Capital investments	660	5		They refer principally to the purchases of telephone exchanges from Italtel (euro 567 million) and IT projects from Siemens Informatica (euro 31 million)

The Report of Operations of the Telecom Italia Group as at 31 December 2001 shows trade operations carried out during the year 2001 by the group itself with the Pirelli Group, mainly for phone services provided (6.6 million euros) and capital expenditure for telecommunication cables (21.4 million euros)
Furthermore, in April 2001 - as already reported in the First Half Year Report - in cooperation with Ramius Capital Group, a US investment management company, the Telecom Italia Lab company (wholly owned by Telecom Italia) formed the US venture capital fund Saturn Venture Partners, to handle investments in wireline and mobile telecommunication services and technologies.
The fund's shareholders also include TIM, Olivetti International and HOPA (of which the former Olivetti Chief Executive Officer Mr. Roberto Colaninno and the former Olivetti Director Mr. Emilio Gnutti were then shareholders and directors).

2) Remunerations to Parent Company Directors and Statutory Auditors

Remunerations for 2001 due to Parent Company Directors and Statutory Auditors in respect of services provided to companies included in the consolidation area totalled 5,877,304 euros and 375,268 euros, respectively.

3) Exhibits

The following exhibits are attached to provide the fullest and clearest possible view of the consolidated financial position as at 31 December 2001 and of the consolidated result for fiscal 2001:
a) statement of changes in consolidated financial position;
b) statement of changes in consolidated shareholders' equity;
c) reclassified consolidated income statement;
d) list of companies included in the consolidated financial statements as at 31 December 2001 and of equity investments, pursuant to articles 38 and 39 of Legislative Decree no. 127/1991.

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Olivetti S.p.A.

1. We have audited the financial statements of Olivetti S.p.A. as of and for the year ended December 31, 2001. These financial statements are the responsibility of the Olivetti S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries, indirectly owned by Telecom Italia S.p.A., have been examined by other auditors, whose reports have been furnished to us. Our opinion, expressed herein, insofar as it relates to the financial statements of these subsidiaries, for the purposes of verifying the valuation of the investments, is based also on the reports of the other auditors.

   For the opinion on the financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to the auditors' report dated May 21, 2001, issued by other auditors.

3. In our opinion, the financial statements of Olivetti S.p.A. comply with the regulations governing financial statements; accordingly, they clearly present and give a true and fair view of the financial position of Olivetti S.p.A. as of December 31, 2001, and the results of its operations for the year then ended.

Reconta Ernst & Young S.p.A.

4. The company holds investments in subsidiary companies and has therefore prepared (as required by law) consolidated financial statements. These consolidated financial statements form an integral part of the annual financial statements for the purpose of providing adequate information on the financial position and the results of operations of the company and the Group. We have examined the consolidated financial statements and these, together with our audit report on them, are presented together with these financial statements.

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Olivetti S.p.A.

1. We have audited the consolidated financial statements of Olivetti S.p.A. as of and for the year ended December 31, 2001. These financial statements are the responsibility of the Olivetti S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the consolidated financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries and associated companies, which represent respectively 12% and 16% of consolidated total assets and consolidated net revenues, have been examined by other auditors, whose reports have been furnished to us. Our opinion, expressed herein, insofar as it relates to the data relating to these subsidiaries and associated companies, is based also on the reports of the other auditors.

   For the opinion on the consolidated financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to the auditors' report dated May 21, 2001, issued by other auditors.

3. In our opinion, the consolidated financial statements of Olivetti S.p.A. comply with the regulations governing consolidated financial statements; accordingly, they clearly present and give a true and fair view of the consolidated financial position of Olivetti S.p.A. as of December 31, 2001, and the consolidated results of its operations for the year then ended.

4. We draw your attention to the information presented in the explanatory notes to the consolidated financial statements, section "Valuation Criteria", in relation to the dispute with INPS (the "Italian National Insurance Board") and the related uncertainty of the liability for the payments due by the subsidiary Telecom Italia S.p.A. for the social security contributions (the previous Telecom Workers Fund) of the personnel of its telephone division.

Report of the Board of Statutory Auditors to the Olivetti S.p.A. Shareholders' Meeting, pursuant to art. 153 Legislative Decree 58/98 and art. 2429 of the Italian Civil Code.

(Translation from the original version in Italian)

To the Shareholders,

This report illustrates the monitoring activities performed by the Board of Statutory Auditors and the other duties it is required to perform pursuant to Legislative Decree no. 58/98 and art. 2429 of the Italian Civil Code and also with reference to the Consob communications no. 1025564 of April 6, 2001, no. 97001574 of February 20, 1997 and no. 98015375 of February 27, 1998.
The Board of Statutory Auditors monitored the compliance with law and the Company's articles of association.
The Company Statutory financial statements as of 31/12/2001 show losses of 871,479,486 euros and were consigned to the Board of Statutory Auditors together with the Directors' Report on Operations as prescribed by law. The Board of Statutory Auditors has verified that the statements were drawn up in compliance with legal requirements through its own auditing work and through the information provided by the Independent Auditors.
The Group consolidated financial statements at your disposal show a loss of 3,090 million euro and were similarly consigned to the Board of Statutory Auditors together with the Directors' Report on Operations as prescribed by law.

1. The main business and financial operations incurred by Olivetti S.p.A. during financial 2001, regarding which the Directors kept the Board of Statutory Auditors periodically and fully informed, are summarised below and described in more detail in the Directors' Report on Operations:
• In the first months of 2001 the Company performed the share capital increase and the issue of bonds, which implemented the Board of Directors' resolution of December 18, 2001, whose terms and conditions were subsequently set by the Board of Directors on February 9, 2001. Following the rights issue and subsequent offer on the stock market of unexercised rights (respectively 5.14% of shares and 3.04% of bonds), 348,249,405 shares with warrants were issued at 2.6 euros per share and 487,549,167 bonds were issued with a par value of 2.6 euros per bond.
• On October 13, 2001, the Board of Directors, in compliance with the proxies in accordance with articles 2443 and 2420 ter of the Italian Civil Code, granted by the Shareholders' Meeting of October 13, 2001 and April 7, 1999, approved to resolve a right issue for a maximum amount of euros 4,079,803,958 by a right issue of 4,079,803,958 shares and/or bonds, on an alternative basis at the choice of the rights holders. This tender, carried out in November (offer to the right owners) and December (offer on the stock exchange of the unexercised shares/bonds, amounting to 0.21% of the total option) was entirely subscribed. A total of 1,491,373,698 shares were issued at the price of 1 euro each (as outlined before) for an aggregate value of 1,491.4 million euros and a total of 2,412,962,875 bonds with a par value of 1 euro each (whose features are described in detail in the Directors' Report) for an aggregate value of 2,413 million euros, for a total number of 3,904,336,573 shares and bonds compared with the maximum of 4,079,803,958 shares and bonds specified by the resolution.
• On December 27, 2001, the Company announced its intention of adhering to the public tender offer launched by Tyche S.p.A. (De Agostini Group) on 100% of the shares of Lottomatica S.p.A., at a price of 6.55 per share, increased following the re-launch of the offer. As agreed with the offerer, Olivetti subse-

470

quently tendered its equity investments in Lottomatica S.p.A., for an overall total of 27,451,550 shares, representing 15.6% of the company's capital (of which 14.04% directly held by Olivetti S.p.A. and 1.56% by its subsidiary Olivetti International S.A.).
In the opinion of the Board of Statutory Auditors, the operations performed comply with the law and with the articles of association, are in the interests of the Company, are not manifestly imprudent or hazardous, do not conflict with shareholder resolutions and do not compromise the integrity of the Company's net assets.

2. The Board of Statutory Auditors has not encountered any atypical and/or unusual operations by Olivetti S.p.A. with third parties or with related parties or other Group entities.
The terms of the ordinary operations between Olivetti S.p.A. and related parties and Group companies are in the interests of the Company, are conducted at normal market conditions and mainly consist of supply of services, management of the Group treasury and coordination of the Group Companies' activity, in connection with its Holding Company status.
In particular:
• financial charges, totalling euro 814 million, related to the financial debt due to the Group finance companies;
• income from equity investments for dividends for euro 52 million from subsidiary and associated companies and related tax credits for euro 29 million euros;
• other operations for smaller amounts as described in the Directors' Report on Operations.
• at last, the existence of the quality of related party might be considered as questionable, in connection with a member of the Board of Directors, who resigned with immediate effect and therefore defined the amount requested to the Company for the entire sum to be considered as due. With a different consideration, the lump sum paid to the former Chief Executive Officer Roberto Colaninno in September 2001 could be considered as a related party transaction. The Board of Directors of the Company resolved this operation at the end of July 2001, for a gross amount of Euro 15 million, as repeatedly mentioned in the Report on Operations and in the notes to the financial statements, and commented in the following paragraph 5. In performing its supervisory functions, the Board of Statutory Auditors evaluated this operation as fair and in agreement with the Company's interest, also considering the risks for the performance and image of the Company that could have originated following a lack of agreement.

3. The Board believes that the information provided in the Directors' Report on Operations with regard to operations with Group entities and operations with related parties is adequate.

4. The report issued by the auditors Reconta Ernst & Young S.p.A. on April 16, 2002 pursuant to art. 153 of Legislative Decree 58/98 declares that the Company Statutory financial statements and the consolidated financial statements and the related Directors' Reports on Operations give a true and fair view of the operations and financial situation of the Parent Company and the Group.
The Independent auditors' Report on the Statutory financial statements includes an emphasis paragraph, which draws the attention on the preparation of the consolidated financial statements, which are an integration to the annual financial statements for the purpose of providing adequate information on the financial position and the results of operation of the Company and the Group.

The Independent auditors' Report on the consolidated financial statements includes an emphasis paragraph in relation to the dispute with INPS and the related uncertainty of the liability for the payments due by the subsidiary Telecom Italia S.p.A. for the social security contributions of personnel of its telephone division. In the notes to the financial statements, chapter "Valuation Criteria" it is stated that in the consolidated financial statements of the Olivetti Group, in accordance with accepted accounting principles, accounts payable for an amount consistent with the minimum estimated liability have been recorded for the purpose of determining consolidation goodwill.

5. In the last months of 2001, the Board of Statutory Auditors received written complaints from a shareholder, which were to be considered generic, except for the fact that the Company sustained "costs of a certain significance, which only partially were deemed to be pertaining to the Company". The Board of Statutory Auditors decided to consider such complaints as made in accordance with the article 2408 of C.C. Such costs were represented by the lump sum paid to Roberto Colaninno (previous Chief Executive Officer and Top Manager of the Company, as well as Chairman and Chief Executive Officer of Telecom Italia S.p.A., Chairman of Telecom Italia Mobile S.p.A. and Vice-Chairman of Seat Pagine Gialle S.p.A.) for settlement and annulment of all claims, in execution of the proxies of the Board of Directors of the Company held on July 31, 2001.
The minutes of the Board of Directors report the reasons of the sum to be paid as follows "as a settlement and annulment of every amount due as Chief Executive Officer and Top Manager of the Company (including salary, severance indemnity, vacation accrual, Christmas bonus and any other sum due for the act of resigning) as well as for waiving the stock options rights, which were assigned and not exercised.
The Board of Statutory Auditors has performed every necessary check, also on the basis of the documents required and examined in order to verify its components - regarding the executive labour contract, the appointment as member of the Board of Directors and at the assignation plan of stock options- each component and the total amount of the lump sum paid in September 2001, resolving what established by the mentioned resolution of the Board of Directors.
In executing these controls, the Board of Statutory Auditors constantly informed the auditing firm and requested a deepened written legal "pro-veritate" opinion to a major independent law firm.
On the basis of the controls performed and in agreement with the opinions of the auditing firm and of the law firm, the Board of Statutory Auditors concludes that the complaint of the mentioned shareholder does not constitute a censurable event to be reported to the Shareholders' meeting.

6. No petitions, complaints or objections have been brought in any way to the attention of the Board of Statutory Auditors.

7. During the year, Olivetti S.p.A. appointed the auditing firm Reconta Ernst & Young S.p.A. to perform the following services in addition to the audit of the financial statements:
- assistance in the preparation of the 2000 financial statements and the 2001 half year report in English language - fee Euro 12,650;
- audit additional procedures and agreed upon procedures on the offering circular for the increase in share capital - fee Euro 22,207 whose costs (including out-of-pocket expenses amounting to Euro 1,500) are to be considered fair.

8. During the year, Olivetti S.p.A. did not commission services from entities with which the auditing firm Reconta Ernst & Young S.p.A. has relations on a continuous basis.

9. During the year, the Board of Statutory Auditors gave its opinion, pursuant to law, on the following matters:
• opinion on the increase of the emoluments of Directors with special responsibilities (Board of Directors of May 14, 2001).
• opinion on the correct calculation of the emoluments of Directors with special responsibilities (Board of Directors of November 13, 2001).
• opinion on the correctness of the emoluments of Directors who are members of the Remuneration Committee and the Internal Control Committee (Board of Directors of November 13, 2001).

10. During the period between the Statutory Auditors' Report to 2000 Financial Statements and this Report, the Board of Statutory Auditors held 17 meetings. The Board of Directors held 13 meetings in the financial period and the Auditors attended all the meetings, obtaining information from the directors on the work performed and on the main business, financial and equity operations performed, also in agreement with article 150 of D.Lgs. 58/98.
Furthermore, an Auditor attended the meetings of the Remuneration Committee and of the Internal Control Committee.

11. Within the limits of its competence, the Board of Statutory Auditors ascertained and monitored compliance with the principles of correct administration, through direct observation, collection of information from heads of function and meetings with the managers of the independent auditors for the purpose of exchanging significant data and information.
It has nothing of note to report.

12. Within the limits of its competence, the Board of Statutory Auditors also ascertained and monitored the adequacy of the Company's organisational structure, and found nothing of note to report.

13. The Board of Statutory Auditors monitored the internal control system of the Company, whose structure is that of a holding company, verifying the activities and control procedures therein and confirming their adequacy.

14. Furthermore, the administrative-accounting system is adequate and reliable for the purposes of correct disclosure of operations.

15. Olivetti S.p.A. provided the subsidiary companies with the instructions necessary to ensure fulfilment of disclosure requirements pursuant to art. 114, par 2 Legislative Decree 58/98. These instructions are adequate to ensure compliance with legal requirements.

16. During the meetings held with the independent auditors, pursuant to art. 150, par 2 Legislative Decree 58/98, no comments or observations were made to the Board of Statutory Auditors as regards matters for which the auditors are responsible. The Board of Statutory Auditors therefore has nothing of note to report.

17. The Company, by appointing the new Board of Directors on October 12, 2001, further suited the corporate governance model adopted to the Voluntary Code of Practice for listed companies, which can be synthesized as follows:

- the Company By-Laws comply with Legislative Decree 58/98.
- the Company states -on a total number of 16 members of Directors on the Board - that 3 Directors are to be considered as "executive" and of the remainder 13 "non-executive" Directors, 6 are to be considered as "independent" according to the article n. 3 of the Code of Practice".
- the Board of Directors has formed an Internal Control Committee and a Remuneration Committee (which broaden and specify the tasks assigned to the previous committees), which fulfil the features foreseen by the Code of Practice, all formed by independent Directors.
- the Chairman of the Board of Directors, in accordance with the By-Laws, besides to regulate the meeting of the Board of Directors, is invested with full powers for the moderation of, participation in and voting at the Shareholders' Meeting, providing assurance for a correct application of provisions of law and By-Laws.
- a specific function guarantees relations with institutional investors and shareholders.

18. The monitoring activities of the Board of Statutory Auditors have not found any omissions, censurable facts or irregularities to be reported to the shareholders and to the Controlling Bodies.
The Board of Statutory Auditors requested and obtained the Reports of the Boards of Statutory Auditors on the 2000 Annual Report of the companies controlled directly by Olivetti S.p.A.. No critical matters were found in these reports.

19. The Board of Statutory Auditors of Olivetti S.p.A. invites the Shareholders to approve the Company Statutory financial statements as of 31 December 2001 as drawn up by the Board of Directors and, with reference to art. 153 par 2 Legislative Decree 58/98, has no objections to the proposal for the coverage of the loss for the year.

Directors' Report on Operations

Developments in the Olivetti Group in 2000

Having successfully completed a series of strategic operations culminating in acquisition of control of Telecom Italia, which transformed Olivetti into an industrial holding focused on telecommunications, the Group's main priority for 2000 was to rationalise the corporate and organisational structure, optimise the financial structure and expand business operations.

An extensive Group re-organisation was achieved through a series of measures designed to improve the business and financial management of the equity investments, enhance synergies among the operating companies and simplify the overall structure of the Group. In this connection, the most important operation was the upstream merger of Tecnost (owned 72.9% by Olivetti and a co-participant in the Telecom Italia acquisition) into and with Olivetti. The merger, the final step in the Public Tender and Exchange Offer (the Tender Offer) on the Telecom Italia Group launched in 1999 by Olivetti and Tecnost, has created one of the largest industrial business organisations listed on the financial markets, with revenues of more than 30 billion euro, 250,000 shareholders and 120,000 employees. The merger was decided by the Boards of Directors of Olivetti and Tecnost in May 2000 (in response to the expectations of the financial community) and approved by the companies' respective Extraordinary Shareholders' Meetings held on 4 October 2000. Once the relevant procedures required under merger law had been completed, the merger took effect as from 31 December 2000, with the cancellation of all the Tecnost shares and warrants previously held by Olivetti.

During the year, the other operations planned as part of the general Group re-organisation took place:
- the strategic repositioning of Tecnost into a financial holding. As a result of the Tender Offer, Tecnost had become a mixed holding (controlling company of Telecom Italia and maintaining its previous industrial operations in gaming automation and specialised IT services);
- in parallel, in order to guarantee the operating efficiency and excellent results of the industrial operations spun-off from Tecnost, these operations were transferred to a company named Tecnost Sistemi, which later in February 2000 was sold to Olivetti. As part of a broader re-organisation of its operations, Olivetti subsequently transferred Tecnost Sistemi to Olivetti Lexikon, which in January 2001 changed its name to Olivetti Tecnost;
- the start-up of a major programme designed to simplify the composition and entity of Olivetti's capital and improve the flexibility and structure of its financial situation by reducing the debt burden and related charges, as follows:
• the conversion of preferred and savings shares (0.31% and 1.63% of capital respectively) into common shares, a free increase in share capital through the use of reserves and the re-denomination of capital in euro, with an increase in the per-share par value from 1,000 lire to 1,936.27 lire;
• the successful placement of a five-year 2.5 billion euro bond convertible into Telecom Italia common shares. The proceeds were used to buy back bonds issued at more costly rates, thus extinguishing the corresponding floating rate notes for 2,143 million euro;
• an increase in share capital resolved by the Olivetti Board of Directors in December 2000, through an offer to current shareholders and holders of the 1998-2002 convertible bond of new shares cum warrant and new bonds convertible into Olivetti shares, for a total value of approximately 2.2 billion euro (rising to approximately 2.5 billion should all warrants be exercised). The operation was successfully completed in March 2001. For full details, see the section "Events subsequent to the end of the financial year".

The Group's overall financial position was also strengthened through major operations on the capital of companies in the Telecom Italia Group. Specifically, TIM launched a voluntary public offer for the conversion of its savings shares into common shares, which ended on 1 December 2000 with an uptake by approximately 90% of savings stock, raising proceeds of more than 5 billion euro (including approximately 1 billion euro for shares held by Telecom Italia). The proceeds will be used to finance the acquisition of new UMTS and GSM licences and to continue network expansion in and outside Italy.
With a similar voluntary savings stock conversion, Seat Pagine Gialle raised proceeds of more than 1.1 billion euro on an uptake by approximately 87% of savings shares.
In early 2001, after buying back approximately 5% of its savings shares under a buy-back programme approved at the beginning of 2000, Telecom Italia announced a plan for the conversion of outstanding savings shares and a subsequent common share buy-back through a public tender offer, for an amount equal to that raised by the conversion, up to a maximum of 10% of share capital. If the operation, which is subject to the approval of the Extraordinary Shareholders' Meeting, is successful, Olivetti would achieve a significant reduction in debt by tendering its shares, and would align its percentage of voting rights in Telecom Italia to its equity stake (approximately 39%).
With regard to the strategic development and re-organisation of the Group's individual businesses, further efforts were made to expand and enhance the most innovative telecommunications operations and re-vitalise the other industrial operations directly controlled by Olivetti.

The Telecom Italia Group implemented a sweeping re-organisation of its operations, creating seven business units for wireline telephony, mobile telephony, the Internet, satellite services, international operations, information technology, research and venture capital.
In the Internet area, Telecom Italia spun off the Tin.it division into a separate company, which was subsequently merged into Seat Pagine Gialle, in which Telecom Italia has acquired a 58.9% equity investment (Seat Pagine Gialle was not consolidated on a line-by-line basis in 2000 since the acquisition took place at the end of the year). Seat Pagine Gialle initiated a rapid growth policy through acquisitions in Italy, Europe and the USA, most of which were financed through reserved share capital increases. Seat Pagine Gialle also signed an agreement with the Cecchi Gori Group for the purchase of 75% of Cecchi Gori Communications, the company that owns the Tmc and Tmc2 television channels, through two share capital increases for an aggregate amount of 750 billion lire. The agreement was signed in August 2000 and is subject to the approval of the competent authorities. It will pave the way for the development of innovative operations integrating television and the Internet.
In the wireline telephony area, the Telecom Italia Wireline Services division continued to expand, compensating the decrease in traditional voice service revenues caused by the reduction in charges and rising competition with strong growth in data services.
In the mobile telephony business, TIM achieved excellent results in Italy and on the international marketplace, purchasing shareholdings or controlling stakes in local companies and winning a number of new GSM and UMTS licences, either directly or through companies in which it owns shareholdings. TIM's growth also benefited from the re-organisation of the Telecom Italia Group's international equity investments, which was completed at the end of 2000. As a result, TIM is now the holding for all equity investments in the mobile communications sector, while wireline or wireline-mobile equity investments are held by Telecom Italia.

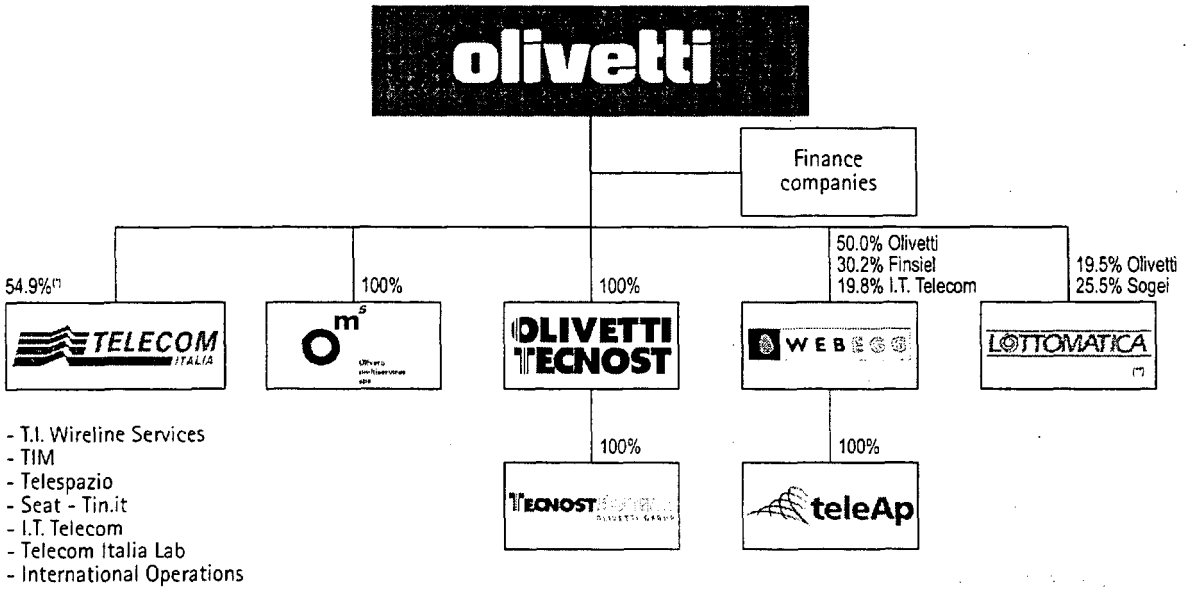
490

The formation of I.T. Telecom enables the Telecom Italia Group's IT services business to be co-ordinated through a single unit, with an enhanced market focus.
The re-organisation of the Telecom Italia Group as provided under the 2000-2002 Industrial Plan continued, with the total or partial disposal of non-core businesses, including Italtel, Sirti and Meie. The Group's real-estate operations were transferred to a company formed with Beni Stabili and Lehman Brothers, of which Telecom Italia holds 40%. The disposals programme generated proceeds of 4.4 billion euro and capital gains of 969 million euro

With regard to the other industrial operations directly controlled by Olivetti, Olivetti Lexikon reported significant progress in 2000. As mentioned earlier, in January 2001 it changed its name to Olivetti Tecnost, extending its offer of office products, communication and imaging devices and Internet appliances with the specialised gaming and services automation products and systems of Tecnost Sistemi.
Growth at Olivetti Tecnost was also achieved through a selective re-organisation of production units and international sales operations; in addition, the company launched a number of new initiatives, including joint ventures, in innovative areas such as Internet services and consultancy, home automation and mobile portals.
Among Olivetti's industrial investments in 2000, a major operation was the acquisition of 50% of Webegg (formerly Logicasiel), with the remaining 50% controlled by I.T. Telecom and Finsiel. Webegg specialises in web consultancy. In November, Olivetti subscribed its portion of a share capital increase at Webegg by transferring 100% of TeleAp, which specialises in advanced customer relationship management and contact centre services.
In January 2001, the Webegg Shareholders' Meeting approved a proposal to proceed with an application for admission to trading on the Italian Stock Exchange New Market, with a share capital increase to service the initial public offering.
In integrated real-estate services, Olivetti Multiservices expanded and diversified its facility management and global services portfolio, establishing itself as a leading player in the sector.
Olivetti operates in the gaming management business through a 45% equity investment, held in part through Sogei (Telecom Italia), in Lottomatica, the world's leading player in terms of "Lotto" takings, which renewed its concession until 2012. In December, the Shareholders' Meeting approved plans for the admission of common shares to Italian Stock Exchange automated trading system with an initial public offering. The Shareholders also approved an increase in share capital for a maximum par value of 24.3 million euro to service the IPO.
The Group consolidated its position in the gaming business with other important operations.
Through a wholly owned Lottomatica subsidiary, 100 million dollars were invested in securities convertible into common shares of Autotote/Scientific Games, an AMEX-listed company and the leading player in the pari mutuel wagering sector; following conversion, the Group will hold an equity stake of approximately 30% in Autotote/Scientific Games.
Olivetti acquired approximately 5% of Cirsa Business Corporation SA, Spain's leading gaming company.
As part of its strategy to improve profitability and expand its industrial operations, Olivetti completed the re-organisation of its non-core businesses with the sale in 2000 of OIS and Olivetti Sanità (software and systems for public authorities) to GFI Informatique, which is listed on the Paris stock exchange.

691

Group structure and activities



(*) % of ordinary share capital; 38.9% of total capital
(**) not consolidated on a line-by-line basis

Olivetti operates in the telecommunications sector through the companies of the Telecom Italia Group; which accounts for approximately 95% of the activities (revenues and workforce) of the Olivetti Group.
The Telecom Italia Group operates in wireline telecommunications services with the Telecom Italia Wireline Services business unit, in mobile communication services with TIM, in satellite services with Telespazio and in Internet services with Seat Pagine Gialle; during the year, Seat Pagine Gialle took over Tin.it, following the division's incorporation as a joint stock company. The Telecom Italia Group operating structure also includes: I.T. Telecom, active in IT services; Telecom Italia Lab, active in research, innovation and venture capital; International Operations, which develops the group's international business.
Through directly owned companies, Olivetti is also active in office products, IT services and Internet appliances (Olivetti Tecnost S.p.A., formerly Olivetti Lexikon S.p.A.), Internet services (Webegg S.p.A.), real-estate and facilities management services (Olivetti Multiservices S.p.A.).
Additionally, Olivetti and the Telecom Italia Group own a significant equity stake in Lottomatica and minor equity investments in a number of financial and services companies.

1. Telecommunications services

In 2000 Telecom Italia benefited from strong growth in demand for telecommunications services, but also faced a number of significant changes and challenges.
Competition in Europe and worldwide intensified, with an inevitable erosion in leading players' market shares.

492

Competitive pressures increased in part as a result of the completion of market deregulation, which eliminated obstacles to competition, in part because of the increase in new public wireline operating licences, and in part due to the growing number of international mergers among mobile communication operators, creating groups with enormous resources. There was also an increase in the number of Internet operators, offering a wide variety of services from simple network access to application service providing, development of fixed and mobile portals, etc.

Whereas the telecommunications industry was previously dominated by national players, today deregulation has considerably heightened the importance of international operations, leading operators to implement new cross-border investment, alliance and acquisition strategies.

Technological progress and the growth of Internet applications are creating new markets, but force operators to take on major investment decisions before the timing and size of the returns are clear. The development of a broadband network for innovative wireline services, the development of the mobile network to deploy faster transmission technologies such as GPRS, the acquisition of UMTS or third-generation service licences are decisions that cannot be postponed, although they absorb huge financial resources. Telecommunications operators are therefore having to turn to the financial markets far more frequently, with new share issues (often for IPOs of business units formed by large groups), and new bond loans.

The market scenario against which these industry changes and challenges are evolving is extremely dynamic: analysts estimate that worldwide demand for telecommunications services grew by 14% in 2000 compared to 1999. Growth in Europe was even higher.

Significant differences still persist in growth rates from one segment to another. The market for mobile services continued to grow fast (+33%): signs that demand is stabilising in countries where cellphones are nearing saturation levels were offset by continued expansion in new markets, with mobile communications accounting for one third of the total value of telecommunications services. Data services (+22%) also grew faster than the market average, while demand for wireline services reflected growing competitive pressures and the shift in traffic towards mobile services: wireline services grew by only 4% and decreased to approximately 56% of the market as a whole.

Generally speaking, trends on the Italian telecommunications market were similar to those on the European and world markets: the market grew by more to 31.5 billion euro. Mobile voice services were a key driver, rising 25% in value; the number of users increased to 42 million, with a penetration rate (users per 100 inhabitants) of approximately 73%, one of the highest in Europe. Trends in wireline telephony were modest, with the sharp decrease in prices offsetting much of the increase in telephone traffic measured in communication minutes. The number of public operator licences awarded in Italy, which rose from 89 at the beginning of the year to 151 by the end, gives an accurate indication of the increase in competitive pressures.

The number of Internet users in Italy is growing fast: according to analysts' assessment, users rose from 8.2 million at the end of 1999 to 14.1 million at the end of 2000, although the penetration rate per 100 inhabitants is still below the European average.

The decisions of the Communications Authority had a significant impact on developments on the Italian market. The measures adopted to complete the deregulation process included:

- the move from a regime of concessions/conventions, which is typical of monopolistic or oligopolistic markets, to a regime of licences/authorisations, in line with community directives on market deregulation. The concessions awarded to Telecom Italia in the past were converted into licences last November;

893

• a tariff review, based on the European Commission's recommendations to the Italian Government, which led between August 2000 and February 2001 to modest increases in the monthly fee for Telecom Italia services and a simultaneous decrease in district and long-distance charges;
• the procedures for the financing of the Universal Service whereby Telecom Italia, as the former monopolist, is required to provide voice services for all users in all areas, even under uneconomic conditions. The Authority determined the net cost of this service for 1999 at 120.8 billion lire, to be financed through a specific fund managed by the Ministry of Communications and provided by Telecom Italia (57.1%), TIM (28.1%), Omnitel (13.8%) and Infostrada (1%);
• the approval, with amendments, of the interconnection offer setting out prices and procedures adopted in 2000 by Telecom Italia for operators accessing its network;
• the definition of guidelines for the supply of unbundled local loop services, to implement the principles of two community directives. The Authority drew up regulations for the technical conditions and procedures to be followed by other operators requesting entry to co-leased sites and approved, with amendments, the financial terms of the relevant offer;
• the approval of a new numbering plan based on market requirements and competition, which provides for the allocation of significant 11-digit numbers With regard to mobile telecommunications, the Authority has provided for the gradual elimination of the initial "0" and for number portability to be applicable by 30 June 2001.

Wireline telephony

The wireline telecommunications business in Italy is managed directly by the parent company Telecom Italia, through the **Telecom Italia Wireline Services** business unit. In this sector, financial 2000 closed with revenues of 33,723 billion lire, down 5.9% from the previous year, despite a sharp rise in traffic volumes (+27.3% in terms of communication minutes).
The entry of new operators, the alternative offered by mobile services and the full deregulation of all market segments intensified competition and significant price reductions were made across the full range of services.
Telecom Italia counteracted the revenue decline with greater cost control and improved efficiency; operating income rose from 19.8% of revenues in 1999 to 20.6% in 2000; as a result of the restructuring and growth plan agreed with the trade unions, the workforce decreased by 12.6% to approximately 66,500 units. Industrial capital expenditure decreased to 4,974 billion lire (–16.1%) and R&D expenditure totalled 170 billion lire, of which 164 billion lire for activities performed by the CSELT laboratories.
Developments in services were geared to the needs of the various categories of customers. Traffic growth on the residential market (households) was driven primarily by the Internet and the special rates introduced during the year, including the "Teleconomy" offers, a turnaround in traditional pricing strategy where rates are based on distance, duration and time of day.
Telecom Italia focused successfully on the development of network services (centralised answerphone, display of caller number), ISDN lines, where installations grew by more than 80% in a year, and information services. The introduction of the "Minuti preziosi" bonus programme based on bill charges and the launch of the Short Message Service as from 1 December 2000 on specific wireline handsets were also well received.

494

In the small/medium business (SMB) sector, there was a strong increase in ISDN lines and "intelligent numbers" (freephone numbers, shared debit) and the offer was enhanced with special value-added solutions for voice, data and Internet services. One of the most successful new solutions introduced on the market was the "Teleconomy ADSL" offer which, at very interesting prices for voice services, combines high-speed Internet access with a flat rate, irrespective of connection time.
On an experimental basis, Telecom Italia also introduced an Application Service Provider offer for businesses wishing to outsource technical and operating management of their information systems. Partnership agreements were reached with leading providers of business management applications for SMBs.
New solutions were also introduced in the business sector; the "ADSL wholesale" offer for operators marketing ADSL access services acquired 83,000 lines, reflecting the keen interest in broadband services.
The enhancements to the offer and the strong rise in traffic volumes required continuous adjustments to network infrastructures, with upgrades to equipment and management system hardware and software. The network improvements were necessary to support the introduction of innovative services (including the new customer care services run on a virtual call centre platform with operators located across the country) and ensure compliance with the national numbering plan and with regulations governing interconnection and local loop unbundling, which require Telecom Italia to house other operator equipment on its own sites.
The upgrades enabled Telecom Italia to maintain a very high technical network quality, as reflected in the "effectiveness rate" (percentage of calls that reach the number called), which in 2000 was 99.6% for local calls and 99.1% for trunk calls.
Development of the wireline network continued with an increase in lines to 27,153 million by the end of 2000 (26,502 million at the end of 1999). The increase arose entirely from ISDN lines, which rose from 3,049 million to 4,584 million in terms of equivalent connections.
Network investment focused in particular on international connections. In particular, during 2000 work began on upgrading the international network architecture from the traditional bilateral model, where carriers from different countries share transmission structures for incoming and outgoing traffic, to the cross-border model, based on interconnected multilateral regional backbones for integrated voice/data services. The new architecture, which at first will be used in parallel with the existing network, will support the new business models that are being developed with the spread of the new telecommunications.
In Europe, work continued on the pan-European Backbone, based on dual fibre pairs linking the main countries with points of presence in the main European cities. The network is based on a loop architecture and covers approximately 11,500 kilometres. It will be completed in 2001.
In the eastern Mediterranean, where the Telecom Italia Group operates through the subsidiary Mediterranean Nautilus, a submarine fibre optic loop is being installed to link Italy, Israel, Greece, Turkey and Egypt. The first part of the network will go into service at the end of 2001.
A similar fibre optic network project is being developed in South America, co-ordinated by the subsidiary Latin American Nautilus.
On completion, these networks will provide multinational operators and customers with full international connectivity for web hosting services.

Mobile telephony

The rapid expansion of **TIM**, the Telecom Italia Group's mobile telecommunications operator, continued in 2000.

Revenues for this business, in Italy, totalled 15,352 billion lire (+6.4%), with operating income of 36.1% (35.5% in 1999). In an increasingly competitive scenario, which saw the entry of a fourth national operator in May, TIM reported further improvements in performance, with 21.6 million customers at the end of 2000 (18.5 million at the end of 1999). Revenue growth was largely due to the rise in traffic volumes, which increased by 24.6% in terms of minutes and 9.8% in terms of revenues, given the growing pressure on prices.

TIM had more than 9,600 employees (+2.8%), of whom 19% were university graduates and 80% high-school graduates. R&D expenditure totalled approximately 50 billion lire.

During the year, TIM benefited from a major operation to simplify its capital, consisting of the voluntary conversion of savings shares into common shares, upon payment of 3.7 euro per share. 91.56% of savings shareholders converted their stock, providing TIM with proceeds of more than 5 billion euro, to be used to finance the acquisition of UMTS licences and new GSM licences in other countries.

At the end of December, the re-organisation of Telecom Italia's international operations approved by the Telecom Italia and TIM Extraordinary Shareholders' Meetings took effect, significantly simplifying the structure of the Group. The re-organisation consisted of the non-proportional split-up of Stet International in favour of Telecom Italia (88%) and TIM (12%), and the transfer to TIM of 55.04% of Stet Mobile Holding (SMH) and control of all non-Italian mobile operations; Telecom Italia was assigned all remaining SMH shares and all the stock of Stet International Netherlands (SIN), the holding for the non-Italian wireline and integrated wireline/mobile companies. Telecom Italia subsequently transferred all its SMH shares to TIM through subscription of a reserved share-capital increase.

At the end of 2000, the TIM group had 27.3 million customers in Italy and worldwide on an equity base (21.8 million at the end of 1999); the number rises to 28.3 million considering the other mobile communication companies in the Telecom Italia Group. Key factors in international growth included the performance of the Spanish operator, Retevision Movil, which increased customers from 1 to 3.7 million, and the performance of the other European and South American operators.

Growth in Italy was achieved through continuous innovations in the offer (new rates, terms and conditions for the various customer categories), the introduction of new services, enhanced quality, reflected in the significant rise in customer satisfaction, and frequent promotional campaigns. Agreements were reached with leading banks for mobile banking and online trading, and an accord was signed with the ANSA press agency for free transmission of information (business, sports, etc.) directly to customer cellphones.

In 2000, TIM broadened its range of value-added services, which were re-organised under the new *i*-TIM brand, an integrated solution comprising WAP and SIM ToolKit technology, voice information, and the latest UNI.TIM applications (universal number for integrated voice, fax, email and Internet browsing management).

In October, TIM launched the General Packet Radio Service (GPRS) for a first group of customers in the Rome and Milan areas; the service will be extended initially to business customers and later to consumers.

At 31 December, TIM products and services were marketed in more than 100,000 sales outlets.

4/16

The year's capital expenditure served the dual purpose of keeping the company at the leading edge of technology and improving the quality of the services that make up its core business. 80% of investments focused on enhancing the GSM network, by boosting access and traffic capacity. 20% was for the development of new services, especially WAP and GPRS, and the improvement of management systems and network quality.
On 3 November, following the presentation of tenders in October, TIM was awarded one of the five UMTS licences for the Italian market, for 4,680 billion lire, together with Andala, Ipse2000, Omnitel and Wind.

Satellite telecommunications

The Telecom Italia Group's revenues in this sector, where it operates through **Telespazio** and its associated companies, totalled 659 billion lire in 2000, an increase of 6.5% at constant size.
The rapid changes taking place in the telecommunications industry also apply to satellite services; interesting growth prospects are opening up in innovative areas such as space systems and services, multimedia and broadband services for web-TV and the Internet, while other areas, such as traditional TV transmission services, are experiencing difficulties, which slowed the growth and profitability of Telespazio.
In 2000, the company focused on the strategic positioning of its offer, an internal process review and a productivity recovery programme, in order to achieve the structural conditions to respond to change and take advantage of new business opportunities.
In the *Telecommunications* segment, and in user systems in particular, Telespazio introduced a broader VSAT services offer and formed a sales network to complement the Telecom Italia organisation. It also established a position of excellence in Europe in the design, development and marketing of *Mobile satellite services* (voice, data and messaging), through international agreements and development of innovative solutions implementing state-of-the-art satellite technology.
In *Space Systems and Services*, Telespazio confirmed the growth trend of the last few years, in part through participation in international broadband communication and Earth observation programmes such as Astrolink, InfoTerra, EuroStar, SkyBridge, which enabled it to overcome the difficulties encountered with the Iridium and Orbcomm mobile satellite telecommunications initiatives.
In 2000 Telespazio strengthened its ties with national and international space agencies. Co-operation with the Italian Space Agency for the development of Earth observation systems led to the formation of E-Geos, a company controlled by Telespazio, which will begin operations in 2001 following transfer of Earth observation assets.

The Internet

The Telecom Italia Group achieved a significant expansion in its Internet business in 2000 with acquisition of control of **Seat Pagine Gialle**, of which Telecom Italia holds 58.9% of ordinary stock.
The acquisition of the controlling stake took place through the upstream merger of **Tin.it** (Telecom Italia's Internet division, which was transformed into a joint stock company on 1 May 2000) into and with Seat Pagine Gialle in mid-November.
This complex operation began with the partial spin-off of the capital of Tin.it S.p.A. (approximately 8%) to Seat Pagine Gialle, which increased its capital by issuing new common shares to be assigned in equal

497

parts to Telecom Italia common and savings shareholders; the upstream merger of Tin.it into and with Seat then took place, with a share-capital increase at Seat reserved for Telecom Italia.
Seat Pagine Gialle has been consolidated on a line-by-line basis in Telecom Italia's 2000 accounts only with regard to the balance sheet, since control was not acquired until mid-November. In 2000, Seat reported consolidated revenues of 2,581 billion lire and operating income of 275 billion lire; it had 7,515 employees at the end of the year.
The merger of Seat and Tin.it has created an Italian organisation in the Internet value chain with the infrastructures, resources and entrepreneurial capabilities to boost the growth of the Internet market in Italy and compete with the major European and world players.
At the end of 2000, Tin.it had 4 million registered Internet customers, of whom approximately 1.5 million were in December. The year's telephone traffic from Internet access almost doubled, from 5.9 billion minutes in 1999 to 11.6 billion in 2000. Tin.it can now leverage synergies with the Virgilio portal, with Matrix and with other companies in the Seat Group to develop its access services.
The new group's strategic goals are development of value-added services on both the home and international markets, and integration of the Internet and television. To achieve its objectives, during 2000 Seat conducted an intensive acquisitions campaign in Italy, Europe and the USA; most of the acquisitions were financed with reserved share-capital increases. Seat also converted its savings shares into common shares; with a payment of 0.89 euro per share and an uptake by 87% of savings capital, the operation, executed in December, raised proceeds of 1.1 billion euro. With regard to the integration of the Internet and television, Seat reached an agreement with the Cecchi Gori Group to acquire 75% of Cecchi Gori Communications, the company that controls Telemontecarlo, through subscription of two capital increases for an aggregate amount of 750 billion lire. Execution of the agreement, signed in August 2000, has been delayed pending approval by the authorities.

International telecommunications operations

The Telecom Italia Group's international operations are conducted through the subsidiary or associated companies of **SIN** (Stet International Netherlands), its wireline and integrated wireline-mobile holding, and **SMH** (Stet Mobile Holding), the mobile telecommunications holding.
In 2000, Telecom Italia focused on international growth in Europe and Latin America, raising its investments in companies operating on the most strategic markets, notably mobile communications, data services and Internet services.
The international companies included in the consolidation reported aggregate revenues for 2000 of 7,615 billion lire, an increase of 25.5% from 1999 at constant size; the companies' employees totalled approximately 16,000.
At 31 December 2000, the Telecom Italia Group's international wireline customers numbered 18.7 million (6 million on an equity base), an increase of 12% from the end of 1999; mobile communication customers were 23.4 million (6.7 million on an equity base), up 70% from the end of 1999.
The Telecom Italia Group's growth on the main European markets is described below.
In *France*, 9Telecom Reseau, owned 93.99%, undertook a broad strategic and corporate re-organisation to position itself in data/voice/IP connectivity, integrated value-added service solutions, site hosting and development. The plan included the acquisition for an outlay of 810.6 million euro through a public ten-

498

der offer of 95.5% of Jet Multimedia, the leading provider of value-added services for business customers and top developer of online applications on Internet, audiotel and minitel platforms. In 2000, 9Telecom acquired 520,000 new customers, reaching a total of 750,000 customers.
The associated company Bouygues Telecom, France's third-largest mobile operator, made excellent progress, with growth of 61.2% and 5.2 million lines at the end of 2000, for a market share of 18%.
In *Austria*, the equity investment in Telekom Austria held by Telecom Italia through SIN rose to 29.8% at the end of 2000 as a result of the sale of shares by the government shareholder OIAG.
Telekom Austria, which lost market share in wireline telephony in 2000, began a market repositioning and re-focusing on the Internet sector, with the acquisition for 235 million euro of 100% of Czech on Line, the Czech Republic's first Internet Service Provider, and the formation in Austria of Jet2Web Internet Services, to offer integrated broadband access services.
In November, Mobilkom Austria, a Telekom Austria subsidiary and market leader with 2.8 million lines, was awarded one of the six UMTS licences auctioned by the Austrian Government.
In *Spain*, Telecom Italia, Endesa and Union Fenosa formed the AUNA holding, to which the partners transferred their equity investments in Spanish telecommunications companies. Through SIN and SMH, Telecom Italia holds 30% of AUNA. AUNA in turn owns 100% of Retevision I, 97.9% of Retevision Movil (Amena brand), 100% of Cable i Televisio de Catalunya and Madritel (telephone services and cable TV), 49% of Quiero TV (terrestrial digital pay TV) and other equity investments.
Retevision I closed 2000 with more than 1,950,000 wireline customers. eresMas Interactiva, formed from the spin-off of the Retevision business unit providing Internet services for residential users, had 1,420,000 customers, confirming its position as Spain's second-largest Internet Service Provider and portal operator. Retevision Movil reported excellent results, with more than 3.7 million lines (+267% from 1999), a 15% share of the total market and 29% of the incremental market. In March, the company was awarded one of the four UMTS licences auctioned by the Spanish government.
In *Greece*, Stet Hellas continued to expand, reaching approximately 1.6 million lines and a market share of 28% of the mobile market. Having decided to enter the Greek wireline telecommunications market, which was deregulated in January 2001, in December Telecom Italia signed a strategic partnership agreement, through Mediterranean Nautilus S.A., with the Forthnet operator, of which it acquired a 5% stake; through the Mediterranean Broadband Services subsidiary, Telecom Italia and Forthnet were awarded a fixed wireless access licence.
In *Turkey*, a market offering considerable growth potential, the Telecom Italia Group was awarded a GSM 1800 mobile licence in April, with an offer presented by a consortium owned 49% by the Telecom Italia Group and 51% by Is Bank, Turkey's largest private bank. In September, TIM and Is Bank formed the Aria company, which began commercial service in March 2001.
In *Argentina*, Nortel Inversora, the controlling company of Telecom Argentina in which Telecom Italia and SIN own 50% of ordinary share capital, reported positive results for 2000. Having been awarded a PCS mobile communication licence in July 1999 and with deregulation of the wireline market (October 1999 for long-distance communications, November 2000 for local communications), Telecom Argentina is now an integrated operator offering a full range of telecommunications services and value-added services throughout the country. It has therefore strengthened its strategic positioning, albeit at the cost of lower traffic revenues and higher operating and financial costs, linked in part to an unfavourable economic climate and changes in the competitive scenario.

499

At the end of 2000, Telecom Argentina had 3.5 million wireline subscribers (equivalent to a 45% market share) and, through Telecom Personal, more than 2 million mobile customers, for a market share of 32%. In the Internet sector, the company had approximately 250,000 subscribers.

In *Brazil*, the Telecom Italia Group's wireline operations are conducted through Brasil Telecom Participaçoes (BTP, the new name of Tele Centro Sul Participaçoes), in which SIN holds an equity investment through Solpart Participaçoes, which owns 51.79% of ordinary capital.

Under the corporate restructuring that began in 1999, the eight operating companies controlled by Tele Centro Sul were merged into Brasil Telecom (the new name of Telepar Participaçoes), which also acquired and merged Tele Brasil Sul and Companhia Riograndense de Telecomunicaçoes (CRT). As a result, BTP holds 65.47% of Brasil Telecom's total capital (97.97% of common shares and 39.34% of preferred shares). At the end of 2000, the company had 7.2 million lines (including approximately 2 million new installations).

In mobile telephony, through SMH Telecom Italia controls Bitel Participaçoes, the holding for the two mobile operating companies, Tele Celular Sul Participaçoes and Tele Nordeste Celular Participaçoes. At the end of 2000, the former had approximately 1.4 million di lines (+37% from 1999), while the latter had more than 1.5 million customers (+27% from 1999). In December, TIM also acquired 37.96% of Maxitel, a cellular operator with almost one million customers, further expanding TIM's territorial coverage on the Brazilian mobile communications market.

In the Internet sector, in June the Group acquired 30% of GLB Serviços Interativos, an Internet company of the Globo group, for 810 million dollars. GLB launched Globo.com, a portal for Portuguese speakers around the world, which uses exclusively multimedia content produced by Globo, the leading media player in Latin America.

In *Peru*, TIM was awarded the third PCS 1900 mobile licence in March 2000 and launched the service in the Lima area and other major cities in January 2001.

In *Venezuela*, in November TIM acquired control of 56.6% of the capital of Digitel, a mobile communications operator with a GSM 900 mobile licence in central Venezuela, which includes Caracas and other major cities. The company launched the service at the end of 1999 and has achieved significant success (253,000 customers at the end of 2000).

In *Chile*, the Telecom Italia Group signed an agreement in December to raise its equity investment in Entel Chile to 54.76% by acquiring the stakes of other shareholders, for a total of 905 million dollars. The number of mobile customers served through the associated company Entel Telefonia Personal almost doubled by the end of 2000, reaching 1.3 million; similarly strong growth was achieved in the Internet business.

