"Long-term investments", amounting to Lire 16,797 billion, increased by Lire 3,580 billion, mainly on account of:

- the acquisition of the investment in GLB Servicos Interativos, the Internet company of Globo Organizações, (30%, for an equivalent amount of Lire 1,686 billion);
- the purchase, by the Parent Company, of No. 104,978,070 treasury savings shares (equal to 1.41% of the entire share capital) for Lire 1,281 billion, under the tender offer and later purchases, as voted by the ordinary stockholders' meeting of January 14, 2000;
- the formation of the company IS TIM which won the third *GSM* 1800 license in Turkey (Lire 594 billion);
- the consolidation of Seat Pagine Gialle group (Lire 436 billion);
- the valuation of Italtel group using the equity method after the sale of an 80.1% stake (Lire 204 billion).

Such increases were partly compensated by the consolidation of Nortel Inversora group which was previously valued using the equity method (Lire 961 billion) and the sale of the investments in the Meie group (Lire 220 billion) and Bharti group (Lire 162 billion).

■ *Working capital* showed a negative balance of Lire 4,380 billion (-Lire 7,069 billion at December 31, 1999).
The reduction of Lire 3,087 billion is due to:

- the decrease in "inventories" (from Lire 1,995 billion at the end of 1999 to Lire 1,405 billion; -Lire 590 billion) mainly for the exclusion of the companies operating in the manufacturing and installations sectors which are no longer in the Group.
- the increase in "trade accounts receivable", from Lire 15,883 billion at the end of 1999 to Lire 16,124 billion, connected principally to the consolidation of the Seat Pagine Gialle group (Lire 1,376 billion) and the Nortel Inversora group (Lire 891 billion).

1665

These increases were countered by the reduction in trade accounts receivable by the Parent Company and the mobile telephony companies. Such reduction, for the Parent Company, is due to a decrease in revenues and the assignment of receivables to factoring companies while, for the mobile telecommunications companies, the reduction derives from the ever-increasing amount of traffic generated by the prepaid service as opposed to subscriptions;

- the increase in "other assets" from Lire 3,177 billion at the end of 1999 to Lire 7,263 billion. Other assets mainly consist of:
  - deferred tax assets of Lire 1,928 billion;
  - receivables from the Tax Administration of Lire 1,116 billion;
  - customer payments in transit with banks and the postal system of Lire 362 billion;
  - receivables from employees of Lire 152 billion;
  - trading securities in portfolio of Lire 843 billion;
  - prepaid expenses and accrued income of Lire 1,684 billion of which Lire 1,454 billion relate to the premium paid on the call option on Seat Pagine Gialle shares agreed as part of the transaction to defer the put option on the Seat shares;
- the increase in "trade accounts payable" from Lire 12,870 billion at the end of 1999 to Lire 14,252 billion, connected with the changes in the scope of consolidation. Such changes refer to increases for the proportional consolidation of Nortel Inversora group (+Lire 832 billion) and for the acquisition of Seat Pagine Gialle group (Lire 765 billion) and to decreases for the sale of the Sirti group (Lire 542 billion) and the Italtel group (Lire 383 billion). As for the Parent Company, the reduction in trade accounts payable is attributable to the decrease in costs and lower investments in installations;
- the increase in the "reserves for risks and charges" from Lire 2,006 billion at the end of 1999 to Lire 3,425 billion, mainly for the risk reserve for technological advances by TIM (Lire 840 billion) set up to meet the risks originating from the evolution of the market and the technological scenario and the reserve for corporate restructuring costs set up by the Parent Company (Lire 295 billion) following the union agreements in 2000; the total also includes the reserve for litigation (432 billion).
- the decrease in "other liabilities" from Lire 13,248 billion at the end of 1999 to Lire 11,495 billion. Other liabilities include:
  - amounts owed to customers of Lire 3,261 billion, mainly including deposits made by customers and pre-billed basic charges, as well as the portion of the prepaid magnetic cards not yet used;
  - contributions to pension and social security institutions of Lire 1,808 billion;
  - taxes payable of Lire 1,800 billion;
  - employee-related payables of Lire 1,560 billion;
  - payables for investments made in investment holdings of Lire 520 billion;
  - accrued expenses and deferred income of Lire 1,977 billion, of which Lire 824 billion relate to capital grants.

■ *Stockholders' equity* is Lire 49,428 billion (Lire 38,311 billion at the end of 1999), of which Lire 36,443 billion (Lire 33,004 billion at December 31, 1999) is the Parent Company interest and Lire 12,985 billion (Lire 5,307 billion at December 31, 1999) the minority interest.

The Parent Company interest increased by Lire 3,439 billion compared to December 31, 1999 due mainly to the effect of the conversion of TIM and Seat Pagine Gialle savings shares into ordinary shares (+Lire 3,952 billion), the net income for the year (+3,927 billion), net of the 1999 Telecom Italia dividends (-Lire 4,505 billion).

1667

■ *Net debt* of Lire 36,845 billion (Lire 15,758 billion at the end of 1999) consists of Lire 16,010 billion of medium/long-term debt (Lire 10,002 billion at the end of 1999) and Lire 20,835 billion of net short-term borrowings (Lire 5,756 billion at December 31, 1999).
The increase in net debt, compared to December 31, 1999, of Lire 21,087 billion, is mainly due to the following:

- the acquisition of the controlling interest in Seat Pagine Gialle (Lire 12,426 billion); from a financial standpoint, the acquisition of Seat will be completed when the put option on the Seat stock is closed. This is described in the notes in "Purchases and sales commitments" under memorandum accounts;
- the buy-back of savings shares by the Parent Company (Lire 1,281 billion);
- the acquisitions and subscriptions of capital increases in the investment holdings abroad (Lire 6,245 billion);
- the acquisition of the *UMTS* license by TIM (Lire 4,680 billion);
- dividends paid out (Lire 5,903 billion);
- changes in the scope of consolidation (Lire 6,289 billion),

The above-described transactions were partly financed by receipts from the conversion of TIM savings shares into ordinary shares (Lire 8,073 billion) and those deriving from the divestiture plan for the non-core businesses of the Group (Lire 8,545 billion).

Gross debt amounts to Lire 45,317 billion at December 31, 2000 (Lire 19,624 billion at December 31, 1999).

An analysis based on maturity is given in the following table:

(in billions of lire)	12/31/2000						12/31/1999	
	Lire	%	Foreign currency	%	Total	%	Total	%
Medium/long-term debt	9,346	29	6,664	52	16,010	35	10,002	51
Short-term debt	23,134	71	6,173	48	29,307	65	9,622	49
Total	32,480	100	12,837	100	45,317	100	19,624	100

1668

5.3 FINANCIAL PERFORMANCE

CONSOLIDATED STATEMENTS OF CASH FLOWS

(in billions of lire)			2000	1999
A.	Net short-term borrowings at beginning of year		(5,756)	(4,987)
B.	Cash flows - operating activities			
	Net income		5,709	4,665
	Depreciation and amortization		10,933	10,338
	(Gains) losses on sales of intangibles, fixed assets and long-term investments		(2,112)	116
	(Upward adjustments) writedowns of intangibles, fixed assets and long-term investments		2,195	1,189
	Change in working capital (*)		(3,088)	(1,371)
	Net change in "reserve for employee termination indemnities"		(342)	185
	Change in scope of consolidation, foreign exchange gains (losses) and other changes		364	292
			13,659	15,414
C.	Cash flows - investing activities			
	Intangibles, fixed assets and long-term investments:			
	• intangible assets		(25,402)	(3,057)
	• fixed assets		(7,530)	(7,503)
	• long-term investments		(5,810)	(2,517)
	Proceeds from sale, or redemption value, of intangible assets, fixed assets and long-term investments		8,348	1,063
			(30,394)	(12,014)
D.	Cash flows - financing activities			
	New borrowings		2,822	1,485
	Capital contributions		8,082	80
	Capital grants		52	128
	Debt repayment		(609)	(370)
	Change in medium-long term debt due within one year		(2,788)	(2,214)
			7,559	(891)
E.	Dividends		(5,903)	(3,278)
F.	Cash flows for the year	(B+C+D+E)	(15,079)	(769)
G.	Net short-term borrowings at end of year	(A+F)	(20,835)	(5,756)

(*) The difference compared to the variation between the 1999 and 2000 consolidated balance sheets is mainly due to recording 40% of the gain on the sale of the "Grandi Immobili" business segment in deferred income.

1669

In 2000, net cash outflows amounted to Lire 15,079 billion, with a consequent increase of the same amount in net short-term borrowings.

This change is due to the requirements for investing and financing activities and dividends (Lire 28,378 billion) that were not entirely financed by the cash flows from operating activities (Lire 13,659 billion).

Investments in 2000 totaled Lire 38,742 billion, of which Lire 32,932 billion for industrial investments and Lire 5,810 billion for financial investments.

Industrial investments refer mainly to the Parent Company and TIM and include:

- goodwill (Lire 17,637 billion) arising from the acquisition of the controlling interest in Seat Pagine Gialle, Maxitel, Digitel, Jet Multimedia and the purchase, on the part of the Parent Company, of 50 million TIM ordinary shares and the reorganization of the international telecommunications sector;
- the cost of the *UMTS* license acquired by TIM in Italy (Lire 4,680 billion) and the PCS 1900 license obtained through TIM Perù (Lire 381 billion).

Financial investments include:

- Lire 1,686 billion for the acquisition of 30% of GLB Servicos Interativos,
- Lire 1,281 billion connected with the buy-back of Telecom Italia treasury savings shares,
- Lire 594 billion for setting up IS TIM which won the third *GSM* 1800 license in Turkey.

5.4 RESULTS OF OPERATIONS, FINANCIAL CONDITION AND PERFORMANCE EXPRESSED IN EUROS

CONSOLIDATED STATEMENTS OF INCOME

1673

5.5 OUTLOOK FOR 2001

For the Telecom Italia Group, the fundamental aim in 2001 is to transform itself into a global operator in the major sectors of business (wireline, wireless and Internet/media), which are also organized by Business Unit at the international level, with an integrated management and a strong operational focus on Europe and Latin America.

The implementation of the new organizational model by Business Unit, begun in 2000, and the restructuring of the international portfolio are the first fundamental steps in this direction. In keeping with this approach, the results for 2001 – and a proforma version of the results for 2000 – will show the contribution of each individual Business Unit to the consolidated results, in a framework of transparency and clarity with regard to the stockholders and the market.

The focusing of management and the operational structures on the various business units will make it possible to maximize efforts in the pursuit of the fundamental aim of **creating value** for the stockholders, which will have to be achieved by acting in three basic directions.

1. **Growth,** first and foremost, by:
   - completing the process to turnaround the **wireline telephony services**, which is expected to generate a sharp increase in the data business, maintaining the leadership position with the most valuable clientele in voice services and producing a further recovery in efficiency;
   - giving a strong boost to **mobile telephony**, deriving from the growth of the data business – particularly in the national market – and from the increase in the number of customers served in the international market;
   - strongly developing the **Internet and Media** business by consolidating the Seat Pagine Gialle group and integrating it with other companies in the Telecom Italia Group by exploiting the considerable synergies generated by the convergence of the various business areas.

   In economic and financial terms, in 2001, this aim will translate into achieving a gross operating margin increasing compared to 2000 thanks partly to the contribution of the companies acquired in 2000 and in the first months of 2001.

2. Maintaining the **return on invested capital** (ROIC), the fundamental factor in guaranteeing a substantial growth in the value of the Group, even in the presence of various business areas in the start-up phase. This objective will be pursued by increasing the return of the individual business areas, and by focusing portfolio management on the most promising business.

3. Strict **financial management**, focused on generating cash flows and aimed at a highly selective policy of investment programs. On the one hand, in concrete terms, this aim will be achieved by keeping the financial debt at a level similar to that of 2000, thus improving the debt/EBITDA ratio; on the other, by improving the debt structure, by extending the average life and diversifying the sources and markets of funding.

1674

5.6 BREAKDOWN OF GROUP RESULTS BY BUSINESS UNIT

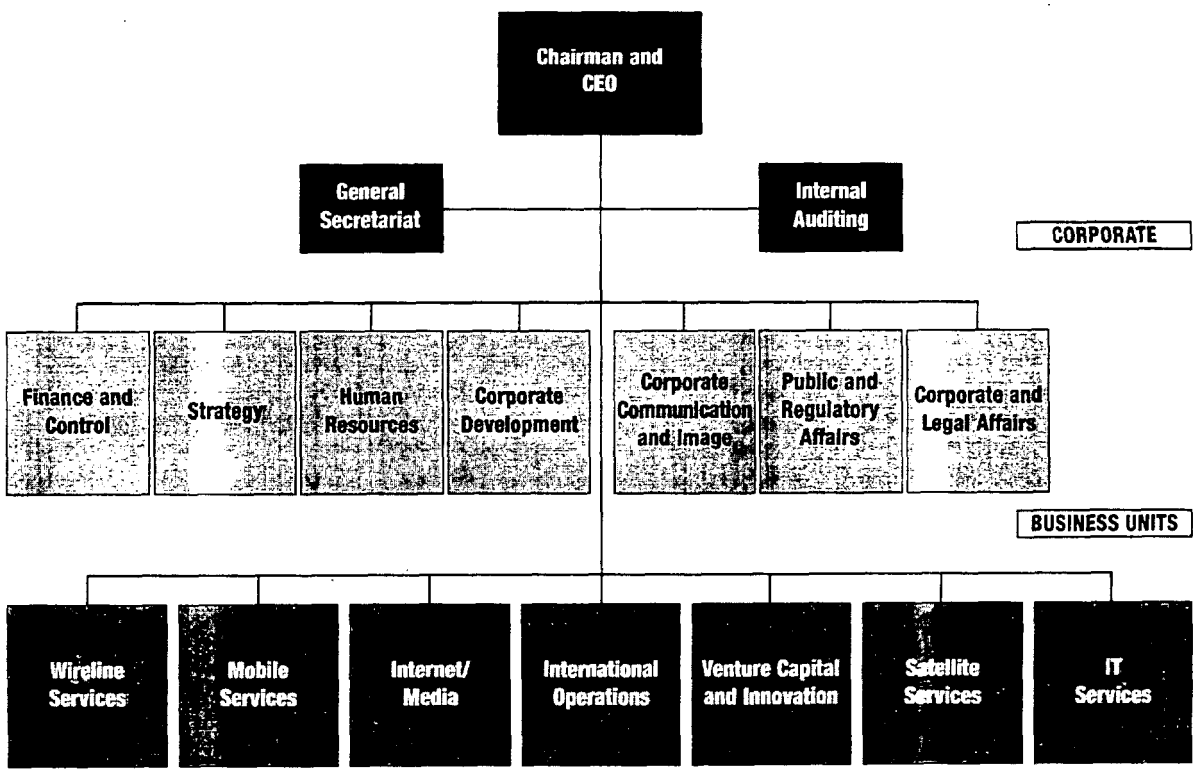
2000 marked the start of the transformation of the Telecom Italia Group announced in conjunction with the take-over and exchange bid. The transformation was shaped by the divestiture of non-strategic businesses, the focus on the core areas and the reorganization of the controlling structure of the international companies and, above all, the deep-seated reorganization of the seven autonomous Business Units from the standpoint of management, objectives, strategies and operational leverage.

The identity and the performance of the Business Units will become increasingly clearer and easier to recognize in terms of budget planning and in terms of actual figures and publication of results.

Consistent with the decentralization of all operations to the Business Units, the Corporate function has been streamlined from the point of view of role, operation and resources employed. The Corporate function will be responsible for guiding and controlling the Group, which signifies the selection of the portfolio, the identification of business to be developed, the allocation of resources, the definition of overall objectives of the Group and specific objectives of the individual Business Units.

The operational activities, at one time concentrated in the General Management function, have been allocated – and are still being shifted – to the Business Units, wherever they are needed for their operational autonomy, or to the companies providing common services: such as, personnel administration (transferred to TE.SS.), information systems operations (transferred to Netsiel), the management of the administrative cycle and training activities.

The reorganization of the Group, which will be completed during the course of 2001, will be reflected in the economic results and the financial condition of each individual business sector on the basis of the structure described below.



1675

The operations allocated to the Business Units are, in summary, the following.

- "Wireline Services" (Telecom Italia) is responsible for the data and voice business on the fixed network and call centers on a national scale; its offering is geared to final customers and other operators. Its aims are to supervise telephone services and encourage the growth of the data business by continuously innovating the offering, both in terms of services and rates; the development of integrated solutions and Internet; the spread of broadband access systems (*XDSL* and fiber optics).
- "Mobile Services" (TIM Group) is responsible for mobile, national and international telecommunications. Its aims are to protect its market shares; to expand in countries with a high rate of growth, thanks partly to the "plug & play" formula (the exportation of successful rate plans and innovative services and turnkey operational processes in order to create fast start-ups); the spread of new services – including Internet – through implementation of the latest technological platforms (*WAP*, *UMTS*).
- "Internet/Media" (Seat Pagine Gialle group) is responsible for developing Internet services for residential customers and small and medium-size companies, in all its components: access, portals, and web services. The Seat group, in addition to being – after the merger by incorporation of Tin.it – the leading Italian Internet Service Provider, is also in charge of the whole chain of value in the media sector, extending its activities to publishing, information and television.
- "International Operations" (Telecom Italia, SIN) is responsible for managing foreign wireline subsidiaries and developing the business of international networks for wholesale customers. In this context, the creation of the "Mediterranean Nautilus", "Latin American Nautilus" and "Pan- European Backbone" projects will provide the Telecom Italia Group with a ring of fiber optics that will enable it to reinforce its presence in the areas of greatest strategic importance.
- "Venture Capital and Innovation" (Telecom Italia Lab, the new name of CSELT) is responsible both for identifying and managing new initiatives in the Information & Communication Technology sector, and coordinating the Group's R&D activities. The contribution of the "Venture Capital" business segment of Telecom Italia (on March 1, 2001) to TI Lab is in response to the pressures of a competitive context which now also extends to research activities, increasingly seen as a business opportunity.
- "Satellite Services" (Telespazio group and the "Satellite Telecommunications" business segment of Telecom Italia) is responsible for developing satellite communication systems for phone and data applications (with particular emphasis on Internet), radio and television broadcasts and earth observation. The Telespazio group is also involved in the main innovative projects on a world scale, such as Astrolink (the broadband multimedia system) and Galileo (the European system for locating mobile vehicles).
- "Information Technology Services" (IT Telecom) is responsible for the development of the information technology of the Group. Now in the process of being set up following the integration of various companies (Finsiel, Netsiel, Telesoft, Sodalia, the "Information Technology" department of Telecom Italia), IT Telecom will cover the whole chain of value of information technology services, with the aim of re-positioning products with greater added value and transforming operative territorial units into development centers for the various geographical areas.

1676

The following table presents the results of the Telecom Italia Group for 2000 pro-forma, broken down by major Business Unit. The results do not include those of the Seat group, as it was acquired in the last part of the year and, as a result, only the balance sheet has been consolidated (the related employees are included in "Other activities"); however, "Other activities" does include the results of the manufacturing and installations sectors for the first nine months (the Italtel group and the Sirti group were sold at the end of the year). For purposes of comparison with 1999, the figures relating to International Operations BU have are presented net of the Nortel Inversora group.

(billions of lire)		Wireline Services	Mobile Services	International Operations	Satellite Services	IT Services	Sub-total	Other activities and eliminations	Total consolidated
Sales and service	2000	31,420	18,235	7,187	659	4,139	61,640	(5,661)	55,979
revenues	1999	33,583	16,750	3,756	612	4,337	59,038	(6,557)	52,481
Gross operating profit	2000	13,817	8,610	2,243	96	638	25,404	(4)	25,400
	1999	14,358	7,526	900	89	682	23,555	118	23,673
Operating income	2000	7,350	5,786	663	(100)	258	13,957	(778)	13,179
	1999	7,152	5,243	400	(21)	233	13,007	(551)	12,456

	1999	5,088	3,552	646	67	307	9,660	900	10,560
N. of employees at the	2000	60,548	15,257	11,592	1,206	12,005	100,608	14,061	114,669
period	1999	67,428	12,363	3,263	1,287	11,796	96,137	26,525	122,662

International Operations (net of Nortel Inversora group)	2000	Sales and services revenues	Gross operating profit	Operating income	Capital expenditures	N. of employees at the end of the period
		3,727	499	(45)	2,503	4,094

(1) Investments in fixed assets and intangibles, including goodwill from the acquisition of consolidated companies, amount, for 2000, to Lire 17,637 billion (Lire 1,078 billion in the 1999).

1677

5.7 TRANSACTIONS BETWEEN TELECOM ITALIA GROUP AND RELATED PARTIES

Transactions with related parties – including parent companies and their subsidiaries, unconsolidated subsidiaries and affiliated companies, as well as the Parent Company's Directors (see pag. 264) and the companies in which they hold corporate office or significant responsibility – all such transactions fall under the Group's normal operations and were conducted at standard conditions or in accordance with specific regulatory provisions. The table below provides a breakdown of transactions with such parties:

Statement of income and balance sheet items for the year 2000	Amounts in billions of lire	Nature of transactions
Sales and services revenues	1,620	These mainly comprise revenues from Seat Pagine Gialle (Lire 409 billion), Teleleasing (Lire 219 billion), Stream (Lire 198 billion), Nortel Inversora group (*) (Lire 157 billion), Lottomatica (Lire 112 billion) and Auna group (Lire 110 billion).
Raw materials and outside services	730	These mainly refer to expenses regarding Siemens Informatica (Lire 155 billion), Seat Pagine Gialle (Lire 119 billion), Teleleasing (Lire 114 billion), Entel Chile group (Lire 77 billion), Etec S.A. (Lire 46 billion) and IM.SER (Lire 44 billion).
Net other (income) expense	37	These mainly relate to cost recoveries for personnel on loan to some foreign subsidiaries and affiliates.
Net financial (income) expense	105	These comprise dividends received from the Eutelsat satellite consortium (Lire 123 billion) plus interest earned on loans made to some foreign subsidiaries and affiliates and interest expense payable to Teleleasing (Lire 60 billion) for financial leasing transactions.
Loans in long-term investments	268	These refer to loans granted to BDT (Lire 198 billion) and other foreign subsidiaries and affiliates.
Trade accounts receivable	540	These comprise mainly trade accounts receivable from Telekom Srbija (Lire 127 billion), Auna group (Lire 92 billion), Golden Lines International (Lire 49 billion), Stream (Lire 45 billion), Nortel Inversora group (*) (Lire 43 billion), Consorzio CSIA (Lire 26 billion) and Etec S.A. (Lire 25 billion).
Trade accounts payable	1,386	These pertain to supplier relationships connected with investments and transactions. In particular, they comprise trade accounts payable to Italtel group (Lire 536 billion), Entel Chile group (Lire 79 billion), Siemens Informatica (Lire 74 billion), Telekom Srbija (Lire 44 billion), Teleleasing (Lire 43 billion), Golden Lines International (Lire 32 billion), Auna group (Lire 25 billion), Etec S.A. (Lire 22 billion) and Telekom Austria group (Lire 20 billion).
Medium and long-term financial liabilities	1,073	These refer to payables to Teleleasing for financial leasing contracts.
Short-term financial liabilities	266	These include payables to IM.SER (Lire 156 billion), Webegg (Lire 57 billion) and Italtel group (Lire 38 billion).
Short-term financial receivables	339	These mainly refer to receivables from the affiliates of Seat Pagine Gialle (Lire 116 billion), Stream (Lire 106 billion) and Telekom Srbija (Lire 41 billion).
Other assets	95	These mainly refer to prepaid expenses for lease payments to IM.SER (Lire 89 billion).
Other liabilities	229	These comprise mainly payables to Astrolink (Lire 183 billion) for capital contributions payable.
Contract work in process	138	This refers to contract work in process by Telespazio for Astrolink.
Investments in fixed and intangible assets	453	These mainly consist of acquisitions from Italtel (Lire 357 billion) and Siemens Informatica (Lire 61 billion).

(*) Nortel Inversora group is consolidated proportionally.

1678

On the basis of a contract drawn up on March 15, 2000 among Telecom Italia and all the partners of Huit which differs from Telecom Italia, Lorenzo Pelliccioli, Huit and Huit II, relating to the integration of Tin.it into Seat Pagine Gialle, as explained, among others, in the prospectus prepared according to Article 70 of the CONSOB regulations No. 11,971 of May 14, 1999, Telecom Italia has acquired shares of Seat Pagine Gialle, as shown on page 227.
Furthermore, by virtue of previous agreements, in July 2000, Lorenzo Pellicioli, the CEO of Seat Pagine Gialle, became a stockholder of Huit II through a capital increase of 1.05% reserved for him. Consequently, the number of Seat shares held by Telecom Italia, indirectly through Huit, was proportionally reduced. Lorenzo Pellicioli later sold the stake in Huit II to the parent company Huit. Telecom Italia contributed, as a partner of Huit, for Lire 37 billion, in the benefits thus obtained by Lorenzo Pellicioli.

5.8 TREASURY STOCK

At December 31, 2000 the Parent Company Telecom Italia holds No. 104,978,070 shares of treasury savings stock of par value Lire 1,000 each, corresponding to 1.41% of share capital.

1679

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF TELECOM ITALIA

1680

chapter 6

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF TELECOM ITALIA

The financial condition and the results of operations of Telecom Italia in the year 2000 reflect the results emerging from the transactions involving the companies described below. As far as the contributions are concerned, the balance sheet does not include the assets and liabilities contributed, whereas the statement of income takes into account the results of the companies contributed up to the date the transactions became effective.

The corporate transactions which took place during the year were as follows:

- contribution, with effect from May 1, 2000, of all the assets and liabilities consisting of the segments and investment holdings inherent to the operations and marketing of online services and products by Telecom Italia, Telespazio and Saritel to Tin.it S.p.A.; on August 10, 2000, the extraordinary stockholders' meeting passed a resolution for the partial demerger, on a proportional basis, of Telecom Italia, finalized on November 10, through the transfer of a 8.168% stake in Tin.it to Seat; on November 15, 2000, the merger of Tin.it in Seat Pagine Gialle was finalized and is effective for accounting and tax purposes as from May 1, 2000;
- contribution to TE.SS. - Tele Payroll Services S.p.A., operational since November 1, 2000, of the business segment for the management of the personnel administration services of the companies of the Group;
- contribution, on December 1, 2000, of the business segment "Grandi Immobili", consisting of Telecom Italia's most prestigious real estate properties, to IM.SER, and the successive sale of 60% of this company to Beni Stabili (45%) and Lehman Brothers (15%);
- total spin-off of Stet International to Telecom Italia and TIM as part of the rationalization of the international communications sector. The spin-off was concluded on December 27, 2000 and is effective for accounting and tax purposes as from January 1, 2000. On December 29, 2000, Telecom Italia contributed its entire stake in Stet Mobile Holding to TIM, receiving 1.94% of TIM ordinary shares (after the conversion of savings shares into ordinary shares) following the share capital increase set aside by TIM for Telecom Italia;
- contribution to Netsiel, which took place on December 31, 2000, of the business segment for the operations of the information technology services. This transaction falls under the reorganization program for the sector which calls for concentrating all of the Group's operations in the Information Technology sector in I.T. Telecom S.p.A..

1681

6.1 RESULTS OF OPERATIONS

STATEMENTS OF INCOME

(in billions of lire)		2000	1999	Change Assolute	Change %

	Income taxes	(3,386)	(3,860)	474	(12.3)
H.	Net income	4,954	5,050	(96)	(1.9)

(*) Reduced by related cost recoveries.

Results of operations for the year 2000 showed a net income of Lire 4,954 billion, a decrease of Lire 96 billion (-1.9%) compared to 1999. This result was mainly affected by the reduction in sales and service revenues and the lower contribution made by net financial income and expense, that were almost completely compensated by the reduction in operating costs, lower amortization and depreciation and provisions in addition to an improvement in balance of net extraodinary expense and income taxes.

The key figures are analyzed in the following paragraphs:

■ *Sales and service revenues,* amounting to Lire 33,723 billion, decreased by 5.9% compared to 1999 (Lire 35,856 billion) and are recorded gross of the amount due to other domestic and international TLC operators (Lire 6,099 billion). The total includes revenues from services of Lire 33,036 billion and revenues from sales of Lire 687 billion (respectively, Lire 34,835 billion and Lire 1,021 billion in 1999).
The decrease in revenues (-Lire 2,133 billion) can mainly be attributed to traffic, which fell by 13.9% even though the number of minutes rose by 27.3% (corresponding to +Lire 2,273 billion in terms of revenues). The average return on traffic, in fact, was Lire 71 per minute compared to Lire 111 per minute in the prior year, (-35.8%, -Lire 5,006 billion in terms of revenues). Such performance was negatively affected by the reduction, beginning August 1, 1999, in long-distance and international rates, the discount policies

1682

aimed at customer retention, the effect of replacing out-of-district rates with the less remunerative online rates and the application of new interconnecting rates for traffic to and from mobile phones. These phenomena were partly compensated by the increase in basic subscription charges (+9.9%) following the August 1, 2000 rate changes, the development of data connections and the growing demand for interconnecting services with the Telecom Italia network by other operators.
The reduction in revenues was also affected, for Lire 212 billion, by the contribution to Tin.it of the businesses for placing advertising and selling the official "White Pages" telephony directory, as part of the Seat – Tin.it merger.
Revenues from transactions with other fixed network carriers were Lire 1,364 billion (Lire 748 billion in 1999).

■ *Raw materials and outside services* of Lire 13,290 billion net of the related cost recoveries, include:

(in billions of lire)	2000	1999	Change %
Direct service costs	2,040	2,202	(7.4)
Operating costs	2,484	2,818	(11.9)
Marketing costs	1,797	1,907	(5.8)
Know-how development costs	267	321	(16.8)
	6,588	7,248	(9.1)
Amounts due to other carriers	6,099	6,321	(3.5)
TLC license fee	603	756	(20.2)
Total	13,290	14,325	(7.2)

In regard to the changes in these costs, the following notes apply:
a) "direct service costs", pertaining to the operation and maintenance of the network, decreased by Lire 162 billion consequent to savings arising from the ongoing equipment rationalization program, concentrating especially on line installations and public telephony installations;
b) "operating costs", inclusive of the management and maintenance of buildings, vehicles, information systems and equipment, as well as overheads, decreased by Lire 334 billion owing to both an overall policy to control and reduce costs and due to the fact that in 1999, nonrecurring costs were incurred for the take-over bid and the negotiations with Deutsche Telekom for Lire 130 billion. The operating costs also include Lire 26 billion (Lire 87 billion in 1999) to upgrade the information systems to ensure *carrier preselection* and *number portability*;
c) "marketing costs", inclusive of sales expense, post-sales assistance, customer relations, advertising and promotion, decreased by Lire 110 billion. This reduction is due to the combined effect of the following factors: lower costs (-Lire 130 billion) for the printing and delivery of the White Pages telephone directories, contributed to Tin.it as part of the Seat – Tin.it merger; lower costs for the sale of products (-Lire 277 billion), insofar as in the second half of 2000, for certain customers, the Company only plans the telecommunications systems, leaving manufacturers with the responsibility for the direct sale of the equipment (this also explains the reduction in revenues from the sales of the products, described previously); higher costs for advertising campaigns, both for institutional and product and service advertising (+Lire 203 billion);
d) "know-how development costs", comprising training, studies and research and technical consulting services, were down by Lire 54 billion.

1683

The above costs total Lire 6,588 billion for 2000, a decrease of 9.1% from 1999.

e) "amounts due to other carriers" decreased by Lire 222 billion, primarily as a result of the difference between the amounts due to mobile carriers (-Lire 678 billion) foreign correspondents (+Lire 88 billion) and fixed carriers (+Lire 413 billion). The decrease in the amount due to mobile carriers is on account of the reduction in fixed-mobile traffic rates; as regards fixed carriers, the increase is in relation to fiercer competitive pressure and the greater presence of new carriers on the wireline telecommunications market;
f) "TLC license fee" decreased by Lire 153 billion and includes the fee on sales revenues (Lire 595 billion), and the fee to operate the Regulatory Authority (Lire 8 billion). The reduction in the first fee is due to a decrease in the rate from 3% to 2.7% and a decline in revenues.

The percentage of raw materials and outside services to revenues was 39.4% compared to 40% in 1999.

■ *Labor costs* (net of cost recoveries for employees on loan to subsidiaries and affiliated companies of Lire 61 billion) amounted to Lire 5,920 billion, with a decrease of Lire 186 billion (-3.0%), compared to 1999, and Lire 198 billion (-3.2%) gross of such cost recoveries. This gross change is due mainly to the reduction in the average number of employees, which dropped from 77,184 in 1999 to 72,936 in 2000 (-5.5%), also on account of the resignations, concentrated in the last quarter, as a result of the cutbacks made under ex Law No. 223/1991 covered by the agreements reached with the labor unions in July. The effects of this reduction were partly counterbalanced by the increases due to collective bargaining agreements, career developments, merit bonuses and seniority increases.
The percentage of labor costs to revenues rose from 17.0% in 1999 to 17.6% in 2000.

■ *Gross operating profit* of Lire 14,552 billion decreased by Lire 882 billion compared to 1999 (-5.7%) due to the reduction in revenues, which, however, was largely compensated by the decrease in operating costs. The percentage of gross operating profit to sales and service revenues shows a slight improvement and was around 43.2% compared to 43.0% in the prior year. This reflects the Company's ability to initiate adequate cost-curbing policies to counter the contraction in revenues induced by the context of the market.

■ *Depreciation and amortization,* totaling Lire 7,201 billion, decreased by Lire 565 billion compared to 1999. This item comprises Lire 1,162 billion for the amortization of intangible assets and Lire 6,039 billion for the depreciation of fixed assets.
"Amortization of intangible assets" decreased by Lire 91 billion, due to lower software investments which became amortizable during 2000.
"Depreciation of fixed assets" decreased by Lire 474 billion; this change derives from a reduction in the amount of depreciable assets, the change in the mix of depreciable assets, lower depreciation on public telephony installations and *DECT* fixed assets written down in the 1999 financial statements and the adjustment of depreciation rates relating to the submarine network in the 2000 financial statements for about Lire 40 billion.

■ *Other valuation adjustments,* amounting to Lire 370 billion, decreased by Lire 172 billion compared to the prior year, which was characterized by the writedowns of public

1684

telephone installations (Lire 93 billion) and the residual amount of the *DECT* platform (Lire 50 billion) and also higher writedowns of accounts receivable. Of the total, Lire 332 billion (Lire 399 billion in 1999) are for writedowns to reduce accounts receivables to their estimated realizable value and Lire 38 billion for the writedown of software projects that will be abandoned in 2001.

■ *Provisions to reserves for risks and charges,* amounting to Lire 121 billion, decreased by Lire 35 billion compared to 1999 and refer to provisions for disputes covering commercial and regulatory questions and adjustments to the "reserve for litigation" for third-party controversies.

■ *Net other income (expense)*, amounting to an income balance of Lire 101 billion, represents the difference between Lire 465 billion of other income and Lire 364 billion of other expenses.
"Other income" includes mainly fees charged to customers for the late payment of telephone bills of Lire 149 billion (Lire 227 billion in 1999), non-telephone services rendered to TIM (Lire 57 billion, as in the previous year), the portion of capital grants credited during the year of Lire 79 billion (Lire 75 billion in 1999) and sundry damages and recoveries (Lire 90 billion, as in the previous year).
"Other expense" mainly includes indirect duties and taxes for the year of Lire 156 billion (Lire 134 billion in 1999) and losses on disposals of fixed and intangible assets of Lire 94 billion (Lire 206 billion in 1999). The reduction in such losses reflects the substantial completion of the rationalization of installations begun in the mid-nineties.

■ *Operating income* amounted to Lire 6,961 billion, a decrease of Lire 135 billion from 1999 (-1.9%) essentially due to a reduction in revenues, which was almost completely compensated by savings in outside costs, labor costs, depreciation and amortization and provisions. The ratio of operating income to revenues was 20.6%, compared to 19.8% in 1999.

■ *Net investment and financial income (expense)* showed an income balance of Lire 1,727 billion (Lire 2,471 billion in 1999) which can be analzyed as follows:

▪ *Investment income (expense)* shows an income balance, detailed as follows:

(in billions of lire)	2000	1999	Change %
Dividends and tax credits	3,401	3,239	5.0
Net gains on sales of investments	63	88	(28.4)
Total	3,464	3,327	4.1

a) dividends and tax credits include:
- dividends accruing in the fiscal year in respect of holdings in subsidiaries (Lire 1,862 billion) and mainly referring to TIM (Lire 1,761 billion);
- dividends recorded on the cash basis (Lire 426 billion) mainly in respect of investments in foreign companies and TIM shares purchased during the year;
- tax credits on dividends received (Lire 19 billion) and on those accruing during the year (Lire 1,094 billion);

b) net gains from the sales of investments refer principally to the gains realized on the sale of TIM shares (Lire 48 billion) and venture capital companies.

1685

■ *Net financial income (expense)* shows an expense balance of Lire 889 billion (-Lire 561 billion in 1999) is detailed as follows:

(in billions of lire)	2000	1999	Change %
Balance from financial transactions	(996)	(632)	57.6
Other net financial income (expense)	107	71	50.7
Total	(889)	(561)	58.5

a) the balance from financial transactions comprises the income (Lire 149 billion) and expense (Lire 1,145 billion) related to financial receivables and payables making up the net debt position. The increase in the net expense balance is attributable to higher financial expense on short-term borrowings to cover the financial requirements for the payment of Seat shares purchased from Huit II and through public offers of purchase, as described in the comments on the Company's financial condition.

b) other net financial income (expense) refers to interest income earned on medium/long-term loans (Lire 32 billion), net gains on exchange (Lire 42 billion) and net sundry other income (Lire 33 billion).

■ *Value adjustments to financial assets* show a negative balance of Lire 848 billion (-Lire 295 billion in 1999) and are almost entirely composed of writedowns to investments, mainly in the subsidiary TMI - Telemedia International Italia (Lire 197 billion) and in the affiliated company Stream (Lire 392 billion); the total also includes writedowns to adjust the value of TIM shares and venture capital companies carried in current assets to market price.

■ *Net extraordinary income (expense)* shows a net expense balance of Lire 348 billion (-Lire 657 billion in 1999) which derives from the difference between extraordinary income of Lire 1,461 billion and extraordinary expense of Lire 1,809 billion.
"Extraordinary income" mainly includes the gains (Lire 1,290 billion) from the contribution of the business segment "Grandi Immobili" to the company IM.SER and the sale of investments (mainly Sirti).
"Extraordinary expense" mainly comprises the expenses connected with corporate restructuring (Lire 884 billion, of which Lire 552 billion for operating agreements reached with the labor unions concerning employee cutbacks and layoffs); social security charges pursuant to Law No. 58/92 (Lire 297 billion) to guarantee uniform status under the former Telephone Employees Pension Fund (FPT) which, as required by the 2000 Finance Bill, has become part of the general "Employees Pension Fund" as from January 1; extraordinary annual contribution (Lire 144 billion) to INPS – as established by the same Bill for the three years 2000 - 2002 – to meet the higher financial requirements covered by the rules of the fund that was abolished. Extraordinary expense also includes Lire 329 billion for expenses connected with the previously-mentioned transactions for the disposals of investments and contributions of business segments.

■ *Income taxes* amounted to Lire 3,386 billion (Lire 3,860 billion in 1999). They represented 40.6% as percentage of income before income taxes in 2000 compared to 43.3% in 1999. The tax rate for 2000 was affected by the taxation of the gains on the sale of the investment in Sirti and the contribution of the business segment "Grandi Immobili" using the substitute equalization tax (19%) and, above all, by lower deferred taxes following the reclassification of the "Reserve for accelerated depreciation", pursuant to the application of art. 14 of Law No. 342/2000. The excess amount in the "reserve for deferred income taxes" was used to reduce the provision for the year.
In the absence of the above entries, the tax rate would have been in line with that of the prior year.

1686

6.2 FINANCIAL CONDITION

BALANCE SHEETS

(in billions of lire)		12/31/2000	12/31/1999	Change
A.	Intangibles, fixed assets and long-term investments

I.	Total (F+G+H)	68,839	51,645	17,194

1687

The balance sheet shows net invested capital of Lire 68,839 billion (Lire 51,645 billion at December 31, 1999), of which 52.6% is financed by stockholders' equity and 47.4% by net borrowings.

■ As far as *intangibles, fixed assets and long-term investments* are concerned, the following should be mentioned:

a) "intangible assets" amounted to Lire 2,302 billion and show an increase of Lire 43 billion compared to December 31, 1999. The increase represents the difference between additions (Lire 1,300 billion), the amortization charge (Lire 1,162 billion), disposals and other changes (Lire 6 billion), writedowns of software projects (Lire 38 billion), transfers, mainly for software in use, as a result of the corporate transactions entered into during the year (Lire 51 billion);

b) "fixed assets" of Lire 29,305 billion showed a decrease of Lire 7,215 billion from December 31, 1999. The decrease represents the difference between additions (Lire 3,674 billion), the depreciation charge (Lire 6,039 billion), disposals and other changes (Lire 3 billion); transfers (Lire 4,847 billion) mainly for the contributions of the business segment "Grandi Immobili" to IM.SER and the business segment "Information Systems Operations" to Netsiel;

c) "long-term investments" amounted to Lire 40,194 billion, up by Lire 20,550 billion compared to December 31, 1999. This increase is mainly on account of the following:

- new investments of Lire 20,632 billion, primarily due to: the acquisition of the investment in Seat Pagine Gialle (Lire 12,427 billion), as part of the merger between Seat and Tin.it and the conversion of Seat savings shares into ordinary shares (Lire 563 billion); loans for the future capital increase of Stet International Netherlands (Lire 1,865 billion) directed to the acquisition of foreign holdings, mainly in Spain, France and Latin America; the acquisition of ordinary TIM shares (Lire 3,423 billion), both directly and through the conversion of No. 305,439,248 savings shares into ordinary shares, for an equivalent amount of Lire 2,188 billion;
- writedowns of holdings amounting to Lire 648 billion, mainly pertaining to Stream (Lire 392 billion) and TMI - Telemedia International Italia (Lire 197 billion);
- acquisition of investments as a consequence of corporate transactions (Lire 7,512 billion), relating mainly to IM.SER (Lire 5,615 billion), Netsiel (Lire 210 billion) and Stet International Netherlands (Lire 1,547 billion);
- cancellation of the investment in Stet International (Lire 1,407 billion) as a result of the total spin-off of this company within the framework of the reorganization of the international holdings, which were followed by the previously-mentioned assignment of the investment in SIN and the increase in the investment in TIM (Lire 1,533 billion) through the capital increase set aside for the transfer of the remaining investment in SMH to TIM;
- sales of investments for a total of Lire 5,860 billion related mainly to IM.SER (Lire 5,224 billion), Bitel Partecipacoes (Lire 260 billion) and Sirti (Lire 86 billion);
- loan repayments for Lire 1,041 billion; these refer mainly to loans repaid by Teleleasing following the agreement for the sale of 60% of Teleleasing by Saiat to Mediobanca;
- buy-back of No. 104,978,070 treasury savings shares with a par value of Lire 1,000 each, equal to 1.41% of the share capital, deriving from the tender offer made during the period February 17, 2000 to March 17, 2000 (No. 1,793,820 shares) and later buy-backs (No. 103,184,250 shares), as voted by the ordinary stockholders' meeting of January 14, 2000 which authorized the tender offer that continued until January 10, 2001. Such shares are recorded at a cost of Lire 1,281 billion at December 31, 2000. A specific reserve was set aside in stockholders' equity for this transaction.

1688

■ *Working capital* showed a negative figure of Lire 965 billion (Lire 4,615 billion at December 31, 1999), thus representing, as it does traditionally, a source of operating cash flow.
In detail:

a) "trade accounts receivable", net of the related allowance account (Lire 654 billion), amounted to Lire 9,846 billion and decreased by Lire 614 billion compared to December 31, 1999. Trade accounts receivables from customers, in particular, decreased by Lire 1,092 billion owing to the reduction in revenues and the assignment of receivables to factoring companies (Lire 400 billion);

b) "other assets" amounted to Lire 6,097 billion and increased by Lire 3,174 billion, compared to December 31, 1999. These essentially refer to receivables from subsidiaries (Lire 2,000 billion), mainly relating to 2000 dividends accrued; deferred tax assets net of deferred tax liabilities (Lire 939 billion); receivables from employees (Lire 157 billion); customer payments in transit with banks and the postal system (Lire 278 billion); trading of stock in portfolio (Lire 643 billion, principally TIM stock); prepaid expenses (Lire 1,559 billion), mainly relating to the premium paid by Telecom Italia for the call option on Seat shares, agreed as part of the transaction to defer the put option on the Seat shares owned by Huit II. The transaction is described in the notes in "Purchases and sales commitments" under memorandum accounts;

c) "trade accounts payable" amounted to Lire 8,459 billion, with a decrease of Lire 854 billion compared to December 31, 1999 due primarly to the reduction in costs and lower expenditures for the purchase of installation investments. They include Lire 747 billion due to other national and international telecommunications carriers;

d) "reserves for risks and charges" of Lire 1,711 billion increased by Lire 469 billion compared to December 31, 1999, chiefly on account of the creation of the "reserve for corporate restructuring" following agreements with the labor unions over employee cutbacks and layoffs (Lire 295 billion). This item includes the "reserve for taxes" (Lire 273 billion), the "reserve for capital grants" (Lire 254 billion), the "reserve for litigation" (Lire 262 billion), the "reserve for contractual risks and other risks" (Lire 598 billion) and the "reserve for losses of subsidiaries and affiliates" (Lire 29 billion);

e) "other liabilities", amounting to Lire 6,887 billion, decreased by Lire 789 billion compared to December 31, 1999. They mainly comprise employee-related payables (Lire 1,208 billion), contributions to pension and social security institutions (Lire 1,657 billion), amounts owed to customers (Lire 2,032 billion), taxes payable (Lire 957 billion) and accrued expenses and deferred income (Lire 781 billion).

■ *Stockholders' equity* amounted to Lire 36,235 billion (Lire 35,577 billion at December 31, 1999), and increased by Lire 658 billion compared to December 31, 1999. The increase represents the net income for the year (Lire 4,954 billion); the portion of capital grants that became available (Lire 32 billion transferred from "reserves for risks and charges" to "reserves"); the increase in "other reserves" (Lire 177 billion) as a result of the spin-off of Stet International and the partial spin-off of a 8.168% stake in Tin.it by Telecom Italia to Seat; 1999 dividends (Lire 4,505 billion). Furthermore:

- in connection with the tender offer for treasury savings shares, Lire 1,281 billion were reclassified from the "special reserve" to the "reserve for treasury shares in portfolio";
- pursuant to Law No. 342/2000, Lire 1,720 billion were reclassified from the "reserve for accelerated depreciaton" to the special reserve set up in accordance with this law.

1689

■ *Net debt* totals Lire 32,604 billion (Lire 16,068 billion at December 31, 1999). The increase over December 31, 1999 of Lire 16,536 billion can be ascribed to the increase in short-term debt (Lire 18,582 billion) mainly to cover the financial requirements to pay for the Seat shares purchased from Huit II and through the public offers of purchase and, in anticipation of changing the type of debt and expiry dates, short-term financing arranged by the Company for the opening of two one-year credit facilities obtained from a banking syndicate headed by Chase Manhattan International Ltd.
From a financial standpoint, the acquisition of Seat will be completed when the put option on the Seat stock is closed. This is described in the notes in "Purchases and sales commitments" under memorandum accounts;

Gross debt amounts to Lire 36,598 billion (Lire 18,248 billion at December 31, 1999).

An analysis based on maturity is given in the following table:

					12/31/2000		12/31/1999	
(in billions of lire)	Lire	%	Foreign currency	%	Total	%	Total	%
Medium/long-term debt	5,313	15	861	44	6,174	17	8,220	45
Short-term debt	29,339	85	1,085	56	30,424	83	10,028	55
Total	34,652	100	1,946	100	36,598	100	18,248	100

6.3 FINANCIAL PERFORMANCE

STATEMENTS OF CASH FLOWS

(in billions of lire)			2000	1999
A.	Net short-term borrowings, at beginning of the year		(7,848)	(7,127)
B.	Cash flows - operating activities			
	Net income		4,954	5,050
	Depreciation and amortization		7,201	7,766
	(Gains) losses on sales of intangibles, fixed assets and long-term investments		(1,180)	175
	(Upward adjustsments) writedowns of intangibles, fixed assets and long-term investments		634	416
	Change in working capital (*)		(3,612)	(2,350)
	Net change in "reserve for employee termination indemnities"		(166)	146
			7,831	11,203
C.	Cash flows - investing activities			
	Intangibles, fixed assets and long-term investments:			
	• intangible assets		(1,300)	(1,352)
	• fixed assets		(3,674)	(4,574)
	• long-term investments		(21,985)	(3,973)
	Intangibles, fixed assets and long-term investments in as a result of corporate transactions		(9,146)	=
	Proceeds from sale, or redemption value, of intangible assets, fixed assets and long-term investments		8,091	507
	Intangibles, fixed assets and long-term investments out as a result of corporate transactions		7,946	=
			(20,068)	(9,392)
D.	Cash flows – financing activities			
	New borrowings		3	1,138
	Capital grants		33	114
	Debt repayment		(581)	(209)
	Capital contributions		=	64
	Change in stockholders' equity as a result of corporate transactions		177	=
	Change in medium-long term debt due within one year		(1,472)	(1,518)
			(1,840)	(411)
E.	Dividends		(4,505)	(2,121)
F.	Cash flows for the year	(B+C+D+E)	(18,582)	(721)
G.	Net short-term borrowings, at end of year	(A+F)	(26,430)	(7,848)

(*) The difference with respect to the "balance sheet" is due to entries affecting working capital. They refer to changes in capital grants, the use of the reserve for losses of subsidiaries and affiliates, the adjustment of long-term loans receivable and medium/long-term debt to year-end exchange rates.

In 2000, net cash outflows amounted to Lire 18,582 billion, mainly due to the financial requirements for investing activities – especially long-term investments following the previously mentioned purchase of Seat shares – in part offset by the proceeds received on the disposal of investments and the contributions of business segments. This gave rise to an increase in short-term financial borrowings for the same amount, which are now Lire 26,430 billion.
Investments, amounting to Lire 4,974 billion (Lire 5,926 billion in 1999), decreased in respect of installations and real estate as a result of the rationalization process and greater selectivity in the choice of network investments and also on account of the reorganization of the real estate area.

1694

6.5 OUTLOOK FOR 2001

In 2000, one of the guiding strategies of TIWS (Telecom Italia Wireline Services, the Business Unit operating in the domestic market of telecommunications services) was the intense focus on the broadband market, in which, in less than eight months, about 115,000 access lines were sold in *XDSL* technologies and in optical fibers to companies and other operators. The broadband offering for families, on the other hand, found an effective market penetration tool in the form of "Teleconomy *ADSL*", a service launched last December which, accompanied by other significant innovations, will not begin to express its full potential until 2001.

TIWS will base its growth on this solid basis in 2001, a year in which it intends to seize further opportunities for growth both in terms of revenues and, particularly, in the more demanding area of the gross operating margin, by reversing the reduction recorded in 2000. The main factors involved in achieving these objectives are:

- growth in revenues from data-transmission and Internet services for business customers, in line with that of 2000;
- greater penetration of Internet services for the residential market, thanks to the spread of *ADSL* tecnology and the continuous growth of online traffic;
- an increase in revenues from the sale of *wholesale* services (interconnection for other operators and broadband access for Internet Service Providers);
- the adoption of pricing policies by customer group in the voice market clientele.

On the subject of recovering efficiency, TIWS intends to follow these guidelines:

- completion of the reorganization of human resources begun in 2000;
- considerable reduction in the costs of information systems and the lease of premises;
- evolution of the network towards an architecture based on *IP* protocols.

In the data segment, greater emphasis will be placed on services integrated with Internet applications ("RING" and "Full Business Company"), according to the winning "pay per use" formula: customers will be offered the range of band as requested, with changes made automatically as their requirements change. In the development of this strategy, agreements with leaders in the sector, for example IBM, SAP, Broadvision, Lotus and Oracle, will play an increasingly important role. In 2001, more than 100,000 new broadband access lines are anticipated for the business segment alone. During the year, TIWS will also create the third Italian Internet data center.

In 2000, in the field of voice services, thanks to an aggressive pricing policy and the introduction of flat-rate and forfeit offerings, special programs were launched to promote loyalty which covered more than 50% of the market of large customers and persuaded 2.2 million subscribers (out of a potential market of 3 million) to subscribe to the "Teleconomy" offerings. In the new competitive scenario, characterized by the introduction of *carrier preselection* and *local loop unbundling*, in 2001, TIWS will propose new versions of the "Teleconomy" offerings.

As for the network, a profound transformation of infrastructures is taking place: the current architecture, based on separate platforms for voice and data, is evolving towards a model which, at a lower cost, will make it possible to develop a new generation of services. The strategy can be summarized as follows:

- completion of national *ADSL* coverage and the subsequent introduction of new *XDSL*-type technologies;
- evolution of the carrier network (*backbone*);
- the gradual integration of voice and data platforms into a single platform based on *IP* protocols.

1695

6.6 TRANSACTIONS BETWEEN TELECOM ITALIA AND RELATED PARTIES

Pursuant to the disclosure requirements of Article 2428 of the Italian Civil Code and Consob communications No. 97001574 of February 20, 1997 and No. 98015375 of February 27, 1998, concerning transactions with related parties – including parent companies and their subsidiaries, unconsolidated subsidiaries and affiliated companies, as well as the Telecom Italia's Directors and the companies in which they hold corporate office or significant responsibility – all such transactions fall under Telecom Italia's normal operations and were conducted at standard conditions or in accordance with specific regulatory provisions. Relating to the purchase of shares by Huit, see pag. 96. In accordance with the provisions of article 2428 of the Italian Civil Code, the table below provides a breakdown of the transactions (1) with such parties:

Statement of income and balance sheet items 2000	Amounts in billions of lire	Nature of transaction
Sales and service revenues	2,987	These refer mainly to revenues from telecommunications services as well as revenues for mobile-fixed interconnections and rental of lines acquired by TIM. They also include the management fee from Telecom Argentina and revenues to Seat Pagine Gialle.
Raw materials and outside services	4,209	These refer to acquisitions from subsidiaries and affiliates and other related parties (in particular from Finsiel, Teleleasing, Italtel, TIM, CSELT, Siemens Informatica, Telesoft, Scuola Superiore Guglielmo Reiss Romoli, IM.SER) mainly for leas and leasing installments, equipment maintenance, software, personnel training, as well as the amounts due to TIM and Telespazio for their share of telecommunications services.
Net other (income) expense	228	These refer, in particular, to income connected with miscellaneous services rendered to subsidiaries and affiliates, including outsourcing services rendered to TIM.
Net financial (income) expense	2,351	These mainly comprise dividends and the interest accrued on current accounts held for purposes of centralized cash management.
Net extraordinary (income) expense	987	These mainly refer to the gain realized on the contribution of the business segment "Grandi Immobili" to IM.SER.
Loans in long-term investments	97	These refer to loans granted to the subsidiary Telespazio.
Trade accounts receivable	1,527	These are mainly items connected with telecommunications services rendered.
Other assets	3,747	These mainly refer to dividends accrued for the year 2000 receivable from subsidiaries and prepaid expenses relating to the premium paid by Telecom Italia to Stet International Netherlands for the call option on Seat Pagine Gialle shares stipulated as part of the transaction for the deferral of the put option on Seat shares.
Trade accounts payable	2,971	Essentially, these are the supplier transactions connected with normal investments and operations, in particular with Telesoft, Italtel and IM.SER, as well as the amounts due to TIM for its share of services invoiced by Telecom Italia.
Other liabilities	209	These refer to the amount payable in connection with the Group's VAT procedure and deferred income from TIM.
Net short-term financial liabilities	5,822	These mainly regard transactions on the current accounts held for purposes of centralized cash management.
Investments in fixed and intangible assets	1,805	These mainly regard the acquisitions from Italtel (exchanges), Telesoft and Finsiel (software projects), Siemens Informatica.

(1) The following transactions do not include those with Sirti since this company was not considered a related party at December 31, 2000.

1696

chapter 7 SIGNIFICANT EVENTS SUBSEQUENT TO DECEMBER 31, 2000

7.1 BUY-BACK OF TELECOM ITALIA SAVINGS SHARES

The buy-back of Telecom Italia savings shares, resolved by the ordinary stockholders' meeting of January 14, 2000 ended on January 10, 2001.
The related resolution called for:

- a tender offer to purchase a maximum of No. 742,615,722 savings shares at a price of Euros 6.5 per share, for a maximum equivalent amount of Euros 4,827 million (Lire 9,346 billion), carried out between February 17 to March 17, 2000;
- the purchase of treasury savings shares, within nine months afer the end of the offer period, up to a maximum quantity equal to the difference between the maximum number of No. 742,615,722 and the number of savings shares tendered under the offer, by placing orders on the screen-trading market, as set forth by applicable laws, at the same price of Euros 6.5 per share.

No. 1,793,820 shares were tendered under the offer; Telecom Italia therefore purchased savings shares up to January 10, 2001, the expiration date of the authorization, taking into account the suspensions and extension voted by the stockholders' meeting of July 3, 2000.
The Company purchased a total of No. 112,998,070 savings shares, equal to about 5.2% of savings share capital, for a total equivalent amount of about Euros 711 million (Lire 1,376.5 billion).

7.2 CONVERSION OF SAVINGS SHARES AND BUY-BACK OF ORDINARY SHARES OF TELECOM ITALIA

On March 31, 2001, the Board of Directors of Telecom Italia, in continuing with the work begun on March 30, 2001, has re-examined the project for the conversion of the savings shares and buy-back of ordinary shares presented on February 5, 2001. The project, which has been modified as a result of the performance of the stock market and the inclinations emerging from the market in response to the original proposal, covers the following:

- the re-denomination of Telecom Italia share capital into euros, increasing the par value per share to Euro 0.55, to be effected by the cancellation of the treasury shares held and, for the remaining amount, by a credit to share capital of part of the reserve for inflation adjustments Law No. 72 of March 19, 1983, with the related increase in share capital;
- the voluntary conversion of Telecom Italia savings shares into an equivalent number ordinary shares against payment of a premium price between 38% and 42% of the average official market price of Telecom Italia ordinary shares in proximity to the transaction date, with a minimum of Euros 5.25 per share. The conversion, proposed to holders of all the No. 2,053,122,025 outstanding savings shares and structured so that those tendering shares can present the next dividend coupon, is subordinated to reaching the conversion of a minimum threshold of 60% of savings share capital, subject to the right of the Board to refrain from effecting the conversion. Assuming that all 100% of the savings shares will be converted, minimum cash inflows will be about Euros 10.8 billion. The Board reserves the right to launch the conversion whenever suitable conditions exist for ensuring the success of

1697

the operation, and, in any case, by December 31, 2001, the deadline for launching the conversion otherwise the time period will be considered to have lapsed. In the event that all savings shares are converted, the percentage of Telecom Italia voting rights held by Olivetti will decline from the current 54.8% to about 40%, corresponding to the total share capital currently held, which will remain unchanged. In order to obtain full consensus of the market, Olivetti has announced that it will not approve the operation if, at the Telecom Italia extraordinary stockholders' meeting called to approve the convection, stockholders representing an absolute majority of the shares not held by Olivetti vote against the proposal;

- the subsequent buy-back, through a tender offer, of ordinary shares up to a maximum of 10% of share capital, at a price equal to the market price immediately preceding the start of the buy-back plan, increased by a premium suitable to ensure the success of the operation and, in any case, not more than 25%. In order to reduce the time between the collection of the price difference and the payment for the shares buy-back, the shares will be purchased, through the tender offer, by a new company ("Newco", 100%-owned by Telecom Italia) specifically set up and provided with available reserves equal to the inflow coming from the conversion. Subsequent to the conclusion of the buy-back and before approval of the 2001 financial statements, Newco will be merged by absorption in Telecom Italia, which will become the holder of the shares delivered in the tender offer. The total outlay for the buy-back will exceed the inflow from the conversion. Any cash remaining after the convertion will be distributed, subject to a resolution passed by the stockholders' meeting, to all stockholders as an extraordinary dividend;
- assuming the conversion of 100% of the savings shares at the minimum price difference of Euros 5.25 per share, gross receipts for Olivetti would be about Euros 4.3 billion.

The extraordinary stockholders' meeting to approve the above operation has been convened, in first call on April 18, 2001 and, in second call, on May 3, 2001.

The project is aimed at optimizing Telecom Italia's share capital structure which, if all shares are converted, will be composed of one single class of stock, and reducing its costs, in view of the equity preferences to which the holders of savings shares are entitled; to improve the economic indicators per share, including earnings per share (the latter, in particular, by about 10%,) and to raise the Company's financial flexibility, improving its credit rating and, therefore, the conditions for access to the financial markets.

7.3 FISCAL AUDIT

At the end of February 2001, the revenue authorities completed a general fiscal audit of Telecom Italia begun on February 3, 2000. The findings, which are based upon interpretations, will be appealed according to the normal procedures followed in such cases. Although it is currently not possible to determine to what extent the findings formulated by the tax auditors will give rise to adjustments in the tax returns which have been filed, the existing provisions are deemed sufficient to meet any contingencies.

7.4 UMTS

On January 10, the Regulator informed the five highest bidders (TIM, Omnitel, Wind, Andala and Ipse) that they had been awarded the licenses and frequencies to supply services using *UMTS* technology. This technology forms the basis for the third-generation mobile telecommunications system that will be fully applied commercially by 2002. The award of the license, which was scheduled for December 20, 2000, has been postponed owing to problems encountered on some frequency bands, which were suspected of creating problems of interference and for which a technical solution was proposed by the same operators.

1698

7.5 LOCAL LOOP UNBUNDLING

On January 12, 2001, Telecom Italia was informed that resolution No. 14/00/CIR had been passed by the Regulator on December 21, 2000. This resolution approves Telecom Italia's offering to supply services for unbundling local loops, subject to certain changes. The Company therefore presented the price list for the various ways of providing access, on copper or fiber optic cable, and supplied detailed information about the numbering groups available and about the exchanges which have been equipped with areas to house the other operators' equipment. In fact, the Regulator drew up a first list of the 550 co-location sites; a second list of 550 is scheduled for March and a third for July, making a total of 1,650 sites. By March, 30 operators had already presented Telecom Italia with a request for interconnection to the so-called "last mile"; the necessary operational agreements have already been finalized with some of them.

7.6 WIRELESS LOCAL LOOP

On January 15, 2001, the Regulator issued a call for the advisor who will supervise the auction of the frequency licenses for the wireless local loop (disaggregated access via radio to the local wireline network). The advisor will collaborate with the Antitrust Authority during all the various stages of the auction, from the preparation of the rules, to the verification and evaluation of the applications for participation, and the preparation of the disclosure documents about the status of the bidding.

7.7 COMMERCIAL AGREEMENTS AND NEW SERVICES

During the first few months of the year, Telecom Italia concluded important agreements with technical partners, particularly with Alcaltel, with a view to augmenting efficiency and network capacity through *SDH* transmission systems, and with Marconi Communications to strengthen the fiber optic network using the new "smartphotonix" systems, which are capable of significantly increasing the capacity of broadband networks and, hence, the traffic of the Company.

The followings products were also launched: "Hyperway", the new data service on dedicated networks characterized by the "pay per use" model and by a wide range of options that permit a high level of customization according to the individual requirements of corporate customers; "Full Business Government", a data solution package, with the "pay per use" formula, which enables the various departments of the Public Administration to distribute online information and value-added services, through the creation of dedicated portals.

During the first part of 2001, TIM signed agreements with: the banking group Credem, thus acquiring an important new partner in the sphere of e-banking solutions; the Local Health Authority and the San Raffaele Hospital in Milan to design "Medguard", the tele-medicine and tele-assistance service via *GSM*; Telegate Italia (the Seat group) for the launch of a new mobile phone service for receiving, through a call center, directory information about subscribers, commercial businesses and for direct connection to the number requested; Webraska, a global supplier of wireless services and navigation technologies, to enable its customers, wherever they are, to find the best route to their destination.

In January, IT Telecom, through Finsiel and Banksiel, launched a euro portal for the companies and organizations facing the changeover to the new European currency, thus acquiring the role of an information "link" between institutions and companies.

1699

7.8 INTERNATIONAL DEVELOPMENT STRATEGIES

At the beginning of 2001, Telecom Italia signed an agreement with the American carrier Teleglobe to supply high-speed *IP* connectivity services over the next five years.
In March, the Company concluded an agreement for the sale of 30% of Mediterranean Nautilus S.A. to a company of the Fishman group, a leader in the media and telecommunications sectors in Israel. The agreement aims to develop the backbone in the Eastern Mediterranean.
On March 12, the share transfer (totaling 28.61%) was completed giving SIN control of Entel Chile.
In January, TIM signed a commercial agreement with the German operator, T-Mobil, based on reciprocal "privileged" roaming. Also in January, TIM signed agreements with Sony Computer Entertainment and with the operators KPN Mobile (the Netherlands) and NTT DoCoMo (Japan) to develop Internet services on the mobile network using *UMTS* technology.
In Brazil, in February, TIM was also awarded two *GSM* licenses for the areas of San Paolo and Brasilia, for a total cost of Lire 1,500 billion; in March, for approximately Lire 550 billion, it was awarded a third license for the northern, northwest and central southern regions, thus becoming the leading mobile telephony operator in the country.
On January, 2 Seat Pagine Gialle signed an agreement with RSL, minority interest of Telegate Holding, in order to purchase, in 2001, 48.63% of the share capital of the same company.
On February 15, 2001, Telecom Italia Group, in relation of the December 2000 memorandum agreement, purchased 100% of NetCreations Inc., U.S. company listed on the New York NASDAQ, leader in e-mail marketing services.
Always in February, Seat Pagine Gialle purchased 54.5% of the share capital of Consodata, a company listed on the Paris Nouveau Marchè and a leader in information marketing.

7.9 CORPORATE TRANSACTIONS

In order to more effectively respond to the demands of a competitive context now even encompassing the field of research, which is increasingly being viewed as a business opportunity, on March 1, 2001, Telecom Italia's "Venture Capital" unit, composed of the research and development activities of the Group, was conferred to CSELT, which then changed its name to Telecom Italia Lab.
Within the scope of the reorganization of the Information Technology business and its allocation to the "IT services" Business Unit, on March 1, 2001, Telesoft received, from Telecom Italia, the "Development" business segment which is devoted to developing information systems and creating applications software, with 619 employees and, from Finsiel, the "Telecommunications" business segment, with 234 employees.

7.10 TELECOM ITALIA DEBENTURES CONVERTIBLE INTO TIM OR SEAT SHARES

On January 23, 2001, the Board of Directors of Telecom Italia approved the issue of exchangeable 5-year debentures convertible into Tim or Seat shares for an amount of Euros 2 billion and with a green shoe option of Euros 500 million. The deal was announced on January 29.
The issue of the debentures by the underwriter Sogerim S.A. was concluded on March 15, 2001 and the conversion into Tim or Seat shares can begin as from June 1, 2001. The annual coupon is 1% and debenture holders are entitled to early redemption at the end of the third year of issue.

1700

chapter 8

OTHER INFORMATION

8.1 LITIGATION

There follows a description of the main disputes in which the Telecom Italia Group was involved in 2000, and the developments in the first few months of 2001.

8.1.1 Sale of Cecchi Gori Communications to Seat Pagine Gialle

On August 7, 2000, Seat Pagine Gialle stipulated a contract for the purchase, from Fin.Ma.Vi. S.p.A., of Cecchi Gori Communications (CGC), which holds the concessions for the two TV channels TMC and TMC2. On August 8, the Antitrust Authority was informed of this fact by Seat. On November 9, the Antitrust Authority began an investigation of Seat and CGC, as it deemed the transaction susceptible of constituting or reinforcing a dominant position in the communications sector; the investigation ended positively for the Telecom Italia Group on January 23, 2001, with the authorization to proceed with the sale, albeit subject to certain conditions.
On September 12, 2000, the Communications Authority, the Regulator, also started an investigation into the transaction, pursuant to Italian Law No. 249/97, which ended on January 18, 2001 without authorizing the transaction. Telecom Italia and Seat filed an appeal to the Regional Administrative Court (TAR) of Lazio, asking for the suspension and nullification of the decision. On January 31, the TAR granted the request for a suspension and ordered the Regulator to re-examine the case. In February, the Regulator reaffirmed its negative ruling. Seat and Telecom Italia immediately filed an appeal to the TAR of Lazio against the new, unfavorable ruling; on March 7, the TAR, deciding on the case, permanently nullified the decision of the Regulator, thus effectively authorizing the transaction. The Regulator has said that it will appeal to the Council of State.
The Council of State is also hearing an appeal from Fin.Ma.Vi. against the first decision by the TAR, which now cannot proceed because of the aforementioned final decision by the TAR of Lazio. Furthermore, Fin.Ma.Vi. presented an urgent appeal to the Civil Court of Rome to declare the contract between the parties null and void; the appeal was rejected on March 12, 2001.

8.1.2 Pagine Italia – Telecom Italia/Seat Pagine Gialle

On July 27, the Antitrust Authority authorized the acquisition of Seat Pagine Gialle by Telecom Italia and the merger of Seat and Tin.it against, amongst other things, Telecom Italia's commitment to provide, from September 1, the eletronic database of telephone subscribers – free of charge to authorized subjects and against a fee to all others – and to

1701

allow bidding for the collection of advertising in the "White Pages" telephone directory as from January 1, 2008.
However, on November 13, 2000, Pagine Italia appealed to the TAR of Lazio asking for the nullification upon suspension of the decision by the Antitrust. At the hearing on December 6, Pagine Italia asked the court to postpone suspension until the case is heard.
On March 22, 2000, Telecom and Seat had already been notified of the summons by Pagine Italia in which the Court of Appeals of Turin was asked to: i) nullify the contract giving Seat the concession for the exclusive collection of advertising in the White Pages since this violated fair trade practices; ii) declare the illegitimacy of the investment by Telecom Italia in Seat as the agreement is illegal and considered an abuse of a dominant position under the same law; iii) prohibit the continuation of such relations.
At the October 17, 2000 hearing, Telecom Italia and Seat raised some preliminary exceptions regarding inadmissibility; Pagine Italia, for its part, filed an urgent appeal, asking the Court of Appeals to forbid the continuation of the exclusive collection of advertising by Seat and to order Telecom Italia to arrange a bid for the collection of advertising in the official telephone directories, for each single local directory.
At the November 21 hearing, the Court of Appeal rejected the appeal presented by Pagine Italia, which filed an official complaint against the decision. The complaint was also rejected by court order of February 14, 2001. The case is adjourned to May 15, 2001.

8.1.3 Buy-back of Telecom Italia savings shares

The buy-back of Telecom Italia savings shares, resolved by the ordinary stockholders' meeting of January 14, 2000 ended on January 10, 2001. The buy-back program, begun with a tender offer from February 17 to March 17, 2000 and later continued with direct purchases on the stock market, was directed to the purchase of treasury stock not to exceed 10% of total capital, at the price of Euros 6.5 per share. The Company purchased a total of No. 112,998,070 shares (of which No. 1,793,820 were tendered under the purchase offer), equal to about 1.5% of share capital.
Elliott International L.P. and Liverpool Limited Partnership, mutual fund investment companies in the American group Elliott, recently filed a claim for damages against Olivetti and Telecom Italia, as well as the Chairman and Deputy Chairman of the latter company, for a total of Euros 18.9 million (Lire 36.6 billion). The claim is based on the alleged non-fulfillment of the commitments stated in the "Offer Document" relating to the take-over by Olivetti and Tecnost over Telecom Italia, and also the resolutions passed by the stockholders' meeting of January 14, 2000, especially in relation to the mandate to purchase treasury savings stock on the screen trading market, as set forth by applicable laws, subsequent to the end for the tender offer period.

* * *

The resolution passed by the stockholders' meeting of January 14, 2000, moreover, was contested in March 2000 by the stockholder, Alberto Reale, who pleaded that the resolution was null and void for the circumstance that a proposal was put to the stockholders' meeting that had been changed from the one deposited prior to the stockholders' meeting.
On March 6, 2001, the judge, after hearing the parties, exhausted all attempts to reconcile the parties. The next hearing is scheduled for July 4, 2001.

1702

8.1.4 Universal service

Omnitel and Infostrada appealed to the TAR of Lazio against the ruling by the Regulator and against Telecom Italia to cancel Resolution No. 8/00/CIR regarding the "Application of the sharing mechanism for the net cost of the Universal Service for 1999" (on this subject, see also the section entitled "The regulatory framework ").
According to the aforementioned resolution, part of the cost, which is recognized as an "unfair burden" for Telecom Italia, the company which, by law, must provide the service, was divided between the companies presenting the appeal and TIM. While judgment is pending, the two companies did not pay their quotas (totaling Lire 18 billion) to the special fund set up by the Ministry of Communications, thus preventing the latter from paying the whole amount recognized to Telecom Italia towards the costs incurred in 1999 (Lire 52 billion).
At the hearing to decide on the request for the suspension of the ruling filed by Omnitel (January 24, 2001), the TAR fixed the date for the case on May 30, 2001 without commenting on the appeal.

8.1.5 Infostrada/Albacom - Telecom Italia: services with access in ADSL technology and RING services

On July 21, 1999, Infostrada accused Telecom Italia, before the Antitrust Authority, of marketing network access services for data transmission using *ADSL* technologies. As a consequence, Telecom Italia would derive an unfair advantage on the data and Internet services market for companies and Internet Service Providers, given the impossibility of its competitors to supply their customers with similar access services; according to Infostrada, this constitutes an unfair trade practice. The Antitrust Authority has therefore begun a preliminary investigation of Telecom Italia to evaluate whether, under the circumstances, this can be construed as an abuse of a dominant position.
In the meantime, under order of August 16, 2000 by the Court of Appeals in Rome, following an urgent appeal presented by Infostrada and Albacom, Telecom Italia is forbidden to "promote and/or offer and/or directly conclude contracts for RING services or their equivalent, under whatever name". After the appeal was upheld, Telecom Italia was prohibited from offering RING services for an indefinite period of time. The Company filed a complaint, which was rejected on February 13, 2001.

8.1.6 Full Business Company/permanent Virtual Channel

On December 6, 2000, Telecom Italia notified the Regulator that an appeal had been filed with the TAR of Lazio asking for the nullification upon suspension of the November 22, 2000 ruling whereby the Regulator suspended the offering known as "Full Business Company", and forbade the Company to continue to market or promote the said offering. The offering consists in the supply of telecommunications services based on access using *XDSL* technology (the so-called broadband technology): the competing operators are disputing the failure of the Company to apply the regulatory ruling by which any offering of such services to the public (*retail*) must always be accompanied by a corresponding and symmetrical *wholesale* offering to the competition.

1703

In the meantime, the Regulator issued Resolution No. 15/00/CIR, establishing Telecom Italia's obligation to make a *wholesale* offering ("permanent virtual channel") for access to *XDSL* technologies to other operators. Telecom Italia challenged this resolution before the TAR of Lazio, asking for the annulment of some of the offering terms established by the Regulator. However, subsequently, the Regulator issued Resolution No. 4/01/CIR of February 22, 2001, definitively approving the contents of the *wholesale* offering and allowing to resume the marketing of the "Full Business Company" and "Ring" services to resume (with effect 30 days after the approval of Telecom Italia's *wholesale* offering). Some other licensed operators contested this decision, asking that it should be suspended; the TAR of Lazio rejected the appeals on March 21, 2001.

8.1.7 Antitrust proceedings against TIM and Omnitel

With regard to the September 28, 1999 decision by the Antitrust Authority which ordered TIM and Omnitel to pay penalties – to be calculated on the basis of their respective revenues in 1998 – for their collusion in price-fixing agreements for fixed-to-mobile calls for the period 1995-1998, in December, the Council of State partially upheld the appeals filed by the companies. In fact, the Council cancelled the most serious of the three sanctions (equal to approximately Lire 62 billion), regarding alleged collusion in the price-fixing in 1998. The fine originally imposed on TIM for Lire 100 billion (paid on June 30, 2000 so as not to incur the risk of further legal sanctions) was thus reduced to Lire 38 billion.

8.1.8 Acquisition of the Telekom Srbija investment

In February 2001, the Attorney's General Office of Turin ordered the start of a preliminary investigation into the transaction involving the acquisition, by Telecom Italia, of 29% of the share capital of Telekom Srbija. Telecom Italia immediately made all the documentation and figures relating to the above-mentioned transaction available to the judicial authorities. On the basis of the tests and procedures performed, with the full cooperation of the responsible corporate functions, the audit firm and the statutory auditors have stated that no facts have emerged, at the present time, which could call into question the correctness of the statutory financial statements and consolidated financial statements of Telecom Italia at December 31, 1997, 1998 and 1999, also for the effects on the fiscal year ended December 31, 2000.

1704

8.2 THE EURO

In 2000, Euro Project, the organizational department of the Telecom Italia Group devoted to the task of supervising and coordinating the changeover to the new currency, continued the actions initiated in 1999, both within and outside the Group.

In Telecom Italia, the Project outlined the steps to be taken in the final phase:
- upgrading of information systems by the third quarter of 2001;
- definition, creation and tests of contingency plans by December 2001;
- "Independent Verification & Validation" of the main corporate systems, carried out using suppliers, methods and tools other than those used during the changeover stage so as to identify eventual problems in time to make the necessary corrections.

The intranet website devoted to the euro, which can be consulted by all the companies in the Group, has been completely revised and transformed into a portal on the Single European Currency, and is continuously updated.

As far as activities with the world outside the company is concerned, the Euro Project implemented the following initiatives:
- the conclusion of the "Eurologo" campaign, promoted by the "Euro Committee" of the Ministry of Treasury, in which the Telecom Italia and TIM shops participated;
- the direct participation in the "Provincial Euro Committees" of nine of the most representative provinces in terms of the various economic and social conditions;
- the creation of courses about the new currency within the sphere of personnel training operating on SAP;
- participation, along with other prominent national companies (Alitalia, Agip Petroli, Banca di Roma, Enel), in the "Focus Group" on the new European currency promoted by the Gartner Group;
- the implementation, upon the specific request of Unioncamere, of five training sessions for future instructors (who will train other instructors) and businessmen in retail distribution in 50 areas of Italy.

1705

8.3 PERFORMANCE OF TIN AND INTERBUSINESS INTERACTIVE SERVICES

As required by the Antitrust Authority, the accounting principles used to determine the economic values for Telecom Italia Net (TIN) and Interbusiness services are described below. These accounting principles have audited starting from the year 1996; in 2000, this examination will be performed by Pricewaterhouse Coopers S.p.A..

Notwithstanding the fact that Telecom Italia reorganized its Internet business by setting up the company Tin.it and later merging it with Seat Pagine Gialle, it was still required to prepare a separate statement of income for TIN up to the time it was contributed to Tin.it (May 1, 2000). Therefore, this section presents the results for TIN for the first four months of the year. The reorganization, on the other hand, had no effect on the presentation of separate accounting results for Interbusiness.

- *Revenues* are stated at market prices for competitive services and at rates established by law for services granted by license and are recorded on the accrual basis. In the case of services whose provision implies the use of dedicated access circuits by the final customers, the revenues also include the income from the leasing of such circuits (valued on the basis of the rates defined in the ministerial decrees), with the consequent recording of the same amount under costs.

- *Direct costs:*
  labor costs represent the cost of personnel who worked to provide such services; the cost includes salary and wages, social security costs, provisions for employee termination indemnities and other sundry costs recorded on the basis of the number of persons in the dedicated operating structures and using cost accounting standards;
  network utilization costs include the cost to use the regulated transport services (usually direct connections) and the cost for the use of the transport of products/services offered in a competitive environment; they are therefore valued, respectively, using the rates by law and the rates applied to all third-party customers, the same as that which occurs in the cost structure of the other carriers in the sector;
  other direct costs refer to direct costs (advertising, marketing, service connection, operations and maintenance, etc.) and indirect costs (corporate structure costs supporting the operating lines) valued using unambiguous cost accounting standards and applying specific allocation methods.

- *Depreciation* of fixed assets directly employed in providing the services in question are determined on the basis of the estimated useful lives of the assets of Telecom Italia. Goodwill is amortized on the straight-line method over five years.

- *Other provisions* refer to the allowance for doubtful receivables made during the year.

- *Other income and expense, net*, includes the losses on receivables.

1706

The economic results of the interactive services are reported as follows:

	TIN	Interbusiness
(in millions of lire)	2000 (*)	2000
Revenues	69,928	234,683
Costs	(117,543)	(195,408)
Of which:		
Labor cost	(9,226)	(12,422)
Network utilization costs	(39,547)	(103,026)
Other costs	(68,770)	(79,960)
Gross operating profit	(47,615)	39,275
Depreciation and amortization	(12,232)	26,468
Other provisions	(9,202)	=
Other income and expense, net	(6,763)	=
Operating income	(75,812)	12,807

(*) First four months

In the first four months of 2000, **TIN** recorded strong commercial growth. The final number of subscribers was 2,807,000, an increase of 41% compared to the end of 1999.
Despite the marked increase in revenues, the operating income was again negative, although there was an improvement, in relative terms, compared to the entire year 1999. A contributory factor was the change in various items of cost deriving from the growth in operations. In particular, again in relative terms, though "network utilization costs" (the supply of infrastructures, expenses for Intelligent charges and toll-free numbers) were significantly lower, "labor costs" and "other costs" increased, especially the latter on account of advertising, sales and information systems expenses. Higher depreciation charges, instead, are due to the greater amount of assets used for the services. The "other provisions" include the provision to the allowance for doubtful receivables.
TIN's performance can therefore be particularly appreciated, since it was achieved in a scenario characterized by fierce competitiveness. In fact, during the first four months of the year, TIN continued to proceed with a huge campaign of communication and promotion begun in the previous year which has helped to make potential Internet customers more aware, thus stimulating the growth of the entire Internet market in Italy where the extension of the access network now allows the entire population to connect to the Internet with just one local call.
The offering by TIN, which has been confirmed as the market leader during the period, has been developed in terms of both connectivity (*dial-up*, *ADSL* and wireless) and services, through hosting offers, e-commerce solutions and portals for companies. The growing quality in the exploitation of services, has also sustained the increase in brand awareness, laying the foundations for an extension of the offering to other types of service, especially Web services for small and medium-size companies.

The 200 results by **Interbusiness** confirm and support the 1999 performance. The operating income was Lire 13 billion, more than triple that of the previous year, and is the result of the marketing success of the offering, which generated a 16% gain in revenues over 1999. The lower increase in total costs (+12%) comes from a significant increase in network operating costs and depreciation and amortization, a lower increase in labor costs and a reduction in other costs. In view of the low risk of uncollectable receivables, also in 2000, no provisions were made to the specific allowance account.

1707

8.4 EQUITY INVESTMENTS HELD BY DIRECTORS AND STATUTORY AUDITORS

Pursuant to the rules issued by Consob under Resolution No. 11971 on May 14, 1999 for the introduction of Legislative Decree No. 58/1998, the following table presents the equity interests held by the directors and statutory auditors in the Company and its subsidiaries.

Name		Company		Number of shares held at end of prior year	Number of shares purchased	Number of shares sold	Number of shares held at the end of 2000
Board of Directors							
Roberto COLANINNO	(1)	Telecom Italia ord. shares		23,000	494,000	225,000	292,000
		Telecom Italia sav. shares		=	910,000	380,000	530,000

(1) Shares not held directly.
(2) Shares held from May 15, 2001, beginning term of office.
(3) The purchases and sales take into account No. 1,025,000 Seat Pagine Gialle savings shares converted into ordinary shares.
(4) The purchases and sales take into account No. 50,000 TIM savings shares converted into ordinary shares.
(5) The purchases and sales take into account No. 8,000 Seat Pagine Gialle saving shares converted into ordinary shares.
(6) Shares held until July 2, 2000, date of the end of office.

1708

chapter 9

GLOSSARY

Access Charge
Charge paid by an operator owning a public TLC network for the use of another public TLC network.

ADSL
Asymmetric Digital Subscriber Loop. Technology that enables the transmission of broad bandwidth signals (2-8 Mbit/sec.) over the normal telephone's twisted pairwire.

ATM
Asynchronous Transfer Mode.Technique for the transfer of information for the integrated supply of data, voice and image services, based on a dynamic allocation of the transmission and switching resources.

Authority
Board entrusted with regulatory functions, legally distinct and functionally independent of the TLC organizations.

Backbone
The ridge of the network.

Band
Range of frequencies that can be transmitted by a channel. Term also used to indicate the range of frequencies occupied by a transmission.

BRA
Basic Rate Access. Basic access to the 144 Kbit/s ISDN network, composed of two telephone channels and one data access.

Call center
A company's customer service system to which calls are made by customers for commercial, technical and administrative request, and from which calls are made for telemarketing, market research activities, etc.

Call set up
The "call set up" model involves the application of a fixed initial charge to a communication regardless of its duration, plus a charge per second calculated on the actual communication time "t".

Channel
Part of a communication system that links a source to one or more destinations. Also called circuit, line, link or path. The term "channel rate" is used to indicate the maximum transmission rate that can be used on a given channel.

Contribution for TLC activities
Annual charge that TLC service providers are obliged to pay to the concession-issuing board, corresponding to an amount established by current law and calculated on all the gross income from the services under concession.

Carrier
Company that provides physical connections.

Carrier selection
Service that enables the customer to choose a *long distance* operator other than the pre-established service provider.

1709

DECT
Digital European Cordless Telecommunications. Standard for cordless and wireless communications for voice and data transmission, for applications in the private and public sectors.

Dial-up
Direct link to Internet using modems or normal telephone and ISDN lines made possible by applications developed on the two protocols, SLIP (Serial line Internet protocol) and PPP (point-to-point protocol).

Easy access carrier selection
Method for selecting the long distance operator each time a call is made by means of a specific code that is input before the national or international telephone number.

E-mail
Electronic mail.

Equal access carrier selection (or carrier pre-selection)
Method for permanently selecting a different long distance operator from the one selected by the access operator, by means of a pre-selection process.

Flexible network
Network architecture for direct numerical circuits that, through advanced routing reconfiguration functions, enables excellent levels of reliability and optimization in the allocation of the plant engineering resources.

Frame Relay
International standard for data transfer services that ensures excellent performance in terms of transmission rate and low transit times.

Gateway
System providing an interface between the network and the services offered at national level with the rest of the world.

GSM
Global System for Mobile communications. Digital system for mobile radio connections developed at European level and operating on the 900 MHz. bandwidth.

HDSL
High bit-rate Digital Subscriber Line, is a system that augments the capacity of copper networks to provide connections at 2 Mbit/s, thus making it possible to reduce the time required to supply the service, thanks to being able to avoid resorting to signal re-generation equipment in the section between the exchange and the user.

Infomobility
A set of systems and services made available to private and business customers in the world of vehicle traffic to meet their safety and information needs.

Intelligent costing
Intelligent network services that enable customers to share the cost of the traffic in pre-arranged proportions between the caller and the called party (e.g. Toll-free and shared charges).

Intelligent network
Network architecture integrated with the telephone network which, thanks to interaction with centralized databases, enables advanced services to be implemented and made available.

IP (Internet Protocol)
This is the data transfer method (or protocol) used in Internet.

ISDN
Integrated Services Digital Network.
A numerical integrated services network that enables multimedial communications (voice, data, animated text and images), accessible at a rate of 128 Kbit/sec (2 channels at 64 Kbit/sec - standard access) and 2 Mbit/sec (primary access).

1710

The particular feature of the ISDN service is that it provides numerical user-to-user connectivity. The ISDN network incorporates functions that enable high-capacity and broadband multiple service accesses, evolving towards an integrated numerical network also in the broadband services.

Local loop unbundling
Lease of user connection (so-called "last mile").

Number portability
The opportunity to use one's own telephone number regardless of the operator chosen or the place of residence.

Open Network Provision (ONP)
Conditions for accessing and using the public providers' network and TLC services open to all users with the same technical and usage methods.

Portal
An Internet interface with the Web that has the aim of putting the company in touch with the outside world and being able to transmit its identity and role. It is created in such a way as to allow simple, rational access to the information, providing an overall view of the company.

POTS
Plain Ordinary Telephone Services. Telephone network made up of all the existing connections (operating, on stand-by and in service).

PRA
Primary Rate Access. Primary access to the 2 Mbit/s ISDN network, composed of 30 equivalent channels.

Price cap
System that regulates the charges applied by the dominant provider, imposing a maximum limit on the average global variation in the price of a set of services over a period of several years, but enabling the provider to define the price of each of these services.

Reseller
Traffic retailers who succeed, by exploiting the differences between the charges in different countries and the traffic volume-based discounts offered by the conventional providers, in offering their customers telephone services at competitive rates.

Roaming
Service that enables a GSM mobile radio user to automatically access a network other than his own.

SDH
Synchronous Digital Hierarchy. New hierarchy for the transmissive multiplexing of numerical signals.

SOCRATE
Sviluppo Ottico Coassiale Rete Accesso Telecom Italia. Network platform dedicated to the development of multimedial services (and CATV, in particular).

TACS
Total Access Communication System. Mobile radio network that makes connections with a standard analog technique.

UMTS
Universal Mobile Telecommunications System. Broadband transmission service that will become the universal mobile radio standard for high-speed communications. With UMTS (the so-called "third-generation mobile radio") the cell phone will become a multimedial terminal capable of receiving voice, data and animated images.

1711

WAP
Wireless Application Protocol. Technology which allows access to Internet using mobile radio sets, even without the use of a computer. It works thanks to software which, inserted in special GSM terminals, makes information offered on Internet to the fixed network also available to the mobile network.

Wholesale
Intended for the new TLC operators ("intermediate" customers), this consists in a specific agreement for the supply of basic services that these intermediate customers do not provide on their own (a typical example is the carriage of international traffic).

XDSL
X - Digital Subscriber Loop. Initials summarizing various technologies (ADSL, HDSL, etc.) which allow the transmission of broadband signals on copper networks.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements at December 31, 2000 have been prepared in accordance with the provisions of the Italian Civil Code.
Following certain changes to some items of the consolidated financial statements, the consolidated financial statements at December 31, 1999 have been reclassified for purposes of a meaningful comparison.
The consolidated statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these notes to consolidated financial statements pursuant to Article 29, Section 3 of Legislative Decree No. 127/1991.
The consolidated financial statements are also accompanied by the Report on the Group's operations together with the Report on the Parent Company.
The disclosure relating to the introduction of the euro conforms to Consob Communication No. 98083971 of October 26, 1998 and is presented in a specific paragraphs of these Notes and the Report on operations.
The scope and principles of consolidation, the summary of significant accounting policies, along with the composition and changes in the individual components of the consolidated financial statements are set out below.

SCOPE OF CONSOLIDATION

The scope of the consolidation at December 31, 2000 includes the Italian and foreign companies listed in Annex 5, in which the Parent Company Telecom Italia holds a majority of voting rights, and all other companies in which it exercises a dominant influence. The proportional method of consolidation, pursuant to Article 37 of Legislative Decree 127/1991, is used to consolidate the following companies controlled jointly with other stockholders at 50%:
- Nortel Inversora and Telecom Argentina group controlled by it (Nortel Inversora group);
- Viasat (through Seat Pagine Gialle) and the subsidiary Viasat Assistance;

The complete list of companies consolidated by the proportional method is given in Annex 6.

The following changes have taken place in the scope of consolidation since December 31, 1999:
a) added to the scope of consolidation (the balance sheets and the statements of income have been consolidated for the entire year):
   - *Nortel Inversora group:* following the acquisition, in 1999, of an additional stake (17.50%) in the holding company Nortel Inversora by Telecom Italia through Stet International Netherlands, with effect from January 1, 2000, Nortel Inversora and the Telecom Argentina group controlled by it, were consolidated on a proportional basis, insofar as they jointly controlled on a 50-50 basis with the France Telecom group;

1720

- *Centrosiel*: 47% owned by Banksiel in addition to a proxy of 4% authorized by Centrobanca to exercise voting rights at the stockholders' meetings;
- *Med-1 group*: following the purchase of the majority stake in the Israeli company Med-1, through the investments held by Stet International Netherlands (27.83%) and directly by Telecom Italia (23.17%), the following companies became subsidiaries: Med-1 Submarine Cables, Med-1 IC-1(1999), Med-1 Netherlands and Med-1 Italy;
- *Mediterranean Nautilus Ltd, Mediterranean Nautilus S.A., Latin American Nautilus Ltd, Latin American Nautilus S.A.*, established as part of the development of the Nautilus project;
- *TI Belgium, TI France, TI Germany, TI Switzerland, TI United Kingdom, Telecom Italia Netherlands*, established following the development of a pan-European network;
- *BBNED*, established in 2000 and entirely controlled by Stet International Netherlands;
- *IMMSI and TELIMM*, deriving, respectively, from the partial spin-offs of Sirti and Teleleasing;
- *Tele Payroll Services*, set up through the contribution of the business segment for the management of personnel administration services of the companies of the Group to the company Teleporti Italia S.p.A. in liquidation;
- *TI.IT - Telecom Italia Information Technology (IT Telecom):* set up as part of the reorganization of the information technologies sector, using the company Reseau S.r.l. in liquidation;
- *TI WEB*, established by Telecom Italia, which holds 99.97%, and to which the investment in Globo.com was transferred by Softe;
- *Tim International*, established by TIM;
- *Tim Perù*, established by Stet Mobile Holding;
- *Timnet.com*, established in June 2000 by Tele Nordeste Celular and Tele Celular Sul.

The following balance sheet and statement of income highlights are presented for the Nortel Inversora group at December 31, 2000, at 50%, for a more meaningful understanding of the effects on the results of operations and financial condition of Telecom Italia Group (in billions of lire):

	Nortel Inversora Group
Balance Sheet	
• Intangibles, fixed assets and long-term investments	5,928
• Current assets including accrued income and prepaid expenses	1,541
• Stockholders' equity	2,147
• Reserves for risks and charges	329
• Liabilities including accrued expenses and deferred income	4,993
Statement of income	
• Production value	3,672
• Production costs	2,946
• Operating income	726
• Investment and financial income (expense), net	- 302
• Extraordinary income (expense)	- 60
• Income taxes	- 215
• Net income, before minority interest	149

1721

b) added to the scope of consolidation only the balance sheets have been consolidated as the companies were acquired during the last part of the year, because in the terms of approving Board of Director's report on operations, the economic results were not avaliable:
- *Seat Pagine Gialle group*;
- *Jet Multimedia group*;
- *Europe Explorer group*;
- *Mageos*;
- *Corporacion Digitel*;
- *Maxitel group*;
- *Eustema.*

The following balance sheet highlights are presented for the Seat Pagine Gialle group at December 31, 2000, for a more meaningful understanding of the effects on the financial condition of Telecom Italia Group (in billions of lire):

	Seat Pagine Gialle Group
Balance sheet	
• Intangibles, fixed assets and long-term investments	3,951
• Current assets including accrued income and prepaid expenses	3,810
• Stockholders' equity	3,358
• Reserves for risks and charges	241
• Liabilities including accrued expenses and deferred income	4,162

c) eliminated from the scope of consolidation:
- *Webegg,* following the dilution of share capital with the capital increase reserved for Olivetti. After this transaction, the company is held 50% by Olivetti, 30.20% by Finsiel and 19.80% by I.T. Telecom; the company has been valued using the equity method.
- *Finsiel Hellas,* put into liquidation in December 2000.
- *Optical Technologies Center*, sold to third parties;
- *Stet France,* non-operating company;
- *Tecnitel,* which, after the wind-up was revoked, changed its name to IM.SER, and after the contribution of the "Grandi Immobili" business segment by Telecom Italia, 60% of the company has been sold. In the 2000 financial statements, the company is valued using the equity method;
- *Teleleasing*, following the disposal of the controlling interest; the investment held by Saiat is now equal to 20% and the company has been valued using the equity method;

d) consolidated (only the statements of income have been consolidated since the companies were disposed of during the last part of the year):
- *Sirti group*;
- *Italtel group*;
- *U-Mobil*;
- *Bisiel.*

The following balance sheet highlights are presented for the Sirti group and the Italtel group at December 31, 1999, for a more meaningful understanding of the effects on the financial condition of Telecom Italia Group (in billions of lire):

1722

	Sirti Group	Italtel Group
Balance sheet		
• Intangibles, fixed assets and long-term investments	430	383
• Current assets including accrued income and prepaid expenses	1,748	2,223
• Stockholders' equity	955	800
• Reserves for risks and charges	223	429
• Liabilities including accrued expenses and deferred income	1,000	1,377

e) other changes in the scope of consolidation:

- *Comitsiel*, merged by incorporation in Banksiel, effective for accounting purposes (balance sheet and statement of income) on January 1, 2000;
- *Metis*, merged in Consiel, effective for accounting purposes (balance sheet and statement of income) on January 1, 2000.

As regards some recently acquired foreign holdings operating in the "new economy", no writedowns were effected notwithstanding the fall in the market values of this sector. This was decided in consideration of the prospects for business in the medium and long-term which are deemed unchanged and also on account of the industrial – and thus strategic – nature of such investments in relation to the competitive positioning of the Telecom Italia Group in the reference markets. Nevertheless, in view of the rapid evolution of the sector, these holdings were will be continually and carefully monitored.

The end of December 2000 marked the conclusion of the reorganization of the international telecommunications sector, with the acquisition of 100% of Stet Mobile Holding by TIM and the acquisition of 100% of Stet International Netherlands by Telecom Italia, which also received 1.94% of TIM ordinary shares, with a share capital increase reserved for the Parent Company. The Parent Company interest, therefore, does not take into account the reduction of the stake in Stet Mobile Holding or the concurrent increase of the holding in TIM.

Annexes 7 and 8 list those subsidiaries excluded from consolidation for the following reasons: their inclusion would not have been material for purposes of a true and fair representation of the consolidated financial statements and/or because they were not operational or in liquidation and/or are involved in business areas markedly different to those of the other companies in the Group.

At December 31, 2000, Telecom Italia's subsidiaries and affiliates listed in Annexes 5 to 8, were categorized as follows:

	Subsidiaries			Affiliates			Total
	Italy	Abroad	Total	Italy	Abroad	Total	
Companies:							
• consolidated on the line-by-line method	81	155	236	=	=	=	236
• consolidated on the proportional method	=	=	=	2	8	10	10
• valued by the equity method	2	7	9	34	28	62	71
• valued at cost	30	17	47	27	11	38	85
Total companies	113	179	292	63	47	110	402

1723

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The data for consolidation purposes have been taken from the financial statements at December 31, 2000 of each consolidated company, approved by the respective boards, and adjusted where necessary to conform to the accounting principles adopted by the Parent Company Telecom Italia.
The financial statements expressed in foreign currency have been translated into Italian lire by applying the average exchange rate for the year to the individual items of the statement of income and the year-end exchange rate to the items of the balance sheet.
The difference arising from the translation of beginning stockholders' equity and the net income for the year at the year-end exchange rate is recorded in the reserves under consolidated stockholders' equity.
The exchange rates used in translation are listed in the "other information" section of the notes.

All subsidiaries included in the scope of consolidation have been consolidated using the line-by-line method, which can be summarized as follows:

a. assumption of the total amount of assets, liabilities, revenues and expenses, regardless of the interest held, separately showing the minority interest in stockholders' equity and net income;
b. the difference arising from the elimination of the carrying value of an investment in a company included in the scope of consolidation against the underlying share of the stockholders' equity at the date of acquisition is allocated, where possible, to the assets and liabilities of the company. Any residual amount is treated as follows:
   - if positive, it is recorded in "consolidation difference" under "intangible assets" and is amortized on the straight-line method over the estimated time required to recover the amount and, in any case, not more than a period of 15 years;
   - if negative, it is recorded in stockholders' equity as "consolidation reserve", or, when the amount is due to expectations of unfavorable financial results, to "consolidation reserve for future risks and charges";
c. elimination of receivables and payables, as well as expenses and revenues among consolidated companies;
d. elimination of profit included in fixed assets and intangible assets which stem from intraGroup purchases of goods and services at market prices. The portion of intraGroup revenues referring to the above goods and services has been reclassified, net of intraGroup profit, to the item "increase in capitalized internal construction costs".

The following have been eliminated:

1. capital gains on the transfer of fixed assets among consolidated companies;
2. profit, if significant, on transactions among consolidated companies involving the sale of goods remaining in inventory which have not been realized with third parties;
3. writedowns and reinstatements of value for long-term investments in consolidated companies, as well as intraGroup dividends.

Provisions and value adjustments made by individual consolidated companies exclusively for the purpose of securing tax benefits allowed by law, such as accelerated depreciation and transfers to the reserves for operating grants, have also been eliminated from the consolidated financial statements.

The consolidation of investments on a proportional basis was effected by including the individual items of assets, liabilities, costs and revenues of the companies jointly

controlled, in proportion to the percentage of ordinary shares held. The consolidated financial statements therefore present the portion of receivables, payables, costs and revenues of the companies consolidated on a line-by-line basis not eliminated against the underlying share of the companies consolidated on a proportional basis.
The value of investments consolidated proportionally has been eliminated against the corresponding share of the net equity of the investments consolidated proportionally; the minority interest in the stockholders' equity will include any proportional share of the net equity in the event of the consolidation of a group.

ACCOUNTING PRINCIPLES

The accounting principles adopted in preparing the consolidated financial statements at December 31, 2000 conform to the law and have been applied on a basis consistent with the prior year, with the exception of the accounting treatment for finance leases.

The accounting principles are set out below:

Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit.
When full recovery of the investments is not expected, appropriate writedowns are made.

Fixed assets

Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include inflation adjustments made on the basis of the laws.
For assets whose value is permanently below the historical cost, net of their accumulated depreciation, the appropriate writedowns are made. Such lower value will be reversed in subsequent years if the underlying assumptions are no longer correct.
Construction in progress is stated at the amount of direct costs incurred.

Equity investments

Equity investments considered long-term in nature are recorded in long-term investments or, if acquired for subsequent sale, recorded in short-term financial assets.
Long-term equity investments in unconsolidated companies are valued by the equity method; positive differences arising upon acquisition, between the carrying value of the investments in said companies and the underlying share of net equity at current values, are included in the value of the investments and amortized on the straight-line method over their expected period of recoverability and, in any case, for a period not exceeding 15 years. Such amortization is charged to the statement of income among "value adjustments to financial assets" in (writedowns of investments).
Other long-term investments in unconsolidated subsidiaries are recorded at acquisition or subscription cost, adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.

1725

For long-term investments in companies operating at a loss, the value of the investments is written down to an amount equal to the corresponding share of the underlying net equity, if lower, as shown by the latest financial statements of the respective companies. Losses exceeding the corresponding carrying values are recorded among *"reserves for risks and charges"*.

Contracts for the loan of securities are represented in the financial statements as two functionally related transactions: a loan and a repurchase transaction on the securities with the obligation of the borrower to resell them at maturity. Accordingly, "Other receivables" and Other liabilities" include, respectively, a receivable and a payable of the same amount at the fixed amount of the contract (market price of stock at the date of delivery of the securities).

Investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost and realizable value, based on the year-end stock market prices.

Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.

Other securities (other than equity investments)

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.

Securities held as long-term investments are valued at cost, adjusted for the portion of the difference for the year between the cost and the redemption value.

Securities included in current assets are valued at the lower of cost, adjusted for the portion of issue differences and realizable value based on market.

Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.

Securities acquired under repurchase agreements, for which the obligation exists to resell them at maturity, are included at purchase cost in receivables under current assets. The difference between the sales price and the purchase price is allocated to income as it accrues with a contra-entry to accrued income/expense in the balance sheet.

Inventories

Inventories are valued at the lower of purchase or production cost and market.

The methods mainly used in computing cost are the following:

- raw materials and finished goods: LIFO with annual adjustments;
- merchandise: weighted average;
- work in progress and semifinished goods: production cost;
- contract work in process:
  - contracts covering less than 12 months: industrial cost;
  - contracts covering more than one year: at estimated revenues using the percentage of completion method.

In determining the value of contract work in process, anticipated losses upon completion and any other risks are also taken into account. Inventories of raw materials, finished goods and merchandise which exceed foreseeable manufacturing requirements or have become obsolete are written down their estimated realizable value.

1726

Accounts receivable and liabilities

Receivables are stated at the estimated realizable value and classified under long-term investments or current assets. Liabilities are shown at their nominal value.
Accounts receivable and liabilities in foreign currency, based on the concept of prudence, are recorded at the year-end exchange rates. The positive and negative differences between the balance of accounts receivable and liabilities converted at year-end exchange rates and their balance at the original exchange rates are recorded in the statement of income, respectively, in *"financial income"* and *"financial expense"*.

Accruals and deferrals

These items are recorded on the accrual basis.

Reserves for risks and charges

For taxes: this reserve includes prudent provisions for estimated tax charges (including any surtaxes and late payment interest) on positions not yet agreed or in dispute.
For deferred taxes: this reserve includes deferred taxes calculated on the timing differences of the individual consolidated companies between the value attributed to assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes, as well as those generated by consolidation adjustments.
Deferred tax assets are recorded among *"other receivables"* in current assets.
Deferred tax assets and deferred tax liabilities are set off, whenever the assumptions for doing so exist.
Deferred taxes on reserves on which taxation has been suspended, regarding consolidated companies or companies valued by the equity method, are recorded when such reserves are expected to be distributed or otherwise used and their distribution or utilization will give rise to tax charges.
The tax benefit of tax loss carryforwards is recorded whenever there is reasonable expectation of realization.
"Other reserves" relate primarily to provisions to cover charges of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data.

Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws and collective bargaining agreements and includes the liability matured at the end of the year in favor for all personnel employed by the Italian consolidated companies. The item *other receivables*, under long-term investments, includes the receivable stemming from the advance payment of tax on the reserve for employee termination indemnities (Law 662/96).

Employee benefit obligations under Law No. 58/1992

Employee benefit obligations, as required by Law No. 58/1992, are accounted for on a cash basis, as described in the notes to financial statements of the Parent Company Telecom Italia. The remaining liability for such obligations, payable in fifteen annual installments

1727

on the basis of the statement updated to December 31, 2000 by the National Social Security Institute (INPS) and according to its interpretation, amounts to Lire 2,923 billion, divided as follows:

a) Lire 1,911 billion for the principal amount (except for the portion attributable to former Iritel employees);
b) Lire 1,012 billion in accrued interest.

As regards pre-amortization interest and the related accrued interest, as described in the notes of the Parent Company, in compliance with the sentence handed down by the Court of Appeals, No. 4242 of April 5, 2000, payment of the above-described interest and accrued interest related thereto (for a residual amount of Lire 789 billion) has been suspended as from June 2000.

The consolidated financial statements also include Lire 1,377 billion due to INPS, relating to the estimate for the employees of the former State Company for Telephone Services (ASST) made by the special Ministerial Commission established under Law No. 58/1992, upon the contribution of the assets of the Post and Telecommunications Administration to Iritel.

The employee benefit obligations to guarantee uniform insurance status recorded in the consolidated statement of income for the year 2000 (under *extraordinary expense*) amount to Lire 297 billion inclusive of accrued and pre-amortization interest.

Grants

Operating grants (directly credited to the statement of income) and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures. Specifically, capital grants are recorded in deferred income and recognized in future years in the statement of income in relation to the amount of depreciation taken on the underlying assets to which the grants refer.

Revenues and expenses

Revenues and expenses are recorded on an accrual basis and recognized in the consolidated statement of income as follows.

a. *telecommunications services*: in the year in which the services are rendered; in particular traffic revenues are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost;
b. *information technology and innovative network services, other activities*: to the extent to which the connected services were rendered during the fiscal year.

Leased assets

Since Teleleasing is no longer in the scope of consolidation, assets covered by finance lease contracts with a purchase option are recorded in fixed assets and depreciated from the date of the lease contract using rates consistent with those used for similarly owned assets. At the same time, a liability is recorded for the same amount, adjusted by the principal lease payments. The statement of income is charged for the financial expenses for the period and the depreciation charge on the assets acquired in leasing.

1728

Memorandum accounts

Starting from these financial statements, the manner of accounting for and presenting memorandum accounts has been changed. In particular:
- guarantees provided are presented net of counter-guarantees received;
- financial derivative contracts are only presented in the notes.

Collateral and guarantees provided – essentially relating to sureties – are recorded for an amount equal to the guarantee provided; those in foreign currencies are translated at year-end exchange rates.
Purchases and sales commitments are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".
Other memorandum accounts mainly refer to assets of third parties at consolidated subsidiaries.

Financial derivatives

Financial derivative contracts are used by the Group to hedge exposure to interest rate and currency exchange risks.
Interest rate swaps involve the exchange of flows of interest between the counterparts calculated on the notional amount of reference at the agreed fixed or variable rates at the specified maturity date: normally the differential between the two interest rates is paid or received.
Cross currency and interest rate swaps are used both to hedge interest rate risk and exchange risk on loans denominated in foreign currency: they make it possible to covert the notional amount in foreign currency to the domestic currency and also to convert from a variable rate to a fixed rate.
The interest paid or received or the differential paid or received is recorded in the statement of income in specific accounts under financial income and expense. Moreover, related accruals are made at the year-end or interim closings with a counter-entry to "accrued income and prepaid expenses or accrued expenses and deferred income".

