forthcoming announcement of the Operation (data as of March 7, 2003 and averages weighted for the preceding 1, 3, 6 and 12 months), which evidence the following (taking account of the necessary roundings):

	Telecom Italia (1)	Olivetti	Exchange Ratio
	(Euro)	(Euro)	
March 7, 2003	5.7	0.9	6.7
Average – 1 month	6.3	0.9	7.0
Average – 3 months	6.8	1.0	6.9
Average – 6 months	7.2	1.0	7.1
Average – 12 months	7.6	1.1	6.9

(1) Value adjusted for the effect of the distribution of reserves planned for the month of June 2003.

The following table evidences the minimum, mean and maximum exchange ratios (Olivetti ordinary shares for Telecom Italia ordinary share) expressed by the stock market detailed above (rounded data):

	Minimum	Mean	Maximum
		(Exchange ratio)	
Olivetti ordinary shares for Telecom Italia ordinary share	6.7	6.9	7.1

The above figures are consistent with the exchange ratio established using the main valuation method. It should be noted that the stock market price method cannot be used to test the exchange ratio for the savings shares owing to the non-existence of Olivetti savings shares. Nonetheless, in the light of the arguments put forward in paragraph 4 above regarding the hypothesis of a basically unchanged discount for the savings shares of the Company Resulting from the Merger with respect to its ordinary shares compared with that recorded by Telecom Italia's savings shares, the consistency of the exchange ratio established using the main valuation method can also be confirmed for the savings share ratio.

7. DETERMINATION OF THE EXCHANGE RATIO

The Directors of Olivetti, taking account of the indications provided by JPMorgan and after examining the results of the application of the above-mentioned valuation methods, have thus reach a valuation of the ratio existing between the economic values of the two Companies involved in the merger, which has then been compared with the conclusions reached by the Board of Directors of Telecom Italia, taking into account the indications provided by Lazard and Goldman Sachs.

At the end of the valuation process, the Board of Directors of Olivetti and the Board of Directors of Telecom Italia have established that the "natural" exchange ratio on the basis of which to determine the assignment of the shares of the Company Resulting from the Merger is:

7 Olivetti shares, assuming the current par value of Euro 1.00 each
for every
1 Telecom Italia share, assuming the current par value of Euro 0.55 each

The exchange ratio will be the same for both the Telecom Italia ordinary shares and for the Telecom Italia savings shares. To this "natural" exchange ratio will correspond a different assignment ratio, made necessary by the decision to carry out the exchange through the redistribution of the capital of the Company Resulting from the Merger, as summarized in paragraph 2 above.

8. WORK PERFORMED

The work performed on the documentation utilized as described in the preceding paragraph 3 is summarized as follows:

- Analysis of the reports and the work papers of the audit firm Reconta Ernst & Young on the Company financial statements and the consolidated financial statements of Olivetti and of Telecom Italia as of December 31, 2002.

- Analysis of the valuation criteria used for the preparation of the Company financial statements and consolidated financial statements of Olivetti and Telecom Italia as of December 31, 2002, to determine the consistency thereof or to assess the effects of any inconsistencies.

- Obtaining information from Management regarding events subsequent to the closing of the 2002 financial statements which could have a significant effect on the determination of the values object of this examination.

- Discussion with the Management of the Companies involved in the merger regarding the criteria used for the preparation of the Group Business Plan of Telecom Italia and the condensed Business Plan of Olivetti Tecnost, the uncertainties and limitations inherent in all forecasts being understood. In particular, we have examined the principal characteristics of the forecasting process and the methodological coherence of the process itself, also with regard to the comparability of the data obtained, taking into account the specificity and characteristics of the Companies involved.

- Verification of the stock market prices referring to the shares of the Companies involved in the merger, considered important in connection with the determination of the ratio for the exchange of shares.

The work performed with reference to the methods of determination of the ratios for the exchange of shares is summarized as follows:

- Critical examination of the valuation methods adopted and of all elements considered necessary to determine whether such methods were technically appropriate, in the specific circumstances, to determine the economic values of the two Companies involved in the merger in relation to the ratio for the exchange of shares.

- Participation in meetings with JPMorgan in order to obtain information regarding the work they performed and the calculations they made.

- Comparison between the procedures and results obtained by the Advisor of Olivetti with those of the Advisors of Telecom Italia.

- Verification of the completeness and uniformity of the procedures followed by the Directors of Olivetti in the determination of the ratio for the exchange of shares.

- Verification that the valuation methods were applied in the uniform way.

- Verification of the consistency of the data utilized with respect to the reference sources and with the "Documentation utilized" described in the preceding paragraph 3.

- Verification of the mathematical accuracy of the calculation of the ratio for the exchange of shares performed through the application of valuation methods adopted by the Directors of Olivetti also on the basis of the indications of JPMorgan.

- Sensitivity analyses in relation to the valuation methods adopted with the objective of verifying the extent to which the ratio for the exchange of shares are influenced by changes in the hypotheses and parameters.

9. COMMENTS ON THE SUITABILITY OF THE METHODS USED AND THE VALIDITY OF ESTIMATES PRODUCED

With reference to the present engagement we believe it appropriate to emphasize that the principal purpose of the Directors' decisional process was to arrive at an estimate of the relative economic values of the individual Companies involved in the merger by applying uniform criteria for the purpose of the determination of the ratio for the exchange of shares. The estimate, therefore, is not suitable for other purposes.

That being stated, we bring to the attention of the Shareholders the following:

- The ratio for the exchange of shares has been determined, as suggested by business doctrine and generally applied in professional practice, on the basis of the comparison of the values attributed to each of the Companies involved in the merger on a going concern basis, that is excluding, in general, considerations of any synergies deriving from the integration of the activities of the two Companies. In particular, with reference to the tax assets, these have only been considered for the part recoverable by the Companies involved in the merger on a stand-alone basis, as described in the following paragraph.

- The determination of the relative economic values of the Companies involved in the merger include the value of the tax benefits deriving from the write-down of investments, in particular those relating to the write-down of Telecom Italia in Olivetti and of Seat Pagine Gialle in Telecom Italia. Such value has been calculated at the present value of the tax savings utilizable by Olivetti and Telecom Italia, on the basis of forecast taxable income, on a stand-alone basis. The cited valuations, and, more generally, all the assumptions of a fiscal nature considered, are based on current fiscal legislation and therefore exclude consideration of future developments deriving from the tax reform in process. This approach seems acceptable since it allows for a reasonable valuation of the position, without taking into consideration future effects not presently reasonably

quantifiable. More specifically, we believe it to be correct that no account has been taken of the eventual benefit of a complete and more rapid recovery of the tax benefit which should derive from the merger. In fact, such benefit should be shared with the shareholding structure of the Company Resulting from the Merger and, prior to the merger, does not represent for either the Absorbing Company or the Absorbed Company an asset that can be ascribed directly and exclusively to one of these.

- The savings shares which will be issued by the Company Resulting from the Merger in favor of the Telecom Savings Shareholders will have more extensive property rights than those enjoyed by Telecom Italia savings shares presently in circulation and on which was calculated the spread, both with regard to the extent of the privilege in the distribution of reserves which will be introduced statutorily by the Telecom Italia General Meeting called to deliberate the merger and for the improvement of the basis on which the privilege will be quantified in absolute value terms; in fact, to each Telecom Italia Savings Shareholder will be allocated for each Telecom Italia savings share more than one savings share of the Company Resulting from the Merger (as a result of the allocation ratio through which the ratio for the exchange of shares will be satisfied). The estimate of the value of the savings shares allotted to the Company Resulting from the Merger has been effected by reference to the spread between the quotations for Telecom Italia ordinary and savings shares. In this regard we bring to your attention that the methodology adopted by the Olivetti Directors presents the limits inherent whenever an empirical method is used, even if it appears to be the only one with the quality of a degree of objectivity otherwise lacking. Furthermore, the creation of one new Olivetti savings share with the characteristics described above and the higher takeover risk of the Company Resulting from the Merger compared to Telecom Italia, constitute a further limit on the utilization of the spread on which the ratio for the exchange of the savings shares of the Company Resulting from the Merger and Telecom savings shares has been defined. However, the method used, even with the above-mentioned limits, is considered to be the most appropriate in the circumstances and, in any event, the most objective.

- The approach used to value the own shares and the Olivetti shares owned by Olivetti International S.A. assumes that economic value and the realizable value are substantially in line. The simplification implicit in the method adopted seems, however, acceptable.

- Following the decision taken by Telecom Italia no longer to consider as strategic the "Directories" business of Seat Pagine Gialle, such investment has been written down to reflect a permanent loss of value. In the light of the impact of the investment in Seat Pagine Gialle on the total value of Telecom Italia and of the information available as of to-day, we agree with the Directors of Olivetti in considering that such disinvestment should not reasonably have effects such as to require modifications to the ratio for the exchange of shares. However, we point out that only when the disinvestment has been concluded will it be possible to evaluate fully the correctness of such assumption.

- The values attributed to Olivetti and Telecom Italia take into account the planned distribution of reserves by Telecom Italia, up to a maximum of approximately Euro 1,333 million. This relates to the distribution of reserves forming part of shareholders' equity not tied to the results for 2002. This approach is to be considered correct and consistent with the methodological approach followed in the valuation under consideration.

- The methods adopted by the Directors of Olivetti are commonly accepted and utilized, both nationally and internationally. We believe that such methods, in this specific case, have adequately taken into account the characteristics of the Companies being valued and the factors which are significant to the valuation itself. In particular, in the application of the analytical methodologies used to value the two Companies (SOP for Telecom Italia and NAV for Olivetti), the numerous operational areas of the Telecom Italia Group and the fact that the controlling interest held by Olivetti in Telecom Italia represents the most significant component of its assets have been taken into consideration. Furthermore, we have verified the substantial uniformity in application of the valuation process and the consistency of the methods. Finally, we point out that the Directors of Telecom Italia have also utilized substantially equivalent methods (even if with the inversion between the principal method and that of control), which confirms the acceptability of the valuation approach adopted.

- In the development of the valuations, the individual components have been valued by the Directors of Olivetti on the basis of the methodologies considered suitable in the circumstances. In particular, even with the different gradations of the two analytical valuation methods adopted (NAV and SOP), the Discounted Cash Flow (DCF) method has been consistently used for the valuation of the principal activities of both Companies. This method is generally considered to be the most rational of those alternatively used. However, it is to be noted that the implicit difficulty in expressing an opinion on the realizability of economic forecasts on which the DCF method is constructed is inherent in every forecasting process. On the whole, however, the forecasts seem to have been developed through a rigorous and methodologically coherent process. In particular, for Telecom Italia such forecasts are based on the detailed Business Plan 2003-2005.

- Considering that both Companies involved in the merger have a high stock market capitalization and a high flotation and that both Companies represent a significant share of the total capitalization of Mibtel and Mib30, the utilization of stock market prices over a sufficient period of time, as performed in the case under examination, is considered to be a particularly important parameter and in any event necessary at least as a point of comparison and control. Moreover, it is to be noted that the difficulties is fully assessing the potential incongruities originating, on the one hand, from a depressed stock market and, on the other, from the possible gaps between quotations and absolute values represents an inherent limitation in the valuation process; however, this difficulty is mitigated

by the convergence in the ratios for the exchange of shares provided by the methods used. Moreover, we agree with the reasons provided by the Directors of Olivetti in support of the utilization of the NAV method for not considering the current stock market value for the valuation of Telecom Italia. This because the inclusion of current market quotations in a valuation made with the NAV method, in the presence of significant controlling interests, can originate incongruities for the possible high volatility of the quotations (with a distortive effect on the exchange ratio) and, in this specific case, a lack of homogeneity of criteria, which is certainly inappropriate when the objective is the estimate of an exchange ratio and not the estimate of absolute values.

- The Directors, in the determination of the exchange ratio, have performed an analysis of the effects which can be reasonably foreseen of the possible exercise of the right of withdrawal by Olivetti Shareholders, and have considered that, also on the basis of the stock market trends of the significant period already elapsed, the outcome of such withdrawals will not be such as to render necessary a modification of the exchange ratio. As a result of the checks performed, we believe we are in a position to agree with the Directors' considerations supporting their decisions.

  Similar considerations could be made with regard to the effects which the planned OPA on Telecom Italia shares could determine. The simulations performed independently by us on the possible outcomes of the OPA, the results of which, however, are also linked to the extent and conditions of the eventual withdrawals, confirm that the fairness of the exchange ratio cannot be significantly influenced.

- The sensitivity analyses we performed to evaluate better the impact of the variations in the different hypotheses and parameters assumed, always within the context of the valuation methods adopted, confirm that the results reached by the Directors are reasonable and not arbitrary.

10. SPECIFIC LIMITATIONS ENCOUNTERED BY THE AUDITOR IN CARRYING OUT THE ENGAGEMENT

Notwithstanding the complexity of the problems faced in the course of our activity, we did not encounter any limitations or difficulties in the performance of this engagement worthy of specific mention in this Section of our report.

11. CONCLUSIONS

On the basis of the documentation examined and the procedures described above and considering the nature and extent of our work as described in this report, we believe that the valuation methods adopted by the Directors also on the basis of the indications of their Advisor are, under the circumstances, reasonable and not arbitrary and have been correctly applied by them in the determination of the ratio for the exchange of shares contained in the proposed merger project.

Directors' Report on Operations

JJ 00630

Evolution of the Olivetti Group in 2001

During 2001, Olivetti Group pursued its plans to consolidate the activities begun in 2000 regarding the restructuring and development of the business and to further accelerate the process of strengthening the financial structure of the companies.

In the first half of the year, an important extraordinary transaction on Olivetti S.p.A.'s capital was completed, aimed at improving the debt to equity ratio. The transaction, approved by the Company's Board of Directors on 18 December 2000, pursuant to the proxies granted by the Shareholders' Meeting on 7 April 1999, generated a cash inflow of around 0.9 billion euros for the portion relating to shares (which may increase to 1.25 billion euros in the event of the full exercise of the warrants attached to the shares) and of 1.27 billion euros for the portion relating to the convertible bond. 348,249,405 ordinary shares were issued for this transaction (as well as an equal number of free warrants of the "Olivetti ordinary shares 2001-2002 warrants" series, attached to the shares and exercisable in the ratio of 2 warrants for each newly-issued share) and 487,549,167 bonds of the "Olivetti 1.5% 2001-2004 convertible with redemption premium" series. The transaction achieved immediate positive effects for the income statement and the cash-flow of the Company, also for the bond element, considering that the issue took place at conditions better than those of already existing loans.

In July, a fundamental change took place in the shareholding structure of Olivetti S.p.A., further to the agreement between Pirelli S.p.A., along with Edizione Holding S.p.A. (Benetton Group), and Bell S.A., relating to the purchase of around 23% of Olivetti's capital held by Bell. The purchase was completed in the second half of the year through a holding company called Olimpia S.p.A. (initially 80% owned by Pirelli and 20% owned by Edizione Holding), into which the Olivetti shares already owned by the two groups were placed. On 24 October 2001, Unicredito Italiano and IntesaBci finalised their entry into the share capital of Olimpia with a 10% stake each. Following this transaction, Pirelli S.p.A.'s stake became 60%, while the stake of Edizione Finance International SA (controlled by Edizione Holding S.p.A., which it replaced on 7 August 2001) remained at 20%.

Also in July, further to the above mentioned transaction, Roberto Colaninno resigned as Chairman and Chief Executive Officer of Telecom Italia and as Chief Executive Officer of Olivetti.

In the meetings of 31 July 2001, the Boards of Directors of Olivetti and Telecom Italia accepted Roberto Colaninno's resignation and substituted him with Enrico Bondi, who was named Chief Executive Officer. Subsequently, in September 2001, following further resignations, Marco Tronchetti Provera (named Deputy Chairman of Olivetti and Chairman of Telecom Italia) and Gilberto Benetton (named Deputy Chairman of both Olivetti and Telecom Italia) and Carlo Buora (named Chief Executive Officer of Olivetti) were elected to the Boards of Olivetti and Telecom Italia. Further resignations meant that the entire Boards were deemed to be vacant and therefore the shareholders' meeting of Olivetti on 13 October 2001 and that of Telecom Italia on 7 November 2001 elected new Boards for the three-year period 2001-2003.

Considering the difficult conditions on the international marketplace, the new management firmly accelerated the financial restructuring within the framework of a comprehensive review of the Group's long-term industrial plans, submitting the new strategic guidelines for the approval of the Boards of Directors of Olivetti and Telecom Italia, held in September.

The plan was based on the principle of creating value, both by developing the activities deriving from new business opportunities and advances in technology as well as from continuously seeking an optimal financial structure based on increased cash flows. Specifically, it was estimated that by focusing on the

JJ 00632

core businesses and reviewing the equity investment portfolio, it would have been possible, taking into account the particular international economic situation, to obtain cash flows from disposals of around 5 billion euros for Telecom Italia and around 1 billion euros for Olivetti over a two-year period. This programme will be linked to carefully managed costs and investments.
The management team, significantly strengthened during the year with the addition of men with wide experience in the various sectors of operations and of staff, in line with the general principles laid out in the plan, will place a strictly industrial emphasis on the management of the Group, ensuring prompt and effective control of operations, costs, purchases and investments.
All the activities of the Group have been resolutely focused on the core businesses. The plan foresees further consolidation in domestic fixed and mobile telephony as well as in international mobile telephony in part through acquisitions and/or agreements, while no further acquisitions are envisaged in international fixed telephony. The directories and the Internet activities connected to the two types of telephony fall within the core businesses. The above will involve a global review of the business portfolio. The Telecom Italia Group will operate as a provider of a variety of services, especially in some business segments.
Regarding more in detail the main areas of business:
• the objective in fixed telephony is to offer "business" customers a broader range of services via optical fibre broadband access; for "mass market" customers, DSL technology will be preferred by using already existing connections;
• the objective in mobile telephony is to increase revenues per customer by offering value added services (VAS); to consolidate the position of market leader in Latin America by offering pan-Latin American GSM services; to develop infrastructures and activities in Europe;
• the objective in directories and the Internet is to increase market share and traffic in the Internet access sector; to develop synergy with mobile and fixed telephony; to build a selective presence in the B2B and B2C portal business.
Referring specifically to Olivetti S.p.A., the Board of Directors deemed it necessary to reinforce the financial restructuring plan, both by disposing of non-core equity investments as well as through a new extraordinary share capital transaction, approved on the basis of the proxies granted by the General Meetings of 7 April 1999 (for the outstanding portion) and of 13 October 2001.
The transaction was successfully completed in November 2001. Overall, 1,491,373,698 shares were issued (for the equivalent of 1,491.37 million euros) and 2,412,962,875 convertible bonds (for the equivalent of 2,412.96 million euros), denominated "Olivetti 1.5% 2001-2010 convertible with redemption premium" having an effective yield on redemption of 3.5% p.a. gross. The shares and bonds were offered at 1 Euro each, on an either/or basis, at the choice of the rights holders.
In accordance with its prior undertaking, Olimpia S.p.A. subscribed the rights to which it was entitled (50% in shares and 50% in bonds); as a result of the transaction, Olimpia S.p.A. owned 28.736% of Olivetti.
In the event of full conversion of the above bonds, the new share capital transaction will involve a significant reduction in indebtedness to 13.5 billion euros.
The Board of Directors also unanimously approved the proposal of the Deputy Chairman and Chief Executive Officer, Mr. Tronchetti Provera, not to further implement the outstanding proxies to issue shares, convertible bonds or bonds with warrants, warrants, options or other similar securities which

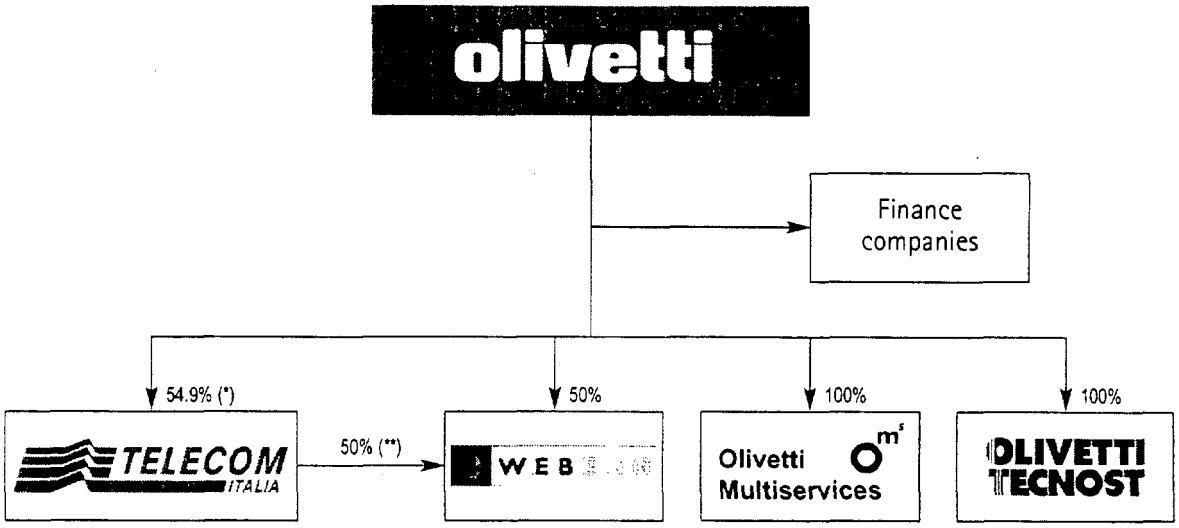
JJ 00058

grant rights to subscribe to Olivetti shares, and to submit to a future Shareholders' Meeting the withdrawal of the aforementioned proxies, relating to the unused outstanding portion.
As well as the success achieved on the extraordinary share capital transactions front, the prompt execution, starting towards the end of last year, of a part of the plan to dispose of non-strategic businesses should be underlined.
Specifically, in December, Olivetti S.p.A., Olivetti International S.A. and Finsiel S.p.A. accepted the public tender offer made by Tyche S.p.A. (De Agostini Group) regarding Lottomatica S.p.A. shares.
Moreover, Telecom Italia Group agreed with Endesa, Union Fenosa and Santander Central Hispano (SCH) to sell its 26.89% stake in AUNA (Auna Operadores de Telecomunicaciones, S.A.), the Spanish telecommunications operator. The sale of this equity investment generated a net cash inflow of approximately 1,850 million euros. Finally, also in December, Telecom Italia completed the disposal of equity investments in Eutelsat, Intelsat, Inmarsat and New Skies Satellites, all ex-satellite consortia, to the recently incorporated company, Mirror International Holding Sarl, owned by the Lehman Brothers Merchant Banking Partners II L.P. closed-end fund with minority stakes held by IntesaBci and Interbanca. The portfolio which Telecom Italia sold to Mirror International Holding Sarl, in which it maintained a 30% stake, was valued at 550 million euros, with a cash inflow of 450 million euros (net of the investment in the new company) and a net capital gain of more than 100 million euros at statutory accounts level.
On the operations front, the marketplace in which the Telecom Italia Group operates has witnessed a rise in demand for telecommunications services of approximately 10% per annum, driven by the widespread use of mobile telephony and the development in data and Internet services. The sector is expected to continue to grow over the next few years and the shift in part of family and business expenditure towards digital products and services is also expected to continue, thereby increasing the possibilities of integrating transmission services and online application content. In 2001, the telecommunications market was characterised by a phase of restructuring and consolidation after the substantial growth caused by the Internet phenomenon and the boom in stock prices. The financial markets have in part re-directed investments from "alternative" carriers, typically characterised by large investment flows linked to the accomplishment of business plans based on the expectation of substantial growth of the Internet and telecommunications market, to those which can leverage assets, distinctive skills and a solid financial structure.
Compared to the major European countries, the Italian market is also characterised by a high penetration of mobile phones, which is in contrast with a relatively modest penetration of Internet and broadband services, whether residential or business. At the end of 2001, Internet penetration in Italy was 23% for families and 44% for small-to-medium sized businesses. Family access is still primarily based on dial-up technology (98%), only a small part (2%) via broadband ADSL. However, a progressive improvement on these figures is expected, in part based upon the experience of the German market, which indicated that widespread use of ADSL accesses may occur fairly rapidly. There is also ample room for growth in the areas of data transmission, services connected with the Internet and new-generation mobile services (GPRS, UMTS). The sector will continue growing over the next few years and the shift in part of family and business expenditure towards digital products and services will continue, thereby increasing the possibilities of integrating transmission services and online application content.
In 2001, the Telecom Italia Group conducted a major restructuring of its Business Units organisation, the details of which will be specified later. Operations through these units were as follows:

– the *Domestic Wireline* business unit operated in an intensely competitive market, based upon price reductions in the "voice traffic" business area and in the Internet access (ISP) market. In this context, Domestic Wireline's business was characterised by a consolidation in its market leadership in the core areas, a consistent increase in the traffic transported on behalf of other operators and price reductions, partly set off by the increase in the standing charge.
– the *Mobile Services* business unit, through TIM, confirmed its leadership in the domestic market, which was highly competitive due to the increase in and further diversification of the products and services and also the significant expansion of the international networks. The results in the international markets were generally better than in 2000, even if still affected by start-up costs in some cases.
– the *Internet and Media* business unit was reviewed within the framework of the new strategic guidelines, making its mission to be the creation of a multi-platform group which, by using paper, telephone, internet and television, satisfies the information and entertainment needs of the public and the communication and services requirements of businesses. During the year, the area of consolidation was extended to many recently acquired companies.
– during the year, the development and management of the foreign portfolio, represented by the *International Operations* business unit, aimed at maintaining Telecom Group's presence in the strategic markets of Latin America and Europe and in the business segments with substantial growth potential.
– also during the year, a further boost was given to the industrial rationalisation plans and corporate reorganisation of the *Information Technology Services* business unit, in charge of the IT activities of the Group, by re-positioning on higher added value products. In particular, consistent with the new strategic guidelines, the business unit was divided into two new business units focusing on the external market and on managing the Group's internal IT processes, respectively.
– the operating results of the *Satellite Services* business unit are however contrasting: the positive trend in the "Media and Communication" and "Space System" areas are offset by the negative effects of the premature closure of the Astrolink contract.
– finally, the *TI Lab business unit*, born out of the integration of the technological know-how of CSELT and the venture capital management skills of Telecom Italia, continued its research activities in the various technology sectors of telecommunications and network technology, carrying out numerous transactions, described later on, aiming to strengthen its corporate national and international structure.
With regard to the other industrial activities directly controlled by Olivetti, an important role is played by Olivetti Tecnost, which operates in the office products sector where the market was characterised by fierce competition, particularly with reference to the ink-jet products segment and to IT systems specialising in services for banking, retail and gaming automation and public administrations, which achieved good results for the year and which represent an important sector in the company's growth strategy.
Industrial and marketing activities were aimed at offering innovative services based on Internet technology, with solutions tailored for small-to-medium sized companies and in the home automation sector, with solutions for private residential use.

JJ 00695

Group Structure and Activities



(*) % of ordinary share capital
(**) 30.2% Finsiel and 19.8% I.T. Telecom

The Olivetti Group operates in the telecommunications sector through the companies of the Telecom Italia Group, which represents approximately 96% of its total revenues.
The Telecom Italia Group is one of the major international companies in the Information and Communication Technology industry. Its companies are leaders in wireline, mobile and satellite communications, Internet and media, information technology and research, providing integrated and innovative services in Italy and abroad. In the domestic market, Telecom Italia is both the technology and the market leader in the highest growth sectors (mobile, broadband, data transmission). Its international presence is geographically focused on Latin America and Europe. Olivetti is also active in other industrial sectors through directly owned subsidiaries, such as office products, Internet appliances and IT services (Olivetti Tecnost Group), Internet services (Webegg Group), facility management and property services (Olivetti Multiservices).

The Telecom Italia Group

During 2001, the Telecom Italia Group operated through a structure of business units, which was comprehensively reorganised during the year.

Domestic Wireline

The Domestic Wireline Business Unit operates nationwide and is the established market leader in wireline voice and data services and call centres, both for end-users and other operators. Internationally, Domestic Wireline develops optical fibre networks for wholesale customers, mainly in Europe and South America.
In 2001, the Business Unit had the following structure:

Telecom Italia DW	*Domestic Subsidiaries*	*International Subsidiaries*
Wireline telecommunication services	Saritel S.p.A.	Pan European Backbone
- Traffic and Access	TMI Group	Latin American Nautilus Group
- Business Data	Atesia	Mediterranean Nautilus Group
- Domestic Wholesale	Path Net	MED1 Group
- International Wholesale		

JJ 00637

At the end of the year, a new organisational structure became operational (Marketing, Customer Operations, Residential Customers, Business Customers, Executive Customers, Domestic Wholesale, International Wholesale, Network, Public Telephony), the main objective of which is to shift the emphasis from the product to the customer and to improve time-to-market.
The table below compares the main financial results, almost entirely attributable to Telecom Italia's Domestic Wireline business, as well as capital investments made and the staff employed, with those of 2000:

(in millions of euros)	Year 2001 (A)	Year 2000 (B)	Changes (A-B) Absolute	%
Revenues from sales and services	17,291	17,514	(223)	(1.3)
Gross operating margin	7,788	7,421	367	4.9
Operating result	4,379	3,915	464	11.8
Capital investments:				
capital expenditure	2,835	2,746	89	3.2
goodwill	-	-	-	-
Personnel at year end (employees)	58,406	62,782	(4,376)	(7.0)

2001 was highly competitive, based upon price reductions in the "voice traffic" business area and in the Internet access (ISP) market. In this context, the activity of Domestic Wireline was principally characterised by a consolidation in market leadership in the business areas of access, data services, web services and wholesale, by a substantial increase in traffic "carried" on behalf of other operators and in on-line traffic and by the price reductions in domestic traffic and outgoing international traffic, which was partially offset by an increase in the standing charge.
The main operational figures for 2001 are compared with 2000 in the table below:

	Year 2001	Year 2000
Connections to wireline network (in thousands)	27.353	27.153
of which ISDN	5.403	4.584
Annual increase in minutes of traffic on wireline network (%)	30,7	27,6
domestic traffic	31,3	28,1
international traffic	16,9	11,5

During 2001, many commercial offers were launched in the voice sector; in particular, in the Residential voice sector, 3,240,000 customers subscribed to the "Teleconomy voce" offer and "Sirio 187", the first telephone in the world capable of managing SMSs, was also launched.
In the Business voice sector, more than 840,000 customers subscribed to the "Teleconomy24 aziende" offer by the year-end.
As regards the installations of Public Telephony, there were 70,000 ISDN terminals at the end of the year (+54% compared to 2000).

00637

In data transmission, the year was characterised by a broader range of data products on offer, such as:
- "Hyperway", nationwide virtual private network using IP protocol and a metropolitan virtual LAN;
- "NetVantage", offering e-business solutions provided by Internet Data Centres (IDC) to manage on-line virtual community processes;
- "Full Business Government/Banking", offering e-business solutions provided by IDCs for local public administrations and for the financial sector.

During the year, Telecom Italia consolidated its Domestic Wholesale activities, increasing interconnection traffic by 126.4% compared to 2000.
The year was characterised by a wider range of products on offer, such as "Canale virtuale permanente" (Permanent Virtual Channel), which enables Internet Service Providers and Other Licensed Operators to offer end-users services and data via broadband access technology using a copper pair or optical fibre, and, to meet the increasing market demand for broadband, "dark optical fibre" provided without power supplies and equipment to use Telecom Italia's network, ensuring potentially unlimited transport capacity.
At the International Wholesale level, the year saw a growth in demand, particularly for Internet and data with an 18.7% increase in traffic volume compared to 2000.

The Domestic Network's performance was characterised by infrastructure and management system upgrades, in part as a consequence of the increased activity of other operators in the Italian market. Of particular interest are the activation of dialling mobile phones numbers without the "0", the activation of the call return service (which advises the customer of the last call, giving number, data and time, with the possibility of automatically dialling the recorded number) and the completion of the digitalisation and the migration of customers from analogue exchanges to digital ones.
Progress was also made on the development of the ring connection, which uses the latest generation SDH and DWDM (Dense Wavelength Division Multiplexing) technology and is the platform for the new "Rete di Trasporto Ottico" (Optical Transport Network) which carries flows with high levels of quality and availability.
The SDH optical network was strengthened during the year and higher capacity equipment (radio links) was installed to meet the increased demand of the mobile operators.

Regarding the International Network, infrastructures and management systems were developed in geographical areas characterised by a strong increase in the demand for capacity and of strategic importance due to the presence of subsidiary and associated companies. Of particular note is the activation of the Pan European Backbone, which connects nine countries (Austria, Belgium, France, Germany, Italy, Holland, Spain, Switzerland and Great Britain) by high speed optical fibre and a ring structure, so as to ensure protection of traffic in the event of a fault in one link. To this end, fully-owned subsidiary companies have been incorporated in each of the nine countries mentioned above.
The initial configuration of the LAN (which connects eight nodes in South America, including Rio de Janeiro, Sao Paulo, Buenos Aires and Santiago, via a ring structure with the Miami node) has been activated and progress was made in laying the submarine optical ring (Mediterranean Nautilus) which will connect Italy, Greece, Turkey, Israel and Egypt, with the help of the subsidiaries MED1 and MED Nautilus.

00638

Approximately 3% of the total revenues of the Domestic Wireline Business Unit is attributable to subsidiary companies in Italy (Saritel, Atesia and Path.Net) and abroad (Pan American Backbone, Latin American Nautilus, Mediterranean Nautilus - incorporated between the end of 2000 and the beginning of 2001 to follow specific projects - and the TMI and MED1 groups).

Mobile Services

The Mobile Services Business Unit (TIM Group) operates in the sector of domestic and international mobile telecommunications. Its international presence focuses on the Mediterranean Basin and South America.
During 2001, the Business Unit operated with the following structure:

Domestic Subsidiaries	*International Subsidiaries*
TIM S.p.A.	TIM International - Stet Hellas Group (Greece) - Tele Nordeste Celular Participaçoes Group (Brazil) - Tele Celular Sul Participaçoes Group (Brazil) - Maxitel Group (Brazil) - Digitel (Venezuela) - TIM Perù

2001 saw the incorporation of Tim Brasil, a sub-holding company for the equity investments TIM Celular Centro Sul, TIM Sao Paulo, TIM Rio Norte, incorporated during the first months of the year, the transfer to TIM Brasil by TIM International N.V. of the equity investment in Bitel (parent company of Tele Nordeste Celular and Tele Celular Sul) and the merger of TIM International B.V. into SMH N.V., which was simultaneously re-named TIM International N.V..
The income statements of Digitel and the Maxitel Group, which were acquired at the end of 2000, were consolidated.
The main results achieved in 2001 compared with 2000 are stated in the table below:

(in millions of euros)	Year 2001 (A)	Year 2000 (B)	Changes (A-B) Absolute	%
Revenues from sales and services	10,250	9,418	832	8.8
Gross operating margin	4,760	4,447	313	7.0
Operating result	3,136	2,988	148	5.0
Capital investments:				
capital expenditure	3,151	4,206	(1,055)	(25.1)
goodwill	31	899	(868)	-
Personnel at year end (employees)	16,721	15,257	1,464	9.6

00639

Revenues from sales and services, gross of the amounts due to third-party telecommunications operators, increased by 8.8% compared to 2000, mainly as a result of increased revenues from TIM S.p.A.. The percentage increase in the gross operating margin is lower than the increase in revenues as a consequence of international start-ups.
TIM S.p.A. had total revenues of 8,357 million euros (+5.4%), this increase being due to the further expansion in traffic (+7.6% in terms of revenues, +13.6% in terms of minutes). The revenues deriving from value added services increased by 56.5% compared to 2000, mainly due to the increase in Internet services (more than 140%) and SMSs (approximately 35%). The gross operating margin (+9.9%) benefited from containing external costs. TIM's net income (equal to 1,907 million euros) reflects international companies value adjustments, which led to a 532 million euros pre-tax extraordinary writedown of the subsidiary company TIM International N.V.
Significant investments have also been made to improve the GSM network, to complete the infrastructures for the launch of the data services (WAP, GPRS) and to continue developing UMTS.
During the year, TIM confirmed its leadership in the highly competitive domestic market, mainly through a broadening of its offer range by proposing innovative products, a further diversification of the rates offered, significant growth of the international networks (+7.4 million lines) and a greater focus on customers, by improving the CRM structures.
Below are the main operational figures for 2001, compared with the year 2000:

	Year 2001	Year 2000
TIM lines in Italy (in thousands)	23,946	21,601
Annual increase in minutes of mobile traffic (%)	13.6	24.6
Coverage for GSM in Italy (% of population)	99.7	99.6
Coverage for E-TACS in Italy (% of population)	98.0	98.0

TIM's year was characterised by the development of SMS traffic, the creation of innovative services and the extension of the offered product profiles with initiatives such as "LoSai di TIM", the free service which advises GSM customers of calls received while unreachable or when the telephone was switched off, "FreeSMS" which proposes a self-recharging mechanism based on SMS traffic, and marketing proposals with special seasonal rates (CartAmici/CartAuguri) or which offer products and services which can be used for a limited period and at very low unit costs (Last Minute di TIM).
Moreover, all TIM lines are GPRS ready, fundamental for the business market, which acknowledges TIM as the only operator capable of ensuring this service.
As concerns abroad:
- the Stet Hellas Group, which manages the GSM service in Greece and which last July acquired a UMTS licence for 50 billion Drachma and a DCS 1800 licence for 9 billion Drachma, managed to improve its operating profit, in spite of a slight decrease in revenues;
- the activities of the Tele Nordeste Celular Participaçoes Group (operating in mobile network services in the north-eastern regions of Brazil and maintaining the same market share as the year before) focused on a strategic re-positioning aimed at more profitable customer segments, launching the TIM Business brand onto the market and making international roaming available to Business customers;

00640

- the activities of the Tele Celular Sul Participaçoes Group (operating in mobile network services in southern Brazil) focused on rationalising costs and optimising investments, the launch of new offers for the pre-paid segment, retention and loyalty programmes aimed at high-use customers and the launch of the TIM Business Brand;
- the Maxitel Group (operating in mobile telephony in the Bahia and Sergipe areas of Brazil) developed new proposals for the pre-paid segment, pursued a strategy of acquiring high-profile customers and improving its loyalty and retention programmes;
- Mobilkom Austria A& Co. KG (an associated company) reported a 38.3% increase in its operating earnings against a 6.7% increase in sales.
- in the first months of 2002, the Telecom Italia Group reached an agreement for the sale of the 19.61% of BDT (Bouygues Décaux Télécom) equity investment (held by TIM International). BDT controls 55% of Bouygues Télécom and the total value of the transaction will be 750 million euros.