Other operations of the Telecom Italia Group

Telecom Italia's **IT operations**, consisting of the Finsiel group, Netsiel, Telesoft and Sodalia and the parent company IT function, form the Information Technology Services business unit. During 2001, these activities will be transferred to **I.T. Telecom**, a wholly owned Telecom Italia subsidiary formed in the second half of 2000 to co-ordinate the Group's IT operations, which have been re-organised in seven main areas: *Telecommunication Services*, comprising application consultancy and system integration services for the telecommunications market; *Operational Services*, management of IT infrastructures; *Market*,

400

which addresses the finance, industry and central government sectors; *Web Professional Services*, professional services and innovative web-related solutions; *Regional Services*, for local government; *Consulting*, which specialises in management consultancy; *Tax Services*, which provides support services for Italy's tax authorities and the Ministry of Finance.
In 2000, the Information Technology Services business unit reported revenues of 3,137 billion lire, an increase of 2% from 1999; 2000 revenues do not include Webegg data (ex Logicasiel), which is now consolidated in the Olivetti financial statements.
During the year, in addition to solutions and services for central and local government, the Finsiel group extended its offer to include development and system integration services, ERP platforms, online services in e-business, e-banking and training. The Internet was the cornerstone of activities for 2000; the entire offer was renewed to focus on web-based personalised solutions for companies, banks and government authorities, to enable traditional public- or private-sector organisations to operate as e-companies, in part through internal process reviews.
On 31 December 2000, Telecom Italia spun-off the units that run its information systems to Netsiel. As a result of the operation, designed to rationalise operations units and reduce overheads, Netsiel is owned 68.65% by Telecom Italia and 31.35% by Finsiel.
Telesoft confirmed its position as the Telecom Italia Group's main provider of software and IT services. Sodalia develops new-generation software, for network and telecommunications services management.
The **CSELT** laboratories handle Telecom Italia Group **research activities** for the development of new wireline and mobile telecommunications applications covering a broad range of fields: development of a virtual call centre for the directory enquiries service based on voice recognition and synthesis technologies; definition of new network architectures with high-capacity DWDM systems; development of WAP systems for mobile communications; testing of GPRS technology, the UMTS system, etc.
The operations in the business unit for innovation and venture capital will be transferred to the CSELT laboratories in 2001, creating **Telecom Italia Lab**.
R&D expenditure at CSELT totalled approximately 290 billion lire in 2000, of which almost 200 billion lire for work performed on commission and more than 90 billion lire for strategic research.
Among training and innovation activities, mention should be made of the **Interaction Design Institute** formed in 2000 by Telecom Italia and Olivetti, which provided funding for the initiative. The institute, which is based in Ivrea and became operational in 2001, is a graduate school specialising in communication technology and culture and in management and entrepreneurial training. The project provides for the formation of a research laboratory staffed by young graduates from different academic areas, in order to create a balanced mix between design and technological competencies.

2. The products, IT services and specialised systems sector controlled directly by Olivetti S.p.A.

Olivetti operates in this sector through the **Olivetti Tecnost S.p.A.** subsidiary (formerly Olivetti Lexikon S.p.A.), whose offer comprises office products and services and imaging and communication devices for the business, SoHo and consumer markets, and, with Tecnost Sistemi S.p.A., in specialised gaming automation systems. During 2000, in line with market trends, Olivetti Tecnost intensified its growth on the Internet and home automation markets.

901

The Group operates on the main international *geographical markets*. Although its main focus is on Europe and Latin America, it is also active on the US consumer market through the Royal Inc. subsidiary. Its product catalogue – flanked by original supplies and professional services guaranteeing top-level support – is marketed in more than 70 countries, through a variety of channels including dealer networks, distributors and mass merchandising chains. In 2000, Olivetti Tecnost achieved further significant growth in all market sectors in *Latin America*, where Olivetti brand recognition is particularly high. Olivetti Tecnost was awarded a number of major product and service orders from banks and public- and private-sector organisations (including CODELCO and Banco de Santander in Chile, Amadeus in Colombia, Comisiòn Federal de Electricidad and Banco Sudameris in Peru, Banco Bilbao Vizcaya in Mexico, Banco Provincial and Banco Mercantil in Venezuela, public authorities in Brazil), which generated significant revenue growth.
In *Europe*, rationalisation of the business model was a key strategic objective, through a re-focusing on the most profitable businesses.
Major revenue growth was reported on the *Italian* market, where Olivetti Tecnost built up significant positions in sectors such as Large Accounts.
In the *Far East*, the Industrial Partnerships Division successfully continued development of long-term co-operation ties with local industrial and commercial partners. It achieved very positive results in 2000, maintaining its leadership position in Asia in specialised printers and reaching a market share of more than 80% in China.
During the year, Olivetti Tecnost also strengthened its presence in *eastern Europe*, with the opening of sales offices in the Czech Republic, Poland, Romania, and in the *Middle East*, where it formed a partnership with an important regional distributor based in Dubai.
Industrial and product initiatives for the Professional and Consumer markets and for Vertical Applications are largely based on ink-jet technology. Key products include fax, printers and, in particular, new multifunctional systems, which offer interesting potential for applications in both the home and the office. Ink-jet industrial operations were optimised during the year, by being grouped in a single corporate entity named Olivetti I-Jet, which has facilities in Arnad in the Aosta Valley and Scarmagno (Turin); this re-organisation will permit development of ink-jet technology for applications other than printing on paper, opening up prospects in exciting new application fields such as medicine.
During the year, production began of the first fax models developed by **Jetech S.p.A.**, the joint venture set up with Philips Consumer Electronics to design, develop and produce ink-jet devices. Marketing will begin in the first quarter of 2001.
In the vertical applications sector, activities in 2000 included new Internet-related initiatives, with the introduction of innovative products such as the webphone to enhance the range of products and services for banks, public authorities and retailers.
In December 2000, **Tecnost Sistemi**, which specialises in the development, supply and maintenance of gaming automation systems, was spun off from Olivetti S.p.A. to Olivetti Tecnost (then still Olivetti Lexikon), in order to create value and leverage synergies.
In May, office supplies production and marketing were spun off to a new management-controlled company, **Baltea s.r.l.**
At the end of the year, Olivetti Tecnost and Canon Inc. signed an agreement for the dissolution of the **Olivetti Canon Industriale** joint venture. Full details are provided in the section *"Events subsequent to the end of the financial year"*.

962

A number of new companies were formed during the year to operate in specific areas of the New Economy:

- **Oliweb S.p.A.** (100% Olivetti Tecnost), which offers end-user turnkey solutions based on Internet products and services: product delivery, installation, maintenance and commercial support. Oliweb also offers high value added solutions with call centre services (the company handled the Tin.it "e-vai" IT project)
- **GoToWeb S.p.A.** (80% Olivetti Tecnost, 20% Webegg), part of the global Internet offer strategy, focuses on small and medium businesses. Its services are also available through the Olivetti dealer network.

A company was also formed in the home automation field: **Domustech S.p.A.** (70% Olivetti Tecnost, 30% Vemer Siber), which designs, develops and markets integrated solutions and systems for local and remote control of homes and offices: integrated management of security and conditioning plant, remote control of electrical domestic appliances, video intercoms, internal and Internet communication.

Olivetti Tecnost also acquired equity investments in **Localport S.p.A.** (18.5%), a company set up by a group of public- and private-sector operators to provide local communication, network and electronic commerce services, and in **Flextel S.p.A.** (13.3%), which is active in research, development and marketing of advanced hardware and software for IT and telecommunications applications.

At the beginning of 2001, Olivetti Tecnost signed an agreement with Sweden's **Speedy Tomato AB** (wholly owned by Telia AB) for the formation of an equally owned joint venture named Speedy Tomato S.p.A. on the rapidly growing mobile portals market.

Olivetti Tecnost's *commercial strategy* in 2000 focused on the professional channel, which accounted for 67% of its European revenues, in particular on the dealer network, one of the company's main assets. A series of special initiatives were organised for dealers, including the Channel Identity project (to strengthen corporate identity), activities designed to take advantage of Internet-related opportunities, and training to help dealers become solution providers.

The *OEM* channel also achieved significant growth, as a result of major agreements in the telecommunications sector.

In terms of *products and market position*, Olivetti Tecnost consolidated its European leadership of the plain-paper ink-jet fax segment, with a broad catalogue of products and important growth in non-European countries. The offer includes new-generation multifunctional fax with colour printing capabilities; the lead product is the JetLab 600, a device offering full document-management capabilities and featuring an elegant, compact design, which received the IF Design Award at the CeBIT tradeshow in Hanover.

In the *ink-jet printer area*, Olivetti Tecnost confirmed its position with the Artjet 10 and Artjet 20 offer, enhanced in the fourth quarter with the entry of the Artjet 12 and Artjet 22, which feature USB ports and faster printing speeds. Interesting growth was achieved on niche markets, such as printing on continuous forms and printing with edible inks; these applications are attracting strong interest both in and outside Italy.

The *ink-jet fax* offer was enhanced with new multifunctional models for professional users, featuring sophisticated capabilities and advanced performance, which were particularly successful in Italy.

In the *reprographics* sector, sales of analogue models decreased in 2000, reflecting market trends. This slowdown was offset by performance in digital models, where the offer was enhanced with new mid-range/low-end models previewed at SMAU 2000.

The line of *original supplies* for ink-jet products performed well in terms of shipments, fuelled by the increase in fax sales and the introduction of the new copier and printer lines.

903

In the highly strategic *Vertical Applications* sector, the Vertical Markets Division was formed in January 2000 to maximise the focus on markets (primarily banking and retail) where users' specific needs and the particular type of product require the support of a dedicated production, distribution and service structure.
In the banking area, the PR2 printer confirmed its position as worldwide market leader, with shipments of approximately 162,000 printers, of which approximately 67,000 through the agreement with Getronics and approximately 85,000 on Far East markets, through industrial co-operation agreements with local partners.
The new PR2 with integrated scanner function was successfully launched: this product won orders from major customers such as the Austrian Post Office and the Danish Post Office, and opened up interesting opportunities in other European countries, which are expected to bring tangible results in 2001.
Performance continued to be strong on the *fiscal cash registers* market as regards both margins and shipments, driven in part by the euro effect, which generated significant replacement purchases.
In the *Internet appliances* area, the Webphone Linea@ was presented in the fourth quarter of 2000: this device supports Internet browsing, email transmission and reception and access to network services; at the end of 2000, an agreement was signed with an Italian company that provides web-based services for professional users, for the supply of approximately 5,000 systems in 2001 (webphones + ink-jet printers).
The *Customer Services* division enhanced the quality of its services offer (notably the expansion of the Help Desk).
The Olivetti Tecnost Group reported third-party revenues totalling 1,120 million euro in 2000 (+11.9% from 1999); net earnings for consolidation purposes amounted to 23.5 million euro, of which 23.3 million attributable to Tecnost Sistemi.
R&D costs totalled approximately 33 million euro.
At 31 December 2000, the Olivetti Tecnost Group had 5,370 employees, an increase of 161 heads from 31 December 2000.

3. Information technology and network services and solutions

In this sector, Olivetti operates through **Webegg** (50% Olivetti S.p.A.; 30.2% Finsiel S.p.A.; 19.8% I.T. Telecom S.p.A.).
The Webegg Group has approximately 700 employees (end March 2001) and offices in Milan, Turin, Bologna, Rome and San Francisco. It provides strategic Web consulting services, integrating its own solutions and those available through a network of partnerships with the world's leading Web integration solutions and technological partners such as Broadbase, Plumtree, Neon, Applix, Midas Kapiti International, Documentum, Cisco, Siebel, Genesys.
Olivetti S.p.A. acquired its equity investment in Webegg, formerly Logicasiel, in February 2000, from the Logica Group for 52.1 billion lire (26.9 million euro).
In November 2000, Olivetti spun off the wholly owned subsidiary Telemedia Applicazioni (TeleAp) to Webegg, as part of a 54 billion lire share-capital increase, which was also reserved for Finsiel and IT Telecom. The operation resulted in the current ownership structure.
2000 was a year of major change at Webegg as regards ownership, operations and business. It implemented a policy of equity acquisitions in complementary operations in Italy, in order to extend its range

904

of activities and confirm its vocation as an "interdisciplinary" organisation that operates as a strategic partner to help companies become e-enterprises, at the Internet, intranet and extranet levels.
Today the Webegg group consists of:
- Webegg, which provides Web consultancy and Web integration services based on the latest technological developments and offers solutions for knowledge management, e-intelligence and networked organisation models;
- Telemedia Applicazioni (TeleAp), 100% Webegg, which provides advanced services and applications, in particular integrated customer relationship management solutions deploying traditional and innovative Internet media;
- Software Factory, 100% Webegg, technical and design consultancy for e-commerce and e-business solutions, specialising in technologically advanced network projects;
- Performer, 100% Webegg, technical and design consultancy for ERP and CRM systems, e-business solutions, and IT systems integration. The Performer offer covers the design, development testing and implementation of innovative e-business solutions;
- Domus Academy, 51% Webegg; a post-graduate design school formed in 1983, which has established an international reputation for professional training, research and initiatives to enhance and promote Italian culture and as a role model for design, fashion and the web;
- Garage, 35% Webegg, one of Italy's most successful communications companies and cinema/TV producers. Garage also specialises in interactive multimedia communications and the new media channels. It has developed major integrated strategic communication projects and co-operates with some of Italy's largest groups, leading players in their business areas;
- Domino, 35% Webegg, which specialises in Web design and production of web sites based on advanced navigation systems. Domino designs, develops and organises web sites, handling all areas of web design, communication and site functionality. The offer covers analysis of customers' current and future needs, graphics and functional projects, production and management of services;
- E@rchimede, 20% Webegg, an incubator for Internet entrepreneurs, providing support from valuation of new ideas to the management of new ventures.
Webegg S.p.A. reported revenues of 67.2 billion lire in 2000 (+14% from 1999) and operating income of 6.1 billion lire (5.3 billion in 1999), giving a return on revenues of 9.1%. In line with the company's growth strategy, the Shareholders' Meeting decided not to distribute a dividend.
The Webegg Group's 2000 consolidated accounts show shareholders' equity of approximately 130 billion lire and net financial resources of approximately 102 billion lire; its business results are not particularly significant, since the main subsidiaries entered the consolidation area at the end of 2000 or in 2001.
The Webegg Group's proforma consolidated gross revenues for 2000 would total approximately 145 billion lire, with a proforma consolidated gross operating margin of approximately 14%.
Subsequent to the end of the financial year, the Webegg Shareholders' Meeting decided to present an application for admission to trading on Italian Stock Exchange New Market, with a share-capital increase to service the initial public offering.

405

4. Facility management: Olivetti Multiservices S.p.A. (100% Olivetti S.p.A.)

Formed in 1998 to handle the Group's real estate, Olivetti Multiservices has gradually grown to become an important player on the emerging global service and facility management market, providing strategic management of all non-core services in order to boost productivity and efficiency and optimise management costs. Olivetti Multiservices focuses in particular on the management and maintenance of property, especially energy management services (operation, maintenance and upgrading of energy plant), company certifications, design of technological plant and digital archiving services. Olivetti Multiservices' management services have ISO 9001 certification. Its third-party revenues grew significantly in 2000, accounting for more than 60% of its total revenues: this positive result reflects growing brand awareness (an estimated 3% share of the facility management market in 2000) and the knowhow built up by the company.

Third-party revenues for Olivetti Multiservices S.p.A. and its subsidiaries in 2000 totalled 55.2 million euro, a sharp increase (+84%) from 1999.

In terms of consolidated net earnings, the group broke even.

At 31 December 2000, Olivetti Multiservices had 302 employees, compared with 255 at 31 December 1999.

906

Human resources

At 31 December 2000, the Olivetti Group companies included in the consolidation had a total of 120,973 employees (129,073 at 31 December 1999).

(employees)	31.12.2000	31.12.1999	Changes
Olivetti S.p.A.	109	158	(49)
Finance companies	12	18	(6)
Real estate and services companies	352	305	47
Olivetti Tecnost Group	5,370	5,209	161
Webegg Group	461	312	149
Telecom Italia Group	114,669	122,407	(7,738)
O.i.S. and Olivetti Sanità (*)	-	664	(664)
Total Olivetti Group	**120,973**	**129,073**	**(8,100)**

(*) companies sold to third parties in August 2000.

The reduction of 7,738 heads at the Telecom Italia Group arose from personnel turnover and from the year's acquisitions and disposals. The main factor contributing to personnel turnover were the terminations at the parent company Telecom Italia, arising in part from application of mobility schemes pursuant to law no. 223/1991, implementing the agreements reached with the trade unions in March and July 2000. Acquisitions and disposals led to a reduction of 17,723 heads, mainly as a result of the sale of the manufacturing and installation companies (-17,857 heads), offset by an increase of 17,567 heads, mainly relating to Telecom Argentina (7,496 heads), Maxitel (1,229 heads) and the Seat group (7,515 heads).
The number of employees with Olivetti Tecnost (formerly Olivetti Lexikon + Tecnost Sistemi) increased by 161 heads, reflecting 384 new hirings (260 in Italy), 228 heads in the Latin American factories on temporary employment contracts and the inclusion in the consolidation of the industrial complex in the Manaus free zone (Brazil) for a total of 84 heads, offset by staff reductions of 349 heads and a decrease of 186 heads as a result of the sale to third parties of a business unit and controlling equity investments (Baltea S.p.A. and OCD S.A.).
The increase at the Webegg group arose as a result of acquisitions and 75 new hirings.
The average number of employees in the Olivetti Group in 2000 was 131,266 heads; this included 124,696 heads for the Telecom Italia Group, of which the equivalent of 7,272 heads for companies consolidated on a proportional basis.

467

Financial review

The Group

With regard to the industrial and corporate transformation of the Olivetti Group, a number of major operations took place in 2000 which had a significant impact on the consolidation area and disparate effects on operations and equity.

The consolidated income statement reflects the effect of the consolidation on a proportional basis as from 1 January 2000 of the Nortel Inversora group and the exclusion of Teleleasing and the O.i.S. group for the full year and of the Sirti and Italtel groups as from 1 October.

In addition to the above operations, the main events effecting equity were the consolidation on a line-by-line basis of the balance sheet captions of Seat Pagine Gialle, Maxitel, Jet Multimedia groups and Digitel, which have been consolidated only with regard to the balance sheet since these entities were acquired at the end of the year.

In 2000, the Olivetti Group posted a consolidated net loss of 940 million euro (consolidated net income of 111 million excluding the year's 1,051 million euro charge for amortisation of goodwill in respect of Telecom Italia share purchases); in 1999, the Olivetti Group had net income of 4,939 million euro as a result of capital gains from disposals, relating in the main to the sale of Omnitel and Infostrada to Mannesmann (owned through the equity investment in OliMan Holding B.V.), offset in part by the considerable costs sustained in connection with the Tender Offer on Telecom Italia.

At 31 December 2000, the Olivetti Group's total shareholders' equity was 31,366 million euro (13,856 million after minority interests), compared to 26,310 million euro at 31 December 1999 (9,549 million after minority interests); the increase of 5,056 million euro included 1,999 million euro from the share-capital increase at Olivetti S.p.A. for the upstream merger of Tecnost S.p.A. into and with Olivetti.

Net financial indebtedness at 31 December 2000 was 37,524 million euro, an increase of 10,145 million euro from 31 December 1999 (27,379 million euro) due in the main to the Telecom Italia Group for non-recurring outlays for equity acquisitions (Seat Pagine Gialle and others), the UMTS licence, dividend pay-outs and changes in the consolidation, set off only in part by non-recurring proceeds, including amounts collected from the conversion of TIM savings shares and from the disposals plan.

Capital expenditure totalled 20,355 million euro.

404

Group business performance

2000 business performance is reflected in the reclassified statement of income set out below, which also includes data for 1999. The statement classifies income components by nature, with separate disclosure of non-recurring income and expense items that are not expected to continue at a similar level in future periods.

(in millions of euro)	Year 2000	%	Year 1999	%
Net revenues	30,116	100.0	28,207	100.0
Operating costs:

Net result for the year	**(940)**	**(3.1)**	**4,939**	**17.5**

(*) The amounts concerning the Telecom Italia Group have been classified as extraordinary items in the consolidated accounts of this latter

Group revenues for the year totalled 30,116 million euro, of which 28,911 million for the Telecom Italia Group. Revenues for the Telecom Italia Group (which accounted for 96% of total revenues) increased by 6.7% (1.7% at constant size) as a result of the inclusion in the consolidation of the Nortel Inversora group (1,825 million euro), offset in part by the decrease (-329 million) in manufacturing and installation revenues (which relate to nine months in 2000 compared to twelve months in 1999, following the sale of the relevant operations to third parties in September) and by the exclusion from the consolidation of Teleleasing revenues from fees on leasing contracts with third parties.

401

The growth in mobile communications services in and outside Italy (+9.7%) was offset by a reduction in revenues from wireline telephone services in Italy (-5.9%) related to Telecom Italia traffic revenues, which, despite an increase of 27.3% in minutes (+1,174 million), decreased by 13.9%; average traffic yield decreased to 71 lire per minute, compared to 111 lire in 1999 (-35.8%; -2,585 million). This slowdown was compensated in part by the rise in subscription fees (+9.9%) as a result of the adjustments to charges on 1 August, the growth of data traffic and growing demand for interconnection to the Telecom Italia network from other carriers.

(in millions of euro)	Year 2000	Year 1999	Changes	%
Telecom Italia Group	26,488.0	26,035.4	452.6	1.7
Olivetti Tecnost Group	1,120.0	1,001.2	118.8	11.9
Webegg Group	29.5	34.4	(4.9)	(14.2)
Olivetti Multiservices	55.2	30.0	25.2	84.0
Total on a consistent comparable basis	**27,692.7**	**27,101.0**	**591.7**	**2.2**
Nortel Inversora Group (excluded from consolidation area in the year 1999)	1,825.1	-	1,825.1	
Sirti and Italtel (sold to third parties in September 2000)	597.9	927.2	(329.3)	
O.i.S. Group and Teleleasing (sold to third parties in the year 2000)	-	178.7	(178.7)	
Total Group	**30,115.7**	**28,206.9**	**1,908.8**	**6.8**

Operating costs and other net charges totalled 24,745 million euro in 2000 (21,994 million for the Telecom Italia Group), an increase of 2,138 million from 1999 (22,607 million, of which 20,625 million for the Telecom Italia Group).

Specifically, the costs of materials and services increased by 902 million, partly due to the change in the consolidation area (+689 million for the entry of the Nortel Inversora group, -105 million for the exit of SIRTI and Italtel, -49 million for the sale of O.i.S.), partly due to the rise in costs for operating and developing mobile telecommunications services.

Labour costs were practically the same as in 1999 (+ 25 million), since the change in the consolidation area was largely offset by lower costs at Telecom Italia S.p.A. as a result of the decrease in the average workforce compared to 1999, following the application of the mobility schemes agreed with the trade unions.

Depreciation and amortisation charges totalled 6,956 million in 2000 (6,018 million in 1999). They related to tangible fixed assets for 4,561 million and intangible fixed assets for 2,395 million, with increases of 168 million and 770 million respectively.

The overall net rise of 168 million euro in depreciation of tangible fixed assets arose from the inclusion of the Nortel Inversora group in the consolidation, offset in part by lower charges at Telecom Italia S.p.A. (as a result of the decrease in assets and the review of depreciation rates on the submarine network in 2000).

Amortisation of intangible fixed assets (2,395 million) included amortisation of consolidation goodwill relating to the acquisition of the Telecom Italia Group (1,319 million, compared to 638 million in 1999, when charges related to the second half of the year only).

Earnings before interest and non-recurring items for 2000 therefore amounted to 5,371 million (earnings of 5,600 million euro in 1999).

910

Non-recurring income totalled 1,705 million euro (7,149 million in 1999), and comprised capital gains of 1,408 million from the year's disposals (7,000 million in 1999, of which 6,927 million from the sale of OliMan Holding B.V. to Mannesmann) and sundry income and other income totalling 297 million (149 million in 1999).

Capital gains from disposals totalled 1,408 million euro, as follows:

- 969 million from the Telecom Italia Group disposals plan, specifically the sale of the equity investments in Italtel (393 million) and Meie (232 million), and the disposal of the Telecom Italia S.p.A. "Great buildings" business unit through the sale of the 60% of IM.SER (312 million) to third parties;
- 174 million from the sale of other equity investments, tangible and intangible assets and business units of the Telecom Italia Group;
- 204 million from the sale on the market of Telecom Italia shares held by Olivetti;
- 37 million from the sale of the equity investment in ARM;
- 24 million from the sale of other assets.

Other non-recurring income, totalling 297 million euro, included 236 million for the Telecom Italia Group (of which 47 million from lower charges on the TIM tax return compared to the 1999 provision) and 61 million for other Group companies, of which:

- 22 million for insurance compensation for damages to the Group facilities in the Ivrea area caused by floods;
- 22 million for a contribution from Canon Inc. in connection with the dissolution of the Olivetti Canon Industriale joint venture with Olivetti Tecnost;
- 17 million in other income and sundry income.

Non-recurring charges totalled 1,613 million euro (1,768 million in 1999) and included 1,542 million for the Telecom Italia Group, of which:

- 492 million for re-organisation charges;
- 419 million for the TIM provision to the technological upgrading reserve and frequency reserve;
- 180 million for provisions relating to disposals of equity investments and the Telecom Italia Group "Great Buildings" business unit;

Non-recurring charges for the other Group companies totalled 71 million euro and included:

- 18 million for re-organisation charges relating to the Olivetti Tecnost Group;
- 24 million for costs relating to the merger of Tecnost with the parent company;
- 10 million for direct damage caused by flooding to the Olivetti Tecnost facilities in the Ivrea area;
- 19 million for other charges.

Net proceeds from equity investments totalled 915 million (921 million in 1999) and included 302 million for the Telecom Italia Group (145 million in 1999), of which 161 million from the sale of listed shares held as current assets.

The residual amount (613 million) mainly referred to deferred tax assets of 524 million and the sale of securities not classified as fixed financial assets and options (68 million).

Interest expense and other net financial charges totalled 1,831 million (1,100 million in 1999) and mainly consisted of 767 million for the Telecom Italia Group (470 million in 1999) and 1,064 million from other companies.

Net financial charges for the Telecom Italia Group increased by 297 million as a result of the inclusion of Nortel Inversora in the consolidation (153 million) and the rise in debt at Telecom Italia (mainly for the recent acquisitions).

911

The net charges of the other companies, mainly Olivetti and Tecnost, increased by 434 million, largely for interest expense on borrowings taken out in relation to the Tender Offer on Telecom Italia, which in 1999 related only to the second half of the year.

Value adjustments to financial assets, which generated a writedown of 1,206 million (600 million in 1999), referred largely to the Telecom Italia Group (1,159 million). They included 706 million euro for equity investment writedowns and 453 million euro for amortisation of goodwill arising at the time of acquisition of these investments, of which 218 million euro for the acquisition of Seat Pagine Gialle.

Taxation for the year amounted to 2,340 million (3,207 million in 1999), of which 2,045 million for the Telecom Italia Group, including 25 million in relation to consolidation adjustments (2,606 million in 1999). Of the residual amount of 295 million euro, 170 million related to Tecnost for the period January September and arose from the cancellation of the deferred tax assets stated the previous year, the merger of Tecnost S.p.A. with Olivetti having also annulled some of the conditions that permitted such assets to be recorded.

Income attributable to minority interests was 1,941 million euro (2,056 million in 1999) and reflected earnings of 2,401 million attributable to Telecom Italia Group minority shareholders (2,181 million in 1999) and a loss of 481 million attributable to Tecnost minority shareholders for the period prior to 30 September 2000.

As a result, the Group posted a net loss for 2000 of 940 million (income of 4,939 million in 1999); excluding amortisation of goodwill in respect of the acquisition of Telecom Italia, the Group had net income of 111 million euro (income of 5,404 million in 1999, which, as already mentioned, largely arose from the capital gain generated by the sale of Omnitel and Infostrada).

912

Analysis of the balance sheet

The Olivetti Group balance sheet as of 31 December 2000 is summarised in the table set out below:

(in millions of euro)	31.12.2000 (a)	%	31.12.1999 (b)	%	Changes (a-b)
Short-term assets					
Financial resources and loans	7,559	7.9	3,426	4.5	4,133
Operating assets	14,426	15.2	12,430	16.5	1,996
Total short-term assets	**21,985**	**23.1**	**15,856**	**21.0**	**6,129**
Medium/long-term assets:					
Financial receivables and marketable securities	3	-	29	-	(26)
Intangible fixed assets	39,640	41.5	28,044	37.1	11,596
Tangible fixed assets	23,776	25.0	23,865	31.6	(89)

Short-term assets at 31 December 2000 totalled 21,985 million euro compared to 15,856 million at 31 December 1999.

The net rise of 1,996 million in short-term operating assets referred to the Telecom Italia Group for 1,789 million, of which prepaid expenses of 751 million euro in respect of the premium paid for deferment of the put option on Seat Pagine Gialle formerly held by Huit II, and 715 million for receivables due from the tax authorities and securities in the trading portfolio.

The rise of 207 million for the other Olivetti Group companies related in the main to marketable securities intended to be sold.

Financial resources increased by 4,133 million, of which 2,455 relating to the Telecom Italia Group (increase of 1,381 million in liquid funds and 957 million in financial receivables relating in the main to Telecom Italia security-lending operations).

The increase for the other Olivetti Group companies (1,678 million) arose for 1,256 million from a rise of 373 million in liquid funds and financial accruals and deferrals, of which 325 million euro in respect of the redemption premium on the 2000-2005 bond issued in 2000 by Tecnost International N.V. (now

a13

Olivetti Finance N.V.) and convertible in Telecom Italia shares, which was classified under debt at 31 December 2000, with deferral of the amount not relating to 2000.
Medium/long-term assets at 31 December 2000 totalled 73,375 million euro compared to 59,670 million at 31 December 1999.
The net rise of 11,596 million euro in intangible fixed assets included 13,406 million for the Telecom Italia Group in relation to the change in the consolidation area for 1,367 million, goodwill arising on acquisitions of subsidiary companies for 9,109 million and purchases of licences (UMTS and PCS 1900 in Peru) for 2,614 million.
The decrease in intangible fixed assets recorded by the other Olivetti Group companies (1,810 million) arose from the decrease in goodwill on the acquisition of Telecom Italia, mainly as a result of amortisation.
Tangible fixed assets were almost unchanged (-89 million, of which -83 million for the Telecom Italia Group).
Other medium/long-term assets (mainly financial fixed assets) rose by 2,224 million euro, of which 1,967 million for the Telecom Italia Group largely as a result of the acquisition of 104,978,070 own savings shares for an amount equivalent to 662 million euro, equity investments (GLB Serviços Interativos) and the formation of IS TIM, which was awarded the third GSM 1800 licence in Turkey (307 million).
The residual increase of 257 million reflected 391 million for 211,931,328 Olivetti shares acquired by Olivetti International in exchange for its Tecnost shares in connection with the merger of Tecnost with the parent company, offset in part by a net decrease of 134 million euro.
Short-term liabilities amounted to 32,558 million euro at 31 December 2000, compared to 21,833 million at 31 December 1999, an increase of 10,725 million.
The rise of 11,058 million euro in financial short-term liabilities referred for 10,247 million to the Telecom Italia Group, mainly as a result of the change in the consolidation area and borrowings to finance the year's equity investment acquisitions.
The decrease of 333 million in other liabilities included a 711 million reversal of parent-company current tax payables (following the decision to spread taxation of the capital gain arising on the 1999 sale of the equity investment in OliMan Holding B.V. and the consequent formation of the reserve for deferred taxes), offset by a net increase of 378 million (of which 214 million for the Telecom Italia Group).
Medium/long-term liabilities rose by 4,053 million euro, of which 3,187 million attributable to the Telecom Italia Group.
The rise of 859 million in medium/long-term non-financial liabilities (85 million relating to the Telecom Italia Group) related to the other Olivetti Group companies for 774 million, of which 825 million for the reserve for deferred taxes, offset in part by the decrease in the reserves for employee termination indemnities and pensions.
Medium/long-term debt rose by 3,194 million euro, of which 3,102 for the Telecom Italia Group, as follows:

- 868 million for Telecom Italia securities loans;
- 351 million for the residual amount due to the Ministry of Communications for acquisition of the UMTS licence;
- 554 million for financial lease payables due to Teleleasing following the elimination of Teleleasing from the consolidation area;
- 1,421 million for increased bond loans and other items.

Capital invested at 31 December 2000 and related funding is illustrated in the table below:

(in millions of euro)	31.12.2000	%	31.12.1999	%	Change
Short-term operating assets	14,426		12,430		1,996
Short-term operating liabilities	(14,957)		(15,290)		333
Operating working capital	(531)	(0.7)	(2,860)	(5.0)	2,329
Intangible fixed assets	39,640	54.4	28,044	49.4	11,596
Tangible fixed assets	23,776	32.6	23,865	42.0	(89)
Other assets	9,956	13.7	7,732	13.6	2,224
Capital invested (A)	**72,841**	**100.0**	**56,781**	**100.0**	**16,060**
Medium/long-term non financial liabilities	3,951	5.5	3,092	5.4	859
Minority interests	17,510	24.0	16,761	29.6	749
Group shareholders' equity	13,856	19.0	9,549	16.8	4,307
Total non financial sources (B)	**35,317**	**48.5**	**29,402**	**51.8**	**5,915**
Net financial indebtedness (A-B)	**37,524**	**51.5**	**27,379**	**48.2**	**10,145**

Capital invested at 31 December 2000 totalled 72,841 million euro, an increase of 16,060 million from 31 December 1999, of which 13,731 million from the increase in fixed assets and 2,329 million from the rise in operating working capital, described in detail above.

The 16,060 million euro increase in capital invested was funded by an increase of 10,145 million in debt and by an increase of 5,915 million in non-financial sources, of which 5,056 million from total shareholders' equity.

The 4,307 million euro rise in Group shareholders' equity arose mainly from share-capital increases for a total of 2,040 million (of which 1,999 million reserved for Tecnost minority shareholders in respect of Tecnost net assets amalgamated by the Parent Company following the merger), from the share exchange surplus relating to the merger of Tecnost for an original amount of 2,580 million euro, from the effect of the conversion of TIM savings shares (for the share relating to the Group) for 641 million, from other net increases for 151 million, offset in part by the loss for the year of 940 million and the dividend payout of 165 million euro.

Minority shareholders' equity rose by 749 million euro as a result of the share of the year's earnings for 1,941 million, offset by negative net movements of 1,192 million, mainly related to the merger of Tecnost (formerly a shareholder of Telecom Italia) into and with Olivetti S.p.A.

9,15

Net financial indebtedness at 31 December 2000 totalled 37,524 million euro compared to 27,379 million at the end of 1999.

Proceeds from dividends paid by Telecom Italia S.p.A.	(888)
Financial charges and other changes, net	1,206
Net financial surplus of other companies	**(746)**
Total net financial requirement	**10,145**

Extraordinary proceeds at the other Olivetti Group companies, totalling 2,095 million euro, mainly consisted of 906 million euro from the sale on the market of Telecom Italia shares, proceeds of 775 million from the transfer of tax credits to the Telecom Italia Group, 133 million from the collection of tax receivables from Mediofactoring (to whom the receivables were ceded in 1999), and proceeds of 32 million euro and 37 million euro from the sale of the equity investments in, respectively, O.i.S. S.p.A. and ARM Holdings PLC.

Payments by the other companies in the Olivetti Group consisted mainly of 165 million euro for the dividend payout by the Parent Company Olivetti S.p.A., 81 million euro for the purchase of 4.98% of Cirsa Business Corp. S.A., 27 million euro for the acquisition by Olivetti S.p.A. of 45% of Logicasiel (now Webegg S.p.A.) from Logica Ltd., 336 million euro for the purchase of Telecom Italia shares on the market and 30 million euro for subscription of the Mediobanca share-capital increase.

917

A number of major financial operations were launched in 2000.

• On 4 October, the Extraordinary Shareholders' Meetings of Olivetti S.p.A. and Tecnost S.p.A. approved the merger operation, which became effective as from 31 December 2000, following fulfilment of all the necessary conditions by the end of 2000.
The interests of holders of bonds issued by Olivetti and Tecnost subsidiaries (Olivetti International N.V., Tecnost International N.V., Tecnost International Finance N.V.) were safeguarded with a credit protection package, which is described in detail below

• On 4 July 2000, the Olivetti Extraordinary Shareholders' Meeting approved a free share-capital increase through the use of reserves, raising the par value of all shares from 1,000 lire to 1,936.27 lire (the equivalent of 1 euro), and the simultaneous re-denomination of share capital in euro.
The meeting also approved the conversion at par, not before tear-off of the relevant coupon, of preferred and savings shares into an equal number of common shares, with dividend entitlement rights from 1 January 2000.

• In August, the Wiretel company made a Public Tender Offer for Sirti S.p.A.
Telecom Italia, which held a 49.09% stake in Sirti S.p.A., tendered its shares.

• On 10 August, the Telecom Italia Extraordinary Shareholders' Meeting approved the partial split-up of the company through the transfer to Seat of 3,348,922 Tin.it S.p.A. common shares (the equivalent of an 8.168% equity investment) held by Telecom Italia.

• On 11 August 2000, Telecom Italia was granted a new credit line for a total of 13 billion euro to finance a series of major operations including the acquisition of Seat shares, the acquisition of 30% of Globo.com and part of the outlay required to purchase the GSM mobile communications operating licence in Turkey. Telecom Italia will pay interest of 0.45% above Euribor on the credit line.

• In August, Olivetti Tecnost (formerly Olivetti Lexikon) obtained a syndicated loan for an amount totalling 240 billion lire (approximately 124 million euro), for approximately 18 months. The operation, taken up by leading Italian banks, was lead managed by Monte dei Paschi di Siena, with Caretti e Associati acting as financial advisors. It has a margin of 31 basis points above Euribor. The new funds will give Olivetti Tecnost greater financial independence and flexibility and will be used to finance growth, new initiatives and investments in the ink-jet area.

• In September, Olivetti and Tecnost drew up a credit protection package to safeguard the interests of the holders of bonds issued by Olivetti and Tecnost subsidiaries. The package consists of a system of coupon adjustments in respect of the credit ratings of the following bonds:
- Tecnost International NV 1999-2004 floating rate notes for 9.44 billion euro (now 7.3 billion euro)
- Tecnost International Finance NV 5 3/8% 1999-2004 for 4.5 billion euro
- Tecnost International Finance NV 6 1/8% 1999-2009 for 1.75 billion euro
- Tecnost International Finance NV 5% 1999-2029 for 20 billion yen

918

- Olivetti International NV 5.875% 1998-2003 for 700 million euro
- Olivetti International NV 5% 1999-2009 for 1.5 billion euro

The credit protection package will remain in effect until the minimum rating of the merging company returns to an A3 rating (Moody's) and the equivalent A- (Standard & Poor's).
The coupons will be increased in the event of a rating downgrade and reduced in the event of an upgrade, with the proviso that interest (or spread over Euribor for the floating rate notes) may never be reduced below the rate set at the time of issue.
The Extraordinary Shareholders' Meeting of 10 October 2000 approved the proposal of the TIM Board of Directors of 26 July 2000 for the voluntary conversion of savings shares into an equal number of common shares against payment of 3.7 euro per share. The operation raised proceeds of over 5 billion euro.

• On 3 November 2000 the bond convertible into Telecom Italia common shares launched on 28 September by Tecnost International NV was largely oversubscribed.
The issue conditions are as follows:

Issuer:	Tecnost International NV
Underwriter:	Tecnost and Olivetti
Amount:	2,500 million euro
Maturity:	5 years
Coupon:	1% annual
Issue price:	at par (100%)
Redemption price:	113.41% of the issue price
Yield on maturity:	3.5% annual
Actual conversion price on maturity:	17.50 euro per Telecom Italia share equivalent to a conversion premium of 45.60% in respect of the price at the time of the launch (12.02 euro)

If all bond conversion rights are exercised, a total of 161,983,500 Telecom Italia common shares, representing 3.08% of common capital, will be subscribed. The bonds have been admitted for trading on the Luxembourg stock exchange.
At the end of November 2000, the loan exchange property relating to the assignment of Seat shares to Telecom Italia shareholders, which is described later in this report, was modified and now consists of 164,218,675 Telecom Italia common shares representing 3.12% of common capital. This means that a bondholder converting a bond with a par value of 1,000 euro is now entitled to receive 65.68747 Telecom Italia common shares, compared to 64.7934 shares as originally planned at the time of issue.
The operation was organised for the purpose of refinancing previous bond issues, in part through the purchase of securities on the open market.
In this connection, on 19 December 2000, Tecnost International NV announced the purchase of 1999-2004 floating rate notes on the market for 2,143.6 million euro.
On 29 December 2000 the Parent Company cancelled these securities.

919

• At a meeting on 18 December 2000, the Board of Directors availed themselves of the powers granted by the Extraordinary Shareholders' Meeting of 7 April 1999 to pass the following resolutions:
1) a share-capital increase for a maximum par amount of 357,184,480 euro through the issue of a maximum of 357,184,480 common shares at 1 euro par value per share, with regular dividend entitlement rights, with a share premium of between 1.6 euro and 2.2 euro per share, to be offered to Olivetti common shareholders and holders of bonds of the series "Olivetti 1998-2002 floating rate notes convertible into common shares" at a rate of 5 new shares for every 100 shares and/or Olivetti 2002 bonds held. Each share will bear an "Olivetti 2001-2002 common share warrant" giving the right to subscribe for one additional common share as per point 3) below for every 2 warrants exercised, at a price of between 2 euro and 2.6 euro per share, including a share premium of between 1 euro and 1.6 euro;
2) issue of a convertible bond loan designated "Olivetti 1.5% 2001-2004 convertible bonds with redemption premium" for a maximum par value of 1,600,186,470.40 euro, comprising a maximum of 500,058,272 bonds with a par value per bond of between 2.6 euro and 3.2 euro convertible into common shares on a one-to-one basis. The bonds will be offered at par to Olivetti common shareholders and holders of Olivetti 2002 bonds at a rate of 7 bonds for every 100 shares and/or Olivetti 2002 bonds held. The bonds will be redeemed on a single-payment basis on maturity (1 January 2004), at between 4% and 6% of their nominal value above par;
3) an additional share-capital increase for a maximum nominal amount of 678,650,512 euro through the issue in one or more tranches of a maximum of 678,650,512 common shares at 1 euro par value per share, with regular dividend entitlement rights, comprising a maximum of 178,592,240 shares reserved exclusively and irrevocably to service the exercise of warrants as at point 1) above, and a maximum of 500,058,272 shares reserved exclusively and irrevocably to service the conversion of bonds as at point 2) above.
The final issue price of the shares as at point 1), the exercise price of the warrants, the par value and redemption premium of the bonds were determined by the Parent Company Directors at a meeting on 9 February 2001, at, respectively, 2.6 euro for the shares, 2 euro for the exercise of the warrants and 5.07759% for the bond redemption premium.

920

Information by sector (CONSOB communication no. 98084143)

A) Information by business sector

The consolidated statement of income set out on the following pages shows the results of the operating companies for consolidation purposes. These results differ from those appearing in the companies' respective statutory accounts. The principal consolidation adjustments are the elimination of intercompany gains and depreciation charges on assets transferred within the Group, the reversal of tax-related entries made largely in respect of depreciation, the valuation of equity investments (equity investments in controlled companies, by definition, appear in the consolidated accounts as the appropriate portion of the company's net equity used for consolidation purposes) and other adjustments made to align the results of the individual companies with the accounting policies adopted by the Group.
The reclassified consolidated balance sheet by company is also set out on the following pages.

B) Other information

It should be noted that:
- intercompany transactions between different business sectors or geographical areas are executed at market prices and eliminated during consolidation;
- a description of the types of products offered and services provided appears in the first half of this Report on Operations.

"Introduction of the euro" disclosure (CONSOB communication no. 98083971)

In 2000, the Telecom Italia Group unit that monitors and co-ordinates activities for the introduction of the new currency continued the operations begun in 1999, both within the Group and with regard to external relations.
Telecom Italia drew up a timetable for the final phase:
- adjustments to information systems to be completed by the end of the third quarter of 2001;
- formulation, realisation and testing of contingency plans to be completed by the end of December 2001;
- independent verification and validation of key corporate systems using suppliers, methodologies and tools other than those adopted in the adjustment phase, in order to identify any problems in time for the necessary corrections to be made.

The intranet site on the euro, which may be consulted by all Telecom Italia group companies, was completely renewed and transformed into a continuously updated portal on the single currency.
With regard to external communications, the following initiatives took place:
- conclusion of the "Eurologo" campaign promoted by the "Euro Committee "of the Italian Treasury, in which Telecom Italia and TIM shops took part;
- direct participation in the "Provincial Euro Committees" set up by nine of Italy's most economically and socially representative provinces;
- courses on the new currency as part of training for personnel using the SAP system;
- participation together with other major Italian companies (Alitalia, Agip Petroli, Banca di Roma, Enel), in the Focus Group on the new European currency organised by Gartner Group;
- at the request of the Unioncamere, organisation of five training seminars for future trainers (tutor cascade system) and for retailers in 50 areas.

With regard to the other Olivetti Group companies included in the consolidation, activities for the introduction of the euro as the currency of account are nearing completion.
The expenses sustained by the Olivetti Group for the introduction of the euro amounted to approximately 8 million euro. For the most part, they were charged to income as production costs since they concern services provided for information system adjustments and upgrades.

926

The Parent Company, Olivetti S.p.A.

Olivetti S.p.A. is a holding company for operations mainly in the fixed and mobile telecommunications sector through its equity investment in the Telecom Italia Group, acquired as a result of the Public Tender Offer completed in June 1999, and through controlling equity investments in other industries including office and Internet products and services (Olivetti Lexikon S.p.A., which recently changed its name to Olivetti Tecnost S.p.A. following the merger of Tecnost Sistemi S.p.A.), Internet services (Webegg group), services and facilities management (Olivetti Multiservices S.p.A.) and gaming management (Lottomatica S.p.A.).
During 2000, Tecnost S.p.A., a holding company in which Olivetti held 69.67% and other Group companies 3.21%, was merged into and with Olivetti S.p.A.
The operation began on 4 July 2000 with the approval by the Boards of Directors of Tecnost and Olivetti of the Merger Plan formulated to simplify the structure of the Olivetti Group in line with market expectations. On 4 October, the Extraordinary Shareholders' Meetings of the two companies approved the operation, which became effective as from 31 December 2000. For accounting purposes, the merger was effective as from 1 October, as illustrated below.
The share exchange ratio, based on the two companies' balance sheets as of 30 April 2000, was set at 1.12 Olivetti shares for each Tecnost share with a par value per share of 1 euro, corresponding to an integer multiple of 28 Olivetti shares for 25 Tecnost shares.
Olivetti executed the merger by nullifying without exchange the Tecnost shares and Tecnost warrants (subsequently re-denominated Olivetti ex Tecnost warrants) in its possession and simultaneously raising share capital to service the share exchange through issuance of 1,999,439,092 Olivetti shares with a par value of 1 euro per share and dividend entitlement from 1 January 2000. An additional 153,848,296 Olivetti shares were reserved to service the Olivetti ex Tecnost warrants (exercisable at a rate of 28 Olivetti shares for every 25 ex Tecnost warrants).
Tecnost operations until 30 September 2000 were charged to the Tecnost statement of income; the same date was used for determination of Tecnost income taxes pursuant to art. 123, par 7 of Presidential Decree no. 917/1986. The operations of the merged company as from 1 October 2000 were charged to Olivetti S.p.A. income.
To permit significant comparison with 1999, the main effects of the merger on operations and balance sheet are disclosed separately.

* * *

Olivetti closed financial 2000 with net income of 870 million euro, compared to net income of 2,832 million euro in 1999, which included the non-recurring income from the sale of OliMan Holding B.V., set against equity investment writedowns to enable the company to take advantage of tax benefits for which it would not otherwise have been eligible.
Capital expenditure for 2000 totalled 258 million euro (17,241 million in 1999), of which 257 million related to equity investments.
Expenditure on equity investments of 257 million euro comprised:
- 186 million euro for acquisitions, of which 129 million for Tecnost Sistemi S.p.A., 27 million for Webegg S.p.A. and 30 million for Mediobanca S.p.A.;

929

• 71 million euro for subscription of share capital increases, of which 53 million for Olivetti Tecnost S.p.A. (formerly Olivetti Lexikon S.p.A.), 16 million for Webegg S.p.A. and 2 million for other equity investments.

At 31 December 2000, Parent Company shareholders' equity amounted to 13,937 million euro (7,454 million euro at 31 December 1999) and net financial indebtedness was 17,991 million euro (2,059 million at 31 December 1999). The increases of 6,483 million and 15,932 million, respectively, were both largely due to the merger of Tecnost S.p.A., as illustrated in detail later in this report.

Business performance for 2000 is reflected in the income statement below, reclassified in compliance with the Consob model for industrial holding companies pursuant to communication no. 94001437 of 23 February 1994. In order to provide a basis for comparison with the figures for 1999, the post-merger results, i.e., for the fourth quarter of 2000, are disclosed separately:

436

The year's ordinary operations closed with income of 956 million euro, which included income of 1,161 million in respect of Tecnost fourth-quarter operations, offset in part by a loss of 205 million for Olivetti operations (a loss of 2,805 million in 1999).
This result comprised:

- 1,475 million euro of financial income, of which 56 million for Olivetti operations (81 million in 1999) and 1,419 million from the effect of the Tecnost merger, including 1,414 million of dividends from Telecom Italia (recorded on accrual) with the relative tax credit and 5 million of interest income on current accounts.
  Financial income at Olivetti comprised:
  - 19 million euro of dividends and tax credits (15 million from Lottomatica, 3 million from Mediobanca and 1 million from other companies), an increase of 2 million euro from 1999;
  - 37 million euro of other financial income (64 million in 1999) of which:
    * 9 million from securities and repurchase agreements held as current assets (consisting largely of government securities), down 8 million from 1999 as a result of the downsizing of the securities portfolio;
    * 3 million of interest income from subsidiary companies (on borrowings and interest-bearing current accounts), down 14 million from 1999 mainly as a result of changes in Olivetti S.p.A.'s financial position in relation to O.F.I. and Tecnost (before merger);
    * 10 million of interest income on bank current accounts, up 4 million from 1999 as a result of the increase in liquid funds;
    * 9 million of interest income on receivables from the tax authorities following advance payment of income taxes for financial 2000;
    * 2 million of exchange rate gains;
    * 4 million of other income.
- 408 million euro of interest expense and other financial charges, of which 156 million for Olivetti operations, compared with 153 million in 1999.
  Financial charges for the Parent Company comprised:
  - 93 million euro relating to borrowings and current accounts in respect of subsidiary companies (54 million in 1999), of which 81 million to Olivetti Holding B.V. and 9 million to O.F.I., with an overall increase of 39 million due largely to the difference in the accrual period (the full year in 2000 and the last six months in 1999);
  - 14 million on bond loans (12 million in 1999);
  - 23 million on medium/long-term borrowings (15 million in 1999);
  - 8 million of exchange rate losses (20 million in 1999);
  - 6 million from use of bank credit lines (6 million in 1999);
  - 12 million on other financial operations (46 million in 1999).

  Financial charges in respect of the Tecnost merger totalled 252 million euro. They included 238 million on 14,100 million euro loans granted to Tecnost by Olivetti Finance N.V. (formerly Tecnost International N.V.).
- 10 million euro for writedowns of equity investments in subsidiary companies (2,397 million in 1999, including 2,071 million relating to Tecnost and 100 million relating to Olivetti International; in both cases, the writedowns were made to take advantage of tax benefits for which the company would not otherwise have been eligible).

931

- 17 million euro of other income from operations (17 million in 1999), consisting mainly of revenues from Group companies.
- 118 million euro of other costs of operations (353 million in 1999), including 112 million for Olivetti and 6 million for the last quarter at Tecnost.
  Specifically, the costs relating to Olivetti comprised:
  - 47 million for non-financial services (41 million in 1999);
  - 21 million for depreciation and amortisation (21 million in 1999), comprising:
    * 20 million in respect of intangible assets (20 million in 1999);
    * 1 million in respect of tangible fixed assets (1 million in 1999);
  - 11 million for writedowns of receivables (18 million in 1999);
  - 15 million for provisions to the reserve for future risks and charges, mainly in respect of sold equity investments (175 million in 1999, including 88 million for commitments to Mannesmann in relation to the sale of OliMan Holding B.V., in the event of Bell Atlantic exercising its option to purchase Omnitel Sistemi Radiocellulari shares at a pre-determined price, and 75 million for possible future charges arising from the 1999 public tender offer on CCIL);
  - 12 million for payroll costs (22 million in 1999);
  - 4 million for other operating charges (72 million in 1999);
  - 2 million for leases and rentals (4 million in 1999).