1729

CONSOLIDATED BALANCE SHEETS

ASSETS

Intangibles, fixed assets and long-term investments

Intangible assets ***Lire 31,052 billion***

(Lire 5,299 billion at December 31, 1999)

Intangible assets increased by Lire 25,753 billion compared to the end of 1999. A breakdown of the composition and the changes in this account are provided below:

(in billions of lire)	12.31.1999	Additions	Amortization	Change in scope of consolidation	Other changes	12.31.2000
Start-up and expansion costs	127	90	(44)	40	(19)	194
Industrial patents and intellectual property rights	1,507	647	(1,455)	37	849	1,585
Concessions, licenses, trademarks and similar rights	296	5,098	(91)	1,505	(21)	6,787
Goodwill	8		(6)	129	2	133
Consolidation difference	1,967	17,637	(349)	568	(14)	19,809
Work in progress and advances to suppliers	755	1,634		10	(773)	1,626
Other intangibles	639	296	(247)	357	(127)	918
Totale	5,299	25,402	(2,192)	2,646	(103)	31,052

Other changes include Lire 70 billion of write-downs, of which Lire 38 billion are for writedowns of the software projects of the Parent Company that will be abandoned during 2001.

- *Start-up and expansion costs* refer primarily to registration fees paid when consolidated companies are established or when their capital is increased.

- *Industrial patents and intellectual property rights* consist mainly of applications software either owned outright or acquired under a license for an unspecified period of time.

- *Concessions, licenses, trademarks and similar rights* increased by Lire 6,491 billion mainly as a result the acquisition of the UMTS license by TIM in Italy (Lire 4,680 billion), in addition to the value, net of amortization, of the mobile telephony licenses of Maxitel (Lire 1,055 billion), Telecom Argentina (Lire 368 billion) and TIM Perù (Lire 366 billion).

- The *consolidation difference* increased by Lire 17,842 billion since the end of 1999, mainly due to the purchase of the controlling interest in Seat Pagine Gialle (Lire 12,736 billion), and the increase for the investment in TIM (Lire 1,525 billion), both of which are net of the amortization charge for the year. The balance also includes the residual value of the difference between the cost incurred for the acquisition of the Jet Multimedia group and Europe Explorer (Lire 1,381 billion), Digitel (Lire 700 billion), Maxitel (Lire 646 billion), TDL Infomedia (Lire 595 billion), Tele Celular Sul

1730

Participacoes (Lire 506 billion) and Tele Nordeste Celular Participacoes (Lire 503 billion) and their underlying stockholders' equity at their acquisition date. It also includes Lire 1,044 billion relating to the companies in the Seat Pagine Gialle group.

- *Work in progress and advances to suppliers* increased by Lire 871 billion, compared to December 31, 1999, and represent the difference between the capitalization of costs incurred by the Parent Company for software development projects in progress and the projects which came into use during the year.

- *Other intangibles,* totaling Lire 918 billion (Lire 639 billion at December 31, 1999), include Lire 506 billion (Lire 357 billion at December 31, 1999) of leasehold improvements.

Fixed assets ***Lire 45,358 billion***

(Lire 45,518 billion at December 31, 1999)

Fixed assets decreased by Lire 160 billion compared to the end of 1999. They are shown net of depreciation and writedowns and have been adjusted to eliminate intraGroup profits generated by purchases of internally produced goods and services. An analysis of fixed assets at December 31, 2000 is provided in the following table:

(in billions of lire)							12.31.2000	12.31.1999
	Owned assets			Leased assets			Net book value	Net book value
	Gross value	Accumulated depreciation	Total	Gross value	Accumulated depreciation	Total	Total	
Land and buildings	7,618	2,774	4,844	1,027	165	862	5,706	9,823
Plant and machinery	109,738	74,726	35,012	139	55	84	35,096	31,991
Manufacturing and distribution equipment	1,935	1,783	152	3	3	=	152	240
Other fixed assets	4,233	2,719	1,514	151	46	105	1,619	1,097
Construction in progress and advances to suppliers	2,633		2,633	152		152	2,785	2,367
Total	126,157	82,002	44,155	1,472	269	1,203	45,358	45,518

The gross value of owned assets is composed as follows:

(in billions of lire)	Cost	Upward adjustments	Write-downs	Gross value
Land and buildings	6,503	1,119	4	7,618
Plant and machinery	110,028	1,596	1,886	109,738
Manufacturing and distribution equipment	1,930	5	=	1,935
Other fixed assets	4,220	14	1	4,233
Construction in progress and advances to suppliers	2,628	11	6	2,633
Total	125,309	2,745	1,897	126,157

Seat Pagine Gialle revalued its industrial buildings pursuant to Law No. 342 of November 21, 2000 for a total amount of Lire 29 billion.
Accumulated depreciation covered 65.9% of gross fixed assets, compared to 64.1% at the end of last year.

1731

A summary of the changes in fixed assets during the year is shown in the following table:

(in billions of lire)	2000	1999
At January 1	45,518	45,665
• Additions	7,530	7,503
• Disposals	(199)	(330)
• Sale of "Grandi Immobili" business segment	(4,632)	=
• Depreciation for the year	(8,741)	(8,425)
• Writedowns	(22)	(138)
• Change in the scope of consolidation	5,766	1,513
• Other	138	(270)
At December 31	45,358	45,518

Additions for the year amounted to Lire 7,530 billion (Lire 7,503 billion in 1999), including a total of Lire 1,139 billion in Southern Italy (Lire 1,391 billion in 1999). A breakdown by sector is provided below:

(in billions of lire)	2000	1999
Wireline telecommunications Italy	3,675	4,574
Mobile telecommunications Italy	1,668	1,582
Satellite telecommunications	57	56
International telecommunications	1,974	955
Information technology activities	232	73
Manufacturing activities	34	46
Installation activities	27	58
	7,667	7,344
Other activities and intraGroup eliminations	(137)	159
Total	7,530	7,503

Additions in 2000 are in line with those of the prior year mainly on account of a reduction in investments by the Parent Company that were offset by higher investments by the mobile telephony companies and the consolidation of the Nortel Inversora group (Lire 937 billion).

Long-term investments ***Lire 16,797 billion***

(Lire 13,217 billion at December 31, 1999)

Long-term investments, which increased by Lire 3,580 billion from December 31, 1999, include the following:

(in billions of lire)	12.31.2000	12.31.1999
Equity investments in:		
• unconsolidated subsidiaries	41	235
• affiliated companies	13,939	11,510
• other companies	369	579
	14,349	12,324
Advances on future capital contributions	363	2
	14,712	12,326
Accounts receivable:		
• affiliated companies	246	258
• other receivables	546	628
	792	886
Other securities	12	5
Treasury stock	1,281	=
Total	16,797	13,217

Equity investments in affiliated companies, amounting to Lire 13,939 billion, increased by Lire 2,429 billion from December 31, 1999 chiefly due to the purchase of the investment in GLB Servicos Interativos, the Internet company of Globo Organizações (30%, for an equivalent amount of Lire 1,686 billion) and the formation of the company IS TIM (Lire 594 billion) which won the third GSM 1800 license in Turkey.

Equity investments in affiliated companies refer to the following:

(in billions of lire)	12.31.2000
Telekom Austria	3,523
GLB Servicos Interactivos	1,566
Mobilkom Austria	1,135
Etec S.A.	1,043
Auna (formerly Retevision)	986
Solpart Participacoes	893
Entel Chile	733
IS TIM	684
Astrolink	507
Eutelsat	419
IM.SER	395
Telekom Srbija	378
BDT	333
Netco Redes	261
Cecchi Gori Communications	229
Italtel Holding	204
Stream	194
Mondus	110
Other	346
Total	13,939

The total of the investments valued by the equity method included the unamortized portion (Lire 5,645 billion, against Lire 4,815 billion at December 31, 1999) of the excess of book values over the corresponding share of the underlying stockholders' equity at the time of purchase. The excess refers to Telekom Austria (Lire 1,891 billion), GLB Servicos Interativos (Lire 1,521 billion), Mobilkom Austria (Lire 593 billion), AUNA (Lire 543 billion), Entel Chile (Lire 313 billion), Bouygues Decaux Telecom (Lire 257 billion), Netco Redes (Lire 218 billion), Etec S.A. (Lire 216 billion), and other minor investments. As regards Telekom Srbija, the investment in this company was reduced to the underlying share of net equity in view of the devaluation of the Serbian dinar against the German mark, and also on account of the loss for the year.

A list of the companies valued by the equity method is provided in Annex 7; equity investments in unconsolidated subsidiaries and affiliates are listed in Annex 8.

1733

Accounts receivable from affiliated companies, amounting to Lire 246 billion, refer to loans made to foreign affiliates, in particular, to BDT (Lire 198 billion) and Golden Lines (Lire 24 billion).

Other receivables, amounting to Lire 546 billion, included the revalued amount of the tax receivable from the prepayment of the tax on the reserve for employee severance indemnities (Lire 261 billion), loans to employees (Lire 124 billion), loans to other companies, security deposits and capital contributions to the Chinese joint venture, Jilin Huatai Communications (Lire 21 billion).

Other securities amounted to Lire 12 billion and increased by Lire 7 billion from December 31, 1999 mainly due to in the inclusion of the Nortel Inversora group in the scope of consolidation.

Treasury stock, of Lire 1,281 billion, refers to No. 104,978,070 savings shares bought back by the Parent Company.

Current Assets

Inventories ***Lire 1,405 billion***

(Lire 1,995 billion at December 31, 1999)

Inventories include the following:

(in billions of lire)	12.31.2000	12.31.1999
Raw materials and supplies	40	189
Merchandise	415	403
	455	592
Work in progress and semifinished goods	26	134
Finished goods	3	23
	29	157
Contract work in process	905	1,217
Advances to suppliers	16	29
	921	1,246
Total	1,405	1,995

Inventories are held by companies providing telecommunications services for Lire 878 billion (Lire 844 billion at December 31, 1999) and companies providing information technology services for Lire 420 billion (Lire 303 billion at December 31, 1999).
The reduction in inventories of Lire 590 billion can mainly be ascribed to the exclusion of the manufacturing and installations companies from the scope of consolidation.
Raw materials and supplies and work in progress and semifinished goods are substantially in line with current costs.

1734

Accounts receivable ***Lire 23,009 billion***

(Lire 19,065 billion at December 31, 1999)

A breakdown of accounts receivable, which increased by Lire 3,935 billion, is provided below:

(in billions of lire)	12.31.2000	12.31.1999
Trade accounts receivable	16,917	16,239
• allowance for doubtful accounts	(1,433)	(1,297)
Total trade accounts receivable	15,484	14,942
Accounts receivable from unconsolidated subsidiaries	79	75
Accounts receivable from affiliated companies	800	953
Accounts receivable from parent companies	5	2
Other receivables	6,641	3,093
Total	23,009	19,065

In particular:

- Gross *trade accounts receivable* totaled Lire 16,917 billion and consist, for the most part, of receivables for telecommunications services. Receivables have been adjusted to estimated realizable value by writedowns and they, too, refer mostly to telecommunications companies. Accounts receivable also include Lire 2,067 billion of receivables from other telecommunications carriers and Lire 250 billion of services to be performed by Seat Pagine Gialle representing the advertising commitments assumed and invoiced by the company for directories that will be published in 2001.
- *Accounts receivable from unconsolidated subsidiaries,* which totaled Lire 79 billion, include loans and trade receivables from subsidiary consortium companies.
- *Accounts receivable from affiliated companies* amounted to Lire 800 billion, a decrease of Lire 153 billion. They refer to financial receivables for Lire 283 billion, and trade and other receivables for Lire 517 billion. Financial receivables mainly refer to Stream (Lire 106 billion), Cecchi Gori Communication (Lire 75 billion) and Telekom Srbija (Lire 41 billion); while trade and other receivables chiefly refer to Telekom Srbija (Lire 127 billion), Auna (Lire 93 billion), Golden Lines (Lire 49 billion), Stream (Lire 45 billion) and other foreign companies.
- *Other receivables* of Lire 6,641 billion (Lire 3,093 billion at December 31, 1999), included the following:
  - financial receivables of Lire 1,810 billion (Lire 58 billion at December 31, 1999), which increased almost entirely on account of the transaction for the loan of securities by the Parent Company, covered by the specific guarantee contracts;
  - other receivables totaling Lire 4,831 billion (Lire 3,035 billion at December 31, 1999), which refer to the following:

1735

(in billions of lire)	12.31.2000	12.31.1999
Government and other public entities for subsidies and grants	82	112
Customer payments in transit	362	532
Due from the Tax Administration	1,116	442
Deferred tax assets	1,928	940
Employees	152	144
Other receivables from the Government, other public entities and items in transit	1,191	865
Total	4,831	3,035

During 2000, TIM assigned trade accounts receivable to factoring companies for Lire 6,203 billion (without recourse within the pre-established limits of the receivables from dealers with collection at the due date). At December 31, 2000, receivables sold and not yet due amounted to Lire 510 billion.
The Parent Company, Telecom Italia, assigned receivables without recourse, not due on December 31, 2000, to factoring companies for a total of Lire 400 billion, with a loss on the sale of Lire 5 billion.

Net deferred tax assets are composed as follows:

(in billions of lire)	12.31.2000	12.31.1999
Deferred tax assets	1,928	940
Reserve for deferred taxes	(390)	(292)
Total	1,538	648

Deferred tax assets mainly refer to the writedowns of receivables and software and the reserves for risks and charges; deferred tax liabilities mainly originated from gains.
The increase in the net tax asset balance is principally due to lower deferred taxes of the Parent Company following the reclassification of the "Reserve for accelerated depreciation", pursuant to the application of art. 14 of Law No. 342/2000.
No deferred tax assets have been set aside because of uncertainty over their recoverability against future taxable profits. In particular, tax loss carryforwards, which have not been considered in the determination of deferred tax assets, amount to some Lire 5,000 billion, of which about Lire 2,600 billion can be utilized under the known circumstances.

Short-term financial assets ***Lire 4,755 billion***
(Lire 2,592 billion at December 31, 1999)

This item, which increased by Lire 2,163 billion compared to December 31, 1999, includes the following:

(in billions of lire)	12.31.2000	12.31.1999
Equity investments in unconsolidated subsidiaries	759	122
Equity investments in affiliated companies	11	=
Other equity investments	73	11
Other securities	3,911	2,450
Receivables for sale of securities	1	9
Total	4,755	2,592

1736

Equity investments refer mainly to listed shares of Group companies purchased by Telecom Italia for trading. The carrying value at the end of the year approximates market value.

Other securities, which consist almost entirely of government securities and bonds, rose by Lire 1,461 billion compared to December 31, 1999 mainly as a result of the consolidation of Maxitel (Lire 527 billion), Telecom Argentina (Lire 331 billion) and due to the increase in marketable securities held by Softe and Sogerim (Lire 443 billion). The carrying value at the end of the year approximates market value.

Liquid assets ***Lire 2,525 billion***
(Lire 1,312 billion at December 31, 1999)

Liquid assets increased by Lire 1,213 billion. They consist mainly of funds on deposit in Italian and foreign banks on current accounts.

Accrued income and prepaid expenses ***Lire 1,950 billion***
(Lire 180 billion at December 31, 1999)

This item, which increased by Lire 1,770 billion, can be analyzed as follows:

(in billions of lire)	12.31.2000	12.31.1999
Issue discounts and similar charges	3	3
Accrued income:		
• production value	24	30
• financial income	115	24
• other	=	40
	139	94
Other prepaid expenses:		
• production costs	192	63
• financial expenses	151	16
• other	1,465	4
	1,808	83
Accrued income and other prepaid expenses	1,947	177
Total	1,950	180

Other prepaid expenses increased primarily on account of the effect of the expenses (Lire 1,454 billion) relating to the deferral of the put option on the Seat Pagine Gialle shares (see the memorandum accounts).
An analysis of accounts receivable and accrued income by maturity and type is provided in Annex 1.

1737

LIABILITIES AND STOCKHOLDERS' EQUITY

Stockholders' equity ***Lire 49,431 billion***
(Lire 38,314 billion at December 31, 1999)

A breakdown of stockholders' equity is presented below:

(in billions of lire)	12.31.2000	12.31.1999
Parent company interest, Telecom Italia	36,443	33,004
Minority interest	12,988	5,310
Total	49,431	38,314

Stockholders' equity of the Parent Company and the minority interest increased by Lire 11,117 billion compared to December 31, 1999. In particular:
- the *share capital of the Parent Company*, unchanged compared to December 31, 1999, consists of 5,260,037,131 ordinary shares and 2,166,120,095 savings shares, both with a par value of Lire 1,000 each;
- Telecom Italia's interest in *reserves and retained earnings* includes the Parent Company's retained earnings and own reserves, as well as the consolidated companies' retained earnings and inflation adjustment reserves and tax-deferred reserves. No deferred taxes have been provided on the latter reserves since, based on current plans, no transactions are expected to be entered into which would warrant taxation.

The Parent Company interest increased by Lire 3,439 billion compared to December 31, 1999 due mainly to the effect of the conversion of TIM savings shares into ordinary shares (Lire 3,236 billion), the net income for 2000 (Lire 3,927 billion), net of the 1999 Telecom Italia dividends (Lire 4,505 billion).
The reconciliation of Telecom Italia's financial statements with the consolidated financial statements as regards stockholders' equity and net income for the year, and the changes in the components of consolidated stockholders' equity, are provided in Annexes 3 and 4.

Reserves for risks and charges ***Lire 3,425 billion***
(Lire 2,006 billion at December 31, 1999)

These reserves increased by Lire 1,419 billion from December 31, 1999 and refer to the following:

- the *reserve for taxes,* amounting to Lire 307 billion, (-Lire 2 billion compared to December 31, 1999), mainly consists of estimated tax liabilities on positions still to be agreed or in dispute;

- the *reserve for deferred taxes*, amounting to Lire 390 billion (+Lire 98 billion compared to December 31, 1999), includes deferred taxes provided by the individual consolidated companies on the income components subject to deferred taxation and also provided on consolidation adjustments;

- *other reserves*, amounting to Lire 2,698 billion, increased by Lire 1,293 billion compared to December 31, 1999 and include the reserve for litigation (Lire 432 billion), the reserve for restructuring charges (Lire 318 billion, of which Lire 295 billion relate to the Parent Company, set up following the union agreements in 2000) and other reserves (Lire 1,733 billion), of which Lire 840 billion refer to the risk reserve for technological advances by TIM.

Reserve for employee termination indemnities ***Lire 2,554 billion***
(Lire 2,896 billion at December 31, 1999)

A breakdown of the changes which occurred during the year is provided below:

(in billions of lire)	2000
Balance at December 31, 1999	**2,896**
• provisions charged to income	469
• utilizations for:	
· indemnities paid to employees	(390)
· advances	(90)
• other changes	(331)
Balance at December 31, 2000	**2,554**

Other changes mainly refer to the change in the scope of consolidation, principally due to the exclusion of the manufacturing and installation companies (Lire 333 billion) which was in part compensated by the inclusion of the Seat Pagine Gialle group (Lire 75 billion).

Liabilities ***Lire 69,087 billion***
(Lire 44,242 billion at December 31, 1999)

A breakdown of liabilities, which increased by Lire 24,845 billion from December 31, 1999, is as follows:

	12.31.2000		12.31.1999	
(in billions of lire)	Financial accounts payable	Trade accounts payable and miscellaneous payable	Financial accounts payable	Trade accounts payable and miscellaneous payable
Debentures	3,512		1,906	
Due to banks	32,522		15,780	
Due to other lenders	3,270		1,738	
Advances		716		733
Trade accounts payable	526	12,603	123	11,652
Notes payable	97			
Accounts payable to unconsolidated subsidiaries		12	9	30
Accounts payable to affiliated companies	1,339	1,124	11	1,145
Accounts payable to parent companies		3		5
Taxes payable		1,800		2,295
Contributions to pensions and social security institutions		1,808		1,855
Other liabilities	4,051	5,704	57	6,903
Total	45,317	23,770	19,624	24,618

In particular:
- *debentures*, which totaled Lire 3,512 billion and increased by Lire 1,606 billion from December 31, 1999, include the following:
  - debentures maturing between 2001 and 2008 issued by Nortel Inversora group for a total of Lire 1,936 billion;
  - the 1992/2010 debenture issue of the Parent Company Telecom Italia, which is reserved for subscription by employees in service and retired, for a total amount of Lire 282 billion at December 31, 2000 (Lire 825 billion at December 31, 1999);

1739

- debentures maturing between 2001 and 2002 issued by Softe through different financial institutions for US$ 229 million, equivalent to Lire 477 billion;
- debentures issued by TDL Infomedia Ltd (Seat Pagine Gialle group), maturing beyond 2005, for Lire 392 billion.
- debentures maturing between 2002 and 2005 issued by the Brazilian companies Tele Nordeste Celular and Tele Celular Sul for Lire 425 billion.

– *Due to banks,* of Lire 32,522 billion, are secured by mortgages and liens for Lire 402 billion. Due to banks increased, compared to 1999, by Lire 16,742 billion owing to the credit facilities utilized by the Parent Company to finance the purchase of the Seat Pagine Gialle shares from the company Huit II and through tender offers (Lire 11,572 billion). The amount also increased as a result of the consolidation of the liabilities of the new foreign companies, including Telecom Argentina (Lire 1,581 billion), Maxitel (Lire 1,511 billion), Digitel (Lire 308 billion), as well as those of the Seat Pagine Gialle group (Lire 340 billion).

– *Due to other lenders,* of Lire 3,270 billion, increased by Lire 1,532 billion compared to December 31, 1999. This was due to a reduction in the loans payable to Cassa Depositi e Prestiti and IRI by the Parent Company (Lire 1,276 billion; -Lire 334 billion compared to 1999) and an increase deriving from the consolidation of Seat Pagine Gialle group (Lire 1,871 billion). Such liabilities mainly refer to the loan payable to Seat Pagine Gialle S.p.A. of Lire 1,848 billion by Seat Pagine Gialle Finance S.r.l., a corporate vehicle operating under Law No. 130/99 on securitization. In July, the vehicle company brought, from a banking syndicate, the medium-term loan payable to Seat Pagine Gialle, in addition to an investment certificate of Euros 50 million issued by the same company, financing itself by issuing medium-term debentures divided into two tranches of, respectively, Euros 700 million for three years and Euros 300 million for five years. The medium/long-term loan sold without recourse by the financing banks to the vehicle company calls for an amortization plan with six-monthly installments up to June 30, 2005. Based on this transaction, the vehicle company will use the net proceeds from the installments to purchase the investment certificates issued by Seat Pagine Gialle with the same maturity dates as the portions of the debentures issued by the vehicle itself; the amortization plan for Seat Pagine Gialle's liability to the vehicle company and that of the 3-year and 5-year debentures issued by the vehicle company will have the same maturity dates. For purposes of the structure of the transaction and to hedge the interest rate risk, Seat Pagine Gialle has, at the same time, concluded a series of swap and collar contracts with financial intermediaries.

– *Advances,* which totaled Lire 716 billion, decreased by Lire 17 billion compared to December 31, 1999 and include advances received from customers of Lire 232 billion and installment billings of Lire 484 billion. The reduction, due to the exclusion of the manufacturing and installation companies from the scope of consolidation, is compensated by the increase in the amount of advances by Telespazio for the Astrolink contract.

– *Trade accounts payable* amounted to Lire 13,129 billion and show an increase of Lire 1,354 billion compared to December 31, 1999. The increase is mainly due to the inclusion in the scope of consolidation of Nortel Inversora group (Lire 832 billion), Maxitel (Lire 570 billion) and Seat Pagine Gialle group (Lire 743 billion). Accounts payable to other telecommunications carriers stood at Lire 1,007 billion.

- *Notes payable*, of Lire 97 billion, refer to the investment certificates issued in July by Seat Pagine Gialle as part of the securitization transaction.

- *Accounts payable to affiliated companies* of Lire 2,463 billion increased by Lire 1,307 billion compared to the end of 1999. They include financial payables for Lire 1,339 billion, mainly to Teleleasing (Lire 1,073 billion) for financial lease contracts. Trade accounts payable and other payables amount to Lire 1,124 billion and are due to the Italtel group (Lire 536 billion) and Astrolink (Lire 183 billion, for capital contributions).

- *Taxes payable* amounted to Lire 1,800 billion and decreased by Lire 495 billion compared to December 31, 1999. The decrease is attributable to the Parent Company and TIM for the reduction in current income taxes and higher advances paid during 2000. Taxes payable include Lire 572 billion for income taxes and Lire 1,228 billion for indirect taxes and withholding taxes. The liability of the Parent Company includes the taxes due on the portion of income which could possibly be set aside in the "Reserve for accelerated depreciation" when the financial statements are approved by the stockholders' meeting; in this case, these same taxes will be reclassified to the "Reserve for deferred taxes".

- *Contributions to pensions and social security institutions* totaled Lire 1,808 billion and decreased by Lire 47 billion compared to December 31, 1999 and include amounts owed to social security and health institutions. This item includes Lire 1,377 billion payable to INPS for the remaining balance of the estimated charges assessed for employees of the former ASST pursuant to Law No. 58/1992.

- *Other liabilities* of Lire 9,755 billion, increased by Lire 2,795 billion compared to December 31, 1999. A breakdown is provided below:

(in billions of lire)	12.31.2000	12.31.1999
Customer-related items	3,261	3,394
Residual amounts due for investments	315	764
Employee-related items	1,560	1,060
Telecommunications license fee	1,191	1,174
Dividends and other financial items	2,973	57
Other recurring and miscellaneous items (contra-entries for accrued costs, accrued interest expense at December 31 and payable the following year, sundry payables, etc.)	455	511
Total	9,755	6,960

In particular, customer-related items consist of deposits paid by customers and pre-billed basic charges (attributable mainly to January and February), as well as prepaid traffic. The item also includes other liabilities for services to be performed by Seat Pagine Gialle (Lire 250 billion). The financial payables refer to the Parent Company for Lire 1,680 billion, for the transaction for the loan of securities, and TIM for Lire 680 billion, in reference to the remaining liability payable to the Ministry of Communications for the purchase of the UMTS license.

1741

Gross debt analyzed by the interest rate is presented in the table below:

	12.31.2000			12.31.1999
(in billions of lire)	ITL	Foreign currency (equivalent in ITL)	Total	
Up to 2.5%	1,928	15	1,943	3,411
From 2.5% to 5%	6,681	819	7,500	9,671
From 5% to 7.5%	20,887	5,912	26,799	5,240
From 7.5% to 10%	1,304	2,045	3,349	1,284
Beyond 10%		4,046	4,046	18
Total	30,800	12,837	43,637	19,624
Non-interest bearing	1,680		1,680	
Total	32,480	12,837	45,317	19,624

The largest amount of gross debt (equal to 83%) falls within the range of rates up to 7.5%; in particular, the range between 5% and 7.5% includes the short-term debt of Telecom Italia S.p.A. to cover financial requirements using short-term credit facilities. The total also includes medium and long-term loans payable to various financial institutions with 3% interest subsidies paid by the Treasury Ministry (pursuant to Law No. 67 of March 11, 1988), loans made by the Cassa Depositi e Prestiti (pursuant to Law No. 887 of December 22, 1984), as well as loans made with EIB funds. The other ranges of interest rates mainly include the medium/long-term and short-term positions of the foreign companies.
At December 31, 2000, the companies of Telecom Italia Group had unused credit lines for about Lire 12,600 billion.

Accrued expenses and deferred income ***Lire 2,357 billion***
(Lire 1,723 billion at December 31, 1999)

A breakdown of accrued expenses and deferred income, which increased by Lire 634 billion over December 31, 1999, is as follows:

(in billions of lire)	12.31.2000	12.31.1999
Accrued expenses:		
• production costs	83	45
• interest expense	358	193
• other charges	1	2
	442	240
Deferred income:		
• capital grants (unavailable amount)	824	920
• production value	663	510
• interest income	22	30
• other income	406	23
	1,915	1,483
Total	2,357	1,723

An analysis of liabilities and accrued expenses by maturity and type is provided in Annex 2.

1742

MEMORANDUM ACCOUNTS

Memorandum accounts at December 31, 2000 total Lire 15,625 billion and increased, compared to December 31, 1999, by Lire 3,565 billion. The total is not comparable to that of the prior year since, starting from 2000, the guarantees provided are presented net of counter-guarantees received and the derivative hedging contracts are only disclosed in the notes.

Memorandum accounts are detailed as follows:

(in billions of lire)	12.31.2000	12.31.1999
Guarantees provided	5,675	2,557
Collateral provided	4	17
Purchases and sales commitments	9,492	1,666
Other	454	7,820
Total	15,625	12,060

In particular:

- *guarantees provided*, net of counter-guarantees received of Lire 1,085 billion, total Lire 5,675 billion and mainly consist of sureties provided by the Parent Company Telecom Italia and Stet Mobile Holding on behalf of affiliated companies and others for medium/long-term loan transactions and guarantees on bids to acquire fixed line and mobile licenses abroad;

- *collateral provided* of Lire 4 billion refers to liens and mortgages covering the assets of the companies included in consolidation;

- *purchases and sales commitments* outstanding at the end of the year of, respectively, Lire 9,344 billion and Lire 148 billion, refer to the commitments which do not fall within the normal operating cycle of the individual consolidated companies.
  In particular, the purchases commitments refer to:
  - Lire 5,780 billion of the Parent Company for the put option on Seat shares. Under the contract stipulated on March 15, 2000 (as subsequently amended and integrated), Telecom Italia gave Huit II a put option on No. 710,777,200 Seat Pagine Gialle shares at a strike price of Euros 4.2. The contract provided for the exercise of such option after the deed of merger between Seat and Tin.it was recorded in the Companies Register. Huit II later transferred the put option to Chase Equity Limited (CEL), together with the ownership of the corresponding Seat shares. On December 4, 2000, CEL renegotiated the contract with Telecom Italia, extending the period to five years, with the possibility of an early exercise of the option in April and May 2003, 2004 and 2005. The time extension made it possible to defer the financial impact. Stet International Netherlands then purchased from CEL, through the Liberator Ltd. trust, a call option on No. 660,777,200 Seat shares with the same expiry date and strike price as the put option, paying a total premium of Euros 747,016,226 (Lire 1,446,425 million). For the purpose of transferring the effects of this latter transaction to Telecom Italia, a call option was stipulated, with the same features, between Telecom Italia and Stet International Netherlands. The implicit rate of interest was 6.2%. At December 31, 2000, the market price of Seat ordinary

1743

shares is significantly lower than the strike price. At the expiration, the purchase of Seat Pagine Gialle shares will involve the enter of a consolidation difference equal to the cost of acquisition, entered in the commitments less the pro-quota of the Seat Pagine Gialle's stockholders' equity at that date;

- Lire 1,857 billion of Stet International Netherlands for the purchase of the 25.63% stake in Entel Chile and from the Chilquinta group and 2.98% from the Matte group;
- Lire 1,355 billion of Seat Pagine Gialle for the commitment to purchase 40% of Webfin S.p.A. by June 30, 2003.

This caption also includes the commitment for the purchase and sale options on listed investments for a total nominal value of Lire 229 billion.

– *other memorandum accounts* of Lire 454 billion refer mainly to third party assets held by the individual consolidated companies, mainly those in the information technology sector.

Furthermore:

- the consolidated companies of the Group issued weak letters of patronage totaling Lire 574 billion chiefly on behalf of unconsolidated subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements;
- assets of third parties on loan, on deposit for safekeeping or for similar purposes amounted to Lire 723 billion and consist mainly of equipment leased to customers;
- collateral received amounts to Lire 30 billion;
- guarantees received amount to Lire 182 billion;
- guarantees provided by others for obligations of the Group companies, which consist primarily of sureties to guarantee the performance of non-financial contractual obligations, totaled Lire 797 billion;
- orders from customers in the portfolios of the consolidated companies amount to Lire 22 billion;
- the stock of employees and private stockholders deposited on December 31, 2000 at the listed companies of the Group amount to about Lire 600 billion;
- the bonds reserved for subscription by the employees of the Parent Company are equal to Lire 718 billion.

Financial derivatives

The Group uses derivatives mainly for the management of its debt positions, primarily interest rate swaps and interest rate options (to reduce the interest rate exposure on fixed-rate and floating-rate bank loans and bonds) and cross-currency & interest rate swaps (to convert foreign currency loans – US dollar, pound sterling, Japanese yen and euro – into the functional currencies of the various subsidiaries).
The following table gives a description of the financial derivative contracts outstanding at December 31, 2000 to hedge medium/long-term debt positions.

(in billions of lire)	Notional amount/ Capital exchanged at 12.31.2000	Market value of derivatives at 12.31.2000 (a)	Market value of underlying debt positions at 12.31.2000 (b)	Market value of debt including-related derivatives at 12.31.2000 (c = b - a)
Interest rate swaps and interest rate options	5,629	46	5,637	5,591
Cross currency and interest rate swaps	2,367	38	2,264	2,226

1744

IRS (interest rate swaps) and IRO (interest rate options) involve the exchange of flows of interest calculated on the notional amount of reference at the agreed fixed or variable rates at the specified maturity date with the counterparts. This amount does not represent the amount exchanged between the parties and therefore does not constitute a measure of exposure to credit risk, which is instead limited to the amount of interest or interest differentials to be received at the interest date.

Furthermore, the counterparts to derivative contracts are only the best rated banks and financial institutions and continually monitored in order to minimize the risk of non-performance.

The same also applies to CIRSs which involve the exchange of capital, in the respective currencies of denomination, in addition to the settlement of periodic interest flows, at maturity and eventually at another date.

The market value of CIRSs (currency & interest rate swaps) reflects the differential between the fixed rate paid by the Company and the market interest rate for the same maturities. The CIRSs also reflect the difference between the forward exchange rate at the closing of the swap and the market rate at December 31, 2000.

To determine the market value of the above financial derivatives, the Company uses adequate pricing models.

Hedges were also considered for the USD Libor in respect of USD loans contracted by Telecom Argentina, consolidated at 50%.

Besides derivative contracts used for managing the debt positions, at December 31, 2000 the Luxembourg subsidiary SOFTE had IRSs and CIRSs to hedge investments in bonds for a notional capital of Lire 526 billion.
Lastly, in addition to the various transactions to hedge the short-term positions of SOFTE, there were also transactions to hedge the interest rate exposure on short-term US dollar loans contracted by TIM.

1745

CONSOLIDATED STATEMENTS OF INCOME

Production value ***Lire 59,111 billion***

(Lire 55,749 billion at December 31, 1999)

Production value increased by Lire 3,362 billion (+6% compared to 1999). The main components of this item are:

- *sales and service revenues,* amounting to Lire 55,979 billion, with an increase of Lire 3,498 billion over 1999 (+6.7%). This increase is due to the inclusion of the Nortel Inversora group in the scope of consolidation which is partly offset by the reduction in the revenues of the manufacturing and installations sectors which were included for a nine-month period in 2000 compared to a 12-month period in the prior year. The deconsolidation of the revenues on leasing contracts with third parties stipulated by Teleleasing also had an effect. The breakdown of revenues by sector is as follows:

			Change	
(in billions of lire)	2000	1999	Amount	%
Wireline telecommunications Italy	33,723	35,856	(2,133)	(5.9)
Mobile telecommunications Italy	15,352	14,425	927	6.4
Satellite telecommunications	659	619	40	6.5
International telecommunications	7,615	3,253	4,362	*
Information technology activities	3,137	3,074	63	2.0
Manufacturing activities	1,221	1,776	(555)	*
Installation activities	1,165	1,501	(336)	*
	62,872	60,504	2,368	3.9
Other activities and IntraGroup eliminations	(6,893)	(8,023)	1,130	*
Consolidated Group revenues	55,979	52,481	3,498	6.7

Revenues from telecommunications services are shown gross of the amount due to other carriers of Lire 5,403 billion (Lire 4,626 billion in 1999).
Revenues from foreign operations totaled Lire 11,374 billion (Lire 7,542 billion in 1999).

- *Increases in capitalized internal construction costs* totaled Lire 1,765 billion (Lire 2,056 billion in 1999; -Lire 291 billion). A breakdown is provided below:

(in billions of lire)	2000		1999		Change	
• intragroup revenues from sales of systems		1,632		1,989		(357)
• other capitalized costs:						
· personnel	45		32		13	
· financial expenses	80		6		74	
· materials and other costs	8	133	29	67	(21)	66
Total		1,765		2,056		(291)

1746

Financial expenses were charged to "construction in progress and advances to suppliers" in fixed assets.

– *other revenues and income* of Lire 826 billion (Lire 998 billion in 1999) include the following:

(in billions of lire)	2000	1999	Change
• operating grants	39	39	=
• gains on disposal of intangibles and fixed assets	18	35	(17)
• portion of capital grants recorded in income	139	141	(2)
• other income	630	783	(153)
Total	826	998	(172)

In particular:
- operating grants refer chiefly to the amounts bestowed by public institutions to defray the costs incurred for research, development and technological innovation;
- the portion of capital grants recorded in income represents the portion that became available during the year;
- other income from operations mainly includes charges to customers of the telecommunications services companies for the late payment of telephone bills (Lire 213 billion compared to Lire 252 billion in 1999).

Production cost ***Lire 45,932 billion***
(Lire 43,293 billion in 1999)

Production cost, which increased by Lire 2,639 billion (+6.1%) compared to 1999, includes the following:

– *raw materials, supplies and merchandise*, totaling Lire 3,893 billion (Lire 4,354 billion in 1999), and *semifinished and finished goods*, amounting to Lire 480 billion (Lire 441 billion in 1999). These costs, which represent purchases of raw materials and other goods to be used in operations, decreased by Lire 422 billion;

– *services* costs, amounting to Lire 16,252 billion (Lire 14,289 billion in 1999), and *cost for the use of property not owned*, totaling Lire 1,546 billion (Lire 1,363 billion in 1999). Overall, these two items increased by Lire 2,146 billion mainly due to the inclusion in the scope of consolidation of the Nortel Inversora group (Lire 996 billion), the rise in operating costs, the expansion of mobile telecommunications services (Lire 333 billion) and the increase in the operations of certain foreign companies;

– *personnel* costs of Lire 9,729 billion (Lire 9,636 billion in 1999), including Lire 7,787 billion relating to companies which provide telecommunications services. The average cost per capita for the Group was Lire 78 million (Lire 79 million in 1999). At December 31, 2000, employees of the Group numbered 114,669 (122,662 at December 31, 1999), a decrease of 7,993 owing to personnel turnover and the effect of the change in the scope of consolidation. In particular, the exclusion of the Sirti group and the Italtel group led to a reduction in the number of employees of 17,857, compensated by the addition of 10,316 units in international telecommunications,

1747

mainly for the Nortel Inversora group (+7,498) and Maxitel (+1,229) and the inclusion of the Seat group (+7,515). A breakdown of personnel by business segment is presented as follows:

	12.31.2000	12.31.1999	Change
Wireline telecommunications Italy	66,541	76,113	(9,572)
Mobile telecommunications Italy	9,634	9,375	259
Satellite telecommunications	1,194	1,287	(93)
International telecommunications	15,943	5,714	10,229
Information technology activities	11,280	10,206	1,074
Manufacturing activities	=	5,153	(5,153)
Installation activities	=	12,704	(12,704)
Other activities	10,077	2,110	7,967
Total	114,669	122,662	(7,993)

The equivalent average number of salaried employees was 124,696 in 2000 (121,327 in 1999).
A breakdown by category follows:

	2000 Average equivalent number of salaried employees of companies consolidated:		
	On a line-by-line basis	By the proportional method	Total
Executives	2,272	25	2,297
Middle management	8,858	333	9,191
Clerical staff	84,383	2,864	87,247
Technicians	21,911	4,050	25,961
Total	117,424	7,272	124,696

– *amortization, depreciation and writedowns* amounted to Lire 11,950 billion (Lire 11,182 billion in 1999), with an increase of Lire 768 billion. This item refers to the following:
  - amortization of intangible assets totaling Lire 2,192 billion, compared to Lire 1,913 billion in 1999, with an increase of Lire 279 billion. The change is due to higher amortization charges by TIM (+Lire 102 billion) and inclusion in the scope of consolidation of the Nortel Inversora group;
  - depreciation of fixed assets totaled Lire 8,741 billion, compared to Lire 8,425 billion in 1999, with an increase of Lire 316 billion. A breakdown of depreciation expense by asset category is provided below:

(in billions of lire)	2000	1999	Change
Nonindustrial and industrial buildings	513	528	(15)
Plant and machinery	7,443	7,165	278
Manufacturing and distribution equipment	95	146	(51)
Other fixed assets	690	586	104
Total	8,741	8,425	316

Depreciation expense increased due to the inclusion in the scope of consolidation of the Nortel group (+Lire 740 billion) which was only partly compensated by the decrease in the

1748

depreciation expense of the Parent Company (-Lire 439 billion) owing to the reduction in the amount of depreciable assets, the change in the mix of depreciable assets, lower depreciation on public telephony installations and DECT fixed assets written down in the 1999 financial statements and the adjustment of depreciation rates relating to the submarine network in the 2000 financial statements;

- other writedowns of intangibles and fixed assets of Lire 93 billion (Lire 142 billion in 1999). The reduction in the amount of provisions is due to the writedown of the public telephony installations effected by the Parent Company in the 1999 financial statements.

- writedowns of receivables included in current assets and liquid assets amounted to Lire 924 billion (Lire 702 billion in 1999) and represent the provisions made during the year to adjust receivables to their estimated realizable value;

– *provisions for risks* and *other provisions* totaled Lire 305 billion (Lire 195 billion in 1999) and consist of provisions made during the year to the various reserves for contractual risks and pending disputes;

– *miscellaneous operating costs,* amounting to Lire 1,773 billion (Lire 1,870 billion in 1999), include the following:

(in billions of lire)	2000	1999
• TLC license fee	1,107	1,174
• losses on disposal of intangibles and fixed assets	101	241
• indirect duties and annual taxes, including the local property tax (ICI)	270	215
• membership dues and other costs	295	240
Total	1,773	1,870

Financial income and expense ***-Lire 900 billion***
(-Lire 633 billion in 1999)

Financial income and expense shows a net financial expense referring to the following items:

(in billions of lire)	2000	1999	Change
Income from equity investments	585	277	308
Other financial income	1,046	791	255
Interest and other financial expense	(2,531)	(1,701)	(830)
Total	(900)	(633)	(267)

– *income from equity investments, net* totaled Lire 585 billion (Lire 590 billion, net of Lire 5 billion in losses on disposals; Lire 277 billion in 1999); this item includes dividends from unconsolidated companies of Lire 273 billion, as well as gains realized by Telecom

1749

Italia on the sale of TIM shares in current assets and venture capital investments (Lire 312 billion);

– *other financial income* of Lire 1,046 billion (Lire 791 billion in 1999) includes the following:

(in billions of lire)		2000		1999		Change
Interest and capital gains on fixed-income securities		202		187		15
Interest and fees from:						
• unconsolidated subsidiaries	1		3		(2)	
• affiliated companies	28		32		(4)	
• banks	143		104		39	
• customers	6	178	24	163	(18)	15
Foreign exchange gains		379		270		109
Other financial income		287		171		116
Total		1,046		791		255

Interest and capital gains on fixed-income securities refer to interest on long-term investment securities for Lire 1 billion (Lire 3 billion in 1999) and interest and capital gains on marketable securities for Lire 201 billion (Lire 184 billion in 1999);

– *interest and other financial expense* of Lire 2,531 billion (Lire 1,701 billion in 1999) can be analyzed as follows:

(in billions of lire)		2000		1999		Change
Interest and fees paid to:						
• unconsolidated subsidiaries	1		1		=	
• affiliated companies	64		1		63	
• banks	1,313		680		633	
• suppliers and other lenders	177	1,555	184	866	(7)	689
Interest and other charges on debenture issues		287		96		191
Foreign exchange losses		338		317		21
Other financial expense		351		422		(71)
Total		2,531		1,701		830

In particular:

- interest and fees paid to other lenders consist mostly of interest on medium/long-term borrowings of the Parent Company;
- interest and fees paid to banks include Lire 481 billion of interest on medium/long-term borrowings and Lire 832 billion of charges relating to short-term positions. Interest is shown net of the interest expense on loans, equivalent to three percentage points, subsidized by the government under Budget Law 1988 (Law No. 67 of March 11, 1988), in connection with loans that replaced those which should have been made by Cassa Depositi e Prestiti.

1750

Value adjustments to financial assets ***-Lire 2,243 billion***
(-Lire 1,131 billion in 1999)

These include:

(in billions of lire)	2000	1999	Change
Upward adjustments of:			
• equity investments	533	467	66
	533	467	66
Writedowns of:			
• equity investments	(2,517)	(1,562)	(955)
• long-term investments, other than equity investments	=	(36)	36
• securities other than equity investments included in current assets	(259)	=	(259)
	(2,776)	(1,598)	(1,178)
Total	(2,243)	(1,131)	(1,112)

Value adjustments primarily refer to the Group's share of net income or loss of unconsolidated subsidiaries and affiliated companies accounted for by the equity method, including the amortization of positive differences that arose upon the acquisition of such investments (Lire 877 billion), mainly in respect of Seat Pagine Gialle (Lire 423 billion). The higher amount of valuation adjustments is due substantially to the negative results of the Maxitel group (Lire 433 billion), Stream (Lire 392 billion), Auna (Lire 340 billion) and Telekom Austria (Lire 101 billion).

Extraordinary income and expense ***-Lire 415 billion***
(-Lire 981 billion in 1999)

This item includes the following:

- income of Lire 2,676 billion (Lire 280 billion in 1999) analyzed as follows:
  - gains deriving from the divestiture plan of the Group (Lire 1,877 billion) which refers to the sale of 80% of the Italtel group (Lire 760 billion), the Meie group (Lire 450 billion), Teleleasing (Lire 41 billion) and the Sirti group (Lire 22 billion) and the sale of the "Grandi Immobili" business segment through the sale of 60% IM.SER (Lire 604 billion) to third parties;
  - the gains on the sale of other investments and intangibles, fixed assets and business segments (Lire 342 billion) of which Lire 107 billion comes from the sale of the investment in the Bharti group;
  - income (Lire 91 billion) representing lower previous taxes for TIM following the favorable evolution of the official interpretations concerning the so-called Visco tax benefits set forth in Law No. 133/99, with specific reference to Circular No. 101 issued by the Ministry of Finance on May 19, 2000.

- expenses of Lire 3,091 billion (Lire 1,261 billion in 1999), analyzed as follows:
  - restructuring expenses for Lire 953 billion, of which Lire 884 billion refer to the Parent Company in respect of the costs of the corporate reorganization plan;
  - social security charges pursuant to Law No. 58/92 to guarantee uniform status under the former Telephone Employees Pension Fund (FPT) which, as required by the 2000

1751

Finance Bill, has become part of the general "Employees Pension Fund" for Lire 297 billion and an extraordinary annual contribution of Lire 150 billion to INPS as established by the same Bill for the three years 2000 - 2002 to meet the higher financial requirements covered by the rules of the fund that was abolished;

- the provision by TIM to the reserve for technological risk and the reserve for the costs to liberalize frequencies for Lire 812 billion. The provision includes the estimates determined by evaluating the risks connected with the evolution of third-generation technologies. Besides the economic risks deriving from the development of new technologies and the expenses consequent to need to replace certain types of network installations in advance, the reserve also includes the valuation of the risks connected with need to make important and early revisions to the billing system to accommodate new types of services;
- expenses and provisions connected to the transactions for the disposal of investment holdings and the "Grandi Immobili" business segment for Lire 349 billion;
- Lire 78 billion for the fine imposed on TIM and Omnitel Pronto Italia by the Antitrust Authority for the alleged violation of rules against price-fixing; this figure is equal to an amount in excess of that recorded in the reserve for risks by TIM in the December 31, 1999 financial statements (Lire 22 billion).

Income taxes ***Lire 3,912 billion***
(Lire 5,046 billion in 1999)

Income taxes decreased by Lire 1,134 billion. The taxes to gross profit ratio is 40.7%, compared to 52% in 1999. The reduction from 1999 is mainly due to the following:

- the tax benefits on investments utilized by TIM;
- the taxation of gains from the sale of investments and the contribution of the business segment "Grandi Immobili" by the Parent Company using the substitute equalization tax;
- the reduction of deferred taxes subsequent to the reclassification of the "Reserve for accelerated depreciation" by the Parent Company pursuant to art. 14 of Law 342/2000.

Income taxes include current taxes for Lire 4,815 billion and deferred tax assets for Lire 903 billion.

Exhibit 2.3

1754

OTHER INFORMATION

Introduction of the Euro

The expenses borne for the introduction of the Euro currency total about Lire 14 billion and have been charged to the statement of income under Production cost as they refer to services rendered to revise and update the information systems.

Remuneration to directors and statutory auditors

The remuneration to which the directors and statutory auditors of Telecom Italia are entitled for fiscal 2000 for carrying out their responsibilities and functions in the Parent Company and also in other consolidated companies, total Lire 8,902 million for the directors and Lire 1,593 million for the statutory auditors.

PRICEWATERHOUSECOOPERS

3 In our opinion, the consolidated financial statements of the Telecom Italia Group as of December 31, 2000 comply with the laws governing the criteria for their preparation; accordingly, they give a true and fair view of the financial position and of the results of operations of Telecom Italia Group.

4 For a better understanding of the consolidated financial statements, reference should be made to the information included in the notes to the consolidated financial statements, in the section "Summary of significant accounting policies", regarding the accounting criteria utilised for the employee benefit obligations as required by law no. 58/1992.

Turin, May 21, 2001

PricewaterhouseCoopers SpA

Sergio Duca

NOTES TO FINANCIAL STATEMENTS

The financial statements at December 31, 2000 have been prepared in accordance with the provisions of the Italian Civil Code.
The accounting policies adopted in preparing the financial statements at December 31, 2000, disclosed below, have been applied on a basis consistent with the prior year.
No special situations that would require the use of the waivers allowed under Article 2423, Section 4, of the Italian Civil Code occurred during the year.
Following certain changes to some items of the financial statements, the financial statements at December 31, 1999 have been reclassified for purposes of a meaningful comparison.
As required by Legislative Decree No. 127/1991, the consolidated financial statements have also been prepared and are presented together with the financial statements of Telecom Italia.
The disclosure relating to the introduction of the euro is presented in a specific paragraph "Other information" of these Notes and in the Report on operations.
The statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these notes to financial statements pursuant to Article 2423, Section 3 of the Italian Civil Code.
Unless otherwise specified, all figures are stated in millions of Italian lire.
As described in the comments under "Management's discussion and analysis of financial condition and results of operations", following the contributions made during 2000, the balance sheet does not include the assets and liabilities contributed, whereas the statement of income takes into account the results of the companies contributed up to the date the transactions went into effect. These financial statements include the assets and liabilities of Stet International, acquired as part of the total spin-off of this same company, effective for accounting and tax purposes as from January 1, 2000.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit.
When full recovery of the investments is not expected, the appropriate writedowns are made by applying the method adopted for fixed assets, to which reference should be made.
Detailed amortization policies are presented in the following paragraphs.

Start-up and expansion costs are amortized in five years, starting from the year the costs were incurred or became due.

1904

Industrial and intellectual property rights are amortized over their estimated period of benefit on a five-year basis (industrial patents) or on a three-year basis (software), starting from the year of their initial use.

Concessions, licenses, trademarks and similar rights refer mainly to the rights for the use of satellites and are amortized on the straight-line method on the basis of the useful life of the satellites.

Goodwill is amortized in five years starting from the year in which the cost was incurred.

The item *Others* consists primarily of:

- *leasehold improvements*: the amortization is calculated on the basis of the remaining duration of the lease contracts;
- *rights of transmission*: the rights guarantee the extension of transmission capacity of the Company over a foreign territory and are amortized over the period of the contracts entered with the foreign operators who own the installations to which the rights refer;
- *exclusive rights to the "Great Jubilee 2000" event*: these refer to the charges incurred by Telecom Italia for the acquisition of the exclusive right as the sole telecommunications operator of the Jubilee and are amortized up to the expiration of the right (January 2001).

Research, development and advertising costs are charged to income in the year incurred.

Fixed assets

Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include inflation adjustments made on the basis of the special laws regarding assets existing on or before December 31, 1981 (Law No. 74 of February 11, 1952; Law No. 576 of December 2, 1975; Law No. 72 of March 19, 1983), the entries required under Law No. 823 of December 19, 1973, regarding the settlement of tax liabilities, as well as mandatory upward adjustments of all real estate as required by Law No. 413 of December 30, 1991.
For assets whose value is permanently below the historical cost, net of their accumulated depreciation, the appropriate writedowns are made pursuant to Article 2426, Section 1, item 3 of the Italian Civil Code. To determine such writedowns, specific methods are used based on the expected future profitability of the assets. In particular, an analysis is made of the value of those assets affected by events compromising the possibility of a full recovery of book value. This value is compared with the – non discounted – cash flows expected from use of the assets. If the cash flow is less than the book value, writedowns are determined by adjusting the book value of the assets to their fair value, represented by cash flows, discounted at the rate used for the valuation of the investments. Any writedowns are recorded in the statement of income under the item "amortization, depreciation and writedowns" among "other writedowns of fixed assets and long-term investments".
Construction in progress is stated at the amount of direct costs incurred (materials used for the installations or intended therefor, third-party services, miscellaneous expenses, as well as company labor). The value of fixed assets does not include maintenance costs

1905

incurred for their upkeep to guarantee their expected useful life, their original capacity and productivity, and costs borne to repair malfunctions and failures; such expenses are charged to the statement of income in the year incurred.
The total depreciation charge for the year was determined taking into account the estimated useful lives of the installations and the review, made in 2000, regarding those of the submarine network.
Total accumulated depreciation for fixed assets was upwardly adjusted where called for by the previously mentioned special laws.

Equity investments

Equity investments in subsidiaries, affiliated companies and other companies are included either under long-term investments or short-term financial assets, based on the anticipated holding period.
Long-term equity investments in *subsidiaries*, *affiliated companies* and *other companies* are valued at acquisition or subscription cost – determined according to the continuous LIFO method – increased by the statutory inflation adjustments, as well as the voluntary one made to several investments during the preparation of the financial statements at December 31, 1981.
The carrying value of investments recorded in long-term investments is adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.
For long-term investments in companies operating at a loss, the value of the investments is written down to an amount equal to the corresponding share of the underlying net equity, if lower, as shown by the latest financial statements of the respective companies. Losses exceeding the corresponding carrying values are recorded among *reserves for risks and charges*.

Contracts for the loan of securities are represented in the financial statements as two functionally related transactions: a loan and a repurchase transaction on the securities with the obligation of the borrower to resell them at maturity. Accordingly, "Other receivables" and Other liabilities" include, respectively, a receivable and a payable of the same amount at the fixed amount of the contract (market price of stock at the date of delivery of the securities).

Equity investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost – determined according to the continuous LIFO method – and realizable value, based on the year-end prices on the Italian Online Stock Market.
The costs of investments in foreign companies have been translated into Italian lire at historical exchange rates prevailing at the time of acquisition or subscription.
Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.
With regard to investments in "international organizations for satellite systems", the value shown in the financial statements consists of the equivalent value in Italian lire of the net financial contributions calculated at the exchange rates in effect at the time of each transaction. The holding in such organizations is adjusted each year in relation to the actual use of the satellite systems.

1906

Other securities (other than equity investments)

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.
Securities held as long-term investments are valued at cost, adjusted for the portion of the difference between the cost and the redemption value that accrued during the year.
Securities included in current assets are valued at the lower of cost of acquisition, adjusted for the portion of issue differences and realizable value, and the year-end prices on the Italian Online Stock Market.
Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.
The cost of securities, whether included in long-term investments or current assets, is determined by the continuous LIFO method.

Inventories

Inventories – consisting of goods intended for sale, as well as stock on hand of technical materials and replacement parts to be used in the business during the year and for maintenance – are valued at the lower of cost, calculated using the weighted-average method, and realizable value.
The carrying value of goods in stock is reduced, through appropriate writedowns, for obsolete materials.
Inventories include the amount of work on behalf of third parties in progress at the end of the year, valued according to the "costs" already incurred.

Accounts receivable and liabilities

Accounts receivable are stated at estimated realizable value and classified under long-term investments or current assets. They include – as far as telecommunications services are concerned – the amount of services already rendered to customers and other carriers, already billed or still to be billed, as well as the invoices for the sale of telephone and online products.
Liabilities are shown at their nominal value.
Accounts receivable and liabilities in foreign currency, based on the concept of prudence, are recorded at the year-end exchange rates; the positive and negative differences between the balance of accounts receivable and liabilities converted at year-end exchange rates and their balance at the original exchange rates are recorded in the statement of income, respectively, in *financial income* and *financial expense*.

Accruals and deferrals

These items are recorded on the accrual basis. *Issue discounts and similar charges* consist of costs in connection with long-term loans, which are charged to the statement of income over the duration of the loan in proportion to the accrued interest.

1907

Reserves for risks and charges

For taxes: this reserve includes prudent provisions for estimated tax charges (including any surtaxes and late payment interest) on positions not yet agreed or in dispute.

For deferred taxes: this reserve includes deferred tax liabilities – net of deferred tax assets, whenever the assumptions for doing so exist – calculated on the timing differences between the value attributed to assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes.
Whenever the amount of deferred tax assets is higher than deferred tax liabilities, the balance is recorded among "*other receivables*" in current assets.

Others: relate primarily to provisions to cover charges of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data.

Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws (in particular Law No. 297 of May 29, 1982, which provides for fixed and variable cost-of-living adjustments) and collective bargaining agreements. The reserve is adjusted to the liability matured at the end of the year for personnel in force at that date and is net of advances paid.
The item *other receivables*, under long-term investments, includes the receivable stemming from the advance payment of tax on termination indemnities in accordance with Law No. 662 of December 23, 1996 and its subsequent amendments. This receivable is revalued according to the provisions of the law.

Employee benefit obligations under Law No. 58/1992

With regard to Telecom Italia's obligation required by Law No. 58/1992 to guarantee a uniform insurance status under the Telephone Workers' Social Security Fund – FPT (part of the general "Employees Pension Fund" beginning January 1, 2000) to all employees in service in the Group's telephone companies (Stet, Sip, Italcable and Telespazio) as of February 20, 1992, as well as those who moved from the Public Administration to Iritel, Article 66, Section 1 of Law 331/1993 and converted into Law No. 427/1993 specifies that the sums due to the Fund should be shown in the financial statements and are tax deductible in the years in which the payments to fulfil this obligation – in fifteen equal annual installments, payable in arrears – are actually made.
At the present time, the amount of the liability, which will be determined by the National Social Security Institute (Istituto Nazionale della Previdenza Sociale - INPS), can be estimated only roughly, due to problems relating to the interpretation and application of the social security legislation and to the lack of certain data which only the social security institutions currently possess. Nevertheless, these financial statements include Lire 1,366 billion of residual payables to INPS, (net of the amount attributed to TIM, TE.SS., Netsiel and Tin.it for the employees transferred to those companies), relating to the estimate

1908

made for the employees of the former State Company for Telephone Services (ASST) by the special Ministerial Commission established under Law No. 58/1992 upon the transfer of the assets of the Post and Telecommunications Administration to Iritel, and recorded by the latter company in its financial statements at December 31, 1993. As a result, these charges will have no impact on the results of future years, since they were already included in the aforementioned calculation.

A dispute concerning the application and interpretation of this law is pending with INPS regarding, firstly, the effective date for the computation of the accrued interest due under Law No. 58/1992, in view of the fact that the liability is paid in installments. Telecom Italia believes that interest should accrue from the time INPS notifies it of the actual amount of the liability, while INPS claims that the computation should be made as of February 20, 1992 or on the date of the transfer to Iritel, thus giving rise to pre-amortization interest. The second issue is the exclusion from the effects of Law No. 58/1992 of all employees (except for employees of the former Iritel) who had filed an application to join pursuant to Law No. 29/1979 before February 20, 1992, unless that application had not been processed by INPS. The position of the Company is that the criteria set forth in Law No. 29/1979 – and, therefore, payment of the respective obligations – apply to these employees.

At the present time, the parties have agreed that the differences in interpretation shall be settled through test appeals, with recourse to the Court of Appeals being waived for a final determination of the correct interpretation of the law in question.

While the proceedings are pending, Telecom Italia has agreed to pay under protest the amounts requested by INPS based on the criteria determined by the latter, subject to subsequent equalization adjustments, if the Courts ultimately accept the Company's interpretation.

Based on the above, a reasonable estimate of the principal amount of the liability attributable to the Company (excluding, as mentioned earlier, the part relating to the former Iritel employees) could vary between Lire 1,900 billion and Lire 2,500 billion (Lire 509 billion of which has already been paid), depending on conflicting interpretations and taking into account all personnel involved. However, these estimates are merely indicative, lacking complete data from INPS. As of December 31, 2000, INPS had submitted formal requests for about 96% of the employees whose change in insurance status will result in a charge for Telecom Italia.

In either case, the impact of the charge should definitely be compatible with the income of future years, since, as allowed under Article 5, Section 3 of Law No. 58/1992, the payments requested by INPS will be made in fifteen equal annual installments payable in arrears (including annual interest of 5%), starting when INPS formally submits its requests.

The remaining liability for obligations under Law No. 58/1992, to be paid in fifteen annual installments on the basis of the formal requests made by INPS on December 31, 2000 and the interpretation of said requests, amounts to Lire 2,923 billion, divided as follows:

- Lire 1,911 billion for the principal amount (except for the portion attributable to former Iritel employees);
- Lire 1,012 billion in accrued interest.

Pre-amortization interest (including that relating to the employees of the former Iritel), subsequent to the agreement between INPS and Telecom Italia, was paid by the latter – with reservation – in fifteen equal annual installments, payable in arrears, including interest at an annual rate of 5%, up to the end of 1999, for a total amount of Lire 216

1909

billion. In compliance with the sentence handed down by the Court of Appeals, No. 4242 of April 5, 2000, which upheld Telecom Italia's position, payment of the above-described interest and accrued interest related thereto was suspended (for a residual amount of Lire 789 billion, of which Lire 68 billion relates to the amount due for 2000).
The charge to income for the year 2000 (under "extraordinary expense") amounts to Lire 297 billion inclusive of accrued interest.
During 2000, Telecom Italia paid INPS the above-mentioned charges also on behalf of other Group companies – mainly TIM and CSELT – for those employees transferred and covered by the obligation of a uniform insurance status under Law No. 58/1992, recovering the amounts paid from these same companies. The recovery is recorded in the statement of income under "extraordinary income" and amounts to Lire 4 billion.

Grants

Operating grants (directly credited to the statement of income) and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures.
The treatment of capital grants and grants for installations in the balance sheet is as follows:

a) grants received through December 31, 1992, are included under *reserves for risks and charges*. The portions equivalent to the depreciation taken on assets financed with the grants in question (the so-called "available" portion) are transferred to a special equity reserve in order to obtain the benefits allowed under the tax law;
b) for grants received from January 1, 1993 to December 31, 1997, 50% of the amount received is recorded in a special reserve of stockholders' equity in order to take advantage of the benefits available under the tax laws, and the remaining 50% is recorded under *deferred income*. These amounts are gradually credited to income in accordance with the pertinent laws;
c) for grants received from January 1, 1998, the amount is recorded under *deferred income* and progressively credited to the statement of income in relation to the depreciation taken on the assets to which the grants refer.

Revenues and expenses

Revenues and expenses are recorded on an accrual basis. Revenues relating to telecommunications services are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost.
Fees for new access lines and line transfers are recorded as income when the service is provided.
Dividends from subsidiaries are recorded when they accrue, that is, in the year when the income from which they are paid is earned by the subsidiaries, providing a substantial certainty that they will be paid, and, in any event, when the stockholders' resolution declaring the dividend is passed or when the appropriation of net income is set forth in the preliminary financial statements prepared by the management of the subsidiaries prior to the Board meeting of the parent company that resolves upon the financial statements. Dividends from affiliated companies and other companies, on the other hand, are recognized in the statement of income according to when they are declared or in the year in which the respective right to the receivable arises, following the stockholders' resolution of those companies.

1910

Leased assets

Capital goods acquired under leasing agreements are shown in the financial statements by a method consistent with current legislation, which requires that leasing payments be recorded as operating costs.

Memorandum accounts

These financial statements contain changes to the presentation of memorandum accounts. In particular:
- guarantees provided are presented net of counter-guarantees received;
- financial derivative contracts are only presented in the notes.

Guarantees provided consist of sureties on behalf of Group companies to secure their borrowings and other obligations. They are shown for an amount equal to the guarantee provided. Those provided in foreign currencies are translated at year-end exchange rates.
Purchases and sales commitments are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".
These are largely represented by the purchases commitments for future lease installments plus the buyout amounts of assets leased.
Other memorandum accounts mainly refer to assets of third parties on loan, on deposit for safekeeping or for similar purposes.

Financial derivatives

Financial derivative contracts are used by the Company to hedge exposure to interest rate and currency exchange risks.
Interest rate swaps involve the exchange of flows of interest between the counterparts calculated on the notional amount of reference at the agreed fixed or variable rates at the specified maturity date: normally the differential between the two interest rates is paid or received.
Cross currency and interest rate swaps are used both to hedge interest rate risk and exchange risk on loans denominated in foreign currency: they make it possible to covert the notional amount in foreign currency to the domestic currency and also to convert from a variable rate or a fixed rate in the foreign currency into a variable rate or fixed rate in the domestic currency.
The interest paid or received or the differential paid or received is recorded in the statement of income in specific accounts under financial income and expense. Moreover, related accruals are made at the year-end or interim closings with a counter-entry to "accrued income and prepaid expenses or accrued expenses and deferred income".

1911

BALANCE SHEETS

ASSETS

Intangibles, fixed assets and long-term investments

Intangible assets ***Lire 2,301,652 million***

(Lire 2,258,614 million at December 31, 1999)

A summary of the changes during the year is presented as follows:

(in millions of lire)	2000
– Additions	1,299,715
– Disposals and other changes	(17,679)
– Contributions of business segments	(52,025)
– Transfers from Stet International for spin-off	1,340
– Writedowns	(37,628)
– Amortization	(1,161,934)
– Reclassifications	11,249
Total	43,038

An analysis of the composition and the changes in intangible assets during the year is presented as follows:

	12/31/1999			
(in millions of lire)	Cost	Writedowns	Amortization	Total
Industrial patents and intellectual property rights	4,184,882	(58,386)	(2,934,208)	1,192,288

1913

Start-up and expansion costs =

This item shows a nil balance between the transfer from Stet International (Lire 1,020 million) and the amortization charge for the year (Lire 1,020 million).

Industrial patents and intellectual property rights *Lire 821,198 million*

These decreased by Lire 371,090 million from December 31, 1999.

They are detailed as follows:

(in millions of lire)	12/31/2000	12/31/1999
• software in use	820,943	1,191,960
• industrial patents	255	328
Total	821,198	1,192,288

Capitalized costs for applications software show a decrease of Lire 371,017 million compared to December 31, 1999, mainly due to some projects which came into use during the year (Lire 713,372 million), net of the amortization charge (Lire 1,024,181 million), disposals (Lire 16,553 million), the writedown of software in use (Lire 4,635 million) and net transfers as a result of corporate transactions entered into during the year (Lire 39,020 million).
Industrial patents decreased by Lire 73 million compared to December 31, 1999, and represent the difference between capitalized costs incurred to file new patents and extend already filed patents to foreign countries (totaling Lire 86 million) and the amortization charge (Lire 159 million).

Concessions, licenses, trademarks and similar rights *Lire 90,088 million*

This item shows a decrease of Lire 22,510 million compared to December 31, 1999, representing the difference between additions and projects which came into use during the year (Lire 980 million), the amortization charge (Lire 23,535 million), disposals (Lire 49 million) and the transfer from Stet International during the year (Lire 94 million).

Goodwill =

Goodwill shows a nil balance owing to the amortization charge for the year 2000 (Lire 1,268 million) and the contribution of the business segment to Tin.it (Lire 2,532 million).

Work in progress and advances to suppliers *Lire 1,240,085 million*

Work in progress and advances to suppliers show an increase of Lire 499,702 million compared to December 31, 1999, due to investments in software development projects relating to network applications and operating programs (Lire 1,229,982 million), completed software projects which came into use during the year (Lire 686,815 million), the writedown of software projects that will be abandoned in 2001 (Lire 32,993 million) and the contributions of business segments during the year (Lire 10,472 million).

1914

Other intangibles *Lire 150,281 million*

These assets, which decreased by Lire 59,264 million compared to December 31, 1999, include:

- "leasehold improvements" (Lire 146,754 million) made up by costs incurred to adapt leased properties to the Company's operating needs. This item shows a decrease of Lire 15,856 million compared to December 31, 1999, representing the difference between new capitalized items (Lire 53,359 million), the amortization charge (Lire 69,439 million) and other changes mainly referring to the transfers from Stet International (+Lire 225 million);
- "exclusive rights to the Great Jubilee 2000 event" (Lire 3,527 million), acquired in 1999 and made up by the costs incurred to obtain the exclusive TLC provider rights for the Jubilee. This asset shows a decrease mainly on account of the amortization charge for the year (Lire 42,330 million).

Fixed assets ***Lire 29,305,516 million***

(Lire 36,519,951 million at December 31, 1999)

A summary of the changes during the year is presented as follows:

(in millions of lire)	2000
– Additions	3,674,626
– Disposals and other changes	7,765
– Contributions of business segments	(4,847,519)
– Transfers from stet international for spin-off	733
– Depreciation	(6,038,791)
– Reclassifications	(11,249)
Total	(7,214,435)

An analysis of the composition and the changes in fixed assets during the year is presented as follows:

	12/31/1999				
(in millions of lire)	Cost	Upward adjustments	Writedowns	Accumulated depreciation	Total
Land and buildings	10,409,499	1,978,817	(3,939)	(4,555,813)	7,828,564

Total	97,525,639	2,504,826	(1,872,176)	(68,852,773)	29,305,516

"Construction in progress and advances to suppliers" include labor costs of Lire 22,006 million. The gross value of the fixed assets transferred as a result of the corporate transactions for the contributions of business segments and the total spin-off of Stet International is Lire 9,227,697 million (of which Lire 7,608,740 million relates to the contribution of the business segment "Grandi Immobili" to IM.SER), whereas the related accumulated depreciation accounts total Lire 4,380,911 million (of which Lire 2,976,942 million relates to IM.SER).

1916

Accumulated depreciation at December 31, 2000, as a whole, is considered sufficient in relation to the remaining period of utilization of the assets, determined on the basis of the estimated useful lives of the installations making up the domestic telecommunications network. Accumulated depreciation covered 68.8% of fixed assets at December 31, 2000 and 64.3% at December 31, 1999.

Since the accounting values of the installations are considered congruous and the most prestigious real estate properties were contributed to IM.SER, the fixed assets were not upwardly adjusted as allowed by Law No. 342/2000. However, as set forth by art. 14 of this law, in order to obtain tax benefits, the "Reserve for accelerated depreciation " pertaining to the fixed assets still in use at the end of 2000 was reclassified to the special reserve as provided by the same law. As a result of this law, the carrying value of the fixed assets subjected to accelerated depreciation transferred to the new reserve also expresses the cost of the fixed assets recognized for tax purposes.

At December 31, 2000, the upward adjustments made to fixed assets in 1952, 1975, 1983 and 1991 as well as those made under Law No. 823/1973 have been depreciated by an average of approximately 75%.

The Company uses fixed assets purchased through lease contracts with its subsidiary Teleleasing, which are essentially stipulated under market conditions, as disclosed in the memorandum accounts and related notes. Had these contracts been accounted for using the financial method, entries would have been made in the statement of income for the interest on the financed principal and the depreciation charge attributable to the leased assets and assets would have been recorded in fixed assets and the residual debt under liabilities. The use of this method, however, would have had no material economic effect on the financial statements. The amount of financial expense included in the lease payments recorded in the 2000 statement of income is separately indicated in the note on the "use of property not owned".

Additions during the year include Lire 692,429 million of projects completed in Southern Italy.

Long-term investments ***Lire 40,193,558 million***
(Lire 19,644,996 million at December 31, 1999)

This item increased by Lire 20,548,562 million compared to December 31, 1999 and includes the following:

(in millions of lire)	12/31/2000	12/31/1999

1917

Equity investments *Lire 36,563,678 million*

Annexes 9 and 10 present the changes in each investment during the year, together with the corresponding amount at the beginning of the year and at December 31, 2000, as well as, according to Article 2427, Section 5, of the Italian Civil Code, a list of all the Company's equity investments in subsidiaries and affiliated companies. Overall, investments in subsidiaries, affiliates and other companies increased by Lire 27,233,285 million compared to December 31, 1999, as shown below:

(in millions of lire)

Increases:	
• Subscription to capital increases, recapitalizations and loss coverage of: TIM (2,188,228), Stream (205,000), Iridium Italia (26,059), Tin.it (formerly Savigliano Immobiliare) (6), Seat Pagine Gialle (563,417), IM.SER (154), Edotel (12,909), N.TC in liquidation (1,321), I.T. Telecom (formerly Reseau) (51,538), Czechtel in liquidation (21), TMI – Telemedia International Italia (166,741), Fintech (15,000), e Fusion (1,860), Trainet (6,889), Stet International Netherlands (2,050), Eutelsat (203,923), Media Technology Venture (1,106), Mix (19), Cygent (18,058), Cartesia (900).	3,465,199
• Acquisition/subscription of shares/quotas at time of corporate formation of: Stream (354,395), TIM (1,234,481), Seat Pagine Gialle (12,426,614), TI France (15), TI Germany (49), TI Switzerland (25), TI United Kingdom (3), TI Web (61), SIA (20,593), Latin American Nautilus (92,677), Mediterranean Nautilus (68), Netsiel (199), Telecom Italia Capital (66), TI Belgium (2,904), TI Netherlands (35), Is Tim Telekomunikasyon Hizmetleri (242,543), STT (4,400), Consorzio Dream Factory (172), Dmail.it (8,472), Gemini Israel III (1,181), IFM Infomaster (1,323), Italtel (80), Jerusalem Global Venture (1,496), Consorzio Energia Fiera District (3).	14,391,855
• Permanent transfer to capital stock of advances on future capital contributions relating to Stet International Netherlands (8,401,122), Stet Mobile Holding (1,118,604), Cartesia (100), CAF Italia 2000 (1).	9,519,827
• Acquisition of investments following corporate transactions: Netsiel (209,860), TE.SS. (2,274), Seat Pagine Gialle (46,409), IM.SER (5,615,183), Stet International Netherlands (1,547,389), Stet Mobile Holding (89,580), Saiat (1,000).	7,511,695
• Reclassification of long-term receivable from Bitel to investments (259,981) and acquisition of investment in IMMSI through partial demerger of Sirti (45,575).	305,556
Total increases (A)	35,194,132

1918

(milioni di lire)	
Decreases:	
• Sale of shares/quotas in: IM.SER (5,224,408), Bitel (259,981), IMMSI (10,281), Edotel (80), Teleleasing (14), Consorzio Promotore ISDN in liquidation (229), Consorzio Multimediale di Terni (1,750), Sistemi e Telematica (420), TSP (7,023), Accel (891), Intelsat (23,493), Media Technology Venture (1,309), The Fantastic Corporation (548), Huit (199), Sirti (86,348), Itinera (127), Is Tim Telekomunikasyon Hizmetleri (242,543), Italtel (80), Italdata (720).	5,860,444
• Writedown for losses of investments charged to statement of income of: Iridium Italia (5,700), Stream (391,881), TMI - Telemedia International Italia (197,081), Tin.it (formerly Savigliano Immobiliare) (6), Consorzio Civita (12), Trainet (1,306).	595,986
• Writedown for losses of investments covered by the reserve for risks and charges on investments of: Iridium Italia (20,359), Stream (1,169), N.TC in liquidation (1,321), Edotel (11,629), Czechtel in liquidation (21), Consorzio CIMSC (9), I.T. Telecom (formerly Reseau) (1,538), IM.SER (137), Geis (9,692), Trainet (5,583).	51,458
• Reduction of the investment in Sirti following the partial demerger and consequent creation of the company IMMSI.	45,575
• Total spin-off of Stet International	1,407,384
Total decreases (B)	7,960,847
Net change for the year (A-B)	27,233,285

In particular:

- subsequent to the resolutions of the extraordinary stockholders' meeting of December 15, 1999, on February 7, 2000, the real estate assets and connected activities of Sirti S.p.A. were partially demerged, on a proportional basis, and attributed to the newly formed company IMMSI S.p.A.. The legal effects of the demerger had effect from February 10 and from February 11, the stock exchange authorized the trading of IMMSI shares and the listing of Sirti shares ex demerger. In November, Telecom Italia tendered all of its shares in Sirti to the voluntary take-over bid by Wiretel for 100% of Sirti stock.
- on April 7, Telecom Italia subscribed to the share capital increase of Savigliano Immobiliare – from Lire 20 million to Lire 1,000 million – voted by the stockholders' meeting of the company acquired the previous February 29. The same stockholders' meeting passed a resolution to transform the company from a limited liability company to a joint stock company, changing the registered name to Tin.it S.p.A.. Also on the same occasion, a second capital increase was voted for Lire 40 billion with the contributions of assets consisting of the business segments and investments inherent to the operations and marketing of online services and products by Telecom Italia, the investment held in Viasat by Telespazio and the "Content Management" division by Saritel. On August 10, 2000, the extraordinary stockholders' meeting passed a resolution for the partial demerger, on a proportional basis, of Telecom Italia, finalized on November 10, through the transfer of a 8.168% stake in Tin.it to Seat, and also the merger of Tin.it and Seat Pagine Gialle, finalized on November 15, 2000. At December 31,

1919

2000, the investment in Seat Pagine Gialle – taking into account this last transaction and the purchase of shares during the year, from Huit II (No. 816,809,603 ordinary shares at 4.5 euro per share, plus interests), through public purchase offers (No. 339,291,608 ordinary shares at 4.2 euro per share and No. 326,944,623 saving shares at 2.94 euro per share) and by JP Morgan (No. 53,009,681 ordinary shares at 4.87 euro per share), was equal to 55.20% of the entire share capital. The shares held by Telecom Italia, equal to No. 6,051,510,901, are composed of No. 5,168,475,885 unencumbered ordinary shares, No. 218,754,174 unencumbered savings shares, No. 339,291,608 ordinary shares pledged and No. 324,989,234 shares on loan (of which No. 216,798,785 ordinary shares and No. 108,190,449 savings shares). These latter shares derive from specific contracts for the loan of securities (see the accounting policies under investments), covered by specific guarantee contracts;

- during the month of April, Telecom Italia purchased 50 million TIM ordinary shares at a price of Lire 1,230,947 million in order to increase its holding in the company. In July, the Board of Directors of Telecom Italia voted to accept TIM's offer to covert all of TIM savings shares into ordinary shares. The outlay by Telecom Italia totaled Lire 2,188,228 million.
- during the first half, Telecom Italia and News Television acquired the investments held by Cecchi Gori group and SDS in Stream, each by equally subscribing to capital increases and making stock purchases. After these transactions, Telecom Italia's stake in Stream increased from 35% to 50%;
- in June, Telecom Italia contributed No. 46,104,648 Meie Assicurazioni shares to Saiat that were carried in the 1999 financial statements at quantity and not at value, realizing a gain of Lire 1,000 million;
- on November 1, 2000, Telecom Italia contributed to TE.SS. – Tele Payroll Services S.p.A. – the business segment consisting of the personnel administration services through the subscription of No. 117,500 shares of the same for an equivalent amount of Lire 2,274 million;
- on December 1, 2000, Telecom Italia contributed the business segment "Grandi Immobili", including the majority of the most prestigious real estate properties, to IM.SER for an amount of Lire 5,615,183 million, acquiring 100% control of the company; later, a 45% stake in IM.SER was sold to Beni Stabili and an additional 15% stake to Lehman Brothers. Telecom Italia's interest thus fell to 40%.
- on December 27, 2000, the total spin-off of Stet International to Telecom Italia and TIM as part of the rationalization of the international telecommunications sector was concluded. The deal is effective for accounting and tax purposes beginning January 1, 2000. This transaction led to the cancellation of the entire stake in Stet International (Lire 1,407,385 million) and the simultaneous increase in the investments in Stet International Netherlands (Lire 1,547,389 million) and in Stet Mobile Holding (Lire 89,581 million). Telecom Italia subsequently contributed the entire stake held in Stet Mobile Holding to TIM, receiving 1.94% of TIM ordinary shares (after the conversion of savings shares into ordinary shares) following the share capital increase set aside by TIM for the same Telecom Italia;
- on December 31, 2000, Telecom Italia, as part of the plan for the reorganization of the information technology sector, which calls for concentrating all of the Group's operations in this sector to I.T. Telecom S.p.A., contributed the business segment for the operations of the information technology services to Netsiel, by subscribing to the capital of the same for an equivalent amount of Lire 209,860 million; after this transaction Telecom Italia's stake in Netsiel is equal to 68.7%;

1920

- some investments in subsidiaries and affiliated companies are recorded at an amount in excess of the corresponding share of the underlying stockholders' equity, net of dividends and after the consolidation adjustments. These investments are maintained at their carrying values since they are expected to show future earnings and their assets are worth more than their respective book values. In particular, in the case of TIM, the higher value – which is nevertheless significantly lower than market value, as later described – is the result of the method (proportion of market value) used in separating the value of the holding from that of the former company Telecom Italia following the demerger in 1995. As for Finsiel, the value of the investment has not been changed in view of its current earnings potential.

A comparison between the market price of the listed shares at December 31, 2000 and their carrying value shows an unrealized gain of Lire 83,954 billion. Further details are given in Annex 11.

Advances on future capital contributions *Lire 1,864,890 million*

These show a decrease of Lire 6,745,200 million compared to December 31, 1999, principally due to the reclassification to "equity investments in subsidiaries" of the payments made to the companies Stet International Netherlands and Stet Mobile Holding in prior years and during 2000. At December 31, 2000, the amount is composed as follows:

- Stet International Netherlands (Lire 1,864,633 million);
- Tecno Idro Meteo (Lire 189 million);
- Ti Austria Gmbh (Lire 68 million).

Accounts receivable *Lire 484,419 million*

These are recorded at nominal value, which corresponds to estimated realizable value, decreased by Lire 1,220,094 million compared to December 31, 1999, and are analyzed as follows:

	12/31/1999	Changes during the year				12/31/2000
(in millions of lire)		Disburse-ments	Reimburse-ments	Reclassifi-cations Other	Total	
Subsidiaries	1,300,011	9,611	(962,918)	(249,890)	(1,203,197)	96,814
Other receivables	404,502	63,266	(78,017)	(2,146)	(16,897)	387,605
Total	1,704,513	72,877	(1,040,935)	(252,036)	(1,220,094)	484,419

Accounts receivable from subsidiaries Lire 96,814 million

These decreased by Lire 1,203,197 million mainly on account of the repayment of loans by Teleleasing following the sale to Mediobanca of a 60% interest in Teleleasing itself. The balance at December 31, 2000 only includes loans granted at market terms to the company Telespazio.

1921

Other receivables — Lire 387,605 million

These decreased by Lire 16,897 million and refer to:

- *receivables from customers* — *Lire 1,819 million*
  these are made up by 50% of the new connection charges borne by residential customers paying in 12 bi-monthly installments, as allowed by law. These receivables show a decrease of Lire 24 million from December 31, 1999;

- *receivables from employees* — *Lire 95,047 million*
  these include the outstanding amount of loans receivable from employees, of which Lire 78 million was made in connection with the Initial Public Offering of ordinary Telecom Italia shares;

- *guarantee deposits* — *Lire 9,744 million*
  these include cash deposits to third parties paid mainly to municipalities to guarantee proper work to roads;

- *other financial receivables* — *Lire 280,995 million*
  These mainly refer to:
  - the loan made to Ros Telecom (Lire 42,610 million) for the installation of the ITUR project (optic submarine cable linking Italy, Turkey, Ukraine and Russia);
  - the prepayment of the tax on the reserve for employee termination indemnities (Lire 220,344 million) required under Law No. 662 of December 23, 1996 and subsequent amendments, revalued as required by law;
  - the outstanding amount (Lire 211 million) of low-rate loans granted to personnel of the other Italian companies of the Telecom Italia Group in connection with the Initial Public Offering (IPO) of ordinary Telecom Italia shares.

Treasury stock — Lire 1,280,571 million

At December 31, 2000, the Company had a total of No. 104,978,070 treasury savings shares, with a par value of Lire 1,000 each, equal to 1.41% of share capital. The buy-backs were made following the tender offer to purchase during the period February 17, 2000 to March 17, 2000 (No. 1,793,820 shares) and later buy-backs (No. 103,184,250 shares) as voted by the ordinary stockholders' meeting of January 14, 2000. A specific reserve was set up under stockholders' equity for this purpose.

As required by Article 2358 of the Italian Civil Code, we report that the amount of the available reserves recorded in the financial statements at December 31, 2000 is sufficient to cover the outstanding balance of the loans made to employees of Telecom Italia and Telecom Italia Group companies for the purchase of ordinary Telecom Italia shares in connection with the Initial Public Offering under Decree of August 8, 1997 by the President of the Council of Ministers.
As required under Article 2427, Section 6 of the Italian Civil Code, Annex 12 sets forth a breakdown of loans under long-term investments by maturity within and beyond five years.

As required by Article 10 of Law No. 72/1983 the table below sets forth a breakdown of upward adjustments by type of assets held by the Company.

1922

(in millions of lire)						Fixed assets	Other assets	
Description							Investments	
	Land and buildings	Plant and machinery	Manufacturing and distribution equipment	Other assets	Construction in progress and advances to suppliers	Total	Subsidiaries	Affiliates

Current assets

Inventories ***Lire 149,388 million***

(Lire 233,028 million at December 31, 1999)

These decreased by Lire 83,640 million compared to December 31, 1999 and include the following:

Contract work in process *Lire 69,533 million*

This item, which increased by Lire 15,553 million compared to December 31, 1999, represents the value of the work being performed on behalf of third parties at December 31, 2000.

Merchandise *Lire 79,855 million*

Merchandise decreased by Lire 99,193 million compared to December 31, 1999 owing to both higher consumption of goods held for sale and used for maintenance (telephone products and materials) and improvements in the management of merchandise inventories.

1923

Accounts receivable ***Lire 17,657,120 million***

(Lire 15,401,138 million at December 31, 1999)

Accounts receivable increased by Lire 2,255,982 million compared to December 31, 1999. A breakdown and the changes that occurred during the year are given in the table below:

	12/31/1999	Changes during the year			12/31/2000
(in millions of lire)		Utilizations	Provisions	Change	
Trade accounts receivable	10,136,833			(1,165,424)	8,971,409
• allowance for doubtful accounts	(728,000)	406,490	(332,490)	74,000	(654,000)
Total trade accounts receivable	9,408,833			(1,091,424)	8,317,409
Accounts receivable from					
subsidiaries	4,489,011			745,660	5,234,671
of which financial receivables	2,083,785			(26,660)	2,057,125
Accounts receivable from					
affiliated companies	405,401			62,418	467,819
of which financial receivables	64,789			56,282	121,071
Accounts receivable from					
parent companies	2,484			(145)	2,339
Other receivables	1,095,409			2,539,473	3,634,882
• Government and					
other public entities					
for grants and subsidies	250			2,200	2,450
• deferred tax assets	345,483			594,006	939,489
• other receivables	749,676			1,943,267	2,692,943
Total	15,401,138			2,255,982	17,657,120

Trade accounts receivable *Lire 8,317,409 million*

Trade accounts receivable decreased by Lire 1,091,424 million, compared to December 31, 1999, owing to the assignment of receivables without recourse, not due on December 31, 2000, to factoring companies (Lire 399,895 million, with a loss of Lire 5,204 million). Trade accounts receivable are shown net of the allowance for doubtful accounts (Lire 654,000 million, of which Lire 332,490 million were provided during the year). The latter decreased by Lire 74,000 million compared to December 31, 1999 (Lire 728,000 million), mainly due to a reduction in the amount of doubtful receivables. Trade accounts receivable include Lire 1,382,473 million of receivables from other operators (Lire 751,227 million from fixed telecommunications carriers, Lire 57,637 million from mobile telecommunications operators and Lire 502,209 million from foreign correspondents).

1924

Accounts receivable from subsidiaries *Lire 5,234,671 million*

Accounts receivable from subsidiaries increased by Lire 745,660 million, compared to December 31, 1999, and include trade, financial and other receivables. The financial receivables reflect current account transactions carried out at market rates for cash management purposes and short-term loans granted to the companies; such receivables can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial receivables from		
Subsidiaries:		
Aspasiel	1,682	1,606
Consiel	69,350	52,943

Venis	6,912	4,630
Webegg (formerly Logicasiel)	=	3,660
Total	2,057,125	2,083,785

1925

Trade receivables, amounting to Lire 1,177,895 million, are mostly due from TIM (Lire 298,934 million), Telespazio (Lire 209,145 million), Seat Pagine Gialle (Lire 184,692 million), Stet International Netherlands (Lire 76,036 million) and Telesoft (Lire 56,192 million).
Other receivables, amounting to Lire 1,999,651 million, primarily represent accrued dividends from subsidiaries (Lire 1,862,344 million) and other receivables connected with the Group's VAT settlement system.

Accounts receivable from affiliated companies *Lire 467,819 million*

Accounts receivable from affiliated companies increased by Lire 62,418 million compared to December 31, 1999. Receivables include trade, financial and other receivables. The financial receivables reflect current account transactions carried out at market rates for cash management purposes and short-term loans; such receivables can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial receivables from		
Affiliated companies:		
Astelit	344	344
Datasiel	110	=
Esri Italia	4,497	7,121
Excite Italia BV	9,846	989
Lares Tecno	=	34
Sispi	4	12
Stream	106,270	56,270
Consorzio Telcal	=	19
Total	121,071	64,789

Trade receivables, amounting to Lire 346,403 million, are mostly due from Retevision (Lire 88,164 million), Telecom Argentina (Lire 57,321 million) and Golden Lines (Lire 48,883 million); other receivables total Lire 345 million.

Accounts receivable from parent companies *Lire 2,339 million*

Accounts receivable from parent companies refer to the amounts due from the parent company Olivetti, of which Lire 2,205 million refers to trade receivables.

Other receivables *Lire 3,634,882 million*

Government and other public entities for grants and subsidies Lire 2,450 million
These consist of the receivable from the Ministry of Industry, Commerce and Handicrafts for grants to defray the costs incurred for the realization of the telecommunications installations in Southern Italy.

Deferred tax assets Lire 939,489 million
These are shown net of the reserve for deferred taxes (Lire 1,111,127 million). The main items which gave rise to deferred tax assets are the writedown of receivables and software and the reserve for risks; those which generated deferred tax liabilities are gains and

1926

capital grants. Both the reserve for "deferred tax liabilities" and "deferred tax assets" include tax credits on dividends accrued.
At December 31, 2000, about Lire 435,000 million of deferred tax assets have not been recorded since future recovery is not reasonably assured.

The balance of deferred tax assets and liabilities is made up as follows:

	Due at December 31, 2000				Due at December 31, 1999			
	Within 1 year	From 2 to 5 years	Beyond 5 years	Total	Within 1 year	From 2 to 5 years	Beyond 5 years	Total
Deferred tax assets	1,766,937	283,679	=	2,050,616	1,373,688	541,039	40,120	1,954,847
Reserve for deferred taxes	(1,097,710)	(13,417)	=	(1,111,127)	(1,185,878)	(383,366)	(40,120)	(1,609,364)
Net balance	669,227	270,262	=	939,489	187,810	157,673	=	345,483

The increase in net deferred tax assets at December 31, 2000 is mainly due to lower deferred tax liabilities following the reclassification of the "Reserve for accelerated depreciation", pursuant to art. 14 of Law No. 342/2000.

Other receivables — Lire 2,692,943 million

These increased by Lire 1,943,267 million compared to December 31, 1999 and can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
• receivables from Tax Administration	83,196	46,079
• receivables relating to personnel	156,581	142,600
• transaction for the loan of securities	1,679,977	=
• amounts paid by customers and in transit with the banking and postal banking system	278,140	340,064
• other items	495,049	220,933
Total	2,692,943	749,676

The contra-entry to the transaction for the loan of securities described under "Investments" can be found in "Other liabilities".

1927

Short-term financial assets ***Lire 642,608 million***
(Lire 119,207 million at December 31, 1999)

These increased by Lire 523,401 million compared to December 31, 1999 and the composition and changes during the year are shown in the following table:

	12/31/1999	Changes during the year				12/31/2000
(in millions of lire)		Acquisition	Sales/ Reimburse-ments	Writedowns/ Reinstate-ments	Total	
Equity investments in subsidiaries	108,813	1,119,153	(428,654)	(166,670)	523,829	632,642
Equity investments in affiliated companies	=	139,199	(139,199)	=	=	=
Other equity investments	10,394	76,511	(23,224)	(53,715)	(428)	9,966
Other securities	=	156,308	(156,308)	=	=	=
Total	119,207	1,491,171	(747,385)	(220,385)	523,401	642,608

These refer to listed shares acquired both in trading transactions and in the form of dividends "in kind" distributed by some venture capital companies (Accel, Media Technology Venture).

The net gains realized on the sales of shares in subsidiaries and other companies, totaling Lire 63,723 million, refer mainly to TIM (Lire 47,946 million); the losses, on the other hand, amount to Lire 746 million and refer to Sirti (Lire 424 million) and Agil Software (Lire 322 million).
Further details are given in Annex 11.

Liquid assets ***Lire 210,952 million***
(Lire 140,452 million at December 31, 1999)

Liquid assets increased by Lire 70,500 million compared to December 31, 1999 and include the following:

(in millions of lire)	12/31/2000	12/31/1999
Bank and postal accounts	210,320	139,521
Checks	9	1
Cash and valuables on hand	623	930
Total	210,952	140,452

1928

Accrued income and prepaid expenses ***Lire 1,634,353 million***
(Lire 49,479 million at December 31, 1999)

These increased by Lire 1,584,874 million compared to December 31, 1999 and include the following:

(in millions of lire)	12/31/.2000	12/31/1999
Issue discounts and similar charges	2,411	3,584
Accrued income		
• financial income	33,737	30,506
	33,737	30,506
Other prepaid expenses		
• production costs	104,644	15,183
• financial expenses	39,623	206
• other	1,453,938	=
	1,598,205	15,389
Accrued income and other prepaid expenses	1,631,942	45,895
Total	1,634,353	49,479

Issue discounts and similar charges *Lire 2,411 million*

These decreased by Lire 1,173 million compared to December 31, 1999 due to the amounts charged to the statement of income for the portion attributable to the current year.
Issue discounts and similar charges are made up by the expenses incurred to obtain loans.

Accrued income and other prepaid expenses *Lire 1,631,942 million*

These increased by Lire 1,586,047 million compared to December 31, 1999.
Accrued income includes the interest expense (Lire 12,301 million) subsidized until 1991 by the government under Law No. 67/1988, equivalent to three percentage points of the cost of the loans which replaced those assigned to the Company through Cassa Depositi e Prestiti under Law No. 887/1984.
Prepaid expenses are mainly related to building rents (Lire 95,427 million), financial expenses (Lire 39,623 million) pertaining to amounts already accrued or paid, but attributable to future years, expenses relating to the deferral of the put option on the Seat shares (Lire 1,453,938 million), to which reference should be made to "Purchases and sales commitments" in the memorandum accounts.

A breakdown of receivables and accrued income by maturity and type is given in Annex 12.

1929

LIABILITIES AND STOCKHOLDERS' EQUITY

Stockholders' equity ***Lire 36,235,335 million***

(Lire 35,577,763 million at December 31, 1999)

The table below shows the changes that occurred during the year:

	12/31/1999	Change during the year				12/31/2000
(in millions of lire)		Appropriation of 1999 net income	Other changes	Net income	Total	
Share capital	7,426,157	=	=	=	=	7,426,157

Share capital *Lire 7,426,157 million*

Share capital has remained unchanged compared to December 31, 1999 and consists of 5,260,037,131 ordinary shares and 2,166,120,095 savings shares of par value Lire 1,000 each.

Reserve for inflation adjustments under Law No. 72 of 3/19/1983 *Lire 4,805,244 million*

This reserve decreased by Lire 481 million compared to December 31, 1999, following the partial spin-off of No. 3,348,922 Tin.it ordinary shares by Telecom Italia to Seat Pagine Gialle, as voted by the extraordinary stockholders' meeting on August 10, 2000.

Reserve for inflation adjustments under Law No. 413 of 12/30/1991 *Lire 908,003 million*

This reserve decreased by Lire 90 million compared to December 31, 1999, due to the aforementioned partial spin-off to Seat Pagine Gialle.

1930

Reserve for treasury stock *Lire 1,280,571 million*

This reserve has been set up in respect of the tender offer for treasury savings shares and subsequent buy-backs, to which reference should be made under the specific caption in assets. The amount was transferred from the "special reserve".

Reserve for accelerated depreciation =

This reserve shows a nil balance due to the following:
- increase as a result of the appropriation of 1999 profit (Lire 298,828 million);
- reclassification of Lire 1,720,299 million to the recently formed "Reserve Law No. 342 of November 21, 2000, art. 14, to which reference should be made;
- reclassification of Lire 66,323 million to the "special reserve" for fixed assets disposed of or retired during 2000.

Reserve Law No. 342 of November 21, 2000, art. 14 *Lire 1,720,299 million*

This reserve was set up by reclassifying part of the "Reserve for accelerated depreciation" pertaining to the fixed assets still in use at the end of 2000. Pursuant to the provision under which the new reserve was set up, it became possible to bring the tax deductible costs of these same fixed assets into line with those carried in the financial statements (which do not take into account accelerated depreciation taken only for tax purposes) through the payment of a substitute equalization tax equal to 19% of the reclassified amount. Tax treatment of this reserve is regulated by DM No. 162 of April 13, 2001, art. 10.

Special reserve *Lire 2,407,507 million*

The special reserve shows a decrease of Lire 1,220,299 million compared to December 31, 1999. The reduction represents the difference between the reclassification from the "Reserve for accelerated depreciation", the transfers to the "Reserve for treasury stock" and the utilization of Lire 6,051 million to round off the special dividend for 1999 to the highest lire, as voted by the ordinary stockholders' meeting of July 3, 2000. In fact, at that date, dividends on the treasury stock held by the Company were uniformly redistributed over all the other shares.

Reserve for capital grants *Lire 884,134 million*

The reserve for capital grants increased by Lire 31,221 million compared to December 31, 1999. The increase represents the difference between the transfer of a portion of the capital grants received up to December 31, 1992, equal to Lire 31,306 million, which became available during 2000 as a result of the depreciation of the assets to which the grants refer and the transfer of Lire 85 million following the partial spin-off in favor of Seat Pagine Gialle.

Other reserves *Lire 7,343,451 million*

Other reserves increased by Lire 177,728 million, compared to December 31, 1999, due to the surplus arising the total spin-off of Stet International through the transfer of all the

1931

assets and liabilities to the beneficiary companies Telecom Italia and TIM, as voted by the extraordinary stockholders' meeting of October 20, 2000; the amount (Lire 181,457 million), in fact, derives from the difference between the accounting value of the assets and liabilities transferred to Telecom Italia and the cancellation of the investment in Stet International. The same amount was partly offset by the effect of the partial spin-off to Seat Pagine Gialle.

Current plans do not include any transactions affecting equity reserves in abeyance of taxes which would be subject to taxation under current laws.

Reserves for risks and charges ***Lire 1,711,092 million***
(Lire 1,242,208 million at December 31, 1999)

These increased by Lire 468,884 million compared to December 31, 1999. The composition and changes in these reserves are described as follows:

	12/31/1999	Changes during the year					12/31/2000
(in millions of lire)		Provisions	Utilizations	Released to income	Reclassification/ Other	Total	
Reserve for taxes	254,498	1,076,796	(1,351,498)	(971)	294,650	18,977	273,475
For taxes	254,498	24,419	(4,471)	(971)	=	18,977	273,475
For deferred taxes	=	1,052,377	(1,347,027)	=	294,650	=	=
Other reserves	987,710	693,415	(180,982)	=	(62,526)	449,907	1,437,617
Reserve for litigation	257,694	17,183	(12,806)	=	120	4,497	262,191
Reserve for capital grants	284,653	=	=	=	(31,306)	(31,306)	253,347
Reserve for losses of subsidiaries and affiliates	49,438	31,245	(51,458)	=	=	(20,213)	29,225
Reserve for corporate restructuring	=	294,523	=	=	=	294,523	294,523
Reserve for contractual risks and other risks	395,925	350,464	(116,718)	=	(31,340)	202,406	598,331
Total	1,242,208	1,770,211	(1,532,480)	(971)	232,124	468,884	1,711,092

Reserve for taxes *Lire 273,475 million*

The reserve for taxes increased by Lire 18,977 million compared to December 31, 1999 and entirely refers to income taxes and other duties and taxes.
The reserve for deferred taxes shows a nil balance attributable to the set-off with deferred tax assets.

Other reserves *Lire 1,437,617 million*

These increased by Lire 449,907 million, compared to December 31, 1999 and include the following reserves:

- reserve for litigation (Lire 262,191 million): this includes prudent provisions – charged to various items of the statement of income – for probable expenses in connection with personnel disputes and litigation with third parties which had not yet been settled at the end of the year. The provisions (Lire 17,183 million) are related to litigation with third parties and the utilizations refer to disputes with personnel (Lire 6,641 million), social security institutions (Lire 60 million) and others (Lire 6,105 million);

1932

- reserve for capital grants (Lire 253,347 million): this includes the unavailable portion of capital grants received up to December 31, 1992 recorded herein solely for purposes of taking advantage of the tax benefits. Utilizations during the year (Lire 31,306 million) stem from the transfer to stockholders' equity of the portion of the capital grants which became available;
- reserve for losses of subsidiaries and affiliates (Lire 29,225 million): this includes the provisions to account for the losses in excess of the carrying value of some investments, in particular, Iridium Italia (Lire 8,541 million) and Trainet (Lire 5,594 million). Utilizations of Lire 51,458 million refer almost entirely to the coverage of the losses of the companies Iridium Italia (Lire 20,359 million) and Edotel (Lire 11,629 million);
- reserve for corporate restructuring (Lire 294,523 million): this includes the provision made during the year subsequent to the operating agreements reached in July with the unions concerning cutbacks and layoffs under unemployment compensation plans;
- reserve for contractual risks and other risks (Lire 598,331 million): this mainly includes the provisions recorded in the previous years for risks relating to the former Iraq construction contracts (Lire 120,000 million), as well as those made in 2000 for probable charges stemming from the settlement of trade and sundry positions (Lire 350,464 million), of which Lire 241,500 million are connected to the disposals of the investments and the contribution of the business segment "Grandi Immobili" and Lire 81,807 million for disputes of a regulatory nature. Utilizations (Lire 116,718 million) mainly refer to payments made as a consequence of the definition of the 1999 interconnecting rates by the Regulatory Authority (February 15, 2000).

Reserve for employee termination indemnities ***Lire 1,996,825 million***
(Lire 2,163,171 million at December 31, 1999)

This item decreased by Lire 166,346 million compared to December 31, 1999. The following changes took place in the account:

(in millions of lire)	
Balance at December 31, 1999	**2,163,171**
Changes during the year:	
- Provisions charged to income for amounts to fund employee termination indemnities accrued in favor of employees during the year plus the fixed and variable cost-of-living adjustments required under Law No. 297/1982	332,906
- Utilizations for:	
• Indemnities paid to employees who took retirement or resigned during the year	(346,289)
• Advances under Law No. 297/1982	(31,067)
• Advances under agreements with labor unions regarding layoffs under unemployment compensation plans	(45,484)
- Amounts transferred to/from subsidiaries and other changes	(76,412)
Balance at December 31, 2000	**1,996,825**

1933

Liabilities ***Lire 51,162,196 million***

(Lire 34,457,494 million at December 31, 1999)

A breakdown of liabilities and accrued expenses pursuant to Article 2427, Section 6, of the Italian Civil Code, is given in Annex 13.
Liabilities, which increased by Lire 16,704,702 million compared to December 31, 1999, include the following:

			12/31/2000			12/31/1999
(in millions of lire)	Financial accounts payable	Trade accounts payable and miscellaneous payables	Total	Financial accounts payable	Trade accounts payable and miscellaneous payables	Total
Debentures	281,642	=	281,642	824,914	=	824,914

Contributions to pension and social security institutions	=	1,656,923	1,656,923	=	1,709,281	1,709,281
Other liabilities	2,313,161	3,348,062	5,661,223	41,738	4,171,987	4,213,725
Total	36,597,730	14,564,466	51,162,196	18,248,158	16,209,336	34,457,494

Debentures *Lire 281,642 million*

Debentures decreased by Lire 543,272 million compared to December 31, 1999.
They include the 1992/2010 debenture issue, passed by resolution of the extraordinary stockholders' meeting of SIP (then Telecom Italia) on April 30, 1992, reserved for employees in service and retired for a maximum amount of Lire 1,000,000 million. The maximum period of the debentures extends to July 1, 2010, although the Company has the option of redeeming the debentures before maturity, by resolution of the Board of Directors. Outstanding debentures owned by employees total No. 5,632,832, with a face value of Lire 50,000 each.
The semi-annual nominal interest rate is variable (1.69% for the December 31, 2000 coupon) and payment is made on January 1 and July 1 of each year.

Due to banks *Lire 24,727,109 million*

These increased by Lire 12,305,036 million compared to December 31, 1999.
They comprise medium/long-term debt totaling Lire 6,089,197 million (Lire 7,592,885 million at December 31, 1999) – of which Lire 96,000 million is secured by collateral – and short-term borrowings totaling Lire 18,637,912 million (Lire 4,829,188 million at December 31, 1999). Of the latter amount, Lire 6,413,519 million refer to loans taken out to cover temporary liquidity requirements, Lire 11,572,080 million for credit facilities, mainly to finance the purchase of Seat shares from Huit II and through the public offers of purchase and Lire 652,313 million of bank overdrafts.

1934

The changes in medium/long-term debt are as follows (in millions of lire):

– new loans	=
– loan repayments	1,508,372
– increase to adjust debt in foreign currency	4,684

Medium/long-term loans will be repaid under the following loan amortization plans:

Year	(in millions of lire)
2001	1,074,487
2002	1,584,027
2003	2,204,341
2004	723,097
2005	349,895
2006 and after	153,350
Total	6,089,197

Corresponding nominal interest rates at December 31, 2000 are shown below:

	(in millions of lire)
Up to 2.5%	1,154,034
From 2.5% to 5%	3,443,325
From 5% to 7.5%	938,124
From 7.5% to 10%	553,714
Total	6,089,197

The largest amount of gross debt falls within the range of rates up to 5% and includes loans made by various institutions to replace those by Cassa Depositi e Prestiti (pursuant to Law No. 887/1984), with 3% interest subsidies paid by the Treasury Ministry (pursuant to Law No. 67/1988), plus part of the loans made with EIB funds.
Foreign currency loans amount to Lire 1,946,291 million (Lire 1,395,645 million at December 31, 1999) and are detailed in the following table:

	Currency (in millions)		Millions of lire	
	12/31/2000	12/31/1999	12/31/2000	12/31/1999
USD	420	150	950,382	288,240
Euro-zone currencies	120	167	231,565	322,914
GBP	252	258	755,590	774,632
JPY	880	992	8,754	9,859
Total			1,946,291	1,395,645

At December 31, 2000, unused credit lines total Lire 10,377,094 million.

Due to other lenders *Lire 1,275,967 million*

These decreased by Lire 333,838 million compared to December 31, 1999.

1935

They consist of medium/long-term loans mainly made by Cassa Depositi e Prestiti (Lire 888,023 million) and amounts due to Iri (Lire 384,522 million).
Such medium/long-term loans will be repaid as follows:

Year	(in millions of lire)
2001	398,389
2002	261,326
2003	198,094
2004	140,765
2005	74,560
2006 and after	202,833
Total	1,275,967

Corresponding nominal interest rates at December 31, 2000 are shown below:

	(in millions of lire)
Up to 2.5%	3,422
From 5% to 7.5%	974,159
From 7.5% to 10%	298,386
Total	1,275,967

Trade accounts payable *Lire 5,485,150 million*

These decreased by Lire 702,838 million compared to December 31, 1999, mainly as a result of lower investments in installations, and include amounts assigned by some suppliers to credit institutions, factoring companies, etc.. They also comprise payables to other TLC carriers amounting to Lire 1,119,070 million, of which Lire 428,601 million are due to foreign correspondents, Lire 311,587 million to wireline telecommunications carriers and Lire 378,882 million to mobile telecommunications operators.

1936

Accounts payable to subsidiaries *Lire 10,006,563 million*

These increased by Lire 3,828,013 million compared to December 31, 1999.
They consist of financial payables, trade accounts payable and other payables. Financial payables (Lire 7,739,320 million) refer to current account transactions negotiated at market rates for cash management purposes and can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial payables to subsidiaries

Trade accounts payable (Lire 2,133,672 million) mainly refer to payables to TIM (Lire 782,629 million), Telesoft (Lire 549,908 million), Telespazio (Lire 154,923 million) and TMI - Telemedia International Italia (Lire 137,245 million).
Other payables (Lire 133,571 million) primarily refer to capital contributions paid to the company Path.Net (Lire 34,997 million) and amounts owed in connection with the Group's VAT settlement system.