Internet & Media

The Internet and Media Business Unit covers the entire value chain in the media sector, extending its activities to telephone publishing and to television and is the leader domestically in marketing products and services for the office. Seat Pagine Gialle also develops all elements of Internet services for residential customers and small-to-medium businesses: access, portals and web services.
Within the framework of the new strategic guidelines, a new mission has been set for the Business Unit, aimed at creating a multiplatform media group which, by using paper, telephone, Internet and TV, satisfies the information and entertainment needs of the public and the communication and services requirements of companies.
The Business Unit comprises the Seat Pagine Gialle Group, which includes Seat P.G. S.p.A. (Directories Div.) and the subsidiaries Tdl Infomedia Ltd. Group (Directories), Telegate AG Group (Directories Assistance), Seat Internet and Matrix (Internet), Buffetti Group (Products and Services for the Office), Consodata S.A. Group (Business Information), Holding Media e Comunicazione Group (TV and others) and other minor companies.
In 2001, the consolidation included many recently acquired companies, amongst which the French group Consodata (Business Information), the British telephone publishing company TDL Infomedia (Directories), the German company Telegate (Directory Assistance), the television group Holding Media e Comunicazione (ex-Cecchi Gori Communications).
The main transactions during the year were the following:
- acquisition of a direct and indirect equity investment in Telegate A.G. (64.5%);
- Giallo Voice (100% Seat PG) gaining control of four Italian call centres;
- the exchange by Huit II (controlled by Telecom Italia) of 186 million Seat PG shares for 100% of ISM. ISM owns, through its subsidiary N.V.Vertico, 33.3% of Matrix;
- acquisition of 54.5% of the French company Consodata, which operates in the information marketing sector and is listed on the Nouveau Marché (New Market) in Paris;
- in May, the conclusion of the residual public tender offer of Seat PG for the outstanding shares of the Buffetti Group;

00641

- in June, the acquisition of 100% of the share capital of Cecchi Gori Communications (now Holding Media e Comunicazione), following a capital increase in April.
The table below sets out results for 2001, compared to results for 2000 restated on the basis of the same area of consolidation:

(in millions of euros)	Year 2001 (A)	Year 2000 (1)	Year 2000 on a consistent comparable basis (2) (B)	Changes (A-B) Absolute	%
Revenues from sales and services	1,957	263	1,908	49	2.6
Gross operating margin	444	(35)	361	83	23.0
Operating result	31	(73)	(1)	32	-
Capital investments:					
capital expenditure	175	34	251	(76)	(30.3)
goodwill	203	-	-		
Personnel at year end (employees)	9,264	7,515	8,932	332	3.7

(1) Data relating to Tin.it only, except for personnel which includes the SEAT Group.
(2) Including SEAT consolidated figures, Tin.it operations from 1st January 2000 and companies newly acquired by the SEAT Group.

During the year, Seat PG strengthened its position as leader or co-leader in almost all the areas it operates in, thanks to its widely recognised brand portfolio. The Group's activities were characterised by:
- interaction between platforms and products, so as to take advantage from any possible synergy and overlaps between directories, telephone and Internet, as well as between Internet and TV;
- management of a commercial network which is unmatched in terms of diffusion, number and type of customers, platform coverage (paper, telephone, Web, TV) and the availability of a physical network for the distribution of products and services;
- major cooperation with Telecom Italia Domestic Wireline for the sale of ADSL Internet connections (132,800 units by the end of the year compared to approximately 6,500 the year before).

International Operations

The International Operations Business Unit operates in the wireline and integrated fixed-mobile sector and its presence is largely focused in Europe and South America.
The Business Unit is structured in subsidiaries (9Télécom Réseau Group, Entel Chile Group, Entel Bolivia Group, BBNed and Intelcom S. Marino) and associated companies (AUNA Spain Group, Telekom Austria Group, Telecom Srbija, Telecom Argentina Group, Brasil Telecom Participaçoes Group and Globo.com).
2001 saw the following transactions:
- in France, Jet Multimedia, in which 9Télécom Reseau holds an equity investment, acquired 100% of Victoire Multimedia from the LVMH group;
- in Spain, the shareholder structure of AUNA (a holding company established in December 2000) was perfected, following which Telecom Italia Group's stake is 26.89 % of the share capital;
- in Chile, new equity investments in the Entel Chile Group were acquired in March, taking the overall holding to 54.76%;

642

– 30% di Mediterranean Nautilus S.A (which also included Elettra) was sold in the first quarter to FTT Investment, a company of the Israeli Fishman Group.
The table illustrates the 2001 results, compared with 2000:

(in millions of euros)	Year 2001 (A)	Year 2000 restated (B)	Changes (A-B) Absolute	%
Revenues from sales and services	1,879	505	1,374	272.1
Gross operating margin	347	(3)	350	-
Operating result	(268)	(135)	(133)	(98.5)
Capital investments:				
capital expenditure	517	204	313	153.4
goodwill	773	780	(7)	(0.9)
Personnel at year end (employees)	7,307	2,572	4,735	184.1

The figures for 2000 have been restated by de-consolidating the activities of Nortel Inversora/Telecom Argentina. In 2001, revenues and the gross operating margin of the Business Unit increased, in part as a consequence of the Entel Chile and Jet Multimedia groups being consolidated.
Provisions and value adjustments relating to the Entel Chile and 9Télécom groups and higher amortization for goodwill, however, contributed to the worsening of operating result.
In 2001, the development and management of the international portfolio were aimed at maintaining Telecom Italia Group's presence in strategic markets (Latin America and Europe) and in business sectors with high growth potential.
As regards the consolidated subsidiaries, 9Télécom Réseau Group operates in the sectors of wireline telephony and voice, data and Internet services. It also operates in traditional hosting in France.
A considerable increase in turnover (+188.5%) was reported in 2001.
In Latin America, the Entel Chile Group operates in the sectors of wireline and mobile telephony, data transmission and Internet access services and, in 2001, recorded increases (in local currency) of 35.8% in revenues and 12.5% in operating earnings.
During the year, it consolidated its position of integrated provider of telecommunications services and became market leader in mobile telephony through the investee company Entel PCS (owner of the first GSM network in South America); moreover, three WLL licences to provide fast access Internet services and wireline telephony in Chile and abroad were acquired.
The Entel Bolivia Group operates in the sectors of wireline and mobile telephony, Internet, data transmission, telex e telegraphy.
In 2001, GSM technology was introduced in Bolivia and market leadership was confirmed in the segment of services for business and corporate customers.
As regards associated companies, an agreement was reached in December with the other shareholders of AUNA Holding (Spain) for the sale of the 26.89% stake held by the Telecom Italia Group for an expected net cash inflow of approximately 1,850 million euros. The AUNA Group operates in the sectors of wireline and mobile telephony, data transmission, Internet access.

643

Information Technology Services

The "Information Technology Services" (IT Services) Business Unit is in charge of the Group's IT activities and covers the whole value chain of IT services.
The Business Unit, established as part of the project to integrate such diverse entities as Finsiel, Netsiel, Telesoft, Sodalia and the ex-IT division of Telecom Italia, comprises the subsidiaries IT Telecom, Finsiel Group, Telesoft Group, Netsiel S.p.A. and Sodalia S.p.A..
During the year, the first phase of industrial rationalisation and corporate restructuring by homogeneous areas of the BU was fully carried out through the following transactions:
- the sale, to Telesoft, of Telecom Italia's "Servizi di Sviluppo dei Sistemi Informativi" (IT Systems Development Services) business
- the sale, to Telesoft, of Finsiel's "Servizi di Sviluppo Software per Applicativi" (Application Software Development Services) business
- the sale, to Netsiel, of Eis's "Servizi" (Services) business
- the sale, to Finsiel, of Consiel's "Sanità" (Health) business
- transfer, to Finsiel, of the equity investment in Lottomatica, by the non-proportional partial split of Sogei. This transaction was carried out in anticipation of the subsequent listing in 2001 on the Italian Exchange
- the sale of Consiel's "Formazione" (Training) business to the Scuola Superiore G. Reiss Romoli.

The main results for 2001, compared against 2000, are stated in the table below:

(in millions of euros)	Year 2001 (A)	Year 2000 (B)	Changes (A-B) Absolute	%
Revenues from sales and services	2,033	2,138	(105)	(4.9)
Gross operating margin	332	329	3	0.9
Operating result	162	134	28	20.9
Capital investments:				
capital expenditure	129	125	4	3.2
goodwill	1	1	-	-
Personnel at year end (employees)	11,288	12,005	(717)	(6.0)

The trend of revenues from sales and services is affected by the new outsourcing contracts signed in 2001 by Telesoft and Netsiel with the Wireline Services Business Unit of Telecom Italia S.p.A., thereby completing the corporate spin-offs of the ex-IT division of Telecom Italia; these contracts, aiming to achieve maximum efficiency through competitive fees compared to the market conditions, have led to a substantial reduction in revenues in the areas dedicated to those activities. Profitability progressively improved during the year, in terms of both gross operating margin and operating profit.
During the year, operations were characterised by a series of ventures to ensure the innovation, development and optimal management of IT within the Group, develop proposals in the professional IT market for traditional and new market segments and start acting on the organisation, the governance processes, the technology and the skills necessary to implement the new IT industrial plan.
This Business Unit's structure, compatible with the new strategic guidelines, was altered at the beginning of 2002 and divided into two new sub-divisions: Group Information Technology (ITG), aimed at increasing quality and efficiency within the framework of the service activities directed at all the Business Units of

644

the Telecom Italia group operating in the market, and Market Information Technology (ITM), which, though the Finsiel Group companies, will pursue those activities aimed directly at the outside market.

Satellite Services

The "Satellite Services" Business Unit (Telespazio Group and the "Satellite Telecommunications" business of Telecom Italia) is in charge of developing systems for voice and data satellite communications, radio-television transmissions and observation of the earth.
It comprises the subsidiaries Telespazio S.p.A., Telespazio Brasil, Eurimage, MCS Europe Group, e-Geos, Telespazio North America, Telespazio Luxembourg S.A. and CTM S.c.p.a.
Among the main corporate events of mention is the exit from the Astrolink venture and the sale at the end of 2001 of the equity investments in the satellite consortia Intelsat, New Skies Satellite, Inmarsat and Eutelsat; these transactions did not change the area of consolidation.
The main results for 2001, compared against 2000, are stated in the table below:

(in millions of euros)	Year 2001 (A)	Year 2000 (B)	Changes (A-B) Absolute	%
Revenues from sales and services	648	340	308	90.6
Gross operating margin	159	50	109	218.0
Operating result	60	(52)	112	-
Capital investments:				
capital expenditure	29	31	(2)	(6.5)
goodwill	-	-	-	-
Personnel at year end (employees)	1,196	1,206	(10)	(0.8)

The 2001 operating results were affected positively by the industrial development and the success of the "Media & Communication" and "Space System" areas and negatively by the premature closure of the Astrolink contract, the effects of which were partially absorbed by capital gains from the sale of shares held in portfolio.
The main activities for the year may be summarised as follows:
- marketing launch of the multimedia services on the Evolv-e platform;
- continuation of the outsourcing activities for the United States Navy, the Ministry of Defence and for the management of a new broadband service for INMARSAT which will become operational in 2002;
- winning of a contract with Unicredito (Xelion) for the connection of online trading positions in vehicles which travelled throughout Italy in 2001;
- strengthening of the FIAT network which currently links the Turin head office with more than 1,700 dealers in 17 European countries;
- acquisition of the satellite services for the Sole24Ore;
- intensification of the activities related to the major current "Space System" projects: Galileo (positioning, navigation and mobile communications), Cosmo Skymed (high resolution observation of the earth with both radar and optical systems), SICRAL (national military telecommunications system via satellite) and ARTEMIS (satellite for advanced telecommunications belonging to ESA - European Space Agency).

TILAB

The TILAB Business Unit (which generated 134 million euros of revenues in 2001, an 8.9% increase compared to the previous year) was formed through the integration of CSELT's technology with Telecom Italia's venture capital management skills. It is responsible for identifying and managing innovative ventures by creating new business opportunities for both Group companies and the outside market.
The main transactions involving TILAB were:
- sale to Olivetti Multiservices (OMS) of the business dedicated to general services and property management;
- establishment, with the US Group Ramius Capital, of the USA Saturn Venture Partners Fund for investments in the ICT technology;
- acquisition from SAIAT of 100% of Telsy, a manufacturing company operating in the field of products and services for IT security systems for TLC;
- execution of the equity investment portfolio reorganisation, carried out by concentrating the Venture Capital equity investments in the aforementioned foreign corporate vehicles, while maintaining direct management of the industrial equity investments.

The BU's activities, focused in the field of research and development and which has also witnessed the first collaboration with Pirelli Labs and strategic suppliers, involved:
- research into enabling techniques in the mobile and wireline sectors;
- the definition of tools for network design, planning and management;
- the definition and experimentation of local access techniques;
- the development of solutions, products and architectures which can be integrated in silicon;
- the development of modular products, created as software and transformable into firmware for specific solutions or for hardware components;
- the creation of the first prototypes of intelligent aerials and of passive filtering systems for UMTS;
- multilingual refinement and extension of voice recognition and synthesis techniques.

Other activities

The "Other activities" of the Telecom Italia Group mainly comprise the "Real Estate and General Services" function, the company Stream and the financial companies Softe and Sogerim.
The "Real Estate and General Services" function manages and maximises the value of the Group's property portfolio (asset and property management), plans and executes property projects and provides facility and property services (project and facility management).
The total turnover generated in 2001 was 953 million euros, a 2.8% decrease compared to the previous year, due to the alignment of prices to the best market conditions.
In 2001, Softe and Sogerim provided financial support to the companies of the Telecom Italia Group on the international markets.
In particular, as regards Sogerim, in the first half of 2001, as part of the Telecom Italia Group's debt restructuring plan, bonds were issued for a total of 8.5 billion euros.
Stream S.p.A. is an associated company operating in the Pay-TV sector.
In February 2002, Telecom Italia reached an agreement with News Corporation and Vivendi Universal/ Canal + for the sale of its 50% of Stream. The agreement, which is conditional upon the approval of the

relevant Italian authorities, envisages the simultaneous sale of Telecom Italia's 50% of Stream to News Corporation and the purchase of 100% of Stream's capital by the French group Vivendi Universal.
The sale price of Telecom Italia's 50% of Stream will be US$ 42 million.

Products, specialised systems and IT services directly controlled by Olivetti S.p.A.: Olivetti Tecnost

The Olivetti Tecnost Group is active in office products (Home Office Division) and in specialised IT systems for service automation for banking, retail, gaming and Public Administrations (Vertical Markets Division).
During 2001, Olivetti Tecnost integrated its industrial and marketing activities by investing substantially in proposals for Internet services with solutions tailored to small-to-medium sized businesses through GoToWeb S.p.A. and in the home automation sector with automated solutions intended for private residential users through DomusTech S.p.A.
The Group operates in the main international geographical markets (where 69% of total turnover is achieved) and, while being predominantly focused in Europe (29%) and Latin America (16%), it is also present in the United States with its subsidiary Royal Consumer Information Product Inc. in the consumer sector.

The **@Home@Office Division** specialises in office products and communication and image processing devices directed at the business, SoHo and consumer markets. The product catalogue – alongside original supplies and professional services which ensure qualified assistance and support – is marketed in over 70 countries through diversified channels which mainly include networks of dealers, distributors and mass merchandising chains.
In 2001, Olivetti Tecnost further improved its leadership position in Europe in the plain-paper fax and ink-jet technology sector, reaching a market share of 25%. The slowdown in the world market, however, created substantial competitive tension which led to a squeeze in prices and, consequently, in margins.
In the sector of ink-jet printers, Olivetti Tecnost has introduced a compact multifunctional "Flat Bed" system, CopyLab 200, which offers, in a single product and at a contained price, the entire range of peripherals needed to carry out activities at home or in a small office.
Moreover, significant growth was achieved in niche markets such as "mobile printing" (which has led to contracts being signed with important international customers) and "printing for foodstuffs" (which has raised substantial interest among operators in the sector).
As regards the range of laser products, the printer market did not show any great changes during the year, while fax machines based on the same technology continued to be very popular, especially in Italy.
2001 was the year in which the copying sector went digital.
The introduction of a complete range of multifunctional photocopiers led to an increase in digital product deliveries of 114% in revenues and 64% in quantity.
The introduction of the euro had a positive effect on the calculator market as well, with both revenues and margins increasing during the year.

2001 marked the real entry of Olivetti Tecnost into the (growing) market of Personal Digital Assistants (P.D.A.), tools which offer and will offer the core functions of a personal computer, e-mail, Internet access, communication over the GSM networks and GPS location tools.
The year was not positive for the range of original supplies for ink-jet products. Weaker demand for fax machines in Europe inevitably affected demand for printheads and ink cartridges, which the increase in hardware sales did not manage to offset.

In 2001, the **Specialised products and services for vertical applications division** recorded third-party revenues of approximately 295 million euros, a 29% increase in value compared to the year before.
In May 2001, Olivetti Tecnost S.p.A.'s Vertical Markets business was transferred to Tecnost Sistemi S.p.A., with the aim of ensuring maximum focus on markets which, due to the specific nature of the target and the product type, require a highly specialised and dedicated organisation from both the production and the offer/support points of view.
As regards banking, the PR2 printer was once again the reference for the market and for competition worldwide (255,000 units sold in 2001, a 61% increase). The new PR2 Enhanced model was also launched (approximately 21,000 units in 2001), which is the natural technological evolution of the PR2 (faster, greater flexibility to interface with other equipment), and the project for the development of a new line of ink-jet validating printers commenced, mainly aimed at geographical regions such as North and South America.
Special mention must be made of the PR6 printer supplied to the Italian Post Office. This device automates payment of services with special post office forms, and approximately 30,000 units have already been installed in post offices throughout Italy.
The Retail sector is basically divided into two broad product areas with decidedly different requirements: the Linea PR4 and Shop Automation.
The Linea PR4 (printers for organised large-scale retailing) confirmed the revenues achieved in 2000 with a total of 23,000 units sold throughout the world, of which 8,000 in Latin America. During 2001, marketing proposals were launched aiming to increase the business in North America with an up-to-date product line, together with the development of a new line of products based on ink-jet technology called J-POS, the aim of which is to adequately re-position Olivetti's name in the retail sector.
As regards Shop Automation, 2001 was positively affected by the introduction of the euro, which led to a substantial increase in sales linked to products in the cash-register line; overall, approximately 97,000 units were sold (of which 95,000 in Italy), revenues increased by 35% compared to 2000 with a gross margin of approximately 47%.
In this context, Olivetti reinforced its leadership in the Italian market with approximately 300,000 units installed and a 30% market share (+2% compared to 2000).
A new company, called Net Shop, was also established, involving Confcommercio, Confesercenti, MWCR and Olivetti Tecnost. Net Shop's brief is to implement a project which can re-define the role "of the shop business" and of the retail distribution system, which in Italy comprises as many as 950,000 outlets between family-run shops, associations and franchising.

The **Special projects** sector, which mainly creates customised products designed specifically to meet the needs of a customer's request, recorded total revenues of more than 10 million euros in 2001.

Part of this sector is a new product, TP-Label, with which Tecnost Sistemi was awarded an Italian Post Office tender in February 2001 for the supply of 18,000 automatic weighing and franking machines worth approximately 12.5 million euros. 11,000 systems were delivered in 2001, the remaining 7,000 will be supplied in 2002.

Tecnost Sistemi has been operating for over twenty years in the **Gaming** sector, where it has won major contracts such as those with CONI - the Italian Olympic Committee - (supply of terminals to manage the Totocalcio - soccer bets) and Lottomatica (supply of terminals to manage the lottery).
In the past few years, 77,000 units have been installed or are being installed in Italy and can count on a widespread after sales service managed directly by Tecnost Sistemi.
In 2001, turnover was approximately 84 million euros.
During 2001, Tecnost Sistemi was awarded an international tender by Lottomatica for the supply, and related maintenance until 2012, of 13,000 terminals for the lottery and 13,000 specialised printers to be installed at the sales outlets; the printers will enable customers to be offered additional services such as accounting of the volume of bets handled by the outlet, printing tickets for sports events, printing telephone contracts, issuing certificates, etc.
A new range of terminals (called M-380) is being developed to automate the lottery. These compact devices feature a 12" colour LCD screen and PC architecture to support a wide range of configurations and therefore the possibility to be integrated into various scenarios.

The **Industrial Partnerships** business model, based on long-term relationships, was positive for 2001 as well, further consolidating its leadership in banking terminals in China: the PR2, in its various models, occupies the overwhelming majority of front office workstations in the 5 major banks and is the printer of reference.
In 2001, other ventures were started in China, such as the adoption of the fiscal cash-register CRF 4050, suitably adapted, by the city and province of Shanghai as a tool for the pilot project to extend the tax obligation in China and, in the gaming field, contacts have been made to introduce our products (again adapted to local needs) for the Chinese lottery and soccer football pools.
The industrial partnerships business model has been implemented in the Maghreb countries and in the CSI, in particular, where there is an agreement with the railways to use the PR2 printer for ticketing.
In 2001, the financial results of the Industrial Partnerships increased significantly in Korea, Iran and India.
In India, a solid base has been established to cope with the expected growth over the next years in the automation of banking, post offices (PR2, PR4) and telecommunications (fax).

In 2001, the Olivetti Tecnost Group vigorously pursued the development of the new business areas in which it had concentrated its energies and skills the year before: home automation, through DomusTech S.p.A., and the Internet, through GoToWeb S.p.A..
• *DomusTech*, a company specialising in the new sector of Home Automation, is a joint venture with Vemer-Siber, a company specialising in the electro-technical sector.
During 2001, the company continued the substantial programme directed at research, planning, development and implementation of an intelligent management system for residential environments, with tech-

nological solutions capable of managing a variety of subsystems present in a so-called "smart home" through intelligent electronic devices and sensors controlled by fixed units (DomusLink and DomusWeb), integrated in a wireline or mobile telephone system.
The company is therefore committed to implement a complex and detailed industrial plan comprising its own and external research, development and integration activities in the areas of mechanical and electronic planning, telecommunications, services, plant engineering and centralised and remote management.
In October 2001, with the aim of completing the range of proposals through partnerships which bring know-how in specific distribution channels and sectors, DomusTech finalised the acquisition from Giesse Gruppo Industriale S.p.A. of the 100% equity investment in Aprimatic S.p.A., into which Gruppo Giesse transferred its "opening systems automation" business (gates, doors, windows, etc.).

- *GoToWeb*, the Group company dedicated to creating and distributing Internet services, specifically directed at small-to-medium sized companies (PMI), started business in the last quarter of 2001.

The services are primarily provided as an ASP (Application Service Provider) and distributed over the Olivetti Tecnost dealer network. In this manner, traditional strengths have been joined in an innovative way with new marketing proposals made possible by Internet technology. During the year, the hardware and software platform to provide the service was implemented, the technical and marketing structure of the Company was set up and the sales structure was selected and trained. To date, there are more than 150 GoToWeb partners.
In 2001, the Olivetti Tecnost Group achieved total revenues to third parties of 1,097 million euros (of which 1,076 million with third-party customers), EBIT before non-recurring income and charges of approximately 4 million euros (a loss of approximately 10 million euros in 2000) and a 55 million euros net loss to be consolidated for the Olivetti Group. This reflected 70 million euros of non-recurring charges, of which 20 million are extraordinary writedowns relating to the I-Jet company (for the drastic downsizing of production in response to the substantial downturn in market forecasts for ink-jet products and supplies) and 23 million euros for lay-off charges (gross of 3 million euros of utilised provisions already set aside the previous year).
There were 4,896 employees at 31 December 2001, compared to 5,373 at 31 December 2000.

IT solutions and services for the web: Webegg

Olivetti operates in this sector through Webegg (50% Olivetti S.p.A., 30.2% Finsiel and 19.8% I.T. Telecom), which had 718 employees at 31 December 2001 and Italian offices in Milan, Turin, Bologna and Rome and a US office in San Francisco (opened in February 2001).
The opening of an office in Geneva is being considered, which would be directed at online solutions for the private banking market.
The Webegg Group operates as a strategic consultant for the online positioning of companies (Web consulting), integrating solutions of its own with those deriving from a network of partnerships with world leaders in web solutions (Web integration) with technology partners such as Broadbase, Plutree, Neon, Applix, Midas Kapiti International, Documentum, Cisco, Siebel, Genesys and Digital Think.
In 2001, Webegg S.p.A. offered consultancy and services for the organisation and positioning of companies on the web using a multidiscipline approach and it broadened its specific skills in the sector of Interactive Design.

In 2001, the company participated in the European Foundation for Quality Management (EFQM) quality award, obtaining the best placing among Italian companies and receiving an official mention; it also maintained its ISO 9000, TICK IT and environmental certifications.
TeleAp S.p.A. (100% owned) is a company offering advanced applications and services to improve and increase the efficiency of a company's contacts with its customers via the traditional media and Internet (customer services).
Constant attention to the quality of the processes has enabled the company to obtain the ISO 9001 - 2000 (VISION 2000) certification, one of the first Italian companies to do so.
Software Factory (100% owned) was acquired in 2001 and offers organisational and IT services.
The company designs, develops and markets software programmes and systems, for itself and for third parties, for electronic data processing, providing consultancy to satisfy organisational, IT and telematics requirements. It also designs and implements integrated systems for data monitoring and management.
Domus Academy S.p.A. (51% owned, acquired in 2001) is a post-graduate school of training activities in the field of industrial, graphic and fashion design and develops projects linked to the world of Internet and specific studies on Interactive Design themes.
Domus Academy organises periodic courses in Interactive Design and, as of 2002, will offer a master's course in Interactive Design.
The areas covered regards digital information and the Web and their constant evolution linked to new technology (WAP, UMTS, GPRS).
In 2001, the Webegg Group had a consolidated turnover of 91.7 million euros, of which 54.2 million with customers outside the Olivetti Group (compared to 74.9 million euros of the pro-forma 2000 figures) and a net profit of 1.2 million euros.

Facility and Property Management: Olivetti Multiservices

Olivetti Multiservices is a group operating in property and the provision of global services and Facility Management; as well as managing the property portfolio of the Olivetti Group, in 2001 it achieved a noteworthy position in the outside market by being one of the top ten companies in the sector. Particular attention has been paid to the services market, where the growth rate of the past two years was confirmed, especially in Facility Management, where Olivetti Multiservices has been awarded major contracts throughout Italy.
Overall 2001 turnover was 97.6 million euros (72.7 million euros in 2000 in comparable terms), of which 30.1% deriving from the captive market and 69.9% from third parties (the latter posting a 23% increase compared to 2000). Property Management, mainly comprising rentals, purchases, restructuring and sales, represents 38.9% of turnover; the provision of global services (Facility Management), in which, as well as general services, are high added value activities such as energy management and the planning and running of technology facilities, accounted for 61.1%.
The net profit as adjusted for consolidation purposes was 1.7 million euros, worthy of note when considering that Olivetti Multiservices has only been fully operational since 1 January 1999 following the contribution of the business from Olivetti S.p.A..
353 persons were employed at 31 December 2001, compared to 302 at 31 December 2000.

Human Resources

At 31 December 2001, the employees of the Olivetti Group companies included in the consolidation numbered 116,020 (120,973 at 31 December 2000).

(employees)	31.12.2001	31.12.2000	Changes
Olivetti S.p.A.	89	109	(20)
Finance companies	8	9	(1)
Telecom Italia Group	109,956	114,669	(4,713)
Olivetti Tecnost Group	4,896	5,373	(477)
Webegg Group	718	461	257
Property and services businesses	353	352 (*)	1
Total Olivetti Group	**116,020**	**120,973**	**(4,953)**

(*) Including 50 employees in O.S.A. excluded from the consolidation area at 31 December 2001.

There was a net decrease of 4,713 employees at the Telecom Italia Group, the main item being the 5,460 reduction in staff at Telecom Italia S.p.A., comprising 5,562 departures, 693 net transfers to other Group companies and 795 new hirings.
The change in the area of consolidation essentially involved the International Operations Business Unit (which reported the most significant numerical changes: the exclusion of the Nortel Inversora Group with -7,498 staff and the inclusion of Entel Chile with +4,681 staff), Mobile (new companies in Brazil) and Internet and Media (increases in the media and IT activities), with a virtually unchanged final balance (0.1%).
Olivetti Tecnost Group staff decreased by 477, of whom 250 in Italy and 227 abroad: in particular, the net decrease of 250 in Italy is attributable to 382 resignations, 14 net transfers to other Olivetti Group companies and 10 for the disposal of a business, partially offset by 114 new hirings and 42 new staff for the acquisition of Aprimatic.
Webegg Group staff increased by 257, mainly due to new hirings (175) and the acquisition of the equity investments in Domus Academy (6) and Software Factory (157), as well as 84 resignations.

Financial Review

The Group

The full-year operating results for 2001 and the balance-sheet values as at 31 December 2001 were strongly influenced by the changes in the consolidation area.
With regard to the Telecom Italia Group, the consolidation does not include the operating results and balance-sheet values of the Nortel Inversora Group, which at 31 December 2000 was consolidated on a proportional basis. In order to permit comparisons between data for the two years, comments on 2001 operations and balance-sheet values refer to 2000 consolidated data restated to exclude the Nortel Inversora Group.
Furthermore, the 2001 consolidation includes the income statement of the Seat Group, which was acquired at the end of 2000; at 31 December 2000, only the balance sheet of the Seat Group was consolidated on a line-by-line basis.

* * *

For financial 2001, the Olivetti Group posted a consolidated net loss of 3,090 million euros, or a consolidated net loss of 1,791 million euros before amortisation of goodwill on purchases of Telecom Italia shares (1,299 million euros). The result was largely due to high non-recurring costs charged to the year.
In 2001, the Group reported a net loss of 940 million euros (net income of 111 million excluding the 1,051 million euros amortisation charge on goodwill on purchase of Telecom Italia shares).
At 31 December 2001, the Olivetti Group's total shareholders' equity amounted to 26,353 million euros (12,729 million euros pertaining to the Group) compared to 30,529 million euros at 31 December 2000 excluding the Nortel Inversora Group (13,856 million euros pertaining to the Group). The decrease of 4,176 million euros arose from the loss for the year of 3,676 million euros (of which 3,090 million euros pertaining to the Group), dividends totalling 2,461 million euros (of which 255 million euros for Olivetti S.p.A. and 2,206 million euros for the Telecom Italia Group) and other net decreases totalling 463 million euros, offset in part by share capital increases subscribed during the year for 2,424 million euros.
Net financial indebtedness at 31 December 2001 totalled 38,362 million euros, an increase of 2,634 million euros compared to 35,728 million euros at 31 December 2000 restated to exclude debt at the Nortel Inversora Group and permit comparison between the two years.
Capital investments amounted to 11,565 million euros.

Group business performance

2001 business performance is reflected in the reclassified statement of income set out below, which also includes data for 2000. The statement classifies income components by nature, with separate disclosure of non-recurring income and expense items.
To permit comparison, comments on 2001 operations refer to 2000 data restated to exclude the Nortel Inversora Group from the consolidation.

(*) The amounts concerning the Telecom Italia Group have been classified as extraordinary items in the consolidated accounts of this latter.

Group *revenues* for 2001 totalled 32,016 million euros, of which 30,818 million euros for the Telecom Italia Group, an increase of 12.8%, after deconsolidation of the Nortel Inversora Group from the 2000 figure (+ 2.5% at constant size, considering companies present in both years). Telecom Italia Group accounted for 96.3% of total revenues and achieved growth of 13.4% (i.e., excluding the Nortel Inversora Group); net of amounts due to other telecommunications operators, revenues totalled 27,104 million euros and rose by 2,649 million euros from 2000 (+ 10.8%).
The 3,649 million euros revenue growth at the Telecom Italia Group reflected positive performance in mobile telephone services and the contributions of the new companies included in the consolidation, in

654

particular the Entel Chile Group (1,247 million euros) and the Seat Pagine Gialle Group (1,707 million euros), which were offset in part by the exclusion from the consolidation of the manufacturing and system installation companies (Sirti and Italtel groups).
The growth of the mobile telephone services business was flanked by a reduction in revenues from wire-line telephone services, where, despite a significant increase in minutes, traffic revenues reflected a reduction in the average traffic yield (retail and wholesale), from 5.5 euro cents per minute in 2000 to 3.9 euro cents per minute in 2001.

Olivetti Group – Third party revenues (in millions of euros)	Year 2001	Year 2000	Changes absolute	%

Total Group	**32,015.7**	**30,115.7**	**1,900.0**	**6.3**

(*) comparison with restated amounts

Operating costs and other net charges totalled 26,678 million euros in 2001 (of which 24,074 million euros for the Telecom Italia Group), an increase of 3,416 million euros from 2000 (23,262 million euros, of which 20,617 million euros for the Telecom Italia Group). As a percentage of revenues, excluding amortisation of consolidation goodwill, the heading decreased by 0.9 percentage points (76.2% in 2001, against 77.1% the previous year).
Costs of materials and services rose by 2,272 million euros, mainly as a result of the inclusion of the Entel Chile Group and the Seat Pagine Gialle Group in the consolidation (whose 2001 consumptions amounted overall to 1,693 million euros), higher costs at Telecom Italia due to rents of 252 million euros on property transferred to IM.SER (offset by lower amortisation charges) and higher costs for the operation and development of mobile telecommunications services in and outside Italy; such increases were offset only in part by the exclusion of the manufacturing and installation companies from the consolidation area.
Costs for the year included contributions totalling 524 million euros to public authorities for the operation of telecommunications services, of which 290 million euros for Telecom Italia, 182 million euros for TIM and 52 million euros for overseas subsidiary companies.
The ratio of costs of materials and services to revenues rose to 42.1% from 39.4% in 2000.
Labour costs, at 4,877 million euros, were largely unchanged (-60 million euros) from 2000. They reflected the exclusion of the Sirti and Italtel groups from the consolidation for 383 million euros and lower labour costs at Telecom Italia, as a result of the reduction in the workforce due to the application of mobility schemes, offset to a large extent by the inclusion in the consolidation of the Entel Chile Group (114 million euros) and the Seat Pagine Gialle Group (360 million euros). As a proportion of revenues, labour costs decreased from 17.4% in 2000 to 15.2% in 2001.
Depreciation and amortisation charges amounted to 7,641 million euros (6,519 million euros in 2000). They included charges totalling 3,561 million euros in respect of intangible fixed assets (of which 2,278

million euros for goodwill on the acquisition of equity investments in controlled companies) and 4,080 million euros in respect of tangible fixed assets. The overall increase of 1,122 million euros arose mainly from higher goodwill amortisation charges (+908 million euros, of which 574 million euros for the acquisition of Seat Pagine Gialle, 102 million euros for the acquisition of Jet Multimedia and 99 million euros for the companies in the Seat Pagine Gialle group), which were offset only in part by the reduction of 99 million euros in depreciation charges on tangible fixed assets, which related almost entirely to the Telecom Italia Group.

Provisions for writedowns and risks amounted overall to 758 million euros (654 million euros in 2000) as follows:

- 733 million euros for the Telecom Italia Group (588 million euros in 2000) including:
  - 455 million euros for writedowns on trade receivables (specifically, 159 million euros at Telecom Italia, 73 million euros at the Seat Pagine Gialle Group, 57 million euros at the Entel Chile Group and 52 million euros at TIM);
  - 278 million euros for provisions for risks and charges, which increased by 132 million euros from 2000 chiefly as a result of the inclusion in the consolidation of the Seat Pagine Gialle Group (31 million euros) and higher provisions at Telespazio (+48 million euros) largely due to the termination of the Astrolink project;
- 25 million euros for provisions and writedowns at other Olivetti Group companies.

EBIT before non-recurring income and charges for 2001 therefore amounted to 5,338 million euros, an improvement of 226 million euros (+4.4%) from the previous year (5,112 million euros).

Non-recurring income amounted to 999 million euros (1,705 million euros in 2000). It consisted of 465 million euros for capital gains from the year's disposals (1,408 million euros in 2000) and 534 million euros for sundry income (297 million euros in 2000).

Capital gains from disposals totalled 465 million euros, of which 392 million euros for the Telecom Italia Group, as follows:

- 170 million euros from the sale to the Lehman Brothers Group of 70% of Mirror International Holding (to which the equity investments in satellite companies were transferred);
- 94 million euros from the sale of 30% of Mediterranean Nautilus S.A. to Israel's F.T.T. Investment;
- 128 million euros from other disposals.

Capital gains for the other Group companies amounted to 73 million euros, as follows:

- 29 million euros from the increase in shareholders' equity at Lottomatica as a result of the share premium raised through the initial public offering, with regard to the portion held directly by Olivetti S.p.A.;
- 43 million euros from the sale of the residual equity investment in Globespan Virata Corp.;
- 1 million euros from the sale of minority shareholdings.

Other non-recurring income amounted to 534 million euros; this included 460 million euros for the Telecom Italia Group, as follows:

- 32 million euros from the partial annulment by the Public Administration Central Court of the fine imposed on TIM by the Antitrust authority for alleged violation of antitrust regulations;
- 120 million euros from reversal to income of prior-year excess provisions;
- 308 million euros of other income.

The 74 million euros of other non-recurring income for the other Group companies included:
• 14 million euros for insurance compensation for damages suffered by Olivetti Tecnost and Olivetti Multiservices as a result of floods in Piedmont and the Aosta Valley in the autumn of 2000;
• 12 million euros from the sale of receivables due from authorities of the Russian Federation, which had previously been written off in full under the allowance for doubtful accounts;
• a 10 million euros adjustment on the sale price of the equity investments in Olivetti Ricerca and Modinform, following official recognition to these companies of state grants for R&D activities;
• a 4 million euros adjustment on the sale price of the equity investment in O.i.S. relating to prior years;
• 8 million euros as a result of the offer on the market of unexercised rights relating to the share capital increases arranged in 2001 by Olivetti S.p.A.;
• 26 million euros of other income.

Non-recurring charges amounted overall to 4,354 million euros (1,583 million in 2000); they included 3,947 million euros at the Telecom Italia Group, as follows:
• 2,984 million euros of goodwill writedowns relating to consolidated companies (9Télécom Group, Entel Bolivia, Entel Chile Group, Maxitel Group, Tele Celular Sul Group, Tele Nordeste Celular Group, MED1 Group and some companies in the Seat Pagine Gialle Group) and to companies valued with the equity method (Globo.com, Solpart Participaçoes and Telekom Austria), as well as other provisions relating to equity investments. These writedowns were made applying the Group's accounting policies consistenly with the prior years, to reflect new business plans and market trends;
• 380 million euros of charges relating to personnel retirements and mobility schemes (including 203 million euros at Telecom Italia S.p.A.);
• 248 million euros provided for charges connected to the sale of the equity investment in Stream in connection with the agreement with Vivendi/Canalplus;
• 77 million euros for an extraordinary contribution payment to the Italian national insurance board (INPS) - pursuant to the 2000 state budget for the three-year period 2000/2002 - to cover increased financial requirements following the integration of the Telephone Companies Employees Security Fund (FPT) with the Employees Pension Fund;
• 85 million euros following the decision to restructure the La7 broadcaster and terminate a series of contracts;
• 84 million euros of financial charges accruing on the liability to the INPS for the FPT Fund, which, following the 2000 state budget, has now been integrated with the Employees Pension Fund;
• 89 million euros of other charges.
Non-recurring charges for the other Group companies amounted to 407 million euros, as follows:
• 190 million euros in respect of risks on equity investments;
• 43 million euros of re-organisation charges at the Olivetti Tecnost Group;
• 15 million euros paid to the outgoing Chief Executive Officer of Olivetti S.p.A. for settlement and waiver of all claims;
• 9 million euros of damages caused by the floods in the Canavese area in the autumn of 2000;
• 150 million euros of other charges, including 97 million euros of consolidation adjustments, offset with a similar amount as an adjustment to writedowns of consolidation goodwill recorded by Telecom Italia.

EBIT after the above non-recurring charges, was positive, at 1,983 million euros, but down from 5,234 million euros reported in 2000.

Net income from equity investments totalled 221 million euros (391 million in 2000) and included 154 million for the Telecom Italia Group (301 million in 2000), consisting largely of dividends from investee companies and net gains from the sale of equity investments in listed companies.
The residual amount of 67 million euros included 24 million euros from the sale of rights on Olivetti shares in the Olivetti International portfolio.