  Other costs of operations at Tecnost totalled 6 million euro, consisting of 2 million for non-financial services and 4 million for amortisation of intangible fixed assets.

Extraordinary operations generated net income of 25 million euro (6,398 million in 1999), relating entirely to Olivetti and consisting of income of 27 million and charges of 2 million.
Income consisted of 18 million euro of capital gains from disposals (including 14 million from the contribution of the equity investment in Tecnost Sistemi to Olivetti Tecnost (formerly Olivetti Lexikon) and approximately 4 million from the contribution of the equity investment in Telemedia Applicazioni to Webegg) and 9 million of other income and sundry income (of which approximately 3 million for reimbursement of higher taxes paid abroad in previous years by subsidiary companies that were sold).
In 1999, non-recurring income totalled approximately 6,925 million euro, and included capital gains from disposals of 6,907 million (6,892 million arising from the sale of the controlling stake in OliMan Holding B.V. to Mannesmann) and other income of 18 million.

After providing income taxes totalling 111 million euro, net income was 870 million euro (income of 2,832 million in 1999).

932

The **balance sheet** of Olivetti S.p.A. at 31 December 2000 is laid out below:

(in millions of euro)	31.12.2000	%	31.12.1999	%	Changes
Short-term assets					
Financial resources	1,000	2.9	416	3.8	584

Total short-term assets	**3,041**	**8.9**	**695**	**6.4**	**2,346**
Medium/long-term assets					
Equity investments	30,881	90.5	10,050	92.1	20,831
Other assets	216	0.6	171	1.5	45
Total medium/long-term assets	**31,097**	**91.1**	**10,221**	**93.6**	**20,876**
Total assets	**34,138**	**100.0**	**10,916**	**100.0**	**23,222**
Short-term liabilities					
Short-term debt	1,841	5.4	372	3.4	1,469
Operating liabilities	1,206	3.5	981	9.0	225
Total short-term liabilities	**3,047**	**8.9**	**1,353**	**12.4**	**1,694**
Medium/long-term liabilities					
Medium/long term debt	17,150	50.3	2,103	19.2	15,047
Other medium/long term liabilities	4	-	6	0.1	(2)
Total medium/long-term liabilities	**17,154**	**50.3**	**2,109**	**19.3**	**15,045**
Total liabilities	**20,201**	**59.2**	**3,462**	**31.7**	**16,739**
Shareholders' equity	**13,937**	**40.8**	**7,454**	**68.3**	**6,483**
Total liabilities and shareholders' equity	**34,138**	**100.0**	**10,916**	**100.0**	**23,222**

Short-term assets at 31 December 2000 totalled 3,041 million euro, an increase of 2,346 million compared to 695 million at 31 December 1999. This reflected a rise of 1,762 million in operating assets, of which 1,414 million related to dividends receivable from Telecom Italia and the relative tax credit, which are recorded on accrual.

Medium/long-term assets at 31 December 2000 totalled 31,097 million euro compared to 10,221 million at 31 December 1999. The net increase of 20,876 million mainly arose from 30,441 million for the Telecom Italia equity investment acquired as a result of the Tecnost merger, offset in part (9,646 million) by the annulment of the equity investment in Tecnost.

Short-term liabilities totalled 3,047 million euro, compared to 1,353 million at 31 December 1999, an increase of 1,694 million arising largely from debt acquired with the Tecnost merger (1,002 million).

Medium/long-term liabilities, consisting mainly of debt, totalled 17,154 million euro at 31 December 2000, an increase of 15,045 million from 2,109 million at 31 December 1999. The increase included 14,100 million of Tecnost debt to Olivetti Finance N.V. (formerly Tecnost International N.V.).

433

The table set out below analyses capital invested at 31 December 2000 and related financing:

(in millions of euro)	31.12.2000	%	31.12.1999	%	Changes
Short-term operating assets	2,041	6.4	279	2.9	1,762
Short-term operating liabilities	(1,206)	(3.8)	(981)	(10.3)	(225)
Operating working capital, net	835	2.6	(702)	(7.4)	1,537
Long-term assets	31,097	97.4	10,221	107.4	20,876
Capital invested (A)	**31,932**	**100.0**	**9,519**	**100.0**	**22,413**
Medium/long-term non financial liabilities	4	-	6	0.1	(2)
Shareholders' equity	13,937	43.7	7,454	78.3	6,483
Total non financial sources (B)	**13,941**	**43.7**	**7,460**	**78.4**	**6,481**
Net financial indebtedness (A-B)	**17,991**	**56.3**	**2,059**	**21.6**	**15,932**

Capital invested was financed by debt for 56.3% (21.6% at the end of 1999) and by shareholders' equity for 43.7% (78.3% at the end of 1999).

Specifically, shareholders' equity rose by 6,483 million euro during 2000 as a result of:

- 2,040 million euro from capital increases (net of 2,368 million from the free capital increase effected through the use of reserves following the re-denomination of share capital in euro), including 1,999 million reserved for the share exchange with Tecnost minority shareholders as part of the Tecnost merger and 41 million from the conversion of bonds and exercise of warrants and options;
- 3,738 million euro of reserves from merger surpluses as a result of the Tecnost merger, including 1,072 million from share cancellation and 2,666 million from the share exchange, which were subsequently used to re-form reserves previously existing in the merged company, as explained below;
- 870 million euro from income for the year;
- a decrease of 165 million euro for the dividend payout in respect of 1999 income.

As mentioned above, the merger generated a surplus of 1,072 million euro from share cancellation and a surplus of 2,666 million euro from the share exchange, as detailed in the table below:

(in millions of euro)	
A. Portion of Tecnost shareholders' equity attributable to Olivetti as of 31 December 2000 (69.67%), excluding the result for the fourth quarter of the year 2000	10,718
B. Cost of the Tecnost equity investment owned by Olivetti	9,646
Reserve for surplus emerging from the cancellation of shares (A-B)	**1,072**
C. Tecnost minority interests (30,33%)	4,665
D. Share capital increase reserved for minority shareholders (1,12 Olivetti shares at 1 euro for each of no. 1,785,213,475 Tecnost shares owned by minority shareholders)	1,999
Reserve for surplus emerging from the exchange of new shares with minority interests acquired (C-D)	**2,666**
Total reserves emerging from the upstream merger	**3,738**

934

The reserve from share cancellation (1,072 million euro) and the reserve from the share exchange (2,666 million euro) were used in full to re-form reserves previously existing in Tecnost:
share cancellation reserve:
- non-taxable grants reserves for 10 million;
- non-taxable revaluation reserve for 1 million;
- legal reserve for 357 million;
- extraordinary reserve for 55 million;
- additional paid-in capital for 649 million;

share exchange reserve:
- reserve of 118 million euro for the exercise of Olivetti ex Tecnost warrants, to be used, when exercise of each warrant is requested, mainly for the free increase in the par value of the shares (from 500 lire to 1,936.27 lire) following the re-denomination of share capital in euro;
- additional paid-in capital for 2,548 million euro.

At 31 December 2000, the Parent Company had net financial indebtedness of 17,991 million euro (2,059 million at 31 December 1999), as follows:

(in millions of euro)	31.12.2000	31.12.1999	Changes
Short-term debt			
Current portion of medium/long-term debt to banks	830	64	766
Current portion of bonds	258	-	258
Bank borrowings and amounts due to other providers of finance	694	280	414
Debt to subsidiary companies	59	28	31
Debt to associated companies	-	-	-

Total net financial indebtedness (A+B)	**17,991**	**2,059**	**15,932**

935

The short-term net financial position worsened by 885 million euro.
Specifically, short-term debt increased by 1,469 million euro, of which:
• 766 million for the current portion of medium/long-term debt, of which mainly 350 million relating to credit facilities of the merged Tecnost company and 416 million relating to Olivetti, due in 2001;
• 258 million in respect of the Olivetti 1994-2001 bond loan, repayable in full on 26 July 2001;
• 414 million payable to banks and other providers of finance, of which Tecnost payables of 650 million, offset in part by an improvement of 236 million in Olivetti exposure.
• 31 million payable to subsidiaries.
Short-term financial resources rose by 584 million, as follows:
• 740 million mainly from the increase in liquid funds as a result of the collection of 755 million in respect of receivables from the tax authorities ceded by Tecnost to Telecom Italia;
• a decrease of 136 million in financial assets, largely as a result of the sale of securities;
• a decrease of 20 million in receivables due from subsidiaries.
The medium/long-term net financial position worsened by 15,047 million euro.
Specifically, amounts due to subsidiaries increased by 13,998 million, including Tecnost payables to Olivetti Finance N.V. (formerly Tecnost International N.V.) for 14,100 million euro, offset in part by the repayment of Olivetti payables to Olivetti Holding B.V. for 102 million.
Medium/long-term accrued interest expenses increased by 1,431 million euro and reflected charges on the above-mentioned borrowings obtained from Olivetti Finance N.V. (1,350 million) and Olivetti Holding B.V. (81 million).
The net financial requirement for the year (15,932 million euro), excluding net debt acquired as a result of the Tecnost merger (15,393 million), was 539 million euro. In addition to the requirement of 124 million euro in respect of ordinary operations (mainly financial charges), it arose from the following extraordinary operations totalling 415 million euro:

(in millions of euro)	Year 2000
Tecnost S.p.A merger costs	14
Residual costs sustained for the Tender Offer for the Telecom Italia S.p.A. shares	13
Payments relating to equity investments acquired, loss coverage, reinstatements of capital and other	257
Costs for share capital increase	(41)
Dividends payment	165
Tax advances	186
Tax credits assignments	(153)
Partial collection of a restricted deposit in favour of Getronics	(37)
Other disbursements, net	11
Total financial requirement for the year from extraordinary operations	**415**

436

Dealings with related parties

Olivetti S.p.A.'s financial and commercial dealings with subsidiaries are conducted at normal market conditions and consist mainly of the provision of services, centralised treasury operations and, pursuant to its role as a holding company, coordination of the activities of the subsidiaries.

(in millions of euro)	Subsidiary companies	Associated companies
Dividend income (excluding tax credit)	891	10
Other financial income	8	-
Financial charges	331	-
Other revenues	11	-
Purchase of goods and services	8	-
Trade and other receivables	893	-
Financial receivables	45	-
Trade and other payables	105	-
Financial payables	15,560	-

Employee stock options

During 1999, a "Three-Year 1999-2001 Stock Option Plan" for the benefit of approximately one hundred managers of Olivetti S.p.A. and its subsidiaries was approved as a tool to provide incentives and boost management loyalty. Authorised by a Directors' resolution of 9 June 1999 and supplemented with a subsequent resolution of 29 November 1999, the plan provides for a maximum of 48 million warrants, which cannot be transferred inter vivos , to be assigned free of charge to the beneficiaries. Each warrant gives an option on one Olivetti common share at an overall price (nominal value plus share premium) of 2,320 lire, for a maximum nominal share-capital increase of 48 billion lire. This increase, resolved by the above-mentioned Board meetings in execution of the powers pursuant to art. 2443 of the Italian Civil Code (delegated by the Extraordinary Shareholders' Meeting of 7 April 1999), complies with the limits set by art. 134, par 2, of Legislative Decree 58/1998.
The warrants may be exercised at pre-specified times during the three-year period and may be accumulated until the end of the plan. The first tranche was exercised during 1999; exercise of the second and third tranches has been set between 1 and 31 January 2001 and 2002, respectively.

	No. rights (warrants)	Exercise price (euro)	Market price (euro)
Rights exercised as of 15 December 1999	21,038,333	1.198	2.499 (2)
Rights to be exercised as of 31 December 1999	24,666,667 (1)	1.198	2.499 (2)
Rights to be exercised as of 31 December 2000	23,871,667 (1)	1.198	3.073 (2)

(1) With reference to assignments as of the date in question, net of cancellation of rights pertaining to personnel gone out of the Olivetti Group.
(2) Average share price, in December 1999 and 2000
In respect of the second tranche of rights to be exercised between 1 January and 31 January 2001, no. 12,138,348 shares were issued.

937

On 24 February 2000, the Board of Directors approved a Three-Year Stock Option Plan from 1 January 2002 to 31 December 2004 for the benefit of approximately one hundred managers of the Parent Company and its subsidiaries. The plan provides for 29,500,000 warrants to be assigned free of charge to the beneficiaries. The warrants give options on an equal number of Olivetti common shares at a price of 3.705 euro per share (7,174 lire), corresponding to the normal value of Olivetti common shares at the date of the Board meeting.

The plan is designed to provide incentives and boost the loyalty of managers who will be implementing the Group's medium-term growth plans in the IT business in parallel with its growth in telecommunications.

The warrants may be exercised in three tranches between 1 November and 15 December of 2002, 2003 and 2004 and may be accumulated until the end of the plan.

The Directors' resolution executes the powers pursuant to art. 2443 of the Italian Civil Code delegated by the Extraordinary Shareholders' Meeting of 7 April 1999.

The Parent Company has not implemented any operations that could encourage subscription of shares by its employees, pursuant to art. 2358 of the Italian Civil Code.

On 9 February 2001, the Board of Directors passed a resolution, effective subject to the annulment of the previous resolution described above which no longer served the purpose for which it was intended, to raise share capital by a total amount of 29 million euro through issuance of 29 million shares at a price of 2.81 euro per share. The increase is to service a stock option plan for the benefit of managers of the Parent Company and its subsidiaries for the three years 2002-2004 (maintaining the conditions applied to managers no longer in the Group's employ).

Also with reference with this plan, the Parent Company has not implemented any operations that could encourage subscription of shares by its employees, pursuant to art. 2358 of the Italian Civil Code.

Shares in Olivetti S.p.A. and its subsidiaries held by the Directors, Statutory Auditors and Chief Operating Officer of the Parent Company (Consob regulation no. 11971/1999)

In compliance with Consob regulation 11971/1999, shares in Olivetti S.p.A. and its subsidiaries held by the Parent Company Directors, Statutory Auditors and Chief Operating Officer are detailed below.

Other information

Olivetti S.p.A. treasury stock as of 31 December 2000 comprised 2,697,500 common shares with a par value of 1 euro per share, arising from the conversion of an equal number of savings shares as a result of the approval by the Extraordinary Shareholders' Meeting of 4 July 2000 of the compulsory conversion of preferred and savings shares into common shares. The shares, stated in the accounts at a unit carrying value of 0.852 euro, also arise from Shareholder-approved purchases of stock from employees of the Parent Company and its subsidiaries as a result of fulfilment of the conditions provided under the relative share offer regulations requiring that the shares be sold back to the Parent Company.
The Shareholders' Meeting of 4 October 2000 authorised the Board of Directors, pursuant to art. 2357 ter, par 1, to dispose of all the above-mentioned own shares by 31 December 2002 through the distribution, in one or more operations, of non-compulsory options to former employees of the Parent Company and its subsidiaries, who continue to provide services for the Group.

With regard to Corporate Governance, the Board of Directors regards the Voluntary Code of Practice drawn up and recommended by Borsa Italiana S.p.A. as a valid reference, since the Olivetti corporate governance model adopts some of the key provisions of the Code.
Specifically:
• Olivetti has already amended its By-Laws to comply with the provisions of the Consolidated Law 58/98, with the introduction of articles to guarantee disclosure of required information by executive Directors to the Board of Directors and the Board of Statutory Auditors and the election of one Auditor by the minority.
• The majority of members of the Board of Directors are non-executive directors. The Board held 20 meetings in the two years 1999-2000.
• The Chairman of the Board of Directors co-ordinates the operations of the Board, chairs meetings by ensuring that the By-Laws are correctly applied, and chairs the Shareholders' Meeting availing himself of the full powers conferred under the By-Laws (art.12).
• The Chief Executive Officer provides the Board of Directors and the Board of Statutory Auditors with regular reports on his activities in relation to the powers granted and presents unusual extraordinary operations or operations with related parties to be examined and approved by the Board.
• The Board has already formed two advisory committees:
- the Audit Committee, which checks the Parent Company and Group financial data (in particular, data for publication in the Annual Report and the Half-Year Reports) and the extraordinary operations submitted by the Board of Directors. Since its formation, the Audit Committee has been composed of four non-executive directors, i.e., directors without any specific responsibilities and delegated powers, and of one standing Auditor;
- the Remuneration Committee, which determines the variable emoluments for senior management (including bonuses and incentives) proposed by the Chief Executive Officer, and implements the powers delegated by the Board with regard to stock options (dating back to 1984).
• With regard to internal control, a corporate internal auditing function which works in co-operation with the Independent Auditors is responsible for ascertaining the effectiveness, efficiency and cost-effectiveness of internal regulations and for ensuring that book entries are correct.

qal

• The current Board of Statutory Auditors was appointed in compliance with the Consolidated Law 58/98 and with current legislation requiring that each member of the Board fulfil specific professional and ethical conditions.
• A special unit ensures proper and continuous relations with institutional investors and private investors.
With regard to Olivetti's announced intention of amending the company By-Laws to take account of the relevant innovations, the Board of Directors will conduct regular reviews to ensure full compliance with all regulations, binding and otherwise, in the interests of transparent and democratic corporate governance.

Legal proceedings

Telecom Italia Group

The main legal proceedings in which the Telecom Italia Group was involved in 2000 and developments in early 2001 are described below.

1) Transfer of Cecchi Gori Communications to Seat Pagine Gialle

On 7 August 2000, Seat Pagine Gialle signed a contract for the purchase from Fin.Ma.Vi. S.p.A. of Cecchi Gori Communications (CGC), which holds the concessions for the TMC and TMC2 television channels. On 8 August, Seat notified the operation to the Competition and Market Authority (Antitrust). On 9 November, the Antitrust commenced an investigation of Seat and CGC, holding the operation likely to form or to strengthen a dominant position in the communications sector; the investigation ended on 23 January 2001 in the Telecom Italia Group's favour, authorising the operation subject to certain conditions. On 12 September the Communications Authority (Authority) launched a separate investigation pursuant to Law 249/97, which ended on 18 January 2001 with authorisation withheld. Telecom Italia and Seat filed an appeal with the Administrative Court (TAR) for the Region of Lazio asking for the ruling to be overturned, and suspended pending the decision. On 31 January, the TAR approved the suspension application and ordered the Authority to re-examine the case. In February, the Authority confirmed its negative finding. Seat and Telecom Italia immediately filed an appeal against the new ruling with the TAR; on 7 March, the TAR issued a final meritorious sentence, overturning the Authority's rulings and thus authorising the operation to continue. The Authority has announced that it will appeal to the Council of State.
The TAR sentence has also rendered null an appeal to the Council of State presented by Fin.Ma.Vi. against the first ruling of the TAR. Fin.Ma.Vi also filed an urgent petition with the civil Court of Rome requesting the contract stipulated by the parties to be declared cancelled. The petition was rejected last 12 March.

2) Pagine Italia – Telecom Italia/Seat Pagine Gialle

On 27 July 2000, the Antitrust authorised the acquisition of control of Seat Pagine Gialle by Telecom Italia and the merger of Seat and Tin.it, upon condition that, among other things, Telecom Italia would cede, as from the following 1 September, the telephone subscribers database in electronic format free of charge to eligible parties and on a pay basis to all other parties, and that it would request tenders, as from 1 January 2008, for the advertising concession for the official telephone subscribers directory (the "White Pages").
On 13 November 2000, Pagine Italia filed a petition with the TAR for the Region of Lazio for the Antitrust ruling of 27 July to be overturned, and suspended pending a decision. At the hearing on 6 December, Pagine Italia asked for the suspension to be extended until the hearing to examine the case.
On 22 March 2000, Telecom Italia had already received notice of a Pagine Italia summons requesting the Turin Court of Appeal to: i) declare null the contract awarding Seat an exclusive advertising concession for the "White Pages" directory, on the grounds that the concession violated competition legislation; ii) declare illegitimate the Telecom Italia investment in Seat, on the grounds that it violated competition legislation and was an abuse of a dominant position; iii) prohibit continuance of the relationship.

943

At a hearing on 17 October, Telecom Italia and Seat produced a number of preliminary inadmissibility pleas. For its part, Pagine Italia filed an urgent petition requesting the Court of Appeal to prohibit the continuance of the exclusive advertising concession in favour of Seat and to order Telecom Italia to request separate tenders for the advertising concession for each local official telephone subscribers directory.
At a hearing on 21 November 2000, the Court of Appeal rejected the petition presented by Pagine Italia, which presented an appeal against the ruling. This appeal was also rejected, on 14 February 2001. The merits of the case will be discussed at a hearing on 15 May 2001.

3) Telecom Italia savings share buy-back

On 10 January 2001 the Telecom Italia savings share buy-back approved by the Shareholders' Meeting of 14 January 2000 was completed. The operation, which began with a public tender offer from 17 February to 17 March 2000 and continued with direct purchases on the stock market, was undertaken with the objective of purchasing own shares representing not more than 10% of total capital, at a price of 6.5 euro per share. The Company purchased a total of 112,998,070 shares (of which 1,793,820 through the Public Tender Offer), representing approximately 1.5% of share capital.
Elliott International L.P. and Liverpool Limited Partnership, investment fund managers of the US Elliott group, recently presented a suit for damages against Olivetti and Telecom Italia and against the Chairman and Vice Chairman of Telecom Italia, for amounts totalling 18.9 million euro (36.6 billion lire). The suit alleges failure to execute the undertakings laid out in the Prospectus relating to the Olivetti and Tecnost Public Tender Offer on Telecom Italia, and failure to comply with the resolutions of the Shareholders' Meeting of 14 January 2000 with specific reference to the mandate to purchase own savings shares on the automated trading system in compliance with the relevant regulations following the end of the public tender offer period.

* * *

Furthermore, the validity of the resolution of the Shareholders' Meeting of 14 January 2000 was impugned in March 2000 by the shareholder Alberto Reale, on the grounds that the proposal submitted to the Meeting was an amended version of that filed prior to the meeting. At a hearing on 6 March 2001, the judge unsuccessfully attempted a ritual mediation between the parties. The next hearing has been set for 4 July 2001.

4) Universal service

The Omnitel and Infostrada companies have filed a petition with the TAR of the Region of Lazio against the Authority and against Telecom Italia requesting the annulment of ruling 8/00/CIR regarding "Applicability of the mechanism for the distribution of the net cost of the universal service for 1999".
Under this ruling, part of the cost, recognised as an "iniquitous charge" for Telecom Italia, the company responsible under law for providing the service, was divided among the petitioning companies and TIM. Pending a sentence, the two companies have not paid the contributions (set overall at 18 billion lire) to

a44

the special fund set up by the Ministry of Communications, thus preventing the Ministry from paying the overall amount conceded to Telecom Italia against its costs for 1999 (52 billion lire).
At the hearing to discuss the Omnitel suspension plea (24 January 2001), the TAR fixed the hearing of the case for 30 May, without making any rulings regarding the petitioner's plea.

5) Infostrada/Albacom - Telecom Italia: services with ADSL access and RING services

On 21 July 1999, the Infostrada company lodged an unfair competition complaint with the Antitrust regarding the marketing by Telecom Italia of ADSL access services to the data transmission networks, alleging an unfair advantage for Telecom Italia on the data services and Internet market for companies and Internet Service Providers, given the impossibility for competitor operators to provide their own customers with similar access technology. The Antitrust commenced an investigation into the matter.
In the meantime, in response to an urgent petition filed by the Infostrada and Albacom companies, on 16 August 2000 the Appeal Court of Rome issued an order forbidding Telecom Italia from "promoting and/or offering and/or directly concluding contracts in respect of RING services, or the equivalent, however named". Telecom Italia has been thus prohibited from offering RING services for an unlimited period of time. In view of the Authority's approval of the Telecom Italia wholesale offer as per resolution 4/01/CIR (see next point), the Company filed a petition for the annulment of the restricting order issued by the Appeal Court of Rome on 16 August 2000. *The petition was granted on 5 April 2001.*

6) Full Business Company/Permanent Virtual Channel

On 6 December 2000, Telecom Italia notified the Authority that it had filed a petition requesting the TAR of the Region of Lazio to overturn and, pending a decision, to suspend the Authority's ruling of 22 November suspending the "Full Business Company" offer and enjoining its continued marketing and promotion.
The offer concerns the supply of telecommunications services based on XDSL broadband access technology: Telecom Italia's competitors allege failure to comply with the regulation whereby the retail offer of such services must always be accompanied by a corresponding and equivalent wholesale offer for competitors.
In the meantime, the Authority issued resolution 15/00/CIR requiring Telecom Italia to formulate a wholesale XDSL access offer (a "permanent virtual channel"). Telecom Italia contested the resolution with a petition requesting the TAR to overturn some of the offer conditions set by the Authority. Subsequently, however, on 22 February 2001, the Authority issued resolution 4/01/CIR declaring final approval of the content of the wholesale offer presented by Telecom Italia and authorising the resumption of marketing of the "Full Business Company" and "Ring" service (30 days from the approval of the Telecom Italia wholesale offer).
Some interconnected operators contested the resolution and filed for its suspension; the TAR rejected the suspension petition on 21 March 2001.

7) Antitrust proceeding against TIM and Omnitel

With regard to the Antitrust ruling of 28 September 1999 ordering TIM and Omnitel to pay fines - to be determined in proportion to their respective revenues for 1998 - for collusion in setting fixed-to-mobile

945

communication charges in the period 1995-1998, in December the Council of State accepted in part the appeals presented by the companies. The largest of the three fines, regarding alleged collusion in 1998, was annulled (approximately 62 billion lire). The fine, originally imposed on TIM, for an amount of 100 billion lire (paid on 30 June 2000 in order to avoid any additional legal sanctions), was thus reduced to 38 billion lire.

8) Acquisition of the equity investment in Telekom Srbija

In February 2001, the Turin Public Prosecutor opened an inquiry into Telecom Italia's acquisition of 29% of the capital of Telekom Srbija. Telecom Italia immediately placed all the documentation and data regarding the operation (carried out in 1997 and therefore several years ago) at the authority's disposal.

9) Dispute with the INPS (Italian national insurance board)

In compliance with Law no. 58/1992, Telecom Italia is required to provide full insurance coverage for all persons employed as of 20 February 1992 by the STET, SIP, Italcable and Telespazio companies, and for persons transferred from the Public Administration to IRITEL, including periods previously worked in other companies, through the Telephone Workers Fund (FPT), which became part of the compulsory national insurance scheme on 1 January 2000. The contributions due are calculated by the INPS and must be paid in 15 annual instalments.
The total liability for these payments is uncertain due to a disagreement between Telecom Italia and the INPS with regard to the method used to calculate the amounts due.
Nevertheless, the Telecom Italia Group consolidated financial statements as of 31 December 2000 include a payable of 1,377 billion lire (711 million euro) for residual amounts due to the INPS in respect of former IRITEL employees.
With regard to application and interpretation of the law, the dispute with the INPS concerns both the date from which, pursuant to law no. 58/192, interest should be calculated for payment of the liability on an instalments basis, and, pursuant to law no. 58/1992, the exclusion of all employees (except former IRITEL employees) who had already applied for re-absorption before 20 February 1992.
The matter has been taken to court and Telecom Italia has undertaken to pay with reservation the amounts requested by the INPS according to the criteria established by the INPS, subject to subsequent adjustment should the courts find in favour of Telecom Italia.
According to Telecom Italia estimates, the principal amount of the liability (excluding sums relating to former IRITEL employees) could vary, depending on the various interpretations and based on estimates including all employees, from 1,900 billion lire (approximately 980 million euro) to 2,500 billion (approximately 1,290 million euro); 509 billion lire (263 million euro) have already been paid.
In the Olivetti Group consolidated financial statements as of 31 December 2000, in compliance with the relevant accounting policies, an amount corresponding to the minimum estimated liability has been provided under goodwill arising as a result of the acquisition of Telecom Italia.
Under an agreement between the INPS and Telecom Italia, Telecom Italia has paid – with reservation – pre-amortisation interest (also covering former IRITEL employees) in fifteen deferred constant annual instalments, including annual 5% interest, through 1999, for an overall amount of 216 billion lire (112 million euro). With the Court of Cassation sentence no. 4242 of 5 April 2000 in favour of Telecom Italia,

9496

payment of pre-amortisation interest and related respite interest for a residual amount of 789 billion lire (407 million euro), of which 68 billion (35 million euro) for the amount due at 31 December 2000, was suspended, as from June 2000.

Olivetti S.p.A.

The main legal proceedings concerning the Parent Company are described below.
1) The investigations opened by the Public Prosecutor in Milan in connection with the presentation on 16 May 1993 of the memorandum by the then Chairman-Chief Executive Officer, regarding which the company has already issued a number of statements (including, in particular, a statement in the Directors' Report in the 1993 Annual Report), were continued by the Public Prosecutor in Rome following the transfer of the case for reasons of territorial jurisdiction.
The main part of proceedings have already been closed, rulings are pending on others.
2) With regard to the dispute in the Rome courts between Olivetti and Poste Italiane S.p.A. for non-payment by Poste Italiane S.p.A. of products and/or technical assistance supplied, the sentences passed to date have been in favour of Olivetti. Poste Italiane S.p.A. recently filed an appeal.
3) The case brought by Centenary Corporation and Centenary International Corporation against Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A. (which merged Sy.F.A. S.p.A., which had in turn merged Olivetti Personal Computers S.p.A.), for damages (put at 250 billion lire) the plaintiffs allege they suffered as a result of the acquisition of the Olivetti Group's personal computers business, is still underway in the Ivrea courts.
Olivetti and its legal advisors believe the case to be objectively groundless in fact and in law, and intended to disguise the responsibilities and management shortcomings of the purchasers.
Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A. have already taken legal action against Piedmont International S.A. (a company in the Centenary Group) to recover receivables due.

427

Events subsequent to the end of the financial year

Olivetti S.p.A.

Conversion of Telecom Italia savings shares into common shares and subsequent buy-back

On 5 February 2001, the Olivetti Board of Directors examined the plan approved on the same date by the Telecom Italia Board of Directors for the conversion of Telecom Italia savings shares into common shares (described below in the section on the Telecom Italia Group). The Olivetti Board of Directors noted that in the event of conversion of all Telecom Italia savings shares into common shares, Olivetti would dilute its percentage of voting rights to approximately 39%, in line with the share of total capital currently owned, which would remain unchanged; the proceeds raised by its participation in the buy-back would permit a significant reduction in the net financial indebtedness of Olivetti and the financial companies it directly controls, thus improving Telecom Italia's credit rating.
The Olivetti Board of Directors acknowledged the importance of the operation as a tool to optimise the capital structure and improve financial flexibility. It therefore:
- found in favour of the conversion of Telecom Italia savings shares into common shares;
- declared its intention of accepting the public tender offer on Telecom Italia common shares in line with the percentage of shares tendered by the market.

Share capital increase through an offer of shares cum warrant and bonds

On 9 February 2001, the Olivetti Board of Directors set the additional terms and conditions of the capital operation approved with a resolution of 18 December 2000 (rights issue and convertible bond), and illustrated earlier in this report.
The subscription price for the shares cum warrant was set at 2.6 euro per share, while the exercise price of the warrants attached to each share was set at 2 euro per share.
With regard to the convertible bond loan designated "Olivetti 1.5% 2001-2004 convertible bond with redemption premium", the Board set terms and conditions as follows:
- par value: 2.6 euro
- redemption premium on maturity: 5.07759% gross of the bond par value
- actual yield on maturity: 3.25% gross p.a.
- conversion period: 1 January 2002 - 15 December 2003

The shares cum warrant and the bonds were offered to Olivetti common shareholders and holders of bonds of the series designated "Olivetti floating rate notes 1998-2002 convertible into common shares", at a rate of 5 new shares cum warrant and/or 7 new bonds for every 100 shares and/or convertible bonds held.
The rights offer closed on 9 March 2001; it was subscribed as follows:
- 330,355,165 shares cum warrant, accounting for 94.86% of the 348,249,405 shares on offer, for proceeds of 858,923,429 euro;
- 472,738,882 convertible bonds, accounting for 96.96% of the 487,549,167 convertible bonds on offer, for proceeds of 1,229,121,093.2 euro;

The proceeds raised by the rights issue and convertible bond on closure of the offer period totalled approximately 2.09 billion euro, an amount equivalent to 96.09% of the total offer value of 2.17 billion euro. If the warrants are exercised, the operation will generate proceeds totalling approximately 2.5 billion euro.

494

The percentages of unsubscribed rights, which will be offered on the stock market within the legally prescribed limit, are as follows:

- 5.14% of the shares, giving the right to subscribe an additional 17,894,240 shares;
- 3.04% of the convertible bonds, giving the right to subscribe an additional 14,810,285 bonds.

The dates of the rights auction will be communicated in a public notice in the main daily newspapers.
On 9 February 2001, at the meeting held to determine the final conditions of the share capital increase, the Board of Directors, subject to a partial reversal of previous resolutions, also approved a share capital increase to service a stock options plan for managers of the parent company and its subsidiaries for the three years 2001-2004 (without change to the conditions applied to beneficiaries no longer in the Group's employ), already illustrated in the section "Employee stock options ".

Olivetti Tecnost S.p.A.

Joint venture with Speedy Tomato (Telia Group) for a mobile communication portal

On 7 February 2001, Olivetti Tecnost signed a joint venture agreement with Sweden's Speedy Tomato AB, a wholly owned subsidiary of Telia AB, which operates on the rapidly growing mobile communication portals market. The new company will be equally owned and will be named Speedy Tomato S.p.A.
Speedy Tomato, an operator-independent portal, will launch its mobile communication services on a number of European markets, during 2001. The portal is already operational in the UK and Denmark and has just been launched in Finland.

Dissolution of the joint venture with Canon Inc.

On 28 February 2001, Olivetti Tecnost S.p.A and Canon Inc. agreed terms for the dissolution of the Olivetti Canon Industriale (OCI) S.p.A. joint venture formed in 1987 for the production of photocopiers. Under the agreement, in March 2001 Olivetti Tecnost bought Canon's 49.99% stake in OCI and will continue to supply Canon with copiers until the end of 2002.

Webegg Group

Purchase of 51% of Domus Academy and 100% of Software Factory S.p.A.

On 1 February 2001, Webegg announced the purchase of 51% of Domus Academy, a post-graduate design school formed in 1983 which has built an international reputation for professional training, research and initiatives to enhance and promote Italian culture and as a role model for design, fashion and the web. Domus Academy reported revenues of 3.2 billion lire in 2000. Webegg's total investment amounted to 6.1 billion lire (3.15 million euro) of which 2 billion lire through the subscription of a share capital increase to finance the academy's Internet activities.
On 5 March 2001, Webegg purchased 100% of Software Factory S.p.A. for 29.7 billion lire (15.3 million euro). This company specialises in technical and design consultancy for e-commerce and e-business solu-

949

tions and specialises in technologically advanced network projects. Based in Milan with 180 employees, in 2000 it reported revenues of 18.3 billion lire (+ 36% from 1999) and operating income of 4.6 billion lire (25% of revenues).

Telecom Italia Group

Buy-back of Telecom Italia savings shares

On 10 January 2001, the Telecom Italia savings share buy-back authorised by the ordinary Shareholders' Meeting of 14 January 2000 was completed. The shareholders' resolution:

- provided for a public tender offer for a maximum of 742,615,722 own savings shares at a price of 6.5 euro per share, equivalent to a maximum amount of 4,827 million euro (9,346 billion lire); the tender offer was executed from 17 February to 17 March 2000;
- authorised the purchase, within nine months from the end of the offer period, of own savings shares for a maximum quantity equal to the difference between 742,615,722 savings shares and the number of tendered shares, if lower, through purchase orders on the automated trading system, in compliance with the relevant legislation, at the same price of 6.5 euro per share;

During the offer period, 1,793,820 shares were tendered; Telecom Italia thus purchased savings shares until 10 January 2001, the expiry date of the authorisation considering the suspension and extension approved by the Shareholders' Meeting of 3 July 2000.

Altogether, the company purchased 112,998,070 own savings shares, representing approximately 5.2% of savings capital, for an overall outlay of approximately 711 million euro (1,376.5 billion lire).

Conversion of savings shares and buy-back of Telecom Italia common shares

On 31 March 2001, continuing proceedings commenced on 30 March, the Telecom Italia Board of Directors reviewed the savings share conversion and buy-back project presented the previous 5 February. The project was amended to take account of stock market trends and the market response to the original proposal, and now provides for:

- the re-denomination of Telecom Italia capital in euro, with an increase in per-share par value to 0.55 euro, through the cancellation of own shares and, for the remaining stock, through the transfer to capital of a part of the monetary revaluation reserve formed pursuant to Law no. 72 of 19 March 1983, with a corresponding increase in share capital;
- the voluntary conversion of Telecom Italia savings shares into an equal number of common shares upon payment of a supplement of between 38% and 42% of the average Telecom Italia common share price in the period near the operation, with a minimum of 5.25 euro per share. The conversion, which refers to the holders of all 2,053,122,025 outstanding savings shares and allows converting shareholders to receive the next dividend, is conditional upon a minimum uptake of 60% of savings stock, with the Board retaining the right not to proceed. In the event of a 100% uptake, the proceeds will amount to approximately 10.8 billion euro. The Board reserves the right to launch the operation as and when conditions are suitable to ensure its success, and in any case no later than 31 December 2001, the final date by which the conversion will otherwise lapse. In the event of full conversion, the share of Telecom Italia

950

voting rights held by Olivetti will decrease from the current 54.8% to approximately 39%, in line with the share of total capital currently held by Olivetti, which will not change. To obtain the full consent of the market, Olivetti announced that it would not approve the operation should shareholders representing the majority of shares not held by Olivetti vote against the proposal at the Telecom Italia Extraordinary Shareholders' Meeting called to approve the conversion;

- the subsequent buy-back, through a public tender offer, of own common shares for a maximum 10% of capital at a price equal to the share price near the operation plus a premium designed to ensure the success of the operation and in any case not more than 25%. In order to reduce the time between payment of the premium and payment of the consideration, the shares will be acquired, through a public tender offer, by a new company ("Newco", wholly owned by Telecom Italia) formed specifically for the purpose and provided with available reserves for an amount equivalent to the proceeds raised by the conversion. On completion of the buy-back and subject to approval of the 2001 financial statements, Newco will be merged into and with Telecom Italia, which will acquire title to the tendered shares. The total outlay will not exceed the proceeds from the conversion; any surplus proceeds outstanding after payment of the buy-back will be distributed to all shareholders in the form of an extra dividend, subject to the approval of the Shareholders' Meeting;
- assuming a 100% uptake of the savings share conversion at the minimum premium of 5.25 euro per share and the subsequent total participation in the buy-back, Olivetti would raise gross proceeds of approximately 4.3 billion euro by tendering for the buy-back.

The Extraordinary Shareholders' Meeting to approve the operation was convened for 18 April on first call and 3 May on second call.

The plan is designed to optimise Telecom Italia's capital structure, which, in the event of full uptake, will consist of one category of shares only; to reduce the cost of capital, by eliminating the privileges pertaining to savings shares; to improve per-share economic indicators, including net earnings per share (the latter, by approximately 10%); to enhance Telecom Italia's financial flexibility by improving its credit rating and access to the financial market.

Tax inspection

A general inspection of Telecom Italia by the Tax Police which began on 3 February 2000 was completed at the end of February 2001. The findings, based on interpretative considerations, have not generated any specific requests to date and will be appealed through the normal channels. Although the company cannot at present foresee the extent of adjustment to its tax returns, it considers that existing provisions provide adequate coverage for any risks relating to the outcome of the dispute.

UMTS

On 10 January, the Authority informed the companies TIM, Omnitel, Wind, Andala and Ipse that they had been awarded licences and frequencies for the supply of "third-generation" UMTS mobile communication services, which will become commercially available by the end of 2002. The allocation, planned for 20 December 2000, was postponed due to suspected interference problems on certain frequencies, for which the operators themselves have proposed a technical solution.

Local loop unbundling

On 12 January 2001, Telecom Italia received notification of the Authority ruling no. 14/00/CIR of 21 December 2000 approving, with amendments, the Telecom Italia reference offer for unbundled local loop access services. The company subsequently presented a price list for the various types of access via copper cable or fibre and provided detailed information on the numbering ranges available and the exchanges in which areas have been made available to house other operators' equipment. The Authority has drawn up a list of the first 550 co-leased sites; a second list of 550 sites is to be published by the end of March and a third by the end of July, for a total of 1,650 sites.
By the end of March, about 30 operators had applied to Telecom Italia for local loop connection; operating agreements have already been drawn up with some of these operators.

Wireless local loop

On 15 January 2001, the Authority issued a call for tenders for the advisor who will be responsible for monitoring bids for the wireless local loop licences and frequencies. The advisor will co-operate with the Authority at each stage in the bidding process, including preparation of the request for tenders, valuation of tenders, preparation of documents on the status of operations.

Commercial agreements and new services

In the early part of the year, Telecom Italia signed a number of important agreements with its technical partners, in particular with Alcatel, for SDH transmission systems to improve network efficiency and capacity, and Marconi Communications, to enhance the national fibre network with the new "smartphotonix" systems, which will significantly increase the company's broadband and traffic capacity.
Telecom Italia also launched: "Hyperway", a new pay-per-use data service on dedicated networks, with a broad range of options to permit maximum customisation; "Full Business Government", a package of pay-per-use data solutions enabling government agencies to provide online information and value-added services through the development of dedicated portals.
In early 2001, TIM reached agreements with: the Credem banking group, an important new partner for e-banking solutions; the Milan public health unit and the San Raffaele hospital for the development of "Medguard", a GSM remote medical and assistance service; Telegate Italia (Seat group), for the launch of a new cellphone service providing subscriber and business directory information via call centres and direct connection to the number requested; Webraska, a world supplier of wireless navigation technology and services, to offer clients a route-planning service anywhere in the world.
In January, through Finsiel and Banksiel, IT Telecom launched a euro portal to help businesses, organisations and agencies handle the changeover to the new European currency, by providing an information link between the authorities and the business community.

International growth strategies

At the beginning of 2001, Telecom Italia signed a five-year agreement with the US carrier Teleglobe for the supply of high-speed IP connectivity services.

a52

In March, the company reached an agreement for the sale of 30% of Mediterranean Nautilus S.A. to a company in the Fishman group, the leading media and telecommunications company in Israel. The accord concerns development of the eastern Mediterranean backbone.
On 12 March, the share transfer (for 28.61%) giving SIN control of Entel Chile was completed.
In January, TIM reached a mutual preferential roaming agreement with Germany's T-Mobil operator. Also in January, TIM signed agreements with Sony Computer Entertainment, the Dutch operator KPN Mobile and the Japanese operator NTT DoCoMo, for development of UMTS mobile Internet services.
In Brazil, in February, TIM was awarded two GSM licences for the Sao Paulo and Brasilia areas, for an overall cost of 1,500 billion lire; in March, for approximately 550 billion lire, it was awarded a third licence, for the north, north-west and central-south regions, thus becoming the leading mobile communications service provider in Brazil.
On 2 January, Seat Pagine Gialle reached an agreement with RSL, a minority shareholder of Telegate Holding, for the purchase in 2001, of the residual equity (48.63%) of the company.
On 15 February 2001, executing the Memorandum of Understanding signed at the end of 2000, the Group acquired 100% of Net Creations Inc., a US company listed on the Nasdaq, which is the leading provider of Internet marketing services via e-mail.
Also in February, Seat Pagine Gialle acquired a 54.5% stake in Consodata, a company listed on the Nouveau Marché in Paris, and leader in information marketing.

Corporate operations

To improve its effectiveness in a scenario in which competition now also extends to research activities, which are regarded increasingly as business opportunities, on 1 March 2001 the Telecom Italia Venture Capital unit, which is responsible for the Group's R&D operations, was transferred to CSELT, which changed its name to Telecom Italia Lab.
Under the reorganisation of the Telecom Italia Group's information technology operations and their transfer to the "IT Services" business unit, on 1 March 2001 the Telecom Italia "Development" business unit, which develops information systems and software applications and has 619 employees, and the Finsiel "Telecommunications" unit, with 234 employees, were transferred to Telesoft.

Telecom Italia bond convertible into TIM or Seat shares

On 23 January 2001, the Telecom Italia Board of Directors approved the issue of a five-year exchangeable bond convertible into TIM and Seat shares, for an amount of 2 billion euro, with a green shoe for an additional 500 million euro. The operation was announced on 29 January 2001.
The bond issue by Sogerim S.A. was completed on 15 March 2001 and conversion into TIM and Seat shares will commence on 1 June 2001. The bond bears an annual 1% coupon and may be called by subscribers at the end of the third year.

953

Operating outlook for 2001

The consolidated results of the Olivetti Group will be influenced by the performance of the Telecom Italia Group, whose results should be at least in line with those reported for 2000.
This expectation, together with the gradual improvement foreseen in the results of Olivetti's other businesses and the probable reduction in financial charges as a result of the success of the Olivetti share-capital increase which closed on 9 March 2001 (with regard to the rights offer), should enable the Group as a whole to post a profit in 2001, before amortisation of consolidation goodwill arising on the acquisition of the equity investment in Telecom Italia.
Olivetti S.p.A.'s results for 2001 will reflect higher financial charges as a result of the increase in indebtedness following the merger of Tecnost S.p.A. at 31 December 2000 (although overall debt will be lower than in 2000 thanks to the successful outcome of the recent share-capital increase) and will benefit from dividends from Telecom Italia S.p.A. (stated on accrual); if these dividends are in line with those for 2000, Olivetti S.p.A. will report a net profit.

954

Proposal for the allocation of Parent Company income for the year 2000

The 2000 financial statements of Olivetti S.p.A. show net income of 869,820,034 euro and shareholders' equity at 31 December 2000 of 13,936,988,766 euro as follows:

(in euro)		31.12.2000
I.	Share capital	4,914,694,381
I.bis	Share capital increase to be filed with the Register of Companies	397,707
I.ter	Share-capital increase payment relating to shares to be issued	26,127
I.quater	Shares to be issued in exchange with the Tecnost shares	1,999,439,092
II.	Additional paid-in capital	3,196,212,781
III.	Revaluation reserve	1,128,827
IV.	Legal reserve	877,318,758
V.	Reserve for treasury stock	2,298,156
VII.	Other reserves	2,075,652,903
Total share capital and reserves		**13,067,168,732**
IX.	Net income for the year	869,820,034
Total		**13,936,988,766**

The Board of Directors therefore proposes that the net income for financial 2000 of 869,820,034 euro be allocated as follows:

- 43,491,002 euro to the legal reserve, corresponding to 5% of earnings for the year ended 31 December 2000;
- 0.035 euro as per share dividend to common shares outstanding at the date of payment, that is, excluding treasury shares;
- the residual amount to "retained earnings".

The Board of Directors

Explanatory Notes

Form and content of the Financial Statements

The Financial Statements as at 31 December 2000 have been prepared and presented in accordance with the Italian Civil Code interpreted by the accounting principles established by the Italian Accounting Profession ("Consigli Nazionali dei Dottori Commercialisti e dei Ragionieri") and, in the absence thereof, by the International Accounting Standards Committee (IASC). They comprise the Balance Sheet (prepared and presented in accordance with the formats specified in articles 2424 and 2424-bis of the Italian Civil Code), the Income Statement (prepared and presented in accordance with the format specified in articles 2425 and 2425-bis of the Italian Civil Code) and these Explanatory Notes.
The Explanatory Notes are provided to illustrate, analyse and supplement the data reported in the Financial Statements and include the information required by article 2427 of the Italian Civil Code, by other provisions as set forth in Legislative Decree No. 127/1991 or by other laws, and additional information is provided in order to present a true and fair view, even if not required by specific legislation.
The Explanatory Notes also include information requested by the Italian Securities and Investments Board (Consob) relating to holding companies as set forth in communication No. 94001437 dated 23 February 1994.

Accounting policies in the valuation of Financial Statements items, in the value adjustments and conversion of values not originally expressed in Euro

The main accounting policies adopted to prepare and present the Financial Statements as at 31 December 2000 comply with art. 2426 of the Italian Civil Code and are described below:

1) Intangible fixed assets

Intangible fixed assets are recorded at their purchase or production cost including related charges and amortised over the period of their expected useful working life.
Formation and expansion costs and purchased goodwill are capitalised with the prior consent of the Independent Auditors and amortised over a period of five years and ten years, respectively. As from fiscal 1999, registration duty relating to share capital increases is not capitalised under intangible fixed assets as in previous years, but charged to the Income Statement, under Other operational charges. Registration duty relating to the 1999 share capital increase in respect of the Public Tender Offer on Telecom Italia has been accounted for as an extraordinary charge, as have all the other costs relating to the Public Tender Offer. The residual cost of duty capitalised under formation and expansion costs in previous financial periods has been reversed and accounted for as an extraordinary charge. Intangible fixed assets are appropriately written down to reflect any other than temporary impairment in value and their book value is reinstated in subsequent years if the reasons for such write-downs no longer apply.

964

2) Tangible fixed assets and depreciation

Tangible fixed assets are stated at their purchase or construction cost, including financial charges incurred over the period of construction of the asset if this period is of significant duration, up to the time the tangible fixed asset is utilised. Tangible fixed assets are appropriately written down to reflect any other than temporary impairment in value and their book value is reinstated in subsequent years if the reasons for such write-downs no longer apply.
Ordinary depreciation is provided on a straight-line basis using rates that reflect the residual useful working life of the assets concerned.
The Company also provides accelerated depreciation for some categories of assets in order to obtain the benefits deriving from deferred taxation, as allowed by current tax legislation.
Ordinary maintenance costs are fully charged to the Income Statement, costs incurred that extend the useful working life of assets are capitalised as part of the said assets and depreciated over the remaining useful working life thereof.

3) Equity investments and securities held as financial fixed assets

Equity investments held as financial fixed assets are stated at purchase cost (LIFO method with annual steps) and written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such write-downs no longer apply.
Securities held as fixed assets are valued at their purchase cost (LIFO method with annual steps) and adjusted on an accrual basis for the difference between such cost and the redemption value, written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such write-downs no longer apply.

4) Accounts receivable and payable

Accounts receivable are recorded at the estimated realisable value and classified as financial fixed assets or as current assets. Accounts payable are stated at their face value.

5) Equity investments and securities not held as financial fixed assets

Securities and equity investments in listed companies held as current assets are valued at whichever is lower between the cost and the market value, the latter being determined on the basis of the arithmetical mean of the December stock market prices; if the reasons for write-downs no longer apply, the original value is reinstated in subsequent years to the extent that it does not exceed market value.
Securities held under reverse repurchase agreements are recorded at their purchase cost and classified as financial assets not held as fixed assets. Income and charges relating to such transactions are recognised on an accrual basis, taking into account of both the difference between the related spot and forward prices, and the income generated by such assets over the duration of the transactions.

6) Accruals, prepayments and deferrals

Costs and income common to two or more financial periods are entered under the item Accruals, prepayments and deferrals to reflect the accrual accounting principle.

7) Reserves for risks and charges

Specific reserves are provided for to cover known or likely losses or liabilities of a given nature, the extent of which are uncertain at year-end; the provisions reflect, therefore, the best estimate based on the information available.

8) Reserve for employee severance indemnities

This reserve is provided for in accordance with current legislation and employment contracts and reflects the liability accrued to all employees at the closing date of the Financial Statements.

9) Recognition of revenues

Revenues from services are credited to the Income Statement at the time the services are provided.

10) Research and development

Interest-relief grants relating to financial charges accruing to research loans are accounted on an accrual basis and credited directly to the Income Statement for the financial period to reduce financial charges.