1937

Accounts payable to affiliated companies *Lire 1,106,083 million*

These increased by Lire 730,040 million, compared to December 31, 1999.
They refer to financial payables, trade accounts payable and other payables. Financial payables (Lire 260,531 million) refer to current account transactions negotiated at market rates for cash management purposes and can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial payables to affiliated companies		
Consorzio Telcal	30	=

Total	260,531	6,426

Trade accounts payable (Lire 1,149,397 million) mainly refer to payables to Italtel (Lire 515,745 million).
Other payables (Lire 10,680 million) refer to the liability for capital contributions, mainly Fintech (Lire 10,500 million).

Accounts payable to parent companies *Lire 2,529 million*

These refer to trade accounts payable to the parent company Olivetti.

Taxes payable *Lire 956,726 million*

These increased by Lire 28,041 million, compared to December 31, 1999 and mainly refer to:

- the payable to the Italian Treasury for withholding taxes of Lire 158,926 million (Lire 167,312 million at December 31, 1999);
- the VAT liability totaling Lire 377,980 million (Lire 288,067 million at December 31, 1999);
- the income tax liability for the year, net of advances paid and dividend tax credits, of Lire 343,630 million (Lire 455,764 million at December 31, 1999). The decrease compared to the prior year is attributable to the reduction in current income taxes and higher advances paid during 2000. The liability at December 31, 2000 includes the taxes due on the portion of income which could possibly be set aside in the "Reserve for accelerated depreciation" when the financial statements are approved by the stockholders' meeting; in this case, these same taxes will be reclassified to the "Reserve for deferred taxes".

1938

Contributions to pension and social security institutions *Lire 1,656,923 million*

These decreased by Lire 52,358 million compared to December 31, 1999 and include amounts owed to social security and health institutions with regard to personnel. These specifically include Lire 1,366,403 million payable to INPS for charges, pursuant to Law No. 58/92 (see related accounting policy) and relating to the merged company Iritel, estimated by the special Ministerial Commission in relation to the valuation of assets contributed to Iritel by the Post and Telecommunications Administration.

Other liabilities *Lire 5,661,223 million*

These increased by Lire 1,447,498 million compared to December 31, 1999.
They include, in particular, liabilities for the:

- payable to customers totaling Lire 2,032,136 million (Lire 2,363,402 million at December 31, 1999), including deposits by subscribers against telephone conversations, pre-billed basic charges (essentially monthly charges for January and February 2001) and the unused portions of prepaid magnetic telephone cards;
- payable to employees amounting to Lire 1,207,581 million (Lire 732,295 million at December 31, 1999) for 2000 payrolls paid in 2001;
- payable for the TLC license fee totaling Lire 637,741 million (Lire 803,056 million at December 31,1999);
- transactions for the loan of Seat Pagine Gialle ordinary and savings shares (Lire 1,679,977 million); these transactions are described under "Investments" in long-term investments, with a contra-entry to "Other receivables".

Accrued expenses and deferred income ***Lire 989,699 million***
(Lire 926,229 million at December 31, 1999)

These increased by Lire 63,470 million compared to December 31, 1999 and include the following:

(in millions of lire)	12/31/2000	12/31/1999
Accrued expenses		
• production costs	5,410	6,232
• financial expense	202,265	141,443
	207,675	147,675
Deferred income		
• capital grants (unavailable portion)	283,763	329,049
• production value	492,003	443,911
• financial income	6,258	5,594
	782,024	778,554
Total	989,699	926,229

Accrued expenses particularly refer to leasing installments (Lire 5,334 million) and financial items (Lire 202,265 million). Deferred income mainly includes pre-billed basic charges and rentals of telephone equipment (Lire 283,940 million), the unavailable portion of capital grants received after December 31, 1992, and financial items mainly connected to loans to employees.

1939

MEMORANDUM ACCOUNTS

Memorandum accounts totaled Lire 15,419,809 million and can be analyzed as follows:

Guarantees provided ***Lire 8,635,255 million***

Guarantees provided consist of sureties, including Lire 5,444,146 million on behalf of subsidiaries – mainly on financial transactions and debentures issued by Softe, other medium/long-term financial transactions and supply contracts – and Lire 4,279,847 million on behalf of affiliated companies and others in connection with medium/long-term financial transactions, supply contracts and guarantees on bids to acquire mobile licenses abroad.
The sureties are net of counter-guarantees received by Telecom Italia (Lire 1,088,738 million).

Purchases and sales commitments ***Lire 6,767,141 million***

This item consists almost entirely of purchases commitments (Lire 6,718,734 million) and the commitments regarding the sale of call options on the listed securities in portfolio (Lire 48,407 million).
In particular, the purchases commitments refer to the put option on the Seat Pagine Gialle shares already held by Huit II (Lire 5,780,278 million), described below, future lease installments plus the buyout amounts of the assets leased (Lire 857,472 million), the five-year commitment for the Lire 60,000 million contribution to the "Interaction Design Institute" association of Ivrea.

Put option on Seat shares

Under the contract stipulated on March 15, 2000 (as subsequently amended and integrated), Telecom Italia gave Huit II a put option with on No. 710,777,200 Seat Pagine Gialle shares at a strike price of Euros 4.2. The contract provided for the exercise of such option after the deed of merger between Seat and Tin.it was recorded in the Companies Register.
Huit II later transferred the put option to Chase Equity Limited (CEL), together with the ownership of the corresponding Seat shares. On December 4, 2000, CEL renegotiated the contract with Telecom Italia, extending the period to five years, with the possibility of an early exercise of the option in April and May 2003, 2004 and 2005. The time extension made it possible to defer the financial impact.
Stet International Netherlands then purchased from CEL, through the Liberator Ltd. trust, a call option on No. 660,777,200 Seat shares with the same expiry date and strike price as the put option, paying a total premium of Euros 747,016,226 (Lire 1,446,425 million). For the purpose of transferring the effects of this latter transaction to Telecom Italia, a call option was stipulated, with the same features, between Telecom Italia and Stet International Netherlands. The implicit rate of interest was 6.2%.
At December 31, 2000, the market price of Seat ordinary shares is significantly lower than the strike price; Telecom Italia, however, intends to record the equivalent value of these same shares in "Investments" under long-term investments at the conclusion of the above transactions.

1940

Other memorandum accounts ***Lire 17,413 million***

These mainly refer to assets of third parties on loan, on deposit for safekeeping or for similar purposes (Lire 12,978 million), the licensing agreement (Lire 2,397 million) for the Great Jubilee 2000, equal to the minimum guaranteed amount not yet been covered by the marketing of telephone cards which bear a "Joint Logo" with the Great Jubilee 2000 Committee which ended in January 2001.

* * *

The Company issued weak letters of patronage totaling Lire 2,350,823 million chiefly on behalf of subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements.
Assets of third parties on loan, on deposit for safekeeping or for similar purposes amounted to Lire 619,845 million and consist mainly of equipment leased to customers.
Guarantees provided by others for Company obligations, which consist primarily of sureties to guarantee the performance of non-financial contractual obligations, totaled Lire 521,493 million.
The stock of employees and private stockholders deposited at December 31, 2000 with Telecom Italia, and hence subdeposited with Monte Titoli S.p.A., equal Lire 419,156 million.
The bonds set aside for subscription by employees are equal to Lire 718,358 million.
In accordance with Article 2503 of the Italian Civil Law, two deposits has been constituted at Mediobanca, in order to allow an early draw up of the partial demerger of Telecom Italia in favour of Seat Pagine Gialle and of the full demerger of Stet International in favour of Telecom Italia and TIM. A pool of banks has guaranteed the cash necessary for the deposits; the amounts are equal to Lire 3,917,459 million and Lire 2,752,976 million, respectively, and the maturities are January 4, 2001 and January 24, 2001, respectively.

Financial derivatives

Derivatives refer to cross currency and interest rate swaps (to convert pound sterling loans into euros) and interest rate swaps (to convert variable rate loans into fixed rate loans and convert debt linked to domestic parameters to the 6-month Euribor rate).
The following table gives a description of the financial derivative contracts outstanding at December 31, 2000 to hedge to medium/long-term debt positions.

(in billions of lire)	Notional amount/ Capital exchanged at 12/31/2000	Market value of derivatives at 12/31/2000 (a)	Market value of underlying debt positions at 12/31/2000 (b)	Market value of debt including related derivatives at 12/31/2000 (c = b – a)
Interest rate swap	3,287	38	3,280	3,242
Cross currency and interest rate swaps	756	37	784	747

1941

In particular, the market value of interest rate swaps and cross currency and interest rate swaps reflects the difference between the fixed rate paid by the Company and the market interest rate for maturities having the same remaining life as the swaps. The cross currency and interest rate swaps also reflect the difference between the forward euro/pound sterling exchange rate at the closing of the swap and the same market rate at December 31, 2000.
To determine the market value of the above financial derivatives, the Company uses adequate pricing models.

The following table indicates the notional amount and the average interest rate to be paid/received by maturity for interest rate swaps.

	Maturity					
	2001	2002	2003	2004	2005	2006
Interest rate swap						
Fixed pay rate,						
variable receive rate:						
• notional amount						
(billions of lire)	129	300	1.100	46	58	=
• weighted average pay rate	3.80%	4.65%	3.92%	4.24%	4.71%	=
• received parameter	Libor	Libor	Libor	Libor	Libor	=
	3-mo	3-mo	3-mo	3-mo	3-mo	
	Euro	Euro	Euro	Euro	Euro	
Variable pay rate,						
variable receive rate:						
• notional amount						
(billions of lire)	=	=	=	591	780	283
• paid parameter	=	=	=	Euribor	Euribor	Euribor
				6-mo	6-mo	6-mo
• received parameter	=	=	=	Rolint	Rolint	Rolint
					Rendint	Rendint
					Rendibot	Rendibot
					Robot	Robot

Derivative contracts (interest rate swaps) stipulated to hedge interest rate exposure on short-term loans are equal to Lire 69,073 million.

1942

STATEMENTS OF INCOME

Production value ***Lire 34,386,209 million***
(Lire 36,616,775 million in 1999)

Production value, which decreased by Lire 2,230,566 million compared to 1999, includes the following:

Sales and service revenues *Lire 33,723,158 million*

Sales and service revenues decreased by Lire 2,133,006 million (-5.9%) compared to 1999. A breakdown of sales and service revenues by type of business and geographical region, as required under Article 2427, Section 10 of the Italian Civil Code, is given below:

Breakdown of "sales and service revenues" by type of business

(in millions of lire)	2000	1999	Change
Sales:			
- telephone products	677,454	1,008,453	(330,999)
- other goods	9,902	12,132	(2,230)
	687,356	1,020,585	(333,229)
Services:			
- Traffic (*)	18,333,337	21,288,013	(2,954,676)
- Basic charges (of which):	12,947,021	11,784,632	1,162,389
• lines leased to TLC operators	1,577,436	1,246,483	330,953
- Activation fees	461,831	419,343	42,488
- Consulting and co-ordination fees	307,163	240,617	66,546
- Miscellaneous services and other revenues	986,450	1,102,974	(116,524)
	33,035,802	34,835,579	(1,799,777)
Total	33,723,158	35,856,164	(2,133,006)

(*) of which:

(in millions of lire)	2000	1999	Change
• Traffic by Telecom Italia customers:			
- domestic	13,173,538	16,178,677	(3,005,139)
- outgoing non-domestic	1,361,357	1,637,120	(275,763)
- special services and other	860,846	1,055,161	(194,315)
	15,395,741	18,870,958	(3,475,217)
• Traffic by other operators			
- domestic	1,555,566	1,036,136	519,430

	2,937,596	2,417,055	520,541

1943

Breakdown of "sales and service revenues" by geographical region

(in millions of lire)	International revenues (incoming services)	Italian revenues (outgoing services)	Total
EUROPE	840,253	1,120,175	1,960,428
OTHER AREAS	549,271	768,316	1,317,587
	1,389,524	1,888,491	3,278,015
ITALY			30,445,143
Total			33,723,158

Note that, as stated in the summary of accounting policies, revenues are shown gross of Lire 6,098,813 million due to other carriers (Lire 6,320,978 million in 1999).

• Sales revenues Lire 687,356 million

Sales revenues, which decreased by Lire 333,229 million (-32.7%) compared to 1999, mainly derive from the sales of telephone and telematic products (special internal installations, facsimile machines, data transmission equipment and accessories). The reduction is attributable to the fact that in the second half of 2000, for some customers, the Company only plans the telecommunications systems, leaving manufacturers with the responsibility for the direct sale of the equipment.

• Service revenues Lire 33,035,802 million

Service revenues, which decreased by Lire 1,799,777 million (-5.2%) compared to 1999, are mostly composed of "traffic revenues" and are shown gross of the amount due to other carriers. Service revenues fell primarily as a result of a decrease in traffic in terms of amount (-13.9%), notwithstanding the increase of 27.3% in terms of minutes (+Lire 2,272,904 million in terms of revenues); the average return on traffic, in fact, was Lire 71 per minute compared to Lire 111 in the prior year (-35.8% or -Lire 5,005,454 million in terms of revenues). Service revenues were negatively affected by the reduction, beginning August 1, 1999, in long-distance and international rates, the discount policies aimed at customer retention, the effect of replacing out-of-district rates with the less remunerative online rates and the application of new interconnecting rates for traffic to and from mobile phones. These phenomena were partly compensated by the increase in basic subscription charges (+9.9%) following the August 1, 2000 rate changes, the development of data connections and the growing demand for interconnecting services with the Telecom Italia network by other operators.
The reduction in revenues was also affected, for Lire 211,866 million, by the contribution to Tin.it of the businesses for placing advertising and selling the official "White Pages" telephony directory, as part of the Seat - Tin.it merger.

Changes in inventory of contract work in process *Lire 15,553 million*

Changes in inventory of contract work in process represent the difference between the increase in work in progress and the decrease as a result of completed contracts.

Increases in capitalized internal construction costs *Lire 22,006 million*

Increases in capitalized internal construction costs decreased by Lire 4,465 million (-16.9%) compared to 1999.
This item includes only capitalized personnel costs.

1944

Other revenues and income *Lire 625,492 million*

Other revenues and income, which decreased by Lire 128,863 million (-17.1%) compared to 1999, include the following:

Operating grants Lire 1,010 million

Operating grants decreased by Lire 1,627 million compared to 1999 and refer to grants made by the European Community to cover the costs of personnel training programs and the introduction of technological innovation.

Other Lire 624,482 million

Such item, which decreased by Lire 127,236 million compared to 1999, also includes revenues from services provided to Group companies (mainly TIM) under special contracts. A breakdown of this item is given below:

(in millions of lire)	2000	1999	Change
• Gains on disposal of production assets	3,155	29,202	(26,047)
• Refunds for costs of employees on loan, mainly at Group companies	60,616	72,348	(11,732)
• Refunds for damage by outsiders and customers	30,764	30,915	(151)
• Income from real estate investments	21,370	15,745	5,625
• Capital grants recorded in income	78,504	74,879	3,625
• Revenues from outsourcing services provided to Group companies	68,135	77,074	(8,939)
• Late payment fees	149,344	227,382	(78,038)
• Indemnification, reimbursements and recoveries and other miscellaneous income	212,594	224,173	(11,579)
Total	624,482	751,718	(127,236)

Production cost ***Lire 27,425,577 million***

(Lire 29,521,186 million in 1999)

Production cost, which decreased by Lire 2,095,609 million compared to 1999, includes the items below:

Raw materials, supplies and merchandise *Lire 783,387 million*

These decreased by Lire 390,781 million (-33.3%) compared to 1999 mainly due to lower costs of sale for products (-Lire 253,025 million) since, beginning from the second half of 2000, as mentioned under the comments for "sales revenues", for some customers, the Company only plans the telecommunications systems, leaving manufacturers with the costs of supplying the equipment.
This item refers mainly to the expenses for the sales of telecommunications products and systems, supplies of materials and other goods purchased for operating purposes.

1945

Services *Lire 11,028,534 million*

Service expenses, which decreased by Lire 542,792 million (-4.7%) compared to 1999, mainly include the operating costs for the TLC network, buildings and information systems, operating costs, as well as costs pertaining to training, studies and research and technical consulting services. Services include the following:

(in millions of lire)	2000	1999	Change
Direct service costs	1,399,847	1,570,113	(170,266)
Operating costs	2,041,786	2,312,225	(270,439)
Marketing costs	1,220,892	1,047,637	173,255
Know-how development costs	267,196	320,373	(53,177)
Amounts due to other carriers	6,098,813	6,320,978	(222,165)
Total	11,028,534	11,571,326	(542,792)

An analysis of the composition of such costs is as follows:

a) "direct service costs" include the operating and maintenance costs of the TLC network, public telephone installations and terminals leased to customers. In particular, in 2000, the interconnecting costs to the other operators' networks increased by Lire 35,096 million compared to 1999;

b) "operating costs" refer to the operating and maintenance costs of buildings, vehicles, information systems and equipment, as well as general expenses. Operating costs include Lire 26,465 million to update the information systems to ensure *carrier preselection* and *number portability*;

c) "marketing costs" include selling expenses, post-sales assistance, customer relations, advertising and promotion; in particular, such costs include Lire 473,274 million (Lire 361,129 million in 1999) for "institutional" advertising campaigns, individual product and service advertising and promotional expenses and Lire 113,257 million for the trade agreements with Internet Service Providers. The costs connected with the printing and delivery of the White Pages telephone directories, contributed to Tin.it as part of the Seat – Tin.it merger, decreased by Lire 130,382 million;

d) "know-how development costs" are made up by costs pertaining to training, studies and research and consulting services;

e) "amounts due to other carriers" include, amongst other items, Lire 4,071,448 million due to Italian mobile carriers, Lire 510,993 million to domestic fixed carriers, Lire 1,216,825 million to foreign correspondents and Lire 299,547 million to the service providers Audiotel and Videotel.

Use of property not owned *Lire 875,363 million*

Use of property not owned, which increased by Lire 22,725 million (+2.7%) compared to 1999, includes mainly service costs (for the lease of TLC lines and satellite systems), amounting to Lire 526,503 million, and operating costs (for building rentals, building and vehicle leases and equipment rentals), amounting to Lire 345,714 million. As regards lease installments, principal and interest total, respectively, Lire 39,261 million and Lire 31,217 million.

1946

Personnel *Lire 5,980,292 million*

Personnel costs show a decrease of Lire 198,406 million (-3.2%) compared to 1999, due to the contrasting effects created, on the one hand, by the reduction in the average number of employees (as set forth in the table below), also on account of the resignations, concentrated in the last quarter, as a result of the employee cutbacks under Law No. 223/1991 covered by the agreements reached with the labor unions in July 2000, and, on the other hand, by the increases due to the collective bargaining agreements, career developments, the policy of merit bonuses and seniority increases.
Personnel costs include costs for employees on loan to other Group companies (Lire 60,616 million in 2000 and Lire 72,348 million in 1999). The recovery of such costs is recorded under *"other revenues and income"*.
A comparative breakdown of the average number of employees by professional category is given below:

(in millions of lire)	2000	1999	Change
Executives	1,084	1,113	(29)
Middle management	4,978	5,105	(127)
Clerical staff	55,214	58,318	(3,104)
Technicians	11,660	12,648	(988)
Total	72,936	77,184	(4,248)

Amortization, depreciation and writedowns *Lire 7,570,843 million*

Amortization, depreciation and writedowns, which decreased by Lire 736,739 million (-8.9%) compared to 1999, include the following:

Amortization of intangible assets Lire 1,161,934 million
Amortization of intangible assets shows a decrease of Lire 91,281 million, compared to 1999, owing to lower investments in software that went into use during the year.

The amortization charge refers to the following assets:

(in millions of lire)		2000		1999		Change
• Start-up and expansion costs		1,020		=		1,020
• Industrial patents and intellectual property rights		1,024,340		1,128,436		(104,096)
• Concessions, licenses, trademarks and similar rights		23,535		23,630		(95)
• Goodwill		1,268		3,800		(2,532)
• Other intangibles:						
leasehold improvements	69,439		66,058		3,381	
exclusive rights to the Great Jubilee 2000 and other intangibles	42,332	111,771	31,291	97,349	11,041	14,422
Total		1,161,934		1,253,215		(91,281)

Depreciation of fixed assets Lire 6,038,791 million
Depreciation of fixed assets shows a decrease of Lire 474,242 million (-7.3%), compared to 1999; the decrease reflects the reduction in the amount of depreciable assets, the change

1947

in the mix of depreciable assets, lower depreciation on the public telephony installations and the *DECT* fixed assets written down in the 1999 financial statements and the adjustment of depreciation rates relating to the submarine network which led to a lower depreciation charge of Lire 46,882 million.

The average depreciation rate, calculated by taking into account the above depreciation rate and the assets being depreciated, is equal to 8.5% (8.6% in 1999).
The depreciation charge is calculated using the following average rates:

Land and building	3.3%
Plant and machinery	9.1%
Manufacturing and distribution equipment	25.0%
Other fixed assets	29.8%

The total depreciation charge is calculated for all asset categories using the rates indicated in the Ministry of Finance Decrees of October 29, 1974 (for assets purchased up to 1988) and December 31, 1988 (for assets purchased thereafter). To the extend of depreciation rates, accelerated depreciation is also calculated in accordance with Article 67, Section 3, of Presidential Decree No. 917/1986. An analysis of the depreciation charge is shown below (in millions of lire):

(in millions of lire)	
Land and buildings	394,252
Plant and machinery	5,314,161
Manufacturing and distribution equipment	62,508
Other fixed assets	267,870
Total	6,038,791

Other writedowns of intangibles and fixed assets Lire 37,628 million
Other writedowns of intangibles and fixed assets decreased by Lire 104,671 million, compared to 1999, mainly following the writedown of public telephone installations in the 1999 financial statements.
This item refers to the writedown of software projects in progress and in use that will be abandoned during 2001.

Writedowns of receivables included in current assets and liquid assets Lire 332,490 million
This item, representing the provision to the allowance for doubtful accounts, decreased by Lire 66,545 million, compared to 1999, owing to lower provisions due to a reduction in doubtful receivables.

Change in inventory of raw materials, supplies and merchandise *Lire 99,193 million*

The change is due to lower purchases in comparison to the utilization of the products intended for sale and maintenance, owing to the continuation of the efforts to improve inventory management, and also reflects the writedowns made to account for obsolescence and the diminished usefulness of materials.

1948

Provisions for risks *Lire 121,690 million*

These refer to provisions made to the *"reserve for litigation"* to cover expenses connected with the probable outcome of disputes with third parties (Lire 17,183 million) and to the *"reserve for contractual risks and other risks"* to cover risks stemming from the settlement of trade and regulatory questions (Lire 104,507 million).

Miscellaneous operating costs *Lire 966,275 million*

Miscellaneous operating costs, which decreased by Lire 303,904 million compared to 1999, include the following:

Losses on disposal of assets Lire 94,349 million

Losses on disposal of assets decreased by Lire 112,122 million from 1999 as a result of having completed the network rationalization and modernization program, begun in previous years.

In fact, the gross amount of assets disposed of during 2000 dropped from Lire 3,627,192 million in 1999 to Lire 2,686,099 million in 2000.

TLC license fee Lire 602,529 million

The TLC license fee decreased by Lire 153,189 million, compared to 1999, owing to a reduction in the revenue base and a reduction in the rate which went from 3% in the prior year to 2.7% in 2000. This item includes the fee computed on sales revenues (Lire 594,923 million) and the fee for operating the Regulatory Authority (Lire 7,605 million).

Other miscellaneous costs Lire 269,397 million

Other miscellaneous costs, which decreased by Lire 38,593 million, compared to 1999, include the following:

(in millions of lire)	2000	1999	Change
• other indirect duties and annual taxes, relating mainly to the local property tax, local duties, stamp and register tax, vehicle tax, Technical Office and Finance taxes and fees, license tax on mobile equipment,	156,273	134,264	22,009
• contributions and membership fees	19,695	13,036	6,659
• other costs, essentially relating to compensation due to customers under service regulations for delays in hookups or line transfers, damages paid to third parties for line installations and maintenance and losses on settlements	93,429	160,690	(67,261)
Total	269,397	307,990	(38,593)

1949

Financial income and expense ***Lire 2,574,900 million***
(Lire 2,766,263 million in 1999)

Financial income and expense, which decreased by Lire 191,363 million, compared to 1999, include the following:

(in millions of lire)	2000	1999	Change
Income from equity investments (A)	3,464,568	3,326,941	137,627
Other financial income (B)	353,581	309,647	43,934
Interest and other financial expense (C)	1,243,249	870,325	(372,924)
Total (A+B-C)	2,574,900	2,766,263	(191,363)

Income from equity investments refers to the following:

(in millions of lire)		2000		1999		Change
Dividends from subsidiaries, affiliates and other companies		2,287,913		2,083,042		204,871
Other income from equity investments:						
• tax credits for dividends	1,112,932		1,155,991		(43,059)	
• gains on sales of investments	63,723	1,176,655	87,908	1,243,899	(24,185)	(67,244)
Total		3,464,568		3,326,941		137,627

Tax credits on dividends of Lire 1,112,932 million are made up of Lire 1,093,755 million of tax credits on dividends from subsidiaries accrued for 2000 and Lire 19,177 million of dividends collected in 2000.

1950

Dividends can be analyzed as follows:

AUDITORS' REPORT IN ACCORDANCE WITH ARTICLE 156 OF LAW DECREE N° 58 DATED 24 FEBRUARY 1998

To the Shareholders of
Telecom Italia SpA

1 We have audited the consolidated financial statements of Telecom Italia SpA and subsidiaries (Telecom Italia Group) as of December 31, 2000. These financial statements are the responsibility of Telecom Italia's directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2 We conducted our audit in accordance with the auditing standards and criteria recommended by CONSOB. Those standards and criteria require that we plan and perform the audit to obtain the necessary assurance about whether the financial statements are free of material misstatement and, taken as a whole, are presented fairly. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the directors. We believe that our audit provides a reasonable basis for our opinion.

The financial statements and the consolidated financial statements of certain subsidiaries (mainly Seat Pagine Gialle SpA, Telecom Italia Mobile SpA, TI Web SA and 9 Telecom Reseau SAS), whose total assets constitute 29 per cent of consolidated total assets and whose sales revenues constitute 33 per cent of consolidated sales revenue, have been audited by other auditors who gave us their related reports. Our opinion, expressed herein, insofar as it relates to the accounts of those subsidiaries included in the consolidated financial statements, is based also on the audits performed by other auditors.

For the opinion on the consolidated financial statements of the prior period, which are presented for comparative purposes as required by law, reference is made to the report issued by Arthur Andersen SpA dated April 10, 2000.

1953

PRICEWATERHOUSECOOPERS

3 In our opinion, the consolidated financial statements of the Telecom Italia Group as of December 31, 2000 comply with the laws governing the criteria for their preparation; accordingly, they give a true and fair view of the financial position and of the results of operations of Telecom Italia Group.

4 For a better understanding of the consolidated financial statements, reference should be made to the information included in the notes to the consolidated financial statements, in the section "Summary of significant accounting policies", regarding the accounting criteria utilised for the employee benefit obligations as required by law no. 58/1992.

Turin, May 21, 2001

NOTES TO FINANCIAL STATEMENTS

The financial statements at December 31, 2000 have been prepared in accordance with the provisions of the Italian Civil Code.
The accounting policies adopted in preparing the financial statements at December 31, 2000, disclosed below, have been applied on a basis consistent with the prior year.
No special situations that would require the use of the waivers allowed under Article 2423, Section 4, of the Italian Civil Code occurred during the year.
Following certain changes to some items of the financial statements, the financial statements at December 31, 1999 have been reclassified for purposes of a meaningful comparison.
As required by Legislative Decree No. 127/1991, the consolidated financial statements have also been prepared and are presented together with the financial statements of Telecom Italia.
The disclosure relating to the introduction of the euro is presented in a specific paragraph "Other information" of these Notes and in the Report on operations.
The statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these notes to financial statements pursuant to Article 2423, Section 3 of the Italian Civil Code.
Unless otherwise specified, all figures are stated in millions of Italian lire.
As described in the comments under "Management's discussion and analysis of financial condition and results of operations", following the contributions made during 2000, the balance sheet does not include the assets and liabilities contributed, whereas the statement of income takes into account the results of the companies contributed up to the date the transactions went into effect. These financial statements include the assets and liabilities of Stet International, acquired as part of the total spin-off of this same company, effective for accounting and tax purposes as from January 1, 2000.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit.
When full recovery of the investments is not expected, the appropriate writedowns are made by applying the method adopted for fixed assets, to which reference should be made.
Detailed amortization policies are presented in the following paragraphs.

Start-up and expansion costs are amortized in five years, starting from the year the costs were incurred or became due.

1962

Industrial and intellectual property rights are amortized over their estimated period of benefit on a five-year basis (industrial patents) or on a three-year basis (software), starting from the year of their initial use.

Concessions, licenses, trademarks and similar rights refer mainly to the rights for the use of satellites and are amortized on the straight-line method on the basis of the useful life of the satellites.

Goodwill is amortized in five years starting from the year in which the cost was incurred.

The item *Others* consists primarily of:
- *leasehold improvements*: the amortization is calculated on the basis of the remaining duration of the lease contracts;
- *rights of transmission*: the rights guarantee the extension of transmission capacity of the Company over a foreign territory and are amortized over the period of the contracts entered with the foreign operators who own the installations to which the rights refer;
- *exclusive rights to the "Great Jubilee 2000" event*: these refer to the charges incurred by Telecom Italia for the acquisition of the exclusive right as the sole telecommunications operator of the Jubilee and are amortized up to the expiration of the right (January 2001).

Research, development and advertising costs are charged to income in the year incurred.

Fixed assets

Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include inflation adjustments made on the basis of the special laws regarding assets existing on or before December 31, 1981 (Law No. 74 of February 11, 1952; Law No. 576 of December 2, 1975; Law No. 72 of March 19, 1983), the entries required under Law No. 823 of December 19, 1973, regarding the settlement of tax liabilities, as well as mandatory upward adjustments of all real estate as required by Law No. 413 of December 30, 1991.
For assets whose value is permanently below the historical cost, net of their accumulated depreciation, the appropriate writedowns are made pursuant to Article 2426, Section 1, item 3 of the Italian Civil Code. To determine such writedowns, specific methods are used based on the expected future profitability of the assets. In particular, an analysis is made of the value of those assets affected by events compromising the possibility of a full recovery of book value. This value is compared with the – non discounted – cash flows expected from use of the assets. If the cash flow is less than the book value, writedowns are determined by adjusting the book value of the assets to their fair value, represented by cash flows, discounted at the rate used for the valuation of the investments. Any writedowns are recorded in the statement of income under the item "amortization, depreciation and writedowns" among "other writedowns of fixed assets and long-term investments".
Construction in progress is stated at the amount of direct costs incurred (materials used for the installations or intended therefor, third-party services, miscellaneous expenses, as well as company labor). The value of fixed assets does not include maintenance costs

1963

incurred for their upkeep to guarantee their expected useful life, their original capacity and productivity, and costs borne to repair malfunctions and failures; such expenses are charged to the statement of income in the year incurred.
The total depreciation charge for the year was determined taking into account the estimated useful lives of the installations and the review, made in 2000, regarding those of the submarine network.
Total accumulated depreciation for fixed assets was upwardly adjusted where called for by the previously mentioned special laws.

Equity investments

Equity investments in subsidiaries, affiliated companies and other companies are included either under long-term investments or short-term financial assets, based on the anticipated holding period.
Long-term equity investments in *subsidiaries*, *affiliated companies* and *other companies* are valued at acquisition or subscription cost – determined according to the continuous LIFO method – increased by the statutory inflation adjustments, as well as the voluntary one made to several investments during the preparation of the financial statements at December 31, 1981.
The carrying value of investments recorded in long-term investments is adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.
For long-term investments in companies operating at a loss, the value of the investments is written down to an amount equal to the corresponding share of the underlying net equity, if lower, as shown by the latest financial statements of the respective companies. Losses exceeding the corresponding carrying values are recorded among *reserves for risks and charges*.

Contracts for the loan of securities are represented in the financial statements as two functionally related transactions: a loan and a repurchase transaction on the securities with the obligation of the borrower to resell them at maturity. Accordingly, "Other receivables" and Other liabilities" include, respectively, a receivable and a payable of the same amount at the fixed amount of the contract (market price of stock at the date of delivery of the securities).

Equity investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost – determined according to the continuous LIFO method – and realizable value, based on the year-end prices on the Italian Online Stock Market.
The costs of investments in foreign companies have been translated into Italian lire at historical exchange rates prevailing at the time of acquisition or subscription.
Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.
With regard to investments in "international organizations for satellite systems", the value shown in the financial statements consists of the equivalent value in Italian lire of the net financial contributions calculated at the exchange rates in effect at the time of each transaction. The holding in such organizations is adjusted each year in relation to the actual use of the satellite systems.

1964

Other securities (other than equity investments)

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.
Securities held as long-term investments are valued at cost, adjusted for the portion of the difference between the cost and the redemption value that accrued during the year.
Securities included in current assets are valued at the lower of cost of acquisition, adjusted for the portion of issue differences and realizable value, and the year-end prices on the Italian Online Stock Market.
Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.
The cost of securities, whether included in long-term investments or current assets, is determined by the continuous LIFO method.

Inventories

Inventories – consisting of goods intended for sale, as well as stock on hand of technical materials and replacement parts to be used in the business during the year and for maintenance – are valued at the lower of cost, calculated using the weighted-average method, and realizable value.
The carrying value of goods in stock is reduced, through appropriate writedowns, for obsolete materials.
Inventories include the amount of work on behalf of third parties in progress at the end of the year, valued according to the "costs" already incurred.

Accounts receivable and liabilities

Accounts receivable are stated at estimated realizable value and classified under long-term investments or current assets. They include – as far as telecommunications services are concerned – the amount of services already rendered to customers and other carriers, already billed or still to be billed, as well as the invoices for the sale of telephone and online products.
Liabilities are shown at their nominal value.
Accounts receivable and liabilities in foreign currency, based on the concept of prudence, are recorded at the year-end exchange rates; the positive and negative differences between the balance of accounts receivable and liabilities converted at year-end exchange rates and their balance at the original exchange rates are recorded in the statement of income, respectively, in *financial income* and *financial expense*.

Accruals and deferrals

These items are recorded on the accrual basis. *Issue discounts and similar charges* consist of costs in connection with long-term loans, which are charged to the statement of income over the duration of the loan in proportion to the accrued interest.

1965

Reserves for risks and charges

For taxes: this reserve includes prudent provisions for estimated tax charges (including any surtaxes and late payment interest) on positions not yet agreed or in dispute.

For deferred taxes: this reserve includes deferred tax liabilities – net of deferred tax assets, whenever the assumptions for doing so exist – calculated on the timing differences between the value attributed to assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes.
Whenever the amount of deferred tax assets is higher than deferred tax liabilities, the balance is recorded among "*other receivables*" in current assets.

Others: relate primarily to provisions to cover charges of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data.

Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws (in particular Law No. 297 of May 29, 1982, which provides for fixed and variable cost-of-living adjustments) and collective bargaining agreements. The reserve is adjusted to the liability matured at the end of the year for personnel in force at that date and is net of advances paid. The item *other receivables*, under long-term investments, includes the receivable stemming from the advance payment of tax on termination indemnities in accordance with Law No. 662 of December 23, 1996 and its subsequent amendments. This receivable is revalued according to the provisions of the law.

Employee benefit obligations under Law No. 58/1992

With regard to Telecom Italia's obligation required by Law No. 58/1992 to guarantee a uniform insurance status under the Telephone Workers' Social Security Fund – FPT (part of the general "Employees Pension Fund" beginning January 1, 2000) to all employees in service in the Group's telephone companies (Stet, Sip, Italcable and Telespazio) as of February 20, 1992, as well as those who moved from the Public Administration to Iritel, Article 66, Section 1 of Law 331/1993 and converted into Law No. 427/1993 specifies that the sums due to the Fund should be shown in the financial statements and are tax deductible in the years in which the payments to fulfil this obligation – in fifteen equal annual installments, payable in arrears – are actually made.
At the present time, the amount of the liability, which will be determined by the National Social Security Institute (Istituto Nazionale della Previdenza Sociale - INPS), can be estimated only roughly, due to problems relating to the interpretation and application of the social security legislation and to the lack of certain data which only the social security institutions currently possess. Nevertheless, these financial statements include Lire 1,366 billion of residual payables to INPS, (net of the amount attributed to TIM, TE.SS., Netsiel and Tin.it for the employees transferred to those companies), relating to the estimate

1966

made for the employees of the former State Company for Telephone Services (ASST) by the special Ministerial Commission established under Law No. 58/1992 upon the transfer of the assets of the Post and Telecommunications Administration to Iritel, and recorded by the latter company in its financial statements at December 31, 1993. As a result, these charges will have no impact on the results of future years, since they were already included in the aforementioned calculation.

A dispute concerning the application and interpretation of this law is pending with INPS regarding, firstly, the effective date for the computation of the accrued interest due under Law No. 58/1992, in view of the fact that the liability is paid in installments. Telecom Italia believes that interest should accrue from the time INPS notifies it of the actual amount of the liability, while INPS claims that the computation should be made as of February 20, 1992 or on the date of the transfer to Iritel, thus giving rise to pre-amortization interest. The second issue is the exclusion from the effects of Law No. 58/1992 of all employees (except for employees of the former Iritel) who had filed an application to join pursuant to Law No. 29/1979 before February 20, 1992, unless that application had not been processed by INPS. The position of the Company is that the criteria set forth in Law No. 29/1979 – and, therefore, payment of the respective obligations – apply to these employees.

At the present time, the parties have agreed that the differences in interpretation shall be settled through test appeals, with recourse to the Court of Appeals being waived for a final determination of the correct interpretation of the law in question.

While the proceedings are pending, Telecom Italia has agreed to pay under protest the amounts requested by INPS based on the criteria determined by the latter, subject to subsequent equalization adjustments, if the Courts ultimately accept the Company's interpretation.

Based on the above, a reasonable estimate of the principal amount of the liability attributable to the Company (excluding, as mentioned earlier, the part relating to the former Iritel employees) could vary between Lire 1,900 billion and Lire 2,500 billion (Lire 509 billion of which has already been paid), depending on conflicting interpretations and taking into account all personnel involved. However, these estimates are merely indicative, lacking complete data from INPS. As of December 31, 2000, INPS had submitted formal requests for about 96% of the employees whose change in insurance status will result in a charge for Telecom Italia.

In either case, the impact of the charge should definitely be compatible with the income of future years, since, as allowed under Article 5, Section 3 of Law No. 58/1992, the payments requested by INPS will be made in fifteen equal annual installments payable in arrears (including annual interest of 5%), starting when INPS formally submits its requests.

The remaining liability for obligations under Law No. 58/1992, to be paid in fifteen annual installments on the basis of the formal requests made by INPS on December 31, 2000 and the interpretation of said requests, amounts to Lire 2,923 billion, divided as follows:

- Lire 1,911 billion for the principal amount (except for the portion attributable to former Iritel employees);
- Lire 1,012 billion in accrued interest.

Pre-amortization interest (including that relating to the employees of the former Iritel), subsequent to the agreement between INPS and Telecom Italia, was paid by the latter – with reservation – in fifteen equal annual installments, payable in arrears, including interest at an annual rate of 5%, up to the end of 1999, for a total amount of Lire 216

1967

billion. In compliance with the sentence handed down by the Court of Appeals, No. 4242 of April 5, 2000, which upheld Telecom Italia's position, payment of the above-described interest and accrued interest related thereto was suspended (for a residual amount of Lire 789 billion, of which Lire 68 billion relates to the amount due for 2000).
The charge to income for the year 2000 (under "extraordinary expense") amounts to Lire 297 billion inclusive of accrued interest.
During 2000, Telecom Italia paid INPS the above-mentioned charges also on behalf of other Group companies – mainly TIM and CSELT – for those employees transferred and covered by the obligation of a uniform insurance status under Law No. 58/1992, recovering the amounts paid from these same companies. The recovery is recorded in the statement of income under "extraordinary income" and amounts to Lire 4 billion.

Grants

Operating grants (directly credited to the statement of income) and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures.
The treatment of capital grants and grants for installations in the balance sheet is as follows:

a) grants received through December 31, 1992, are included under *reserves for risks and charges*. The portions equivalent to the depreciation taken on assets financed with the grants in question (the so-called "available" portion) are transferred to a special equity reserve in order to obtain the benefits allowed under the tax law;
b) for grants received from January 1, 1993 to December 31, 1997, 50% of the amount received is recorded in a special reserve of stockholders' equity in order to take advantage of the benefits available under the tax laws, and the remaining 50% is recorded under *deferred income*. These amounts are gradually credited to income in accordance with the pertinent laws;
c) for grants received from January 1, 1998, the amount is recorded under *deferred income* and progressively credited to the statement of income in relation to the depreciation taken on the assets to which the grants refer.

Revenues and expenses

Revenues and expenses are recorded on an accrual basis. Revenues relating to telecommunications services are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost.
Fees for new access lines and line transfers are recorded as income when the service is provided.
Dividends from subsidiaries are recorded when they accrue, that is, in the year when the income from which they are paid is earned by the subsidiaries, providing a substantial certainty that they will be paid, and, in any event, when the stockholders' resolution declaring the dividend is passed or when the appropriation of net income is set forth in the preliminary financial statements prepared by the management of the subsidiaries prior to the Board meeting of the parent company that resolves upon the financial statements. Dividends from affiliated companies and other companies, on the other hand, are recognized in the statement of income according to when they are declared or in the year in which the respective right to the receivable arises, following the stockholders' resolution of those companies.

1968

Leased assets

Capital goods acquired under leasing agreements are shown in the financial statements by a method consistent with current legislation, which requires that leasing payments be recorded as operating costs.

Memorandum accounts

These financial statements contain changes to the presentation of memorandum accounts. In particular:
- guarantees provided are presented net of counter-guarantees received;
- financial derivative contracts are only presented in the notes.

Guarantees provided consist of sureties on behalf of Group companies to secure their borrowings and other obligations. They are shown for an amount equal to the guarantee provided. Those provided in foreign currencies are translated at year-end exchange rates.
Purchases and sales commitments are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".
These are largely represented by the purchases commitments for future lease installments plus the buyout amounts of assets leased.
Other memorandum accounts mainly refer to assets of third parties on loan, on deposit for safekeeping or for similar purposes.

Financial derivatives

Financial derivative contracts are used by the Company to hedge exposure to interest rate and currency exchange risks.
Interest rate swaps involve the exchange of flows of interest between the counterparts calculated on the notional amount of reference at the agreed fixed or variable rates at the specified maturity date: normally the differential between the two interest rates is paid or received.
Cross currency and interest rate swaps are used both to hedge interest rate risk and exchange risk on loans denominated in foreign currency: they make it possible to covert the notional amount in foreign currency to the domestic currency and also to convert from a variable rate or a fixed rate in the foreign currency into a variable rate or fixed rate in the domestic currency.
The interest paid or received or the differential paid or received is recorded in the statement of income in specific accounts under financial income and expense. Moreover, related accruals are made at the year-end or interim closings with a counter-entry to "accrued income and prepaid expenses or accrued expenses and deferred income".

1969

BALANCE SHEETS

ASSETS

Intangibles, fixed assets and long-term investments

Intangible assets ***Lire 2,301,652 million***

(Lire 2,258,614 million at December 31, 1999)

A summary of the changes during the year is presented as follows:

(in millions of lire)	2000
– Additions	1,299,715
– Disposals and other changes	(17,679)
– Contributions of business segments	(52,025)
– Transfers from Stet International for spin-off	1,340
– Writedowns	(37,628)
– Amortization	(1,161,934)
– Reclassifications	11,249
Total	43,038

An analysis of the composition and the changes in intangible assets during the year is presented as follows:

1971

Start-up and expansion costs =

This item shows a nil balance between the transfer from Stet International (Lire 1,020 million) and the amortization charge for the year (Lire 1,020 million).

Industrial patents and intellectual property rights *Lire 821,198 million*

These decreased by Lire 371,090 million from December 31, 1999.

They are detailed as follows:

(in millions of lire)	12/31/2000	12/31/1999
• software in use	820,943	1,191,960
• industrial patents	255	328
Total	821,198	1,192,288

Capitalized costs for applications software show a decrease of Lire 371,017 million compared to December 31, 1999, mainly due to some projects which came into use during the year (Lire 713,372 million), net of the amortization charge (Lire 1,024,181 million), disposals (Lire 16,553 million), the writedown of software in use (Lire 4,635 million) and net transfers as a result of corporate transactions entered into during the year (Lire 39,020 million).
Industrial patents decreased by Lire 73 million compared to December 31, 1999, and represent the difference between capitalized costs incurred to file new patents and extend already filed patents to foreign countries (totaling Lire 86 million) and the amortization charge (Lire 159 million).

Concessions, licenses, trademarks and similar rights *Lire 90,088 million*

This item shows a decrease of Lire 22,510 million compared to December 31, 1999, representing the difference between additions and projects which came into use during the year (Lire 980 million), the amortization charge (Lire 23,535 million), disposals (Lire 49 million) and the transfer from Stet International during the year (Lire 94 million).

Goodwill =

Goodwill shows a nil balance owing to the amortization charge for the year 2000 (Lire 1,268 million) and the contribution of the business segment to Tin.it (Lire 2,532 million).

Work in progress and advances to suppliers *Lire 1,240,085 million*

Work in progress and advances to suppliers show an increase of Lire 499,702 million compared to December 31, 1999, due to investments in software development projects relating to network applications and operating programs (Lire 1,229,982 million), completed software projects which came into use during the year (Lire 686,815 million), the writedown of software projects that will be abandoned in 2001 (Lire 32,993 million) and the contributions of business segments during the year (Lire 10,472 million).

1972

Other intangibles *Lire 150,281 million*

These assets, which decreased by Lire 59,264 million compared to December 31, 1999, include:

- "leasehold improvements" (Lire 146,754 million) made up by costs incurred to adapt leased properties to the Company's operating needs. This item shows a decrease of Lire 15,856 million compared to December 31, 1999, representing the difference between new capitalized items (Lire 53,359 million), the amortization charge (Lire 69,439 million) and other changes mainly referring to the transfers from Stet International (+Lire 225 million);
- "exclusive rights to the Great Jubilee 2000 event" (Lire 3,527 million), acquired in 1999 and made up by the costs incurred to obtain the exclusive TLC provider rights for the Jubilee. This asset shows a decrease mainly on account of the amortization charge for the year (Lire 42,330 million).

Fixed assets ***Lire 29,305,516 million***

(Lire 36,519,951 million at December 31, 1999)

A summary of the changes during the year is presented as follows:

(in millions of lire)	2000
– Additions	3,674,626
– Disposals and other changes	7,765
– Contributions of business segments	(4,847,519)
– Transfers from stet international for spin-off	733
– Depreciation	(6,038,791)
– Reclassifications	(11,249)
Total	(7,214,435)

An analysis of the composition and the changes in fixed assets during the year is presented as follows:

	12/31/1999				
(in millions of lire)	Cost	Upward adjustments	Writedowns	Accumulated depreciation	Total
Land and buildings	10,409,499	1,978,817	(3,939)	(4,555,813)	7,828,564

Total	97,525,639	2,504,826	(1,872,176)	(68,852,773)	29,305,516

"Construction in progress and advances to suppliers" include labor costs of Lire 22,006 million. The gross value of the fixed assets transferred as a result of the corporate transactions for the contributions of business segments and the total spin-off of Stet International is Lire 9,227,697 million (of which Lire 7,608,740 million relates to the contribution of the business segment "Grandi Immobili" to IM.SER), whereas the related accumulated depreciation accounts total Lire 4,380,911 million (of which Lire 2,976,942 million relates to IM.SER).

1974

Accumulated depreciation at December 31, 2000, as a whole, is considered sufficient in relation to the remaining period of utilization of the assets, determined on the basis of the estimated useful lives of the installations making up the domestic telecommunications network. Accumulated depreciation covered 68.8% of fixed assets at December 31, 2000 and 64.3% at December 31, 1999.

Since the accounting values of the installations are considered congruous and the most prestigious real estate properties were contributed to IM.SER, the fixed assets were not upwardly adjusted as allowed by Law No. 342/2000. However, as set forth by art. 14 of this law, in order to obtain tax benefits, the "Reserve for accelerated depreciation " pertaining to the fixed assets still in use at the end of 2000 was reclassified to the special reserve as provided by the same law. As a result of this law, the carrying value of the fixed assets subjected to accelerated depreciation transferred to the new reserve also expresses the cost of the fixed assets recognized for tax purposes.

At December 31, 2000, the upward adjustments made to fixed assets in 1952, 1975, 1983 and 1991 as well as those made under Law No. 823/1973 have been depreciated by an average of approximately 75%.

The Company uses fixed assets purchased through lease contracts with its subsidiary Teleleasing, which are essentially stipulated under market conditions, as disclosed in the memorandum accounts and related notes. Had these contracts been accounted for using the financial method, entries would have been made in the statement of income for the interest on the financed principal and the depreciation charge attributable to the leased assets and assets would have been recorded in fixed assets and the residual debt under liabilities. The use of this method, however, would have had no material economic effect on the financial statements. The amount of financial expense included in the lease payments recorded in the 2000 statement of income is separately indicated in the note on the "use of property not owned".

Additions during the year include Lire 692,429 million of projects completed in Southern Italy.

Long-term investments ***Lire 40,193,558 million***
(Lire 19,644,996 million at December 31, 1999)

This item increased by Lire 20,548,562 million compared to December 31, 1999 and includes the following:

(in millions of lire)	12/31/2000	12/31/1999

1975

Equity investments *Lire 36,563,678 million*

Annexes 9 and 10 present the changes in each investment during the year, together with the corresponding amount at the beginning of the year and at December 31, 2000, as well as, according to Article 2427, Section 5, of the Italian Civil Code, a list of all the Company's equity investments in subsidiaries and affiliated companies. Overall, investments in subsidiaries, affiliates and other companies increased by Lire 27,233,285 million compared to December 31, 1999, as shown below:

(in millions of lire)

Increases:	
• Subscription to capital increases, recapitalizations and loss coverage of: TIM (2,188,228), Stream (205,000), Iridium Italia (26,059), Tin.it (formerly Savigliano Immobiliare) (6), Seat Pagine Gialle (563,417), IM.SER (154), Edotel (12,909), N.TC in liquidation (1,321), I.T. Telecom (formerly Reseau) (51,538), Czechtel in liquidation (21), TMI – Telemedia International Italia (166,741), Fintech (15,000), e Fusion (1,860), Trainet (6,889), Stet International Netherlands (2,050), Eutelsat (203,923), Media Technology Venture (1,106), Mix (19), Cygent (18,058), Cartesia (900).	3,465,199
• Acquisition/subscription of shares/quotas at time of corporate formation of: Stream (354,395), TIM (1,234,481), Seat Pagine Gialle (12,426,614), TI France (15), TI Germany (49), TI Switzerland (25), TI United Kingdom (3), TI Web (61), SIA (20,593), Latin American Nautilus (92,677), Mediterranean Nautilus (68), Netsiel (199), Telecom Italia Capital (66), TI Belgium (2,904), TI Netherlands (35), Is Tim Telekomunikasyon Hizmetleri (242,543), STT (4,400), Consorzio Dream Factory (172), Dmail.it (8,472), Gemini Israel III (1,181), IFM Infomaster (1,323), Italtel (80), Jerusalem Global Venture (1,496), Consorzio Energia Fiera District (3).	14,391,855
• Permanent transfer to capital stock of advances on future capital contributions relating to Stet International Netherlands (8,401,122), Stet Mobile Holding (1,118,604), Cartesia (100), CAF Italia 2000 (1).	9,519,827
• Acquisition of investments following corporate transactions: Netsiel (209,860), TE.SS. (2,274), Seat Pagine Gialle (46,409), IM.SER (5,615,183), Stet International Netherlands (1,547,389), Stet Mobile Holding (89,580), Saiat (1,000).	7,511,695
• Reclassification of long-term receivable from Bitel to investments (259,981) and acquisition of investment in IMMSI through partial demerger of Sirti (45,575).	305,556
Total increases (A)	35,194,132

1976

(milioni di lire)	
Decreases:	
• Sale of shares/quotas in: IM.SER (5,224,408), Bitel (259,981), IMMSI (10,281), Edotel (80), Teleleasing (14), Consorzio Promotore ISDN in liquidation (229), Consorzio Multimediale di Terni (1,750), Sistemi e Telematica (420), TSP (7,023), Accel (891), Intelsat (23,493), Media Technology Venture (1,309), The Fantastic Corporation (548), Huit (199), Sirti (86,348), Itinera (127), Is Tim Telekomunikasyon Hizmetleri (242,543), Italtel (80), Italdata (720).	5,860,444
• Writedown for losses of investments charged to statement of income of: Iridium Italia (5,700), Stream (391,881), TMI - Telemedia International Italia (197,081), Tin.it (formerly Savigliano Immobiliare) (6), Consorzio Civita (12), Trainet (1,306).	595,986
• Writedown for losses of investments covered by the reserve for risks and charges on investments of: Iridium Italia (20,359), Stream (1,169), N.TC in liquidation (1,321), Edotel (11,629), Czechtel in liquidation (21), Consorzio CIMSC (9), I.T. Telecom (formerly Reseau) (1,538), IM.SER (137), Geis (9,692), Trainet (5,583).	51,458
• Reduction of the investment in Sirti following the partial demerger and consequent creation of the company IMMSI.	45,575
• Total spin-off of Stet International	1,407,384
Total decreases (B)	7,960,847
Net change for the year (A-B)	27,233,285

In particular:

- subsequent to the resolutions of the extraordinary stockholders' meeting of December 15, 1999, on February 7, 2000, the real estate assets and connected activities of Sirti S.p.A. were partially demerged, on a proportional basis, and attributed to the newly formed company IMMSI S.p.A.. The legal effects of the demerger had effect from February 10 and from February 11, the stock exchange authorized the trading of IMMSI shares and the listing of Sirti shares ex demerger. In November, Telecom Italia tendered all of its shares in Sirti to the voluntary take-over bid by Wiretel for 100% of Sirti stock.
- on April 7, Telecom Italia subscribed to the share capital increase of Savigliano Immobiliare – from Lire 20 million to Lire 1,000 million – voted by the stockholders' meeting of the company acquired the previous February 29. The same stockholders' meeting passed a resolution to transform the company from a limited liability company to a joint stock company, changing the registered name to Tin.it S.p.A.. Also on the same occasion, a second capital increase was voted for Lire 40 billion with the contributions of assets consisting of the business segments and investments inherent to the operations and marketing of online services and products by Telecom Italia, the investment held in Viasat by Telespazio and the "Content Management" division by Saritel. On August 10, 2000, the extraordinary stockholders' meeting passed a resolution for the partial demerger, on a proportional basis, of Telecom Italia, finalized on November 10, through the transfer of a 8.168% stake in Tin.it to Seat, and also the merger of Tin.it and Seat Pagine Gialle, finalized on November 15, 2000. At December 31,

1977

2000, the investment in Seat Pagine Gialle – taking into account this last transaction and the purchase of shares during the year, from Huit II (No. 816,809,603 ordinary shares at 4.5 euro per share, plus interests), through public purchase offers (No. 339,291,608 ordinary shares at 4.2 euro per share and No. 326,944,623 saving shares at 2.94 euro per share) and by JP Morgan (No. 53,009,681 ordinary shares at 4.87 euro per share), was equal to 55.20% of the entire share capital. The shares held by Telecom Italia, equal to No. 6,051,510,901, are composed of No. 5,168,475,885 unencumbered ordinary shares, No. 218,754,174 unencumbered savings shares, No. 339,291,608 ordinary shares pledged and No. 324,989,234 shares on loan (of which No. 216,798,785 ordinary shares and No. 108,190,449 savings shares). These latter shares derive from specific contracts for the loan of securities (see the accounting policies under investments), covered by specific guarantee contracts;

- during the month of April, Telecom Italia purchased 50 million TIM ordinary shares at a price of Lire 1,230,947 million in order to increase its holding in the company. In July, the Board of Directors of Telecom Italia voted to accept TIM's offer to covert all of TIM savings shares into ordinary shares. The outlay by Telecom Italia totaled Lire 2,188,228 million.
- during the first half, Telecom Italia and News Television acquired the investments held by Cecchi Gori group and SDS in Stream, each by equally subscribing to capital increases and making stock purchases. After these transactions, Telecom Italia's stake in Stream increased from 35% to 50%;
- in June, Telecom Italia contributed No. 46,104,648 Meie Assicurazioni shares to Saiat that were carried in the 1999 financial statements at quantity and not at value, realizing a gain of Lire 1,000 million;
- on November 1, 2000, Telecom Italia contributed to TE.SS. – Tele Payroll Services S.p.A. – the business segment consisting of the personnel administration services through the subscription of No. 117,500 shares of the same for an equivalent amount of Lire 2,274 million;
- on December 1, 2000, Telecom Italia contributed the business segment "Grandi Immobili", including the majority of the most prestigious real estate properties, to IM.SER for an amount of Lire 5,615,183 million, acquiring 100% control of the company; later, a 45% stake in IM.SER was sold to Beni Stabili and an additional 15% stake to Lehman Brothers. Telecom Italia's interest thus fell to 40%.
- on December 27, 2000, the total spin-off of Stet International to Telecom Italia and TIM as part of the rationalization of the international telecommunications sector was concluded. The deal is effective for accounting and tax purposes beginning January 1, 2000. This transaction led to the cancellation of the entire stake in Stet International (Lire 1,407,385 million) and the simultaneous increase in the investments in Stet International Netherlands (Lire 1,547,389 million) and in Stet Mobile Holding (Lire 89,581 million). Telecom Italia subsequently contributed the entire stake held in Stet Mobile Holding to TIM, receiving 1.94% of TIM ordinary shares (after the conversion of savings shares into ordinary shares) following the share capital increase set aside by TIM for the same Telecom Italia;
- on December 31, 2000, Telecom Italia, as part of the plan for the reorganization of the information technology sector, which calls for concentrating all of the Group's operations in this sector to I.T. Telecom S.p.A., contributed the business segment for the operations of the information technology services to Netsiel, by subscribing to the capital of the same for an equivalent amount of Lire 209,860 million; after this transaction Telecom Italia's stake in Netsiel is equal to 68.7%;

1978

- some investments in subsidiaries and affiliated companies are recorded at an amount in excess of the corresponding share of the underlying stockholders' equity, net of dividends and after the consolidation adjustments. These investments are maintained at their carrying values since they are expected to show future earnings and their assets are worth more than their respective book values. In particular, in the case of TIM, the higher value – which is nevertheless significantly lower than market value, as later described – is the result of the method (proportion of market value) used in separating the value of the holding from that of the former company Telecom Italia following the demerger in 1995. As for Finsiel, the value of the investment has not been changed in view of its current earnings potential.

A comparison between the market price of the listed shares at December 31, 2000 and their carrying value shows an unrealized gain of Lire 83,954 billion. Further details are given in Annex 11.

Advances on future capital contributions *Lire 1,864,890 million*

These show a decrease of Lire 6,745,200 million compared to December 31, 1999, principally due to the reclassification to "equity investments in subsidiaries" of the payments made to the companies Stet International Netherlands and Stet Mobile Holding in prior years and during 2000. At December 31, 2000, the amount is composed as follows:

- Stet International Netherlands (Lire 1,864,633 million);
- Tecno Idro Meteo (Lire 189 million);
- Ti Austria Gmbh (Lire 68 million).

Accounts receivable *Lire 484,419 million*

These are recorded at nominal value, which corresponds to estimated realizable value, decreased by Lire 1,220,094 million compared to December 31, 1999, and are analyzed as follows:

	12/31/1999	Changes during the year				12/31/2000
(in millions of lire)		Disburse-ments	Reimburse-ments	Reclassifi-cations Other	Total	
Subsidiaries	1,300,011	9,611	(962,918)	(249,890)	(1,203,197)	96,814

Total	1,704,513	72,877	(1,040,935)	(252,036)	(1,220,094)	484,419

Accounts receivable from subsidiaries Lire 96,814 million

These decreased by Lire 1,203,197 million mainly on account of the repayment of loans by Teleleasing following the sale to Mediobanca of a 60% interest in Teleleasing itself. The balance at December 31, 2000 only includes loans granted at market terms to the company Telespazio.

1979

Other receivables — Lire 387,605 million

These decreased by Lire 16,897 million and refer to:

- *receivables from customers* — *Lire 1,819 million*
  these are made up by 50% of the new connection charges borne by residential customers paying in 12 bi-monthly installments, as allowed by law. These receivables show a decrease of Lire 24 million from December 31, 1999;

- *receivables from employees* — *Lire 95,047 million*
  these include the outstanding amount of loans receivable from employees, of which Lire 78 million was made in connection with the Initial Public Offering of ordinary Telecom Italia shares;

- *guarantee deposits* — *Lire 9,744 million*
  these include cash deposits to third parties paid mainly to municipalities to guarantee proper work to roads;

- *other financial receivables* — *Lire 280,995 million*
  These mainly refer to:
  - the loan made to Ros Telecom (Lire 42,610 million) for the installation of the ITUR project (optic submarine cable linking Italy, Turkey, Ukraine and Russia);
  - the prepayment of the tax on the reserve for employee termination indemnities (Lire 220,344 million) required under Law No. 662 of December 23, 1996 and subsequent amendments, revalued as required by law;
  - the outstanding amount (Lire 211 million) of low-rate loans granted to personnel of the other Italian companies of the Telecom Italia Group in connection with the Initial Public Offering (IPO) of ordinary Telecom Italia shares.

Treasury stock — Lire 1,280,571 million

At December 31, 2000, the Company had a total of No. 104,978,070 treasury savings shares, with a par value of Lire 1,000 each, equal to 1.41% of share capital. The buy-backs were made following the tender offer to purchase during the period February 17, 2000 to March 17, 2000 (No. 1,793,820 shares) and later buy-backs (No. 103,184,250 shares) as voted by the ordinary stockholders' meeting of January 14, 2000. A specific reserve was set up under stockholders' equity for this purpose.

As required by Article 2358 of the Italian Civil Code, we report that the amount of the available reserves recorded in the financial statements at December 31, 2000 is sufficient to cover the outstanding balance of the loans made to employees of Telecom Italia and Telecom Italia Group companies for the purchase of ordinary Telecom Italia shares in connection with the Initial Public Offering under Decree of August 8, 1997 by the President of the Council of Ministers.
As required under Article 2427, Section 6 of the Italian Civil Code, Annex 12 sets forth a breakdown of loans under long-term investments by maturity within and beyond five years.

As required by Article 10 of Law No. 72/1983 the table below sets forth a breakdown of upward adjustments by type of assets held by the Company.

1980

(in millions of lire)						Fixed assets	Other assets	
Description							Investments	
	Land and buildings	Plant and machinery	Manufacturing and distribution equipment	Other assets	Construction in progress and advances to suppliers	Total	Subsidiaries	Affiliates

Current assets

Inventories ***Lire 149,388 million***

(Lire 233,028 million at December 31, 1999)

These decreased by Lire 83,640 million compared to December 31, 1999 and include the following:

Contract work in process *Lire 69,533 million*

This item, which increased by Lire 15,553 million compared to December 31, 1999, represents the value of the work being performed on behalf of third parties at December 31, 2000.

Merchandise *Lire 79,855 million*

Merchandise decreased by Lire 99,193 million compared to December 31, 1999 owing to both higher consumption of goods held for sale and used for maintenance (telephone products and materials) and improvements in the management of merchandise inventories.

1981

Accounts receivable ***Lire 17,657,120 million***

(Lire 15,401,138 million at December 31, 1999)

Accounts receivable increased by Lire 2,255,982 million compared to December 31, 1999. A breakdown and the changes that occurred during the year are given in the table below:

	12/31/1999	Changes during the year			12/31/2000
(in millions of lire)		Utilizations	Provisions	Change	
Trade accounts receivable	10,136,833			(1,165,424)	8,971,409
• allowance for doubtful accounts	(728,000)	406,490	(332,490)	74,000	(654,000)
Total trade accounts receivable	9,408,833			(1,091,424)	8,317,409
Accounts receivable from					
subsidiaries	4,489,011			745,660	5,234,671
of which financial receivables	2,083,785			(26,660)	2,057,125
Accounts receivable from					
affiliated companies	405,401			62,418	467,819
of which financial receivables	64,789			56,282	121,071
Accounts receivable from					
parent companies	2,484			(145)	2,339
Other receivables	1,095,409			2,539,473	3,634,882
• Government and					
other public entities					
for grants and subsidies	250			2,200	2,450
• deferred tax assets	345,483			594,006	939,489
• other receivables	749,676			1,943,267	2,692,943
Total	15,401,138			2,255,982	17,657,120

Trade accounts receivable *Lire 8,317,409 million*

Trade accounts receivable decreased by Lire 1,091,424 million, compared to December 31, 1999, owing to the assignment of receivables without recourse, not due on December 31, 2000, to factoring companies (Lire 399,895 million, with a loss of Lire 5,204 million). Trade accounts receivable are shown net of the allowance for doubtful accounts (Lire 654,000 million, of which Lire 332,490 million were provided during the year). The latter decreased by Lire 74,000 million compared to December 31, 1999 (Lire 728,000 million), mainly due to a reduction in the amount of doubtful receivables. Trade accounts receivable include Lire 1,382,473 million of receivables from other operators (Lire 751,227 million from fixed telecommunications carriers, Lire 57,637 million from mobile telecommunications operators and Lire 502,209 million from foreign correspondents).

1982

Accounts receivable from subsidiaries *Lire 5,234,671 million*

Accounts receivable from subsidiaries increased by Lire 745,660 million, compared to December 31, 1999, and include trade, financial and other receivables. The financial receivables reflect current account transactions carried out at market rates for cash management purposes and short-term loans granted to the companies; such receivables can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial receivables from		
Subsidiaries:		
Aspasiel	1,682	1,606

1983

Trade receivables, amounting to Lire 1,177,895 million, are mostly due from TIM (Lire 298,934 million), Telespazio (Lire 209,145 million), Seat Pagine Gialle (Lire 184,692 million), Stet International Netherlands (Lire 76,036 million) and Telesoft (Lire 56,192 million).
Other receivables, amounting to Lire 1,999,651 million, primarily represent accrued dividends from subsidiaries (Lire 1,862,344 million) and other receivables connected with the Group's VAT settlement system.

Accounts receivable from affiliated companies *Lire 467,819 million*

Accounts receivable from affiliated companies increased by Lire 62,418 million compared to December 31, 1999. Receivables include trade, financial and other receivables. The financial receivables reflect current account transactions carried out at market rates for cash management purposes and short-term loans; such receivables can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial receivables from		
Affiliated companies:		
Astelit	344	344
Datasiel	110	=
Esri Italia	4,497	7,121
Excite Italia BV	9,846	989
Lares Tecno	=	34
Sispi	4	12
Stream	106,270	56,270
Consorzio Telcal	=	19
Total	121,071	64,789

Trade receivables, amounting to Lire 346,403 million, are mostly due from Retevision (Lire 88,164 million), Telecom Argentina (Lire 57,321 million) and Golden Lines (Lire 48,883 million); other receivables total Lire 345 million.

Accounts receivable from parent companies *Lire 2,339 million*

Accounts receivable from parent companies refer to the amounts due from the parent company Olivetti, of which Lire 2,205 million refers to trade receivables.

Other receivables *Lire 3,634,882 million*

Government and other public entities for grants and subsidies Lire 2,450 million
These consist of the receivable from the Ministry of Industry, Commerce and Handicrafts for grants to defray the costs incurred for the realization of the telecommunications installations in Southern Italy.

Deferred tax assets Lire 939,489 million
These are shown net of the reserve for deferred taxes (Lire 1,111,127 million). The main items which gave rise to deferred tax assets are the writedown of receivables and software and the reserve for risks; those which generated deferred tax liabilities are gains and

1984

capital grants. Both the reserve for "deferred tax liabilities" and "deferred tax assets" include tax credits on dividends accrued.
At December 31, 2000, about Lire 435,000 million of deferred tax assets have not been recorded since future recovery is not reasonably assured.

The balance of deferred tax assets and liabilities is made up as follows:

	Due at December 31, 2000				Due at December 31, 1999			
	Within 1 year	From 2 to 5 years	Beyond 5 years	Total	Within 1 year	From 2 to 5 years	Beyond 5 years	Total
Deferred tax assets	1,766,937	283,679	=	2,050,616	1,373,688	541,039	40,120	1,954,847
Reserve for deferred taxes	(1,097,710)	(13,417)	=	(1,111,127)	(1,185,878)	(383,366)	(40,120)	(1,609,364)
Net balance	669,227	270,262	=	939,489	187,810	157,673	=	345,483

The increase in net deferred tax assets at December 31, 2000 is mainly due to lower deferred tax liabilities following the reclassification of the "Reserve for accelerated depreciation", pursuant to art. 14 of Law No. 342/2000.

Other receivables — Lire 2,692,943 million

These increased by Lire 1,943,267 million compared to December 31, 1999 and can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
• receivables from Tax Administration	83,196	46,079
• receivables relating to personnel	156,581	142,600
• transaction for the loan of securities	1,679,977	=
• amounts paid by customers and in transit with the banking and postal banking system	278,140	340,064
• other items	495,049	220,933
Total	2,692,943	749,676

The contra-entry to the transaction for the loan of securities described under "Investments" can be found in "Other liabilities".

1985

Short-term financial assets ***Lire 642,608 million***
(Lire 119,207 million at December 31, 1999)

These increased by Lire 523,401 million compared to December 31, 1999 and the composition and changes during the year are shown in the following table:

	12/31/1999	Changes during the year				12/31/2000
(in millions of lire)		Acquisition	Sales/ Reimburse-ments	Writedowns/ Reinstate-ments	Total	
Equity investments in subsidiaries	108,813	1,119,153	(428,654)	(166,670)	523,829	632,642
Equity investments in affiliated companies	=	139,199	(139,199)	=	=	=
Other equity investments	10,394	76,511	(23,224)	(53,715)	(428)	9,966
Other securities	=	156,308	(156,308)	=	=	=
Total	119,207	1,491,171	(747,385)	(220,385)	523,401	642,608

These refer to listed shares acquired both in trading transactions and in the form of dividends "in kind" distributed by some venture capital companies (Accel, Media Technology Venture).

The net gains realized on the sales of shares in subsidiaries and other companies, totaling Lire 63,723 million, refer mainly to TIM (Lire 47,946 million); the losses, on the other hand, amount to Lire 746 million and refer to Sirti (Lire 424 million) and Agil Software (Lire 322 million).
Further details are given in Annex 11.

Liquid assets ***Lire 210,952 million***
(Lire 140,452 million at December 31, 1999)

Liquid assets increased by Lire 70,500 million compared to December 31, 1999 and include the following:

(in millions of lire)	12/31/2000	12/31/1999
Bank and postal accounts	210,320	139,521
Checks	9	1
Cash and valuables on hand	623	930
Total	210,952	140,452

1986

Accrued income and prepaid expenses ***Lire 1,634,353 million***
(Lire 49,479 million at December 31, 1999)

These increased by Lire 1,584,874 million compared to December 31, 1999 and include the following:

(in millions of lire)	12/31/2000	12/31/1999
Issue discounts and similar charges	2,411	3,584
Accrued income		
• financial income	33,737	30,506
	33,737	30,506
Other prepaid expenses		
• production costs	104,644	15,183
• financial expenses	39,623	206
• other	1,453,938	=
	1,598,205	15,389
Accrued income and other prepaid expenses	1,631,942	45,895
Total	1,634,353	49,479

Issue discounts and similar charges *Lire 2,411 million*

These decreased by Lire 1,173 million compared to December 31, 1999 due to the amounts charged to the statement of income for the portion attributable to the current year.
Issue discounts and similar charges are made up by the expenses incurred to obtain loans.

Accrued income and other prepaid expenses *Lire 1,631,942 million*

These increased by Lire 1,586,047 million compared to December 31, 1999.
Accrued income includes the interest expense (Lire 12,301 million) subsidized until 1991 by the government under Law No. 67/1988, equivalent to three percentage points of the cost of the loans which replaced those assigned to the Company through Cassa Depositi e Prestiti under Law No. 887/1984.
Prepaid expenses are mainly related to building rents (Lire 95,427 million), financial expenses (Lire 39,623 million) pertaining to amounts already accrued or paid, but attributable to future years, expenses relating to the deferral of the put option on the Seat shares (Lire 1,453,938 million), to which reference should be made to "Purchases and sales commitments" in the memorandum accounts.

A breakdown of receivables and accrued income by maturity and type is given in Annex 12.

1987

LIABILITIES AND STOCKHOLDERS' EQUITY

Stockholders' equity ***Lire 36,235,335 million***

(Lire 35,577,763 million at December 31, 1999)

The table below shows the changes that occurred during the year:

	12/31/1999	Change during the year				12/31/2000
(in millions of lire)		Appropriation of 1999 net income	Other changes	Net income	Total

Total stockholders' equity	35,577,763	=	(4,296,690)	4,954,262	657,572	36,235,335

Share capital *Lire 7,426,157 million*

Share capital has remained unchanged compared to December 31, 1999 and consists of 5,260,037,131 ordinary shares and 2,166,120,095 savings shares of par value Lire 1,000 each.

Reserve for inflation adjustments under Law No. 72 of 3/19/1983 *Lire 4,805,244 million*

This reserve decreased by Lire 481 million compared to December 31, 1999, following the partial spin-off of No. 3,348,922 Tin.it ordinary shares by Telecom Italia to Seat Pagine Gialle, as voted by the extraordinary stockholders' meeting on August 10, 2000.

Reserve for inflation adjustments under Law No. 413 of 12/30/1991 *Lire 908,003 million*

This reserve decreased by Lire 90 million compared to December 31, 1999, due to the aforementioned partial spin-off to Seat Pagine Gialle.

1988

Reserve for treasury stock *Lire 1,280,571 million*

This reserve has been set up in respect of the tender offer for treasury savings shares and subsequent buy-backs, to which reference should be made under the specific caption in assets. The amount was transferred from the "special reserve".

Reserve for accelerated depreciation =

This reserve shows a nil balance due to the following:
- increase as a result of the appropriation of 1999 profit (Lire 298,828 million);
- reclassification of Lire 1,720,299 million to the recently formed "Reserve Law No. 342 of November 21, 2000, art. 14, to which reference should be made;
- reclassification of Lire 66,323 million to the "special reserve" for fixed assets disposed of or retired during 2000.

Reserve Law No. 342 of November 21, 2000, art. 14 *Lire 1,720,299 million*

This reserve was set up by reclassifying part of the "Reserve for accelerated depreciation" pertaining to the fixed assets still in use at the end of 2000. Pursuant to the provision under which the new reserve was set up, it became possible to bring the tax deductible costs of these same fixed assets into line with those carried in the financial statements (which do not take into account accelerated depreciation taken only for tax purposes) through the payment of a substitute equalization tax equal to 19% of the reclassified amount. Tax treatment of this reserve is regulated by DM No. 162 of April 13, 2001, art. 10.

Special reserve *Lire 2,407,507 million*

The special reserve shows a decrease of Lire 1,220,299 million compared to December 31, 1999. The reduction represents the difference between the reclassification from the "Reserve for accelerated depreciation", the transfers to the "Reserve for treasury stock" and the utilization of Lire 6,051 million to round off the special dividend for 1999 to the highest lire, as voted by the ordinary stockholders' meeting of July 3, 2000. In fact, at that date, dividends on the treasury stock held by the Company were uniformly redistributed over all the other shares.

Reserve for capital grants *Lire 884,134 million*

The reserve for capital grants increased by Lire 31,221 million compared to December 31, 1999. The increase represents the difference between the transfer of a portion of the capital grants received up to December 31, 1992, equal to Lire 31,306 million, which became available during 2000 as a result of the depreciation of the assets to which the grants refer and the transfer of Lire 85 million following the partial spin-off in favor of Seat Pagine Gialle.

Other reserves *Lire 7,343,451 million*

Other reserves increased by Lire 177,728 million, compared to December 31, 1999, due to the surplus arising the total spin-off of Stet International through the transfer of all the

1989

assets and liabilities to the beneficiary companies Telecom Italia and TIM, as voted by the extraordinary stockholders' meeting of October 20, 2000; the amount (Lire 181,457 million), in fact, derives from the difference between the accounting value of the assets and liabilities transferred to Telecom Italia and the cancellation of the investment in Stet International. The same amount was partly offset by the effect of the partial spin-off to Seat Pagine Gialle.

Current plans do not include any transactions affecting equity reserves in abeyance of taxes which would be subject to taxation under current laws.

Reserves for risks and charges ***Lire 1,711,092 million***
(Lire 1,242,208 million at December 31, 1999)

These increased by Lire 468,884 million compared to December 31, 1999. The composition and changes in these reserves are described as follows:

	12/31/1999	Changes during the year					12/31/2000
(in millions of lire)		Provisions	Utilizations	Released to income	Reclassification/ Other	Total	
Reserve for taxes	254,498	1,076,796	(1,351,498)	(971)	294,650	18,977	273,475
For taxes	254,498	24,419	(4,471)	(971)	=	18,977	273,475
For deferred taxes	=	1,052,377	(1,347,027)	=	294,650	=	=

Total	1,242,208	1,770,211	(1,532,480)	(971)	232,124	468,884	1,711,092

Reserve for taxes *Lire 273,475 million*

The reserve for taxes increased by Lire 18,977 million compared to December 31, 1999 and entirely refers to income taxes and other duties and taxes.
The reserve for deferred taxes shows a nil balance attributable to the set-off with deferred tax assets.

Other reserves *Lire 1,437,617 million*

These increased by Lire 449,907 million, compared to December 31, 1999 and include the following reserves:

- reserve for litigation (Lire 262,191 million): this includes prudent provisions – charged to various items of the statement of income – for probable expenses in connection with personnel disputes and litigation with third parties which had not yet been settled at the end of the year. The provisions (Lire 17,183 million) are related to litigation with third parties and the utilizations refer to disputes with personnel (Lire 6,641 million), social security institutions (Lire 60 million) and others (Lire 6,105 million);

1990

- reserve for capital grants (Lire 253,347 million): this includes the unavailable portion of capital grants received up to December 31, 1992 recorded herein solely for purposes of taking advantage of the tax benefits. Utilizations during the year (Lire 31,306 million) stem from the transfer to stockholders' equity of the portion of the capital grants which became available;
- reserve for losses of subsidiaries and affiliates (Lire 29,225 million): this includes the provisions to account for the losses in excess of the carrying value of some investments, in particular, Iridium Italia (Lire 8,541 million) and Trainet (Lire 5,594 million). Utilizations of Lire 51,458 million refer almost entirely to the coverage of the losses of the companies Iridium Italia (Lire 20,359 million) and Edotel (Lire 11,629 million);
- reserve for corporate restructuring (Lire 294,523 million): this includes the provision made during the year subsequent to the operating agreements reached in July with the unions concerning cutbacks and layoffs under unemployment compensation plans;
- reserve for contractual risks and other risks (Lire 598,331 million): this mainly includes the provisions recorded in the previous years for risks relating to the former Iraq construction contracts (Lire 120,000 million), as well as those made in 2000 for probable charges stemming from the settlement of trade and sundry positions (Lire 350,464 million), of which Lire 241,500 million are connected to the disposals of the investments and the contribution of the business segment "Grandi Immobili" and Lire 81,807 million for disputes of a regulatory nature. Utilizations (Lire 116,718 million) mainly refer to payments made as a consequence of the definition of the 1999 interconnecting rates by the Regulatory Authority (February 15, 2000).

Reserve for employee termination indemnities ***Lire 1,996,825 million***
(Lire 2,163,171 million at December 31, 1999)

This item decreased by Lire 166,346 million compared to December 31, 1999. The following changes took place in the account:

(in millions of lire)	
Balance at December 31, 1999	**2,163,171**
Changes during the year:	
- Provisions charged to income for amounts to fund employee termination indemnities accrued in favor of employees during the year plus the fixed and variable cost-of-living adjustments required under Law No. 297/1982	332,906
- Utilizations for:	
• Indemnities paid to employees who took retirement or resigned during the year	(346,289)
• Advances under Law No. 297/1982	(31,067)
• Advances under agreements with labor unions regarding layoffs under unemployment compensation plans	(45,484)
- Amounts transferred to/from subsidiaries and other changes	(76,412)
Balance at December 31, 2000	**1,996,825**

1991

Liabilities ***Lire 51,162,196 million***

(Lire 34,457,494 million at December 31, 1999)

A breakdown of liabilities and accrued expenses pursuant to Article 2427, Section 6, of the Italian Civil Code, is given in Annex 13.
Liabilities, which increased by Lire 16,704,702 million compared to December 31, 1999, include the following:

	12/31/2000			12/31/1999		
(in millions of lire)	Financial accounts payable	Trade accounts payable and miscellaneous payables	Total	Financial accounts payable	Trade accounts payable and miscellaneous payables	Total
Debentures	281,642	=	281,642	824,914	=	824,914
Due to banks	24,727,109	=	24,727,109	12,422,073	=	12,422,073
Due to other lenders	1,275,967	=	1,275,967	1,609,805	=	1,609,805
Advances	=	2,281	2,281	=	1,862	1,862
Trade accounts payable	=	5,485,150	5,485,150	=	6,187,988	6,187,988
Accounts payable to subsidiaries	7,739,320	2,267,243	10,006,563	3,343,202	2,835,348	6,178,550
Accounts payable to affiliated companies	260,531	845,552	1,106,183	6,426	369,617	376,043
Accounts payable to parent companies	=	2,529	2,529	=	4,568	4,568
Taxes payable	=	956,726	956,726	=	928,685	928,685
Contributions to pension and social security institutions	=	1,656,923	1,656,923	=	1,709,281	1,709,281
Other liabilities	2,313,161	3,348,062	5,661,223	41,738	4,171,987	4,213,725
Total	36,597,730	14,564,466	51,162,196	18,248,158	16,209,336	34,457,494

Debentures *Lire 281,642 million*

Debentures decreased by Lire 543,272 million compared to December 31, 1999.
They include the 1992/2010 debenture issue, passed by resolution of the extraordinary stockholders' meeting of SIP (then Telecom Italia) on April 30, 1992, reserved for employees in service and retired for a maximum amount of Lire 1,000,000 million. The maximum period of the debentures extends to July 1, 2010, although the Company has the option of redeeming the debentures before maturity, by resolution of the Board of Directors. Outstanding debentures owned by employees total No. 5,632,832, with a face value of Lire 50,000 each.
The semi-annual nominal interest rate is variable (1.69% for the December 31, 2000 coupon) and payment is made on January 1 and July 1 of each year.

Due to banks *Lire 24,727,109 million*

These increased by Lire 12,305,036 million compared to December 31, 1999.
They comprise medium/long-term debt totaling Lire 6,089,197 million (Lire 7,592,885 million at December 31, 1999) – of which Lire 96,000 million is secured by collateral – and short-term borrowings totaling Lire 18,637,912 million (Lire 4,829,188 million at December 31, 1999). Of the latter amount, Lire 6,413,519 million refer to loans taken out to cover temporary liquidity requirements, Lire 11,572,080 million for credit facilities, mainly to finance the purchase of Seat shares from Huit II and through the public offers of purchase and Lire 652,313 million of bank overdrafts.

1992

The changes in medium/long-term debt are as follows (in millions of lire):

– new loans	=
– loan repayments	1,508,372
– increase to adjust debt in foreign currency	4,684

Medium/long-term loans will be repaid under the following loan amortization plans:

Year	(in millions of lire)
2001	1,074,487
2002	1,584,027
2003	2,204,341
2004	723,097
2005	349,895
2006 and after	153,350
Total	6,089,197

Corresponding nominal interest rates at December 31, 2000 are shown below:

	(in millions of lire)
Up to 2.5%	1,154,034
From 2.5% to 5%	3,443,325
From 5% to 7.5%	938,124
From 7.5% to 10%	553,714
Total	6,089,197

The largest amount of gross debt falls within the range of rates up to 5% and includes loans made by various institutions to replace those by Cassa Depositi e Prestiti (pursuant to Law No. 887/1984), with 3% interest subsidies paid by the Treasury Ministry (pursuant to Law No. 67/1988), plus part of the loans made with EIB funds.
Foreign currency loans amount to Lire 1,946,291 million (Lire 1,395,645 million at December 31, 1999) and are detailed in the following table:

	Currency (in millions)		Millions of lire	
	12/31/2000	12/31/1999	12/31/2000	12/31/1999
USD	420	150	950,382	288,240
Euro-zone currencies	120	167	231,565	322,914
GBP	252	258	755,590	774,632
JPY	880	992	8,754	9,859
Total			1,946,291	1,395,645

At December 31, 2000, unused credit lines total Lire 10,377,094 million.

Due to other lenders *Lire 1,275,967 million*

These decreased by Lire 333,838 million compared to December 31, 1999.

1993

They consist of medium/long-term loans mainly made by Cassa Depositi e Prestiti (Lire 888,023 million) and amounts due to Iri (Lire 384,522 million).
Such medium/long-term loans will be repaid as follows:

Year	(in millions of lire)
2001	398,389
2002	261,326
2003	198,094
2004	140,765
2005	74,560
2006 and after	202,833
Total	1,275,967

Corresponding nominal interest rates at December 31, 2000 are shown below:

	(in millions of lire)
Up to 2.5%	3,422
From 5% to 7.5%	974,159
From 7.5% to 10%	298,386
Total	1,275,967

Trade accounts payable *Lire 5,485,150 million*

These decreased by Lire 702,838 million compared to December 31, 1999, mainly as a result of lower investments in installations, and include amounts assigned by some suppliers to credit institutions, factoring companies, etc.. They also comprise payables to other TLC carriers amounting to Lire 1,119,070 million, of which Lire 428,601 million are due to foreign correspondents, Lire 311,587 million to wireline telecommunications carriers and Lire 378,882 million to mobile telecommunications operators.

1994

Accounts payable to subsidiaries *Lire 10,006,563 million*

These increased by Lire 3,828,013 million compared to December 31, 1999.
They consist of financial payables, trade accounts payable and other payables. Financial payables (Lire 7,739,320 million) refer to current account transactions negotiated at market rates for cash management purposes and can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial payables to subsidiaries		
Atesia	18,989	2,556

Total	7,739,320	3,343,202

Trade accounts payable (Lire 2,133,672 million) mainly refer to payables to TIM (Lire 782,629 million), Telesoft (Lire 549,908 million), Telespazio (Lire 154,923 million) and TMI - Telemedia International Italia (Lire 137,245 million).
Other payables (Lire 133,571 million) primarily refer to capital contributions paid to the company Path.Net (Lire 34,997 million) and amounts owed in connection with the Group's VAT settlement system.

1995

Accounts payable to affiliated companies *Lire 1,106,083 million*

These increased by Lire 730,040 million, compared to December 31, 1999.
They refer to financial payables, trade accounts payable and other payables. Financial payables (Lire 260,531 million) refer to current account transactions negotiated at market rates for cash management purposes and can be analyzed as follows:

(in millions of lire)	12/31/2000	12/31/1999
Financial payables to affiliated companies		
Consorzio Telcal	30	=
IM.SER	156,259	=

Total	260,531	6,426

Trade accounts payable (Lire 1,149,397 million) mainly refer to payables to Italtel (Lire 515,745 million).
Other payables (Lire 10,680 million) refer to the liability for capital contributions, mainly Fintech (Lire 10,500 million).

Accounts payable to parent companies *Lire 2,529 million*

These refer to trade accounts payable to the parent company Olivetti.

Taxes payable *Lire 956,726 million*

These increased by Lire 28,041 million, compared to December 31, 1999 and mainly refer to:

- the payable to the Italian Treasury for withholding taxes of Lire 158,926 million (Lire 167,312 million at December 31, 1999);
- the VAT liability totaling Lire 377,980 million (Lire 288,067 million at December 31, 1999);
- the income tax liability for the year, net of advances paid and dividend tax credits, of Lire 343,630 million (Lire 455,764 million at December 31, 1999). The decrease compared to the prior year is attributable to the reduction in current income taxes and higher advances paid during 2000. The liability at December 31, 2000 includes the taxes due on the portion of income which could possibly be set aside in the "Reserve for accelerated depreciation" when the financial statements are approved by the stockholders' meeting; in this case, these same taxes will be reclassified to the "Reserve for deferred taxes".

1996

Contributions to pension and social security institutions *Lire 1,656,923 million*

These decreased by Lire 52,358 million compared to December 31, 1999 and include amounts owed to social security and health institutions with regard to personnel. These specifically include Lire 1,366,403 million payable to INPS for charges, pursuant to Law No. 58/92 (see related accounting policy) and relating to the merged company Iritel, estimated by the special Ministerial Commission in relation to the valuation of assets contributed to Iritel by the Post and Telecommunications Administration.

Other liabilities *Lire 5,661,223 million*

These increased by Lire 1,447,498 million compared to December 31, 1999.
They include, in particular, liabilities for the:

- payable to customers totaling Lire 2,032,136 million (Lire 2,363,402 million at December 31, 1999), including deposits by subscribers against telephone conversations, pre-billed basic charges (essentially monthly charges for January and February 2001) and the unused portions of prepaid magnetic telephone cards;
- payable to employees amounting to Lire 1,207,581 million (Lire 732,295 million at December 31, 1999) for 2000 payrolls paid in 2001;
- payable for the TLC license fee totaling Lire 637,741 million (Lire 803,056 million at December 31,1999);
- transactions for the loan of Seat Pagine Gialle ordinary and savings shares (Lire 1,679,977 million); these transactions are described under "Investments" in long-term investments, with a contra-entry to "Other receivables".

Accrued expenses and deferred income ***Lire 989,699 million***
(Lire 926,229 million at December 31, 1999)

These increased by Lire 63,470 million compared to December 31, 1999 and include the following:

(in millions of lire)	12/31/2000	12/31/1999
Accrued expenses		
• production costs	5,410	6,232
• financial expense	202,265	141,443
	207,675	147,675
Deferred income		
• capital grants (unavailable portion)	283,763	329,049
• production value	492,003	443,911
• financial income	6,258	5,594
	782,024	778,554
Total	989,699	926,229

Accrued expenses particularly refer to leasing installments (Lire 5,334 million) and financial items (Lire 202,265 million). Deferred income mainly includes pre-billed basic charges and rentals of telephone equipment (Lire 283,940 million), the unavailable portion of capital grants received after December 31, 1992, and financial items mainly connected to loans to employees.

1997

MEMORANDUM ACCOUNTS

Memorandum accounts totaled Lire 15,419,809 million and can be analyzed as follows:

Guarantees provided ***Lire 8,635,255 million***

Guarantees provided consist of sureties, including Lire 5,444,146 million on behalf of subsidiaries – mainly on financial transactions and debentures issued by Softe, other medium/long-term financial transactions and supply contracts – and Lire 4,279,847 million on behalf of affiliated companies and others in connection with medium/long-term financial transactions, supply contracts and guarantees on bids to acquire mobile licenses abroad.
The sureties are net of counter-guarantees received by Telecom Italia (Lire 1,088,738 million).

Purchases and sales commitments ***Lire 6,767,141 million***

This item consists almost entirely of purchases commitments (Lire 6,718,734 million) and the commitments regarding the sale of call options on the listed securities in portfolio (Lire 48,407 million).
In particular, the purchases commitments refer to the put option on the Seat Pagine Gialle shares already held by Huit II (Lire 5,780,278 million), described below, future lease installments plus the buyout amounts of the assets leased (Lire 857,472 million), the five-year commitment for the Lire 60,000 million contribution to the "Interaction Design Institute" association of Ivrea.

Put option on Seat shares

Under the contract stipulated on March 15, 2000 (as subsequently amended and integrated), Telecom Italia gave Huit II a put option with on No. 710,777,200 Seat Pagine Gialle shares at a strike price of Euros 4.2. The contract provided for the exercise of such option after the deed of merger between Seat and Tin.it was recorded in the Companies Register.
Huit II later transferred the put option to Chase Equity Limited (CEL), together with the ownership of the corresponding Seat shares. On December 4, 2000, CEL renegotiated the contract with Telecom Italia, extending the period to five years, with the possibility of an early exercise of the option in April and May 2003, 2004 and 2005. The time extension made it possible to defer the financial impact.
Stet International Netherlands then purchased from CEL, through the Liberator Ltd. trust, a call option on No. 660,777,200 Seat shares with the same expiry date and strike price as the put option, paying a total premium of Euros 747,016,226 (Lire 1,446,425 million). For the purpose of transferring the effects of this latter transaction to Telecom Italia, a call option was stipulated, with the same features, between Telecom Italia and Stet International Netherlands. The implicit rate of interest was 6.2%.
At December 31, 2000, the market price of Seat ordinary shares is significantly lower than the strike price; Telecom Italia, however, intends to record the equivalent value of these same shares in "Investments" under long-term investments at the conclusion of the above transactions.

1998

Other memorandum accounts ***Lire 17,413 million***

These mainly refer to assets of third parties on loan, on deposit for safekeeping or for similar purposes (Lire 12,978 million), the licensing agreement (Lire 2,397 million) for the Great Jubilee 2000, equal to the minimum guaranteed amount not yet been covered by the marketing of telephone cards which bear a "Joint Logo" with the Great Jubilee 2000 Committee which ended in January 2001.

* * *

The Company issued weak letters of patronage totaling Lire 2,350,823 million chiefly on behalf of subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements.
Assets of third parties on loan, on deposit for safekeeping or for similar purposes amounted to Lire 619,845 million and consist mainly of equipment leased to customers.
Guarantees provided by others for Company obligations, which consist primarily of sureties to guarantee the performance of non-financial contractual obligations, totaled Lire 521,493 million.
The stock of employees and private stockholders deposited at December 31, 2000 with Telecom Italia, and hence subdeposited with Monte Titoli S.p.A., equal Lire 419,156 million.
The bonds set aside for subscription by employees are equal to Lire 718,358 million.
In accordance with Article 2503 of the Italian Civil Law, two deposits has been constituted at Mediobanca, in order to allow an early draw up of the partial demerger of Telecom Italia in favour of Seat Pagine Gialle and of the full demerger of Stet International in favour of Telecom Italia and TIM. A pool of banks has guaranteed the cash necessary for the deposits; the amounts are equal to Lire 3,917,459 million and Lire 2,752,976 million, respectively, and the maturities are January 4, 2001 and January 24, 2001, respectively.

Financial derivatives

Derivatives refer to cross currency and interest rate swaps (to convert pound sterling loans into euros) and interest rate swaps (to convert variable rate loans into fixed rate loans and convert debt linked to domestic parameters to the 6-month Euribor rate).
The following table gives a description of the financial derivative contracts outstanding at December 31, 2000 to hedge to medium/long-term debt positions.

(in billions of lire)	Notional amount/ Capital exchanged at 12/31/2000	Market value of derivatives at 12/31/2000 (a)	Market value of underlying debt positions at 12/31/2000 (b)	Market value of debt including related derivatives at 12/31/2000 (c = b – a)
Interest rate swap	3,287	38	3,280	3,242
Cross currency and interest rate swaps	756	37	784	747

1999

In particular, the market value of interest rate swaps and cross currency and interest rate swaps reflects the difference between the fixed rate paid by the Company and the market interest rate for maturities having the same remaining life as the swaps. The cross currency and interest rate swaps also reflect the difference between the forward euro/pound sterling exchange rate at the closing of the swap and the same market rate at December 31, 2000.
To determine the market value of the above financial derivatives, the Company uses adequate pricing models.

The following table indicates the notional amount and the average interest rate to be paid/received by maturity for interest rate swaps.

	Maturity					
	2001	2002	2003	2004	2005	2006
Interest rate swap

Derivative contracts (interest rate swaps) stipulated to hedge interest rate exposure on short-term loans are equal to Lire 69,073 million.

2000

STATEMENTS OF INCOME

Production value ***Lire 34,386,209 million***
(Lire 36,616,775 million in 1999)

Production value, which decreased by Lire 2,230,566 million compared to 1999, includes the following:

Sales and service revenues *Lire 33,723,158 million*

Sales and service revenues decreased by Lire 2,133,006 million (-5.9%) compared to 1999. A breakdown of sales and service revenues by type of business and geographical region, as required under Article 2427, Section 10 of the Italian Civil Code, is given below:

Breakdown of "sales and service revenues" by type of business

(in millions of lire)	2000	1999	Change
Sales:			
- telephone products	677,454	1,008,453	(330,999)
- other goods	9,902	12,132	(2,230)
	687,356	1,020,585	(333,229)
Services:			
- Traffic (*)	18,333,337	21,288,013	(2,954,676)
- Basic charges (of which):	12,947,021	11,784,632	1,162,389
• lines leased to TLC operators	1,577,436	1,246,483	330,953
- Activation fees	461,831	419,343	42,488
- Consulting and co-ordination fees	307,163	240,617	66,546
- Miscellaneous services and other revenues	986,450	1,102,974	(116,524)
	33,035,802	34,835,579	(1,799,777)
Total	33,723,158	35,856,164	(2,133,006)

(*) of which:

(in millions of lire)	2000	1999	Change
• Traffic by Telecom Italia customers:			
- domestic	13,173,538	16,178,677	(3,005,139)
- outgoing non-domestic	1,361,357	1,637,120	(275,763)
- special services and other	860,846	1,055,161	(194,315)
	15,395,741	18,870,958	(3,475,217)
• Traffic by other operators			
- domestic	1,555,566	1,036,136	519,430

	2,937,596	2,417,055	520,541

2001

Breakdown of "sales and service revenues" by geographical region

(in millions of lire)	International revenues (incoming services)	Italian revenues (outgoing services)	Total
EUROPE	840,253	1,120,175	1,960,428
OTHER AREAS	549,271	768,316	1,317,587
	1,389,524	1,888,491	3,278,015
ITALY			30,445,143
Total			33,723,158

Note that, as stated in the summary of accounting policies, revenues are shown gross of Lire 6,098,813 million due to other carriers (Lire 6,320,978 million in 1999).

• Sales revenues Lire 687,356 million

Sales revenues, which decreased by Lire 333,229 million (-32.7%) compared to 1999, mainly derive from the sales of telephone and telematic products (special internal installations, facsimile machines, data transmission equipment and accessories). The reduction is attributable to the fact that in the second half of 2000, for some customers, the Company only plans the telecommunications systems, leaving manufacturers with the responsibility for the direct sale of the equipment.

• Service revenues Lire 33,035,802 million

Service revenues, which decreased by Lire 1,799,777 million (-5.2%) compared to 1999, are mostly composed of "traffic revenues" and are shown gross of the amount due to other carriers. Service revenues fell primarily as a result of a decrease in traffic in terms of amount (-13.9%), notwithstanding the increase of 27.3% in terms of minutes (+Lire 2,272,904 million in terms of revenues); the average return on traffic, in fact, was Lire 71 per minute compared to Lire 111 in the prior year (-35.8% or -Lire 5,005,454 million in terms of revenues). Service revenues were negatively affected by the reduction, beginning August 1, 1999, in long-distance and international rates, the discount policies aimed at customer retention, the effect of replacing out-of-district rates with the less remunerative online rates and the application of new interconnecting rates for traffic to and from mobile phones. These phenomena were partly compensated by the increase in basic subscription charges (+9.9%) following the August 1, 2000 rate changes, the development of data connections and the growing demand for interconnecting services with the Telecom Italia network by other operators.
The reduction in revenues was also affected, for Lire 211,866 million, by the contribution to Tin.it of the businesses for placing advertising and selling the official "White Pages" telephony directory, as part of the Seat - Tin.it merger.

Changes in inventory of contract work in process *Lire 15,553 million*

Changes in inventory of contract work in process represent the difference between the increase in work in progress and the decrease as a result of completed contracts.

Increases in capitalized internal construction costs *Lire 22,006 million*

Increases in capitalized internal construction costs decreased by Lire 4,465 million (-16.9%) compared to 1999.
This item includes only capitalized personnel costs.

2002

Other revenues and income *Lire 625,492 million*

Other revenues and income, which decreased by Lire 128,863 million (-17.1%) compared to 1999, include the following:

Operating grants Lire 1,010 million

Operating grants decreased by Lire 1,627 million compared to 1999 and refer to grants made by the European Community to cover the costs of personnel training programs and the introduction of technological innovation.

Other Lire 624,482 million

Such item, which decreased by Lire 127,236 million compared to 1999, also includes revenues from services provided to Group companies (mainly TIM) under special contracts. A breakdown of this item is given below:

(in millions of lire)	2000	1999	Change
• Gains on disposal of production assets	3,155	29,202	(26,047)
• Refunds for costs of employees on loan, mainly at Group companies	60,616	72,348	(11,732)
• Refunds for damage by outsiders and customers	30,764	30,915	(151)
• Income from real estate investments	21,370	15,745	5,625
• Capital grants recorded in income	78,504	74,879	3,625
• Revenues from outsourcing services provided to Group companies	68,135	77,074	(8,939)
• Late payment fees	149,344	227,382	(78,038)
• Indemnification, reimbursements and recoveries and other miscellaneous income	212,594	224,173	(11,579)
Total	624,482	751,718	(127,236)

Production cost ***Lire 27,425,577 million***

(Lire 29,521,186 million in 1999)

Production cost, which decreased by Lire 2,095,609 million compared to 1999, includes the items below:

Raw materials, supplies and merchandise *Lire 783,387 million*

These decreased by Lire 390,781 million (-33.3%) compared to 1999 mainly due to lower costs of sale for products (-Lire 253,025 million) since, beginning from the second half of 2000, as mentioned under the comments for "sales revenues", for some customers, the Company only plans the telecommunications systems, leaving manufacturers with the costs of supplying the equipment.

This item refers mainly to the expenses for the sales of telecommunications products and systems, supplies of materials and other goods purchased for operating purposes.

2003

Services *Lire 11,028,534 million*

Service expenses, which decreased by Lire 542,792 million (-4.7%) compared to 1999, mainly include the operating costs for the TLC network, buildings and information systems, operating costs, as well as costs pertaining to training, studies and research and technical consulting services. Services include the following:

(in millions of lire)	2000	1999	Change
Direct service costs	1,399,847	1,570,113	(170,266)
Operating costs	2,041,786	2,312,225	(270,439)
Marketing costs	1,220,892	1,047,637	173,255
Know-how development costs	267,196	320,373	(53,177)
Amounts due to other carriers	6,098,813	6,320,978	(222,165)
Total	11,028,534	11,571,326	(542,792)

An analysis of the composition of such costs is as follows:

a) "direct service costs" include the operating and maintenance costs of the TLC network, public telephone installations and terminals leased to customers. In particular, in 2000, the interconnecting costs to the other operators' networks increased by Lire 35,096 million compared to 1999;

b) "operating costs" refer to the operating and maintenance costs of buildings, vehicles, information systems and equipment, as well as general expenses. Operating costs include Lire 26,465 million to update the information systems to ensure *carrier preselection* and *number portability*;

c) "marketing costs" include selling expenses, post-sales assistance, customer relations, advertising and promotion; in particular, such costs include Lire 473,274 million (Lire 361,129 million in 1999) for "institutional" advertising campaigns, individual product and service advertising and promotional expenses and Lire 113,257 million for the trade agreements with Internet Service Providers. The costs connected with the printing and delivery of the White Pages telephone directories, contributed to Tin.it as part of the Seat – Tin.it merger, decreased by Lire 130,382 million;

d) "know-how development costs" are made up by costs pertaining to training, studies and research and consulting services;

e) "amounts due to other carriers" include, amongst other items, Lire 4,071,448 million due to Italian mobile carriers, Lire 510,993 million to domestic fixed carriers, Lire 1,216,825 million to foreign correspondents and Lire 299,547 million to the service providers Audiotel and Videotel.

Use of property not owned *Lire 875,363 million*

Use of property not owned, which increased by Lire 22,725 million (+2.7%) compared to 1999, includes mainly service costs (for the lease of TLC lines and satellite systems), amounting to Lire 526,503 million, and operating costs (for building rentals, building and vehicle leases and equipment rentals), amounting to Lire 345,714 million. As regards lease installments, principal and interest total, respectively, Lire 39,261 million and Lire 31,217 million.

2004

Personnel *Lire 5,980,292 million*

Personnel costs show a decrease of Lire 198,406 million (-3.2%) compared to 1999, due to the contrasting effects created, on the one hand, by the reduction in the average number of employees (as set forth in the table below), also on account of the resignations, concentrated in the last quarter, as a result of the employee cutbacks under Law No. 223/1991 covered by the agreements reached with the labor unions in July 2000, and, on the other hand, by the increases due to the collective bargaining agreements, career developments, the policy of merit bonuses and seniority increases.
Personnel costs include costs for employees on loan to other Group companies (Lire 60,616 million in 2000 and Lire 72,348 million in 1999). The recovery of such costs is recorded under "*other revenues and income*".
A comparative breakdown of the average number of employees by professional category is given below:

(in millions of lire)	2000	1999	Change
Executives	1,084	1,113	(29)
Middle management	4,978	5,105	(127)
Clerical staff	55,214	58,318	(3,104)
Technicians	11,660	12,648	(988)
Total	72,936	77,184	(4,248)

Amortization, depreciation and writedowns *Lire 7,570,843 million*

Amortization, depreciation and writedowns, which decreased by Lire 736,739 million (-8.9%) compared to 1999, include the following:

Amortization of intangible assets Lire 1,161,934 million
Amortization of intangible assets shows a decrease of Lire 91,281 million, compared to 1999, owing to lower investments in software that went into use during the year.

The amortization charge refers to the following assets:

(in millions of lire)	2000		1999		Change	
• Start-up and expansion costs		1,020		=		1,020
• Industrial patents and intellectual property rights		1,024,340		1,128,436		(104,096)
• Concessions, licenses, trademarks and similar rights		23,535		23,630		(95)
• Goodwill		1,268		3,800		(2,532)
• Other intangibles:						
leasehold improvements	69,439		66,058		3,381	
exclusive rights to the Great Jubilee 2000 and other intangibles	42,332	111,771	31,291	97,349	11,041	14,422
Total		1,161,934		1,253,215		(91,281)

Depreciation of fixed assets Lire 6,038,791 million
Depreciation of fixed assets shows a decrease of Lire 474,242 million (-7.3%), compared to 1999; the decrease reflects the reduction in the amount of depreciable assets, the change

2005

in the mix of depreciable assets, lower depreciation on the public telephony installations and the *DECT* fixed assets written down in the 1999 financial statements and the adjustment of depreciation rates relating to the submarine network which led to a lower depreciation charge of Lire 46,882 million.

The average depreciation rate, calculated by taking into account the above depreciation rate and the assets being depreciated, is equal to 8.5% (8.6% in 1999).
The depreciation charge is calculated using the following average rates:

Land and building	3.3%
Plant and machinery	9.1%
Manufacturing and distribution equipment	25.0%
Other fixed assets	29.8%

The total depreciation charge is calculated for all asset categories using the rates indicated in the Ministry of Finance Decrees of October 29, 1974 (for assets purchased up to 1988) and December 31, 1988 (for assets purchased thereafter). To the extend of depreciation rates, accelerated depreciation is also calculated in accordance with Article 67, Section 3, of Presidential Decree No. 917/1986. An analysis of the depreciation charge is shown below (in millions of lire):

(in millions of lire)	
Land and buildings	394,252
Plant and machinery	5,314,161
Manufacturing and distribution equipment	62,508
Other fixed assets	267,870
Total	6,038,791

Other writedowns of intangibles and fixed assets Lire 37,628 million
Other writedowns of intangibles and fixed assets decreased by Lire 104,671 million, compared to 1999, mainly following the writedown of public telephone installations in the 1999 financial statements.
This item refers to the writedown of software projects in progress and in use that will be abandoned during 2001.

Writedowns of receivables included in current assets and liquid assets Lire 332,490 million
This item, representing the provision to the allowance for doubtful accounts, decreased by Lire 66,545 million, compared to 1999, owing to lower provisions due to a reduction in doubtful receivables.

Change in inventory of raw materials, supplies and merchandise *Lire 99,193 million*

The change is due to lower purchases in comparison to the utilization of the products intended for sale and maintenance, owing to the continuation of the efforts to improve inventory management, and also reflects the writedowns made to account for obsolescence and the diminished usefulness of materials.

2006

Provisions for risks *Lire 121,690 million*

These refer to provisions made to the *"reserve for litigation"* to cover expenses connected with the probable outcome of disputes with third parties (Lire 17,183 million) and to the *"reserve for contractual risks and other risks"* to cover risks stemming from the settlement of trade and regulatory questions (Lire 104,507 million).

Miscellaneous operating costs *Lire 966,275 million*

Miscellaneous operating costs, which decreased by Lire 303,904 million compared to 1999, include the following:

Losses on disposal of assets Lire 94,349 million

Losses on disposal of assets decreased by Lire 112,122 million from 1999 as a result of having completed the network rationalization and modernization program, begun in previous years.
In fact, the gross amount of assets disposed of during 2000 dropped from Lire 3,627,192 million in 1999 to Lire 2,686,099 million in 2000.