Interest expense and other net financial charges amounted to a total of 3,105 million euros (1,673 million euros in 2000), of which 2,153 million euros related to the Telecom Italia Group (609 million euros in 2000) and 952 million euros to the other Group companies (1,064 million euros in 2000).
Net financial charges at the Telecom Italia Group increased by 1,544 million euros as a result of the Group's increased financial exposure, the impact of consolidation of the income statements of the Maxitel Group (net financial charges of 187 million euros), the Seat Pagine Gialle Group (85 million euros) and the Entel Chile Group (67 million euros), and charges arising from the re-negotiation of Telecom Italia put/call options on Seat shares (569 million euros).
Net financial charges for the other companies decreased by 112 million euros, due to lower average financial exposure as a result of the share capital increases subscribed during the year and also to debt-refinancing at lower servicing charges through the liquidity raised by the capital increases and bond issues.

Value adjustments to financial assets generated an overall charge of 2,196 million euros (1,194 million euros in 2000), of which 1,955 million euros for the Telecom Italia Group (1,147 million euros in 2000) and 241 million euros for the other Group companies (47 million euros in 2000).
Value adjustments for the Telecom Italia Group (1,955 million euros) included 316 million euros for the Group's share of profit and losses of companies valued with the equity method, including amortisation of goodwill arising on acquisition; the heading reflected the loss posted by IS Tim (334 million euros) as a result of start-up costs and the impact of the currency crisis in Turkey with application of inflation accounting procedures, the writedown of Stream (241 million euros), the writedown of listed shares and securities held as current assets to reflect market values (291 million), the 238 million euros loss posted by the Nortel Inversora Group (as a result of the economic crisis in Argentina, in particular exchange rate losses on debt and writedowns of securities) and the 259 million euros writedown of Astrolink charged by Telespazio upon termination of the project.
Value adjustments relating to the other Group companies amounted to 241 million euros (47 million euros in 2000), as follows:
- for 100 million euros, the writedown on 41.4 million Telecom Italia shares held as current assets in the securities trading portfolio, to the share price at 28 December (9.60 euros per share);
- for 118 million euros, the writedown on 174.2 million Seat Pagine Gialle shares, held as current assets until 30 June and subsequently reclassified under financial fixed assets, in line with the strategy of the new reference shareholder;
- for 23 million euros, other securities.

Income taxes for 2001 amounted to 579 million euros (1,813 million euros in 2000), relating in the main to the Telecom Italia Group (951 million euros) and to other Olivetti investee companies (24 million euros), offset by tax benefit (net of current taxes and tax consolidation adjustments) at Olivetti S.p.A. through use of the deferred tax reserve.

Income attributable to minority interests amounted to 586 million euros (compared to a loss of 1,885 million euros in 2000) and consisted chiefly of earnings attributable to Telecom Italia Group minority shareholders.

As a result, the Group posted a net loss for 2001 of 3,090 million euros (a loss of 940 million euros in 2000); excluding amortisation of goodwill on the acquisition of Telecom Italia, the Group net loss amounted to 1,791 million euros (net earnings of 111 million euros in 2000).

Analysis of the Group balance sheet

The reclassified balance sheet of the Olivetti Group at 31 December 2001 is set out below:

(in millions of euros)	31.12.2001	%	31.12.2000 Restated	%	31.12.2000 Original	%

Short-term assets at 31 December 2001 amounted to 23,891 million euros compared to 20,925 million euros at 31 December 2000.
Financial resources (including financial receivables and accrued interest income) totalled 8,641 million euros at 31 December 2001 compared to 7,065 million euros at 31 December 2000. The increase of 1,576 million euros arose from an increase of 2,353 million euros for non-Telecom Italia companies (mainly as a result of share capital increases at Olivetti S.p.A.), set against a decrease of 777 million euros in financial resources at the Telecom Italia Group.
The net increase of 1,390 million euros in short-term operating assets arose from an increase of 1,850 million euros for the Telecom Italia Group and a decrease of 460 million euros for the other companies.
The net increase of 1,850 million euros at the Telecom Italia Group arose as follows:
• an increase of 457 million euros in trade receivables following the inclusion in the consolidation of the Entel Chile Group (+337 million euros) and higher receivables at the Seat Pagine Gialle Group, at Tele Sistemi Ferroviari and at Telespazio;
• an increase of 1,393 million euros in other assets, largely for prepaid taxes for the TIM Group and Telecom Italia.
The short-term operating assets of the other companies decreased by 460 million euros, including 304 million euros for Seat Pagine Gialle shares held (directly or indirectly) by Olivetti, which were classified under financial fixed assets in 2001, and 295 million euros for other net decreases, arising mainly from lower deferred tax assets on dividends recorded on accrual, offset by 139 million euros for the equity investment in Lottomatica, which was classified under current assets at 31 December 2001 in connection with take-up of the public tender offer at the beginning of 2002.

Medium/long-term assets amounted to 70,336 million euros, a net decrease of 571 million euros from 70,907 million euros at 31 December 2000.
Specifically, financial medium/long-term assets at 31 December 2001 amounted to 705 million euros and consisted of the prepayment of the redemption premium on the "Olivetti 1.5% 2001-2004" and "Olivetti 1.5% 2001-2010 bonds" issued by the Parent Company in 2001 and on the "2000-2005 bond exchangeable for Telecom Italia shares" issued by Olivetti Finance N.V. in 2000, for residual amounts not accruing in 2001.
The 377 million euros increase mainly arose from the prepayment of the redemption premium relating to loans issued by the Parent Company in 2001, for amounts not accruing in 2001.
Intangible fixed assets amounted to 39,220 million euros compared to 39,174 million euros at the end of 2000, an increase of 46 million euros; this reflected an increase of 1,182 million euros for the Telecom Italia Group, offset by a decrease of 1,136 million euros for the other companies, mainly due to the effect of amortisation of consolidation goodwill at the Telecom Italia Group. The net increase of 1,182 million euros at the Telecom Italia Group included 1,174 million euros for goodwill on acquisitions during the year (mainly Entel Chile) and 2,736 million euros for other investments including the cost of the new mobile phone service licences in Brazil and Greece, offset by amortisation and write-downs of consolidation goodwill for a total of 1,966 million euros and other net decreases for 762 million euros.
Tangible fixed assets rose by 1,025 million euros and related entirely to the Telecom Italia Group (1,036 million euros), largely as a result of the inclusion of the Entel Chile Group in the consolidation.

Other medium/long-term assets decreased by 2,019 million euros, of which 2,074 million euros for the Telecom Italia Group reflecting the balance on payments to investee companies (1,659 million euros), writedowns of foreign equity investments applied in compliance with the new strategic guidelines (1,078 million euros), the cancellation by Telecom Italia of treasury savings stock on re-denomination of share capital in euros (662 million euros), and the consolidation of the Entel Chile Group and the Holding Media e Comunicazione Group (ex Cecchi Gori Communications).

Short-term liabilities at 31 December 2001 amounted to 26,971 million euros, a decrease of 4,581 million euros from 31,552 million euros at 31 December 2000.
Specifically, short-term debt (9,961 million euros at 31 December 2001) decreased by 7,210 million euros, of which 6,004 million euros for the Telecom Italia Group and 1,206 million euros for the other Group companies.
The reduction in Telecom Italia Group short-term debt was due to cash flow from operating activities and from financing activities, which increased as a result of Group debt refinancing operations.
The short-term debt of the other companies decreased by 1,206 million euros, mainly due to lower requirements following the Parent Company capital increases subscribed in 2001, and maturity of the Olivetti 1994-2001 bond.
Short-term operating liabilities increased by 2,629 million euros, of which 2,226 million euros for the Telecom Italia Group, mainly due to the inclusion of the Entel Chile Group in the consolidation, higher payables for the Mobile business, the Latin American Nautilus Group and Netsiel, and the increase in provisions for risks and charges, offset in part by the reduction in trade payables at Telecom Italia and Telespazio. The increase in the reserve for risks and charges largely reflected extraordinary provisions for Telecom Italia Group equity investments (provided in accordance with the new strategic guidelines), charges arising from the re-negotiation of Telecom Italia put/call options on Seat shares, and charges relating to the sale of Stream.

Medium/long-term liabilities amounted to 40,903 million euros, an increase of 11,152 million euros from 29,751 million euros at 31 December 2000.
Specifically, medium/long-term debt amounted to 37,747 million euros, of which 16,083 million for the Telecom Italia Group; Telecom Italia Group medium/long-term debt increased by 9,350 million euros, chiefly due to the restructuring of Group debt, for which bonds were issued directly by Telecom Italia and through Sogerim, as part of the Global Medium-Term Note Programme.
Debt for the other Group companies increased by 2,447 million euros as a result of new bonds issued by Olivetti S.p.A. for 4,588 million euros, new subscriptions totalling 800 million euros of Olivetti International Finance N.V. bonds and the negotiation of new borrowings for 225 million euros, offset by early repayments for 2,896 million euros and transfers to current portions due totalling 270 million euros.
Medium/long-term non-financial liabilities decreased by 645 million euros, of which 484 million euros for non-Telecom Italia Group companies consisting of 480 million euros from partial use of the Parent Company reserve for deferred taxes.

Capital invested at 31 December 2001 and related funding is illustrated in the table below:

(in millions of euros)	31.12.2001 (a)	%	31.12.2000 Restated (b)	%	31.12.2000 Original	%

Capital invested (67,871 million euros) decreased by 2,187 million euros from the previous year. Of the total, 43.5% was funded by non-financial sources, mainly total shareholders' equity (26,353 million euros, down by 4,176 million euros from 30,529 million euros at 31 December 2000 as previously analysed). Net financial indebtedness funded the remaining 56.5% (51% at 31 December 2000).

Olivetti Group **net financial indebtedness** at 31 December 2001 amounted to 38,362 million euros, an increase of 2,634 million euros from 35,728 million euros at 31 December 2000 excluding debt at Nortel Inversora, which was deconsolidated to permit comparison with 2001.

Dividend payments from Olivetti S.p.A.	255
Financial charges and other disbursements, net	943
Financial surplus of other companies	**(2,075)**
Total net financial requirement	**2,634**

* * *

The main financial operations of 2001 are described below:

Telecom Italia Group

• On 10 January 2001 Telecom Italia completed its savings share buy-back authorised by the Ordinary Shareholders' Meeting of 14 January 2000; with this operation Telecom Italia purchased a total of approximately 113 million treasury savings shares (representing approximately 5.2% of savings capital and approximately 1.5% of total capital), for the equivalent of approximately 711 million euros.
• On 10 April 2001 the subsidiary company Sogerim placed a bond on international markets for a total of 6,000 million euros. The issue was subdivided into three tranches: the first, consisting of floating rate notes for 1 billion euros, maturing on 20 April 2004; the second, consisting of fixed coupon bonds for 3,000 million euros, maturing on 20 April 2006; the third, consisting of fixed coupon bonds for 2,000 million euros, maturing on 20 April 2011.

• The Telecom Italia S.p.A. Extraordinary Shareholders' Meeting of 3 May approved the conversion of share capital in euros through re-denomination of the par value of ordinary and savings shares and the rounding-up of par value from 1,000 Italian lire (equivalent to 0.5165 euros) to 0.55 euros, in part through cancellation of treasury stock and for the remainder through the transfer of a part of equity reserves to share capital.
• In June 2001, Telecom Italia successfully completed its first issue of asset-backed securities guaranteed by telephone bills, for a total of 700 million euros, through the TI Securitisation Vehicle company. This was the first issue of this type ever made by a European telephone operator.
High investor demand meant it was possible to fix lower margins than those originally planned, at 19.7 and 34 basis points above Euribor respectively for the 100 million euros tranche at 18 months, the 150 million euros tranche at 3 years and the 450 million euros tranche at 5 years.
Demand for the securities, issued at a floating rate with AAA/Aaa/AAA ratings from Fitch, Moody's and Standard & Poor's, came from Italy for approximately 20% of the overall total and from overseas for the remaining 80%, mainly Spain, France, the United Kingdom and Germany.
• On 7 August 2001, Telecom Italia negotiated the partial renewal of a credit line provided by 36 leading Italian and international banks, for 8 billion euros. The credit line has a 364 day term and is 5 billion euros lower than the previous credit line (13 billion euros), as a result of the medium/long-term consolidation of Group debt through bond issues in the first half of 2001.
• The Telecom Italia ordinary Shareholders' Meeting of 7 November 2001 carried a resolution for the buy-back, in one or more operations, of ordinary and savings shares for a maximum of 10% of share capital equivalent to a maximum of 1,500 million euros; the purchase price for each share may not be more than 15% above or below the average share price registered during the three sessions prior to each operation.
The Meeting also authorised disposal of the shares thus acquired through sale or exchange, inclusive of any stock option plans that may be put in place; in the event of a sale, the price may not be lower than the lowest purchase price; the shares may also be used to service the exercise of bonds or warrants. The price limit will not apply in the event of sales to employees and/or directors and/or consultants of the company, in connection with stock option plans. The share buy-back was authorised for a period of 18 months.
• In December 2001 a bond issued by Telecom Italia as part of the Group's "Global Note Programme" was subscribed in full. In response to high investor demand, the original amount of 1 billion euros was raised to 1.5 billion euros.
Institutional investor interest allowed the margin originally offered to be reduced to an overall yield of 100 basis points over Euribor. The coupon does not contain "step-up" clauses. The bond characteristics are as follows:

Amount:	1,500,000,000 euros
Regulation date:	21 December 2001
Term:	3.5 years
Floating rate coupon:	3 months Euribor + 0.95%
Payment of first coupon:	3 months after the regulation date
Redemption price:	100
Issue price:	99.837
Listing:	Luxembourg
Early redemption:	at the option of the issuer, at par, after the first 24 months, on a quarterly basis.

The proceeds from the issue were used to repay part of Telecom Italia S.p.A. short-term loans; this extended the average maturity of Group debt, without affecting the overall volume.
Caboto - IntesaBci Group, JP Morgan Securities Ltd., Schroder Salomon Smith Barney and UniCredit Banca Mobiliare acted as lead managers and bookrunners.

• At a meeting on 28 December 2001, the Finsiel Board of Directors decided to take up the public tender offer made by Tyche S.p.A. (De Agostini Group) on 100% of the shares of Lottomatica S.p.A., at a price of 6.55 euros per share, which was increased following the re-launch of the offer.
In executing the Board's resolution, Finsiel subsequently tendered its equity investment in Lottomatica S.p.A., which amounted overall to 32,300,850 shares, representing 18.3% of the company's capital.
The sale raised approximately 212 million euros for Finsiel, with a capital gain of approximately 207 million euros.

Other companies in the Olivetti Group

• As mentioned above, the share capital increase resolved by the Olivetti S.p.A. Board of Directors on 18 December 2000, whose terms and conditions were set by the Board of Directors on 9 February 2001, took place in early 2001.
Following the rights issue and subsequent offer on the stock market of unexercised rights (respectively 5.14% of shares and 3.04% of bonds), 348,249,405 shares with warrants were issued at 2.6 euros per share and 487,549,167 bonds were issued with a par value of 2.6 euros per bond.
The bonds are of the series "Olivetti 1.5% 2001-2004 convertible with redemption premium" with the following characteristics:

- maturity:	1 January 2004;
- nominal interest rate:	1.5% annual gross;
- redemption premium on maturity:	5.07759% gross of bond par value;
- actual yield on maturity:	3.25% annual gross;
- conversion period:	1 January 2002-15 December 2003.

• On 9 February 2001, during the meeting held to set final conditions for the above-mentioned share capital increase, the Olivetti S.p.A. Board of Directors also carried a resolution partially reversing previous resolutions and approving a share capital increase to service a stock options plan for managers of the Parent Company and its subsidiaries for the three years 2002-2004.

• At a meeting on 30 May 2001, the Olivetti S.p.A. Board of Directors approved the amendment to the 10 billion euros "Euro Medium Term Notes (EMTN)" programme (launched in July 1999) to include Olivetti S.p.A. as a possible issuer. It also approved the issue, under the programme, of a two-year non-convertible bond for a maximum amount of 400 million euros reserved exclusively for Italian professional investors and foreign institutional investors (excluding the USA), listed on the Luxembourg Stock Exchange. The resolution was implemented with the issue on 11 June 2001 of a 400 million euros bond, redeemable in full on maturity; the bond bears interest of 92 basis points over the Euro Overnight Index Average.

• On 17 July, Olivetti instructed Lehman Brothers to re-open the "Olivetti International Finance N.V. 5 3/8% 1999-2004" bond of 4.5 billion euros and the "Olivetti International Finance N.V. 6 1/8% 1999-2009" bond of 1.75 billion euros.

In view of high investor demand - orders were received for more than double the original amount of 500 million euros - Olivetti decided to raise the offer up to a total of 800 million euros.
The amount was subdivided into two tranches:
- 450 million euros on the "Olivetti International Finance N.V. 5 3/8% 1999-2004" bond, raising from an original amount of 4.5 billion euros to 4.95 billion euros; the re-offer price of this tranche was 99.596%, for a yield of 153 basis points over the French BTAN 3.50% July 2004 benchmark;
- 350 million euros on the "Olivetti International Finance N.V. 6 1/8% 1999-2009" bond, raising from an original amount of 1.75 billion euros to 2.1 billion euros, offered at a price of 94.956%, for a yield of 248 basis points over the German Bund 4.50% July 2009 benchmark.
The two bonds currently bear a 0.45% coupon step-up, in relation to the credit protection package which was granted to investors. Lehman Brothers acted as Lead Manager and book runner for the operation, with Mediobanca as Senior Co-lead Manager.
Proceeds from the issue were used to refinance debt on more favourable terms.

• On 27 December 2001, Olivetti announced its intention of accepting the public tender offer launched by Tyche S.p.A. (De Agostini Group) on 100% of the shares of Lottomatica S.p.A., at a price of 6.55 per share, increased following the relaunch of the offer.
Under agreements with the offerer, Olivetti subsequently tendered its equity investments in Lottomatica S.p.A., for an overall total of 27,451,550 shares, representing 15.6% of the company's capital (of which 14.04% held directly by Olivetti S.p.A. and 1.56% by the subsidiary Olivetti International S.A.).
Also considering the 18.3% equity investment in Lottomatica held by Finsiel S.p.A., whose Board of Directors approved acceptance of the offer on 28 December 2001, the total proceeds for the Olivetti-Telecom Italia Group amounted to 391 million euros with an overall capital gain of 367 million euros, recorded in the accounts of the relevant companies.

• As part of the programme to optimise sources of finance, on 31 December 2001 notes previously re-purchased from the market in respect of the following bonds were cancelled:
- "Olivetti Finance N.V. 1999-2004 floating rate" for a par value of 2,150 million euros
- "Olivetti Finance N.V. 1% 2000-2005 exchangeable for Telecom Italia ordinary shares" for a par value of 500 million euros.
As from 31 December 2001, the par value of the above bonds decreased as follows:
- "Olivetti Finance N.V. 1999-2004 floating rate" from 7,300 million euros to 5,150 million euros
- "Olivetti Finance N.V. 1% 2000-2005" from 2,500 million euros to 2,000 million euros.

• In November and December 2001 the offer of Olivetti shares and convertible bonds approved by the Board of Directors of 13 October 2001 under proxies granted by the Extraordinary Shareholders' Meetings of 7 April 1999 and 13 October 2001 was successfully completed.
The bonds have a par value of 1 euro each, for the series "Olivetti 1.5% 2001-2010 convertible with redemption premium" with the following characteristics:

Issue date:	23 November 2001
Maturity:	1 January 2010
Coupon:	1.5% per annum paid annually as from 1 January 2003
Redemption premium on maturity:	18.37825% gross of bond par value
Actual yield on maturity:	3.5% per annum gross
Conversion period:	22 January 2002 / 15 December 2009

Information by sector (CONSOB communication no. 98084143)

A) Information by business sector

The consolidated statement of income showing the results of the operating companies adjusted for consolidation purposes and the consolidated reclassified balance sheet showing the balances of these companies adjusted for consolidation purposes, are set out on the following pages. The results and balances for consolidation purposes differ from those disclosed in the companies' respective statutory financial statements at 31 December 2001. The main consolidation adjustments are the elimination of intercompany gains and depreciation charges on assets transferred within the Group, the reversal of tax-related entries made largely in respect of depreciation, the valuation of equity investments (equity investments in subsidiary companies, by definition, appear in the consolidated accounts as the appropriate portion of the company's net equity used for consolidation purposes) and other adjustments made to align the result of the individual companies with the accounting policies adopted by the Group.

B) Other information

It should be noted that:

- intercompany transactions between different business sectors or geographical areas are executed at market prices and eliminated during consolidation;
- a description of the types of products offered and services provided appears in the first half of the Report on Operations.

"Introduction of the euro" disclosure (CONSOB communication no. 98083971)

In 2001, the Telecom Italia Group completed adjustments to its information systems, which were performed in two phases:

- in the first nine months of 2001, the software and data banks for all procedures affected by the introduction of the euro were modified and enhanced, both within the Group and in relation to external systems;
- during the fourth quarter (final phase), contingency plans were formulated and tested and an "Independent verification and validation" was performed on key corporate systems, using suppliers, methodologies and tools other than those used in the adjustment phase, in order to identify any problems in time for the necessary corrections to be made.

Research & Development

In 2001 most of the Telecom Italia Group's R&D operations were conducted by TILAB which has a staff of 1,080.

Activities consisted of study and testing in the wireline and mobile telecommunications areas and in the Internet area. Special attention was paid to enabling techniques (localisation, messaging and multimedia services), development of network design, planning and management tools, development and testing of local access techniques, and silicon solutions, products and architectures. Significant results were obtained with regard to the ADSL access modem and IP networking (network processor). Total R&D expenditure for 2001 amounted to approximately 137 million euros. Subsidies and low-interest loans for R&D expenses collected during the year or due to be collected by TI Lab amounted to approximately 10 million euros.

R&D expenditure at the Olivetti Tecnost Group amounted to 33 million euros, relating to vertical applications (in particular, the PR2 Enhanced bank printer, the Explor@ Internet-enabled non-fiscal cash register, the JPOS model in the retail sector), the Gaming area (with work on the M320, M340, M350, M370, M380 terminals, which are also intended for new non-European markets), the products Division (the Nomad Jet 100 printer, OFX 520/550/570/800 fax, Jet Lab 400/500/600, Life jet printer, XCC32, Linea @ Jet Linea and new applications for a photographic printer) and the printheads Division (in particular, developments in active and passive dies and research on monolithic printheads and new applications).

R&D activities at Webegg focused on software products and organisation modules, for overall expenditure of approximately 1 million euros.

The Parent Company

In 2001, the Parent Company Olivetti S.p.A. operated purely as a holding, mainly in the fixed and mobile telecommunications sector through its equity investment in the Telecom Italia Group and through controlling equity investments in other industries, including office and Internet products and services (Olivetti Tecnost S.p.A.), Internet services (Webegg Group), real estate, services and facilities management (Olivetti Multiservices S.p.A.).
In 2000, Tecnost S.p.A., a holding company controlled by Olivetti, was merged into and with Olivetti S.p.A.. Tecnost operations were included in the Tecnost statement of income until 30 September 2000 and as from 1 October 2000 in Olivetti S.p.A. accounts. Comparison of results for the two years and between the balance-sheet values as at 31 December 2001 and 2000 is therefore not meaningful; nevertheless, in the interest of full disclosure, data for the two years is illustrated below.

* * *

Olivetti closed 2001 with a net loss of 871 million euros, compared to net income of 870 million euros in 2000, due to lower dividends from Telecom Italia recorded on accrual and higher financial charges arising from the above-mentioned changes in the company structure.
Capital investments for 2001 totalled 584 million euros (260 million euros in 2000), of which 430 million euros related to equity investments (257 million euros in 2000) and 153 million euros to intangible assets (2 million euros in 2000).
At 31 December 2001, shareholders' equity amounted to 15,235 million euros. The increase of 1,298 million euros from 13,937 million euros at 31 December 2000 arose from the share capital increases subscribed during the year offset in part by the loss for the year and dividend payouts.
Net financial indebtedness at the end of 2001 totalled 16,322 million euros, a decrease of 1,669 million euros from the end of 2000 (17,991 million euros), which arose largely as a result of the above-mentioned share capital increases.

Business performance for 2001 is reflected in the income statement below, reclassified in compliance with the Consob model for industrial holding companies pursuant to communication no.94001437 of 23 February 1994.

(in millions of euros)	Year 2001	Year 2000	Changes

Net income (loss) for the year	**(871)**	**870**	**(1,741)**

The year's ordinary operations closed with a loss of 1,328 million euros compared to income of 956 million in 2000.

This result reflected:

- 122 million euros of financial income (1,475 million euros in 2000), including:
  - 85 million euros of dividends and related tax credits (1,433 million euros in 2000), of which 73 million euros from Telecom Italia (recorded on accrual, in respect of 2001 income), 8 million euros from Lottomatica, 3 million euros from Mediobanca and 1 million euros from Finsiel, with a net decrease of 1,336 million euros mainly arising as a result of lower dividends from Telecom Italia (-1,329 million euros);

- 37 million euros of other financial income (42 million euros in 2000) of which:
  * 4 million euros from securities and reverse repurchase agreements accounted for under current assets (consisting largely of government securities);
  * 4 million euros of interest income from subsidiary companies (on borrowings and interest-bearing current accounts) a decrease of 4 million euros from 2000;
  * 9 million euros of interest income on bank current accounts, down 2 million euros from 2000;
  * 9 million euros of interest income on receivables from tax authorities ceded without recourse in previous years;
  * 10 million euros of exchange rate gains;
  * 1 million euros of other income;

- 966 million euros of interest expense and other financial charges (408 million euros in 2000), including:
  - 814 million euros relating to borrowings and interest-bearing current accounts in respect of subsidiary companies (331 million euros in 2000), of which 722 million euros to Olivetti Finance N.V. and 82 million euros to Olivetti Holding B.V., with an overall increase of 483 million euros largely due to the changes in the company structure as from 1 October 2000, following the Tecnost S.p.A. merger;
  - 62 million euros on bond loans (14 million euros in 2000);
  - 28 million euros on medium/long-term borrowings (28 million euros in 2000);
  - 19 million euros for exchange rate losses (8 million euros in 2000);
  - 29 million euros from use of bank credit lines (15 million euros in 2000);
  - 14 million euros on other financial operations (12 million euros in 2000);
- 175 million euros for writedowns of equity investments in subsidiary companies (10 million euros in 2000), including:
  - 108 million euros relating to 159.6 million Seat Pagine Gialle shares held as current assets until 30 June 2001 and subsequently reclassified under financial fixed assets, in accordance with the strategies of the new reference shareholder;
  - 64 million euros relating to the equity investment in Olivetti Tecnost;
  - 3 million euros relating to equity investments held as current assets;
- 15 million euros of other income from operations (17 million euros in 2000) consisting mainly (7 million euros) of the sum credited by Olivetti Finance N.V. as a result of the buy-back below par on the market (and subsequent cancellation) of part of the 500 million euros bond redeemable in Telecom Italia shares maturing in 2005 and simultaneous repayment by Olivetti S.p.A. of a borrowing for the same amount previously granted by Olivetti Finance N.V.;
- 324 million euros in other costs of operations (118 million euros in 2000), including:
  - 49 million euros for non-financial services (49 million euros in 2000);
  - 63 million euros for depreciation and amortisation (25 million euros in 2000), including 62 million euros in respect of intangible assets (24 million euros in 2000) of which 20 million euros for charges relating to share capital increases and bonds subscribed in 2001;
  - 1 million euros for writedowns on receivables (11 million euros in 2000);
  - 192 million euros for provisions to the reserve for future risks and charges relating to investee companies (15 million euros in 2000);
  - 13 million euros for payroll costs and retirement incentives (12 million euros in 2000);
  - 6 million euros in other costs of operations (6 million euros in 2000);

Extraordinary operations generated net income of 7 million euros (25 million euros in 2000), consisting of income totalling 23 million euros and charges totalling 16 million euros.
Extraordinary income included 1 million euros for capital gains from equity investment disposals, 8 million euros for the sale on the stock market of unexercised rights for subscription of shares and bonds and 10 million euros for the adjustment of the sale price of the equity investments in Olivetti Ricerca and Modinform, following final approval of state grants to these companies to cover R&D costs.
Extraordinary charges included an indemnity of 15 million euros paid in September 2001 to the outgoing Chief Executive Officer in settlement and waiver of all claims.

The Taxation heading reflects an income totalling 450 million euros, arising from the partial reversal of the reserve for deferred taxes, which was redundant of 480 million euros, and a provision of 30 million euros for current taxes.

The **balance sheet** of Olivetti S.p.A. at 31 December 2001 is laid out below:

(in millions of euros)	31.12.2001	31.12.2000	Changes
Short-term assets			
Financial resources	314	1,000	(686)
Operating assets	761	2,041	(1,280)
Total short-term assets	**1,075**	**3,041**	**(1,966)**

Other liabilities	349	828	(479)
Total medium/long-term liabilities	**11,137**	**17,978**	**(6,841)**
TOTAL LIABILITIES	**18,060**	**20,201**	**(2,141)**
SHAREHOLDERS' EQUITY	**15,235**	**13,937**	**1,298**
TOTAL LIABILITIES AND SHAREHOLDERS' EQUITY	**33,295**	**34,138**	**(843)**

Short-term assets at 31 December 2001 totalled 1,075 million euros, a decrease of 1,966 million euros compared to 3,041 million euros at 31 December 2000. The decrease arose from a reduction of 1,280 million euros in operating assets, of which 1,341 million euros related to dividends receivable from Telecom Italia and relative tax credits, which are recorded on accrual.

Medium/long-term assets at 31 December 2001 amounted to 32,220 million euros (31,097 million euros at 31 December 2000) and included 31,409 million euros for equity investments and 811 million euros for other assets.
The 528 million euros increase in Equity investments compared to 31 December 2000 included 391 million euros paid to Olivetti International S.A. to form a statutory reserve and 192 million euros for the reclassification of 159.6 million Seat Pagine Gialle shares (arising from the partial split of Telecom Italia S.p.A.) under financial fixed assets. Until 30 June 2001, these shares were treated as current assets to classified be disposed of (a condition that subsequently lapsed), and were therefore classified under current assets. They had been written down from 1.88 euros per share (carrying value at 31.12.2000) to 1.203 euros per share, to reflect the average stock market value for June.

Short-term liabilities amounted to 6,923 million euros compared to 2,223 million euros at 31 December 2000, an increase of 4,700 million euros, largely as a result of higher debt.

Medium/long-term liabilities, consisting mainly of debt, amounted to 11,137 million euros at 31 December 2001, a reduction of 6,841 million euros from 17,978 million euros at 31 December 2000.

The table set out below analyses **capital invested** at 31 December 2001 and related financing:

(in millions of euros)	31.12.2001	%	31.12.2000	%	Changes
Short-term operating assets	761	2.4	2,041	6.2	(1,280)
Short-term operating liabilities	(580)	(1.8)	(382)	(1.1)	(198)
Operating working capital	181	0.6	1,659	5.1	(1,478)
Long-term assets	31,725	99.4	31,097	94.9	628
Capital invested (A)	**31,906**	**100.0**	**32,756**	**100.0**	**(850)**
Medium/long-term non financial liabilities	349	1.1	828	2.6	(479)
Shareholders' equity	15,235	47.7	13,937	42.5	1,298
Total non financial sources (B)	**15,584**	**48.8**	**14,765**	**45.1**	**819**
Net financial indebtedness (A–B)	**16,322**	**51.2**	**17,991**	**54.9**	**(1,669)**

Capital invested was financed by debt for 51.2% (54.9% at the end of 2000) and by shareholders' equity for 47.7% (42.5% at the end of 2000).
Specifically, shareholders' equity rose by 1,298 million euros during 2001 as a result of:
- 2,424 million euros from capital increases (net of 15 million euros from free issues effected through the use of reserves following the re-denomination of share capital in euros), including 2,397 million euros from the rights issues of March and November 2001 and 27 million euros from the conversion of bonds and exercise of warrants and options;
- a decrease of 871 million euros for the loss for 2001;
- a decrease of 255 million euros for the dividend payout in respect of 2000 income.

At 31 December 2001 the Parent Company had **net financial indebtedness** of 16,322 million euros (17,991 million euros at 31 December 2000), as follows:

(in millions of euros)	31.12.2001	31.12.2000	Changes
Short-term debt			
Current portion of medium/long-term debt to banks	90	830	(740)

Total medium/long-term debt	**10,788**	**17,150**	**(6,362)**
Medium/long-term accruals and prepayments	(495)	-	(495)
Total medium/long-term net financial indebtedness (B)	**10,293**	**17,150**	**(6,857)**
Total net financial indebtedness (A+B)	**16,322**	**17,991**	**(1,669)**

The short-term net financial position worsened by 5,188 million euros.
Short-term debt increased by 4,502 million euros, of which:

- 5,871 million euros for amounts due to overseas subsidiaries;
- 242 million euros for bond loan repayments;
- 1,127 million euros for settlement of amounts due to banks and other parties.

The medium/long-term net financial position improved by 6,857 million euros.
Amounts due to subsidiaries decreased by 10,203 million euros; this included a reduction in amounts due to the subsidiaries Olivetti Finance N.V. (8,798 million euros) and Olivetti Holding B.V. (1,405 million euros). Amounts due to bondholders increased by 4,569 million euros.
Medium/long-term accrued interest expenses decreased by 670 million euros and reflected charges on the above mentioned borrowings from Olivetti Finance N.V. (550 million euros) and Olivetti Holding B.V. (120 million euros).

6 80

The net financial surplus for the year totalled 1,669 million euros. Net of the requirement of 55 million euros in respect of ordinary operations (mainly financial charges, net of dividends collected), the financial surplus reflected the following non-recurring operations for an amount totalling 1,724 million euros:

(in millions of euros)	Year 2001
Share capital increases	(2,424)
Tax credits assignments	(193)
Costs for share capital increases	42
Costs for Tecnost S.p.A. merger	14
Costs for bond issues and borrowings	148
Cash disbursements for acquisitions, loss coverages,replenishments and other	430
Dividend payments	255
Other disbursements, net	4
Total net financial requirement (surplus) for the year from extraordinary operations	**(1,724)**

Dealings with related parties

Olivetti S.p.A.'s financial and commercial dealings with subsidiaries are conducted at normal market conditions and consist mainly of the provision of services, centralised treasury operations and, pursuant to its role as a holding company, coordination of the activities of the subsidiaries.

(in millions of euros)	Subsidiary companies	Associated companies
Dividend income (excluding tax credit)	47	5
Other financial income	4	-
Financial charges	814	-
Other revenues	13	-
Purchase of goods and services	9	-
Trade and other receivables	56	-
Financial receivables	80	-
Trade and other payables	22	-
Financial payables	10,000	-

Employee stock options

During 1999, a "Three-Year 1999-2001 Stock Option Plan" for the benefit of approximately one hundred managers of Olivetti S.p.A. and its subsidiaries was approved as a tool to provide incentives and boost management loyalty. Authorised by a Directors' resolution of 9 June 1999 and supplemented with a subsequent resolution of 29 November 1999, the plan provided for a maximum of 48 million warrants, non-transferable inter vivos, to be assigned free of charge to the beneficiaries. Each warrant gave an option on an Olivetti ordinary share at an overall price (par value plus share premium) of 2,320 Italian lire (equivalent to 1.198 euros), for a maximum share capital increase of 48 billion Italian lire. This increase,

resolved by the above-mentioned Board meetings in execution of the proxy pursuant to art. 2443 of the Italian Civil Code (granted by the Extraordinary Shareholders' Meeting of 7 April 1999), complied with the limits set by art. 134, par 2, of Legislative Decree 58/1998.
The warrants assigned could be exercised at pre-specified times during the three-year period and could be accumulated until the end of the plan. The first two tranches were exercised in December 1999 and January 2001 respectively, while the third was exercised by 31 January 2002.

	No.of rights (warrants)	Exercise price (euros)	Market price (euros)
Rights exercised on 15 December 1999	21,083,333	1.198	2.499 (2)
Rights to be exercised as of 31 December 1999	24,666,667 (1)	1.198	2.499 (2)
Rights to be exercised as of 31 December 2000	23,871,667 (1)	1.198	3.073 (2)
Rights to be exercised as of 31 December 2001	5,654,982 (1)	1.000 (3)	1.407 (2)

(1) With reference to assignments as of the date in question, net of cancellation of rights pertaining to personnel gone out of the Olivetti Group.
(2) Average share price in December 1999, 2000 and 2001.
(3) The price reflects the effects of the share capital increases of 2001.
In respect of the third tranche of warrants exercised from 1 January to 31 January 2002, no. 5,654,982 shares were issued.

On 24 February 2000, the Board of Directors approved a Three-Year Stock Option Plan from 1 January 2002 to 31 December 2004, assigning 29,500,000 warrants free of charge to approximately one hundred managers of the Parent Company and its subsidiaries. The warrants entitled the beneficiaries, to subscribe an equal number of Olivetti ordinary shares at a price of 3.308 euros per share (after adjustment for the share capital increases of 2001), corresponding to the normal value of Olivetti ordinary shares at the date of the Board meeting.
The warrants were to be exercised in three tranches between 1 November and 15 December of 2002, 2003 and 2004, and could be accumulated until the end of the plan.
The relevant Directors' resolution, like that described above, executed the proxy pursuant to art. 2443 of the Italian Civil Code granted by the Extraordinary Shareholders' Meeting of 7 April 1999.
The Parent Company did not implement any operations that could encourage subscription of shares by its employees, pursuant to art. 2358 of the Italian Civil Code.
Subsequently, on 9 February 2001, after reversing the resolution of 24 February 2000 as untimely and no longer appropriate for the purpose for which it had been intended, the Board of Directors approved a share capital increase for a total of 29 million euros through the issue of 29 million shares at a price of 2.515 euros per share (after adjustment for the share capital increases of 2001). The capital increase services a stock option plan for managers of the Parent Company and its subsidiaries for the three years 2002-2004; with regard to stock options already assigned to managers on the payroll as of 24 February 2000 who had since left the Group, the original terms and conditions apply.
The Parent Company has not implemented any operations that could encourage subscription of shares by its employees, pursuant to art. 2358 of the Italian Civil Code.

Shares in Olivetti S.p.A. and its subsidiaries held by Directors, Statutory Auditors and Chief Operating Officer (Consob regulation no. 11971/1999 and subsequent amendments)

In compliance with CONSOB regulation 11971/1999 and subsequent amendments, shares issued by Olivetti S.p.A. and its subsidiaries and owned by Parent Company Directors, Statutory Auditors and Chief Operating Officer are detailed below.

	Investee company	Shares held at 31.12.2000 (*)	Type of shares	Type of ownership	Number of shares purchased	Number of shares sold	Shares held at 31.12.2001 (**)

(*) Or at date of appointment

(**) Or at date of resignation

(a) Including shares subscribed following share capital increase

(b) Acquisition on 27 December 2000 (following the contribution to Seat P.G. of an indirectly owned investment in Databank S.p.A.) not reported by the party concerned for the preparation of the Financial Statements as of 31 December 2000.

(c) Including shares subscribed through exercise of stock options

(d) Including shares owned by C+G S.p.A.