11) Exchange rate differences arising on transactions in foreign currency and translation criteria of foreign currency items

Receivables and payables denominated in non-EMU currencies are originally translated into Euro by adopting the accounting rates at the date of the respective transactions. Exchange rate differences arising at the time of collecting receivables or settlement of payables in non-EMU currencies are credited or charged to the Income Statement.
Gains or losses arising from alignment with the applicable exchange rates in force in December with regard to payables and receivables are credited or charged to the Income Statement for the period.
Total exchange rate differences are illustrated in the specific comment on financial income and charges.

12) Forward currency transactions

As regards forward purchase or sale transactions of foreign currency at fixed exchange rates pertaining to specific receivables and payables expressed in foreign currency, or a net exposure in foreign currency, the difference that emerges by comparing the exchange rate applicable at the date the transaction was executed and the forward fixed exchange rate is charged to the Income Statement for the duration of the said transaction; furthermore, profits or losses resulting from the comparison between the exchange rate in force at the date the transaction was executed and the exchange rate applicable at the closing date the Financial Statements are entered in the Income Statement if the profits or losses deriving from the modified exchange rate ratio pertaining to the corresponding assets and liabilities expressed in foreign currency are also charged to the Income Statement.
Gains or losses arising from other forward purchases or sales of foreign currency at fixed exchange rates, determined by reference to the comparable forward rates at the closing date of the Financial Statements are recorded in the Income Statement.

13) Forward interest rate transactions

The interest-rate differentials to be paid or received on interest rate swaps and similar transactions accruing at the closing date of the Financial Statements are entered on an accrual basis in the Income Statement under financial income and charges.

The consideration for the options acquired or sold in connection with forward interest rate transactions are carried in the Income Statement over the duration of the said option.

14) Dividends

Dividend income and the relative tax credit from subsidiary companies are entered as accrued, namely in the year such income is formed; dividends of other equity investments are carried in the financial period in which they are collected.

15) Capital gains from contribution of businesses

Capital gains generated by the contribution of branches of business in respect of the corporate spin-off process are entered in the Income Statement and classified as extraordinary income.

16) Surplus generated from merger

The surplus emerging from the merger of the subsidiary Tecnost S.p.A. was accounted in the shareholders' equity under reserves.

17) Value adjustments and provisions charged exclusively for tax purposes

Value adjustments and provisions charged exclusively for tax purposes, comprising accelerated depreciation as allowed under specific tax laws and write-downs of equity investments, are carried in the respective headings of the Income Statement.

18) Income taxes

Current tax liabilities are provided, where applicable, as amounts due to tax authorities, based on a reasonable estimate of taxation for the year. In addition, in accordance with the balance sheet liability method, deferred taxes or prepaid taxes are recognised on all temporary differences between the book values of assets and liabilities and their corresponding tax values, applying tax rates expected in the periods in which the temporary differences will be reversed.
The benefit of tax-loss which can be carried forward is recognised to the extent that a reasonable certainty exists that future taxable income will be available against which such amounts carried forward can be utilised, in accordance with current legislation.

19) Grouping of Financial Statements items

The Financial Statements as at 31 December 2000 do not include any groupings of items.

20) Reporting currency

The Parent Company has adopted the Euro as its reporting currency as from 1 January 1999; all amounts in the Explanatory Notes are therefore expressed in Euro unless indicated otherwise.

21) Departures allowed under paragraph 4, article 2423 of the Italian Civil Code.

It is hereby confirmed that no departures were applied in the attached Financial Statements pursuant to paragraph 4, art. 2423 of the Italian Civil Code.

Comments on assets

B) Fixed assets

I. Intangible fixed assets

Net intangible fixed assets, as at 31 December 2000 totalled Euro 158.3 million (Euro 74.3 million as at 31 December 1999).

	Net value at 31.12.1999	New costs	Amortization	Net value at 31.12.2000
1) Start-up and expansion costs	73,273,109		(19,096,342)	54,176,767
3) Industrial patents and intellectual property rights	5,165		(2,066)	3,099
7) Other				
- Extraordinary maintenance and leasehold improvements	12,414	2,158,950	(254,758)	1,916,606
- Costs relating to the issue of bonds	1,037,200		(691,464)	345,736
- Costs relating to borrowings, sustained by Tecnost S.p.A.		105,839,469	(3,980,709)	101,858,760
	1,049,614	107,998,419	(4,926,931)	104,121,102
Total	**74,327,888**	**107,998,419**	**(24,025,339)**	**158,300,968**

Start-up and expansion costs are comprised of expenses associated with operations concerning the increase in share capital, incurred during 1999 and amortised over a period of five years.
Extraordinary maintenance and leasehold improvements increased during the financial period by Euro 2.2 million in respect of expenses incurred to restructure property utilised by "Associazione Interaction Design Institute" of Ivrea, following the commitment in kind undertaken by Olivetti, in favour of the Association itself. The said costs are amortised according to the duration of the agreements.
The increase in costs relating to the issuance of bond loans and financing equal to Euro 105.8 million derived from the merger of Tecnost S.p.A.
The said costs referred in particular to Euro 84.1 million in respect of expenses incurred by Olivetti Finance N.V. (formerly Tecnost International N.V.) in connection with the issue of the convertible 2000-2005 bond loan denominated "1.00 per Cent. Guaranteed Exchangeable Bonds" which enabled the issuer, in turn, to finance Tecnost S.p.A. at significantly more favourable interest rates compared to the rates charged on financing granted up to that date. The lower financial charges were counterbalanced, therefore, by the issuance costs, re-charged to Tecnost S.p.A., and amortised in relation to the duration of the loan.

II. Tangible fixed assets

Breakdown of tangible fixed assets:

	Cost	Accumulated depreciation	Net book value at 31.12.2000	% accum.deprec. at 31.12.2000	Net book value at 31.12.1999
1) Land and buildings	-	-	-	-	-
2) Plant and machinery					
General plant	27,889	(2,788)	25,101	10.0	-
Electronic plant	4,933,161	(3,328,201)	1,604,960	67.5	1,273,726

3) Industrial and commercial equipment	**10,259,589**	**(10,259,589)**	-	**100.0**	-
4) Other assets					
Vehicles	383,403	(364,390)	19,013	95.0	57,037
Furniture and fittings	2,222,164	(1,894,143)	328,021	85.2	108,287
	2,605,567	**(2,258,533)**	**347,034**	**86.7**	**165,324**
5) Assets under construction and advance payments					
Assets under construction	**33,343**	-	**33,343**	-	**919,494**
Total	**24,009,165**	**(21,991,207)**	**2,017,958**	**91.6**	**2,388,630**

The branch of business dedicated to accounting and administration was transferred to the newly established company Olivetti Servizi Amministrativi S.r.l. during the financial period; the values of the transferred tangible fixed assets are shown below in the movements of the gross values and of the depreciation.
The gross value of assets during fiscal 2000 changed as follows:

	Cost at 31.12.1999	Additions	Disposals and reclassifications	Transfer of business unit	Cost at 31.12.2000
1) Land and buildings	-	-	-	-	-
2) Plant and machinery					
General plant	-	27,889	-	-	27,889
Electronic plant	4,303,449	325,551	1,275,478	(971,317)	4,933,161
Machinery and specific plant	6,145,890	3,357	369	-	6,149,616
	10,449,339	**356,797**	**1,275,847**	**(971,317)**	**11,110,666**
3) Industrial and commercial equipment	**10,259,589**	-	-	-	**10,259,589**
4) Other assets					
Vehicles	414,049	-	(30,646)	-	383,403
Furniture and fittings	2,144,849	309,754	(107,648)	(124,791)	2,222,164
	2,558,898	**309,754**	**(138,294)**	**(124,791)**	**2,605,567**
5) Assets under construction and advance payments					
Assets under construction	**919,494**	**464,998**	**(1,351,149)**	-	**33,343**
Total	**24,187,320**	**1,131,549**	**(213,596)**	**(1,096,108)**	**24,009,165**

969

Changes in depreciation for fiscal 2000 were as follows:

Accumulated ordinary depreciation	Accumulated depreciation at 31.12.1999	Provision for the year	Disposals and reclassifications	Transfer of business unit	Accumulated depreciation at 31.12.2000
1) Land and buildings	-	-	-	-	-
2) Plant and machinery					
General plant	-	1,394	-	-	1,394
Electronic plant	1,854,636	486,343	8,321	(263,853)	2,085,447
Machinery and specific plant	5,531,097	22,508	(716)	-	5,552,889
	7,385,733	**510,245**	**7,605**	**(263,853)**	**7,639,730**
3) Industrial and commercial equipment	**6,911,744**	**-**	**-**	**-**	**6,911,744**
4) Other assets					
Vehicles	237,189	19,012	(19,814)	-	236,387
Furniture and fittings	1,721,300	31,996	(57,689)	(104,806)	1,590,801
	1,958,489	**51,008**	**(77,503)**	**(104,806)**	**1,827,188**
Total accumulated ordinary depreciation	**16,255,966**	**561,253**	**(69,898)**	**(368,659)**	**16,378,662**

Accumulated accelerated depreciation					
1) Land and buildings	-	-	-	-	-
2) Plant and machinery					
General plant	-	1,394	-	-	1,394
Electronic plant	1,175,087	306,533	(81,631)	(157,235)	1,242,754
Machinery and specific plant	584,707	3,356	1,144	-	589,207
	1,759,794	**311,283**	**(80,487)**	**(157,235)**	**1,833,355**
3) Industrial and commercial equipment	**3,347,845**	**-**	**-**	**-**	**3,347,845**
4) Other assets					
Vehicles	119,823	19,012	(10,832)	-	128,003
Furniture and fittings	315,262	31,995	(23,930)	(19,985)	303,342
	435,085	**51,007**	**(34,762)**	**(19,985)**	**431,345**
Total accumulated accelerated depreciation	**5,542,724**	**362,290**	**(115,249)**	**(177,220)**	**5,612,545**
Total accumulated depreciation	**21,798,690**	**923,543**	**(185,147)**	**(545,879)**	**21,991,207**

Ordinary depreciation was calculated by adopting rates deemed to represent the residual useful working life of the respective tangible fixed assets.

970

The rates applied, reduced by 50% for assets acquired during the year, were as follows:

Buildings	3%
Plant and machinery	10% - 20%
Other fixtures and fittings, tools and equipment	20% - 40%
Other assets:	
Electronic office machines	20%
Office furniture and fittings	12%
Motor vehicles	25%

Furthermore, as in previous years, accelerated depreciation was charged in accordance with current tax laws. Accelerated depreciation charge totalled Euro 0.9 million (included in the total charge for the year, heading B10b of the Income Statement).
As at 31 December 2000, tangible fixed assets were depreciated by 91.6% compared with 90.1% at the end of fiscal 1999.
Accelerated depreciation for the current year and previous years, charged in accordance with current tax laws, was classified as a deduction of the relevant asset items.

III. Financial fixed assets

Equity investments

As at 31 December 2000, equity investments totalled Euro 30,881.4 million, an increase of Euro 20,831.3 million compared with 31 December 1999 (Euro 10,050.1 million), as analysed below:

	Net book value
As of 31 December 1999	**10,050,127,450**
Operations connected to the upstream merger of Tecnost S.p.A.:	
Acquisition of equity investments	30,513,644,981
Cancellation of equity investment in Tecnost S.p.A.	(9,646,629,663)
Free allotment of Seat shares:	
Valuation of Seat P.G. S.p.A. shares	300,098,395
Contextual write-down of the equity investment in Telecom Italia S.p.A.	(300,098,395)
Acquisition of Tecnost Sistemi S.p.A. shares	129,114,225
Contribution of Tecnost Sistemi S.p.A. shares	(129,114,225)
Subscription of Olivetti Tecnost capital increase through the contribution of Tecnost Sistemi shares	143,000,000
Subscription of Webegg S.p.A. capital increase trough the contribution of Telemedia Applicazioni S.p.A. shares	6,553,581
Other acquisitions, capital subscriptions and replenishments of losses	127,426,414
Other disposals	(2,386,355)
Write-downs	(10,208,668)
Reclassification of Seat P.G. equity investment under financial assets not held as fixed assets	(300,098,395)
	20,831,301,895
As of 31 December 2000	**30,881,429,345**

971

Equity investments were acquired amounting to Euro 30,513.6 million following the merger of Tecnost S.p.A., legally executed on 31 December 2000; the breakdown is as follows:
- Telecom Italia S.p.A. for Euro 30,440.6 million;
- TechnoProduzioni S.p.A. (formerly Olteco-Fin S.p.A.) for Euro 25.8 million;
- Olivetti Finance N.V. (formerly Tecnost International N.V.) for Euro 46.9 million;
- Lottomatica S.p.A. and other minor investments for Euro 0.3 million;

Concurrently the equity investment in Tecnost S.p.A. amounting to Euro 9,646.6 million was cancelled.
The equity investment in Seat Pagine Gialle derives from the shares acquired from the partial spin-off of Telecom Italia S.p.A. with a transfer of TIN.IT S.p.A. shares, in exchange with which the shareholders of Telecom Italia were assigned No. 56 Seat Pagine Gialle shares for every 1,000 shares held.
The merged company Tecnost S.p.A., owner of no. 2,850,255,432 Telecom Italia shares was therefore assigned No. 159,614,304 Seat Pagine Gialle shares.
The value of the Seat Pagine Gialle shares amounting to the Euro 300.1 million (Euro 1.88 per share) was determined by adopting the cost repartition method based on the economic value of the equity transferred to the beneficiary.
The cost of the Telecom Italia equity investment was consequently reduced by the same amount.
In February 2000 the equity investment in Tecnost Sistemi S.p.A. (Euro 129.1 million) was purchased from Tecnost S.p.A. and then contributed to Olivetti Tecnost S.p.A. (formerly Olivetti Lexikon S.p.A.) in reference to the increase in capital thereof, for a value of Euro 143 million generating a capital gain of Euro 13.9 million.
The other changes comprised:
- acquisitions of shares in the following companies for Euro 56.6 million:
  - Euro 26.9 million Webegg S.p.A.;
  - Euro 29.7 million Mediobanca S.p.A.;
- share capital increases for Euro 70.8 million referred to:
  - Euro 52.7 million Olivetti Tecnost S.p.A.;
  - Euro 15.6 million Webegg S.p.A.;
  - Euro 0.9 million Fin-Priv. S.r.l.;
  - Euro 1.6 million Olivetti Finanziaria Industriale S.p.A.
- disposals of equity investments in the following companies for Euro 2.4 million:
  - Euro 2.1 million Telemedia Applicazioni S.p.A.;
  - Euro 0.3 million Eustema S.p.A.
- write-downs of Olivetti Finanziaria Industriale S.p.A. for Euro 10.2 million.

The equity investment in Seat Pagine Gialle was reclassified under financial assets not held as fixed assets, since the sale had been planned.

The aggregate value of equity investments would be 2,166 million euro higher, had the equity investments in Telecom Italia S.p.A. and Olivetti International S.A. not been written down in 1999 for tax purposes; therefore, Olivetti S.p.A. shareholders' equity at 31 December 2000 would be 1,917 million euro higher (net of the corresponding tax effect of 249 million euro).

922

The breakdown of the opening balances for the equity investments classified as financial fixed assets were as follows:

	Shares/quota at 31.12.1999	Original cost	Losses and write-downs	Replenishments and capital restorations	Book value at 31.12.1999
Subsidiary companies					
Tecnost S.p.A.	4,101,458,190	11,717,914,399	(2,071,284,736)		9,646,629,663
Olivetti International S.A.	3,999,998	442,739,664	(778,241,328)	365,800,674	30,299,010
Olivetti Management of America Inc.	100	98,127	(98,127)		-

976

A comparison of the book values of equity investments in subsidiary companies (cost written down for other than temporary impairment in value or for tax purposes) and the corresponding portion of shareholders' equity (determined in accordance with the principles applicable to the consolidated Financial Statements) shows the aggregate equity investment book value to be higher by Euro 23,348.7 million:

(in millions of euro)	Book value of equity investments (a)	Portion of net equity as adjusted for consolidation purposes attributable to the Parent Company (b)	Differences (a-b)
Equity investments the book values of which are lower than the relevant portions of the net equity, as adjusted for consolidation purposes, attributable to the Parent Company:			
Olivetti Multiservices S.p.A.	167.0	171.3	(4.3)
Olivetti Finance N.V.	46.9	63.9	(17.0)
TechnoProduzioni S.p.A.	25.8	26.7	(0.9)
	239.7	261.9	(22.2)
Equity investments the book values of which are higher than the relevant portions of the net equity, as adjusted for consolidation purposes, attributable to the Parent Company:			
Telecom Italia S.p.A.	30,140.6	6,798.7	23,341.9
Olivetti International S.A.	30.3	26.8	3.5
Olivetti Tecnost S.p.A.	272.1	252.8	19.3
Webegg S.p.A.	49.0	43.0	6.0
Olivetti Finanziaria Industriale S.p.A.	35.1	34.9	0.2
	30,527.1	7,156.2	23,370.9
	30,766.8	**7,418.1**	**23,348.7**

The difference between the book value for the equity investment in Telecom Italia S.p.A. and the shareholders' equity as adjusted for consolidation purposes is essentially attributable to the consolidation goodwill, recognized as an asset in the consolidated Financial Statements of Olivetti, consequent to the acquisition of the said Telecom Italia.

Total amounts due after 12 months	**52,592,751**	**91,937,835**	**(39,345,084)**

928

Receivables, due within 12 months from third parties, referred in particular to Euro 9.6 million and receivables for interest relief grants (Law No. 346/1988).
Receivables due after 12 months amount to Euro 52.4 million and have decreased by Euro 39.2 million compared with 31 December 1999 mainly following the partial closure of an interest-bearing guarantee deposit in favour of Getronics (formerly Wang Laboratories), established with a leading bank to guarantee cover for any residual liabilities, which decreased from Euro 76.3 million at 31 December 1999 to Euro 37.5 million at 31 December 2000.
An interest rate and currency swap hedging transaction had been arranged in connection with the original guarantee deposit expiring in July 2001.
The hedging transaction was progressively reduced by partial guarantees, consistent with the movement of the guarantee deposit. The position totalled Euro 37.5 million as at 31 December 2000.

Treasury stock

As at 31 December 2000 the Parent Company held No. 2,697,500 ordinary shares (formerly savings shares converted into ordinary shares during the financial period) also acquired from employees, for a face value of Euro 2.7 million, recorded at a cost of Euro 2.3 million; a special restricted reserve is carried in the shareholders' equity for the same amount.

Receivables due within 12 months amounted to Euro 1,810 million and increased by Euro 1,445.6 million compared with 31 December 1999.
The increase is due in particular to receivables deriving from dividends of Telecom Italia S.p.A. accruing on profits for fiscal 2000 (Euro 890.6 million) and the relative prepaid tax asset (Euro 523 million) which in fiscal 2001 will be reversed in respect of the corresponding tax credit. The dividend is carried following the merger of Tecnost S.p.A., formerly the controlling company of Telecom Italia S.p.A.
The Company in its capacity as a contracting party for insurance policies to cover risks, also on behalf of subsidiary companies, has entered receivables from insurance companies for Euro 14.6 million in reference to indemnities for damages suffered by companies of the Olivetti Tecnost Group (beneficiaries of the said insurance policies) following the flooding experienced last October in the Canavese area.
The same amount was entered under payables to subsidiary companies.

III. Financial assets not held as fixed assets

Equity investments in subsidiary companies

These amounted to Euro 300.1 million and concerned the equity investment in Seat Pagine Gialle as already mentioned in the item Equity investments.

Comments on liabilities and shareholders' equity

A) Shareholders' equity

The Extraordinary Shareholders' Meeting of Olivetti S.p.A. held on 4 July 2000 approved the conversion of No. 15,221,888 preferred shares and no. 78,629,488 savings shares at par value and into an equal number of ordinary shares, after detachment of the relative dividend, with dividend entitlement right from 1 January 2000. The relative resolution was passed on 6 July by the Special Meetings of the holders of savings shares and preferred shares, respectively. On 17 July the District Court of Ivrea approved the resolutions passed by the Meetings held on 4 and 6 July and consequently the Olivetti savings and preferred shares were duly deleted from the Stock Exchange listings on 24 July, corresponding to the due date for detachment of the dividend in compliance with the Stock Exchange calendar.
Approval was also given during the same Extraordinary Shareholders' Meeting to the no-charge share capital increase by utilising available reserves, increasing the par value from Lire 1,000 to Lire 1,936.27 (corresponding to Euro 1) of all the shares (both shares outstanding and shares that will be issued in the future by implementing the resolutions already approved with regard to conversion of bonds and the exercise of warrants), with the concurrent redenomination of the share capital in Euro.
In particular, the Shareholders' Meeting also resolved:
a) to increase the share capital on a free basis from Lire 4,897,704,838,000 (equal to euro 2,529,453,453) to Lire 9,483,278,946,674 (equal to euro 4,897,704,838) and therefore, by an amount of Lire 4,585,574,108,674 (equal to Euro 2,368,251,385), by increasing the par value of all the No. 4,897,704,838 shares comprising the share capital at a value of Lire 1,000 to Lire 1,936.27 (equal to Euro 1) by utilising available reserves and hence in particular the additional paid-in capital reserve amounting to Lire 4,417,720,137,160 (equal to Euro 2,281,562,043) and the distributable profits reserve (Extraordinary reserve) for the remaining Lire 167,853,971,514 (equal to Euro 86,689,342), with the consequent redenomination of the said share capital in Euro;
furthermore, in reference to the potential future changes in share capital:
b) to irrevocably appropriate the amount of Lire 44,812,705,990 (equal to Euro 23,143,831) to the "Olivetti floating-rate 1998-2002" bonds conversion reserve;
c) to irrevocably appropriate the amount of Lire 32,476,287,946 (equal to the Euro 16,772,603) to the Olivetti 1998-2002 warrant exercise reserve;
d) to irrevocably appropriate the aggregate maximum amount of Lire 25,243,399,962 (equal to a maximum of Euro 13,037,128) to the Olivetti 1999-2001 subscription rights exercise reserve ("warrant or options") reserved for the managers of Olivetti S.p.A. and its subsidiary companies with regard to the Board resolutions approved on 9 June 1999 and on 29 November 1999;
e) to irrevocably appropriate the maximum amount of Lire 27,619,965,000 (equal to a maximum of Euro 14,264,521) to the Olivetti 2002-2004 subscription rights exercise reserve ("warrant or options") reserved for the managers of Olivetti S.p.A. and its subsidiary companies with regard to the Board resolution approved on 24 February 2000.
The above-mentioned reserves were established by the partial use of the distributable profits reserve (extraordinary reserve) and are irrevocably restricted as tied to the conversion of bonds and exercise of warrants and to subscription rights as mentioned above.

243

The Extraordinary Shareholders' Meeting of Olivetti S.p.A. held on 4 October 2000, in the framework of the merger project of Tecnost S.p.A. in Olivetti S.p.A., among other matters, approved the following resolutions:
1) to increase the share capital, in one or more layers, at the time of the merger of Tecnost S.p.A. by Olivetti S.p.A., for a maximum amount of Euro 2,153,287,388, by issuing a maximum number of 2,153,287,388 ordinary shares with a par value of Euro 1 each. This increase relates to the assignment in joint exchange to Tecnost shares owned by third parties and in part to servicing the exercise of Tecnost 1999-2004 warrants owned by third parties;
2) to establish an irrevocable restricted reserve tied to the exercise of Tecnost 1999-2004 warrants (renamed "Olivetti ex Tecnost 1999-2004" warrant) for a maximum amount of Euro 102,505,388, establishing that at the time the application to exercise each warrant is made the amount of Lire 1,436.27 (equal to the difference between the unit counter-value of Euro 1, namely Lire 1,936.27, and the pre-existing par value of Lire 500 per share) shall be assigned to the share capital, representing the free increase of the said share capital.

I. Share capital

The share capital of Olivetti S.p.A. as at 31 December 2000, fully subscribed, paid-up and filed with the Companies Register was represented by No. 4,914,694,381 ordinary shares (No. 4,815,238,805 shares as at 31 December 1999, of which No. 4,721,387,429 ordinary shares, No. 15,221,888 preferred shares and No. 78,629,488 savings shares with a par value of Lire 1,000 each), with a par value of Euro 1 each, for an aggregate value of Euro 4,914,694,381 compared with a value of Lire 4,815,238,805,000 as at 31 December 1999, equal to Euro 2,486,863,302.

The following operations contributed to determine the increase of Euro 2,427,831,079:
A) Operations implemented before the resolution approved by the Shareholders' Meeting held on 4 July 2000, amounting to an aggregate par value of Lire 82,466,033,000, equal to the Euro 42,590,151:
• filing with the Companies Register, pursuant to art. 2444 of the Italian Civil Code of the share capital increases for an aggregate amount of Lire 21,924,545,000 (equal to Euro 11,323,082), fully subscribed within 31 December 1999 by issuing No. 21,924,545 ordinary shares each with a par value of Lire 1,000 for which entry in the Companies Register had not been executed as at 31 December 1999; the said issues were relative to:
- share capital increase amounting to Lire 21,038,333,000 (equal to Euro 10,865,392) par value, through the issue of No. 21,038,333 ordinary shares reserved for the managers of the Parent Company and its subsidiary companies, to implement the Board of Directors resolution approved on 9 June 1999 in reference to the powers granted thereto by the Shareholders' Meeting held on 7 April 1999;
- share capital increase amounting to Lire 847,233,000 (equal to Euro 437,559) par value, through the issue of No. 847,233 of ordinary shares following the conversion of an equal number of "Olivetti floating-rate 1998-2002" bonds;
- share capital increase amounting to Lire 38,979,000 (equal to Euro 20,131) par value, through the issuance of No. 38,979 ordinary shares following the exercise of an equal number of "Olivetti 1998-2002 ordinary share warrants";
• share capital increase amounting to Lire 40,333,010,000 (equal to Euro 20,830,261) par value, through the issuance of No. 40,333,010 ordinary shares following conversion of an equal number of "Olivetti floating-rate 1998-2002" bonds;

• share capital increase amounting to Lire 20,165,786,000 (equal to Euro 10,414,759) par value, through the issuance of No. 20,165,786 ordinary shares following the exercise of an equal number of "Olivetti 1998-2002 ordinary share warrants";
• share capital increase amounting to Lire 42,692,000 (equal to Euro 22,049) par value, through the issuance of No. 42,692 ordinary shares following the exercise of an equal number of "Olivetti 1998-2002 warrants" executed within 31 December 1999 in reference to which the corresponding conversion shares had not yet been issued.
B) Free share capital increase, to implement the resolution approved by the Extraordinary Shareholders' Meeting held on 4 July 2000 amounting to Lire 4,585,574,108,674 equal to Euro 2,368,251,385, as described in the previous analysis.
C) Operations implemented following the Meeting resolution approved on 4 July 2000 for an aggregate nominal amount of Euro 16,989,543:
• share capital increase for an aggregate nominal amount of Euro 8,792,983 through the issuance of No. 8,792,983 ordinary shares of Euro 1 each, following conversion of an equal number of "Olivetti floating-rate 1998-2002" bonds with an original par value of Lire 1,000 and through the utilisation of Euro 4,251,786 of the extraordinary reserve;
• share capital increase for an aggregate nominal amount of Euro 706,667 through the issuance of No. 706,667 ordinary shares reserved for the Managers of the Parent Company and the subsidiary companies following the exercise of an equal number of Olivetti 1999-2001 shares warrants; this issue was executed:
- for Euro 364,963 against payment of Lire 1,000 per share (in addition to Lire 1,320 additional paid-in capital);
- for Euro 341,704 on a free basis by utilising the extraordinary reserve;
• share capital increase for an aggregate nominal amount of Euro 7,489,893 through the issuance of No. 7,489,893 shares each with a par value of Euro 1, following the exercise of an equal number of "Olivetti 1998-2002 shares warrants "; this issue was executed:
- for Euro 3,868,207 against payment of Lire 1,000 per share;
- for Euro 3,621,686 on a free basis by utilising the extraordinary reserve.

Future potential changes in share capital

As at 31 December 2000 a total of no. 37,298,324 "Olivetti 1998-2002 floating-rate bonds" were still outstanding, net of:
- No. 360,695 bonds against which the relative conversion shares had already been issued at that date for which registration by the Companies Register had not yet been executed;
- No. 1,411,014 bonds for which conversion to ordinary shares had already been requested at that date, with the consequent decrease in the number of outstanding counterpart bonds representing payables to future shareholders; the corresponding shares were issued on 15 January 2001.
No. 37,298,324 ordinary shares for an aggregate value of Euro 37,298,324 could still be issued in respect of the outstanding bonds.

As at 31 December 2000 a total of no. 27,133,851 "Olivetti 1998-2002 ordinary shares warrants" were still outstanding, net of:
- No. 37,012 exercised warrants the shares relating to which had already been issued but for which registration by the Companies Register had not yet been executed;

945

- No. 26,127 exercised warrants the shares relating to which were being issued at the close of the financial period (15 January 2001).

No. 27,133,851 ordinary shares at a price of Euro 1 each, for an aggregate value of Euro 27,133,851 could still be issued in respect of the warrants.

As at 31 December 2000 No. 23,871,667 Olivetti 1999-2001 warrants freely assigned to managers of the Parent Company and its subsidiary companies (based on the scheme resolved by the Board of Directors on 9 June 1999 and supplemented with a subsequent resolution approved on 29 November 1999) had not yet been exercised, as described in the specific chapter of the shares schemes reserved for employees. No. 23,871,667 ordinary shares at the price of Lire 2,320 (Euro 1,198) each, of which Lire 1,320 (Euro 0.681) represents the additional paid-in capital, may consequently still be issued in respect of the above-mentioned warrants, for an aggregate value of Euro 40,145,534. Such amount is represented for Euro 23,871,667 by the share capital increase (and after utilising Euro 11,542,980 of the especially established reserve for free share capital increases) and for Euro 16,273,867 by the additional paid-in capital portion.

No. 137,364,550 "Olivetti ex Tecnost 1999-2004 warrants" were still outstanding as at 31 December 2000; these warrants are valid to subscribe to No. 153,848,296 Olivetti shares (therefore, in the ratio of 1.12 ordinary Olivetti shares for each warrant) at the base price of Euro 2.80, increased by 15% on an annual basis, for the period between 20 August 1999 and the execution date of the respective applications and therefore lying between 3.45 (equal to Lire 6,678) in the case of warrants exercised in January 2001 and Euro 5.35 (equal to Lire 10,359), following adjustment in respect of the share capital increase executed in 2001, in relation to the warrants that will be exercised in June 2004. Consequently, should all the warrants outstanding as at 31 December 2000 be exercised, the aggregate value of the share capital increase, including the additional paid-in capital, would vary from a minimum of Euro 473,907,697, on the basis of an exercise unit price of Euro 3.45 (January 2001) to a maximum of Euro 734,900,343, on the basis of an exercise unit price of Euro 5.35 (June 2004) to which Euro 118,376,861 must be added deriving from the utilisation of pre-established free share capital increase reserves.

The Board of Directors meeting held on 24 February 2000 (as described in detail in the relative section in the Directors' Report) by adopting the powers ex art. 2443 of the Italian Civil Code assigned thereto by the Extraordinary Shareholders' Meeting held on 7 April 1999, had resolved a Three-Year Stock Option Plan as from 1 January 2002 expiring on 31 December 2004, reserved for about one hundred managers of the Parent Company and its subsidiary companies, with the object of assigning No. 29,500,000 free warrants, which give the right to subscribe to an equal number of ordinary Olivetti shares at the price of Euro 3,705 (Lire 7,174) each, corresponding to the normal value of the ordinary Olivetti shares at the date the Board of Directors' Meeting was held.

The warrants (options) may be exercised in three layers over the period between 1 November and 15 December during 2002, 2003 and 2004 with the possibility of accumulation up to the end of the entire Plan.

Subsequently, the Board of Directors' Meeting held on 9 February 2001 resolved to revoke the resolutions adopted thereby in the Meeting held on 24 February 2000 and to increase the share capital by an aggregate amount of Euro 29 million through the issuance of 29 million shares at a unit subscription price of Euro 2.81 each, reserved for the managers of the Parent Company and its subsidiary companies and subject to the service of subscription rights (warrants) to be assigned thereto in the framework of the Three-Year Stock Option Plan "February 2002 - December 2004", notwithstanding the terms and conditions applied to assignee managers no longer employed in the Group.

946

Powers assigned to Directors

The Extraordinary Shareholders' Meeting held on 7 April 1999, pursuant to arts. 2443 and 2420-ter of the Italian Civil Code, for the period of five years from the date the resolution was approved, duly assigned the Directors the right to:

a) increase the share capital, in one or more layers, for a maximum par value of Lire 5 thousand billion, on a free and/or payment basis, with or without share premium, through the issuance of ordinary shares and/or serviced with various rights, with the same characteristics as the outstanding shares, to be assigned or offered in option, respectively to parties with entitlement thereto, giving the Directors the right to establish, case-by-case, the categories of the shares, the issue price thereof, the dividend due date, the appropriation of share capital increase to service the conversion of bonds issued also by third parties, both in Italy and abroad, and/or warrants, as well as the right to appropriate the increase or the increases (within the time limits set forth in art. 134 of Legislative Decree No. 58/1998), also via options, warrants, or similar rights, to employees of the Company, its Parent Company and its subsidiary companies;

b) to issue bonds, in one or more layers, and/or bonds convertible into ordinary shares and/or serviced with various rights, with the same characteristics as the outstanding bonds, with or without warrants, also issued in foreign currency, to be offered in option to parties with entitlement thereto, for a maximum amount of Lire 8 thousand billion, within the limits permitted under law, on a case-by-case basis, with the consequent share capital increase to service the conversion of bonds and/or exercise warrants, establishing the procedures, terms, conditions and the relative regulations thereof.

A partial implementation was executed by the Board of Directors' Meeting held on 7 April 1999 as regards the powers under sub a), in which the said Board resolved to increase the share capital intended to finance the Public Tender Offer promoted at that time on the ordinary shares of Telecom Italia, through subscription of the share capital increase resolved for this purpose by the subsidiary company Tecnost. This share capital increase was executed over the period 21 June 1999 - 7 July 1999 for a nominal amount equal to Lire 1,497,601,424,000.

Also by way of implementing the powers cited under sub a), the Board of Directors implemented a number of resolutions with regard to stock option plans regarding an aggregate maximum of No. 77,500,000 shares (as at 31 December 2000); specifically on 9 June 1999, 29 November 1999 and 24 February 2000, as described in detail and as set forth in art. 5 of the Company By-laws.

Subsequently, on 4 July 2000, the Extraordinary Shareholders' Meeting, in relation to the free share capital increase and the concurrent redenomination in Euro, made provision also to express in the aforesaid currency the amounts reported in the above-mentioned powers statements.

The Board of Directors' Meeting held on 18 December 2000, availing of the aforesaid powers and by way of implementing the effects thereof, resolved a right issue for a maximum of no. 357,184,480 Olivetti ordinary shares with an equal number of associated warrants and a maximum of No. 500,058,272 bonds, the characteristics of which are described in detail in the Directors' Report (then turned out no. 348,249,405 shares and no.487,549,167 bonds on the basis of the share capital when the operation started).

Finally, as an integration and to complete the information regarding the share capital we would mention that the Shareholders' Meeting held on 12 May 1994 had empowered the Board of Directors to issue bonds, also convertible bonds, up to the maximum amount of Lire 2,000 billion, within the limits permitted under law, on a case-by-case basis, as well as shares up to a nominal maximum of Lire 1,000 billion.

a47

On 9 June 1994, by way of a partial exercise of the powers conferred by the Shareholders' Meeting, the Board of Directors' Meeting resolved to issue a Lire 500 billion floating-rate bond maturing in 2001 – fully subscribed and listed in 1994.

I. bis Share capital increase to be filed with the Register of Companies pursuant to art. 2444 of the Italian Civil Code

This heading, which includes the nominal value of the shares issued in respect of share capital increases for which registration by the Companies Register had not yet been executed as at 31 December, amounted to Euro 397,707 (Euro 11,323,083 as at 31 December 1999); this amount referred to:

- the share capital increase of Euro 360,695 (of which Euro 174,412 on free basis by utilising a specially pre-established reserve) through the issuance of No. 360,695 ordinary shares following the conversion of an equal number of "Olivetti 1998-2002 floating-rate bonds";
- share capital increase of Euro 37,012 (of which Euro 17,897 on a free basis) through the issuance of No. 37,012 ordinary shares following the exercise of an equal number of "ordinary Olivetti 1998-2002 shares warrants".

I. ter Share capital increase payment relating to shares to be issued

This heading amounted to Euro 26,127 as at 31 December 2000 and included Euro 13,493 representing the amount paid (Lire 1,000 per share) by the holders of No. 26,127 "Olivetti ordinary shares 1998-2002 warrants" to exercise the same in relation to which the corresponding shares had not yet been issued as at 31 December 2000 (15 January 2001), as well as Euro 12,634 tied to the exercise of the said warrants (by utilisation of the extraordinary reserve) to increase the par unit value to Euro 1 (equal to Lire 1,936.27 per share) of the shares to be issued.

I. quater Shares in exchange with Tecnost shares

This heading amounted to Euro 1,999,439,092 as at 31 December 2000 and reflected the par value of no. 1,999,439,092 Olivetti shares reserved in joint exchange with shares owned by Tecnost minority shareholders, following the merger of the latter company into Olivetti S.p.A. which became effective at 11.59 p.m. on 31 December 2000.

II. Additional paid-in capital

This reserve amounted to Euro 3,196,212,781 as at 31 December 2000 compared with Euro 2,267,219,725 as at 31 December 1999 representing a net increase of Euro 928,993,056 to which the following components contributed:

- share capital increase of Euro 14,342,318 in respect of no. 21,038,333 shares issued at the end of 1999 (at Lire 2,320 each) in favour of the managers of the Parent Company and its subsidiary companies (1999-2001 Stock Option Plan) for which the registration formalities at the Companies Register had not yet been completed as at 31 December 1999;

- share capital increase of Euro 481,752 in respect of No. 706,667 shares issued in 2000 (at Lire 2,320 each) in favour of the managers of the Parent Company and its subsidiary companies (1999-2001 Stock Option Plan);
- share capital increase of Euro 3,195,731,029 in respect of the partial re-establishment of the Tecnost additional paid-in capital reserve following the merger through utilisation of the share exchange reserve amounting to Euro 2,547,518,244 and of the share cancellation reserve amounting to Euro 648,212,785;
- utilisation of Euro 2,281,562,043 in respect of a free share capital increase to implement the resolution approved by the Shareholders' Meeting held on 4 July 2000, as described in detail previously.

II. bis Additional paid-in capital in respect of share capital increases to be filed with the Register of Companies

This reserve, which amounted to Euro 14,342,318 as at 31 December 1999, was written off as at 31 December 2000 following the registration in the Companies register of the share capital increase relating to No. 21,038,333 shares issued in 1999 in favour of the managers of the Parent Company and of its subsidiary companies (1999-2001 Stock Option Plan).

III. Revaluation reserve

This heading which amounted to Euro 1,128,827 as at 31 December 2000, referred to the revaluation Reserve already carried in the books of Tecnost and re-established in the Olivetti Financial Statements following the merger, through utilisation of the share cancellation reserve.

IV. Legal reserve

This reserve amounted to Euro 877,318,758 as at 31 December 2000 and was established in 2000:
- Euro 141,603,263 as appropriation of 5% of the profits for fiscal 1999;
- Euro 378,646,124 as appropriation of part of the profits for fiscal 1999 to a supplementary legal reserve for the additional, conditioned and potential future share capital, resulting after 31 December 1999 up to a maximum aggregate amount of Euro 114,383,634, based on the theoretical assumption that after 31 December 1999 and within the respective due dates all the convertible bonds are converted and all the warrants issued are exercised, also with regard to the stock options in circulation at that date;
- Euro 357,069,371 representing the re-establishment of the Tecnost legal reserve, following the merger, through utilisation of the share cancellation reserve.

V. Reserve for treasury stock

This reserve amounting to Euro 2,298,156 reflected the value of No. 2,697,500 Parent Company shares, carried in the Financial Statements in the relative heading under financial fixed assets, in compliance with the provisions of art. 2357-ter of the Italian Civil Code, and cannot be distributed while own shares continue to be held.

989

VII. Other reserves

These reserves represent an aggregate amount of Euro 2,075,652,903 as at 31 December 2000 and were entirely established in 2000.

a) Extraordinary reserve

The reserve, which amounted to Euro 1,888,261,068 was established for Euro 1,987,003,159 by the portion of net profits for fiscal 1999 in compliance with the resolution approved by the Shareholders' Meeting held on 4 July 2000 and for Euro 55,165,334 through utilisation of the share cancellation reserve, to re-establish the Tecnost extraordinary reserve following the merger, and was utilised for Euro 153,907,425 according to the following details:
- Euro 86,689,342 representing the free share capital increase in relation to the increase in the unit par value of the shares from Lire 1,000 to Lire 1,936.27 (equal to 1 euro), as described in detail previously;
- Euro 23,143,831 to establish the Olivetti 1998-2002 floating-rate bonds conversion reserve;
- Euro 16,772,603 to establish the Olivetti 1998-2002 warrant exercise reserve;
- Euro 13,037,128 to establish the Olivetti 1999-2001 exercising subscription rights reserve for warrants (Stock options) reserved for the managers of the Parent Company and its subsidiary companies;
- Euro 14,264,521 to establish the Olivetti 2002-2004 exercising subscription rights reserve for warrants (stock options) reserved for the managers of the Parent Company and its subsidiary companies.

b) Restricted reserve tied to exercising the "Olivetti ex Tecnost 1999-2004" warrants

This reserve, equal to Euro 118,376,861, was irrevocably restricted as tied to exercising the Tecnost 1999-2004 warrants (renamed the "Olivetti ex-Tecnost 1999-2004 warrant") and was established (by way of implementing the resolution approved by the Extraordinary Shareholders' Meeting of Tecnost S.p.A. held on 4 October 2000 following redenomination of the share capital of Tecnost S.p.A. in Euro) for an amount of Euro 102,505,388 (through utilisation of the share exchange reserve) since at the time of the request to exercise the warrants the unit amount of Lire 1,436.27 (equal to the difference between the unit counter-value of Euro 1, namely Lire 1,936.27, and the pre-existing par value of Lire 500 per share) will be transferred to share capital in the form of a free share capital increase. The Reserve was subsequently integrated to Euro 118,376,861 to take the joint exchange ratio of 1.12 Olivetti shares for each ex-Tecnost warrant following the merger of Tecnost into Olivetti S.p.A.

c) Restricted reserves tied to the conversion of bonds and to exercising Olivetti warrants

These reserves represented an aggregate amount of Euro 58,797,964 and were established in 2000 (for an original aggregate amount of Euro 67,218,083) following redenomination of the Olivetti share capital in Euro, as described in detail previously.
As at 31 December 2000 these reserves comprised:
- Olivetti 1998-2002 floating-rate bonds conversion reserve, for a residual amount of Euro 18,717,633;
- Olivetti 1998-2002 shares warrant exercising reserve, for a residual amount of Euro 13,120,386;
- Olivetti 1999-2001 subscription right exercising reserve for warrants reserved for the managers of the Parent Company and its subsidiary companies, for a residual amount of Euro 12,695,424;

490

- Olivetti 2002-2004 subscription right exercising reserve for warrants reserved for the managers of the Parent Company and its subsidiary companies, for a residual amount of Euro 14,264,521.

d) Non-taxable reserves

These reserves, posted in Tecnost accounts and amounting to Euro 10,217,010, were re-established in the Olivetti Financial Statements following merger of Tecnost through utilisation of the share cancellation surplus reserve.
The breakdown of these reserves is as follows:
- Reserve pertaining to research grants (Law No. 346/1988) for Euro 8,741,403
- Reserve pertaining to Technological Innovation grants (Law No. 46/1982) for Euro 685,713
- Reserve pertaining to investment grants (Law No. 64/1986) for Euro 695,110
- Reserve pertaining to VAT deduction on investments for Euro 94,784.

No provision for taxes has been made on non-taxable reserves since, at the present time, no operations are foreseen which can generate taxation thereof.

VIII. Retained earnings (accumulated losses)

Losses brought forward as at 31 December 2000 were set to zero compared with Euro 159,759,033 as at 31 December 1999, following cover as resolved by the Shareholders' Meeting held on 4 July 2000.

B) Reserves for risks and charges

2.a) Reserves for taxation

The following years are still subject to adjustment or to assessment by the Inland Revenue authorities: the financial years from 1995 as regards income taxes; the financial years from 1996 as regards value added tax.
In fiscal 1999, the Parent Company underwent a general tax inspection conducted by the Regional Corps of the Turin Tax Police, with specific reference to the financial years 1994, 1995 and 1996. The inspectors' report to the competent Inland Revenue office listed a series of hypothetical administrative anomalies regarding both value added tax and (predominantly) income tax. The objections regarding income tax essentially stem from a different configuration of tax results due to differences in the allocation to each of the three years of costs incurred and revenues generated by the Company over the three years in question.
The Parent Company declared a tax loss for all three financial years; specifically, for fiscal 1994 a tax loss of Lire 510 billion, for fiscal 1995 a loss of Lire 904 billion and for fiscal 1996 a tax loss of Lire 1,705 billion.
Should the recoveries proposed by the Tax Police be accepted in full, the loss for fiscal 1994 would decrease to Lire 431 billion, the loss for fiscal 1995 to Lire 551 billion and the loss for fiscal 1996 to Lire 1,375 billion.
On 15 December 2000 notification was duly given regarding the income tax assessment referred to fiscal 1994, which fully accepts the observations made in the assessment findings reported by the Tax Police for the year in question.

qal

The Parent Company submitted a settlement appeal on 8 February 2001 with regard to the said assessment findings. Furthermore, on 8 March 2001, the Parent Company also requested settlement of income taxes for fiscal 1995 and 1996, to obtain a joint examination with fiscal 1994, which has already been subjected to assessment.
The Parent Company is confident it will be able to obtain a significant reduction in the recoveries compared with the amounts proposed by the Tax Police. Otherwise legal proceedings will be established to challenge the assessment findings with regard to fiscal 1994 and in respect of the assessments regarding fiscal 1995 and 1996, which may be notified.
On 15 December 2000 the Parent Company also received adjustment notices regarding value added tax for fiscal 1994 and 1995 reflecting the findings proposed in the report issued by the Tax Police. The company has lodged prompt and reasoned appeals to challenge in these notices.
The Parent Company received assessment notices referred to the 1994, 1995 and 1996 financial years concerning the income tax returns for the years from 1988 to 1992. No significant assessment notices have been received with regard to value added tax.
The financial authorities objected to the treatment of lease-back contracts as financial leasing contracts, in view of the consequent tax regime in the assessment relating to fiscal 1988. The assessments concerning fiscal 1991 and 1992 stemmed from objections raised by the Regional Corps of the Trieste Tax Police with regard to usufruct on share contracts entered into by the Parent Company in previous years. The assessments relating to fiscal 1989 and 1990 concerned both matters.
With regard to usufruct on share contracts, in separate assessments, the authorities questioned the legitimacy of the deduction of tax credits and withholdings relating to dividends collected from resident companies by the Parent Company as usufructuary, and alleged the co-responsibility of the Parent Company for failure to apply to such dividends the higher withholdings taxes due on payment of share income to non-residents.
The Parent Company has lodged motivated appeals against all these assessments.
The objections raised with regard to lease-back contracts have been rejected by both the first-degree Provincial Tax Court and the second-degree Regional Tax Court. In the meantime, the Inland Revenue has decided not to proceed further with the matter.
All the objections raised by the tax authorities regarding usufruct on share contracts for the 1989, 1991 and 1992 financial years, as well as the deductibility of tax credit and withholdings on dividends with reference to fiscal 1990, have been rejected by both the first- and second-degree Tax Courts. Only the appeal lodged by the Parent Company against the fiscal 1990 assessment alleging co-responsibility for lower tax withholdings has been rejected by both the provincial and the regional Tax Courts.
The Inland Revenue Office has submitted an appeal to the Court of Cassation as regards all the decisions in favour of the Parent Company concerning the objections relating to usufruct on share contracts and the Parent Company has lodged its counter-appeal. The Parent Company has lodged an appeal to the Court of Cassation against the decision of the regional Tax Court regarding tax withholdings referring to fiscal 1990.
The Parent Company's tax advisors believe that the disputes regarding usufruct on share contracts will be settled in favour of the Parent Company, since the objections raised on both matters lack any juridical basis, and now represent favourable jurisprudence also at a Court of Cassation level.

aq2

2.b) Reserves for deferred taxation

The reserve for deferred taxes, as at 31 December 2000, amounted to Euro 824.2 million and was entirely established during the financial period in relation to a provision charge of Euro 822.2 million and an existing provision in the merged Tecnost S.p.A. of Euro 2 million.
The principle temporary differences, which generated the reserve, arose from:
- Telecom Italia dividends and the relative tax credit accruing to fiscal 2000 but referred to fiscal 2001 for taxation purposes (taxable amount Euro 1,413.6 million);
- capital gains realised by the disposal of 31.5% of the equity investment in OliMan Holding B.V. executed during fiscal 1999.

The tax burden pertaining to the capital gains (Euro 4,155.8 million) was provided for under current income taxes relating to fiscal 1999. Subsequently, at the time of submitting the tax return, taxation of capital gains was spread over five years as from fiscal 1999; therefore, the taxable amount that originated the deferred taxes provision amounted to Euro 2,493.5 million corresponding to three fifths of the full capital gains amount.
The amount of the reserve was determined by taking into account the tax losses for the previous financial years (Euro 968.4 million) totally eligible for fiscal 2001, the rates expected for the years in which the temporary differences will be reversed (36% for fiscal 2001 and 2002, 35% for fiscal 2003 and 2004) and portions subject to the rate of 19% by application of Dual Income Tax (D.I.T.).
As a prudent measure no utilisation of the reserve for future risks and charges taxed in preceding financial years has been foreseen.
Details of the provision calculation are provided with the reconciliation table between the theoretical tax charge and the effective tax charge carried in the income statement.

3) Other provisions

As at 31 December 2000, following the provision of Euro 15.1 million (of which Euro 0.1 million classified under personnel costs), the adjustment to the exchange rates in force on 31 December 2000 as regards risks and charges expressed in non-EU foreign currency amounted to Euro 7.6 million and the utilisation of Euro 5.9 million, this caption at 31 December 2000 amounted to Euro 232.3 million (compared with euro 215.5 million at 31 December 1999) and concerned Euro 25.8 million for deferred social security charges arising from reductions in the workforce pursuant to Law No. 223/1991, Euro 175.2 million in charges relating to commitments and possible future risks associated with the sale of OliMan Holding B.V. and Euro 31.3 million in charges relating to guarantees given relating to the sale of subsidiary companies.

C) Reserve for employee severance indemnities

	9,591,788	11,710,749	(2,118,961)
Total non financial payables	**147,815,791**	**763,815,301**	**(615,999,510)**
Total payables due within 12 months	**1,963,569,302**	**1,121,672,412**	**841,896,890**

945

Payables due within 12 months amounted to Euro 1,963.6 million as at 31 December 2000 (Euro 1,121.7 million as at 31 December 1999 and are represented by financial payables of Euro 1,815.8 million (Euro 357.9 million as at 31 December 1999) and by other payables amounting to Euro 147.8 million (Euro 763.8 million as at 31 December 1999).
The increase of short-term financial payables, amounting to Euro 1,457.9 million in particular is the result of incorporation of ordinary borrowings pertaining to Tecnost S.p.A. for an aggregate amount of Euro 1,001.6 million, the Olivetti 1994-2001 bond loan of Euro 258.2 million refundable in a single instalment on 26 July 2001.
Interest rate swap contracts for the entire amount are applicable to the floating-rate bond of Euro 258.2 million issued by Olivetti S.p.A. maturing in July 2001, and falling due on the same date as the floating-rate was converted into a fixed quarterly rate of 4.145%.
The other payables have varied principally as a result of a decrease in the payables due to tax authorities (Euro 712.4 million); in fact, during fiscal 1999 current income taxes were provided for amounting to Euro 711 million subsequently found to be in excess following constant installment taxation (over five financial years) of the capital gains generated by the sale of the equity investment in OliMan Holding B.V.