TLC license fee Lire 602,529 million

The TLC license fee decreased by Lire 153,189 million, compared to 1999, owing to a reduction in the revenue base and a reduction in the rate which went from 3% in the prior year to 2.7% in 2000. This item includes the fee computed on sales revenues (Lire 594,923 million) and the fee for operating the Regulatory Authority (Lire 7,605 million).

Other miscellaneous costs Lire 269,397 million

Other miscellaneous costs, which decreased by Lire 38,593 million, compared to 1999, include the following:

(in millions of lire)	2000	1999	Change
• other indirect duties and annual taxes, relating mainly to the local property tax, local duties, stamp and register tax, vehicle tax, Technical Office and Finance taxes and fees, license tax on mobile equipment,	156,273	134,264	22,009
• contributions and membership fees	19,695	13,036	6,659
• other costs, essentially relating to compensation due to customers under service regulations for delays in hookups or line transfers, damages paid to third parties for line installations and maintenance and losses on settlements	93,429	160,690	(67,261)
Total	269,397	307,990	(38,593)

2007

Financial income and expense ***Lire 2,574,900 million***
(Lire 2,766,263 million in 1999)

Financial income and expense, which decreased by Lire 191,363 million, compared to 1999, include the following:

(in millions of lire)	2000	1999	Change
Income from equity investments (A)	3,464,568	3,326,941	137,627
Other financial income (B)	353,581	309,647	43,934
Interest and other financial expense (C)	1,243,249	870,325	(372,924)
Total (A+B-C)	2,574,900	2,766,263	(191,363)

Income from equity investments refers to the following:

(in millions of lire)		2000		1999		Change
Dividends from subsidiaries, affiliates and other companies		2,287,913		2,083,042		204,871
Other income from equity investments:						
• tax credits for dividends	1,112,932		1,155,991		(43,059)	
• gains on sales of investments	63,723	1,176,655	87,908	1,243,899	(24,185)	(67,244)
Total		3,464,568		3,326,941		137,627

Tax credits on dividends of Lire 1,112,932 million are made up of Lire 1,093,755 million of tax credits on dividends from subsidiaries accrued for 2000 and Lire 19,177 million of dividends collected in 2000.

2008

Dividends can be analyzed as follows:

(in millions of lire)			2000		1999	Change
Accrued dividends from subsidiaries						
TIM			1,761,219		1,400,836	360,383

Accrued portion of issue discounts and similar charges on loans			1,172	1,418	(246)
Other financial expense			110,419	75,505	34,914
Total			1,243,249	870,325	372,924

"Interest and fees on loans due to banks" are shown net of the interest expense on loans, equivalent to three percentage points (Lire 65,606 million compared to Lire 77,209 million in 1999) subsidized under Law No. 67/1988, in connection with loans that replaced those which should have been made by Cassa Depositi e Prestiti.

Value adjustments to financial assets ***-Lire 847,616 million***
(- Lire 294,605 million in 1999)

Value adjustments to financial assets, which increased by Lire 553,011 million compared to 1999, refer to writedowns of the following holdings:

Recorded in "long-term investments"

- Stream, for Lire 391,881 million;
- Iridium Italia, for 14,241 million, of which Lire 8,541 million recorded in a specific reserve;
- TMI Telemedia International Italia, for Lire 197,081 million;
- Trainet, for Lire 6,900 million, of which Lire 5,594 million recorded in a specific reserve;
- Telecom do Brasil, for Lire 2,110 million, entirely recorded in a specific reserve;
- other companies, for Lire 15,018 million, almost entirely recorded in a specific reserve;

2011

Recorded in "short-term financial assets"

- TIM, for Lire 166,670 million, and venture capital companies, for Lire 53,715 million; writedowns were made to adjust the book value of the stocks acquired for trading purposes to market value.

Extraordinary income and expense ***-Lire 347,483 million***
(-Lire 656,971 million in 1999)

This item shows a net expense balance of Lire 347,483 million, with a decrease of Lire 309,488 million compared to 1999.
Income (Lire 1,461,388 million) increased by Lire 1,390,102 million compared to 1999, mainly as a result of the gains (Lire 1,290,378 million) on the sale of investments and the contribution of the business segment "Grandi Immobili" to the company IM.SER.
Expense (Lire 1,808,871 million) increased by Lire 1,080,614 million over 1999. Such increase is mainly due to expenses connected with corporate restructuring activities (Lire 884,381 million, of which Lire 551,846 million for the operating agreements reached with the labor unions in July 2000 concerning cutbacks and layoffs under unemployment compensation plans); social security charges pursuant to Law No. 58/92 (Lire 296,910 million, Lire 363,688 million in 1999) to guarantee uniform status under the former Telephone Employees Pension Fund (FPT) which, as required by the 2000 Finance Bill, has become part of the general "Employees Pension Fund" as from January 1; extraordinary annual contribution for the year 2000 (Lire 144,430 million) to INPS – as established by the same Bill for the three years 2000 – 2002 – to meet the higher financial requirements covered by the rules of the fund that was abolished. Extraordinary expense also includes Lire 329,034 million for expenses connected with the above-mentioned transactions for the disposals of investments and contributions of business segments.

Income taxes ***Lire 3,386,171 million***
(Lire 3,859,913 million in 1999)

This item includes current income taxes of Lire 2,677,681 million (Lire 3,257,767 million in 1999), and deferred income taxes of Lire 708,490 million (Lire 602,146 million in 1999). The total decrease of Lire 473,742 million is due to the combined effect of the decrease in current income taxes (owing both to a reduction in taxable income and the taxation of a part of such taxable income with the substitute equalization tax of 19%) and the increase in deferred taxes. The latter, principally due to the tax credits on dividends accrued in 2000, take into account the reduction in the reserve for deferred taxes following the reclassification of the "Reserve for accelerated depreciation" pursuant to the application of Law No. 342/2000, art. 14.
Total income taxes can be divided into Lire 2,835,415 million (IRPEG and the substitute equalization tax) and Lire 550,756 million relating to IRAP.

2012

The effective tax rate in 2000 (40.6%) is lower than that of 1999 (43.32%) on account of the positive effects of Law No. 342/2000, as previously mentioned. The composition of the tax rates in 2000 is as follows:

		IRPEG	IRAP	Total
Theoretical taxes	(A)	**3,085,960**	**550,040**	**3,636,000**
• Temporary timing differences taxed and deductible in future years				
- dividends accrued		(1,093,757)	=	(1,093,757)
- provision for writedown of receivables		97,417	=	97,417
- net change relating to installation writedowns, other provisions and sundry		386,830	3,729	390,559
• Reversal of prior years' temporary timing differences				
- accelerated depreciation		24,540	2,819	27,359
- sundry		(348,755)	(17,523)	(366,278)
• Permanent differences		184,941	24,706	209,647
• DIT and other tax benefits		(211,655)	(11,611)	(223,266)
Current income taxes		**2,125,521**	**552,160**	**2,677,681**
Deferred income taxes		**709,894**	**(1,404)**	**708,490**
Taxes charged to statement of income	(B)	**2,835,415**	**550,756**	**3,386,171**
Income before income taxes	(C)			8,340,433
Theoretical tax rate	(A/C)			**43.59%**
Effective tax rate	(B/C)			**40.60%**

2013

OTHER INFORMATION

Remuneration to directors and statutory auditors

In compliance with the instructions giving effect to Legislative Decree 58/1998, art. 78, issued by Consob under resolution No. 11971 of May 14, 1999, the remuneration to which the directors and statutory auditors are entitled for fiscal 2000 are presented in the following table.

The table has been prepared by reference to the term of office, on the accrual basis, except for bonuses and other incentives linked to the achievement of personal targets which are reported on a cash basis.
The remuneration for the post is that decided for the individual by the appropriate corporate governance body.
Non-cash benefits correspond to the amount subject to taxes based on current tax laws.
Remuneration – prorata over the term of office in Telecom Italia – for the posts of director or statutory auditor in companies of the Group and not handed over to third parties are reported in the column – "Other compensation".
Any other type of remuneration is shown in the column "Other cash compensation".

(*) The compensation is all-inclusive of the fees received for all the corporate posts held and also posts held in subsidiaries or other companies in which Telecom Italia S.p.A. has interests. In particular, also the compensation due to him as a member of the Board of Directors, as already voted by the Stockholders' Meeting of Telecom Italia S.p.A., ex art. 2389[1] is considered waived.
(**) The professional association Bonelli Erede Pappalardo, in 2000, were paid for professional services rendered by its members on behalf of Telecom Italia S.p.A. and its subsidiaries for Lire 10,300 million;
(***) Avv. Angelo Benessia, in 2000, received compensation for professional services rendered to Telecom Italia S.p.A. and its subsidiaries for Lire 645 million;
(1) Compensation for the post of Chairman of Telecom Italia Mobile S.p.A. paid over to Telecom Italia S.p.A.;
(2) Fees for the post were not received by the Directors but paid over to third-party companies;
(3) Compensation for the post of Statutory Auditor in Stet International and for the post of Chairman of the Board of Statutory Auditors of Tin.it S.p.A.;
(4) Compensation for the post of Statutory Auditor in the subsidiaries Finsiel, Immsi, Telespazio and Telecom Italia Mobile S.p.A.;
(5) Compensation for the post of Statutory Auditor in the indirect subsidiary Sogei and for the post of Chairman of the Board of Statutory Auditors in the subsidiaries Finsiel, Immsi, Path.net e Saiat;
(6) Compensation for the post of Chairman of the Board of Statutory Auditors in the subsidiary Telecom Italia Mobile S.p.A.;
(7) Fees for the post were not received by the Chairman but paid over to the Administration Fund of the organization belonging.

2015

STOCK OPTION PLAN

Article 6 of the corporate by-laws authorizes the Board of Directors to increase share capital by issuing ordinary shares set aside for the executives of Telecom Italia Group. The stockholders' meeting, by delegating this right, expressly destined the issue of such shares to the human resources assigned roles of particular importance and of greater strategic interest in shaping the success of the Company and Group, in order to provide the Company an effective tool to develop corporate loyalty and offer incentives, in line with the most recent internationally accepted practices.

In this framework, in particular, a group of beneficiaries identified as executives employed by Telecom Italia and its subsidiaries were assigned a total of No. 16,595,400 personal and non-transferable *inter vivos* rights, valid for the subscription against payment of the same number of new Telecom Italia ordinary shares, of which about a third of the total (No. 4,905,500) was subscribed to and issued by the end of 1999. The Board established the subscription price according to the terms of the authorization it received.

As for the total assigned shares:

- No. 4,905,500 shares were subscribed to and issued by the end of the year 1999;
- for No. 5,754,900 shares, the subscription period began on January 2, 2000 after having reached the specific parameter of stock market performance;
- for the remaining No. 5,935,000 shares, the subscription period begins from January 2002 on condition that the ordinary shares reach a predetermined performance target in December 2001.

As already disclosed in the 1999 annual report, the period to exercise the rights assigned in 1999 has been established in three years from notification of having reached the set incentive parameter; therefore, the capital increase servicing the 1999 stock option plan will be closed on January 31, 2005.

During 2000, in view of the evolution of the tax laws covering stock option plans, a decision was made to propose to the extraordinary stockholders' meeting a change in the mechanism for fixing the subscription price of the shares servicing the plan (that is, the average official price of the ordinary shares shown on the screen-trading market organized and operated by Borsa Italiana S.p.A. in the six months preceding the incentive period), assigning the Board of Directors the discretionary right to determine, each time, the price for every tranche of share capital increase; in the meantime, a proposal has been advanced to extend the plan to cover executives of the subsidiaries.

These proposed changes in the original mandate were approved by the extraordinary stockholders' meeting of August 10, 2000 and the related resolutions were homologated by decree of the Turin Courts on September 29, 2000, successively confirmed by decree of the Appeals Court in Turin on October 20, 2000 only for the part covering the change in price.

Subsequent to this change, all aspects of the stock option cycle begun in February 2000 were decided and, accordingly, a total of No. 51,430,000 options were assigned, valid for the subscription of the same number of newly issued ordinary shares (corresponding to 0.69% of outstanding share capital at December 31, 2000), against payment of an exercise price equal to the arithmetic average of the official prices of Telecom Italia ordinary shares during the period August 11, 2000 – September 11, 2000, consistent with existing laws. Such options can be exercised, also in part, in three distinct lots, subject to having reached the performance parameter represented by the comparison of the ratio between the average market prices recorded by the stock in specific periods and the ratio between the arithmetic average of the closing prices on the Dow Jones EuroStoxx TLC index

2016

representing a basket of stocks in the sector over the same periods; however, in the event the incentive parameter is only reached for the second and third lot, the beneficiaries of the previous lots will nevertheless be allowed to exercise their rights.

Furthermore, the strategic resources who have the most impact on the Group's business have been assigned an additional extraordinary lot of options which can be exercised provided that, when the conditions for exercising the rights of the third lot are met, the market price of the ordinary shares will have also appreciated to a predetermined level. The period to exercise the subscription rights has been established in five years from notification of having reached the corresponding incentive parameter; therefore, the capital increase servicing the 2000 stock option plan will be closed on July 31, 2008.
As set forth by the recommendation contained in Consob Communication No. 11508 of February 15, 2000, the following table summarizes the essential elements of the stock option plan in 2000.

	2000			1999		
	Number of shares	Exercise price (euro)	Market price (euro)	Number of shares	Exercise price (lire)	Market price (lire)
(1) Rights at 1/1	11,689,900	6.791	14.118	=	=	14,669
(2) New rights assigned during year	51,430,000	13.815	13.815	16,595,400	13,150	18,806
(3) Rights exercised during year	=	=	=	4,905,500	13,150	25,305
(4) Rights expired and not exercised during year	=	=	=	=	=	=
(5) Rights at 12/31	63,119,900	12.514	11.902	11,689,900	13,150	27,207
(6) of which, rights which can be exercised	=	=	=	=	=	=

INTRODUCTION OF THE EURO

The expenses borne during the year for the introduction of the Euro currency total Lire 3.6 billion, of which Lire 3 billion were charged to the statement of income (in *Production cost* under *Services*, as they refer to services rendered to revise and update the information systems), and the remaining amount was recorded in the balance sheet (*Intangibles* under *Industrial patents and intellectual property rights,* as it refers to new and more complex functions added to the Company's own software).

The following Annexes numbered 9 through 13 are an integral part of these notes.

PricewaterhouseCoopers SpA

AUDITORS' REPORT IN ACCORDANCE WITH ARTICLE 156 OF LAW DECREE N° 58 DATED 24 FEBRUARY 1998

To the Shareholders of
Telecom Italia SpA

1. We have audited the financial statements of TELECOM ITALIA SpA as of December 31, 2000. These financial statements are the responsibility of Telecom Italia's directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with the auditing standards and criteria recommended by CONSOB. Those standards and criteria require that we plan and perform the audit to obtain the necessary assurance about whether the financial statements are free of material misstatement and, taken as a whole, are presented fairly. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the directors. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries held directly by Telecom Italia SpA (mainly Seat Pagine Gialle SpA, Telecom Italia Mobile SpA, Huit Sarl and TI Web SA) which reflect 60 per cent of the total carrying value of "Investments in subsidiaries" and 24 per cent of total assets, and the financial statements of certain subsidiaries, held directly and indirectly, by Stet International Netherlands NV (mainly 9 Telecom Reseau SAS), have been audited by other auditors who gave us their related reports. Our opinion, expressed herein, insofar as it relates to the financial statements of those subsidiaries utilised in order to verify this valuation of the investments, is based also on the audits performed by other auditors.

   For the opinion on the financial statements of the prior period, which are presented for comparative purposes as required by law, reference is made to the report issued by Arthur Andersen SpA dated April 10, 2000.

2032

PRICEWATERHOUSECOOPERS

3. In our opinion, the financial statements of Telecom Italia SpA as of December 31, 2000 comply with the laws governing the criteria for their preparation; accordingly, they give a true and fair view of the financial position and of the results of operations of Telecom Italia SpA.

4. We draw your attention to the following points:

- Telecom Italia SpA has investments in subsidiaries and has consequently prepared (as required by law) group consolidated financial statements. Such consolidated financial statements represent an integral part of the annual financial statements for the purposes of providing adequate information on the financial position and the results of operations of the company and the Group. We have examined the consolidated financial statements, which, together with the audit report, have been presented with the annual financial statements.

- For a better understanding of the financial statements, reference should be made to the information included in the notes to financial statements, in the section "Summary of significant accounting policies", regarding the accounting criteria utilised for the employee benefit obligations as required by Law no. 58/1992.

Turin, May 21, 2001

PricewaterhouseCoopers SpA

This report has been translated from the original, which was issued in accordance with Italian legislation.

REPORT OF THE BOARD OF STATUTORY AUDITORS TO THE STOCKHOLDERS' MEETING OF TELECOM ITALIA S.P.A. PURSUANT TO LEGISLATIVE DECREE 58/1998 ART. 153 AND ART. 2429, PARAGRAPH 3, ITALIAN CIVIL CODE

To the Stockholders,
During the year ended December 31, 2000, the Board of Statutory Auditors carried out the supervisory work required by law, taking into account the code of ethics recommended by the National Boards of Dottori Commercialisti and Ragionieri. In preparing this report, the Board also took into consideration CONSOB Instructions No. 1025564 dated April 6, 2001, No. 97001574 of February 20, 1997 and No. 98015375 dated February 27, 1998.

1. The Board of Statutory Auditors has received periodic information and data, as set forth by Legislative Decree 58/1998, art. 150, paragraph 1 and article 13 of the corporate by-laws, from the Directors at the Board of Directors' Meetings, which have always been attended by the Board of Statutory Auditors.
   The disclosure of this information shows that the most important economic, financial and equity transactions entered into by TELECOM ITALIA S.P.A. refer mainly to the merger of TIN.IT in SEAT S.P.A. (contribution of the Internet operations in TIN.IT S.P.A.; purchase of SEAT shares from HUIT II S.A.; voluntary tender offer for SEAT shares; partial demerger of TELECOM ITALIA with the transfer of TIN.IT shares to SEAT; merger by absorption of TIN.IT in SEAT), restructuring of international operations by TELECOM ITALIA (total non-proportional spin-off of STET INTERNATIONAL S.P.A. in favor of TELECOM ITALIA and TELECOM ITALIA MOBILE S.P.A.; contribution by TELECOM ITALIA of STET MOBILE HOLDING N.V. shares to TIM), purchase of TIM ordinary shares, buy-back of treasury shares, spin-off of the real estate business (contribution of the TELECOM ITALIA "Large Buildings" business segment to IM.SER S.P.A., 100%-owned by Telecom Italia; sale of 60% of IM.SER to BENI STABILI and LEHMAN BROTHERS), all of which have been exhaustively described in the Directors' report on operations and in the notes to the 2000 financial statements.
   The Board of Statutory Auditors has ascertained that the above transactions have been carried out in accordance with the law, the by-laws and the general principles of economic rationale, ensuring that such transactions were not patently imprudent, risky, with potential conflict of interests, in contrast with the resolutions passed by the Stockholders' Meetings or such as to compromise the whole of the assets of the company.

2. The Board of Statutory Auditors has not noted any unusual and/or atypical transactions entered into with third parties, related parties or intercompanies.
   The Directors, in their report on operations, disclose the major related party transactions entered into by TELECOM ITALIA Group and TELECOM ITALIA S.P.A., respectively, in paragraphs 5.7 and 6.6, to which reference should be made, also with respect to the characteristics of the transactions and their economic effects.
   The Board of Statutory Auditors has verified, with the assistance of the Internal Auditing function, that, in TELECOM ITALIA S.P.A., adequate procedures are in force and have been followed in order to ensure that the above transactions are conducted at arms' length or according to specific regulatory provisions.

3. The disclosure provided in the report on operations accompanying the statutory and consolidated financial statements, concerning transactions entered into by TELECOM ITALIA S.P.A. with related parties or intercompanies, is sufficient, taking into account the size and structure of the Company.

2034

4. The audit firm, PRICEWATERHOUSECOOPERS S.P.A., on May 21, 2001, has issued its audit report in accordance with Legislative Decree No. 58/1998, art. 156 stating that the statutory financial statements and the consolidated financial statements at December 31, 2000 give a true and fair view of the financial position and results of operations of the Company and the Group. The report makes reference to the usual comments concerning the pension costs regulated by Law No. 58/1992.

5. The Board of Statutory Auditors received nine complaints under ex art. 2408 of the Italian Civil Code, two of which were received in early 2001, concerning certain questions relating to the Stockholders' Meetings held in 2000 and matters of a commercial nature. The Board of Statutory Auditors carried out the appropriate inquiries and ascertained that there were no omissions, censurable facts or irregularities that needed to be brought to the attention of the Stockholders' Meeting.

6. The Board of Statutory Auditors received no petitions.

7. In 2000, TELECOM ITALIA appointed PRICEWATERHOUSECOOPERS S.P.A. to perform certain work other than the legal audit of the financial statements. The fees for this work, excluding out-of-pocket expenses and VAT, are summarized below (in millions of lire):

Audit work for Global Note Program	830
Audit work for the Annual Report Form 20-F	343
Other work	513
Total	1,686

The above fees appear adequate in relation to the complexity and magnitude of the work performed.
Furthermore, on July 21, 2000, the chief judge of the Turin Courts appointed PRICEWATERHOUSECOOPERS S.P.A. as the expert, pursuant to art. 2501 quinquies of the Italian Civil Code, within the framework of the operation for the total non-proportional spin-off of STET INTERNATIONAL in favor of TELECOM ITALIA and TIM.

8. In 2000, TELECOM ITALIA did not confer any appointments to parties connected by continuous working relationships with PRICEWATERHOUSECOOPERS S.P.A..

9. In 2000, the Board of Statutory Auditors issued a specific opinion to the Board of Directors, pursuant to ex art. 2389, paragraph 2 of the Italian Civil Code, concerning the remuneration assigned to the Chairman and CEO.

10. In 2000, the meetings of the Board of Statutory Auditors numbered fourteen. The Board also attended the ordinary and extraordinary sessions of the Stockholders' Meetings and the Board of Directors' Meetings, which numbered seventeen.

11. The Board of Statutory Auditors has acquired information and monitored, as far as its responsibilities are concerned, the proper keeping of administration, through direct observation, gathering of information from those in charge of the organizational functions, pursuant to Legislative Decree No. 58/1998, ex art. 151, paragraph 2, and meetings with the audit firm of PRICEWATERHOUSECOOPERS S.P.A., for purposes of a reciprocal exchange of important information and data.

2035

12. The Board of Statutory Auditors has acquired information and monitored, as far as its responsibilities are concerned, the adequacy of the organizational structure of the Company, now organized in Business Units.

13. The Board of Statutory Auditors has evaluated and monitored the adequacy of the internal control system. In particular, it regularly gathered information on the activities carried out, by meetings with those in charge of the Internal Auditing function and by obtaining specific documentation on a periodical basis; it also requested and obtained evidence of the steps taken to correct critical areas.
As regards self-assessment of the risk profile of corporate activities, the Company has begun two projects in the Wireline Services Business Unit. The first is already operational in 2000 and involves the application of a CRSA (Control Risk Self Assessment) method to certain corporate operational processes. The second, begun in 2001, consists of the self-assessment of the risk profile for all the major macro-processes of the Business Unit and will be completed during the current year, with subsequent updates each year thereafter.

14. The Board of Statutory Auditors has evaluated and monitored the adequacy of the and the administrative and accounting system, as well as its reliability to correctly represent the operating events, by obtaining information from those in charge of the respective functions, examining corporate documentation and reviewing the results of the work carried out by the audit firm.

15. The instructions given by TELECOM ITALIA S.p.A. to its subsidiaries, pursuant to art. 114, paragraph 2, of Legislative Decree No. 58/1998, appear adequate for purposes of fulfilling the obligation regarding communication as required by law.

16. The Board of Statutory Auditors has ascertained that the laws have been respected with regard to the preparation and formation of the statutory financial statements of TELECOM ITALIA S.P.A. and the consolidated financial statements of the Group as well as the directors' report accompanying said statements. In particular, the Group's performance by business sector and by geographical area has been presented by taking into account Consob Instruction No. 98084143 dated October 17, 1998.

17. The Company, through its own code of conduct, follows the Code of Self-discipline of the Committee for the Corporate Governance of listed companies. To this end, the Audit and Corporate Governance Committee and the Committee for the Remuneration of the Directors have been set up and are operational.

18. During the course of the foregoing monitoring activities, there were no significant facts that came to our attention such that would need to be reported to the controlling bodies or mentioned in this report.
The examination of the reports issued as set forth by Legislative Decree No. 58/1998, art. 153 and art. 156, respectively by the Board of Statutory Auditors and the audit firms of the subsidiaries of TELECOM ITALIA S.P.A., listed on regulated markets and managed by the Borsa Italiana S.p.A. (TIM, SEAT, IMMSI and BUFFETTI GROUP), show no critical areas or significant matters for attention.
As regards the alleged irregularities surrounding the acquisition, in June 1997, by STET INTERNATIONAL NETHERLANDS N.V., of a 29% stake in TELEKOM SRBIJA, the Turin

2036

judicial authorities have begun a formal inquiry and, as from February 22, 2001, have obtained documentation from TELECOM ITALIA made available by the Company in its offices in Turin and Rome.

As from February 28, 2001, Telecom Italia has also made practically the same documentation available to PRICEWATERHOUSECOOPERS S.P.A. which, on March 14, 2001, sent Consob and us, the Board of Statutory Auditors, a memorandum on the subject, with no other memo having been received since that date.

CONSOB, in its memorandum dated March 5, 2001, asked the Board of Statutory Auditors to begin an inquiry and to send the relative findings to the same Commission, with particular reference to the correctness of the disclosure made public in the 1997, 1998 and 1999 financial statements of TELECOM ITALIA as regards its investment in the affiliate TELEKOM SRBIJA.

The Board of Statutory Auditors, in close contact with PRICEWATERHOUSECOOPERS S.P.A., took advantage of the assistance of the structures of TELECOM ITALIA and kept in contact with the members of the Audit and Corporate Governance Committee. During the course of its work, the Board also proceeded to hold specific interviews with the managers in service. Lastly, the Board had direct contacts with representatives of CONSOB and a report was sent to Consob on April 12, 2001, and, more recently (May 15, 2001), an explanatory memorandum.

The report of the Board of Statutory Auditors has been drawn up by taking into account the tests carried out, as well as the information and documentation obtained in conformity with the powers held by the same Board.

The facts examined mainly regard the years 1997 and 1998. No facts have emerged as result of the above, at this time, which could refute the correctness of the statutory financial statements and the consolidated financial statements of TELECOM ITALIA at December 31, 1997, 1998 and 1999, also for the effects on the financial statements for the year ended December 31, 2000.

Lastly, it should also be pointed out that the matter is still under investigation by the judicial authorities in Turin, as mentioned above.

19. Finally, the Board of Statutory Auditors calls your attention to the resignation of the Director Avv. Angelo Benessia on April 5, 2001, and, consequently, you are called to appoint a new director to the Board.

20. As far as the Board of Statutory Auditors is concerned, having taken note of the results of the statutory financial statements for the year ended December 31, 2000, we have no objections to the proposal by the Board of Directors for the appropriation of the net income for the year.

Rome, May 21, 2001

The Board of Statutory Auditors

2037

REPORT OF THE BOARD OF STATUTORY AUDITORS TO THE STOCKHOLDERS' MEETING OF TELECOM ITALIA S.P.A. PURSUANT TO LEGISLATIVE DECREE 58/1998 ART. 153 AND ART. 2429, PARAGRAPH 3, ITALIAN CIVIL CODE

To the Stockholders,
During the year ended December 31, 2000, the Board of Statutory Auditors carried out the supervisory work required by law, taking into account the code of ethics recommended by the National Boards of Dottori Commercialisti and Ragionieri. In preparing this report, the Board also took into consideration CONSOB Instructions No. 1025564 dated April 6, 2001, No. 97001574 of February 20, 1997 and No. 98015375 dated February 27, 1998.

1. The Board of Statutory Auditors has received periodic information and data, as set forth by Legislative Decree 58/1998, art. 150, paragraph 1 and article 13 of the corporate by-laws, from the Directors at the Board of Directors' Meetings, which have always been attended by the Board of Statutory Auditors.
   The disclosure of this information shows that the most important economic, financial and equity transactions entered into by TELECOM ITALIA S.P.A. refer mainly to the merger of TIN.IT in SEAT S.P.A. (contribution of the Internet operations in TIN.IT S.P.A.; purchase of SEAT shares from HUIT II S.A.; voluntary tender offer for SEAT shares; partial demerger of TELECOM ITALIA with the transfer of TIN.IT shares to SEAT; merger by absorption of TIN.IT in SEAT), restructuring of international operations by TELECOM ITALIA (total non-proportional spin-off of STET INTERNATIONAL S.P.A. in favor of TELECOM ITALIA and TELECOM ITALIA MOBILE S.P.A.; contribution by TELECOM ITALIA of STET MOBILE HOLDING N.V. shares to TIM), purchase of TIM ordinary shares, buy-back of treasury shares, spin-off of the real estate business (contribution of the TELECOM ITALIA "Large Buildings" business segment to IM.SER S.P.A., 100%-owned by Telecom Italia; sale of 60% of IM.SER to BENI STABILI and LEHMAN BROTHERS), all of which have been exhaustively described in the Directors' report on operations and in the notes to the 2000 financial statements.
   The Board of Statutory Auditors has ascertained that the above transactions have been carried out in accordance with the law, the by-laws and the general principles of economic rationale, ensuring that such transactions were not patently imprudent, risky, with potential conflict of interests, in contrast with the resolutions passed by the Stockholders' Meetings or such as to compromise the whole of the assets of the company.

2. The Board of Statutory Auditors has not noted any unusual and/or atypical transactions entered into with third parties, related parties or intercompanies.
   The Directors, in their report on operations, disclose the major related party transactions entered into by TELECOM ITALIA Group and TELECOM ITALIA S.P.A., respectively, in paragraphs 5.7 and 6.6, to which reference should be made, also with respect to the characteristics of the transactions and their economic effects.
   The Board of Statutory Auditors has verified, with the assistance of the Internal Auditing function, that, in TELECOM ITALIA S.P.A., adequate procedures are in force and have been followed in order to ensure that the above transactions are conducted at arms' length or according to specific regulatory provisions.

3. The disclosure provided in the report on operations accompanying the statutory and consolidated financial statements, concerning transactions entered into by TELECOM ITALIA S.P.A. with related parties or intercompanies, is sufficient, taking into account the size and structure of the Company.

2038

4. The audit firm, PRICEWATERHOUSECOOPERS S.P.A., on May 21, 2001, has issued its audit report in accordance with Legislative Decree No. 58/1998, art. 156 stating that the statutory financial statements and the consolidated financial statements at December 31, 2000 give a true and fair view of the financial position and results of operations of the Company and the Group. The report makes reference to the usual comments concerning the pension costs regulated by Law No. 58/1992.

5. The Board of Statutory Auditors received nine complaints under ex art. 2408 of the Italian Civil Code, two of which were received in early 2001, concerning certain questions relating to the Stockholders' Meetings held in 2000 and matters of a commercial nature. The Board of Statutory Auditors carried out the appropriate inquiries and ascertained that there were no omissions, censurable facts or irregularities that needed to be brought to the attention of the Stockholders' Meeting.

6. The Board of Statutory Auditors received no petitions.

7. In 2000, TELECOM ITALIA appointed PRICEWATERHOUSECOOPERS S.P.A. to perform certain work other than the legal audit of the financial statements. The fees for this work, excluding out-of-pocket expenses and VAT, are summarized below (in millions of lire):

Audit work for Global Note Program	830
Audit work for the Annual Report Form 20-F	343
Other work	513
Total	1,686

The above fees appear adequate in relation to the complexity and magnitude of the work performed.
Furthermore, on July 21, 2000, the chief judge of the Turin Courts appointed PRICEWATERHOUSECOOPERS S.P.A. as the expert, pursuant to art. 2501 quinquies of the Italian Civil Code, within the framework of the operation for the total non-proportional spin-off of STET INTERNATIONAL in favor of TELECOM ITALIA and TIM.

8. In 2000, TELECOM ITALIA did not confer any appointments to parties connected by continuous working relationships with PRICEWATERHOUSECOOPERS S.P.A..

9. In 2000, the Board of Statutory Auditors issued a specific opinion to the Board of Directors, pursuant to ex art. 2389, paragraph 2 of the Italian Civil Code, concerning the remuneration assigned to the Chairman and CEO.

10. In 2000, the meetings of the Board of Statutory Auditors numbered fourteen. The Board also attended the ordinary and extraordinary sessions of the Stockholders' Meetings and the Board of Directors' Meetings, which numbered seventeen.

11. The Board of Statutory Auditors has acquired information and monitored, as far as its responsibilities are concerned, the proper keeping of administration, through direct observation, gathering of information from those in charge of the organizational functions, pursuant to Legislative Decree No. 58/1998, ex art. 151, paragraph 2, and meetings with the audit firm of PRICEWATERHOUSECOOPERS S.P.A., for purposes of a reciprocal exchange of important information and data.

2039

12. The Board of Statutory Auditors has acquired information and monitored, as far as its responsibilities are concerned, the adequacy of the organizational structure of the Company, now organized in Business Units.

13. The Board of Statutory Auditors has evaluated and monitored the adequacy of the internal control system. In particular, it regularly gathered information on the activities carried out, by meetings with those in charge of the Internal Auditing function and by obtaining specific documentation on a periodical basis; it also requested and obtained evidence of the steps taken to correct critical areas.
As regards self-assessment of the risk profile of corporate activities, the Company has begun two projects in the Wireline Services Business Unit. The first is already operational in 2000 and involves the application of a CRSA (Control Risk Self Assessment) method to certain corporate operational processes. The second, begun in 2001, consists of the self-assessment of the risk profile for all the major macro-processes of the Business Unit and will be completed during the current year, with subsequent updates each year thereafter.

14. The Board of Statutory Auditors has evaluated and monitored the adequacy of the and the administrative and accounting system, as well as its reliability to correctly represent the operating events, by obtaining information from those in charge of the respective functions, examining corporate documentation and reviewing the results of the work carried out by the audit firm.

15. The instructions given by TELECOM ITALIA S.p.A. to its subsidiaries, pursuant to art. 114, paragraph 2, of Legislative Decree No. 58/1998, appear adequate for purposes of fulfilling the obligation regarding communication as required by law.

16. The Board of Statutory Auditors has ascertained that the laws have been respected with regard to the preparation and formation of the statutory financial statements of TELECOM ITALIA S.P.A. and the consolidated financial statements of the Group as well as the directors' report accompanying said statements. In particular, the Group's performance by business sector and by geographical area has been presented by taking into account Consob Instruction No. 98084143 dated October 17, 1998.

17. The Company, through its own code of conduct, follows the Code of Self-discipline of the Committee for the Corporate Governance of listed companies. To this end, the Audit and Corporate Governance Committee and the Committee for the Remuneration of the Directors have been set up and are operational.

18. During the course of the foregoing monitoring activities, there were no significant facts that came to our attention such that would need to be reported to the controlling bodies or mentioned in this report.
The examination of the reports issued as set forth by Legislative Decree No. 58/1998, art. 153 and art. 156, respectively by the Board of Statutory Auditors and the audit firms of the subsidiaries of TELECOM ITALIA S.P.A., listed on regulated markets and managed by the Borsa Italiana S.p.A. (TIM, SEAT, IMMSI and BUFFETTI GROUP), show no critical areas or significant matters for attention.
As regards the alleged irregularities surrounding the acquisition, in June 1997, by STET INTERNATIONAL NETHERLANDS N.V., of a 29% stake in TELEKOM SRBIJA, the Turin

2040

judicial authorities have begun a formal inquiry and, as from February 22, 2001, have obtained documentation from TELECOM ITALIA made available by the Company in its offices in Turin and Rome.

As from February 28, 2001, Telecom Italia has also made practically the same documentation available to PRICEWATERHOUSECOOPERS S.P.A. which, on March 14, 2001, sent Consob and us, the Board of Statutory Auditors, a memorandum on the subject, with no other memo having been received since that date.

CONSOB, in its memorandum dated March 5, 2001, asked the Board of Statutory Auditors to begin an inquiry and to send the relative findings to the same Commission, with particular reference to the correctness of the disclosure made public in the 1997, 1998 and 1999 financial statements of TELECOM ITALIA as regards its investment in the affiliate TELEKOM SRBIJA.

The Board of Statutory Auditors, in close contact with PRICEWATERHOUSECOOPERS S.P.A., took advantage of the assistance of the structures of TELECOM ITALIA and kept in contact with the members of the Audit and Corporate Governance Committee. During the course of its work, the Board also proceeded to hold specific interviews with the managers in service. Lastly, the Board had direct contacts with representatives of CONSOB and a report was sent to Consob on April 12, 2001, and, more recently (May 15, 2001), an explanatory memorandum.

The report of the Board of Statutory Auditors has been drawn up by taking into account the tests carried out, as well as the information and documentation obtained in conformity with the powers held by the same Board.

The facts examined mainly regard the years 1997 and 1998. No facts have emerged as result of the above, at this time, which could refute the correctness of the statutory financial statements and the consolidated financial statements of TELECOM ITALIA at December 31, 1997, 1998 and 1999, also for the effects on the financial statements for the year ended December 31, 2000.

Lastly, it should also be pointed out that the matter is still under investigation by the judicial authorities in Turin, as mentioned above.

19. Finally, the Board of Statutory Auditors calls your attention to the resignation of the Director Avv. Angelo Benessia on April 5, 2001, and, consequently, you are called to appoint a new director to the Board.

20. As far as the Board of Statutory Auditors is concerned, having taken note of the results of the statutory financial statements for the year ended December 31, 2000, we have no objections to the proposal by the Board of Directors for the appropriation of the net income for the year.

Rome, May 21, 2001

The Board of Statutory Auditors

2041

PROPOSED RESOLUTIONS

The Shareholders' Meeting is convened on June 12, 2001 at 10.00 hours at the registered office of the Company – in Turin in Via Bertola, 34 – and, if necessary, on June 13, 2001 at the same time and place

2042

FINANCIAL STATEMENTS AND APPROPRIATION OF NET INCOME FOR 2000; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders

The financial statements of Telecom Italia S.p.A. for the year 2000 show a net income of Lire 4,954,261,597,624, which is basically in line with the figure for last year (Lire 5,050,362,910,293), reflecting a trend that has been illustrated in detail in the report on operations.

Thanks to this result, a unit dividend per ordinary share of Lire 605 is proposed (compared to the figure of Lire 603 effectively paid last year, inclusive of the increase stemming from the proportional allocation of net income accruing on treasury stock held in the Company's portfolio), as well as the preferential dividend due on savings shares. In this respect, it should be borne in mind that the nominal value of Telecom Italia shares benefited from a gratuitous increase following the re-denomination of the share capital in Euro approved by the Extraordinary Shareholders' Meeting held on May 3, 2001. This gave rise to an increase in the rights pertaining to savings shares, inasmuch as they are linked on a percentage basis to the nominal value of the stock, which was rounded off from Lire 1,000 to Euro 0.55. In particular, the extra dividend due on savings shares increased from Lire 20 to 0.011 Euro (Lire 22) per share.

Furthermore, the conversion of the share capital into Euro has given rise to the cancellation of own savings shares held in the Company's portfolio and consequently to a reduction in the total number of shares. Against this, a contrary variation is liable to come about as a result of issuing new ordinary shares in connection with the portion of the share capital increase deliberated by the Board of Directors on December 17, 1999, which is susceptible to implementation before the Shareholders' Meeting approving the financial statements is held.

With regard to the offer for the voluntary conversion of savings shares into ordinary shares at a ratio of one ordinary share (regular dividend) for each savings share (regular dividend), which was also examined by the aforementioned Extraordinary Shareholders' Meeting, this will in no way affect payment of the 2000 dividend. When the report illustrating the operation was issued, it was in fact made clear that the eventual conversion offer will in any case be carried out following modalities that will allow those who agree to collect the dividend for the year ended December 31, 2000.

To better clarify the proposal for allocating the year's net income, emphasis should also be laid on a special reserve for a figure corresponding to 3% of the quotas of the TFR (reserve for employee termination indemnities) destined for supplementary pension funds (Telemaco and Fontedir), in such a way as to obtain an equivalent deduction for the purposes of determining IRPEG (corporate income tax) income for the year, as permitted by Legislative Decree 124/1993. The reserve thus set up will benefit from the tax suspension facility.

Finally, it should be stressed that access to the subsidies envisaged by Law 488/1992 – in connection with projects for investments in the regions of Southern Italy presented by the Company during the course of the year 2000 for a total figure of Lire 270,800 million – is subject, inter alia, to contributions of own resources (this may come in the form of net income for the year set aside as accelerated depreciation in the form of a special reserve for the entire duration of the special-term programmes) for a figure of Lire 229,792 million. To this end, it will be necessary to tie up a corresponding amount of the reserve for accelerated depreciation set up in the course of the year when applications to the Ministry of Industry, Trade and Crafts were presented.

2043

In the light of the above, we submit to your approval the following

Agenda

The Ordinary Shareholders' Meeting of Telecom Italia S.p.A.

- after examining the financial statements of the Company for the year ended December 31, 2000;
- after examining the report on operations accompanying the financial statements;
- after acknowledging the report provided by the Board of Statutory Auditors and audit firm PricewaterhouseCoopers S.p.A.;
- in consideration of the conversion of the share capital into Euro approved by the Extraordinary Shareholders' Meeting held on May 3, 2001,
  - rounding off the nominal value of ordinary and savings shares from Lire 1,000 to Euro 0.55 for each share and consequently gratuitously increasing the share capital;
  - by means – inter alia – of cancelling 112,998,070 own savings shares held in the Company's portfolio, with a consequent reduction in the number of savings shares to 2,053,122,025;
- bearing in mind that the capital increase referred to in Article 6, paragraph 3, of the By-laws deliberated by the Board of Directors on December 17, 1999 (exercising the power referred to in Article 6, paragraph 2, of the By-laws) is susceptible to being partially implemented before the date on which the Extraordinary Shareholders' Meeting called to approve this deliberation is to be held, in such a way as to increase the number of ordinary shares with a regular dividend to a maximum of 5,265,792,031;
- in view of the advisability of benefiting from the tax relief envisaged by Legislative Decree 124/1993, by setting aside in a special reserve a figure corresponding to 3% of the TFR quotas earmarked for supplementary social security funds (for a total figure of Lire 327,810,645);
- in acknowledgement of applications for special financial terms, pursuant to Law 488/1992, presented by the Company to the Ministry of Industry, Trade and Crafts in the course of the year 2000, which envisage contributions of own resources – partly in the form of net income for the year set aside as accelerated depreciation in a special reserve for the entire duration of the investment projects hereinafter – for a figure of Lire 229,792 million, in exchange for investment projects in the regions of Southern Italy for a total figure of Lire 270,800 million.

resolves

1. to approve the report on operations drawn up by the Board of Directors, the balance sheet, the statements of income and the notes to the annual financial statements of Telecom Italia S.p.A. for the year ended on December 31, 2000, which shows a net income of Lire 4,954,261,597,624;
2. to appropriate the aforesaid net income as follows:
   - Lire 247,713,079,881 (corresponding to 5% of the net income generated) to the legal reserve;
   - Lire 327,810,645 to the "Reserve pursuant to Legislative Decree 124/1993";
   - A maximum of Lire 4,473,111,688,430 (corresponding to 90.3% of the net income) to be distributed in the form of a dividend of Lire 605 for each of the maximum total number of 7,318,914,056 shares existing as of the date of detaching the coupon, in addition to a further increase in the dividend due to the 2,063,122,025 savings shares of Lire 22 for each share;

2044

- To the reserve for accelerated depreciation the minimum remainder of Lire 233,109,018,668 (corresponding to 4.7% of the net income generated), a maximum of Lire 229,792 million of which is tied up pursuant to Law 488/1992, subject to effectively obtaining the relevant special terms referred to in the introduction.

Any net income not distributed in the form of a dividend as a result of failure to fully subscribe the portion of the capital increase referred to in Article 6, paragraph 3, of the By-laws, which is presently liable to subscription, will be transferred to the reserve for accelerated depreciation;

3. to authorise the Board of Directors – and the Chairman of the Board on its behalf – to ascertain in due course the exact extent
   - of the total amount of the dividend due to be effectively distributed,
   - of the net income for 2000 earmarked for the reserve for accelerated depreciation; and
   - of the part of the aforesaid reserve tied up pursuant to Law 488/1992;
4. to pay the dividend as from June 21, 2001, detaching the coupon on June 18, 2001.

On the basis of Article 14 of Presidential Decree DPR 917 of December 22, 1986 and subsequent amendments, the total dividend will give shareholders a tax credit of 58.73% which can be used in full and without limitation.

2045

APPOINTMENT OF A DIRECTOR

To our Shareholders
You are here also requested to appoint a Director to replace Mr. Angelo Benessia, who has resigned.

The Board of Directors invites the Shareholders' Meeting,

- after acknowledging the lapsing of a Director;
- in consideration of the deliberation passed by the Ordinary Shareholders' Meeting held on June 28, 1999, which amongst other things set at thirteen the number of members of the Company's Board of Directors and established that the duration of their mandate should be three financial years, and therefore until such time as the financial statements for the year ending on December 31, 2001 are approved;

to appoint a Board Director of the Company, whose mandate will expire together with that of the Directors currently in office and will therefore last until such time as the financial statements for the year ending on December 31, 2001 are approved.

2046

RE-DETERMINING THE REMUNERATION DUE TO DIRECTORS AND AUDITORS; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders

In this Meeting you are also asked to express your opinion with regard to the proposal to re-determine the remuneration due to the Corporate Bodies of Telecom Italia. The Group re-organisation process and the value creation schemes undertaken at all levels call for a special commitment in terms of management, guidance and control. Extraordinary operations have increased not only in number but also in terms of their dimension and complexity. At the same time routine business operations have had to cope with structural transformations in progress and with ever more challenging budget objectives, often in an unfavourable market framework.

In addition to the specific, ongoing commitment of the Chairman and Chief Executive Officer (remunerated separately, pursuant to Article 2389, paragraph 2, of the Civil Code), the number of meetings held by the Governing Body provides indirect but clear proof of all this. During 2000, the Board of Directors met seventeen times. If we also consider the time that Directors have to dedicate to preparing and examining the matters up for discussion in board meetings and shareholders' meetings and if we consider the fact that certain directors take part in the committees set up within the Board in order to optimise the corporate governance of both the Company and the Group, it would seem reasonable to propose a revision of the total annual remuneration of your Directors, solely in respect of the last of the three years in office.

The proposal submitted to your attention is therefore to re-determine, for the aforesaid period, the total remuneration of Lire two billion established by the Shareholders' Meeting held on June 28, 1999 at a figure of Lire three billion.

For similar reasons it is also proposed that, for the last two years in office, the remuneration already established for the Auditors' Committee by the Shareholders' Meeting held on July 3, 2000, which recommended that the Chairman's annual remuneration be set at a figure of Lire 225 million and that of each regular auditor at Lire 150 million, should also be correspondingly revised. The increased commitment required of Directors has also given rise to more work for the Controlling Body, whose members – all of whom have the professional and honourable requisites envisaged by Decree 162, March 30, 2000 of the Ministry of Justice and as such are qualified to continue exercising the mandate they have received – are under a duty to take part in Shareholders' Meetings of the Company and in Board Meetings. On top of this they are also expected - in periodical meetings and special checks and inspections carried out at the Company – to perform the surveillance and examination duties assigned to them by regulations, with special reference to listed companies. During the course of 2000, as well as taking part in shareholders' meetings and board meetings, the Auditors' Committee held fourteen meetings.

It is therefore proposed to re-determine, for each of the last two years of their assignment, the remuneration reserved for the Committee at a figure of Lire 300 million for the Chairman and Lire 225 million for each regular auditor, granting them an identical annual increase of Lire 75 million.

2047

In view of the above, we therefore ask you to approve the following deliberations.

Re-determining the remuneration due to Directors

In the light of the issues raised in the explanatory report, we submit to your approval the following

Agenda

The Shareholders' Meeting of Telecom Italia S.p.A.

- after examining the explanatory report issued by the Board of Directors,
- in view of the decisions adopted by the Ordinary Shareholders' Meeting held on June 28, 1999,

resolves

to re-determine the total annual remuneration due to the Board of Directors pursuant to Article 2389, paragraph 1, of the Civil Code, for the remaining duration of the assignment and as from the year of assignment subsequent to the year in progress, at a figure of Lire 3 billion to be split between its members in accordance with deliberations to be adopted by the Board, in addition to reimbursement of out-of-pocket expenses incurred in performing their duties.

Re-determining the remuneration due to Statutory Auditors

In the light of the issues raised in the explanatory report, we submit to your approval the following

Agenda

The Shareholders' Meeting of Telecom Italia S.p.A.

- after examining the explanatory report issued by the Board of Directors,
- in view of the decisions adopted by the Ordinary Shareholders' Meeting held on July 3, 2000,

resolves

to re-determine the remuneration due to members of the Auditors' Committee, for the second and third year of their assignment, at a gross annual figure of Lire 225 million for each Regular Auditor and at a gross annual figure of Lire 300 million for the Chairman of the Auditors' Committee, in addition to reimbursement of out-of-pocket expenses incurred in performing their duties.

2048

APPOINTING THE INDEPENDENT AUDIT FIRM; REVOCATION AND CONFERRAL OF A NEW ASSIGNMENT

To our Shareholders

In this Meeting you are asked to deliberate in respect of revoking the audit assignment conferred on PricewaterhouseCoopers S.p.A. for the three-year period 2000-2002 by the Shareholders' Meeting held on June 28, 1999.

The reasons why the Board has decided to make this proposal are as follows:

- as the audit assignment conferred by the parent company Olivetti S.p.A. on PricewaterhouseCoopers was due to expire at the close of the 2000 financial year, on July 4, 2000 the Shareholders' Meeting of the Group Leader conferred an audit assignment for the three-year period 2001-2003 on Reconta Ernst & Young S.p.A.;
- audit principles require that, in cases of corporate groups, the audit firm of the group leader should carry out the audit of the group's most important entities in terms of the nature of operations, in such a way that it can act as main group audit firm and express a professional evaluation of the financial statements in their entirety. For this reason, but partly also in order to optimise and simplify audit operations, Reconta Ernst & Young has been selected as the audit firm for the majority of Olivetti Group companies.

In view of the above, in accordance with Article 159, paragraph 2, of Legislative Decree 58/1998, the case in point is one of "revocation on just grounds" of the assignment previously conferred on PricewaterhouseCoopers, in view of the fact that otherwise Reconta Ernst & Young could not be qualified as the main audit firm in the framework of the Olivetti Group. The early extinction of the contract with PricewaterhouseCoopers is moreover already envisaged in the contract signed with Telecom Italia in September 1999. Following the revocation, it will therefore be necessary to proceed with a new audit assignment for the three-year period 2001-2003.

In the light of a) the determinations of the Group Leader, which has conferred Reconta Ernst & Young assignments for auditing its financial statements and half-year reports on Reconta Ernst & Young and, therefore, b) the need to ensure that it Reconta Ernst & Young is appointed as main audit firm in the framework of the Olivetti Group, your Board of Directors considers that the audit firm in question should also be given equivalent audit assignments for Telecom Italia.

The proposal presented by Reconta Ernst & Young – a highly prestigious audit firm – is competitive in economic, technical and quality terms. The consideration requested is in line with that previously established with the outgoing audit firm PricewaterhouseCoopers. Here is a resume of the proposal for professional services for each year of the three-year period 2001-2003:

				Annual consideration	
Document	Extent of audit	Duration of assignment	No. hours (for each year of 3-year period)	(Lire)	(Euro)
Financial statements	full audit	2001/2003	10,000	909,000,000	469,459.32
Consolidated financial statements	full audit	2001/2003	350	36,000,000	18,592.45
Half-year report in individual and consolidated form	limited review	2001/2003	1,200	109,000,000	56,293.80
Total			11,550	1,054,000,000	544,345.57

The figures shown do not include direct expenses or administrative costs and VAT. The surveillance contribution that the audit firm has to pay to Consob will not be re-debited. No mechanism is envisaged in order to adjust the fees to changes in the rate of inflation occurring during the 3-year period.

2049

The hours and remuneration relating to the accounting audit of the financial statements also include those pertaining to the activities referred to in Article 155, paragraph 1, letter a) of Legislative Decree 58/1998 concerning checks during the year on regular corporate bookkeeping and on accurate representations of operations in accounting entries.
The fees will only be later adjusted by the Company's Shareholders' Meeting if during the course of the assignment exceptional and unforeseeable events occur such as to make it necessary to adjust the initially agreed consideration, in compliance with the criteria indicated in Consob communication 96003556 of April 18, 1996.

In view of the above, we submit to your approval the following

Agenda

The Shareholders' Meeting of Telecom Italia S.p.A.,

- after examining the explanatory report issued by the Board of Directors,
- after acknowledging the opinions of the Auditors' Committee on (i) the revocation on just grounds of the audit assignment conferred on PricewaterhouseCoopers S.p.A. for the 3-year period 2000-2002 by the Ordinary Shareholders' Meeting held on June 28, 1999 and (ii) the conferral of the new audit assignment,

resolves

1. to revoke – pursuant to Article 159, paragraph 2, of Legislative Decree 58/1998 - the audit assignment previously assigned to PricewaterhouseCoopers S.p.A. for the 3-year period 2000-2002 by the Ordinary Shareholders' Meeting held on June 28, 1999;
2. in accordance with Article 159 of Legislative Decree 58/1998, to confer on Reconta Ernst & Young S.p.A. (listed in the special Register of Audit Firms) an assignment for the accounting audit of the financial statements of Telecom Italia S.p.A. and the consolidated financial statements of the Telecom Italia Group for the 3-year period 2001-2003, determining the consideration due to the said audit firm for each of the financial years as follows: Lire 909,000,000 (corresponding to Euro 469,459.32) for the financial statements of Telecom Italia S.p.A. and Lire 36,000,000 (corresponding to Euro 18,592.45) for the consolidated financial statements of Telecom Italia Group;
3. in accordance with Consob Communication 97001574 of February 20, 1997, to confer on Reconta Ernst & Young S.p.A. an assignment in respect of the limited accounting audit of the half-year statement in individual and consolidated form of Telecom Italia S.p.A. for the 3-year period 2001-2003, determining the consideration due to the said audit firm for each of the aforementioned years at a figure of Lire 109,000,000 (corresponding to Euro 56,293.80);
4. to establish that the consideration referred to above in points 2 and 3 will only be later adjusted by the Company's Shareholders' Meeting if in the course of the assignment exceptional or unforeseeable circumstances arise such as to make it necessary to adjust the initially envisaged consideration, in compliance with the criteria indicated in Consob communication 96003556 of April 18, 1996.

2050

OPINION ON THE PROPOSED REVOCATION OF THE AUDIT APPOINTMENT

To the Stockholders,
The Board of Statutory Auditors of Telecom Italia S.p.A.,

Having stated

- that the statutory financial statements and the consolidated financial statements for the year ended December 31, 2000 of Telecom Italia have been audited by PricewaterhouseCoopers S.p.A. on the basis of the appointment conferred by the Stockholders' Meeting of June 28, 1999 for the three years 2000-2001-2002,
- that on July 4, 2000, the Stockholders' Meeting of OLIVETTI appointed RECONTA ERNST & YOUNG S.P.A. to audit the financial statements for the three years 2001-2002-2003,
- that the early termination of the relationship had already been provided for in the contract between PRICEWATERHOUSECOOPERS S.P.A. and TELECOM ITALIA in September 1999, in order to allow TELECOM ITALIA to make the appointment of the same audit firm as the parent company OLIVETTI,

Notes

- that, on the basis of the decision taken by the parent company OLIVETTI, RECONTA ERNST & YOUNG is the principal auditor of OLIVETTI GROUP for the three years 2001-2002-2003,
- that the auditing standards recommended by Consob require that, in the case of a corporate group, the auditors of the parent company, so that they may act as the principal auditors of the group and express a professional opinion on the financial statements taken as a whole, should perform the audit of the most significant enterprises of the group in terms of operations,

Expresses

a favorable opinion for the revocation for a legitimate reason of the appointment previously conferred to PRICEWATERHOUSECOOPERS S.P.A., in accordance with Legislative Decree No. 58/1998, art. 159, paragraph 2, since – failing to do so – RECONTA ERNST & YOUNG would not be considered as the principal auditors of the OLIVETTI GROUP.

Rome, May 21, 2001 — The Board of Statutory Auditors

2051

OPINION ON THE PROPOSED APPOINTMENT OF THE AUDIT FIRM

To the Stockholders,
The Board of Statutory Auditors of TELECOM ITALIA S.P.A.,

Having stated

- that the Stockholders' Meeting of the parent company Olivetti has, on July 4, 2000, appointed RECONTA ERNST & YOUNG S.P.A. as the audit firm for the three years 2001-2002-2003
- that, for the reason indicated in the previous point, the audit appointment conferred for the years 2000-2001-2002 to PRICEWATERHOUSECOOPERS by the TELECOM ITALIA Stockholders' Meeting held on June 28, 1999 is revoked for a legitimate reason according to Legislative Decree No. 58/1998, art. 159, paragraph 2,
- that the Board of Directors of TELECOM ITALIA has voted on March 30, 2001 to propose to appoint RECONTA ERNST & YOUNG S.P.A. as the auditors of the financial statements of TELECOM ITALIA S.P.A. and the consolidated financial statements of TELECOM ITALIA GROUP for the years 2001-2002-2003, for purposes of ensuring that the audit firm maintains its position as the principal auditors of OLIVETTI GROUP,
- that, to this end, an ordinary Stockholders' Meeting has been called by TELECOM ITALIA to pass the related resolution pursuant Legislative Decree No. 58/1998, art. 159,

Having seen

Legislative Decree No. 58/1998, art. 159, paragraph 1 and art. 80 of the Rules issued by Consob under Resolution No. 11971 of May 14, 1999 and successive amendments

Having examined

the proposal by the audit firm of RECONTA ERNST & YOUNG S.P.A. formulated on March 12, 2001,

Notes

- that said proposal contains the audit plan of the statutory financial statements and consolidated financial statements for the years 2001-2002-2003 for purposes of expressing an opinion pursuant to Legislative Decree No. 58/1998, art. 156 and that such plan is adequate and complete,
- that such proposal contains a description of the procedures used to perform the tests pursuant to Legislative Decree No. 58/1998, art. 155, paragraph 1, letters a) and b) and that such procedures are adequate,
- that the audit firm in question has the requisites of independence called for by law and that there are no situations of incompatibility existing at this time,
- that the audit firm in question has an organization and technical resources sufficient for the size and complexity of the work to be carried out,
- that the fees requested are congruous,
- that, the Audit and Corporate Governance Committee also maintained, in its report presented to the Board of Directors at the time of the approval of the financial statements, that the proposal formulated by RECONTA ERNST & YOUNG S.P.A. is consistent with the standards and the normal conditions applied by the leading audit firms,

Expresses

- a favorable opinion, pursuant to Legislative Decree No. 58/1998, art. 159, paragraph 1, for the appointment of RECONTA ERNST & YOUNG S.P.A. as auditors of the statutory financial statements and the consolidated financial statements for the three years 2001-2002-2003, in conformity with the proposal by the same on March 12, 2001,
- a favorable opinion, as regards the appointment of RECONTA ERNST & YOUNG S.P.A. as auditors of the limited review of the six-month report on the interim statutory financial statements and the interim consolidated financial statements of TELECOM ITALIA for the three years 2001-2002-2003, in accordance Consob Instruction No. 97001574 of February 20, 1997.

Rome, May 21, 2001 — The Board of Statutory Auditors

2052

GIVING THE BOARD OF DIRECTORS THE POWER TO INCREASE THE SHARE CAPITAL IN SUPPORT OF *STOCK OPTION* INITIATIVES; AMENDING ARTICLE 6 OF THE BY-LAWS; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders,

You have been called in extraordinary session to examine, amongst other things, the proposal to give the Board of Directors a fresh power to increase the share capital against payment, with a surcharge, reserving the increase – in accordance with the combined provisions of Articles 2443 and 2441, final paragraph, of the Civil Code and Article 134 of Legislative Decree 58 of February 24, 1998 – for senior managers and other employees of the Company or of parent companies and subsidiaries, who have particular responsibilities and/or skills of relevance to the success of the Company and the Group from a strategic and/or economic angle. Like the previous power originally granted by the Extraordinary Shareholders' Meeting held on December 15, 1998 – which was exercised virtually in full servicing the stock option plans already launched – the proposed power sets out to endow Telecom Italia with a further effective incentive and retention instrument directed towards valued resources for the Company and Group, thereby reflecting general practice at both the national and international level.

The most suitable method of reaching this objective would appear to be to grant subscription rights on newly issued ordinary shares that cannot be transferred *inter vivos ("Options")*, in accordance with the combined provisions of Article 2441, final paragraph, of the Civil Code and of Article 134 of Legislative Decree 58/1988. The price at which the said rights are exercised cannot be lower than the nominal value of the shares and will be established by the Board of Directors, after taking account of the applicable fiscal conditions.

In view of its objectives and characteristics, it is felt that the operation will have a positive impact on company operations, as it will encourage the resources most involved in creating the Company's value to give their best efforts. This will produce positive effects in terms of achieving the planned objectives and it will also favour the performance of the Company's stocks in the market.

If we consider the best interests of the Company and its shareholders, the proposed operation will give rise to exclusion of the option right in relation to a maximum capital increase to the order of approx. 1% of its current total figure.

The initiative may be divided into various plans aimed at managers and other employees of the Company or of parent companies and subsidiaries, who have special responsibilities and/or skills of relevance to the success of the Company and the Group from a strategic and/or economic angle and who will be individually selected by the Board of Directors.

The plans will be implemented in the form of one or more tranches of share capital increases approved by the Board of Directors pursuant to Article 2443 of the Civil Code.

The Board of Directors will establish, also by special rules of implementation, a) the characteristics, terms, conditions and modalities in respect of implementing the plan (or plans) and exercising the Options and b) anything else that may be necessary and advisable with a view to implementing the said plans.

It is also proposed that the duration of the power conferred on the Directors should be set at the maximum period referred to in Article 2443 of the Civil Code, i.e. five years from the date on which this resolution is approved.

In view of the time-span of the power, it is also considered appropriate to set the maximum number of newly issued ordinary shares at 73,000,000, which corresponds to a nominal increase in the share capital of approximately 1% of the current total amount. This will be

2053

subscribed with the surcharge established by the Board of Directors from time to time, whilst also bearing in mind, as previously indicated, the applicable fiscal conditions.
In view of the above, we submit to your approval the following

Agenda

The Extraordinary Shareholders' Meeting of Telecom Italia S.p.A.

- after examining the explanatory report issued by the Board of Directors; and
- in view of the certification of the Auditors' Committee attesting that the current share capital is fully paid in;

resolves

1. to grant the Board of Directors – for a maximum period of five years from the date of this deliberation, pursuant to Article 2443, paragraph two, of the Civil Code – the power to increase the share capital against payment, in one or more instalments, for a maximum nominal figure of Euro 40,150,000 by issuing a maximum of 73,000,000 ordinary shares, with regular dividend, to be offered for subscription to senior managers and other managers of Telecom Italia S.p.A. or parent companies and subsidiaries – who are to be selected individually by the Board of Directors – excluding the right of option in accordance with the combined provisions of Article 2441, final paragraph, of the Civil Code and Article 134 of Legislative Decree 58 of February 24, 1998. Rights to subscribe these shares will be personal and non-transferable *inter vivos*. The resolutions of the Board of Directors will set a special deadline for subscribing the shares and will envisage that, if the deliberated increase is not subscribed within this deadline, the capital will be increased by a figure equivalent to the subscriptions collected within the deadline;
2. to amend Article 6 of the By-laws by adding the following text as the final paragraph: "The Extraordinary Shareholders' Meeting held on ... June 2001 has granted the Board of Directors – for a maximum period of five years from the date of the shareholders' resolution approving the mandate – the right to increase the share capital against payment in one or more instalments by a maximum nominal figure of Euro 40,150,000 by issuing a maximum of 73,000,000 ordinary shares, with regular dividend, to be offered for subscription to senior managers and other employees of Telecom Italia S.p.A. or parent companies and subsidiaries – who are to be selected individually by the Board of Directors – excluding the right of option in accordance with the combined provisions of Article 2441, final paragraph, of the Civil Code and Article 134 of Legislative Decree 58 of February 24, 1998. Rights to subscribe these shares will be personal and non-transferable *inter vivos*. The resolutions of the Board of Directors will set a special deadline for subscribing the shares and will envisage that, if the deliberated increase is not subscribed within this deadline, the capital will be increased by a figure equivalent to the subscriptions collected within the deadline";
3. to reserve the capital increase to be deliberated by the Board of Directors in one or more instalments, on the basis of the power referred to in point 1, to implementing one or more stock option plans aimed at senior managers and other employees of Telecom Italia S.p.A. or parent companies and subsidiaries – in accordance with any provisions that may be laid down in any special regulation(s) - who will be selected individually by the Board of Directors;

2044

4. to authorise the Board of Directors, with reference to the aforementioned power to increase the share capital, to determine the price at which the shares are issued, bearing in mind the relevant fiscal provisions and in any case at a unit figure no lower than the nominal value;
5. to authorise the Board of Directors to draw up one or more rules of implementation reflecting the various stock option plans;
6. to empower the Board of Directors, and on its behalf, the Chairman and Deputy Chairman, if needs be on a separate basis:
   - to amend, whenever necessary, Article 6 of the By-laws as a result of the deliberations, execution and finalisation of the capital increase as authorised above, arranging to this end to comply with any formalities and public notices envisaged by the law;
   - to meet any other formality required in order that the approved deliberations are registered in the Register of Companies, accepting and introducing in them any non-substantial changes, additions or cancellations that may be requested or recommended by the competent Authorities.

2045

AMENDING ARTICLE 9, PARAGRAPH 2, OF THE BYLAWS, FOLLOWING THE WITHDRAWAL OF THE PREVIOUS AUTHORISATION AND THE DELEGATION OF RENEWED POWERS TO THE BOARD OF DIRECTORS TO ISSUE DEBENTURES PURSUANT TO ARTICLE 2420 TER OF THE ITALIAN CIVIL CODE; AMENDING ARTICLE 12, PARAGRAPH 4 (PROCEDURES REGULATING THE HOLDING OF BOARD MEETINGS) AND ARTICLE 17 (APPOINTMENT OF THE AUDITORS' COMMITTEE) OF THE BYLAWS; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders

The Extraordinary Shareholders' Meeting provides an opportunity to deal with a series of amendments aimed at updating the by-laws in such a way as to take account of (i) regulatory developments and (ii) the need to endow Telecom Italia with instruments geared to ensure maximum flexibility in operations in the face of rapidly changing markets.

In this spirit, you are asked to revise the clauses concerning the appointment of the Auditors' Committee (Article 17), the withdrawal of the current power on the Board of Directors to issue debentures – insofar as it has not been used – and its renewal (Article 9, paragraph 2, of the By-laws), and you are also asked to redefine procedures regulating the holding of board meetings (Article 12, paragraph 4, of the By-laws).

Auditors' Committee

As far as the Auditors' Committee is concerned, in Ministerial Decree DM 162 of March 30, 2000 the Ministry of Justice, in conjunction with the Ministry for Budget and Economic Planning – after consulting Consob, Banca d'Italia and ISVAP – approved "Regulations containing rules for establishing the professional and honourable requisites of members of the auditors' committee of listed companies, to be issued on the basis of Article 148 of Legislative Decree 58 of February 24, 1996".

The measure directly regulates honourable requisites and confirms the previous requisite of professionalism which consists of exercising the activity of legally auditing accounts, this being required for a period of no less than three years; in particular, at least one or two regular auditors must meet this requisite (as well as one supply auditor), depending on whether the committee consists of three or more members. Since the regular and supply auditors of Telecom Italia have the aforesaid requisites, they can all therefore remain in office and duly proceed with the 3-year mandate conferred on them by the Ordinary Shareholders' Meeting held on July 3, 2000.

However, the same measure introduces other requisites qualifying the professionalism of auditors to be elected, in relation to the quota not reserved for official accounting auditors. In particular, alternative professional requisites to the activity of exercising the activity of legally auditing accounts have been envisaged. These include – in addition to administration, audit or management experience with joint-stock companies with a share capital of no less than Euro two million – experience for at least 3 years exercising "professional activities and full-time university teaching in legal, economic, financial and technical/scientific subjects closely linked to the enterprise's activity" or alternatively "management duties with public entities or administrations operating in the banking, financial and insurance sectors or in sectors closely linked to the enterprise's activity" (see Article 1, paragraph 2, letters b and c, of the Ministerial Decree). In this respect, the description of the subjects and sectors of activity closely linked to the enterprise's activity referred to above is left to the discretion of the by-laws, and you are therefore asked to approve amendments of the By-laws on this point.

2046

In view of the fact that the presence in the Auditors' Committees of a minimum number of Auditors having the specific requisite of professionalism pertaining to the activity of legally auditing accounts (Article 1, paragraph 1, of the Ministerial Decree) must be guaranteed, amending the By-laws to the new rules also means that the clauses relating to procedures regulating the appointment of the Auditors' Committee will have to be integrated.

Power to issue debentures

As far as the power to issue debentures is concerned, this will be a question of confirming the solution already adopted by the Extraordinary Shareholders' Meeting held on April 30, 1997, whilst also bearing in mind the fact that the existing power expires in April 2002. To this end, it is proposed that this power should be withdrawn insofar as it has not been used and at the same time that a new power should be conferred guaranteeing the maximum possible extension of the power in terms of duration (five years from the time the resolution is passed), subject-matter (convertible and non-convertible debentures) and quantity (the maximum limits envisaged by current rules).

Procedures regulating the holding of board meetings

As far as procedures regulating the holding of board meetings are concerned, the proposed solution is the logical consequence of the choice previously made, by including in the By-laws the possibility of making use of the video-conference facility. Practice has confirmed how very useful this instrument has been - especially at a time when so many meetings of the Board of Directors are being held - as a result of the corporate governance policies adopted by Telecom Italia. You are therefore asked to allow for meetings to be held also using the audio-conference facility, whilst maintaining the necessary precautions in terms of identifying those taking part and guaranteeing an effective debate.
The comparative exposition of the by-law articles for which amendments are proposed – pursuant to Consob Resolution 11971/1999 – is shown in the text of the proposed resolution set forth hereafter.

In view of the above, you are asked to examine the following

Agenda

The Extraordinary Shareholders' Meeting of Telecom Italia S.p.A.

- after considering the power to issue debentures pursuant Article 2420 *ter* of the Civil Code conferred on the Board of Directors by the Extraordinary Shareholders' Meeting held on April 30, 1997;
- after considering recent corporate practice with regard to procedures regulating the holding of board meetings;
- after considering Decree 162 of the Ministry of Justice of March 30, 2000;

2047

resolves

1. to withdraw the power conferred on the Board of Directors under the resolution of the Extraordinary Shareholders' Meeting of April 30, 1997, insofar as it has not been used;
2. to confer on the Directors, for a maximum of five years from the date on which this deliberation is approved, pursuant to Article 2420 *ter* of the Civil Code, the power to issue debentures in one or more instalments, up to the maximum amount permitted by current rules;
3. consequently to amend Article 9, paragraph 2, of the By-laws as follows:

Current wording	New wording
In accordance with Article 2420 *ter* of the Civil Code, the Board of Directors is authorised, for a maximum period of five years from April 30, 1997, to issue debentures in one or more instalments, for up to an amount that does not exceed the limit referred to in Article 2410, paragraph 1, of the Civil Code.	In accordance with Article 2420 *ter* of the Civil Code, the Board of Directors is authorised, for a maximum period of five years from ... June 2001, to issue debentures in one or more instalments (if needs be in the form of convertible debentures), for up to the maximum amount permitted by current rules.

4. o modify Article 12 of the By-laws, amending paragraph four as follows:

Current wording	New wording
Meetings of the Board of Directors – should the Chairman ascertain the need and provided that there is no objection on the part of at least two directors – may be validly held by video-conference, provided that the persons authorised to attend by video-conference are precisely identified and everyone is given a chance to intervene orally, in real time, on all matters and that they are able to inspect, receive and transmit documents; however, at least the Chairman and the Secretary must be present in the place of convocation chosen for the meeting where the meeting of the Board of Directors will be held to have taken place.	Meetings of the Board of Directors – should the Chairman or anyone acting in his place ascertain the need – may be validly held by video-conference or by audio-conference, on condition that all those taking part can be identified by the Chairman and by all the other participants, that they are allowed to follow the debate and intervene in real time in dealing with the matters being discussed, that they are allowed to exchange documents pertaining to such matters and that the above situation is fully recorded in the relevant minutes. Once the above assumptions have been verified, the Board meeting will be held to have taken place where the Chairman is located and where the Secretary to the meeting must also be.

5. to amend Article 17 of the By-laws as follows:

Current wording	New wording
The Auditors' Committee is formed by no less than five and no more than eight regular members. The Shareholders' Meeting will determine the number of members of the Committee and this number will remain unchanged until otherwise decided. The Shareholders' Meeting will also appoint two supply auditors.	Paragraph unchanged

2048

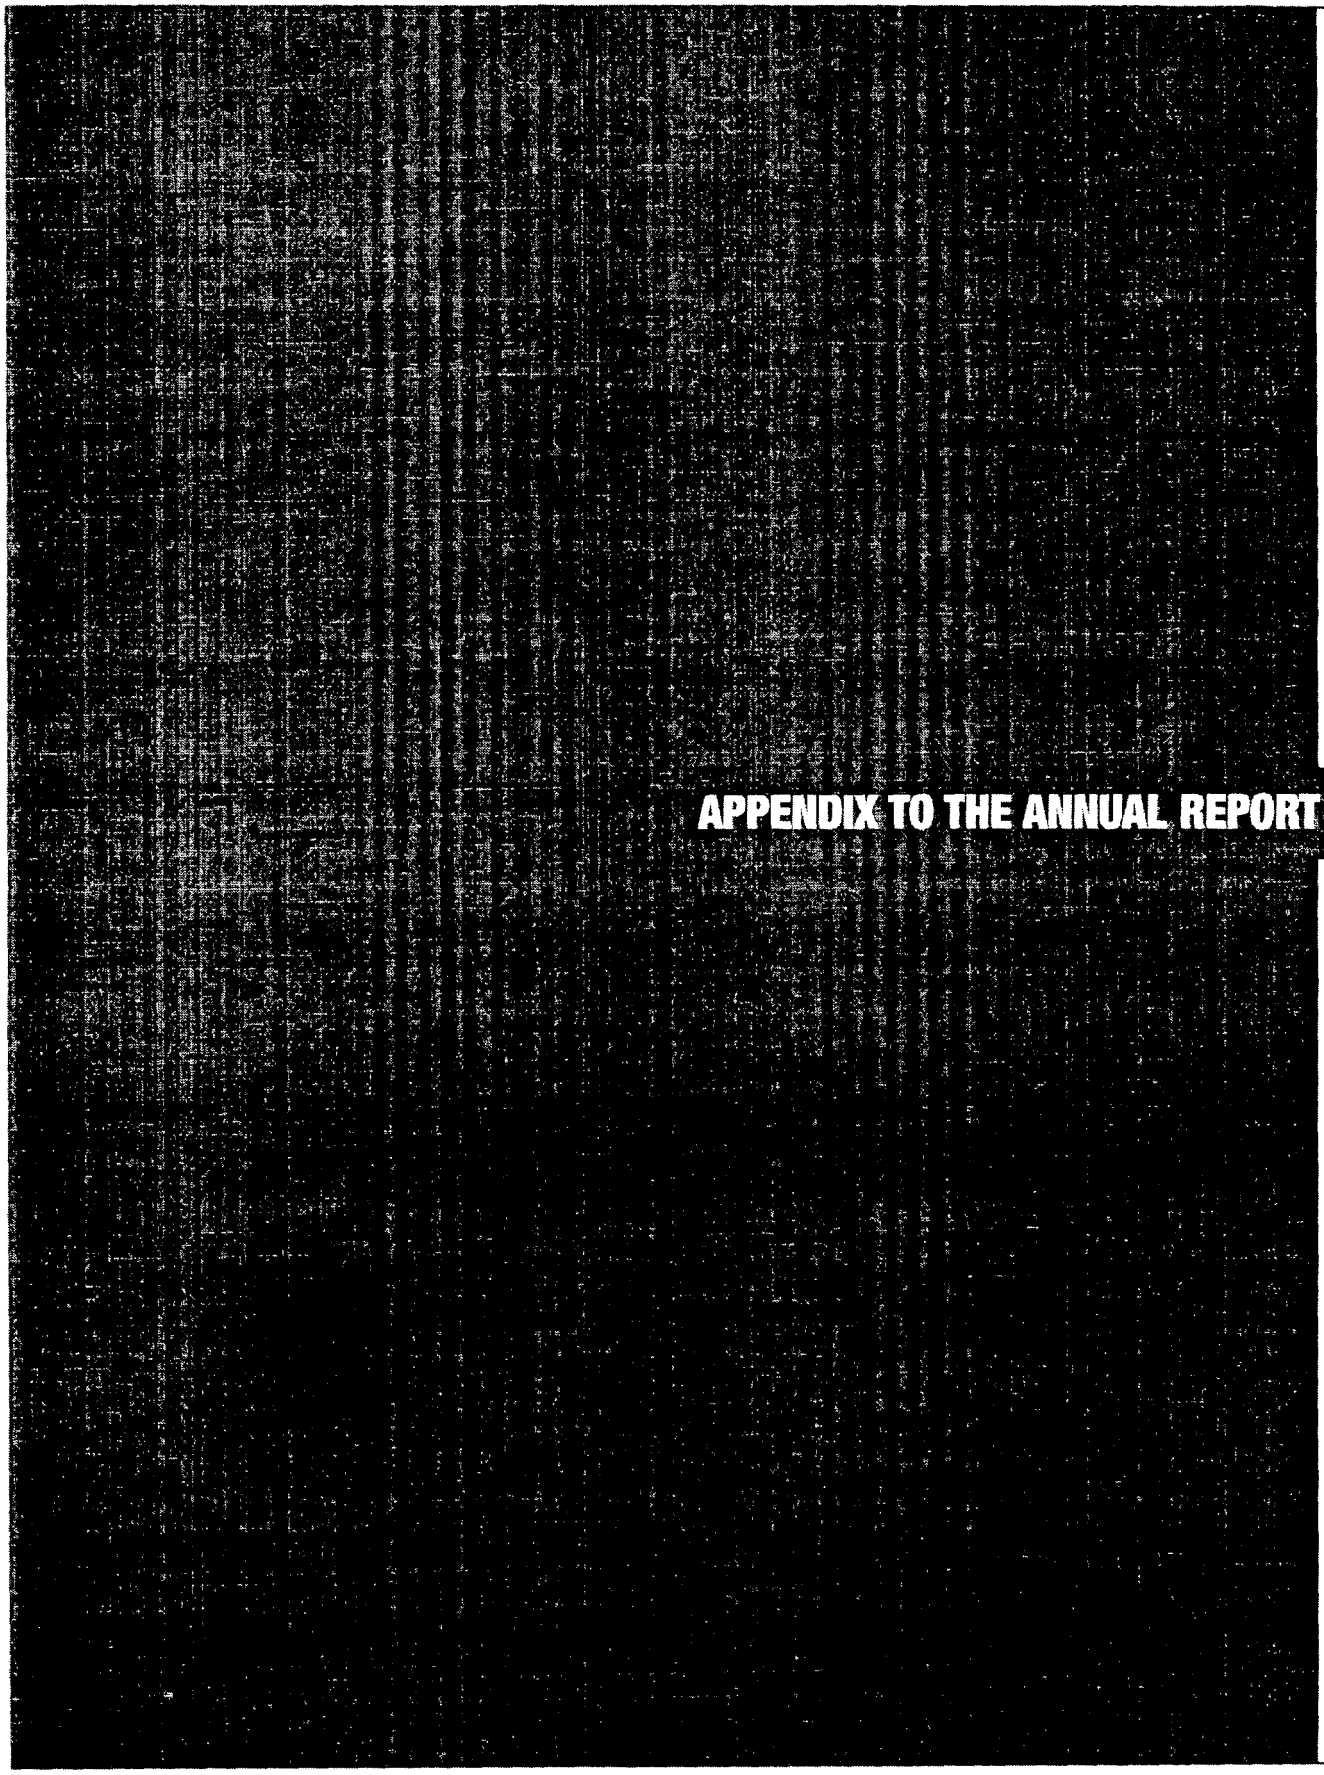
For appointments and designations referred to in this Article, account will also be taken of special provisions of a legislative, statutory or regulatory nature or of any provisions that may be envisaged under convention.	Paragraph unchanged
Without prejudice to the provisions of the preceding paragraph, the Auditors' Committee will elect a Chairman from its regular members on a majority vote.	Paragraph unchanged
Without prejudice to situations of incompatibility envisaged by the law, any persons who occupy the position of regular auditor in more than five companies listed in regulated Italian markets may not be appointed as auditors and, if elected they will forfeit the appointment; in this limit TELECOM ITALIA S.p.A. and its subsidiaries are not to be considered.	Paragraph unchanged
	For the purposes of the provisions of Article 1, paragraph 2, letters b) and c), of the rules referred to in Decree 162 of the Ministry of Justice of March 30, 2000, the following sectors of operation and subjects are held to be closely linked to that of the Company: telecommunications, information technology, computer technology, electronics and multimedia technology, as well as subjects inherent in private law and administrative legal disciplines, economic disciplines and disciplines relating to company organisation.
The appointment of the Auditors' Committee – without prejudice to the powers of appointment and designation referred to in paragraph two above – takes place on the basis of lists presented by shareholders in compliance with legal provisions envisaging the election of regular members on the part of the minority; in this case the procedure envisaged by the By-laws for appointing the Board of Directors will apply. One supply auditor will be taken from the minority list that has obtained the highest number of votes.	Paragraph unchanged

2049

	To this end, the lists will be divided into two sections: one for candidates to the position of regular auditor and the other for candidates to the position of supply auditor. The first of the candidates of each section must be selected from members of the register of chartered accountants who have exercised the activity of legally auditing accounts for a period of no less than three years.
The appointment of auditors required to replenish the Committee pursuant to Article 2401 of the Civil Code will be made by the Shareholders' Meeting in accordance with the majorities laid down by law, without prejudice to the powers of appointment and designation referred to in paragraph two above.	Paragraph unchanged
After informing the Chairman of the Board of Directors, the Auditors' Committee – or at least two regular auditors – may convene, in accordance with the law, the Board of Directors or the Executive Committee.	Paragraph unchanged

6. to confer on the Chairman and Deputy Chairman of the Board of Directors, if needs be on a separate basis, the powers required to meet any necessary formalities in order that the adopted deliberations are registered at the Companies Register, accepting and introducing in such deliberations any non-substantial amendments, additions or cancellations that may be required or recommended by the competent Authorities.

2050



APPENDIX TO THE ANNUAL REPORT

2051

ADDITIONAL INFORMATION FOR US INVESTORS ON THE CONSOLIDATED FINANCIAL STATEMENTS AT DECEMBER 31, 2000 OF THE TELECOM ITALIA GROUP

Introduction

As a result of the listing of the Telecom Italia ordinary and savings shares on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADSs), each of which represents 10 Telecom Italia shares, the company is required to file an annual report on Form 20-F as required under the regulations of the Securities and Exchange Commission (SEC).

The annual report on Form 20-F must be made available to investors in all of its markets in order to provide identical information. This document will include, among other information, a reconciliation to US Generally Accepted Accounting Principles (US GAAP) of the net income for the years ended December 31, 1998, 1999 and 2000 and stockholders' equity at December 31, 1999 and 2000. Telecom Italia's annual report to stockholders has been expanded to include the accounting information related to the reconciliation together with the 2000 condensed consolidated balance sheet and statement of income.

For purposes of convenience of the reader the 2000 figures included in the consolidated financial statements and the reconciliation to the US GAAP are shown in billions of lire, as well as in millions of USD, converted at the rate in effect on March 30, 2001: Lire 2,201.80 = USD 1.

2056

RECONCILIATION TO GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE US (US GAAP) OF CONSOLIDATED NET INCOME FOR THE YEARS ENDED DECEMBER 31, 1998, 1999 AND 2000 AND CONSOLIDATED STOCKHOLDERS' EQUITY AT DECEMBER 31, 1999 AND 2000

The consolidated financial statements of the Telecom Italia Group are prepared in accordance with accounting principles established or adopted by the Italian Accounting Profession, which differ in certain significant respects from US GAAP. The comments on the significant differences are as follows:

Goodwill deriving from Stet - Old Telecom Italia merger

During 1997, Old Telecom Italia was merged with and into STET (which was renamed Telecom Italia). Under Italian GAAP, the combination was accounted for as a merger and the financial statements reflected the ownership change based on the net book value of the combined entities. For Italian GAAP purposes, the merger was recognized as of January 1, 1997. Under US GAAP, the combination was accounted for as a purchase, effective as of July 18, 1997. The assets and liabilities of Old Telecom Italia were recorded at fair value. The excess of the purchase price over the fair value of net assets was recorded as goodwill. This is being amortized until 2012, which represented the residual license period at the time of the merger.

Purchase method accounting transactions

Several pre-1997 transactions, which are required to be accounted for under the purchase method of accounting for US GAAP purposes, have been recorded differently under Italian GAAP:

- *Old Telecom Italia formation* - Upon the formation of Old Telecom Italia in 1994, Telecom Italia's ownership percentage in the combined companies was diluted. The Italian GAAP financial statements reflected the ownership change impact based on the net book value of the combined entities, while US GAAP required the ownership change to be treated as a purchase, at fair value. For US GAAP purposes, the difference between fair value and book value is being amortized until 2012, which represented the residual license period at the time of the formation.
- *Ownership change in Old Telecom Italia* - In 1994, Telecom Italia increased its ownership in Old Telecom Italia by receiving previously unissued stock and its Italian GAAP financial statements reflected this transaction as an equity reduction for the excess of the investment over the ownership percentage of Old Telecom Italia's book value. The US GAAP reconciliation treats this excess as an asset to be amortized over 19 years.
- *Investment in Telsi* - In 1995, Telecom Italia and Siemens A.G. each contributed assets for a fifty percent non-controlling interest in Telsi Limited. The Italian GAAP financial statements reflected a gain based on the original book value of the investments contributed while for US GAAP purposes the transaction has been accounted for using the fair market value of the investments contributed. The US GAAP reconciliation reflects the amortization of the underlying basis difference between Telecom Italia's investment in Telsi and Telsi's recorded equity. This was fully amortized at December 31, 1999.

2057

Revaluation of fixed assets

The Group has revalued its fixed assets as permitted by Italian Law. Under Italian GAAP the depreciation charge is based on the revalued amounts. US GAAP does not permit revaluation of fixed assets and requires depreciation based on historical acquisition cost.

Elimination of intercompany profit on sales of intangibles and fixed assets and related depreciation

Until 1993, the Group did not eliminate intercompany profit on sales of intangibles and fixed assets. Therefore, certain intangibles and fixed assets are valued at the sales amount instead of historical book value. The amounts, principally from manufacturing and installation companies to telecommunication companies, are being depreciated over the useful life of the assets. US GAAP requires the elimination of intercompany profits and requires depreciation based on historical cost.

Capitalization of interest on tangible and intangible assets under construction

The Group capitalizes interest on construction projects only when specific borrowings can be attributed to the project. US GAAP requires interest to be capitalized on both tangible and intangible assets regardless of whether specific borrowings relate to the project. The capitalized interest is being depreciated over the remaining useful life of the assets.

Deferred taxes

The differences between Italian GAAP and US GAAP are related to the tax treatment for capital grants received by the Group prior to 1998.

Contributions to telephone workers social security fund

Pursuant to Italian laws, the Group has not recorded a liability for contributions due to the INPS. US GAAP requires the recognition of a liability when it is probable and can be reasonably estimated. Accordingly, the minimum amount of the range of the liability is reflected in the US GAAP reconciliation net of any payments made and expensed through the Italian GAAP income statement.

Accounting for long-term contracts under the percentage of completion method

Prior to 1999 the Group recognized revenues for its long – term contracts under the completed contract method. In 1999, the Group changed its accounting principle and started accounting for these contracts using the percentage of completion method. This is consistent with US GAAP.

2058

Stock options

During 1999 and 2000, Telecom Italia and TIM awarded shares and granted stock options to certain managers. For purposes of Italian GAAP, the above transactions are treated by the Group as changes in share capital and additional paid-in-capital. For US GAAP purposes the Group uses Accounting Principles Board Opinion ("APB") No. 25, "Accounting for Stock Issued to Employees". Under APB No. 25, these transactions are treated as compensation expense for the difference between the quoted market price of the shares and the cost of those shares to the managers. This difference is determined on the "measurement date", which is the first date on which both the ultimate number of shares and the option or award prices are known.

Restructuring reserve

The Italian GAAP financial statements include a restructuring reserve made during the year 2000 as part of a group plan to reduce the workforce and re-train employees. US GAAP requires that certain conditions must be met before a restructuring accrual can be established, as well as the type of costs, which can be accrued. Training costs included within the accrual do not meet these conditions, and therefore the US GAAP reconciliation reflects an adjustment to eliminate this amount.

Investments in marketable equity securities

Telecom Italia Group holds marketable equity securities of unrelated companies both for the purpose of selling them in the near term as well as holding them to take advantage of investment opportunities.
Under Italian GAAP, all investments are carried at the lower of cost or market value. Write-downs below historical cost are reversed in subsequent periods up to original cost if the fair market value of the securities increases.
Under US GAAP, the securities would be classified as trading and available for sale, respectively. The Group's trading securities are recorded at fair market value, with unrealized gains and losses included in earnings.
Available for sale securities would be carried at fair market value, with any unrealized holding gains or losses each balance sheet date being reflected in other comprehensive income on a net of tax basis. Declines in fair value that are other than temporary are reflected in the consolidated statement of income.

Investment in stock of subsidiary companies

Telecom Italia Group has purchased, sold and holds stock of certain consolidated subsidiaries and records these investments within current assets. The portion of the earnings, losses and the ownership interest in the net assets associated with such stock is not consolidated under Italian GAAP. The equity securities are recorded at the lower of historical cost or fair market value within current assets. Write-downs below historical

2059

cost are reversed in subsequent periods up to the original cost, if the fair market value of the equity securities increases. Write-downs and any subsequent reversals are recorded in the income statement.

Under US GAAP, the value of the investment in subsidiary stock has been adjusted to original cost and has been eliminated upon consolidation of the Group. The elimination of the investment results in additional goodwill, the reversal of any write-downs taken under Italian GAAP, and the accrual of the incremental income or losses from the additional ownership percentage being consolidated.

SEAT-Tin.it transaction

In 2000, several significant events occurred with the acquisition of a controlling interest in SEAT, giving rise to the following differences:

- In February 2000, the Group announced its intention to acquire a controlling interest in SEAT Pagine Gialle S.p.A., the publisher of the Italian yellow pages. The acquisition was made with a combination of cash and the issuance of shares in Telecom Italia's wholly owned internet subsidiary, Tin.it, to SEAT. For purposes of Italian GAAP, the transaction was accounted for as an acquisition using purchase accounting for the cash portion of the acquisition, and as a pooling of interest for the exchange of shares. For purposes of US GAAP the acquisition, including the shares exchanged, was accounted for at fair value. For US GAAP purposes the distribution of the subsidiary's shares to SEAT generated a gain of Lire 12,657 billion for the difference between the fair market value of the SEAT shares received and the book value of the subsidiary's shares issued. Additionally, Seat shares were issued directly to Telecom Italia shareholders in exchange for 8.168 percent of the wholly-owned subsidiary's shares, which has been accounted for as a dividend at fair value, generating a gain of Lire 2,574 billion.
- For purposes of Italian GAAP, the SEAT acquisition was considered effective as of December 31, 2000. For purposes of US GAAP, the acquisition was considered effective as of October 1, 2000, the date that operating control of SEAT passed to Telecom Italia. Therefore, an adjustment has been recorded to account for the fourth quarter results of SEAT.
- Under the US GAAP purchase accounting requirements, the fair market value of the SEAT acquisition was Lire 31,028 billion. Included in this amount was acquisition goodwill relating to Seat Pagine Gialle of Lire 26,787 billion. From the date at which the acquisition was announced until the end of the fiscal year, the market valuations of hi-tech companies, in particular those associated with internet activity, were severely reduced. The reduction was considered a possible indication of impairment, thereby requiring an analysis of Seat based upon SFAS 121. Based on this review, an impairment charge of Lire 15,424 billion was recorded to income to reduce the value of the SEAT investment.
- After the acquisition of SEAT by the Group, Seat made additional acquisitions in the fourth quarter of 2000. These acquisitions were done through the issuance of additional Seat shares for the targets stock. For purposes of Italian GAAP, these transactions were recorded as equity movements. For purposes of US GAAP, the dilution effect on Telecom Italia's shareholding percentage in SEAT resulted in a gain.

2060

Sale of real estate portfolio

During the year 2000 the Group transferred certain real estate properties to a wholly owned subsidiary ("IM.SER"), which was then partially sold to third parties. Concurrent with the sale, the Group entered into a lease agreement for part of the portfolio. After the partial sale of the subsidiary, IM.SER borrowed funds from a syndicate of banks, with the funds being dispersed to the shareholders as a special dividend. For purposes of Italian GAAP, a gain was recognized to the extent of the fair market value of the transferred property over its historical cost for that portion sold to third parties. For purposes of US GAAP, the transfer of the assets to the wholly owned subsidiary, the subsequent lease agreement and the receipt of cash by the Group from the partial sale and the special dividend are treated as a secured borrowing, therefore no gain recognition is allowed.

Non-capitalizable expenses

The Group entered into several transactions in 2000 for which certain costs were capitalized under Italian GAAP. These costs include expenses related to the SMH transaction, and non-capitalizable costs associated with intangible assets. For purposes of US GAAP, these costs are not considered to be capitalizable, therefore they have been expensed.

Reversal of provisions

During the year 2000, due to the technological changes in the mobile phone industry, TIM determined that the invested cost related to analogic services, and the related network plants and billing systems, was rapidly approaching obsolescence due to the evolution of third generation services. The Italian GAAP financial statements reflect reserves for Lire 775 billion taken to accrue the estimated costs to rework these systems. US GAAP requires that certain conditions must be met before reserves can be established. These conditions, which are stricter and more formal based on US GAAP, have not been met, therefore, in the US GAAP reconciliation these provisions have been reversed.

Subsidiary stock conversions

In the course of 2000 two publicly traded subsidiaries, SEAT and TIM, each conducted share conversion offers related to their outstanding savings shares, a non-voting class of shares. As part of the conversion offering, holders of savings shares paid a premium to the applicable subsidiary and in return converted their savings shares to common voting shares. These transactions resulted in a net increase in the book value of each subsidiary over and above Telecom Italia's proportionate investment.
For purposes of Italian GAAP, these gains were accounted for as equity movements. For purposes of US GAAP, these gains are recognized as non-operating gains in the income statement.

2061

Revenue Recognition

Under Italian GAAP, non-refundable activation and installation fees and related costs are generally charged and recognized at the outset of a service contract. Under US GAAP, up front revenues related to non-refundable fees and certain related direct costs must be deferred and recognized over the expected customer relationship period, which is estimated to be 8 years.

Common control transactions

During 2000, Telecom Italia acquired an additional ownership percentage of TIM by contributing its ownership of SMH to TIM in exchange for new shares issued by TIM. Under Italian GAAP, this transaction resulted in an increase in equity and goodwill. As the timing of this transaction was near December 31, 2000, no amortization of the goodwill occurred in the Italian GAAP financial statements.
Under US GAAP, transactions between entities under common control require predecessor basis accounting. Therefore, the 2000 increase in equity and goodwill has been reversed.

Treasury stock

Telecom Italia has purchased and held as at December 31, 2000 its own savings shares. Under Italian GAAP, these savings shares are recorded at historical cost within long-term investments. Under US GAAP, the cost of the acquired shares is shown as a deduction from stockholders' equity.

Significant differences and the effect of the above on consolidated net income and stockholders' equity are set out below:

2062

	1998 (billions of Lire)	1999 (billions of Lire)	2000 (billions of Lire)	2000 (millions of USD)

Diluted EPS – per Savings Share amounts in accordance with US GAAP	412	407	933	0.42

(*) The approximate earnings per share amounts have been calculated using the two class method due to ordinary and savings shares being outstanding, as set forth in SFAS No. 128, "Earnings Per Share". The calculations take into account the requirement that Savings Share stockholders are entitled to a Lire 20 premium (based on 2 percent of Savings Share par value) over dividends on Ordinary Shares. This taking into account the par value of Lire 1,000 per share as of December 31, 2000; following the resolution of the extraordinary stockholders' meeting held on May 3, 2001, regarding the re-denomination of Telecom Italia share capital into euros, the new par value per share is equal to Euro 0.55. For purposes of these calculations the weighted average number of Shares was 7,421,251,726 as of December 31, 1998, 7,421,660,518 as of December 31, 1999 and 7,398,247,829 as of December 31, 2000.

2066

CORPORATE GOVERNANCE

Corporate governance is an issue that Telecom Italia has been addressing in earnest since 1997, when for the first time ever the Board of Directors set up internally a special Audit and Corporate Governance Committee (November 28, 1997). Since then, the Company has expounded its decisions on this issue in special documents and it has continued to update these decisions to keep abreast of developments in the operating framework. The model code of self-discipline produced at the recommendation of Borsa Italiana S.p.A. (autumn 1999) has thus represented a further incentive and an important opportunity for verification.

Telecom Italia introduced its own Code of Self-discipline (approved in its final wording by the Board of Directors on April 4, 2000) and, enforcing a special provision contained in this Code, it introduced Rules regulating shareholders' meetings (approved by the Ordinary Shareholders' Meeting held on October 20, 2000). These rules were deposited at the Companies Register and have been published – together with the Code of Self-discipline and the By-laws – in the Internet site http://www.telecomitalia.it. A special printed version is also available to anyone who requests it.

The Company's governance structure is described in the By-laws and in the Code of Self-discipline; currently it focuses mainly on the Board of Directors, the Chairman and Chief Executive Officer, the internal committees of the Board of Directors, the Auditors' Committee and – of course – the Shareholders' Meeting.

During the course of 2000, ordinary shareholders met four times, while savings shareholders were only once convened to a Special Meeting. By-law rules in this respect have been changed to allow for the approval of Rules regulating Shareholders' Meetings and "provisions aimed at facilitating the collection of voting proxies from employees holding shares", as permitted by Legislative Decree 58/1998 (Extraordinary Shareholders' Meeting held on August 10, 2000). Both these measures come under the framework of the spirit of the Code of Self-discipline, insofar as they aim to encourage broad and effective participation on the part of shareholders in the life of the Company. In this respect, it should be stressed that the By-laws also envisage the possibility of exercising the right to vote by mail.

The Board of Directors (elected by the Shareholders' Meeting held on 28th June 1999) consists of thirteen members, one of whom is appointed by the Government Authority pursuant to the special powers envisaged by Article 5 of the By-laws. The list vote mechanism applied to renew the Governing Body has ensured that minority shareholders are represented on the Board. There is only one Executive Director, i.e. the Chairman and Chief Executive Officer.

In 2000, seventeen board meetings were held, in which representatives of management (and sometimes consultants) usually contributed towards illustrating and examining in depth the matters up for discussion. The business of the Board of Directors gave the Chairman and Chief Executive Officer an opportunity to report on the fulfilment of mandates received and, more generally, it enabled the Governing Body to provide the information required by the Auditors' Committee. In this respect special emphasis was attached (in accordance with the law, By-laws and relevant Consob recommendations) to the most important economic, financial and asset-related operations conducted by Telecom Italia or by subsidiaries, operations involving a potential conflict of interest, inter-group operations or operations with related parties, and any non-typical or unusual operations compared to the enterprise's normal business. Meetings were normally preceded by the delivery of explanatory information to Directors and Auditors.

Last year, the Auditors' Committee (renewed on July 3, 2000 applying the list voting mechanism) met fourteen times. The Company has made available a permanent structure

2067

to support the Committee in fulfilling its regular functions. Through its Chairman, the Committee also attends meetings of the internal audit and corporate governance committee. Committees set up within the Board (the internal audit and corporate governance committee and the directors' remuneration committee) have carried out functions in terms of (i) providing investigative and consultative services and (ii) putting forward proposals to the Governing Body. The solution adopted by the Code of Self-discipline is to leave committees broad margins of autonomy in defining their rules of operation. This flexibility has facilitated the flow of information and interaction between committees (also in terms of members) and the corporate structure, producing greater efficiency and speed in results. The internal committees (sometimes aided by contributions from non-committee Directors and/or management representatives) have thus also come to acquire specific investigation mandates in respect of matters inherent in the institutional responsibilities conferred by the Code of Self-discipline. In particular, the directors' remuneration committee has been entrusted with making a prior assessment of retention initiatives and management incentive schemes.

In fulfilling their functions, both the Auditors' Committee and the internal audit and corporate governance committee, each in its own domain, have had special meetings with the audit firm PricewaterhouseCoopers, and also with the corporate structures responsible for internal auditing (Internal Auditing Division), dedicating special meetings to issues of particular importance. In this respect, it should be stressed that the question of internal auditing and procedures has been the subject of special attention on the part of the Company.

Finally, a special mention should go to the policy adopted by Telecom Italia in its relations with the market, as this is a significant aspect of the decisions of a company's corporate governance. Here, the Company is making every effort to maintain an ongoing dialogue with shareholders as a whole and with the world of finance, in compliance with current rules. To this end, corporate organisation features a special Investor Relations Function in the framework of the Corporate Image and Communication Division and special instruments have been adopted (the toll free number dedicated to shareholders, but also the special section of the Internet site http://telecomitalia.it) dedicated to relations with shareholders and investors. These instruments are designed to ensure the provision of accurate, complete, homogeneous and ongoing information.

2068

RESPONSIBILITIES

Board of Directors

The Board of Directors of Telecom Italia is solely and exclusively responsible for matters that cannot be subject to delegation pursuant to Article 2381 of the Civil Code. In addition,

(a) it draws up and adopts rules for the Company's corporate governance and defines guidelines for the Group's corporate governance;
(b) it examines and approves the Company's and the Group's strategic, industrial and financial plans;
(c) it evaluates and approves the Company's and the Group's annual budget;
(d) it evaluates and approves the periodical financial reports contemplated by current rules;
(e) it examines and approves investments and disinvestments (including real estate operations) for figures in excess of Lire five hundred (500) billion;
(f) it examines and approves operations (including, purely for the sake of example, acquisitions and disposals of direct or indirect majority interests) of particular economic and strategic interest, with special reference to operations with related parties;
(g) it confers and revokes powers vested in the Chairman and Chief Executive Officer and in the Executive Committee, in cases where this has been set up, establishing the limits, modalities and frequency - usually no less than every three months - with which the delegated organs must report to the Board on the activity carried out in the course of exercising the powers conferred on them;
(h) it arranges to appoint the chief executive officer and the chairman of subsidiaries whose turnover – based on the latest available financial statements – is equal to or higher than Lire two thousand (2,000) billion;
(i) at the proposal of the Chief Executive Officer, it makes arrangements in respect of appointing and removing the Company's General Managers and granting them powers;
(j) after examining the proposals of a special committee and after consulting the Auditors' Committee, it establishes the remuneration due to the Chief Executive Officer and to persons occupying special positions, and it also establishes, if the Shareholders' Meeting has not already so provided, the breakdown of the total remuneration due to individual members of the Board and of the Committees;
(k) it monitors the general progress of operations, with special stress on situations involving a conflict of interest, taking special account of information provided by the Chief Executive Officer and the internal audit committee, whilst also comparing the results achieved with those planned;
(l) it verifies the adequacy of the general administrative and organisational structure of the Company and the Group prepared by the Chief Executive Officer;
(m) it arranges to modify, renew and enter into agreements with the Ministry of Communications.
(n) it reports to the Shareholders' Meeting.

Chairman and Chief Executive Officer

The Chairman and Chief Executive Officer is vested with

- legal representation and the company signature;
- the task of updating the Auditors' Committee on the activity carried out and on the most important economic, financial and asset-related operations carried out by the Company and by the Group, in the manners and terms envisaged by Article 13 of the By-laws;
- all the Company's powers of ordinary and extraordinary administration (including the power to appoint proxies *ad negotia* for single deeds or series of deeds) with the sole exclusion of powers reserved for the Board of Directors, which he may however exercise in cases of urgency, subject to later informing the Board at its next meeting).

Deputy Chairman

The Deputy Chairman is vested with the company signature and with legal representation of the Company solely in cases where the Chairman and Chief Executive Officer is impeded or absent.

Internal committees

The following committees have been set up within the Board of Directors

- a Directors' Remuneration Committee. This committee puts forward proposals to the Board concerning the remuneration due to the Chief Executive Officer and to directors occupying special positions, and also, at the recommendation of the Chief Executive Officer, concerning the establishment of criteria for remunerating the Company's senior management;
- an Internal Audit and Corporate Governance Committee. This committee
  (a) evaluates the adequacy of the internal auditing system;
  (b) evaluates the work programme prepared by those in charge of internal auditing and receives periodical reports from them;
  (c) evaluates proposals advanced by the audit firm with a view to receiving the relevant assignment, along with the work plan prepared for the audit and the results set out in the letter of recommendations;
  (d) reports to the Board at least once every six months – when the financial statements and half-year reports are approved – on the activity carried out and on the adequacy of the internal auditing system;
  (e) fulfils any further tasks that are vested in it by the Board of Directors, with special emphasis on relations with the audit firm.

The Internal Audit and Corporate Governance Committee also monitors the observance and periodical updating of corporate governance rules and compliance with the code of conduct and ethical standards that may have been adopted by Telecom Italia and/or by its subsidiaries.

2069

CODE OF SELF-DISCIPLINE

1. Responsibilities of the Board of Directors

1.1. The board is the joint body responsible for running the company. It has full powers and responsibilities, in observance of legal and regulatory requirements and current rules laid down by the by-laws.

1.2. Neither the conferring of delegated powers nor the assignment of operational powers to units in charge of the various corporate divisions excludes the responsibility of the board, which continues to maintain a superior power of guidance and control over all the enterprise's activities in its various components. Insofar as it is vested with guidance and control responsibilities, the board must be promptly and immediately informed by those vested with delegated powers of the activity carried out by them in exercising such powers. The powers of guidance and control extend to all of Telecom's subsidiaries (referred to hereafter as the "Group"), i.e. the complex economic body coming under Telecom's framework, without prejudice to limits inherent in the diversity of the legal subjects concerned.

1.3. Without prejudice to the board's exclusive responsibility over matters that cannot be delegated, pursuant to Article 2381 of the Civil Code, the board will, on an exclusive basis:

(a) draw up and adopt the company's rules of corporate governance and establish guidelines for the Group's corporate governance;

(b) examine and approve the company's and the Group's strategic, industrial and financial plans;

(c) evaluate and approve the company's and the Group's annual budget;

(d) evaluate and approve the periodical report documents envisaged by current regulations;

(e) examine and approve investments and disinvestments (including those pertaining to real estate) for figures in excess of five hundred (500) billion lire;

(f) examine and approve operations of particular economic or strategic importance (including, for instance, the acquisition and disposal of direct or indirect controlling equity interests), with particular reference to operations with related parties;

(g) grant and revoke powers delegated to the chief executive officer and the executive committee, if it has been set up, establishing the limits, operating procedures and frequency, usually not less than every three months, with which the delegated bodies have to report to the board on the activity carried out in exercising the powers conferred on them;

(h) make arrangements for designations to the positions of chief executive officer and chairman of subsidiaries, whose turnover – based on the latest available financial statements – is equal to or higher than two thousand (2,000) billion lire;

2070

(i) at the chief executive officer's proposal, appoint, remove, and confer powers on the company's general managers;

(j) after examining proposals put forward by the special committee and acquiring the opinion of the auditors' committee, determine (I) the fees due to the chief executive officer and directors who occupy special positions and (ii) unless the meeting of shareholders has already done so, the breakdown of the total remuneration due to individual members of the board and committees;

(k) watch over the general progress of operations, paying special attention to situations involving conflicts of interest and bearing specifically in mind any information received from the chief executive officer and the internal audit committee, whilst also periodically comparing the results attained with those planned;

(l) verify the adequacy of the company's and group's general organisational and administrative structure prepared by the chief executive officer;

(m) arrange to modify, renew and enter into agreements with the Ministry of Communications;

(n) report to shareholders during the meeting of shareholders.

1.4. The board may appoint external consultants to look into matters of particular importance whenever it deems fit to do so.

2. Independent directors

There will be an appropriate number of independent directors. These are directors who:

(a) have no significant economic relations with the company, its subsidiaries, executive directors, the shareholder or group of shareholders controlling the company, such as to affect their freedom of judgment;

(b) have no direct or indirect equity investments of an entity such as to allow them to exercise control over the company, and are not a party to shareholders' agreements in respect of controlling the company.

3. Meetings of the Board of Directors

3.1. The directors will act and deliberate with full knowledge of the facts and in complete autonomy, pursuing the objective of creating value for the shareholders. Directors will accept their appointment if they consider that they can devote the necessary time to diligently performing their duties.