(e) Operations carried out by separate company-managed asset portfolio

Other information

Olivetti S.p.A. treasury stock at 31 December 2001 comprised 2,697,500 ordinary shares with a par value of 1 euro per share, arising from the conversion of an equal number of savings shares following approval by the Extraordinary Shareholders' Meeting of 4 July 2000 of the compulsory conversion of preferred and savings shares into ordinary shares. The shares, which are stated in the accounts at a unit carrying value of 0.852 euros, also arise from shareholder-approved purchases of stock from employees of the Parent Company and its subsidiaries as a result of fulfilment of the conditions provided under the relative share offer regulations requiring that the shares be sold back to the Parent Company.
The Shareholders' Meeting of 4 October 2000 authorised the Board of Directors, pursuant to art. 2357 ter, par 1, to dispose of all the above-mentioned treasury shares by 31 December 2002 through the distribution, in one or more operations, of non-compulsory options to former employees of the Parent Company and its subsidiaries, who continue to provide services for the Group.

Annual Report on the Company's System of Corporate Governance

The *corporate governance* structure implemented some time ago by the Company, taking the Code of Conduct of Italian Stock Exchange (Borsa Italiana) as the point of reference, is also the outcome of recent adjustments following the change in management which occurred during the shareholders' meeting of 13 October 2001, when the Board of Directors was renewed. This Report will therefore focus on the system of governance adopted from that date, referring the reader back to the contents of the relevant section of the 2000 Report on operations as regards the earlier part of 2001.

Composition and duties of the Board of Directors

The current Board of Directors was elected at the ordinary shareholders' meeting of 13 October 2001 to replace the previous Board, following the resignation of half of the Directors. The above meeting set the number of members of the Board at 16 and elected the following Directors for the three-year term 2001-2003:

Gilberto Benetton,
Enrico Bondi,
Carlo Buora,
Lorenzo Caprio,
Giorgio Cirla,
Pier Luigi Fabrizi,
Cesare Geronzi,
Gianni Mion,
Pietro Modiano,
Giampietro Nattino,
Alberto Pirelli,
Carlo Alessandro Puri Negri,
Antonio Tesone,
Dario Trevisan,
Marco Tronchetti Provera,
Alberto Varisco.

On 13 October 2001, the Board elected the officers and delegated powers, as summarised below:
Chairman (Antonio Tesone) - legal representation and signature on the Company's behalf (N.B. no management powers were granted to the Chairman);
Deputy Chairmen - Deputy Chairman Marco Tronchetti Provera was granted the same powers as the Chairman. Deputy Chairman Gilberto Benetton was granted the same powers as the Chairman and Deputy Chairman Mr. Tronchetti Provera, to be exercised in the absence of the Chairman or of the other Deputy Chairman;
In his capacity as Chief Executive Officer, Marco Tronchetti Provera may carry out all company business with the following restrictions: power to issue, with a single signature, personal guarantees up to 50 million euros for Group companies and up to 20 million euros for unrelated parties; power to invest, dispose

of and acquire interests in subsidiary and associated companies and to dispose of companies or businesses thereof in any manner, for amounts no greater than 250 million euros;
Chief Executive Officers (Enrico Bondi and Carlo Buora): management powers regarding ordinary company business.
The Board of Directors, in accordance with the bylaws, has the widest powers for the ordinary and extraordinary business management of the Company, since it is empowered to carry out any business which is not expressly the domain of the shareholders, whether by law or under the bylaws.
Even in the absence of a specific bylaw, but as accepted practice, the following are the exclusive domain of the Board:

- examination and approval of the industrial, financial and strategic planning of the Company, as well as the corporate structure of its Group;
- granting and withdrawal of powers to the Chief Executive Officers and the definition of any limits and operating procedures;
- determining, after examining the proposals of the specific Committee and the opinion of the Board of Statutory Auditors, the remuneration of the Chief Executive Officers and those directors with specific mandates;
- supervising operations in general, with a particular focus on any situations involving conflicts of interest, taking into account the information received from the Chief Executive Officers and the Internal Control Committee, within the ambit of its role, as well as regularly comparing the results achieved with those forecast;
- examination and approval of any transactions of financial significance, particularly with related parties;
- verifying the suitability of the general administrative and organisational structure of the Company and of the Group as set up by the Chief Executive Officers;
- report to the shareholders at the General Meetings.

In accordance with point 2.1 of the Code of Conduct, the Deputy Chairman and Chief Executive Officer Mr. Tronchetti Provera and the two Chief Executive Officers, Mr. Bondi and Mr. Buora, are deemed to be executive directors, in that they have operational/managerial powers further to the granting of the above mentioned powers.
Point 3 of the Code of Conduct establishes that "independent directors" are those who:
a) do not carry out business which would affect their independence of judgement with regards the Company, its subsidiaries, its executive directors, nor the shareholder or group of shareholders who control the Company;
b) do not own, directly or indirectly, equity interests of a size to enable them to exercise control over the Company, nor are they party to private shareholder agreements regarding the control of the Company.
In the light of this definition, 6 of the remaining 13 directors (the Chairman Antonio Tesone and the Directors Lorenzo Caprio, Giorgio Cirla, PierLuigi Fabrizi, Cesare Geronzi and Dario Trevisan) qualify as "independent".
The Chairman, as part of the functions attributed to him by the bylaws, supervises the activities of the Board, ensuring that the statutory and legal regulations in force are properly applied, using the powers granted to him by law and the articles of association, chairs and supervises the Company's General Meetings.

There were thirteen Board meetings in 2001; the overall attendance was more than 79% (79.46). The Board has also already met twice in 2002. The Company has approved the calendar of corporate events for 2002, which has been made known to the market, on the basis of which at least four Board meetings are envisaged.
In applying Article 19 of the bylaws, those Directors with powers granted pursuant Article 2381 of the Italian Civil Code report at least quarterly to the Board of Directors and the Board of Statutory Auditors (also pursuant to Article 150 of Legislative Decree no. 58/1998) on their activities, on extraordinary transactions as well as those where there could be a potential conflict of interest. This requirement has so far been punctually satisfied.

Appointment and remuneration of the Directors

The list vote mechanism is not envisaged when electing Directors.
The Board of Directors did not deem necessary to establish an internal committee to propose directors for election.
At the aforementioned General Meeting held on 13 October 2001, all shareholders, upon entering the hall, were provided with a printed document containing the names of the proposed candidates and a detailed curriculum vitae for each of them.
The same Meeting also voted to grant the Board of Directors overall annual emoluments of 826,331.04 euros, to be divided equally among the directors, which will be calculated before the net profit in the financial statements, to be paid from the date of the General Meeting up to be end of the term.
On 13 October 2001, the Board of Directors established the **Remuneration Committee** (expanding the duties of the already existing Emoluments Committee), providing that part of its duties is to formulate proposals to the Board for the remuneration of the Chief Executive Officers and those directors with specific mandates, as well as formulating proposals, at the request of the chief executive officers, for calculating the criteria for the remuneration of the top management of the Company, as well as preliminary examination of stock option proposals. As regards its composition, the Board voted that it comprise at least three directors, who elect the Chairman and, even if not one of them, a Secretary, with the members of the Board of Statutory Auditors as well as the Chief Executive Officers being entitled to attend the meetings. The Committee meets whenever the Chairman deems it appropriate or upon the request of another member or Chief Executive Officer.
The Board has also voted that notice of the meetings as well as the validity of the meetings and the decisions thereof shall be governed by the same regulations stated in the bylaws regarding Board meetings of the Company.
The Board elected to the Committee Lorenzo Caprio, Pietro Modiano and Antonio Tesone, all non-executive and independent Directors.
In the meeting held on 13 November 2001, the Committee elected the Chairman (Antonio Tesone) and the Secretary (Piera Rosiello). It also formulated proposals regarding the emoluments for those Directors with specific mandates, as per paragraph 2 of Article 2389 of the Italian Civil Code, expressing the opinion that, since the Company is a pure holding company (which therefore reflects the results of the operating subsidiaries), it was not appropriate to envisage a variable element in the emoluments, only a fixed one.

The Committee's proposals were approved by the Board of Directors (in the meeting held on 13 November) and therefore voted to grant those Directors with specific mandates the emoluments which are stated next to each name in the Report on operations.
No stock options are envisaged for those Directors in service.

Internal control system

The Board of Directors has set up, within its ambit, the "Internal Control Committee" (integrating and better qualifying the duties of the already existing Audit Committee), establishing that:
a) as regards its consultative and proposing role vis-à-vis the Board of Directors, it should in particular:
- evaluate the adequacy of the internal control system;
- evaluate the work schedule prepared by the internal control function officers and receive regular reports from them;
- evaluate the proposals of the external auditors for their audit services as well as the work schedule for the audit and the results stated in the report and in the Suggestions Report;
- report to the Board at least twice a year, when the annual accounts and the First Half-Year Report are approved, regarding the activities carried out and the adequacy of the internal control system;
- carry out any further duties which the Board of Directors may assign it, particularly regarding relations with the external auditors;
b) as regards its composition, that:
- it comprise non-executive directors, who shall elect a Chairman and, even if not one of them, a Secretary;
- the Board of Statutory Auditors, the Chief Executive Officers as well as, if invited, the Internal Audit Department manager and one or more Chief Operating Officers, may attend the meetings;
c) as regards its working, that:
- it meet at least twice a year, before the Board meetings for the approval of the annual accounts and the First Half-Year Report, or whenever the Chairman deems it appropriate or upon the request of another member or Chief Executive Officer;
- notice of the meetings as well as the validity of the meetings and the decisions thereof shall be governed by the same regulations stated in the bylaws regarding Board meetings of the Company.
From 1st January 2001 to date, five meetings have been held, of which three by the already existing *Audit Committee*.
The members of the Internal Control Committee are:
Mr. Antonio Tesone (Chairman), Prof. Lorenzo Caprio and Mr. Alberto Varisco.
The Internal Control Committee has identified the first steps to take so as to improve the overall internal control system, in order to strengthen the already existing structure which is characteristic of a holding company. It will in particular: elect a director to head the internal control system; ensure the hierarchical independence of the Internal Audit Dept; adopt operational procedures regarding the information flows from the main subsidiary companies.
As regards the most important equity investment, Telecom Italia S.p.A. already has a sophisticated internal control system, considering the objective complexity of its Group, which is not yet complete but is deemed to be adequate by both its Internal Control Committee as well as its Board of Directors.

649

In the light of such proposed measures, the Board, pending a more detailed examination to be carried out once they have been actually adopted, overall deems the Company's internal control system to be adequate, also on the basis of like opinion to be submitted to the appropriate Committee.

Management of confidential information

The management of confidential information, especially price sensitive information, is directly handled by the Chairman or by the Deputy Chairman and Chief Executive Officer.

Investor relations (in particular with institutional investors)

The Company has a specific set-up (investor.relations@olivetti.com) for shareholder and institutional investor relations.
The Board of Directors has not considered - and does not currently consider - it necessary to adopt rules for General Meetings, deeming that the powers attributed to the Chairman of the Board of Directors in this respect are more than sufficient for the normal business of General Meetings.

Statutory auditors

In accordance with Article 20 of the Company bylaws, the election (or integration following substitution or forfeiture) of the Board of Statutory Auditors occurs by means of a list vote. Those shareholders who alone or together own voting shares of at least 5% of the corresponding share capital may present one (and only one) list.
Each candidate may be in only one list, pain of ineligibility; candidates who are Statutory Auditors in another five listed companies (excluding Olivetti S.p.A.'s controlling or subsidiary companies), or do not have the necessary requirements of character and professional background, may not be listed.
The lists (together with, pain of inadmissibility, the acceptances of the individual candidates, the statements pertaining to the absence of reasons of ineligibility and incompatibility and the statements regarding the existence of the regulatory and bylaws requirements) must be presented at the Company's registered offices at least five days prior to the date of the first calling of the General Meeting.

Legal Proceedings

Olivetti S.p.A.

The legal proceedings involving the Company are described below:
1. Currently under preliminary examination by magistrates in Rome are the criminal charges brought by the Rome public prosecutors against ex-managers of Olivetti and of the Poste Italiane (Italian Post Office) regarding products and services provided by Olivetti to the Post Office in the early 1990s.
2. With regard to the dispute in the Rome courts between Olivetti and Poste Italiane S.p.A. for non-payment by Poste Italiane S.p.A. of products and/or technical assistance, sentences passed to date are in favour of Olivetti and have been appealed by Poste Italiane S.p.A..
3. In relation to the disposal of the personal computers business in April 1997, there are lawsuits against Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A. (which had merged Sy.F.A. S.p.A., which had in turn merged Olivetti Personal Computers S.p.A) brought before the Ivrea courts by:
a) Centenary Corporation and Centenary International, for damages (250 billion Italian lire claimed but lacking evidence) which the plaintiffs allege they suffered as a consequence of Olivetti Group's acquisition of the personal computers business (through the acquisition of the specific company business, which was demerged and contributed to OP Computers S.p.A., established for that purpose);
b) ex-employees of OP Computers S.p.A., to ascertain that the contracts relating to the aforementioned disposal of the personal computers business are null and void, to obtain reinstatement as employees of Olivetti, with payment of the salary differences and damages (calculated at 170 billion Italian lire and lacking evidence);
c) the receiver of OP Computers S.p.A. (in bankruptcy) to ascertain that the contract of sale of the personal computers business by Olivetti Personal Computers to OP Computers is either null and void, or to be annulled or revoked, claiming damages (again, lacking evidence and calculated at 158 billion Italian lire).
4. Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A., on their part, have taken legal action before the Milan courts against Piedmont International S.A. (a Centenary Group company) for the recovery of 100 billion Italian lire due by the latter or for a greater amount to be proven in court.
5. Also following the disposal of the personal computers business, in 1998, a group of OP Computers S.p.A. ex-employees filed a complaint against the former legal representatives of the company; the Public Prosecutor of Ivrea opened an investigation on the basis of alleged crimes and originally requested the charges to be dismissed; the investigating magistrate, however, decided to further investigate one charge alone. The investigations regarding the above transaction are still ongoing.
Olivetti and its external advisors believe that the transactions carried out regarding the disposal of the personal computers business were legal and proper, and therefore consider the above legal actions to be essentially groundless in fact and in law.

Telecom Italia Group

Disputes regarding shareholder resolutions

Still pending in first instance are the proceedings arising from the resolution whereby the Shareholders' Meeting of 14 January 2000 authorised the buy-back of savings shares by public tender and subsequent purchases in the market until 10 January 2001.
In particular, some shareholders are claiming 18.9 million euros of damages from Olivetti, Telecom Italia, as well as the Chairman and Deputy Chairman pro tem. The case is based upon the alleged non-fulfilment of the undertakings in the "Offer documents" relating to the Public Tender and Exchange Offer made by Olivetti and Tecnost on Telecom Italia in 1999, as well as the resolutions of the shareholders' meeting of 14 January 2000, with specific reference to the mandate to purchase own savings shares on the screen-based market and in compliance with the applicable regulations after the end of the public tender period.
Another shareholder has challenged the same resolution, claiming that a modified proposal compared to that which had been deposited before the meeting was submitted to the shareholders.
Concerning the expiry of the time limit for the offer to voluntarily convert savings shares into ordinary shares (hence the foreseen buy-back of the ordinary shares will not take place), the proceedings relating to the challenge to the resolutions of the shareholders' meeting on 3 May 2001, regarding the authorisation to establish a subsidiary company for the purpose of buying Telecom Italia's ordinary shares by public tender, as well as offering to convert the savings shares for consideration, were abandoned.

Seat/De Agostini arbitration

For alleged breaches of the frame agreement dated 20 September 2000, regarding the obligation of Seat to purchase the shares of Finanziaria Web S.p.A. still held by the De Agostini Group (40% of the capital, while the remaining 60% is already owned by Seat), De Agostini has deferred the dispute against Seat, Matrix, Buffetti Group and Finanziaria Web to a panel of arbitrators.
The plaintiff essentially claims that all the contractual conditions precedent had occurred in order to implement the agreement, while Seat argues that this is not true and that, in any case, the changed market conditions had made the consideration excessively onerous.
The De Agostini Group claims actual performance of the frame agreement and therefore that the Finanziaria Web shares be transferred to Seat for the originally agreed consideration of 700 million euros, with payment beginning from 30 June 2003, as well as damages, yet to be quantified.

Seat Pagine Gialle/Cecchi Gori Communications

Following the acquisition of Cecchi Gori Communications by Seat in accordance with the contract signed on 7 August 2000 with Fin.Ma.Vi. S.p.A. and Cecchi Gori Group Media Holding S.p.A. (Cecchi Gori Group), a complex dispute is ongoing.
In particular, in May 2001, the Cecchi Gori Group served a writ of summons on Cecchi Gori Communications and Seat, claiming that the resolutions passed at the Cecchi Gori Communications Shareholders' Meeting of 27 April 2001 be ascertained and declared non-valid, and meanwhile suspended (rejected).

In August 2001, the Cecchi Gori Group also filed a suit before the Milan Courts for the annulment of the contract governing the pledge of the shares of Cecchi Gori Communications owned by Cecchi Gori Group, guaranteeing the proper fulfilment of all the undertakings of the selling parties envisaged in the purchase agreement dated 7 August 2000.
On the basis of the arbitration clause in the same agreement, an arbitration procedure is also pending, started by the Cecchi Gori Group in order to ascertain the non-validity, ineffectiveness or the termination of the purchase agreement (essentially for the non-fulfilment of the suspensive condition relating to the necessary authorisations of the competent authorities within the agreed time limit) or to claim the fulfilment thereof and, in any case, to obtain damages.
The Arbitration Panel met in October 2001 and fixed 31 December 2002 as the time limit for the proceedings.

Dispute regarding Law no. 1369/1960

Two proceedings are pending in which INPS – on the basis of the joint and several liabilities envisaged in Law no. 1369/1960 – claims that Telecom Italia pay approximately 31 million euros overall for non-payment of contributions by the network sub-contractors Comitel and Telefon, which have in the meantime gone bankrupt.
In particular, the Comitel case is being appealed, while the Telefon verdict was successfully appealed by Telecom Italia, subject to INPS not taking the case to the Supreme Court.
A third proceeding, arising from Telecom Italia opposing an injunction brought by INPS for approximately 15 million euros, recently cancelled said injunction.
There are numerous disputes with former employees of sub-contractors either to be hired by Telecom Italia, or to have the telephony sector labour contract, for an overall amount of more than 35 million euros.
Moreover, given the current legal situation, Telecom Italia's chances of losing the cases are fairly remote.

Universal service

Omnitel and Infostrada appealed to the Regional Administrative Court of Lazio to obtain the annulment of the decision of the Telecommunications Authority regarding the division of the net costs of the universal service for 1999. On the basis of said decision, part of the universal service's net costs, recognised as an "unfair cost" for Telecom Italia (which must by law provide such service), was divided between the plaintiffs and TIM.
Pending judgement, the plaintiffs have not paid their portions (fixed at approximately 9 million euros overall) to the specific fund set up at the Ministry of Communications, thereby preventing the latter from transferring the amount globally assessed in favour of Telecom Italia for the 1999 costs (27 million euros).
The Regional Administrative Court, in a sentence filed in January this year, accepted Omnitel's appeal only regarding its challenge concerning its rights of defence. The Regional Administrative Court rejected both Omnitel's challenges upon the merit and Telecom Italia's counter-appeal, concentrating on the exclusion of the "12 Service" from the universal service.

In February 2002, the appeals were served by Omnitel Pronto Italia and Wind Telecomunicazioni before the Regional Administrative Court of Lazio for the annulment, and in the meantime, the suspension, of the decision of the Telecommunications Authority regarding the division of the net costs of the universal service for 2000. Both appellants essentially challenged the unlawfulness of the decision on the basis of faults in the preliminary stage and for not having had access to the documentation of the technical survey ordered by the Authority to analyse the net costs.
Omnitel also requested a referral to the EU Court of Justice for an interpretation on the EU directives as well as, on a secondary level, misapplication of the Italian laws on the matter.

Data transmission services and Internet access using x-DSL technology

Following the opening of an investigation into Telecom Italia's practices regarding the supply of direct baseband circuits, the offer to its business customers of Internet access and broadband data transmission services based on x-DSL technology without a corresponding wholesale offer to competitors, the specifications of the terms offered to competitors for wholesale services with ADSL access, on 27 April 2001 the Antitrust Authority fined Telecom Italia 59 million euros. In November, the Regional Administrative Court of Lazio reduced the amount of the fine to 29 million euros, which was paid in January. There is still time to lodge an appeal with the Administrative Supreme Court.
Meanwhile, claims for damages totalling 351 million euros by Albacom, Infostrada, AIIP, Unidata, Data Service and other operators, for Telecom Italia's alleged abuse of a dominant position in offering Internet access and broadband data transmission services based on x-DSL technology without a corresponding wholesale offer to competitors, have been filed before the competent civil courts.

Galactica dispute

At the end of May 2001, a dispute arose between Telecom Italia and the Internet Service Provider Galactica S.p.A. (currently in liquidation) for the non-renewal of an agreement regarding an experimental internet access service, at the "flat" rate. In this respect - after the urgent appeals, lodged with the Civil Court and the Court of Appeal in Milan in accordance with Law no. 287/1990, had both been rejected - Galactica sued Telecom Italia to ascertain the alleged unlawfulness of the recession, claiming damages and an injunction against Telecom Italia interrupting the service.
In February 2002, Galactica served another writ of summons for damages relating to alleged anti-competitive practices of Telecom Italia.
It should also be pointed out that the conciliation proceedings before the Telecommunications Authority was unsuccessful.

12 Service

At the end of March, Telecom Italia appealed to the Regional Administrative Court of Lazio (with an attached claim for damages) for the annulment of the decision of the Telecommunications Authority, which, in letter dated 23 March 2001, had ordered that the service be restored at the original technical and financial terms - after having authorised the new "12 Service".
At the hearing held on 11 July 2001, a new decision of the Authority dated 4 July 2001 was deposited, which modified the conditions of the service offered as requested by Telecom Italia. The hearing has been postponed to a future date.

Alleged anti-competitive strategies of Telecom Italia detrimental to market development

Following the complaint of 27 competing operators regarding alleged strategies of Telecom Italia detrimental to market development, with decision no. 179/01/CONS, the Telecommunications Authority charged the Company with a series of breaches and, in July 2001, started the announced proceedings with specific resolutions.
Telecom Italia has challenged both the above decision and said resolutions.

Contribution as per Article 20, paragraph 2 of Law no. 448 of 23 December 1998

Before the Regional Administrative Court of Lazio, Telecom Italia, Tim, Wind and Omnitel challenged the Ministerial Decree of 21 March 2000, implementing Law no. 448 dated 23 December 1998, which, from 1 January 1999, introduced a new contribution to replace the concession fee, which progressively decreases to 2003.
The Regional Administrative Court requested the Treasury and Communications Administrations to deposit a detailed report clarifying the correspondence with the European Commission concerning the approval of the aforementioned decree.
Moreover, regarding the extraordinary appeals to the Head of State presented by Infostrada and Albacom for the annulment of the aforementioned decree, the Administrative Supreme Court raised the preliminary issue before the EU Court of Justice of whether the contribution was compatible with EU directives regarding telecommunications.
Following this dispute, Telecom Italia and Tim did not pay the amount due for the year 2000 (equal to 307 million euros and 179 million euros, respectively).

Investigations by the Public Prosecutor in Turin

In February 2001, the Public Prosecutor in Turin began investigating the transaction whereby Telecom Italia purchased 29% of the share capital of Telekom Srbija. Telecom Italia promptly provided the judges with all available documents and data relating to the aforementioned transaction.
Regarding the verifications made, with the full co-operation of the relevant company offices, in carrying out its task relating to the 2000 financial statements, the independent auditors, PriceWaterhouseCoopers, and the Board of Statutory Auditors stated that, to date, no facts have emerged which may prejudice the correctness of the statutory and consolidated financial statements of Telecom Italia at 31 December 1997, 1998 e 1999, also with regard to the year ended 31 December 2000.

* * *

In early July, the Company was served with a request to hand over documentation essentially relating to the acquisition of Seat and the Tin.it-Seat merger.
The Company co-operated fully with the investigating authorities and made a wide range of documents available.

695

Sogei concession

In 1992, the Ministry of Finance (now Ministry for the Economy) granted Sogei (a subsidiary of Finsiel) the concession for managing the tax IT systems until May 2001. In relation to the provisions of Article 14 of Decree no. 333/1992 converted into Law no. 359/1992, Sogei asserts that the concession must now be deemed extended until May 2012.
However, according to the Ministry for the Economy, the concession has expired without extension; therefore, the Ministry has named an Advisor for the tender regarding the management of its IT services.
Sogei has challenged the tender and has also initiated arbitration procedures so as to ascertain its right to the extension of the concession. The Ministry contested the powers of the arbitration panel by not appointing the member it is entitled to and who was subsequently appointed by the President of the Court. A first meeting of the Arbitration Panel and the appointment of its Chairman are still pending.
In May 2001, meanwhile, the Ministry and Sogei, without prejudice to their rights, agreed a "technical extension" of the original concession until May 2003.
An arbitration procedure is also underway to ascertain that Sogei's right (established in the agreement) to avail itself of Finsiel Group companies, without the latter being considered third parties, is not precluded by EU regulations and by the Italian laws acknowledging said regulations.

Finsiel concession

On 24 July 1991, the Ministry of Health awarded Italsiel (which was merged into and with Finsiel as of 1 July 1994) the concession for the implementation and running of the health sector IT system until 31 July 2000.
In relation to the provisions of Article 14 of Decree no. 333/1992 converted into Law no. 359/1992, Finsiel asserts that the concession must now be deemed extended by law. According to the Ministry of Health, however, the concession has expired without extension.
Moreover, on 28 July 2000, at the request of the Ministry – without prejudice to the rights and positions of the parties – Finsiel and the Ministry of Health signed a private negotiation for the completion of the development and running of the health system until 31 July 2001. On 1 August 2001, therefore, a further contract, valid until 31 July 2002, was signed.
Meanwhile, the Ministry has made public two tenders relating, on the one hand, to the "design and development of the "New Health IT System" (N.S.I.S.) and of the national health IT assets' security system" and on the other, to the "awarding of the services of Nationwide Functional and Technical Management of the National Health IT System", which Finsiel has challenged before the Regional Administrative Court of Lazio, while participating in the tenders.
Finsiel has also initiated arbitration procedures so as to ascertain that the concession be considered extended by law. The Ministry of Health has however denied that the arbitration panel has the necessary powers, as per the general conditions for supplies and services rendered by the Provveditorato Generale dello Stato, approved by Ministerial Decree no. 16 dated 28 October 1985.

Nortel Inversora disputes

In April 2001, Nortel was served with a notice to appear before the commercial court of Buenos Aires for a compulsory conciliation attempt relating to the challenge of some resolutions adopted by the

696

Shareholders' Meeting on 19 January 2001, regarding, among other things, approval of the financial statements at 30 September 2000. The conciliation meeting was unsuccessful. Therefore, the plaintiff served a writ of summons, thus starting the merit phase of the dispute.
In August, a further writ of summons was served, similar to the previous one, for a compulsory conciliation attempt relating to the challenge of some resolutions adopted by the Nortel Shareholders' Meeting on 26 April 2001, regarding, among other things, approval of the financial statements at 31 December 2000. No agreement was reached at the conciliation meeting. The counterparty has not yet started a proceeding concerning the merit phase of the dispute.
Meanwhile, the effectiveness of the challenged decisions of the shareholders' meetings was suspended and an appeal, filed by Nortel, is pending against this precautionary measure.

Brasil Telecom dispute

In April 2001, Brasil Telecom filed a lawsuit against Telecom Italia and Stet International Netherlands (SIN), also including the two directors of Brasil Telecom appointed by Telecom Italia.
The lawsuit aims to obtain damages which Brasil Telecom allegedly suffered following the purchase of shares in CRT (Companhia Riograndense de Telefonia) and the non-participation in the SMP (Serviçio Móvel Pessoal) tender; the judge has been requested to quantify the damages.
To date, the preliminary claims of the parties are being considered.

Entel Chile dispute

Americatel Corporation (in which Entel Chile directly holds an 80% equity investment) appears to be owed receivables of approximately 30 million US Dollars by OAN, the concessionaire of the invoicing and cash collection services regarding Americatel customers. OAN has filed for bankruptcy procedure, within the framework of which it has been authorised to assign to third parties receivables due to Americatel. The latter has therefore initiated litigation in order to avoid confusing its receivables with the assets of OAN, challenging in particular the lawfulness of the aforementioned assignment of receivables.

WTC dispute

In March 1999, Telecom Italia claimed before the Miami courts payment by the local operator Wholesale Telecom Corporation ("WTC") of unpaid invoices amounting to approximately 13 million US Dollars for the supply of international traffic capacity.
WTC appeared before the court and filed a counterclaim, also involving in the dispute Telemedia International USA Inc., claiming from both TMI USA as well as its parent company Telecom Italia damages of 60 million Dollars. To date, the pre-trial procedures are almost complete.
In 2001, Telecom Italia allocated 6 million euros to a specific provision for risks.

Chase Manhattan Bank dispute

In June 2000, Chase Manhattan initiated a civil action in the USA against the shareholders of Iridium LLC, following the non-repayment of an 800 million US Dollar loan granted by Chase in favour of Iridium Operating LLC (controlled by Iridium LLC). In particular, Chase claimed specific performance of an alleged

697

undertaking of the shareholders to guarantee the repayment of the loan by means of increasing the share capital of Iridium LLC; in this regard, the claim against Telecom Italia amounts to approximately 7.5 million Dollars, which has already been provided for in the financial statements of the subsidiary company Iridium Italia at 31 December 2000. Moreover, Chase was authorised to change the heading of its claim into "fraud" and consequently claimed acknowledgement of the joint and several responsibility of all the shareholders of Iridium LLC for the entire amount of the loan.
Telecom Italia appeared before the court in February 2001, objecting to being named in the suit (having sold its equity investment in Iridium LLC to Iridium Italia S.p.A. in October 1996, in which Telecom Italia owned 30%, Tim 35% and Telespazio 35%). To date, the pre-trial procedures, in which Telecom Italia filed a motion to be excluded from the law suit, are under completion.

Stet Hellas dispute

In December 1996, Mobitel, a company belonging to the Greek Interamerican Group (now Demco Reinsurance), a minority shareholder of Stet Hellas and, at the time, its exclusive agent, initiated arbitration procedures, principally claiming its right to receive fees not only on outgoing traffic generated by the subscribers it introduced, but also on incoming traffic and on that of late-paying customers. Overall damages claimed amount to approximately 38 million Dollars.
Mobitel and Interamerican have also claimed damages of 172 million Dollars following the termination of the exclusive agreement, which was served by Stet Hellas.
The latter and Telecom Italia, which replaced Stet International (already guarantor of the first and, as such, party to the agreements signed at the time), filed a counterclaim for approximately 210 million Dollars, essentially as damages for the non-acquisition of market share, attributable to Mobitel's breach of contract.
In October 2000, an in principle award was made in favour of Mobitel regarding payment of a fee also on the revenues deriving from incoming traffic; in November 2001, the Arbitration Panel rejected the objection regarding lack of jurisdiction raised by Telecom Italia/Stet Hellas, who maintained that only the Greek courts had the necessary powers regarding the amount, since the Arbitration Panel only has the powers regarding the existence of the payable, which it had already acknowledged.

Dispute with INPS

In compliance with Law no. 58/1992, Telecom Italia is required to provide full insurance coverage for all persons employed as at 20 February 1992 by STET S.p.A., SIP S.p.A., Italcable S.p.A. and Telespazio S.p.A., as well as persons transferred from the Public Administration to IRITEL, including periods previously worked in other companies, through the "Fondo Previdenza Telefonici" (Telephone Sector Employees Pension Fund), which merged into the "Assicurazione generale obbligatoria" (Compulsory General Insurance) on 1 January 2000. The contributions due are calculated by INPS and must be paid in 15 annual instalments.
The amount of the liability regarding the payments due is uncertain, in that Telecom Italia and INPS disagree on the method of calculating such amounts.
However, 656 million euros of outstanding amounts due to INPS relating to ex-IRITEL employees are included in the Telecom Italia Group financial statements at 31 December 2001.

Concerning the application and interpretation of the regulation, there is an ongoing dispute with INPS regarding both the starting date for the calculation of interest due, as per the aforementioned Law no. 58/1992, for the deferred payment of the amount, as well as the exclusion from the provisions of Law 58/1992 of all those employees (except for ex-IRITEL personnel) who had already requested full insurance coverage prior to 20 February 1992.
The positions are currently the subject of discussions before the courts between the parties and Telecom Italia has undertaken to pay under reserve the amounts claimed by INPS under its calculations, subject to adjustment in the event that the courts should finally agree with the Company's position.
In consideration thereof, the principal amount payable (excluding, as stated above, the portion relating to ex-employees of IRITEL) estimated by Telecom Italia could vary, depending on the opposing interpretations and on evaluations which take account of all the employees involved, between 960 million euros and 1,284 billion euros approximately, of which 334 million euros has already been paid.
In compliance with the accepted accounting principles, a provision for an amount in line with the minimum estimated liability has been stated in the consolidated financial statements of the Olivetti Group at 31 December 2001, as a component of the goodwill calculated following the acquisition of Telecom Italia.
Following an agreement between INPS and Telecom Italia, backdated interest (including that relating to ex-IRITEL employees) has been paid - under reserve - by the latter in fifteen equal annual deferred instalments, inclusive of interest at 5% per annum, up to the end of 1999, for a total amount of 112 million euros. Following sentence no. 4242 of 5 April 2000 of the Supreme Court in favour of Telecom Italia, payment of backdated interest and the deferred interest relating thereto has been suspended from June 2000 (for an outstanding amount of 407 million euros).

648

Events Subsequent to the End of the Financial Year

Telecom Italia Group

• *2002 – 2022 bond loan reserved at subscription to staff of the Telecom Italia Group*
On 1 January 2002, following the resolution of the Board of Directors on 27 July 2001, the offer opened for the "Telecom Italia 2002 – 2022 floating rate, special open series, reserved at subscription to current and retired staff of the Telecom Italia Group" bond loan, maturing 1 January 2022, for a maximum amount of 1 billion euros. On the same date, early redemption was made of the "SIP 1992 – 2010" bond loan, which was similar to the new loan.
The new bonds, which pay a semi-annual gross coupon (payable in arrears on 1 January and 1 July each year) may be subscribed during the term of the loan, until the maximum amount offered is drawn. They also include a put option for the borrower vis-à-vis Telecom Italia which may be exercised at any time at par value; there is also the option for the Company to make early redemption at par, exercisable at any interest payment date with at least three months' notice.
On 22 March, bonds worth 160 million euros had been subscribed and there were 10,029 bondholders.

• *Bond issue*
In February, a 2.5 billion euros bond issue was completed, divided into two fixed rate tranches of 1.25 billion euros each, maturing on 1 February 2007 and 1 February 2012. This issue falls under the "Global note program" for the restructuring of Group debt; the overall amount of the program was raised from 10 to 12 billion dollars following a resolution of the Board of Directors held on 18 December 2001.

• *Closure of the revised agreements for the put/call options on Seat Pagine Gialle S.p.A. shares*
On 25 February, Telecom Italia and the JPMorgan Chase Group signed the final agreements relating to the re-negotiation of the put and call options on Seat Pagine Gialle shares.

• *Approval of the interconnection tariffs for 2001 by AGCOM*
On 4 March, the Authority approved Telecom Italia's interconnection tariffs for 2001, with some technical and financial modifications. Among the most significant changes, the income effects of which are included in the 2001 financial statements, we point out the reduction in the costs for voice interconnection services and in the costs of configuring exchanges; as regards local loop unbundling, the Authority maintained the 2000 prices, extending the services offered by Telecom Italia to the interconnected operators.

• *Voice over Internet protocol*
In February, Telecom Italia started to upgrade the first facilities to enable voice and data transmission over the Internet protocol (IP). The conversion of the network to the IP protocol, which will lead to cost reductions arising from the management of a single infrastructure, will be operational from June (for telephone traffic along the Milan-Rome axis); by the year end, 10% of domestic telephone calls which travel over the transport network are expected to pass over to the Internet protocol.

• *Planned disposals*
– Lottomatica: in January 2002, Finsiel S.p.A. accepted the public tender offer made by Tyche S.p.A. (De Agostini Group) for 100% of the Lottomatica shares and tendered its equity investment in Lottomatica S.p.A. amounting to 18.3% of the subscribed share capital of the company;

- BDT: in February 2002, Telecom Italia Group reached an agreement for the sale of the 19.61% equity investment held by TIM International in BDT (Bouygues Décaux Télécom), which controls 55% of Bouygues Télécom. The value of the transaction was approximately 750 million euros.
- Stream: an agreement has been reached with News Corporation and Vivendi Universal/Canal+ for the disposal of Telecom Italia's 50% in Stream at a price of US$ 42 million. The agreement, which is conditional upon the approval of the relevant Italian authorities, envisages the simultaneous sale of Telecom Italia's 50% to News Corporation and the purchase of 100% of Stream's capital by the French group Vivendi Universal. As part of the sale, Telecom Italia is committed to waive approximately US$ 80 million of trade receivables due from Stream. The financial effects of the transaction have already been taken into account in extraordinary provisions.

• *Purchase of Telecom Italia own shares*
Pursuant to the authorisation of the ordinary Shareholders' Meeting held on 7 November 2001, in March the Company began to purchase own shares on the market in accordance with the terms and conditions envisaged in the regulations of such authorisation. As at 21 March 2002, 2,225,000 Telecom Italia savings shares had been bought overall at an average price of around 6.06 euros per share, for a total investment of some 13.5 million euros.

Other companies of the Olivetti Group

• In January 2002, Olivetti took up the public tender offer for Lottomatica made by Tyche S.p.A. (De Agostini Group) on 23 November 2001 regarding 100% of the shares at a price of 6.55 euros per share, after an improved bid.
Olivetti tendered its equity investment in Lottomatica, equal to 27,451,550 shares overall, corresponding to 15.6% of the subscribed capital of the company (of which 14.04% directly owned by Olivetti S.p.A. and 1.56% owned by the subsidiary Olivetti International S.A.).
When also considering Finsiel S.p.A.'s 18.3% equity investment, the overall cash inflow for the Olivetti Telecom Italia Group was 391 million euros, with an aggregate capital gain stated in the companies' statutory accounts of 367 million euros.

• In January 2002, Olivetti sold to Antex Group, which provides corporate administration, consultancy and staff training services, full ownership in Olivetti Servizi Amministrativi S.r.l. (75 employees), which is responsible for the administration and management of the Securities service for Olivetti.

• On 29 January 2002, Olivetti International Finance N.V. re-opened the bond maturing July 2009 for 250 million euros via a private placement with a limited number of institutional investors, bringing the total bonds in circulation to 2,350 million euros.

• On 14 March 2002, Olivetti Finance N.V. issued a 500 million euros floating rate bond, guaranteed by Olivetti S.p.A.. The bond pays a quarterly coupon indexed to 3-month Euribor + 130 basis points. The term is 3 years, which may be extended at the bondholders' option for subsequent 21-month periods up to a maximum overall term of 10 years.

700

Operating Outlook for 2002

Olivetti S.p.A. expects to post a full-year net income for financial 2002 as a result both of the collection from Telecom Italia of extraordinary dividends arising from the distribution of reserves announced by Telecom Italia, and of dividends stated on accrual in respect of 2002 earnings
Based on the foreseeable performance of the Telecom Italia Group, the Olivetti Group's consolidated result should be positive before taxes and amortisation of goodwill on the acquisition of Telecom Italia.