Payables due after 12 months

1) Bonds

Loans from the Technological Innovation Fund (FIT)	24,436,714	27,268,644	(2,831,930)
less: current portions	(5,536,705)	(4,474,200)	(1,062,505)
Total	**18,900,009**	**22,794,444**	**(3,894,435)**

5) Amounts due to subsidiary companies

	31.12.2000	31.12.1999	Changes
Amounts due to subsidiary companies			
Olivetti Holding B.V.	1,405,000,000	1,506,727,164	(101,727,164)
Olivetti Finance N.V. (ex Tecnost International N.V.)	14,100,008,816	-	14,100,008,816
Total	**15,505,008,816**	**1,506,727,164**	**13,998,281,652**

Medium/long-term debt as at 31 December 2000 due to subsidiary companies (Euro 15,505 million) concern financing utilised in reference to disbursement related the Public Tender Offer on Telecom Italia S.p.A.
The undertaking of payables pertaining to Tecnost S.p.A. due to Olivetti Finance N.V (Euro 14,100 million) and a reduction of the amount payable to Olivetti Holding B.V. (Euro 101.7 million) in respect of a repayment have contributed to generate the increase of Euro 13,998.3 million.

* * *

Financial payables secured by guarantees on assets owned by the company as at 31 December 2000 amounted to Euro 43.1 million; these guarantees, equal to Euro 46 million (Euro 55.9 million as at 31 December 1999), provided in reference to research loans granted by San Paolo IMI, consisted of pledges on securities.

The breakdown of the medium/long-term debt, including current portions, was as follows:

(in millions of euro)	31.12.2000	31.12.1999
Amounts due to subsidiary companies		
Loan from Olivetti Holding B.V., interest rate 5,799% at 31.12.2000, repayable on 30 June 2002	1,405.0	1,506.7
Loan from Olivetti Finance N.V., interest rate 6,798 % at 31.12.2000, repayable on 30 June 2002	6,823.6	-
Loan from Olivetti Finance N.V., interest rate 7,149% at 31.12.2000, repayable on 29 October 2004	174.2	-
Loan from Olivetti Finance N.V., interest rate 7,149% al 31.12.2000, repayable on 30 June 2004	4,602.2	-
Loan from Olivetti Finance N.V., interest rate 3,933% al 31.12.2000, repayable on 3 November 2005	2,500.0	-
Amounts due to third parties		
"Olivetti 1994-2001" bonds (nominal value lire 1.000 each), floating rate (Ribor three months plus 0,75 p.p.p.a.; interest rate at 31.12.2000: 5,8%) repayable in full on 26 July 2001, supported by swap contract to stabilise the rate at 4,145%	258.2	258.2
Olivetti 1998-2002 floating rate bonds, convertible into common shares, interest rate at 31 December 2000: 5,2%	19.3	45.0
IMI loans for research pursuant to Law 46/1982, average interest rate of 4,5% at 31 December 2000, repayable by 2001	0.2	0.5
IMI loans for research pursuant to Law 346/1988, average interest rate of 12,5452% (gross of interest relief grants) at 31 December 2000, repayable by 2004	97.1	116.4
Subsidized loans for technological innovation, average interest rate of 4.0216% at 31 December 2000 repayable by 2012	24.4	27.3
Other loans in Italian lire, average interest of 5,5403% at 31 December 2000, repayable by 2002	869.8	178.1
Total	**16,774.0**	**2,132.2**
of which:		
Portion expiring within 12 months	1,093.7	68.2
Portion expiring after 12 months	15,680.3	2,064.0

Payables due after 12 months expire as follows:

(in millions of euro)	31.12.2000	31.12.1999
within 2 years	8,344.0	1,884.2
within 5 years	7,331.2	173.1
after 5 years	5.1	6.7
Total	**15,680.3**	**2,064.0**

The Parent Company had unused overdraft facilities on current accounts as at 31 December 2000 for Euro 198.1 million (Euro 157.5 million as at 31 December 1999) and other unused standby lines of credit for Euro 50.2 million (Euro 91.9 million as at 31 December 1999).

Financial fixed assets			
Financial receivables due within 12 months from:			
Subsidiary companies	17,483	104,035	(86,552)
Associated companies	58,973	-	58,973
Others	10,716,241	14,974,673	(4,258,432)
	10,792,697	15,078,708	(4,286,011)
Financial receivables due after 12 months from subsidiary companies	18,201	231,572	(213,371)
Total financial fixed assets	**10,810,898**	**15,310,280**	**(4,499,382)**
Financial current assets			
Interest bearing current accounts with subsidiary companies	45,267,667	65,127,375	(19,859,708)
Interest bearing current accounts with associated companies	81,060	76,898	4,162
Interest bearing current accounts with thiird parties	25,894,762	21,769,617	4,125,145
Securities	70,937,978	76,056,373	(5,118,395)
Receivables for securities held under reverse repurchase agreements	875,008	132,826,975	(131,951,967)
Liquid funds	838,896,181	98,925,015	739,971,166
Total financial current assets	**981,952,656**	**394,782,253**	**587,170,403**
Accrued interest income	**7,293,460**	**6,130,941**	**1,162,519**
Total financial resources (B)	**1,000,057,014**	**416,223,474**	**583,833,540**
Net financial indebtedness (A-B)	**17,990,935,831**	**2,058,395,201**	**15,932,540,630**

Net financial indebtedness amounted to Euro 17,990.9 million compared with Euro 2,058.4 million at 31 December 1999.

The net increase of Euro 15,932.5 million in particular, was due to:

- net payables and interest accruals, following the merger of Tecnost, representing an aggregate amount of Euro 15,392.6 million which can be broken down as follows;
  - Euro 1,001.4 million net payables to third parties due within 12 months,
  - (Euro 1,070.1) million receivables from the Parent Company and Group companies due within 12 months;
  - Euro 14,100 million payables to Group companies after 12 months;
  - Euro 11.0 million short-term net accrued liabilities;
  - Euro 1,349.7 million medium/long-term accrued liabilities;
  - Euro 0.6 payables to third parties due after 12 months.
- increase of pre-merger short-term payables of Olivetti, due to subsidiary companies for Euro 1,096.9 million;
- increase in short-term financial assets for Euro 587.2 million in particular deriving from the collection of the proceeds deriving from the transfer from Tecnost to Telecom Italia of receivables due from tax authorities.

During the merger operations the amounts due to Tecnost S.p.A. from Olivetti Finanziaria Industriale S.p.A. (Euro 327.4 million) were compensated with a corresponding amount due from Olivetti S.p.A. to Olivetti Finanziaria Industriale itself; furthermore, the payables of Olivetti to Tecnost amounting to Euro 742.7 million were written off.

Memorandum accounts

A) Personal securities given and counter-securities received

As at 31 December 2000 suretyships and other personal securities given, also indirectly through banks and insurance companies, totalled Euro 19,402.4 million (Euro 12,284.3 million as at 31 December 1999) and were broken down as follows:

(in millions of euro)	31.12.2000	31.12.1999
To third party holders of securities issued by subsidiary companies	18,825.6	11,706.4
To banks and finance companies for credit lines and financings given to subsidiary companies	135.3	21.4
Counter-securities given to third parties for guarantees given on behalf of:		
subsidiary companies	19.9	28.4
associated and unconsolidated subsidiary companies	6.6	6.8
third parties	47.1	120.5
	19,034.5	11,883.5
Other personal guarantees given	367.9	400.8
Total personal guarantees given	**19,402.4**	**12,284.3**

The increase of Euro 7,119.2 million referred to guarantees given to third party holders of securities issued by subsidiary companies was attributable in particular to guarantees given in fiscal 1999 by the merged Tecnost S.p.A. in respect of the following bond loans issued by Tecnost International Finance N.V.:
- Euro 4,500 million, maturing in 2004;
- Euro 1,750 million, maturing in 2009;
- Yen 20 billion (equal to Euro 174 million) maturing in 2029;

to which a further bond loan has been added in November 2000, issued by Olivetti Finance N.V. for Euro 2,836 million guaranteed by Olivetti S.p.A.
The other guarantees, equal to Euro 367.9 million as at 31 December 2000, referred to the following:
- Euro 15 million in respect of suretyships given with reference to the execution of commercial supplies by Getronics S.p.A. (formerly Wang Global S.p.A.);
- Euro 240.5 million in guarantees given to the Italian State Railways in the interest of Infostrada S.p.A.;
- Euro 83. 6 million in respect of guarantees given to Mannesmann A.G. with regard to the sale of the equity investment in OliMan Holding B.V.;
- Euro 28.8 million in other guarantees.

To cover the above guarantees, as at 31 December 2000 the Parent Company had received counter-securities totalling Euro 287.2 million (Euro 9,767.5 million as at 31 December 1999), mainly comprising Euro 240.5 million from Mannesmann A.G. in respect of guarantees given to the Italian State Railways and Euro 17.4 million received from Getronics (substituting Wang).
The decrease of the counter-securities, for Euro 9,480.3 million, compared with the position at 31 December 1999, was attributable to the merger of Tecnost S.p.A. which provided counter-securities to Olivetti S.p.A. in 1999 in respect of the guarantees the said Company had given to third party holders of bonds issued by Olivetti Finance N.V. totalling Euro 9,443.6 million maturing in 2004.

1001

B) Guarantees on Company assets

Guarantees on Company assets relating to financial operations are analysed under financial payables.

C) Commitments

As at 31 December 2000, contractual commitments undertaken totalled Euro 443.8 million (Euro 16.9 million as at 31 December 1999) and comprised:

- Euro 34.1 million for repurchase obligation in respect of receivables following the sale of the O.i.S. Group to GFI Informatique S.A.;
- Euro 14.5 million for repurchase obligations in respect of a building linked to the sale to Getronics S.p.A. of the equity investment in Olivetti Ricerca S.p.A.;
- Euro 395.2 million mainly towards the subsidiary Olivetti International S.A.

D) Other memorandum accounts

The other memorandum accounts as at 31 December 2000 totalled Euro 3.8 million and related to third party assets held as guarantee deposits (Euro 3.8 million as at 31 December 1999).

1002

Comments on the Income Statement

The Income Statement for fiscal 2000, also for tax purposes, included the effects of the operations executed in the fourth quarter of fiscal 2000 by the merged Company Tecnost S.p.A.

A) Value of production

5) Other revenues and income

The other revenues amounted to Euro 17.2 million (Euro 17.1 million in fiscal 1999), and referred to services rendered and to the recovery of costs in relation to subsidiaries.

B) Costs of production

7) Services

The amount of Euro 49.1 million (Euro 40.1 million in fiscal 1999) referred to Euro 24.1 million regarding costs incurred for the merger of Tecnost S.p.A.

9) Personnel

Payroll costs in fiscal 2000 represented Euro 11.9 million compared with Euro 21.8 million in fiscal 1999. The average number of employees decreased from 200 in fiscal 1999 to 134 in fiscal 2000 (34 managers, 27 middle-management, 72 office staff and 1 factory worker) representing an average decrease of 66; the number of employees decreased from 158 as at 31 December 1999 to 109 as at 31 December 2000; the unit cost has remained essentially unchanged.

10) Amortisation, depreciation and write-downs

Amortisation of intangible fixed assets - Amortisation for the financial period amounted to Euro 24 million, of which Euro 19.1 million for amortisation of the costs incurred for share capital increases and Euro 4.6 million in respect of the amortisation of costs relating to the issuance of bond loans (Euro 4 million incurred by Tecnost during the fourth quarter October-December 2000)

Depreciation of tangible fixed assets - Depreciation for the financial period (Euro 0.9 million) was determined on a straight-line basis by adopting rates that reflect the remaining useful working life of the assets.
As described in the comments concerning tangible fixed assets, accelerated depreciation was also provided for, in compliance with the tax laws;

(in millions of euro)	2000	1999	Changes
Ordinary depreciation	0.6	0.7	(0.1)
Accelerated depreciation	0.3	0.3	-
Total depreciation	**0.9**	**1.0**	**(0.1)**

1003

Write-downs of receivables classified as current assets – The allowance for doubtful accounts was equal to Euro 10.8 million (Euro 18.2 million in fiscal 1999) of which Euro 5.2 million were attributable to write-downs of receivables purchased in previous financial periods from Wang Global S.p.A. (now named Getronics S.p.A.) in connection with the sale of Olsy S.p.A. to Wang Laboratories Inc.

12) Provision for risks

The provision of Euro 15 million (Euro 175.6 million in fiscal 1999) referred to guarantees given in respect of the sales of subsidiary companies.

14) Other operational charges

The other operational charges relating to fiscal 2000 amounted to Euro 3.3 million, decreasing by Euro 67.7 million compared with fiscal 1999 and in particular referred to losses on receivables amounting to Euro 1.5 million, duties and non-income taxes for Euro 0.6 million and contributions to public and private institutions amounting to Euro 0.4 million.

C) Financial income and charges

from associated companies	4,162	205	3,957
from others	1,434,624	1,134,764	299,860
f) Bank current accounts	10,502,145	6,380,009	4,122,136
g) Gains from exchange rate fluctuations	1,827,939	7,163,790	(5,335,851)
h) Other	10,595,763	14,691,939	(4,096,176)
Total	**41,647,421**	**63,763,549**	**(22,116,128)**

Other financial income, which amounted to Euro 41.6 million, included Euro 4.6 million accruing to the fourth quarter of fiscal 2000 on loans previously granted by Tecnost S.p.A.

1065

17) Interest and other financial charges

	2000	1999	Changes
Interest payable to subsidiary companies			
Olivetti Tecnost S.p.A.	966,896	193,811	773,085
Olivetti Finanziaria Industriale S.p.A.	9,016,878	1,038,376	7,978,502
TechnoProduzioni S.p.A.	421,084	33,746,757	(33,325,673)
Olivetti Holding B.V.	81,223,170	18,317,331	62,905,839
Tecnost S.p.A.	1,106,427	-	1,106,427
Olivetti Finance N.V. (ex Tecnost International N.V.)	238,099,825	-	238,099,825
Other subsidiary companies	233,204	903,802	(670,598)
Interest payable to associated companies	-	-	-
Interest payable to third parties			
Bonds	13,743,814	11,766,054	1,977,760
Medium/long-term loans	27,505,093	15,351,031	12,154,062
Bank current accounts	14,619,713	6,253,611	8,366,102
Interest rate swaps	3,075,474	27,285,518	(24,210,044)
Charges on borrowings relating to the Tender Offer on Telecom Italia	-	5,993,231	(5,993,231)
Losses on exchange rate fluctuations	7,715,785	20,177,996	(12,462,211)
Interest, commissions and charges on other finance operations	10,101,584	11,777,882	(1,676,298)
Total	**407,828,947**	**152,805,400**	**255,023,547**

Financial charges amounting to Euro 407.8 million, reflected an increase of Euro 255 million compared with fiscal 1999, due in particular to:
- Euro 251.3 million in respect of charges pertaining to Tecnost S.p.A. payables;
- Euro 62.9 million concerning borrowings received from Olivetti Holding B.V. and essentially attributable to the different period in which the said charges fall due (in full during fiscal 2000 and during the last six months of fiscal 1999);
- Euro 36.7 million reduced charges regarding interest rate swap operations and exchange rate losses.

D) Value adjustments to financial assets

19) Write-downs

The write-down of Euro 10.2 million, entirely referred to the equity investment in Olivetti Finanziaria Industriale S.p.A., was lower by Euro 2,386.6 million compared with fiscal 1999 the financial period in which the equity investment in Tecnost S.p.A. had been written down by Euro 2,071.3 million.

1006

E) Extraordinary income and charges

20) Extraordinary income

	2000	1999	Changes
Gains on disposals			
Equity investments			
subsidiary companies	18,382,825	6,892,248,937	(6,873,866,112)
associated companies	-	1,491,175	(1,491,175)
others	-	13,307,182	(13,307,182)
Tangible fixed assets	21,050	47,426	(26,376)
Disposal of business to Olivetti Servizi Amministrativi S.r.l.	75,226	-	75,226
	18,479,101	**6,907,094,720**	**(6,888,615,619)**
Other income	**8,410,649**	**18,154,706**	**(9,744,057)**
Total	**26,889,750**	**6,925,249,426**	**(6,898,359,676)**

Capital gains on the disposal of equity investments amounted to Euro 18.4 million and derive from the contribution of:
- Tecnost Sistemi S.p.A. to Olivetti Tecnost S.p.A. (formerly Olivetti Lexikon S.p.A.) for Euro 13.9 million;
- Telemedia Applicazioni S.p.A. to Webegg S.p.A. for Euro 4.5 million.

Other income (Euro 8.4 million) arose from adjustments to costs relating to previous years (Euro 1.9 million), collection of amounts in excess of the price paid to repurchase receivables from Wang Global S.p.A. (Euro 2.3 million), the reimbursement of taxes paid abroad by controlled companies then sold (euro 2.7 million) and other sundry items for Euro 1.5 million.

21) Extraordinary charges

	2000	1999	Changes
Losses on disposals			
Tangible fixed assets	-	79,887	(79,887)
Equity investments			
subsidiary companies	-	7,148,352	(7,148,352)
associated companies	360,885	-	360,885
Other charges			
Costs relating to the Tender Offer for Telecom Italia shares	-	509,639,366	(509,639,366)
Miscellaneous charges	1,201,212	10,225,107	(9,023,895)
Total	**1,562,097**	**527,092,712**	**(525,530,615)**

22) Income taxes for the year

Income taxes for fiscal 2000 totalled Euro 111.2 million, which comprised the provision for deferred tax liabilities amounting to Euro 822.2 million and the cancellation of current taxes provided for in fiscal 1999 amounting to Euro 711 million, as a result of the different taxation periods for the capital gains generated by the sale of OliMan Holding B.V., adopted at the time the tax return for fiscal 1999 was submitted, compared with the value assumed when preparing the Financial Statements.

1007

The actual Corporate Income Tax (IRPEG) accruing to the financial period differs from the theoretical tax, calculated by adopting the tax rates applicable for fiscal 2000, as shown in the table below; no provisions were made as regards the Local Tax on Production Activities (IRAP) since both the theoretical and the actual taxable amounts were negative.

Reconciliation between theoretical taxes and effective taxes charged to the Income Statement

Corporate Income Tax (IRPEG)

		Taxes by different tax rates				
(in millions of Euro)	Taxable income	37%	19%	36%	35%	Total taxes
Income before taxes	**981.1**					
Theoretical tax effect		**363.0**				**363.0**
Different tax rates on income taxable in the following years	-	(526.4)	270.3			(256.1)
Temporary differences deductible in the following years	28.2	13.3	(0.7)	(0.9)	(0.5)	11.2
Temporary differences arisen in prior years	3,355.0	305.9	183.1	260.2	294.7	1,043.9
Permanent differences	(5.2)	(1.9)				(1.9)
Tax losses arisen in prior years	(1,384.4)	(153.9)	(184.0)			(337.9)
	2,974.7	**-**	**268.7**	**259.3**	**294.2**	**822.2**
Reversal of current tax payable accrued in the year 1999, as resulted excessive		**(711.0)**				**(711.0)**
Income taxes charged to the income statement		**(711.0)**	**268.7**	**259.3**	**294.2**	**111.2**

Taxes referring to the income (Euro 1,422.8 million) taxable in the following years essentially concerned dividends and the relative tax credit accruing to the income for the year generated by Telecom Italia, which will be distributed in fiscal 2001.

The temporary differences that arose in previous years mainly pertained to the capital gains carried in fiscal 1999 (Euro 4,155.8 million), in relation to the sale of 31.5% of the equity investment in OliMan Holding B.V., with interests in Omnitel and Infostrada, the taxation of which was divided in instalments over five years.

The taxable amount of Euro 2,974.7 million was net of Euro 416 million fully offset by utilising tax losses of previous years; current taxes, therefore, were not provided for in fiscal 2000.

1068

Other information

Considerations payable to the Parent Company's Directors and General Manager and fees payable to the Statutory Auditors

In compliance with the Italian Securities and Investments Board (Consob) Resolution No. 11971/1999 details are provided below of the considerations and fees payable by the Parent Company and also by subsidiary companies on whatever basis and in whatever form, to the Directors, General Manager and to the Statutory Auditors of the Parent Company.

(x) The compensation of Mr Colaninno in Telecom Italia is omni-comprehensive and covers remuneration of all corporate offices as well as of the offices Mr Colaninno holds in other Telecom Italia subsidiary companies or companies in which Telecom Italia has an equity investment. Specifically, it includes a waiver of the amounts due as portion partaining to him of the emoluments of the Board of Directors approved by the Telecom Italia shareholders' meeting pursuant to art. 2389 and transfer to Telecom Italia S.p.A. of the emoluments for the office of Chairman of Telecom Italia Mobile S.p.A., amounting to Euro 103,291.

(xx) Olivetti emoluments are transferred to BC Partners company.

(xxx) The solicitor's office Trevisan & Associati has billed fees totalling euro 113,621 for services provided to Telecom Italia S.p.A. in 2000.

1) Other emoluments.

2) Directorships in other Group companies.

3) The Olivetti Group acquired control of Seat Pagine Gialle S.p.A. on 15 November 2000. The emoluments of the Directors Erede and Tazartes (totalling euro 5,165 each) refer to the whole of year 2000.

4) Audit Committee.

5) Chairman of the Board of Statutory Auditors of other Group companies.

6) Regular Auditor of other Group companies.

(*) In the year 2000 Mr. Sergio Erede issued bills for professional activities carried out in favour of Olivetti S.p.A. in 1999 for an overall amount of euro 4,080,010.

(**) In addition, the Bonelli Erede Pappalardo professional association issued bills in the year 2000 for professional activities carried out by its members in favour of Olivetti S.p.A. for euro 3,976,718; Telecom Italia S.p.A. for euro 2,753,748; Telecom Italia Mobile S.p.A. for euro 120,515 and Seat Pagine Gialle S.p.A. for euro 2,454,978.

1009

Furthermore, in the framework of the share capital increase reserved for the Managers of Olivetti S.p.A. and its subsidiary companies duly approved by the Board of Directors on 24 February 2000 in execution of the powers granted by the Extraordinary Shareholders' Meeting on 7 April 1999 and as already mentioned in the comments to the equity item "Share Capital", the following shares and/or stock options were attributed to the Managing Director Roberto Colaninno and to the General Manager Corrado Ariaudo, in their capacity as Managers of the Parent Company:

	Rights or options allocated in 2000					Shares allocated or options exercised during 2000		
	Free allocation of shares		Options for purchase or subscription			Free allocation of shares	Options for purchase or subscription	
Name	Number of shares allocated	Date of allocation	Number of shares which could be purchased or subscribed	Price per share (in euro)	Exercise period of option rights	Number of shares allocated	Number of shares purchased or subscribed	Price per share
Roberto Colaninno	-	-	12,500,000	3.705	2002-2004 (1)	-	(2)	-
Corrado Ariaudo	-	-	2,500,000	3.705	2002-2004 (1)	-	(2)	-

(1) As described in the section "Employee stock options" the Plan to which such assignments refer was revoked by the Board of Directors meeting held on 9 February 2001, and a new Plan was approved (February 2002 - December 2004) with an exercise price of euro 2.81.
(2) In relation to the stock options allocated in 1999, options may be exercised for subscription of the following shares in the periods 1 January - 31 January 2001 and 1 January - 31 January 2002, at a price of Lire 2,320 (Euro 1,198):
Roberto Colaninno no. 11,500,000
Corrado Ariaudo no. 1,066,666

Legal proceedings

The Parent Company was involved in various legal proceedings as at 31 December 2000; according to the Parent Company's legal advisers, the outcome of such disputes should not have significant adverse effects on the Parent Company's equity and financial position.

Costs relating to the introduction of the Euro and to Year 2000 issues (Italian Securities and Investments Board (Consob) Communications No. 98083971 and No. 98079574)

The revamping scheme regarding the information technology systems, which targeted the introduction of the Euro and the Year 2000 issue was completed during the year.
The costs incurred of Euro 0.4 million were entirely capitalised as tangible fixed assets and were added to Euro 1.9 million in respect of fiscal 1999 of which Euro 1.5 million were capitalised.

Tax regime in the event of distribution of reserves

- Additional paid-in capital reserve (Euro 3,196,212,781). This represents a capital reserve and in the event of distribution, therefore, does not concur to form the taxable income of shareholders.
- Revaluation reserve (Euro 1,128,827).

In the event of distribution, this reserve is treated as forming part of the Parent Company's taxable income and the shareholders' taxable income.

1010

• Reserve for treasury stock (Euro 2,298,156).
This reserve would be treated as shareholders' taxable income, if made available and distributed, and the said shareholders would attract tax credit within the limits of the taxes applied to the assessed companies pursuant to article 105, paragraph 1, subsections a) and b) of the Income Tax Consolidated Text.
• Extraordinary reserve (Euro 1,888,261,068).
In the event of distribution, this reserve is treated as shareholders' taxable income and the said shareholders would attract tax credit within the limits of the taxes applied to the assessed companies pursuant to article 105, paragraph 1, subsections a and b of the Income Tax Consolidated Text.
• Non-taxable reserves.
These comprise:
- research contributions reserve (Law No. 346/1988) for Euro 8,741,403;
- Technology Innovation grants reserve (Law No. 46/1982) for Euro 685,713;
- investments grants reserve (Law No. 64/1986) for Euro 695,110;
- Value Added Tax deduction reserve pertaining to investments for Euro 97,784.
Should the above reserves be distributed they would be treated as forming the Parent Company's taxable income and the shareholders' taxable income; should they be utilised for purposes other than covering losses of the year, they would be treated as forming the Parent Company's taxable income.

Explanatory Notes

General policies in the preparation of the consolidated Financial Statements

The consolidated Financial Statements as at 31 December 2000 have been prepared and presented in accordance with the relevant provisions contained in Legislative Decree No. 127 dated 9 April 1991, and comprise the consolidated Balance Sheet (prepared and presented in accordance with the formats specified in articles 2424 and 2424-bis of the Italian Civil Code suitably adapted), the consolidated Income Statement (prepared and presented in accordance with the format specified in articles 2425 and 2425-bis of the Italian Civil Code suitably adapted) and these Explanatory Notes.
The Explanatory Notes are provided to illustrate, analyse and, in some cases, supplement the data reported in the consolidated Financial Statements. They include the information required by article 38 of Legislative Decree No. 127/1991 and by other provisions contained therein, as well as those notified by the Italian Securities and Investments Board (CONSOB); furthermore, additional information is provided to present a true and fair view even where not required by specific legislation.
The Financial Statements used for consolidation purposes are those as at 31 December 2000 approved by the Shareholders' Meetings of the individual companies or prepared by the respective Boards of Directors for such approval, adjusted, where necessary, to eliminate entries recorded solely for tax purposes and to align them to the accounting policies adopted by the Group. Such accounting policies are consistent with legislation governing consolidated Financial Statements, interpreted by the accounting principles established by the Italian Accounting Profession and, in their absence, by the International Accounting Standards Committee (I.A.S.C.).

Consolidation area

The consolidated Financial Statements as at 31 December 2000 were prepared on the basis of the Financial Statements of the Parent Company Olivetti S.p.A., the groups and the companies directly or indirectly controlled thereby (and namely in which the said Parent Company as at 31 December 2000 directly or indirectly held the majority of voting rights at ordinary Shareholders' Meetings, or sufficient votes to be able to exercise a dominant influence) excepting for a number of minor subsidiary companies and companies subject to sale after 31 December 2000. In particular, Telecom Italia S.p.A. and its subsidiary companies (hereinafter referred to as Telecom Italia Group), which contributed for 96% to the consolidated revenue, have been included in the consolidation by absorbing line-by-line the consolidated Financial Statements of the Telecom Italia Group (approved by the Board of Directors and submitted to audit by PricewaterhouseCoopers), after having implemented the appropriate consolidation adjustments. The associated company Viasat and its subsidiary Viasat Assistance, as well as Nortel Inversora and the Telecom Argentina Group controlled thereby were included in the consolidation area using the proportional method as from 2000, pursuant to art. 37 of Legislative Decree No. 127/1991.
The complete list of companies in which an equity investment is held is shown in the Attachment to these Explanatory Notes ("List of companies included in the consolidated Financial Statements as at 31 December 2000 and the equity investments, pursuant to articles 38 and 39 of Legislative Decree No. 127/1991").

The principle changes that have occurred in the consolidation area for the Telecom Italia Group compared with 31 December 1999 are as follows:
a) inclusion of Nortel Inversora Group in the consolidation area with effects both in the income statement and in the balance sheet items for the entire financial period: following acquisition of a further share (17.50%) by Telecom Italia in the Nortel Inversora holding during fiscal 1999, through Stet International Netherlands, the said Nortel Inversora and the Telecom Argentina Group controlled thereby, have been consolidated proportionally as from 1 January 2000, since controlled jointly with the France Telecom Group;
b) inclusion of the following companies in the consolidation area only as regards balance sheet items, since acquired in the last part of the year:
- Seat Pagine Gialle Group;
- Jet Multimedia Group;
- Europe Explorer Group;
- Corporacion Digitel;
- Maxitel Group;

c) exclusion from the consolidation area, as regards :
- Tecnitel, which, after revocation of winding-up proceedings, changed the company name to IM.SER and, subsequently contribution of the branch of business "Great Buildings" of Telecom Italia, was transferred for a share equal to 60%. The company was valued in the Financial Statements for fiscal 2000 by adopting the equity method;
- Teleleasing, following transfer of the controlling interest; the equity investments held by Saiat are now equal to 20% and the company was valued by adopting the equity method;

d) inclusion in the consolidated Financial Statements only as regards income statement items since transferred in the last part of the year:
- Sirti Group;
- Italtel Group.

As regards the other companies of the Olivetti Group we would mention the exclusion of the O.i.S. Group (O.i.S. and Olivetti Sanità) from the consolidation area for the entire financial period, since sold to third parties during the year.
No write-down was posted with reference to a number of recently acquired foreign investee companies operating in the "new economy" sector, despite the downturn in the market values of the section, in consideration of the unchanged medium and long-term business prospects, and of the industrial – and therefore strategic nature – of such investments in their specific reference sector. However, considering the rapid evolution of the sector the said investments will be subject to continued and careful monitoring.

Consolidation principles

The main consolidation principles adopted for the consolidated Financial Statements as at 31 December 2000 are as follows:
a) the assets and liabilities of the companies included in the consolidation process were consolidated on a line-by-line basis, by eliminating the book value of each consolidated equity investments against the related portion of the shareholders' equity of the companies in which an interest is held.

1032

b) the assets and liabilities of the jointly controlled companies included in the consolidation area according to the proportional method are consolidated for a share equal to the percentage held by the Group, by eliminating the book value of the consolidated equity investments against the related portion of the shareholders' equity of the companies in which an interest is held.
c) gains and losses not yet realised deriving from operations between companies of the Group have been eliminated, as well as the payable and receivable items, the dividends and all the operations executed between companies included in the consolidation basis.
d) goodwill (or consolidation difference), defined as the difference between the purchase cost of subsidiary and associated companies and their current value at the time of acquisition, if positive, was classified under assets in the heading referred to as "Consolidation differences", representing the future income-earning capacity of the company acquired and amortised over the period in which such goodwill was expected to provide benefits; negative differences were classified under an item of the shareholders' equity referred to as "Consolidation reserves". The Income Statements of the subsidiary companies acquired during the year were consolidated for the full financial period; pre-acquisition results not accruing to the Group were reversed under a special heading of the Income Statement.
Consolidation differences in respect of associated companies – if positive – were charged to the equity investment account and amortised over the period in which such goodwill was expected to provide benefits.
e) minority interests in the net equity and the net result for the year are carried separately under an appropriate heading in the consolidated shareholders' equity and the consolidated Income Statement, respectively.
f) capital gains and capital losses arising from the sale of shares in Group companies to third parties are recorded in the Income Statement. In the event of a share capital increase of a Group company, subscribed by a minority shareholder, possible capital gains or capital losses that derive from the comparison between the values of the portions of shareholders' equity pertaining to the Group, as carried before and after the operation, are duly recorded in the Income Statement.
g) provisions and value adjustments recorded by individual companies included in the consolidation area solely to obtain tax benefits available under current legislation are eliminated from the consolidated Financial Statements, taking due account of any tax effects, where applicable.

Criteria and exchange rates applied in the translation into Euro of Financial Statements denominated in foreign currency

a) The Financial Statements of foreign subsidiary companies resident in non-EMU (European Monetary Union) member countries are translated into Euro by applying the exchange rates in force at the date of closing the Financial Statements to the Balance Sheet items and the average exchange rate for the financial period to the items of the Income Statement. The exchange rate differences arising from the application of these criteria compared with differences in force at the end of the previous financial period were charged directly to a specific item of the consolidated shareholders' equity under "Other reserves".
The Financial Statements of foreign subsidiary companies resident in EMU (European Monetary Union) member countries are translated into Euro at the fixed exchange rates as defined by the European Commission on 31 December 1998.

1033

b) Exchange rates in force at 31 December 2000 and 1999 and the average exchange rates for fiscal 2000 and fiscal 1999 adopted to translate into Euro the Financial Statements of foreign subsidiary companies resident in EMU (European Monetary Union) member countries are as follows:

Euro/Local currency	
Lira	1,936.27

1034

The average exchange rates for fiscal 2000 and fiscal 1999 adopted to translate the economic items denominated in the currencies of non-EMU (European Monetary Union) member countries were determined based on the following differentiated criteria:
- for companies in the Telecom Italia Group: by translating the average arithmetic Italian Lire/foreign currency rates detailed in the Explanatory Notes to the Telecom Italia consolidated Financial Statements;
- for other companies in the Olivetti Group: the average weighted rates against the monthly revenues to take due account of the seasonal business trends, consistent with the principles adopted in the previous financial periods.

Valuation criteria

The valuation criteria adopted to prepare the items of the consolidated Financial Statements comply with those established by law and are the same as those adopted in the previous financial period.
The valuation criteria adopted for the various headings are described below.

Intangible fixed assets

Intangible fixed assets are recorded at their purchase or production cost, including related accessory charges and amortised over the residual period of their useful working life; intangible fixed assets are written down to reflect any other than temporary impairment in value; the book value is reinstated in subsequent years if the reasons for such write-downs no longer apply.
Start-up and expansion costs are amortised over five years.
Industrial patents and intellectual property rights are amortised depending on their expected useful working life - over five years (for industrial patents) or predominantly over three years (software) as from the financial period in which the intangible fixed assets enter service.
Concessions, licences, trademarks and similar rights are amortised over their expected useful working life (licences are amortised based on the duration of the relevant contracts).
Purchased goodwill relating to the acquisition of businesses or of branches of business is generally amortised over a period of five years.
Fixed assets in process of formation and advance payments refer to costs sustained for current software development projects. Such projects according to their nature, type and significant value are of particular economic and business management importance, and offer good prospects of future revenues or containment of costs.
The heading 'Other' includes, in particular, expenses in respect of third-party buildings (generally amortised over the duration of the relevant lease agreements), rights of way acquired by Telecom Italia to ensure an extension of the company's transmission capacity over non-Italian territory (amortised over the residual duration of the agreements signed with foreign operators who own the facilities to which the rights refer), as well as the exclusive rights acquired by Telecom Italia and by TIM with regard to the celebrations for the "2000 Grand Jubilee" (amortised over the term of the said rights).

1035

Tangible fixed assets

Tangible fixed assets are recorded at the purchase or construction cost, amortised over their residual useful working lives and include monetary revaluation as established by law.
Assets are suitably written down to reflect any other than temporary impairment in value; the original book value is reinstated in subsequent financial periods if the reasons for such write-downs no longer apply.
Tangible fixed assets under construction are recorded at the direct costs incurred.
Ordinary maintenance costs are charged fully to the Income Statement.

Equity investments

Long-standing equity investments are classified as financial fixed assets; equity investments purchased for subsequent disposal, or intended to be sold, are classified as investments not held as fixed assets.
Equity investments classified as financial fixed assets in unconsolidated companies in which at least 20% of voting rights are held are accounted for using the equity method. The other equity investments in unconsolidated companies held as financial fixed assets are stated at their purchase cost, adjusted by means of appropriate write-downs until they reflect the corresponding shareholders' equity portion resulting from the most recent Financial Statements of the company in which the participating interest is held, to reflect any other than temporary impairment in value. Losses in value in excess of the corresponding book values are charged to the provisions for risks and charges. In any event, the book value of such equity investments is consistent with the presumed lower value determined on the basis of reasonable expectations of utility and recovery in the future financial periods.
Equity investments in consolidated listed companies purchased for trading purposes and classified under current assets are recorded at whichever is lower between the purchase cost and the realisable value determined on the basis of the trend represented by the year-end stock market prices.
Write-downs of equity investments (both those held as financial fixed assets and those held as current assets) are eliminated in subsequent years if the reasons for such write-downs no longer apply.

Other securities (other than equity investments)

Securities to be held until maturity are classified as financial fixed assets; marketable securities are classified as financial assets not held as fixed assets.
Securities held as financial fixed assets are recorded at their purchase cost, adjusted on an accrual basis for the difference between the said cost and their redemption value, and written down to reflect any other than temporary impairment in value.
Securities held as current assets are recorded at whichever is lower between the purchase cost -adjusted on an accrual basis for the issue spread – and the realisable value based on the market trends.
Write-downs of securities are eliminated in subsequent financial periods if the reasons for such write-downs no longer apply.
Securities purchased through reverse repurchase agreements, subject to the obligation of resale at the expiry date, are classified as financial current assets and stated at their purchase cost. The difference between the spot and forward prices is charged on an accrual basis to the Income Statement with a contra- item in the Balance Sheet under accrued income/expenses.

1636

Inventories

Inventories are valued at whichever is lower between the purchase or production cost and the value determined on the basis of the market trends.
The prevailing methods adopted to determine the cost are as follows:
- raw materials and finished products: LIFO based on annual steps;
- goods: weighted average;
- work-in-progress and semi-finished products: based on the cost of production;
- short-term contract work-in-progress: based on the industrial cost;
- long-term contract work-in-progress: percentage of completion method, and based on agreed revenues, also taking into account presumed losses up to completion and other possible related risks.

Raw materials, finished products and goods in excess of foreseeable production requirements, slow-moving, or subject to obsolescence are suitably written down based on the estimated realisation value.

Accounts receivable and payable

Accounts receivable are recorded at their estimated realisable value and classified as financial fixed assets or as current assets.
Accounts payable are recorded at their face value.
Foreign currency receivables and payables are entered on the basis of the year-end exchange rates; gains or losses between the values of accounts receivable and payable converted at year-end exchange rates and values of the same entered at the original exchange rates are carried in the Income Statement under the items "financial income" and the "financial charges", respectively.
Accounts receivable due to the consolidated subsidiary TIM from almost all of its dealers have been transferred to a factoring company (transfer was executed on a without recourse basis within the agreed limits). As each individual receivable falls due, the factoring company pays TIM the receivable face value less amounts due to the dealers for services rendered thereby. TIM has not given guarantees in respect of this factoring operation.

Telephone companies employees Social Security Fund (FPT)

Pursuant to Law No. 58/1992 Telecom Italia is under obligation to provide full national insurance coverage for all employees on the payrolls of STET, SIP, Italcable and Telespazio as at 20 February 1992, as well as for all employees transferred from the Public Administration to IRITEL, through the Telephone Companies Employees Social Security Fund (Fondo Previdenza Telefonici – FPT). This national insurance coverage also extends to previous periods of employment in other companies. The amounts due are calculated by the Italian National Social Security Board (INPS) and shall be paid in 15 annual instalments. Subsequently, art. 66 of Law No. 427/1993 provided for these costs to be recorded in the Company's Financial Statements and deducted against taxes in the financial periods in which the payments are made
The amount of the liability regarding the payments due is uncertain arising from disagreement between Telecom Italia and INPS in relation to the methods used to calculate the amounts due.
The arguments of the two parties are currently being examined by the Courts. Telecom Italia firmly believes that the total liability relating to these contributions as at 31 December 2000 can be estimated between Lire 1,900 billion (Euro 981 million) and Lire 2,500 billion (Euro 1,291 million) (of which Lire 509

1037

billion have already been paid), net of the residual amount already recorded by IRITEL and as currently carried in the Financial Statements of Telecom Italia and TIM following the merger of IRITEL.
A payable of an amount consistent with the minimum estimated liability has been recorded in the Olivetti Group's consolidated Financial Statements for the purposes of determining consolidation goodwill, and in compliance with the relevant accounting principles.

Accruals, prepayments and deferrals

Accruals, prepayments and deferrals are determined to reflect the correct apportionment of costs and revenues applicable to two or more financial periods.

Reserves for risks and charges

Taxation: provisions charged to these reserves cover both presumed tax liabilities (including any surcharges and arrears interest) in respect of uncertain or disputed positions and amounts provided for deferred taxes.
Deferred taxes and prepaid tax credits are recognised in the Financial Statements and are calculated on the basis of the temporary differences between the value assigned to the assets and liabilities for individual consolidated companies according to accounting criteria and the value assigned to the said assets and liabilities for tax purposes, as well as on the basis of the consolidation adjustments.
Assets arising from prepaid tax credits are prudently not recognised unless there is a reasonable certainty that in those years in which the temporary differences will be reversed future taxable income will be equal to or greater than the total amount of such differences.
Prepaid tax credits and deferred taxes are recorded in the consolidated Balance Sheet by entry thereof under the current assets heading "receivables due from others" and under "reserve for taxation", as a contra-item to the heading "income taxes for the period".
The tax benefits relating to tax losses brought forward are recognised when the reasonable expectation of realising the said tax benefits exists.
Deferred taxes on equity reserves and provisions not subject to taxation in respect of consolidated companies or companies valued on the basis of the equity method are recognised as and when such reserves shall be distributed or however utilised and the distribution or utilisation shall give rise to tax charges.

Other provisions: these provisions largely relate to amounts provided for to cover known charges of a certain or likely nature, the timing or extent of which are however uncertain at year-end. The provisions reflect the best estimates based on the commitments undertaken and the information available.

Employee severance indemnities

This provision is formed in accordance with current legislation and labour contracts and reflects the liability accrued to all employees of the consolidated companies at the close of the Financial Statements at year-end. The receivable arising as a result of the advance tax payments on employee severance indemnity pursuant to Law No. 662 dated 23 December 1996 and subsequent amendments thereto is entered under the financial fixed assets heading "other receivables". This receivable amount has been revalued in accordance with the criteria set forth in the above-mentioned law.

1034

Grants

Grants related to income (charged directly to the Income Statement) and grants related to assets are recognised in the financial period in which the documentation confirming payment of such contributions is filed, or, in cases where payment is based on established procedures, in the financial period in which the relevant costs are sustained.
More specifically, grants related to assets are deferred on an accrual basis to the following financial periods by classifying the said grants under deferred income; the reversal to the Income Statement is executed in correlation to the depreciation of the assets to which the said grants refer.

Revenues

Revenues are entered as they arise and are recognised in the consolidated Income Statement as follows:
a) telecommunications services: in the financial period in which the services are provided; in particular as from 1999, traffic revenues are stated gross of the amounts due to third party operators;
b) IT operations, innovative network services and miscellaneous operations: to the extent that the relevant services were provided during the financial period;
c) manufacturing and installation operations: on delivery in the case of supplies, or on completion of the work in the case of services, and consistent with the contractual commitments undertaken;
d) office products: on delivery of the goods.

Sale and lease-back operations

Capital gains realised on the sale of assets to leasing companies that are immediately leased back by entering into a finance leasing agreement are deferred in the Financial Statements and credited to the consolidated Income Statement in relation to the duration of the finance leasing agreement.

Dividends

Dividend income from subsidiaries are recorded in the financial period to which they accrue (and namely in the financial period in which the corresponding income is earned) and eliminated in the consolidation process. Deferred taxes are provided for against such dividends.
The relative tax credits that will arise at the time the dividends are collected, based on the accrual principle, are also credited to financial income in the financial period during which the said dividends accrue with a balance sheet contra-item "Prepaid taxes" under other receivables.
Dividend income from non-subsidiary companies and the related tax credits are recorded in the financial period in which the said dividends are declared, which generally coincides with the year of collection.

Memorandum accounts

Guarantees given - referring in the main to suretyships - are stated for an amount equal to the value of the securities granted, net of the relative counter-securities received.
Purchase and sale commitments reflect the contractual amounts at the close of the financial period not included in the normal "operating cycle" and for the portion not yet executed.

1039

Derivative instruments

Hedging instruments are assessed on a consistent basis with the assets and liabilities hedged and the relative financial flows are carried in the Income Statement on an accrual basis over the period of the said hedging instruments, with a contra-item under "Accruals, prepayment and deferrals" in the Balance Sheet under the heading assets or liabilities.
Non-hedging derivative instruments are assessed through a comparison of the instrument value at the time the contract was entered into and the year-end value thereof. Should capital losses emerge from this comparison, the said losses are charged to the Income Statement; vice versa, possible capital gains are not recorded since they are not realised.
Premiums collected (paid) against the purchase and sale of put and call options relating to listed shares held in portfolio are recorded as "other payables" or "receivables due from others". If the option is exercised, the premium collected (paid) represents an accessory component of the purchase cost or selling price of the underlying instruments. If the option is not exercised the premium collected (paid) is recorded in the Income Statement under financial income (financial charges). The purchase or sale commitment in respect of the sale of put and call options is reported in these Explanatory Notes under the section "Hedging instruments and other derivatives".

Departures pursuant to the 4th paragraph of art. 2423 of the Italian Civil Code

No departures pursuant to the 4th paragraph of art. 2423 of the Italian Civil Code have been made in the consolidated Financial Statements as at 31 December 2000.

Changes in the application of accounting principles

No changes to the accounting or valuation policies for the items of the Financial Statements have been adopted in fiscal 2000.

1040

Comments on consolidated assets

B) Fixed assets

I. Intangible fixed assets

Net intangible fixed assets as at 31 December 2000 amounted to Euro 39,640 million (Euro 28,044 million as at 31 December 1999).

(in millions of euro)	Net book value at 31.12.1999	Increases	Amortisations	Changes in consolidation area and other	Net book value at 31.12.2000
Start-up and expansion costs	74	47	(23)	(4)	94
Industrial patents and intellectual property rights	789	340	(757)	465	837
Concessions, licences, trademarks and similar rights	153	2,633	(47)	766	3,505
Goodwill	9		(5)	68	72
Assets in process of formation and advance payments	398	844		(402)	840
Other	446	245	(150)	113	654
Consolidation differences	26,175	9,146	(1,413)	(270)	33,638
Total	**28,044**	**13,255**	**(2,395)**	**736**	**39,640**

Start-up and expansion costs comprised costs relating to share capital increases during fiscal 1999 and fiscal 2000.

Industrial patents and intellectual property rights essentially relate to application software owned or licensed indefinitely and are principally attributable to the Telecom Italia Group.

Concessions, licences, trademarks and similar rights mainly comprise the acquisition cost of the UMTS licence by TIM equal to Euro 2,417 million, residual cost of the licences to operate the mobile telephony services and the residual value of the costs sustained by Telecom Italia for the launch and acquisition of satellite utilisation rights.

The item *Consolidation differences* (or goodwill arising on consolidation) as at 31 December 2000 is equal to Euro 33,638 million (Euro 26,175 million as at 31 December 1999) and included:

- Euro 23,619 million in respect of the acquisition of 52.12% of the ordinary share capital of Telecom Italia, net of amortisation of Euro 1,915 million.

In particular, the aggregate goodwill on consolidation was entered under intangible fixed assets for an original value of Euro 25,534 million (as justified by the stock market prices, by the availability of the majority of the voting rights and by the profitability expectations with implementation of the Industrial Business Plan based on the Public Tender Offer) to be amortised over a period of 20 years commencing from the second half of fiscal 1999;

- Euro 8,849 million in respect of acquisition of the equity investment in Seat P.G. and other foreign companies by the Telecom Italia Group.

1041

The item *Assets in process of formation and advance payments* equal to Euro 840 million refers to costs sustained by Telecom Italia for software development projects in progress.
The item *Other*, amounting to Euro 654 million, included:
a) Euro 269 million for leasehold improvements, of which Euro 261 million were attributable to the Telecom Italia Group;
b) Euro 54 million relating to bank fees and commissions in the framework of the Telecom Italia Public Tender Offer;
c) Euro 112 million relating to bond loan issuance expenses
The net increase for the intangible fixed assets during fiscal 2000, equal to Euro 11,596 million, was attributable to the following components:

(in millions of euro)	Year 2000
Consolidation goodwill on acquisition of SEAT P.G.	6,796
Consolidation goodwill on acquisition of no. 50 millions of TIM ordinary shares	618
Consolidation goodwill on acquisition of Maxitel and Digitel by TIM	695
Consolidation goodwill on acquisition of Jet Multimedia and Europe Explorer groups	713
Consolidation goodwill following the reorganization of international operations of mobile telephony	211
Cost of acquisition of PCS 1900 license in Peru	197
Cost of acquisition of UMTS license by TIM	2,417
Other investments	1,608
Total increases	13,255
Amortisation	
consolidation goodwill on Telecom Italia equity investment	(1,319)
other	(1,076)
Total amortisation	(2,395)
Effect of change in the consolidation area	1,358
Disposals, writedowns and other differences	(622)
Total net increase	**11,596**

1042

II. Tangible fixed assets

Net tangible fixed assets as at 31 December 2000 amounted to Euro 23,776 million (Euro 23,865 million as at 31 December 1999) and comprised:

(in millions of euro)	Gross value at 31.12.2000	Accumulated depreciation 31.12.2000	Net book value at 31.12.2000	Net book value at 31.12.1999	Changes
Land and buildings	4,802	1,594	3,208	5,331	(2,123)
Plant and machinery	56,894	38,724	18,170	16,576	1,594
Industrial and commercial equipment	1,126	1,034	92	145	(53)
Other assets	2,305	1,456	849	578	271
Assets under construction and advance payments	1,457	-	1,457	1,235	222
Total	**66,584**	**42,808**	**23,776**	**23,865**	**(89)**

Changes in net tangible fixed assets during fiscal 2000 were as follows:

(in millions of euro)	
Net book value as of 31 December 1999	**23,865**
New additions	3,976
Depreciation	(4,561)
Disposal of the "Great buildings" business	(2,392)
Changes in the consolidation area	3,264
Disposals and other changes	(376)
Net book value as of 31 December 2000	**23,776**

Additions totalled Euro 3,976 million, of which Euro 3,889 million were sustained by the Telecom Italia Group and Euro 87 million were sustained by other Group undertakings.
The changes in the consolidation area principally referred to the increase in the Nortel Inversora Group for Euro 2,611 million, to the Seat Pagine Gialle Group (Euro 176 million), to Maxitel (Euro 379 million) and Digitel (Euro 107 million), partly compensated by the exclusion of the Sirti Group (Euro 206 million), the Italtel Group (Euro 174 million) and the O.i.S. Group (Euro 3 million).
In particular, additions of the Telecom Italia Group comprised:

(in millions of euro)	Year 2000
Telecommunication services	3,808
IT activities and innovative network services	120
Manufacturing operations	18
Installation	14
Sundry operations and consolidation adjustments	(71)
Total	**3,889**

1043

Additions of the other Group undertakings, totalled Euro 87 million, were principally sustained by the Olivetti Tecnost Group in the framework of the new industrial initiatives.
Depreciation was provided for on the basis of rates deemed to reflect the remaining useful working life of the relative tangible fixed assets, which were as follows related to the period of utilisation as regards the acquisitions for the period:

Buildings	3-10%
Plant and machinery	3-40%
Industrial and commercial equipment	15-40%
Other assets	12-33%

III. Financial fixed assets

Financial fixed assets as at 31 December 2000 totalled Euro 9,386 million, compared with Euro 7,090 million as at 31 December 1999, and comprised:

(in millions of euro)	31.12.2000	31.12.1999	Changes
Equity investments	7,766	6,459	1,307
Financial receivables	78	29	49
Other receivables due from:			
associated companies	127	133	(6)
other companies	353	433	(80)
Other securities	669	34	635
Treasury stock	393	2	391
Total	**9,386**	**7,090**	**2,296**

Equity investments

(in milions of euro)	31.12.2000	31.12.1999	Changes
Equity investments in unconsolidated subsidiaries	26	127	(101)
Equity investments in associated companies	7,166	5,951	1,215
Equity investments in other companies	574	381	193
Total	**7,766**	**6,459**	**1,307**

1049

Equity investments in associated companies (Euro 7,166 million) comprised:

(in millions of euro)	Book value as of 31.12.2000	Book value as of 31.12.1999	Changes
Telekom Austria	1,819	1,997	(178)
GBL Serviços Interativos	809	-	809
Solpart Participaçoes	461	410	51
Mobilkom Austria	586	601	(15)
AUNA (ex Retevision)	509	439	70
Etec S.A.	538	489	49
Nortel Inversora (*)	-	496	(496)
Entel Chile	379	241	138
IS TIM	353	-	353
B.D.T.	172	170	2
Cecchi Gori Communications	118	-	118
IM.SER.	204	-	204
Netco Redes	135	-	135
Astrolink LLC	262	247	15
Eutelsat	216	-	216
Other	605	861	(256)
Total	**7,166**	**5,951**	**1,215**

(*) consolidated on a proportional basis as from year 2000.