3.2. Board meetings are chaired by the chairman, who will avail himself of the collaboration of the secretary to the board of directors.

2071

3.3. The board will meet at least four (4) times a year and also whenever the chairman may deem appropriate. It will also meet on the initiative of the directors and auditors, in accordance with relevant provisions of the law and the by-laws.

3.4. On opening meetings, the board will usually be informed of the most important developments that have meanwhile occurred, and, at least every three months, of the company's and Group's general progress and the exercising of delegated powers.

3.5. Every director is entitled to propose matters to be discussed in later board meetings. During the meeting, every director is also entitled to raise matters not included in the agenda, but the majority of directors will however determine whether a formal resolution can be taken without previous notice.

3.6. With the participants' agreement, the chairman may ask the general managers, or other persons from outside the board, to attend meetings in order that they may either listen or provide their support.

4. Chairman of the Board of Directors

4.1. The chairman calls the meetings of the board of directors, establishes the agenda and guides the manner in which the meetings in question are held.

4.2. Preparatory to meetings, the chairman will announce the matters on the agenda and send to the directors, sufficiently in advance of meetings, the most appropriate documentation with a view to facilitating effective participation in the joint body's business.

4.3. The chairman will make efforts to ensure adequate flows of information between management and the board of directors. In particular, he will make efforts to guarantee information on the basis of which (i) formal resolutions are adopted and (ii) the board's powers of management, guidance and control over the company's and the Group's activity are more generally exercised.

4.4. The chairman is vested with emergency powers in matters covered by the responsibility of the board of directors and he will exercise them after consulting the consultative committee referred to hereafter in Article 6, as long as it is possible to do so. The board of directors will be informed about the exercising of such emergency powers at the next convenient meeting.

5. Chief executive officer

The chief executive officer is responsible for implementing the resolutions passed by the meeting of shareholders and the board of directors.

6. Consultative committee

6.1. The consultative committee consists of three members, including one member to be chosen amongst those directors taken from the slates different from that one that

obtained a majority of the votes cast by the shareholders according to the procedure set forth in the by-laws for the appointment of the board (hereafter the "minority director"), as well as the chairman and deputy chairman of the board of directors, and it deliberates on a majority of its members.

6.2. The committee will only meet (by conference call or videoconference, if necessary) in urgent cases, at the chairman's convocation, when the chairman intends to exercise the emergency powers referred to in Article 4.4. The chairman will convene meetings of the committee informally (this may even be orally) without having to give advance notice.

6.3. The committee's resolutions concerning the exercising of emergency powers by the chairman are purely consultative and are not binding, as the chairman is free to exercise such powers, under his own responsibility, even if the committee deliberates otherwise. The board of directors must be informed of such resolutions, according to the procedure set forth in Article 4.4.

7. Information for the Board of Directors

The chief executive officer will periodically report to the board on the activities he has carried out in exercising the powers conferred on him.
He will provide adequate information to the board and to the auditors on non-standard and unusual operations or on operations carried out with related parties, the examination and approval of which are not reserved for the board of directors.

8. Treatment of confidential information

8.1. The chief executive officer will monitor the handling of confidential information; to this end he will propose to the board of directors that an internal procedure be adopted in respect of communicating documents and information concerning the company outside the same company, with particular reference to price sensitive information.

8.2. All directors are under an obligation to maintain the confidentiality of any documents and information they may have acquired in the course of carrying out their duties and to comply with the procedure established for communicating such documents and information outside the company.

9. Directors' fees committee

9.1. Within its framework, the board of directors will set up a fees committee. This committee, which will consist primarily of directors who have not been vested with special assignments and include at least one minority director, will formulate proposals to the board a) in respect of fees due to the chief executive officer and directors who have received special assignments, and b), at the chief executive officer's indication, in respect of determining criteria establishing fees due to the company's senior managers. To this end, it may avail itself of external consultants, at the company's expense.

2073

9.2. In determining the chief executive officer's total fees, the board of directors will normally envisage that a part of such fees is subject to the economic results achieved by the company and the Group and possibly also to the attainment of specific objectives previously indicated by the board itself.

10. Internal audit

10.1. The chief executive officer will ensure the due functioning and adequacy of the internal audit system, establishing the relevant procedures. For this purpose, he will appoint one or more persons in charge, endowing them with appropriate means.

10.2. The internal audit system is designed (i) to verify compliance with any internal operative and administrative procedures that may have been established in order to guarantee sound and efficient management and (ii) to identify, avert and, as far as possible, handle financial and operative risks and prevent the company from being harmed by fraudulent acts.

10.3. The persons in charge of the internal audit will not depend hierarchically on any operational area head and they will report on their work to those directors who may have been appointed to this end, the internal audit committee referred to hereafter in Article 11 and the auditors.

11. Internal audit and corporate governance committee

11.1. Within its framework, the board of directors will set up an internal audit and corporate governance committee, which will consist primarily of independent directors and include at least one minority director. Either the chairman of the auditors' committee or one statutory auditor to be designated by the chairman of the auditors' committee and the chief executive officer will attend the committee's meetings.

11.2. Whilst also bearing in mind the reports received in accordance with Article 10.3, the committee will

(a) evaluate the adequacy of the internal audit system;

(b) evaluate the plan of work presented by the persons in charge of the internal audit and receive the periodical reports submitted by them;

(c) evaluate proposals formulated by the audit firm applying for the relevant assignment, along with the plan of work prepared for the audit and the results set out in the letter of recommendations;

(d) report to the board, at least once every six months, when the annual and semi-annual reports are approved, on the activity it has carried out and on the adequacy of the internal audit system;

(e) perform any further tasks that may be assigned to it by the board of directors, especially as far as relations with the audit firm are concerned.

2074

11.3. The committee will also monitor compliance with, and the periodical updating of, the rules of corporate governance and compliance with the code of conduct and any ethical standards that may have been adopted by Telecom and/or its subsidiaries.

12. Meetings of shareholders

12.1. The ordinary meeting of shareholders exercises the functions envisaged by Article 2364 of the Civil Code. The powers referred to in Article 2365 of the Civil Code are vested in the extraordinary meeting of shareholders.

12.2. The directors will encourage and facilitate the broadest possible participation of shareholders in meetings of shareholders.

12.3. All directors will usually participate in meetings of shareholders.

12.4. Meetings of shareholders are also an opportunity to provide shareholders with information on the company, but the rules pertaining to price sensitive information must be observed.

12.5. The board of directors will submit to the approval of the meeting of shareholders a set of rules regulating the orderly and functional holding of the company's ordinary and extraordinary meeting of shareholders, guaranteeing each and every shareholder's right to speak on the matters up for discussion.

12.6. In the event of important changes in the total value of capitalisation, the ownership structure and the number of shareholders in the company, the directors will assess whether or not it is advisable to submit to the approval of the meeting of shareholders changes to by-laws concerning the percentages established for implementing actions and exercising the prerogatives designed to protect minorities.

13. Auditors

13.1. Proposals put to the meeting of shareholders for appointments of auditors, accompanied by comprehensive information concerning the personal and professional characteristics of candidates, will usually be deposited at the company's registered office either at least ten days prior to the date envisaged for the meeting or on depositing the lists.

13.2. The auditors will act autonomously and independently also vis-a'-vis the shareholders who elected them.

13.3. The auditors are under an obligation to maintain the confidentiality of any documents and information they may have acquired in the course of performing their duties and to observe the procedure adopted in respect of communicating such documents and information outside the company.

13.4. The auditors' committee will exercise the powers and abide by the duties envisaged by the law.

Number of employees of Group	**122,662**	123,966	126,097

[1] The figures at December 31, 1997 and December 31, 1998 differ from the published figures due to the presentation of revenues gross of amounts to be paid to other carriers.
[2] Net of "Receivables from stockholders for capital contributions".
[3] Net Income before minority interest / Average stockholders' equity before minority interest.

2097

To the Shareholders,

1999 was an extraordinarily important year for our Company.
The successful take-over bid launched by Olivetti for Telecom Italia is the milestone that I would like to use as a basis for assessing the year's performance and results, which are being submitted for your examination and approval. In fact, this operation was based on an assumption that I still regard as being fundamental: the attempt to win the approval of shareholders and market alike. The take-over bid was conceived in the name of the clarity and credibility of an ambitious industrial project, with the aim of making this Company a key player in the scenario of a global economy in which telecommunications is the mainstay of the formidable transformation now under way.
The spirit behind the take-over bid is the same which, today, is guiding the management of Telecom Italia: a spirit of initiative which is relying on your support to construct a dynamic Company modeled according to the market, in Italy and the rest of the world.

The first signs of change are visible, although only in part, in the trend and the economic results of the last year.
The Telecom Italia Group closed 1999 with results which, overall, slightly exceeded our expectations. The increase of 8.2% in revenues [compared to 5.3% net of the share of revenues due to other operators] which amount to Lire 52,481 billion, is due to the positive trend in telecommunications services and the information segment, while the volume of business in the installations and manufacturing segments recorded a fall, as predicted. The consolidated gross operating profit [Ebidta], equal to Lire 23,673 billion, grew by 3.4% over 1998, accounting for 45.1% of gross revenues.
The consolidated net income for 1999 was Lire 3,364 billion [Lire 4,665 billion net of minority interest of Lire 1,301 billion], with a fall of 12.2% compared to 1998. Considering that the result of the past year had been largely affected by considerable gains, on account of the sale of some investments, and considerable extraordinary income arising from the change in accounting principles, the 1999 results should be regarded as positive and confirm the strength and vitality of the Telecom Italia Group.

The results of the Parent Company are very positive.
In fact, Telecom Italia closed 1999 with a net income of Lire 5,050 billion, Lire 2,260 billion more [+81%] than in 1998. The result also benefits from a reduction in depreciation and amortization and lower writedowns of fixed assets, and a significant increase in the dividends from subsidiaries [+178%].
Revenues, equal to Lire 35,856 billion, fell by 1.2% compared to 1998, and the gross operating profit [Ebidta] decreased by 5% compared to 1998. This reduction, which was generated by the context of increasing competition and the consequent fall in tariffs, despite the presence of a marked growth in traffic [+11.6% in terms of minutes], was accompanied by a decrease of overall costs. Labor costs, in particular, fell by 2.3% compared to 1998.

2098

These results should be interpreted in the light of the various trends which characterize the evolution of the market. In 1999, the core business of telecommunications services recorded the dramatic expansion of mobile telephone services, which still have enormous growth potential, and a fair level of stability in the fixed telephone segment, in which, the maturity of voice services was accompanied by substantial growth in the data segment and the decisive development of the Internet, albeit in its initial stages. Overall, the demand for fixed telephone services is shifting towards innovative services, with a boom in solutions based on the IP platform and data transmission. And our strategy is heading exactly in this direction. In fact, our objectives are focusing on gaining space and shares of the market, in Italy and abroad, in the market of new business areas.

A necessary step in the creation of this strategic plan has been the restructuring of the Group. In order to encourage the development of our Company, I wanted a reorganization plan modeled on production processes and oriented to the creation of value in all the operational sectors. A new structure based on the specific realities of the market, with a close correlation between types of offering, clientele targets and distribution channels, in the various areas of activity [Internet, fixed/data services, mobile services, international services and information]. This plan, which we are continuing to refine and update in line with the new requirements dictated by the market, depends upon an asset which is highly-prized and, I would say, unique: the people who work for us. This precious heritage will have to be fully enhanced, also through the use of effective training and re-training policies.

Without any doubt, the Internet market is the mainstay of our strategy. With the merger of Tin.it and Seat, we are constructing a giant force on a national and European scale, able to upset the current balance and attack our competitors precisely on the most advanced and sought after frontier: that of the new economy. Tim has also concentrated on the Internet, launching innovative products including Uni.Tim which, in only two months, has led to the activation of more than 400,000 mail-boxes.

International business is another fundamental area for the development of our Group. We can count on important initiatives in Europe and Latin America which, in 1999 enabled us to win over almost 18 million customers to the fixed network and more than 13 million to mobile telephone services, and on new projects like the Nautilus network which we are starting in the Mediterranean area. But in the international field there is still a great deal to do in terms of rationalizing the investment portfolio and improving profitability. Here, our action to revitalize and re-launch will be even more decisive and far-reaching, even though the position acquired is certainly a real strength.

Another central element of the strategy is our capacity for technological innovation. We are devoting considerable resources [Lire 16,500 billion over the three-year period 2000-2002] to revitalizing network infrastructures because we are convinced that this is a point of excellence of our Company, which sets us apart from the competition.

In the 1999 financial statements, especially in the second half of the year, interesting factors were perceived that are in keeping with this strategic plan, which are worth bringing to your attention.
First, the explosion of the Internet market, in which TIN has confirmed its role of market leader with approximately 2 million customers at the end of 1999 [+400% compared to the

2099

end of 1998] and a further acceleration which led to 2.7 million customers by March 2000, thanks partly to the success of the "E-Vai" offering. In this field, we have an offering that is diversified into numerous products and applications, from Intranet and Extranet solutions to converging phone and data solutions, solutions based on IP platforms to highly evolved ICT outsourcing, able to anticipate the needs of the market.
For example, innovative services as a percentage of total business revenues rose from 34% in 1998 to 47% in 1999, a figure which testifies to your Company's dynamism and capacity for change.

The new features launched in the field of network infrastructures are also important signs, especially with regard to the future. For example, I am thinking of the innovative offering based on ADSL, a technology which makes it possible to transmit large quantities of data to the customer, with advanced multimedia characteristics, and is particularly suited to the requirements of surfers on the Internet. But it is also suited to the requirements of companies, for which we have created the "RING" services [IP, Frame Relay and ATM], with high-speed access supplied by means of ADSL and other technologies [SDH, HDSL].

In order to confirm our leadership and develop results in the future, we are working hard to bring about a marked cultural change which we are duty bound to impress on our organization. It is a transformation which involves not only the management of the Company but, more particularly, the daily activities of the men and women who operate at all levels within the Group. We must show that we are masters of a new culture based on professional and ethical values without which we cannot successfully enter the realm of a great industrial group of international stature.
In conclusion, I am convinced that the results for 1999 constitute a significant starting-point for your Company and, at the same time, provide the confidence with which to tackle the ambitious programs and challenges which await us.

For my own part I would like to confirm that I will do my utmost to ensure that information is always transparent and complete, which will enhance the rapport of trust with the management and enable us to give you and the market the certainty of knowing at any time, where our Company is heading.

[POWERS OF CORPORATE GOVERNANCE BODIES]

Board of Directors

The Board of Directors of Telecom Italia, with respect to its exclusive responsibility regarding matters which cannot be delegated according to art. 2381 of the Italian Civil Code, as its exclusive right:

[a] prepares and adopts the rules for corporate governance and establishes guidelines for corporate governance of the Group;
[b] reviews and approves strategic, industrial and financial plans of the Company and the Group;
[c] examines and approves the annual budget of the Company and the Group;
[d] examines and approves the documentation of the periodic statement envisaged by existing laws;
[e] reviews and approves capital expenditures and disposals [also real estate] for amounts in excess of Lire 500 billion;
[f] reviews and approves transactions [including, for instance, acquisitions or divestitures of directly or indirectly held investments] bearing particular economic or strategic importance, with special reference to related party transactions;
[g] assigns or revokes powers granted to the CEO and the Executive Committee, where there is one, setting the limits, the manner and period, usually not less than three months, for the activities carried out during the year which should be referred to the board by those granted powers;
[h] provides for the assignment of the posts of CEO and Chairman in the subsidiaries which have revenues – according to the latest available financial statements – that are equal to or higher than Lire 2,000 billion;
[i] provides, as proposed by the CEO, for the appointment, revocation and conferral of powers to the general managers of the Company;
[j] establishes, after examining the proposals of the specific committee and having heard the board of statutory auditors, the remuneration of the CEO and those that hold special posts, as well as dividing the total remuneration among the individual board members and committees, where this has not already been arranged by the shareholders' meeting;
[k] monitors the overall performance of operations, with special attention being paid to conflicts of interest, taking into account, in particular, the information received from the CEO and the audit committee, in addition to effecting a periodical comparison of actual and budget figures;
[l] ascertains the appropriateness of the organizational and administrative structure of the Company and the Group drawn up by the CEO;
[m] sees to the change, renewal and stipulation of agreements with the Ministry of Communications;
[n] keeps the shareholders informed at meetings.

Chairman and CEO

The Chairman and CEO is assigned

- legal representation and signature powers;
- the task of keeping the Board of Statutory Auditors informed of activities carried out and transactions of significant economic, financial and equity importance carried out by the Company and the Group, in the manner and within the terms established by art. 13 of the by-laws;
- all ordinary and extraordinary powers of administration of the Company [with the right to appoint procurators ad negotia for individual acts or series of acts] except for those powers reserved exclusively for the Board of Directors, which he may exercise in cases of emergency, subject to informing the Board at its next meeting.

Deputy Chairman

The Deputy Chairman shall have signature powers and legal representation of the Company only in the case of impediment or absence of the Chairman and CEO.

Internal Committees

Committees are also formed within the Board of Directors as follows:

- a remuneration committee. This committee [composed of the Deputy Chairman and the Directors Cohen and Siniscalco] formulates proposals to the Board for the remuneration of the CEO and those who hold special posts, in addition to, as indicated by the CEO, determining the criteria for the remuneration of the Company's top management;
- an audit and corporate governance committee. This committee is composed of the Directors Benessia, Livingston and Worms. Such committee:
  [a] evaluates the adequacy of the internal control system;
  [b] evaluates the working plan prepared by the those in charge of internal control and receives periodical reports from same.
  [c] examines the proposals submitted by the audit firms to obtain appointment as auditors, as well as the audit work plan and the recommendations contained in the internal control report;
  [d] informs the Board, at least every six months, at the time of the approval of the financial statements, on the activities carried out and the adequacy of the system of internal control;
  [e] carries out additional tasks which it is assigned by the Board of Directors, especially with respect to relations with the independent audit firm.

The audit and corporate governance committee also oversees the observance and periodical updating of the rules for corporate governance and compliance with the code of conduct and ethical standards eventually adopted by Telecom Italia and/or its subsidiaries.

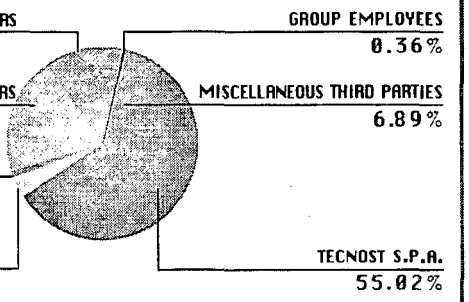
2101

Information for shareholders

The shareholders of Telecom Italia ordinary shares as reported in the Shareholders' Register and other information available on the date of February 29, 2000 are as follows:

Tecnost S.p.A. [*]	55.02%
Italian Treasury	3.46%
Banca d'Italia	1.14%
Foreign institutional shareholders	19.77%
Italian institutional shareholders	13.36%
Group employees	0.36%
Miscellaneous third parties	6.89%

[*] of which 0.22% is held through the subsidiary Tecnost International N.V.



Performance of stocks in Telecom Italia Group

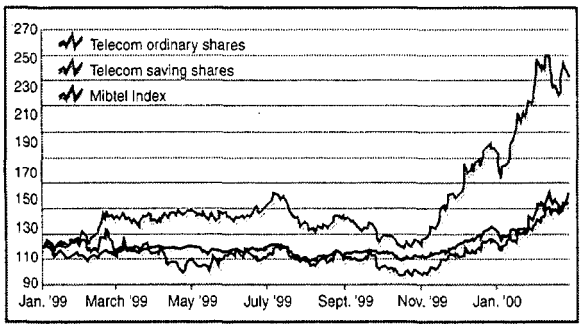
1999 was an especially positive year for the European stock exchanges: having overcome the crisis in the fall of 1998, the stock markets were able to take advantage of a weak Euro and the confident trend of the American economy which continued to grow beyond all expectations and without any signs of an upturn in inflation. Markets the world over were characterized by a strong interest in technological stocks and, in particular, those of companies operating in the Internet sector. In this scenario, the Italian stock market displayed a positive performance, thanks especially to the strong upswing in the last two months of the year. The Mibtel Index at year-end reached 29,000, a gain of 15% compared to the end of 1998.

Telecom Italia ordinary share prices displayed a strong gain during the year [+78%], starting from the launch of the take-over bid by Olivetti and Tecnost on all the Company's ordinary shares, and reached a maximum of Euros 14.21 at December 28, 1999. The positive trend carried over into 2000: performance from January 1, 1999 to February 29, 2000 was 133%, reaching a maximum price of Euros 20.35 on February 11, 2000. In 1999, the prices of saving shares, instead, increased only marginally, and then rose appreciably in the first two months of 2000. The gain between January 1, 1999 and the end of February 2000 was 42% overall.

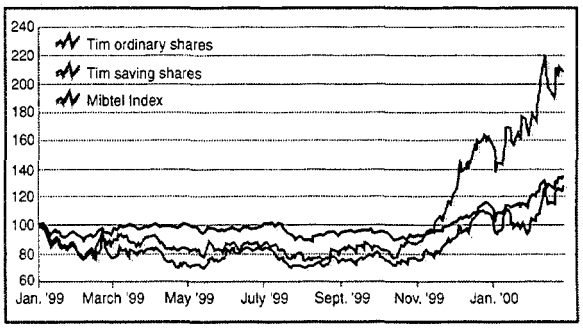
2102

Performance of stocks in Telecom Italia Group

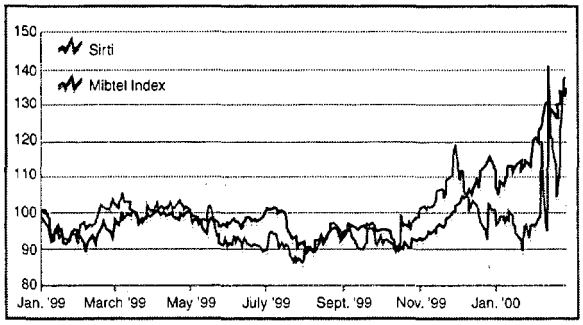
TELECOM ITALIA



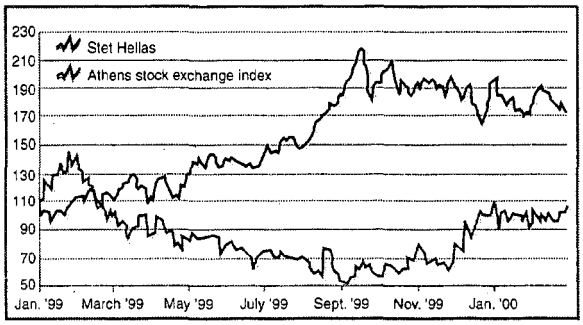
TIM



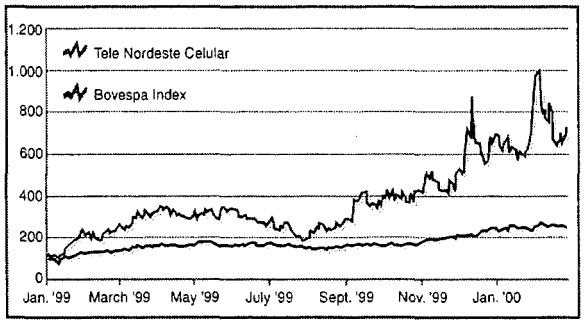
SIRTI



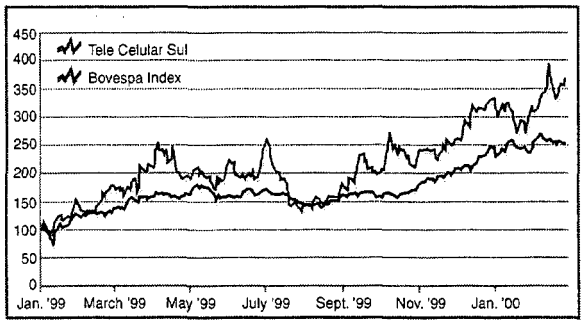
STET HELLAS



TELE NORDESTE CELULAR



TELE CELULAR SUL



The prices of TIM ordinary shares also recorded a strong gain, especially in the second half, closing the year at Euros 11 [+65%] and then rose to over Euros 15 [+110% from January 1, 1999 to February 29, 2000]. The prices of saving shares, instead, were substantially in line with the market trend, rising 10% during the year [+28% when also considering the first two months of 2000].

Stet Hellas shares experienced a drop of roughly 6%, as a result of increased competition on the local market.

A particularly bright note comes from the performance of the two Brazilian mobile telecommunications subsidiaries, Tele Nordeste Celular and Tele Celular Sul whose shares in 1999 reported gains of 567% and 230%, respectively.

2103

Finally, in 1999, the prices of **Sirti** shares, which were affected by the on-going stagnation of the installations market, remained stable. The conclusion of the demerger of the real estate business and the simultaneous listing of IMMSI shares on the stock exchange [February 11, 2000] nevertheless led to an appreciable increase in value for the shareholders: considering the sum of the prices of Sirti and IMMSI shares, the increase during the period January 1, 1999 to February 29, 2000, adjusted to take into account the extraordinary dividends paid on December 13, 1999, was, in fact, 38%.

Market capitalization of Telecom Italia and TIM

On the basis of the official prices at February 29, 2000, Telecom Italia is the leading Italian company in terms of market capitalization [with almost Euros 114 billion] and accounts for 13% of the entire national stock market. On the same date, TIM is the second largest Italian company in terms of market capitalization [with almost Euros 103 billion] and makes up around 12% of the total.

Financial Indicators

[in lire]	1999	1998	1997
Dividends per share			
• ordinary shares	600	280	190
• savings shares	620	300	210
Consolidated earnings per share [1]			
• ordinary shares	447	510	346
• savings shares	467	530	366
Consolidated cash flow per share	2,020	2,120	1,989
Consolidated equity per share	4,444	4,265	4,030

[1] Consolidated earnings per share of the Parent Company were calculated on the basis of the consolidated net income attributable to the Parent Company and the number of ordinary and savings shares outstanding at year-end [respectively, 5,255,131,631 and 2,166,120,095]. For purposes of this calculation, savings shares were assigned a dividend of Lire 20 higher than that for ordinary shares.

1. The market

2108

[1.1] DIMENSIONS AND DYNAMICS OF THE GLOBAL MARKET FOR TELECOMMUNICATIONS SERVICES

In 1999, the world market for telecommunications reached an amount of Lire 1,273,000 billion, with an increase of 9.5%, against a growth in GDP worldwide of 6.2% [1]. In Europe, there was a growth of 12.3%; contributory factors to this were further developments in the mobile telephone business, data transmission and, more particularly, *Internet*.
By the end of 1999, European subscribers to mobile telephone services exceeded 154 million, with a level of penetration of 39.5% [against 23.6% at the end of 1998]. Compared with the forecasts, the acceleration of growth [+68.1% over the end of 1998] was particularly evident in countries where operators concentrated on the prepaid market, offering wide-ranging, highly differentiated tariffs. The most recent forecasts suggest an average annual growth of mobile subscribers in Europe of 12.7% between 1999 and 2003, reaching a level of penetration of approximately 65% by the end of the period: mobile telephone links are estimated to account for 52% of the total in 2003 [compared to 34.4% in 1999].
As far as *Internet* is concerned, in 1999, users in Western Europe increased by an average of 70%, exceeding a penetration of 13% [compared to 7.8% at the end of 1998] [2]. A series of factors contributed to the growth, both in terms of the offering [free access, fast *Internet*], and market demand [greater flexibility in the use of advanced TLC systems, greater attention from the media, a broader presence of companies in the network, greater use of the Web for business activities and increased activities on the part of governments to promote awareness]. The European market is approximately three years behind that of the United States, but the level of average growth estimated for the next four years [33%] suggests that it is catching up fast.

[1.2] DIMENSIONS AND DYNAMICS OF THE ITALIAN MARKET FOR TELECOMMUNICATIONS SERVICES

In 1999, the Italian telecommunications market grew by 13.7%, reaching Lire 50,700 billion [3]. 52.4% of the total can be attributed to fixed telephone services, 35.9% to mobile telephone services [compared to 29.9% in 1998] and 11.7% to the data transmission/*Internet* segment.
The greatest contributor to growth was mobile telephone services, with an increase in the number of subscribers of 46.7% and a rise in revenues of 36.6%. With over 30 million subscribers recorded at the end of 1999, Italy is the largest market in Europe; the level of penetration [calculated as the number of customers of mobile telephone services to population] reached 52% and is the highest apart from the Scandinavian countries. During 1999, the number of mobile telephones exceeded the number of fixed telephones, reaching a total of 52.7% by the end of the year.
The *Internet* market increased from 3.1 million subscribers at the end of 1998 to 5.6 million at the end of 1999 [+80.6%]. Despite the considerable increase generated by the generalized commercial offering [such as free access] and specific offers [such as "E-vai!" promoted by Tin.it], the level of penetration [9.6%] remains below the European average, with obvious room for growth.
Competitive pressure on the Italian market is constantly increasing, as can be seen from the following:

- issue of licenses for fixed networks which rose from 42 in April 1999 to 89 at the end of the year;
- awarding of the fourth license to operate a mobile telephone network in July 1999;

[1] Source: based on data of Dataquest, December 1999.
[2] Source: based on data of Dataquest, August 1999.
[3] Source: EITO 2000.

- opening of the *local loop* market on January 1, 2000, already with two other carriers, and the offer will soon be launched by 5 more;
- availability of *carrier preselection* for long-distance calls from January 1, 2000; later *carrier preselection* will be launched for local calls;
- July 2000 will also see the start of *number portability* and *unbundling* for *local loop* systems.

[1.3] COMPETITIVE DYNAMICS AND STRUCTURAL CHANGES IN THE ICT SECTOR

In 1999 and in the first few months of 2000, the Information & Communications Technology [ICT] sector was characterized by the following factors.

▸▸ Competitive pressure on the fixed-line telephone services market

In 1998, most of the European markets were liberalized; as a result, the dominant carriers had to face considerable pressure on prices and reduced market shares, partly compensated by growth in volumes and lower costs. Greater competitive pressure is driving carriers to find new sources of revenues, especially from data/*Internet* components, and to become more efficient in terms of costs and the use of human resources. In 1999, the prices of interconnection were further reduced, whereas, in 2000, *carrier preselection* and *number portability* will be introduced in many countries and, in some, also *unbundling* of the *local loop*.

▸▸ Mergers and acquisitions

In 1999 and in the first few months of 2000, the trend to consolidate the sector continued in the form of deals that were much more significant both in number and in size and strategic importance than those of previous years. In fact, in the ICT-media sector, in Europe and North America, 6,008 deals were completed [+26% compared to 1998], for a total of more than USD 1,200 billion [+154% compared to 1998] [4]. In telecommunications, there were 834 deals [+38.3% compared to 1998], for a total of USD 686 billion [+172.1% compared to 1998]. Once again, the United States was in the front line, with 62.2% of the overall deals. However, activity in Europe grew more than in the United States, increasing by over 30% in number [2,271 in 1999] and by 480% in amount [USD 455 billion in 1999]. However, this data does not yet take into account the acquisition of Mannesmann by Vodafone Airtouch concluded in February 2000, the largest deal of all time [5] worth more than USD 170 billion.
A considerable number of the deals involved mobile telephone services. In fact, mobile operators, all of them European, were involved in eight of the twelve largest deals.
The *Internet* sector was also very active, particularly in the U.S.A., where the most significant deal was the recent merger between Time Warner and AOL. In Europe, too, *Internet* dominated the scenario, influencing all the deals that came into being in the TLC segment, from the new digital media, to the cable and wireless segments, in a logic of vertical integration along the chain of value.

▸▸ Initial Public Offer

In 1999, the "new market" devoted to small-cap and fast-growing securities had an enormous impact on the main European financial markets. Between the beginning of 1998 and the end of 1999, the number of listed companies in the sector increased from 63 to 338, while average capitalization rose from Euros 107 million to Euros 295 million. The

[4] Broadview Int. Llc., "Technology M&A Report – 1999"
[5] In the world table of international mergers, the largest deal not involving telecommunications was the Exxon-Mobil take-over for USD 77 billion.

2110

capital raised by IPOs in 1999 was three times that of 1998. Many of these involved *Internet* operators, new entries or demergers, and the demand was always much greater than the offering, boosting prices to unprecedented levels. Numerous other deals have been announced for 2000, many of which involve the demerger of mobile and *Internet* activities on the part of integrated providers.

▸▸ The *Internet* Offering

The multiplication of Internet Service Providers and the offers of free access to the *Internet* also helped to revolutionize the scenario and provided a decisive boost to the growth of the market. Many ISPs, for example, integrate the offering by developing *portals* able to generate additional revenues through advertising and commissions on e-commerce. At the same time, operators in the media sector, including some of the large editorial groups involved in pursuing multi-channel strategies, have developed activities on the Web, creating *portals* which also offer free access to the *Internet* so that they can reach their public online.

▸▸ Offering of broadband networks and services

In response to competitive pressure from television cable-network operators [CATV], and, more generally, to the demand for faster access, many European and North American operators began experimenting, since 1998, with *ADSL* network services, with the aim of being able to provide an offering in 2000. During the next few years, access to broadband networks and services will become a crucial element in Europe's breaching of the gap currently existing in its level of *Internet* penetration compared to the United States. The benefits will be directly proportional to the skill of operators in successfully using aggressive utilization of *ADSL* services to the benefit of the ISP, thus effectively combating the competition of CATV networks.

▸▸ Value-added and *Internet* services using mobile telephones

Competitive pressure in the mobile sector tends to lower prices and revenues per subscriber and encourage customers to switch to other providers; exploiting the rapid growth in the demand for data services, mobile operators responded by providing value-added services [VAS] including, in particular, supplementary mobile services [SMS] – information services, mobile banking, etc. – which have met with great success on the market. Quite apart from the defensive side to this move, such SMS bring mobile operators enormous benefits in terms of traffic volume, revenues, service penetration and customer loyalty. The market for applications that can be accessed from a wireless terminal, such as *e-mail* and text messaging, is also developing fast. In addition, thanks to the convergence of technologies and the development of the wireless application protocol [WAP], a market is now emerging based on mobile access to the Internet and mobile electronic business ["m-commerce"]. Europe could become the leader in this business area, having a higher penetration of mobile services than other geographical areas and an *Internet* market in rapid expansion. Furthermore, many operators, including TIM have already begun experimenting and, in some cases, offering WAP services. The final link in the chain of m-commerce is represented by mobile portals [or "mortals"], which supply and aggregate content, such as news, customizing of information, *e-mail*, links to WAP sites and permit the purchase of goods and services. Finally, even more recently, there have been initiatives to implement multi-access *portals*, which make it possible to access the *Internet* from fixed-line or mobile terminals.

2111

2. The regulatory framework

2112

During the last few months the process of liberalization, in our country, has been characterized by a considerable boost which has stimulated the development of the Italian regulatory framework, bringing it to the forefront within the European context. Today, the regulatory liberalization framework can be regarded as being almost completed, although certain obstacles on the pricing structure which limit the offering of Telecom Italia have yet to be removed. There follows a brief summary of the fundamental decisions adopted by the Authority during 1999.

[2.1] TARIFF REBALANCING

The Authority approved a tariff rebalancing maneuver with Resolution No. 101 of June 25, 1999, according to which the local tariff will remain unchanged, a "sliding-zone tariff" will be introduced to be applied to calls between adjacent local areas within the same district with effect from November 1, 1999, the tariffs will be reduced, from August 1, 1999, for long-distance calls of the 3rd level [6.3%] and international calls [5.1%] and, as from November 1, 1999, monthly basic charges for residential customers will be raised to a single charge of Lire 18,000.
As set forth by the same Resolution, from November 1, 1999 *carrier selection* was launched for districts, to be extended to local areas not later than January 1, 2000.
With its Resolution No. 170 of July 28, 1999, the Authority also introduced the time tariff [TAT], with effect from November 1, 1999, based on call set up methodology, for all vocal telephone services, except public telephone services.
Resolution No. 171 also of July 28, 1999 implemented the *price-cap* regime, with effect from August 1, 1999, which is to be applied until December 31, 2002 to a whole basket of vocal telephone consumption composed of activation fees, basic charges, local, long-distance and international tariffs. In particular, a general *price-cap* was established for the basket of the vocal telephone service, equal to the inflation rate minus 4.5 percentage points, and specific *sub-price cap* for a basket of residential services [the inflation rate minus 2.5 percentage points], for installation fees and basic charges [the inflation rate plus 1 percentage point] and local telephone services [the inflation rate].

[2.2] FINANCING THE UNIVERSAL SERVICE

With regard to computation criteria and methods of financing the net cost of universal service, as established by the Ministerial Decree of March 10, 1998, on March 30, 1999 Telecom Italia sent the Authority the computation of the net cost for the year 1998 and a document defining the methodology used, relating to vocal telephone services, subscriber information and the supply of public telephone equipment. With its Resolution No. 2/CIR of August 4, 1999, the Authority established that in 1998 – the first year of liberalization, which, in its opinion was still characterized by an insignificant number of competitive carriers – the cost sustained by Telecom Italia does not represent an "unfair burden" and, therefore, the sharing mechanism laid down by the above-mentioned Ministerial Decree is not yet applicable.
The calculation of the net cost for 1999 was sent to the Authority on March 31, 2000. Any positive economic impact consequent to its decisions in this regard – expected by the end of next June – will be taken into account in the 2000 statement of income.

[2.3] INTERCONNECTION

As far as the offering of interconnecting rates of reference is concerned, on July 15, 1999 Telecom Italia sent a new offer to the Authority which included some of the specific suggestions expressed by the Authority, such as the application of a single tariff in the largest metropolitan areas [Rome, Milan and Turin], respect for the "best practice" criteria recommended by the European Commission and the revision of tariffs in off-peak periods [when lower tariffs are applied - at night and on public holidays] for services conveying switched traffic.
In Resolution No. 1/00/CIR of February 15, 2000, the Authority approved the offering, making certain changes regarding, in particular, the non-geographic numbering services [toll-free numbers, numbers with Intelligent charges, etc.]. The offer has a retroactive effect starting from January 1, 1999.

[2.4] FIXED-TO-MOBILE CALLS

Following Resolution No. 10 of March 17, 1999 which implemented an initial price reduction [an average of approximately 12%] for fixed-to-mobile calls, in its Resolution No. 338 of December 6, 1999, the Authority established the maximum value [Lire 360/minute] for the price of the termination of calls on TIM and Omnitel networks. It also made it possible to apply a diversified tariff for each time band, and set the maximum amount [Lire 110/minute] for the *retention* price of Telecom Italia, with the option of applying different tariffs according to the time band involved and the type of contract subscribed by the clientele [residential or business]. Once the Authority verified the correspondence between the above-mentioned resolution and the new prices for fixed-to-mobile calls proposed by Telecom Italia, it authorized the company to apply such prices with effect from February 17, 2000.

[2.5] NUMBERING

The decisions taken by the Authority with regard to *carrier preselection* and *number portability* are of particular importance.
In Resolution No. 3/CIR of December 7, 1999, the Authority established that, from January 1, 2000, customers could make inter-district, international calls and calls to mobile networks using a preselected carrier, as an alternative to Telecom Italia, without dialing the identifying code required. Therefore, calls within a district may be made with *carrier preselection* starting from May 2000 in Milan, June 2000 in Rome and July 2000 in other local areas.
In Resolution No. 4/CIR of December 7, 1999, with effect from January 1, 2000, the Authority gave its authorization for fixed-line network customers to change their carrier while retaining the number assigned by Telecom Italia.

[2.6] ADSL

The Authority authorized the supply of *wholesale* services providing high-speed Internet access in Resolution No. 407 of December 21, 1999, based on the application of *ADSL* technology. Tin.it began to market the economic offering to the public on January 26, 2000.

2114

[2.7] LOCAL LOOP UNBUNDLING

Under Resolution No. 2 of March 16, 2000, the Authority approved the measure for unbundled access services at the level of local network [*local loop unbundling*] and the promotion of the spread of innovative services [broadband, interactive, etc.]. The Resolution will allow the operators to directly access the final users, leasing the necessary network components from Telecom Italia. The functioning of *unbundling* services should be guaranteed by September 2000.

[2.8] NEW OPERATING FEE

Pursuant to Law No. 448 of December 23, 1998, a new fee was instituted from January 1, 1999 to take the place of the license fee. The amount of the operating fee is based on a sliding scale [3.0% for 1999, 2.7% for 2000, 2.5% for 2001, 2.0% for 2002, 1.5% for 2003]. The Ministerial Decree of March 21 by the Treasury Ministry, pursuant to the application of the above law, establishes that the fee should only be applied to revenues from installation activities and the supplier of public telecommunications networks, local telephone service and mobile and personal service.

[2.9] EVOLUTION OF EUROPEAN UNION REGULATIONS

Currently being introduced into Italian legislation are certain Directives of particular importance for the development of the competitive framework, with regard to the implementation of the system for supplying an *Open Network Provision* [ONP], for vocal telephone services and the universal service within a competitive environment. In 1999, the European Commission gave the go-ahead to a review of Community legislation on telecommunications, aimed principally at verifying that the standards issued are suited to the actual market developments, and that convergence is taking place between fixed and mobile telecommunications and between these sectors and the audiovisual sector.

* * *

The action brought by the Antitrust Authorities in January 1999 to ascertain the existence of price-fixing agreements between TIM and Omnitel to reduce competition in the mobile telephone market, was concluded on September 28, by the decision that ordered the two operators to pay penalties to be calculated on the basis of their respective revenues in 1998. The penalty for TIM was about Lire 100 billion. TIM appealed the decision to the regional administrative court of Lazio [TAR] on October 25, 1999 and a hearing will be held on May 3, 2000. In view of the upcoming hearing, the Company has not paid the penalty but has set aside a reserve for risks under liabilities in the balance sheet.

3. Telecom Italia Group

2116

Telecom Italia Group operates mainly in Italy and provides telecommunication services as its core business.

In Italy, the Group is engaged in the following business sectors: wireline telephone services operated by Telecom Italia, mobile telephone services supplied by TIM and satellite telecommunications provided by Telespazio. In fiscal 1999, Telecom Italia and TIM revenues accounted for 68.3% and 27.5%, respectively, of aggregate revenues.

Outside Italy, the Group's telecommunications business is operated by its subsidiaries and affiliated companies, generally, in Europe and Latin America. Some of these companies are held directly by Telecom Italia while others are owned through the subsidiaries TMI - Telemedia International Italia, Stet International Netherlands and Stet Mobile Holding.

The Group is also present in other sectors: information technology systems run by the companies Finsiel, Telesoft and Sodalia, manufacturing operations conducted by Italtel, installation operations supplied by Sirti.

The total consolidated carrying value of investments in affiliated companies at December 31, 1999 is concentrated in Europe for about 70%, in Latin America for about 25% and the remainder in the rest of the world.

The Group's workforce at December 31, 1999 numbered 122,662 [123,966 at December 31, 1998]. The decrease of 1,304 units is due to the combined result of personnel reductions in telecommunications [-786 units], the manufacturing sector [-2,398 units] and miscellaneous operations [-285 units] and increases in the installations sector [+2,060 units] and the information technology area [+105 units].
The change in telecommunications is due to the sharp decrease following the rationalization of personnel operating in the national wireline telephone business, the increase in the number of resources in mobile telecommunications and the entry of companies into the scope of consolidation.
In the manufacturing sector, the considerable reduction compared to the end of 1998 is due to the division of Italtel's business between Telecom Italian and Siemens and the disposal of certain businesses, including Italtel Sistemi, to third parties.
The strong increase in the installations sector is chiefly the result of the consolidation and development of operations in Brazil.
Lastly, the information technology area posted an increase following a policy to step up personnel in connection with developments in the sector's business.

The following table presents the Group's results by business segment [1]:

[in billions of lire]		Wireline telecom-munications in Italy	Mobile telecom-munications in Italy	Satellite telecom-munications	International telecom-munications	Information technology activities	Manufacturing activities [2]	Installation activities	Subtotal	Other activities and eliminations	Consolidated total
Sales and service revenues [*]	1999	35,856	14,425	636	3,160	3,074	1,776	1,501	60,428	[7,947]	52,481
	1998	36,292	11,904	740	1,443	2,566	1,975	2,165	57,085	[8,578]	48,507
Gross operating profit	1999	15,448	6,734	70	580	405	23	123	23,383	290	23,673
	1998	16,260	5,650	129	171	361	133	303	23,007	[119]	22,888
Operating income [loss]	1999	7,108	5,126	[41]	[246]	237	[5]	76	12,255	201	12,456
	1998	5,042	4,117	42	[159]	219	55	243	9,559	[373]	9,186
Capital expenditures [3]	1999	5,928	1,992	70	1,845	129	87	81	10,132	428	10,560
	1998	8,278	2,094	103	803	145	92	24	11,539	120	11,659
Number of employees at end of period	1999	76,150	9,375	1,354	5,627	10,206	5,153	12,704	120,569	2,093	122,662
	1998	79,508	8,893	1,270	3,621	10,101	7,551	10,644	121,588	2,378	123,966
[*] Of which, to other sectors of the Group	1999	4,903	703	176	180	947	817	664	8,390	[8,390]	=
	1998	5,212	810	203	234	650	934	945	8,988	[8,988]	=

[1] The figures for 1998 have been reclassified for purposes of comparison with 1999.
[2] These refer to 50% of the consolidated figures of Italtel Group from January 1, 1999 to October 31, 1999 and 100% of the same figures from November 1, 1999 to December 31, 1999.
[3] Investments in fixed assets and intangible assets.

[3.1] WIRELINE TELECOMMUNICATIONS IN ITALY

The wireline telecommunications sector is operated directly by the Parent Company, Telecom Italia. A comparison of the highlights between 1999 and 1998 is as follows:

[in billions of lire]	1999	1998	Change	
			amount	percentage
Sales and service revenues	35,856	36,292	[436]	[1.2]
Gross operating profit	15,448	16,260	[812]	[5.0]
Operating income	7,108	5,042	2,066	41.0
Capital expenditures	5,928	8,278	[2,350]	[28.4]
Number of employees at end of period	76,150	79,508	[3,358]	[4.2]

The reduction in revenues [shown gross of the amounts to be paid to other carriers] and gross operating profit, compared to 1998, can be ascribed to the effects of the competition and the consequent decrease in prices and rates, although in a context of strong growth in terms of minutes of traffic [+11.6%]. The improvement in the operating income instead is essentially due to lower expenses connected with fixed assets following the rationalization and modernization programs undertaken in previous years, and confirmed by the sharp drop in capital expenditures.

2118

▸▸ The offering

In 1999, following the rapid development of *Internet*, convergence was stepped up in the Information & Communications Technology [ICT] market, while an ever more rapid process of liberalization favored the entry of new operators to the vocal services market. On the fixed network market, Telecom Italia had to face up to two fundamental trends: the growth of the data segment and the mature status of vocal services. In order to unite customer focus and market leadership, Telecom Italia is pursuing innovative strategies which will lead to:

- designing an organization which will respond quickly to emerging requirements, focusing the attention of the various structures on the clientele;
- concentrating on small and medium-size companies, introducing a new organizational structure entirely devoted to this segment of the market;
- reproducing models of customer care, sales and marketing that have already been successfully tried in other Group companies, so as to reorient business areas related to residential customers towards criteria of efficiency, customer service and profitability;
- concentrating *Internet* activities in a separate unit.

Mass Market

In the mass market segment, the continuous erosion by mobile operations, the pressure from numerous competitors and the fall in the prices of telephone services have generated a reduction in revenues from traffic compared to 1998 [-12.4%], despite an increase in volumes of 0.57%. The fall in prices particularly affected district traffic [introduction of the "Fuori porta" tariff], as well as inter-district, international and fixed-to-mobile traffic. In addition, on November 1, 1999 the time tariff [TAT] was introduced for fixed vocal telephone services, on the basis of which the cost of conversations is calculated according to the effective duration of the call in seconds.

1999 also saw the continuation, with the support of suitable advertising campaigns, of initiatives to promote the free activation of *ISDN* lines, which helped to remove the barriers preventing customers from installing the lines and spread awareness of the product. The success achieved in 1998 [+152% compared to 1997] was again confirmed in 1999 [+124% compared to the prior year]; on December 31 almost 1,450,000 equivalent lines had been installed, more than 200% compared to the end of 1998.

Telecom Italia confirmed its leadership by the attention paid to customers' requirements, the continuous innovation of its offering, technological superiority and the pursuit of a policy of loyalty to keep its best customers. With regard to the latter, a new initiative called "Guarda la bolletta e vinci" [Look at your phone bill and win] was launched, a contest with automatic prizes with the aim of promoting the loyalty of customers with medium-high traffic consumption and limiting *carrier selection*.

In 1999, the offering of already-existing traffic plans for residential and business customers was extended, favoring, in particular, customers with high traffic consumption and *ISDN* customers. The initiatives implemented in July included the new plans Formula Area+ and Formula Vantaggio which, thanks partly to the success of the promotional offer [4 months free basic charges], exceeded 900,000 units by December 31. The overall number of all plans at the end of 1999 was well over 1,500,000, an increase of 256,000 compared to the end of 1998, more than 500%, confirming the validity of pricing strategies as a tool for building loyalty.

2119

Still on the subject of promoting customer loyalty and innovating the offering, 1999 was also an important year in terms of network services. The two new services, "Chi è" [Who is it?] and "Numero Personale" [Personal Number], launched in April, had reached a total number of more than 700,000 subscribers by December 31. The centralized answering service Memotel also proved popular, with 687,000 new customers, reaching a final total of 1,880,000 subscribers [+58% compared to the end of 1998]. In addition, 554,000 new supplementary telephone services were activated [call waiting, call transfer, three-way conference calls, automatic disabling], bringing the total at December 31 to 6,019,000 units [+10% compared to the end of 1998]. The free "5" redial service for engaged numbers was used by approximately 30% of customers, well exceeding the estimated target of 25%.

There was also a strong increase in the purchase of Call IT cards [248,000 cards sold during the year], reaching approximately 400,000 units by the end of 1999 thanks partly to the advertising campaign in June and the "Benvenuto" [Welcome] promotion [15 minutes of national and international traffic for new customers].

In 1999, particular emphasis was given to Customer Care services. In fact, the "187" service was strengthened by a new system for welcoming and managing calls, and increasing the availability of the service to the public from 8 a.m. to 8 p.m. from Monday to Friday. The image of the new 187 service ["A number made up of people"] was supported by an intensive advertising campaign. Innovation also proceeded with the "12" subscriber information and "1412" services, the latter resulting partly from the success of the "Chi è" service and the possibility of being able to see the number of the person calling.

In order to further capitalize on the competitive advantage deriving from the widespread presence of its distribution throughout the country, in 1999, Telecom Italia added 43 new points of sale for large-scale retailing to the existing 114 direct shops and 1,448 InSip shops. The commercial capacity of the points of sale was extended by being able to market network services, *ISDN* and rate plans, thus generating customer retention initiatives.

As regards the development of *Internet* business as a whole and with the aim of supplying customers with ever more highly evolved commercial services in line with market demands, in 1999, an e-commerce distribution channel was created. "Surfers" visiting the "www.telecomitalia.it" site are offered the whole range of services/products proposed by the company also through traditional channels. E-commerce then is another way of making contact with the market, and provides plenty of commercial opportunities. The start-up, which was more than satisfactory in terms of results, constitutes the basis for further developments in the next few years, in line with the potential of the new channel.

As for public telephone services, activities to develop the offering continued through certain promotions on national and international traffic by means of prepaid phone cards, the issue of phone cards to commemorate special events and contests linked to the purchase of cards. For outgoing international traffic there was a repositioning of the pricing of Welcome cards, favoring the countries of origin of the largest ethnic communities present in Italy. With collectors in mind, limited series of cards were issued, some commemorating special events, and some in partnership with specialized publishing

2120

houses. During the year, the installation of Terminale Ubicabile Ovunque [TUO] continued, reaching a total of 41,000 telephones, while for the two-year period 2000-2001 there is already a plan to replace 100,000 traditional telephones with *ISDN* telephones on an *intelligent network*, able to improve both the quality of service and the selection and broadening of the offering, as well as running and maintenance costs. To take into account the economic aspects of the plan, which also calls for optimizing the number of locations, the telephones which will be disconnected have been written down in the 1999 financial statements. By the end of the year, 362,000 public telephones were installed, of which 104,000 installed on roadside or placed in stations, airports and other areas of major traffic concentration. 1999 also saw the start of experiments involving "Internet corner" terminals enabling users to surf the *Internet* using phone cards; the results will help to establish how many systems to install and where.

Small and Medium-size companies

In 1999, in a context of growing competition, Telecom Italia set up the Business department, devoted to cover small and medium-size companies, economic entities which require a different sales approach and offering than larger customers or the residential clientele. The solution adopted, based partly on similar experiences, was regarded as the most effective and the one closest to the corporate strategy of covering the segment [650,000 customers with approximately 2,000,000 equivalent lines], and focused on the offering of phone and data services, involving external partners and reinforcing contact with the customer through the telephone channel "Telephone sales support" and "Business agent". The initiative led to the construction of a dedicated system in terms of marketing, sales and Customer Care structures, as well as information systems and procedures. The Customer Care service was thus rationalized by creating the single access number "191" for all commercial and technical assistance requirements.

Business Market

In a market framework marked by complete liberalization and considerable price pressure, Telecom Italia confirmed the level of revenues reported in 1998.

Maintaining a strong hold on the core business of phone and data services, extending the offering portfolio, developing innovative services and strengthening technological infrastructures, especially in the sector of data transmission, with particular reference to the *Internet* segment, proved to be fundamental strategic levers.

The defense strategy of the core business made it possible to obtain positive results in terms of commercial and economic objectives, making it possible to maintain a market share of 93% in phone services and 81% in data transmission services. Contributory factors to this were the rapid development of Intranet and Extranet solutions, the establishment of converging phone/data solutions, solutions based on *Internet Protocol* [*IP*] platforms, and evolved ICT outsourcing by involving top-level information partners. As for traffic, compared to 1998, the minutes of conversation increased by 13.5% [local traffic +26%, long-distance traffic +4.5%, and fixed-to-mobile +9%], while traffic revenues fell by 8% owing to the dramatic reduction in prices.

In order to broaden the offering portfolio, the following services were introduced in 1999: the "RING" data service, with prices based on use and high-speed access up to 155 Mbit/s supplied in various technologies [*ADSL, SDH, HDSL*]; "Business to consumer" solutions in response to the strong market demand; "Business Net" as an evolved version of the

2121

phone offering to companies. Within the framework of the new services to accelerate the movement of voice, data and images onto *IP* networks, "C@ll Web" was introduced, integrating access to the Web server with the functional advantages of corporate Call Centers.

The single Customer Care number "803-123" was activated nationwide and, lastly, the plan to review the maintenance service of private switching systems was launched.

As regards the services offered, the following should be pointed out:

- the further growth of *ISDN* connections, with the creation of more than 513,000 equivalent lines increasing their number by 47% compared to 1998 and exceeding the number of traditional business lines during the year with a final penetration of 53% over the total number of connections;
- compared with 1998, there was an increase in the number of active codes [+9%] and revenues from Numero Verde [toll-free] calls [+13%];
- the marketing of Business Solution first and later Business Net to supply phone solutions that can compete with the competitors;
- the dramatic growth of Business Frame and, in particular, the related revenues [+70% compared to 1998];
- the increase in the number of lines activated and the significant increase in revenues [+25%] from InterBusiness compared to the previous year;
- the positive results of acquisitions relating to the "Single Public Administration Network" [RUPA], due to approximately 3,000 lines being activated;
- the more widespread use of Video-communications, with approximately 14,000 devices installed and an increase in sales volumes of approximately 20% compared to 1998;
- the *Call Centers*, with 162 systems installed by the end of 1999 and a 27% increase over sales in 1998;
- the development of Network Applications, which have almost tripled the economic results of 1998, partly as a result of the full effect of the specialized sales force.

Internet

1999 marked the explosion of the *Internet* market in which TIN [Telecom Italia Net] has confirmed its role as a leader, closing the year with 1,990,000 customers [+409% compared to the end of 1998]. This result is above all due to the success of "free" Internet access offered starting from September, which, in four months reached a total of about 1,286,000 customers.

The potential market increased thanks also to the extension of the access network for this service, which now permits 100% of the population to connect to TIN.it with a local call. TIN.it is, in Italy, the only operator with a complete, integrated offering [Web access, *portals* and services] and multi-platform services [*dial-up, ADSL*, wireless].

TIN.it is shifting its market strategies from access to services for companies, offering, in particular, hosting, e-commerce solutions and portals. Its success can also be measured by the number of page views a month [65 million] and by the number of daily customers [5,000] visiting the virtual community "Atlantide".

TIN launched the "E-vai" offer on the market at the end of 1999. This is a personal computer with premium access to TIN.it payable on an installment plan. This offer is aimed at removing purchase barriers and promoting "computer literacy" in the nation.

2122

As far as the innovative offering is concerned, January 2000 saw the launch of the marketing of broadband services in *ADSL* technology, specifically for residential and small business customers, which permits fast access to *Internet* and the use of active multimedia services.
The TIN offer includes an "always on" connection to *Internet* for a basic monthly charge.

International traffic
The international *wholesale* services market, in which Telecom Italia operates in Italy and internationally, in 1999 was marked by increases in voice and *IP* traffic volumes, the drop in unit prices owing to the sharp growth in the offering and the appreciable reduction in transport costs, the introduction of more competitive procedures for receiving and transmitting phone traffic, the development of proprietary networks by the main *carriers*, the explosion of the international demand for connection to *Internet*, which, on the Atlantic section, exceed the band usage for phone services.

In the international phone traffic market where over 1,700 competitors operated at the end of 1999 compared to a thousand at the end of 1998, Telecom Italia is ranked seventh in outgoing traffic, with a world market share of 3%. This position was achieved thanks to the increase in *wholesale* traffic obtained from mobile operators and the other Italian wireline operators [+62% compared to 1998] and the increase of traffic in transit, which posted a strong gain [from 487 to 857 million minutes, +76%, with a market share of 7% compared to 5% in 1998] due to the entry of new operators and a more aggressive policy followed by Telecom Italia, based on a competitive quality/price ratio. In the incoming traffic market, Telecom Italia has confirmed its leadership position with a market share of 81% although competition on the domestic market is fierce. Telecom Italia's total minutes were 6.7 billion compared to 5.8 billion in 1998, up 15%.

% increase in international traffic by Telecom Italia [1999/ 1998]:

Total traffic	15.4%
• Incoming	15.9%
• Outgoing	2.2%
• In transit	76.0%

The system for prepaid international telephone cards was also stepped up during the year from the standpoint of both the operating system and the offering, which introduced the new products "New Welcome", "Athena", "Time", "Retevision".

The data-*IP* business in 1999 accounted for roughly 16% of *wholesale* international revenues. The *IP* business was the recipient of very sharp growth [+500% compared to 1998] owing to the international connectivity service SEA-BONE, directed to foreign *carriers* or Internet Service Providers [ISP], and the conclusion of four new agreements for the reciprocal utilization of networks with important European correspondents. The data business, instead, was hurt by competition from the principal international operators that were able to offer extremely competitive prices. In 1999 Telecom Italia revised its prices twice, in January and July, to bring its offering in line with the best prices offered in

2123

Europe, reducing the overall rates for traffic to the most frequented European sections by 33% and North America by 31%.

As for the quality of service, lastly, 95.2% of customers polled expressed satisfaction with the quality of international phone services [94.8% in 1998] and, of these, 34.8% were very satisfied [34.1% in 1998]. With regard to the Italy Direct operator service, the results based on technical finding show the following percentages:

	1999	1998
Calls answered	96.7%	94.8%
Answered within 20"	98.2%	96.8%

The network

Telecom Italia keeps an ever-watchful eye on scenarios where the demand is evolving, leading to a need to improve its network, with the aim of raising standards of performance from the point of view of quality and reliability, so that it can offer its clientele new hi-tech services based on an ever higher technological standard of infrastructures and control systems. With this in mind it has begun to implement plans to develop technology in the area of multiplexing and switching, and to introduce new operation systems; in particular, it has improved levels of overall availability by taking action both in the area of the *SDH* transmission network and in the area of service and duplication exchanges of the parts that are not yet appropriately sized. As far as monitoring and verifying levels of data network services are concerned, there is a plan to develop the systems with the aim of processing the performance data of individual components and to produce reports on the network as a whole and in terms of its clientele, with the option of offering customers the tools to verify for themselves the levels of service offered.

2124

The National network

The national network in statistics at December 31, 1999 is as follows.

Exchange areas:	10,000 served by 13,200 Line Stages [SL]
Switching areas:	615 served by 651 Local Group Stages [SGU]
Gateway areas:	33 served by 67 Transit Group Stages [SGT]
POTS accesses:	26.7 million
ISDN PRA accesses:	38,300
ISDN BRA accesses:	1,480,800
Copper network accesses:	103.4 million of kilometers-pair
Optic fiber access network:	400,000 kilometers-line
Optic fiber carrier network:	2.5 million kilometers-line
Tele-selective circuits:	3.7 million
Network for direct number circuits:	600,000 access points with speeds up to 2 Mbit/s
Frame Relay accesses:	70,000 gates at equivalent 64kbit/s [usable also for *IP* services]
ATM accesses:	230 gates at 34Mbit/s and 100 gates a 2Mbit/s
IP dial-up accesses:	40,000 gates

The switched network is composed of connections between the premises of individual customers and the local exchange, switching exchanges [for voice and data services] and transmission media for interconnecting the exchanges. The territory is divided as follows: "exchange areas", to which subscribers are connected; "switching areas", which collect the telephone traffic of the exchange areas connected to them; "*gateway* areas" which collect the inter-district and international traffic of the switching areas. The network, which is mature from a technological point of view and stable from the point of view of territorial coverage, has developed in terms of continual modernization [numbering has reached 98.7% compared to 97.9% at the end of 1998] and opening up towards other operators.

In fact, during 1999, with the development of the liberalized market, Telecom Italia set up interconnections with the networks of 17 more operators, in addition to the 6 recorded in 1998. During the year, the following contracts were also signed or renewed: 40 interconnection agreements [with Infostrada and Wind also signing agreements for *carrier selection* between districts]; 11 "reverse" agreements, terminating calls on the network of another operator; 8 agreements to supply direct connections between the networks of other operators. Negotiations are currently in progress for an agreement to supply high-speed access services based on *ADSL* technology. Interconnection traffic, amounting to 28.3 billion minutes in total, can be broken down as follows: 8.9 billion minutes of "fixed-to-mobile" traffic generated by Telecom Italia customers; 8.1 billion minutes of "mobile-to-fixed" calls; 5 billion minutes of *carrier selection*; 3.7 billion minutes of fixed-fixed calls generated by customers of other operators; 2.6 billion minutes of fixed-fixed calls generated by Telecom Italia customers. During the year, the transfer of numbering for toll-free dialing from "167" to "800" was completed, while the network was equipped for the inter-district *carrier selection* service which started on January 1, 2000.

During the year, the intelligent network again showed a growth of traffic [approximately 40 million calls a day] and services. New services were introduced during the year: "Numero Personale" [Personal number], "Numero verde universale" [Universal toll-free number], "Pronto Pagine Gialle" [Pronto Yellow Pages], "Business Net" and "Chiama gratis" [Call free]. The Call It, Addebito Intelligente [Intelligent charge], TUO and services

2125

based on *Call Centers* were also transferred to a second generation platform and all enhanced with new features. With reference to liberalization and interconnection with other operators, inter-district *carrier selection* and the service *gateway* for interconnection via SGU became effective. At the same time, the network was extended by introducing a new platform; the new signaling network for advanced services, with higher performance in terms of supervision, safety and traffic capacity; finally, the network of peripheral equipment was extended to support interactive services on the intelligent network, in which the first second-generation systems were introduced.

The second half of 1999 saw the start of the development of the Arianna network which, thanks to the use of the latest generation of *SDH* technologies and the new optical DWDM technology [Dense Wavelength Division Multiplexing] constitutes the basis for a new transport network with a high transmission capacity capable of covering the entire country. The network will be used to transport flows with a high requirement for quality and availability, both in terms of incremental requirements and migration away from the current transit network. Arianna is based on a structure with *SDH* rings; from 2000, in order to reduce the number of fibers, DWDM systems will be used capable of multiplying by a factor of 12 the available optical fiber band and the current transmission capacity, thus increasing the transport capacity of the connections. The network will be operated by the same system that is currently used for regional networks. The DWDM systems provide the natural link between current transport networks and the future optical OTN networks [Optical Transport Networks], multiplexing and exchange entirely within the optical domain, without any need for optical-electric conversion. The evolution of the transport network towards the optical network will make it possible to augment the operational capacity of all types of traffic, from phone calls to *Internet* traffic. In this context, experiments with CSELT continued on the PEGASO project [Project for the Evolution of the Operation and Architectures of Optical Networks and Systems], which has the aim of finding out more about the topics associated with optical networking, and the transport of *IP* and *ATM* flows on optical networks. The strong growth of the *SDH* network [from 700 to 3,000 pieces of accessory equipment and from 7,900 to 70,000 connections] during the year led to numerous adaptations and improvements to systems and software.

At the end of 1999, in the access network, the number of lines exceeded 26.5 million, thanks particularly to the development of *ISDN* connections. The trend is shown in the following table:

[in thousands]	1999	1998	1997
Number of fixed connections			
Final total	26,502	25,986	25,698
- general telephone network	23,453	24,251	24,801
- *ISDN* in equivalent lines	3,049	1,735	897

In 1999, services in *DECT* technology were not extended to other cities other than the 33 existing at the end of 1998, because of the slow expansion and low level of use of the FIDO service. In view of the suspension of the service following profitability forecasts which will not permit the recovery of the value of investments, the residual value of the installations and software constituting the platform was written off in the 1999 financial statements.

Experiments are being performed with "in-house" cabling for apartments, which facilitates the supply of high-speed services by integrating existing telecommunications links

2126

[telephone and TV] and by also allowing the use of *ISDN* access and *ADSL* technology. In addition, the technical specifications of the "new network termination" have been established which, by replacing the three-hole socket, will also make it possible to exploit new telecommunications and multimedia services. The experiments will take place in the second half of 2000, in order to permit installation in new or re-structured offices from 2001.

With reference to access services using *ADSL* technology, in 1999, the technical and commercial trials with fast *Internet* access for residential and SOHO [Small Office Home Office] customers, begun in Rome and Milan at the end of 1998, were concluded. In the second half of the year, commercial services with access in *ADSL* technology for business customers and ISPs [Internet Service Providers] were extended to 25 cities. The commercial services for business customers include the use of *ADSL* technology in urban areas to supply access to the "RING" services [*IP, Frame Relay* and *ATM*] of Telecom Italia's data networks. The services for ISPs supply *wholesale ATM* access based on *ADSL* technology to the public, leaving the commercial interface with the final customer to the Service Provider. At the end of 1999, the "exchange areas" covered by *ADSL* technology numbered 250; by 2000, 72 towns and 650 exchange areas will be served.

In 1999, both high-speed access on copper pairs using *HDSL* technology with *ATM* protocols and access using optical fiber with *SDH* connections were made available, making it possible to exploit data services locally and to access the long-distance services of the Telecom Italia networks. The innovative feature of this offer lies in the availability of fast access on copper connections and in the possibility of using RING services with tariffs matched to consumption, in local, national and long-distance scenarios. In fact, in the second half of the year, the technical verifications for opening *IP* services for business customers with this type of tariff system were successfully concluded. This functional advance, which is significant from a technological point of view, places the company on the leading edge in worldwide terms; thanks to this new system, customers will only pay for the traffic they consume on *IP* networks, subdivided into local, national and "Big Internet" traffic, up to the maximum speed which subscribed access to the service exchanges of the Telecom Italia network allows. The service, which is already available in Milan, Padua and Brescia, will be extended during the course of 2000 to the 72 cities where the RING offering of services is available. During the first half of 2000, tariffs matched to consumption will also be introduced to the *ATM* and *Frame Relay* networks in the same cities for *IP* consumption services.

The evolution of new ways of offering *Internet* access includes the introduction of different levels of quality in terms of both the general telephone network gates reserved for the Service Provider, and in terms of *band* on access to the national and international *IP* backbone. The relative technical assessments will be carried out in the first half of 2000. During the same period, a technical analysis has been scheduled for the opening of *IP* "multicast" services on a national scale, which, initially, will be directed towards ISPs who intend to extend the offering of their services to residential and SOHO customers with audio/video and multimedia content, distributed by broadcasting mode on *IP* networks from their own service centers. The technical realization of these services is planned both for access from switched networks, and is thus nationwide, and for access from *ADSL* networks, which is limited to the cities covered by the service. During the first half of 2000, a technical analysis of *IP* multicast services within *IP* networks – private virtual networks for business customers is also planned, together with the extension of the service on an international scale.

2127

In 1999, operating systems were, in turn, developed with the aim of ensuring the offering of new services, optimizing operational activities and pursuing objectives of total quality. Procedures were developed for systems dedicated to supervising traffic for verifying levels, the immediate management of measurements and constant monitoring of the quality of the service provided; in systems that operate the flexible network for data transmission, features were activated which reduce activation and connection time, permit the timely recognition of customers who have experienced malfunctions in services and augment the availability of the connections themselves; finally, operating systems have been equipped with new features for marketing new services ["Numero personale", "Numero verde universale", "Pronto pagine gialle" and "Chi è"].

Within the framework of developing the network and services, various experimental activities have been planned, the most important of which are as follows:

- *ADSL* terminations of networks for various network configurations for the customer, and *ADSL* access for *ATM* services and *IP*s for business customers;
- integrated messaging and voice and fax services on *IP* for residential and SOHO customers;
- services with the use of integrated *ATM/IP* technologies, as well as intelligent systems on *IP* networks capable of tailoring the offering according to the customer base or ISP;
- hi-tech tariff solutions, no longer based on consumption [volume or time], but on the basis of the content or application requested by the customer.

The technical quality of the network, expressed as a percentage of calls reaching the number called [99.7% for local calls, 99.1% for long-distance calls] is much in line with the levels of excellence recorded in 1998. Surveys carried out with the aim of discerning the quality of service perceived by the clientele confirm the results of the prior year, highlighting, both in the case of residential and business customers, a level of satisfaction of well over 90%.

ADSL

Currently, the telephone network is the main medium used for entering *Internet*. The fact that coverage is comprehensive nationwide means that anyone can access the data network, although, until now, the low speed of conventional transmission systems has limited access to the network. However, for a few years now, thanks to the introduction of new technologies for transmitting data on the copper network, the telephone network is being transformed from a network for voice compatible with data to a network for data that is compatible with voice, thus extending the possibility of exchanging information at high speed.

One of these technologies is the Asymmetric Digital Subscriber Line [*ADSL*], which permits the transmission of audio, video or data signals in a digital format at high speed and asymmetrically, using the normal copper user connections and thus generating a good price/performance ratio and with numerous advantages for the clientele. By means of this analog/digital type of technology, which uses modems connected to existing copper telephone pairwires, voice traffic is separated from data traffic, facilitating the supply of advanced services both for the residential market and the business market of the SOHO [Small Office Home Office] type.

ADSL, which has unbalanced flows of data-transmission, is particularly suited to applications which require high speed in transmission from the network towards the customer, but not in the opposite direction. This feature of *ADSL* makes it possible to transfer large quantities of data towards the customer, as with video transmissions or during access to the content of Web

2128

sites with advanced multimedia characteristics. In this way, the capacity of surfing the Internet can increase by a factor of 10 or 12 compared to the traditional service.
The network structure for *ADSL* services involves termination located at the customer's premises and connected, by means of a copper pairwire to an "access multiplier" [*ADSL*-mux] located in the Telecom Italia exchange; a pair of *ADSL* modems located at the customer's premises and at the exchange makes it possible to transport three information channels: a high-speed data channel from the switchboard to the customer's premises, a medium-speed data channel in the opposite direction and an analog telephone channel, the functioning of which is ensured by special filters even when the ADSL channels are being used. In this way, it is possible to send data at high speed, even when the telephone is being used. Since each connection made by the user is a dedicated resource, the customer is always connected to the network with a reserved band and with high levels of reliability in the connection.
The commercial offering is based on the integration of *ADSL* and *ATM* technologies and is directed, first, to the Internet Service Providers [ISPs] who intend to supply their customers with high-speed access to the *Internet*. In fact, *ADSL* makes it possible to send digital signals at high speed to the premises of subscribers to the Telecom Italia data network or to other service/content providers. The service therefore makes it possible to create access networks towards service providers and high-speed Internet/intranet applications. The pricing system involves a fixed cost for the connection, separate from the consumption and volume of the amount of data exchanged; the reference clientele therefore comprises not only ISPs, but also small and medium-sized companies, research institutes, universities, the Public Administration, local authorities, suppliers of interactive online services and other telecommunications operators. The banking sector is also particularly interested in using *ADSL*, especially for developing the online bank counter with a reduction in costs which some estimate to be more than 100 times those of operations carried out at an actual bank counter.

International network

The liberalization of the markets is intensifying the adaptation of the international network, where the collection, routing and termination of traffic can be carried out with alternative means to those used hitherto. In fact, a radical evolution of the network architecture is in progress, in which bi-lateral connections are integrated with a multi-lateral *backbone* [for voice and data] and, more generally, all the various stages are performed based on considerations of quality, economic yield and flexibility in order to reduce the "time-to-market".
In this context, new switchboard features have been introduced, the strengthening of the operation system has continued and the platform for the international *ATM* service, which was activated in July, has been completed. The growth of the *Internet* service also continued, with the extension of the SEA-Bone network [South European Access backBone], the capacity of which, at December 31, 1999, was eight times that at the end of 1998.

During the year, in order to cope with the growth of traditional traffic and new services, the submarine links in South America, the North Atlantic the Middle and Far East and the Mediterranean were increased; then the project design for the Nautilus system, an optical fiber network between Italy, Israel, Greece, Turkey and Egypt for hi-tech and *Internet* services was completed. At the end of 1999, Telecom Italia's international submarine network extended for approximately 350,000 km.
Construction has also begun of the *backbone* which will link the most important European countries through POPs in the main cities [Milan, Zurich, Paris, Barcelona, London, Brussels, Amsterdam, Frankfurt and Vienna]; the first part of the network [Italy-

Switzerland-Germany-France-United Kingdom] will be available by June 2000, while the rest is scheduled for completion by March 2001.

At the end of 1999, 229 countries could be reached by direct dialing. There were 121,384 international circuits [27.4% more than in 1998], of which 97,910 between Italy and foreign countries and 23,474 between foreign countries [of which 5,053 via satellite]. Of these, 69,739 are for phone services [57.5%], 23,474 for transit calls [19.3%], 18,617 for *Internet* [15.3%], 960 for *ATM* [0.8%] while private circuits number 5,697 [4.7%]. The numbering of the international network has exceeded 98%.

In 1999, the ABR [Answer Bid Ratio – the ratio between the calls which obtain a reply and the overall number of attempts at calling] produced the following results:

	1999	1998
ABR outgoing	53.2%	55.1%
ABR incoming	63.6%	62.6%

The outgoing ABR deteriorated because of the greater amount of traffic directed towards low-quality national networks, despite technical measures [alternative routing systems, increasing the number of circuits, intervention involving the interested operators] carried out during the year.

▸▸ Human resources

Employees in the sector [including the 37 resources transferred to Path.Net, the new company which will provide data transport services on the "Single Public Administration Network"] numbered 76,150 at December 31, 1999. Those at Telecom Italia numbered 76,113 compared to 79,508 at the end of 1998; the decrease of 3,395 units is in line with corporate strategy to optimize processes and costs. 71% of the 3,816 who terminated employment did so due to early retirement, 16% due to spontaneous retirement, and 9% were transferred to other companies in the Group. At the same time, particular attention was given to the quality mix of the personnel by recruiting 421 new employees, almost all of whom are university graduates, or have high-school diplomas or diplomas of interest to the company, while 42% of those who left the company had a low level of education.

Training activities in 1999 concentrated on interpreting and managing the current dynamics of the Information and Communications Technology market. The training courses, for a total of 2.5 million hours, both at managerial and operational level, were aimed at strengthening knowledge and competence in "critical" areas for the development of corporate business. They mainly involved the integration of the various business areas, client orientation, supervision of the markets, internationalization, the co-ordination of production and organizational processes, the management and development of human resources through increasing use of the latest teaching methodologies, based on the integration of multimedia and online systems with traditional training techniques.

In 1999 negotiations started with the labor unions under the terms of the development and re-organization plan; in particular the key strategic areas for the development of the Group were described to the labor unions within the national and international context, and the

2130

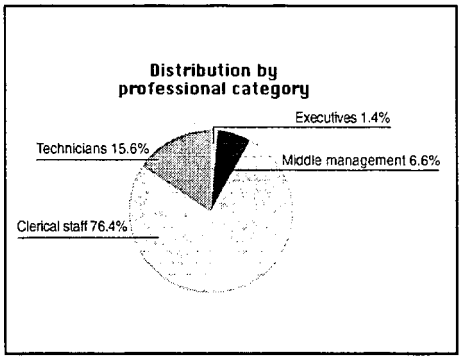
relative implications in terms of organization and processes. In view of the proximate expiry of the Collective National Labor Contract [CCNL], within the framework of Confindustria, negotiations were begun and are still in progress to stipulate a new contract for the sector. Since its definition will have repercussions in terms of current collective contracts, an agreement was signed with the unions to postpone the expiry of the contract and the harmonization agreements in force until the date of the stipulation of the new CCNL.

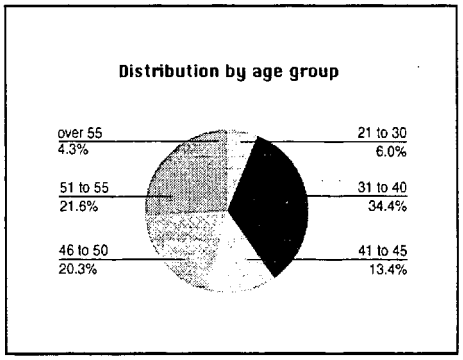
During the year, agreements were signed with the labor unions on the following main topics:

- *Temporary work*: an agreement for the sector involves special cases of use in addition to the cases defined in the interconfederal agreement, also raising the level of use for mobile radio services to 11%.
- *Hour bank*: in certain areas of the company, testing has been started and concluded aimed at optimizing the management of working hours by converting 50% of overtime into recovery time according to specific methods and criteria.
- *Sales force*: from 1999 the incentives scheme will be established unilaterally by the Company. In relation to this change, the pay structure for the sales force has been put on a par with that of other personnel.
- *Bonus*: the bonus structure has been revised both on account of the introduction of IRAP taxes and on account of the variation in some of the criteria used in drawing up the 1998 financial statements, which modified the original parameters for bonus payment; it is possible that there will be another revision if there is any variation in the legislative or fiscal framework or accounting criteria.
- *National supplementary pension fund for employees of "Telemaco" telecommunications companies*: following the approval of the information card by the competent supervisory commission, over 66,000 people had joined at December 31, 1999; in accordance with the criteria established by the institutional agreement and electoral regulations, in October 1999, the elections were announced for the Meeting of the fund and held on February 10, 2000. These will be followed by the elections to appoint the administrative and control bodies for the fund.

The joint re-examination with labor union representatives of some of the micro-organizational processes has led to the extension of working hours for front-end customer services, the definition of new sales channels and the re-engineering of technical assistance activities. Finally, during the year, 200 remote work stations were activated at the homes of operators of the "12" Directory Inquiries service, according to the agreement with the labor unions of July 1998.

The tables that follow show the distribution of the personnel of Telecom Italia S.p.A. by professional category and by age group at December 31, 1999.





2131

▸▸ Research and development

In 1999, R&D activities at Telecom Italia were mainly directed towards testing innovative services, with particular reference to *Internet* and the evolution of mobile services and the networks. New solutions were devised for the offering to specific customer segments and the technological options were further researched to develop network platforms to support flexible solutions for the integrated transport of voice and data. In particular, work continued to find solutions for fast access to *Internet* using *ADSL* technology; in this context, the testing of the "Fast Internet" service for residential and SOHO customers in Milan and Rome was completed, and new business models were tested for the offering of advanced *Internet* services. New *IP* solutions were also tested for companies, thanks to collaboration with leading international partners in the field of research.

During the year, activities also continued in the area of "multimedia workshops", in collaboration with three Italian universities, to encourage the training of researchers and university staff in the use of hi-tech telecommunications tools and technologies, the development of business opportunities in the sector of multimedia and the creation of a basis for business initiatives geared to marketing the results achieved. In the field of the offering of services, products and applications, prototypes of new solutions were developed for the various customer segments, based on the implementation of innovative services aimed at specific market targets, including global solutions for the local economy developed within the framework of the Torino 2000 Project.

Telecom Italia devoted Lire 213 billion to R&D activities, of which Lire 196 billion refer to activities performed by CSELT.

[3.2] MOBILE TELECOMMUNICATIONS IN ITALY

The Telecom Italia Group operates in the mobile telecommunications sector through **Telecom Italia Mobile** [**TIM**]. The highlights of fiscal 1999 are as follows.

[in billions of lire]	1999	1998	Change	
			amount	percentage
Sales and service revenues	14,425	11,904	2,521	21.2
Gross operating profit	6,734	5,650	1,084	19.2
Operating income	5,126	4,117	1,009	24.5
Capital expenditures	1,992	2,094	[102]	[4.9]
Number of employees at end of year	9,375	8,893	482	5.4

In 1999 TIM appreciably improved its results compared to 1998, evidence of the approval expressed by its clientele for the ample range of rate plans and services. The increase in revenues was equally reflected in all the various operating results [the gross operating profit was also affected by higher sales costs]; the same revenues, however, also included higher amounts to be paid to other mobile carriers as a result of the increase in the related traffic volumes. The latter, up by 35% in terms of minutes, led to a growth in the relevant revenues of 27.2%, being the result of the increase in the average lines [+41% due to the effect of the sales campaign during the year] and the

2132

reduction in average revenues per line [–14% owing to the growing success of prepaid services] and the average revenues per minute [–7% due to the pricing policy aimed at customer retention and development].

▸▸ The offering

The Italian mobile radio market, the largest in Europe, with 30.3 million lines by the end of the year, was characterized by a further acceleration of growth and the intensification of competitive pressure [in March 1999, in fact, the third operator became operational]. Within this context, an ongoing renovation of the services offered is vital to building loyalty and acquiring new customers.
In 1999, TIM was confirmed the leader in Italy in terms of the number of lines [61%] whereas net acquisitions were the same as its major competitor [43%]. The growth of TIM can now be wholly attributed to prepaid services, with the percentage increasing from 72% to 82% of the total lines.
In addition to covering the national market, expansion continued on foreign markets, as described in the section on the international sector, geared to consolidating presence in the two target macro-regions of Europe and Latin America. By the end of the year there were more than 18.5 million lines operating in Italy, while foreign lines operated by Telecom Italia Group reached 13.8 million [3.8 on an equity base], thanks particularly to the French operator Bouygues, the start-up of the Spanish operator Retevision Movil and the success achieved by Brazilian subsidiaries.
With regard to the offering to private customers, TIM adopted the strategies of tailor-made solutions and simplifying ways of using its services; these strategies, which were made possible by developing its network capacity and information systems, were established mainly through the introduction of "TIMMenù'" and "UNI.TIM".
With "TIMMenù", it was possible to create a tariff system adapted to the various customer requirements, modifying it according to the necessity to use cell phones. Besides the basic rate, the customer chooses one or two options to call during particular time bands or particular numbers with especially advantageous terms. By the end of the year, the "TIMMenù" plan had been further enhanced with the new "Long TIM" options, suitable for longer conversations and "TIMMenù Autoricarica", whereby a bonus is awarded according to the amount of traffic received.
With UNI.TIM [Universal Number TIM], introduced in November 1999, customers may also use their own cell telephone number for e-mail, faxes and *Internet* access.
With regard to the business market TIM has extended the offering for vocal traffic [TIM Card Aziendale, MSC-PABX direct link] by introducing new value-added services ["InfoTIM", "UNI.TIM", and Business to Consumer and Business to Business applications].
On an international level, TIM continued its efforts to arrange *roaming* agreements with operators in other countries, in order to increase the level of coverage offered to its *GSM* customers, augment the number of customers with *roaming* facilities on its own network, and upgrade its portfolio of investments so as to consolidate its presence in the two regions in which it is chiefly interested [Europe and Latin America].
The TIM sales network, which is becoming ever more diversified, has 1,805 Standard Dealers [including 56 directly owned "Il Telefonino" shops], 379 Master Dealers, and 80,000 points of sale in the distribution channel [tobacconists, newsagents, motorway service stations, Autogrill restaurants, and Telecom Italia company shops]. On December 23, 1999 the TIM sales network was enhanced by the virtual sales channel "Il Telefonino On line".

2133

Finally, as far as the quality of service is concerned - TIM's main objective for ensuring customer loyalty and conquering new customers - the level of overall satisfaction in 1998 was confirmed at about 80% on the total of TIM's customers.

▸▸ The network

The capital expenditures made in 1999 were mainly concentrated on strengthening the 900-MHz *GSM* network and building the 1800-MHz network in order to increase capacity in areas with a high density of traffic. In fact, 135,000 incremental *GSM* channels were installed, of which approximately 29,000 were 1800-MHz channels, and more than 2,000 new base transceiver stations, more than 800 of which were 1800-MHz channels; in addition, more than 32 new switching exchanges were activated as well as 8 data control exchanges which also made it possible to improve the performance, coverage and traffic-handling capacity of the *GSM* network.
For the *TACS* network, investments involved the transmission channels in order to optimize the capacity of the individual cells.
The handling capacity of supplementary mobile services was doubled by installing a new services center with greater potential than the previous ones.
At December 31, 1999 levels of coverage were as follows; population 99% for *GSM* and 98% for *TACS*; territory 89% for *GSM* and 83% for *TACS*.

UMTS

In June, TIM and other mobile telecommunication leaders in the world market set up a research group to promote and study *UMTS* technology. On November 16, in Turin, in cooperation with Ericsson and CSELT, the first "on air" call was made in Europe using prototype equipment in a local setting. The "third generation mobile radio system" which will continue to be tested during 2000, will make multimedia applications available also for wireless communications, revolutionizing the mobile market in the near future. The new broadband network, in fact, will be able to handle data transmissions at a speed such as to allow moving images and high-fidelity sounds to be sent.
In Italy, on December 22, 1999, the Telecommunications Authority approved the rules for the issue of five licenses which will be awarded, after a selection based on technical, economic and commercial criteria, to the best bids. TIM, however, maintains that it has the right to start service without participating in the bidding since it holds the "public mobile radio services for numerical communication, regardless of the technologies used". In February 2000, the decree was published for the institution of a Committee of ministers which will select the advisors who will prepare the call for bids, draw up the rules and choose the winners. The Committee will coordinate the bidding procedures and approve the list. The choice of the committee members should be completed by April, in time to publish the call for bids in May; by the end of the summer the licenses should be awarded and immediately thereafter issued in accordance with the commitments undertaken at the community seat. The start of services is scheduled for January 2002.
Telecom Italia Group is in any case taking part in the biding for the issue of the *UMTS* licenses in places where it operates as a *GSM* operator; in this sense, on March 13, 2000 the associated company Retevision Movil was awarded a specific license in the mobile radio market in Spain.

2134

Human resources

At the end of 1999, there were 9,375 employees, an increase of 5.4% compared to 8,893 at the end of 1998 including 896 new recruits, of whom 37% were recruited from companies within Telecom Italia Group, while 414 employees left the company during the year. 43% of the workforce are women, mainly employed in the Customer Service structures, 18% are university graduates and 80% have high school diplomas. The average age of the workforce is 31, with an average of 2.8 years service.
Thanks to an agreement with the unions, 1,540 temporary part-time staff were employed in Customer Service which made it possible to optimize the size of the workforce to satisfy the "peak" periods of customer demand. There was positive progress in the sphere of experiments for remote work using computers, begun in 1998, which currently involves 93 people.
Training programs aimed at developing corporate business and improving the professional skills of corporate personnel were held for all departments, with special attention to the Consumer, Business, Customer Service and Network departments.

Research and development

Research and development activities are carried out by CSELT. The activities consist mainly in the study and analysis of new options to broaden the range of data transmission and online services offered to customers and to improve the relative standard of quality. CSELT also assists TIM in optimizing its frequency planning and the scheduling of its coverage of the mobile network, participating in research activities and the design of technical standards in national and international settings and in the development of satellite technology applications.
The activities commissioned by TIM from CSELT for 1999 laid the foundations for product and process innovation which, over the next few years, will modify the traditional definition of the core business of the company, which, until now, has been based on mobile phone services and low-speed data-transmission services. The innovation consists of high-speed multimedia data-transmission services and the associated GPRS and *UMTS* technology. Multimedia services make it possible to create many applications in many diverse sectors of activity; especially with the ability to transmit data at high speed, they will provide a new way of communicating, both for private customers and especially for business customers.
Another field of research regards the study of the environment and, in particular, the effects of electro-magnetic fields in the definition of methodologies which make it possible to obtain reliable forecasts and measurements with regard to optimizing the distribution of signals and its impact on the human body.
The overall cost of R&D activities conducted by CSELT in 1999 on behalf of TIM was Lire 48.5 billion.

[3.3] SATELLITE TELECOMMUNICATIONS

The Telecom Italia Group operates in the satellite telecommunication sector through **Telespazio** and its subsidiaries. The highlights of fiscal 1999 are as follows:

[in billions of lire]	1999	1998	Change	
			amount	percentage
Sales and service revenues	636	740	[104]	[14.1]
Gross operating profit	70	129	[59]	[45.7]
Operating income [loss]	[41]	42	[83]	°
Capital expenditures	70	103	[33]	[32.0]
Number of employees at end of year	1,354	1,270	84	6.6

The above figures refer almost entirely to Telespazio.
With reference to this company, production value, including contract work in process [Lire 680 billion compared to Lire 623 billion in 1998, +9.1%], already takes into account the first orders for the Astrolink system. The greater competitive pressure in 1999 is evident from the figures for gross operating profit [Lire 137 billion compared to Lire 170 billion in 1998] and operating income [Lire 53 billion compared to Lire 87 billion in 1998]; the net income of Lire 1 billion [Lire 23 billion in 1998] was also affected by the writeoff of the entire investment in Iridium Italia.
The gross operating profit and operating result were negatively affected by the other companies of the sector such as Iridium, on account of the unsatisfactory commercial results and Viasat, which is still in the start-up stage.

▸▸ The offering

In 1999, the satellite telecommunications scenario was characterized by a gradual process of consolidation of the main operators, a significant re-scaling of public finances and the acceleration of the privatization processes begun by all the governmental satellite organizations. On the technological front, with the significant cutback of wireless phone operations via satellite, the market is particularly interested in both the development of global broadband systems for multimedia and *Internet* applications, and the commercial spread of data recorded and transmitted by high-resolution satellites. In this context, Telespazio succeeded in augmenting its role as a national and international space center for satellite engineering and services, exploiting its capacity to operate over the whole value chain of space activities, except for the construction and launching of satellites.
In particular, in the sector of space services and systems, the building of the earth stations for the European scientific mission Artemis was concluded, while the company continued to operate telemetry and satellite control services for Italsat, Intelsat, Eutelsat, Comsat and Orion. In addition, Telespazio has participated in the leading national projects connected with the development of the MITA and PRIMA standard space platforms, playing a key role in the program of creating systems for GNSS satellite navigation.
In the television sector, despite the growing competition from foreign operators, there was further growth in the offering of digital channels, business TV services and data transmission for important networks of national and international customers.

2136

The activities on behalf of the Ministry of Defense to support the operations in the Balkans and in East Timor were of particular significance. There was significant growth in wireless satellite messaging services associated with the Emsat and Orbcomm products, the applications of which in the field of *infomobility* and the monitoring of transportation have been integrated with the "Euteltracs" system for fleet management. The subsidiary Viasat [an equally mutually-owned joint venture between the Group and Magneti Marelli] has sold about 30,000 terminals, thus taking the lead in the European market for vehicular *infomobility* services.
Finally, earth observation activities were developed thanks to the supply of standard territorial information services oriented towards local [Provincial and Regional] administrations, aimed at risk management and monitoring of the environment.
The agreements signed in July 1999 with Lockheed Martin Global Telecommunication and TRW for the Astrolink project, on the other hand, have enormous strategic value in terms of the potential for Telespazio to strengthen its role in the promising sector associated with broadband and *Internet* services. As a result of its commitment to Astrolink [financial investments for a total of USD 250 million, of which USD 83 million has already been paid], the company has acquired contracts to supply the earth segment worth USD 508 million.

1999 was the first year of activity for **Iridium**, after the launch into orbit of the satellites and the launch of the service in 1998. Commercial growth proved to be much lower than expected and led to the failure to respect commitments made with the financing banks, which assumed that commercial objectives would be reached within pre-established deadlines. Following these problems, the American company leading the project, Iridium Llc., in which the Group has an investment through Iridium Italia [35% held by Telespazio, 35% by TIM and 30% by Telecom Italia], was forced into a temporary receivership, which is still in progress. At the same time, the securities of Iridium World Communication Ltd., quoted on the Nasdaq Index, were at first suspended from trading on account of the sharp fall in the price of the stocks and then cancelled from the Index. At the end of March, Iridium Llc. decided to interrupt commercial service; actions are however also being taken to search for opportunities to relaunch the project.

▸▸ The network

In the technical field, Telespazio aimed to consolidate its roles of national and international space center for engineering and space services, of active participation in the development of global satellite systems, of national coverage of services disseminated in the television market and user networks in the data market, also interpreted as a pilot market for evolution of multimedia. In these spheres, efforts were aimed at expanding the corporate business areas, continuing to improve the efficiency of its operations centers and updating the technology of its information centers. In the sector of space systems and services, we should mention the building of the control center for the Artemis data re-launching satellite. In the sector of telecommunications, activities continued that were associated with the development of the VSAT networks, systems for wireless telecommunications and installations devoted to rendering services to customers outside the Group; of particular note was the construction of the two-way system for satellite *Internet* connections. Finally, in the television segment, activities included the strengthening of the platform and services for digital TV and the modernization of the systems devoted to conventional

2137

television services. Within the sphere of the Astrolink system, the constellation of four new-generation geo-stationary satellites that will offer multimedia services on a global scale, which will be operational by 2002, Telespazio will be responsible for constructing the entire earth segment [network and satellite control centers, *gateways*] and will supply all the operational and maintenance services. During the last few months of 1999, the company concentrated on the development of the preliminary design for the earth segment, along with other suppliers.

▸▸ Human resources

The increase in personnel operating in the sector [+84 units] is due to the development of new activities at the companies in which Telespazio has holdings. In fact, in the parent company, at December 31, 1999 the workforce numbered 1,041, compared to 1,040 at the end of 1998. Incoming employees numbered 49 while outgoing employees numbered 48. University graduates and high school graduates accounted for 35% and 56% of the total respectively, confirming the high level of education of the resources working for the company. During the year, the workforce received about 27,000 hours of training, which concentrated mainly on technical and managerial subjects and the study of foreign languages. Finally, because of the importance of the initiative and the complexity of the contract for the creation of the earth segment of the Astrolink system, a special structure was designated for the management of the project.

▸▸ Research and development

Telespazio is engaged in activities aimed at developing innovative systems and services using technologies that are already available, so that it can act as a provider in the market of multimedia services via satellite; such services, in the future, will be able to be supplied at a lower cost and on a global scale through the Astrolink system. The initiatives are being carried out both independently and through participation in programs jointly financed by national [ASI] or European [ESA] organizations specialized in the development of activities in space.

In telecommunications, activities mainly involved the development of broadband satellite systems, given the growing demand for flexibility and the greater volumes of traffic induced by *Internet* and, more generally, by multimedia. In fact, in this sector, the satellite is no longer regarded as a means of transport, but is becoming a tool in its own right, thanks to which it is possible to offer value-added services directly to customers.

In the sector of earth observation, development of the new high-definition satellite remote observation systems, and the development of the technological platform for the Services Center that is to supply territorial information services, also on-screen, [for example, measuring the shift of land in centimeters and monitoring areas liable to landslide], was speeded up.

In the navigation sector, development activities involved the management of air traffic and the European "Galileo" satellite program; in the sector of integrating aeronautical and space systems, activities involved various areas of civilian and military interest. Finally, there were special activities devoted to the sectors of systems and services in space and observation of space.

2138

[3.4] INTERNATIONAL TELECOMMUNICATIONS

The international presence of Telecom Italia Group is concentrated mainly in the south of Europe and South America, where the Group is strategically placed and controls a significant share of the total market with approximately 30 million fixed and mobile customers [excluding Italy].
In this context, the international strategy of Telecom Italia Group has the following objectives:

- to pursue the enormous potential of the growth of mobile telephone, *Internet* and data services;
- to become a pan-regional operator of mobile and data services in Western Europe;
- to consolidate its current position in South America;
- to create a selective presence in the area of the Mediterranean Basin.

Action has therefore been taken to augment the operational influence in the individual companies and to reorganize the system of foreign investments. In addition, an assessment will be made of the strategic importance of the investments in the affiliated companies in which the Group does not play a significant role and which, consequently, are not integrated into the Telecom Italia "system".

Telecom Italia Group has an international presence through a number of companies, the majority of which are held by SIN [Stet International Netherlands], the holding company for integrated wireline and mobile companies and SMH [Stet Mobile Holding], the holding company for the mobile telecommunications companies.

▸▸ Consolidated subsidiaries

The following table shows highlights of the results, adjusted to conform with Group accounting principles, reported by the consolidated companies which make up the international sector.

[in billions of lire]	1999	1998	Change	
			amount	percentage
Sales and service revenues	3,160	1,443	1,717	119.0
Gross operating profit	580	171	409	239.2
Operating income [loss]	[246]	[159]	[87]	54.7
Capital expenditures	1,845	803	1,042	129.8
Number of employees at end of year	5,627	3,621	2,006	55.4

The significant increase in revenues and gross operating profit is essentially due to the entry in the scope of consolidation of the two Brazilian companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes, the results of which were offset by the negative contribution made by 9 Telecom Reseau, a company in the start-up phase which, however, in 1998 had only been consolidated for one month.
The negative performance of 9 Telecom Reseau has also affected the operating result of the sector which, in fact, reported a higher loss than in 1998 despite the aforementioned change in the scope of consolidation and the improvement in the results registered by Stet Hellas and TMI Group.
Such results were also affected by the amortization charge for goodwill on the purchases of Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes.
The increase in capital expenditures and the number of employees is due to the entry of the two Brazilian mobile companies in consolidation.

2139

Europe

TMI-TeleMedia International Italia Group. The TMI-Telemedia International group is entirely owned by Telecom Italia and operates in the Global Providers market. The group is passing through a period of sustained growth even though prices are falling due to fierce competition. It offers voice and data telecommunications services internationally for fixed networks and designs projects with a high technological and professional content.
In 1999 the TMI group stepped up its commercial stance focused on the development of multinational customers with headquarters in Italy through Telecom Italia, and with foreign offices through direct sales networks or distributors mainly those in which Telecom Italia has stakes [France, Spain and Latin America]. As for the offering, expansion continues strong in corporate services such as data transmission using *Frame Relay* and *IP* platforms [Datafast and Mondonet], while services producing lower profits such as voice, messaging and services offered to *resellers* have been reduced considerably.
TMI group recorded revenues in 1999 of Lire 300 billion [Lire 366 billion in 1998, -18.0%], directing commercial operations to more remunerative segments. As for costs, the reduction and rationalization plan produced savings in all main items [transmission, personnel and general expenses]. The gross operating margin showed a loss of Lire 192 billion [-Lire 260 billion in 1998]. The consolidated net loss fell from Lire 293 billion in 1998 to Lire 88 billion in 1999, partly due to a gain of Lire 119 billion realized on the sale of the investment in Concentric Network Corporation to Softe.

9 Telecom Reseau. 9 Telecom Reseau is a French wireline telephone carrier which offers indirect access to voice, data and *Internet* services for the residential, SOHO [Small Office Home Office] and small and medium-size business segments. The investment in 9 Telecom Reseau held by Telecom Italia Group [through the subsidiaries SIN and TMI Ltd] rose from 85% to 91.64% during the year.
The company launched its own telecommunications services starting in June 1999; it acquired about 230,000 residential customers, some 1,000 companies and 60,000 *Internet* customers [free Internet].
The national *backbone* in fiber optics [2,800 km] linked to the France Telecom network through 20 interconnecting points was completed in 1999. This was accomplished by fully complying with the obligations regarding implementation of the infrastructure imposed by the regulatory body in order to maintain the license with numbering using just one figure.
The company, in 1999, reported revenues of about French francs 120 million [Lire 35 billion] and an operating loss of French francs 1,024 million [-Lire 302 billion]. The loss for the year of French francs 1,018 million [-Lire 300 billion] is due to the start-up phase.

Intelcom San Marino. Telecom Italia Group holds 70% of the company, which is a wireline telephone carrier offering international telephone services, value-added services, data transmission and *Internet* services. Intelcom also operates in the mobile telephone sector thanks to a 51% investment in Telefonia Mobile Sammarinese, the second operator in the Republic of San Marino, which began service in December 1999. During the year Intelcom purchased a 10% stake in CVS [Comunicare Via Satellite], a company operating in the satellite service, business television and data transmission sectors.
Revenues totaled Lire 45 billion, an increase of 21.7% compared to 1998. The operating income was Lire 2.5 billion and the net income was Lire 3 billion.

2140

Stet Hellas. The company, held 58.14% by SMH, is the second largest mobile telephone provider in Greece and operates in a growing market which has about 3,900,000 lines [+88% compared to 1998] and a level of penetration equal to 36.7%. This growth is partly due to the aggressive market policies of the third operator to enter the market, CosmOTE [a subsidiary of the fixed network carrier OTE], which, thanks to eroding considerable market shares from the two leading companies, it now has about one million customers and a 25% market share. Stet Hellas, after an initial recovery due to an economic agreement with Germanos, a major Greek commercial chain, suffered a set-back on account of its non-winning position and the abandonment of its traditional commercial partner and shareholder, Interamerican [owner of the Mobitel chain]. The difficulties encountered in meeting the greater competitive pressures and the exploitation of opportunities deriving from the rapid growth of the market, pointed to the urgent need to initiate a far-reaching plan for the reorganization of the entire company, with particular focus on marketing, the network and the information systems. At the end of the year Stet Hellas operated 1,183,000 lines [+72% compared to 1998], covering a 30.4% share of the Greek market. The percentage of prepaid compared to the entire customer base is 62% compared to 43% at the end of 1998. Revenues in 1999 totaled Greek drachmas 151.3 billion [Lire 900 billion, +27.3% more than 1998]; the operating income was Greek drachmas 25.1 billion [Lire 149 billion] and profit was Greek drachmas 2.6 billion [Lire 15 billion].

Latin America

Entel Bolivia. The legal framework in Bolivia, up to November 24, 2001, calls for a monopoly in wireline local and long-distance telecommunications services. The local telephone services are currently provided by cooperatives covering a limited territorial area of the country, while long-distance services are supplied nationally by Entel Bolivia, a 50%-owned subsidiary of SIN. In view of the approaching liberalization of the telecommunications market, Entel Bolivia intends to consolidate its current position as the number one Bolivian carrier. Its strategy, in fact, calls for the acquisition of the three major cooperatives in the country, which together cover approximately 80% of the local market. The company is also involved in a gradual transformation into an integrated telecommunications provider; in 1999, in fact, it had about 150,000 mobile customers and 15,000 *Internet* customers. On January 9, 2000, Telecom Italia and Entel finalized a strategic agreement with Union Fenosa and Garafulic Group, a major media operator in the country. The first action under this agreement was the presentation of a joint offer for the Comteco cooperative. The eventual purchase of Comteco would allow Entel to control about 20% of the local telephone market in Bolivia.

In 1999, Entel posted revenues of Bolivian bolivianos 1,304 million [Lire 412 billion], a figure in line with that of 1998; mobile operations contributed Bolivian bolivianos 187 million [Lire 59 billion] to the amount. The stability of revenues is a symptom of the economic crisis in the country, confirmed by the contraction in GDP growth [+1% compared to +4.6% in 1998]. The operating income was Bolivian bolivianos 167 million, corresponding to Lire 53 billion. The net income of Bolivian bolivianos 224 million [Lire 71 billion] shows a reduction compared to 1998 [Bolivian bolivianos 400 million, equal to Lire 126 billion], due to the loss of Bolivian bolivianos 66 million [Lire 21 billion] in mobile operations owing to the increase in costs following a more aggressive marketing policy and non-recurring items which benefited the company in 1998. Had these items not been considered, the net income for 1999 would have been in line with that of the prior year.

2141

Bitel Participacoes. This Brazilian company, a wholly owned subsidiary of SMH, has two operating holding companies, Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes, which operate in the cell phone segment. The control of these companies was acquired at the beginning of 1999 through the purchase of the stakes held by the shareholder UGB [from 9.6% to 19.26% of total share capital and from 25.9% to 51.8% of ordinary shares]. In 1999, Bitel incurred financial expenses of Lire 229 billion on the remaining debt payable to the Brazilian government for the purchase of the companies. Bitel and the subsidiaries are undergoing a reorganization which will make it possible to simplify the corporate structure, develop operating synergies and obtain tax benefits.

Tele Celular Sul Participacoes. Tele Celular Sul provides mobile phone services to the states of Paranà and Santa Caterina and the city of Pelotas through three operating companies. The Group's commitment in 1999 was specifically centered on technical and marketing areas leading to the start of important development projects to bring digital technology to the network, start-up the information systems [previously outsourced to the wireline operator], restructure the commercial network and launch prepaid services. At December 31, 1999, Tele Celular Sul had 1,034,000 customers, corresponding to an 84.1% market share.
The company registered revenues in 1999 of Brazilian reais 717 million [Lire 722 billion]. The gross operating profit in 1999 was Brazilian reais 111 million [Lire 112 billion]. The net income attributable to Bitel was Brazilian reais 34 million [Lire 34 billion]. The net income was affected by higher marketing costs to acquire customers and the negative trend of the local currency against the US dollar which drove up financial expenses in Brazilian reais on foreign currency loans received by the group.

Tele Nordeste Celular Participacoes. Tele Nordeste Celular Participacoes supplies telephone services in the states of Alagoas, Cearà, Paraiba, Pernambuco, Piaui and Rio Grande do Norte, through six operating companies. At December 31, 1999 it reached 1,188,000 customers, corresponding to a market share of 70.4%.
The company posted revenues in 1999 of Brazilian reais 706 million [Lire 711 billion]. The gross operating profit was Brazilian reais 121 million [Lire 122 billion]. The net income attributable to Bitel was Brazilian reais 9 million [Lire 9 billion]. As was the case for Tele Celular Sul, the net income was affected by marketing costs and the negative trend of the Brazilian real against the US dollar.

▸▸ Affiliated companies and other companies

Europe

Spain. The main events which took place during 1999 in **Spain** through affiliated companies and other companies include:

- the purchase, through Retevision, of 49% of Onda Digital, a company which in June obtained the license to operate the TDT [Televisione Digitale Terrestre] platform and the offering of pay-TV services;
- the incorporation of Retevision Interactiva, which in 2000 will be used for the demerger of the Internet operations of Retevision;
- the participation, through Retevision Móvil, in the bid for the fourth *UMTS* license to be issued by the Spanish government, concluded with the awarding of the license in March 2000.

2142

In February 1999, Telecom Italia, together with the Spanish partners Endesa and Unión Fenosa, created Agrupación de Interés Económico [AIE] with the purpose of coordinating the joint telecommunications activities in Spain. The creation of AIE marks the first step towards the formation of a holding company which will group the Spanish companies of the three shareholders. The "mission" of this holding company will be the definition of a global market strategy for telecommunications in Spain aimed at maximizing synergies between current and future operations and optimizing the use of the human and financial resources of the different companies. The holding company should become operative by the end of 2000.

Retevision is held by Telecom Italia Group through SIN, with a 28.7% stake acquired on two occasions, the second for 7% in June 1999 following the privatization of the 30% that was still held by the Spanish state.
In the wireline telephone sector, the company ended the year with over 1,600,000 customers [11% of the total market, 40% of the business segment and 10% of the residential segment] and with a market share, in terms of traffic, equal to over 4%. The company has over 20,000 direct accesses, connecting mainly business customers and is the confirmed leader in the Spanish market for *Internet* from the standpoint of the market, with a 27% share [corresponding to over 510,000 customers] and technological profile, with the launch of free *Internet* service in July [the first company in the Spanish market] and a *portal* with particularly advanced content called "Alehop".
Total revenues of Retevision in 1999 were Spanish pesetas 91.4 billion [Lire 1,064 billion], with an increase of over 50% compared to the prior year. Such revenues include about 60% from the telecommunications business, about 30% from audiovisual business and about 5% from *Internet* business which, in particular, rose from Spanish pesetas 2.2 billion invoiced in 1998 to Spanish pesetas 5 billion in 1999 [+120%]. The gross operating margin was a loss of Spanish pesetas 10.4 billion [-Lire 121 billion]. The company reported a loss for the year of Spanish pesetas 19 billion [-Lire 221 billion].