Proposal for the Coverage of the Parent Company loss for 2001

The 2001 financial statements of the Parent Company Olivetti S.p.A. show a net loss of 871,479,486 euros and shareholders' equity at 31 December 2001 of 15,235,055,159 euros made up as follows:

(in euros)		31.12.2001
I.	Share capital	8,783,701,564
I bis.	Share capital increase to be filed with the Companies Register	839,593
I ter.	Share capital increase payment relating to shares to be issued	26,954
II.	Additional paid-in capital	3,765,113,918
II bis.	Additional paid-in capital in respect of capital increases to be filed with the Companies Register and on shares to be issued	10,442
III.	Revaluation reserve	1,128,827
IV.	Legal reserve	920,809,760
V.	Reserve for treasury stock	2,298,156
VII.	Other reserves	2,061,056,125
VIII.	Retained earnings and accumulated losses	571,549,306
	Total Share Capital and Reserves	16,106,534,645
IX.	Net loss for the year	(871,479,486)
Total		**15,235,055,159**

The Board of Directors proposes that the net loss for 2001 be carried forward.

The Board of Directors

Explanatory Notes

Form and content of the financial statements

The financial statements for the year closed at 31 December 2001 have been prepared and presented in accordance with the Italian Civil Code interpreted by the accounting principles established by the Italian Accounting Profession ("Consigli Nazionali dei Dottori Commercialisti e dei Ragionieri"). They comprise the balance sheet (prepared in accordance with the formats specified in articles 2424 and 2424 bis of the Italian Civil Code), the income statement (prepared in accordance with the formats specified in articles 2425 and 2425 bis of the Italian Civil Code) and these explanatory notes.
The explanatory notes are provided to illustrate, analyse and supplement the data reported in the financial statements with the information required by article 2427 of the Italian Civil Code, by other provisions of Legislative Decree no. 127/1991, or by other laws; they also provide additional information, even where not required by specific legislation, if deemed necessary to present a true and fair view.
The explanatory notes also include information relating to holding companies requested by the Italian Securities and Stock Exchange Board (CONSOB) in communication no. 94001437 of 23 February 1994.

Accounting policies in the valuation of financial statement items, in value adjustments and conversion of values not originally denominated in euros

The most significant accounting policies adopted for the financial statements for the year to 31 December 2001, in compliance with article 2426 of the Italian Civil Code, are as follows:

1) Intangible fixed assets

Intangible fixed assets are stated at purchase or production cost including related accessory charges, and are amortised over their residual useful life.
Start-up and expansion costs and purchased goodwill are amortised over five and ten years respectively. As from 1999 registration duty relating to share capital increases is no longer capitalised under intangible fixed assets but charged to the Income Statement under other operational expenses. Intangible fixed assets are written down to reflect any other than temporary impairment in value; their book value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

2) Tangible fixed assets and depreciation

Tangible fixed assets are stated at purchase or construction cost, including financial charges incurred over the period of construction of the asset, if this period is of significant duration, up to the time the asset enters service. Assets are written down to reflect any other than temporary impairment in value; the original value is reinstated in subsequent periods if the reasons for such writedowns no longer exist.
Ordinary depreciation is provided on a straight-line basis using rates that reflect the residual useful working life of the assets concerned.

The Company also provides accelerated depreciation for some categories of assets in order to obtain the benefits deriving from deferred taxation, as allowed by current tax legislation.
Ordinary maintenance costs are charged in full to income; costs incurred that extend the useful working life of assets are capitalised as part of the said assets and depreciated over the remaining useful working life thereof.

3) Equity investments and securities held as financial fixed assets

Equity investments held as fixed assets are stated at purchase cost (LIFO method with annual layers), written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such writedowns no longer apply.
Securities held as fixed assets are valued at purchase cost (LIFO method with annual layers), adjusted on an accrual basis for the difference between such cost and the redemption value, written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

4) Accounts receivable and payable

Accounts receivable are stated at estimated realisable value and classified under financial fixed assets or current assets. Accounts payable are stated at face value.

5) Equity investments and securities not held as financial fixed assets

Securities and equity investments in listed companies held as current assets are valued at the lower of cost and market value, the latter being determined on the basis of the average stock market price for the month of December; if the reasons for writedowns no longer apply, the original value is reinstated in subsequent years to the extent that it does not exceed the original cost.
Securities purchased through reverse repurchase agreements with an obligation of resale on maturity are classified as financial assets not held as fixed assets and stated at purchase cost.
Income and charges relating to such transactions are calculated taking into account both the difference between the spot and forward prices and the income generated by such assets over the duration of the operation and are recorded on an accrual basis.

6) Accruals, prepayments and deferrals

Costs and income common to two or more fiscal years are recorded under this heading to reflect the accrual accounting principle

7) Reserves for risks and charges

Specific reserves are provided to cover known or likely losses or liabilities of a given nature, the extent or timing of which are uncertain at the end of the year; the provisions reflect, therefore, the best estimate based on the information available.

212

8) Employee severance indemnities

This provision is formed in accordance with current legislation and labour contracts and reflects the liability accrued to all employees as at the balance-sheet date.

9) Revenues

Revenues from services are credited to the Income Statement at the time the services are provided.

10) Research and development

Interest-relief grants on financial charges accruing on research loans are accounted on an accrual basis and credited directly to income for the year against financial charges.

11) Exchange rate differences arising on transactions in foreign currency and translation criteria of foreign currency items

Receivables and payables denominated in non-EMU currencies are originally translated into euros by adopting the accounting rates at the date of the respective transactions. Exchange rate differences arising at the time of collection of receivables or settlement of payables in non-EMU currencies are credited or charged to income.
Gains or losses on payables and receivables arising from application of the exchange rates in force in December are credited or charged to income for the year.
Total exchange rate differences are illustrated in the specific comment on financial income and charges.

12) Forward currency transactions

As regards forward purchase or sale transactions of foreign currency at fixed exchange rates in respect of specific receivables and payables expressed in foreign currency, or, in respect of a net exposure in foreign currency, the difference between the exchange rate at the transaction date and the forward fixed exchange rate is charged to income for the duration of the said transaction; furthermore, gains or losses arising from differences between the exchange rate at the transaction date and the exchange rate at the balance-sheet date are credited or charged to income, if gains or losses in respect of the foreign currency assets and liabilities to which the transactions refer are also credited or charged to income.
Gains or losses arising from other forward purchases or sales of foreign currency at fixed exchange rates, determined by reference to the comparable forward rates at the closing date of the financial statements, are credited or charged to income.

13) Forward interest rate transactions

The interest-rate differentials to be paid or received on interest rate swaps and similar transactions accruing at the closing date of the financial statements are entered on an accrual basis in the Income Statement under financial income and charges.
The considerations for the options acquired or sold in connection with forward interest rate transactions are recorded in income over the duration of the options.

14) Dividends

Dividend income and the relative tax credit from subsidiary companies are entered on accrual, namely in the year such income is formed; dividends from other equity investments are recorded on collection.

15) Capital gains from contributions in-kind

Capital gains from corporate demergers and subsequent contributions are classified as extraordinary income.

16) Surplus from merger

The surplus emerging from the merger of the subsidiary Tecnost S.p.A. was booked in a shareholders' equity reserve in the balance sheet as at 31 December 2000.

17) Value adjustments and provisions charged exclusively for tax purposes

Value adjustments and provisions charged exclusively for tax purposes, comprising accelerated depreciation as allowed under specific tax laws and writedowns on equity investments, are carried in the respective income headings.

18) Income taxes

Current tax liabilities are provided, where applicable, as amounts due to tax authorities, based on a reasonable estimate of taxation for the year. In addition, in accordance with the balance sheet tax liability method, deferred taxes or prepaid taxes are recognised on all temporary differences between the book values of assets and liabilities and their corresponding tax values, applying tax rates expected in the periods in which the temporary differences will be reversed.
The benefit of tax-loss carryforwards is recognised when a reasonable certainty exists that future taxable income will be available against which such carryforwards can be utilised, in accordance with current legislation.

19) Grouping of financial statement items

The financial statements as at 31 December 2001 do not include any groupings of items.

20) Reporting currency

The Parent Company has adopted the Euro as its reporting currency as from 1 January 1999; all amounts in the Explanatory Notes are therefore expressed in Euro unless indicated otherwise.

21) Exceptions allowed under paragraph 4, article 2423 of the Italian Civil Code.

No exceptions were applied in the attached financial statements pursuant to paragraph 4, art. 2423 of the Italian Civil Code.

Comments on assets

B) Fixed assets

I. Intangible fixed assets

Net intangible fixed assets at 31 December 2001 amounted to 249.7 million euros (158.3 million euros at 31 December 2000).

	Net value at 31.12.2000	New costs	Amortisation charges	Net value at 31.12.2001
1) Start-up and expansion costs	54,176,767	57,273,611	(30,353,755)	81,096,623
3) Industrial patents and intellectual property rights	3,099	-	(2,066)	1,033
7) Other:				
Extraordinary maintenance and leasehold improvements	1,916,606	1,880,143	(599,698)	3,197,051
Costs relating to the issue of bonds	345,736	93,956,866	(9,201,714)	85,100,888
Costs relating to borrowings, sustained by Tecnost S.p.A. (merged into Olivetti in 2000)	101,858,760	-	(21,531,749)	80,327,011
	104,121,102	95,837,009	(31,333,161)	168,624,950
Total	**158,300,968**	**153,110,620**	**(61,688,982)**	**249,722,606**

Start-up and expansion costs rose by 57.3 million in 2001 due to guarantee commissions connected with share capital increases and are amortised over a period of five years.
Extraordinary maintenance and leasehold improvements increased by 1.9 million euros in respect of expenses incurred to complete the restructuring of the building provided on a free loan basis as contribution in kind to the "Associazione Interaction Design Institute" of Ivrea; the said costs are amortised over the term of the agreements.
The increase in *costs relating to the issue of bonds*, equal to 94 million euros, concerned:
- 25.5 million euros relating to "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium";
- 68.5 million euros relating to "Olivetti 1.5% 2001-2010 convertible bonds with redemption premium".

II. Tangible fixed assets

Total accumulated accelerated depreciation (B)	**5,612,545**	**581,477**	**(40,636)**	**6,153,386**
Total accumulated depreciation (A+B)	**21,991,207**	**1,262,719**	**(104,500)**	**23,149,426**

Ordinary depreciation was provided at rates deemed to reflect the residual useful life of the tangible fixed assets concerned.

717

The rates applied, reduced by 50% for assets acquired during the year, were as follows:

Buildings	3%
Plant and machinery	10% - 20%
Industrial and commercial equipment	20% - 40%
Other assets:	
Electronic office machines	20%
Office furniture and fittings	12%
Motor vehicles	25%

As at 31 December 2001, fixed assets were depreciated by 91.3% compared with 91.6% at the end of 2000.
Accelerated depreciation for the current year and previous years, charged in accordance with current tax laws, was classified as a deduction of the relevant asset items.

III. Financial fixed assets

Equity investments

As at 31 December 2001, equity investments totalled 31,409.3 million euros, an increase of 527.9 million euros compared with 31 December 2000 (30,881.4 million euros), as analysed below:

	Net book value
As of 31 December 2000	**30,881,429,345**
Acquisitions, capital subscriptions and other disbursements	429,873,512
Disposals	(26,484,133)
Write-downs	(64,207,033)
Reclassification of SEAT P.G. equity investment from financial assets not held as fixed assets	192,016,008
Reclassification of Lottomatica S.p.A. equity investment under financial assets not held as fixed assets	(3,323,401)
	527,874,953
As of 31 December 2001	**31,409,304,298**

The changes comprised:
- acquisitions of shares in the following companies for 22 million euros:
- 19.5 million euros Consortium S.r.l.
- 2.4 million euros Fin-Priv. S.r.l.
- 0.1 million euros Global Gaming Investments S.p.A.
- share capital increases and other disbursements for 407.8 million euros referred to:
- 390.6 million euros Olivetti International S.A.
- 14.0 million euros Tredicimarzo S.r.l.
- 2.0 million euros Fin-Priv S.r.l.
- 1.2 million euros Global Gaming Investments S.p.A.
- replenishments of losses for 0.1 million euros relating to Global Gaming Investments S.p.A.;
- disposals of equity investments in the following companies for 26.5 million euros:
- 25.8 million euros TechnoProduzioni S.p.A.
- 0.7 million euros Istituto R.T.M. S.p.A.
- writedowns of 64.2 million of which 64.1 million referred to Olivetti Tecnost S.p.A..

The equity investment in Seat Pagine Gialle was reclassified under financial fixed assets in keeping with the strategy of the new reference shareholder.

On 27 December 2001 the Parent Company adhered to the public tender offer made by Tyche S.p.A. (De Agostini Group) for 100% of Lottomatica S.p.A.'s shares and in January 2002 it sold its equity investment (direct and indirect) of 27,451,550 shares (15.6% of subscribed capital).

As a consequence the equity investment was reclassified under financial assets not held as fixed assets.

The aggregate book value of equity investments would be 2,166 million euros higher, had the equity investments in Telecom Italia S.p.A. and Olivetti International S.A. not been written down in 1999 for tax purposes; therefore Olivetti S.p.A. shareholders' equity at 31 December 2001 would be 1,917 million euros higher (net of the corresponding tax effect of 249 million euros).

The breakdown of the opening balances for the equity investments classified as financial fixed assets was as follows:

	Shares/quotas at 31.12.2000	Original cost	Losses and write-downs	Replenishments and value restorations	Book value at 31.12.2000
Subsidiary companies					
Finsiel S.p.A.	18,320	429,486			429,486

(***) 54.2% on voting rights.

(•) Controlled indirectly through Telecom Italia S.p.A.

723

A comparison of the book values of equity investments in subsidiary companies and the corresponding portion of shareholders' equity adjusted for consolidation purposes shows the aggregate equity investment book value to be higher by 25,245.6 million euros:

(in millions of euros)	Book value of equity investments (a)	Portion of net equity as adjusted for consolidation purposes attributable to the Parent Company (b)	Differences (a-b)
Equity investments the book values of which are lower than the relevant pro-quota net equity, as adjusted for consolidation purposes:			
Olivetti Multiservices S.p.A.	167.0	174.0	(7.0)
Olivetti Finanziaria Industriale S.p.A.	35.1	39.3	(4.2)
Olivetti International S.A.	420.9	433.0	(12.1)
	623.0	646.3	(23.3)
Equity investments the book values of which are higher than the relevant pro-quota net equity, as adjusted for consolidation purposes:			
Telecom Italia S.p.A.	30,140.6	5,032.8	25,107.8
Global Gaming Investments S.p.A.	1.3	1.0	0.3
Olivetti Tecnost S.p.A.	208.0	188.7	19.3
Webegg S.p.A.	49.0	44.4	4.6
Olivetti Finance N.V.	46.9	(90.0)	136.9
	30,445.8	5,176.9	25,268.9
	31,068.8	**5,823.2**	**25,245.6**

The difference between the book value of the equity investment in Telecom Italia S.p.A. and the corresponding portion of shareholders' equity adjusted for consolidation purposes is essentially attributable to consolidation goodwill arising from the acquisition of Telecom Italia and recorded in Olivetti's consolidated financial statements.

The lower value of the corresponding portion of shareholders' equity adjusted for consolidation purposes of Olivetti Finance N.V. (136.9 million), compared with the book value of Olivetti S.p.A.'s equity investment, is attributable to the value adjustment taken by Olivetti Finance N.V. to reflect losses arising from the valuation at year-end market values of shares (including 41,401,250 Telecom Italia shares) and securities held for trading purposes. Olivetti did not consider it necessary to write down its equity investment in the belief that these losses do not reflect other than temporary impairment in value.

724

Receivables

This heading includes both short-term and medium/long-term financial receivables:

Receivables due within 12 months from third parties referred in particular to 9.8 million euros of receivables for interest-relief grants (Law No. 346/1988).

Receivables due after 12 months amounted to 61.3 million euros (52.4 million euros at 31 December 2000) and mainly consist of an interest-bearing restricted deposit (at 31 December 2001 46.5 million euros), established with a leading bank to guarantee cover for any residual liabilities, in favour of Getronics (formerly Wang Laboratories).

In connection with the original restricted deposit in US dollars, an interest rate and currency swap hedging transaction had been arranged, which was progressively reduced consistent with the movements on the deposit. On expiry in July 2001, a 12-month extension of the currency swap was arranged by means of a forward sale of dollars against euros.

Treasury stock

At 31 December 2001 the Parent Company held 2,697,500 ordinary own shares (formerly savings shares converted into ordinary shares during 2000) including shares acquired from employees, for a par value, following the redenomination of the share capital in euros, of 2.7 million euros and recorded at cost at 2.3 million euros; a special restricted reserve is carried in the shareholders' equity for the same amount.

727

Receivables due within 12 months amounted to 837.5 million euros, a decrease of 972.5 million euros compared with 31 December 2000. The decrease reflects lower accruals for Telecom Italia dividends accrued over the year (844.1 million euros) and the consequent lower prepaid tax credit (496.9 million euros), and an increase in receivables due from tax authorities (335.2 million) relating in particular to tax credits on dividends collected.
In its capacity as a contracting party for insurance policies to cover risks, also on behalf of subsidiary companies, the Parent Company had receivables due from insurance companies for 18.3 million euros (14.6 million at 31 December 2000), mainly as compensation for damages suffered by companies of the Olivetti Tecnost Group (beneficiaries of the said insurance policies) following the flooding in the Canavese area in October 2000.
An item for the same amount was entered under payables to subsidiary companies.

III. Financial assets not held as fixed assets

Equity investments in other companies

At 31 December 2001, these amounted to 7.2 million euros and referred to:
- equity investments acquired during 2001 for trading purposes related to:
- 1.1 million Biesse S.p.A.;
- 2.8 million Datalogic S.p.A.
- reclassification of the equity investment in Lottomatica S.p.A. (3.3 million) following acceptance of the public tender offer, as previously noted under the heading on Equity Investments.

Equity investments acquired for trading purposes, relating to listed companies, are recorded at the lower of acquisition cost and realisable value based on average share prices in December 2001.

Other securities

	31.12.2001	31.12.2000	Changes	Market values
Treasury Certificates (C.C.T.)	46,716,156	46,716,156	-	46,493,871

D) Accrued income and prepaid expenses

	31.12.2001	31.12.2000	Changes
Accrued income			
Due within 12 months:			
Interest income			
from third parties	1,898,916	2,143,700	(244,784)
from associated companies	1,169	1,974	(805)
from subsidiary companies	346	680	(334)
Interest relief grants	3,807,848	5,147,106	(1,339,258)
Total accrued income within 12 months	5,708,279	7,293,460	(1,585,181)
Due after 12 months			
from third parties	11,449,758	-	11,449,758
Total accrued income	**17,158,037**	**7,293,460**	**9,864,577**
Prepaid expenses			
Due within 12 months:			
Financial charges from third parties	-	236,061	(236,061)
Insurance premiums and other costs			
from third parties	2,259,725	1,898,840	360,885
from subsidiary companies	-	1,493	(1,493)
Total prepaid expenses due within 12 months	2,259,725	2,136,394	123,331
Due after 12 months:			
Financial charges from third parties	483,572,416	-	483,572,416
Total prepaid expenses	**485,832,141**	**2,136,394**	**483,695,747**
Total	**502,990,178**	**9,429,854**	**493,560,324**

Prepaid expenses in respect of financial charges increased by 483.3 million euros, compared with 31 December 2000, largely due to the portions accruing to future years of the redemption premium (charged to income) on the convertible bonds issued during the year.

729

Comments on liabilities and shareholders' equity

A) Shareholders' equity

I. Share capital

The share capital of Olivetti S.p.A. as at 31 December 2001, fully subscribed, paid-up and filed with the Companies Register, was represented by 8,783,701,564 ordinary shares with a par value of 1 euro each (4,914,694,381 ordinary shares as at 31 December 2000) for an aggregate value of 8,783,701,564 euros (4,914,694,381 euros as at 31 December 2000).
The following operations determined the net increase of 3,869,007,183 euros during 2001:
• share capital increases subscribed by 31 December 2000 for an aggregate amount of 397,707 euros through the issuance of 397,707 ordinary shares, filed with the Companies Register in 2001 in accordance with article 2444 of the Italian Civil Code, as follows:
- share capital increase of 360,695 euros par value through the issuance of 360,695 ordinary shares, following conversion of a similar number of "Olivetti floating rate 1998-2002 bonds";
- share capital increase of 37,012 euros par value through the issuance of 37,012 ordinary shares, following exercise of a similar number of "Olivetti 1998-2002 ordinary share warrants":
• share capital increase of 1,999,439,092 euros par value through the issuance of 1,999,439,092 ordinary shares, to coincide with the date of the merger of Tecnost S.p.A. into and with Olivetti S.p.A. (31 December 2000), given in exchange to Tecnost S.p.A. minority shareholders, filed in 2001 with the Companies Register in accordance with article 2444 of the Italian Civil Code;
• share capital increase of 26,127 euros par value through the issuance of 26,127 ordinary shares following exercise in December 2000 of a similar number of "Olivetti 1998-2002 ordinary share warrants" for which the corresponding shares had not yet been issued at 31 December 2000;
• share capital increase of 7,213,223 euros par value through the issuance of 7,213,223 ordinary shares following the conversion of a similar number of "Olivetti floating rate 1998-2002" bonds with a par value of 1,000 Italian lire each and through utilisation of an amount of 3,487,904 euros of the "Reserve for the conversion of Olivetti floating rate 1998-2002 bonds" formed following re-denomination of share capital in euros;
• share capital increase of 3,891,093 euros par value through the issuance of 3,891,093 ordinary shares following exercise of a similar number of "Olivetti 1998-2002 ordinary share warrants"; the issuance was effected:
- 2,009,582 euros against payment of 1,000 Italian lire per share;
- 1,881,511 euros on a free basis through the use of the "Reserve for the exercise of Olivetti 1998-2002 ordinary share warrants" formed following re-denomination of share capital in euros;
• share capital increase of 348,249,405 euros par value (in addition to a share premium of 557,199,048 euros) through the issuance of 348,249,405 ordinary shares (dividend entitlement from 1 January 2000) in execution of the Board of Directors' resolution of 18 December 2000 in respect of the proxy granted by the Extraordinary Shareholders' Meeting of 7 April 1999;
• share capital increases for an aggregate amount of 18,216,685 euros par value (in addition to a share premium of 11,488,562 euros) through the issuance of 18,216,685 ordinary shares reserved for managers

730

of the Parent Company and its subsidiaries following the exercise of an equal number of "Olivetti 1999-2001 share warrants"; the issuance was effected:
- 9,408,133 euros against payment of 1,000 lire par value for each share;
- 8,808,552 euros on a free basis through use of the "Reserve for the exercise of Olivetti 1999-2001 warrants or options assigned to managers of the Parent Company and its subsidiaries" formed following re-denomination of share capital in euros;

• share capital increase of 7,308 euros par value (in addition to a share premium of 20,709 euros) through the issuance of 7,308 ordinary shares following the exercise of 6,525 "Olivetti ex Tecnost 1999-2004 warrants" on an exchange basis of 1.12 Olivetti shares per warrant; the issue was effected:
- 1,685 euros against payment;
- 5,623 euros on a free basis through use of the "Reserve for the exercise of ex Tecnost 1999-2004 warrants" formed following re-denomination of Tecnost S.p.A. share capital in euros;

• share capital increase of 192,845 euros par value (in addition to a share premium of 192,818 euros) through the issuance of 192,845 ordinary shares following the exercise of 385,690 "Olivetti 2001-2002 ordinary share warrants";

• share capital increase of 1,491,373,698 euros through the issuance of 1,491,373,.698 ordinary shares (with regular dividend entitlement), in execution of the Board of Directors' resolution of 13 October 2001 in respect of the proxies granted by the Extraordinary Shareholders' Meetings of 7 April 1999 and 13 October 2001.

Future potential changes in share capital

The following were still outstanding at 31 December 2001:
- 30,352,768 "Olivetti floating rate bonds 1998-2002", net of 362,452 bonds for which conversion to ordinary shares had already been requested at that date, with the consequent decrease in the number of outstanding bonds with counter-item represented by a payable to future shareholders (the corresponding shares were issued on 15 January 2002). A total of 30,352,768 Olivetti ordinary shares for an aggregate par value of 30,352,768 euros could still be issued in respect of the outstanding bonds, of which 14,676,872 euros through the utilisation of the special reserve for free capital increases;
- 23,169,150 "Olivetti 1998-2002 ordinary share warrants", net of 21,033 exercised warrants, for which conversion shares had not yet been issued at closure (shares issued on 15 January 2002). A total of 23,169,150 Olivetti ordinary shares at a price of 1 euro each, for an aggregate value of 23,169,150 euros, could still be issued in respect of the outstanding bonds, of which 11,203,283 euros through utilisation of the special reserve for free capital increases;
- 137,358,025 "Olivetti ex Tecnost 1999-2004 warrants" for subscription of 153,840,988 Olivetti ordinary shares (at a rate of 1.12 Olivetti shares for each warrant exercised) at the originally planned price per share of 2.80 euros with a 15% annual increment, for the period between 20 August 1999 and the execution date of the respective applications, and therefore ranging (following adjustment in respect of the share capital increases executed in 2001) from 3.249 euros in the case of warrants exercised in January 2002 to 4.626 euros in relation to warrants that will be exercised in June 2004. Consequently, should all the warrants outstanding at 31 December 2001 be exercised, the aggregate value of the share capital increase, including additional paid-in capital, would vary from a minimum of 499,829,370 euros

73

(January 2002) to a maximum of 711,668,410 euros (June 2004), to which 118,371,238 euros must be added deriving from the utilisation of pre-established free share capital increase reserves;
- 487,549,167 "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium" in relation to which at 31 December 2001 487,549,167 Olivetti ordinary shares could be issued (as from 1 January 2002, when bond convertibility began) for an aggregate par value of 487.5 million euros;
- 5,654,982 Olivetti 1999-2001 free warrants assigned to managers of the Parent Company and its subsidiaries under the plan approved by the Board of Directors on 9 June 1999 and supplemented with a subsequent resolution approved on 29 November 1999, as described in the specific chapter on employee stock options. In respect of these warrants, as at 31 December 2001 5,654,982 ordinary shares could still be issued at a price of 1 euro each (following adjustment in respect of the share capital increases executed in 2001), for a share capital increase with an aggregate par value of 5.7 million euros (after use for 2.7 million euros of the reserve formed for free issues). The plan expired on 31 January 2002 with exercise of all outstanding warrants.
- 347,839,626 "Olivetti 2001-2002 ordinary share warrants", net of 12,246 warrants already exercised for which conversion shares had not yet been registered at 31 December 2001, and net of 11,842 warrants already exercised for which the corresponding shares had not yet been issued at 31 December 2001. In respect of these warrants, 173,919,813 shares could still be issued at a subscription price of 1.867 euros per share (after taking into account the adjustment in respect of the share capital increase executed in November 2001), for an aggregate par value of 173,919,813 euros (in addition to a share premium of 150,788,478 euros);
- 2,412,962,875 "1.5% 2001-2010 convertible bonds with redemption premium" in respect of which at 31 December 2001 an equal number of Olivetti ordinary shares could be issued (as from 22 January 2002 until 15 December 2009) for an aggregate par value of 2,412,962,875 euros.

The Board of Directors' Meeting of 24 February 2000 implemented the proxy granted pursuant to art. 2443 of the Italian Civil Code by the Extraordinary Shareholders' Meeting of 7 April 1999 to carry a resolution for a Three-Year Stock Option Plan from 1 January 2002 to 31 December 2004, assigning to approximately one hundred managers of the Parent Company and its subsidiaries 29,500,000 free warrants for subscription of an equal number of Olivetti ordinary shares at a price of 3.308 euros per share (after adjustment for the share capital increases of 2001) corresponding to the normal value of Olivetti ordinary shares at the date of the Board of Directors' meeting.

The stock options were to have been exercised in three groups in the period between 1 November and 15 December of 2002, 2003 and 2004 and could be accumulated until the end of the Plan.

Subsequently, the Board of Directors' meeting of 9 February 2001 passed a resolution to reverse the previous resolution of 24 February 2000 and to raise share capital by an aggregate amount of 29 million euros through issue of 29 million shares at a subscription price of 2.515 euros per share (after adjustment for the share capital increases of 2001) reserved for managers of the Parent Company and its subsidiaries and servicing the warrants to be assigned to such managers under the "February 2002 - December 2004 Three-Year Stock Option Plan", with no changes to terms and conditions applying to stock options already assigned to managers on the payroll as of 24 February 2000 who had since left the Group's employ.

732

Proxies assigned to Directors

The Extraordinary Shareholders' Meeting held on 7 April 1999 granted the following powers to the Directors, pursuant to arts. 2443 and 2420-ter of the Italian Civil Code, for a period of five years as from the date of the resolution:

a) to increase the share capital in one or more tranches, for a maximum par value of 5 thousand billion Italian lire (equal to 2,582.3 million euros), on a free and/or payment basis, with or without share premium, through the issuance of ordinary shares and/or shares serviced with various rights, with the same characteristics as the outstanding shares, to be assigned or offered to parties with entitlement thereto, giving the Directors the right to establish, case by case, the categories of the shares, the issue price thereof, the dividend entitlement, the appropriation of share capital increase to service the conversion of bonds including bonds issued by third parties, both in Italy and abroad, and/or warrants, as well as the right to appropriate the increase or the increases (within the time limits set forth in art. 134 of Legislative Decree no. 58/1998), also via options, warrants, or similar rights, to employees of the Company, its Parent Company and its subsidiary companies;

b) to issue bonds, in one or more tranches, and/or bonds convertible into ordinary shares and/or serviced with various rights, with the same characteristics as the outstanding bonds, with or without warrants, also issued in foreign currency, to be offered with pre-emptive right to parties with entitlement thereto, for a maximum amount of 8 thousand billion Italian lire (equal to 4,131.7 million euros), within the limits permitted under law, on a case-by-case basis, with the consequent share capital increase to service the conversion of bonds and/or exercise of warrants, establishing the procedures, terms, conditions and regulations thereof.

A partial implementation was executed by the Board of Directors' Meeting held on 7 April 1999, in which the Board resolved to increase the share capital intended to finance the Public Tender Offer promoted at that time on the ordinary shares of Telecom Italia, through subscription of the share capital increase resolved for this purpose by the subsidiary company Tecnost. This share capital increase was executed over the period 21 June 1999 – 7 July 1999 for a par amount of 1,497.6 billion Italian lire (equal to 773.4 million euros).

Also by way of implementing the proxies cited, the Board of Directors carried a number of resolutions with regard to stock option plans for an aggregate maximum of 78,330,000 shares for an aggregate par value of 105.5 billion Italian lire (54.5 million euros); specifically on 9 June 1999, 29 November 1999, 24 February 2000 and 9 February 2001, as described in detail and as set forth in art. 5 of the Company By-laws.

Subsequently, on 4 July 2000, the Extraordinary Shareholders' Meeting held to approve the free share capital increase and the concurrent re-denomination in euros, made provision also to express in euros the amounts reported in the above-mentioned proxies.

The Board of Directors' Meeting held on 18 December 2000 implemented the above proxies to approve a rights issue for a maximum of 357,184,480 Olivetti ordinary shares with an equal number of warrants (set, on the basis of share capital at commencement of the operation, at 348,249,405 shares and a similar number of warrants for subscription of 174,124,702 shares for an aggregate par value of 1,011.4 billion Italian lire, equal to 522.3 million euros) and a maximum of 500,058,272 bonds (set, on the basis of share capital at commencement of the operation, at 487,549,167 bonds for an aggregate par value of

T33

2,454.5 billion Italian lire, equal to 1,267.6 million euros). The characteristics of the rights issue are described in detail in the Directors' Report.
The Board of Directors' meeting held on 30 May 2001 implemented the above proxies pursuant to art. 2420-ter of the Italian Civil Code to approve the issue of a two-year non-convertible bond for a maximum overall value of 400 million euros (as part of the Euro Medium-Term Notes programme dating back to July 1999 and updated by the Board itself), intended exclusively for Italian professional investors and foreign institutional investors (excluding the USA) and listed on the Luxembourg Stock Exchange.
On 13 October 2001, the Extraordinary Shareholders' Meeting resolved to grant proxies authorising the Directors, in accordance with article 2443 of the Italian Civil Code, to raise share capital on one or more occasions over a five-year period from the date of the resolution, by a maximum of 7 billion euros (par value) through the issue of shares to be assigned or offered to entitled parties and to issue bonds and/or convertible bonds – in accordance with article 2420-ter of the Italian Civil Code – up to a maximum of 10 billion euros (par value), on one or more occasions over a five-year period from the date of the resolution. These proxies are additional to existing proxies for remaining sums.
The Board of Directors' Meeting held on 13 October 2001 implemented proxies, including those granted pursuant to arts. 2443 and 2420-ter by the Shareholders' Meeting of 7 April 1999 for the remaining part, to resolve a rights issue for a maximum amount of 4,079,803,958 euros through the offer of up to 4,079,803,958 shares and/or bonds, on an alternative basis at the choice of the rights holders.
The offer, made in November (rights issue to rights holders) and December (market offer of unexercised rights, 0.21% of total rights), was entirely subscribed by the market, without the intervention of the underwriting banks.
A total of 1,491,373,698 shares were issued at the price of 1 euro each (as outlined before) for an aggregate value of 1,491.4 million euros and a total of 2,412,962,875 bonds with a par value of 1 euro each (which are described in detail in the Directors' Report) for an aggregate value of 2,413 million euros, for a total number of 3,904,336,573 shares and bonds compared with the maximum of 4,079,803,958 shares and bonds specified by the resolution.
In fulfilment of its previous commitments, and after full exercise of its rights, Olimpia S.p.A. underwrote 504,825,563 shares and 504,825,562 bonds; as a result, the percentage of the share capital held by Olimpia S.p.A. was 28.736%.
The Board of Directors also resolved not to avail itself of the residual proxies conferred pursuant to arts. 2443 and 2420-ter of the Italian Civil Code (for a maximum of 6,740 million euros and 10,051 million euros respectively) to arrange operations that would raise share capital and, consequently, resolved request Shareholder approval of any further issue of shares, convertible bonds or bonds with warrants, warrants, options or other similar rights for subscription of shares, which, albeit covered by the residual proxies, might be necessary and opportune. The Board of Directors, therefore, resolved to put before a forthcoming General Meeting a proposal for the revocation of the proxies delegated pursuant to arts. 2420-ter and 2443 of the Italian Civil Code, for any further issue of shares, convertible bonds or bonds with warrants, warrants, options or other similar rights for subscription of shares, that had not been utilised after execution of the offer.

I bis. Share capital increase to be filed with the Companies Register pursuant to art. 2444 of the Italian Civil Code

This heading amounted to 839,593 euros at 31 December 2001 (397,707 euros at 31 December 2000). It includes the par value of the shares issued by the Parent Company in respect of share capital increases effected in 2001 which had not been filed with the Companies Register at the end of the year (780,895 shares from the conversion of an equal number of "Olivetti floating rate 1998-2002 bonds", 52,575 shares from the exercise of an equal number of "Olivetti ordinary share 1998-2002 warrants" and 6,123 shares from the exercise of 12,246 "Olivetti ordinary share 2001-2002 warrants").

I ter. Share capital increase payments relating to shares to be issued

At 31 December 2001 this heading amounted to 26,954 euros (26,127 euros at 31 December 2000) and included 21,033 euros from the exercise of "ordinary Olivetti 1998-2002 share warrants" and 5,921 euros from the exercise of "Olivetti ordinary share 2001-2002 warrants".

I quater. Shares in exchange for Tecnost shares

At 31 December 2001 this heading was zero following the filing in the Companies Register of the share capital increase relating to the 1,999,439,092 Olivetti shares reserved in joint exchange for Tecnost S.p.A. minority shareholders following the merger of Tecnost S.p.A. into and with Olivetti S.p.A., which became effective on 31 December 2000.

II. Additional paid-in capital

This reserve amounted to 3,765,113,918 euros at 31 December 2001 compared to 3,196,212,781 euros at 31 December 2000, a net increase of 568,901,137 euros which reflected the following movements:
- 557,199,048 euros for the share capital increase subscribed in 2001 for an aggregate par amount of 348,249,405 euros, implementing the Board of Directors' resolution of 18 December 2000 in respect of the proxy granted by the Extraordinary Shareholders' Meeting of 7 April 1999;
- 11,488,562 euros for the share capital increase for a par amount of 18,216,685 euros reserved for managers of the Parent Company and its subsidiaries following exercise of 18,216,685 stock options;
- 20,709 euros for the share capital increase subscribed in 2001 for an aggregate par amount of 7,308 euros following exercise of 6,525 "Olivetti ex Tecnost 1999-2004 warrants";
- 192,818 euros for the share capital increase subscribed in 2001 for an aggregate par value of 192,845 euros following exercise of 385,690 "Olivetti 2001-2002 stock options".

II bis. Additional paid-in capital in respect of share capital increases to be filed with the Companies Register and of shares to be issued

This reserve amounted to 10,442 euros at 31 December 2001 (it was set to zero at 31 December 2000) and referred to 12,044 shares following exercise of an equal number of "Olivetti ordinary share 2001-2002 warrants".

III. Revaluation reserves

This heading consists of the Revaluation reserve previously stated in the books of the merged company Tecnost S.p.A. and re-formed in the books of Olivetti S.p.A. following the merger with effect from 31 December 2000; at 31 December 2001 it amounted to 1,128,827 euros, unchanged from 31 December 2000.

IV. Legal reserve

This reserve amounted to 920,809,760 euros at 31 December 2001, an increase of 43,491,002 euros compared with 31 December 2000 due to appropriation of a portion of earnings for 2000, as resolved by the Ordinary Shareholders' Meeting of 14 June 2001.

V. Reserve for treasury stock

This reserve of 2,298,156 euros reflects the value of 2,697,500 shares issued and held by the Parent Company and carried in the balance sheet under the appropriate financial fixed assets heading, in accordance with art. 2357-ter of the Italian Civil Code: it cannot be distributed while own shares continue to be held.

VII. Other reserves

At 31 December 2001 these reserves reflected an aggregate amount of 2,061,056,125 euros, compared to 2,075,652,903 euros at 31 December 2000, a total net decrease of 14,596,778 euros.

a) Extraordinary reserve

At 31 December 2001 this reserve amounted to 1,888,261,068 euros (unchanged from 31 December 2000).

b) Restricted reserve tied to exercise of Olivetti ex Tecnost 1999-2004 warrants

This reserve is irrevocably tied to exercise of "Olivetti ex Tecnost 1999-2004 warrants". At 31 December 2001 it amounted to 118,371,238 euros compared with 118,376,861 euros at 31 December 2000; the decrease of 5,623 euros was due to the exercise of 6,525 warrants during the year. This reserve was formed following the free issue at Tecnost S.p.A. and the simultaneous re-denomination of share capital into euros; at the moment of exercise of the warrants, the unit amount of 1,436.27 lire (equal to the difference between the unit counter-value of 1 euro, namely 1,936.27 lire, and the pre-existing par value of 500 lire per share) will be transferred to share capital in the form of a free share capital increase, as well as to take into account the joint exchange ratio of 1.12 Olivetti shares for each ex Tecnost warrant following the merger of Tecnost S.p.A. into and with Olivetti S.p.A..

c) Restricted reserves tied to conversion of Olivetti bonds and exercise of Olivetti warrants

These reserves (formed following the re-denomination of share capital into euros) amounted to a total of 44,206,809 euros at 31 December 2001, compared to 58,797,964 euros at 31 December 2000. The decrease of 14,591,155 euros reflects:

736

- for 3,865,500 euros, use of the "Reserve for conversion of Olivetti floating rate 1998-2002 bonds" (which decreased from 18,717,633 euros to 14,852,133 euros) following conversion of 7,994,118 bonds;
- for 1,917,103 euros, use of the "Reserve for exercise of Olivetti 1998-2002 ordinary share warrants" (which decreased from 13,120,386 euros to 11,203,283 euros) following exercise of 3,964,701 warrants;
- for 8,808,552 euros, use of the "Reserve for exercise of Olivetti 1999-2001 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries" (which decreased from 12,695,424 euros to 3,886,872 euros) following exercise of 18,216,685 warrants.