The aggregate value of these equity investments included the residual amount to be amortised (Euro 2,915 million as at 31 December 2000 and Euro 2,487 million as at 31 December 1999) of the positive difference that emerged at the time of acquisition between the acquisition cost and the corresponding net equity portion of the investee companies. This difference mainly referred to:

(in millions of euro)	31.12.2000	31.12.1999
Telekom Austria	977	1,195
GBL Serviços Interativos	786	-
Mobilkom Austria	306	333
AUNA	280	258
Entel Chile	162	67
B.D.T.	133	145
Netco Redes	113	122
ETEC S.A.	112	117
Nortel Inversora	-	131
Other	46	119
Total	**2,915**	**2,487**

1045

Changes in equity investments for fiscal 2000 were as follows:

(in millions of euro)	
Net book value as of 31 December 1999	**6,459**
Acquisition of GBL Serviços Interativos	870
IS TIM formation	306
Writedowns	(847)
Amortisation of consolidation differences	(453)
Revaluations	276
Other changes, net	1,155
Net book value as of 31 December 2000	**7,766**

Other receivables

Other receivables classified under financial fixed assets (but not included in the net financial position) as at 31 December 2000 totalled Euro 480 million (of which Euro 111 million, short-term and Euro 369 million medium/long-term) and mainly included Euro 140 million for receivables, including the revaluation portion, arising from tax advance payments relating to employee severance indemnity (of which Euro 51 million short-term and Euro 89 million medium/long-term), Euro 127 million from associated companies mainly related to financing granted by the Telecom Italia Group to the Group's foreign equity investments and in particular to B.D.T. (Euro 102 million) and Golden Lines (Euro 12 million) and Euro 64 million in respect of loans granted to staff.
As at 31 December 1999 other receivables totalled Euro 566 million, of which Euro 100 million short-term and Euro 466 million medium/long-term.

Other securities

As at 31 December 2000 these assets totalled Euro 669 million (Euro 34 million as at 31 December 1999) and comprised:
- Euro 662 million regarding the purchase by Telecom Italia during fiscal 2000 of No. 104,978,070 own savings shares with a par value of Lire 1,000 each, equal to 1.41% of the share capital, deriving from the Public Tender Offer executed to implement the resolution approved by the ordinary Shareholders' Meeting held on 14 January 2000;
- Euro 6 million referring to other securities;
- Euro 1 million in respect of guarantee deposits.

Treasury shares held by the Parent Company and its subsidiary Olivetti International S.A.

As at 31 December 2000 Olivetti S.p.A. and Olivetti International S.A. held a total of No. 214,628,828 ordinary shares issued by the Parent Company recorded at a book value of Euro 393 million. In particular, the shares held by the Parent Company Olivetti S.p.A. (No. 2,697,500) were recorded at a book value of Euro 2 million and also derive from purchases made from the Company's and subsidiary companies' employees, following authorisation by the Shareholders' Meeting, whereas the shares held by Olivetti

1046

International S.A. (No. 211,931,328) were received in joint exchange with the shares of Tecnost S.p.A. following the merger of Tecnost into Olivetti and recorded overall at the original book value of the Tecnost shares, equal to Euro 391 million.
The Olivetti S.p.A. Shareholders' Meeting held on 4 October duly authorised the Board of Directors, pursuant to paragraph 1 of art. 2357-ter, to dispose of all the own shares as detailed above, within 31 December 2002, by assigning, in one or more tranches, purchase options reserved for former employees of the Parent Company and its subsidiary companies, still in active service within the Group.

C) Current assets

I. Inventories

Net inventories as at 31 December 2000 totalled to Euro 968 million (Euro 1,215 million as at 31 December 1999):

(in millions of euro)	31.12.2000	31.12.1999	Changes
Raw, ancillary and consumable materials	51	113	(62)
Work-in progress and semi-finished products	35	90	(55)
Total manufacturing inventories	86	203	(117)
Finished products and goods for resale:			
in respect of group core business	382	353	29
property for sale	20	2	18
	402	355	47
Contract work-in-progress	471	641	(170)
Advance payments	9	16	(7)
Total	**968**	**1,215**	**(247)**

Long-term contract work-in-progress was valued on the basis of payments due under contractual terms and conditions according to the percentage of completion method, on the basis of the work progress status.
Property for sale comprised both land and buildings already part of the real estate owned by the Olivetti Group, and of residential real estate the construction or restructuring of which as at 31 December 2000 had not yet been completed by the contractors; the said real estate, owned by Olivetti Multiservices S.p.A., up to 31 December 1999 had been carried under tangible fixed assets, whereas commencing from fiscal 2000 the same was entered under current assets as a result of the dimensions and significance assumed by the real estate operations undertaken by the said subsidiary company.
The net decrease of Euro 247 million is largely attributable to the change in the consolidation area of the Telecom Italia Group and in particular to the exclusion of the manufacturing and installation sectors.

1047

II. Receivables

Accounts receivable not carried as fixed assets as at 31 December 2000 totalled Euro 13,597 million (Euro 11,908 million as at 31 December 1999).

(in millions of euro)	31.12.2000	31.12.1999	Changes
Receivables due within 12 months	12,838	11,106	1,732
Receivables due after 12 months	759	802	(43)
Total	**13,597**	**11,908**	**1,689**

Receivables due within 12 months

(in millions of euro)	31.12.2000	31.12.1999	Changes
Financial receivables:			
Interest-bearing current account and loans			
- subsidiary companies	30	10	20
- associated companies	145	106	39
- third parties	957	56	901
	1.132	**172**	**960**
Non-financial receivables due from:			
- subsidiary companies	12	36	(24)
- associated companies	299	388	(89)
- trade customers	9.085	8.780	305
- others	3.197	2.494	703
	12.593	11.698	895
less: allowance for doubtful accounts	(887)	(764)	(123)
	11.706	**10.934**	**772**
Total	**12.838**	**11.106**	**1.732**

Trade receivables before the relative write-downs amounted to Euro 9,085 million and in the main referred to amounts due for telecommunications services provided and supplies of office products; the receivables included Euro 1,068 million in respect of amounts due from other telecommunications services providers.

The value of receivables was written down to the presumed realisable value by making appropriate allowances, largely concerning amounts due from telecommunications companies.

Trade receivables were ceded during fiscal 2000 through factoring operations totalling Euro 3,630 million, of which Euro 3,204 million related to TIM and Euro 207 million related to Telecom Italia (receivables due from dealers ceded without recourse within the agreed limits, with collection on the due date); receivables ceded not yet due as at 31 December 2000 amounted to Euro 294 million.

1049

The other non-financial short-term receivables, equal to Euro 3,197 million (Euro 2,494 million as at 31 December 1999), comprised:

(in millions of euro)	31.12.2000	31.12.1999	Changes
Subsidies and grants due from the State and other public bodies	39	58	(19)
Amounts collected from customers, currently being credited	187	275	(88)
Amounts due from tax authorities	863	662	201
Prepaid taxes	1,118	713	405
Amounts due from employees	79	76	3
Sundry amounts due (from the State and other public bodies and sundry items)	911	710	201
Total	**3,197**	**2,494**	**703**

Receivables relating to prepaid taxes (determined in compliance with the policies as laid down in Accounting Document No. 25 published by the Italian National Accounting Profession Commission) represent the tax benefit arising from prepaid taxes not offset against deferred taxes (determined on the basis of the temporary differences that will be reversed in fiscal 2001) and by accounting the benefit regarding the tax losses eligible to be carried forward and for which utilisation is reasonably certain in relation to the taxable income for fiscal 2001, and include Euro 523 million in respect of prepaid taxes (or tax assets) on dividends from Telecom Italia S.p.A. accounted as accruing in fiscal 2000.

Receivables due after 12 months

Receivables due after 12 months as at 31 December 2000 totalled Euro 759 million (Euro 802 million as at 31 December 1999) and included:

- Euro 691 million relating to prepaid taxes (Euro 756 million as at 31 December 1999), of which Euro 264 million arising from entry of the payable in the Olivetti consolidated Financial Statements only relating to the Telephone Companies Employee Social Security Fund - F.P.T. (accounted for by Telecom Italia Group on a cash basis) and Euro 427 million represented by the future benefit arising from tax losses brought forward in relation to taxable income in future financial periods as from 2002;
- Euro 68 million for other receivables, of which Euro 44 million from the tax authorities.

III. Financial assets not held as fixed assets

These assets as at 31 December 2000 amounted to Euro 3,649 million (Euro 1,951 million as at 31 December 1999).

(in millions of euro)	31.12.2000	31.12.1999	Changes
Equity investments in subsidiary companies	696	63	633
Equity investments in associated companies	6	-	6
Other equity investments	37	6	31
Securities	2,909	1,749	1,160
Receivables for securities held under reverse repurchase agreements	1	133	(132)
Total	**3,649**	**1,951**	**1,698**

1049

The equity investments in subsidiary companies, equal to Euro 696 million, referred to the value of listed shares intended to be subsequently sold and were referred to Euro 392 million in respect of shares in companies of the Telecom Italia Group (stock market prices for such shares were in line with the book value at year-end for fiscal 2000) and to Euro 304 million with regard to equity investments in Seat P.G. held by the other companies of the Group, in particular Olivetti S.p.A. (Euro 300 million).
Securities, amounting to Euro 2,909 million and mainly held by Group finance companies in connection with their operations, included Euro 2,020 million of Italian Government securities and bond securities held by the Telecom Italia Group. These securities increased by Euro 1,160 million during the financial period, of which Euro 755 million are attributable to the Telecom Italia Group.
Receivables for securities held under reverse repurchase agreement (Euro 1 million), which decreased by Euro 132 million compared with fiscal 1999, represent the value of securities, equal to the purchase cost, acquired under a commitment to resell the said securities at an agreed date and for a pre-established price. The income and expenses arising from these transactions, calculated by taking into account the difference between the spot and forward prices, are carried on an accrual basis under accrued income or expenses and classified as other financial income/charges.

IV. Liquid funds

As at 31 December 2000 liquid funds amounted to Euro 2,770 million (Euro 1,162 million as at 31 December 1999), of which Euro 1,304 related to the Telecom Italia Group, and largely comprised the cash held in bank current accounts. The increase of Euro 1,608 million was generated by the Telecom Italia Group for Euro 626 million (largely attributable to the effect of the changes in the consolidation area) and Olivetti S.p.A. for Euro 740 million.

1050

D) Accrued income and prepaid expenses

Accrued income and prepaid expenses as at 31 December 2000 amounted to Euro 1,573 million (Euro 290 million as at 31 December 1999).

(in millions of euro)	31.12.2000	31.12.1999	Changes
Accrued income:			
financial income	265	171	94
other	14	42	(28)
Total accrued income	279	213	66
Prepaid expenses:			
financial charges	404	8	396
other	866	40	826
Discounts on bond issues and other similar charges on loans	24	29	(5)
Total prepaid expenses and discounts	1,294	77	1,217
Total	**1,573**	**290**	**1,283**

Prepaid expenses regarding financial charges increased by Euro 396 million, largely due to the effect of the redemption premium on the 2000-2005 bond loan issued in fiscal 2000 by Olivetti Finance N.V. (formerly Tecnost International N.V.) and convertible into Telecom Italia shares, carried under financial payables as at 31 December 2000 and deferred for the portion not accruing to the financial period (Euro 325 million).

The other prepaid expenses amounted to Euro 826 million and included Euro 751 million regarding the premium paid relating to the put option deferment operation on the Seat P.G. shares already held by Huit II.

Comments on consolidated liabilities and shareholders' equity

A) Shareholders' equity

The Extraordinary Shareholders' Meeting of the Parent Company Olivetti S.p.A. held on 4 July 2000 approved the conversion of No. 15,221,888 preferred shares and No. 78,629,488 savings shares at par value and without cash adjustment into an equal number of ordinary shares, not before detachment of the relative dividend, with dividend entitlement on 1 January 2000. The relative resolution was passed on 6 July by the Special Meetings of the holders of savings shares and preferred shares, respectively. On 17 July the District Court of Ivrea duly approved the resolutions passed by the Meetings held on 4 and 6 July and consequently the Olivetti savings and preferred shares were deleted from the Stock Exchange listings on 24 July, corresponding to the due date for detachment of the dividend in compliance with the Stock Exchange calendar.
Approval was also given during the same Extraordinary Shareholders' Meeting to the free share capital increase by utilising unrestricted reserves, with the increase of unit par value from Lire 1,000 to Lire 1,936.27 (corresponding to Euro 1) of all the shares (both shares in circulation and shares that will be issued in the future by implementing the resolutions already approved with regard to conversion of bonds and the exercise of warrants), with the concurrent redenomination of the share capital in Euro.
Refer to the analogous section of the Explanatory Notes to the Financial Statements of the Parent Company for further details.

I. Share capital

As at 31 December 2000, the share capital of Olivetti S.p.A., fully subscribed, paid-up and filed with the Companies Register, was represented by No. 4,914,694,381 ordinary shares each with a par value of Euro 1 (No. 4,815,238,805 shares as at 31 December 1999, of which No. 4,721,387,429 ordinary shares, No. 15,221,888 preferred shares and No. 78,629,488 savings shares, with a par value of Lire 1,000 each) for an aggregate value of Euro 4,915 million compared with a value of Lire 4,815 billion as at 31 December 1999, equal to Euro 2,487 million, representing a net increase of Euro 2,428 million.
Refer to the analogous section of the Explanatory Notes to the Parent Company Financial Statements for further details.

Future potential changes in share capital

As at 31 December 2000 a total of No. 37,298,324 "Olivetti 1998-2002 floating-rate" bonds were still outstanding, net of:
- No. 360,695 bonds against which the relative conversion shares had already been issued at that date for which registration by the Companies Register had not yet been executed;
- No. 1,411,014 bonds for which conversion to ordinary shares had already been requested at that date, with the consequent decrease in the number of outstanding bonds representing payables to future shareholders; the corresponding shares were issued on 15 January 2001.

No. 37,298,324 ordinary shares for an aggregate value of Euro 37 million could still be issued in respect of the outstanding bonds.

1052

As at 31 December 2000 a total of No. 27,133,851 "Olivetti ordinary shares 1998-2002 warrants" were still outstanding, net of:
- No. 37,012 exercised warrants the relevant shares of which had already been issued but for which registration by the Companies Register was still pending;
- No. 26,127 exercised warrants the relevant shares of which were being issued at the close of the financial period (15 January 2001).
No. 27,133,851 ordinary shares at a price of Euro 1 each, for an aggregate value of Euro 27 million could still be issued in respect of the warrants.
As at 31 December 2000 No. 23,871,667 Olivetti 1999-2001 warrants freely assigned to Managers of the Parent Company and its subsidiary companies based on the scheme resolved by the Board of Directors on 9 June 1999 and supplemented with a subsequent resolution approved on 29 November 1999 had not yet been exercised, as described in the specific chapter of the stock option schemes reserved for employees.
No. 23,871,667 ordinary shares at the price of Lire 2,320 (Euro 1,198) each, of which Lire 1,320 (Euro 0.681) represents the additional paid-in capital, may consequently still be issued for an aggregate value of Euro 40 million: Euro 24 million represent the share capital increase, (and after utilising Euro 11 million of the especially established reserve for free share capital increases), and Euro 16 million represent the additional paid-in capital portion.
No. 137,364,550 "Olivetti ex-Tecnost 1999-2004 warrants" were still outstanding as at 31 December 2000; these warrants are valid for subscription to No. 153,848,296 Olivetti shares (therefore, in the ratio of 1.12 ordinary Olivetti shares for each warrant) at the base price of Euro 2.80, increased by 15% on an annual basis, for the period between 20 August 1999 and the execution date of the respective requests and therefore lying between 3.45 (equal to Lire 6,678) in the case of warrants exercised in January 2001 and Euro 5.35 (equal to Lire 10,359), following adjustment in respect of the share capital increase executed in 2001, in relation to the warrants that will be exercised in June 2004. Consequently, should all the warrants outstanding as at 31 December 2000 be exercised, the aggregate value of the share capital increase, including the additional paid-in capital, would vary from a minimum of Euro 474 million, on the basis of a warrant exercising unit price of Euro 3.45 (January 2001), to a maximum of Euro 735 million, on the basis of a warrant exercising unit price of Euro 5.35 (June 2004), to which Euro 118 million must be added deriving from the utilisation of free pre-established share capital increase reserves.
The Board of Directors' Meeting held on 24 February 2000 (as described in detail in the relative section of the Directors' Report) by availing of the powers ex art. 2443 of the Italian Civil Code assigned thereto by the Extraordinary Shareholders' Meeting held on 7 April 1999, had resolved a Three-year Stock Option Plan as from 1 January 2002 expiring on 31 December 2004, reserved for about one hundred managers on the Parent Company and its subsidiary companies, in order to assign No. 29,500,000 free warrants, which gave the right to subscribe to an equal number of Olivetti ordinary shares at the price of Euro 3,705 (Lire 7,174) each, corresponding to the normal value of ordinary Olivetti shares at the date the Board of Directors' Meeting was held. The warrant options could have been exercised in three layers over the period between 1 November and 15 December during 2002, 2003 and 2004 with the possibility of accumulation up to the end of the entire Plan.
Subsequently, the Board of Directors' Meeting held on 9 February 2001 resolved to revoke the resolutions adopted thereby in the Meeting held on 24 February 2000 and to increase the share capital by an aggre-

gate amount of Euro 29 million through the issuance of 29 million shares at a unit subscription price of Euro 2.81 each, reserved for the Managers of the Parent Company and its subsidiary companies and subject to servicing of subscription rights (warrants) to be assigned thereto in the framework of the Three-year Stock Option Plan "February 2002 – December 2004", notwithstanding the terms and conditions applied to assignee managers no longer employed by the Group.

Powers assigned to Directors

The Extraordinary Shareholders' Meeting held on 7 April 1999, pursuant to arts. 2443 and 2420-ter of the Italian Civil Code, for the period of five years from the date the resolution was approved, duly assigned the Directors the right to:

a) increase the share capital, in one or more layers, for a maximum par value amount of Lire 5 thousand billion, on a free and/or payment basis, with or without additional paid-in capital, through the issuance of ordinary shares and/or serviced with various rights, with the same characteristics as the shares outstanding, to be assigned or offered with pre-emptive rights, respectively to parties with entitlement thereto, giving the Directors the right to establish, case-by-case, the categories of the shares, the issue price thereof, the due date, the appropriation of share capital increase to service the conversion of bonds issued also by third parties, both in Italy and abroad, and/or warrants, as well as the right to appropriate the increase or the increases (within the time limits set forth in art. 134 of Legislative Decree No. 58/1998), also via options, warrants, or similar rights, to employees of the Company, its Parent Company and its subsidiary companies;

b) to issue bonds, in one or more layers, and/or bonds convertible into ordinary shares and/or serviced with various rights, with the same characteristics as the outstanding bonds, with or without warrants, also issued in foreign currency, to be offered with pre-emptive rights to parties with entitlement thereto, for a maximum amount of Lire 8 thousand billion, within the limits permitted under law, on a case-by-case basis, with the consequent share capital increase to service the conversion of bonds and/or exercise warrants, establishing the procedures, terms, conditions and the relative regulations thereof.

A partial implementation was executed by the Board of Directors' Meeting held on 7 April 1999 as regards the powers under sub a), in which the said Board resolved to increase the share capital intended to finance the Public Tender Offer promoted at that time on the ordinary shares of Telecom Italia, through subscription of the share capital increase resolved for this purpose by the subsidiary company Tecnost. This share capital increase was executed over the period 21 June 1999 – 7 July 1999 for a nominal amount equal to Lire 1,498 billion.

Also by way of implementing the powers cited under sub a), the Board of Directors implemented a number of resolutions with regard to stock option plans regarding an aggregate maximum of No. 77,500,000 shares; specifically on 9 June 1999, 29 November 1999 and 24 February 2000, as described in detail and set forth in art. 5 of the Company By-laws.

Subsequently, on 4 July 2000, the Extraordinary Shareholders' Meeting, in relation to the free share capital increase and the concurrent redenomination in Euro, made provision also to express in the aforesaid currency the amounts reported in the above-mentioned powers statements.

The Board of Directors' Meeting held on 18 December 2000, availing of the aforesaid powers and by way of implementing the effects thereof, resolved a right issue for a maximum of No. 357,184,480 Olivetti ordinary shares with an equal number of associated warrants and a maximum of No. 500,058,272 bonds, the

1054

characteristics of which are described in detail in the Directors' Report (then turned out No. 348,249,405 shares and No. 487,549,167 bonds on the basis of the share capital when the operation started).

Finally, as an integration and to complete the information regarding the share capital we would mention that the Shareholders' Meeting held on 12 May 1994 had empowered to Board of Directors to issue bonds, also convertible bonds, up to the maximum amount of Lire 2,000 billion, within the limits permitted under law, on a case-by-case basis, as well as shares up to a nominal maximum of Lire 1,000 billion. On 9 June 1994, by way of a partial exercise of the powers conferred by the Shareholders' Meeting, the Board of Directors' Meeting resolved to issue an Lire 500 billion floating-rate bond maturing in 2001 – fully subscribed and listed during 1994.

I.bis Share capital increase to be filed with the Register of Companies pursuant to art. 2444 of the Italian Civil Code

This heading, which includes the nominal value of the shares issued by the Parent Company in respect of share capital increases for which registration in the Companies Register had not yet been executed as at 31 December amounted to Euro 397,707 (Euro 11,323,083 as at 31 December 1999); this amount referred to:
- the share capital increase of Euro 360,695 (of which Euro 174,412 on a free basis by utilising a specially pre-established reserve) through the issuance of No. 360,695 ordinary shares following conversion of an equal number of "Olivetti 1998-2002 floating-rate bonds";
- share capital increase of Euro 37,012 (of which Euro 17,897 on a free basis) through the issuance of No. 37,012 ordinary shares following the exercise of an equal number of "ordinary Olivetti 1998-2002 shares warrants".

I. ter Share capital increase payment relating to shares to be issued

This heading pertaining to the Parent Company amounted to Euro 26,127 as at 31 December 2000 and included Euro 13,493 representing the amount paid (Lire 1,000 per share) by the holders of No. 26,127 "Olivetti ordinary shares 1998-2002 warrants" to exercise the said warrants in relation to which the corresponding shares had not yet been issued as at 31 December 2000 (15 January 2001), as well as Euro 12,634 tied to the exercise of the said warrants (by utilisation of the Parent Company's extraordinary reserve) to increase the unit par value of the shares to be issued to Euro 1 (equal to Lire 1,936.27 per share).

I. quater Shares in exchange with Tecnost shares

This heading pertaining to the Parent Company amounted to Euro 1,999 million as at 31 December 2000 and reflected the nominal value of No. 1,999,439,092 Olivetti shares reserved in joint exchange with shares owned by Tecnost minority shareholders, following the merger of the latter company by the Parent Company, which became effective from 31 December 2000.

II. Additional paid-in capital

This reserve pertaining to the Parent Company amounted to Euro 3,196 million as at 31 December 2000 compared with Euro 2,267 million as at 31 December 1999 representing a net increase of Euro 929 million to which the following components contributed:

1055

- share capital increase of Euro 14,342,318 in respect of No. 21,038,333 shares issued at the end of 1999 (at Lire 2,320 each) in favour of the managers of the Parent Company and its subsidiary companies (1999-2001 Stock Option Plan) for which the registration formalities at the Companies Register had not yet been completed as at 31 December 1999;
- share capital increase of Euro 481,752 in respect of No. 706,667 shares issued in 2000 (at Lire 2,320 each) in favour of the managers of the Parent Company and its subsidiary companies (1999-2001 Stock Option Plan);
- share capital increase of Euro 3,195,731,029 in respect of the partial re-establishment of the Tecnost additional paid-in capital reserve following the merger through utilisation of the Sundry reserves, retained earnings and accumulated losses in the consolidated Financial Statements;
- utilisation of Euro 2,281,562,043 in respect of a free share capital increase to implement the resolution approved by the Shareholders' Meeting held on 4 July 2000, increasing the par value of No. 4,897,704,838 shares, which comprised the share capital at that time, from Lire 1,000 to Lire 1,936.27 (and therefore Euro 1), as illustrated previously.

II. bis Additional paid-in capital in respect of share capital increases to be filed with the Register of Companies

This reserve pertaining to the Parent Company, which amounted to Euro 14 million as at 31 December 1999, was written off as at 31 December 2000 following registration in the Companies Register of the share capital increase referring to No. 21,038,333 shares issued in 1999 in favour of managers of the Parent Company and of its subsidiary companies (1999-2001 Stock Option Plan).

III. Revaluation reserve

This heading pertaining to the Parent Company which amounted to Euro 1 million as at 31 December 2000, is represented by the Revaluation Reserve previously carried in the books of Tecnost and re-established following the merger by utilising the Sundry reserves, retained earnings and accumulated losses in the consolidated Financial Statements.

IV. Legal reserve

This reserve pertaining to the Parent Company amounted to Euro 877 million as at 31 December 2000 and was established in 2000 in compliance with the following:
- Euro 141 million as appropriation of 5% of the profits for fiscal 1999;
- Euro 379 million as appropriation of part of the profits for fiscal 1999 to a supplementary legal reserve for the additional, conditioned and potential future share capital, resulting after 31 December 1999 up to a maximum aggregate amount of Euro 114 million, based on the theoretical assumption that after 31.12.1999 and within the respective due dates all the convertible bonds are converted and all the warrants issued are exercised, also with regard to the stock options in circulation at that date;
- Euro 357 million representing the re-establishment of the Tecnost legal reserve, following the merger, through utilisation of the Sundry reserves, retained earnings and accumulated losses in the consolidated Financial Statements.

1056

V. Reserve for treasury stock

This reserve pertaining to the Parent Company amounting to Euro 2 million reflected the value of No. 2,697,500 shares issued by the Parent Company held by the said Parent Company, carried in the Financial Statements in the relative heading under financial fixed assets, in compliance with the provisions of art. 2357-ter of the Italian Civil Code, and cannot be distributed while the own shares continue to be held.

VII. Other reserves

a) Other reserves of the Parent Company

These reserves pertaining to the Parent Company represented an aggregate amount of Euro 2,075 million as at 31 December 2000 and were entirely established in 2000.

1) Extraordinary reserve

This reserve, which amounted to Euro 1,888 million, comprised Euro 1,987 million from the portion of net profits of fiscal 1999 in compliance with the resolution approved by the Shareholders' Meeting held on 4 July 2000 and increased by Euro 55 million to re-establish the Tecnost extraordinary reserve following the merger, through utilisation in the consolidated Financial Statements of the Sundry reserves, retained earnings and accumulated losses, and was utilised for Euro 154 million, of which Euro 87 million represented the free share capital increase in relation to the increase in the unit par value of shares from the Lire 1,000 to Lire 1,936.27 (equal to Euro 1), and for Euro 67 million to establish reserves for the future conversions of bonds and the future exercising of warrants.

2) Restricted reserves tied to the conversion of bonds and to exercising Olivetti warrants

These restricted reserves were established in 2000 for an original aggregate amount of Euro 67 million following redenomination of the Olivetti share capital in Euro, as described previously.
As at 31 December 2000 these reserves amounted to Euro 59 million and comprised:
- Olivetti 1998-2002 floating-rate bonds conversion reserve, for a residual amount of Euro 19 million;
- Olivetti 1998-2002 shares warrant exercising reserve, for a residual amount of Euro 13 million;
- Olivetti 1999-2001 subscription right exercising reserve for warrants reserved for the managers of the Parent Company and its subsidiary companies, for a residual amount of Euro 13 million;
- Olivetti 2002-2004 subscription right exercising reserve for warrants reserved for the managers of the Parent Company and its subsidiary companies, for a residual amount of Euro 14 million.

3) Restricted reserve tied to exercising "Olivetti ex-Tecnost 1999-2004" warrants

This restricted reserve, equal to Euro 118 million is irrevocably restricted as tied to exercising the Tecnost 1999-2004 warrants (renamed the "Olivetti ex-Tecnost 1999-2004 warrant") and is established (by way of implementing the resolution approved by the Extraordinary Shareholders' Meeting of Tecnost S.p.A. held on 4 October 2000 following the redenomination of the share capital of Tecnost S.p.A. in Euro) for an amount of Euro 102 million (through utilisation of the share exchange reserve) since the unit amount of Lire 1,436.27 (equal to the difference between the unit counter-value of Euro 1, namely Lire 1,936.27, and the pre-existing par value of Lire 500 per share) will be transferred to share capital in the form of a

1057

free share capital increase at the time of the request to exercise the warrants. The reserve was subsequently integrated to Euro 118 million to take the joint exchange ratio of 1.12 Olivetti shares for each ex-Tecnost warrant into due account, following the merger of Tecnost into Olivetti S.p.A.

4) Non-taxable reserves

These reserves pertaining to the Parent Company and already posted in Tecnost accounts are equal to an aggregate amount of Euro 10 million and have been re-established following the merger of the said Tecnost through utilisation, in the consolidated Financial Statements, of Sundry reserves, retained earnings and accumulated losses.
The said reserves comprise reserves pertaining to contributions (research, technological innovation and investments) and referring to VAT deductions on investments.

b) Reserve for Parent Company shares held by subsidiary companies

This reserve was equal to the Euro 391 million as at 31 December 2000 and referred to No. 211,931,328 Olivetti shares held by the subsidiary company Olivetti International S.A., received in joint exchange with the Tecnost S.p.A. shares held following the merger of the latter company into Olivetti. This reserve in the consolidated Financial Statements was established through utilisation of the Sundry reserves, retained earnings and accumulated losses.

VIII. Sundry reserves, retained earnings and accumulated losses

This heading represented a positive amount of Euro 1,340 million as at 31 December 2000 (negative for Euro 171 million as at 31 December 1999) and includes the other reserves, retained earnings, accumulated losses, exchange rate differences generated by the translation of the Financial Statements expressed in foreign currency and the other items of the shareholders' equity pertaining to subsidiary companies not eliminated during the consolidation process.

Group shareholders' equity

The consolidated shareholders' equity pertaining to the Group as at 31 December 2000 was equal to Euro 13,856 million (Euro 9,549 million as at 31 December 1999).
The reconciliation table between the net consolidated results for the Group and the net results for the Parent Company for fiscal 2000 is shown below:

(in millions of euro)	Net result for the year
Net result shown in Olivetti S.p.A. statutory accounts as of 31 December 2000	**870**
Net result for the first nine months of the year 2000 recorded by Tecnost S.p.A., for the portion attributable to the Group	(588)
Elimination of dividend income from subsidiary companies	(891)
Amortization of consolidation goodwill on the acquisition of Telecom Italia shares	(1,051)
Results for consolidation purposes of subsidiary companies and other changes	720
Net result shown in the consolidated financial statements of the Olivetti Group as of 31 December 2000	**(940)**

1054

The reconciliation table between the Group consolidated shareholders' equity and the Parent Company shareholders' equity as at 31 December 2000 is shown below:

(in millions of euro)	Shareholders' equity
Shareholders' equity shown in Olivetti S.p.A. statutory accounts as of 31 December 2000	**13,937**
Decrease of the consolidation goodwill due to amortization and disposals	(2,166)
Elimination of dividend income from subsidiary companies, recorded as accrued	(891)
Lower carrying value of equity investments in subsidiary companies with respect to the pro-quota shareholders' equity, as adjusted for consolidation purposes, and other differences	2,976
Shareholders' equity shown in the consolidated financial statements of the Olivetti Group as of 31 December 2000	**13,856**

X. Minority interests

Minority interests as at 31 December 2000 and 1999 comprised:

(in millions of euro)	31.12.2000	31.12.1999	Changes
Reserves	15,569	14,705	864
Result of the year:			
before acquisition of Telecom Italia	-	911	(911)
after acquisition of Telecom Italia	1,941	1,145	796
Total	**17,510**	**16,761**	**749**

Total shareholders' equity

Total shareholders' equity as at 31 December 2000 and 1999 was equal to Euro 31,366 million and Euro 26,310 million, respectively, and comprised:

(in millions of euro)	31.12.2000	31.12.1999	Changes
Capital and reserves:			
Group	14,796	4,610	10,186
Minority interests	15,569	14,705	864
	30,365	19,315	11,050
Net result of the year:			
Group	(940)	4,939	(5,879)
Minority interests	1,941	2,056	(115)
	1,001	6,995	(5,994)
Total	**31,366**	**26,310**	**5,056**

1059

B) Reserves for risks and charges

Reserves for risks and charges as at 31 December 2000 and 1999 amounted to Euro 3,079 million and Euro 1,391 million, respectively, and were referred to:

1) Reserve for pensions and similar obligations

This reserve, which included liabilities accruing to the employees of a number of Group companies operating abroad, as at 31 December 2000 amounted to Euro 31 million, compared with Euro 56 million as at 31 December 1999.

2) Reserves for taxation

This heading included the reserve for taxation risks and the reserve for deferred taxes.

In particular, the reserve for taxation risks has been provided in relation to potential charges on tax items still unsettled or challenged and was equal to Euro 295 million as at 31 December 2000 (Euro 205 million as at 31 December 1999), of which Euro 159 million were referable to the Telecom Italia Group (Euro 160 million as at 31 December 1999) and Euro 135 million to Olivetti Finance N.V. (Euro 45 million as at 31 December 1999).
Refer to the Explanatory Notes to the Statutory Financial Statements of Olivetti S.p.A. as regards the tax position of the Parent Company
Deferred and prepaid taxes were calculated on the temporary differences emerging between the balance sheet values for tax purposes and the corresponding accounting values carried by the Financial Statements of Group companies as adjusted for consolidation purposes, as well as the consolidation adjustments, on the basis of the tax rates in force in the various countries.
Deferred and prepaid taxes are only compensated when this operation is permitted by tax regulations in force and in the framework of each financial period for which it is expected that the respective temporary differences will be reversed.
Consequently, liabilities arising from deferred taxes which are not compensated with prepaid taxes are included in the Reserve for deferred taxes, while prepaid taxes which are not compensated with deferred taxes are included in Receivables from others, under current assets.
The balance regarding deferred taxes and/or prepaid taxes as at 31 December 2000 was an asset for Euro 783 million, compared with an asset of Euro 1,317 million as at 31 December 1999, and comprised:

(in millions of euro)	31.12.2000	31.12.1999	Changes
Reserve for deferred taxes	1,026	153	873
Prepaid tax credit	(1,809)	(1,470)	(339)
Net tax liability (credit) balance	**(783)**	**(1,317)**	**534**

Receivables regarding prepaid taxes pertain to the Telecom Italia Group for Euro 996 million (Euro 485 million as at 31 December 1999).

1060

As at 31 December 2000, Olivetti Group companies had tax losses brought forward, not utilised to carry deferred tax asset, representing an aggregate amount of approximately Euro 4,000 million, of which approximately Euro 2,600 referred to the Telecom Italia Group, of which approximately Euro 1,300 million - according to prudent estimates made on the basis of information currently available - may be utilized with reasonable certainty against the taxable amounts during the financial periods in which the said losses shall be deductible in compliance with current taxation regulations; losses attributable to other companies of the Olivetti Group, equal to approximately Euro 1,400 million, may foreseeably be utilized in future financial periods for approximately Euro 1,000 million, mainly in respect of the Parent Company Olivetti S.p.A..

3) Other provisions

As at 31 December 2000, other provisions totalled Euro 1,727 million (Euro 977 million as at 31 December 1999) and comprised:
- Provisions for litigation amounting for Euro 228 million (Euro 153 million as at 31 December 1999), of which Euro 223 million were attributable to the Telecom Italia Group (Euro 149 million as at 31 December 1999);
- Provisions for restructuring charges for Euro 197 million (Euro 182 million as at 31 December 1999), of which Euro 164 million were referable to the Telecom Italia Group (Euro 147 million as at 31 December 1999) and Euro 26 million referable to Olivetti S.p.A. deriving from deferred Social Security charges as a result of reductions in the labour force pursuant to Law No. 223/1991;
- Provision for risks regarding technological upgrading for Euro 434 million, established by TIM in relation to risks generated by the evolution of the market and the technological scenario.
- Other sundry provisions for Euro 868 million (Euro 642 million as at 31 December 1999), comprising Euro 573 million attributable to the Telecom Italia Group (Euro 429 million as at 31 December 1999) and Euro 295 million attributable to other companies of the Olivetti Group, including Euro 175 million concerning charges related to commitments and possible future risks deriving from the sale of the equity investment in OliMan executed by Olivetti S.p.A.

C) Reserve for employee severance indemnities

This heading represents the indemnities to be paid at severance in compliance with the laws and labour contracts in force in the individual countries where the companies included in the consolidation area operate.
The change of the reserve during the fiscal 2000 was as follows:

(in millions of euro)	
Balance as of 31 December 1999	**1,577**
Reserve of the Seat P.G. Group	39
Effect of deconsolidation of Sirti and Italtel	(172)
Indemnity accrued	255
Indemnities paid in the year	(263)
Other changes, net	(48)
Balance as of 31 December 2000	**1,388**

1061

D) Payables

Payables as at 31 December 2000 totalled Euro 57,785 million (Euro 44,881 million as at 31 December 1999), of which Euro 44,411 million pertained to financial items (Euro 30,291 million as at 31 December 1999) and Euro 13,374 million pertained to trade and other payables (Euro 14,590 million as at 31 December 1999).

1062

The principle components of the Olivetti Group's indebtedness are commented below:

Telecom Italia Group

Bond loans amounted to Euro 1,814 million and referred to:
- bond loans falling due between 2001 and 2008 issued by the Nortel Inversora Group, totalling Euro 1,000 million;
- 1992/2010 Telecom Italia S.p.A. bond loan, reserved to currently employed and retired corporate staff for a counter-value of Euro 146 million (Euro 426 million as at 31 December 1999);
- bond loans falling due between 2001 and 2002 issued by Softe, through different financial institutes, totalling US $ 229 million, with a counter-value of Euro 246 million;
- bond loans issued by TDL Infomedia Ltd. (Seat Pagine Gialle Group), falling due after 2005, of Euro 202 million;
- bond loans falling due between 2002 and 2005 issued by the Brazilian companies Tele Nordeste Celular and Tele Celular Sul, totalling Euro 220 million.

Amounts due to banks of Euro 16,797 million, were secured by mortgages and liens of Euro 53 million; this item increased by Euro 8,648 million, compared with fiscal 1999, through the use of credit facilities by Telecom Italia S.p.A., to finance the acquisition of Seat Pagine Gialle shares from Huit II and by the Public Tender Offer (Euro 5,976 million). Furthermore, this item has increased as a result of the consolidation of payables pertaining to the new foreign companies, which include Telecom Argentina (Euro 817 million), Maxitel (Euro 780 million), Digitel (Euro 159 million), as well as the payables of the Seat Pagine Gialle Group (Euro 176 million).

Amounts due to other lenders equal to Euro 1,688 million mainly referred to medium/long-term financings granted to Telecom S.p.A. by the "Cassa Depositi e Prestiti" and by IRI for Euro 659 million and the effect deriving from the consolidation of Seat P.G. for Euro 966 million.

Amounts due to associated companies equal to Euro 662 million comprised Euro 554 million from payables to Teleleasing in respect of finance leasing contracts.

Other payables amounted to Euro 2,142 million and were essentially referable to guaranteed security loan operations of Euro 868 million executed by Telecom Italia and to Euro 351 million as regards the residual amount due to the Ministry for Communications regarding the purchase of the UMTS licence.

Other companies

Bond loans totalled Euro 16,248 million; the original rate is indicated for each of these loans and, separately, the possible "credit protection" measures defined as "step-up". All the hedging operations are analysed in the "Hedging instruments" section.

- Olivetti S.p.A. - Lire 500 billion, equal to Euro 258 million:
- bond loan (1994-2001) issued in Italian lire with a quarterly floating-rate coupon, plus a 0.75% spread, falling due in July 2001;
- Olivetti International N.V. - CHF 100 million equal to Euro 66 million:
- bond loan issued in Swiss francs (1986-2046) with a 5.625% fixed rate coupon falling due in June 2046;

1063

• Olivetti International N.V. – Euro 700 million:
– 1998-2003 bond loan with a 5.875% fixed-rate coupon + 0.15% "step-up", falling due in May 2003;
• Olivetti International N.V. – Euro 1,500 million:
– 1999-2009 bond loan with a 5% fixed-rate coupon + 0.15% "step-up", falling due in February 2009 ;
• Olivetti Finance N.V. – Euro 7.300 million:
– 1999-2004 bond loan with a floating-rate coupon equal to the 3-month Euribor + 1.85% spread + 0.45% "step-up", falling due in June 2004. The issuer has the right to an early repayment in June 2002. The initial loan of Euro 9,443 million was cancelled during 2000 for an amount equal to Euro 2,143 million following the repurchase on the market of No. 21.4 million bonds and the successive cancellation thereof;
• Tecnost International Finance N.V. – Euro 6,250 million
– two bond loans in the framework of the Euro Medium Term Notes Programme (EMTN), with the following characteristics:
* Euro 4,500 million (1999-2004) with a 5 3/8% fixed-rate coupon + 0.45% "step-up", falling due in July 2004;
* Euro 1,750 million (1999-2009) with a 6 1/8% fixed-rate coupon + 0.45% "step-up", falling due in July 2009;
• Tecnost International Finance N.V. – Yen 20 billion
– 1999-2029 bond loan falling due in October 2029, issued in the framework of the EMTN Programme and subscribed by a single Japanese investor; this loan, denominated in Yen (which is interest-bearing with a 5% fixed-rate coupon + 0.45% "step-up" in relation to a notional reference capital of US $ 185.6 million) was immediately converted into Euro 174 million (Currency swap);
Convertible bond loans totalled Euro 2,855 million and comprised:
• Olivetti S.p.A.: 1998-2002 bond loan for a residual Euro 19 million, convertible into Olivetti ordinary shares, falling due in September 2002 ;
• Olivetti Finance N.V.: 2000-2005 bond loan of Euro 2,500 million convertible into Telecom Italia ordinary shares, with a 1% annual fixed-rate coupon, with a redemption price of 113.41% on the issue price falling, due in November 2005. This loan, therefore, determined an aggregate payable equal to Euro 2,836 million. The performance at the due date was equal to 3.5% per annum and the nominal conversion price was approximately Euro 15.22 per Telecom Italia ordinary share.
Amounts payable to banks totalled Euro 1,855 million (Euro 1,667 million as at 31 December 1999). The principal components comprised:
• Olivetti S.p.A.:
– subsidised IMI financings for research activities, equal to Euro 1 million, average rate of 4.5% at 31 December 2000, refundable within 2001;
– IMI financings for research activities of Euro 97 million, pursuant to Law No. 346/1988, average rate as at 31 December 2000 of 12.528% before the interest-relief grant, reimbursable within 2004 (of which Euro 24 million fall due within 31.12.2001);
– other financings, equal to Euro 520 million, at the average rate of 5.574% at 31.12.2000, reimbursable within 2002 (of which Euro 455 million fall due within 31.12.2001);
– financing for Euro 1,000 million referred to the utilisation of a short-term line of credit for an original amount of Euro 1,000 million, granted by Mediobanca and syndicated among a limited group of Italian

1064

banking institutes; this line of credit is not secured by guarantees on assets but is subject to financial covenants customary for similar operations;
- other short-term payables equal to Euro 17 million.
• Olivetti Tecnost Group:
- financings equal to Euro 215 million (of which Euro 31 million falling due within 31.12.2001);
- other short-term payables equal to Euro 3 million.
• Other short-term payables of Euro 2 million relative to other companies.

Amounts due to other lenders totalled Euro 78 million and comprised:
• Olivetti S.p.A.: subsidised financings pertaining to technological innovation (FIT) for Euro 24 million (of which Euro 6 million falling due within 31.12.2001), average rate of 4.002% at 31.12.2000, refundable within 2004;
• Other companies:
- various financings totalling Euro 36 million (of which Euro 3 million falling due within 31.12.2001);
- Short-term payables to other institutions for Euro 18 million.

* * *

Financial payables equal to Euro 44,411 million may be analysed by currency:

(in millions of euro)	31.12.2000	31.12.1999
Italian Lire	17,914	8,630
Other EMU currencies	20,617	19,070

Total	**11,869**	**1,505**	**13,374**	**13,134**	**1,456**	**14,590**

Amounts due to suppliers totalled Euro 6,811 million and included Euro 520 million due to other operators of telecommunications services (principally Omnitel and foreign operators). The increase of Euro 516 million was mainly attributable to the effect of the variation in the consolidation basis.

Amounts due to tax authorities totalled Euro 962 million (Euro 1,936 million as at 31 December 1999) and included current income taxes and withholding taxes to be paid.

In particular, payables in respect of current taxes cover current liabilities relating to income taxes and estimated by Group companies on the basis of reasonable forecasts concerning accruing tax charges pursuant to the regulations and rates in force locally; payables in respect of other taxes as at 31 December 2000 mainly include withholding taxes held by Group companies in their capacity as withholding agents.

1067

The aggregate decrease of Euro 974 million comprised Euro 711 million relating to the cancellation of the payable pertaining to current taxes for the Parent Company following the decision taken at the time of the tax return to divide into instalments the capital gain tax on the sale of the equity investment in Oli-Man Holding B.V. (executed in 1999) and to provide for consequently the deferred tax liability.
The tax position of Olivetti S.p.A. is illustrated in the Explanatory Notes to the Statutory Financial Statements.
Amounts due to Social Security authorities equal to Euro 1,659 million, referred to the contributions accrued and still to be paid to Social Security authorities; the item included Euro 711 million as regards the residual indebtedness of Telecom Italia in relation to Italian Social Security Board (INPS) in connection with the estimated reabsorption charges ex-Law No. 58/1992 in respect of ex-ASST staff.
The amount also includes the payable referred to the former Telephone Workers Social Security Fund (FPT) for the employees of the Telecom Italia Group, joined on 1 January 2000 in the General Compulsory Insurance Scheme, equal to Euro 714 million, carried in the Olivetti Consolidated Financial Statements when determining the consolidation goodwill regarding the acquisition of the Telecom Italia Group.
Other payables equal to Euro 2,978 million comprised:
- Euro 1,684 million for items related to customers, concerning payments made by subscribers pertaining to conversations, prepaid rentals and traffic prepaid charges;
- Euro 58 million as regards payables for contributions to exercise the telecommunications business;
- Euro 819 million regarding payable items associated with staff management;
- Euro 162 million concerning residual payables concerning investments in equity investments;
- Euro 255 million relating to other items of a miscellaneous and recurring nature.

* * *

Payables falling due after 12 months, excluding the amount concerning the Telephone Workers Social Security Fund (FPT) totalling Euro 714 million, were equal to Euro 28,276 million; the relative distribution by due date was as follows:

(in millions of euro)	from 2 to 5 years	after 5 years	Total
Debt			
Telecom Italia Group	6,540	1,728	8,268
Other companies	15,690	3,527	19,217

E) Accrued expenses and deferred income

Accrued expenses and deferred income as at 31 December 2000 totalled Euro 1,742 million (Euro 1,367 million as at 31 December 1999):

(in millions of euro)	31.12.2000	31.12.1999	Changes
Accrued expenses:			
Interest charges	664	543	121
Other	81	68	13
Total	**745**	**611**	**134**
Deferred income:			
Grants related to assets	425	475	(50)
Other	561	281	280
Interest income	11	–	11
Total	**997**	**756**	**241**
Total accrued expenses and deferred income	**1,742**	**1,367**	**375**

The increase of Euro 375 million is attributable to the Telecom Italia Group to the extent of Euro 327 million.

Hedging instruments and other derivatives

The Olivetti Group enters into forward contracts to hedge exchange risks associated with exchange rate fluctuations among the various foreign currencies in which the commercial and financial transactions undertaken by Group companies are expressed.
As at 31 December 2000 the companies of the Olivetti Group had undertaken forward contracts and option instruments with regard to commitments for the purchase and sale of foreign currencies at fixed exchange rates for the equivalent of Euro 985 million, largely in reference to:
- hedging contracts on financial transactions arranged by Olivetti International S.A. for Euro 501 million;
- hedging contracts on exchange rate risks on short-term financial payables denominated in US dollars undertaken by TIM to purchase foreign equity investments in Turkey and Venezuela for Euro 469 million;
- hedging contracts on commercial transactions relating to the exposures in Greek drachma of Stet Hellas for Euro 15 million.