Retevision also holds a 40.1% stake in **Retevision Movil**, the third largest mobile telephone provider in Spain which, only six months after having been awarded the license, on January 25, 1999 launched the service in the eight major cities of Spain, having met the stringent obligations covered in the license. The simple and extremely interesting offering made on the Spanish market was certainly the determining factor in the company's growth, which doubled during the year, reaching almost 15 million customers and with market penetration equal to about 37.5%.
In just under one year the company has more than one million customers, with prepaid services accounting for 76%, being the only package marketed until April when various offers were launched for subscribers.
Revenues of Retevision Movil totaled Spanish pesetas 29.4 billion [Lire 342 billion], exceeding expectations, thanks especially to the growth of customers. The gross operating result shows a negative figure of Spanish pesetas 58.6 billion [-Lire 682 billion]. The net result for the year is a loss of Spanish pesetas 38 billion [-Lire 443 billion].
A direct interest is also held in the company by SMH for a 23.3% stake; in 1999, option rights were exercised on 11.05% of capital. The shares, which will remain the property of SMH until 2002, are pledged and deposited with a Spanish bank.

Cable i Televisio de Catalunya, a company in which a 22.5% stake is held directly by SIN and 7.5% indirectly by Multi Media Cable, launched telephone services and CATV in

the Barcelona area in June. In the seven months of operations, the company posted good commercial results, with about 12,000 contracts and 2,000 active customers. Despite the delays in receiving digging permits, cables were laid for 121,000 homes. The company is currently completing its offering by adding more services: wireline telephones, CATV, *Internet* with broadband access, data transmission.
In 1999, revenues totaled Spanish pesetas 132 million [Lire 1.5 billion]. The operating result was a loss of Spanish pesetas 4,712 million [–Lire 54.8 billion]. The loss for the year of Spanish pesetas 4,500 million [–Lire 52.3 billion] was due to the start-up phase.

Madritel, in which SIN has a 23% stake, has the telephone and cable TV license for the Madrid area, launched digital telephone carrier services and CATV in September. In the first four months of operations, the company posted good commercial results, with about 13,000 contracts and 7,000 active customers. Despite the delays in receiving digging permits, cables were laid for 53,000 homes.
The company, which is currently extending its offering, in 1999, posted revenues for Spanish pesetas 476 million [Lire 5.5 billion]. The operating result was a loss of Spanish pesetas 6,055 million [–Lire 70.5 billion]. The loss for the year of Spanish pesetas 3,998 million [–Lire 46.5 billion] is attributable to the start-up phase.

Netco Redes, in which SIN has a 30% stake, holds the utilization rights to the fiber optic telecommunications network of certain Spanish electricity companies including Endesa, Union Fenosa and Red Electrica de Espana. The company's business purpose is the operation and maintenance of the networks, later leased to Retevision.
In 1999, the company reported revenues of Spanish pesetas 3.3 billion [Lire 38 billion] and a net income of Spanish pesetas 1.9 billion [Lire 22 billion].

Telecom Italia Group also holds 18% of the capital of **Euskaltel**, a company which offers telecommunications services in the Basque regions under a strategic agreement with Retevision sealed by a 3% exchange of shares. During the course of 1999, Euskaltel consolidated its position as the second largest telecommunications operator in the Basque regions with over 220,000 telephone customers, with an increase of 40% compared to the prior year and a market share of 34%. Furthermore, in 1999, Euskaltel became an integrated fixed-mobile provider – about 60,000 customers – through a commercial cooperation agreement with Retevision Movil. The offering is completed by *Internet* services whose excellent results in 1999 [acquisition of about 45,000 customers partly due to the launch of the "Canal 21" *portal*] enabled Euskaltel to consolidate its fifth-place position as a provider in Spain.
Revenues in 1999 totaled Spanish pesetas 11.2 billion [Lire 130 billion, +177% compared to 1998], including Spanish pesetas 1.4 billion from mobile telephone services. The operating result shows a loss of Spanish pesetas 5.8 billion [–Lire 67 billion]. The loss for the year was Spanish pesetas 4.1 billion [–Lire 48 billion].

France. 1999 was a year of exceptional growth for the French mobile radio market, with an 85% increase in lines compared to 1998, over 20 million customers at the end of year and market penetration of 34.4%. In this scenario, the commercial performance of **Bouygues Telecom**, a company in which Telecom Italia Group holds an indirect interest through Bouygues Decaux Telecom, was decidedly positive. In fact, the lines are now more than 3.2 million, with an increase of 130% over 1998. Market share in 1999 was 15.7% in terms of the final number of lines and 19.3% in terms of the net increase in customers.

2144

The driving role played by prepaid services was fundamental to growth and contributed to new acquisitions for 42%.
Revenues in 1999 totaled French francs 7,911 million [Lire 2,335 billion]; the operating result showed a loss of French francs 2,856 million [–Lire 843 billion] and the loss for the year was French francs 3,542 million [–Lire 1,046 billion].

Austria. In Austria, the Telecom Italia Group is present through the holding [25% + 1 share] acquired at the end of December 1998 by SIN in **Telekom Austria**, the dominant carrier of wireline telephone services. The market was opened to competition in 1999 and this led to an erosion of the company's market share. The company responded by launching a portfolio of new services [including *ADSL* and *ISDN*] and laying the groundwork for extending the *Internet* offer through the purchase – concluded in the early months of 2000 – of 25% + 1 share of Libro A.G., a distribution chain with an enormous presence in Austria and leader in the sale of communications products and owner of "Lion.cc", the most popular *portal* for e-commerce and the second most visited in Austria.
In August 1999, Austria authorized "*unbundling*" and the first effects are expected to be felt in 2000. On September 1, 1999, rate changes were made which called for a reduction in national and international long-distance rates and, at the same time, an increase in the basic monthly charge. Telekom Austria counts about 3,454,000 fixed lines equal to about 3,818,000 equivalent channels, with a market share of 90%; it also has 120,000 *Internet* customers with a market share of 25% and the company confirms its leading position in the residential segment of customers.
In 1999, revenues were recorded for Austrian schillings 38,244 million [Lire 5,381 billion]. The operating income was Austrian schillings 3,800 million [Lire 535 billion] and net income was Austrian schillings 2,807 million [Lire 395 billion].

In the mobile telephone market, **Mobilkom Austria,** [25% + 1 share held through SMH and a further 18.75% through Telekom Austria] captured the leadership position in 1999 in terms of market share with 40%, compared to 37% by Max.Mobil and 23% by One.
Mobilkom activated 779,000 new lines in 1999, reaching a total of about 2.3 million customers [+52.6% compared to 1998], with obvious positive effects on revenues of Austrian schillings 16,501 million [Lire 2,322 billion], operating income of Austrian schillings 2,634 million [Lire 371 billion] and net income of Austrian schillings 1,740 million [Lire 245 billion].
During 1999 Mobilkom raised its stake to 51.1% in the Croatian operator Vip – Net, which successfully launched service in July 1999. On November 16, the company also won the DCS 1800 license in Liechtenstein.

Czech Republic. In the country, where Telecom Italia Group is present with an investment in **Radiomobil** [held through SMH for 5.9%], the mobile telephone market has displayed notable growth, with a market penetration equal to 18.6% compared to 9.3% at the end of 1998. A further increase is expected in 2000, the year in which services will begin by the third operator and holder of the DCS license for 1800 MHz assigned in September 1999.
Radiomobil had accumulated 875,000 customers at the end of the year [+135% compared to the end of 1998], with a market share of 45.6% and an incremental share of 52%. Prepaid accounts for 62% of the total in 1999 from 29% in 1998. The company distinguishes itself by the dynamism and innovative drive which led to the launch of numerous new services and experiments with new technologies which will be introduced in 2000.

Revenues for the year, equal to Lire 565 billion, are higher than forecast thanks to the rapid increase in the number of customers; the gross operating profit was Lire 187 billion and net income was Lire 68 billion.

Serbia. In Serbia, the Telecom Italia Group is present with a 29% investment through SIN in **Telekom Srbija**, the wireline carrier operating as a monopoly and the country's second largest mobile operator. Following the hostilities between March and June 1999 and the consequent declaration of a state of war by the Yugoslavian government, Telecom Italia personnel on loan to Telekom Srbija left Serbian territory dictated by martial law, which, among other things, prevented foreign citizens from holding positions of responsibility in local companies. In July, Italian management took up their previous positions of responsibility, according to the terms of the Shareholders' Agreement. The company provided no official valuation of the entity of the damages inflicted during the war; in fact, until June 26, 2000, this is regarded as a state secret imposed by the government of the Federal Republic of Yugoslavia.
In 1999, the company reached about 2,100,000 subscribers on the fixed-line network and 106,000 customers on the mobile radio network.
Since Telekom Srbija is barred from operating telecommunications services in the Kosovo region at this time, the investment was written down [Lire 198 billion] in the SIN financial statements on the basis of the estimates of the percentage effect of this region on all of the company's business.

Russia. Astelit, a company equally owned by Telecom Italia and the Russian state, offers services to business customers in Moscow and Saint Petersburg both to support Telecom Italia in the services rendered to large business customers and in the offer of *wholesale* traffic in the local market. Revenues in 1999 totaled USD 5.3 million [Lire 9.6 billion]. The company posted a loss for the year of USD 0.5 million [–Lire 0.9 billion].

Ukraine. Astelit is held 49% by U-Mobil, a subsidiary of SMH. In view of the deterioration of the economy of the country and the competitive environment, a prudential writedown of the investment was made for Lire 56 billion.

Latin America

Argentina. Telecom Italia Group is present in Argentina with **Nortel Inversora**, a subsidiary held directly by Telecom Italia and through SIN with a total stake of 50% of ordinary share capital, after the joint and equally owned acquisition, in August 1999, with France Cable et Radio of the interest held by the shareholders Perez Companc and JP Morgan, for an equivalent USD 265 million.
The wireline telephone market of the country was liberalized starting from October 1999. The liberalization allowed **Telecom Argentina** to transform itself into an integrated provider at national level, penetrating into the southern part of the country – thanks also to the construction of the fiber optic *backbone* – where it had not previously been present, and winning, at the end of June, new mobile licenses using PCS technology. Telecom Argentina can today provide all telecommunications and value-added services, thus strengthening its strategic position. At the end of September 1999, Telecom Argentina reached 3,201,000 subscribers on the wireline network and 1,096,000 customers on the mobile radio service, confirming its leadership position on the market.

2146

During the financial year October 1998 to September 1999, Nortel Inversora reported a consolidated net income of Argentine pesos 131 million [Lire 238 billion]. This result is mainly due to the results of the subsidiary Telecom Argentina which, during the period, posted consolidated revenues of Argentine pesos 3,280 million [Lire 5,961 billion], a figure in line with that of the preceding year. Telecom Argentina's performance was affected by the recessive context of the country, which, among other things, led to a considerable increase in the amounts set aside to cover doubtful receivables, with a corresponding negative effect on the income statement. Consolidated net income attributable to Nortel Inversora was Argentine pesos 309 million [equal to about Lire 562 billion].

Brazil. In Brazil, Telecom Italia Group operates in the wireline telephone sector through the company Società Tele Centro Sul Participacoes and in the mobile telephone sector with Maxitel, besides the previously mentioned companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes.

The subsidiary SIN holds an indirect investment in **Tele Centro Sul Participacoes**, purchased in July 1998 through **Solpart Participacoes** which holds 51.79% of ordinary capital. SIN's holding in Solpart, following the exercise of option rights to acquire a further 19% of the ordinary shares, in May rose to 38% of share capital [38% of ordinary shares and 38% of preferred shares]. At December 1999, the first stage of the restructuring process of Tele Centro Sul group began, with the goal of obtaining important benefits in terms of operating synergies, cost reductions and tax relief. In February 2000, the second stage of the process commenced, with the merger of the subsidiary Telepar Participacoes and the other eight operating subsidiaries of Tele Centro Sul.
From an operating standpoint, the year was marked by important investments in infrastructures, with the construction of the regional *backbone* using *ATM/SDH* technology [8,600 km] and the sharp increase in the number connections which, with an increase of about 940,000 new lines [+25% over 1998], reached 4,718,000 lines in service. Tele Centro Sul reported consolidated revenues in 1999 of Brazilian reais 3,205 million [Lire 3,228 billion], with a growth of 19% compared to the prior year which posted consolidated revenues of Brazilian reais 2,693 million. Operating income was Brazilian reais 457 million [Lire 461 billion] and consolidated net income attributable to Solpart was Brazilian reais 282 million [Lire 284 billion].

Maxitel, *in which SMH holds a 43.15% stake in ordinary share capital, operates in the* states of Bahia and Sergipe where it launched digital telephone service in March 1998, and in the state of Minas Gerais where the telephone service was launched in December 1998. At the end of 1999, Maxitel, notwithstanding the crisis with hit Brazil during the year, has about 508,000 connections, in line with budget; market share is 27% of the total market and 39% of the incremental market. Plans for 2000 call for a further strengthening of the company by extending coverage and the development of the marketing offer.
Revenues in 1999 totaled Brazilian reais 294 million [Lire 296 billion]. Operating income was Brazilian reais 80 million [Lire 81 billion], while the net result was a loss of Brazilian reais 295 million [-Lire 297 billion].

Chile. The **Entel Chile** group, in which SIN has a stake, reported consolidated sales revenues in 1999 of Chilean pesos 377 billion [Lire 1,351 billion], with an increase of 47% compared to Chilean pesos 257 billion in 1998, notwithstanding the recessive

macroeconomic context. In addition to the good performance of the traditional long-distance business of the parent company [which increased its revenues by 7%], there was considerable growth in mobile telephone business [with an increase in revenues of 23% compared to 1998] and the takeoff of Americatel USA, which offers long-distance services in the United States market targeted to those of Latin-American origin.
The consolidated net income attributable to the parent company is Chilean pesos 28 billion [Lire 100 billion] and should be compared to the loss in 1998 of Chilean pesos 11 billion. The improvement is also due to the extraordinary gain of about Chilean pesos 36 billion realized on the sale by Entel Telefonia Personal to Bellsouth of a cell phone license in the 800-MHz bandwidth with regional coverage, as it was no longer needed for its operations. The consolidated operating income amounted to Chilean pesos 31.2 billion [Lire 112 billion].
In the first months of 2000, SIN's investment in the company, following new purchases on the market, rose to 23.6%, with the goal of arriving at 25.05% by the end of the first half of 2000.

Cuba. The company **Etec S.A. Cuba**, exclusive carrier for national and international wireline telephone services, in which Telecom Italia holds a 29.29% stake through SIN, reported revenues in 1999 of USD 249 million [Lire 453 billion], up by about 12% compared to USD 223 million in 1998. The net income of USD 144 million [Lire 262 billion] was about 11% higher than in 1998. Performance is considered satisfactory, since the company was able to absorb the negative impact caused by the closing of telephone connections with the main American operators [excluding Sprint] on February 25, 1999 following the noted episode regarding the possible compensation to families of United States citizens, victims of the two planes shot down by Cuban aviation. Pending the outcome of the legal action, Telecom Italia has provided the company with technical-operational support, thus allowing traffic to be rerouted with the consequent recovery of the related revenues.

Other areas

Israel. Golden Lines is the third international telephone carrier in Israel. Telecom Italia Group, through Golden Netherlands, holds a 26.4% interest in this company which, established in 1996, became operative in July 1997. In 1999 Golden Lines has a market share of about 26%.
The 1999 financial statements show revenues of about Israeli shekels 500 million [Lire 220 billion, +26% over 1998], with a loss of Israeli shekels 80 million [-Lire 35 billion, +20% compared to the prior year].

India. Telecom Italia Group is present on the Indian market through Bharti Telenet and Bharti Cellular .
Bharti Telenet, which began operation in June 1998, operates 45,000 lines, with a waiting list of 23,000 requests, with the goal of reaching about 60,000 customers by March 2000 and 116,000 by March 2001. Revenues in 1999 were about Indian rupees 330 million [Lire 14 billion]. The loss for the year was Indian rupees 287 million [-Lire 12 billion]. The company also manages a *GSM* network in the Himachal Pradesh region.
Bharti Cellular has about 158,000 thousand subscribers and the good trend in acquisitions confirms its position as leader with a 58% market share.

2148

[3.5] INFORMATION TECHNOLOGY ACTIVITIES

The Telecom Italia Group operates in the sector through its own information technology segment, consisting of the Finsiel Group, Telesoft and Sodalia. The highlights for fiscal 1999 are as follows:

[in billions of lire]	1999	1998	Change	
			amount	percentage
Sales and service revenues	3,074	2,566	508	19.8
Gross operating profit	405	361	44	12.2
Operating income	237	219	18	8.2
Capital expenditures	129	145	[16]	[11.0]
Number of employees at end of year	10,206	10,101	105	1.0

With reference to the individual companies, **Finsiel** confirmed its leadership in the Italian market for Information Technology [which, in 1999, showed a growth of approximately 12.2%] thanks to repositioning its offering to embrace the rapid development of telecommunications and the growing demand for information, largely brought about by the *Internet*, and strengthening the know-how acquired in order to improve results in an ever more competitive market. In this context, Finsiel presents itself to large public and private organizations as an ICT outsourcer and systems integrator, guaranteeing both the move towards the new information architectures and also significant reductions in costs, the expansion of information bases, management consulting and technological innovation for business development.
During the year, collaboration continued with other companies in Telecom Italia Group, especially with reference to revisions in the information systems to bring them into line with the year 2000, the review of administration and control systems, purchases and product and supplier qualification and online training activities using the Intranet network.

The Group strengthened its traditional role as the partner of the Public Administration, supporting the process of improving its structures and services, playing an advisory role in the key areas of administrative decentralization, taxation and health. In April, in a strongly competitive environment, Finsiel won the bid for two new three-year contracts for the State Audit Court and the General Accounting Office for a total of approximately Lire 150 billion. With regard to existing agreements, activities were developed with some of the Ministries, including the Ministry of Health and the Ministry of Agricultural Policies.

A decisive contribution was made by SOGEI, the main operations partner of the Ministry of Finance, as confirmed by the success of the "Online Revenue Service" project, which processed more than 25 million tax returns. The introduction of more advanced technologies in the fundamental processes of the Ministry will make it possible not only to reduce delays and malfunctions of the Administration, but also to improve and broaden the range of services available to taxpayers. In addition, other projects are being worked out to support the reform of the Ministry, including the creation of four independent agencies and the extension of online services to other subjects.
There are exciting opportunities for growth resulting from the creation of the "Single Public Administration Network" [RUPA], the computer infrastructure which will connect the central administrations of the state, also making it possible to link with the local

administrations. Within RUPA, inter-departmental projects are to be activated, such as the municipal land registry communication system, the territorial information system and the national records system. The special commercial structure created by Finsiel was awarded the tender for RUPA data transmission, a service to be provided by Path.Net, a joint stock company set up on July 28, 1999 by Telecom Italia [99.99%] and Sodalia [0.01%].

Finsiel also supervises the outsourcing of information systems for many regional and local administrations; during the year, in this context, an investment was acquired by the Umbria Region in CRUED [a company that manages the Region's Business Process Outsourcing and the information technology governing the local health system] and the agreement was renewed between Insiel and the Friuli-Venezia-Giulia Region, enabling the latter to access an online broadband network, with *Internet* protocol extending to all the local councils in the region. Development in the sector should be seen in relation to the gradual technological updating of local organizations and the extension of services oriented towards facilitating the relationship with the citizen/user.

In 1999, Banksiel consolidated its performance. In addition to having benefited from the demand for adapting information systems to the euro and the year 2000, it developed a full-outsourcing service for banks. The high demand for *Internet* solutions on distribution channels to retail and corporate customers and in the field of internal communications [Intranet solutions] was solved thanks to the decisive contribution of Logicasiel. In the sector, an agreement was stipulated with Centrobanca which gave rise to the Centrosiel joint venture [in which Banksiel has a 47% holding]; furthermore, in 2000, the restructuring of Comitsiel will be completed through the acquisition of 30% of the capital held by Banca Commerciale Italiana and its subsequent incorporation in Banksiel.

In the sector dedicated to transportation, Tele Sistemi Ferroviari [a company in partnership with Ferrovie dello Stato – the Italian State Railroad, for which it provides outsourcing] has markedly expanded its activity, with the aim of providing the customer with the possibility of a rapid recovery in operational efficiency. In addition to full outsourcing, the company is responsible for managing the "SFINGE" administration and finance system, one of the broadest and most complex ERP applications in Italy, based on the SAP platform, and has developed the "IN.RETE" system for maintaining railroad infrastructures and operating materials logistics. Other projects in progress include the *call center* for the sale of tickets and information.

Finally, in the sector of management consultancy, the company METIS has been completely acquired by the subsidiary Consiel.

In 1999, the Finsiel Group reported sales and service revenues of Lire 2,204 billion, an increase of 9.5% compared to the prior year [Lire 2,012 billion] and an operating income of Lire 174 billion [–6.5% less than 1998 of Lire 186 billion]: the net income due to the Parent Company amounted to Lire 84 billion, less than in 1998 [Lire 141 billion], which had benefited from the gain on the sale of a business segment to Lottomatica. The 1999 result was also affected by provisions made by Finsiel S.p.A. to reserves for risks as part of a program of restructuring and technological innovation. Profitability was again high compared both to the invested capital [ROI: 17.9%] and the net equity [ROE: 13.3%].

In 1999, the Group invested Lire 100 billion [Lire 131 billion in 1998], of which Lire 85 billion referred to capital expenditures and Lire 15 billion to financial investments.

2150

During the year the Parent Company reported sales and service revenues of Lire 618 billion and a net income of Lire 68 billion [compared to Lire 78 billion in 1998].
At December 31, 1999 the workforce numbered 8,130, resulting in 64 units less than the end of 1998.

Telesoft was again confirmed the largest supplier of Information Technology software and services in the Telecom Italia Group. The company is involved in the chief strategic projects of Telecom Italia and TIM; in 1999, in particular, the contract was acquired to develop and operate the "new marketing platform" which constitutes the evolution of the support systems for Telecom Italia's marketing activities [Business Support Systems - BSS], and it intensified its cooperation with TIM in the fields of customer care, customer service and charging and billing. Collaboration continued with the same companies to develop and adapt operational management systems for the telecommunications network [Operation Support Systems - OSS], through the introduction of new technologies for network infrastructures, and innovative services.
In addition to consolidating its position on the domestic market, the company augmented its level of commercial penetration abroad, in keeping with the development strategies of the Telecom Italia Group, both directly [in Austria, France and Latin America] and through subsidiaries, particularly in Spain, where Teco Soft España was set up, a wholly owned subsidiary of Telesoft.
The production value for 1999 amounted to Lire 779 billion [of which Lire 758 billion can be attributed to sales and service revenues] and shows considerable growth since the prior year [Lire 496 billion; an increase of 57%]; the same applies to operating income of Lire 40 billion [compared to Lire 29 billion in 1998]. The net income was Lire 17 billion [compared to Lire 6 billion in 1998].
At December 31, 1999 the workforce numbered 1,554, compared to 1,443 at the end of 1998.

Sodalia operated on behalf of Telecom Italia in the development of new generation software systems, and support systems for the operation of networks and telecommunications services. The quality of production, testified both by the ISO 9001 and "level 3-CMM" [Capability Maturity Model] certification of the Software Engineering Institute of Pittsburgh, favored an expansion of activity in the North American market for the customers Bell Atlantic and TTC.
The aim of the company is to establish a reputation on an international level as a center for the development of telecommunications software systems.
In 1999, the production value amounted to Lire 49 billion [of which Lire 36 billion can be attributed to sales and service revenues], more than in 1998 [Lire 45 billion, of which sales and service revenues totaled Lire 26 billion]. The operating income amounted to Lire 3 billion [Lire 5 billion in 1998]; the net income totaled Lire 741 million [Lire 927 million in 1998]. In 1999, the autonomous Province of Trento recognized the last payment [Lire 16 billion] of its contribution to the technological research activities begun in 1993.
At December 31, 1999 the workforce numbered 303, compared to 305 at the end of 1998.

▸▸ Research and development

In 1999, **Finsiel** spent a total of more than Lire 54 billion on research and development, with a commitment in terms of resources of 277 years/person. Activities were oriented both towards the application of innovative technologies and the creation of products and services for distribution on the network, with the dual objective of recovering and making better use of already existing computer systems and improving the efficiency of

2151

production processes. The numerous projects with a high level of technological and product innovation include regional networks developed for the Public Administration, the online hypermarket, the technological platform for a public information system for train stations ["Infostazioni"], the platform for the multi-channel distribution of online banking services via *Internet* or *GSM* ["Finance Net"], solutions for value-added services based on *call centers* [including the telephone game] and the management of document flows online. In 1999, the number of "quality systems" certified according to the ISO 9000, Nato-AQAP and TICK-IT international quality standards increased to 35; by the end of the year, more than 5,600 of the resources of the Group worked in areas of offering covered by these quality systems.

In 1999, the research and development activities of **Telesoft** were concentrated on the following areas:

- *Methodologies and architectures*: the development, integration and re-engineering methods of the systems used by Telesoft, which are flexible compared with many of the architectural solutions used, facilitate the evolution of systems following continuous technological evolution and have been applied to projects on behalf of Telecom and TIM.
- *Re-use of software*: a "library" of re-usable software components is being tested which can be used again in other applications.
- *Usability*: Telesoft has prepared a special laboratory in which products are subjected to specific tests with end users, both during the intermediate stages of development and once the product is installed, or during maintenance.
- *Internet and e-commerce*: the evolution of Web applications and new development methods are being examined so that this evolution can be tackled in a rapid, flexible way.

In 1999, 40 people were involved in research and development, with a cost of approximately Lire 10 billion.

In 1999, **Sodalia** concentrated its research on the study and development of original methods and tools for software engineering, advanced software architectures and software components that can be integrated with third-party components. The company is thus able to supply quality products at competitive prices rapidly, with particular attention to the complex and growing requirements of telecommunications carriers. Applied research activities have made it possible to develop software products with the requisites of portability, re-usability and inter-operability that are vital for operating data networks and advanced telecommunications services [*IP*, Intranet/Extranet, *ATM*, *ADSL*, *Frame relays*, and *intelligent networks*].

2152

[3.6] MANUFACTURING ACTIVITIES

The Telecom Italia Group operates in the manufacturing sector through **Italtel**. The results achieved during fiscal 1999 are as follows:

[in billions of lire]	1999 [1]	1998	Change amount	Change percentage
Sales and service revenues	3,114	3,950	[836]	[21.2]
Gross operating profit	10	266	[256]	[96.2]
Operating income	[115]	111	[226]	°
Capital expenditures	127	184	[57]	[31.0]
Number of employees at end of year	5,153	15,101	[9,948]	[65.9]

[1] Following the reorganization, Italtel Group was consolidated using the proportional method at 50% for the first 10 months of the year and consolidated line-by-line for the remaining two months.

Of total revenues, Lire 1,481 billion [equal to 47.5%] were earned abroad subsequent to steps taken to strengthen operations in Spain and Argentina as suggested by the international expansion strategy pursued by Telecom Italia Group. The statement of income, which was penalized by provisions [Lire 159 billion] to cover the restructuring plan for the workforce during the period 1999/2002, partly offset by the recording of accumulated deferred tax assets [Lire 80 billion], shows a loss for the year of Lire 269 billion, a slight improvement over the loss in 1998 of Lire 282 billion.

▸▸ The offering

Italtel is one of the principal companies operating internationally in the telecommunication network sector as a supplier of reference in the segment of network solutions for voice and data integration. Its telecommunications systems are installed on four continents and in over twenty countries including Spain, Russia, Argentina and Chile.
New network equipment was developed during 1999 which allows the company to more effectively respond to the changed needs of the market and allow different switching and access architectures to be built which ensure that evolved and innovative services can be rendered with reduced consumption.

In this sense, the offering in the wireline segment is oriented towards the supply of Trouble Management systems for managing and supervising breakdowns and servicing, the activation of Service Configurations, Traffic Surveillance and Performance for the analysis and control of traffic data in real time and the Network Planning System and Network DataBase.

In Italy, besides the partnership relationship with the Parent Company, Italtel has focused on the liberalization of the domestic market, developing commercial ties with the new operators. In this scenario, the company acquired the new customer Metroweb, a bare fiber optic provider in the metropolitan area of Milan which, together with Fastweb, a broadband integrated services company, will implement a network based on *IP* technology to offer integrated voice, data, video and *Internet* services.

2153

In 1999 Italtel also extended its offering to final users providing Home Networking solutions. Products, in fact, have been offered that allow wireless access to the telephone line as part of home and Small Office solutions.

Lastly, Italtel also operates in the digital world through Pay TV, Pay per View, Near Video on Demand via cable or satellite, home shopping and home banking, mail and Web TV.

▸▸ Separation of Italtel operations

In 1999 it was decided to separate the activities of the Italtel group to enable Telecom Italia and Siemens to concentrate on specific areas of competence. Under the memorandum of understanding signed in April, a business segment of Italtel S.p.A. was contributed on October 31 to the new joint stock company Siemens Information and Communications Networks [SICN], a wholly-owned subsidiary of Italtel. The contribution involved "radio", "transport" and "mobile telecommunications networks" activities, along with the related factories, buildings, intangible and tangible assets, contracts, warehouses and investments. In total, 7,289 employees have been transferred to SICN, of whom 6,173 were from the parent company Italtel.

Within the framework of the restructuring program, based on business segmentation, some foreign holdings of Italtel International NV [sold to Siemens], were attributed to Italtel and are now held by Italtel BV, which is 100%-owned. On the basis of the "separation and termination agreement", Italtel subsequently sold SICN to Siemens; at the same time, Telecom Italia acquired from Siemens the remaining 50% of the share capital of Telsi Ltd, which owns 100% of Italtel.

From 2000, Italtel will thus be able to develop the segment of "fixed networks", in order to compete more effectively in this sector of telecommunications, expand, and venture into new markets and develop new agreements. Its primary aim is to exploit its "core competencies" in switching and developing innovative solutions for the integration of phone and data services. This second objective, which is fundamental in a context with a broad offering of integrated solutions and a growing number of network services [*Internet*, multimedia, e-commerce], will necessitate using the know-how already present in Italtel and the creation of alliances with partners which are on the leading edge in the segment of data networks, and who can encourage development into new markets and towards new customers. The strategies for the period 2000/2002 will again be characterized by the rationalization of production already begun in previous years, the strengthening of commercial coverage and a commitment to research and development to support new strategies.

Telecom Italia recently initiated contacts with primary operators in the sector interested in establishing partnerships with Italtel to advance and develop technological and commercial business operations within the sphere of the above-mentioned objectives.

2154

▸▸ Human resources

At December 31, 1999, the workforce numbered 5,153, showing a considerable reduction due, apart from the deal with Siemens [-6,709 units], to the sale to third parties during the year of the companies Italtel Tecnoelettronica [-233 units] and Italtel Sistemi [-2,292 units, net of 660 technical assistants being kept on at Italtel] and the "monitoring" and "test" business segments of Necsy [-119 units] and the "information systems " of Italtel S.p.A. [-243 units].

▸▸ Research and development

In this connection, in 1999, Italtel incurred a total expenditure of Lire 447 billion, which can be attributed to the following main areas:

- high-traffic junction exchanges with optical terminations;
- conversation exchanges for telephone traffic packet switching;
- conversation exchange/mapping of *IP* signals;
- multi-service access exchanges for native telephone and data traffic on *IP*s;
- exchange center for telephone and data convergence;
- interactive set top box with *Internet* surfing functions;
- re-configurable architectures and systems for creating fast prototypes;
- advanced user terminations for home networking and home wireless LAN.

[3.7] INSTALLATION ACTIVITIES

The Telecom Italia Group operates in the installation sector through **Sirti**, which recorded the following results for fiscal 1999:

[in billions of lire]	1999	1998	Change	
			amount	percentage
Sales and service revenues	1,501	2,165	[664]	[30.7]
Gross operating profit	123	303	[180]	[59.4]
Operating income	76	243	[167]	[68.7]
Capital expenditures	81	24	57	°
Number of employees at end of year	12,704	10,644	2,060	19.4

The deterioration in results compared to 1998 is the result of the contraction in productive activities by the parent company Sirti S.p.A. and some of its major subsidiaries, especially in Brazil and Chile, which were only partly compensated by the better results reported in Argentina and Spain. The production value of Lire 1,578 billion shows a reduction of Lire 426 billion compared to 1998, a year which benefited from the closing of numerous long-term orders. The net income of the group of Lire 76 billion, a reduction of Lire 87 billion compared to the previous year, was affected by the extraordinary expenses [Lire 56 billion] for the employee reduction plans operated by the parent company, which were only partly offset by the adoption, from 1999, of the estimated revenues under the percentage of completion method for valuing contract work

in process on long-term orders, instead of cost, which gave rise to income, net of taxes, of Lire 17 billion.
From the financial point of view, net consolidated cash resources fell by Lire 996 billion, mainly as a result of the extraordinary distribution of available reserves [Lire 920 billion] in December 1999.

▸▸ The offering

In 1999, the processes of technological innovation and the liberalization of services affecting telecommunications, and, hence, also the market of engineering and network installations continued. In this context, in addition to the traditional operators, which were involved in corporate reorganization and strategic reorientation processes and showed greater selectivity in investment programs, the presence of new operators is becoming more consolidated. The new operators, having initially been concentrated in mobile networks, thanks to the possibility of resorting to private fixed networks and interconnection using the access networks of the main operators, have reviewed their strategies and attributed greater importance to fixed networks, according to the growing need of bandwidths and the need to keep interconnection costs to a minimum.

In this scenario, which offers Sirti development opportunities confirmed by the positive trend of commercial initiatives directed at the new national and European operators, there is, however, no lack of tension regarding volumes and prices, especially in a domestic market conditioned by a fall in investments on the part of Telecom Italia in the segments of transmission equipment and junction and access networks. Activities on behalf of the Italian State Railroad highlighted a positive trend in terms of orders and a confirmation of production volumes in the sector of conventional systems. Further orders have been received for high-speed systems, the economic effects of which will not be felt until 2000 because of the complexities involved in its realization, conditioned by the obtaining of permits and by environmental impact assessments.

The production of foreign subsidiaries recorded slowdowns in Latin America, both on the part of the Brazilian subsidiary [because of the liberalization of telecommunications and the economic crisis affecting the country], and the Chilean subsidiary [affected by the reduction in orders from Entel], which was only partly offset by the higher production volumes of Sirti Argentina. In Europe, there was a growth in activities thanks to the Spanish subsidiary Seirt, which benefited from the liberalization of the market and the important role played in Spain by the Telecom Italia Group.

▸▸ Corporate transactions

In 1999, the Polish, French, German, British and Argentinean subsidiaries were recapitalized with the aim of restoring balance to their financial structure and encouraging commercial development. Following the sales option exercised by the Brazilian partner Partcon, Sirti raised its stake in the Brazilian companies Construtel and Matricial, in the Chilean company Construtel and in Sirti Bolivia. Towards the end of the year, Sinted was sold to third parties, before acquisition of the "Automation and networks" business segment of the company. The 50% holding in Fibre Ottiche Sud - FOS S.p.A. was also sold and the merger of Sirti International and Sirti S.p.A. was completed.

2156

The reorganization of Sirti S.p.A. is geared to concentrating activities on the core business of installations engineering and redefining the operating policies for the two segments of the company, consisting of industrial activities and the management of its considerable real estate properties. The latter has been transferred by means of a partial demerger, to the newly established company IMMSI S.p.A., which has been listed on the Milan Stock Exchange. On the other hand, as far as the installations engineering segment is concerned, Telecom Italia has begun negotiations to establish partnerships with Sirti in order to advance Sirti's potential from a technological and engineering point of view, and exploit possible synergies associated with the company's presence on the most important international markets.

▸▸ Human resources

The workforce of the Group increased by 2,060 units as a result of the reduction in Sirti S.p.A. [–794 units] and the increase in subsidiaries [+2,854 units], due mainly to the recruitment carried out by Construtel Brasil in order to honor the restrictions involving the sub-contracting of work on the local market.

▸▸ Research and development

In 1999, the R&D activities of the Sirti Group can be divided into the following main areas:

- *Access networks*: the analysis of solutions [hybrid optic-coaxial networks, passive optic networks, copper networks with DSL techniques] continued for the offering of broadband interactive multimedia services, capable of meeting highly diversified requirements in terms of quality, reliability and flexibility. Testing continued with Telecom Italia and CSELT on self-supporting aerial optic cables and new exchange structures were defined for Infostrada, the Italian State Railroad and Telecom Italia itself.
- *Transport networks*: research continued into the evolution of transmission networks following the introduction of new technologies, together with the development of methods for *ATM* networks and equipment dimension in order to acquire more know-how about the inter-operability among different technologies; there was also research into interaction among networks using *IP*, *ATM* and WDM technologies with particular reference to architecture and installations engineering.
- *Broadband services*: research continued into the optimum hardware and software platforms for supplying DVB [Digital Video Broadcasting] type services, and interactive services [broadband access to *Internet*, online services]. With regard to applications, testing was carried out with Telecom Italia and CSELT [in Turin, Bologna, Bari and Naples] on low-cost solutions for internal cabling for buildings.

Finally, research activities continued in the field of optic components and systems for monitoring optic cables.

2157

[3.8] OTHER ACTIVITIES

Among the activities supporting the core business of Telecom Italia Group, **Emsa** is in charge of the ordinary and extraordinary management of the real estate properties. The company reported revenues of Lire 80 billion, a reduction of Lire 4 billion compared to 1998 due to the current reorganization of the real estate sector in the Group. The decrease in operating costs, obtained partly by a reduction in the number of the workforce from 102 to 94 units, allowed Emsa to basically end the year with a breakeven.

The activities conducted by the two financial companies of Telecom Italia Group, **Saiat** and **Softe**, are continuing with good results. In particular, Saiat, entrusted with the national market, reported a profit of Lire 4 billion, while Softe, which operates on international markets, posted a profit of USD 20 million [about Lire 37 billion].
One of Saiat's subsidiaries, **Teleleasing**, continued its business of providing financial support for the Group's commercial activities and investments. The company recorded revenues of Lire 369 billion, up Lire 5 billion compared to 1998, and made investments totaling Lire 359 billion. At December 31, 1999, the workforce numbered 33. The sale of this company to Mediobanca is currently in the process of being concluded.

The strong commercial growth of **Meie**, a Telecom Italia Group company in the insurance sector, continued in 1999. Premiums totaled Lire 1,190 billion, an increase of 28% from the 1998, and the year especially benefited from the results obtained by the sales network of 433 points of sale throughout the national territory. **Meie Assicurazioni** is among the top 20 national companies in the damages sector with premiums of Lire 916 billion [+26%] and investments in financial assets for Lire 1,328 billion. The company reported good profit performance with a net income of Lire 19 billion, a sharp rise over 1998 [Lire 7 billion]. The workforce at year-end is the same as 1998 with 474 units.
Meie Vita posted premiums of Lire 274 billion, 34% more than the prior year thanks to the growth of individual policies [+74%] which encountered favor on the market owing to the issue of combined index-linked insurance-financial products. The company made investments in financial assets for Lire 1,202 billion and, as in 1998, reported a net income of Lire 3 billion. The workforce at December 31, 1999 numbered the same as last year [34 units].
The company, which is not active in the core business of telecommunications, falls under Telecom Italia Group's reorganization plan.

Fintech, a venture capital company jointly owned by Telecom Italia and Istituto Mediocredito Centrale, in its second year of operations, continued to invest risk capital in small and medium-sized companies in the development stage. At the end of 1999, the Board of Directors of the company passed a resolution to increase share capital from Lire 20 billion to Lire 50 billion in order to strengthen its investment capabilities and flexibility.

In telemarketing and market research in Italy, **Atesia** confirms its leadership position, consolidating its role of qualified support to Telecom Italia Group's marketing policies. Revenues rose from Lire 82 billion in 1998 to Lire 98 billion in 1999, while net income increased to Lire 25 billion compared to Lire 21 billion in 1998. The workforce at the end of 1999 numbers 106 with 27 units added since the end of 1998 owing to the opening of a productive unit in Milan.

Saritel took advantage of the significant growth in the demand for projects and services connected with the *Internet* for both wireline and mobile networks. The company operates,

2158

in accordance with its mission, in three business areas: *Internet*, state-of-the-art telephone services and information technology services. Internet-related activities grew very sharply both for the services managed on behalf of the Parent Company [thanks partly to the take-off of free *Internet* service offered by TIN] and for the development of new important initiatives such as the activities connected with the entry of TIM in the world of Internet with the "Universal Number" service, for which Saritel provided the support for the integration of systems and networks, the wireless transit of data and messages and the customer care service. Positive returns were also obtained from activities directed to the final customer through services offered by Telecom Italia. Phone services, instead, decreased as a result of discontinuing the supply of systems to TIM for "voice messaging", with a partial recovery connected with the increase in the supply of "interactive voice response systems" [IVR] and related service applications.
Revenues in 1999 were Lire 188 billion, compared to Lire 160 billion in 1998; the significant increase [+17.5%] is due to the growth of *Internet* activities. The net income for the year was Lire 5 billion, a strong jump compared to the prior year [Lire 536 million]. The workforce employed at December 31, 1999 numbered 384, compared to 327 at the end of 1998.

In the area of advanced research, **CSELT** [Centro Studi e Laboratori Telecomunicazioni] contributed to the Group's process of strategic innovation by dealing with the problems directly associated with operational support, from the evolution of network architecture to the search for leading-edge solutions for value-added service offers and the development of mobile services [mobile banking, interactive access on the Web from GSM terminals].
The Optical Technologies Center – OTC S.r.l. was created in November 1999. The Optical Technologies Center business segment was contributed to this company which was then sold to the American company Agilent Technologies in March 2000.
The Center reported revenues of Lire 278 billion, in line with 1998, ending the year with a profit of Lire 15 billion arising from the gains realized on the sale of the business segment. The year 1998 closed, instead, basically with a breakeven.
At the end of 1999 the workforce numbered 1,149 units and, compared to 1998, shows a reduction of 74 units, 49 of whom were transferred to the new company OTC.

For **Stream**, the Group company active in the Pay-TV sector, 1999 was a year of profound and significant changes. In June 1999, Telecom Italia completed the sale of 65% of the share capital of the company to industrial partners [35% to News Corp. Europe, 18% to the Cecchi Gori Group, 12% to S.D.S.]. At the same time, a plan was defined for the re-launching of the company, focusing, from the technological standpoint, on the satellite digital platform, and on the "Calcio" and "Premium Movie" offering, from the marketing standpoint.
In this connection, the rights have been acquired for six seasons for seven of the 18 Series A teams, while the entry of the Cecchi Gori Group gives access to the largest library of film rights on a national scale. In addition, in June, the "Blu interactive" package was introduced, offering interactive applications on "set top box" [travel, weather, the horoscopes, the lottery, the stock market, and so on], while the soccer offering has been enhanced by the acquisition of the rights for the 1999-2000 Italian championship Cup.
The second half of the year has already highlighted the positive results of the adoption of the new strategy: at year-end, the number of subscribers totaled approximately 385,000, an increase of 332% compared to 1998. The satellite digital platform, in particular, generated approximately 300,000 new subscribers, of whom more than 75% were acquired in the second half of the year. Consequently, revenues also increased and reached Lire 82 billion [+257% compared to 1998]. The expenses incurred to re-launch the company, connected to the acquisition of

2159

content and the creation of a technological infrastructure able to significantly increase the number of subscribers, have nevertheless led to a deterioration in the result for the year, which shows a loss of Lire 458 billion, Lire 131 billion [+36%] more than in 1998.

On the one hand, the year 2000 will be geared to maximizing the subscriber base and, on the other, to a further improvement of the product, with the enhancing of the "basic" package and the launch of the "Premium Cinema" and "Premium Sport" channels. In this connection, important agreements have already been concluded with Class Financial Network for the supply of a telematic financial news channel, with Fox Kids for a channel of the same name especially adapted for the Italian clientele, and with Mediaset for two channels for broadcasting TV movies and sit-coms.

▸▸ Research and development

CSELT has supplied the usual operational support to companies in the Group and to subsidiaries and affiliates in the international sphere on several fronts, focusing on identifying the business potential by developing innovative solutions, products and services.
As far as the subject of *Internet* is concerned, in 1999 there was marked growth in activities geared to enhancing the offering. In the area of *IP* networking, CSELT provided a significant contribution to innovating the Telecom Italia offering of access to *Internet* and "*IP wholesale*" towards ISP and corporate clientele, including the creation of the video-conference service on the "Videonet" *IP*.
As far as infrastructures are concerned, research continued into the evolution of the access network [*ADSL* in particular], the *backbone* [experimenting with WDM – Wavelength Division Multiplexing] and the mobile network, especially with regard to the offering of data services and convergence between fixed and mobile networks.
In the sphere of mobile telecommunications services, activity focused on the development of interactive services [mobile trading] and information services, and on the evolution of the mobile radio network towards data services and the third-generation system [*UMTS*].
In 1999, experiments were conducted in field of video-conferencing services, audio and video streaming, surfing the *Internet* and exploiting multimedia content with speeds of up to approximately 400 Kbit/s. The *UMTS* phone call made in November was the first call in an urban environment to be made in Europe.
With regard to unbundling, CSELT has built a model, with the aim of supporting Telecom Italia in the debate with the *Authority*, to make better use of the offering of unbundled access to the local network.
R&D expenditures by CSELT in 1999 were Lire 291 billion, of which Lire 195 billion for commissioned research and Lire 96 billion for strategic research activities.

In 1999, the R&D activities of **Saritel** focused on technological and market exploration, the creation of prototypes and the testing of innovative technologies. Particular attention was devoted to aspects of providing *Internet* services as outsourcing, the creation of intranet/extranet solutions and the subjects of security and electronic commerce. Within the sphere of the convergence of fixed-mobile services for phone and data, solutions were studied for data services for mobile networks where, in addition to the development of prototypes using WAP technology, innovative products were developed which found immediate application in the UNITIM project. In 1999, approximately Lire 2 billion was spent on R&D, corresponding to a commitment in terms of personnel of about 12 years/man.

2160

4. Social and environmental information

2161

During the three-year period 1997-1999, the activities of Telecom Italia Group were systematically cataloged and reorganized in response to social and environmental requirements, favoring the creation of a more diversified culture on the subject. The greatest efforts were devoted to identifying individual items of expenditure, "legitimizing" investments in this field and defining a methodological approach for analyzing data which is more consistent with the more highly evolved European models.

The "1999 Social and Environmental Report" of Telecom Italia [1998 data] shows how the pursuit of profitability and competitiveness can be closely linked both to "creating value" for all those involved in corporate activities, and respect for the environment according to the principle of sustainable development. With an introduction about the "corporate values" which orient the Group's activities in its dealings with the Community, the report highlights 21 processes that are important in terms of social and environmental aims and their relative corporate performances. Arthur Andersen, the Group's principal auditors, issued a positive opinion on the completeness of the information contained in the report.

▸▸ The environment

The sharing of the principle of sustainable development, with explicit reference to safeguarding the rights of future generations, has influenced certain choices on the part of Telecom Italia Group which, in its capacity as a global operator, plays its role by also endeavoring to orient the development of telecommunications towards objectives of quality of life and safeguarding our natural and environmental heritage. In keeping with this stance, in 1999, some companies in the Group continued to create and market services aimed at controlling and safeguarding specific aspects of the environment and the territory.

Specific action was taken to reduce the consumption of energy and natural resources, improve the management of waste and limit the sound emissions produced by installations. Telecom Italia has launched two projects applied to some telephone switchboards which have reduced the consumption of electrical power by 3%. In addition, the plan to convert heating systems to methane continued, with a consequent reduction in the consumption of oil.

In order to reduce the environmental impact of digging, Telecom Italia has tested non-invasive techniques which led to a reduction in costs such as to make them competitive with conventional open-sky digging methods. Systems based on milling have also been developed which make it possible to lay fiber optic cables in ditches only a few centimeters wide and a few centimeters deep. Telecom Italia continued to use eco-compatible products for its cables and network materials.

Telecom Italia has designed and built a system of "remote environmental monitoring" which, using the wireline telephone network, is able to detect and analyze various parameters relating to air, water, acoustic, electro-magnetic, meteorological and micro-climatic pollution, without any particular limits in terms of installation and diffusion throughout the territory. In 1999, successful tests were also carried out in Ancona and Falconara, aimed at verifying the effectiveness of the control system for atmospheric pollutants. A programming contract with the Provincial Authority, the University of Ancona and the local health authority [ASL No. 7] has not only made it possible to extend

2162

the activity to the towns of Chiaravalle and Montemarciano, but is encouraging the exchange of experience and knowledge with the aims of analysis and comparison, in a framework of effective collaboration between public and private enterprise.

Satellite services are also used as supports for detecting and safeguarding the territory. In fact, Telespazio is able to supply various types of specific cartography [showing flooded areas, land use, the roads network, geology, risk-areas, woodland areas with high fire-risk, and so on] and to offer services for making estimates and assessments of critical events [hydrogeological and geological threats, control of areas designated for waste, landslides], partly through the use of GPS techniques. With the aim of controlling fires, on the other hand, TIM has developed a system which, by means of the GSM network, makes it possible to identify outbreaks of even small fires and to inform the Civil Protection Department in real time.

Special attention continues to be given to the impact of electro-magnetic fields. Telecom Italia, TIM and Telespazio – whose installations all operate in full compliance with national and international standards – are constantly following developments in this field, both from a technological point of view, and from a medical and scientific point of view. In turn, Sirti has taken measurements of electro-magnetic compatibility with the aim of obtaining a certificate of conformity with EEC Directive No. 89/336 of its electric and electronic installations in residential areas or areas supporting light industry, and is also contributing to the development of national and international standards in the field of electro-magnetic compatibility, interference, the protection of the public from electro-magnetic fields and electrical safety. So that detailed information on the subject could be supplied, the "Environmental, Safety and Health Report" for 1998 was accompanied by a special document on the subject, entitled "Electro-magnetism: how to find out more".

▸▸ Safety and health

The safety and health of people have always been a high priority for Telecom Italia Group which, in a highly competitive market scenario governed by a legislative framework in continuous and rapid evolution, confirmed its strategy of safeguarding its human resources by perfecting a permanent, organic system through which to identify, assess, control and eliminate risk [Territorial safety plans].

In 1999, in keeping with this stance, in its choice of equipment, machines and installations, users were involved who were able to assess more effectively suitability in terms of safety and performance. During the course of the year, the application of this procedure already made it possible to review the technical characteristics of part of the technical equipment, identifying products which allow a higher level of safety in some types of processing, and, at the same time, reduce costs.

During the year, measurements were again taken of the amount of lead dispersed in the air during the welding of cables in order to assess the risk of exposure, in compliance with Legislative Decree No. 277/1991. During the measurements, it was found that other chemical compounds were also present deriving from the same process phases and classifiable as air pollutants. A document was subsequently published on Telecom Italia's Intranet describing the prevention and protection measures being adopted in the field of fires, electro-magnetic fields and asbestos in each of the 17,000 company buildings.

2163

Special policies have also been developed geared to spreading the culture of prevention, based on general involvement in the management of safety. In addition to the training reserved for newly recruited employees, with the help of multimedia supports, initiatives were organized oriented towards teaching personnel the correct behavior to adopt when exposed to specific risks. Constant training at every level, constant information about risks at work and the simultaneous adoption of the latest technical equipment increase respect for standards of personal and general safety. In 1999, in confirmation of the above, Telecom Italia recorded a further fall in the number of accidents [which have more than halved in the last ten years] and the resulting social costs, with positive effects also on the national system as a whole. Finally, in compliance with Legislative Decree No. 626/1994, the Parent Company also instituted a new process of health supervision, involving a pool of approximately 18,000 employees who mainly work at computer screens.

▸▸ Social awareness

The re-construction of the process of the distribution of value added by reclassifying the statement of income has brought to light significant increases in 1998, compared to 1997, in the contribution made by Telecom Italia to the main stakeholders.

As far as equality in general is concerned, despite the marked inequality between women and men in the categories of executives and middle management, TIM has launched two projects which aim to redress the balance: "Valore donna" aims to recruit 150 women between 40 and 45 years of age, and "TIM mamma" aims to support women in maternity.

The Community stakeholder was supported in many ways, from training [the Telecom/University project, scholarships, stages] and attention to the rights of disadvantaged categories [remote teaching for long-term child patients; remote work for the disabled; the Arcobaleno project for promoting the employment of the disabled; the Ginestra project for promoting the social re-integration of ex-offenders; the solidarity group for helping elderly people living on their own]. Other projects regarded various cultural, artistic and sporting initiatives. The total contribution by Telecom Italia Group is equal to 1.2% of consolidated operating income, a figure comparable to that of other large European companies.

Telecom Italia also intends to makes its own contribution to a new cycle of development in Italy, by helping, among other things, to overcome the delays in the growth of *Internet* by spreading access to schools and creating a dedicated *portal* ["Web scuola"].

In this context, it especially has plans to promote a private university institution that will attract researchers and academic staff of international standing experienced in the Information and Communications Technology sector. The project will be organically integrated with the system of research and training centers of the Group [CSELT, Scuola Superiore Guglielmo Reiss Romoli, Centro Studi San Salvador] and will operate closely with leading institutions in the academic world in North America. The people involved in the project, who will be graduates and young researchers from Italy and abroad, will be trained at the new university, and be in continuous contact with the top institutions in the world, with the aim of creating a scientific and technological ICT community, with close cooperation with all the countries in which Telecom Italia Group operates.

2164

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF TELECOM ITALIA GROUP

5. Management's discussion and analysis of financial condition and results of operations of Telecom Italia Group

[5.1] RESULTS OF OPERATIONS

Consolidated statements of income [*]

[in billions of lire]			1999	1998	Change amount	Change %
A.	Sales and service revenues		52,481	48,507	3,974	8.2
	Changes in inventories of work in progress, semifinished and finished goods		[127]	[34]	[93]	°
	Changes in inventory of contract work in process		341	[171]	512	°
	Increases in capitalized internal construction costs		2,056	2,088	[32]	[1.5]
	Operating grants		39	38	1	2.6
B.	Standard production value		54,790	50,428	4,362	8.6
	Raw materials and outside services	[**]	[21,531]	[17,923]	[3,608]	20.1
C.	Value added		33,259	32,505	754	2.3
	Labor costs	[**]	[9,586]	[9,617]	31	[0.3]
D.	Gross operating profit		23,673	22,888	785	3.4
	Depreciation and amortization		[10,338]	[10,480]	142	[1.4]
	Other valuation adjustments		[844]	[2,545]	1,701	[66.8]
	Provisions to reserves for risks and charges		[195]	[362]	167	[46.1]
	Net other income [expense]		160	[315]	475	°
E.	Operating income		12,456	9,186	3,270	35.6
	Net income from investments		277	936	[659]	[70.4]
	Net financial expense		[910]	[684]	[226]	33.0
	Value adjustments on financial assets		[1,131]	[354]	[777]	°
F.	Income before extraordinary items and taxes		10,692	9,084	1,608	17.7
	Net extraordinary income [expense]		[981]	133	[1,114]	°
G.	Income before taxes		9,711	9,217	494	5.4
	Income taxes for the year		[5,046]	[3,965]	[1,081]	27.3
H.	Net income before minority interest		4,665	5,252	[587]	[11.2]
	Minority interest		[1,301]	[1,422]	121	[8.5]
I.	Net income after minority interest		3,364	3,830	[466]	[12.2]

[*] The figures for the year 1998 differ from the published figures due mainly to the presentation of revenues gross of amounts to be paid to other carriers.
[**] Reduced by related cost recoveries.

2166

Results of operations for 1999 showed a consolidated net income of Lire 3,364 billion [Lire 4,665 billion less the minority interest of Lire 1,301 billion], a decrease of Lire 466 billion [-12.2%] compared to 1998.
For a better analysis of the figures, it should be kept in mind that the 1998 financial statements were affected by the gains on the sale of the Impsat holding and TIM and Stet Hellas shares, expenses connected with the writedowns of the *SOCRATE* and *DECT* platforms and changes in the tax accounting principles.
The 1999 financial year was shaped by the results of the international sector which reflect the losses of some subsidiaries which are still in the start-up phase and the writedown of certain investments, such as Telekom Srbija and the Iridium project, as well as the change in the scope of consolidation. The latter is due to the entry in consolidation of the mobile telecommunications companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes and the exit of Stream; furthermore, the 1999 statement of income includes the results for the entire year of 9 Telecom Reseau, which in 1998 had only been consolidated for one month.
The key figures are analyzed in the following paragraphs.

▸▸ *Sales and service revenues*, shown gross of the amount due to other telecommunications carriers starting from 1999, amounted to Lire 52,481 billion, an increase of 8.2% over 1998 [had revenues been shown net of the amount due to other carriers, the revenues would have been Lire 47,855 billion, representing an increase of Lire 2,390 billion, +5.3% over 1998].
This growth is the result of the positive performance of mobile telecommunication services, which also benefited from the entry of the Brazilian companies in the scope of consolidation, and the increase in information technology revenues, although partly offset by the reduction in revenues from manufacturing and installations activities.

▸▸ *Raw materials and outside services* totaled Lire 21,531 billion, 20% higher than 1998, representing 41% as a percentage of gross revenues [36.9% in 1998]. The costs, net of revenues pertaining to other telecommunications carriers, increased by 13.6% compared to 1998, representing 35.3% of net revenues [32.7% in 1998].This change should be viewed mainly in connection with the increase in the costs of operating and developing mobile telecommunications services and the entry of the two Brazilian mobile telephony companies and 9 Telecom Reseau in the scope of consolidation. The amount also includes non-recurring costs incurred by the Parent Company for the take-over bid, the negotiations with Deutsche Telekom, and the revisions to the information systems to ensure *carrier preselection* and *number portability.*
This item includes Lire 1,174 billion [Lire 1,029 billion in 1998] of telecommunications operating fees, Lire 1,113 billion of this being the fee calculated on sales revenues which replaced the license fees payable to the Ministry of Communications, Lire 11 billion being the new fee for the operation of the Telecommunications Authority and Lire 50 billion being other fees regarding the foreign consolidated companies.

▸▸ *Labor costs*, totaling Lire 9,586 billion, decreased by Lire 31 billion compared to 1998 [-0.3%]. The decrease is attributable to the reduction in Parent Company costs and higher TIM labor costs and the change in the scope of consolidation.
As a percentage of gross revenues, labor costs went from 19.8% in 1998 to 18.3% in 1999.
Personnel in the Group numbered 122,662 at December 31, 1999, with a decrease of 1,304 compared to December 31, 1998.

2167

Personnel in the telecommunications sector decreased by 786, mainly due to the reduction in Parent Company personnel [-3,395] that was offset by the entry of companies in the scope of consolidation [+2,025] and the increase in TIM staff [+482].
The reduction in personnel was also due to the decrease of personnel in the manufacturing sector [-2,398] following Italtel Group's reorganization and the increase in the installations sector [+2,060] connected to the growth of operations in Brazil.

» *Gross operating profit* of Lire 23,673 billion increased by Lire 785 billion [+3.4%] compared to 1998, representing 45.1% of gross revenues [47.2% in 1998].
This growth is mainly due to the positive performance of mobile telecommunications [with an increase by TIM of Lire 1,084 billion in its gross operating profit], partly offset by a reduction in Telecom Italia's gross operating results [-Lire 814 billion] owing to the trend in wireline telecommunications revenues. The increase in the gross operating profit of the sector, besides the above mentioned structural phenomenon, was also partly due to the changes into the scope of consolidation. Other significant factors that affected the consolidated gross operating profit were the lower results of the manufacturing and installations sectors [-Lire 110 billion and -Lire 180 billion, respectively] and the exclusion from the scope of consolidation of Stream, a company that had a negative effect of Lire 258 billion on gross operating profit in 1998.

» *Depreciation* and *amortization* totaled Lire 10,338 billion [Lire 10,480 billion in 1998] including Lire 1,913 billion for the amortization of intangibles and Lire 8,425 billion for the depreciation of fixed assets. The amortization charge for intangibles increased by Lire 315 billion compared to 1998. This change is due to higher amortization by the Parent Company and TIM [+Lire 58 billion and +Lire 91 billion, respectively, compared to 1998] mainly as a result of the amortization of new investments in software, together with the amortization of goodwill from the acquisitions of the Brazilian companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes [a total of Lire 131 billion].
The depreciation charge decreased by Lire 457 billion with respect to 1998. There was a decrease in the depreciation charge by the Parent Company [-Lire 711 billion] owing to a lower amount of depreciable assets, the change in the mix of depreciable assets, lower depreciation on the *DECT* and *SOCRATE* assets that were written down in the 1998 financial statements and the adjustment of depreciation rates relating to the copper network, whose the useful life was extended because of the introduction of *ADSL* technology, and the switching and transmission installations, whose useful life was reduced because of the increase of the software assets included in such equipment. Such change was partially offset by the depreciation charges for the new companies included in the scope of consolidation.

» *Other valuation adjustments* of Lire 844 billion decreased by Lire 1,701 billion with respect to 1998 and include writedowns of receivables from customers, in order to adjust receivables to estimated realizable value. Of these writedowns Lire 399 billion refer to the Parent Company and Lire 88 billion to TIM [Lire 494 billion and Lire 120 billion, respectively, in 1998]. The reduction in this item is due not only to minor adjustments of receivables, but also to the writedown of the residual amount of installations and software related to the DECT and SOCRATE platforms made in 1998 by the Parent Company [Lire 1,834 billion].

» *Provisions to reserves for risks and charges*, amounting to Lire 195 billion [Lire 362 billion in 1998], decreased by Lire 167 billion, mainly due to the provisions made by the Parent Company in 1998 for charges related to the *SOCRATE* and *DECT* platforms.

2168

▸▸ *Net other income [expense]* shows an income balance of Lire 160 billion [-Lire 315 billion in 1998] and basically refers to late payment fees charged by the telecommunications companies to customers for late payment of telephone bills [Lire 252 billion compared to Lire 253 billion in 1998], net losses on the sale and disposal of fixed assets and intangibles [Lire 206 billion compared to Lire 559 billion in 1998], indirect duties and taxes [Lire 215 billion compared to Lire 210 billion in 1998], together with other income and expense in the normal course of business.

▸▸ *Operating income* of Lire 12,456 billion increased by Lire 3,270 billion [+35.6%] over 1998, with operating income as a percentage of gross revenues representing 23.7% compared to 18.9% in 1998.

▸▸ *Income from investments,* amounting to Lire 277 billion, decreased by Lire 659 billion compared to 1998. In effect, in 1998 the item included the gains [Lire 814 billion] deriving from the sales of the Impsat investment and TIM and Stet Hellas shares. Income from investments in 1999 includes dividends received from unconsolidated companies [Lire 115 billion], gains on the sale by Sirti of the 50% investment in F.O.S. [Lire 53 billion] and net gains realized by Telecom Italia on the sale of TIM shares and investments in venture capital projects.

▸▸ *Net financial expense* totals Lire 910 billion [-Lire 684 billion in 1998]. The increase is due to Lire 229 billion of interest expense incurred by Bitel for the purchase of the investments in Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes, this being the interest matured on the loan payable to the Brazilian government, and Lire 122 billion of net financial expense of the same mobile telephone companies that are mainly composed of exchange losses on the US dollar debt that were only partly compensated by the reduction in the interest expense of the Parent Company.

▸▸ *Value adjustments on financial assets* show a negative balance of Lire 1,131 billion [-Lire 354 billion in 1998] and mainly refer to the Group's share of the income and losses of the unconsolidated companies valued using the equity method, which also includes the amortization of goodwill upon the purchase of these investments. The increase in the balance is mainly due to writedowns related to the Iridium project [-Lire 185 billion], the Telekom Srbija holding [-Lire 198 billion] and the Astelit Ucraina project [-Lire 56 billion], as well as the effects [-Lire 345 billion] of the results reported by the Brazilian affiliated companies Maxitel and Solpart Participacoes. The results of Maxitel and Solpart Participacoes were also affected by the costs deriving from the currency devaluation of the Brazilian real, as well as by the amortization of the purchase of the mobile telephony license and the investment in Tele Centro Sul.

▸▸ *Net extraordinary income [expense]* shows an expense balance of Lire 981 billion [+Lire 133 billion in 1998] and includes Lire 364 billion [Lire 333 billion in 1998] of pension expense pursuant to Law 58/1992 to guarantee uniform status under the Telephone Employees Pension Fund [FPT], and Lire 495 billion [Lire 369 billion in 1998] of charges for employee reduction plans and layoffs, of which Lire 246 billion [Lire 216 billion in 1998] refers to the Parent Company and Lire 157 billion [Lire 102 billion in 1998] to Italtel. The change to an expense balance is mainly due to the extraordinary income [Lire 683 billion] resulting from the entry in 1998 of cumulative deferred tax assets, and to higher expenses for employee reduction plans and layoffs made in 1999 [+Lire 118 billion compared to 1998].

2169

⏩ *Income taxes for the year* of Lire 5,046 billion increased by Lire 1,081 billion compared to 1998.

The taxes to gross profit ratio is 52%, compared to 43% in 1998. The change in the ratio is mainly related to the gains realized in 1998 by the Dutch companies SIN and SMH on the sale of the Impsat investment and Stet Hellas shares, as well as to the extraordinary income deriving from the cumulative deferred tax assets from previous years recorded in 1998.

[*] Net of "Receivables from stockholders for capital contribution".

2171

The balance sheet of the Telecom Italia Group shows a net invested capital of Lire 54,069 billion [Lire 51,506 billion at December 31, 1998], of which 70.9% is financed by stockholders' equity [69.3% at December 31, 1998] and 29.1% by net borrowings [30.7% at December 31, 1998].

▸▸ *Intangibles, fixed assets and long-term investments* of Lire 64,034 billion show an increase of Lire 1,207 billion compared to December 31, 1998.
The increase of Lire 1,652 billion in "intangible assets" is basically attributable to the remaining goodwill from the acquisition of the controlling interests in the Brazilian companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes through Bitel and Italtel through Telsi Ltd.
The decrease of Lire 147 billion in "fixed assets" is mainly attributable to the depreciation for the period [Lire 8,425 billion], which is partially compensated by the additions during the period [Lire 7,503 billion] and the change in the scope of consolidation.
The decrease of Lire 298 billion in "long-term investments" is attributable mainly to the reclassification of the investments in Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes after their inclusion in consolidation using the line-by-line method, adjustments made for the valuation of companies accounted for using the equity method and also new investments abroad that were partly offset by the additional investments in Astrolink [Lire 481 billion] and Nortel Inversora [Lire 486 billion].

▸▸ *Working capital* showed a negative balance of Lire 7,069 billion [–Lire 8,610 billion at December 31, 1998].
This change was affected by:

- the increase in "inventories" [from Lire 1,859 billion at the end of 1998 to Lire 1,995 billion, +Lire 136 billion];
- the increase in "trade accounts receivable" from Lire 15,098 billion at the end of 1998 to Lire 15,883 billion, attributable to the expansion of the Group's business, including Lire 1,473 billion of receivables from other telecommunications carriers;
- the growth in "other assets" from Lire 2,470 billion at the end of 1998 to Lire 3,177 billion. This item includes receivables from the Financial Administration of Lire 442 billion, collections from customers of Lire 532 billion being processed by the bank and postal systems, receivables from personnel of Lire 144 billion, deferred tax assets of Lire 940 billion, receivables from the State and other public bodies and sundry items of Lire 1,119 billion;
- the increase in "trade accounts payable" from Lire 11,981 billion at the end of 1998 to Lire 12,870 billion, which is attributable to the entry in the scope of consolidation of Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes, as well as higher payables by TIM, Telespazio, Telesoft; the item also includes Lire 1,238 billion due to other telecommunications carriers;
- the decrease in "reserves for risks and charges" from Lire 2,035 billion at the end of 1998 to Lire 2,006 billion. These include the reserve for taxes [Lire 309 billion], the reserve for deferred income taxes [Lire 292 billion], the reserve for litigation [Lire 289 billion], the reserve for restructuring charges [Lire 284 billion] and other reserves [Lire 832 billion];
- the decrease in "other liabilities" from Lire 14,021 billion at the end of 1998 to Lire 13,248 billion. This item comprises payables to customers [Lire 3,394 billion], taxes payable [Lire 2,295 billion], contributions to pension and social security institutions [Lire 1,855 billion], employee-related payables [Lire 1,060 billion], telecommunications

2172

operating fees payable [Lire 1,174 billion] and trade accrued expenses and deferred income [Lire 3,470 billion].

▸▸ *Net debt* of Lire 15,758 billion [Lire 15,826 billion at the end of 1998] consists of Lire 10,002 billion of medium/long-term debt [Lire 10,839 billion at the end of 1998] and Lire 5,756 billion of net short-term borrowings [Lire 4,987 billion at December 31, 1998]. Starting from the 1999 financial statements, net debt also includes financial accruals, prepayments and deferrals [Lire 183 billion at December 31, 1999 and Lire 217 billion at December 31, 1998].

Gross debt amounts to Lire 19,624 billion [Lire 20,180 billion in 1998].

An analysis based on maturity is given in the following table:

[in billions of lire]					12/31/1999		12/31/1998	
	ITL	%	Foreign Currency	%	Total	%	Total	%
Medium/long-term debt	8,206	57	1,796	35	10,002	51	10,839	54
Short-term debt	6,271	43	3,351	65	9,622	49	9,341	46
Total	14,477	100	5,147	100	19,624	100	20,180	100

The average maturity of medium/long-term debt is 4.8 years.

A breakdown of foreign currency borrowings is given in the following table:

	Foreign Currency [in millions]		Billions of lire	
	12/31/1999	12/31/1998	12/31/1999	12/31/1998
USD	1,364	1,489	2,629	2,462
Euro-zone currencies	342	339	662	657
GBP	320	61	964	181
GRD	44,700	39,370	262	231
BRL	515		555	
Other currencies			75	57
Total			5,147	3,588

2173

A breakdown of gross debt based on interest rates is given below:

[in billions of lire]	12/31/1999			12/31/1998
	ITL	Currency [equivalent in lire]	Total	
Up to 2.5%	3,384	27	3,411	1,187
From 2.5% to 5%	7,866	1,805	9,671	12,255
From 5% to 7.5%	2,147	3,093	5,240	4,679
From 7.5% to 10%	1,062	222	1,284	1,406
Over 10%	18		18	653
Total	14,477	5,147	19,624	20,180

The largest amount of gross debt [approximately 67%] falls in the range of interest rates up to 5% and includes loans made by various banking institutions with 3% interest being subsidized by the Ministry of the Treasury [under Law No. 67 dated March 11, 1988], and also loans made with EIB funds and short-term borrowings.
The range of interest rates from 5% to 7.5% includes loans from the Cassa Depositi e Prestiti [under Law No. 887 dated December 22, 1984].

2174

[5.3] FINANCIAL PERFORMANCE

Consolidated statements of cash flows

[in billions of lire]			1999	1998
A.	Net short-term borrowings at beginning of year		[4,987]	[3,348]
B.	Cash flows - operating activities			
	Net income for the year		4,665	5,252
	Depreciation and amortization		10,338	10,480
	[Gains] losses on sales of intangibles, fixed assets and long-term investments		116	[294]
	[Upward adjustments] writedowns of intangibles, fixed assets		1,189	2,195
	Change in working capital	[*]	[1,371]	710
	Net change in reserve for employee termination indemnities		185	233
	Foreign exchange gains [losses] and other changes		164	[146]
			15,286	18,430
C.	Cash flows - investing activities			
	Long-term investments:			
	• intangible assets		[3,057]	[2,236]
	• fixed assets		[7,503]	[9,423]
	• long-term investments		[2,517]	[7,224]
	Proceeds from sale, or redemption value, of intangible assets, fixed assets and long-term investments		1,063	1,675
	Change in scope of consolidation		128	=
			[11,886]	[17,208]
D.	Cash flows - financing activities			
	New borrowings		1,485	2,479
	Capital contributions		80	=
	Capital grants		128	98
	Debt repayment		[370]	[843]
	Change in medium-long term debt due within one year		[2,214]	[2,695]
			[891]	[961]
E.	Dividends		[3,278]	[1,900]
F.	Cash flows for the fiscal year	[B+C+D+E]	[769]	[1,639]
G.	Net short-term borrowings at end of year	[A+F]	[5,756]	[4,987]

[*] The difference with respect to the "consolidated balance sheet" is due to entries affecting working capital. They refer to changes in capital grants, the use of the reserve for losses of subsidiaries and affiliates, the adjustment of medium/long-term debt expressed in the euro-zone currencies to the fixed euro exchange rates [for 1998], and the adjustment of receivables recorded in long-term investments and medium/long-term debt to the year-end exchange rates [for 1999].

In 1999, net cash outflows amounted to Lire 769 billion, with a consequent increase of the same amount in net short-term borrowings, which at December 31, 1999 totaled Lire 5,756 billion. This change is due to the requirements for investing and financing activities and dividends that were not entirely financed by the cash flows from operating activities [Lire 15,286 billion].

Investments totaled Lire 13,077 billion [Lire 18,883 billion in 1998]. They refer to industrial investments of Lire 10,560 billion made mainly by the Parent Company and TIM, in addition to the goodwill of the Brazilian companies and Italtel; financial investments [Lire 2,517 billion] mainly refer to investments abroad, including the additional stake in Nortel Inversora [Lire 486 billion], the start of the partnership for the Astrolink system [Lire 481 billion], the additional stake in Retevision [Lire 335 billion] and the capital contributions in Maxitel and Retevision Movil [Lire 142 billion and Lire 112 billion, respectively].

2178

[5.5] OUTLOOK FOR 2000

In 2000, the Telecom Italia Group will be involved in the implementation of a strategy which, it is hoped, will provide a dynamic response to a context in continuous evolution and marked by ever fiercer competition. In fact, in a scenario which imposes ever greater challenges, the Group has devised a strategy which, by activating technical, human and financial resources in an integrated way, will provide an effective answer to the competition and to the requirements of the market. In fact, although 2000 will be characterized, on the one hand, by a gradual reduction in the prices of supply in response to the step-up of competition, on the other, it will feature the continuous progress of mobile telephone services and the marked development of the Internet market.
The Group also anticipates a reorganization of investments, the consolidation of its international presence and the repositioning of its core business, with the aim of improving the return on capital invested.
Operations will, therefore, be distinguished by action aimed at retaining the clientele, rationalizing costs and investments and generally recovering efficiency and, as a result, generate a higher level of economic performance and profit than in 1999.
The main operational guidelines will therefore be as follows:

- to define suitable pricing policies and to improve the range of services offered, which are to be spread by means of appropriate sales policies;
- to significantly reduce productive and structural costs;
- to extend the offering of high-speed services by integrating the conventional networks with ADSL technology, with particular reference to the "small business" segment and service providers; in particular, the spread of this technology will make it possible to transmit audio, video and data signals in digital format at very high speed, using conventional links and resulting in the optimization of the price/performance ratio, to the advantage of the clientele.
- to create a mobile network using UMTS technology so that the service can subsequently be offered both on a national scale, through TIM, and in an international context through foreign subsidiaries;
- to integrate Tin.it and Seat, thus creating a leading company in the market of Internet access and an integrated "business to business" platform of European value;
- to create a "information pool" which, apart from Finsiel, Telesoft and Sodalia, will include the running and development of the Telecom Italia information systems;
- the real estate demerger project, with the aim of maximizing the value of the real estate properties belonging to the Group;
- to divest activities that are not correlated to the core business of the Group: namely, Teleleasing [the financial details of the sale were defined last February], the insurance activities held through Meie, the installation activities of Sirti and the control of Italtel;
- to develop the Nautilus project with the aim of providing a response to the marked growth in international connectivity in eastern Mediterranean countries;
- to strengthen commitment in the multimedia segment by investing in Stream, given the high level of potential integration with the core business of the Group.

[5.6] TRANSACTIONS BETWEEN TELECOM ITALIA GROUP AND RELATED PARTIES

Pursuant to the disclosure requirements of Consob Communications No. 97001574 of February 20, 1997 and No. 98015375 of February 27, 1998, concerning transactions with related parties – including parent companies, unconsolidated subsidiaries and associated companies, as well as the Parent Company's Directors and the companies in which they hold corporate office or significant responsibility – all such transactions were part of the Group's normal operations and were conducted at standard conditions or in accordance with specific regulatory provisions. The table below provides a breakdown of transactions with such parties:

Statement of income and balance sheet items for the year 1999	Amounts in billions of lire	Nature of transactions
Sales and services revenues	1,078	These comprise mainly the revenues from Seat-Pagine Gialle [Lire 308 billion], Telecom Argentina [Lire 177 billion], Stream [Lire 153 billion] and Lottomatica [Lire 85 billion].
Raw materials and outside services	469	These mainly refer to expenses to Seat-Pagine Gialle [Lire 176 billion], Siemens Telematica [Lire 119 billion] e Siemens Informatica [Lire 73 billion].
Net other [income] expense	50	These mainly relate to cost recoveries for personnel on loan to some foreign subsidiaries and affiliates.
Net financial [income] expense	37	These mainly interest earned on loans made to some foreign subsidiaries and affiliates.
Loans in long-term investments	293	This item refers to capital contributions to joint ventures with Chinese companies and other long-term loans to foreign subsidiaries and affiliates.
Trade accounts receivable	800	These comprise mainly trade accounts receivable of Stream [Lire 215 billion], Seat-Pagine Gialle [Lire 121 billion], Retevision [Lire 60 billion], Telecom Argentina [Lire 58 billion], Telekom Srbija [Lire 48 billion], Golden Lines International [Lire 35 billion], Consorzio Cored [Lire 26 billion] and Madritel [Lire 25 billion].
Trade accounts payable	613	These pertain to supplier relationships connected with investments and operations. In particular, they comprise trade accounts payable to Consorzio Ims [Lire 143 billion], Siemens Informatica [Lire 117 billion], Tecnosistemi [Lire 71 billion], Seat-Pagine Gialle [Lire 63 billion].
Short-term financial assets	221	These include, among other things, receivables from Etec S.A. [Lire 58 billion], Stream [Lire 56 billion] and Telekom Srbija [Lire 37 billion].
Other liabilities	694	These comprise mainly payables to Solpart [Lire 360 billion] and Astrolink [Lire 322 billion] for capital contributions payable.
Investments in fixed and intangible assets	1,238	These mainly consist of acquisitions from Italtel for the period January-October in which the company was consolidated proportionally at 50% [Lire 754 billion], Consorzio Ims [Lire 186 billion], Siemens Informatica [Lire 153 billion].

2180

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF TELECOM ITALIA

6. Management's discussion and analysis of financial condition and result of operations of Telecom Italia

[6.1] RESULTS OF OPERATIONS

Statements of income [*]

[in billions of lire]			1999	1998	Change Amount	Change %
A.	Sales and service revenues		35,856	36,292	[436]	[1.2]

	Income taxes for the year		[3,860]	[2,176]	[1,684]	77.4
H.	Net income for the year		5,050	2,790	2,260	81.0

[*] The figures of 1998 differ from the published figures due mainly to the presentation of revenues gross of amounts to be paid to other carriers.
[**] Reduced by related cost recoveries.

2182

Results of operations for 1999 showed a net income of Lire 5,050 billion, an increase of Lire 2,260 billion [+81%] over 1998. The net income was affected by a reduction in the depreciation charge for fixed assets, lower writedowns of intangibles, fixed assets and long-term investments [in 1998 writedowns and other costs connected to the *SOCRATE* and *DECT* platforms amounted to Lire 2,098 billion] and an increase in dividends from subsidiaries; the positive effect of such factors was higher than the decrease in gross operating profit caused by growing competition and a consequent reduction in tariffs.

The key figures are analyzed in the following paragraphs:

▸▸ *Sales and service revenues,* amounting to Lire 35,856 billion, decreased by 1.2% compared to 1998 [Lire 36,292 billion]. Starting from 1999, revenues are recorded gross of the amount due to other domestic and international TLC operators [Lire 6,321 billion]. The total refers to revenues from services of Lire 34,835 billion and revenues from sales of Lire 1,021 billion [Lire 35,329 billion and Lire 963 billion, respectively, in 1998].
The decrease in service revenues [–1.4%] is attributable to a decrease of 6.4% in revenues from traffic, in spite of an increase of 11.6% in terms of minutes; such trend was negatively affected by the tariff change of January 6, 1999, the discount policies aimed at customer "retention" and the application of new interconnecting rates to traffic to and from the mobile network, which were partly offset by the increases in basic subscription charges [+7.6% due to tariff increases, *ISDN* connections and links with other carriers] and other income.
By way of comparison, had revenues been shown net of the amount due to other carriers [as practiced until December 1998], service revenues would have been Lire 28,514 billion in 1999 and Lire 29,345 billion in 1998, with a reduction of Lire 831 billion [–2.8%].

Revenues from interconnection access charges from the new fixed network carriers were Lire 708 billion [Lire 44 billion in 1998].

▸▸ *Raw materials and outside services* of Lire 14,313 billion net of the related cost recoveries, include:

[in billions of lire]	1999	1998	Change %
Direct service costs	2,202	2,189	0.6
Operating costs	2,806	2,789	0.6
Marketing costs	1,907	1,779	7.2
Know-how development costs	321	387	[17.1]
	7,236	7,144	1.3
Amount due to other carriers	6,321	5,984	5.6
TLC operating fees	756	753	0.4
Total	14,313	13,881	3.1

In regard to the changes in costs, the following notes apply:
a] "direct service costs", pertaining to the operation and maintenance of the network, increased by Lire 13 billion due to a higher use of satellite systems and the interconnecting costs to the other operators' networks, partly offset by the savings arising from the ongoing equipment rationalization program, concentrating especially on line installations and public telephony;

2183

b] "operating costs", inclusive of management and maintenance of buildings, vehicles, information systems and equipment, as well as overheads, decreased by Lire 17 billion and include Lire 217 billion of non-recurring costs relating to the take-over bid, the negotiations with Deutsche Telekom [Lire 130 billion] and the adjustments to information systems to ensure the *carrier preselection* and the *number portability* [Lire 87 billion];
c] "marketing costs", inclusive of sales expenses, post-sales assistance, customer relations, advertising and promotion, increased by Lire 128 billion; this increase is due to both expenses [Lire 92 billion] arising from the trade agreements with the Internet Service Providers, both to the advertising costs incurred for the take-over bid [Lire 19 billion];
d] "know-how development costs", comprising training, studies and research and technical consulting services, are down by Lire 66 billion.

The above costs total Lire 7,236 billion for 1999, an increase of 1.3% compared to 1998; excluding the non-recurring costs would be Lire 7,000 billion, a decrease of 2% from 1998;

e] "amounts due to other carriers" increased by Lire 337 billion [Lire 119 billion to mobile carriers, Lire 98 billion to fixed carriers and Lire 107 billion to foreign correspondents] due to the upward trend of the TLC market;
f] "TLC operating fees" increased by Lire 3 billion and referred to the operating fee based on sales revenues [Lire 748 billion] that replaced the license fee as from 1999, and the new fee [Lire 8 billion] for the operation of the *Authority*.

The percentage of outside costs to revenues was 39.9% [39.3%, net of the non-recurring costs] compared to 38.2% in 1998.

▸▸ *Labor costs* [net of cost recoveries for employees on loan to subsidiaries and affiliated companies] amounted to Lire 6,106 billion, with a decrease of Lire 146 billion [–2.3%] compared to 1998, and Lire 181 billion [–2.8%] gross of such cost recoveries. This gross change is due to the contrasting effects created, on the one hand, by the reduction in the average number of employees – which dropped from 80,294 in 1998 to 77,184 in 1999 [–3.9%] – and, on the other hand, by the increase in the average per unit cost [Lire 80.1 million compared to Lire 79.2 million in 1998, +1.1%]. The increase in the average per unit cost has been affected by the carrying forward of the collective bargaining agreements, the adjustment to the reserve for employee termination indemnities and seniority and career increases, that were partly offset by the reduction in overtime and INPS social security contribution rates.
The percentage of labor costs to revenues dropped from 17.2% in 1998 to 17% in 1999.

▸▸ *Gross operating profit* of Lire 15,446 billion decreased by Lire 814 billion compared to 1998 [–5%] due to a reduction in service revenues. The percentage of gross operating profit to sales and service revenues is lower than in 1998 [43.1% compared to 44.8%]. Such percentage, calculated on the basis of revenues net of the amount due to other TLC carriers – as practiced until 1998 – dropped from 53.6% in 1998 to 52.3% in 1999.

▸▸ *Depreciation and amortization,* totaling Lire 7,766 billion, decreased by Lire 638 billion compared to 1998. This item comprises Lire 1,253 billion in amortization of intangible assets and Lire 6,513 billion in depreciation of fixed assets.
"Amortization of intangible assets" increased by Lire 73 billion, due to the software investments which became amortizable during the year.

2184

"Depreciation of fixed assets" decreased by Lire 711 billion; this change derives from a reduction in the amount of depreciable assets, the change in the mix of depreciable assets and lower depreciation of *DECT* and *SOCRATE* assets that were written down in the 1998 financial statements and the adjustment of depreciation relating to the copper network, whose the useful life was extended because of the introduction of *ADSL* technology, and the switching and transmission equipment, whose useful life was reduced because of the increase of the software assets included in such equipment. Such adjustment caused positive effects of approximately Lire 300 billion.

▸▸ *Other valuation adjustments,* amounting to Lire 542 billion, decreased by Lire 1,786 billion compared to 1998 essentially due to the writedowns of the *DECT* and *SOCRATE* platforms made in the 1998 financial statements [Lire 1,834 billion] and referred to:

a] "writedowns of accounts receivables", amounting to Lire 399 billion [Lire 494 billion in 1998], made in order to reduce accounts receivables to their estimated realizable value;

b] "writedowns of intangibles and fixed assets", amounting to Lire 143 billion, which reflect the permanent reduction in the value of public telephony installations, amounting to Lire 93 billion, and writedowns of the residual amount of installations and software related to the *DECT* platform, amounting to Lire 50 billion.

▸▸ *Provisions to reserves for risks and charges,* amounting to Lire 156 billion, refer mainly to adjustments to the "reserve for litigation" [Lire 40 billion] for third party controversies and charges [Lire 96 billion] deriving from the indications supplied, at the end of February 2000, by the Authority for the 1999 interconnecting rates. The reduction of Lire 65 billion compared to 1998 is mainly attributable to the provisions made in the previous year for charges related to the *SOCRATE* and *DECT* platforms.

▸▸ *Net other income [expense],* amounting to an income balance of Lire 126 billion [–Lire 265 billion in 1998], represents the difference between Lire 640 billion of income and Lire 514 billion of expenses.
"Income" includes mainly late payment fees charged to customers as a result of the late payment of telephone bills of Lire 227 billion [Lire 232 billion in 1998], non-telephone services rendered to TIM of Lire 57 billion [Lire 64 billion in 1998], portions of capital grants attributable to the year of Lire 75 billion [Lire 67 billion in 1998]. "Expense" includes losses on disposals of fixed and intangible assets of Lire 207 billion [Lire 586 billion in 1998], indirect duties and taxes for the year of Lire 134 billion [Lire 139 billion in 1998] and other expenses from normal operations amounting to Lire 173 billion [Lire 282 billion in 1998].

▸▸ *Operating income* amounts to Lire 7,108 billion, an increase of Lire 2,066 billion over 1998 [+41%] essentially due to lower charges related to the fixed capital [amortization and depreciation, capital losses and writedowns]. The ratio of operating income to revenues is 19.8% compared to 13.9% in 1998.

▸▸ *Income from investments* can be analyzed as follows:

[in billions of lire]	1999	1998	Change %
Dividends and tax credits	3,239	1,067	°
Net gains on sales of investments	88	128	[31.2]
Total	3,327	1,195	°

2185

a] dividends and tax credits refer to:
- dividends accruing in the fiscal year relating to holdings in subsidiaries [Lire 1,511 billion] of which Lire 1,401 billion relating to TIM dividends;
- special dividends distributed by SIRTI in December 1999 [Lire 450 billion] and other dividends that have been collected, which are mainly in reference to holdings in foreign companies [Lire 122 billion];
- tax credits for dividends collected [Lire 269 billion] and accruing in the fiscal year [Lire 887 billion]; the latter have been recorded starting from 1999 financial statements as laid down by Italian Accounting Principle No. 25;

b] net gains on sales of investments refer mainly to capital gains on the sale of TIM and of venture capital companies.

⏩ *Net financial expense* [Lire 573 billion] can be analyzed as follows:

[in billions of lire]	1999	1998	Change %
Balance from financial transactions	[632]	[699]	[9.6]
Other net financial income	59	104	[43.3]
Total	[573]	[595]	[3.7]

a] the balance from financial transactions comprises the income [Lire 146 billion] and expense [Lire 778 billion] related to financial receivables and payables making up the net debt position;

b] other net financial income refers to interest income earned on medium/long-term loans [Lire 62 billion] and net gains on exchange [Lire 3 billion].

⏩ *Value adjustments on financial assets* show a negative balance of Lire 295 billion [-Lire 805 billion in 1998] and are almost entirely composed of writedowns on the investments in the subsidiaries TMI - Telemedia International Italia [Lire 87 billion] and Iridium Italia [Lire 77 billion, of which Lire 14 billion is recorded under "reserve for losses of subsidiaries and affiliates"] and the affiliated companies Stream [Lire 112 billion] and TSP [Lire 11 billion].

⏩ *Net extraordinary income [expense]* shows a net expense balance of Lire 657 billion [+Lire 129 billion in 1998] which derives from the difference between income of Lire 71 billion and expenses of Lire 728 billion. The latter mainly comprises the expenses connected with corporate restructuring activities [Lire 246 billion], social security charges pursuant to Law No. 58/92 for equalization with the Telephone Employees Pension Fund - FPT [Lire 364 billion] and charges incurred on the sale of 65% of Stream [Lire 55 billion].

⏩ *Income taxes for the year* amounted to Lire 3,860 billion [Lire 2,176 billion in 1998] and as percentage of income before income taxes are 43.3% in 1999 compared to 43.8% in 1998. The 1999 amount is affected by a significant amount of dividends. Had these items been excluded from the statement of income in 1999 and had no account been taken of the effects of the adoption of the new accounting principles concerning income taxes in 1998, the tax rate would have been 47.7% in 1999 compared to 48% in previous year.

[6.2] FINANCIAL CONDITION

Balance sheets

[in billions of lire]			12/31/1999	12/31/1998	Change
A.	Intangibles fixed assets and long-term investments				
	Intangible assets		2,259	2,230	29
	Fixed assets		36,520	38,741	[2,221]

G.	Medium/long-term debt		8,220	8,801	[581]
H.	Net short-term borrowings				
	• short-term borrowings		10,028	9,205	823
	• liquid assets and short-term financial assets		[2,297]	[2,256]	[41]
	• financial accrued expense [income] and deferred expense [income], net		117	178	[61]
			7,848	7,127	721
		[G+H]	16,068	15,928	140
I.	Total	[F+G+H]	51,645	48,479	3,166

The balance sheet shows net invested capital of Lire 51,645 billion [Lire 48,479 billion at December 31, 1998], of which 68.9% is financed by stockholders' equity and 31.1% by net borrowings.

▸▸ As far as *intangibles, fixed assets and long-term investments* are concerned, the following should be mentioned:

a] "intangible assets" amounted to Lire 2,259 billion, up by Lire 29 billion compared to December 31, 1998, and represent the difference between additions [Lire 1,352 billion], the amortization charge [Lire 1,253 billion] and retirements [Lire 70 billion] during the year;

b] "fixed assets" of Lire 36,520 billion decreased by Lire 2,221 billion from December 31, 1998 and represent the difference between additions [Lire 4,574 billion], the depreciation charge [Lire 6,513 billion], disposals net of reutilizations [Lire 145 billion] and writedowns of public telephony and *DECT* installations [Lire 137 billion] made during the year;

c] "long-term investments" amounted to Lire 19,644 billion, up by Lire 3,117 billion compared to December 31, 1998. This increase represents mainly the difference between:

- new investments of Lire 3,973 billion, primarily due to loans for the future capital increases of Stet International Netherlands [Lire 1,676 billion] and Stet Mobile Holding [Lire 568 billion] directed to the acquisition of foreign holdings, mainly in Spain and Latin America, the recapitalization and increase in share capital of Stream [Lire 409 billion], the establishment of Path.Net [Lire 50 billion] and, the acquisition, within the scope of the Italtel-Siemens deal, of a 50% stake in Telsi [Lire 794 billion];
- writedowns of holdings amounting to Lire 414 billion, mainly pertaining to Stream [Lire 251 billion, of which Lire 139 billion is already covered by a specific reserve existing at December 31, 1998], TMI - Telemedia International Italia [Lire 87 billion] and Iridium Italia [Lire 63 billion];
- repayment of loans amounting to Lire 271 billion;
- sale of investments for a total of Lire 197 billion, mainly comprising the sale of 65% of Stream [Lire 130 billion].

▸▸ *Working capital* showed a negative figure of Lire 4,615 billion [Lire 7,002 billion at December 31, 1998], thus representing, as it does traditionally, a source of operating cash flow. In detail:

a] "trade accounts receivable", net of the related allowance account [Lire 728 billion], amounted to Lire 10,460 billion and decreased by Lire 484 billion compared to December 31, 1998;

b] "other assets" amounted to Lire 2,923 billion and increased by Lire 870 billion compared to December 31, 1998. They essentially refer to accrued 1999 dividends from subsidiaries [Lire 1,511 billion], receivables from employees [Lire 143 billion], deferred tax assets net of the reserve for deferred tax liabilities [Lire 345 billion], customer payments in transit with banks and the postal system [Lire 340 billion], receivables from subsidiaries [Lire 181 billion], receivables from trading in stock [Lire 119 billion], principally in TIM stock, and commercial accrued income and prepaid expenses [Lire 19 billion];

c] "trade accounts payable" amounted to Lire 9,313 billion, with decrease of Lire 672 billion compared to December 31, 1998 that was especially due to lower expenditures

2188

for installation investments; they include Lire 1,129 billion due to other national and international telecommunications operators;

d] "reserves for risks and charges" of Lire 1,242 billion decreased by Lire 273 billion compared to December 31, 1998. They include the "reserve for taxes" [Lire 254 billion], the "reserve for capital grants" [Lire 285 billion], the "reserve for litigation" [Lire 258 billion], the "reserve for contractual risks and other risks" [Lire 396 billion], and the "reserve for losses of subsidiaries and affiliates" [Lire 49 billion];

e] "other liabilities" amounting to Lire 7,676 billion decreased by Lire 1,087 billion compared to December 31, 1998. They mainly comprise employee-related payables [Lire 732 billion], contributions to pension and social security institutions [Lire 1,709 billion], amounts owed to customers [Lire 2,363 billion], payables related to TLC operating fees [Lire 803 billion], taxes payable [Lire 929 billion] and commercial accrued expenses and deferred income [Lire 779 billion].

▸▸ *Stockholders' equity* at December 31, 1999 amounted to Lire 35,577 billion and increased from December 31, 1998 by Lire 3,026 billion, which represents the balance of net income for the year [Lire 5,050 billion], the portion of capital grants that became available [Lire 33 billion transferred from "reserves for risks and charges" to "reserves"], the increase in "share capital" [Lire 5 billion] and in "additional-paid in capital" [Lire 59 billion] from the stock option plan approved by the Extraordinary Stockholders' Meeting held on December 15, 1998, and dividends related to fiscal year 1998 [Lire 2,121 billion].

▸▸ *Net debt* of Lire 16,068 billion increased by Lire 140 billion from December 31, 1998. Starting from the 1999 financial statements, net debt also comprises financial accrued expense [income] and deferred expense [income], net amounting to Lire 117 billion [Lire 178 billion at December 31, 1998]. Gross indebtedness amounts to Lire 18,248 billion, compared to Lire 18,006 billion at December 31, 1998 and, as from 1999, comprises liabilities to financial institutions for interest expense accrued in 1999 and settled in January 2000. 1998 figures have been reclassified to conform with the 1999 presentation.

An analysis based on maturity is given in the following table:

					12/31/1999		12/31/1998	
[in billions of lire]	ITL	%	Foreign Currency	%	Total	%	Total	%
Medium/long-term debt	7,170	43	1,050	75	8,220	45	8,801	49
Short-term debt	9,682	57	346	25	10,028	55	9,205	51
Total	16,852	100	1,396	100	18,248	100	18.006	100

The average maturity for medium/long-term debt is 5.1 years.

2189

A breakdown of foreign currency debt is as follows:

	Foreign Currency [in millions]		Billions of lire	
	12/31/1999	12/31/1998	12/31/1999	12/31/1998
USD	150	201	288	346
Euro-zone currencies	167	225	323	436
GBP	258	56	775	167
YEN	992	992	10	10
Total			1,396	959

A breakdown of gross debt based on interest rates is given below:

			12/31/1999	12/31/1998
[in billions of lire]	ITL	Currency [equivalent in lire]	Total	Lire
Up to 2.5%	3,035	=	3,035	918
From 2.5% to 5%	10,877	884	11,761	12,522
From 5% to 7.5%	1,878	472	2,350	2,710
From 7.5% to 10%	1,045	40	1,085	1,373
Over 10%	17	=	17	483
Total	16,852	1,396	18,248	18,006

The largest amount of gross debt falls in the range of interest rates up to 5% and includes loans made by various banking institutions with the interest of 3% being subsidized by the Ministry of the Treasury [under Law No. 67 dated March 11, 1988], and also part of loans made with EIB funds and short-term borrowings.
The range of interest rates from 5% to 7.5% includes loans from the Cassa Depositi e Prestiti [under Law No. 887 dated December 22, 1984].

[6.3] FINANCIAL PERFORMANCE

Statements of cash flows

[in billions of lire]			1999	1998
A.	Net short-term borrowings		[7,127]	[4,733]
B.	Cash flows - operating activities			
	Net income for the year		5,050	2,790
	Depreciation and amortization		7,766	8,404
	[Gains] losses on sales of intangibles, fixed assets and long-term investments		175	426
	[Upward adjustments] writedowns of intangibles and fixed assets		416	2,480
	Change in working capital	[*]	[2,350]	[773]
	Net change in reserve for employee termination indemnities		146	169
			11,203	13,496
C.	Cash flows - investing activities			
	Intangibles, fixed assets and long-term investments:			
	• intangible assets		[1,352]	[1,522]
	• fixed assets		[4,574]	[6,756]
	• long-term investments		[3,973]	[5,782]
	Proceeds from sale, or redemption value, of intangible assets, fixed assets and long-term investments		507	467
			[9,392]	[13,593]
D.	Cash flow - financing activities			
	New borrowings		1,138	1,645
	Capital contributions		64	=
	Capital grants		114	91
	Debt repayment		[209]	[607]
	Change in medium-long term debt due within one year		[1,518]	[1,973]
			[411]	[844]
E.	Dividends		[2,121]	[1,453]
F.	Cash flows for the fiscal year	[B+C+D+E]	[721]	[2,394]
G.	Net short-term borrowings at end of year	[A+F]	[7,848]	[7,127]

[*] The difference with respect to the "balance sheet" is due to entries affecting working capital. They refer to changes in capital grants, the use of the reserve for losses of subsidiaries and affiliates, the adjustment of medium/long-term debt expressed in the euro-zone currencies to the fixed euro exchange rates [for 1998], and the adjustment of receivables recorded in long-term investments and medium/long-term debt to the year-end exchange rates [for 1999].

In 1999 net cash outflows amounted to Lire 721 billion, with a corresponding increase in net short-term borrowings, which at December 31, 1999 totaled Lire 7,848 billion [Lire 7,127 billion at December 31, 1998].

This change is due to cash flows provided by operating activities [Lire 11,203 billion] which almost entirely financed investing and financing activities as well as dividends.

Investments totaled Lire 9,899 billion [Lire 14,060 billion in 1998]. These refer to industrial investments of Lire 5,926 billion [Lire 8,278 billion in 1998], aimed at the modernization and expansion of the technological infrastructures related to the telecommunications services which decreased mainly in the installation business after abandoning the *SOCRATE* and *DECT* platform projects, decided in the end of 1998, and the completion of the urban switching numbering process and a greater selectivity in network investments.

2194

[6.5] OUTLOOK FOR 2000

The completion of the liberalization of the basic market and the marked development of the *Internet* market are the main factors on which operations will focus in 2000.
The complete liberalization of services [*carrier selection, carrier preselection, number portability, local loop unbundling*] and the consequent emergence of ever fiercer competition points to a need to apply new policies of retention which will lead to a gradual reduction in the average prices of supplying the services. In addition, customer retention will also be pursued through coverage of the market, which will be achieved by broadening and specializing the various sales channels and the sales force together with suitable policies to innovate and globalize the offering.
As part of its measures to defend and protect its current profitability levels, Telecom Italia S.p.A. intends to take appropriate action to recover productivity as well as activating policies to spread the *ISDN* and TD services as part of the continuous expansion of its *Internet* services. Particularly with reference to this business area, the company has set itself the following objectives:

- to increase the level of penetration in the domestic sphere;
- to develop the process of internationalization.

Action directed at the residential clientele can be summarized in terms of new offerings of access, both on traditional lines [RTG], by developing services and products with the aim of limiting the intention to switch, and by means of *ISDN* "super-lines" which, in addition to the advantages of having two lines in one, makes it possible to activate appropriate services which will be proposed in a goal-oriented way to the target group of clientele selected.
With regard to defending market shares and promoting the migration of phone to data services, action aimed at Top and Business clientele includes suitable offers concerning phone services [strengthening the platform of outbound, inbound and innovative services], data [strengthening the offerings of Direct Circuits, extending the RING solution and providing incentives for VAS] and, finally, incentives.
In actual fact, the integration between *ADSL* and *ATM* technologies, on which the commercial offering is based, aims to transform the conventional telephone network into a data network that is compatible with voice services, thus extending the potential of high-speed information exchange.
As far as the international offering is concerned, discounts will be offered to certain segments of the clientele and on global offerings, to protect traffic volumes. At the same time, agreements with the clientele will take account of the sections of traffic served, the duration of the contract and volumes, with the aim of maximizing the results of international traffic.
The most significant drivers of the evolution of the national and international network will insist mainly on transforming the voice market [migration towards mobile services, developing interconnection traffic] and on developing the Internet market within a framework of competition on the national and international market and bearing in mind the other hurdles/opportunities that the regulations will define.
Finally, with reference to the technological aspects, the new network architecture will have to ensure:

- the effective collection of Internet *dial-up traffic*;
- the development of *broadband* access;
- the creation of an integrated voice-data *backbone*;
- the extension of the international network with the start-up of projects in Europe, the Mediterranean area, the North Atlantic and South America.

2195

[6.6] TRANSACTIONS BETWEEN TELECOM ITALIA AND RELATED PARTIES

Pursuant to the disclosure requirements of Article 2428 of the Italian Civil Code and Consob communications No. 97001574 of February 20, 1997 and No. 98015375 of February 27, 1998, concerning transactions with related parties – including parent companies, subsidiaries and associated companies, as well as Telecom Italia's Directors and the companies in which they hold corporate office or significant responsibility – all such transactions were part Telecom Italia's normal operations and were conducted at standard conditions or in accordance with specific regulatory provisions. With reference to article 2428 of the Italian Civil Code, the following transactions are reported:

Statement of income and balance sheet items for 1999	Amounts in billions of lire	Nature of transaction
Sales and service revenues	2,882	This item refers to revenues from telecommunications services as well as revenues connected with the mobile-fixed *access charge* and rental of lines acquired by TIM. Also included are revenues from services connected to contracts with Seat Pagine Gialle and the management fee from Telecom Argentina.
Raw materials and outside services	4,901	This item refers to acquisitions from subsidiaries and affiliates and other related parties [in particular from Sirti, Finsiel, Teleleasing, Italtel, TIM, Cselt, Siemens Informatica, Telesoft, Scuola Superiore Guglielmo Reiss Romoli and Seat Pagine Gialle] mainly for leasing installments, equipment maintenance, software, personnel training and directory printing, as well as the amounts due to TIM for its share of services invoiced by Telecom Italia.
Other income [expense]	102	Income connected to miscellaneous services rendered to subsidiaries and affiliates, including outsourcing services rendered to TIM.
Financial income [expense]	2,077	This item mainly comprises dividends and the interest accrued on current accounts held for purposes of centralized cash management.
Trade accounts receivable	1,053	These are mainly items connected with telecommunications services rendered.
Other assets	198	These essentially comprise receivables relating to the Group's VAT procedure.
Trade accounts payable	3,148	Essentially, these are the supplier transactions connected with normal investments and operations, in particular from Sirti, Consorzio Cored, Telesoft, Italtel and Siemens Informatica, as well as the amounts due to TIM for its share of services invoiced by Telecom Italia.
Other liabilities	156	This item refers to the amount payable in connection with the Group's VAT procedure and deferred income from TIM.
Long-term loans receivable	1,300	Loans granted to Teleleasing, Bitel and Telespazio subsidiaries.
Net short-term financial liabilities	1,201	This item mainly regards transactions current accounts held for purposes of centralized cash management.
Investments in fixed and intangible assets	2,318	These are mainly the acquisitions from Italtel [exchanges], Sirti and Consorzio I.M.S. [line equipment], Telesoft and Finsiel [software projects], Siemens Informatica [hardware].

2196

7. Significant events subsequent to December 31, 1999

Tin.it - Seat Pagine Gialle

On March 15, the Board of Directors approved the process to merge TIN.IT and Seat Pagine Gialle. The new company will be the Italian leader in *Internet* access, portals and in collecting advertising, both online and for telephone directories, and will be the only operator in Europe present along the entire chain of value for Internet, thanks also to an integrated "business to business" platform which is unique on the continent.
The deal initially calls for the creation of a new company TIN.IT S.p.A., 100% owned by Telecom Italia and consisting of the operations of TIN, the investment by Telespazio in Viasat, the "content management" division of Saritel and the management of the telephone directories. Later, 8% of TIN.IT S.p.A. will be exchanged for Seat stock issued in favor of Telecom Italia's shareholders. Lastly, TIN.IT will be merged in Seat by summer; Telecom Italia's stake in Seat will rise to 64%.
A joint venture between Seat and TIM will then be set up to take advantage of the potential of e-commerce and content and services offered using WAP and *UMTS* platforms, as well as a publishing deal with De Agostini to enhance the editorial content on the Internet platforms of Seat-TIN.IT.

Commercial agreements for Internet services

With a view to developing Internet services, especially in e-banking, Telecom Italia concluded a series of agreements with some of the major banks in Italy, including: Banca Popolare di Milano, Banca Popolare di Vicenza, Banca Nazionale del Lavoro, Banca di Roma, Banca Popolare di Verona, Banca Intesa. The agreement with the last company provides for an integrated offer of IBM hardware and access to *Internet* through Tin.it.
Telecom Italia then reached an understanding with Cartasi for the integrated offer of a new and secure credit card to make purchases through *Internet* and Tin.it's "E-Vai" package for Web access.
Lastly, agreements were concluded with Assicurazioni Generali to realize a broadband multi-service online network which will link management with the more than 800 agencies, and with "Il Sole - 24 Ore" to develop "trading online" in e-banking services.

2197

Buyback of savings shares

On January 14, 2000 the ordinary shareholders' meeting authorized the voluntary irrevocable public offer of purchase of 742,615,722 savings shares, equal to 10% of total share capital and 34.28% of savings capital, at a price per share of Euros 6.5 for a maximum total of approximately Euros 4.8 billion.
The offer is open from February 17, 2000 to March 17, 2000 and was promoted in Italy and the United States where it was registered as an "issuer tender offer" under the Securities Exchange Act of 1934. To comply with United States law and in order to guarantee equal treatment for all shareholders, wherever they reside, acceptance of the offer may be cancelled at any time up to the end of the offer.
The collection of the acceptances of the offer, as well as any cancellations, were carried out, for the first time for an offer not involving the total number of shares, on the online stock market.
The offer ended with only 1,793,820 shares tendered, which were entirely retired against payment on March 24, 2000.
Furthermore, the ordinary shareholders' meeting of January 14, 2000, which authorized the offer, decided that if the number of shares accepting the offer was below the number of shares indicated in the offer, the shares would continue to be purchased, up to and not after nine months from the end of the offer [and, in any case by a maximum of 18 months from January 14, 2000] up to a maximum equal to the difference between the maximum number of 742,615,722 and the lower number of shares accepting the offer, through the purchase orders on the online stock market at the same price of Euros 6.5 per share.

Abolishment of the Telephone Employees Pension Fund

Pursuant to the provisions of art. 41 of Law No. 488 of December 23, 1999 [the 2000 Finance Bill], starting from January 1, 2000 the "Fondo di previdenza per il personale addetto ai pubblici servizi di telefonia" [FPT] or Telephone Employees Pension Fund was abolished. From that date, those holding positions in this fund will be registered in the obligatory general insurance fund, with separate accounting in the "Employees pension fund", and the rules of the abolished fund will continue to be applied.
For the additional financial requirements necessary under specific FPT rules, an extraordinary contribution to INPS has been decided for the three years 2000-2002 amounting in total to Lire 150 billion, to be charged to the companies which have employees registered in the abolished fund. Telecom Italia Group's share will be charged on the accrual basis over the three year period.

UMTS

The Telecommunications Authority has an inquiry pending for the revision of the current mobile radio agreements. To this end, TIM has maintained that it has the right to start the service in Italy using *UMTS* numbering technology without taking part in the bids since the current agreement states that TIM is the holder of "public mobile radio services for numerical communication, regardless of the technologies used".
In March, the associated company Retevision Movil which operates on the Spanish mobile radio market under the brand name of Amena was awarded the *UMTS* license.