At 31 December 2001 the heading also included the "Reserve for exercise of Olivetti 2002-2004 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries" for 14,264,521 euros, unchanged from 31 December 2000.

d) Non-taxable reserves

These reserves, amounting overall to 10,217,010 euros, had been carried by Tecnost S.p.A. and were reformed in the Olivetti balance sheet following the merger of Tecnost into and with Olivetti; the breakdown of these reserves is as follows:

- Reserve pertaining to research grants (Law no. 346/1988) for 8,741,403 euros
- Reserve pertaining to Technological Innovation grants (Law no. 46/1982) for 685,713 euros
- Reserve pertaining to capital investment grants (Law no. 64/1986) for 695,110 euros
- Reserve pertaining to VAT deductions on capital investments for 94,784 euros.

Taxes are not provided for these reserves since operations that would make them liable for taxation are not planned at the present time.

VIII. Retained earnings (accumulated losses)

Retained earnings at 31 December 2001 amounted to 571,549,306 euros (zero at 31 December 2000) following appropriation of a portion of earnings for 2000 resolved by the Shareholders' Meeting of 14 June 2001.

B) Reserves for risks and charges

2.a) Reserves for taxation

The following years are still subject to adjustment or to assessment by the tax authorities: the financial years from 1996 onwards as regards income taxes; the financial years from 1997 onwards as regards value added tax.

In 1999 the Parent Company underwent a general tax inspection conducted by the Regional Corps of the Turin Tax Police, with specific reference to the years 1994, 1995 and 1996. At the end of the inspection, the tax authorities were notified of hypothetical administrative anomalies regarding both value added tax and (predominantly) income tax. The objections regarding income tax essentially stem from a different configuration of tax results due to differences in the allocation to each of the three years of costs incurred and revenues generated by the Company over the three-year period.

731

The Company declared a tax loss for all three years, defined as set out below following the tax settlement agreed on 23 July 2001.

Tax losses (in millions of euros)	As per tax returns	As adjusted by tax police reports	Settled
1994	264	223	239
1995	467	285	400
1996	881	710	873
Total	1,612	1,218	1,512

The adjustments agreed amount to 100 million euros in total (compared to the figure in the Tax Police's report of 394 million euros). They relate to the double deduction of costs in error, costs not pertaining to 1996, but technically not deductible in the following accruing year (1997), and lesser headings.

On 15 December 2000 adjustment notices were received regarding value added tax for 1994 and 1995 as a consequence of the findings of the Tax Police's report. The Company promptly presented a well-argued appeal, which was substantially accepted by the Provincial Tax Commission.

In 1994, 1995 and 1996 the Company received assessment notices relating to the income tax returns from 1988 to 1992.

With regard to the assessment relating to 1988, the Tax Authorities objected, in view of the consequent tax regime, to the treatment of lease-back contracts as financial leasing contracts. The assessments relating to 1991 and 1992 stemmed from the findings of the Regional Corps of the Trieste Tax Police with regard to usufruct on share contracts entered into by the Parent Company in previous years, while the assessments for 1989 and 1990 concerned both matters.

With regard to usufruct on share contracts, the authorities, in separate assessments, questioned the legitimacy of the deduction of tax credits and withholdings relating to dividends collected from resident companies by the Parent Company as usufructuary. It also alleged the joint responsibility of the Parent Company for the failure to apply to such dividends the higher withholdings tax due on payment of share income to non-residents. Well-argued appeals have been made against all these assessments.

The objections raised with regard to lease-back contracts have been resolved in favour of the Parent Company and the tax authorities have not proceeded with the matter.

All the objections raised by the authorities regarding usufruct on shares for 1989, 1991 and 1992, as well as that relating to the alleged non-deductibility of tax credits and withholding taxes on dividends for 1990, have been rejected by the first and second degree tax commissions. Only the appeal lodged by the Company against the 1990 assessment alleging joint responsibility for lower withholding tax has been rejected by both the provincial and regional tax commissions.

The tax authorities have submitted appeals to the Supreme Court of Cassation as regards all the decisions in favour of the Parent Company concerning the objections to usufruct on shares and the Parent Company has lodged counter-appeals. With regard to the adverse ruling of the regional tax commission regarding the assessment of withholding tax for 1990, the Parent Company has lodged an appeal to the Court of Cassation and the tax authorities have submitted a counter-appeal.

The Parent Company's tax advisors believe that the dispute regarding usufruct on shares will be settled in favour of the Company since the objections raised on both matters lack any juridical basis, and the Court of Cassation has already issued favourable jurisprudence in this area.

2.b) Reserves for deferred taxation

The reserve for deferred taxes as at 31 December 2001 amounted to 344.4 million euros and decreased by 479.8 million euros compared to 31 December 2000. The reduction in the reserve was entirely due to utilisation in relation to taxable income for the year and the reduction in the temporary differences for which the reserve was formed in 2000.
The reserve was provided in respect of tax charges on Telecom Italia accruing dividends and tax credits of 72.6 million euros recorded on accrual (1,413.6 million euros in 2000) and on capital gains arising from the disposal of 31.5% of the equity investment in OliMan Holding B.V. (the operation took place in 1999 and taxation was spread over five years), adjusted for use of the reserve for risks and charges planned for 2002.
The reserve was determined by taking into account the tax rates expected for the years in which the temporary differences will be reversed (36% for 2002, 35% for 2003 and 2004) and the portions of income subject to the 19% rate as a result of application of Dual Income Tax (DIT).
Details of the provision calculation are provided in the statement of reconciliation between the theoretical tax charge and the effective tax charge in the financial statements.

3) Other provisions

Other provisions at 31 December 2001 amounted to 429.5 million euros (232.3 million euros at 31 December 2000), following increases of 201.6 million euros and uses totalling 4.4 million euros.

The heading includes 24.5 million euros for deferred social security charges arising from reductions in the workforce pursuant to Law No. 223/1991, 85.1 million euros for charges relating to commitments and possible future risks associated with the sale of OliMan Holding B.V., 300 million euros for risks and charges relating to investee companies and 19.9 million euros for charges relating to guarantees given in relation to the sale of subsidiary companies.

C) Reserve for employee severance indemnities

	31.12.2001	31.12.2000	Changes
Beginning balance	**4,126,520**	**6,185,118**	**(2,058,598)**
Provision for the year	1,050,599	800,262	250,337
Additional indemnities	1,900,561	1,599,118	301,443
	2,951,160	2,399,380	551,780
Indemnities paid	(2,832,851)	(2,855,459)	22,608
Advances to employees	(47,529)	(151,923)	104,394

741

Payables due within 12 months, at 31 December 2001, amounted to 5,050.9 million euros (1,963.6 million euros at 31 December 2000).
The change of 3,087.3 million euros is principally due to the increase in the current portion of borrowings from foreign subsidiary companies (4,055.2 million euros) set against the reduction in payables due to banks (1,139.8 million euros).

Payables due after 12 months

1) Bonds

	31.12.2001	31.12.2000	Changes
Olivetti 1994-2001 floating rate bond	-	258,228,450	(258,228,450)
less: current portion	-	(258,228,450)	258,228,450
Olivetti 2001-2003 floating rate bond	400,000,000	-	400,000,000
Total	**400,000,000**	**-**	**400,000,000**

With regard to the floating-rate 400 million euros bond linked to the European OverNight Index Average (EONIA), swap contracts have been arranged for a similar amount and duration, converting the rate into a 6 and 12 month USD LIBOR rate with cap protections.

2) Convertible bonds

	31.12.2001	31.12.2000	Changes
Olivetti 1998-2002 floating rate convertible bond:			
amount subscribed upon issue	172,903,364	172,903,364	-
conversions into ordinary shares	(157,227,468)	(153,640,387)	(3,587,081)
less: current portion	(15,675,896)	-	(15,675,896)
	-	19,262,977	(19,262,977)
Olivetti 1,5% 2001-2004 convertible bond with premium upon redemption			
par value	1,267,627,834	-	1,267,627,834
premium upon redemption	64,364,944	-	64,364,944
	1,331,992,778	-	1,331,992,778
Olivetti 1,5% 2001-2010 convertible bond with premium upon redemption			
par value	2,412,962,875	-	2,412,962,875
premium upon redemption	443,460,350	-	443,460,350
	2,856,423,225	-	2,856,423,225
Total	**4,188,416,003**	**19,262,977**	**4,169,153,026**

The premiums on the 2001-2004 and 2001-2010 bonds, determined on the basis of 5.07759% and 18.37825% redemption increments respectively, have been recorded under financial charges and deferred for amounts accruing to future years.

742

3) Amounts due to banks

	31.12.2001	31.12.2000	Changes
Ordinary loans	90,189,979	869,783,341	(779,593,362)
Loans for research	71,957,868	97,308,476	(25,350,608)
less: current portion	(90,349,749)	(829,943,970)	739,594,221
Total	**71,798,098**	**137,147,847**	**(65,349,749)**

4) Amounts due to other lenders

	31.12.2001	31.12.2000	Changes
Loans from the Technological Innovation Fund	18,900,009	24,436,714	(5,536,705)
Other lenders	12,234,341	-	12,234,341
less: current portions	(5,762,176)	(5,536,705)	(225,471)
Total	**25,372,174**	**18,900,009**	**6,472,165**

5) Amounts due to subsidiary companies

	31.12.2001	31.12.2000	Changes
Amounts due to subsidiary companies			
Olivetti Holding B.V.	-	1,405,000,000	(1,405,000,000)
Olivetti Finance N.V.	5,302,415,417	14,100,008,816	(8,797,593,399)
Total	**5,302,415,417**	**15,505,008,816**	**(10,202,593,399)**
Total amounts due after 12 months	**9,988,001,692**	**15,680,319,649**	**(5,692,317,957)**

Medium/long-term debt due to subsidiary companies of 5,302.4 million euros decreased compared to 31 December 2000 by a net amount of 10,202.6 million euros, which reflected 4,055.2 million reclassified under payables due within 12 months, 8,462.8 million early repaid before expiry and 2,315.4 million for new financing.
With regard to payables due to Olivetti Finance N.V., a loan of 20 billion yen at a half-yearly floating rate expiring in 2029 was arranged.
Against this exposure a currency and interest rate swap (CIRS) was arranged, which nullified the yen/euro exchange rate risk and converted the floating yen rate into a fixed euro rate.

* * *

At 31 December 2001 financial payables secured by guarantees on assets owned by the Company amounted to 32.5 million euros; these guarantees consisted of pledges on securities; they totalled 34.5 million euros (46 million euros at 31 December 2000) and were provided in reference to research loans granted by San Paolo IMI.

The breakdown of medium/long-term debt, including portions due within 12 months, was as follows:

(in millions of euros)	31.12.2001	31.12.2000
Amounts due to subsidiary companies:		
Loan from Olivetti Holding B.V., floating rate 3.94806% at 31.12.2001, repayable on 30 June 2002	2,147.0	1,405.0
Loan from Olivetti Finance N.V., floating rate 8.02361% at 31.12.2001, repayable on 30 June 2002	1,908.2	6,823.6
Loan from Olivetti Finance N.V., floating rate 6.97475% at 29.10.2001, repaid in advance on 29 October 2001	-	174.2
Loan from Olivetti Finance N.V., floating rate 6.19028% at 31.12.2001, repayable on 30 June 2004	3,129.0	4,602.2
Loan from Olivetti Finance N.V., floating rate 4.03055% at 31.12.2001, repayable on 3 November 2005	2,000.0	2,500.0
Loan from Olivetti Finance N.V. - yen 20 billion - floating rate 1.14928% at 31.12.2001, repayable on 29 October 2029	173.4	-
Amounts due to third parties:		
"Olivetti 1994-2001" floating rate bond (3-month RIBOR plus 0.75 p.p.p.a.), repaid in full on 26 July 2001	-	258.2
"Olivetti 1998-2002" floating rate bond, convertible into common shares, at 31 December 2001; 6.1% floating rate, repayable in full on 30 September 2002	15.7	19.3
EONIA Linked Notes due 2003, EONIA rate plus 0.92%, 5.051364% at 31.12.2001, repayable in full on 11 June 2003	400.0	-
"Olivetti 1,5% 2001-2004 convertible bond with premium upon redemption", repayable in full on 1st January 2004	1,267.6	-
Premium upon redemption "Olivetti 1.5% 2001-2004 bonds": 5.07759% of bond par value, payable upon redemption on 1st January 2004	64.4	-
"Olivetti 1.5% 2001-2010 convertible bond with premium upon redemption", repayable in full on 1st January 2010	2,413.0	-
Premium upon redemption "Olivetti 1.5% 2001-2010 bond"; 18.37825% of bond par value, payable upon redemption on 1st January 2010	443.5	-
IMI loans for research pursuant to Law 346/1988, average interest rate 12.5084% (gross of interest relief grants) at 31 December 2001, repayable by 2004	71.9	97.1
Subsidized loans for technological innovation, average interest rate of 4.0068% at 31 December 2001, repayable by 2012	18.9	24.4
Other loans, average interest 3.9843% at 31 December 2001, repayable by 2003	90.2	869.8
Other lenders	12.2	0.2
Total	**14,155.0**	**16,774.0**
of which:		
Portions expiring within 12 months	4,167.0	1,093.7
Portions expiring after 12 months	9,988.0	15,680.3

744

Payables due after 12 months were as follows:

(in millions of euros)	31.12.2001	31.12.2000
within 2 years	465.7	8,344.0
within 5 years	6,487.7	7,331.2
after 5 years	3,034.6	5.1
Total	**9,988.0**	**15,680.3**

At 31 December 2001 the Parent Company had unused overdraft facilities on current accounts of 315.4 million euros (198.1 million euros at 31 December 2000) and other unused standby lines of credit for 46.7 million euros (50.2 million euros at 31 December 2000).

Analysis of the financial position

	31.12.2001	31.12.2000	Changes
Financial liabilities:			
Due within 12 months	6,343,665,953	1,841,189,023	4,502,476,930
Due after 12 months	10,788,241,009	17,149,803,822	(6,361,562,813)
Total financial liabilities (A)	**17,131,906,962**	**18,990,992,845**	**(1,859,085,883)**
Financial resources:			
Medium /long-term financial assets	495,022,174	18,201	495,003,973
Financial current assets	308,724,693	992,745,353	(684,020,660)
Accrued interest income	5,708,279	7,293,460	(1,585,181)
Total financial resources (B)	**809,455,146**	**1,000,057,014**	**(190,601,868)**
Net financial indebtedness (A-B)	**16,322,451,816**	**17,990,935,831**	**(1,668,484,015)**

Net financial indebtedness at 31 December 2001 amounted to 16,322.4 million euros, a decrease of 1,668.5 million euros from 31 December 2000.
The variation (reflecting a reduction in medium/long-term debt of 6,856.6 million euros and an increase in short-term debt of 5,188.1 million) is essentially due to increases in share capital, as previously illustrated, net of costs incurred, to dividend payouts and to disbursements to subsidiary companies.

745

E) Accrued expenses and deferred income

	31.12.2001	31.12.2000	Changes

746

Memorandum accounts

A) Personal guarantees given and counter-securities received

As at 31 December 2001, guarantees and other personal securities given directly or indirectly through banks and insurance companies totalled 17,634.5 million euros overall (19,402.4 million euros at 31 December 2000), as follows:

(in millions of euros)	31.12.2001	31.12.2000	Changes
To third party holders of securities issued by subsidiary companies	17,136	18,826	(1,690)
To banks and finance companies for credit lines and financings given to subsidiary companies	137	135	2
Counter-securities given to third parties for guarantees given on behalf of:			
subsidiary companies	72	20	52
associated and unconsolidated subsidiary companies	3	7	(4)
third parties	34	47	(13)
	17,382	19,035	(1,653)
Other personal guarantees given	253	368	(115)
Total personal guarantees given	**17,635**	**19,403**	**(1,768)**

The decrease of 1,690 million euros relating to guarantees given to third party holders of securities issued by subsidiary companies is attributable in particular to guarantees given in respect of bond loans issued by Olivetti International Finance B.V. and Olivetti Finance N.V.
The counter-securities given to third parties in respect of guarantees given on behalf of subsidiary companies include 52.8 million euros in favour of Telecom Italia.
Other guarantees, equal to 252.7 million euros at 31 December 2001, referred to:

- suretyships for 3.6 million euros with reference to the fulfilment of trade supplies by Getronics S.p.A.;
- guarantees of 228.1 million euros given to the Italian State Railways in the interest of Infostrada S.p.A.;
- other guarantees for 21 million euros.

In respect of the above guarantees, as at 31 December 2001, the Parent Company had received counter-securities totalling 315 million euros (287.2 million euros at 31 December 2000), mainly comprising 228.1 million euros from Mannesmann A.G., in respect of guarantees given to the Italian State Railways and 52.8 million euros received from Telecom Italia.

747

B) Guarantees on Company assets

Guarantees on Company assets relating to financial operations are analysed under financial payables.

C) Commitments

At 31 December 2001 contractual commitments totalled 11 million euros overall (443.8 million euros at 31 December 2000), down by 432.8 million euros mainly as the result of the payment in favour of Olivetti International S.A. (395.2 million euros), for commitments undertaken in the previous year.
On the same date, the heading also included a letter of indemnity in favour of Olivetti Finanziaria Industriale S.p.A. in respect of potential risks from ongoing cases.

D) Other memorandum accounts

Other memorandum accounts at 31 December 2001 amounted to 3.8 million euros relating to third-party assets held as guarantee deposits (unchanged from 31 December 2000).

748

Comments on the income statement

A) Value of production

5) Other revenues and income

Other revenues amounted to 15.2 million euros (17.2 million euros in 2000). They refer to services supplied and to the recovery of costs in relation to subsidiary companies.

B) Costs of production

7) Costs of services

The amount of 49.1 million euros (substantially unchanged from 2000) includes 27.5 million euros for costs incurred for consultancy services and other costs relating to the increases in capital.

9) Personnel

Payroll costs in 2001 were 13.1 million euros (11.9 million euros in 2000), an increase of 1.2 million euros, of which 1.8 million euros was for higher costs for retirement incentives set against a reduction in costs following the reduction in the average number of employees, from 134 in 2000 to 107 in 2001 (30 managers, 16 supervisors, 61 office staff).
At 31 December 2001, there were 89 employees (109 at 31 December 2000) after the transfer of 2 supervisors and 10 office staff to Antex Servizi Finanziari e Amministrativi S.p.A. on the same date.

10) Amortisation, depreciation and writedowns

Amortisation of intangible fixed assets - The total charge for the year amounted to 61.7 million euros, of which 30.4 million euros for the amortisation of costs incurred for share capital increases and 30.7 million euros for the amortisation of costs relating to the issuance of bond loans.

Depreciation of tangible fixed assets - Depreciation for the year (1.3 million euros) was determined on a straight-line basis by adopting rates that reflect the residual useful life of the assets.
As illustrated in the note relating to tangible fixed assets, accelerated depreciation was also provided in compliance with the tax laws.

(in million of euros)	Year 2001	Year 2000	Changes
Ordinary depreciation	0.7	0.6	0.1
Accelerated depreciation	0.6	0.3	0.3
Total depreciation	**1.3**	**0.9**	**0.4**

Writedowns of receivables classified as current assets – The provision for doubtful accounts was 1.5 million euros (10.8 million euros in 2000).

12) Provision for risks

The provision of 191.8 million euros (15 million euros in 2000) refers to future charges relating to subsidiary companies.

14) Other operational expenses

Other operational expenses in 2001 amounted to 3 million euros, largely unchanged on 2000. They referred in particular to losses on receivables of 0.8 million euros, duties and non-income taxes of 0.7 million euros and contributions to public and private institutions of 0.6 million euros.

C) Financial income and charges

15) Income from equity investments

	Year 2001	Year 2000	Changes
Dividends from subsidiary companies			
Telecom Italia S.p.A. (accrued in the year)	46,459,164	890,580,620	(844,121,456)

Olivetti Holding B.V.	81,641,655	81,223,170	418,485
Tecnost S.p.A.	-	1,106,427	(1,106,427)
Tecnost Sistemi S.p.A.	301,323	-	301,323
Olivetti Finance N.V.	722,416,961	238,099,825	484,317,136
other subsidiary companies	607,561	233,204	374,357
Interest payable to third parties			
Bonds	62,139,142	13,743,814	48,395,328
Medium/long-term loans	28,089,997	27,505,093	584,904
Bank current accounts	29,281,339	14,619,713	14,661,626
Interest rate swap	2,116,366	3,075,474	(959,108)
Losses on exchange rate fluctuations	18,800,340	7,715,785	11,084,555
Interest, commissions and charges on other finance operations	11,996,663	10,101,584	1,895,079
Total	**966,628,422**	**407,828,947**	**558,799,475**

Financial charges amounted to 966.6 million euros, an increase of 558.8 million euros due in particular to:
- 484.3 million euros in respect of charges on borrowings from Olivetti Finance N.V. In the first nine months of the previous year, these charges were posted by Tecnost S.p.A, which was merged into and with Olivetti S.p.A. on 31 December 2000, with effect from 1 October 2000;
- 48.4 million euros for charges relating to bonds issued in the year.

D) Value adjustments to financial assets

19) Writedowns

a) of equity investments

The writedown of 172.3 million euros (10.2 million euros in 2000) mainly refers to the equity investment in Olivetti Tecnost S.p.A. , written down by 64.1 million euros, and in Seat Pagine Gialle S.p.A. written down by 108.1 million euros.
The equity investment in Olivetti Tecnost was written down to reflect the value of the portion of shareholders' equity as adjusted for consolidation purposes, considering also the net income expected for the next year.
The writedown of Seat Pagine Gialle was carried out on 30 June 2001, when the shares were classified under current assets as securities available for sale. It reflected the difference between book value at 31 December 2000 (1.88 euro per share) and the average stock market value in June (1.203 euro).
The heading also refers to the writedown of 2.9 million euros on shares acquired for trading purposes in Datalogic S.p.A. and Biesse S.p.A., to reflect the difference between the purchase price and the average stock market value in December 2001.

752

E) Extraordinary income and charges

20) Extraordinary income

	2001	2000	Changes
Gains on disposals			
Equity investments			
subsidiary companies	1,032,155	18,382,825	(17,350,670)
associated companies	10,106	-	10,106
Tangible fixed assets	3,313	21,050	(17,737)
Assignment of business to O.S.A. S.r.l. (now Antex Servizi Finanziari e Amministrativi S.p.A.)	-	75,226	(75,226)
	1,045,574	**18,479,101**	**(17,433,527)**
Other income	22,622,268	8,410,649	14,211,619
Total	**23,667,842**	**26,889,750**	**(3,221,908)**

Other income (22.6 million euros) was due to: 7.8 million euros from the sale of unexercised rights to subscribe share capital increases arranged in 2001; collection of amounts in excess of the price paid to repurchase receivables from Wang Global S.p.A., now Getronics S.p.A. (1.2 million euros); the portion of the sale price of equity investments disposed of in previous years that related to the collection of research grants (10.6 million euros); adjustments to costs relating to previous years (2.4 million); and other items (0.6 million euros).

21) Extraordinary charges

The heading amounted to 16.5 million euros (1.6 million euros in 2000), of which 15 million euros as the lump sum paid to the outgoing Chief Executive Officer by the Board of Directors.

22) Income taxes for the year

Income taxes for 2001 were due to provisions for current corporate income taxes (IRPEG) of 30.1 million euros, substitute tax of 0.3 million euros pursuant to art. 3 section 11 of Law No. 448/2001 and art. 19 Law No. 342/2000, and the release of the reserve for deferred taxes of 479.8 million euros, as already highlighted in the comment on the deferred tax reserve.
Therefore overall tax benefit of 449.4 million euros was posted.
Actual corporate income tax (IRPEG) for the year differs from the theoretical tax, calculated by adopting the tax rates applicable for 2001, as shown in the table below; with regard to the Local Tax on Production Activities (IRAP), no provisions were made since both the theoretical and the actual taxable amounts were negative.

753

Reconciliation between theoretical taxes and effective taxes reported in the Income Statement

Corporate Income Tax (IRPEG)

(in millions of euros)	Result for the year	Temporary differences	Taxes Current	Deferred
Income (loss) before taxes for the year 2001	**(1,320.9)**	**-**	**-**	**-**
Theoretical income tax charge (benefit)			**(251.0)**	
Temporary differences taxable in the following years	(80.9)	80.9	(15.4)	15.4
Temporary differences deductible in the following years	267.1	(3.8)	50.8	(0.9)
Temporary differences arisen in prior years	2,253.1	1,481.1	428.1	329.9
Permanent differences	2.0	-	0.4	-
Tax losses carried over from prior years	(962.2)	-	(182.8)	
Total differences	**1,479.1**	**1,558.2**	**281.1**	**344.4**
Taxable income	**158.2**	**1,558.2**		
less: reserve for deferred taxation as of 31 December 2000				(824.2)
Total income tax charge (benefit) for the year 2001			**30.1**	**(479.8)**

The temporary differences that arose in previous years mainly pertained to the capital gains recorded in 1999 (4,155.8 million euros, of which 1,662.3 million euros was already taxed in previous years) on the sale of 31.5% of the equity investment in OliMan Holding B.V., the taxation of which was deferred over five years, and to Telecom Italia dividends and related tax credits recorded on accrual in 2000 and collected in 2001 (1,413.6 million euros).
The taxable amount for the year of 158.2 million euros (after utilisation of tax losses from previous years of 962.2 million euros) gave rise to current taxes of 30.1 million euros (19% tax rate).
The reserve for deferred taxes (1,558.2 million) was determined by calculating the taxes at rates of 19% and 35%, which correspond to 238.6 million euros and 105.8 million euros respectively.

754

Other information

Remunerations to Parent Company Directors, Statutory Auditors and Chief Operating Officer

In compliance with the CONSOB resolution no. 11971/1999 details are provided below of the remunerations payable by the Parent Company and also by subsidiary companies on whatever basis and in whatever form to the Directors, Statutory Auditors and Chief Operating Officer.

	Description of appointment			Gross remunerations (in euros)				
Name	Title	Duration (days)	Notes	For the appointment	Non-cash benefits	Bonuses and other incentives	Other emoluments	Notes

TOTAL EMOLUMENTS				**2,784,668**	**8,250**	**413,166**	**35,796,243**	

(x) Olivetti emoluments are transferred to the employing company
1) Directorships in other Group companies
2) Member of Committees
3) Emoluments for offices in Telecom Italia Mobile S.p.A., Seat Pagine Gialle S.p.A. and Telespazio S.p.A. were tranferred to Telecom Italia S.p.A.
4) Emoluments for offices in Telecom Italia Mobile S.p.A. were transferred to Telecom Italia S.p.A.
5) Remuneration for subordinate job.
6) Chairman of the Board of Statutory Auditors of other Group Companies
7) Auditor of other Group Companies
8) Including emoluments paid in year 2001 by Olivetti S.p.A., Telecom Italia S.p.A. and Telecom Italia Mobile S.p.A. to Bonelli Erede Pappalardo professional association of which Mr. Sergio Erede is member.
9) Other emoluments

755

Furthermore, in connection with the share capital increase reserved for the managers of Olivetti S.p.A. and its subsidiary companies, duly approved by the Board of Directors on 24 February 2000 in execution of the proxies granted by the Extraordinary Shareholders' Meeting on 7 April 1999 and illustrated in the comments on the balance sheet heading "Share capital", the Chief Executive Officer Corrado Ariaudo, in his capacity as a manager of the Parent Company, was assigned 2,500,000 stock options at an exercise price of 3.705 euros. This stock option plan was subsequently revoked by the Board of Directors on 9 February 2001 and replaced with a new plan which, with an equal assignment of options, provides for an exercise price of 2.515 euros (amended following the share capital increases in 2001) and an exercise period between February 2002 and December 2004.
As part of the same plan, 12,500,000 stock options were apportioned to the then Chief Executive Officer Roberto Colaninno. Following Mr Colaninno's resignation on 31 July 2001, and also in consideration of the lump sum paid to him for settlement and annulment of all claims, as mentioned previously, these stock options have been revoked.
More details about the stock option plans mentioned above can be found in the section "Information on employee stock option plans" in the Directors' Report on Operations.

Legal proceedings

At 31 December 2001 the Parent Company was involved in various legal proceedings; according to the Company's legal advisers the outcome of such disputes should not have significant adverse effects on the Parent Company's equity and financial position.

Costs relating to the introduction of the euro

The revamping of the Parent Company information systems in connection with the introduction of the euro was completed in 2000.

Tax regime in the event of the distribution of reserves

- Additional paid-in capital reserve (3,196,212,781 euros). This represents a capital reserve and in the event of distribution, therefore, does not contribute to the formation of the taxable income of shareholders.
- Revaluation reserve (1,128,827 euros).

In the event of distribution, this reserve is treated as forming part of the Parent Company's and Shareholders' taxable income.

- Reserve for Treasury stock (2,298,156 euros).

This reserve would be treated as shareholders' taxable income, if made available and distributed, and the said shareholders would attract tax credits within the limits of the taxes applied to the assessed companies pursuant to article 105, paragraph 1, subsections a) and b) of the Income Tax Consolidated Text.

- Extraordinary reserve (1,888,261,068 euros).

In the event of distribution, this reserve is treated as shareholders' taxable income and the said shareholders would attract tax credits within the limits of the taxes applied to the assessed companies pursuant to article 105, paragraph 1, subsections a) and b) of the Income Tax Consolidated Text.

• Non-taxable reserves.
These comprise:
- Research grants reserve (Law No. 346/1988) for 8,741,403 euros;
- Technology Innovation grants reserve (Law No. 46/1982) for 685,713 euros;
- Capital investment grants reserve (Law No. 64/1986) for 695,110 euros;
- Value Added Tax deduction reserve pertaining to capital investments for 97,784 euros.
Should the above reserves be distributed they would be treated as forming the Parent Company's and the Shareholders' taxable income; should they be utilised for purposes other than covering losses of the year, they would be treated as forming the Parent Company's taxable income.

Explanatory Notes

Basis of presentation

The consolidated financial statements for the year ended 31 December 2001 have been prepared in accordance with Legislative Decree no. 127 of 9 April 1991. They comprise the Consolidated Balance Sheet (prepared in accordance with the formats specified in articles 2424 and 2424 bis of the Italian Civil Code with suitable adaptations), the Consolidated Income Statement (prepared in accordance with the formats specified in articles 2425 and 2425 bis of the Italian Civil Code with suitable adaptations) and these Explanatory Notes.
The explanatory notes are provided to illustrate, analyse and, in some cases, supplement the data reported in the financial statements. They include the information required by article 38 of Legislative Decree no. 127/1991 and by other provisions contained therein, as well as by provisions issued by the Italian Securities and Stock Exchange Board (CONSOB); they also provide additional information, even where not required by specific legislation, if deemed necessary to present a true and fair view.
The financial statements used for consolidation purposes are those as at 31 December 2001 approved by the Shareholders' Meetings of the individual companies or prepared by the respective Boards of Directors for such approval, adjusted, where necessary, to eliminate entries recorded solely for fiscal purposes and to align them with the accounting policies adopted by the Group. Such accounting policies are consistent with legislation governing consolidated financial statements, interpreted by the accounting principles established by the Italian Accounting Profession.

Consolidation area

The consolidated financial statements as at 31 December 2001 were prepared using the financial statements of the Parent Company Olivetti S.p.A. and those of the Groups and companies it controls directly and indirectly (that is to say, in which, at 31 December 2001, the Parent Company directly or indirectly held the majority of voting rights at ordinary Shareholders' Meetings, or sufficient votes to exercise a dominant influence), with the exception of a number of minor subsidiary companies and of companies sold since 31 December 2001. Specifically, Telecom Italia S.p.A. and its subsidiary companies (hereinafter referred to as the Telecom Italia Group), which contributed 96% of consolidated revenues, were included through line-by-line consolidation of the Telecom Italia Group consolidated financial statements (approved by the Board of Directors and audited by Reconta Ernst & Young S.p.A.), after the necessary consolidation adjustments.
Beginning with the consolidated financial statements as at 31 December 2001, Nortel Inversora and the Telecom Argentina Group (Nortel Inversora Group) were consolidated with the equity method; the Nortel Inversora Group was consolidated on a proportional basis in the 2000 consolidated financial statements pursuant to article 37 of Legislative Decree no. 127/1991.
To provide a basis for comparison, the most significant changes are also shown in respect of figures for 2000 restated after deconsolidation of the Nortel Inversora Group.

The complete list of investee companies is contained in the Exhibit to these explanatory notes ("List of companies included in the consolidated financial statements as at 31 December 2001 and of equity investments, pursuant to articles 38 and 39 of Legislative Decree no. 127/1991").
The main changes in the Telecom Italia Group consolidation area compared with 31 December 2000 are as follows:
a) inclusion in the consolidation area:
- for *Domestic Wireline*: the companies Latin American Nautilus, Mediterranean Nautilus, Telecom Italia Spain, TI Telecom Italia (Austria) Telekommunikationsdienste, Telecontact Center;
- for *Mobile*: TIM Brasil, TIM Celular Centro Sul (ex Bluecel), TIM Sao Paulo (ex Starcel), TIM Rio Norte (ex Unicel);
- for *International Operations*: Entel Chile Group; in the Jet Multimedia Group, Victorie Multimedia, Victoire Multimedia Informatique;
- for *Internet and Media*: the companies Free-Finance, Xoom.it, the groups Consodata, Telegate, TDL Infomedia and Holding Media e Comunicazione (ex Cecchi Gori Communications), NetCreations and a number of companies active in publishing and professional communications;
- for *IT Services*: Webred and Netikos Finland;
- for *Satellite Services*: Telespazio North America, e-Geos;
- for *Telecom Italia Lab*: Loquendo; Telecom Italia Lab S.A.; Telecom Italia Lab General Partner;
- for "others": ISM and N.V. Vertico.

The Seat Pagine Gialle, Jet Multimedia, Mageos Explorer (ex Europe Explorer) and Maxitel groups and the Corporacion Digitel and Eustema companies, which were consolidated only with regard to balance-sheet headings as at 31 December 2000, in the consolidated financial statements as at 31 December 2001 were consolidated line by line also with regard to income statement.
b) exclusion from the consolidation area:
- for *Domestic Wireline*: TMI Hong Kong, TMI Hungary;
- for *Mobile*: U-Mobil;
- for *International Operations*: Nortel Inversora, Telecom Argentina Group, Iber Explorer;
- for *Internet and Media*: Polix, Consodata Interactive, Consodata Italia, Infoconcert, Consodata Systeme, Living Lifestyle, companies of the Thomson Directories Group;
- for *IT Services*: Bisiel, Aska, Jmac Consiel, Sit;
- for *Satellite Services*: Com.star, Iridium Italia, Telespazio Ireland.

In fiscal 2000, the Sirti and Italtel groups were consolidated only with regard to income.

Consolidation principles

The most significant consolidation principles adopted for the consolidated financial statements as at 31 December 2001 are as follows:
a) the assets and liabilities of the companies consolidated on a line-by-line basis are stated by eliminating the book value of each consolidated equity investment against the related portion of shareholders' equity.

b) the assets and liabilities of companies controlled jointly with other bodies and consolidated with the proportional method are stated for a share equivalent to the Group's percentage of ownership, by eliminating the book value of each consolidated equity investment against the related portion of shareholders' equity.
c) unrealised gains and losses deriving from operations between Group companies are eliminated, as are all receivables, payables, dividends and transactions between companies in the consolidation area.
d) goodwill (or consolidation difference), defined as the difference between the purchase price of subsidiary companies and their current value at the time of acquisition, if positive, is classified under the asset heading "Consolidation differences", which represents the future earnings capacity of the company, and amortised over the period in which such goodwill is expected to provide benefit; if negative, it is classified under the equity reserve "Consolidation reserve". The income statements of subsidiaries acquired during the year are consolidated for the full year; pre-acquisition results not pertaining to the Group are reversed under a specific income statement heading.
Consolidation differences relating to equity investments in associated companies, if positive, are included in the investment cost and amortised over the period in which they are expected to provide benefit.
e) minority shareholders' interests in the equity and net result for the year of the consolidated subsidiaries are disclosed separately under specific headings of consolidated shareholders' equity and consolidated income, respectively.
f) capital gains and losses arising from the sale of shares in Group companies to third parties are recorded under income. In the event of a share capital increase of a Group company, subscribed by a minority shareholder only, any capital gains or losses arising as the difference between the value of the Group's share of equity before and after the various operations are recorded under income.
g) provisions and value adjustments recorded by consolidated companies to obtain tax benefits allowed under current legislation are eliminated from the consolidated financial statements, taking due account of any related tax effects.

Translation into euro of financial statements denominated in foreign currency

a) The financial statements of foreign subsidiary companies resident in non-European Monetary Union (EMU) countries are translated into euro by applying the year-end exchange rates to balance sheet headings and the average exchange rates for the year to income statement headings. Any differences arising in respect of the rates at the end of the previous financial year are reported separately under a specific consolidated shareholders' equity heading "Sundry reserves, retained earnings and accumulated losses".
The financial statements of foreign subsidiary companies resident in EMU countries are translated into euro using the fixed exchange rates defined by the European Commission on 31 December 1998.
b) The exchange rates at 31 December 2001 and 2000 and the average rates for 2001 and 2000 used to translate into euro the financial statements of foreign companies resident in EMU countries are set out below:

Euro/Local currency	
Italian Lira	1,936.27
Deutsche mark	1.95583
Belgian franc	40.3399
Spanish peseta	166.386
French franc	6.55957

778

The average exchange rates for 2001 and 2000 used to translate income statements denominated in non-EMU currencies were determined as follows:
- for companies in the Telecom Italia Group: the arithmetic average of the euro/foreign currency rates for 2001 and the Italian lire/foreign currency rates for 2000 detailed in the explanatory notes to the Telecom Italia consolidated financial statements for the years in question;
- for the other companies in the Olivetti Group: the average rates weighted against monthly revenues to take due account of seasonal business trends, in line with the principles adopted in the previous financial periods.

The financial statements of companies operating in highly inflationary economies, where cumulative inflation has exceeded 100% over the last three years (and is not expected to decrease in the short term), have been adjusted in accordance with inflation accounting procedures by restating historical book values on the basis of indices that reflect the real change in the purchasing power of local currencies. In order to avoid distortions to results, the year-end exchange rates have been used to translate the income statements of these companies, rather than the average rates for the year. The following companies adopt inflation accounting procedures: Digitel C.A. (Venezuela), Finsiel Romania S.r.l. (Romania) and IS Tim Telekomunikasyon Hitzmetleri A.S. (Turkey).

Economic trends in Argentina generated significant exchange rate changes following termination of parity with the US dollar. Financial statements denominated in Argentine pesos have been translated into euros by applying the average exchange rate for the income statement, based on an exchange rate of 1 peso for 1 US dollar, with the exception of exchange rate differences originating from items in currencies other than the peso, which, like the balance sheet, have been translated into euros based on an exchange rate of 1.7 pesos for 1 US dollar.