The Olivetti Group enters into Interest Rate Swap (IRS), Currency and Interest Rate Swap (CIRS) contracts and other hedging agreements to mitigate the possible effects deriving from interest rate fluctuations. As at 31 December 2000 Group undertakings had opened short-and long-term forward contracts covering financial liabilities recorded in the Financial Statements, based on a total capital notional amount equal to a counter-value of Euro 19,785 million (of which Euro 4,893 million related to companies of the Telecom Italia Group), as detailed below:

(in millions of euro)	31.12.2000
Telecom Italia Group:	
IRS and CIRS contracts carried out by Telecom Italia S.p.A. on BEI medium/long-term loans denominated in British pounds	390
IRS contracts carried out on debt of Telecom Italia S.p.A. expiring between 2001 and 2006	1,695
IRS and CIRS contracts carried out by Telecom Argentina on loans denominated in various currencies expiring until 2015	734
IRS and other interest rate hedging contracts carried out by Seat on own debt relating to securitization	1,000
IRS contracts in US dollars on debt of Telecom Argentina expiring until 2003	212
Various hedging contracts on short-term debt of Softe	656
IRS contracts in US dollars on debt of Softe expiring in 2001	108

Telecom Italia Group

As regards the Telecom Italia Group, the main hedging agreements entered into as at 31 December 2000 are analysed below:

- IRS and CIRS operations arranged in respect of BEI financings denominated in GBP by which the GBP floating-rate was converted into a fixed rate and a Euro floating-rate, for Euro 390 million;
- the following IRS operations were executed for an amount of Euro 1,695 million in respect of medium/long-term financial payables by companies of the Telecom Italia Group at a floating-rate with due dates lying between 2001 and 2006, by which:

1) the floating-rate was partially converted into a fixed rate;

2) the floating-rate index-linked to "domestic parameters" (Rendint, Rendibot, Nolint) was partially converted into a 6-month Euribor floating-rate;

- IRS and CIRS operations arranged by Telecom Argentina in respect of financing in various currencies converted into US dollars at a fixed and floating-rate with due dates up to 2015, for Euro 734 million;

1070

• IRS and other hedging operations (cap contract sale) arranged by Seat in reference to financial payables originating from securitisation executed directly by Seat, with the partial conversion at a fixed rate, for Euro 1,000 million;
• IRS operations executed by Telecom Argentina to convert financings denominated in US dollars from floating-rate into fixed rate with a due date up to 2003, for Euro 212 million;
• various IRS, CIRS and similar operations executed by Softe in respect of exposures deriving from short-term inter-company financings denominated in various foreign currencies, for Euro 656 million;
• IRS operations executed by Softe in respect of short-term floating-rate financings denominated in US dollars with partial conversion into fixed rate, for Euro 108 million;
• IRS and CIRS operations transacted in respect of short-term financial payables denominated in USA dollars by which the floating-rate denominated in dollars was converted into a floating rate and a fixed rate denominated in local currency (Brazilian real), for Euro 98 million.

Other companies

The relative hedging operations are analysed below as regards the medium/long-term financial payables relating to other companies of the Olivetti Group.
With regard to the 100 million Swiss francs (equal to Euro 66 million) 1986/2046 fixed rate bond loan issued by Olivetti International N.V., an interest rate swap contract has been transacted by Olivetti Intl. S.A. for the full amount and expiring in June 2036 with conversion of the fixed rate into an annual floating-rate denominated in Swiss francs.
With regard to the Euro 1,500 million 1999/2009 fixed rate bond loan expiring in February 2009 issued by Olivetti Intl. N.V., the following hedging contracts were entered into by Olivetti Intl. S.A. maturing in February 2009 totalling Euro 1,000 million:
• interest rate swap operations for Euro 500 million with conversion of the fixed rate into a six-monthly floating-rate with sale of floor contracts at the average rate of 4.15% – the floor is only activated if, during the six-month reference period, the 6-month Euribor increases from 2.20% up to 3.75% – this latter value during the last 5 years;
• interest rate swap operations for Euro 500 million with conversion of the annual fixed rate into a 3-month fixed rate of 4.30% should the 3-month Euribor remain below 5.80%, or into a 3-month floating-rate less 0.50%;
• sale of cap contract operation for Euro 500 million at the rate of 6.50%.
With regard to the Euro 700 million 1998/2003 fixed rate bond loan issued by Olivetti Intl. N.V., interest rate swap operations were transacted by Olivetti Intl. S.A. for the same amount and duration to convert the fixed-rate into a six-monthly floating-rate.
With regard to the Lire 500 billion (equal to the Euro 258 million) 1994/2001 floating-rate bond loan issued by Olivetti S.p.A., interest rate swap contracts have been arranged for the entire amount and with the same maturity date by which the floating-rate was converted into a fixed rate.
With regard to the yen 20 billion 1999/2029 fixed rate bond loan expiring in October 2029 issued by Tecnost Intl. Finance N.V., an interest rate and currency swap contract was transacted by Olivetti Finance N.V. for the entire amount and the same maturity date with conversion into a six-monthly fixed rate denominated in Euro.
With regard to the Euro 1,750 million 1999/2009 fixed-rate bond loan issued by Tecnost Intl. Finance N.V., interest rate swap contracts have been transacted by Olivetti Finance N.V. for equal an amount and

1071

with the same maturity date by which the fixed rate was converted into a floating-rate with the following additional hedging arrangements:
- purchase of cap contract at the rate of 4.75% (which is converted to a rate of 7% should the 12-month Euribor exceed this threshold during the reference period), for Euro 1,000 million;
- purchase of cap contract at the rate of 5.85% and sale of cap contract at the rate of 7.95%, for Euro 750 million;
- sale of floor contract at rates increasing from 2.65% up to 2.85% for Euro 750 million.

With regard to the Euro 4,500 million 1999/2004 fixed-rate bond loan issued by Tecnost Intl. Finance N.V. interest rate swap contracts have been transacted by Olivetti Finance N.V. for Euro 3,000 million for the same maturity date by which the fixed rate was converted into a floating-rate with the following additional hedging arrangements:
- purchase of cap contract at the rate of 4.25% and sale of cap contract at the rate of 5.45% for Euro 1,000 million;
- purchase of cap contract at the rate of 4.95% and sale of cap contract at the rate of 6.85%, for Euro 1,000 million;
- sale of floor contract at rates increasing from 2.65% up to 2.85% for Euro 1,000 million.

With regard to the Euro 7,300 million 1999/2004 floating-rate bond loan issued by Olivetti Finance N.V., index-linked to the 3-month Euribor, the following hedging contracts have been transacted by Olivetti Finance N.V. expiring in June 2002, totalling Euro 7,944 million:
- interest rate swap contracts for Euro 1,944 million by which the reference floating-rate for the loan (3-month Euribor) was converted into an annual average fixed-rate of 3.48% and subsequent sale of cap contracts at the rate of 5.50%;
- interest rate swap contract for Euro 1,000 million by which the 3-month Euribor, reduced by a spread of 0.574%, is paid and the 3-month Euribor is collected;
- interest rate swap contract for Euro 5,000 million by which the quarterly loan floating-rate was converted into a six-monthly floating-rate with a further zero-cost collar structure with the following components:
  - purchase of cap contracts at the rate of 3.86% and sale of cap contracts at the rate of 5.47% for Euro 5,000 million;
  - sale of floor contracts at the rate of 2.74% for Euro 2,000 million;
  - sale of floor contracts at rates increasing from 3.15% to 3.38% for the last year for Euro 2,000 million.

* * *

Furthermore, the following operations were executed to hedge securities or other assets held in portfolio totalling Euro 429 million:
- IRS and CIRS operations by Softe in respect of securities held in portfolio for Euro 272 million.
- IRS operations by Olivetti Finance N.V. in respect of securities held in portfolio for a face value of Euro 120 million;
- IRS and CIRS operations by Olivetti S.p.A. for a counter-value of Euro 37 million to hedge the exposure in dollars arising from a restricted deposit denominated in US dollars arising in connection with the sale of Olsy S.p.A. to Wang Lab. Inc. (currently named Getronics).

1072

Memorandum accounts

A. Personal guarantees given and counter-securities received

As at 31 December 2000 guarantees given, also indirectly through banks and insurance companies, totalled Euro 3,932 million (Euro 1,884 million as al 31 December 1999), of which Euro 2,956 million in respect of unconsolidated subsidiary and associated companies (Euro 1,029 million as at 31 December 1999).
As at 31 December 2000, the breakdown of personal guarantees given were as follows:

- guarantees given by the Telecom Italia Group on behalf of unconsolidated subsidiaries and associated companies (Euro 2,944 million), on behalf of consolidated subsidiary companies (Euro 20 million) and of third parties (Euro 527 million) in respect of medium/long-term financial transactions, for supply contracts and as guarantees on foreign telephone licences, for a total of Euro 3,491 million;
- suretyships and counter-securities given by other companies of the Olivetti Group on behalf of unconsolidated subsidiaries and associated companies (Euro 13 million), of consolidated subsidiaries (Euro 14 million) and of third parties (Euro 49 million), for a total of Euro 76 million;
- Euro 240 million for guarantees given by Olivetti S.p.A. on behalf of Infostrada S.p.A. to the Italian State Railways;
- Euro 84 million for guarantees given by Olivetti S.p.A. to Mannesmann AG in relation to the disposal of the equity investment in OliMan Holding B.V.;
- Euro 15 million for guarantees given by Olivetti S.p.A. to guarantee the fulfilment of commercial supply contracts by Getronics S.p.A. (formally Wang Global S.p.A.);
- Euro 26 million in respect of other guarantees.

As at 31 December 2000 the Olivetti Group received counter-securities in relation to the above guarantees totalling Euro 826 million (Euro 674 million as al 31 December 1999), mainly comprising:

- counter-securities from third parties totalling Euro 560 million against guarantees given by Telecom Italia S.p.A.;
- counter-securities received from Mannesmann AG equal to Euro 240 million against guarantees given by Olivetti S.p.A. to the Italian State Railways;
- counter-securities received from Getronics for Euro 17 million.

B. Guarantees on Group companies' assets

These guarantees, as at 31 December 2000, referred to pledges and mortgages set up on assets of companies included in the consolidation area for the Telecom Italia Group in respect of non-financial operations for an amount of Euro 2 million.
Guarantees securing financial operations are analysed in the section referring to financial payables.

C. Commitments

As at 31 December 2000 the commitments contractually undertaken by the Olivetti Group totalled Euro 5,001 million (Euro 84 million as at 31 December 1999), of which Euro 4,901 million referred to the Telecom Italia Group and Euro 100 referred to the other companies.

1023

The breakdown of the commitments undertaken by the Telecom Italia Group totalled Euro 4,901 million (Euro 12 million as at 31 December 1999) comprised:

- Euro 2,985 million for put options on Seat Pagine Gialle shares by Telecom Italia S.p.A.;
- Euro 959 million for the acquisition commitment of 28.61% of Entel Chile by STET International Netherlands;
- Euro 700 million for the acquisition commitment of 40% of Webfin by Seat Pagine Gialle;
- Euro 31 million for the commitment to pay membership fees for the "Interaction Design Institute" association of Ivrea;
- Euro 25 million for the sale commitment of call options on listed securities by Telecom Italia S.p.A.;
- Euro 25 million for lease rentals;
- Euro 176 million for other commitments.

In the framework of the contract entered into on 15 March 2000 (as subsequently amended), Telecom Italia undertook a commitment towards Huit II by granting a put option in respect of No. 710,777,200 Seat Pagine Gialle shares at a "strike price" of Euro 4.2. The terms of the contracts established exercising the said option subsequent to registration in the Companies Register of the merger deed between Seat and Tin.it.
Huit II subsequently transferred the put option to Chase Equity Limited (CEL), together with the ownership of the corresponding Seat shares. CEL renegotiated the contract with Telecom Italia on 4 December 2000, extending the contract duration to 5 years, with the possibility of anticipating exercising the put option in April and May 2003, 2004 and 2005.
Stet International Netherlands then purchased a call option on No. 660,777,200 Seat shares from CEL, through trust Liberator Ltd., with a maturity date in line with the expiry dates of the put option and at the same strike price, paying a premium which totalled Euro 747 million. Moreover, in order to transfer the effects of this latter operation to Telecom Italia, a call option contract was arranged, with the same characteristics, between the said Telecom Italia and Stet International Netherlands. The operation involved an implicit interest rate of 6.2%.
The commitments undertaken by the other companies of the Olivetti Group totalled Euro 100 million (Euro 72 million as at 31 December 1999) and comprised:

- Euro 45 million for lease rentals;
- Euro 34 million for trade receivables guaranteed by Olivetti S.p.A. in respect of the sale of the O.i.S. group to GFI Informatique S.A.;
- Euro 15 million for obligations to repurchase a building in relation to the sale of the equity investment in Olivetti Ricerca S.p.A. to Getronics Solutions Italia S.p.A.;
- Euro 6 million for other commitments.

D. Other memorandum accounts

As at 31 December 2000 the other memorandum accounts totalled Euro 266 million (Euro 586 million as at 31 December 1999) and were referable to assets owned by third parties on deposit with Group undertakings.

Other information

As at 31 December 2000 third party assets deposited with the Olivetti Group had a counter-value (stock market prices) of Euro 216 million comprising securities (deposited by the employees of Telecom Italia S.p.A. and the employees of other Italian companies of the Telecom Italia Group) in sub-deposit with Monte Titoli S.p.A.

1074

Comments on the consolidated Income Statement

The Consolidated Income Statement of the Olivetti Group for fiscal 2000 is not comparable with the Consolidated Income Statement for fiscal 1999 since the income components for the Nortel Inversora Group have been fully consolidated for the first time (the Nortel Inversora Group was included in the consolidation area starting from this financial period) while the income components of the companies that have been sold during the financial period have been excluded, these mainly comprised O.i.S., Olivetti Sanità and Teleleasing.

A) Value of production

1) Net revenues from sales and services

In fiscal 2000 revenues from product sales and the supply of services totalled Euro 30,116 million compared with Euro 28,207 million in fiscal 1999 representing a net increase of Euro 1,909 million, which were largely reflected by the increase generated by the Nortel Inversora Group (Euro 1,825 million) and a decrease as a result of the sale of the manufacturing and installation sectors.
The breakdown for the sector is as follows:

(in millions of euro)	Year 2000	%	Year 1999	%	Changes
Wirelines telecommunications in Italy	17,416	57.8	18,518	65.7	(1,102)
Mobile telecommunications in Italy	7,929	26.3	7,450	26.4	479
Satellite telecommunications	340	1.1	320	1.1	20
International telecommunications	3,933	13.1	1,680	6.0	2,253
IT operations	2,770	9.2	2,660	9.4	110
Manufacturing operations	631	2.1	917	3.3	(286)
Installation operations	602	2.0	775	2.7	(173)
Other operations and consolidation adjustments	(3,505)	(11.6)	(4,113)	(14.6)	608
Total	**30,116**	**100.0**	**28,207**	**100.0**	**1,909**

4) Capitalised production

Capitalised production amounted to Euro 912 million, entirely attributable to the Telecom Italia Group.

5) Other revenues and income

The other revenues and income for fiscal 2000 amounted to Euro 483 million (Euro 569 million in 1999) and comprised:
- Euro 21 million in grants pertaining to the period in respect of costs incurred for research activities, development and technological innovation;
- Euro 72 million in grants related to assets representing the portion credited to income since accrued in the period, entirely attributable to the Telecom Italia Group;
- Euro 110 million for indemnities charged to customers following delayed bill payments;
- Euro 280 million for other income from ordinary operations, mainly comprising various indemnities and refunds, to recover expenses as well as sundry income.

1075

B) Costs of production

6) Purchases of raw, ancillary and consumable materials and goods for resale

In fiscal 2000 this heading totalled Euro 3,058 million (of which Euro 2,258 million were attributable to the Telecom Italia Group) compared with Euro 3,111 million in fiscal 1999 (Euro 2,476 million attributable to the Telecom Italia Group) and included the cost for the supply of materials relating to the Group's core businesses.

7) Costs for services

These costs amounted to Euro 8,623 million in fiscal 2000 compared with Euro 7,584 million in fiscal 1999. The increase of Euro 1,039 million, of which Euro 1,013 million were attributable to the Telecom Italia Group, arose as a result of the increase in costs incurred by TIM correlated to the operation and the development of mobile telecommunications services (Euro 172 million), besides the consolidation of the Nortel Inversora Group (Euro 466 million).

8) Leases and rentals

This heading includes the rentals for buildings and other lease and hire charges relating to assets. In fiscal 2000, these costs totalled Euro 827 million, compared with Euro 739 million in fiscal 1999.

9) Personnel

In fiscal 2000, staff costs totalled Euro 5,245 million (Euro 5,260 million in fiscal 1999) and comprised Euro 5,024 million for the Telecom Italia Group, of which Euro 4,022 million referred to the undertakings engaged in telecommunications services.
In fiscal 2000, the aggregate average number of staff employed by the Olivetti Group was 131,266 equivalent units, of which 7,272 equivalent units referred to companies consolidated on a proportional basis. In fiscal 1999, the average number was 128,603 equivalent units of which 6,508 equivalent units referred to companies consolidated on a proportional basis.
As regards the geographical distribution, in fiscal 2000 the average number of staff was 108,306 employed in Italy (114,574 in fiscal 1999) and 22,960 staff employed abroad (14,029 in fiscal 1999).
The breakdown by category, as far as the number of staff employed in Italy is concerned (classification of the staff employed abroad is not consistent with the classification criteria adopted in Italy), is summarised in the following table:

(in equivalent units)	Year 2000	Year 1999
ITALY		
Managers	2,337	2,470
Supervisors	8,588	9,501
White collars	79,887	83,380
Blue collars	17,494	19,223
Total average in Italy	**108,306**	**114,574**
Total average abroad	**22,960**	**14,029**

107

10) Amortisation, depreciation and write-downs

Depreciation and amortisation charges in fiscal 2000 totalled Euro 6,956 million and included Euro 4,561 million referred of tangible fixed assets and Euro 2,395 million referred of intangible fixed assets.
In fiscal 1999, depreciation and amortisation charges totalled Euro 6,018 million, of which Euro 4,393 million referred to tangible fixed assets and Euro 1,625 million referred to intangible fixed assets.
Amortisation of intangible assets (Euro 2,395 million) in particular included Euro 1,319 million in respect of consolidation goodwill arising from the acquisition of Telecom Italia (Euro 638 million in fiscal 1999) and Euro 1,022 million referred to amortisation provided for by the Telecom Italia Group.
The aggregate net increase in depreciation referred to tangible fixed assets of Euro 168 million is attributable to the inclusion of the Nortel Inversora Group in the consolidation area, partly compensated by the decreased depreciation of Telecom Italia S.p.A. (in particular arising from the decrease in assets and a review of the depreciation rates of the underwater network implemented in fiscal 2000).
Write-downs implemented in fiscal 2000 totalled Euro 543 million and included Euro 48 million relating to fixed assets and Euro 495 million in respect of receivables carried as current assets. In fiscal 1999 write-downs had totalled Euro 504 million.

12-13) Provisions for risks and Other provisions

In fiscal 2000, provisions for risks and the Other provisions totalled Euro 319 million (Euro 334 million in fiscal 1999) and comprised:

- Euro 158 million referring to provisions for contractual risks and risks relating to legal disputes involving the Telecom Italia Group
- Euro 98 million for charges arising from finance operations undertaken by Olivetti Finance N.V.

14) Other operational charges

These charges totalled Euro 930 million (Euro 1,057 million in fiscal 1999) and comprised:

(in millions of euro)	Year 2000	Year 1999	Changes
Duties for telecommunications activities	572	606	(34)
Loss on disposal of intangible and tangible fixed assets	52	124	(72)
Taxes other than on income and duties accrued in the year, including ICI (local tax on real estate)	145	152	(7)
Other charges	161	175	(14)
Total	**930**	**1.057**	**(127)**

1077

C) Financial income and charges

15) Income from equity investments

Income from equity investments totalled Euro 917 million (Euro 921 million in fiscal 1999) and comprised:

(in millions of euro)	Year 2000	Year 1999	Changes
Dividends and tax credits	686	835	(149)
Other income from equity investments	231	86	145
Total	**917**	**921**	**(4)**

Dividends received from companies in which an interest is held and the tax credits referred for Euro 141 million to the Telecom Italia Group and for Euro 545 million to other companies of the Olivetti Group (of which Euro 542 million referred to Olivetti S.p.A.).

We would mention that dividend income from subsidiary companies, as from the Financial Statements closed at 31 December 1999, are accounted in the financial period in which they accrue (and namely in the financial period in which the respective profits arise) and eliminated in the consolidation process; in addition, the relative tax credits, that will fall due at the time the dividends are collected, in compliance with the accrual criteria, are accounted under financial income for the financial period of accruing (Euro 524 million in fiscal 2000).

The other income from equity investments totalled Euro 231 million and comprised capital gains achieved by Telecom Italia by selling shares of listed companies classified as current assets totalling Euro 161 million.

16) Other financial income

Other financial income in fiscal 2000 totalled Euro 808 million (Euro 547 million in fiscal 1999) and comprised:

(in millions of euro)	Year 2000	Year 1999
Interest income and gains on fixed income securities	171	137
Interest income and commissions from:		
unconsolidated subsidiary companies	1	1
associated companies	25	17
banks	116	93
customers	15	12
Exchange rate gains	235	163
Other	245	124
Total	**808**	**547**

1078

17) Interest expense and other financial charges

Interest expenses and other financial charges totalled Euro 2,641 million (Euro 1,647 million in fiscal 1999) and comprised:

(in millions of euro)	Year 2000	Year 1999
Interest expenses and other charges on bonds	1,216	507
Exchange rate losses	216	193
Banks and other	1,209	947
Total	**2,641**	**1,647**

D) Value adjustments to financial assets

18) Revaluations

This item totalled Euro 280 million and referred to the positive adjustments to non-consolidated equity investments valued by adopting the equity method, which totalled Euro 276 million in fiscal 2000, and write-backs of the value of securities which totalled Euro 4 million.
This item totalled Euro 243 million in fiscal 1999.

19) Write-downs

This heading totalled Euro 1,486 million (Euro 843 million in fiscal 1999) and referred to write-downs of equity investments carried at cost following other than temporary impairment in value, write-downs of equity investments accounted for by adopting the equity methods and write-downs of securities following both other than temporary impairments in value (referred to securities carried as fixed assets) and to reflect the lower market value (referred to securities carried as current assets).
The heading also includes the amortisation charges of goodwill raised at the time the equity investments were purchased and valued by adopting the equity method; in fiscal 2000 these charges totalled Euro 453 million, compared with Euro 184 million in fiscal 1999 representing an increase of Euro 269 million, attributable for Euro 218 million to the equity investment in Seat P.G.

E) Extraordinary income and charges

20) Extraordinary income

Extraordinary income totalled Euro 1,705 million in fiscal 2000 (Euro 7,147 million in fiscal 1999), and comprised:

- Euro 1,408 million, from capital gains on disposals (Euro 7,000 in fiscal 1999, of which Euro 6,927 million from capital gains from the sale of OliMan Holding B.V. to Mannesmann);
- Euro 297 million from other income (Euro 147 million in fiscal 1999).

Capital gains on disposals totalled Euro 1,408 million, and comprised:
• Euro 969 million deriving from the disposals plan of the Telecom Italia Group which referred in particular to the sale of Italtel (Euro 393 million) and Meie (Euro 232 million), and to the sale of the branch of business "Great Buildings" owned by Telecom Italia S.p.A. through the disposal of the 60% of IM.SER to third parties (Euro 312 million);
• Euro 174 million deriving from the disposal of other equity investments and intangible and tangible fixed assets and branches of business of the Telecom Italia Group;
• Euro 204 million from the sale of Telecom Italia shares on the Stock Market by Tecnost;
• Euro 37 million from the sale of the equity investment in ARM by OTM Investment B.V.;
• Euro 24 million from other sales.
The other income totalled Euro 297 million and comprised:
• Euro 47 million deriving from reduced tax charges payable by TIM which emerged at the time of the tax return compared with the amount provided for in the 1999 Financial Statements;
• Euro 22 million from insurance policy refunds receivable in reference to damages suffered following flooding which involved the plants owned by Olivetti Tecnost in the Ivrea area;
• Euro 22 million representing a contribution paid by Canon Inc. to wind-up the Olivetti Canon Industriale joint-venture with Olivetti Tecnost;
• Euro 206 million for other income of which Euro 189 million referred to the Telecom Italia Group.

21) Extraordinary charges

Extraordinary charges amounted overall to Euro 1,570 million (Euro 1,480 million in fiscal 1999) and included Euro 1,542 million attributable to the Telecom Italia Group, of which:
• Euro 492 million for reorganisation charges;
• Euro 419 million representing the amount provided by TIM to the technological upgrading provision and to the frequencies freeing provision;
• Euro 180 million for provisions associated with disposal operations of equity investments and the branch of business "Great Buildings" of the Telecom Italia Group;
The extraordinary charges of the other companies of the Group totalled Euro 28 million and included:
• Euro 10 million representing direct damages caused by the flooding which involved the plants owned by Olivetti Tecnost in the Ivrea area;
• Euro 18 million for other charges.

22) Income taxes of the period

Income taxes for fiscal 2000 totalled Euro 2,340 million, compared with Euro 3,207 million in fiscal 1999.

(in millions of euro)	Year 2000	Year 1999
Current taxes	2,079	3,605
Deferred (prepaid) taxes	261	(398)

Loss per share

Loss per share, determined in compliance with the International Accounting Standard (IAS) No. 33, in respect of fiscal 2000 was as follows:

Year 2000	Net loss (in millions of euro)	Number of shares	Loss per share (in euro)	Loss per share (in lire)
Loss for the year, wholly attributable to outstanding ordinary shares	(940)			
Average number of ordinary shares		6,912,350,085		
Primary loss per ordinary share			**(0.136)**	**(263)**

With regard to fiscal 2000, the fully diluted loss per ordinary share does not differ from the primary loss per share value since conversion of the 1999-2002 bonds, exercising of the 1998-2002 warrants and exercising of the warrants assigned to Managers in 1999 and 2000 generate anti-dilution effects which have not been taken into account.

Other information

1) Legal disputes

As at 31 December 2000, the Group was involved in legal disputes, according to the Group's legal advisers, the outcome of such disputes should not adversely affect the consolidated financial position.

2) Transactions with related parties

The operations transacted by consolidated companies of the Group Olivetti with related companies and entities all represent normal operations and were conducted according to market conditions or in compliance with specific laws. Obviously, dealings between companies directly or indirectly controlled by Olivetti and their respective directors are not taken into account in this section but are reported in the financial statements of the said subsidiaries (for example, the dealings between SEAT P.G. S.p.A., controlled by Telecom Italia S.p.A., and its Chief-Executive Officer).
However, the principle transactions undertaken with non-consolidated subsidiaries and associated companies are detailed below:

1061

Main economic and financial items for the year 2000	Amounts in millions of euro	Description
Revenues from sales	882	They include principally revenues from Seat Pagine Gialle Group (euro 211 million), Teleleasing (euro 113 million), Stream (euro 102 million), Nortel Inversora Group (*) (euro 81 million), Lottomatica (euro 58 million) and Auna Group (euro 57 billion).
Consumption of materials and services	381	They refer principally to costs payable to Siemens Informatica (euro 80 million), Seat Pagine Gialle (euro 61 million) and Teleleasing (euro 59 million).
Miscellaneous income, net	19	They refer principally to recoveries of payroll costs for personnel moved temporarily to some foreign subsidiaries.
Financial income, net	54	They include dividends collected from the satellite consortium Eutelsat (euro 64 million) and interest income accrued on loans granted to some foreign investees, and interest payable to Teleleasing (euro 31 million) accrued on financial lease contracts.
Receivables classified as financial fixed assets	138	They include loans granted to BDT (euro 102 million) and other overseas group companies.
Trade receivables	307	Include amounts due from Telekom Srbija (euro 66 million), Auna Group (euro 48 million), Golden Lines International (euro 25 million), Stream (euro 23 million), Nortel Inversora Group (*) (euro 22 million), CSIA Consortium (euro 13 million) and Etec S.A. (euro 13 million).
Trade payables	718	They refer to supply agreements for investing and operating activities; they include amounts due to Italtel Group (euro 277 million), Entel Chile Group (euro 41 million), Siemens Informatica (euro 38 million), Telekom Srbija (euro 23 million), Teleleasing (euro 22 million), Golden Lines International (euro 17 million), Auna Group (euro 13 million), Etec S.A. (euro 11 million) and Telekom Austria Group (euro 10 million).
Medium/long-term financial payables	554	They refer to amounts due to Teleleasing in respect of financial lease contracts.
Short-term financial payables	108	They include amounts due to IM.SER (euro 81 million), and Italtel Group (euro 20 million).
Short-term financial receivables	175	They refer principally to amounts due from associated companies of Seat Pagine Gialle (euro 60 million), Stream (euro 55 million) and Telekom Srbija (euro 21 million).
Other assets	49	They refer principally to prepaid expenses for rentals paid to IM.SER (euro 46 million).
Other liabilities	118	They include mainly the amounts due to Astrolink (euro 95 million) for arrears of subscribed capital.
Contract work-in-progress	71	They refer to Telespazio work-in progress on jobs ordered by Astrolink.
Capital expenditure in tangible and intangible fixed assets	234	They refer principally to the purchases from Italtel (euro 184 million) and from Siemens Informatica (euro 32 million).

(*) The Nortel Inversora Group is consolidated on a proportional basis

1082

3) Considerations payable to the Parent Company Directors and fees payable to the Statutory Auditors

The considerations payable to Parent Company Directors and the fees payable to Statutory Auditors for fiscal 2000 in respect of such services provided to companies included in the consolidation area, totalled Euro 6,041,415 and Euro 255,388, respectively.

4) Exhibits

The following exhibits are enclosed to provide a clearer and more complete representation of the consolidated financial position as at 31 December 2000 and of the consolidated result for fiscal 2000:
a) statement of changes in consolidated financial position;
b) statement of changes in the consolidated shareholders' equity;
c) reclassified consolidated income statement;
d) list of companies included in the consolidated Financial Statements as at 31 December 2000 and of the equity investments, pursuant to articles 38 and 39 of Legislative Decree No. 127/1991.

Notes: - This statement does not include companies in winding-up, dormant companies and those companies intended to be disposed of to third parties.
- Percentages of ownership do not consider securities classified as current assets (in particular the share of 0.54% of Telecom Italia S.p.A. held by Olivetti Finance N.V.).

(*) Equity investments held by Telecom Italia S.p.A. are listed in the following pages, as shown in the exibits of Telecom Italia itself's Annual Report.

(**) Equity investments held also by Telecom Italia Group companies.

(°) Companies whose share percentage computed on voting rights is different from that computed on ownership.

In the following pages subsidiary and associated companies of the Telecom Italia Group are listed in the format of the Exhibit to the "2000 Annual Report" of the Telecom Italia Group itself.

1091

Reports of the Independent Auditors and the Board of Statutory Auditors

PRICEWATERHOUSECOOPERS

PricewaterhouseCoopers SpA

AUDITORS' REPORT IN ACCORDANCE WITH ARTICLE 156 OF LEGISLATIVE DECREE N° 58 DATED 24 FEBRUARY 1998

To the shareholders of
Olivetti S.p.A.

1 We have audited the financial statements of Olivetti S.p.A. as of 31 December 2000. These financial statements are the responsibility of Olivetti S.p.A.'s directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2 We conducted our audit in accordance with the auditing standards and criteria recommended by CONSOB. Those standards and criteria require that we plan and perform the audit to obtain the necessary assurance about whether the financial statements are free of material misstatement and, taken as a whole, are presented fairly. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the directors. We believe that our audit provides a reasonable basis for our opinion.

The financial statements of certain indirectly held Group companies (mainly Seat Pagine Gialle S.p.A., Telecom Italia Mobile S.p.A., Huit S.a.r.l., TI Web S.A. and 9 Telecom Reseau S.a.S.) held by Telecom Italia S.p.A., have been examined by other audit firms who have supplied us with their audit reports. Our opinion, as expressed in this report, in relation to the financial statements of these subsidiaries, used to verify the valuation of this subsidiaries, is also based on the audits carried out by other audit firms.

For the opinion on the financial statements of the prior year, which are presented for comparative purposes as required by law, reference is made to the report issued by us dated 12 June 2000.

3 In our opinion, the financial statements of Olivetti S.p.A. as of 31 December 2000 comply with the laws governing the criteria for their preparation; accordingly, they give a true and fair view of the financial position and of the results of operations of the company.

PRICEWATERHOUSECOOPERS

4 The company holds investments in subsidiary companies and has therefore prepared (as required by law) consolidated financial statements. These consolidated financial statements form an integral part of the annual financial statements for the purposes of providing adequate information on the financial position and the results of operations of the company and the Group. We have examined the consolidated financial statements and these, together with our audit report on them, are presented together with these financial statements.

AUDITORS' REPORT IN ACCORDANCE WITH ARTICLE 156 OF LEGISLATIVE DECREE N° 58 DATED 24 FEBRUARY 1998

To the shareholders of
Olivetti S.p.A.

1 We have audited the consolidated financial statements of Olivetti S.p.A. as of 31 December 2000. These consolidated financial statements are the responsibility of Olivetti S.p.A.'s directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2 We conducted our audit in accordance with the auditing standards and criteria recommended by CONSOB. Those standards and criteria require that we plan and perform the audit to obtain the necessary assurance about whether the financial statements are free of material misstatement and, taken as a whole, are presented fairly. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the directors. We believe that our audit provides a reasonable basis for our opinion.

The financial statements and consolidated financial statements of certain subsidiaries (mainly Seat Pagine Gialle S.p.A., Telecom Italia Mobile S.p.A.,TI Web S.A. and 9 Telecom Reseau S.a.S.) representing respectively 20% and 32% of consolidated assets and consolidated revenues, have been examined by other audit firms who have supplied us with their audit reports. Our opinion, as expressed in this report, in relation to the values of these subsidiaries included in the consolidation, is also based on the audits carried out by other audit firms.

For the opinion on the consolidated financial statements of the prior year, which are presented for comparative purposes as required by law, reference is made to our report dated 12 June 2000.

3 In our opinion, the consolidated financial statements of Olivetti S.p.A. as of 31 December 2000 comply with the laws governing the criteria for their preparation; accordingly, they give a true and fair view of the financial position and of the results of operations of the Group.

Sede legale: Milano 20124 Via Vittor Pisani 20 Tel. 0267831 Fax 0266981433 Cap. Soc. 7.220.000.000 i.v. Reg. Imp. Milano N. 278929/1999 C.F. e P. Report of the Board of Statutory Auditors to the Olivetti S.p.A. Shareholders' Meeting, pursuant to art. 153 Legislative Decree 58/98 and art. 2429 of the Italian Civil Code.

(Translation from the original version in Italian)

To the Shareholders,

This report illustrates the monitoring activities performed by the Board of Statutory Auditors and the other duties it is required to perform pursuant to Legislative Decree no. 58/98 and art. 2429 of the Italian Civil Code and also with reference to the recently published Consob communication no. DEM/1025564 and related attachments of 6 April 2001.
The Company statutory financial statements as of 31/12/2000 show earnings of 869,820,034 euro and were consigned to the Board of Statutory Auditors together with the Directors' Report on Operations as prescribed by law. The Board of Statutory Auditors has verified that the statements were drawn up in compliance with legal requirements through its own auditing work and through the information provided by the Independent Auditors.
The Group consolidated financial statements at your disposal show a loss of 940 million euro and were similarly consigned to the Board of Statutory Auditors together with the Directors' Report on Operations as prescribed by under law.

1. The main business and financial operations transacted by Olivetti S.p.A. during financial 2000, regarding which the Directors kept the Board of Statutory Auditors periodically and fully informed, are summarised below and described in fuller detail in the Directors' Report on Operations:
• Following the contribution of the industrial operations of the Tecnost group to Tecnost Sistemi S.p.A., the latter was sold in February 2000 to Olivetti S.p.A., based on the reports drawn up by the experts appointed by the Presiding Judge of the Court of competent jurisdiction.
The sale of Tecnost Sistemi S.p.A. to Olivetti S.p.A. was preparatory to the subsequent contribution (at the end of the year) of Tecnost Sistemi S.p.A. to Olivetti Lexikon S.p.A. (which was subsequently renamed Olivetti Tecnost S.p.A.), as part of the Group industrial re-organisation.
• Conversion of Company preferred and savings shares into common shares, at par.
Free increase of share capital through the increase of the nominal value of all shares from 1,000 lire to 1,936.27 lire (1 euro) and simultaneous re-denomination of share capital in euro.
Both operations were resolved by the Extraordinary Shareholders' Meeting of 4 July 2000 and ratified by the competent Courts on 17 July 2000.
• Upstream merger of Tecnost S.p.A. into and with Olivetti S.p.A. The operation was approved by the companies' respective Shareholders' Meetings of 4 October 2000. It took effect for juridical purposes as from 31 December 2000 and for accounting purposes as from 1 October 2000. The share exchange ratio, the fairness of which was substantiated by the opinions of leading advisors and by the two independent auditors, based on balance sheet as of 30 April 2000, was set at 1.12 Olivetti shares for each Tecnost share. The object of the operation was to rationalise the ownership structure of the Olivetti Group.
The shareholders' resolutions were ratified by the competent Courts on 10 October 2000.
• Operations resolved by the Board of Directors of 18 December 2000 in execution of the powers granted by the Extraordinary Shareholders' Meeting of 7 April 1999:
a) increase in share capital for a maximum nominal amount of 357,184,480 euro through issuance of a maximum of 357,184,480 common shares cum warrants with a nominal value of 1 euro per share;

1120

b) issue of a convertible bond loan for a maximum nominal amount of 1,600,186,470.40 euro;
c) increase in share capital for a maximum nominal amount of 678,650,512 euro through issuance in one or more tranches of a maximum of 678,650,512 common shares with a nominal value of 1 euro per share, of which up to 178,592,240 to service the exercise of the warrants as at point a) and up to 500,058,272 to service the conversion of the bonds as at point b).
The final share price, the warrant exercise price and the bond redemption premiums were set by the Board of Directors on 9 February 2001.
In the opinion of the Board of Statutory Auditors, the operations performed comply with the law and with the Articles of association, are in the interests of the Company, are not manifestly imprudent or hazardous, do not conflict with shareholder resolutions and do not compromise the integrity of the Company's net assets.

2. The Board of Statutory Auditors has not encountered any atypical and/or unusual operations by Olivetti S.p.A. with third parties or with related parties or infragroup operations.
The terms of the ordinary operations between Olivetti S.p.A. and related parties and Group companies are in the interests of the Company, are conducted at normal market conditions and consist largely of financial charges (totalling 331 million euro posted to the income statement) relating in the main to the debt acquired following the merger of Olivetti S.p.A. with Tecnost S.p.A.
The following operations with related parties and Group companies should also be mentioned:
• income from equity investments comprising dividends from subsidiary and associated companies and related tax credits for 1,430 million euro (of which 891 million euro of dividends from Telecom Italia S.p.A. accruing on earnings for 2000, 523 million euro of related tax credits and the balance for dividends from minor equity investments and related tax credits);
• capitalised costs for bond issues totalling 106 million euro, arising from the merger of Tecnost S.p.A. into Olivetti S.p.A., of which approximately 4 million euro have been amortised;
• other operations for smaller amounts as described in the Directors' Report on Operations.

3. The Board believes that the information provided in the Directors' Report on Operations with regard to infragroup operations and operations with related parties is adequate and reflects the company's interest in the transaction of such operations.

4. The reports issued by the auditors PricewaterhouseCoopers S.p.A. on 21/5/2001 pursuant to art. 153 of Legislative Decree 58/98 declare that the Company statutory financial statements and the consolidated financial statements and the related Directors' Report on Operations give a true and fair view of the operations and financial situation of the Parent Company and the Group.

5. During the Shareholders' Meeting of 4 July 2000, the shareholder D'Atri consigned to the Board of Statutory Auditors a copy of a letter sent by a lawyer to the Olivetti company on 2 July 1999 and attached sub H to the minutes of the said Ordinary Shareholders' Meeting as requested by the shareholder, which, according to the shareholder, constitutes a complaint to the Board of Statutory Auditors pursuant to art. 2408 of the Italian Civil Code.

The Board of Statutory Auditors examined the document but was unable to ascertain its exact purpose. It therefore sent a letter to the shareholder (dated 12 July 2000) asking him to specify the matters he considered censurable and which he wished the Board to investigate.
Speaking at the Extraordinary Shareholders' Meeting of 4 October 2000, shareholder D'Atri declared that he would not reply to the letter of the Board of Statutory Auditors and to date the Board has not received any correspondence on the subject.

6. No petitions, complaints or objections have been brought in any way to the attention of the Board of Statutory Auditors.

7. During the year, Olivetti S.p.A. appointed the auditing firm PricewaterhouseCoopers S.p.A. to perform the following services in addition to the audit of the financial statements, the costs of which are deemed by the Board of Statutory Auditors to be congruous and adequate in view of the complexity and extent of the work involved:
- report on the share exchange ratio for the upstream merger of Tecnost S.p.A. into and with Olivetti S.p.A. The costs incurred amounted to 2 billion lire;
- report on the proforma consolidated data as of 30 June 2000 in respect of the above merger operation. The costs incurred amounted to 30 million lire;
- other activities for costs totalling 10 million lire.

8. During the year, Olivetti S.p.A. did not commission services from bodies with whom the auditing firm PricewaterhouseCoopers S.p.A. has relations on a continuous basis.

9. During the year, the Board of Statutory Auditors gave its opinions, pursuant to law, on the following matters:
- opinion on the audit engagement to the auditing firm Reconta Ernst & Young S.p.A. for the Company statutory and consolidated financial statements and the half-year reports pursuant to art. 159, par 1 Legislative Decree 58/98, on 2 June 2000;
- opinion on the correctness of the calculation of the emoluments of Directors with special responsibilities.

10. During the period between the Statutory Auditors' Report to 1999 Financial Statements and this Report, the Board of Statutory Auditors held 12 meetings. The Auditors also attended all the meetings of the Board of Directors held in 2000, for a total of eight meetings, and obtained information from the directors on the work performed and on the main business, financial and equity operations performed by the Company and its subsidiary companies.
Furthermore, an Auditor attended the meetings of the Remuneration Committee and of the Audit Committee.

11. Within the limits of its competence, the Board of Statutory Auditors ascertained and monitored compliance with the principles of correct administration, through direct observation, collection of informa-

1122

tion from heads of function and meetings with the managers of the independent auditors for the purpose of exchanging significant data and information.
It has nothing of note to report.

12. Within the limits of its competence, the Board of Statutory Auditors also ascertained and monitored the adequacy of the Parent Company's organisational structure, and found nothing of note to report.

13. The Board of Statutory Auditors monitored the internal control system of the Company, whose structure is that of a holding company, verifying the activities and control procedures therein and confirming their adequacy.

14. Furthermore, the administrative-accounting system is adequate and reliable for the purposes of correct disclosure of operations.

15. Olivetti S.p.A. provided the subsidiary companies with the instructions necessary to ensure fulfilment of disclosure requirements pursuant to art. 114, par 2 Legislative Decree 58/98. These instructions are adequate to ensure compliance with legal requirements.

16. During the meetings held with the independent auditors, pursuant to art. 150, par 2 Legislative Decree 58/98, no comments or observations were made to the Board of Statutory Auditors as regards matters for which the auditors are responsible. The Board of Statutory Auditors therefore has nothing of note to report.

17. The corporate governance model adopted by the Company is based on the key points of the Voluntary Code of Practice for listed companies. Specifically:
- the Company By-Laws comply with Legislative Decree 58/98.
- the majority of Directors on the Board are "non-executive" and/or "independent".
- the Board of Directors has formed an Audit Committee and a Remuneration Committee.
- in accordance with art. 12 of the By-Laws, the Chairman of the Board of Directors is invested with full powers for the moderation of, participation in and voting at the Shareholders' Meeting, while the Chief Executive Officer reports periodically to the Board of Directors and to the Board of Statutory Auditors on the ordinary and extraordinary operations performed in the exercise of his powers.
- a specific function guarantees relations with institutional investors and shareholders.

The Report on Operations undertakes to take further action to ensure full compliance with the recommended principles in the interests of transparent and democratic governance of the Company.

18. The monitoring activities of the Board of Statutory Auditors have not found any omissions, censurable facts or irregularities to be reported to the shareholders and to the Controlling Bodies.
The Board of Statutory Auditors requested and obtained the Reports of the Boards of Statutory Auditors on the 2000 Annual Report of the companies controlled directly by Olivetti S.p.A. and – in view of its sig-

1123

nificance – that of the Telecom Italia Mobile S.p.A. company. No critical matters were found in these reports or through the contacts with the Boards of Statutory Auditors, in particular that of Telecom Italia S.p.A.
In point 18 of its Report, and also at the specific request of Consob, the Board of Statutory Auditors of Telecom Italia S.p.A. highlights the acquisition in 1997 by STET International N.V. of a 29% share of TELEKOM Srbija a.d., concluding that at the present time nothing of significance has emerged that could vitiate the correctness of the Telecom Italia financial statements as of 31 December 1997, 1998, 1999 and 2000.

19. The Board of Statutory Auditors of Olivetti S.p.A. invites the Shareholders to approve the Company statutory financial statements as of 31 December 2000 as drawn up by the Board of Directors and, with reference to art. 153 par 2 Legislative Decree 58/98, has no objections to the proposal for the allocation of the income for the year.

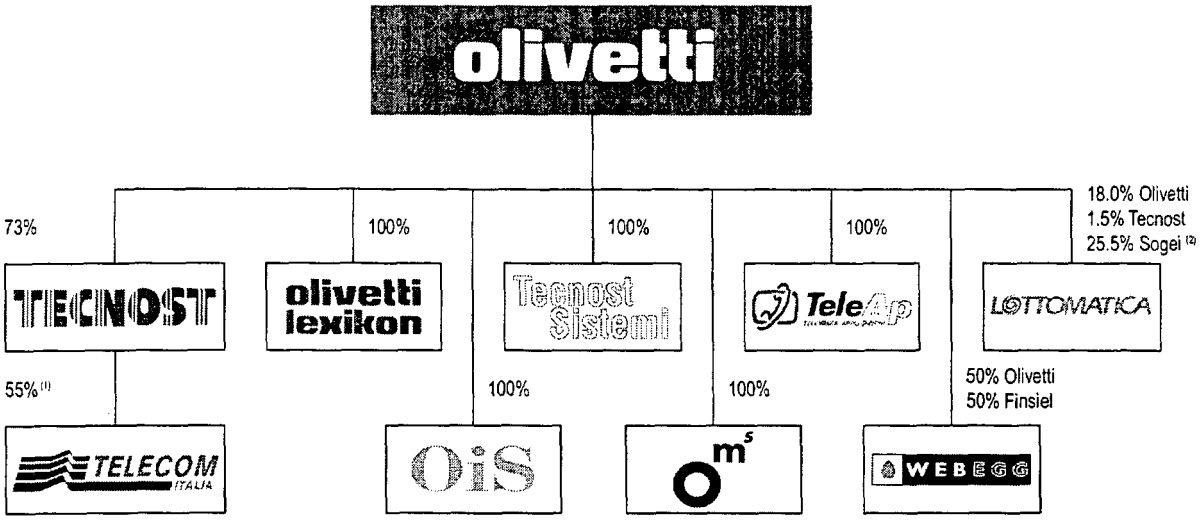
Directors' Report on Operations

olivetti

Evolution of the Olivetti Group in 1999

The Olivetti Group underwent a sweeping transformation in 1999 as a result of the success of the Public Tender and Exchange Offer (hereafter the Tender Offer) for the common shares of Telecom Italia launched in February by Olivetti S.p.A. through its Tecnost S.p.A. subsidiary. The Tender Offer closed in June, with shareholders tendering 52.12% of Telecom Italia common shares.
This operation gave a decisive boost to Olivetti's mission as an industrial holding in high technology fields, placing the company firmly at the forefront of the fixed and mobile telecommunications industry. As the chart illustrating the Group structure shows, in addition to its telecommunications activities, Olivetti operates in information technology products and services with the subsidiaries Olivetti Lexikon and O.i.S., in specialised IT systems through Tecnost Sistemi (sold by Tecnost S.p.A. to Olivetti S.p.A. in February 2000) and in the highly innovative (and fast-growing) business of call-centre development for telecommunications operators, through Telemedia Applicazioni S.p.A. (TeleAp). In the real estate and related services area, Olivetti Multiservices continued its business growth.
Olivetti S.p.A. has also begun making selective investments in the Internet business with the acquisition – in February 2000 – of a 50% shareholding in Webegg S.p.A. (formerly Logicasiel, an equally owned joint venture with Finsiel S.p.A.). It has provided the company with funds totalling 46 million euro to finance an ambitious business plan.
With the acquisition of the Telecom Italia Group, the Olivetti Group owns (through Tecnost, Sogei and Olivetti) 45% of Lottomatica S.p.A., the leading player on Italy's betting and gaming systems market.

Current structure of the Olivetti Group



(1) 55.02% of common shares; 38.97% of total share capital
(2) Telecom Italia Group company

1138

The decision to acquire a shareholding in Telecom Italia through a Tender Offer is related to the Olivetti Group's strategic decision to focus on and expand its telecommunications business. Advances in the new digital and multimedia technologies and market deregulation are opening up enormous opportunities in telecommunications and giving the industry a central role in the promotion of a new economic growth cycle and the creation of value across all world markets.

The bright prospects of this sector and the importance of the Italian market at a time of rapid change and growth in international telecommunications represent a major opportunity for a top European industrial player like Telecom Italia to deliver telecommunications infrastructures and services offering the technologies, quality and content required by the new "digital economy", in and outside Italy.

Olivetti and Tecnost's industrial plan for the re-launch of Telecom Italia is a strategic program of cultural, professional and organisational change.

The guidelines of the plan to make the customer the focus of attention, to optimise the resources available, to motivate staff and to guarantee growing shareholder value.

The operation was announced at the end of February 1999, when Tecnost S.p.A. and Olivetti S.p.A. declared their intention of proceeding with an unsolicited public tender and exchange offer for 100% of Telecom Italia common stock (represented by 5,255,131,631 shares), against a consideration composed partly of cash, partly of bonds issued by Tecnost International N.V. (wholly owned by Tecnost S.p.A.) and partly of Tecnost shares.

A total of 2,739,178,932 Telecom Italia common shares representing 52.12% of the common share capital were tendered during the Offer Period from 30 April to 21 May 1999.

On 25 May 1999, Tecnost and Olivetti announced their intention of collecting the tendered shares. The transfer of share ownership to Olivetti and Tecnost took place on 28 May 1999.

On 9 June 1999, pursuant to Law no. 474 of 30 July 1994, the Italian Treasury issued a Ministerial Decree "of Approval" (no. 119867), after which, on the same day, Olivetti and Tecnost were registered as Telecom Italia shareholders.

The consideration was paid on 23 June, that is, on the tenth stock exchange business day following registration in the Telecom Italia stock ledger; on the same day, Olivetti S.p.A. transferred to Tecnost S.p.A. 14.6% of the tendered Telecom Italia shares, for a price of 11.5 euro per share.

The total value of the Tender Offer in respect of shares tendered was 60,994 billion lire. The detail is as follows:

	Consideration per Telecom Italia share		Total value of the Tender Offer	
	Euro	Italian Lire	Euro/Millions	Lire/Bns
Cash	6.92	13,399	18,955	36,702
Bonds	2.90	5,615	7,944	15,381
Tecnost shares	1.68	3,253	4,602	8,911
Total	**11.50**	**22,267**	**31,501**	**60,994**

The Offerers used the following resources to finance the components of the consideration:

Consideration in cash:
- 23,236 billion lire (12,000 million euro) deriving from Tecnost's equity resources, raised through the share capital increase carried out during the period 21 June – 9 July 1999; Olivetti subscribed for its portion of the share capital increase, 96.68% of the total, on 23 June, the consideration payment date;
- approximately 8,911 billion lire (4,602 million euro) through a further increase in Tecnost share capital following the exercise by Olivetti, in order to obtain Tecnost shares for the benefit of Telecom Italia tendering shareholders, of the warrants on the shares issued as a result of the capital increase; to exercise these warrants, Olivetti utilised part of the syndicated bank loan organised with Chase Manhattan Plc, DLJ Capital Funding Inc., Lehman Brothers Commercial Paper Inc. and Mediobanca S.p.A. to finance the Tender Offer;
- approximately 2,904 billion lire (approximately 1,500 million euro) deriving from the issue by Tecnost International N.V. of a tranche of bonds additional to the tranche issued in respect of the Tender Offer consideration. This second tranche was underwritten by Chase Manhattan International, Donaldson Lufkin & Jenrette International, Lehman Brothers International (Europe) and Mediobanca S.p.A. and issued at the same time as the bonds issued in respect of the Tender Offer consideration. The resources raised by the new tranche of bonds were made available to Tecnost through infragroup borrowings given by Tecnost International N.V. to Olteco-Fin S.p.A. (then a wholly owned Olivetti subsidiary) and between Olteco-Fin S.p.A. and Tecnost;
- the remainder of approximately 1,651 billion lire (approximately 853 million euro) through utilisation of part of the above-mentioned syndicated bank loan to the Olivetti Group.
The resources raised by the loan were transferred as follows:
(i) a total of approximately 10,083 billion lire (about 5,207 million euro) to Olivetti, including about 8,911 billion lire (about 4,602 million euro) for the purpose of exercising the Tecnost warrants and about 1,172 billion lire (about 605 million euro) to cover the costs of the Tender Offer;
(ii) approximately 1,651 billion lire (around 853 million euro) to Tecnost through infragroup borrowings.
The above-mentioned bank loan was secured by guarantees which were cancelled following the repayment of the loan in July 1999 after the issue of the Tecnost International Finance N.V. 5- and 10-year bond loans.