2198

Italtel

On February 9, at the Ministry of Labor, an agreement was reached for the corporate restructuring plan of Italtel which calls for a reduction in the current workforce by about 1,200 units and the recruitment of new technical-professional job figures in the three-year period 2000-2002. The first stage of the plan provides for lay-offs and the use of unemployment programs for 641 units starting from March 1, 2000.

Sirti

On February 10, 2000, the partial demerger of Sirti S.p.A. became effective, authorized by the resolution passed by the extraordinary shareholders' meeting on December 15, 1999, with the consequent transfer of its real estate properties and related assets to a newly formed company called IMMSI S.p.A.. The new company was listed on the stock exchange from February 11, 2000; Sirti shares were listed "ex demerger" from that date.

Teleleasing

In the first months of 2000, an agreement was reached for the sale of a 60% interest in Teleleasing, subsequent to which Mediobanca will hold the majority stake with 80%, while Telecom Italia's interest will fall to 20%.

Iridium

At the end of March, Iridium Llc. appealed to the bankruptcy court of New York to be permitted to cease wireless communication services via satellite for its 55 thousand customers. The decision was made in light of the impossibility of finding a buyer for the network of 66 dedicated satellites. The service will still be provided for several months to specific customers [including a scientific expedition at the North Pole] who are using the network in remote parts of the world. The company is waiting for the sentence to be handed down by the American judge to move from the receivership to the full wind-up of the company.

Brazil

On January 31, 2000, Tele Centro Sul Participacoes [TCS], a company in which Telecom Italia has an indirect interest through Stet International Netherlands of 19.6%, made an offer to purchase 100% of Tele Brasil Sul [TBS], a holding company which owns 31.5% of the total share capital of Companhia Riograndense de Telecomunicacoes [CRT].

The TCS offer turned out to be the only offer in a process which, pursuant to what was agreed with ANATEL, the Brazilian regulator agency, set February 4 as the last date by which Telefonica, CRT's majority shareholder, should have sold its holding because of incompatibility with its position as a majority shareholder in Telesp, the telephone operator in the state of San Paolo.

2199

Telefonica, which in the meantime had refused the TCS offer considering it inadequate, appealed ANATEL's decision in the Federal Courts. At this time it is not possible to determine either the timing or the outcome of this action.

Corporate reorganization plan

On March 28, 2000, an agreement was reached with the unions concerning the development and reorganization of Telecom Italia. The agreement will allow the Company to reach pre-fixed objectives in terms of employee cutbacks [confirmed in about 13,000] and operating cost reductions. Telecom Italia will thus be in a stronger and more efficient position to face a market characterized by extremely rapid evolution and growing competition.

The reorganization will include, in the three-year period 2000-2002, the Network and Market Italy areas and the staff functions. The reorganization will involve unemployment compensation programs under ex Law 223/1991 for 5,300 units, layoffs for 2,200 units, intercompany job transfers for 1,000 units, solidarity contracts and work hours flexibility for 600 units. The company also confirmed the total number of employee cutbacks for which, in addition to the above-described programs, incentive plans will be offered to about 3,000 units and no replacements will be made for staff turnover. Programs to re-train and re-quality staff are also being put into place for specific professional job figures, which will involve about 15,000 units.

The Plan also calls for the hiring of 6,200 persons [2,000 in the Southern Italy] mainly in reference to activities connected to the new economy, customer care and technological evolution.

The agreement is currently being examined by the appropriate corporate functions to put the plan into operation.

2200

8. Other information

[8.1] YEAR 2000

The activities undertaken by Telecom Italia since 1997 to ensure the full compatibility of its computer systems with the year 2000 were concluded within the established time frame and met the quality-related objectives. 100% compatibility of the systems was reached by the end of 1999; 100% functional adaptation had already been achieved at August 31, 1999. Thanks to such actions, there were no significant problems in going into the year 2000.

To this end, Telecom Italia has also completed a process of "independent verification and validation" [IV & V] on 25 of the most crucial software applications. The corresponding analyses involved verifying the software through suppliers, methods and tools that differ from those used during the adaptation phase and their purpose was to obtain conformity of the application to the Year 2000 or, alternatively, to pinpoint any residual nonconformities.

Apart from the Adaptation Plan, a Corporate Contingency Plan was designed consisting of the integrated aggregate of a series of mission oriented plans developed by the single departments and in order to ensure the continuity of the company's "core" processes, minimizing the impact and duration of any disservice caused by the transition to the year 2000. An organization structure was designed under the same plan involving over 3,000 resources to manage the Year 2000 emergency and was integrated by the structures in charge of managing normal emergencies.

During 1999 Telecom Italia worked closely with national and international companies and entities, and actively participated, in particular, in the work of the "Year 2000 Committee" set up by the President of the Council of Ministers to develop the "National Continuity and Year 2000 Emergency Plan", coordinating emergency connections [phone and data] in use by the management unit of the "National Decision Center" set up especially for the purpose in Rome.

In the other major companies of the Group, the actions taken to adapt to the year 2000 continued according to the plans that had previously been decided: product changes, adoption of new versions of market platforms already in use and to be updated, product replacements. The actions taken and concluded within the deadline dates and at the set qualitative levels rendered all systems compatible with the year 2000, thus eliminating any problems associated with the date of transition.

2201

[8.2] THE EURO

In 1999, the Euro Project, the organizational unit designated for the coordination of the activities to introduce the new currency to the entire Telecom Italia Group, developed the Euro Master Plan which defines and plans the actions needed to convert all the corporate processes by January 1, 2002, and which was approved by management in June.

In 1999, work mainly centered on the parallel operations that were begun in 1998 and concluded in 1999. Training is mainly being concentrated on a more complete preparation and development of the "Euro Information" Web site which includes the "Law" section which now has over 100 laws online and the "Document" section which presents the most important studies and research on the Euro. All Telecom Italia Group companies can visit this training site and thus further improve the economies of scale. Lastly, specific training exercises have been set up for the administrative staff of the Parent Company.
External communication projects undertaken during 1999 were numerous and refer to the following:

- issue of prepaid telephone cards which also bear the Euro amount;
- operation of the *Internet* site "Eurolandia" for elementary and middle schools which, during the first months of the year, recorded almost 1,000 average daily visits;
- cooperation by the Telecom Italia and TIM company stores in the "EuroLogo" project;
- direct participation in the Euro Provincial Committees in order to directly monitor the process of introducing the new currency, limited to the nine more representative provinces from the standpoint of diverse economic, social situations, etc..

TIM, Telsy, CSELT and Saritel have arranged to change their systems to convert almost all their accounting processes into Euro by January 1, 2000 and prepare the 2000 financial statements in the new currency.

[8.3] PERFORMANCE OF TIN AND INTERBUSINESS INTERACTIVE SERVICES

As required by the Authority, the accounting principles used to determine the economic values for Telecom Italia Net [TIN] and Interbusiness services are described below. These accounting principles, starting from the year 1996, have been audited by the firm of Arthur Andersen.

▸▸ *Revenues* are stated at market prices for competitive services and at rates established by law for services granted by license and are recorded on the accrual basis. In the case of services provided that imply the use of dedicated access circuits by the final customers, the revenues also include the income from the leasing of such circuits [valued on the basis of the rates defined in the ministerial decrees], with the consequent recording of the same amount under costs.

▸▸ *Direct costs:*

a] *labor costs* represent the cost of personnel who worked to provide such services; the cost includes salary and wages, social security costs, provisions for employee termination indemnities and other sundry costs recorded on the basis of the number of persons in the dedicated operating structures and using cost accounting standards;

2202

b] *network utilization costs* include the cost to use the regulated transport services [usually direct connections] and the cost for the use of the transport of products/services offered in a competitive environment; they are therefore valued, respectively, using the rates by law and the rates applied to all third-party customers, the same as that which occurs in the cost structure of the other carriers in the sector;

c] *other direct costs* [advertising, marketing, service connection, operations and maintenance, etc.] and indirect costs [corporate structure costs supporting the operating lines] are valued using cost accounting standards and applying specific allocation methods.

▸▸ *Depreciation* of fixed assets directly employed in providing the services in question are determined on the basis of the estimated useful lives of the assets of Telecom Italia. Goodwill is amortized on the straight-line method over five years.

▸▸ *Other provisions* refer to provisions to the allowance for doubtful receivables made during the year.

▸▸ *Other income and expense, net*, includes the losses on receivables.

The economic results of interactive services are reported as follows:

[millions of lire]	TIN	Interbusiness
	1999	1999
Revenues	132,926	202,113
Costs	[327,440]	[181,048]
Of which:		
Labor cost	[21,898]	[11,980]
Network utilization costs	[143,564]	[82,642]
Other costs	[161,978]	[86,425]
Gross operating profit	[194,514]	21,065
Depreciation and amortization	[26,046]	[16,839]
Other provisions	[22,147]	-
Other income and expense, net	[17,050]	-
Operating income	[259,757]	4,227

In 1999, **TIN** recorded strong commercial growth. The final number of subscribers is 1,990,000, an increase of 409% compared to 1998.

Despite the marked increase in revenues, the operating income was again negative. A contributory factor was the change in various items of cost deriving from the growth in operations. In particular, the increase in "network utilization costs" is due to the expenses for Intelligent charges and for the international bandwidth; the change in "other costs" is mainly due to the increase in advertising expenditure, while the higher depreciation is the result of the greater amount of assets used for the services. The "other provisions" include the provision to the allowance for doubtful receivables, calculated on the basis of the characteristics of specific clientele, in relation to which action has already been taken to the reduce any uncollectible amounts.

The operational performance of TIN can therefore be particularly appreciated, since it was achieved in a scenario characterized by fierce competitiveness. In fact, during the year, TIN has carried out a huge campaign of communication which has helped to make

2203

potential Internet customers more sensitive, thus stimulating the growth of the Italian Internet market as a whole.
The growing quality offering, in the exploitation of services, has also sustained the increase in brand awareness, laying the foundations for a gradual extension of the offering to other types of service apart from access [namely portals and Web services to small and medium-size companies]. A strong extension of the access network, which now allows 100% of the population to be connected by making a local call, has increased the market potential.

1999 marks a very important year for **Interbusiness**, since, for the first time, the operating result shows an income figure of Lire 4 billion [an operating loss of Lire 14 billion in 1998], net of overheads.
This result has been achieved thanks to the marketing of its offering, which has produced an increase in revenues [+62%] compared to 1998 over and above the total costs [+43%]. While network costs show a rather reasonable increase [+25%], there was a considerable rise in "other costs" [+71%] due to higher international connection costs on the SEA-BONE access. Personnel costs, instead, are more or less in line with 1998.
Depreciation and amortization increased by 32% due to the development of the equipment platform dedicated to the service.
In view of the low risk of uncollectible receivables, also in 1999, no provisions were made to the specific allowance account.

2204

[8.4] EQUITY INVESTMENTS HELD BY DIRECTORS, STATUTORY AUDITORS AND GENERAL MANAGERS

Pursuant to the rules issued by Consob under Resolution No. 11971 on May 14, 1999 for the introduction of Legislative Decree No. 58/1998, the following table presents the equity interests held by the directors, statutory auditors and general managers in the Company and its subsidiaries.

Name		Company	Number of share held at end of prior year	Number of share purchased	Number of share sold	Number of share held at te end of 1999
Board of directors						
Roberto COLANINNO	[1]	Telecom Italia	=	142,000	119,000	23,000
		TIM	25,000	=	25,000	=

9. Glossary

Access Charge
Charge paid by an operator owning a public TLC network for the use of another public TLC network.

ADSL
Asymmetric Digital Subscriber Loop. Technology that enables the transmission of broad bandwidth signals [2-8 Mbit/s] over the normal telephone's twisted pairwire.

ATM
Asynchronous Transfer Mode. Technique for the transfer of information for the integrated supply of data, voice and image services, based on a dynamic allocation of the transmission and switching resources.

Authority
Board entrusted with regulatory functions, legally distinct and functionally independent of the TLC organizations.

Back-bone
The ridge of the network.

Band
Range of frequencies that can be transmitted by a channel. Term also used to indicate the range of frequencies occupied by a transmission.

BRA
Basic Rate Access. Basic access to the 144 Kbit/s ISDN network, composed of two telephone channels and one data access.

Call center
A company's customer service system to which calls are made by customers for commercial, technical and administrative request, and from which calls are made for telemarketing, market research activities, etc.

Call set up
The "call set up" model involves the application of a fixed initial charge to a communication regardless of its duration, plus a charge per second calculated on the actual communication time "t" .

Channel
Part of a communication system that links a source to one or more destinations. Also called circuit, line, link or path. The term "channel rate" is used to indicate the maximum transmission rate that can be used on a given channel.

Contribution for TLC activities
Annual charge that TLC service providers are obliged to pay to the concession-issuing board, corresponding to an amount established by current law and calculated on all the gross income from the services under concession.

Carrier
Company that provides physical connections.

Carrier selection
Service that enables the customer to choose a *long distance* operator other than the pre-established service provider.

2206

DECT
Digital European Cordless Telecommunications. Standard for cordless and wireless communications for voice and data transmission, for applications in the private and public sectors.

Dial-up
Direct link to Internet using modems or normal telephone and ISDN lines made possible by applications developed on the two protocols, SLIP [Serial line Internet protocol] and PPP [point-to-point protocol].

Easy access carrier selection
Method for selecting the long distance operator each time a call is made by means of a specific code that is input before the national or international telephone number.

E-mail
Electronic mail.

Equal access carrier selection [or carrier pre-selection]
Method for permanently selecting a different long distance operator from the one selected by the access operator, by means of a pre-selection process.

Flexible network
Network architecture for direct numerical circuits that, through advanced routing reconfiguration functions, enables excellent levels of reliability and optimization in the allocation of the plant engineering resources.

Frame Relay
International standard for data transfer services that ensures excellent performance in terms of transmission rate and low transit times.

Gateway
System providing an interface between the network and the services offered at national level with the rest of the world.

GSM
Global System for Mobile communications. Digital system for mobile radio connections developed at European level and operating on the 900 MHz. bandwidth.

HDSL
High bit-rate Digital Subscriber Line, is a system that augments the capacity of copper networks to provide connections at 2 Mbit/s, thus making it possible to reduce the time required to supply the service, thanks to being able to avoid resorting to signal re-generation equipment in the section between the exchange and the user.

Infomobility
A set of systems and services made available to private and business customers in the world of vehicle traffic to meet their safety and information needs.

Intelligent costing
Intelligent network services that enable customers to share the cost of the traffic in pre-arranged proportions between the caller and the called party [e.g. Toll-free and shared charges].

Intelligent network
Network architecture integrated with the telephone network which, thanks to interaction with centralized databases, enables advanced services to be implemented and made available.

Internet
The most famous data network in the world. Initially used by the American government as a network for the Ministry of Defense, Internet has developed as an interconnected set of networks based on different construction technologies [LAN, WAN, data networks, voice networks] and managed by different bodies, but all using the IP protocol.

2207

IP [Internet Protocol]
This is the data transfer method [or protocol] used in Internet.

ISDN
Integrated Services Digital Network. A numerical integrated services network that enables multimedial communications [voice, data, animated text and images], accessible at a rate of 128 Kbit/s [2 channels at 64 Kbit/s - standard access] and 2 Mbit/s [primary access]. The particular feature of the ISDN service is that it provides numerical user-to-user connectivity. The ISDN network incorporates functions that enable high-capacity and broadband multiple service accesses, evolving towards an integrated numerical network also in the broadband services.

Number portability
The opportunity to use one's own telephone number regardless of the operator chosen or the place of residence.

Open Network Provision [ONP]
Conditions for accessing and using the public providers' network and TLC services open to all users with the same technical and usage methods.

Portal
An Internet interface with the Web that has the aim of putting the company in touch with the outside world and being able to transmit its identity and role. It is created in such a way as to allow simple, rational access to the information, providing an overall view of the company.

POTS
Plain Ordinary Telephone Services. Telephone network made up of all the existing connections [operating, on stand-by and in service].

PRA
Primary Rate Access. Primary access to the 2 Mbit/s ISDN network, composed of 30 equivalent channels.

Price cap
System that regulates the charges applied by the dominant provider, imposing a maximum limit on the average global variation in the price of a set of services over a period of several years, but enabling the provider to define the price of each of these services.

Reseller
Traffic retailers who succeed, by exploiting the differences between the charges in different countries and the traffic volume-based discounts offered by the conventional providers, in offering their customers telephone services at competitive rates.

Roaming
Service that enables a GSM mobile radio user to automatically access a network other than his own.

SDH
Synchronous Digital Hierarchy. New hierarchy for the transmissive multiplexing of numerical signals.

SOCRATE
Sviluppo Ottico Coassiale Rete Accesso Telecom Italia. Network platform dedicated to the development of multimedial services [and CATV, in particular].

TACS
Total Access Communication System. Mobile radio network that makes connections with a standard analog technique.

2208

UMTS
Universal Mobile Telecommunications System. Broadband transmission service that will become the universal mobile radio standard for high-speed communications. With UMTS [the so-called "third-generation mobile radio"] the cell phone will become a multimedial terminal capable of receiving voice, data and animated images.

Wholesale
Intended for the new TLC operators ["intermediate" customers], this consists in a specific agreement for the supply of basic services that these intermediate customers do not provide on their own [a typical example is the carriage of international traffic].

Notes to consolidated financial statements

The consolidated financial statements at December 31, 1999 have been prepared in accordance with the provisions of the Italian Civil Code.
Following certain changes to some items of the financial statements, the financial statements at December 31, 1998 have been reclassified, for purposes of a meaningful comparison. The consolidated statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these notes to consolidated financial statements pursuant to Article 29, Section 3 of Legislative Decree No. 127/1991.
The consolidated financial statements are also accompanied by the Report on the Group's operations together with the Report on the Parent Company.
The disclosure relating to the introduction of the euro and the Year 2000 conforms to Consob Communications No. 98083971 of October 26, 1998 and No. 98079574 of October 9, 1998 and are presented in specific paragraphs of these Notes and the Report on operations.
The scope and principles of consolidation, summary of significant accounting policies, along with the composition and changes in the individual items of the consolidated financial statements are set out below.
Unless otherwise specified, all figures are stated in billions of Italian lire.

SCOPE OF CONSOLIDATION

The scope of the consolidation at December 31, 1999 includes the Italian and foreign companies listed in Annex 5, in which the Parent Company Telecom Italia holds a majority of voting rights, and all other companies over which it exerts a dominant influence. The proportional method of consolidation, pursuant to Article 37 of Legislative Decree 127/1991, is used to consolidate the affiliated company Viasat [through Telespazio] and its subsidiary Viasat Assistance, as reported in Annex 6.
The reorganization of Italtel Group was concluded during the year.
Specifically, on October 30, 1999 Italtel contributed a business segment and certain holdings in the subsidiary Siemens Information and Communication Networks S.p.A., later sold to Siemens A.G.. Telecom Italia then purchased 50% of Telsi Ltd, the controlling holding company of Italtel, of which it already held a 50% stake, from Siemens A.G.. Accordingly, after this deal, the statement of income of Italtel Group was consolidated proportionally at 50% for the first ten months of the year, whereas the statement of income of the new Group arising from the reorganization was fully consolidated for the remaining two months of 1999.

The following changes have taken place in the scope of consolidation since December 31, 1998:
a] added to the scope of consolidation: Datacom, Gruppo Tele Celular Sul Participacoes,

2217

The consolidated financial statements at December 31, 1999 have been prepared in accordance with the provisions of the Italian Civil Code.
Following certain changes to some items of the financial statements, the financial statements at December 31, 1998 have been reclassified, for purposes of a meaningful comparison. The consolidated statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these notes to consolidated financial statements pursuant to Article 29, Section 3 of Legislative Decree No. 127/1991.
The consolidated financial statements are also accompanied by the Report on the Group's operations together with the Report on the Parent Company.
The disclosure relating to the introduction of the euro and the Year 2000 conforms to Consob Communications No. 98083971 of October 26, 1998 and No. 98079574 of October 9, 1998 and are presented in specific paragraphs of these Notes and the Report on operations.
The scope and principles of consolidation, summary of significant accounting policies, along with the composition and changes in the individual items of the consolidated financial statements are set out below.
Unless otherwise specified, all figures are stated in billions of Italian lire.

SCOPE OF CONSOLIDATION

The scope of the consolidation at December 31, 1999 includes the Italian and foreign companies listed in Annex 5, in which the Parent Company Telecom Italia holds a majority of voting rights, and all other companies over which it exerts a dominant influence. The proportional method of consolidation, pursuant to Article 37 of Legislative Decree 127/1991, is used to consolidate the affiliated company Viasat [through Telespazio] and its subsidiary Viasat Assistance, as reported in Annex 6.
The reorganization of Italtel Group was concluded during the year.
Specifically, on October 30, 1999 Italtel contributed a business segment and certain holdings in the subsidiary Siemens Information and Communication Networks S.p.A., later sold to Siemens A.G.. Telecom Italia then purchased 50% of Telsi Ltd, the controlling holding company of Italtel, of which it already held a 50% stake, from Siemens A.G.. Accordingly, after this deal, the statement of income of Italtel Group was consolidated proportionally at 50% for the first ten months of the year, whereas the statement of income of the new Group arising from the reorganization was fully consolidated for the remaining two months of 1999.

The following changes have taken place in the scope of consolidation since December 31, 1998:

a] added to the scope of consolidation: Datacom, Gruppo Tele Celular Sul Participacoes, Gruppo Tele Nordeste Celular Participacoes, Metis, Ditel Engineering, Tecosoft Espana, Finsiel do Brasil, Path.Net, Optical Technologies Center, Teleinvest Participacoes, Telepolis, Telespazio Luxembourg and Telespazio Ireland.

b] eliminated from the scope of consolidation: Setelco, Réseau and Stream.

Annexes 7 and 8 list those subsidiaries that were excluded from consolidation for the following reasons: their inclusion would not have had a material effect on a true and fair representation of the consolidated financial statements and/or because they were not operational or in liquidation and/or are involved in business areas markedly different to those of the other companies in the Group.

2218

At December 31, 1999, Telecom Italia's subsidiaries and affiliates listed in Annexes 5 to 8, were categorized as follows:

	Subsidiaries			Affiliates			Total
	Italy	Abroad	Total	Italy	Abroad	Total	
Companies:							
Consolidated on the line-by-line method	53	74	127	=	=	=	127
Consolidated on the proportional method	=	=	=	2	=	2	2
Valued by the equity method	6	4	10	36	36	72	82
Valued at cost	30	8	38	37	8	45	83
Total companies	89	86	175	75	44	119	294

The investments in companies valued at cost mainly refer to consortia, of which 20 are subsidiaries and 35 are affiliates.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

PRINCIPLES OF CONSOLIDATION

The data for consolidation purposes have been taken from the financial statements at December 31, 1999 of each consolidated company, approved by the respective boards, and adjusted where necessary to conform to the accounting principles adopted by the Parent Company Telecom Italia.

The financial statements expressed in foreign currency have been translated into Italian lire by applying the average exchange rate for the year to the individual items of the statement of income and the year-end exchange rate to the balance sheet items. The difference arising from the translation of beginning stockholders' equity and the net income for the year at the year-end exchange rate is recorded in the reserves in consolidated stockholders' equity.

The exchange rates used are listed in the "other information" section of the notes.

All subsidiaries included in the scope of consolidation have been consolidated using the line-by-line method, which can be summarized as follows:

a. assumption of the total amount of assets, liabilities, revenues and expenses, regardless of the interest held, separately showing the minority interest in stockholders' equity and net income;

b. the difference arising from the elimination of the carrying value of an investment in a company included in the scope of consolidation against the underlying share of the stockholders' equity at the date of acquisition is allocated, where possible, to the assets and liabilities of the company. Any residual amount is treated as follows:
   - if positive, it is recorded in "consolidation difference" under "intangible assets" and is amortized on the straight-line method over the estimated time required to recover the amount;
   - if negative, it is recorded in stockholders' equity as "consolidation reserve", or, when the amount is due to expectations of unfavorable financial results, to "consolidation reserve for future risks and charges";

c. elimination of receivables and payables, as well as expenses and revenues among consolidated companies;

d. elimination of profit included in fixed assets and intangible assets which stem from intraGroup purchases of goods and services at market prices. The portion of intraGroup revenues referring to the above goods and services has been reclassified, net of intraGroup profit, to the item "increase in capitalized internal construction costs".

The following have been eliminated:
1. capital gains on the transfer of fixed assets among consolidated companies;
2. income, if significant, on transactions among consolidated companies involving the sale of goods remaining in inventory which have not been realized with third parties;
3. writedowns and reinstatements of value for long-term investments in consolidated companies, as well as intraGroup dividends.

Provisions and value adjustments made by individual consolidated companies exclusively for the purpose of securing tax benefits allowed by law, such as accelerated depreciation and transfers to the reserves for operating grants, have also been eliminated from the consolidated financial statements.

Accounting principles

The accounting principles adopted in preparing the consolidated financial statements at December 31, 1999 conform to the law and have been applied on a basis consistent with the prior year, with the exception of the recording of revenues for telecommunications services, the translation of foreign currency balances as well as the valuation of contract work in process for long-term contracts.
The accounting principles are set out below:

Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit.
When full recovery of the investments is not expected, appropriate writedowns are made.

Fixed assets

Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include inflation adjustments made on the basis of the laws.
For assets whose value is permanently below the historical cost, net of their accumulated depreciation, the appropriate writedowns are made. Such lower value will be reversed in subsequent years if the underlying assumptions are no longer correct.
Construction in progress is stated at the amount of direct costs incurred.

Equity investments

Investments considered long-term in nature are recorded in long-term investments or, if acquired for subsequent sale, recorded in short-term financial assets.
Long-term investments in unconsolidated companies are valued by the equity method; positive differences arising upon acquisition, between the carrying value of the

2220

investments in said companies and the underlying share of net equity at current values, are included in the value of the investments and amortized on the straight-line method over their expected period of recoverability. Such amortization is charged to the statement of income among "value adjustments on financial assets" in "writedowns of investments".
Other long-term investments in unconsolidated subsidiaries are recorded at acquisition or subscription cost, adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.
For long-term investments in companies operating at a loss, the value of the investments is written down to an amount equal to the corresponding share of the underlying net equity, if lower, as shown by the latest financial statements of the respective companies. Losses exceeding the corresponding carrying values are recorded among *reserves for risks and charges*.
Investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost and realizable value, based on the year-end stock market prices.
Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.

Other securities other than investments in subsidiaries and affiliated companies

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.
Securities held as long-term investments are valued at cost, adjusted for the portion of the difference between the cost and the redemption value that accrued during the fiscal year.
Securities included in current assets are valued at the lower of cost, adjusted for the portion of issue differences and realizable value, based on the year-end market prices.
Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.
Securities bought under repurchase agreements are included at purchase cost in receivables under current assets. The difference between the sales price and the purchase price is allocated to income as it accrues with a contra-entry to accrued income/expense in the balance sheet.

Inventories

Inventories are valued at the lower of purchase or production cost and market.
The methods mainly used in computing cost are the following:
- raw materials and finished goods: LIFO with annual adjustments;
- merchandise: weighted average;
- work in progress and semifinished goods: production cost;
- contract work in process:
  - orders covering less than 12 months: industrial cost;
  - orders covering more than one year: at estimated revenues using the percentage of completion method. Up to December 31, 1998 such inventories were valued at manufacturing cost using the completed contract method. Had the new principle been adopted in the previous year, there would have been no significant effect on the consolidated financial statements.

In determining the value of contract work in process, anticipated losses upon completion and other risks incurred are also taken into account.

2221

Inventories of raw materials, finished goods and merchandise which exceed foreseeable manufacturing requirements or have become obsolete are written down their estimated realizable value.

Accounts receivable and liabilities

Receivables are stated at the estimated realizable value and classified under long-term investments or current assets.
Liabilities are shown at their nominal value.
Up to December 31, 1998, accounts receivable and liabilities expressed in foreign currencies were recorded at the exchange rate at the time they were booked; to deal with the risk of losses deriving from exchange rate fluctuations, the negative difference between the balance of accounts receivable and liabilities translated at year-end exchange rates and their balance at the original exchange rates was charged to the statement of income with a counterpart entry to the reserve for foreign exchange fluctuations under the item *other reserves for risks and charges*.
Starting from 1999, the same accounts receivable and liabilities are recorded, based on the concept of prudence, at the year-end exchange rates as set forth by the recently issued national accounting principle No. 26 as well as International Accounting Standard [IAS] No. 21; the positive and negative differences between the balance of accounts receivable and liabilities converted at year-end exchange rates and their balance at the original exchange rates are recorded in the statement of income among *financial income* and *financial expense*. The change in accounting principle had no significant effect on the consolidated financial statements.
Had the new translation principle been adopted in the previous year there, however, would have been no significant impact.
The receivables by TIM, a consolidated subsidiary, from almost all of its dealers are assigned to factoring companies [the assignment is understood to be without recourse within set limits]. At the maturity of the individual assigned receivables, the factoring company pays TIM the nominal value, net of the amounts due to the dealers for services rendered. TIM provided no guarantees for this transaction.

Accruals and deferrals

These items are recorded on the accrual basis.

2222

Reserves for risks and charges

"For taxes": this reserve includes prudent provisions for estimated tax (including any surtaxes and late payment interests) on positions not yet agreed or in dispute.

"For deferred taxes": this reserve includes deferred taxes calculated on the timing differences of the individual consolidated companies between the value attributed to assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes.
Deferred tax assets are recorded among "*miscellaneous receivables*" in current assets.
Starting from 1999, deferred tax assets and deferred tax liabilities are set off, whenever the assumptions for doing so exist.
Deferred taxes on reserves on which taxation has been suspended, regarding consolidated companies or companies valued by the equity method, are recorded when such reserves are expected to be distributed or otherwise used and their distribution or utilization will give rise to tax charges.
The tax benefit of tax loss carryforwards is recorded whenever there is reasonable expectation of realization.

"Others" relate primarily to provisions to cover charges of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data. In detail, they consist of:

- the reserve for litigation, determined by taking into account, according to prudent criteria, charges in connection with the foreseeable outcome of various disputes;
- the reserve for losses of subsidiaries and affiliates, which includes the losses of such investments in excess of the corresponding carrying values;
- the reserve for contractual risks and other risks, determined by valuing, according to prudent criteria, charges in connection with the settlement of trade and miscellaneous items.

Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws and collective bargaining agreements and includes the liability matured at the end of the year in favor for all personnel employed by the consolidated companies. The item *miscellaneous receivables*, under long-term investments, includes the receivable stemming from the advance payment of tax on the reserve for employee termination indemnities.

Employee benefit obligations under Law No. 58/1992

Employee benefit obligations, as required by Law No. 58/1992, are accounted for on a cash basis, as described in the Notes to financial statements for the Parent Company Telecom Italia. The remaining liability for such obligations, payable in fifteen annual installments on the basis of the statement updated to December 31, 1999 by the National Social Security Institute [INPS] and according to its interpretation, amounts to Lire 3,887 billion, divided as follows:

a] Lire 1,955 billion for the principal amount [except for the portion attributable to former Iritel employees];

b] Lire 1,143 billion in accrued interest;
c] Lire 789 billion in pre-amortization interest [including accrued interest].
The consolidated financial statements also include Lire 1,477 billion due to INPS, relating to the estimate for the employees of the former State Company for Telephone Services [ASST] made by the special Ministerial Commission established under Law No. 58/1992, upon the contribution of the assets of the Post and Telecommunications Administration to Iritel.
The employee benefit obligations to guarantee uniform insurance status recorded in the consolidated statement of income for the year 1999 [under extraordinary expense] amount to Lire 364 billion inclusive of accrued and pre-amortization interest.

Grants

Operating grants [directly credited to the statement of income] and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures. Specifically, capital grants are recorded in deferred income and recognized in future years in the statement of income in relation to the amount of depreciation taken on the underlying assets to which the grants refer.

Revenues and expenses

Revenues and expenses are recorded on an accrual basis and recognized in the consolidated statement of income as follows:
a. *telecommunications services*: in the year in which the services are rendered; in particular, starting from 1999, traffic revenues are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost;
b. *information technology and innovative network services, other activities*: to the extent to which the connected services were rendered during the fiscal year;
c. *manufacturing and installation activities*: upon delivery of the goods in case of supply transactions, or upon completion of the work in the case of services, and in accordance with the contractual obligations undertaken.

Leased assets

Capital goods acquired under leasing agreements are shown in the financial statements by a method consistent with current legislation, which requires that leasing payments be recorded as operating costs. This method does not differ substantially from the finance method in that almost all the leasing contracts have been stipulated with Teleleasing, a consolidated company.

Memorandum accounts

"Collateral and guarantees provided" – essentially relating to sureties – are recorded for an amount equal to the guarantee provided.
"Purchase and sales commitments" are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".

2224

"Other memorandum accounts" include certain financial derivatives contracts, described in a specific paragraph, leased assets [remaining lease payments plus the buyout amount] as well as other assets of third parties.

Financial derivatives

Financial derivatives used for hedging purposes are stated on the basis of the assets and liabilities hedged and the corresponding financial flows are recognized in the statement of income over the duration of the contract, with a contra-entry to accruals and deferrals under the assets or liabilities in the balance sheet.
The memorandum accounts include the item "*other*" which comprises the notional values of the financial derivative contracts that do not require any initial or final exchange of capital, and the item "*purchase and sales commitments*" which relates to the commitments for the purchase or sale of foreign currency translated into Italian lire at the contractual exchange rate.
Non-hedging financial derivatives are stated at the lower of the contract value at the stipulation date and the contract market value at year end. If this valuation gives rise to any capital loss, such loss will be recognized in the statement of income; conversely, the capital gains, if any, are unrealized and therefore will not be recorded; however, if the gains are significant, they will be disclosed in a note to the consolidated financial statements.
The premiums received [paid] against the purchase and sale of put and call options on shares listed in portfolio are recorded in "*miscellaneous payables*" *["miscellaneous receivables"]*. If the option is exercised, the premium received [paid] becomes a component of the purchase or sale amount of the underlying instruments. If the option is not exercised, the premium received [paid] is recorded in *financial income and expense* in the statement of income. The purchase or sales commitment for the sale of put and call options is shown among memorandum accounts under "*purchase and sales commitments*".

CONSOLIDATED BALANCE SHEETS

ASSETS

Intangibles, fixed assets and long-term investments

Intangible assets ***Lire 5,299 billion***

[Lire 3,647 billion at December 31, 1998]

Intangible assets increased by Lire 1,652 billion compared to the end of 1998. A breakdown of the composition and the changes in this account are provided below:

[in billions of lire]	12/31/1998	Purchases and capitalization	Amortization	Writedowns	Disposals and other changes	12/31/1999
Start-up and expansion costs	139	53	[37]		[28]	127
Industrial patents and intellectual property rights	1,455	343	[1,404]	[5]	1,118	1,507
Permits, licenses, trademarks and similar rights	289	33	[47]	[2]	23	296
Goodwill	17	2	[4]	=	[7]	8
Consolidation difference	443	1,097	[200]	=	627	1,967
Work in progress and advances to suppliers	657	1,329	=	=	[1,231]	755
Other intangibles	647	200	[221]	=	13	639
Total	3,647	3,057	[1,913]	[7]	515	5,299

- *Start-up and expansion costs* refer primarily to registration fees paid when consolidated companies are established or when their capital is increased.

- *Industrial patents and intellectual property rights* consist mainly of applications software either owned outright or acquired under a license for an unspecified period of time.

- *Permits, licenses, trademarks and similar rights* mainly include the remaining cost of the license acquired by Stet Hellas Telecommunications in order to provide GSM mobile radio telecommunications services in Greece, and the remainder of the costs incurred by the Parent Company for the launch and use of satellites.

- The *consolidation difference* increased by Lire 1,524 billion since the end of 1998, mainly due to the purchase of 50% of Italtel through Telsi Ltd [Lire 411 billion] and the entry in the scope of consolidation of Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes. The latter gave rise to the transfer from *long-term investments* of the residual goodwill on the acquisition of 25.9% of the ordinary shares [Lire 645 billion] in 1998 and the recording, as an addition, of the goodwill paid in 1999 [Lire 667 billion] for the acquisition of the additional stake [25.9%] which led to control over the companies. Furthermore, this item includes the residual value of the difference between the amount paid for Entel Bolivia [Lire 271 billion] and 9Tele§com Reseau [Lire 102 billion] and their underlying stockholders' equity at their acquisition date.

- *Work in progress and advances to suppliers* increased by Lire 98 billion compared to December 31, 1998, including capitalization of costs incurred by the Parent Company for software development projects in progress, net of the transfer of completed projects to assets in operation.

2226

- *Other intangibles* totaling Lire 639 billion [Lire 647 billion at December 31, 1998] include, among others:
  a] Lire 357 billion [Lire 347 billion at December 31, 1998] in leasehold improvements;
  b] Lire 64 billion for the acquisition of the exclusive rights to the "Great Jubilee 2000" event by the Parent Company and TIM.

Fixed assets ***Lire 45,518 billion***

[Lire 45,665 billion at December 31, 1998]

Fixed assets decreased by Lire 147 billion compared to the end of 1998. They are shown net of depreciation and writedowns and have been adjusted to eliminate intraGroup profits generated by purchases of internally produced goods and services. An analysis of fixed assets at December 31, 1999 is provided in the following table:

					12/31/1999	12/31/1998
[in billions of lire]	Cost	Upward adjustments	Writedowns	Accumulated depreciation	Total	Total
Land and buildings	12,811	2,156	[4]	[5,140]	9,823	9,695
Plant and machinery	99,464	1,689	[1,919]	[67,243]	31,991	32,282
Manufacturing and distribution equipment	2,336	6	=	[2,102]	240	270
Other fixed assets	4,538	8	=	[3,449]	1,097	1,128
Construction in progress and advances to suppliers	2,367	=	=	=	2,367	2,290
Total	121,516	3,859	[1,923]	[77,934]	45,518	45,665

Accumulated depreciation covered 64.1% of gross fixed assets, compared to 61.6% at the end of last year.

The changes in fixed assets are shown in the following table:

[in billions of lire]	1999	1998
January 1	45,665	47,615
Changes during the year:		
• Additions	7,503	9,423
• Sales and retirements	[330]	[632]
• Depreciation for the year	[8,425]	[8,882]
• Writedowns	[138]	[1,781]
• Change in the scope of consolidation and other	1,243	[78]
December 31	45,518	45,665

2227

Additions for the year amounted to Lire 7,503 billion [Lire 9,423 billion in 1998], including a total of Lire 1,391 billion in Southern Italy [Lire 2,035 billion in 1998], a decrease of Lire 1,920 billion with respect to 1998. A breakdown by sector is provided below:

[in billions of lire]	1999	1998
Wireline telecommunications Italy	4,574	6,756
Mobile telecommunications Italy	1,582	1,742
Satellite telecommunications Italy	57	83
International telecommunications	944	509
Information technology activities	73	88
Manufacturing activities	46	75
Installation activities	58	23
	7,334	9,276
Other activities and intraGroup eliminations	169	147
Total	7,503	9,423

Long-term investments ***Lire 13,217 billion***

[Lire 13,515 billion at December 31, 1998]

This item, which decreased by Lire 298 billion from December 31, 1998, includes the following:

[in billions of lire]	12/31/1999	12/31/1998	Change
Investments in:			
• unconsolidated subsidiaries	235	137	98
• affiliated companies	11,510	11,704	[194]
• other companies	579	656	[77]
	12,324	12,497	[173]
Advances on future increase in capital contributions to investments	2	2	=
	12,326	12,499	[173]
Loans to:			
• affiliated companies	258	111	147
• other borrowers	628	750	[122]
	886	861	25
Other securities	5	155	[150]
Total	13,217	13,515	[298]

Investments in affiliated companies, amounting to Lire 11,510 billion, decreased by Lire 194 billion from December 31, 1998 chiefly due to the entry in the scope of consolidation of the Brazilian companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes, partially offset by the investments in Astrolink [Lire 481 billion] and Nortel Inversora [Lire 486 billion].

2228

Investments in affiliated companies refer to the following:

[in billions of lire]	
Telekom Austria	3,867
Mobilkom Austria	1,164
Retevision	850
Etec S.A.	947
Nortel Inversora	961
Solpart Participacoes	794
Entel Chile	466
Astrolink	479
BDT	329
Other	1,653
Total	11,510

Investments valued by the equity method included the unamortized portion [Lire 4,815 billion against Lire 6,267 billion at December 31, 1998] of the excess of book values over the corresponding share of the underlying stockholders' equity at the time of purchase. The excess refers to Telekom Austria [Lire 2,314 billion], Mobilkom Austria [Lire 644 billion], Retevision [Lire 499 billion], Bouygues Decaux Telecom [Lire 281 billion], Netco Redes [Lire 237 billion], Etec S.A. [Lire 227 billion], Entel Chile [Lire 130 billion], Telekom Srbija [Lire 63 billion] and other minor investments.

A list of the companies valued by the equity method is provided in Annex 7; investments in unconsolidated subsidiaries and affiliates are listed in Annex 8.

Loans to affiliated companies, amounting to Lire 258 billion, refer to loans made to foreign affiliates, in particular, to BDT [Lire 156 billion], Retevision [Lire 91 billion] and Golden Lines [Lire 11 billion].

Loans to other borrowers, amounting to Lire 628 billion, include loans to other companies, capital contributions to the Tanjin Stet and Jilin Huatai Communications Chinese joint ventures, loans to employees and security deposits. This item also includes the upward adjusted tax credit, deriving from prepayment of the tax on the reserve for employee severance indemnities, totaling Lire 318 billion.

Other securities amounted to Lire 5 billion and decreased Lire 150 billion from December 31, 1998 mainly due to the redemption of securities which matured during the year, by Entel Bolivia.

Inventories ***Lire 1,995 billion***

[Lire 1,859 billion at December 31, 1998]

Inventories include the following:

[in billions of lire]	12/31/1999	12/31/1998	Change
Raw materials and supplies	189	346	[157]
Merchandise	403	301	102
	592	647	[55]
Work in progress and semifinished goods	134	248	[114]
Finished goods	23	69	[46]
	157	317	[160]
Contract work in process	1,217	881	336
Advances to suppliers	29	14	15
	1,246	895	351
Total	1,995	1,859	136

Inventories are held by manufacturing and installation companies for Lire 833 billion [Lire 1,048 billion at December 31, 1998] and companies providing telecommunications services for Lire 835 billion [Lire 600 billion at December 31, 1998]. Starting from 1999, contract work in process for long-term orders are valued at their estimated revenues under the percentage of completion method. Up to December 31, 1998 they were valued at manufacturing cost using the completed contract method.
The increase in contract work in process for long-term orders is due mainly to the acquisition of the new contract in Astrolink by Telespazio.
Raw materials and supplies and *work in progress and semifinished goods* are substantially in line with current costs.

Accounts receivable ***Lire 19,074 billion***

[Lire 18,303 billion at December 31, 1998]

A breakdown of accounts receivable, which increased by Lire 771 billion, is provided below:

[in billions of lire]	12/31/1999	12/31/1998	Change
Trade accounts receivable	16,239	15,569	670
• Allowance for doubtful accounts	[1,297]	[1,263]	[34]
Total trade accounts receivable	14,942	14,306	636
Receivables from unconsolidated subsidiaries	75	352	[277]
Receivables from affiliated companies	953	707	246
Receivables from parent companies	2	=	2
Miscellaneous receivables	3,102	2,938	164
Total	19,074	18,303	771

In particular:
- gross *trade accounts receivable* totaled Lire 16,239 billion and consist, for the most part, of receivables relating to telecommunications services. Receivables have been adjusted to estimated realizable value by writedowns made almost entirely to receivables from

2230

telecommunications services. Accounts receivable also include Lire 1,473 billion of receivables from other telecommunications carriers.

- *Receivables from unconsolidated subsidiaries,* which totaled Lire 75 billion, are mainly related to the Cored consortium.

- *Receivables from affiliated companies* amounted to Lire 953 billion, an increase of Lire 246 billion. They refer to financial receivables for Lire 201 billion, and trade and other receivables for Lire 752 billion. Financial receivables mainly refer to Etec S.A. [Lire 58 billion], Stream [Lire 56 billion] and Telekom Srbija [Lire 37 billion], while trade and other receivables chiefly refer to Seat Pagine Gialle [Lire 121 billion], Stream [Lire 215 billion], and other foreign companies.

- *Miscellaneous receivables* of Lire 3,102 billion [Lire 2,938 billion at December 31, 1998] included the following:
  - financial receivables of Lire 67 billion [Lire 623 billion at December 31, 1998] which show a reduction due to repurchase agreements on fixed rate securities closed out by Sirti;
  - other receivables totaling Lire 3,035 billion [Lire 2,315 billion at December 31, 1998] which refer to the following:

[in billions of lire]	12/31/1999	12/31/1998
Government and other public entities for subsidies and grants	112	125
Customer payments in transit	532	401
Due from the Tax Administration	442	344
Deferred tax assets	940	562
Employees	144	172
Other receivables from the Government, other public entities and items in transit	865	711
Total	3,035	2,315

Net deferred tax assets are made up as follows:

[in billions of lire]	12/31/1999	12/31/1998	Change
Deferred tax assets	940	562	378
Deferred tax liabilities	[292]	[461]	169
Total	648	101	547

The balance at December 31, 1999 increased compared to the end of 1998 due to the increase in deferred tax assets [mainly with respect to the writedown of receivables and the reserve for risks and charges] and the reduction in deferred tax liabilities [relating to accelerated depreciation].
Tax loss carryforwards, which have not been considered in the calculation of deferred taxes because of uncertainty over their recoverability against future taxable profits, amount to some Lire 2,400 billion, of which about Lire 250 billion can be utilized in the next three years and about Lire 1,000 billion has no set date for utilization.

Short-term financial assets ***Lire 2,583 billion***
[Lire 2,566 billion at December 31, 1998]

This item, which increased by Lire 17 billion compared to December 31, 1998, includes the following:

[in billions of lire]	12/31/1999	12/31/1998	Change
Investments in subsidiaries	122	136	[14]
Investments in other companies	11	=	11
Treasury stock	=	5	[5]
Marketable securities	2,450	2,425	25
Total	2,583	2,566	17

Investments refer to the value of listed shares purchased for later sale.
A comparison of the market prices of such shares at year-end and the corresponding carrying value shows an unrealized gain of Lire 46 billion.
Marketable securities, which consist almost entirely of government securities and bonds, increased by Lire 25 billion compared to December 31, 1998. The carrying value approximates market price.

Liquid assets ***Lire 1,312 billion***
[Lire 1,133 billion at December 31, 1998].

Liquid assets increased by Lire 179 billion. They consist mainly of funds on deposit in Italian and foreign banks on current accounts.

Accrued income and prepaid expenses ***Lire 180 billion***
[Lire 187 billion at December 31, 1998]

This item, which decreased by Lire 7 billion, can be analyzed as follows:

[in billions of lire]	12/31/1999	12/31/1998	Change
Discounts and similar charges on borrowings	3	5	[2]
Accrued income			
• production value	30	27	3
• financial income	24	36	[12]
• others	40	5	35
	94	68	26
Prepaid expenses			
• production costs	63	65	[2]
• financial expenses	16	14	2
• others	4	35	[31]
	83	114	[31]
Other accrual income and prepaid expenses	177	182	[5]
Total	180	187	[7]

An analysis of accounts receivable and accrued income by maturity and type is provided in Annex 1.

2232

LIABILITIES AND STOCKHOLDERS' EQUITY

Stockholders' equity ***Lire 38,314 billion***

[Lire 35,685 billion at December 31, 1998]

A breakdown of stockholders' equity is presented below:

[in billions of lire]	12/31/1999	12/31/1998	Change
Parent company interest, Telecom Italia	33,004	31,651	1,353
Minority interest	5,310	4,034	1,276
Total	38,314	35,685	2,629

Stockholders' equity of the Parent Company and minority interest increased by Lire 2,629 billion compared to December 31, 1998. In particular:

- the share capital of the Parent Company Telecom Italia consists of 5,260,037,131 ordinary shares and 2,166,120,095 savings shares, both with a par value of Lire 1,000 each. The increase in stockholders' equity is due to the subscription of 4,905,500 ordinary shares of par value Lire 1,000 each by the Group's managers under the Stock Option Plan approved by resolution of the Extraordinary Stockholders' Meeting held on December 15, 1998.
- Telecom Italia's interest in *reserves and retained earnings* includes the Parent Company's retained earnings and own reserves, as well as the consolidated companies' retained earnings and inflation adjustment reserves and tax-deferred reserves. No deferred taxes have been provided on the latter reserves since, based on current plans, no transactions are expected to be entered into which would warrant taxation.

The reconciliation of Telecom Italia's financial statements with the consolidated financial statements as regards stockholders' equity and net income for the year, and the changes in the components of consolidated stockholders' equity, are provided in Annexes 3 and 4.

Reserves for risks and charges ***Lire 2,006 billion***

[Lire 2,035 billion at December 31, 1998]

These reserves decreased by Lire 29 billion from December 31, 1998 and refer to the following:

- the *reserve for taxes*, amounting to Lire 309 billion, [-Lire 22 billion compared to December 31, 1998], mainly consists of estimated tax liabilities on positions still to be agreed or in dispute;

- the *reserve for deferred income taxes*, amounting to Lire 292 billion [-Lire 169 billion compared to December 31, 1998], includes deferred taxes provided by the individual consolidated companies on the income components subject to deferred taxation and also provided on consolidation adjustments;

- *other reserves*, amounting to Lire 1,405 billion, increased by Lire 175 billion compared to December 31, 1998 and include the reserve for litigation [Lire 289 billion], the reserve for restructuring charges [Lire 284 billion] and other reserves [Lire 832 billion], of which Lire 396 billion refers to contractual and other risks of the Parent Company.

2233

Reserve for employee termination indemnities ***Lire 2,896 billion***

[Lire 2,711 billion at December 31, 1998]

A breakdown of the changes which occurred during the year is provided below:

[in billions of lire]	
Balance at 12/31/1998	**2,711**
• provisions charged to income	487
• utilizations for:	
• indemnities paid to employees	[233]
• advances	[41]
• other changes	[28]
Balance at 12/31/1999	**2,896**

Liabilities ***Lire 44,242 billion***

[Lire 44,832 billion at December 31, 1998]

A breakdown of liabilities, which decreased by Lire 590 billion from December 31, 1998, is as follows:

	12/31/1999		12/31/1998	
[in billions of lire]	Loans payable	Trade accounts payable and miscellaneous payables	Loans payable	Trade accounts payable and miscellaneous payables
Debentures	1,906	=	2,481	=
Due to banks	15,780	=	15,230	=
Due to other lenders	1,738	=	2,331	=
Advances	=	733	=	528
Accounts payable to suppliers	123	11,652	5	10,590
Accounts payable to unconsolidated subsidiaries	9	30	6	247
Accounts payable to affiliated companies	11	1,145	100	1,396
Accounts payable to parent companies	=	5	=	=
Taxes payable	=	2,295	=	2,974
Contributions to pensions and social security institutions	=	1,855	=	1,980
Other liabilities	57	6,903	27	6,937
Total	19,624	24,618	20,180	24,652

In particular:

- *Debentures*, which totaled Lire 1,906 billion and decreased by Lire 575 billion from December 31, 1998, include the following:
  - the 1992/2010 debenture issue of the Parent Company Telecom Italia, which is reserved for subscription by employees in service and retired, for a total amount of Lire 825 billion at December 31, 1999 [Lire 901 billion at December 31, 1998];
  - debenture maturing between 2000 and 2002 issued by Softe through different financial institutions for US $583 million, equivalent to Lire 1,081 billion.
- The amount *due to banks* totaled Lire 15,780 billion, an increase of Lire 550 billion over December 31, 1998. Liabilities were secured by mortgages and liens for a total of Lire 166 billion.

2234

- The amount *due to other lenders* of Lire 1,738 billion decreased by Lire 593 billion compared to December 31, 1998. It refers mainly to long-term financing provided to the Parent Company by Cassa Depositi e Prestiti and IRI.

- *Advances*, which totaled Lire 733 billion, increased by Lire 205 billion compared to December 31, 1998 and include advances received from customers of Lire 220 billion and installment billings of Lire 513 billion.

- *Accounts payable to suppliers* amounted to Lire 11,775 billion and show an increase of Lire 1,180 billion compared to December 31, 1998, mainly in respect of the Parent Company, TIM, Telespazio, Telesoft and the entry of the two Brazilian mobile telephone companies in consolidation. Accounts payable to other telecommunications carriers stood at Lire 1,238 billion.

- *Accounts payable to affiliated companies* of Lire 1,156 billion decreased by Lire 340 billion compared to the end of 1998. They include loans payable of Lire 11 billion and trade accounts payable and sundry of Lire 1,145 billion, the latter due mainly for capital contributions to Solpart Participacoes for Lire 360 billion and Astrolink for Lire 322 billion.

- *Taxes payable* amounted to Lire 2,295 billion and decreased by Lire 679 billion compared to December 31, 1998. This was due to the reduction in taxes payable by the Parent Company, the increase in taxes payable by TIM and the entry in the scope of consolidation of the Brazilian mobile telephone companies. The item includes income taxes payable of Lire 1,184 billion and indirect and other taxes and withholding taxes of Lire 1,111 billion.

- *Contributions to pensions and social security institutions* totaled Lire 1,855 billion and decreased by Lire 125 billion compared to December 31, 1998 and include amounts owed to social security and health institutions with regard to personnel.
  This item includes Lire 1,477 billion payable to INPS for the remaining balance of the estimated charges assessed for employees of the former ASST pursuant to Law No. 58/1992.

- *Other liabilities* decreased by Lire 4 billion from December 31, 1998 to Lire 6,960 billion. A breakdown is provided below:

[in billions of lire]	12/31/1999	12/31/1998
Customer-related items	3,394	3,675
Residual amounts due for investments	764	607
Employee-related items	1,060	1,091
Telecommunications operating fee	1,174	1,014
Dividends and other financial items	=	27
Other recurring and miscellaneous items [counter-entries for accrued costs, accrued interest expense at December 31 and payable the following year, sundry payables, etc.]	568	550
Total	6,960	6,964

In particular, customer-related items consist of deposits paid by customers and pre-billed basic charges [attributable mainly to January and February].

2235

Accrued expenses and deferred income ***Lire 1,723 billion***

[Lire 1,617 billion at December 31, 1998]

A breakdown of accrued expenses and deferred income, which increased by Lire 106 billion over December 31, 1998, is as follows:

[in billions of lire]	12/31/1999	12/31/1998	Change
Accrued expenses			
• production costs	45	51	[6]
• interest expense	193	242	[49]
• other charges	2	1	1
	240	294	[54]
Deferred income			
• capital grants [unavailable amount]	920	946	[26]
• production value	510	325	185
• interest income	30	25	5
• other income	23	27	[4]
	1,483	1,323	160
Total	1,723	1,617	106

An analysis of liabilities and accrued expenses by maturity and type is provided in Annex 2.

2236

MEMORANDUM ACCOUNTS

Memorandum accounts totaled Lire 12,060 billion, a decrease of Lire 2,129 billion compared to December 31, 1998. They can be analyzed as follows:

(in billions of lire)	12/31/1999	12/31/1998
Guarantees provided	2,557	2,900
Collateral provided	17	160
Purchase and sale commitments	1,650	5,545
Other	7,836	5,584
Total	12,060	14,189

In particular:

- ***guarantees provided*** of Lire 2,557 billion mainly consist of sureties provided by the Parent Company Telecom Italia on behalf of affiliated companies and others for financial transactions, and guarantees on bids to acquire fixed line and mobile licenses abroad;

- ***collateral provided*** refers to liens and mortgages covering the assets of the companies included in consolidation;

- ***purchase and sale commitments*** outstanding at the end of the year of, respectively, Lire 1,086 billion and Lire 564 billion, refer to the commitments of the individual consolidated companies which do not fall within the normal course of business, including those relating to derivative contracts;

- ***other memorandum accounts*** of Lire 7,836 billion refer mainly to financial derivatives, as discussed below, and third party assets held by the individual consolidated companies. They comprise the equivalent value of Telecom Italia shares purchased by employees of the Parent Company and other Italian consolidated companies through acceptance of the public offer of sale and still deposited at December 31, 1999 with the Parent Company and on sub-deposit with Monte Titoli S.p.A.. These shares have been valued at the December 30, 1999 price of ordinary Telecom Italia shares on the Italian online stock market.

Furthermore:

- the consolidated companies of the Group issued weak letters of patronage totaling Lire 369 billion chiefly on behalf of unconsolidated subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements;
- assets of third parties received free on loan, on deposit for safekeeping or for similar purposes amounted to Lire 4,553 billion and consist mainly of equipment leased to Telecom Italia customers; and own securities deposited with third parties;
- collateral received amounts to Lire 209 billion;
- guarantees received amount to Lire 1,551 billion;
- guarantees provided by others for obligations of the Group companies, which consist primarily of sureties to guarantee the performance of non-financial contractual obligations, totaled Lire 648 billion;

2237

- collateral provided to secure the liabilities recorded in the balance sheet totaled Lire 166 billion and consists mainly of mortgages on buildings owned by the Group companies;
- customer order backlog held by the installation companies amount to Lire 889 billion.

Financial derivatives

Financial derivative contracts undertaken to hedge interest rate risks and outstanding at the end the year refer to medium/long-term debt positions as indicated in the following table:

[in billions of lire]	Notional amount/ Capital exchanged at 12/31/1999	Market value of derivatives at 12/31/1999 [a]	Market value of underlying debt positions at 12/31/1999 [b]	Market value of debt including related derivates at 12/31/1999 [c] = [b-a]
Interest rate swap	2,213	36	2,194	2,158
Zero cost collar	144	..	143	143
Cross currency and interest rate swap	832	63	875	812

To determine the market value of the above financial derivatives, various pricing models are used based on current market standards. In particular, the market value of the interest rate swaps and the cross currency and interest rate swaps reflects the present value of the difference between the fixed rate to be paid/received and the market interest rate for maturities having the same remaining life as the swaps. The market value of the cross currency and interest rate swaps also reflect the difference between the foreign currency/domestic currency exchange rate at the closing of the swap and the same market exchange rate at December 31, 1999. Libor rates are used for short-term derivatives [up to one year] and swap rates are used for medium/long-term derivatives [more than one year].
The market value of the debt is estimated as the present value of future cash flows.

The following table indicates the notional amount and the average interest rate to be paid/received by maturity for interest rate swaps.

	Maturity					Total
	2000	2001	2002	2003	Beyond	
Interest rate swap:						
Fixed pay rate, variable receive rate:						
• notional amount [billions of lire]	[*] 298	217	125	300	1,100	173	2,213
• weighted average pay rate	23.80%	4.39%	3.80%	4.65%	3.92%	4.44%	
• weighted average receive rate	CDI	Libor 3M Euro	Libor 3M Euro	Libor 3M Euro	Libor 3M Euro	Libor 3M Euro	

[*] interest rate hedge on a position in Brazilian real

2238

Zero cost collars include two contracts with maturity in 2000.
The notional amount of the derivatives described above, shown under "other memorandum accounts", does not measure the credit risk exposure, which, instead, is limited to the amount of interest to be received each time.

The *cross currency* and interest rate swaps, stipulated in 1999 to hedge an European Investment Bank [EIB] loan in pounds sterling, amount to Lire 605 billion and allow variable rates in pounds sterling to be converted into fixed or variable rates in Euro. The cross currency and interest rate swaps stipulated by the Brazilian companies Tele Celular Sul and Tele Nordeste Celular for an equivalent Lire 77 billion convert USD loans into local currency.

The use of financial derivatives to hedge interest rate risks led to savings of Lire 6.8 billion in funding costs on medium/long-term debt transactions. The use of the *interest rate swaps* and *the cross currency and interest rate swaps* to convert loans made by EIB at variable interest rates or in foreign currency to fixed rate loans in Italian lire, led to a 0.12 percentage point cost reduction compared to the speculative assumptions on loans offered by EIB at fixed rates in Italian lire.

Financial derivatives negotiated to hedge the risks on the securities in portfolio at December 31, 1999 include the following *asset swaps* aimed at hedging the risk of a reduction in the yield or in the value of the underlying securities.

[in billions of lire]	Notional amount Capital exchanged at 12/31/1999	Market value of securities including related derivatives at 12/31/1999
Interest rate swap	424	418
Cross currency and interest rate swap	236	235

Interest rate swaps are used to hedge interest rate risks on securities in domestic currency and convert fixed rate yields to variable rate yields.

Cross currency and interest rate swaps are used to hedge interest rate and currency exchange risks on securities denominated in foreign currency: consequently it becomes possible to transform the yield of the security from the foreign currency to the domestic currency and eventually also to convert from a fixed rate to a variable rate or a variable rate to a fixed rate.

Asset swaps are valued by reference to synthetic securities which are composed of the underlying security plus the swap.
The market value of asset swaps changes in relation to the security issuer's credit and eventually the yield of the synthetic security, as compared to the market rates.

Financial derivatives stipulated to hedge exchange risks and outstanding at the end of the year include hedges on trade and financial payables in foreign currency as shown in the following table:

(in billions of lire)	Capital exchanged at 12/31/1999	Market value of derivatives at 12/31/1999	Market value of underlying debt position at 12/31/1999	Market value of debt including related derivatives at 12/31/1999
Forward contracts in foreign currency	235	[1]	[235]	[236]

The forward contracts refer to forward currency purchases.

The market value of these contracts is determined by reference to the difference between the amount of the underlying debt translated at the exchange rate at December 31, 1999 and the amount of the same debt at the forward exchange rate at the same date. The forward exchange rate is obtained by adding the starting spot exchange rate plus the accrual of premium or discount points pertaining to the period between the starting date and December 31, 1999.

On December 17, 1999, 10 interest rate swap contracts were stipulated, with deferred effect starting from the month of June 2000, for a total amount of Lire 487 billion to hedge interest rate exposure on Italian lire loans which replaced the Cassa Depositi e Prestiti loans.
"Other" in the memorandum accounts also include Lire 1,455 billion of interest rate swap contracts to hedge interest on short-term loans.

Derivative contracts are entered into only with the best rated banks and financial institutions in order to minimize the risk of non-performance.

2240

CONSOLIDATED STATEMENTS OF INCOME

Production value ***Lire 55,749 billion***

[Lire 51,475 billion in 1998]

Production value increased by Lire 4,274 billion [+8.3% compared to 1998]. The main components of this item are:

- *sales and service revenues*, which, starting from 1999 are shown gross of the amounts due to other TLC carriers, amounted to Lire 52,481 billion, with an increase of Lire 3,974 billion over 1998 [+8.2%]. The growth in revenues reflects the positive performance by mobile telecommunications services, which also benefited from the entry in the scope of consolidation of the Brazilian companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes, and by the information technology sector, which was partly offset by a reduction in the volumes of the manufacturing and installation sectors. A breakdown by sector is provided below:

			Change	
[in billions of lire]	1999	1998	Amount	%
Wireline telecommunications Italy	35,856	36,292	[436]	[1.2]
Mobile telecommunications Italy	14,425	11,904	2,521	21.2
International telecommunications	636	740	[104]	[14.1]
Satellite telecommunications Italy	3,160	1,443	1,717	°
Information technology activities	3,074	2,566	508	19.8
Manufacturing activities	1,776	1,975	[199]	[10.1]
Installation activities	1,501	2,165	[664]	[30.7]
	60,428	57,085	3,343	[5.9]
Other activities and IntraGroup eliminations	[7,947]	[8,578]	631	7.4
Consolidated Group revenues	52,481	48,507	3,974	8.2

Revenues from telecommunications services are shown net of Lire 4,626 billion due to other carriers [Lire 3,042 billion in 1998].
Revenues from foreign operations totaled Lire 7,542 billion compared to the Lire 4,932 billion in 1998.

- *Increases in capitalized internal construction costs* totaled Lire 2,056 billion [Lire 2,088 billion in 1998], a decrease of Lire 32 billion. A breakdown is provided below:

[in billions of lire]		1999		1998
• IntraGroup revenues from sales of systems		1,989		2,002
• Other capitalized costs:				
• Personnel	32		51	
• Financial expenses	6		12	
• Materials and other costs	29	67	23	86
Total		2,056		2,088

Financial expenses were charged to "construction in progress and advances to suppliers"

in fixed assets.

2242

- *Other revenues and income* of Lire 998 billion [Lire 1,085 billion in 1998] include the following:

[in billions of lire]	1999	1998
• Operating grants	39	38
• Gains on disposal of intangibles and fixed assets	35	36
• Portion of capital grants recorded in income	141	152
• Other income	783	859
Total	998	1,085

In particular:
- operating grants refer chiefly to the amounts bestowed by public institutions to defray the costs incurred for research, development and technological innovation;
- the portion of capital grants recorded in income represents the portion that became available during the year;
- other income from operations mainly includes charges for the late payment of telephone bills to the telecommunications services companies [Lire 252 billion, compared to Lire 253 billion in 1998].

Production cost ***Lire 43,293 billion***
[Lire 42,289 billion in 1998]

Production cost, which increased by Lire 1,004 billion [+2.4%] compared to 1998, include the following:

- *raw materials, supplies and merchandise*, totaling Lire 4,354 billion [Lire 4,426 billion in 1998] and *semifinished and finished goods*, amounting to Lire 441 billion [Lire 109 billion in 1998]. These costs, which represent purchases of raw materials and other goods to be used in operations, increased by Lire 260 billion;

- *services costs*, amounting to Lire 14,289 billion [Lire 11,082 billion in 1998], and *cost for the use of property not owned*, totaling Lire 1,363 billion [Lire 1,285 billion in 1998]. Overall, these two items increased by Lire 3,285 billion in relation to the rise in operating costs, the expansion of mobile telecommunications services, the entry in consolidation of the two mobile Brazilian companies and the consolidation of 9Telecom Reseau for the entire year. The item also includes the non-recurring costs incurred by the Parent Company essentially for the take-over bid, the negotiations with Deutsche Telekom, and revisions to the information systems to ensure *carrier preselection* and *number portability*;

- *personnel costs* of Lire 9,636 billion [Lire 9,665 billion in 1998], including Lire 7,341 billion relating to companies which provide telecommunications services.
  The average cost per capita for the Group was Lire 79 million [Lire 79 million in 1998]. At December 31, 1999, employees of the Group numbered 122,662 [123,966 at December 31, 1998], 67 of whom are employed by companies consolidated using the proportional method [7,580 at December 31, 1998]. A breakdown of personnel by business segment is presented as follows:

	12/31/1999	12/31/1998
Wireline telecommunications Italy	76,150	79,508
Mobile telecommunications Italy	9,375	8,893
Satellite telecommunication	1,354	1,270
International telecommunications	5,627	3,621
Information technology activities	10,206	10,101
Manufacturing activities	5,153	7,551
Installation activities	12,704	10,644
Other activities	2,093	2,378
Total	122,662	123,966

The equivalent average number of salaried employees was 121,327 in 1999 [122,417 in 1998]. 6,508 of this number were employed by companies consolidated using the proportional method: 52 by Viasat and 6,456 by Italtel group based on the part of year in which control was held proportionally. A breakdown by category follows:

	1999 Average equivalent number of salaried employees of companies consolidated		
	on a line-by-line basis	by the proportional method	Total
Executives	2,165	228	2,393
Middle management	9,095	465	9,560
Clerical staff	82,723	3,944	86,667
Technicians	20,836	1,871	22,707
Total	114,819	6,508	121,327

– *amortization, depreciation and writedowns* amounted to Lire 11,182 billion [Lire 13,025 billion in 1998], with a decrease of Lire 1,843 billion. This item refers to the following:

- amortization of intangible assets totaling Lire 1,913 billion, compared to Lire 1,598 billion in 1998. The increase of Lire 315 billion is due to higher amortization charges by the Parent Company and TIM [+Lire 58 billion and +Lire 91 billion, respectively, compared to 1998], mainly for investments in software which went into operation during the year, and the amortization of goodwill on the acquisitions of the Brazilian companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes [a total of Lire 131 billion];
- depreciation of fixed assets totaled Lire 8,425 billion, compared to Lire 8,882 billion in 1998, with a decrease of Lire 457 billion. A breakdown by asset category is provided below:

[in billions of lire]	1999	1998
Industrial and non-industrial buildings	528	535
Plant and machinery	7,165	7,514
Manufacturing and distribution equipment	146	191
Other fixed assets	586	642
Total	8,425	8,882

2244

The depreciation charge shows a decrease with respect to the Parent Company [-Lire 711 billion] due to lower depreciation of DECT and SOCRATE assets which were written down in the 1998 financial statements, a reduction in the amount of depreciable assets, the change in the mix of depreciable assets and the revised depreciation rates for the copper network and the switching and transmission systems. Such decrease was partly reduced by the depreciation charges of the new companies included in the scope of consolidation;

- *other writedowns of fixed assets* came to Lire 142 billion [Lire 1,840 billion in 1998]. The reduction, besides referring to lower provisions made to adjust receivables, is due to the writedown made in 1998 by the Parent Company for the permanent reduction in the installations and software related to the DECT and SOCRATE networks [Lire 1,834 billion].

- *writedowns of receivables included in current assets* amounted to Lire 702 billion [Lire 705 billion in 1998] and represent the provisions made during the year to adjust receivables to their estimated realizable value.

- *provisions for risks* and *other provisions* totaled Lire 195 billion [Lire 362 billion in 1998] and consist of provisions made during the year to reserves for contractual risks and pending disputes.

- *miscellaneous operating costs*, amounting to Lire 1,870 billion [Lire 2,278 billion in 1998], include the following:

[in billions of lire]	1999	1998
• operating fee	1,174	1,029
• losses on disposal of intangibles and fixed assets	241	595
• indirect duties and annual taxes, including the local property tax [ICI]	215	210
• charges for broadband suspension and non-reusable materials for SOCRATE	33	178
• membership dues and other costs	207	266
Total	1,870	2,278

Financial income and expense ***-Lire 633 billion***
[Lire 252 billion in 1998]

Financial income and expense shows a net financial expense referring to the following items:

[in billions of lire]	1999	1998
Income from investments in unconsolidated subsidiaries and affiliated companies	277	936
Other financial income	791	641
Interest and other financial expense	[1,701]	[1,325]
Total	[633]	252

- *income from investments in unconsolidated subsidiaries and affiliated companies* totaled Lire 277 billion [Lire 936 billion in 1998]. This item includes dividends from unconsolidated companies of Lire 115 billion, the gain of Lire 53 billion on the sale by

2245

Sirti of the 50% investment in F.O.S. and the gain realized by Telecom Italia on the sale of TIM shares and venture capital investments.

- *other financial income* of Lire 791 billion [Lire 641 billion in 1998] includes the following:

[in billions of lire]		1999		1998
Interest and capital gains on fixed-income securities		187		192
Interest and fees from:				
• unconsolidated subsidiaries	3		2	
• affiliated companies	32		33	
• banks	104		84	
• customers	24	163	19	138
Foreign exchange gains		270		118
Other financial income		171		193
Total		791		641

Interest and capital gains on fixed-income securities refer to interest on long-term investment securities for Lire 3 billion [Lire 6 billion in 1998] and interest and capital gains on marketable securities for Lire 184 billion [Lire 186 billion in 1998].

- *interest and other financial expense* of Lire 1,701 billion [Lire 1,325 billion in 1998] can be analyzed as follows:

[in billions of lire]		1999		1998
Interest and fees paid to:				
• unconsolidated subsidiaries	1		=	
• affiliated companies	1		4	
• banks	680		763	
• suppliers and other lenders	184	866	183	950
Interest and other charges on debenture issues		96		124
Foreign exchange losses		317		116
Other financial expense		422		135
Total		1,701		1,325

In particular:

- interest and fees paid to other lenders consist mostly of interest on medium/long-term debt of the Parent Company;
- interest and fees paid to banks include Lire 448 billion of interest on medium/long-term borrowings and Lire 232 billion of charges relating to short-term positions. Interest is shown net of the interest expense on loans, equivalent to three percentage points, subsidized by the government under Budget Law 1988 [Law No. 67 of March 11, 1988], in connection with loans that replaced those which should have been made by Cassa Depositi e Prestiti.

2246

Value adjustments on financial assets ***-Lire 1,131 billion***
[-Lire 354 billion in 1998]

They include the following:

[in billions of lire]	1999	1998
Upward adjustments on:		
• investments in unconsolidated subsidiaries and affiliated companies	467	315
	467	315
Writedowns of:		
• investments in unconsolidated subsidiaries and affiliated companies	[1,562]	[660]
• long-term investments other than investments in unconsolidated subsidiaries and affiliated companies, included in current assets	[36]	[5]
• securities, other than investments in unconsolidated subsidiaries and affiliated companies, included in current assets	=	[4]
	[1,598]	[669]
Total	[1,131]	[354]

Value adjustments primarily refer to the Group's share of net income or loss of unconsolidated subsidiaries and affiliated companies accounted for by the equity method, including the amortization of positive differences that arose upon the acquisition of these investments. The change is mainly due to writedowns related to the Iridium project [-Lire 185 billion], Telekom Srbija [-Lire 198 billion] and the Astelit Ucraina project [-Lire 56 billion], as well as the effects [-Lire 345 billion] of the results of the Brazilian affiliated companies Maxitel and Solpart Participacoes. Furthermore, Maxitel's and Solpart Participacoes' results were affected by costs connected to the devaluation of the Brazilian real and the amortization charge made by these companies for the acquisition of the mobile license and the investment in Tele Centro Sul.

Extraordinary income and expense ***-Lire 981 billion***
[Lire 133 billion in 1998]

This item includes the following:
- *income* of Lire 280 billion [Lire 981 billion in 1998], which includes Lire 50 billion of gains on the disposal of fixed assets and business segments referring mainly to the reorganization of Italtel group;
- *expenses* of Lire 1,261 billion [Lire 848 billion in 1998], analyzed as follows:
  - Lire 495 billion [Lire 369 billion in 1998] for charges connected to the reorganization of both the Parent Company and the companies in the manufacturing and installation sectors;
  - Lire 364 billion [Lire 333 billion in 1998] for charges to provide employees with uniform pension status, as required under Law No. 58/1992.
  - Lire 402 billion of prior period items and other extraordinary expenses, including costs of Lire 55 billion incurred by the Parent Company on the sale of the 65% investment in Stream.

STATUTORY AUDITORS' REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS AT DECEMBER 31, 1999 (LEGISLATIVE DECREES NO. 127/91, ART. 41 AND NO. 58/98)

Dear Stockholders,

Legislative Decree No. 58 of February 24, 1998, which includes the provisions covering financial brokerage in the Testo Unico, has completely changed the rules for the monitoring and control of the companies listed on regulated markets.
Monitoring activities have been entrusted to the Board of Statutory Auditors, while the control of the accounting system, financial statements and issuance of opinions on the congruity of extraordinary transactions have been charged to the audit firms registered with Consob.
Pursuant to Legislative Decree No. 127/1991, art. 41, the Board of Statutory Auditors have been delegated the control of the consolidated financial statements and the tests which are performed and the results of such tests must be presented in a report.
The directors' report accompanying the consolidated financial statements at December 31, 1999 of Telecom Italia Group fully and exhaustively explains the events which had an effect on the operations of the Group through the presentation of summaries on the performance of the financial condition and results of operations.

With specific reference to Consob instructions regarding corporate controls, we would like to state the following:

- disclosure regarding "transactions with related parties" presented in the directors' report have been prepared in conformity with Consob instructions No. 97001574 of February 20, 1997 and No. 98015375 of February 27, 1998. In particular, such transactions were carried out in the interests of the Group companies at normal market conditions or in accordance with specific regulatory provisions. To this end, we found no unusual or nonrecurring transactions not in the normal course of business;
- the Group's operations by business segment and geographic area have been presented in accordance with Consob instruction No. 98084143 of October 27, 1998;
- the steps taken to render the information systems compatible with the year 2000 have made it possible to avoid any inconveniences connected with the transition period.

Also in accordance with the previously mentioned Legislative Decree No. 127/1991, art. 41, we have examined the consolidated financial statements of Telecom Italia Group at December 31, 1999 and have ascertained that:

- the determination of the scope of consolidation, the selection of the principles for consolidation of the subsidiaries and affiliated companies and the accounting principles comply with the law;
- the annual financial statements of the companies consolidated on a line-by-line basis and by the proportional method and those of the most significant companies accounted for using the equity method are generally audited. Consequently, all the information that has been transmitted to the Parent Company by the Legal Representatives of the companies for purposes of inclusion in the consolidated financial statements has been audited by the auditors of the individual companies, on the basis of procedures performed in order to certify the individual financial statements;
- the information thus obtained, together with the data taken from the statutory financial statements of the Parent Company, have been correctly used in the consolidation process;
- as required by Legislative Decree No. 127/1991, art. 32, the structure and the content of the consolidated balance sheet and the statement of income are those used for the statutory financial statements, except for adjustments on consolidation;
- the notes contain the information required by Legislative Decree No. 127/1991, art. 38 and 39;
- the organization structure of the company is considered adequate in relation to aspects of competence, the internal control system, the administrative and accounting system and also the instructions issued by Telecom Italia to its subsidiaries.

Based on the foregoing considerations, we state that, through the direct tests performed and information acquired from the audit firm of Arthur Andersen S.p.A., as regards the consolidated financial statements of the Telecom Italia Group, the laws have been respected for the preparation, formation and directors' report of said statements.

The Board of Statutory Auditors — Rome, April 20, 2000

2273

ARTHUR ANDERSEN

**Report of the Independent Auditors
on the consolidated financial statements pursuant to
art. 156 of Legislative Decree no. 58 of February 24, 1998
(Translation from the Original Issued in Italian)**

To the Shareholders of
Telecom Italia S.p.A.:

1. We have audited the consolidated financial statements of Telecom Italia S.p.A. and subsidiaries as of and for the year ended December 31, 1999. These consolidated financial statements are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

2. We conducted our audit in accordance with generally accepted auditing standards in Italy as recommended by the Italian Regulatory Commission for Companies and the Stock Exchange ("CONSOB"). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the adequacy and the fairness of the accounting principles used and the reasonableness of the estimates made by the Directors. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries, the total assets and revenues of which represent 13% and 16% respectively of the consolidated amounts, have been examined by other auditing firms. Our opinion expressed in this report, insofar as it relates to the amounts included for those subsidiaries, is based also upon the audits of the other auditing firms.

   For our opinion on the prior year' s consolidated financial statements, which are presented for comparative purposes as required by law, reference should be made to our auditors' report dated May 12, 1999.

3. In our opinion, the consolidated financial statements of Telecom Italia S.p.A. and subsidiaries as of and for the year ended December 31, 1999 comply with the Italian statutory provisions related to consolidated financial statements; therefore they give a true and fair view of the consolidated financial position and consolidated results of operations of Telecom Italia S.p.A. and its subsidiaries.

4. For a better understanding of the consolidated financial statements, attention is drawn to the information described in the annual report regarding pension costs regulated by Law no. 58/1992 and the fact that, in accordance with the provisions of above law, a substantial portion of the equalization charges for vested pension benefits of personnel which have matured under other pension plans are recorded on a cash basis in annual installments starting from the date of definition of the individual requests by the National Social Security Institute (INPS).

Turin, Italy
April 10, 2000

Arthur Andersen SpA
s/Vincenzo Coppa - Partner

Note: The consolidated financial statements have been translated into English from the original version in Italian. They have been prepared in accordance with the Italian law related to financial statements. Certain accounting practices applied by the Company that conform with generally accepted accounting principles in Italy, may not conform with generally accepted accounting principles in other countries.

Notes to financial statements

The financial statements at December 31, 1999 have been prepared in accordance with the provisions of the Italian Civil Code.
The accounting policies adopted in preparing the financial statements at December 31, 1999, disclosed below, have been applied on a basis consistent with the prior year, with the exception of those later described.
No special situations that would require the use of the waivers allowed under Article 2423, Section 4, of the Italian Civil Code occurred during the year.
Following certain changes to some items of the financial statements, the financial statements at December 31, 1998 have been reclassified, for purposes of meaningful comparison.
As required by Legislative Decree No. 127/1991, the consolidated financial statements have also been prepared and are presented together with the financial statements of Telecom Italia.
The disclosure relating to the introduction of the euro and the Year 2000 issues conforms to Consob Communications No. 98083971 of October 26, 1998 and No. 98079574 of October 9, 1998 and are presented in specific paragraphs of these Notes and the Report on operations.
The statement of cash flows, although it is presented in the Report on Operations, constitutes an integral part of these notes to financial statements pursuant to Article 2423, Section 3 of the Italian Civil Code.
Unless otherwise specified, all figures are stated in millions of Italian lire.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit.
When full recovery of the investments is not expected, the appropriate writedowns are made by applying the method adopted for fixed assets, to which reference should be made.
Detailed amortization policies are presented in the following paragraphs.

"*Start-up and expansion costs*" are amortized in five years, starting from the year the costs were incurred or became due.

"*Industrial and intellectual property rights*" are amortized over their estimated period of benefit on a five-year basis [industrial patents] or on a three-year basis [software], starting from the year of their initial use.

2283

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit.
When full recovery of the investments is not expected, the appropriate writedowns are made by applying the method adopted for fixed assets, to which reference should be made.
Detailed amortization policies are presented in the following paragraphs.

"*Start-up and expansion costs*" are amortized in five years, starting from the year the costs were incurred or became due.

"*Industrial and intellectual property rights*" are amortized over their estimated period of benefit on a five-year basis [industrial patents] or on a three-year basis [software], starting from the year of their initial use.

"*Permits, licenses, trademarks and similar rights*" refer mainly to the rights for the use of satellites and are amortized on the straight-line method on the basis of the useful life of the satellites.

"*Goodwill*" is amortized in five years starting from the year in which the cost was incurred.

The item "*Others*" consists primarily of:
- *leasehold improvements*: the amortization is calculated on the basis of the remaining duration of the lease contracts;
- *rights of transmission:* the rights guarantee the extension of transmission capacity of

2284

the company over a foreign territory and are amortized over the period of the contracts entered with the foreign operators who own the installation to which the rights refer;
- *exclusive rights to the "Great Jubilee 2000" event:* these refer to the charges incurred by Telecom Italia for the acquisition of the exclusive right as the sole telecommunications operator of the Jubilee and are amortized up to the expiration of the right [June 30, 2001].

"*Research, development and advertising costs*" are charged to the statement of income in the year incurred.

Fixed assets

Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include inflation adjustments made on the basis of the special laws regarding assets existing on or before December 31, 1981 [Law No. 74 of February 11, 1952; Law No. 576 of December 2, 1975; Law No. 72 of March 19, 1983], the entries required under Law No. 823 of December 19, 1973, regarding the settlement of tax liabilities, as well as mandatory upward adjustments of all real estate as required by Law No. 413 of December 30, 1991.
For assets whose value is permanently below the historical cost, net of their accumulated depreciation, the appropriate writedowns are made pursuant to Article 2426, Section 1, item 3 of the Italian Civil Code. To determine such writedowns, the provisions of international accounting principle IAS 36 and US accounting principle SFAS 121 are applied. These principles define specific methods based on the expected future profitability of the assets. In particular, an analysis is made of the value of those assets affected by events compromising the possibility of a full recovery of book value. This value is compared with the – non discounted – cash flows expected from use of the assets. If the cash flow is less than the book value, writedowns are determined by adjusting the book value of the assets to their fair value, represented by cash flows, discounted at the rate used for the valuation of the investments. Any writedowns are recorded in the statement of income under the item "amortization, depreciation and writedowns" among "other writedowns of fixed assets and long-term investments".
Construction in progress is stated at the amount of direct costs incurred [materials used for the installations or intended therefor, third-party services, miscellaneous expenses, as well as company labor]. The value of fixed assets does not include maintenance costs incurred for their upkeep to guarantee their expected useful life, their original capacity and productivity, and costs borne to repair malfunctions and failures; such expenses are charged to the statement of income in the year incurred.
The total depreciation charge for the year was determined taking into account the revised estimated useful lives of the main installations constituting the national telecommunications network, being the networks in copper and the exchange installations, as described in the comments to the note on "depreciation of fixed assets".

Total accumulated depreciation for fixed assets was upwardly adjusted where called for by the previously mentioned special laws.

Investments in subsidiaries, affiliated companies and other companies

Investments in subsidiaries, affiliated companies and other companies are included either under long-term investments or short-term financial assets, based on the anticipated holding period.
Long-term investments in "*subsidiaries*", "*affiliated companies*" and "*other companies*" are valued at acquisition or subscription cost – determined according to the continuous LIFO

method – increased by the statutory inflation adjustments, as well as the voluntary one made to several investments during the preparation of the financial statements at December 31, 1981.
The carrying value of investments recorded in long-term investments is adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.
For long-term investments in companies operating at a loss, the value of the investments is written down to an amount equal to the corresponding share of the underlying net equity, if lower, as shown by the latest financial statements of the respective companies. Losses exceeding the corresponding carrying values are recorded among "*reserves for risks and charges*".
Investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost – determined according to the continuous LIFO method – and realizable value, based on the year-end prices on the Italian Online Stock Market.
The costs of investments in foreign companies have been translated into Italian lire at historical exchange rates prevailing at the time of acquisition or subscription.
Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.
With regard to investments in "international organizations for satellite systems", the value shown in the financial statements consists of the equivalent value in Italian lire of the net financial contributions calculated at the exchange rates in effect at the time of each transaction. The holding in such organizations is adjusted each year in relation to the actual use of the satellite systems.

Other securities [other than investments in subsidiaries, affiliated companies and other companies]

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.
Securities held as long-term investments are valued at cost, adjusted for the portion of the difference between the cost and the redemption value that accrued during the year.
Securities included in current assets are valued at the lower of cost of acquisition, adjusted for the portion of issue differences and realizable value, based on the year-end prices on the Italian Online Stock Market.
Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.
The cost of securities, whether included in long-term investments or current assets, is determined by the continuous LIFO method.

Inventories

Inventories – consisting of goods intended for sale, as well as stock on hand of technical materials and replacement parts to be used in the business during the year and for maintenance – are valued at the lower of cost, calculated using the weighted-average method, and realizable value.
The carrying value of goods in stock is reduced, through appropriate writedowns, for obsolete materials.
Inventories include the amount of work on behalf of third parties in progress at the end of the year, valued according to the "costs" already incurred.

2286

Accounts receivable and liabilities

Accounts receivable are stated at estimated realizable value and classified under long-term investments or current assets. They include – as far as telecommunications services are concerned – the amount of services already rendered to customers and other carriers, already billed or still to be billed, as well as the invoices for the sale of telephone and online products.
Liabilities are shown at their nominal value.
Up to December 31, 1998, accounts receivable and liabilities expressed in currencies not belonging to the European Monetary Union were recorded at the exchange rate at the time they were booked; to deal with the risk of losses deriving from exchange rate fluctuations, the negative difference between the balance of accounts receivable and liabilities translated at year-end exchange rates and their balance at the original exchange rates was charged to the statement of income with a counterpart entry to the reserve for foreign exchange fluctuations under the item "*other reserves for risks and charges*".
Starting from 1999, the same accounts receivable and liabilities are recorded, based on the concept of prudence, at the year-end exchange rates as set forth by the recently issued national accounting principle No. 26 as well as International Accounting Standard [IAS] No. 21; the positive and negative differences between the balance of accounts receivable and liabilities converted at year-end exchange rates and their balance at the original exchange rates are recorded in the statement of income among "*financial income*" and "*financial expense*".
Had these new procedures for the translation of foreign currencies been applied in the preceding year they, in any case, would not have had any significant impact on the financial statements for the year.

Accruals and deferrals

These items are recorded on the accrual basis. "*Discounts and similar charges on borrowings*" consist of costs in connection with long-term loans, which are charged to the statement of income over the duration of the loan in proportion to the accrued interest.

Reserves for risks and charges

"*For taxes*": this reserve includes prudent provisions for estimated tax charges [including any surtaxes and late payment interest] on positions not yet agreed or in dispute.

"*For deferred taxes*": this reserve includes deferred tax liabilities - net of deferred tax assets, whenever the assumptions for doing so exist - calculated on the timing differences between the value attributed to assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes.
Whenever the amount of deferred tax assets is higher than deferred tax liabilities, the balance is recorded among "*miscellaneous receivables*" in current assets.
In 1998, deferred tax assets and deferred tax liabilities were recorded separately in the balance sheet.

"*Others*": relate primarily to provisions to cover charges of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data. In detail, they consist of:

- the reserve for litigation, determined by taking into account, according to prudent criteria, charges in connection with the foreseeable outcome of various disputes;
- the reserve for losses of subsidiaries and affiliates, which includes the losses of such investments in excess of the corresponding carrying values;
- the reserve for contractual risks and other risks, determined by valuing, according to prudent criteria, charges in connection with the settlement of trade and miscellaneous items;
- the reserve for capital grants, which will be explained below.

Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws [in particular Law No. 297 of May 29, 1982, which provides for fixed and variable cost-of-living adjustments] and collective bargaining agreements. The reserve is adjusted to the liability matured at the end of the year for personnel in force at that date and is net of advances paid.

The item "*miscellaneous receivables*", under long-term investments, includes the receivable stemming from the advance payment of tax on termination indemnities in accordance with Law No. 662 of December 23, 1996 and its subsequent amendments. This receivable is revalued according to the provisions of the law.

Employee benefit obligations under Law No. 58/1992

With regard to Telecom Italia's obligation required under Law No. 58/1992 to guarantee a uniform insurance status with the Telephone Workers' Social Security Fund [FPT] to all employees in service in the Group's telephone companies [Stet, Sip, Italcable and Telespazio] as of February 20, 1992, as well as those who moved from the Public Administration to Iritel, Article 66, Section 1 of Law No. 427/1993 specifies that the sums due to the Fund should be shown in the financial statements and are tax deductible in the years in which the payments to fulfil this obligation – in fifteen equal annual installments, payable in arrears – are actually made.

At the present time, the amount of the liability, which will be determined by the National Social Security Institute [Istituto Nazionale della Previdenza Sociale - INPS], can be estimated only roughly, due to problems relating to the interpretation and application of the social security legislation and to the lack of certain data which only the social security institutions currently possess. Nevertheless, these financial statements include Lire 1,472 billion of residual payables to INPS, [net of the amount attributed to TIM for the employees transferred to that company], relating to the estimate made for the employees of the former State Company for Telephone Services [ASST] by the special Ministerial Commission established under Law No. 58/1992 upon the transfer of the assets of the Post and Telecommunications Administration to Iritel, and recorded by the latter company in its financial statements at December 31, 1993. As a result, these charges will have no impact on the results of future years, since they were already included in the aforementioned calculation.

A dispute concerning the application and interpretation of this law is pending with INPS regarding, firstly, the effective date for the computation of the accrued interest due under

2288

Law No. 58/1992, in view of the fact that the liability is paid in installments. Telecom Italia believes that interest should accrue from the time when INPS notifies it of the actual amount of the liability, while INPS claims that the computation should be made as of February 20, 1992 or on the date of the transfer to Iritel. The second issue is the exclusion from the effects of Law No. 58/1992 of all employees [except for employees of the former Iritel] who had filed an application to join pursuant to Law No. 29/1979 before February 20, 1992, unless that application had not been processed by INPS. The position of the Company is that the criteria set forth in Law No. 29/1979 – and, therefore, payment of the respective obligations – apply to these employees.

At the present time, the parties have agreed that the differences in interpretation shall be settled through test appeals, with recourse to the Court of Appeals being waived and for a final determination of the correct interpretation of the law in question.

While the proceedings are pending, Telecom Italia has agreed to pay under protest the amounts requested by INPS based on the criteria determined by the latter, subject to subsequent equalization adjustments, if the Courts ultimately accept the Company's interpretation.

Based on the above, a reasonable estimate of the principal amount of the liability attributable to the Company [excluding, as mentioned earlier, the part relating to the former Iritel employees] could vary between Lire 1,800 billion and Lire 2,400 billion [Lire 381 billion of which has already been paid], depending on conflicting interpretations and taking into account all personnel involved. However, these estimates are merely indicative, lacking complete data from INPS. As of December 31, 1999, INPS had submitted formal requests for about 94% of the employees whose change in insurance status will result in a charge for Telecom Italia.

In either case, the impact of the charge should definitely be compatible with the income of future years, since, as allowed under Article 5, Section 3 of Law No. 58/1992, the payments requested by INPS will be made in fifteen equal annual installments payable in arrears [including annual interest of 5%], starting when INPS formally submits its requests.

Under an agreement concluded with INPS with regard to the pre-amortization interest [including the amounts attributable to the former Iritel employees], Telecom Italia has agreed to pay – under protest – the respective amounts in fifteen equal annual installments, including an annual interest of 5%.

The remaining liability for obligations under Law No. 58/1992, to be paid in fifteen annual installments on the basis of the formal requests made by INPS on December 31, 1999 and the interpretation of said requests, amounts to Lire 3,887 billion, divided as follows:

a] Lire 1,955 billion for the principal amount [except for the portion attributable to former Iritel employees];

b] Lire 1,143 billion in accrued interest;

c] Lire 789 billion in pre-amortization interest [including accrued interest].

The charge to income for the year 1999 [under "*extraordinary expense*"] amounts to Lire 364 billion inclusive of accrued interest and pre-amortization interest.

Moreover, during 1999, Telecom Italia paid INPS the above-mentioned charges also on behalf of other Group companies – mainly TIM and CSELT – for those employees transferred and covered by the obligation of a uniform insurance status under Law No. 58/1992 and has arranged for these amounts to be recovered from these companies. The recovery is recorded in the statement of income under "*extraordinary income*" and amounts to Lire 5 billion.

Grants

Operating grants [directly credited to the statement of income] and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures. The treatment of capital grants and grants for installations in the balance sheet is as follows:

a] grants received through December 31, 1992, are included under "*reserves for risks and charges*". The portions equivalent to the depreciation taken on assets financed with the grants in question [the so-called "available" portion] are transferred to a special equity reserve in order to obtain the benefits allowed under the tax law;

b] for grants received from January 1, 1993 to December 31, 1997, 50% of the amount received is recorded in a special reserve of stockholders' equity in order to take advantage of the benefits available under the tax laws, and the remaining 50% is recorded under *deferred income*. These amounts are gradually credited to income in accordance with the pertinent laws;

c] for grants received from January 1, 1998, the amount is recorded under "*deferred income*" and progressively credited to the statement of income in relation to the depreciation taken on the assets to which the grants refer.

Revenues and expenses

Revenues and expenses are recorded on an accrual basis.

In particular, starting from January 1, 1999 traffic revenues relating to telecommunications services are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost.

Fees for new access lines and line transfers are recorded as income when the service is provided.

Dividends from subsidiaries are recorded when they accrue, that is, in the year when the income from which they are paid is earned by the subsidiaries, providing a substantial certainty that they will be paid, and, in any event, when the stockholders' resolution declaring the dividend is passed or when the appropriation of net income is set forth in the preliminary financial statements prepared by the management of the subsidiaries prior to the Board meeting of the parent company that resolves upon the financial statements. Dividends from affiliated companies and other companies, on the other hand, are recognized in the statement of income according to the accrual principle or in the year in which the respective right to the receivable arises, following the stockholders' resolution of those companies. Starting from 1999, tax credits are recorded on the same basis as the dividends to which they refer, whereas in prior years tax credits were only recorded on dividends collected. The adoption of this new accounting principle led to the recording of Lire 887 billion in financial income of tax credits on dividends accrued, compensated, however, by the increase in deferred taxes.

Leased assets

Capital goods acquired under leasing agreements are shown in the financial statements by a method consistent with current legislation, which requires that leasing payments be recorded as operating costs.

2290

Memorandum accounts

"*Guarantees provided*" consist of sureties on behalf of Group companies to secure their borrowings and other obligations. They are shown for an amount equal to the guarantee provided. Those provided in foreign currencies are translated at year-end exchange rates.
"*Purchase and sale commitments*" refer, like "*other memorandum accounts*", also to derivative contracts, which are described in a specific paragraph, and to sales commitments relating to debentures reserved for subscription by the company's personnel. These commitments, which are outside the normal "operating cycle", are determined on the basis of the unperformed portion of contracts outstanding at the end of the year.
"*Other memorandum accounts*" include, in particular:

- leased assets, which are shown in the amount equal to the remaining lease payments due in future years, plus the respective buyout amount;
- the value of the ordinary shares purchased under the Initial Public Offering by employees of the Company and of other consolidated Italian companies of the Telecom Italia Group and, as of December 31, 1999, on deposit with Telecom Italia, which in turn had deposited them with Monte Titoli S.p.A.. These shares were valued on the basis of their official stock market price on December 30, 1999.
- counter-guarantees received by Telecom Italia from third-party companies for guarantees provided for the obligations undertaken by these companies with others.

Financial derivatives

Financial derivative contracts are used by the Company to hedge exposure to interest rate and currency exchange risks.
The use of interest rate derivative contacts has allowed savings in funding costs on medium/long-term loans in Italian lire. The use of the Interest Rate Swaps and the Cross Currency and Interest Rate Swaps to convert loans made by EIB at variable interest rates or in foreign currency to fixed rates in Italian lire, has allowed a reduction in costs compared to the speculate assumptions on loans offered by EIB at fixed rates in Italian lire.
The memorandum accounts include the item "*other*" which comprises the notional values of the financial derivative contracts that do not require any initial or final exchange of capital [interest rate swaps, zero cost collars], and the item "*purchase and sales commitments*" which relates to the commitments for the purchase or sale of foreign currency translated into Italian lire at the exchange rate at the conclusion of the contract [cross currency and interest rate swaps, currency swaps].

Interest flows to be received or paid on interest rate swaps, zero cost collars, cross currency and interest rate swaps and the premium or discount on currency swaps are recorded in the statement of income on the accrual basis over the period of the contract, with a counterpart entry to "accrued income and prepaid expenses" on accrued liabilities or deferred income.

The premiums paid [received] against the purchase and sale of put and call options on financial instruments [e.g. foreign currency, listed shares in portfolio] are recorded in "*miscellaneous receivables*" ["*miscellaneous payables*"]. If the option is exercised, the premium paid [received] becomes a component of the purchase or sale amount of the underlying instruments. If the option is not exercised, the premium paid [received] is recorded in *financial income and expense* in the statement of income. Options outstanding at year-end are stated at the market value at the end of the year. If this valuation gives rise to any unrealized gains, such gains will not be recorded in the statement of income; however, if the gains are significant, they will be disclosed in a note to the financial statements.

Derivative contracts used for hedging purposes are valued on a basis consistent with the underlying assets and liabilities.

Industrial patents and intellectual property rights *Lire 1,192,288 million*

Industrial patents and intellectual property rights, which decreased by Lire 27,794 million compared to December 31, 1998, can be broken down as follows:

[in millions of lire]	12/31/1999	12/31/1998
• software in use	1,191,960	1,219,596
• industrial patents	328	486
Total	1,192,288	1,220,082

2294

Capitalized costs for applications software show a decrease of Lire 27,636 million compared to December 31, 1998 due to some projects which became operative during the year [Lire 1,158,546 million] and new direct additions [Lire 2,394 million], net of the amortization charge [Lire 1,128,246 million], retirements during the year [Lire 55,411 million] and writedowns [Lire 4,919 million] of *DECT* software.
Industrial patents decreased by Lire 158 million compared to December 31, 1998, and represent the difference between capitalized costs incurred to file new patents and extend already filed patents to foreign countries [totaling Lire 116 million], retirements [Lire 84 million] during the year and the amortization charge [Lire 190 million].

Permits, licenses, trademarks and similar rights *Lire 112,598 million*

This item shows an increase of Lire 16,862 million compared to December 31, 1998, representing the difference between additions, projects which became operative [Lire 41,074 million], the amortization charge [Lire 23,630 million] and retirements [Lire 582 million] during the year.

Goodwill *Lire 3,800 million*

This item refers to the residual amount of goodwill paid by Telecom Italia in connection with the acquisition of the Video On Line business segment from Exol.

Work in progress and advances to suppliers *Lire 740,383 million*

Work in progress and advances to suppliers show an increase of Lire 144,820 million compared to December 31, 1998, mainly due to the investments for software development projects relating to network applications and operating programs [Lire 1,281,207 million], the reclassifications for transfers of projects to assets in operation during the year [Lire 1,158,546 million] and the advances to software suppliers [Lire 27,574 million].

Other intangibles *Lire 209,545 million*

These assets, which decreased by Lire 101,791 million compared to December 31, 1998, mainly include:

- "leasehold improvements" [Lire 162,609 million] made up by costs incurred to adapt leased properties to the Company's operating needs. This item shows a decrease of Lire 31,846 million compared to December 31, 1998, representing the difference between new capitalized items [Lire 35,056 million] and the amortization charge [Lire 66,058 million];
- "Great Jubilee 2000" includes the costs incurred to obtain the exclusive TLC provider rights for "Great Jubilee 2000" [Lire 46,934 million] acquired in 1998. This asset shows a decrease due to the amortization charge [Lire 31,289 million].

Fixed assets ***Lire 36,519,951 million***

[Lire 38,740,751 million at December 31, 1998]

A summary of the changes during the year is presented as follows:

[in millions of lire]	1999
– Additions	4,573,624
– Retirements and other changes	[144,011]
– Writedowns	[137,380]
– Depreciation	[6,513,033]
Total	[2,220,800]

An analysis of the composition and the changes in fixed assets during the year is presented as follows:

	12/31/1998				
[in millions of lire]	Cost	Upward adjustments	Writedowns	Accumulated Depreciation	Total
Land and buildings	10,079,087	1,986,837	[3,939]	[4,154,867]	7,907,118

2296

	12/31/1999				
[in millions of lire]	Cost	Upward adjustments	Writedowns	Accumulated depreciation	Total
Land and buildings	10,409,499	1,978,817	[3,939]	[4,555,813]	7,828,564
• non-industrial buildings	94,942	10,550	=	[7,622]	97,870
• industrial buildings	10,314,557	1,968,267	[3,939]	[4,548,191]	7,730,694
Plant and machinery	87,563,843	1,682,971	[1,912,380]	[60,473,127]	26,861,307
Manufacturing and distribution equipment	1,754,708	5,366	=	[1,644,580]	115,494
Other fixed assets	3,029,300	8,374	=	[2,587,226]	450,448
Construction in progress and advances to suppliers	1,264,138	=	=	=	1,264,138
Total	104,021,488	3,675,528	[1,916,319]	[69,260,746]	36,519,951

"*Construction in progress and advances to suppliers*" include labor costs of Lire 26,471 million.

Accumulated depreciation, as a whole, is considered sufficient in relation to the estimated useful lives of fixed assets, as determined by the depreciation rates based on the revised estimated useful life of the majority of installations making up the domestic telecommunications network, such as copper networks and exchange systems and transmission installations, as described in the comment on "depreciation of fixed assets". Accumulated depreciation covered 61.9% of gross fixed assets at December 31, 1998 and 64.3% at December 31, 1999.

Writedowns during the year [Lire 137,380 million] include, in accordance with the Article 2426, Section I, Item 3 of the Italian Civil Code, the permanent reductions in value of public telephone installations [Lire 93,000 million] and the writedowns of the residual value of DECT installations [Lire 44,380 million].

At December 31, 1999 the upward adjustments made to fixed assets in 1952, 1975, 1983 and 1991 as well as those made under Law No. 823/1973 have been depreciated by an average of approximately 65.38%.

The Company uses fixed assets purchased through lease contracts with its subsidiary Teleleasing, which are essentially stipulated under market conditions, as disclosed in the memorandum accounts and related notes. Had these contracts been accounted for using the financial method, entries would have been made in the statement of income for the interest on the financed principal and the depreciation charge attributable to the leased assets and assets would have been recorded in fixed assets and the residual debt under liabilities. The use of this method, however, would have had no material economic effect on the financial statements. The amount of financial expense included in the lease payments recorded in the 1999 statement of income is separately indicated in the note on the "use of property not owned".

Additions during the year include Lire 905,378 million of projects completed in Southern Italy.

Long-term investments ***Lire 19,644,996 million***

[Lire 16,527,295 million at December 31, 1998]

This item increased by Lire 3,117,701 million compared to December 31, 1998 and includes the following:

Investments *Lire 9,330,393 million*

Annexes 9 and 10 present the changes in each investment during the year, together with its corresponding amount at the beginning of the year and at December 31, 1999, as well as, according to Article 2427, Section 5, of the Italian Civil Code, a list of all the Company's investments in subsidiaries and affiliated companies. Overall, investments in subsidiaries, affiliates and other companies increased by Lire 863,087 million compared to December 31, 1998, as shown below:

[in millions of lire]	
Increases:	
• Subscription to capital increases, recapitalizations and loss coverage of: Stream [409,259], Accel [575], Emittenti Titoli [800], Czechtel [32], Media Technology Venture [2,834], TMI - Telemedia International Italia [134,118].	547,618
• Acquisition/subscription of shares/quotas at time of corporate formation of: Path.Net [49,995], Telecom Italia GMBH [84], Telsi [793,978] Eutelsat [67,736], Excite Italia B.V. [44], Otto [13,451], Teleporto Adriatico [240], Conai [2], GE.SE.CE.DI. [140].	925,670
• Permanent transfer to capital stock of advances on future increases in capital contributions relating to eFusion Inc..	444
• Corporate formation of Huit S.A. by means of the contribution of the investment in Otto, net of capital contributions payable.	98,958
Total increases [A]	1,572,690

[in millions of lire]	
Decreases:	
• Sale of shares/quotas in: Accel [297], Tecnation [85], Inmarsat [105], Intelsat [25,622], S.I.S.I.E. [4], Stream [130,000], Consorzio Telematur [14], The Fantastic Corporation [1,167], Consorzio CoTIM [2], Media Technology Venture [265].	157,561
• Writedown for losses of investments charged to statement of income of: Iridium Italia [63,004], Stream [112,300], TMI-Telemedia International Italia [87,535], TSP [10,825], Teleporti Italia [32], Consorzio Itinera [131], Consorzio Promotore ISDN [48], Sistemi e Telematica [180], Consorzio Ambiente 2000 [8], Consorzio CoTIM [5], Czechtel [16].	274,084
• Writedown for losses of investments covered by the reserve for risks and charges on investments of: Tecno Idro Meteo [84], S.I.S.I.E [161], Stream [139,259], Consorzio Telematur [3].	139,507
• Contribution of investment in Otto to new company Huit S.A..	138,451
Total decreases [B]	709,603
Net change for the year [A-B]	863,087

In particular:

- on June 7, 1999, the sale of 65% of the stock held in Stream was concluded, respectively, to News Television Ltd [35%], Cecchi Gori Group Finmavi S.r.l. [18%] and Società Diritti Sportivi S.r.l. [12%]. After the sale, Telecom's holding in Stream fell to 35% and the company was classified as an affiliated company;
- in connection with the demergers of the businesses managed by Italtel and its subsidiaries which led to the sale, on December 29, 1999, of the 100% stake in Siemens Information and Communication Networks S.p.A. to Siemens Beteiligungsvewaltung GmbH, Telecom Italia acquired the remaining 50% stake in Telsi Ltd. for Lire 793,978 million. Telecom Italia's holding in Telsi Ltd. after the acquisition is now 100% and the company was consequently classified as a subsidiary;
- some investments in subsidiaries and affiliated companies are recorded at an amount in excess of the corresponding share of the underlying stockholders' equity, net of dividends and after the consolidation adjustments. These investments are not written down but are maintained at their carrying values since they are expected to show future earnings and their assets are worth more than their respective book values. In particular, in the case of TIM, the higher value – which is nevertheless significantly lower than market value, as later described – is the result of the method [proportion of market value] used in separating the value of the holding from that of the former company Telecom Italia following the demerger in 1995. As for Finsiel, the value of the investment has not been changed in view of its current earnings potential.
- in February 1998, Meie Assicuratrice, Società Mutua di Assicurazione, was changed into a joint stock company and, consequently, the insured became shareholders of the new joint stock company. Accordingly, on the basis of the insurance premiums paid in the past, 46,104,648 shares of Meie Assicurazioni were assigned, which were recorded only by quantity and not by price. At the time of the merger of Meie Rischi Diversi in Meie Assicurazioni, in 1998, the shares of the latter were attributed a price of Lire 2,488 each, as decided by an independent appraiser appointed by the Milan Courts; on this basis the total value of shares held would therefore amount to Lire 114,708 million.

A comparison between the market price of the listed shares at December 31, 1999 and their carrying value shows an unrealized gain of Lire 84,638 billion. Further details are given in Annex 11.

Advances on future increase in capital contributions to investments *Lire 8,610,090 million*

These show an increase of Lire 2,244,159 million compared to December 31, 1998 due to the non-interest bearing loans on the future increase in capital contributions made during the year to the following companies:

- Stet International Netherlands [Lire 1,676,048 million];
- Stet Mobile Holding [Lire 568,454 million].

The first loan is directed to the acquisition of some foreign holdings, especially in Spain and Latin America.

2300

Loans *Lire 1,704,513 million*

The loans under long-term investments, which are recorded at their face value, corresponding to estimated realizable value, increased by Lire 13,942 million compared to December 31, 1998, and are analyzed as follows:

	12/31/1998	Changes during the year				12/31/1999
[in millions of lire]		Disburse-ments	Reimburse-ments	Reclassifi-cations/ Other	Total	
Subsidiaries	1,180,284	206,633	[108,798]	21,892	119,727	1,300,011
Other borrowers	510,287	48,011	[162,559]	8,763	[105,785]	404,502
Total	1,690,571	254,644	[271,357]	30,655	13,942	1,704,513

Loans to subsidiaries Lire 1,300,011 million

Loans to subsidiaries increased by Lire 119,727 million and represent loans made to Teleleasing, Bitel and Telespazio at market rates.