Accounting policies

The accounting policies adopted for the preparation of the consolidated financial statements comply with those established by law and are consistent with those adopted in the previous financial period.
The accounting policies adopted for the various headings are illustrated below.

Intangible fixed assets

Intangible fixed assets are stated at purchase or production cost including related accessory charges, and are amortised over their residual working life; intangible fixed assets are written down to reflect any other than temporary impairment in value; their book value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

Start-up and expansion costs are amortised over five years.

Industrial patents and intellectual property rights are amortised in respect of their expected working life, over five years (for industrial patents) or predominantly over three years (software), as from the year in which they enter service.

Concessions, licences, trademarks and similar rights are amortised in respect of their expected useful working life (licences are amortised over the term of the relevant contracts).
Purchased goodwill relating to the acquisition of businesses or business units is capitalised and generally amortised over five years.
Assets in process of formation and advance payments refer to costs sustained for current software development projects. Due to their nature and value, these projects are of high business and management importance and offer strong prospects of future revenues or containment of costs.
The heading Other includes expenses in respect of buildings owned by third parties (generally amortised over the term of the relevant leases), rights of way acquired by Telecom Italia to ensure extension of its transmission capacity over non-Italian territory (amortised over the residual life of the contracts with the foreign operators who own the facilities to which the rights refer).

Tangible fixed assets

Tangible fixed assets are recorded at purchase or construction cost restated in accordance with specific monetary revaluation laws and amortised over their residual working lives.
Assets are written down to reflect any other than temporary impairment in value; the original value is reinstated in subsequent periods if the reasons for such writedowns no longer exist.
Tangible fixed assets under construction are stated at the direct costs incurred.
Ordinary maintenance costs are charged in full to expenses.

Equity investments

Long-standing equity investments are classified as financial fixed assets; equity investments acquired for subsequent sale or intended to be sold are classified as financial assets not held as fixed assets.
Equity investments classified as financial fixed assets in unconsolidated companies in which at least 20% of voting rights are held are valued with the equity method. Other equity investments classified as financial fixed assets in unconsolidated companies are recorded at cost written down to the corresponding portion of shareholders' equity resulting from the latest financial statements of the investee company in order to reflect other than temporary impairments in value. Losses in value in excess of the corresponding book values are recorded under reserves for risks and charges. The book value of such equity investments in any case is determined on the basis of reasonable expectations of utility and recovery in future financial periods, if lower.
Equity investments purchased for trading purposes and consequently classified under current assets, in consolidated or unconsolidated listed companies, are stated at the lower of purchase cost and realisable value based on year-end stock market prices.
Writedowns of equity investments (both those held as financial fixed assets and those held as current assets) are eliminated in subsequent years if the reasons for such writedowns no longer exist.

Other securities (other than equity investments)

Securities to be held until maturity are classified as financial fixed assets; marketable securities are classified as financial assets not held as fixed assets.

Securities held as fixed assets are stated at purchase cost adjusted on an accrual basis to reflect the difference between purchase cost and redemption value, written down to reflect any other than temporary impairment in value.
Securities held as current assets are recorded at the lower of purchase cost, adjusted on an accrual basis to reflect the issue spread, and presumed realisable value based on market trends.
Writedowns of securities are eliminated in subsequent years if the reasons for such writedowns no longer exist.
Securities purchased through reverse repurchase agreements with an obligation of resale on maturity are classified as financial assets not held as fixed assets and stated at purchase cost. The differences between the spot and forward prices are charged or credited to the income statement on an accrual basis, with a counter-item under accrued income/expenses.

Inventories

Inventories are valued at the lower of purchase or production costs and market value.
The methods used to determine cost are as follows:
- raw materials and finished products: LIFO based on annual layers for the Telecom Italia Group and weighted average for the Olivetti Tecnost Group;
- goods: weighted average;
- work-in-progress and semi-finished products: production cost;
- short-term contract work-in-progress: industrial cost;
- long-term contract work-in-progress: percentage of completion method, based on the agreed considerations, also taking account of presumed losses until completion and other possible related risks.

Raw materials, finished products and goods in excess of foreseeable production requirements, slow-moving items or items subject to obsolescence are written down to presumed realisable value.

Accounts receivable and payable

Accounts receivable are stated at estimated realisable value and classified under financial fixed assets or current assets.
Accounts payable are stated at face value.
Foreign currency receivables and payables are stated on the basis of year-end exchange rates; any translation gains or losses arising in respect of the original exchange rates are recorded under "financial income" and "financial charges" respectively.
Receivables due to the consolidated subsidiary TIM from almost all its dealers have been transferred to a factoring company (without recourse, within the agreed limits). As each receivable falls due, the factoring company pays TIM the relative face value, minus amounts due to dealers for services rendered. TIM has not provided guarantees in respect of this operation.

Telephone Companies Employees Social Security Fund

Pursuant to law no. 58/1992, Telecom Italia is required to provide full national insurance coverage for all employees on the payrolls of STET, SIP, Italcable and Telespazio as at 20 February 1992, as well as for all employees transferred from the Public Administration to IRITEL, through the Telephone Companies

Employees Social Security Fund (Fondo Previdenza Telefonici – FPT). This coverage also extends to previous periods of employment in other companies. The amounts due are to be calculated by the Italian National Social Security Board (INPS) and paid in 15 annual instalments. Subsequently, art. 66 of Law no. 427/1993 ruled that these costs be recorded in the company's financial statements on a cash basis and deducted against taxes for the years in which the payments are made.
The amount of the liability is uncertain, since Telecom Italia and the INPS do not agree on the calculation methods to be used.
The matter is currently being examined in the Courts. Telecom Italia believes that the total liability at 31 December 2001 in respect of the above payments is between 960 million euros and 1,284 million euros (of which 334 million have already been paid), net of the residual amount already recorded by IRITEL and currently carried in the financial statements of Telecom Italia and TIM following the merger of IRITEL.
In accordance with accepted accounting principles, a payable for an amount consistent with the minimum estimated liability has been recorded in the Olivetti Group's consolidated financial statements for the purposes of determining consolidation goodwill.

Accruals, prepayments and deferrals

Accruals, prepayments and deferrals are determined to reflect the correct apportionment of costs and revenues applicable to two or more financial periods.

Reserves for risks and charges

Taxation: reserves are provided to cover presumed tax liabilities (including any surcharges and arrears interest) in respect of open or disputed positions, and also to cover deferred taxes.
In addition, deferred and prepaid taxes are recognised for temporary differences between the book value and the tax value of the assets and liabilities of the individual consolidated companies, and also for consolidation adjustments.
In accordance with prudent accounting principles, prepaid tax assets are not recognised unless there is a reasonable certainty that future taxable income will be available in the years in which the temporary differences will be reversed.
Prepaid taxes and deferred taxes are recorded in the consolidated financial balance sheet under, respectively, the current assets heading "receivables due from others" and the "reserve for taxation" as a counter-item to "income taxes for the year".
The tax benefit of tax loss carry-forwards is recognised to the extent that there is a reasonable expectation of realising the said benefit.
Deferred taxes on equity reserves and provisions not subject to taxation of consolidated companies or companies accounted for using the equity method are recognised when such reserves are distributed or utilised and are thus liable for taxation.

Other provisions: these amounts are provided largely to cover likely known charges whose timing and extent are however uncertain at year-end. The provisions reflect best estimates based on the commitments undertaken and the information available.

Employee severance indemnities

This provision is formed in accordance with current legislation and labour contracts and reflects the liability accrued to all employees of the consolidated companies as at the balance-sheet date. Receivables arising as a result of advance tax payments on employee severance indemnities pursuant to law no. 662 of 23 December 1996 and subsequent amendments are revalued in accordance with such law and classified under the financial fixed assets heading "other receivables".

Grants

Grants related to income (directly credited to the Income Statement) and grants related to assets are recognised in the period in which the documents confirming payment are filed, or in the period in which the related costs are sustained in cases when payment is based on established procedures.
Specifically, grants related to assets are recognised on an accrual basis: they are classified as deferred income and subsequently credited to income as the assets to which they refer are amortised.

Revenues

Revenues are recognised as they arise, as follows:
a) *telecommunications services*: in the year the services are provided; in particular, traffic revenues have been stated gross of amounts due to third-party operators;
b) *IT operations, innovative network services and other operations*: to the extent that the relevant services are provided during the year;
c) *manufacturing and installation operations*: on delivery of goods in the case of supplies or on completion of work in the case of services, consistently with contractual commitments;
d) *office products*: on delivery.

Leased assets

Assets held under finance lease contracts are classified under fixed assets and amortized beginning from the contract date at the rates applied to proprietary assets of a similar nature. A financial payable is recorded for an equivalent amount and gradually reduced as payment is made. Financial charges and amortization charges provided in respect of leased asset values are charged to income on an accrual basis. Capital gains realised on the sale of assets to leasing companies that are immediately leased back through finance lease contracts are deferred in the balance sheet and credited to consolidated income over the lease term.

Dividends

Dividend income from subsidiaries is recorded in the period to which they accrue (i.e., the year in which the corresponding income is earned) and eliminated during consolidation. Deferred taxes are provided in respect of such income. In line with accrual accounting procedures, tax credits arising on collection of dividends are also credited to deferred tax assets in the year the dividends accrue, with a balance-sheet counter-item under the heading "Prepaid taxes" in other receivables.

Dividends from non-subsidiary companies and related tax credits are recorded in the year in which such dividends are declared, which generally coincides with the year of collection.

Memorandum accounts

Guarantees given - referring in the main to suretyships - are stated for an amount reflecting the value of securities, net of counter-securities received.
Purchase and sale commitments reflect year-end contractual amounts which have not been included in the normal "operating cycle" and portions not yet executed.

Derivative instruments

Hedging instruments are assessed on a consistent basis with the assets and liabilities covered and the relative financial flows are charged to income on an accrual basis over the term of the contract, with accrual and deferral contra-items under assets and liabilities.
Non-hedging derivatives are assessed by comparing the instrument value at the contract date and its year-end value. Any losses are charged to income, while gains are not recorded since they are not realised.
Premiums collected (paid) on the sale or purchase of put and call options on listed portfolio shares are classified under "other payables" or "receivables due from others". If the option is exercised, the premium collected (paid) is treated as an accessory component of the purchase cost or selling price of the underlying instruments; if the option is not exercised, the premium collected (paid) is recorded under financial income (financial charges). Purchase or sale commitments in respect of the sale of put and call options are illustrated in these notes, in the section "Hedging instruments and other derivatives".

Exceptions allowed under article 2423, paragraph 4, of the Italian Civil Code

No exceptions pursuant to article 2423, par 4, of the Italian Civil Code have been made in the financial statements as at 31 December 2001.

Changes in the application of accounting policies

No changes have been adopted in accounting or evaluation policies for financial statement items in 2001.

Comments on consolidated assets

B) Fixed assets

I. Intangible fixed assets

Net intangible fixed assets at 31 December 2001 amounted to 39,220 million euros (39,640 million euros at 31 December 2000).

(in millions of euros)	Net book value at 31.12.2000 original	Exclusion of Nortel Inversora from consolidation	Net book value at 31.12.2000 restated	Increases	Amortisations	Other changes	Net book value at 31.12.2001
Start-up and expansion costs	94		94	100	45	(23)	126
Industrial patents and intellectual property rights	837	(10)	827	492	966	938	1,291
Concessions, licences, trademarks and similar rights	3,505	(190)	3,315	1,142	84	(66)	4,307
Goodwill	72		72	3	12	(13)	50
Assets in process of formation and advance payments	840		840	1,018		(984)	874
Other	654	(138)	516	159	176	236	735
Consolidation differences	33,638	(128)	33,510	1,193	2,282	(584)	31,837
Total	**39,640**	**(466)**	**39,174**	**4,107**	**3,565**	**(496)**	**39,220**

Start-up and expansion costs comprised costs relating to share capital increases and bond issues.
Industrial patents and intellectual property rights essentially related to application software owned or licensed indefinitely, largely attributable to the Telecom Italia Group.
Concessions, licences, trademarks and similar rights amounted to 4,307 million euros, an increase of 802 million euros mainly due to the acquisition of new mobile telephone licences in Brazil and Greece.
Assets in process of formation and advance payments amounted to 874 million euros and reflected costs sustained by Telecom Italia for software development projects in progress.
The heading *Other* amounted to 735 million euros and included:
a) 238 million euros for leasehold improvements, of which 231 million euros attributable to the Telecom Italia Group;
b) 48 million euros for bank fees and commissions in respect of the public tender offer on Telecom Italia;
c) 175 million euros for bond issuance expenses.
Consolidation differences (or consolidation goodwill) at 31 December 2001 amounted to 31,837 million euros (33,638 million euros at 31 December 2000) and included:
• 21,946 million euros for the acquisition of 52.12% of the ordinary share capital of Telecom Italia, net of amortisation totalling 3,192 million euros. Aggregate consolidation goodwill was originally stated at 25,534 million euros (justified by stock market prices, availability of the majority of voting rights and

earnings expectations as a result of implementation of the Industrial Business Plan drawn up at the time of the public tender offer) to be amortised over a period of 20 years beginning from the second half of 1999;

• 8,953 million euros for the acquisition by the Telecom Italia Group of the equity investment in Seat Pagine Gialle and other companies.

The heading reflects a decrease of 1,801 million euros from 2000 as a result of the 1,017 million euros writedown generated by the Telecom Italia Group net of consolidation adjustments, amortisation charges for the year totalling 2,282 million euros, deconsolidation of the Nortel Inversora Group for 128 million euros, set against investments for the year and other net changes for 1,626 million euros.

The net decrease of 420 million euros in intangible fixed assets in 2001 arose as follows:

(in millions of euros)		Year 2001
Costs for share capital increases and issue of bonds of Olivetti S.p.A.		153
Consolidation goodwill on acquisition of Entel Chile controlling stake		731
Costs of acquisition of licenses by TIM in Brazil and Greece		1,080
Consolidation goodwill on Holding Media e Comunicazione		65
Other investments		2,078
Total capital investments		4,107
Amortisations		
on consolidation goodwill regarding Telecom Italia equity investment	(1,299)	
other amortisations	(2,266)	
Total amortisations		(3,565)
Writedowns of consolidation goodwill		(1,017)
Total amortisations and writedowns		(4,582)
Effect of change in the consolidation area:		
Nortel Inversora Group		(466)
Entel Chile Group and other companies		308
Other differences		213
Total net decrease		**(420)**

II. Tangible fixed assets

At 31 December 2001 net tangible fixed assets amounted to 22,097 million euros (23,776 million euros at 31 December 2000) and comprised:

(in millions of euros)	Gross value at 31.12.2001	Accumulated depreciation at 31.12.2001	Net book value at 31.12.2001 (a)	Net book value at 31.12.2000 restated (b)	Net book value at 31.12.2000 original (c)	Changes (a-c)	Changes (b-c)
Land and buildings	4,836	1,699	3,137	2,917	3,208	(71)	(291)
Plant and machinery	57,238	40,543	16,695	16,343	18,170	(1,475)	(1,827)
Equipment	1,102	1,019	83	93	92	(9)	1
Other assets	2,080	1,334	746	613	849	(103)	(236)
Assets under construction	1,436		1,436	1,106	1,457	(21)	(351)
Total	**66,692**	**44,595**	**22,097**	**21,072**	**23,776**	**(1,679)**	**(2,704)**

Changes in tangible fixed assets during 2001 were as follows:

(in millions of euros)	
Net book value as of 31 December 2000 (original)	**23,776**
Exclusion of Nortel Inversora Group from consolidation	(2,704)
Net book value as of 31 December 2000 (restated)	**21,072**
Additions	4,317
Depreciation	(4,080)
Changes in the consolidation area	1,347
Disposals and other changes	(559)
Net book value as of 31 December 2001	**22,097**

Additions totalled 4,317 million euros, of which 4,254 million euros for the Telecom Italia Group and 63 million euros for the other Group companies.
Additions for the Telecom Italia Group were as follows:

(in millions of euros)	Year 2001
Domestic Wireline	1,976
Mobile	1,547
International Operations	427
Internet and media	82
Satellite Services	27
IT Services	87
Telecom Italia Lab	12
Sundry operations and consolidation adjustments	96
Total	**4,254**

787

Additions for the other group companies totalled 63 million euros, and related to new industrial businesses at the Olivetti Tecnost Group for 24 million euros, to the Olivetti Multiservices Group for 34 million euros and to other Group companies for 5 million euros.
Depreciation was provided at rates deemed to reflect the residual useful life of the assets concerned. These rates, related to the period of utilisation as regards additions for the period, were as follows:

Buildings	3-10%
Plant and machinery	3-40%
Industrial and commercial equipment	15-40%
Other assets	12-33%

III. Financial fixed assets

Financial fixed assets at 31 December 2001 amounted overall to 7,750 million euros compared to 9,386 million euros at 31 December 2000, as follows:

(in millions of euros)	31.12.2001 (a)	31.12.2000 restated (b)	31.12.2000 original (c)	Changes (a-c)	Changes (b-c)

Total	**5,057**	**7,966**	**7,579**	**(2,522)**	**387**

Equity investments in associated companies (4,651 million euros) comprised:

(in millions of euros)	Book value as of 31.12.2001	Original book value as of 31.12.2000	Changes
Telekom Austria	1,460	1,819	(359)
Globo.com	24	809	(785)
Solpart Participaçoes	238	461	(223)
Mobilkom Austria	544	586	(42)
AUNA	690	509	181
Etec S.A.	551	538	13
Telekom Srbija	195	195	-
Entel Chile		379	(379)
IS Tim	81	353	(272)
B.D.T.	158	172	(14)
Holding Media e Comunicazione		118	(118)
IM.SER	141	204	(63)
Netco Redes	125	135	(10)
Telemaco immobiliare	91		91
Mirror International Holding	94		94
Italtel Holding	65	105	(40)
Stream	32	100	(68)
Astrolink LLC		262	(262)
Eutelsat		216	(216)
Other	162	205	(43)
Total	**4,651**	**7,166**	**(2,515)**

The aggregate value of these equity investments includes the residual amount to be amortised (1,688 million euros at 31 December 2001 and 2,915 million euros at 31 December 2000) of the positive consolidation difference arising at the time of acquisition between the purchase cost and the value of the corresponding net equity portion of the investee companies. The consolidation difference mainly referred to:

(in millions of euros)	Book value as of 31.12.2001	Book value as of 31.12.2000	Changes
Telekom Austria	677	977	(300)
Globo.com	-	786	(786)
Mobilkom Austria	280	306	(26)
AUNA	253	280	(27)
Etec S.A.	106	112	(6)
Entel Chile	-	162	(162)
B.D.T.	121	133	(12)
Netco Redes	103	113	(10)
Other	148	46	102
Total	**1,688**	**2,915**	**(1,227)**

In addition to the reduction of 1,227 million euros illustrated above, other net reductions totalling 1,288 million euros arose from extraordinary writedowns and disposals, offset in part by new acquisitions and the overall amount of adjustments using the equity method.
Advances on future capital contributions amounted to 1,659 million euros and referred mainly to payments made by TIM International for IS Tim.

Other receivables

Other receivables classified as financial fixed assets (but not included in the net financial position) at 31 December 2001 amounted to 472 million euros (of which 82 million euros short-term and 390 million euros medium/long-term). They included 117 million euros for receivables, including revaluations, arising from advance tax payments on employee severance indemnities, 117 million euros due from associated companies, mainly for borrowings granted by the Telecom Italia Group to its foreign investee companies, in particular to B.D.T. (108 million euros), and 87 million euros for loans to personnel.
At 31 December 2000 other receivables amounted to 480 million euros, of which 111 million euros short-term and 369 million euros medium/long-term.

Other securities

The balance on this heading at 31 December 2001 totalled 87 million euros (669 million euros at 31 December 2000) and comprised:
- 86 million euros of other securities, mainly units in the Wiseequity S.p.A. closed mutual fund held by Seat Pagine Gialle (53 million euros);
- 1 million euros of guarantee deposits.

The net reduction of 582 million euros arose for 662 million euros from the cancellation of Telecom Italia treasury savings stock following the free capital increase arranged when share capital was re-denominated in euros.

Treasury shares held by the Parent Company and by its subsidiary Olivetti International S.A.

At 31 December 2001 Olivetti S.p.A. and Olivetti International S.A. held a total of 214,628,828 Parent Company ordinary shares, carried at a book value of 393 million euros. Treasury shares held by the Parent Company Olivetti S.p.A. (2,697,500) are carried at 2 million euros and arose partly from purchases authorised by the Shareholders' Meeting of stock held by employees of the Parent Company and its subsidiaries. Shares held by Olivetti International S.A. (211,931,328) were obtained in joint exchange with Tecnost S.p.A. shares following the upstream merger of Tecnost into Olivetti and are carried at an aggregate value of 391 million euros, the original book value of the Tecnost shares.
The Olivetti S.p.A. Shareholders' Meeting of 4 October 2001 authorised the Board of Directors, pursuant to article 2357 ter, par 1, to dispose of the 2,697,500 treasury shares detailed above by 31 December 2002 by assigning, in one or more tranches, stock options to former employees of the Parent Company and its subsidiary companies who are still in active service in the Group.

C) Current assets

I. Inventories

Net inventories at 31 December 2001 amounted to 861 million euros (968 million euros at 31 December 2000):

(in millions of euros)	31.12.2001 (a)	31.12.2000 restated (b)	31.12.2000 original (c)	Changes (a-c)	Changes (b-c)
Raw materials	42	50	51	(9)	(1)
Work-in-progress	29	32	35	(6)	(3)
Total manufacturing inventories	71	82	86	(15)	(4)
Finished products and goods for resale:					
in respect of group core business	409	336	382	27	(46)
property for sale	27	20	20	7	-
	436	356	402	34	(46)
Contract work-in-progress	352	471	471	(119)	-
Advance payments	2	9	9	(7)	-
Total	**861**	**918**	**968**	**(107)**	**(50)**

Long-term contract work-in-progress reflects considerations due under contractual terms, according to the percentage of completion method.
Property for sale comprised land and buildings in the Olivetti Group's real estate, as well as residential real estate whose construction or restructuring had not been completed by the contractors as of 31 December 2001.
The net decrease of 107 million euros includes 50 million euros for the deconsolidation of the Nortel Inversora Group.

II. Receivables

Accounts receivable not held as fixed assets at 31 December 2001 amounted to 14,488 million euros (13,597 million euros at 31 December 2000).

(in millions of euros)	31.12.2001 (a)	31.12.2000 restated (b)	31.12.2000 original (c)	Changes (a-c)	Changes (b-c)

Total	**13,760**	**12,336**	**12,838**	**922**	**(502)**

Trade receivables before allowances for bad debts amounted to 9,081 million euros and referred in the main to amounts due for telecommunications services and supplies of office products. They related to Telecom Italia (4,242 million euros), TIM (917 million euros) and the Seat Pagine Gialle Group (885 million euros). They also included 1,610 million euros for amounts due from other telecommunications services providers.

Receivables were written down to estimated realisable value. Such writedowns mainly concerned amounts due to the Group's telecommunications companies.

During 2001, Telecom Italia S.p.A. transacted securitisation operations which generated a decrease of 877 million euros in trade receivables as at 31 December 2001, of which 684 million euros were not yet due, and an improvement of 848 million euros in net financial indebtedness.

Factoring operations totalling 3,516 million euros were also arranged, of which 3,297 million euros relating to TIM and 219 million euros to other Group companies; ceded receivables not yet due at 31 December 2001 amounted to 130 million euros.

Other short-term non-financial receivables amounted to 4,354 million euros (3,197 million euros at 31 December 2000), and comprised:

(in millions of euros)	31.12.2001	31.12.2000 original	Changes
Subsidies and grants due from the State and other public bodies	43	39	4
Amounts collected from customers, currently being credited	210	187	23
Amounts due from tax authorities	2,215	863	1,352
Prepaid taxes	991	1,118	(127)
Amounts due from employees	94	79	15
Sundry amounts due (from the State and other public bodies and sundry items)	801	911	(110)
Total	**4,354**	**3,197**	**1,157**

Receivables in respect of prepaid taxes reflect the tax benefit arising from prepaid taxes not offset against deferred taxes, determined on the basis of the temporary differences that will be reversed in 2002 and included 26 million euros for prepaid taxes (or deferred tax assets) on dividends from Telecom Italia S.p.A. recorded as accrued in 2001.

Receivables due after 12 months

Receivables due after 12 months at 31 December 2001 amounted overall to 728 million euros (759 million euros at 31 December 2000) and comprised:

- 704 million euros for prepaid taxes (691 million euros at 31 December 2000), of which 238 million euros for the entry in the Olivetti consolidated financial statements only of the Telephone Companies Employee Social Security Fund payable (accounted on a cash basis by the Telecom Italia Group).
- 24 million euros for other receivables (68 million euros in 2000) of which 9 million euros due from the tax authorities.

II. Financial assets not held as fixed assets

These assets totalled 4,013 million euros at 31 December 2001 (3,649 million euros at 31 December 2000).

(in millions of euros)	31.12.2001 (a)	31.12.2000 restated (b)	31.12.2000 original (c)	Changes (a–c)	Changes (b–c)
Equity investments in subsidiary companies	247	696	696	(449)	-
Equity investments in associated companies	134	6	6	128	-
Other equity investments	12	37	37	(25)	-
Securities	3,616	2,759	2,909	707	(150)
Receivables for securities held under reverse repurchase agreements	4	1	1	3	-
Total	**4,013**	**3,499**	**3,649**	**364**	**(150)**

Equity investments available for future divestments are classified as equity investments under current assets and carried at the lower of purchase cost and presumed realisable value based on stock market prices in the last month of the year.
At 31 December 2001, equity investments in subsidiary companies amounted to 247 million euros and related primarily to shares held by companies in the Telecom Italia Group.
Equity investments in associated companies amounted to 134 million euros and referred to equity investments in Lottomatica S.p.A..
Equity investment portions acquired for trading purposes relating to listed companies, including those consolidated in full, are classified as securities and recorded at the lower of purchase cost and presumed realisable value based on year-end stock market prices.
Aggregate securities amounted to 3,616 million euros at 31 December 2001 and were held in the main by Group finance companies in connection with trading activities; they included 1,935 million euros for Italian government securities and bonds held by the Telecom Italia Group and 1,681 million euros for securities held by other Olivetti Group companies.

III. Liquid funds

At 31 December 2001 liquid funds amounted to 3,702 million euros (2,771 million euros at 31 December 2000), including 763 million euros for the Telecom Italia Group. They consisted mainly of cash held in bank current accounts. The net increase of 931 million euros reflected increases of 1,473 million euros for the other Olivetti companies (mainly as a result of share capital increases) and a decrease of 542 million euros for the Telecom Italia Group.

D) Accrued income and prepaid expenses

Accrued income and prepaid expenses at 31 December 2001 amounted to 2,095 million euros (1,572 million euros at 31 December 2000).

(in millions of euros)	31.12.2001 (a)	31.12.2000 restated (b)	31.12.2000 original (c)	Changes (a-c)	Changes (b-c)

within 12 months	59	79	79	(20)	-
after 12 months	693	325	325	368	-
other	734	849	865	(131)	(16)
Discounts on bond issues and other similar charges on loans	131	23	24	107	(1)
Total prepaid expenses and discounts	**1,617**	**1,276**	**1,293**	**324**	**(17)**
Total	**2,095**	**1,555**	**1,572**	**523**	**(17)**

Prepaid expenses in respect of interest charges due after 12 months amounted to 693 million euros at 31 December 2001 and consisted of the redemption premium on the Olivetti 1.5% 2001-2004 and Olivetti 1.5% 2001-2010 bonds issued by the Parent Company in 2001, and on the 2000-2005 Bond exchangeable for Telecom Italia ordinary shares issued by Olivetti Finance N.V. in 2000, for the portions not accruing in 2001.

The 368 million euros increase arose mainly from the redemption premium on the bonds issued by the Parent Company in 2001, for the portions not accruing in 2001.

Comments on consolidated liabilities and shareholders' equity

A) Shareholders' equity

I. Share capital

The share capital of Olivetti S.p.A. as at 31 December 2001, fully subscribed, paid-up and filed with the Companies Register, was represented by 8,783,701,564 ordinary shares with a par value of 1 euro each (4,914,694,381 ordinary shares as at 31 December 2000) for an aggregate value of 8,783,701,564 euros (4,914,694,381 euros as at 31 December 2000).
The following operations determined the net increase of 3,869,007,183 euros during 2001:
• share capital increases subscribed by 31 December 2000 for an aggregate amount of 1,999,862,926 euros, as follows:
- 397,707 euros, following conversion of 360,695 "Olivetti floating rate 1998-2002" bonds and exercise of 37,012 "Olivetti 1998-2002 ordinary share warrants" filed with the Companies Register in 2001;
- for a par value of 1,999,439,092 euros through issuance of 1,999,439,092 ordinary shares following the merger of Tecnost S.p.A. into and with Olivetti S.p.A. on 31 December 2000, filed with the Companies Register in 2001;
- for a par value of 26,127 euros following exercise in December 2000 of a same number of "Olivetti 1998-2002 ordinary share warrants" for which the relevant shares were issued in January 2001;
• share capital increases for an aggregate amount of 7,213,223 euros following conversion of 7,213,223 "Olivetti floating rate 1998-2002" bonds with a par value of 1,000 Italian lire each (0.5163 euros) and utilisation of an amount of 3,487,904 euros from the "Reserve for the conversion of Olivetti floating rate 1998-2002 bonds" formed following re-denomination of share capital in euros;
• share capital increases for an aggregate amount of 22,307,931 euros following exercise of warrants:
- for a par value of 3,891,093 euros following exercise of "Olivetti 1998-2002 ordinary share warrants"; the increase was effected for 2,009,582 euros against payment (1,000 Italian lire per share) and for 1,881,511 euros on a free basis (utilisation of the "Reserve for the exercise of Olivetti 1998-2002 ordinary share warrants" formed following re-denomination of share capital in euros);
- for a par value of 18,216,685 euros (in addition to a share premium of 11,488,562 euros) following exercise of an equal number of "Olivetti 1999-2001 share warrants" assigned to managers of the Parent Company and its subsidiaries; the issue was effected for 9,408,133 euros against payment (1,000 Italian lire par value for each share) and for 8,808,552 euros on a free basis through utilisation of the "Reserve for the exercise of Olivetti 1999-2001 (warrants or options) reserved for managers of the Parent Company and its subsidiaries" formed following re-denomination of share capital in euros;
- for a par value of 7,308 euros (in addition to a share premium of 20,709 euros) following exercise of 6,525 "Olivetti ex Tecnost 1999-2004 warrants" on an exchange basis of 1.12 Olivetti shares per warrant; the issue was effected for 1,685 euros against payment and for 5,623 euros on a free basis through utilisation of the "Reserve for the exercise of ex Tecnost 1999-2004 warrants" formed following re-denomination of Tecnost S.p.A. share capital in euros;

796

– for a par value of 192,845 euros (in addition to a share premium of 192,818 euros) following exercise of 385,690 "Olivetti 2001-2002 ordinary share warrants";
• share capital increases for an aggregate amount of 1,839,623,103 euros through the following rights issues:
– for a par value of 348,249,405 euros (in addition to a share premium of 557,199,048) in execution of the Board of Directors' resolution of 18 December 2000 in respect of the proxy granted by the Extraordinary Shareholders' Meeting of 7 April 1999;
– for a par value of 1,491,373,698 euros in execution of the Board of Directors' resolution of 13 October 2001 in respect of the proxies granted by the Extraordinary Shareholders' Meetings of 7 April 1999 and 13 October 2001.

Future potential changes in share capital

The following were still outstanding at 31 December 2001:
– 30,352,768 "Olivetti floating rate 1998-2002" bonds; if converted these bonds would generate a share capital increase for a total par value of 30.4 million euros, of which 14.7 million euros from use of the reserve for free capital increases;
– 23,169,150 "Olivetti 1998-2002 ordinary share warrants" for an aggregate par value of 23.2 million euros, of which 11.2 million euros from use of the reserve for free capital increase;
– 137,358,025 "Olivetti ex Tecnost 1999-2004 warrants" exercisable at a floating price until expiry. If exercised, these warrants would generate a share capital increase including share premium for a total varying from a minimum of 499.8 million euros (January 2002) to a maximum of 711.7 million euros (June 2004), to which 118.4 million euros from utilisation of reserves formed for free capital increase should be added;
– 487,549,167 Olivetti 1.5% 2001-2004 convertible bonds (convertible as from 1 January 2002) with redemption premium, which would generate a share capital increase for an aggregate par value of 487.5 million euros;
– 5,654,982 "Olivetti 1999-2001 free warrants assigned to managers of the parent Company and its subsidiaries"; if exercised, these warrants would generate a share capital increase for an overall value of 5.7 million euros (including utilisation of an amount of 2.7 million euros from the reserve formed for free capital increase). This plan expired on 31 January 2002 with exercise of all outstanding warrants;
– 347,839,626 "Olivetti 2001-2002 ordinary share warrants" which, if exercised, would generate a share capital increase for an aggregate par value of 173.9 million euros (in addition to a share premium of 150.8 million euros);
– 2,412,962,875 "Olivetti 1.5% 2001-2010 convertible bonds with redemption premium", in respect of which at 31 December 2001 an equal number of Olivetti ordinary shares could be issued (as from 22 January 2002 until 15 December 2009) for an aggregate par value of 2,413 million euros.
In connection with the proxy granted by the Extraordinary Shareholders' Meeting of 7 April 1999 pursuant to art. 2443 of the Italian Civil Code, the Board of Directors meeting of 24 February 2000 approved a Three-Year Stock Option Plan from 1 January 2002 to 31 December 2004, assigning to approximately one hundred managers of the Parent Company and its subsidiaries 29,500,000 free warrants for subscription of an equal number of Olivetti ordinary shares at a price of 3.308 euros per share (after adjustment for

the share capital increases of 2001), corresponding to the normal value of Olivetti ordinary shares at the date of the Board of Directors' Meeting.
The stock options were to have been exercised in three groups in the period between 1 November and 15 December of 2002, 2003 and 2004 or accumulated until the end of the Plan.
Subsequently, the Board of Directors' Meeting of 9 February 2001 passed a resolution to reverse the previous resolution of 24 February 2000 and to raise share capital by an aggregate amount of 29 million euros through issue of 29 million shares at a subscription price of 2.515 euros per share (after adjustment for the share capital increases of 2001) reserved for managers of the Parent Company and its subsidiaries and servicing the warrants to be assigned to such managers under the "February 2002 - December 2004 Three-Year Stock Option Plan"; no changes were made to terms and conditions applying to stock options already assigned to managers on the payroll as of 24 February 2000 who had since left the Group's employ.

I bis. Share capital increase to be filed with the Companies Register pursuant to art. 2444 of the Italian Civil Code

This Parent Company caption amounted to 839,593 euros at 31 December 2001 (397,707 euros at 31 December 2000). It included the par value of the shares issued by Olivetti S.p.A. in respect of share capital increases effected in 2001 which had not been filed with the Companies Register by the end of the year.

I ter. Share capital increase payments relating to shares to be issued

At 31 December 2001 this Parent Company heading (which is not disclosed in the Consolidated Balance Sheet given the limited amount involved) amounted to 26,954 euros (26,127 euros at 31 December 2000).

II. Additional paid-in capital

This Parent Company reserve amounted to 3,765,113,918 euros at 31 December 2001 compared to 3,196,212,781 euros at 31 December 2000, a net increase of 568,901,137 euros which reflected the following movements:
- 557,199,048 euros for the share capital increase subscribed in 2001 (348,249,405 euros) implementing the Directors' resolution of 18 December 2000 in respect of the proxy granted by the Extraordinary Shareholders' Meeting of 7 April 1999;
- 11,488,562 euros for the share capital increase subscribed in 2001 (18,216,685 euros) following exercise of 18,216,685 stock options;
- 20,709 euros for the share capital increase subscribed in 2001 (7,308 euros) following exercise of 6,525 "Olivetti ex Tecnost 1999-2004 warrants";
- 192,818 euros for the share capital increase subscribed in 2001 (192,845 euros) following exercise of 385,690 "Olivetti 2001-2002 ordinary share warrants".

II bis. Additional paid-in capital in respect of share capital increases to be filed with the Companies Register and of shares to be issued

This Parent Company reserve (which is not disclosed in the Consolidated Balance Sheet given the immaterial amount involved) amounted to 10,442 euros at 31 December 2001.

III. Revaluation reserve

This Parent Company caption amounted to 1,128,827 euros (unchanged from 31 December 2000) and consisted of the revaluation reserve previously stated in the books of the merged company Tecnost S.p.A. and re-formed in the books of Olivetti S.p.A..

IV. Legal reserve

This Parent Company reserve amounted to 920,809,760 euros at 31 December 2001, an increase of 43,491,002 euros from 31 December 2000 as a result of allocation of part of 2000 net income.

V. Reserve for treasury stock

This reserve of 2,298,156 euros reflected the value of 2,697,500 shares issued and held by the Parent Company and classified in the balance sheet under financial fixed assets.

VII. Other reserves

a) Other Parent Company reserves

At 31 December 2001 these reserves amounted to a total of 2,061,056,125 euros, compared to 2,075,652,903 euros at 31 December 2000, with a total net decrease of 14,596,778 euros.

1) Extraordinary reserve

At 31 December 2001 this reserve amounted to 1,888,261,068 euros (unchanged from 31 December 2000).

2) Reserve tied to exercise of Olivetti ex Tecnost 1999-2004 warrants

This reserve was formed following the free capital increase of Tecnost S.p.A. and simultaneous re-denomination of share capital in euros. It is irrevocably tied to exercise of "Olivetti ex Tecnost 1999-2004 warrants". At 31 December 2001, it amounted to 118,371,238 euros, a decrease of 5,623 euros after exercise of 6,525 warrants during the year.

3) Reserves tied to conversion of Olivetti bonds and exercise of Olivetti warrants

These reserves (formed following the re-denomination of share capital in euros) amounted to a total of 44,206,809 euros at 31 December 2001, compared to 58,797,964 euros at 31 December 2000. The decrease of 14,591,155 euros reflects:

- for 3,865,500 euros, use of the "Reserve for conversion of Olivetti floating rate 1998-2002 bonds" (which decreased from 18,717,633 euros to 14,852,133 euros) following conversion of 7,994,118 bonds;
- for 1,917,103 euros, use of the "Reserve for exercise of Olivetti 1998-2002 ordinary share warrants" (which decreased from 13,120,386 euros to 11,203,283 euros) following exercise of 3,964,701 warrants;
- for 8,808,552 euros, use of the "Reserve for exercise of Olivetti 1999-2001 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries" (which decreased from 12,695,424 euros to 3,886,872 euros) following exercise of 18,216,685 warrants.

At 31 December 2001 the heading also included the "Reserve for exercise of Olivetti 2002-2004 subscription rights (warrants or options) reserved for managers of the Parent Company and its subsidiaries" for 14,264,521 euros, unchanged from 31 December 2000.

4) Non-taxable reserves

At 31 December 2001, these reserves amounted overall to 10,217,010 euros, unchanged from 31 December 2000. Originally carried by Tecnost S.p.A., they were re-formed in the Olivetti S.p.A. balance sheet following the merger of Tecnost into and with Olivetti. Taxes are not provided for these reserves since operations that would make them liable for taxation are not planned at the present time.

b) Reserve for Parent Company shares held by subsidiary companies

This reserve amounted to 391 million euros at 31 December 2001 (unchanged from 31 December 2000) in respect of 211,931,328 Olivetti shares held by the subsidiary Olivetti International S.A. and received in exchange for Tecnost S.p.A. shares following the merger of Tecnost into and with Olivetti.