Loans to other borrowers Lire 404,502 million

Loans to other borrowers decreased by Lire 105,785 million and refer to:

- *receivables from customers* *Lire 1,843 million*

These are made up by 50% of the connection charges borne by residential customers paying in 12 bi-monthly installments, as allowed by law. These receivables show a decrease of Lire 1,306 million from 1998 since this form of payment is not as requested as in the past.

- *receivables from employees* *Lire 84,051 million*

These refer to outstanding loans to employees and include low-rate loans of Lire 2,248 million made in connection with the Initial Public Offering of ordinary Telecom Italia shares;

- *guarantee deposits* *Lire 11,740 million*

These include cash deposits to third parties paid mainly to municipalities to guarantee proper work to roads;

- *other loans* *Lire 306,868 million*

  These mainly refer to:
  - the loan made to Ros Telecom [Lire 54,063 million] for the installation of ITUR project [optic submarine cable linking Italy, Turkey, Ukraine and Russia];
  - the prepayment of the tax on the reserve for employee termination indemnities [Lire 245,012 million] required under Law No. 662 of December 23, 1996, revalued as required by law;

2301

- the outstanding amount [Lire 354 million] of subsidized loans granted to personnel of the other Italian companies of the Telecom Italia Group in connection with the Initial Public Offering [IPO] of ordinary Telecom Italia shares.

2302

As required by Article 2358 of the Italian Civil Code, we report that the amount of the available reserves recorded in the financial statements at December 31, 1999 is sufficient to cover the outstanding balance of the loans made to employees of Telecom Italia and Telecom Italia Group companies for the purchase of ordinary Telecom Italia shares in connection with the Initial Public Offering under Decree of August 8, 1997 by the President of the Council of Ministers.
As required under Article 2427, Section 6 of the Italian Civil Code, Annex 12 sets forth a breakdown of loans under long-term investments by maturity within and beyond five years.

Other securities =

Other securities show a zero balance due to the redemptions during the year.

As required by Article 10 of Law No. 72/1983 the table below sets forth a breakdown of upward adjustments by type of assets held by the Company.

[in millions of lire] Investments in	Land and buildings	Plant and machinery	Industrial and distribution equipment	Other assets	Construction in progress and advances	Fixed assets Other assets

2303

Current assets

Inventories ***Lire 233,028 million***

[Lire 263,613 million at December 31, 1998]

These decreased by Lire 30,585 million compared to December 31, 1998 and include the following:

Contract work in process *Lire 53,980 million*

This item, which decreased by Lire 20,215 million compared to December 31, 1998, represents the value of the work being performed on behalf of third parties at December 31, 1999.

Merchandise *Lire 179,048 million*

Merchandise includes goods held for resale and used for maintenance [telephone products and materials] and shows a decrease of Lire 10,370 million compared to December 31, 1998.

Accounts receivable ***Lire 15,401,138 million***

[Lire 15,002,304 million at December 31, 1998]

Trade accounts receivable increased by Lire 398,834 million compared to December 31, 1998.

A breakdown and the changes that occurred during the year are given in the table below:

	12/31/1998	Changes during the year			12/31/1999	
[millions of lire]		Utilizations	Provisions	Change		
Trade accounts receivable	10,634,958			[498,125]	10,136,833	
• allowance for doubtful accounts	[848,000]	519,035	[399,035]	120,000	[728,000]	
Total	9,786,958			[378,125]	9,408,833	
Receivables from subsidiaries	2,815,413			162,591	2,978,004	
of which financial receivables	1,670,942			412,843	2,083,785	
Receivables from affiliated companies	669,491			[264,090]	405,401	
of which financial receivables	461,294			[396,505]	64,789	
Receivables from parent companies	=			2,484	2,484	
Miscellaneous receivables	1,730,442			875,974	2,606,416	
• Government and other public entities for grants and subsidies	5,489			[5,239]	250	
• accrued dividends from subsidiaries	705,440			805,567	1,511,007	
• deferred tax assets	201,150			144,333	345,483	
• other receivables	818,363			[68,687]	749,676	
Total	15,002,304			398,834	15,401,138	

Trade accounts receivable *Lire 9,408,833 million*

Trade accounts receivable, which are shown net of the allowance for doubtful accounts [Lire 728,000 million, of which Lire 399,035 million charged during the year], decreased by Lire 378,125 million compared to December 31, 1998.

The allowance for doubtful accounts decreased by Lire 120,000 million compared to December 31, 1998 [Lire 848,000 million], mainly due to a reduction in doubtful receivables from business

customers, partly as a consequence of the settlement of the dispute with the Italian Postal Administration, involving the utilization of Lire 137,000 million from the allowance account.

Receivables from subsidiaries *Lire 2,978,004 million*

Receivables from subsidiaries, up by Lire 162,591 million compared to December 31, 1998, also include receivables from Italtel, reclassified from affiliated companies to subsidiaries following the deal with Siemens A.G..
These receivables refer to trade receivables, financial receivables and other receivables. The financial receivables reflect current account transactions carried out at market rates for cash management purposes and short-term loans granted to the companies; such receivables can be analyzed as follows:

[in millions of lire]	12/31/1999	12/31/1998

2306

Trainet	=	275
Venis	4,630	=
Total	2,083,785	1,670,942

Trade receivables, amounting to Lire 712,749 million, are mostly due from TIM [Lire 292,556 million], Teleleasing [Lire 80,530 million], Telespazio [Lire 74,619 million], Stet International [Lire 51,779 million] and Telesoft [Lire 45,878 million].
Other receivables, amounting to Lire 181,470 million represent primarily amounts owed in connection with the Group's VAT settlement system.

Receivables from affiliated companies *Lire 405,401 million*

Receivables from affiliated companies decreased by Lire 264,090 million compared to December 31, 1998 mainly as result of the previously mentioned reclassification of Italtel to receivables from subsidiaries. It should also be pointed out that this item includes receivables from Stream reclassified from subsidiaries to affiliated companies following the sale of the majority stake in this company in 1999.
Receivables include trade receivables, financial receivables and other receivables. The financial receivables reflect current account transactions carried out at market rates for cash management purposes and short-term loans; such receivables can be analyzed as follows:

[in millions of lire]	12/31/1999	12/31/1998
Financial receivables from affiliated companies:		
Astelit	344	=
Datasiel	=	144
Esri Italia	7,121	8,741
Excite Italia BV	989	=
Italtel	=	452,348
Labia Services [in liquidation]	=	28
Lares Tecno	34	=
Sispi	12	33
Stream	56,270	=
Consorzio Telcal	19	=
Total	64,789	461,294

Trade receivables, amounting to Lire 335,837 million, are mostly due from Seat Pagine Gialle [Lire 119,080 million], Retevision [Lire 46,993 million], Stream [Lire 35,522 million] and Golden Lines [Lire 34,827 million].

Other receivables, amounting to Lire 4,775 million, represent primarily receivables from Nortel Inversora [Lire 2,457 million] and Consorzio Telcal [Lire 1,261 million].

Receivables from parent companies *Lire 2,484 million*

These refer to amounts due from the parent companies Olivetti and Tecnost, of which Lire 2,183 million refers to trade receivables.

Miscellaneous receivables *Lire 2,606,416 million*

Accrued dividends from subsidiaries Lire 1,511,007 million

These increased by Lire 805,567 million compared to December 31, 1998 and refer to the dividends accruing to the company from subsidiaries, especially TIM [Lire 1,400,836 million], Finsiel [Lire 45,563 million] and Sirti [Lire 37,174 million].

Government and other public entities for grants and subsidies Lire 250 million

These decreased by Lire 5,239 million compared to December 31, 1998 and are made up by the receivable from the European Social Fund for grants received against the costs incurred in the training of personnel working in Southern Italy or in economically depressed areas of Central and Northern Italy.

Deferred tax assets Lire 345,483 million

These are shown net of the reserve for deferred taxes [Lire 1,609,364 million]. The main items which gave rise to deferred tax assets are the writedown of receivables and plant and the reserve for risks; those which generated deferred tax liabilities were the reserve for accelerated depreciation and gains. Both the reserve for "deferred tax liabilities" and "deferred tax assets" include, only at December 31, 1999, tax credits on dividends accrued of Lire 887,415 million.

At December 31, 1999, about Lire 270,000 million of deferred tax assets have not been recorded since future recovery is not reasonably assured.

The balance of deferred tax assets and liabilities is made up as follows:

Due at December 31, 1998	Due at December 31, 1999					
	Within 1 year	From 2 to 5 years	Beyond 5 years	Total	Within 1 year	From 2 to 5 years Beyond 5 years Total
Reserve for deferred taxes	1,185,878	383,366	40,120	1,609,364	161,949	598,643 52,801 813,393
Deferred tax assets	[1,373,688]	[541,039]	[40,120]	[1,954,847]	[241,417]	[460,485] [174,483] [876,385]
Net balance	[187,810]	[157,673]	=	[345,483]	[79,468]	138,158 [121,682] [62,992]

The net balance at December 31, 1999 increased compared to the end of 1998 due to the combined effect of the increase in deferred tax assets [mainly with respect to the value adjustments to tangible assets, the writedown of receivables and the reserve for risks and charges] and the reduction in deferred tax liabilities [relating to accelerated depreciation and gains], net of tax credits on dividends accrued at December 31, 1999, also included in deferred tax assets.

Other receivables Lire 749,676 million

These decreased by Lire 68,687 million compared to December 31, 1998 and can be analyzed as follows:

[in millions of lire]	12/31/1999	12/31/1998
• receivables from Tax Administration	46,079	84,882

2308

• receivables relating to personnel	142,600	158,360
• items in transit:		
- amounts paid by customers and in transit with the banking and postal systems	340,064	263,835
- other items	220,933	311,286
Total	749,676	818,363

Short-term financial assets ***Lire 119,207 million***

[Lire 114,357 million at December 31, 1998]

These increased by Lire 4,850 million compared to December 31, 1998 and the composition and changes during the year are shown in the following table:

	12/31/1998	Changes during the year				12/31/1999
[in millions of lire]		Investments	Sales/ Reimburse-ments	Writedowns/ Reversal of writedown	Totale	
Investments in subsidiaries	114,357	407,569	[412,340]	[773]	[5,544]	108,813
Other investments	=	27,811	[17,257]	[160]	10,394	10,394
Total	114,357	435,380	[429,597]	[933]	4,850	119,207

Investments in subsidiaries refer to listed shares purchased for later trading.
The net gain on sales of shares in subsidiaries and other companies, totaling Lire 85,780 million, refers mainly to TIM [Lire 64,023 million] and represents the difference between the sales price of Lire 601,156 million and the corresponding carrying value of Lire 515,376 million.
A comparison between the market prices of listed shares in portfolio at December 31, 1999 and their carrying value shows an unrealized gain of Lire 42,968 million.
Further details are given in Annex 11.

Liquid assets ***Lire 140,452 million***

[Lire 114,483 million at December 31, 1998]

Liquid assets increased by Lire 25,969 million compared to December 31, 1998 and include the following:

[in millions of lire]	12/31/1999	12/31/1998
Bank and postal accounts	139,521	113,436
Checks	1	1
Cash and valuables on hand	930	1,046
Total	140,452	114,483

Accrued income and prepaid expenses ***Lire 49,479 million***

[Lire 52,501 million at December 31, 1998]

These decreased by Lire 3,022 million compared to December 31, 1998 and include the following:

2310

[in millions of lire]	12/31/1999	12/31/1998
Discounts and similar charges on borrowings	3,584	5,002
Accrued income		
• financial income	30,506	30,661
	30,506	30,661
Other prepaid expenses		
• production costs	15,183	16,557
• financial expenses	206	281
	15,389	16,838
Accrued income and other prepaid expenses	45,895	47,499
Total	49,479	52,501

Discounts and similar charges on borrowings *Lire 3,584 million*

These show a decrease of Lire 1,418 million compared to December 31, 1998 due to the amounts charged to the statement of income for the portion attributable to the current year. Discounts and similar charges on borrowings are made up by the expenses incurred to obtain loans.

Accrued income and other prepaid expenses *Lire 45,895 million*

These decreased by Lire 1,604 million compared to 1998.
Accrued income includes the interest expense [Lire 14,582 million] subsidized until 1991 by the Government under Law No. 67/1988, equivalent to three percentage points of the cost of the loans which replaced those assigned to the Company through Cassa Depositi e Prestiti under Law No. 887/1984.
Prepaid expenses are mainly related to leasing installments [Lire 1,695 million], building rents and circuit rent [Lire 9,498 million] and financial expenses [Lire 206 million] pertaining to amounts already accrued or paid, but attributable to future years.

A breakdown of receivables and accrued income by maturity and type is given in Annex 12.

LIABILITIES AND STOCKHOLDERS' EQUITY

Stockholders' equity ***Lire 35,577,763 million***

[Lire 32,550,945 million at December 31, 1998]

The table below shows the changes that occurred during the year.

	12/31/1998	Changes during the year				12/31/1999
[in millions of lire]		Appropriation of 1998 net income	Other changes	Net income	Total

Total stockholders' equity	32,550,945	=	[2,023,545]	5,050,363	3,026,818	35,577,763

Share capital *Lire 7,426,157 million*

Share capital increased by Lire 4,905 million compared to December 31, 1998. Such increase is due to the subscription of 4,905,500 ordinary shares of par value Lire 1,000 each by the Group's managers under the Stock Option Plan approved by resolution of the Extraordinary Stockholders' Meeting held on December 15, 1998.
Share capital consists of 5,260,037,131 ordinary shares and 2,166,120,095 savings shares, both of par value Lire 1,000 each.

Additional paid-in capital *Lire 3,490,922 million*

Additional paid-in capital shows an increase of Lire 59,602 million compared to December 31, 1998 owing to the above-described subscriptions under the Stock Option Plan.

Special reserve *Lire 3,627,806 million*

The special reserve shows an increase of Lire 1,124,411 million due to the reclassification from the "Reserve for accelerated depreciation" described below.

2312

Reserve for accelerated depreciation *Lire 1,487,794 million*

The reserve for accelerated depreciation decreased by Lire 595,399 million and represents the difference between the appropriation of 1998 net income [Lire 529,012 million] and the portion released and reclassified to the "Special Reserve" [Lire 1,124,411 million].

Reserve for capital grants *Lire 852,913 million*

The reserve for capital grants increased by Lire 33,221 million and refers to the transfer of a portion of the capital grants received up to December 31, 1992, which became available during 1999 as a result of the depreciation of the assets to which the grants refer.

Other reserves *Lire 7,165,723 million*

These have remained unchanged compared to December 31, 1998, and are made up by the allocation of the surplus arising from the merger of the former company Telecom Italia in Stet.

Current plans do not include any transactions affecting equity reserves in abeyance of taxes which would be subject to taxation under current law.

Reserves for risks and charges ***Lire 1,242,208 million***

[Lire 1,514,331 million at December 31, 1998]

These decreased by Lire 272,123 million compared to December 31, 1998. The composition and changes in these reserves are described as follows:

	12/31/1998	Changes during the year					12/31/1999
[in millions of lire]		Provisions	Utili-zations	Released to statement of income	Reclassi-fication/ Other	Total	
Reserve for taxes	402,141	893,517	[421,415]	[2,170]	[617,575]	[147,643]	254,498
For taxes	263,983	1,462	[8,777]	[2,170]	=	[9,485]	254,498
For deferred taxes	138,158	892,055	[412,638]	=	[617,575]	[138,158]	=
Other reserves	1,112,190	207,553	[258,136]	[40,676]	[33,221]	[124,480]	987,710
Reserve for litigation	254,523	39,904	[10,057]	[26,676]	=	3,171	257,694
Reserve for capital grants	317,874	=	=	=	[33,221]	[33,221]	284,653
Reserve for losses of subsidiaries and affiliates	169,357	19,588	[139,507]	=	=	[119,919]	49,438
Reserve for contractual risks and other risks	370,436	148,061	[108,572]	[14,000]	=	25,489	395,925
Total	1,514,331	1,101,070	[679,551]	[42,846]	[650,796]	[272,123]	1,242,208

2313

Reserve for taxes *Lire 254,498 million*

The reserve for taxes decreased by Lire 147,643 million compared to December 31, 1998 and entirely refers to income taxes and indirect duties and taxes.
The reserve for deferred income taxes shows a zero balance which is mainly attributable to the set-off with deferred tax assets.

Other *Lire 987,710 million*

These decreased by Lire 124,480 million and include the following reserves.

- Reserve for litigation [Lire 257,694 million]: this includes prudent provisions - charged to various items of the statement of income - for probable expenses in connection with personnel disputes and litigation with third parties which had not yet been settled at the end of the year. The provisions [Lire 39,904 million] are related to litigation with third parties and the utilizations refer to disputes with personnel [Lire 4,240 million], social security institutions [Lire 178 million] and others [Lire 5,639 million].
- Reserve for capital grants [Lire 284,653 million]: this includes the unavailable portion of capital grants received up to December 31, 1992 recorded herein solely for purposes of taking advantage of the tax benefits. Utilizations during the year [Lire 33,221 million] stem from the transfer to stockholders' equity of the portion of the capital grants which became available.
- Reserve for losses of subsidiaries and affiliates [Lire 49,438 million]: this includes the provisions to account for the losses in excess of the carrying value of the corresponding investments, in particular, Iridium Italia [Lire 14,006 million]. Utilizations of Lire 139,507 million refer almost entirely to the coverage of the losses of the company Stream for the first four months of 1999.
- Reserve for contractual risks and other risks [Lire 395,925 million]: this mainly includes the provisions recorded in the previous years for risks relating to the former Iraq construction contracts [Lire 120,000 million], as well as those made in 1999 for probable charges stemming from the settlement of trade and sundry positions [Lire 148,061 million], of which Lire 96,110 million relates to the 1999 interconnecting rates notified by the Telecommunications Authority under resolution of February 15, 2000. Utilizations [Lire 108,572 million] mainly refer to the settlement of the past positions relating to the *SOCRATE* and *DECT* projects.

Reserve for employee termination indemnities ***Lire 2,163,171 million***
[Lire 2,017,465 million at December 31, 1998]

This decreased by Lire 272,123 million compared to December 31, 1998. The composition and changes in this reserve are described as follows:

[in millions of lire]

Balance at 12/31/1998	**2,017,465**
Changes during the year:	
- Provisions charged to income for amounts to fund employee termination indemnities accrued in favor of employees during the year plus the fixed and variable cost-of-living adjustments required under Law No. 297/1982	337,103
- Utilizations for:	
• Indemnities paid to employees who took retirement or resigned during the year	[156,312]
• Advances under Law No. 297/1982	[28,825]
• Amounts transferred to/from subsidiaries and other changes	[6,260]
Balance at 12/31/1999	**2,163,171**

2314

Liabilities ***Lire 34,457,494 million***

[Lire 36,166,514 million at December 31, 1998]

A breakdown of liabilities and accrued expenses pursuant to Article 2427, Section 6, of the Italian Civil Code, is given in Annex 13.
Liabilities, which decreased by Lire 1,709,020 million compared to December 31, 1998, include the following:

	12/31/1999			12/31/1998		
[in millions of lire]	Loans payable	Trade accounts payable and miscellaneous payables	Total	Loans payable	Trade accounts payable and miscellaneous payables	Total
Debentures	824,914	=	824,914	900,508	=	900,508
Due to banks	12,422,073	=	12,422,073	13,373,290	=	13,373,290

Contributions to pension and social security institutions	=	1,709,281	1,709,281	=	1,832,497	1,832,497
Other liabilities	41,738	4,171,987	4,213,725	34,932	4,391,101	4,426,033
Total	18,248,158	16,209,336	34,457,494	18,006,122	18,160,392	36,166,514

Debentures *Lire 824,914 million*

Debentures decreased by Lire 75,594 million compared to December 31, 1998. They include the 1992/2010 debenture issue, passed by resolution of the Extraordinary Stockholders' Meeting of Sip [then Telecom Italia] on April 30, 1992, reserved for employees in service and retired for a maximum amount of Lire 1,000,000 million. The maximum period of the debentures extends to July 1, 2010, although the Company has the option of redeeming the debentures before maturity, by resolution of the Board of Directors. Outstanding debentures owned by employees total No. 16,498,280 [No. 18,010,157 at December 31, 1998] with a face value of Lire 50,000 each.
The semi-annual nominal interest rate is variable [1.2% for the December 31, 1999 coupon] and payment is made on January 1 and July 1 of each year.

Due to banks *Lire 12,422,073 million*

These decreased by Lire 951,217 million compared to December 31, 1998. They comprise medium/long-term debts totaling Lire 7,592,885 million [Lire 7,875,415 million at December 31, 1998] – of which Lire 120,000 million is secured by collateral – and short-term borrowings totaling Lire 4,829,188 million [Lire 5,497,875 million at December 31, 1998], consisting of Lire 3,750,802 million in loans taken out to cover temporary liquidity requirements, Lire 246,283 million in short-term loans of USD 118 million to win the bid

for the privatization of Telebras and Lire 832,103 million of bank overdrafts.

The changes are as follows [in millions of lire]:

- new loans	1,130,693
- loan repayments	1,421,901
- increase to adjust balances in foreign currency	8,678

Medium/long term loans will be repaid under the following loan amortization plans:

Year	[in millions of lire]
2000	1,468,254
2001	1,098,612
2002	1,595,336
2003	2,204,342
2004	723,096
2005 and after	503,245
Total	7,592,885

Corresponding nominal interest rates at December 31, 1999 are shown below:

	[in millions of lire]
Up to 2.5 %	2,194,235
From 2.5% to 5%	3,794,363
From 5% to 7.5%	952,024
From 7.5% to 10%	634,842
Over 10%	17,421
Total	7,592,885

The largest amount of gross debt falls within the range of rates up to 5% and includes loans made by various institutions to replace those by Cassa Depositi e Prestiti [in accordance with Law No. 887/1984], with 3% interest subsidies paid by the Treasury Ministry [in accordance with Law No. 67/1988] plus part of the loans made with EIB funds and short-term borrowings.
Currency loans amount to Lire 1,390,947 million [including Lire 318,217 million relating to the euro-zone currencies] and increased by Lire 443,345 million.
At December 31, 1999 overdraft arrangements amount to Lire 13,074 million.

2316

Due to other lenders *Lire 1,609,805 million*

These decreased by Lire 391,248 million compared to December 31, 1998. They consist of medium/long-term loans made by Cassa Depositi e Prestiti [Lire 1,016,749 million] and amounts due to Iri [Lire 593,056 million], including loans with EIB funds for ECU 2.4 million [equivalent Lire 4,697 million].
Such medium/long-term loans will be repaid as follows:

Year	[in millions of lire]
2000	339,086
2001	399,807
2002	262,285
2003	198,539
2004	140,634
2005 and after	269,454
Total	1,609,805

Corresponding nominal interest rates at December 31, 1999 are shown below:

	[in millions of lire]
From 2.5% to 5%	27,510
From 5% to 7.5%	1,132,711
From 7.5% to 10%	449,584
Total	1,609,805

Accounts payable to suppliers *Lire 6,187,988 million*

These decreased by Lire 158,663 million compared to December 31, 1998, mainly as a result of lower installation investments, and include amounts assigned by some suppliers to credit institutions, factoring companies, etc.. They also comprise payables to other TLC carriers, shown up to 1998 in "other payables", amounting to Lire 1,128,890 million, of which Lire 445,311 million is due to foreign correspondents and Lire 610,581 million to Omnitel Pronto Italia.

Accounts payable to subsidiaries *Lire 6,178,550 million*

These increased by Lire 1,667,264 million compared to December 31, 1998.
They consist of loans payable, trade accounts payable and other payables. Loans payable [Lire 3,343,202 million] include current account transactions negotiated at market rates for cash management purposes and can be analyzed as follows:

[in millions of lire]	12/31/1999	12/31/1998
Loans payable to subsidiaries		
Atesia	2,556	=

Total	3,343,202	1,631,949

Trade accounts payable [Lire 2,751,349 million] mainly refer to payables to Sirti [Lire 338,313 million], TIM [Lire 837,230 million], Telesoft [Lire 459,188 million], Italtel [Lire 576,558 million], the latter being reclassified from affiliated companies to subsidiaries following the deal with Siemens A.G..
Other payables [Lire 83,999 million] primarily refer to capital contributions paid to the company Path.Net [Lire 34,997 million] and amounts owed in connection with the Group's VAT settlement system.

2318

Accounts payable to affiliated companies *Lire 376,043 million*

These decreased by Lire 516,540 compared to December 31, 1998. They refer to loans payable, trade accounts payable and other payables. Loans payable [Lire 6,426 million] include current account transactions negotiated at market rates for cash management purposes. This item includes the payables to Stream reclassified from subsidiaries to affiliated companies following the sale of the majority interest in this company in 1999. Accounts payable can be analyzed as follows:

[in millions of lire]	12/31/1999	12/31/1998
Loans payable to affiliated companies		
Consorzio Telcal	=	23
Datasiel	90	=
Italdata	550	228
Italtel	=	50,625
Labia Services	10	=
Seat Pagine Gialle	120	603
Siemens Informatica	3,427	12,911
Stream	2,229	=
Total	6,426	64,390

Trade accounts payable [Lire 366,983 million] mainly refer to payables to Seat Pagine Gialle [Lire 62,833 million], Siemens Informatica [Lire 116,748 million] and Consorzio COIMS [Lire 143,367 million].
Other payables [Lire 2,634 million] almost entirely refer to the company Astelit.

Accounts payable to parent companies *Lire 4,568 million*

These refer to trade accounts payable to the parent companies Tecnost [Lire 3,552 million] and Olivetti [Lire 1,016 million].

Taxes payable *Lire 928,685 million*

These decreased by Lire 950,869 million compared to December 31, 1998 and mainly refer to:

- the payable to the Italian Treasury for withholding taxes of Lire 167,312 million [Lire 244,593 million at December 31, 1998];
- the VAT liability totaling Lire 288,067 million [Lire 604,933 million at December 31, 1998];
- Irpeg and Irap tax liabilities for the year, net of advances paid, are Lire 455,764 million [Lire 1,013,843 million in 1998]. The decrease compared to the prior year is due to diverse tax dynamics and the different amounts of advances paid in 1999 and 1998 [the year in which the advance payments took account of the recovery of the excess payments made in 1997]. The 1999 liability includes taxes due on the portion of income which could be set aside in the "reserve for accelerated depreciation" at the time of approving the financial statements by the shareholders' meeting; in this case, these same taxes will be reclassified to the "reserve for deferred taxes".

Contributions to pension and social security institutions *Lire 1,709,281 million*

These decreased by Lire 123,216 million compared to December 31, 1998 and include amounts owed to social security and health institutions with regard to personnel.
These specifically include Lire 1,472,235 million payable to INPS for charges, pursuant to Law No. 58/92 [see related accounting policy] and relating to the merged company Iritel, estimated by the special Ministerial Commission in relation to the valuation of assets contributed to Iritel by the Post and Telecommunications Administration.

Other liabilities *Lire 4,213,725 million*

These decreased by Lire 212,308 million compared to December 31, 1998 and mainly refer to the following:

- payable to the Postal Administration for their portion of telecommunications service revenues billed by Telecom Italia to customers, totaling Lire 23,100 million [Lire 21,374 million at December 31, 1998];
- payable to customers totaling Lire 2,363,402 million [Lire 2,627,553 million at December 31, 1998], including deposits, pre-billed basic charges [essentially monthly charges for January and February] and the unused portions of prepaid magnetic telephone cards;
- payable to employees amounting to Lire 732,295 million [Lire 770,985 million at December 31, 1998] for 1999 payrolls paid in 2000;
- payable for the TLC license fee and operating fee totaling Lire 803,056 million.

Accrued expenses and deferred income ***Lire 926,229 million***
[Lire 796,366 million at December 31, 1998]

These increased by Lire 129,863 million compared to December 31, 1998 and include the following:

[in millions of lire]	12/31/1999	12/31/1998
Accrued expenses		
• production cost	6,232	7,164
• financial expense	141,443	198,804
	147,675	205,968
Deferred income		
• capital grants [unavailable amount]	329,049	291,003
• production value	443,911	289,601
• financial income	5,594	9,794
	778,554	590,398
Total	926,229	796,366

Accrued expenses refer to leasing installments [Lire 5,902 million] and financial items [Lire 141,443 million]. Deferred income mainly includes pre-billed basic charges and rentals of main equipment [Lire 285,867 million], the unavailable portion of capital grants received after December 31, 1992, and financial items connected to loans to employees.

2320

MEMORANDUM ACCOUNTS

Memorandum accounts totaled Lire 12,745,124 million and can be analyzed as follows:

Guarantees provided ***Lire 4,826,669 million***

Guarantees provided consist of sureties, including Lire 2,918,500 million on behalf of subsidiaries – mainly on debentures issued by Softe, other medium/long-term financial transactions and supply contracts – and Lire 1,885,386 million on behalf of affiliated companies and others in connection with medium/long-term financial transactions, supply contracts and guarantees on bids to acquire mobile licenses abroad.
Guarantees also include Lire 22,783 million of counter-guarantees provided by Telecom Italia on behalf of third parties [Siemens A.G.].

Purchase and sale commitments ***Lire 1,341,401 million***

This item consists mainly of sales commitments involving debentures reserved for employees [Lire 175,086 million], forward exchange sales contracts [Lire 297,345 million] to hedge currency exchange risks on receivables from Softe and purchase commitments on five *cross currency and interest rate swaps* operations of a notional capital of Lire 755,590 million to hedge currency exchange and interest rate risks on EIB loans in GBP, as later described.

Other memorandum accounts ***Lire 6,577,054 million***

These consist mainly of:

- leasing installments and residual buyout amounts [Lire 942,352 million]. This amount represents future lease installments plus the buyout amounts of the assets leased;
- assets of third parties received free on loan, on deposit for safekeeping or for similar purposes [Lire 786,692 million]. They mainly consist of shares purchased in connection with the Initial Public Offering by employees of Company and other consolidated Italian companies of the Telecom Italia Group, which at December 31, 1999 were still on deposit with Telecom Italia and on sub-deposit with Monte Titoli S.p.A.. These shares have been valued at the December 30, 1999 price of ordinary Telecom Italia shares on the Italian Online Stock Market.
- "Great Jubilee 2000": licensing agreement [Lire 5,543 million] equal to the minimum guaranteed amount not yet been covered by the marketing of telephone cards which bear a "Joint Logo" with the Great Jubilee 2000 Committee;
- counter-guaranties received by Telecom Italia from third party companies [Lire 838,499 million] for guaranties provided for the obligations undertaken by these companies with others;
- financial derivative contracts [Lire 4,001,847 million] as later described.

***

The Company issued weak letters of patronage totaling Lire 2,301,860 million chiefly on behalf of subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements.
Assets of third parties received free on loan, on deposit for safekeeping or for similar purposes amounted to Lire 4,436,026 million and consist mainly of equipment leased to customers [Lire 684,501 million] and securities belonging to the Company deposited with others [Lire 3,751,428 million].
Guarantees received amount to Lire 1,369,083 million.
Guarantees provided by others for Company obligations, which consist primarily of sureties to guarantee the performance of non-financial contractual obligations, totaled Lire 264,719 million.
Collateral provided to secure the liabilities recorded in the balance sheet totaled Lire 120,000 million and consists of mortgages on Company buildings. Mortgages are carried for an effective amount of Lire 480,000 million.

Financial derivatives

Medium/long-term funding was obtained during 1999 through new EIB loans in Euros and pounds sterling for a total equivalent amount of Lire 1,405 billion. Derivatives refer to cross currency and interest rate swaps [to convert pound sterling loans into Euros] and interest rate swaps [to convert Euro variable rate loans into fixed rate loans].
The following tables gives a description of the financial derivative contracts outstanding at December 31, 1999 to hedge to medium/long-term debt positions.

[in billions of lire]	Notional amount/ Capital exchanged at 12/31/1999	Market value of derivatives at 12/31/1999 [a]	Market value of underlying debt [EIB] positions at 12/31/1999 [b]	Market value of debt including related derivatives at 12/31/1999 [c = b – a]
Interest rate swaps	1,915	34	1,893	1,859
Zero cost collar	144	=	143	143
Cross currency and interest rate swap	755	44	786	742

Interest rates swaps and *zero cost collars* involve the exchange of flows of interest calculated on the notional amount of reference at the agreed fixed or variable rates at the specified maturity date with the counterparts. This amount does not represent the amount exchanged between the parties and therefore does not constitute a measure of exposure to credit risk, limited instead to the amount of interest or interest differentials to be received at the interest date.
Furthermore, the counterparts to derivative contracts are only the best rated banks and financial institutions and continually monitored in order to minimize the risk of non-performance.
The same also applies to *cross currency swaps and interest rate swaps* which involve the exchange of capital, in the respective currencies of denomination, in addition to the settlement of periodic interest flows, at maturity and eventually at another date.

2322

In particular, the market value of interest rate swaps and cross currency and interest rate swaps reflects the difference between the fixed rate paid by the Company and the market interest rate for maturities having the same remaining life as the swaps. The cross currency and interest rate swaps also reflect the difference between the forward Euro/pound sterling exchange rate at the closing of the swap and the same market rate at December 31, 1999.
To determine the market value of the above financial derivatives, the Company uses adequate pricing models.

The following table indicates the notional amount and the average interest rate to be paid/received by maturity for interest rate swaps.

	Maturity						Total
	2000	2001	2002	2003	2004	2005	
Interest rate swap							
Fixed pay rate, variable receive rate:							
• notional amount [billions of lire]	217	125	300	1,100	103	70	1,915
• weighted average pay rate	4.39%	3.80%	4.65%	3.92%	4.25%	4.71%	4.12%
• weighted average	Libor	Libor	Libor	Libor	Libor	Libor	Libor
receive rate	3M Euro	3M Euro	3M Euro	3M Euro	3M Euro	3M Euro	3M Euro

Zero cost collars include two contracts with an initial notional value of Lire 136 billion each, with maturity in 2000.

The *cross-currency and interest rate swaps*, stipulated in 1999 and hedging European Investment Bank [EIB] loans in pounds sterling, amount to Lire 605 billion and allow variable rates in pounds sterling to be converted into fixed or variable rates in Euro.

On December 17, 1999, 10 *interest rate swap* contracts were stipulated, with deferred effect starting from the month of June 2000, for a total amount of Lire 487 billion to hedge interest rate exposure on Italian lire loans which replaced the Cassa Depositi e Prestiti loans.

"Other" in the memorandum accounts also include Lire 1,455 billion of *interest rate swap* contracts to hedge interest on short-term loans.

STATEMENTS OF INCOME

Production value ***Lire 36,616,775 million***

[Lire 37,297,174 million in 1998]

Production value, which decreased by Lire 680,399 million compared to 1998, includes the following:

Sales and service revenues *Lire 35,856,164 million*

Sales and service revenues decreased by Lire 435,750 million [-1.2%] compared to 1998. A breakdown of sales and service revenues by type of business and geographic region, as required under Article 2427, Section 10 of the Italian Civil Code, is given below:

Breakdown of sales and service revenues by type of business

[in millions of lire]	1999	1998	Change
Sales:			
- telephone products	1,008,453	952,744	55,709
- other goods	12,132	10,513	1,619
	1,020,585	963,257	57,328
Services:			
- Traffic [*]	21,290,647	22,744,860	[1,454,213]
- Basic charges:	11,780,323	10,952,892	827,431
• lines leased to TLC operators	1,227,079	929,847	297,232
- Activation fees	419,343	425,393	[6,050]
- Consulting and co-ordination fees	240,617	191,496	49,121
- Miscellaneous services and other revenues	1,104,649	1,014,016	90,633
	34,835,579	35,328,657	[493,078]
Total	35,856,164	36,291,914	[435,750]

[*] broken down as follows:

[in millions of lire]	1999	1998	Change
• domestic outgoing from fixed networks	16,180,998	17,724,450	[1,543,452]
• other carriers' network traffic	669,359	467,847	201,512
• international	3,309,174	3,448,803	[139,629]

• miscellaneous traffic revenues	467,530	500,753	[33,223]

2324

Breakdown of "sales and service revenues" by geographic region

[in millions of lire]	International revenues [incoming services]	Italian revenues [outgoing services]	Total
EUROPE	773,809	1,428,332	2,202,141
OTHER AREAS	638,089	844,388	1,482,477
	1,411,898	2,272,720	3,684,618
ITALY			32,171,546
Total			35,856,164

Note that, as stated in the summary of accounting policies, revenues are shown gross of Lire 6,320,978 million due to other carriers [Lire 5,983,217 million in 1998].

• Sales revenues Lire 1,020,585 million

Sales revenues, up by Lire 57,328 million [+6.0%] compared to 1998, mainly arise from sales of telephone and telematic products [special internal systems, facsimile machines, data transmission equipment and accessories].

• Service revenues Lire 34,835,579 million

Service revenues decreased by Lire 493,078 million [-1.4%] compared to 1998, which can mainly be ascribed to the "traffic revenues" which, as mentioned, are shown gross of the amount due to other carriers of Lire 6,320,978 million.
Service revenues fell primarily as a result of a decrease in traffic in terms of amount [-6.4%], notwithstanding the increase in terms of minutes [+11.6%]. This situation was affected by the tariff change of January 6, 1999, the commercial policies aimed at customer retention and the new interconnecting rates, whose effects were partly countered by the increase in basic rates following the tariff changes, the growth in *ISDN* line connections and the interconnecting relationships with other carriers [+7.6%] and other revenue.
In accordance with Article 18, Final Section, of Law No. 41/1986, traffic consumption units in 1999 for class B subscribers [residential] were again calculated at reduced rates for low-volume traffic use [so-called socially sensitive rate band]. Such reduction totals Lire 7,809 million.

Changes in inventory of contract work in process *-Lire 20,215 million*

Changes in inventory of contract work in process represent the difference between the increase in work in progress and the decrease for completed contracts.

Increases in capitalized internal construction costs *Lire 26,471 million*

Increases in capitalized internal construction costs decreased by Lire 7,857 million [-22.9%] compared to 1998. Such item includes only capitalized personnel costs.

Other revenues and income *Lire 754,355 million*

Other revenues and income, which decreased by Lire 150,679 million [-16.6%] compared to 1998, include the following:

Operating grants Lire 2,637 million

Operating grants, up by Lire 1,783 million compared to 1998, refer to grants made by the European Community to cover the costs of personnel training programs and the introduction of technological innovation.

Other Lire 751,718 million

Such item, which decreased by Lire 152,462 million compared to 1998, also includes revenues from services provided to Group companies [mainly TIM] under special contracts. A breakdown of this item is given below:

[in millions of lire]	1999	1998	Change
• Gains on disposal of production assets	29,202	44,006	[14,804]
• Reimbursements for costs of employees on loan, mainly at Group companies	72,348	107,569	[35,221]
• Reimbursements for damage by outsiders and customers	30,915	34,614	[3,699]
• Income from building investments	15,745	17,705	[1,960]
• Fees for cable moving, line transfers and hookups	5,899	2,169	3,730
• Capital grants recorded in income	74,879	67,394	7,485
• Revenues from outsourcing services provided to Group companies	77,074	116,444	[39,370]
• Late payment fees	227,382	231,844	[4,462]
• Indemnification, reimbursements and recoveries and other miscellaneous income	218,274	282,435	[64,161]
Total	751,718	904,180	[152,462]

Production cost ***Lire 29,508,741 million***

[Lire 32,254,740 million in 1998]

Production cost, which decreased by Lire 2,745,999 million compared to 1998, includes the items below:

Raw materials, supplies and merchandise *Lire 1,174,168 million*

Raw materials, supplies and merchandise, which decreased by Lire 120,793 million [-9.3%] compared to 1998, refer mainly to the expenses for sales of telecommunications products and systems, supplies of materials and other goods purchased for operating purposes.

Services *Lire 11,558,881 million*

Services, up by Lire 590,032 million [+5.4%] compared to 1998, mainly include the operating costs for the TLC network, buildings and information systems, operating costs,

2326

as well as costs pertaining to training, studies and research and technical consulting services. Services include the following:

[in millions of lire]	1999	1998	Change
Direct service costs	1,570,113	1,567,427	2,686
Operating costs	2,299,780	2,163,297	136,483
Marketing costs	1,047,637	868,901	178,736
Know-how development costs	320,373	386,007	[65,634]
Amounts due to other carriers	6,320,978	5,983,217	337,761
Total	11,558,881	10,968,849	590,032

An analysis of the composition of such costs is as follows:

a] "direct service costs" include the operating and maintenance costs of the TLC network, public telephone installations and terminals leased to customers. In particular, in 1999, the interconnecting costs to the other operators' networks increased by Lire 41,054 million [Lire 134 million in 1998];

b] "operating costs" refer to the operating and maintenance costs of buildings, vehicles, information systems and equipment, as well as overheads; they also include costs incurred for the take-over bid and negotiations with Deutsche Telekom [Lire 129,411 million] and Lire 86,669 million mainly to update the information systems to guarantee *carrier preselection* and *number portability*;

c] "marketing costs" include selling expenses, post-sales assistance, customer relations, advertising and promotion, as well as advertising costs [Lire 19,911 million] incurred for the take-over bid and the expenses [Lire 92,324 million] arising from the trade agreements with the Internet Service Providers;

d] "know-how development costs" are made up by costs pertaining to training, studies and research and consulting services;

e] "amounts due to other carriers" include, amongst other items, Lire 4,749,814 million due to Italian mobile carriers, Lire 1,129,218 million to foreign correspondents, Lire 310,764 million to the service providers Audiotel and Videotel and Lire 98,400 million

to other national wireline telephone carriers.

Use of property not owned *Lire 852,638 million*

Use of property not owned, which decreased by Lire 69,100 million [-7.5%] compared to 1998, includes mainly service costs [for lease of TLC circuits and satellite systems], amounting to Lire 506,898 million, and operating costs [for building rentals, property and vehicle leases and equipment rentals], amounting to Lire 340,726 million. As regards lease installments, principal and interest total, respectively, Lire 31,180 million and Lire 38,108 million.

Personnel *Lire 6,178,698 million*

Personnel costs show a decrease of Lire 181,048 million [-2.8%] compared to 1998, due to the contrasting effects created by the reduction in the average number of employees - as set forth in the table below- and the increase in the average per unit cost [Lire 80.1 million in 1999 compared to Lire 79.2 million in 1998]. The increase in the average cost per capita was affected by the collective bargaining agreements carried forward, the upward adjustment to the reserve for employee termination indemnities and seniority and career increases, that were partly offset by the reduction in overtime and INPS social security contribution rates.
Personnel costs include costs for employees on loan to other Group companies [Lire 72,348 million in 1999 and Lire 107,569 million in 1998]. The recovery of such costs is recorded under "*other revenues and income*".
A comparative breakdown of the average number of employees by professional category is given below:

[in millions of lire]	1999	1998	Change
Executives	1,113	1,163	[50]
Middle management	5,105	4,965	140
Clerical staff	58,318	60,682	[2,364]
Technicians	12,648	13,484	[836]
Total	77,184	80,294	[3,110]

Amortization, depreciation and writedowns *Lire 8,307,582 million*

Amortization, depreciation and writedowns, which decreased by Lire 2,424,087 million [-22.6%] compared to 1998, include the following:

Amortization of intangible assets Lire 1,253,215 million
Amortization of intangible assets shows an increase of Lire 73,652 million compared to 1998, due to the significant software investments which became amortizable during the year.

The amortization charge refers to the following assets:

[in millions of lire]	1999	1998	Change
• Start-up and expansion costs	=	820	[820]
• Industrial patents and intellectual property rights	1,128,436	1,039,048	89,388
• Permits, licenses, trademarks and similar rights	23,630	23,017	613
• Goodwill	3,800	3,800	=

2328

• Other intangibles:						
leasehold improvements	66,058		80,044			[13,986]
exclusive rights to the Great Jubilee 2000 and other intangibles	31,291	97,349	32,834	112,878	[1,543]	[15,529]
Total		1,253,215		1,179,563		73,652

Depreciation of fixed assets — Lire 6,513,033 million

Depreciation of fixed assets shows a decrease of Lire 710,967 million [-9.8%] compared to 1998; the decrease reflects the absence of the depreciation charge on the *DECT* and *SOCRATE* assets that were written down in 1998, the reduction in the amount of depreciable assets and the change in the mix of depreciable assets. The decrease is also due, for about Lire 300 billion, to the revised depreciation rates caused, on one hand, by the extension of the useful life of copper cables [owing to the introduction of signal compression techniques – the *ADSL* systems – which make it possible to provide high-speed interactive video and Internet services on the general telephone network], and, on the other hand, by the reduction in the estimated useful life of switching and transmission installations [owing to the increase in software components contained therein].
The average depreciation rate, calculated by taking into account the above depreciation rate and the assets being depreciated, is equal to 8.6% [9.7% in 1998].

The depreciation charge is calculated using the following average rates:

Land and building	3.3%
Plant and machinery	9.2%
Manufacturing and distribution equipment	20.2%
Other fixed assets	31.7%

The total depreciation charge is calculated for all asset categories using the rates indicated in the Ministry of Finance Decrees of October 29, 1974 [for assets purchased up to 1988] and December 31, 1988 [for assets purchased thereafter]. Accelerated depreciation is also calculated in accordance with Article 67, Section 3, of Presidential Decree No. 917/1986. An analysis of the depreciation charge is shown below:

[in millions of lire]	
Land and buildings	407,222
Plant and machinery	5,663,514
Manufacturing and distribution equipment	69,673
Other fixed assets	372,624
Total	6,513,033

Other writedowns of intangibles and fixed assets — Lire 142,299 million

Other writedowns of intangibles and fixed assets shows a decrease of Lire 1,691,701 million compared to 1998 mainly with respect to the *DECT* and *SOCRATE* platforms that were written down in the 1998 financial statements.
The writedowns refer to the permanent reduction in the value of public telephone installations [Lire 93,000 million] and writedowns of the residual amount of installations and software related to the *DECT* platform [amounting to Lire 44,380 million and Lire 4,919 million, respectively].

Writedowns of receivables included in current assets and liquid assets — Lire 399,035 million

This item, representing the provision to the allowance for bad debts, decreased by Lire 95,071 million compared to 1998 owing mainly to a reduction in doubtful receivables from business customers, partly as a consequence of the settlement of the dispute with the Italian Postal Administration.

Change in inventory of raw materials, supplies and merchandise — *Lire 10,370 million*

Change in inventory of raw materials, supplies and merchandise pertains to products purchased for sale and maintenance, which were not used during the year, net of writedowns made to account for obsolescence and a shorter period of utilization.

2330

Provisions for risks *Lire 156,225 million*

These refer to provisions made to the "*reserve for litigation*" to cover expenses connected with the probable outcome of disputes with third parties [Lire 39,904 million] and to the "*reserve for contractual risks and other risks*" to cover risks stemming from the settlement of trade and sundry items [Lire 116,321 million], of which Lire 96,110 million relates to the 1999 interconnecting rates notified by resolution of the Telecommunications Authority of February 15, 2000.

Miscellaneous operating costs *Lire 1,270,179 million*

Miscellaneous operating costs, which decreased by Lire 489,591 million compared to 1998, include the following:

Losses on disposal of assets Lire 206,471 million

Losses on disposal of assets decreased by Lire 379,627 million from 1998 due to network rationalization and modernization, started in previous years, which led to losses essentially from disposals of switching installations, copper cables in the long distance network and obsolete software projects.
In fact, the gross amount of assets disposed of during 1999 dropped from Lire 6,586 billion in 1998 to Lire 3,627 billion in 1999.

TLC operating fee Lire 755,718 million

This fee, up by Lire 2,718 million compared to 1998, refers to the TLC operating fee [Lire 747,750 million] computed on sales revenues, which replaced the license fee starting from 1999, and the new charge [Lire 7,968 million] for operating the *Authority*.

Other miscellaneous costs Lire 307,990 million

Other miscellaneous costs, which decreased by Lire 112,682 million compared to 1998, include the following:

[In millions of lire]	1999	1998	Change
• Other indirect duties and annual taxes, relating mainly to the local property tax, local duties, stamp and register tax, vehicle tax, Technical Office and Finance taxes and fees, license tax on mobile equipment	134,264	139,067	[4,803]
• Charges for broadband suspension and non-reusable materials for *SOCRATE*	73,067	177,447	[104,380]
• Other costs, essentially relating to contributions and membership dues, compensation due to customers under service regulations for delays in hookups or line transfers and losses caused by fraudulent use of TLC services	100,659	104,158	[3,499]
Total	307,990	420,672	[112,682]

Financial income and expense ***Lire 2,753,818 million***
[Lire 600,132 million in 1998]

Financial income and expense, which increased by Lire 2,153,686 million compared to 1998, include the following:

[in millions of lire]	1999	1998	Change
Income from investments	3,326,941	1,194,874	2,132,067
Other financial income	309,647	384,576	[74,929]
Interest and other financial expense	[882,770]	[979,318]	96,548
Total	2,753,818	600,132	2,153,686

Income from investments refers to the following:

[in millions of lire]		1999		1998		Change
Dividends from subsidiaries, affiliates and other companies		2,083,042		813,957		1,269,085
Other income from investments:						
• tax credits for dividends	1,155,991		253,187		902,804	
• gains on sales of investments	87,908	1,243,899	127,730	380,917	[39,822]	862,982
Total		3,326,941		1,194,874		2,132,067

Tax credits on dividends of Lire 1,155,991 million are made up of Lire 887,415 million of tax credits on dividends from subsidiaries accrued for 1999 and Lire 268,576 million of dividends collected in 1999, mainly on the extraordinary dividends from Sirti.

2332

Dividends can be analyzed as follows:

[in millions of lire]		1999		1998		Change
Accrued dividends from subsidiaries						
TIM		1,400,836		582,484		818,352

Total			309,647	384,576	[74,929]

Interest and other financial expense — *Lire 882,770 million*

Interest and other financial expense, which decreased by Lire 96,548 million compared to 1998, can be analyzed as follows:

[in millions of lire]	Medium/ long-term	Short-term	1999 Total	1998	Change
Interest, premiums and other similar charges on debentures	26,860	=	26,860	45,017	[18,157]
Interest and fees on loans due to banks	374,587	141,320	515,907	604,231	[88,324]
Interest and fees on loans due to other lenders	111,807	=	111,807	167,305	[55,498]
Interest on loans due to suppliers	=	6,916	6,916	359	6,557
Interest and fees on loans to subsidiaries	=	70,447	70,447	62,068	8,379
Interest and fees on loans to affiliated companies	=	1,011	1,011	3,494	[2,483]
Interest on other loans	=	1,919	1,919	3,228	[1,309]
	513,254	221,613	734,867	885,702	[150,835]
Foreign exchange losses			58,535	43,821	14,714
Accrued portion of discounts and similar charges on debenture issues			1,418	1,506	[88]
Other financial expense			87,950	48,289	39,661
Total			882,770	979,318	[96,548]

"Interest and fees on loans due to banks" are shown net of the interest expense on loans, equivalent to three percentage points [Lire 77,209 million compared to Lire 88,521 million in 1998] subsidized under Law No. 67/1988, in connection with loans that replaced those which should have been made by Cassa Depositi e Prestiti.

2335

Value adjustments on financial assets ***-Lire 294,605 million***
[-Lire 805,343 million in 1998]

Value adjustments on financial assets, which decreased by Lire 510,738 million compared to 1998, refer entirely to writedowns of the following holdings:

- Stream for Lire 112,300 million;
- Iridium Italia for Lire 77,010 million, of which Lire 14,006 million recorded in a specific reserve;
- Consultel for Lire 2,288 million, entirely recorded in a specific reserve;
- Réseau for Lire 1,478 million, entirely recorded in a specific reserve;
- TMI-Telemedia International Italia for Lire 87,535 million;
- Sidac for Lire 516 million, entirely recorded in a specific reserve;
- TSP for Lire 10,825 million;
- Sirti for Lire 773 million; the writedown was made to adjust the book value of the shares purchased for later disposal to market value. The shares are recorded under "short-term financial assets";
- other companies for Lire 1,880 million entirely recorded a specific reserve.

Extraordinary income and expense ***-Lire 656,971 million***
[Lire 128,765 million in 1998]

This item shows a net expense balance of Lire 656,971 million, with an increase of Lire 785,736 million compared to 1998.
Income [Lire 71,286 million] decreased by Lire 632,093 million compared to 1998; such reduction mainly reflects the cumulative deferred tax assets up to January 1, 1999 [Lire 538,481 million] that were recorded in the 1998 financial statements, in accordance with new Italian and international accounting principles.
Expense [Lire 728,257 million] increased by Lire 153,643 million over 1998. Such increase is mainly due to expenses connected with corporate restructuring activities [Lire 245,973 million compared to Lire 215,761 million in 1998], social security charges pursuant to Law No. 58/92 for the FPT fund [Lire 363,688 million compared to Lire 333,134 in 1998] and other charges incurred on the sale of 65% of Stream shares [Lire 55,470 million].

Income taxes ***Lire 3,859,913 million***
[Lire 2,176,214 million in 1998]

In accordance with Italian and international accounting principles this item includes current income taxes of Lire 3,257,767 million [Lire 2,808,731 million in 1998] and deferred income taxes of Lire 602,146 million [-Lire 632,517 million in 1998]. The change [Lire 1,683,699 million] in current income taxes is attributable to higher taxable income; in deferred income taxes the change is due mainly to significant deferred tax assets recorded in 1998, partly connected to the writedowns of the *SOCRATE* and *DECT* platforms.
Total income taxes can also be analyzed as follows: Lire 3,306,873 million relating to Italian income tax IRPEG and Lire 553,042 million relating to local income tax IRAP.

The effective tax rate in 1999 [43.3%], given by the percentage of income taxes to income before income taxes, is in line with the theoretical tax rate; the composition of such tax rates is as follows:

		IRPEG	IRAP	Total
Theoretical taxes	[A]	**3,296,802**	**562,145**	**3,858,947**
• Temporary timing differences taxed and deductible in future years				
– dividends accrued		[887,415]	=	[887,415]
– provision for writedown of receivables		122,232	=	122,232
– net movements on plant writedowns, other provisions and sundry		201,092	12,282	213,374
• Reversal of prior years' temporary timing differences				
– accelerated depreciation		285,973	32,848	318,821
– sundry		[370,876]	[16,857]	[387,733]
• Permanent differences		31,005	15,589	46,594
• DIT and other tax benefits		[2,361]	[24,692]	[27,053]
Current income taxes		**2,676,452**	**581,315**	**3,257,767**
Deferred income taxes		**630,419**	**[28,273]**	**602,146**
Tax expense charged to statement of income	[B]	**3,306,871**	**553,042**	**3,859,913**
Income before income taxes	[C]			8,910,276
Theoretical tax rate	[A/C]			**43.31%**
Effective tax rate	[B/C]			**43.32%**

[1] Data taken from the latest financial statements.
[2] Includes net income (loss).
[3] Net of distributed dividends.
[4] Covered by the reserve for charges of the affiliates.
[5] Data taken from the consolidated financial statements.
[6] Carrying value equal to zero as a result of the transformation in February, 1998, of Meie Assicuratrice from a mutual insurance company to a corporation, with consequent distribution of shares to the insureds.
[7] Does not include shares included in short - term financial assets.
[8] The stockholders' equity is the percentage held, taking into account the redemption of all the Class A preferred. At December 31, 1999, the percentage of the ordinary capital is 32.50%, and the average percentage of total stockholders' equity, including the Class A preferred is 21.40%.
[9] Data taken from the consolidated financial statements on December 31, 1998.

STATUTORY AUDITORS' REPORT ON THE FINANCIAL STATEMENTS AT DECEMBER 31, 1999 [LEGISLATIVE DECREE NO. 58/98, ART. 153 AND ART. 2429, PARA. 3 OF THE ITALIAN CIVIL CODE]

Dear Stockholders,

Legislative Decree No. 58 of February 24, 1998, which includes the provisions covering financial brokerage in the Testo Unico, has completely changed the rules for the monitoring and control of the companies listed on regulated markets.
Monitoring activities have been entrusted to the Board of Statutory Auditors, while the control of the accounting system, financial statements and issuance of opinions on the congruity of extraordinary transactions have been charged to the audit firms registered with CONSOB.
In view of the above, 1999 is the first year in which the new law is being applied by the Company.
During the course of the year ended December 31, 1999, we have carried out monitoring activities set forth by law and, where necessary, making reference to the code of ethics of the Board of Statutory Auditors recommended by the National Boards of Dottori Commercialisti and Ragionieri; there were 17 meetings of the Board of Statutory Auditors.
We also attended the meetings of the Boards of Directors and the Executive Committee, which numbered 24, and have also received periodic information from the directors concerning the activities conducted and the most important transactions entered into in terms of the economic, financial and equity effect on Telecom Italia, ensuring that the steps decided and acted upon by the Company were in accordance with the law, the by-laws and generally accept economic rationale.
We have acquired information and monitored, as far as our responsibilities are involved, the adequacy of the organizational structure of the Company and the proper keeping of administration, through direct observation, gathering of information from those in charge of the organizational functions and meetings with the audit firm of Arthur Andersen S.p.A., for purposes of a reciprocal exchange of important information and data.
We have evaluated and monitored the adequacy of the internal control system and the administrative and accounting system, as well as its reliability to correctly represent the operating events, by obtaining information from those in charge of the respective functions, examining corporate documentation and reviewing the results of the work carried out by the audit firm.
We have ascertained that the laws have been respected with regard to the preparation and formation of the statutory financial statements of Telecom Italia, as well as the directors' report accompanying said statements, also by direct tests and information obtained from the audit firm.
Furthermore, with specific reference to CONSOB instructions regarding corporate controls, we state that the disclosure regarding "transactions with related parties" and "intercompany transactions" presented in the directors' report have been prepared in conformity with CONSOB instructions No. 97001574 of February 20, 1997 and No. 98015375 of February 27, 1998. In particular, such transactions were carried out in the interests of Telecom Italia at normal market conditions or in accordance with specific regulatory provisions. To this end, we found neither unusual or nonrecurring transactions not in the normal course of business nor did any conflicts of interest emerge as regards the directors.

Report of the Independent Auditors on the financial statements pursuant to art. 156 of Legislative Decree no. 58 of February 24, 1998
(Translation from the Original Issued in Italian)

To the Shareholders of
Telecom Italia S.p.A.:

1. We have audited the financial statements of Telecom Italia S.p.A. as of and for the year ended December 31, 1999. These financial statements are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2. We conducted our audit in accordance with generally accepted auditing standards in Italy as recommended by the Italian Regulatory Commission for Companies and the Stock Exchange ("CONSOB"). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the adequacy and the fairness of the accounting principles used and the reasonableness of the estimates made by the Directors. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries, representing 32% and 4% of the book value of investments and total assets respectively, have been examined by other auditing firms. Our opinion expressed in this report, insofar as it relates to the amounts included for those subsidiaries, is based also upon the audits of the other auditing firms.

   For our opinion on the prior year' s financial statements, which are presented for comparative purposes as required by law, reference should be made to our auditors' report dated May 12 1999.

3. In our opinion, the financial statements of Telecom Italia S.p.A. as of and for the year ended December 31, 1999 comply with the Italian statutory provisions related to financial statements; therefore they give a true and fair view of the financial position and results of operations of Telecom Italia S.p.A.

4. For a better understanding of the financial statements, attention is drawn to the information described in the annual report regarding pension costs regulated by Law no. 58/1992 and the fact that, in accordance with the provisions of the above law, a substantial portion of the equalization charges for vested pension benefits of Company personnel which have matured under other pension plans are recorded on a cash basis in annual installments starting from the date of definition of the individual requests by the National Social Security Institute (INPS).

Turin, Italy
April 10, 2000

Arthur Andersen SpA
s/Vincenzo Coppa - Partner

Note: The financial statements have been translated into English from the original version in Italian. They have been prepared in accordance with the Italian law related to financial statements. Certain accounting practices applied by the Company that conform with generally accepted accounting principles in Italy, may not conform with generally accepted accounting principles in other countries.

Proposed resolutions

The Shareholders' Meeting of Telecom Italia S.p.A. is convened on June 28, 2000, c/o Company registered office - in Turin, Via Bertola 34 - and, if necessary, on July 3, 2000 same time and same place.

FINANCIAL STATEMENTS AND APPROPRIATION OF NET INCOME FOR 1999; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders,

Whilst calling your attention to the report on operations illustrating the Company's financial statements and the Group's consolidated financial statements, we propose, confirming previous announcements, that a dividend of 89.1% of the net income of the Company in 1999 should be distributed.

With Telecom Italia S.p.A.'s result improving by 81% over the previous year, the amount involved comes to a total figure of Lire 4,499,016,737,500, which is equivalent to Lire 600 for each ordinary share [the dividend in 1998 was Lire 280] and Lire 620 for each savings share [the dividend in 1998 was Lire 300]. This unit sum will be increased [and duly rounded off] by the amount resulting from the joint and proportional assignment to any shares held by third party shareholders of rights to profits relating to treasury shares held by the Company.

As you know the Shareholders' Meeting held on January 14, 2000 in fact authorized the Company to purchase a maximum number of 742,615,722 treasury savings shares at a price of Euro 6.5 each, in the form of a tender offer. In the event that the number of savings shares covered by the tender offer is less than the aforesaid maximum [this has in fact occurred], the Shareholders' Meeting has authorized the Chairman and Chief Executive Officer and the Deputy Chairman to make open market purchases of the Company's treasury savings shares on Telematico - once again at a price of Euro 6.5 per share - during the nine months after termination of the tender offer period [March 17, 2000] and for a maximum number equivalent to the difference between the maximum number of 742,615,722 and the lower number of validly tendered savings shares.

The result of this is that the buy-back is still underway and will continue until 17th December 2000, as a total of 1,793,820 savings shares have been validly tendered. However, in order to facilitate calculating the amounts due on distributing the net income, we propose to you that purchases should be suspended during the time elapsing between the approval of the financial statements and the allocation of net income for 1999 by the Shareholders' Meeting and the day on which coupon is due, and that the time lost as a result of the suspension should be recovered at the end of the period envisaged for purchasing on the stock exchange.

Based on the foregoing, we submit to your approval the following

Agenda

The Shareholders' Meeting of Telecom Italia S.p.A.

- after examining the Company's financial statements for the year ended December 31, 1999;
- in consideration of the report on operations accompanying the financial statements;
- after acknowledging the reports provided by the Board of Statutory Auditors and audit firm Arthur Andersen;
- in view of the resolution authorizing the purchase of treasury savings shares passed by the Ordinary Shareholders' Meeting held on January 14, 2000;

resolves

1. to approve the Board of Directors' report on operations, the balance sheet, the statement of income and the notes to the annual financial statements of Telecom Italia

2365

S.p.A. as of December 31, 1999, which show a net income of Lire 5,050,362,910,293;

2. to appropriate the aforesaid net income as follows:
   - Lire 252,518,145,515 [5% of the net income] to the legal reserve;
   - Lire 298,828,027,278 [5.9% of the net income] to the reserve for accelerated depreciation;
   - Lire 4,499,016,737,500 [89.1% of the net income] to be distributed, in the form of a dividend of Lire 600 for each ordinary share and Lire 620 for each savings share, each with a par value of Lire 1,000.

   However, as the Company holds treasury shares, in respect of which the dividend is proportionally assigned to the other shares, each ordinary and savings share held by third parties is entitled to receive a corresponding dividend increase, which will be rounded off to the higher lira by using and reducing the extraordinary reserve;
3. to pay the dividend, increased as envisaged in the previous point, as from July 27, 2000, with the coupon due on July 24, 2000; and
4. from the day on which this resolution is passed until that on which the coupon for the 1999 dividend is due, to suspend operations for purchasing any of the Company's treasury shares, and therefore - as a result of the envisaged buy-back suspension - to authorize continuing the purchase on the same conditions for a number of days equivalent to that of the aforesaid suspension, i.e. after 17th December 2000.

On the basis of Presidential Decree 917, of 22nd December 1986, art. 14, and later amendments, the total dividend will entitle Shareholders to a full tax credit of 58.73%, which may be used without limitations.

APPOINTMENT OF A DIRECTOR

To our Shareholders,
in this session of the meeting you are asked to make arrangements to appoint a Director to replace Mr. Enrico Bondi, who resigned his post.
The Board of Directors, for his replacement, has therefore co-opted Mr. Ettore Lonati, whom we ask that you confirm as Director

We therefore submit for your approval the following

Agenda

The Shareholders' Meeting of Telecom Italia S.p.A. in its ordinary session of the meeting:
a] having acknowledged the resignation of a Director;
b] having acknowledged the resolution passed by the Shareholders' Meeting of June 28, 1999, which, amongst other things, established the number of the members of the Board of Directors of Company in thirteen for a term of office of three years from the date of the related mandate, and, therefore, up until the approval of the financial statements for the year ended December 31, 2001.
c] having examined the report by the Board of Directors;

resolves

to appoint Mr. Ettore Lonati as a Director on the Board of Directors of the Company, whose term of office will expire with that of the other directors in office and, therefore, up to the approval of the financial statements for the year ended December 31, 2001.

RENEWING THE BOARD OF THE STATUTORY AUDITORS FOR THE THREE-YEAR PERIOD 2000-2002; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders,
in this ordinary session of the meeting you are asked to make arrangements to appoint the Board of Statutory Auditors for the three-year period 2000-2002.
To this end, in accordance with the law and the by-laws, the deliberations to be adopted are as follows:

- to determine the number of members forming the Board of Statutory Auditors;
- to appoint the regular and alternate auditors in compliance with the special provisions that apply;
- to establish the annual fee due to auditors.

According to Article 17 of the by-laws, Telecom Italia's Board of Statutory Auditors must consist of no less than five and no more than eight regular members. The Board of Directors proposes that you confirm the five-member composition, as this number appears to be appropriate in terms of effectively fulfilling the duties assigned by law to the controlling body, whilst also ensuring its operational efficiency.
As far as the choice of auditors is concerned, it must be stressed that - in accordance with the existing agreements currently in force - one regular auditor [who chairs the Board of Statutory Auditors] is designated by the Treasury Minister and a second regular auditor is designated by the Communications Minister. The aforesaid Ministers have in fact respectively designated Mr. Paolo Germani and Mr. Fabrizio Quarta.
On the question of the special power to appoint a regular auditor conferred under Article 5 of the by-laws to the Treasury Minister, in liaison with the Minister for Industry, Commerce and Crafts, in a letter dated April 3, 2000 the aforesaid Minister for Treasury, Budget and Economic Planning has announced that "in advance of renewing the board of statutory auditors of Telecom Italia S.p.A. and in order to allow the company and its shareholders to make the appropriate organizational choices in due time, [...], the Italian Government does not intend to appoint a member of Telecom Italia's board of statutory auditors, exercising the special powers envisaged by Article 2, clause 1, letter d] of Law Decree 332 of May 31, 1994, converted into Law 474 of July 30, 1994, which are also included in the company's by-laws".
The choice of the remaining three members of the Board of Statutory Auditors is left to the majority/minority debate held in the framework of the shareholders' meeting and, in particular, to the voting mechanism based on slates, without prejudice to the fact that, whatever happens, one regular auditor will be elected by the minority. In accordance with the by-laws, the slates are presented by shareholders who - either alone or with others - represent at least 1% of the share capital with voting rights. The procedure envisages that the slates should be published in daily newspapers and deposited at the Company's registered office at least ten days before that established for the Shareholders' Meeting on first call.
Finally, as far as the annual fee to be acknowledged to regular auditors in accordance with Article 2402 of the civil code is concerned, the Board of Directors has no proposal to put forward and leaves this matter for the Shareholders' Meeting to decide.

In consideration of the above points, the Board of Directors:

- after acknowledging the end of the three-year period of office of the Board of Statutory Auditors appointed by the Shareholders' Meeting on June 6, 1997;
- in view of current provisions concerning the duration in office, fees and composition of the Board of Statutory Auditors;

- after acknowledging requirements stemming from the agreements between the Company and the Communications Ministry approved by Presidential Decree 523 of August 13, 1984 and quoted in clause 2 of Article 17 of the by-laws;
- after acknowledging the letter dated April 3, 2000 of the Minister for Treasury, Budget and Economic Planning announcing the Government's intention not to exercise the special power to appoint a regular auditor provided by Article 5 of the by-laws; and
- in consideration of Article 17 of the by-laws;

asks the Shareholders' Meeting of Telecom Italia S.p.A.

1. to set the number of the Company's regular auditors at five;
2. to appoint Mr. Paolo Germani [designated under the aforesaid agreements by the Minister for Treasury, Budget and Economic Planning] and Mr. Fabrizio Quarta [designated under the same agreements by the Communications Minister] as regular auditors;
3. to appoint the three remaining regular auditors and the two alternate auditors by choosing a slate of candidates for the position of Company auditor from those presented and published in accordance with the modalities and terms specified in the by-laws;
4. to establish the annual fee to be paid to the regular auditors as appointed above.

2370

ADOPTING RULES REGULATING SHAREHOLDERS' MEETINGS; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders,
in its standard code of self-discipline, the Committee for corporate governance of companies listed in the Italian Stock Exchange recommends that the shareholders' meeting should adopt rules regulating the "orderly and functional" holding of meetings. Your Board of Directors has complied in full with this recommendation, by including a corresponding provision in Telecom Italia's code of self-discipline.
In the course of this ordinary session you are therefore asked to adopt a set of rules regulating shareholders' meetings. The text of these rules has been prepared following an attentive benchmarking of the best practice at the national level, in such a way as to combine and blend the need for efficiency in decision-making with the need to guarantee shareholders.

Based on the foregoing, we submit to your approval the following

Agenda

In this ordinary session, the Shareholders' Meeting of Telecom Italia S.p.A.:
a] in consideration of the recommendation made by Borsa Italiana S.p.A. in respect of adopting rules regulating shareholders' meetings, to which the Company's Board of Directors has conformed in adopting Telecom Italia S.p.A.'s code of self-discipline, which envisages that "a set of rules regulating the orderly and functional holding of the company's ordinary and extraordinary shareholders' meetings, guaranteeing each shareholder's right to speak on the matters due to be discussed" should be submitted "to the approval of the shareholders' meeting";
b] taking into account the general principle contained in the first clause of Article 20 of the by-laws, which confers on the meeting's Chairman the task of establishing rules regulating the manner in which it is held;
c] in consideration of the envisaged introduction in the by-laws - as the third and final clause of the aforesaid Article 20 - of a special clause referring to a set of rules regulating the holding of shareholders' meetings;
d] after examining the Board of Directors' report;

resolves

to approve and adopt the set of rules regulating shareholders' meetings consisting of 18 articles, which is attached hereto and forms an integral and essential part of this resolution.

RULES REGULATING SHAREHOLDERS' MEETINGS

Summary

- General principles
- Access to the meeting's premises
- Conducting business
- Dealing with the agenda
- Voting

General principles

Article 1

These rules [approved under a resolution passed by the Shareholders' Meeting held in ordinary session on ...] express the power of self-organization vested in the meeting of Telecom Italia S.p.A.'s ordinary shareholders.

They apply to both the Company's ordinary and extraordinary meetings.

Article 2

As far as anything not specifically envisaged by the Rules is concerned, the Chairman of the meeting - in accordance with the by-laws - will adopt the measures and solutions that he considers to be most appropriate for the regular holding of the meeting's business.

Access to the meeting's premises

Article 3

Any persons who are so entitled in accordance with current laws and the by-laws, or the proxies or representatives of such persons, have the right to speak and vote in meetings [they are referred to hereafter as "participating shareholders"].

In order to participate in meetings, proof of the participant's personal identity is required and he/she must display to the Company's representatives an appropriate document of legitimization [certification and proxy, if required]. After verifying that the participants have the aforesaid document of legitimization, the Company's representatives will issue a special badge of recognition valid for the purpose of verifying and exercising votes. Unless otherwise indicated in the notice of convocation, personal identification and verification of the right to participate in the meeting will begin in the place where the meeting is to be held at least one hour prior to the time fixed for the meeting.

Shareholders participating in the meeting must be guaranteed the right to follow the debate, take part in the debate and exercise their right to vote in accordance with the technical modalities established on each occasion by the Chairman of the meeting.

Any shareholders who, after being admitted to the meeting, leave the premises where the meeting is being held for any reason are under an obligation to inform the auxiliary personnel entrusted by the Company with monitoring the meeting [hereafter referred to as "auxiliary personnel"].

Article 4

The participation of members of the Board of Directors and the Board of Statutory Auditors in the meetings is not subject to any formalities.

Article 5

Company executives and directors and the executives of Group companies may attend meetings, whenever their presence is deemed by the Chairman of the meeting to be useful in relation to the matters to be discussed. At the Chairman's request and always with his approval, professional persons, consultants, experts, financial analysts and qualified

2372

journalists accredited for the meeting in question may follow the meeting's business, but they will not have the right to either speak or vote.
Persons accredited to follow the meeting's business must make themselves known to the Company's representatives at the entrance to the premises where the meeting is being held, collect a special verification badge and exhibit it whenever asked.

Conducting business

Article 6
As envisaged by the by-laws, the Chairman of the meeting is responsible for conducting the meeting's business, ensuring the best possible conditions for its orderly and effective running. Participating shareholders are entitled to make proposals with regard to the way in which meetings are run. The Chairman will assess whether the above proposals are compatible with the proper and orderly running of the meeting.

Article 7
The Chairman of the meeting will avail himself of the auxiliary personnel in order to verify the right of shareholders to participate in the meeting and the regularity of proxies. In running the meeting and drawing up the minutes, he will be aided by a Secretary, except for cases where the assistance of a Notary Public is required. The Secretary or Notary Public may in their turn be assisted by someone of their choice. The Company can organize a service recording the meeting's business so as to facilitate the taking of minutes. For the purposes of managing voting procedures [including verification of the validity of forms used to vote by mail], the Chairman will appoint one or more counters, selecting as many as are deemed appropriate, from among the participating shareholders. The Chairman of the meeting may use further room staff made available by the Company to provide the necessary technical support and order facilities.

Article 8
Under the Chairman's management, an attendance sheet is prepared [which must be attached to the meeting's minutes] indicating shareholders attending personally, by proxy or by any other title envisaged under the law, or who participate in the meeting casting a vote by mail, specifying the number of shares they own.

Article 9
If the number of persons in attendance required to set up the meeting is not reached, the Chairman of the meeting will - once what he judges under the circumstances to be a sufficient period of time has elapsed since the time set for the meeting to begin - inform the participants and defer dealing with the matters on the agenda to the day of the next call. The meeting's business is normally dealt with in a single session. During the course of the session, the Chairman may interrupt business for no more than three hours in cases where he consider this to be necessary, but without prejudice to opposition on the part of the meeting.
Furthermore, the Chairman is entitled to propose adjourning the meeting whenever he so deems fit.

Article 10
The meeting will be held in Italian. The Company will nevertheless provide participants with a simultaneous translation service from Italian into English and vice-versa.
Audio-visual recording and broadcasting instruments are not allowed into the premises where the meeting is being held without authorization from the Chairman of the meeting. This is without prejudice to the provisions specified earlier in respect of the recording service set up to facilitate the taking of minutes.

Dealing with the agenda

Article 11

In the course of dealing with the matters on the agenda, the Chairman may follow a different order to that appearing in the notice of convocation. Similarly, he may arrange for the various points on the agenda to be discussed together or alternatively he may arrange for the individual matters placed on the agenda to be discussed separately.
The Chairman, and at his request, the Company's Directors or senior managers, will illustrate the matters on the agenda.

Article 12

The Chairman is responsible for running and regulating the debate, guaranteeing that it takes place properly and efficiently and that the regular holding of the meeting is not disturbed.
Taking into account the purpose and importance of individual matters on the agenda, the Chairman may, on opening the meeting, determine the amount of time - in no case less than fifteen minutes - available for each speaker to address the meeting. Once this time has elapsed, the Chairman may ask the speaker to conclude within the next five minutes.
The Chairman will remind speakers to observe the time limits established in advance for their addresses and to stick to the matters placed on the agenda. In the event of excesses and/or abuses, the Chairman - exercising the prerogatives assigned to him by the by-laws - may interrupt the shareholder responsible.

Article 13

Participating shareholders are entitled to speak on each of the matters placed on the agenda. Those who have already taken part in the debate may ask to speak once again on the same matter, once the reply stage has been completed and for no more than five minutes, but purely to allow them to give their response and declare their voting intentions.
Persons intending to speak must ask the Chairman or Secretary in writing, indicating the point of the agenda to which their address refers. Such requests may be made at any time before the Chairman has closed the debate on the matter to which the request to speak refers.
The Chairman will usually grant the right to address the meeting according to the order in which requests are received.

Article 14

Both the Board of Directors and participating shareholders have the right to put forward alternative proposals for resolution or proposals either amending or integrating those originally formulated by the Board of Directors. The Chairman will assess whether such proposals are compatible with the meeting's agenda.

Article 15

The members of the Board of Directors and the Board of Statutory Auditors may ask to take part in the debate. At the Chairman's request, senior managers of the Company and Directors and senior managers of Group companies may also address the meeting.

Article 16

Replies to any requests for clarification made during addresses by shareholders will be provided by the Chairman or, at his request, by the Company's Directors or senior managers.

Voting

Article 17

The meeting's votes are usually given on an open vote.

The Chairman will adopt any measures that may be required to ensure the orderly holding of votes. If the circumstances so permit, the Chairman may arrange for voting on a matter to take place either immediately after closing the debate on that particular matter or alternatively after all the matters on the agenda have been discussed.

For each vote, the Chairman will establish the procedure by which it is held. Votes expressed under procedures different to those indicated by the Chairman will be null and void.

Article 18

Once voting operations have been completed and the votes have been counted with the aid of the counters and the Secretary, the Chairman will announce the results of the vote.

CHANGES TO CERTAIN ELEMENTS OF THE POWER TO INCREASE THE SHARE CAPITAL, PURSUANT TO ARTICLE 2443 OF THE CIVIL CODE, IN SUPPORT OF THE STOCK OPTION AND THE CONSEQUENT UPDATING OF ARTICLE 6 OF THE BY-LAWS; CHANGES TO ARTICLES 19 AND 20 AND THE ELIMINATION OF ARTICLE 23 OF THE BY-LAWS; PERTINENT AND RELATED RESOLUTIONS

To our Shareholders,
as you are aware, the Extraordinary Shareholders' Meeting held on 15th December 1998 resolved to give the Board of Directors the power - for a maximum period of five years from the aforesaid date - to increase the share capital against payment by a maximum figure of Lire 74,000,000,000, using the newly issued ordinary shares to implement an incentive and retention plan [the stock option plan] for senior managers employed by Telecom Italia and Telecom Italia subsidiaries and selected by the Board of Directors.
The Board of Directors has already partially exercised the above power by approving the Rules implementing the operation and deliberating, on 17th December 1999, an initial capital increase tranche for a maximum number of 16,595,400 ordinary shares; of this tranche, 4,905,500 of ordinary shares have been subscribed and issued, corresponding to a par value of Lire 4,905,500,000.
The above shareholders' resolution also laid down that the issue price of the shares in support of the stock option would be equivalent to the average of the official prices of Telecom Italia S.p.A. shares registered on the screen-trading stocks market organized and run by Borsa Italiana S.p.A. [so called Telematico] during the six months preceding the incentive scheme period established by the Board of Directors.
On this latter point, and partly in order to account for recent developments in the relevant tax framework, your Board of Directors considers that the rigid mechanism described above applied to establish the issue price is no longer suitable in respect of adopting effective incentive and retention schemes for the Group's management.
The Board of Directors therefore believes that changes should be made to the terms of the resolution passed by the Shareholders' Meeting held on 15th December 1998, giving it the power to establish at its discretion the price of each future capital increase tranche. This will allow the Board to establish on a time by time basis the criterion applied to fix the most appropriate and efficient price in relation to [i] the incentive and retention scheme selected and [ii] the applicable regulatory provisions, which could - amongst other considerations - undergo further changes in the light of the market globalization process.
Furthermore, the Board considers that the aforesaid resolution should be adjusted to the new reference framework, extending the area of potential beneficiaries of the stock option plan to include senior managers employed by holding companies. This is permitted by the combined provisions of Article 2441, final clause, of the Civil Code and Article 134, clauses two and three, of Legislative Decree 58 of February 24, 1998. This adjustment will also require amending Article 6 of the by-laws.

* * *

At the same time it would also be advisable to update the by-laws by canceling Article 23, which was originally introduced in the framework of the privatization process and has now by law lapsed, due to the fact that following the public purchase and exchange offer completed in 1999 Tecnost has purchased the absolute majority

of voting rights exercisable in the Company's ordinary shareholders' meeting [Article 3, final clause, of Law Decree 332 of May 31, 1994, converted into Law 474 of July 30, 1994].

Finally, in line with the general policy of encouraging as far as possible shareholders to participate in shareholders' meetings, which has been expressed by the Committee for the corporate governance of companies listed on the Italian Stock Exchange and fully accepted by your Board in adopting Telecom Italia's Code of Self-discipline, the time has now come to incorporate in the by-laws a clause designed to facilitate the collection of voting proxies among employee shareholders. This possibility is explicitly envisaged by clause three of Article 137 of the aforesaid Legislative Decree 58/1998.

The above initiative comes under the same line of reasoning that has persuaded the Board of Directors to submit to your approval in ordinary session a set of rules regulating the orderly and practical holding of Shareholders' Meetings. In this respect, it is proposed that a special back-up clause referring to the set of rules should be included in the wording of Article 20 [which already contains the general principle of giving the Chairman of the Meeting the power to establish rules on how the meeting should be held].

In consideration of the above, we submit to your approval the following

Agenda

Meeting here in extraordinary session, the shareholders' meeting of Telecom Italia S.p.A.:

a] in consideration of the previous resolution passed by the Extraordinary Shareholders' Meeting held on 15th December 1998 giving the Board of Directors, in accordance with Article 2443, clause two, of the Civil Code, the power to increase the share capital by a maximum figure of Lire 74,000,000,000 through the issuing of ordinary shares available for subscription to senior managers employed by Telecom Italia S.p.A. and Telecom Italia S.p.A. subsidiaries, pursuant to the combined provisions of Article 2441, final clause, of the Civil Code, and Article 134, clauses two and three, of Legislative Decree 58 of February 24, 1998, at a price to be established on the basis of the average of official prices of Telecom Italia ordinary shares registered on the screen-trading stocks market organized and run by Borsa Italiana S.p.A. during the six months preceding the period of the incentive scheme;

b] in consideration of Articles 134, clauses two and three, and Article 137, clause three, of Legislative Decree 58 of February 24, 1998 on share capital increases reserved for employees and on collecting voting proxies;

c] in consideration of Article 3, final clause, of Law Decree 332 of May 31, 1994, converted into Law 474 of July 30, 1994, on the lapsing ope legis of the by-law clauses envisaging limits on shareholdings;

d] after examining the explanatory report provided by the Board of Directors; and

e] after acknowledging the favorable opinion of the Auditors' Committee;

resolves

1. to modify the terms of the power given to the Board of Directors, pursuant to Article 2443, clause 2, of the Civil Code, to increase the Company's share capital referred to in letter a] of the introduction, envisaging
   • that the corresponding shares be made available for subscription to senior

managers - to be selected by the Board of Directors - employed both by Telecom Italia S.p.A. and also by Telecom Italia S.p.A. holding companies or subsidiaries;
- that the Board of Directors be given the power to establish at its discretion, on a time by time basis, the issue price of each future capital increase tranche, in full compliance with legal limits;

2. to correspondingly change the second clause of Article 6 of the by-laws, taking into account the changes that have since occurred, as follows:

Old wording

"The Board of Directors, for a maximum period of five years from the date of the stockholders' resolution authorizing it to do so, pursuant to Article 2443, clause two of the Civil Code, has the power to increase the share capital by payment on one or more occasions, with the consequent issue of ordinary shares, which will rank for dividend pari passu, to be offered for subscription to executives – to be selected by the Board of Directors – employed by Telecom Italia S.p.A. or its subsidiaries, with exclusion of the option right pursuant to the combined provisions of Article 2441, last clause, of the Civil Code, and of Article 134, clauses two and three of Legislative Decree No. 58 of February 24, 1998, up to a maximum of Lire 74,000,000,000, and, accordingly, through the issue of 74,000,000 ordinary shares, with a par value of Lire 1,000 each. The rights to subscribe these shares will be personal and not transferable *inter vivos*. The resolutions of the Board of Directors shall set appropriate deadlines for the subscription and shall provide that, when the increase resolved upon is not subscribed within the deadline set for this purpose, the capital shall be increased by an amount equal to the subscriptions received up to that deadline".

New wording

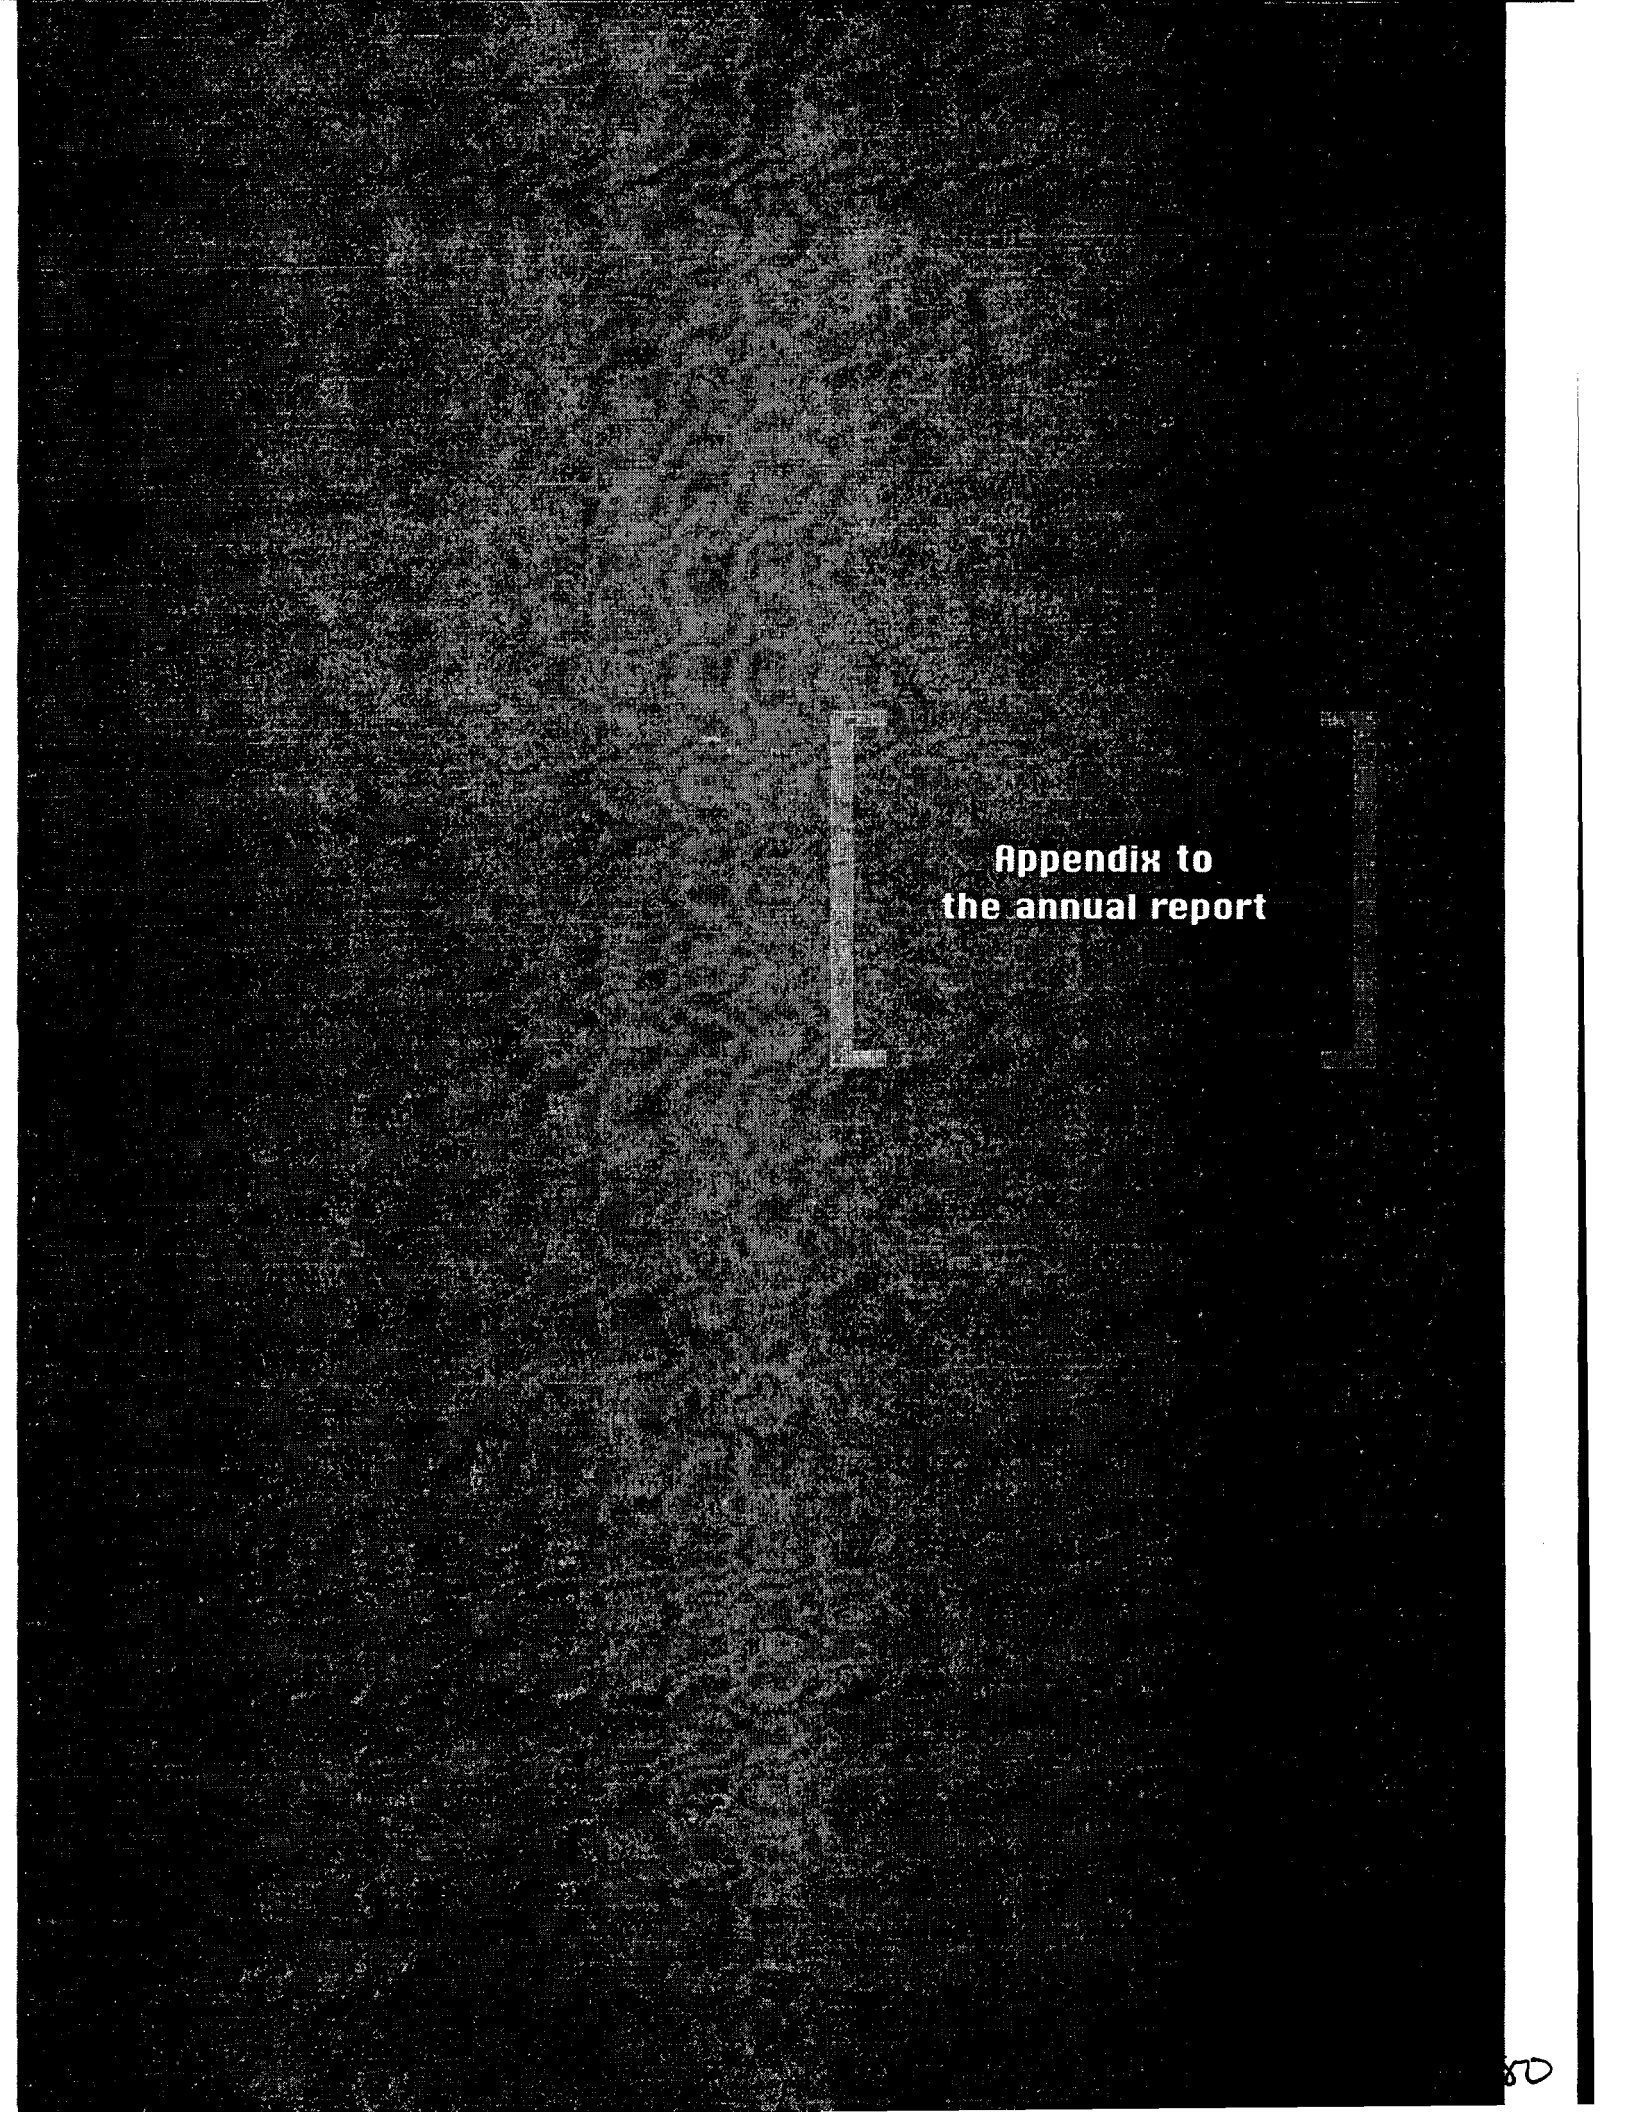
"The Board of Directors, for a maximum period of five years from the date of the stockholders' resolution authorizing it to do so [**15th December 1998**], pursuant to Article 2443, clause two of the Civil Code, has the power to increase the share capital by payment on one or more occasions, with the consequent issue of ordinary shares, which will rank for dividend pari passu, to be offered for subscription to executives – to be selected by the Board of Directors – employed by TELECOM ITALIA S.p.A. or **by TELECOM ITALIA S.p.A. holding companies or** subsidiaries, with exclusion of the option right pursuant to the combined provisions of Article 2441, last clause, of the Civil Code, and of Article 134, clauses two and three of Legislative Decree No. 58 of February 24, 1998, up to a maximum of Lire 74,000,000,000, and, accordingly, through the issue of 74,000,000 ordinary shares, with a par value of Lire 1,000 each, **at a price determined on a time to time basis by the Board of Directors for each capital increase tranche within the limits permitted by law**. The rights to subscribe these shares will be personal and not transferable *inter vivos*. The resolutions of the Board of Directors shall set appropriate deadlines for the subscription and shall provide that, when the increase resolved upon is not subscribed within the deadline set for this purpose, the capital shall be increased by an amount equal to the subscriptions received up to that deadline";

3. to introduce the following provision as the second and final clause of Article 19 of the by-laws:

"In order to facilitate the collection of proxies among employee shareholders of the Company and its subsidiaries by shareholder associations satisfying the requisites envisaged by current rules pertaining to this matter, on the basis of terms and modalities established by the Board of Directors either directly or through its

appointees special spaces will be made available where information can be made available and proxy collection operations can be carried out";

4. to introduce the following provision as the third and final clause of Article 20 of the by-laws:
   "The holding of shareholders' meetings will be regulated by the law, by these by-laws and by the Rules regulating meetings approved by the Ordinary Shareholders' Meeting";
5. to cancel and not replace Article 23, the final article of the by-laws;
6. to authorize the Chairman and Chief Executive Officer and the Deputy Chairman of the Board of Directors in order that they should - separately, if needs be - approve and add to this resolution any changes, additions or cancellations that may be required or suggested by the Judicial Authorities on registration.



Appendix to
the annual report

ADDITIONAL INFORMATION FOR U.S. INVESTORS ON THE CONSOLIDATED FINANCIAL STATEMENTS AT DECEMBER 31, 1999 OF THE TELECOM ITALIA GROUP

Introduction

As a result of the listing of the Telecom Italia ordinary and savings shares on the New York Stock Exchange in the form of American Depositary Shares [ADSs], each of which represents 10 Telecom Italia shares, the company is required to file an annual report on Form 20-F as required under the regulations of the Securities and Exchange Commission [SEC].

The annual report on Form 20-F must be made available to investors in all of its markets in order to provide identical information. This document will include, among other information, a reconciliation to US Generally Accepted Accounting Principles [US GAAP] of the net income for the years ended December 31, 1997, 1998 and 1999 and stockholders' equity at December 31, 1998 and 1999. Telecom Italia's annual report to stockholders has been expanded to include the accounting information related to the reconciliation together with the 1999 condensed balance sheet and statement of income translated into USD.

For purposes of convenience of the reader the 1999 figures included in the condensed financial statements and the reconciliation of the US GAAP are shown in billions of lire, as well as in millions of USD, converted at the rate in effect on April 4, 2000: Lire 2,019.33 = USD 1.

RECONCILIATION TO GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE U.S. [US GAAP] OF CONSOLIDATED NET INCOME FOR THE YEARS ENDED DECEMBER 31, 1997, 1998 AND 1999 AND CONSOLIDATED STOCKHOLDERS' EQUITY AT DECEMBER 31, 1998 AND 1999

The Telecom Italia Group's consolidated financial statements have been drawn up using Italian accounting principles that differ from US GAAP in certain significant respects. A description of the main differences between the two systems follows:

Stet - former Telecom Italia merger

According to Italian accounting principles, the effective date of the merger was January 1, 1997, while under US GAAP it went into effect on July 18, 1997, the effective date of the merger under the Italian Civil Code.
As a result, minority interest relating to income and stockholders' equity of the former Telecom Italia from January 1, 1997, determined using Italian accounting principles, was subtracted from the income and stockholders' equity attributable to Telecom Italia.

Goodwill from the Stet - former Telecom Italia merger

The goodwill from the merger by absorption of the former Telecom Italia into Stet [entered at market value for US GAAP purposes] was amortized based on the remaining Telecom Italia license period which, at the time of the merger, ended in 2012.

Revaluation adjustments on fixed assets

Pursuant to Italian law, the Group has revalued its fixed assets. Depreciation of these fixed assets was based on the revalued amounts. Under US GAAP, revaluations of fixed assets is not permissible.

Intercompany profits on intangibles and fixed assets

Until 1993, intercompany profit that was the result of the sale of intangibles and fixed assets mainly from manufacturing and installation companies to the telecommunication companies was not eliminated. However, those intercompany profits have been eliminated since 1994. For US GAAP purposes, such profits have always been eliminated.

Capitalization of interest

The Group capitalizes interest on assets under construction only when special financing has been applied to those assets. Under US GAAP, interest on all assets under construction is capitalized, regardless of financing. Capitalized interest has been amortized over the remaining life of the assets.

RECONCILIATION TO GENERALLY ACCEPTED ACCOUNTING PRINCIPLES IN THE U.S. [US GAAP] OF CONSOLIDATED NET INCOME FOR THE YEARS ENDED DECEMBER 31, 1997, 1998 AND 1999 AND CONSOLIDATED STOCKHOLDERS' EQUITY AT DECEMBER 31, 1998 AND 1999

The Telecom Italia Group's consolidated financial statements have been drawn up using Italian accounting principles that differ from US GAAP in certain significant respects. A description of the main differences between the two systems follows:

Stet - former Telecom Italia merger

According to Italian accounting principles, the effective date of the merger was January 1, 1997, while under US GAAP it went into effect on July 18, 1997, the effective date of the merger under the Italian Civil Code.
As a result, minority interest relating to income and stockholders' equity of the former Telecom Italia from January 1, 1997, determined using Italian accounting principles, was subtracted from the income and stockholders' equity attributable to Telecom Italia.

Goodwill from the Stet - former Telecom Italia merger

The goodwill from the merger by absorption of the former Telecom Italia into Stet [entered at market value for US GAAP purposes] was amortized based on the remaining Telecom Italia license period which, at the time of the merger, ended in 2012.

Revaluation adjustments on fixed assets

Pursuant to Italian law, the Group has revalued its fixed assets. Depreciation of these fixed assets was based on the revalued amounts. Under US GAAP, revaluations of fixed assets is not permissible.

Intercompany profits on intangibles and fixed assets

Until 1993, intercompany profit that was the result of the sale of intangibles and fixed assets mainly from manufacturing and installation companies to the telecommunication companies was not eliminated. However, those intercompany profits have been eliminated since 1994. For US GAAP purposes, such profits have always been eliminated.

Capitalization of interest

The Group capitalizes interest on assets under construction only when special financing has been applied to those assets. Under US GAAP, interest on all assets under construction is capitalized, regardless of financing. Capitalized interest has been amortized over the remaining life of the assets.

Deferred taxes

Until 1997, the Group recognized only deferred income taxes; pursuant to new domestic and international accounting principles, effective January 1, 1998, the financial statements now contain both deferred and prepaid taxes, on the basis of temporary differences between the value attributed to assets and liabilities according to statutory methods and the value attributed to those same assets and liabilities for fiscal purposes. This is consistent with US GAAP. There are still some minor differences between Italian accounting principles and US GAAP regarding tax treatment for capital grants prior to 1998.

Telephone Workers Social Security Fund [FPT]

As permitted by the relevant law, the Group has not recorded the estimated liability for the Telephone Workers Social Security Fund pension contributions due to INPS. Under US GAAP, a liability must be recognized when it is probable and can be reasonably estimated. Accordingly, the minimum amount of the range of the liability is reflected in the US GAAP reconciliation.

Accounting for transactions using the "purchase method"

The reconciliation reflects some of the differences deriving from accounting methods with regard to the following company business transactions:

- *Formation of the former Telecom Italia* - Upon formation of the former Telecom Italia [by means of a merger in 1994], the ownership percentage of Telecom Italia [the former Stet] in some of the combined companies was diluted.
  The Italian GAAP financial statements reflect the ownership change impact based on the net book value of these companies. For US GAAP purposes the ownership change related to minority interest must be treated as a purchase and, therefore, its basis stepped up to fair market value.
  This increase in value was entered into the reconciliation as a greater asset to be amortized over the remaining government license period which, at the time of the formation of the company, ended in 2012.
- *Former Telecom Italia capital increase* - During 1994, Telecom Italia [formerly Stet] received new shares issued by the former Telecom Italia. Italian GAAP consolidated financial statements illustrate that this transaction led to a decrease in the Group's consolidation reserves in the former Telecom Italia due to dilution of paid-in-capital. The US GAAP reconciliation treats this difference as an asset to be amortized over the remaining government license period.
- *Investment in Telsi*: in 1995, Telecom Italia [formerly Stet] and Siemens AG contributed investments to form Telsi Ltd., a company in which each would hold 50%. The Italian GAAP 1995 financial statements reflect this with a gain based on the original book value of the investments contributed, while for US GAAP purposes the transactions has been accounted for using the fair market value of the investments contributed. The US GAAP reconciliation reflects the amortization of the underlying basis difference between Telecom Italia's investment in Telsi and Telsi's recorded equity.

Long-term contracts

Until 1998, the Group recognized revenues for its long-term contracts under the completed contracts method. Starting from 1999, revenue recognition on these contracts is now accounted for using the percentage of completion method, in accordance with US GAAP.

Stock options

During 1999, Telecom Italia and TIM assigned shares to some of its managers. These transactions were treated as an increase in capital and additional paid-in-capital. In accordance with US GAAP, the difference between the market price of the shares and the subscription price was treated as an operating cost recorded in the statement of income. This difference is calculated on the date on which the number of the assigned shares and the award price are known ("measurement date").

Tax on equity

Until 1997, Telecom Italia and its Italian subsidiaries were assessed and remitted a tax on the respective statutory stockholders' equity. This tax was charged against stockholders' equity. Under US GAAP, this tax was recorded in the statement of income. Beginning in 1998, with the introduction of the IRAP tax [Imposta Regionale sulle Attività Produttive], this tax has been eliminated.

Restructuring reserve

In 1995 and 1996, the Italian GAAP financial statements reflected accruals for anticipated restructuring charges to occur in the future. Under US GAAP, certain conditions must be met before a restructuring accrual can be established. These conditions were met in 1996 and 1997.

Former Telecom Italia and TIM stock transactions

In 1995, Telecom Italia [formerly Stet] increased its ownership in the former Telecom Italia and TIM by purchasing additional shares from IRI [then its majority stockholder] and RAI [an IRI subsidiary]. The Italian GAAP consolidated financial statements list these shares under marketable securities, while for US GAAP these additional shares were treated as an increase in ownership of the consolidated company. In 1996 and in 1997, these shares were sold and the related gains were treated as stockholders' equity for US GAAP purposes and were listed in the statement of income in the Italian GAAP consolidated financial statements.

Gain on disposal of investments

In 1996 and 1997, Telecom Italia [formerly Stet] sold a portion of its investment in the former Telecom Italia and in TIM. This sale, which was completed on the open market, resulted in a gain that for Italian GAAP purposes was treated as a credit to stockholders' equity. Under US GAAP this gain - the difference between the sale price and the carrying value in the US GAAP financial statements - was recognized in the statement of income. Beginning in 1998, Telecom Italia began recording these gains in the statement of income, resolving the discrepancy with US GAAP.

Detachable stock warrants

In 1992, a consolidated subsidiary issued debt with detachable stock warrants for the shares of Sip [later called the former Telecom Italia and TIM] and accounted for the proceeds as debt. US GAAP required that the proceeds be allocated between the debt and a warrant liability and that debt be accredited to its face value over its terms. US GAAP also requires that a loss be recognized in situations where the book value of the warranted shares is greater than the sum of the exercise price and the recorded amount of the warrant liability.

Effect of change in tax laws

During 1997, a change in Italian tax laws was enacted which changed the tax rates effective January 1, 1998. As a result, in the US GAAP reconciliation for 1997, deferred tax assets and liabilities were changed to reflect the new rates.

All these differences and the related effect on consolidated net income and stockholders' equity are set out below.

	1997 (billions of lire)	1998 (billions of lire)	1999 (billions of lire)	1999 (millions of USD)
Net income				
Net income as reported in the consolidated statements of income	3,448	5,252	4,665	2,310
Minority interest	(839)	(1,422)	(1,301)	(644)
Net income, net of minority interest	**2,609**	**3,830**	**3,364**	**1,666**
Effect of former Telecom Italia and Stet merger	(560)	-	-	-
Net income, net of minority interest applicable for US GAAP purposes	**2,049**	**3,830**	**3,364**	**1,666**
Items increasing (decreasing) reported net income:				
Goodwill deriving from the former Telecom Italia and Stet merger	(187)	(375)	(375)	(185)
Reduction in depreciation for revalued fixed assets	176	154	164	81
Elimination of intercompany profit on intangibles and fixed assets and related depreciation	270	100	88	45
Capitalization of interest on fixed assets under construction net of related depreciation	145	19	(121)	(60)

Diluted EPS - per Savings share amounts in accordance with US GAAP	205	412	407	0.20

[*] The approximate earnings per share amounts have been calculated using the two class method due to ordinary and savings shares being outstanding, as set forth in SFAS No. 128 "Earnings per Share". The calculations take into account the requirement that Savings Share stockholders are entitled to a Lire 20 premium [based on 2 percent of Savings Share par value] over dividends on Ordinary Shares. For purposes of these calculations, the weighted average number of Shares was 6,351,231,924 at December 31, 1997 and 7,421,251,728 at December 31, 1998 and 7,421,660,518 at December 31, 1999.