VIII. Sundry reserves, retained earnings and accumulated losses

At 31 December 2001 this heading reflected a negative balance of 107 million euros (a positive balance of 1,340 million euros at 31 December 2000). It included sundry reserves, retained earnings/accumulated losses, exchange rate differences from the translation of foreign currency financial statements and other net equity captions relating to subsidiaries that have not been eliminated during consolidation.

Group shareholders' equity

At 31 December 2001 consolidated shareholders' equity pertaining to the Group amounted to 12,729 million euros (13,856 million euros at 31 December 2000).

The reconciliation of the consolidated net result pertaining to the Group and the Parent Company net result for 2001 is set out below:

(in millions of euros)	Net result for the year
Net result shown in Olivetti S.p.A. statutory accounts as of 31 December 2001	**(871)**
Elimination of dividend income from subsidiary companies	(46)
Amortization of consolidation goodwill on the acquisition of Telecom Italia shares	(1,299)
Results for consolidation purposes of subsidiary companies and other changes	(874)
Net result shown in the consolidated financial statements of the Olivetti Group as of 31 December 2001	**(3,090)**

800

The reconciliation of consolidated shareholders' equity pertaining to the Group and Parent Company shareholders' equity as at 31 December 2001 is set out below:

(in millions of euros)	Group shareholders' equity
Shareholders' equity shown in Olivetti S.p.A. statutory accounts as of 31 December 2001	**15,235**
Decrease of the consolidation goodwill due to amortization and disposals	(3,465)
Elimination of dividend income recorded as accrued	(46)
Lower carrying value of equity investments in subsidiary companies with respect to the pro-quota shareholders' equity, as adjusted for consolidation purposes, and other differences	1,005
Net result shown in the consolidated financial statements of the Olivetti Group as of 31 December 2001	**12,729**

X. Minority interests

Minority interests as at 31 December 2001 and 2000 were as follows:

(in millions of euros)	31.12.2001 (a)	31.12.2000 restated (b)	31.12.2000 original (c)	Changes (a-c)	Changes (b-c)

B) Reserves for risks and charges

Reserves for risks and charges at 31 December 2001 and 2000 amounted to 4,158 million euros and 3,079 million euros respectively, and comprised:

1) Employee pensions and similar obligations

This reserve includes liabilities accruing to the employees of a number of Group companies operating abroad. At 31 December 2001 it amounted to 66 million euros, compared to 31 million euros at 31 December 2000.

2) Taxation

This reserve includes the provision for tax risks and the provision for deferred taxes.
The reserve for tax risks is provided in relation to potential charges on open or disputed tax positions; at 31 December 2001 it amounted to 378 million euros (295 million euros at 31 December 2000), of which 154 million euros relating to the Telecom Italia Group (160 million euros at 31 December 2000), 202 million euros to Olivetti Finance N.V. (135 million euros at 31 December 2000) and 22 million euros to other Olivetti Group companies.
The tax position of the Parent Company Olivetti S.p.A. is illustrated in the Explanatory Notes to the Olivetti S.p.A. Financial Statements.
Deferred taxes and prepaid taxes are calculated on temporary differences between the tax values of assets and liabilities and the corresponding book values carried in the Group companies' balance sheets used for consolidation purposes, as well as on consolidation adjustments, based on local tax rates in each country.
Deferred taxes and prepaid taxes are set off only when permitted under tax laws and for each financial year in which temporary differences are expected to be reversed.
Deferred tax liabilities which are not set off against prepaid taxes are included in the Reserve for deferred taxes, while prepaid taxes which are not set off against deferred taxes are classified under the current assets heading Other receivables.
The balance on deferred and/or prepaid taxes at 31 December 2001 reflected a net tax asset of 1,314 million euros, compared to a net tax asset of 783 million euros at 31 December 2000, and comprised:

(in millions of euros)	31.12.2001	31.12.2000	Changes
Reserve for deferred taxes	381	1,026	(645)
Prepaid tax assets	(1,695)	(1,809)	114
Net tax liability (asset)	**(1,314)**	**(783)**	**(531)**

Prepaid tax asset related to the Telecom Italia Group for 1,410 million euros (996 million euros at 31 December 2000).
As at 31 December 2001 Olivetti Group companies had tax losses brought forward, not utilised to post deferred tax asset, representing an aggregate amount of over 6 billion euros, almost wholly attributable to the Telecom Italia Group.

3) Other provisions

At 31 December 2001 these reserves amounted to an overall total of 3,333 million euros (1,727 million euros at 31 December 2000) and included:
- provisions for risks relating to technological upgrades for 465 million euros, formed by TIM in respect of risks arising from changes in market and technology scenarios;
- provisions for risks relating to investee companies for 903 million euros, of which 603 million euros for the Telecom Italia Group (extraordinary provisions relating to the new strategic guidelines) and 300 million euros for Olivetti S.p.A. investee companies;
- provisions totalling 569 million euros at the Telecom Italia Group in relation to Seat Pagine Gialle shares covered by forward purchase agreements;
- other provisions totalling 1,396 million euros (1,293 million euros at 31 December 2000), of which 1,296 million euros for the Telecom Italia Group (960 million euros at 31 December 2000) and 217 million euros for other Olivetti Group companies; these provisions include 590 million euros for provisions and contractual risks arising from the sale of Telecom Italia Group equity investments and business units.

C) Reserve for employee severance indemnities

This heading reflects accrued severance liabilities pursuant to current legislation and employment contracts in the countries in which the companies included in the consolidation operate.
The movements on the reserve during 2001 were as follows:

(in millions of euros)	
Balance as of 31 December 2000	**1,388**
Indemnity accrued	224
Indemnities paid in the year	(152)
Other changes, net	(46)
Balance as of December 2001	**1,414**

D) Payables

Payables as at 31 December 2001 totalled 60,251 million euros (57,785 million euros at 31 December 2000), of which 46,819 million euros were financial payables (44,412 million euros at 31 December 2000 and 42,486 million euros after deconsolidation of the Nortel Inversora Group) and 13,432 million euros were trade and other payables (13,373 million euros at 31 December 2000 and 12,816 million euros after deconsolidation of the Nortel Inversora Group).

804

The main components in Olivetti Group indebtedness are outlined below:

Telecom Italia Group

Bonds amounted to 8,183 million euros, as follows:

- on 10 April 2001, the subsidiary company Sogerim placed an international bond for a total of 6,000 million euros. The issue was subdivided into three tranches: one, floating rate notes for 1 billion euros maturing 20 April 2004; two, fixed rate bonds for 3,000 million euros maturing 20 April 2006; three, fixed rate bonds for 2,000 million euros maturing 20 April 2011;
- on 21 December 2001, Telecom Italia issued floating rate notes for 1,500 million euros (the first issue in the Global Medium-Term Note Program with Telecom Italia as issuer). The bond matures on 21 June 2005, with the issuer having the right to make early redemption at par as from the end of the second year and with each subsequent coupon;
- bonds maturing in 2003 issued by Brazil's Tele Nordeste Celular and Tele Celular Sul for an aggregate amount of 196 million euros;
- bonds maturing between 2002 and 2021 issued by Entel Chile for an aggregate amount of 102 million euros;
- bonds maturing in 2002 issued by Softe through a number of banks for an aggregate amount of 174 million euros;
- bonds issued by TDL Infomedia Ltd., maturing between 2009 and 2010, for an aggregate amount of 211 million euros.

Convertible bonds refer to a bond issued by Sogerim for 2,500 million euros, convertible into TIM or Seat Pagine Gialle shares, with the issuer having the right to make a cash settlement. The bond matures after five years, with early redemption rights for investors as from the end of the third year.

Amounts due to banks amounted to 10,235 million euros and were secured by mortgages for 37 million euros and pledges for 686 million euros; the balance on this heading decreased by 6,561 million euros compared to 31 December 2000.

Amounts due to other lenders totalled 2,163 million euros and included loans granted to Telecom Italia by the Cassa Depositi e Prestiti and by IRI (489 million euros; down 170 million euros from 31 December 2000), amounts due at Seat Pagine Gialle for a loan granted by Seat Pagine Gialle Finance S.r.l., a corporate securitisation vehicle wholly owned by third parties, which operates pursuant to law no 130/99 (780 million euros), and a loan granted to Softe by Olivetti Finance (600 million euros).

Amounts due to associated companies amounted to 541 million euros, and included 522 million euros for amounts due to Teleleasing in respect of finance lease contracts.

Other payables amounted to 1,108 million euros, of which 395 million euros related to Telecom Italia (including 236 million euros for security loan operations) and 670 million euros to the TIM Group for residual amounts due to the Ministry of Communications for acquisition of the UMTS licence and in respect of the PCS licences acquired in Brazil during the year.

Other companies

Bonds amounted overall to 14,868 million euros. The original rate and any credit protection step-ups are disclosed separately below. All hedging operations are analysed in the section "Hedging instruments and other derivatives".

• Olivetti S.p.A. - 400 million euros
- bond (2001-2003) with a floating rate coupon linked to quarterly EONIA plus a spread;
• Olivetti International N.V. - 700 million euros
- bond (1998-2003) with a fixed 5.875% coupon + a 0.15% step-up maturing in May 2003;
• Olivetti International N.V. - 1,500 million euros
- bond (1999-2009) with a fixed 5% coupon + a 0.15% step-up maturing in February 2009 ;
• Olivetti International N.V. - 100 million Swiss francs equivalent to 68 million euros
- Swiss franc bond (1986-2046) with a fixed 5.625% coupon maturing in June 2046;
• Olivetti Finance N.V. - 5,150 million euros
- bond (1999-2004) with a floating rate coupon linked to quarterly Euribor + a spread of 1.85% + a 0.45% step-up, maturing in June 2004. The issuer may make early repayment in June 2002. During 2001, an amount of 2,150 million euros was cancelled in respect of the original loan of 7,300 million euros following the buyback of bonds on the market and their subsequent cancellation;
• Olivetti International Finance N.V. - 7,050 million euros
- two bonds under the Euro Medium-Term Notes programme (EMTN):
* 4,950 million euros (1999-2004) with a fixed 5 3/8% coupon + a 0.45% step-up, maturing in July 2004 following an additional issue for 450 million euros in July 2001;
* 2,100 million euros (2000-2009) with a fixed 6 1/8% coupon + a 0.45% step-up, maturing in July 2009 following an additional issue for 350 million euros in July 2001.

Convertible bonds amounted to an aggregate 6,472 million euros and included:

• Olivetti S.p.A.: 1998-2002 bond for a residual 16 million euros, convertible into Olivetti ordinary shares, maturing in September 2002;
• Olivetti Finance N.V.: 2000-2005 bond for 2,000 million euros exchangeable for Telecom Italia ordinary shares, with a fixed annual coupon of 1% and a redemption premium of 113.41% of the issue price (approximately 15.22 euros per bond) maturing in November 2005. The loan determined an aggregate payable of 2,268 million euros. The yield on maturity is 3.5% per annum and the exchange will be at a rate of one Telecom Italia share for each bond;
• Olivetti S.p.A.: 2001-2004 bond for 1,268 million euros convertible into Olivetti S.p.A. shares, with a fixed annual coupon of 1.5% and a redemption premium of 105.07759% of the issue price (2.6 euros per bond) maturing in January 2004. The loan determined an aggregate payable of 1,332 million euros. The yield on maturity is 3.25% per annum and conversion is at a rate of one Olivetti share for each bond.
• Olivetti S.p.A.: 2001-2010 bond for 2,413 million euros convertible into Olivetti S.p.A. shares, with a fixed annual coupon of 1.5% and a redemption premium of 118.37825% of the issue price (1.0 euros per bond) maturing in January 2010. The bond determined an aggregate payable of 2,856 million euros. The yield on maturity is 3.5% per annum and conversion is at a rate of one Olivetti share for each bond.

406

Amounts due to banks amounted to an aggregate 630 million euros (1,855 million euros at 31 December 2000) and included:

• Olivetti S.p.A.:

- IMI research loans pursuant to law no. 346/1988, for 72 million euros, average rate of 12.528% at 31 December 2001 before interest-relief grants, to be repaid by 2004 (25 million euros falling due by 31.12.2002);
- other loans totalling 357 million euros, average rate of 5.574% at 31.12.2001, to be repaid by 2003 (332 million euros falling due by 31.12.2002).

• Olivetti Tecnost Group:

- loans totalling 196 million euros (155 million euros falling due by 31.12.2002).
- other short-term payables for 5 million euros.

Amounts due to other lenders amounted to an aggregate 262 million euros and included:

• Olivetti S.p.A.: subsidised loans for technological innovation (FIT) totalling 19 million euros (6 million euros falling due by 31.12.2002), average rate of 4.002% at 31.12.2001, to be repaid by 2012;

• other loans at Olivetti S.p.A. for 12 million euros falling due in 2003;

• other companies:

- a financing contract for 173 million euros due 29 October 2029 granted to Olivetti International Finance N.V. by a Japanese investor; the borrowing previously took the form of a bond loan; this 20 billion yen loan bears a fixed 5% coupon + a 0.45% step-up in relation to a notional amount of US$ 185.6 million.
- other loans totalling 32 million euros (3 million euros falling due by 31.12.2002);
- short-term payables due to other lenders for 26 million euros.

* * *

Financial payables totalling 46,819 million euros may be analysed by currency as follows:

(in millions of euros)	31.12.2001	31.12.2000
Italian Lire	-	17,915
Other EMU currencies	42,502	20,617
US Dollars		4,409
Other currencies	4,317	1,471
Total	**46,819**	**44,412**

At 31 December 2001 financial payables due after five years amounted to 9,751 million euros, as follows:

(in millions of euros)	31.12.2001	31.12.2000 restated	31.12.2000 original
Bonds	8,804	3,851	4,101

Amounts due to suppliers totalled 6,339 million euros and included 743 million euros due to other telecommunications services providers.

Amounts due to tax authorities totalled 969 million euros (962 million euros at 31 December 2000) and included current income taxes and withholdings to be paid.

The current tax payable reflects a reasonable estimate of the current income tax liabilities of Group companies determined with reference to local tax regulations; the payable for other taxes at 31 December 2001 refers in the main to withholding taxes applied by Group companies in their capacity as withholding agents.

609

The tax position of Olivetti S.p.A. is illustrated in the Explanatory Notes to the Parent Company financial statements.

Amounts due to social security authorities amounted to 1,520 million euros and referred to contributions accrued and due to social security authorities; the heading includes 656 million euros in respect of the residual Telecom Italia payable due to the INPS in connection with the estimated re-absorption charge for former ASST personnel, pursuant to law no. 58/1992.

The heading also includes the payable of 643 million euros to the former Telephone Companies Employees Social Security Fund (FPT) for Telecom Italia Group employees, which was incorporated under Compulsory National Insurance on 1 January 2001. Such payable was recorded in the Olivetti Group consolidated financial statements at the time of determination of consolidation goodwill on the acquisition of the Telecom Italia Group.

Other payables amounted to 3,843 million euros and included:

- 1,650 million euros for items relating to customers: subscriber payments for conversations, prepaid rentals and prepaid traffic charges;
- 1,034 million euros for contributions regarding operation of telecommunications services;
- 631 million euros for payables relating to staff management;
- 528 million euros for other items of a miscellaneous and recurring nature.

* * *

Payables due after 12 months, excluding the Telephone Companies Employees Social Security Fund payable of 643 million euros, totalled 38,399 million euros, falling due as follows:

Hedging instruments and other derivatives

The Olivetti Group enters into forward contracts to hedge risks associated with exchange rate fluctuations among the currencies in which the commercial and financial transactions undertaken by Group companies are denominated.
At 31 December 2001 the Olivetti Group companies had forward contracts and currency options for the purchase or sale of foreign currencies at previously determined exchange rates for the equivalent of 413 million euros relating to hedging contracts on financial operations transacted by Olivetti International S.A..
The Olivetti Group enters into Interest Rate Swaps (IRS), Currency and Interest Rate Swaps (CIRS) and other hedging agreements to mitigate the possible effects of interest-rate fluctuations. At 31 December 2001 the Group companies had forward contracts covering financial liabilities disclosed in the balance sheet based on a total notional capital amount for the equivalent of 21,668 million euros (7,826 million euros relating to Telecom Italia Group companies and 13,842 million euros relating to other Olivetti Group companies) as illustrated below:

Telecom Italia Group

The main hedging agreements for the Telecom Italia Group at 31 December 2001 are analysed below:

- IRS operations totalling 1,437 million euros on medium/long-term floating rate financial payables of Telecom Italia Group companies, falling due between 2002 and 2006, by which:

1) the floating rate was partially converted into a fixed rate;

2) the floating rate linked to "domestic indices" (Rendint, Rendibot, Rolint) was partially converted into a 6-month Euribor floating rate;

- IRS and other hedging operations (cap sales) totalling 3,023 million euros arranged by Seat in respect of debt originating from securitisation operations effected by Seat itself, with partial conversion to a fixed rate, for 1,000 million euros;
- various swaptions and other operations arranged by Sogerim for 1,000 million euros;
- CIRS arranged in respect of EIB loans in British pounds, to convert the floating rate in pounds into fixed and floating rates in euros, for 390 million euros;
- CIRS arranged by Brazil's cellular phone company Maxitel for 675 million euros;
- IRS and CIRS arranged by Entel Chile S.A. for 1,183 million euros;

412

• IRS in respect of US dollar borrowings of Telecom Italia Brazilian subsidiaries to convert the floating rate in dollars into fixed and floating rates in the local currency (Brazilian real), for 118 million euros.

Furthermore, Telecom Italia arranged financial operations to hedge the risk of interest rate and exchange rate on short-term loans totalling 311 million euros (mainly Foreward Rate Agreements).

Other companies

The main hedging agreements with regard to the medium/long-term debt of the other companies in the Olivetti Group are analysed below.

With regard to the 1986/2046 100 million Swiss franc fixed-rate bond (68 million euros) issued by Olivetti International N.V., Olivetti International S.A. has arranged an IRS for the full amount expiring in June 2046, to convert the annual fixed rate into a six-monthly floating rate in Swiss francs.

With regard to the 1999/2009 1,500 million euros fixed-rate bond maturing in February 2009 issued by Olivetti International N.V., Olivetti International S.A. has arranged the following hedging contracts expiring in February 2009 for a total of 1,450 million euros:

• IRS for 500 million euros to convert the annual fixed rate into a quarterly floating rate with a protection structure applicable until the 1-year swap rates exceed the 5-year swap rates;

• IRS for 500 million euros to convert the annual fixed rate into a quarterly 4.30% fixed rate (if 3-month Euribor remains under 5.80%), or into a quarterly floating rate less 0.50% (if 3-month Euribor exceeds 5.80%), and simultaneous cap sale for 500 million euros at 5.75%;

• IRS for 450 million euros to convert the annual fixed rate into a quarterly 3.56% fixed rate until February 2002. After February 2002, an IRS for 500 million euros converted the annual fixed rate into 12-month Euribor, fixed in arrears.

With regard to the 1998/2003 700 million euros annual fixed-rate bond issued by Olivetti International N.V., Olivetti International S.A. has arranged IRS for the same amount and maturity to convert the annual fixed rate into a rate linked to the six-month rates in Swiss francs and Swedish crowns, fixed in arrears.

With regard to the 2001/2003 EONIA-linked floating rate bond for 400 million euros issued by Olivetti S.p.A., IRS have been arranged for the full amount and same maturity, linking the floating rate to the US 6- and 12-month interest rates fixed in arrears with cap purchases at 5.00%, which are cancelled if the reference rate exceeds 6.50% at fixing.

With regard to the fixed-rate 20 billion yen borrowing maturing in October 2029 received by Olivetti International Finance N.V., Olivetti S.p.A. has arranged a CIRS for the full amount and same maturity, to convert the rate into an annual fixed rate in euros.

With regard to the 1999/2009 2,100 million euros annual fixed-rate bond issued by Olivetti International Finance N.V., Olivetti Finance N.V. has arranged IRS for the full amount and similar maturity to convert the annual fixed rate into a floating rate with cap sales at 7.95% for 750 million euros as from February 2002.

With regard to the 1999/2004 4,950 million euros annual fixed-rate bond issued by Olivetti International Finance N.V., Olivetti Finance N.V. has arranged IRS for 4,450 million euros with same maturity to convert the annual fixed rate as follows:

413

• into a floating rate for 3,950 million euros with the following additional hedges:
- floor sale for 1,000 million euros at 3.15% fixed in arrears (to be activated if at fixing 12-month Euribor is less than 2.65%);
- floor sale for 1,000 million euros at 2.85%
• into a six-monthly fixed 4.75% rate for 500 million euros (if the US 6-month interest rate fixed in arrears is less than 5.90%) or into US 6-month interest rate fixed in arrears applied to the principal in euros.

With regard to the 1999/2004 5,150 million euros floating-rate bond issued by Olivetti Finance N.V., linked to quarterly Euribor, Olivetti Finance N.V. has arranged the following hedges expiring in June 2002 for a total of 4,500 million euros:
• IRS for 500 million euros converting the quarterly floating rate into a six-monthly floating rate with floor sales at 4.10% (to be activated if at fixing 6-month Euribor fixed in arrears is less than 3.75%)
• IRS for 1,500 million euros converting the quarterly floating rate as follows:
- quarterly fixed rate of 3.575% for 1,000 million euros;
- floor rate of 4.28% for floor sales (to be activated if at fixing 3-month Euribor is less than 3.80%) for 500 million euros;
• IRS for 2,500 million euros linking the floating rate to US rates fixed in arrears with the following protection structure:
- floor sales at 2% for 2,000 million euros (referred to the 12-month US rate);
- floor sales at 3.95% (to be activated if at fixing the 3-month US rate fixed in arrears is less than 3.40%) for 500 million euros.

* * *

The following operations have also been arranged to hedge securities or other portfolio assets, for a total of 2,778 million euros:
• IRS and CIRS arranged by Softe on securities for 2,084 million euros;
• Treasury hedging contracts arranged by Sogerim for a notional capital amount of 368 million euros;
• IRS arranged by Olivetti Finance N.V. on securities for a nominal value of 279 million euros;
• Contracts arranged by Olivetti S.p.A. to hedge the currency risk on the restricted deposit denominated in US dollars, for 47 million euros.

4/4

Memorandum accounts

A. Personal guarantees given and counter-securities received

At 31 December 2001 guarantees given directly or indirectly through banks and insurance companies amounted to 2,344 million euros (3,932 million euros at 31 December 2000), of which 1,656 million euros in respect of unconsolidated subsidiaries and associated companies (2,956 million euros at 31 December 2000).
Personal guarantees given as of 31 December 2001 were as follows:
- guarantees given by the Telecom Italia Group in the interest of unconsolidated subsidiaries and associated companies (1,653 million euros), consolidated subsidiaries (23 million euros) and third parties (313 million euros) in respect of medium/long-term financial operations, supply contracts and telephony licences abroad, for a total of 1,989 million euros;
- suretyships and counter-securities given by other Olivetti Group companies in the interest of unconsolidated subsidiaries and associated companies (3 million euros), consolidated subsidiaries (69 million euros) and third parties (35 million euros), for a total of 107 million euros;
- 228 million euros for guarantees given by Olivetti S.p.A. to the Italian State Railways in the interest of Infostrada S.p.A.;
- 4 million euros for guarantees given by Olivetti S.p.A. with regard to fulfilment of trade supplies by Getronics S.p.A.;
- 16 million euros for other guarantees.

At 31 December 2001, the Olivetti Group had counter-securities in respect of the above guarantees for an amount totalling 806 million euros (826 million euros at 31 December 2000), mainly consisting of :
- counter-securities from third parties for 567 million euros relating to guarantees given by Telecom Italia S.p.A.;
- counter-securities from Mannesmann AG for 228 million euros relating to the guarantees given by Olivetti S.p.A. to the Italian State Railways;
- counter-securities from Getronics for 5 million euros.

B. Guarantees on Group assets

These guarantees related to pledges and mortgages set up on assets of companies in the Telecom Italia Group consolidation area in respect of non-financial operations, for an amount totalling 163 million euros at 31 December 2001 (2 million euros at 31 December 2000). They include pledges on IS Tim shares given by TIM International to guarantee fulfilment of obligations stipulated in IS Tim's supply contracts with Ericsson and Siemens.
Guarantees on Group assets securing financial operations are reported in the section on financial payables.

C. Commitments

At 31 December 2001 the Olivetti Group had contractual commitments for an aggregate amount of 5,431 million euros (5,001 million euros at 31 December 2000), of which 5,369 million euros for the Telecom Italia Group and 62 million euros for the other companies.
Telecom Italia Group commitments amounted to 5,369 million euros (4,901 million euros at 31 December 2000) as follows:

- 2,985 million euros for put/call commitments on Seat Pagine Gialle shares by Telecom Italia S.p.A.;
- 1,999 million euros for a Group commitment regarding sale of the equity investment in Spain's AUNA;
- 113 million euros for a Telecom Italia Lab S.A. commitment in respect of residual as yet unpaid subscriptions to four investment trusts that specialise in financing start-ups in telecommunications, the Internet, intranet and broadband networks;
- 52 million euros for leases;
- 220 million euros for other commitments.

With regard to the contract entered into on 15 March 2000 (as subsequently amended), Telecom Italia granted Huit II a put option on 710,777,200 Seat Pagine Gialle shares at a strike price of 4.2 euros. The contract provided for the put to be exercised after registration of the Seat/Tin.it merger deed in the Companies Register.
Huit II subsequently transferred the put option to Chase Equity Limited (CEL), together with ownership of the corresponding Seat shares. On 4 December 2000, CEL re-negotiated the contract with Telecom Italia, to extend the duration of the put option to five years and provide for the possibility of early exercise in April and May of 2003, 2004 and 2005.
Through Trust Liberator Ltd., Stet International Netherlands then purchased from CEL a call option on 660,777,200 Seat shares with the same duration as the put option and at the same strike price, paying an overall premium of 747 million euros. Furthermore, in order to transfer the effects of the latter operation to Telecom Italia, a call option with the same characteristics was drawn up between Telecom Italia and Stet International Netherlands. The operation had an implicit rate 6.2%.
The commitments of the other companies in the Olivetti Group amounted overall to 62 million euros (100 million euros at 31 December 2000) as follows:

- 45 million euros for leases;
- 10 million euros for trade receivables guaranteed by Olivetti S.p.A. in respect of the sale of the O.i.S. group to GFI Informatique S.A.;
- 7 million euros for other commitments.

D. Other memorandum accounts

At 31 December 2001, other memorandum accounts totalled 295 million euros (266 million euros at 31 December 2000), of which 287 million euros for the Telecom Italia Group (234 million euros at 31 December 2000), related to third-party assets deposited at consolidated companies, mainly in the IT sector.

9/16

Comments on the consolidated income statement

A) Value of production

1) Net revenues from sales and services

Net revenues from the sale of products and the supply of services in 2001 amounted to 32,016 million euros compared to 30,116 million euros in 2000 (28,374 in 2000 restated excluding the Nortel Inversora Group from the consolidation) with an increase of 1,900 million euros, or 6.3% (+ 12.8% excluding the Nortel Inversora Group from 2000). Growth reflected the increase in revenues from mobile phone services (+ 832 million euros) as well as the contribution of the newly consolidated companies, in particular the Entel Chile Group (1,247 million euros) and the Seat Pagine Gialle Group (1,707 million euros), and was offset in part by the exclusion of the Nortel Inversora Group and the manufacturing and installation companies from the consolidation area.
The revenue breakdown by business sector is set out in the table below:

(in millions of euros)	Year 2001 (a)	%	Year 2000 restated (b)	%	Year 2000 original (c)	%	Changes (a-c)	(b-c)

4) Capitalised production

Capitalised production amounted to 583 million euros, of which 581 million euros for the Telecom Italia Group.

417

5) Other revenues and income

Other revenues and income for 2001 amounted to 476 million euros (483 million euros in 2000) and included:
- 26 million euros in grants relating to costs for research, development and technological innovation;
- 73 million euros for the portion of grants related to assets credited to income as accrued, relating entirely to the Telecom Italia Group;
- 112 million euros for charges to customers for late bill payments;
- 265 million euros of other income from ordinary operations, consisting largely of indemnities and refunds, recovery of expenses and sundry income.

B) Costs of production

6) Purchases of raw, ancillary and consumable materials and goods for resale

In 2001 this heading totalled 2,640 million euros (1,972 million euros for the Telecom Italia Group) compared to 3,058 million euros in 2000 (2,259 million euros for the Telecom Italia Group) and included costs for the supply of materials relating to the Group's core businesses.

7) Costs of services

These costs amounted to 9,782 million euros in 2001 compared to 8,623 million euros in 2000. The increase of 1,159 million euros related to the Telecom Italia Group for 1,158 million euros and was due to higher costs for the operation and development of mobile telecommunications services.

8) Leases and rentals

This heading included rentals for buildings and other asset lease and hire charges. In 2001 it amounted to 1,096 million euros, compared to 827 million euros in 2000. The increase of 269 million euros reflected higher costs of 252 million euros at Telecom Italia for rents on property transferred to IM.SER.

9) Personnel

Payroll costs in 2001 amounted to 4,919 million euros (5,245 million euros in 2000) and included 4,666 million euros for the Telecom Italia Group, of which 3,546 million euros relating to the companies that provide telecommunications services.
In 2001 the aggregate average number of staff employed by the Olivetti Group was 113,974 equivalent units.
The average number in 2000 was 131,266 equivalent units, of which 7,272 for companies consolidated on a proportional basis.
In terms of geographical distribution, in 2001 the average number of employees was 93,610 units in Italy (108,306 in 2000) and 20,364 units abroad (22,960 in 2000).

418

The staff breakdown by category in Italy (different categories apply in other countries) was as follows:

(employees)	Year 2001	Year 2000
ITALY		
Managers	2,214	2,337
Supervisors	5,031	8,588
White collars	76,092	79,887
Blue collars	10,273	17,494
Total average in Italy	**93,610**	**108,306**
Total average abroad	**20,364**	**22,960**

10) Amortisation, depreciation and writedowns

Depreciation and amortisation charges in 2001 totalled 7,645 million euros and included 3,565 million euros relating to intangible fixed assets and 4,080 million euros relating to tangible fixed assets.
Charges in 2000 amounted to 6,956 million euros, of which 2,395 million euros relating to intangible fixed assets and 4,561 million euros relating to tangible fixed assets.
Amortisation of intangible fixed assets (3,565 million euros) included 1,299 million euros in respect of consolidated goodwill on the acquisition of Telecom Italia (1,319 million euros in 2000) and 2,146 million euros for amortisation charges at the Telecom Italia Group.
The decrease of 481 million euros in depreciation charges on tangible fixed assets was due to the reduction of depreciable assets at the Telecom Italia Group, following the contribution to IM.SER. and the change in the consolidation area (Nortel Inversora Group).
Writedowns in 2001 amounted to 465 million euros and included 17 million euros relating to fixed assets and 448 million euros relating to receivables classified under current assets. Writedowns in 2000 totalled 543 million euros.

12-13) Provisions for risks and Other provisions

Provisions for risks and Other provisions amounted overall to 486 million euros in 2001 (213 million euros in 2000). They included 278 million euros of provisions for contractual risks and risks relating to Telecom Italia Group legal disputes, and 208 million euros for provisions at other Olivetti Group companies, mainly in respect of risks on equity investments.

819

14) Other operational expenses

Other operational expenses amounted to 858 million euros (930 million euros in 2000) and included:

(in millions of euros)	Year 2001 (a)	Year 2000 restated (b)	Year 2000 original (c)	Changes (a-c)	Changes (b-c)
Duties for telecommunications activities	524	543	572	(48)	(29)
Losses on disposal of intangible and tangible assets	29	52	52	(23)	-

Other	450	226	245	205	(19)
Total	**1,225**	**769**	**808**	**417**	**(39)**

17) Interest expense and other financial charges

Interest expense and other financial charges amounted to 4,330 million euros (euro 2,641 million euros in 2000) of which 3,075 million euros for the Telecom Italia Group (1,307 million euros in 2000) and included:

(in millions of euros)	Year 2001 (a)	Year 2000 restated (b)	Year 2000 original (c)	Changes (a-c)	Changes (b-c)
Interest expenses and other charges on bonds	1,501	1,103	1,216	285	(113)
Exchange rate losses	392	216	216	176	-
Banks and other	2,437	1,125	1,209	1,228	(84)
Total	**4,330**	**2,444**	**2,641**	**1,689**	**(197)**

Other financial charges included 569 million euros from the re-negotiation of the Telecom Italia put/call options on Seat Pagine Gialle shares and 149 million euros consisting in the accrued portion of the charges relating to the deferral of the put option above, which had been recorded under prepaid expenses.

82

D) Value adjustments to financial assets

18) Revaluations

Revaluations amounted to 198 million euros, reflecting upward adjustments of unconsolidated equity investments valued with the equity method.
The heading amounted to 280 million euros in 2000.

19) Writedowns

This heading totalled 2,394 million euros (1,486 million euros in 2000), reflecting writedowns for other than temporary impairments in value of equity investments stated at cost, downward adjustments of equity investments valued with the equity method and writedowns of securities to reflect other than temporary impairments in value (on securities classified under fixed assets) and adjustments to market value (for securities held as current assets).
Writedowns arose as follows:
- the loss of 334 million euros at IS Tim (Turkey) as a result of start-up charges and also as a result of the currency crisis in Turkey and application of inflation accounting procedures;
- a writedown of 259 million euros on Astrolink charged by Telespazio upon interruption of the related project;
- the writedown of Stream (241 million euros);
- the loss of 238 million euros reported by the Nortel Inversora Group as a result of the economic crisis in Argentina, in particular exchange rate losses on debt;
- writedowns of listed shares and listed securities held as current assets by the Telecom Italia Group to reflect stock market values, for 291 million euros;
- a writedown of 100 million euros on 41.4 million Telecom Italia shares held as current assets in the securities trading portfolio, to reflect stock market prices;
- a writedown of 118 million euros on 174.2 million Seat Pagine Gialle shares classified as current assets until 30 June and subsequently reclassified under financial fixed assets, in line with the strategy of the new reference shareholder.

Writedowns also included amortisation of goodwill arising on acquisition of equity investments valued with the equity method; this charge amounted to 316 million euros in 2001 (462 million euros in 2000).

(in millions of euros)	Year 2001 (a)	Year 2000 restated (b)	Year 2000 original (c)	Changes (a-c)	Changes (b-c)
Equity investments	2,157	1,324	1,314	843	10
Financial fixed assets other than equity investments	49	134	134	(85)	-
Securities classified as current assets other than equity investments	188	38	38	150	-
Total	**2,394**	**1,496**	**1,486**	**908**	**10**

42

E) Extraordinary income and charges

20) Extraordinary income

Extraordinary income, at 996 million euros (1,705 million euros in 2000), included 465 million euros of capital gains from disposals during the year (1,408 million euros in 2000) and 531 million euros from sundry income (297 million euros in 2000).

Capital gains from disposals amounted to 465 million euros, of which 392 million euros at the Telecom Italia Group, including:

- 170 million euros from the transfer of the equity investments in satellite companies to Mirror International Holding and the subsequent sale of Mirror International Holding to the Lehman Brothers Group;
- 94 million euros from the sale of 30% of Mediterranean Nautilus S.A. to Israel's F.T.T. Investment;
- 128 million euros from other disposals.

The 73 million euros of capital gains reported by the other Group companies include:

- 29 million euros from the increase in shareholders' equity at Lottomatica as a result of the share premium raised through the initial public offering, with regard to the portion held directly by Olivetti S.p.A.;
- 43 million euros from the sale of the full equity investment in Globespan Virata Corp.;
- 1 million euros from the sale of minor equity investments.

Other income amounted to 531 million euros, of which 460 million euros at the Telecom Italia Group, including:

- 32 million euros from the partial annulment by Public Administration Central Court ruling no. 3699/2001 of the fine imposed on TIM and Omnitel by the Antitrust authority, which was previously provided in full;
- 232 million euros arising from reversal to income of prior-year excess provisions at Telecom Italia (120 million euros, of which the Iraq job orders provision for 62 million euros and the corporate restructuring provision for 50 million euros);
- 196 million euros of other income.

The 71 million euros of income at the other Group companies included:

- 14 million euros of insurance compensation for damages suffered by Olivetti Tecnost and Olivetti Multiservices as a result of floods in Piedmont and the Aosta Valley in the autumn of 2000;
- 12 million euros from the sale of receivables due from authorities in the Russian Federation, previously provided in full under the allowance for doubtful accounts;
- a 10 million euros adjustment on the sale price of the equity investments in Olivetti Ricerca and Modinform, following official recognition to these companies of state grants for R&D activities;
- a 4 million euros adjustment on the sale price of the equity investment in O.i.S. relating to prior years;
- 8 million euros as a result of the offer on the market of unexercised rights relating to the share capital increases arranged in 2001 by Olivetti S.p.A. ;
- 23 million euros of other income.

21) Extraordinary charges

Extraordinary charges amounted to 4,105 million euros (1,570 million euros in 2000) and included 3,947 million euros at the Telecom Italia Group, of which :

- 2,984 million euros of goodwill writedowns relating to consolidated companies (9Télécom Group, MED1 Group, Entel Bolivia, Entel Chile, Maxitel Group, Tele Celular Sul, Tele Nordeste Celular and some companies in the Seat Pagine Gialle Group) and to equity investments valued with the equity method (Globo.com, Solpart Participaçoes, Telekom Austria, Nortel Inversora Group), as well as other provisions relating to equity investments. These writedowns were made applying the Group's accounting policies consistently with the prior years, to reflect new business plans and market trends;
- 380 million euros of charges relating to personnel retirements and mobility (including 203 million euros at Telecom Italia);
- 248 million euros provided for charges connected to the sale of the equity investment in Stream in relation to the agreement with Vivendi/Canalplus;
- 77 million euros for an extraordinary payment to the INPS - pursuant to the 2000 state budget for the three-year period 2000-2002 - to cover increased financial requirements following the suppression of the fund;
- 84 million euros of financial charges accruing on the liability to the INPS for the Telephone Companies Employees Security Fund;
- 85 million euros as a result of the decision to restructure the La7 broadcaster and terminate a series of contracts;
- 89 million euros of other charges.

Extraordinary charges for the other Group companies amounted to 158 million euros and included:

- 20 million euros of reorganisation charges at the Olivetti Tecnost Group;
- 15 million euros paid to the outgoing Chief Executive Officer for settlement and waiver of all claims;
- 9 million euros of damages caused by the floods in the Canavese area in the autumn of 2000 and other charges;
- 114 million euros of other charges including 97 million euros of consolidation entries, offset with a similar amount accounted for as a reversal of writedowns of consolidation goodwill recorded by Telecom Italia.

22) Income taxes for the year

Income taxes for fiscal 2001 amounted to 579 million euros, compared to 1,923 million euros in 2000.

(in millions of euros)	Year 2001	Year 2000
Current taxes	1,291	2,079
Deferred (prepaid) taxes, net	(712)	(156)
Total	**579**	**1,923**

424

Loss per share

The loss per share for fiscal 2001, determined in compliance with International Accounting Standard (IAS) no. 33, is set out below:

Year 2001	Net loss (in millions of euros)	Number of shares	Loss per shares (in euros)
Loss for the year, wholly attributable to outstanding shares	(3,090)		
Average number of outstanding ordinary shares		7,284,586,056	
Primary loss per ordinary share			**(0.424)**

The diluted loss per ordinary share for fiscal 2001 does not differ from the primary loss per share value.

Other information