Consideration in bonds:
Bonds guaranteed by Olivetti and Tecnost were issued by Tecnost International N.V. (wholly owned by Tecnost) and delivered to Telecom Italia shareholders at a rate of one bond for every Telecom Italia common share tendered.
The bonds mature over 5 years, from 23 June 1999 to 23 June 2004 (with an early redemption option for the issuer: not earlier than 36 months from the date of issue, nor earlier than 18 months from the date of issue in the event of heavier tax burden for the issuer) and bear a floating interest rate equivalent to three-month Euribor plus 185 base points p.a.
The bonds, listed in Italy and Luxembourg, were issued for a total nominal value of approximately 9,444 million euro (around 18,285 billion lire), of which approximately 7,944 million euro (around 15,381 billion lire) in respect of the Tender Offer consideration and approximately 1,500 million euro (around 2,904

1140

billion lire) underwritten by Chase Manhattan International, Donaldson Lufkin & Jenrette International, Lehman Brothers International (Europe) and Mediobanca - Banca di Credito Finanziario S.p.A., as described above.

Consideration in shares:
Olivetti allocated Tecnost shares to Telecom Italia tendering shareholders at a rate of 3 Tecnost shares for every 5 Telecom Italia shares tendered. These Tecnost shares originated from the exercise by Olivetti of the warrants on the shares subscribed in respect of the Tecnost share capital increase.
Considering the response to the Tender Offer, a total of 1,643,506,088 Tecnost shares was issued through the exercise of warrants.
As mentioned earlier, in order to exercise its warrants, Olivetti utilised 8,911 billion lire of the proceeds raised by the bank loan.

In the period between the close of the Tender Offer and the close of the financial year, Tecnost (also through its controlled company Tecnost International N.V.) raised its common shareholding in Telecom Italia to 55% of current common share capital through stock purchases on the market for a total outlay of an additional 2,612 billion lire.

1141

Market scenario

1. Telecommunications services

Industry trends

In Europe and Italy, 1999 and early 2000 was a time of continuous progress towards a truly liberalised market and strong growth in demand for the telecommunications services industry.
The larger number of players and stronger competitive pressures generated a fall in prices and – for the dominant operators – an inevitable decline in market share. At the same time, competition fuelled a focus on greater efficiency, cost containment, use of more advanced technologies and development of new services. The strong expansion of mobile and Internet services provided many operators with new sources of revenue and income, and generally made up for the lack of growth or decline in their traditional businesses (fixed network voice services).
The regulatory changes are also bringing rapid structural changes in the industry. The assignment of new mobile and fixed telephony licences and the decrease in interconnection charges have raised the number and competitiveness of new entrants: in addition, the introduction of carrier preselection, number portability and local loop unbundling (already completed in some countries, and planned for 2000 in others) is boosting competition and extending it to urban communications.
All this is accompanied by the "Internet revolution". On one hand, the Internet is creating opportunities for new services, which often require telecommunications competencies to be integrated with skills in other sectors (for example, online trading or virtual banking services; the synergies in e-commerce among telecommunications, media and content; the new role of portals and advertising as a source of operator income, etc.). On the other, communication prices are falling and becoming increasingly independent of length and distance (v. the trend towards a flat rate for Internet access).
This scenario, together with rapid technological developments and innovation, is driving a sweeping operating and strategic repositioning among industry players.
Like information technology and the media, telecommunications is in the throes of an apparently never-ending wave of acquisitions, mergers and alliances that are fuelling a major industry shakeout. In 1999, in Europe and North America, the ICT-media area witnessed 6,008 transactions (up 26% compared with 1998), for a value of more than $1,200 billion (up 154% from 1998). 834 operations took place in the telecommunications area alone (up 38%), for a value of $686 billion (up 172% from 1998), many of absolute strategic and financial significance. There was a general reawakening in the European industry with a series of major operations, including the Olivetti-Tecnost Tender Offer for Telecom Italia and the Mannesmann acquisition by Vodafone-Airtouch (completed in 2000 and therefore not included in the data given here). Many agreements related to the Internet, such as the Time Warner/AOL merger and the announced merger between Seat Pagine Gialle and Tin.it.
The agreements among existing market players were accompanied by the continual formation and rapid growth of new businesses set up to take advantage of the favourable conditions on the financial markets. Many new companies were formed in the ICT and Internet sectors using venture capital, while all the world's stock markets showed great interest in financing their growth. In Europe, from the beginning of 1998 to the end of 1999, the number of listed companies in this area rose from 63 to 338, while average capitalisation increased from 107 to 295 million euro. Funds raised through IPOs in 1999 were triple those of 1998, with many IPOs relating to spin-offs formed to operate specifically in the Internet business.

Looking ahead, the areas offering the greatest growth potential for the telecommunications market are the Internet and mobile telephony.
The development of the Internet is currently hampered by limits on access speed (bandwidth), although new technologies such as ADSL and XDSL are being developed to overcome this. These solutions allow development of a high-speed Internet without involving a complete renewal of networks and infrastructures. Over the next few years, of course, technological progress is likely to generate a constant flow of new access solutions, giving users a wide choice: traditional but enhanced telephone networks, fibre optic metropolitan networks, TV and satellite networks and possibly, at a later date, power networks.
Easy Internet access is a necessary if not sufficient condition for rapid growth of e-commerce and e-business in Europe. Statistics indicate that e-commerce is just getting started in Europe; but the phenomenon is set to grow rapidly over the next few years and become a not insignificant source of income for telecommunications operators.
In the mobile telephony field, the arrival of third-generation telephones using the UMTS system is opening up new opportunities for interesting mobile commerce applications, especially for private users. For these applications, mobile Internet access, which is already possible with today's WAP technology, needs to be faster and simpler: in other words, it needs the new UMTS standard, which should become available in 2002. In the meantime, old and new mobile communication operators throughout Europe are competing for the UMTS licences being awarded by governments through auctions and other forms of bid. This will lead to further price decreases in voice communications and encourage users to switch more frequently from one operator to another: Industry players will therefore have to focus on value-added services and new applications as sources of revenues and income.

Market data

In quantitative terms, Dataquest estimates the growth of the European telecommunications services market at more than 12%, compared with an estimated world rate of 9.5%. The main growth drivers are clearly mobile telephony, data transmission and the Internet.
At the end of 1999, Europe had more than 154 million mobile service users, a penetration rate of nearly 40% of the population (23.6% at the end of 1998). Market growth (up 68% in a year, the equivalent of more than 60 million new customers) was once again stronger than the most optimistic forecasts and occurred mainly in the countries where operators focused on the prepaid system, with a variety of offers. According to recent forecasts, in 2003 the number of mobile links will overtake fixed lines and mobile telephony penetration will be around 65%; clearly, however, the annual market growth rate will gradually slow.
1999 also saw a rapid rise in use of the Internet in Europe, as a result of a number of factors: the introduction of the free-access formula, the new high-speed Internet solutions, the reduction in telephone charges, the expansion of network services, the growing awareness of the new technologies among business users and consumers, etc. The European market is considered to be about three years behind the US market, but in 1999, for the first time, this gap began to narrow.
With the spread of the Internet, use of telephone lines to transmit multimedia data and information rose rapidly, boosting the business performance of fixed networks, which had been eroded by the competition from mobile services and falling prices in the voice communications field.

1143

In Italy, telecommunications services grew more rapidly in 1999 than in Europe as a whole: the European Information Technology Observatory (EITO) 2000 Report estimates the market to be worth 50,700 billion lire, an annual increase of 13.7%.
The key growth driver was mobile services: the number of users rose by 46.7% to more than 30 million, and the share of mobile services to the market as a whole rose from approximately 30% in 1998 to 36% in 1999. In this sector, Italy is the largest European market, with a penetration rate of 52%, exceeded only by the Scandinavian countries.
The Internet market expanded from 3.1 million subscribers at the end of 1998 to 5.6 million at the end of 1999 (up 80%). Despite strong growth generated by free-access offers or campaigns specifically targeting new users (e.g., Tin.it's "E-Vai" offer), the penetration rate (about 10% of the population) was below the European average, with ample room for growth.

The regulatory situation in Italy

Competitive pressures on the Italian market are rising as a result of:
- the increase in the number of fixed network operator licences from 42 in April 1999 to 89 at the end of the year;
- the assignment in July 1999 of the fourth mobile network operator licence;
- the opening on 1 January 2000 of the local loop market, which has already attracted a numbre of operators;
- the availability of the carrier preselection service for long-distance calls as from 1 January 2000 and later also for local calls;
- the availability of number portability and local loop unbundling as from July 2000.
These developments have been achieved as a result of the measures taken during 1999 by the Italian Ministry of Communications and the Antitrust Authority, which have enabled Italy to make up for much of its earlier delay in the liberalisation of the telecommunications industry; a number of constraints on price structures continue to represent a significant obstacle to the Telecom Italia offer and need to be eliminated.
The market areas in which the Authority's decisions in 1999 had the greatest effect were as follows:
- *review of charges:* while no changes were made to local call rates, a number of long-distance and international rates were reduced and a "proximity" rate was introduced for calls between local areas within the same district; time-based charges (TAT) were introduced on 1 November 1999 and monthly residential subscriber fees were raised to the same level. The carrier selection service was made available at district level on 1 November 1999 and not later than 1 January 2000 for local calls. Price-cap regulations were introduced on 1 August 1999 to run until 31 December 2002 for a basket of voice telephony services.
- *financing of the universal service:* in August 1999, the Authority ruled that the costs accrued by Telecom Italia for this service in 1998 were not to be shared out among the other operators, since their presence was still only marginal.
- *interconnection:* the charge proposals submitted by Telecom Italia to the Authority in July reduced prices and also incorporated a number of specific requests, in particular application of a single rate in large metropolitan areas and observance of the best-practise criterion indicated by the European Commission. The Authority approved the proposals, with a number of changes, in February 2000, with effectiveness backdated as from 1 January 1999. A further reduction in interconnection costs is planned in 2000.

1144

- *fixed-to-mobile communications:* after the average 12% decrease in fixed-to-mobile calls introduced in March 1999, new charges were introduced on 17 February 2000.
- *numbering:* the Authority approved carrier preselection for fixed network customers, and the service was introduced in 2000, first for long-distance, international and fixed-to-mobile calls, and later also for local calls. As from 1 January 2000, fixed network customers can change operator without having to change the number assigned by Telecom Italia (number portability).
- *ADSL* (high-speed Internet): on 21 December 1999, the Authority authorised wholesale high-speed Internet access services based on ADSL technology. Tin.it began marketing an offer for the "retail" public on 26 January 2000.
- *local loop unbundling:* on 16 March 2000, the Authority approved regulations regarding local loop unbundling services and the promotion of innovative services (broadband, interactive, etc.). This means operators will have direct access to end users by leasing the relevant network components from Telecom Italia. Unbundling services will be available by September 2000.

2. Office products and specialised IT systems

The general market scenario in the *office products sector* was positive, despite strong competition especially in traditional segments.
Specifically, the plain-paper fax market grew by 20% compared with the previous year; demand was particularly strong in the promising multifunctional fax segment, with average growth of more than 30%.
Trends on the printer market varied from one segment to another. The ink-jet printer segment continued to record double-digit growth (up 15%), while sales of laser models were unchanged compared with 1998. The downturn in dot matrix printers continued, due to intense competition from laser and ink-jet equipment. In the copier market, sales of analog models fell by about 15% in 1999, a decrease that was more than compensated by the rise in sales of digital models. Shipments and margins improved in cash registers and calculators, thanks in part to demand fuelled by the introduction of the euro. The sharp rise in installations over the last few years kept demand high for profitable supplies and consumables, despite strong competition from sales of non-original products, which had a negative impact on price stability.
1999 also witnessed the emergence of a new demand trend fuelled by the strong growth of the Internet and telecommunications. One of the main new segments is Internet Appliances, a new class of easy-to-use, low-price, digital devices for access to the Internet and network services without a PC and without specialist IT skills. This market is growing fast: according to leading market research companies (e.g., IDC), in 2001 Internet appliances will be a more common access tool than PCs.

Trends on the *specialised IT systems* market varied. The gaming sector continued to report strong growth, with a further expansion in betting and in revenues. The introduction of the new "Formula 101" and "Bingo" games will lead to further growth in collection systems and networks and boost the number of sales points. Italy's gaming networks link more than 60,000 terminals; for the network alone, installation of a further 25,000 terminals is forecast, to give a total of approximately 50,000 terminals with real-time Internet links to the processing centre.
The recession of the last few years on the electronic test equipment and traffic and public transport automation systems markets continued, leading to falling prices and a surplus of offers.

Group operating structure and activities

Since the conclusion of the Tender Offer for Telecom Italia, the Olivetti Group has focused on telecommunications services, while retaining important industrial interests in specific areas of the IT and office products fields and in the Internet business.
In telecommunications, Telecom Italia, a highly articulated group with operations in a range of sectors, directly operates a nationwide fixed network service. It is also active in mobile communications through TIM, in the Internet business with Tin.it, in satellite telecommunications through Telespazio and in multimedia services through Stream. Telecom Italia also runs operations in areas that complement its telecommunications businesses, including information technology (Finsiel, Telesoft, Sodalia, Saritel), manufacturing (Italtel) and system facilities (Sirti).
Outside Italy, Telecom Italia operates through a number of subsidiaries and associated companies, mainly in Europe and Latin America.
The Olivetti Group also operates in the IT field through directly owned subsidiaries including Olivetti Lexikon (office products and communication and imaging devices), OiS (IT services and solutions), TeleAp (Customer Relationship Management and Contact Centre solutions) and Tecnost Sistemi, the grouping for Tecnost's specialised service automation systems units, which were acquired directly by Olivetti S.p.A. on February 2, 2000. Also in February 2000, Olivetti acquired the Logica Group's 45% shareholding in Logicasiel S.p.A. Logicasiel, now named Webegg (and equally owned by Olivetti S.p.A. and Finsiel following a 46 million euro share capital increase), intends to become a high-growth provider of consultancy services and solutions for web companies.

1. Telecommunications services

Fixed-line telephony

This is Telecom Italia S.p.A.'s core competency and the Group's largest source of revenues.
The company closed 1999 with revenues of 35,856 billion lire, a decrease of 1.2% from 1998. Having completed an equipment modernisation and rationalisation program, in 1999 Telecom Italia kept industrial investments to 5,928 billion lire (down 28.4%) and reduced personnel to 76,150 people. Operating income rose by 41% to 7,108 billion lire.
The revenue decline was due to stronger competition and above all to the reduction in prices and charges: in terms of traffic minutes, communications rose by 11.4%. The improvement in operating income arose from more efficient management and lower fixed capital charges.
In fixed-line telephony, important changes in the regulatory scenario and competition led to the entry of large numbers of new competitors, structural reviews and reductions in prices and charges, and the introduction of new services. In the voice services area, the shift in demand from fixed-line to mobile telephony gathered strength.
In response to the new market conditions, Telecom Italia introduced new rates for national and international calls; promoted a variety of value-added services and introduced a range of new services ("Chi è"; "Numero Personale"); it continued to enhance customer care operations by extending the working hours of its call centres, improving the image and quality of the 187 service and launching an automatic nighttime "12" service. It also expanded its sales network and introduced Internet sales solutions on the "www.telecomitalia.it" site.

1146

In the business user area, Telecom Italia introduced a range of innovative services, including "Business Net" for telephony solutions and the "Ring" data service, which are based on leading-edge technologies. It also reported a strong increase in ISDN lines, reflecting business users' need to improve their data networks and Internet access. It formed Path.NET S.p.A., which runs the data carrier service for the Central Government Unified Network (Rete Unitaria delle Pubbliche Amministrazioni centrali dello Stato) and handles links with local government networks.
Telecom Italia paid special attention to Small and Medium Businesses (SMBs), a market offering particularly high potential. For these users, Telecom Italia created a new organisational structure comprising marketing, sales and customer care resources.
As competitive pressures rise and service prices are squeezed, Telecom Italia aims to defend margins on its fixed network business by containing overheads, rationalising investments and monitoring business users. At the same time, it intends to achieve growth by taking advantage of the opportunities opened up by the spread of the Internet and data transmission, fixed-to-mobile voice traffic, and the potential demand in certain user segments, including SMBs.

Mobile telephony

The Group operates in the mobile telephony field, its second-largest business in terms of revenues, through TIM, the leading European operator by number of customers.
Although competitive pressures are rising, with the entry of a third operator at the beginning of 1999 and a fourth in 2000, TIM's results have improved significantly: 1999 revenues rose by 21.2% to 14,425 billion lire; operating income was 5,126 billion lire (up 24.5%). At the end of 1999, TIM had 9,375 employees (up 5.4%) and 18.5 million customers, an increase of 4.2 million in just one year (up 30%).
TIM's growth, fostered by a still highly receptive market, was fuelled by the prepaid system, which rose from 72% to 82% of lines. Partly in response to strong competition, TIM enhanced its offer with a wide range of solutions, including "UNI-TIM" (Universal Number TIM), enabling users to utilise their cellphone number also for e-mail applications, fax and Internet browsing; "TIM Menù" for personalised charge plans; "TIM Menù autoricarica" with a bonus for incoming traffic; and a variety of value-added services, including services offering business users features that make cellular phones increasingly attractive, affordable tools.
Segmentation of customers and services, and knowhow exports were key elements in the company's business strategy. TIM achieved important success in Spain with Amena, the trademark of Retevisión Móvil, the country's third-largest GSM operator, in France with Bouygues and in Brazil, where it exports its trademark. Outside Italy, the mobile communication companies in which the Telecom Italia Group owns shareholdings had 13.8 million customers at 31 December 1999 (3.8 million calculated in relation to the percentage of equity owned), an increase of 101% compared with 1998.
In this situation, it is essential that TIM implement an effective customer retention policy based on continuous innovations in products and charge structures.
In the next few years, the company intends to offset the expected erosion of margins in traditional business segments and defend its leadership by moving in two directions: one, by focusing on high-consumption market areas where innovation is greater, two, by focusing on the development of value-added services and the new mobile commerce applications made possible as technology evolves. TIM is there-

1147

fore committed to the application development of technologies and standards (SIM Toolkit, WAP, GPRS, UMTS) that will drive market growth by integrating mobile communications with the Internet.

The Internet

The growth of the Internet is a key strategic element for the Telecom Italia Group, which is already the market leader through Tin.it, an operating division that became a joint-stock company in April 2000. At the end of 1999, Tin.it had 1.99 million customers, a number that had already risen to almost 3 million by the end of April, for a market share of around 40%.
The growth guidelines drawn up for this sector cover: improvement of low-cost broadband infrastructures to give consumers and SMBs faster, easier access; introduction of turnkey e-business offers for web companies; development of portals, search engines and other Internet tools to boost content and market demand in various areas (schools, entertainment, music, SMBs, etc.).
Tin.it is also paying special attention to promoting the use of access terminals (PCs and other Internet access devices).
An important boost to the Internet business was Tin.it's launch of "Clubnet", a free network subscription, which contributed to the extremely rapid growth of the Italian Internet market in the second half of 1999. The success of this offer is attested by the number of subscribers, which rose to 1,286,000 by the end of 1999.
Besides ClubNet, Tin.it promoted a range of other initiatives to promote the Internet. The "Premium" formula for customers with high-performance requirements had about 700,000 customers by the end of the year. Good results were also achieved with "Tin Easy Way" for home installation and activation of access kits; a free Internet offer for schools; the development of the Enterprise portal for businesses and professionals; the launch together with Microsoft of Soluzioni 2000. A major initiative was the "e-Vai" operation launched with Olivetti Lexikon, which offers Internet navigation devices at extremely affordable prices. Following its launch in December, more than 40,000 orders were placed for "e-Vai" in four months. The high-speed ADSL access offer introduced on the retail market at the end of January 2000 has also been well received.
Mobile phone penetration could be used as a lever to boost the spread of the Internet among consumers in the future. An important advance in this area was TIM's launch of the UNI.TIM mobile access service described above, using the same number for all communications.
To take full advantage of the opportunities in the Internet sector, the Telecom Italia Board of Directors approved plans to spin off Tin.it and merge it with Seat Pagine Gialle.
The new Seat-Tin.it company will be one of the largest companies on the European Internet market, with operations across the entire Internet value chain. Further details about the project are provided in the section "Events subsequent to the end of the financial year".

Network development

The network infrastructure has been expanded in order to support growing national, international and Internet traffic. Development and application work is already at an advanced stage on a number of medium- and broadband technologies such as ADSL (Asymmetrical Digital Subscriber Loop), which currently

covers 25 urban areas and for which 52,000 lines have been installed, ATM (Asynchronous Transfer Mode), SDH (Synchronous Digital Hierarchy) and HDSL (High-speed Digital Subscriber Loop). A key element of the strategy is the activation of proprietary international backbones. The main projects scheduled for completion this year are: a pan-European backbone wholly owned by Telecom Italia, with points of presence in nine west European countries, and the Nautilus project for the development of a fibre optic loop in the eastern Mediterranean area, to enable Telecom Italia to reach the main markets in this area by the end of next year. In this connection, Telecom Italia announced the formation of the Med-1 operating company, of which it owns 51%.

Satellite and multimedia telecommunications

In 1999, Telespazio, a Telecom Italia Group company, enhanced its role as a national centre for satellite engineering and services, taking part in a large number of international projects. Significant growth was achieved in mobile satellite messaging services, in part through Viasat, an associated company. An important industrial and partnership agreement was signed on 19 July 1999 with Lockheed Martin Global Telecommunications and TRW, for the formation of the Astrolink consortium to develop a global telecommunications services offer. Telespazio has invested approximately 465 billion lire in the consortium. The system will consist of a network of four geostationary satellites and related terrestrial components (network and satellite control centres, gateways), to deliver global interactive broadband data, voice and image services, on request.
In August, the US lead company on the Iridium project, in which Iridium Italia (a Telecom Italia Group subsidiary) has a 3.93% shareholding, filed for receivership. This led to a further fall in the NASDAQ share price of Iridium World Communication Ltd. and the stock was removed from the stock market list. Given the lack of a buyer, the company has gone into liquidation.
In the multimedia services area, Stream, in which Telecom Italia currently holds 50%, performed successfully in the second half of the year, with approximately 390,000 subscribers by the end of the year, an increase of approximately 150% from 30 June 1999.

International operations

The Telecom Italia Group's international operations are largely focused on southern Europe and Latin America, where it has an excellent positioning and an important share of the overall market, for a total of 30 million clients for fixed and mobile communication services (excluding Italy).
The Group is strengthening its position on the international marketplace with a strategy designed to:
- take advantage of the major growth opportunities in mobile communications, the Internet and data services;
- become a pan-regional mobile and data services operator in western Europe;
- consolidate its current position in Latin America;
- develop selective operations in the Mediterranean basin.

In Spain, Brazil and Argentina, Telecom Italia laid the groundwork for further major industrial and commercial growth. In Argentina, through Stet International Netherlands and in partnership with France Telecom, it acquired the remaining 35% of Nortel Inversora, and now jointly owns 100% of the company.

1149

Nortel Inversora is a holding that owns 60% of Telecom Argentina, one of the country's main integrated operators (local and long-distance fixed telephony, mobile telephony, value-added services, etc.). In June, through its mobile communications subsidiaries, Telecom Argentina won two PCS licences and extended those it already operated, thus strengthening its position in the mobile field.
In Brazil, through Bitel Participaçoes, Telecom Italia acquired control (51.8% of common stock) of the cellular operators Tele Celular Sul and Tele Nordeste Celular, buying out the local partner UGB: at the end of 1999, the two companies had 1.03 and 1.19 million customers respectively. A reorganisation is underway to simplify the operating structure of the Bitel group and exploit synergies.
In Spain, SIN raised its stake in Retevision, the country's second fixed network operator, from 21.7% to 28.7%. The Group also operates in Spain's mobile communications sector with Retevision Movil, which trades under the Amena name, and in the local telephone/CATV sector with Madritel, CTC and Euskaltel. Telecom Italia's Spanish operations are being rationalised with the creation (April 2000) of a new holding, Auna, which controls the Spanish telecommunications equity investments of Telecom Italia (37.5%), Endesa (38.9%) and Union Fenosa (23.6%). In March 2000, Retevision Movil was awarded a licence to run UMTS services in Spain.
In Greece, Telecom Italia operates through Stet Hellas, a 58%-owned subsidiary and the country's second-largest mobile communications operator with 1.18 million clients at the end of 1999.
In Austria, the Telecom Italia Group operates through Telekom Austria, of which it holds 25% plus one share. Telekom Austria was privatised in 1998; its mobile services operation is Mobilkom Austria, of which Telecom Italia also owns 25% plus one share. The main goal for 2000-2001 is to prepare Telekom Austria for a stock listing. The strategy is to maintain the company's leadership in the fixed and mobile businesses by concentrating on the creation of value and building a stronger position on the Internet market.
In France, the Telecom Italia Group owns more than 91% of 9Télécom, a fixed network operator which offers voice, data and Internet services through indirect access, and about 11% of Bouygues Télécom, the third mobile provider in France with 3.2 million customers at the end of 1999. Measures are being taken to reposition 9Télécom in order to maximise return on investments, with special attention to broadband access technologies, like ADSL.
Over the next few years, Telecom Italia intends to continue its international market expansion. Having won the third mobile operator licence in Peru in March 2000, and the third cellular communications licence in Turkey in April 2000 (with an offer presented jointly with IS Bank), Telecom Italia is bidding for the tenders relating to the privatisation of other national operators.

Other activities of the Telecom Italia Group

The Telecom Italia Group operates in the Information Technology business through its "Comparto Informatica" area, which comprises the Finsiel Group, Telesoft and Sodalia. In 1999, these companies had aggregate revenues of 3,074 billion lire, an increase of 19.8%; operating income was 237 billion lire.
The Finsiel Group operates on the Italian IT market where it offers systems integration, networking and facilities management services for public- and private-sector organisations, as well as new ERP business management systems. One of its key business areas is central and local government. Finsiel was recently awarded two long-term contracts with Italy's Court of Accounts and the State Comptroller.

1150

The IT activities that complement or support the telecommunications operations are particularly important: Finsiel also provides network services development solutions for private and institutional customers, offered jointly with Telecom Italia.
Telesoft provides IT platforms and management software for telecommunications networks and services. It is involved in major Telecom Italia and TIM strategic projects, as the reference partner for the development and implementation of network operation support systems and business support systems.
Sodalia provides telecommunications network and services management software, in and outside Italy.
Important activities are conducted by Saritel, which supports the network value-added services offered by Telecom Italia, specialising in the management and integration of Italian end-user Internet and intranet application delivery platforms.
As part of the disposals program for the Group's non-core operations, an agreement was reached with Siemens for the separation of Italtel, with Siemens taking the fibre and radio transport segments, the mobile communications networks, the Necsy and Datentechnik subsidiaries and the equity investment in Siemens Telematica; Telecom Italia takes the fixed network business, which it will subsequently dispose of on conditions that guarantee its growth.
In addition, the real estate assets of Sirti were transferred to IMMSI, a new company that was subsequently admitted for trading (February 2000) on the Italian securities exchange. The objective is to focus the "industrial" company's strategies and operations on its core systems operations with a view to subsequent disposal.

2. Office Products

Olivetti operates in the Office Products business through the subsidiary Olivetti Lexikon, whose main activities are in office products and communication and imaging devices for business users, the SOHO market and consumers. With a primary focus on Europe and Latin America, Olivetti Lexikon markets its products in more than 70 countries through a variety of channels, including dealer networks, distributors and mass merchandising chains. It is present in the USA with the Royal brand.
During 1999, Olivetti Lexikon reviewed its technology and commercial strategies to accelerate enhancements to its offer; major investments were made in products using the proprietary bubble ink-jet technology – one of the company's key strengths – leading to the development of new printers, fax and a broad range of multifunctional products. In the ink-jet sector, the company increased sales of Olivetti branded products to make up for the decline in sales on the OEM market.
The printer offer for specialised applications has recently been enhanced with new models and work is continuing on digital products to flank the company's successful analog printers.
1999 also saw the entry of Olivetti Lexikon on to the market for Internet appliances, digital devices used instead of PCs for Internet access: this rapidly growing field offers extraordinary growth opportunities; the first results are expected next year as Olivetti Lexikon markets its new webphones, simple, low-cost devices for browsing and access to network services.
Olivetti Lexikon extended its strategic alliances with the formation in July 1999 of a joint venture with Philips Consumer Electronics. The new company, Jetech S.p.A. (51% Olivetti Lexikon, 49% Philips), designs, develops and produces ink-jet products for the fax and multifunctional product markets and the

promising home Internet appliances market. It is based in Italy and plans to begin launching a product range in 2000 to boost competitiveness on the consumer market.
In December 1999, Olivetti Lexikon reached an agreement with Tin.it - the Telecom Italia Group's Internet service provider - for "e-Vai", a major initiative to introduce people to the ICT world and promote use of the Internet.
Through the dedicated OLIWEB S.p.A. company, Olivetti Lexikon has made a key contribution to the project as regards development of hardware (including the Artjet 10 colour ink-jet printer) and the formulation of a global customer service plan.
Olivetti Lexikon continued to expand in Latin America, winning major orders from banks and public authorities (e.g., Banco de la Nacion, Banco de la Provincia de Buenos Aires, BBV Venezuela, Banco Ganadero Colombiano, the Mexican national insurance board) for the supply of services and products, including installation of more than 18,000 specialised printers.
Nevertheless, the Olivetti Lexikon Group's business results for 1999 were poor, with consolidated revenues down 13% from 1998 to 921 million euro and a net loss of 85 million euro, of which 58 million euro for provisions and non-recurringcharges for restructuring measures aimed at cutting overheads (mainly personnel downsizing). Important changes have been made to the company's management structure and the organisation of its top management since the start of financial 2000, including the appointment of a new Board of Directors.
The company is conducting an extensive review of methodology and structure, and has launched a series of key investments in new technologies and products, advertising, new industrial initiatives and sales and marketing.
Olivetti Lexikon is also raising the profile of the Olivetti brand on the national and international markets, through heavy investment in advertising, participation in local and international tradeshows and "Channel Identity", a project to enhance the image of the Olivetti dealer network with a new line of packaging, documentation and materials for sales outlets.
First-quarter 2000 results were encouraging (a clear turnaround in revenues, which rose 20% compared with the year-earlier period, and a 30% improvement in operating income compared with first-quarter 1999) and indicate that a significant profitability recovery can be reasonably expected for the full year.

3. Specialised IT systems

Olivetti operates in the specialised service automation systems area, with a special focus on gaming and betting systems, through Tecnost Sistemi. Its offer covers development, production and support of systems for:
- betting, ticketing and front-office automation (the parent company's Mael division and the Tiemme Sistemi S.r.l. and Tiesse S.c.p.A. subsidiaries).
- passenger management on public transport (Tecnotour S.p.A.).
- carpark and tollbooth control and automation systems (a division of Tecnost Sistemi S.p.A.).

Since the end of 1999, Tecnost Sistemi includes all the revenue-generating operations of parent company Tecnost S.p.A.'s Mael and Sistemi divisions, which were transferred to the Tecnotour S.p.A.. subsidiary. Tecnotour, renamed Tecnost Sistemi S.p.A., also holds the equity investments in Tiemme S.r.l., Thema S.p.A. and Tiesse S.c.p.A.

1152

As described in the section "Events subsequent to the end of the financial year", Tecnost Sistemi S.p.A., a wholly owned Tecnost S.p.A. subsidiary, was acquired by Olivetti S.p.A. on 2 February 2000, for a price of approximately 250 billion lire.
The operation meets the need to rationalise the Group's operating structure, with Olivetti focusing on the management and development of industrial operations (run through directly owned subsidiaries) complementing the telecommunications business. As a result of the role acquired following the conclusion of the Tender Offer for Telecom Italia, Tecnost S.p.A. has become the holding for the Olivetti Group's telecommunications interests. The Tecnost Sistemi acquisition confirms Olivetti's strategic interest in a business characterised by high market growth, especially in the gaming segment.

4. IT and network services and solutions

The Olivetti Group's activities in this sector are mainly conducted through:
• the *O.i.S. Group*, consisting of OiS S.p.A. (100% Olivetti S.p.A.) and Olivetti Sanità S.p.A. (100% O.i.S. S.p.A.). This group addresses central and local government, industry and commerce, with a broad offer of solutions and services ranging from design and implementation of integrated information systems to organisation consultancy, project management, training and software maintenance. It recently started the development of activities resulting from the convergence of telecommunications and IT, focusing on the design and implementation of Internet Service Farms. In 1999, it developed a unit in IT security, secure networks and digital signature applications, which are winning strong market success. In 1999, O.I.S. reported revenues of 77 million euro and a loss of 17 million euro, of which more than 8 million euro relating to non-recurring provisions and charges to downsize the operating structure and workforce and achieve a more balanced organisation.
• *Telemedia Applicazioni S.p.A.* (100% Olivetti S.p.A.), formed in 1995 and dedicated to customer relationship management solutions. The TeleAp offer is largely concerned with the development of call centres, covering all phases from preliminary analysis and design, to the implementation and operating start-up of infrastructures, as well as staff training and updating. TeleAp offers businesses a broad selection of important call centre functionalities, with applications based on computer telephony integration. TeleAp's strength lies in a large number of commercial agreements and alliances with the leading IT and telecommunications players, of which the strategic alliances with CRM and Contact Centre market leaders Genesys and Siebel are particularly important. In 1999, TeleAp shipped more than 12,000 agent workstations in Italy and reported revenues of approximately 15 million euro; its client portfolio includes many of Italy's leading corporations.
• *Webegg* (equally owned by Olivetti S.p.A. and Finsiel S.p.A.) operates in the promising field of consultancy services and IT solutions for web companies, i.e., companies that operate, communicate and create business opportunities on the Internet. Webegg currently has about 260 employees and offices in Milan, Turin and Bologna. Its 1999 revenues were around 60 billion lire (up 15% compared with 1998). Its strategy is to take companies on to the Web by providing innovative solutions based on financial, services and telecommunications application platforms and leveraging partnerships with international companies. As explained in greater detail in the section "Events subsequent to the end of the financial year", Olivetti bought its investment in Webegg (formerly Logicasiel) from Britain's Logica group in February 2000, for

52 billion lire. The strategic objective of the operation is to strengthen Olivetti's direct interests in network solutions for business users. It is already present in this field through its TeleAp and Olivetti Lexikon subsidiaries, which will be enhancing their offers with new products, services, technologies and web appliances.

• *Olivetti Multiservices S.p.A.*, which operates in the real estate and services field. In addition to managing the Olivetti Group's real estate assets, the company aims to establish itself on the Global Service market, which, though still in its infancy, is recording significant growth as Italy's largest companies move more decisively into services. Olivetti Multiservices provides real estate management and maintenance services, with a growing focus on energy management, environmental certification, technological plant and work station design, digital archiving. It has UNI EN ISO 9001 quality certification. In 1999, it disposed of a number of non-strategic property assets and enhanced others in order to improve future profitability. It also moved into the building restructuring field as the controlling shareholder of a construction company set up together with other partners. In the energy management area, it is working on a project with Turin's municipal power authority for improvements to a co-generation centre owned by Olivetti Multiservices; the company is also examining possible partnerships for power production and sale as part of its plans to enhance the Scarmagno manufacturing facility.

The above activities generated overall 1999 revenues for Olivetti Multiservices S.p.A. of 41 million euro (up 35 million euro 1998), largely through operations outside the Olivetti Group (22 million euro).

1154

Human resources

At 31 December 1999, the Olivetti Group companies included in the consolidation had a total of 129,073 employees (16,742 at 31 December 1998).
Comparisons between the 31 December 1999 and 31 December 1998 figures are not significant; a breakdown of the situations as of 31 December 1998 and 31 December 1999 is set out below.

(employees)	December 31, 1999	December 31, 1999	Change

1156

Financial review

The Group

As a result of the Tender Offer for Telecom Italia S.p.A. by Olivetti S.p.A. and its Tecnost S.p.A. subsidiary, under which shares equivalent to 51.12% of common stock were tendered between 20 April and 21 May 1999 (which subsequent stock purchases on the market raised to 55% as of 31 December), a controlling interest was acquired in Telecom Italia S.p.A. pursuant to art. 2359 of the Italian Civil Code. The Telecom Italia Group was therefore included in the consolidation as from 1 January 1999 and was therefore a contributing factor to the Olivetti Group's costs, revenues, charges and income for the full year, with the amounts relating to the period prior to the acquisition (the first six months of the year) deducted from the net income figure and classified under the heading "Telecom Italia Group pre-acquisition result". Conversely, the equity investments in Omnitel and Infostrada (sold after the acquisition of Telecom Italia) and in Modinform and Olivetti Ricerca (also sold during the year) were excluded from the consolidation as from 1 January 1999 and their income statements were excluded from the consolidation as from the same date.
The radical change in the area of consolidation of the Olivetti Group means there is no significant basis for comparisons between the 1999 balance-sheet and income-statement figures and those of 1998. Nevertheless, for the purpose of full disclosure, the tables in this financial review set out the figures for both years.

***

In 1999, the Olivetti Group reported consolidated net income of 4,939 million euro arising from overall revenues of 28,207 million, largely through the Telecom Italia Group (27,104 million euro).
At 31 December 1999, the Olivetti Group's total shareholders' equity was 26,310 million euro (9,549 million after minority interests) compared with 1,943 million euro at 31 December 1998 (1,261 million after minority interests). The increase of 24,367 million euro was largely due to the share capital increases executed after the Tender Offer and to the year's income figure of 6,995 million euro, of which 4,939 million relating to the Olivetti Group.
Net financial indebtedness at 31 December 1999 was 27,379 million euro, an increase of 25,848 million euro compared with 31 December 1998 (1,531 million euro), largely as a result of borrowings relating to the Tender Offer, which are explained in detail below.
1999 capital expenditure amounted to 2,405 million euro, not including 1,518 million euro at the Telecom Italia Group in the period prior to the acquisition date.
R&D costs were 189 million euro.

Group Business Performance

1999 business performance is reflected in the reclassified statement of income set out below, which, for the purpose of full disclosure, also includes Telecom Italia Group data for 1999.
The statement classifies income components by nature, with separate disclosure of non-recurring income and expense items that are not expected to continue at a similar level in future periods given the expected evolution of the business.

Olivetti Group – Statement of income

(in millions of euro)	Year 1999 Total	%	of which: Telecom Italia Group	(*) %	Year 1998	%

(*) amounts restated for consolidation purposes in the Olivetti Group

(**) the amounts concerning the Telecom Italia Group in the consolidated accounts of this latter have been classified as extraordinary items

Group revenues for the year totalled 28,207 million euro (not comparable with the 3,702 million euro reported in 1998 due, as noted above, to the significant changes in the organisational and business perimeter), of which 27,104 million for the Telecom Italia Group (as from 1999 shown gross of amounts due to other telecommunications operators).

(in millions of euro)	1999	1998	Change
Olivetti Lexikon Group	917	1,055	(138)
Specialised I.T. Systems Group	85	81	4
Telemedia Applicazioni S.p.A.	11	1	10

Total on a consistent comparable basis	28,207	26,275	1,932
Revenues from Telecom Italia Group acquired in 1999	-	(25,052)	25,052
Companies disposed of during 1999		2,479	(2,479)
Total Group	**28,207**	**3,702**	**24,505**

Operating costs and other recurring net charges amounted to 22,607 million euro in 1999, of which 20,625 million related to the Telecom Italia Group.
Specifically, 1999 depreciation and amortisation charges totalled 6,018 million (of which 5,293 million for the Telecom Italia Group). They included 638 million euro for amortisation of consolidation goodwill for six months, following the acquisition of 52.12% of Telecom Italia S.p.A. common stock in June 1999.
Earnings before interest and taxes and before non-recurring income and charges totalled 5,600 million euro (19.9% of net revenues).
Non-recurring income of 7,149 million euro comprised 7,000 million of capital gains from the year's disposals and 149 million from sundry income items and other income.
Capital gains from disposals of 7,000 million euro included:
- 289 million euro from the sale to Mannesmann in February 1999 of 12.4% of the equity of OliMan Holding B.V., as a result of which Olivetti's equity investment in the Dutch company decreased from 62.5% to 50.1%;
- 4,184 million euro from the sale to Mannesmann on 15 June 1999 of 31.5% of the equity of OliMan Holding B.V., as a result of which Olivetti's equity investment was further reduced, from 50.1% to 18.6%;
- 2,454 million from the sale in June 1999 of the residual 18.6% equity investment in OliMan Holding B.V. to OliMan Holding B.V. through a buy-back transaction, and elimination of the corresponding capital share in this company;
- 73 million euro from other disposals, including 26 million for Telecom Italia Group disposals (fixed asset and business unit disposals in respect of the reorganisation of the Italtel Group), 24 million from the sale on 29 March 1999 of Telecom Italia S.p.A. shares, 13 million from the sale of Wang Laboratories Inc. shares in respect of the Getronics N.V. Tender Offer, 5 million from the sale of the equity investment in Modinform S.p.A. and 5 million from the disposal of other fixed assets.

Other non-recurring income of 149 million euro comprised:
- 119 million relating to the Telecom Italia Group;
- 8 million from gains on receivables acquired from Wang in respect of acquisition value;
- 3 million from gains on the receivable for shares to be received from Wang Laboratories Inc. in relation to book value;
- 19 million for other income and sundry income.

1156

Non-recurring costs totalled 1,768 million euro (718 million euro in 1998). They comprised the costs of the Tender Offer for Telecom Italia for 740 million euro, and other non-recurring charges for 1,028 million euro.

The costs of the Tender Offer amounted to 740 million euro and arose as follows:

- commissions totalling 355 million on the "Bank Credit Line" of 6,060 million euro granted by bank consortia;
- fixed commissions of 35 million due to banks for commitments of by these banks to underwrite a bond loan in the event of a Tender Offer take-up of more than 90%;
- commissions of 8 million on the bridge loan of 2,600 million euro granted by Mediobanca for the period between the closure of the Tender Offer and collection of the proceeds from the Olivetti S.p.A. share capital increase;
- registration duty of 196 million relating to the Tecnost S.p.A. and Olivetti S.p.A. share capital increases;
- fees of 60 million for the organisation and coordination of the operation;
- 16 million in legal services;
- 3 million in legal consultancy fees;
- 2 million in tax services and consultancy fees;
- 19 million in communication expenses;
- 11 million in commissions payable by Olivetti S.p.A. to the banks handling the operation;
- 12 million for the Consob surveillance contribution;
- 17 million for contract stamp duty;
- 6 million in other expenses, consultancy fees and commissions.

With regard to registration duty for the share capital increases, given the amount and nature of the charge and as explained in the notes to the consolidated financial statements, as from the current year this duty is to be directly charged as incurred.

Other non-recurring charges, totalling 1,028 million euro, largely comprised:

- a 164 million provision for future charges including:

- 88 million for commitments to Mannesmann with regard to the sale of the equity investment in OliMan, in the event that Bell Atlantic should exercise its option to purchase Omnitel Sistemi Radiocellulari shares;
- a prudent provision of 75 million for possible future charges as a result of the Tender Offer for C.C.I.L. shares, which was completed in early 1999;
- 1 million in other charges;

- 280 million for charges relating to the downsizing of the workforce, including 251 million for the reorganisation of the Telecom Italia Group (mainly Telecom Italia S.p.A. and companies in the manufacturing and installation sectors) and 26 million for the Olivetti Lexikon Group;
- 187 million euro for Telecom Italia Group social welfare unification charges pursuant to Law no. 58/1992; these charges were recorded before the acquisition and consequently written off under the income statement caption "Telecom Italia Group pre-acquisition result";
- 29 million euro in charges sustained by Telecom Italia for the sale of 65% of Stream.
- 30 million in compensation to Wang Laboratories;
- a 23 million write-off for receivables due from OP Computers;

• 70 million to write off residual registration duty in respect of share capital increases (of which 66 million relating to the Telecom Italia Group), as a result of the introduction of a new accounting policy for these taxes as from the current financial year (previously, stamp duty was capitalised);
• 179 million in other non-recurring charges relating to the Telecom Italia Group.

Consolidated earnings before interest and taxes amounted to 10,981 million euro, compared with 587 million euro in 1998.

Interest expense and other charges, net, amounted to 149 million euro. They included net financial charges of 1,070 million euro, of which 449 million relating to the Telecom Italia Group and 621 million to other Group companies. Of this latter amount, 507 million related to bond loans and included 383 million for bond loans issued during the year in connection with the Tender Offer; these financial charges were offset by income from equity investments of 921 million euro, as follows:

- 146 million from equity investments in associated companies in the Telecom Italia Group;
- 757 million attributable to Tecnost S.p.A. for prepaid tax credits on Telecom Italia dividends, of which 233 million relate to dividends collected and 524 million to dividends not yet collected but recorded as accrued following the change in the accounting principle about dividends from subsidiary companies, to conform with the Telecom Italia Group accounting policies;
- 18 million in income from equity investments in associated companies relating to dividends and related tax credits.

Exchange rate differences showed a net loss of 30 million euro (of which 24 million relating to the Telecom Italia Group), mainly as a result of Italian lira exchange rate trends in relation to the non-EMU currencies in which the Group transacts its business and financial operations. The item included the effect of the year's hedging operations.

Value adjustments to financial asset generated a net write-down of 600 million euro, of which 584 million for the Telecom Italia Group. They largely related to the Group's share of the net results of subsidiaries and associated companies, valued with the equity method; they also included amortisation of consolidation goodwill arising at the time of purchase of these equity investments. The item also included 16 million euro relating to other companies in the Group, of which a 12 million euro writedown of securities held as current assets.

Taxation for the year amounted to 3,207 million euro, equivalent to 31.4% of pre-tax income, of which 2,606 million related to the Telecom Italia Group and 761 million to Olivetti S.p.A; such amounts are counterbalanced by 170 million in net prepaid tax credits at Tecnost S.p.A. in respect of the future benefit of the tax losses for the year which the Group is reasonably certain to realise in future years for the portion not offset by the deferred taxation on dividends (and relevant tax credit) by Telecom Italia accounted for as accrued.

Income attributable to minority interests was 1,145 million euro. It included 672 million attributable to the minority shareholders of the Telecom Italia Group and 508 million to those of Tecnost.

As a result, Group consolidated net income for 1999 was 4,939 million euro, net of 911 million relating to the net result of the Telecom Italia Group for the period prior to the acquisition.

1160

Analysis of the Consolidated Balance Sheet

The Olivetti Group balance sheet as of 31 December 1999 is summarised in the table set out below:

(in millions of euro)	December 31, 1999 (a)	%	December 31, 1998 (b)	%	Change (a-b)
Short term assets:					
Financial resources and loans	3,426	4.5	1,517	19.6	1,909
Operating assets	12,430	16.5	2,380	30.7	10,050
Total short-term assets	**15,856**	**21.0**	**3,897**	**50.3**	**11,959**
Medium/long-term assets					
Financial receivables and securities	29	0.0	31	0.4	(2)
Intangible fixed assets	28,044	37.1	1,729	22.3	26,315
Tangible fixed assets	23,865	31.6	1,662	21.5	22,203
Other assets	7,732	10.3	422	5.5	7,310
Total medium/long-term assets	**59,670**	**79.0**	**3,844**	**49.7**	**55,826**
Total assets	**75,526**	**100.0**	**7,741**	**100.0**	**67,785**
Short-term liabilities					
Short-term debt	6,543	8.7	770	9.9	5,773
Operating liabilities	15,290	20.2	2,155	27.9	13,135
Total short-term liabilities	**21,833**	**28.9**	**2,925**	**37.8**	**18,908**
Medium/long-term liabilities					
Medium/long-term debt	24,291	32.2	2,309	29.8	21,982
Other medium/long-term liabilities	3,092	4.1	564	7.3	2,528
Total medium/long-term liabilities	**27,383**	**36.3**	**2,873**	**37.1**	**24,510**
Total liabilities	**49,216**	**65.2**	**5,798**	**74.9**	**43,418**
Total shareholders' equity	**26,310**	**34.8**	**1,943**	**25.1**	**24,367**
Total liabilities and shareholders' equity	**75,526**	**100.0**	**7,741**	**100.0**	**67,785**

Short-term assets at 31 December 1999 totalled 15,856 million euro compared with 3,897 million at 31 December 1998. The net increase of 11,959 million largely reflected an increase due to the assets of the Telecom Italia Group (12,751 million) and a decrease arising from the sale of the Omnitel and Infostrada consolidated equity investments for 1,260 million.

Medium/long-term assets amounted to 59,670 million compared with 3,844 million at the end of 1998. The net increase (55,826 million) arose largely from an increase for 25,922 million due to consolidation goodwill arising from the acquisition of Telecom Italia, of which 24,896 million related to the Tender Offer, and an increase of 32,729 million from the line-by-line consolidation of the Telecom Italia Group, set against a decrease arising from the deconsolidation of Omnitel and Infostrada.

Short-term liabilities at 31 December 1999 were 21,833 million euro, compared with 2,925 million at the end of 1998, an increase of 18,908 million largely attributable to the Telecom Italia Group.

Medium/long-term liabilities amounted to 27,383 million compared with 2,873 million at the end of 1998. The net increase of 24,510 million was largely due to the effect of the consolidation of Telecom Italia (8,121 million) and to the bond loans issued during the year (17,368 million), as analysed in greater

1161

detail in the Explanatory Notes to the consolidated financial statements, and to a decrease as a result of the sale of Omnitel and Infostrada (1,241 million).
Analysis of capital invested at 31 December 1999 and related funding is set out below:

(in millions of euro)	December 31, 1999	%	December 31, 1998	%	Change
Short-term operating assets	12,430		2,380		10,050
Short-term operating liabilities	(15,290)		(2,155)		(13,135)
Operating working capital	(2,860)	(5.0)	225	5.6	(3,085)
Intangible fixed assets	28,044	49.4	1,729	42.8	26,315
Tangible fixed assets	23,865	42.0	1,662	41.2	22,203
Other assets	7,732	13.6	422	10.4	7,310
Capital invested (A)	**56,781**	**100.0**	**4,038**	**100.0**	**52,743**
Medium/long-term non financial liabilities	3,092	5.4	564	14.0	2,528
Minority interests	16,761	29.6	682	16.9	16,079
Group shareholders' equity	9,549	16.8	1,261	31.2	8,288
Total non financial sources (B)	**29,402**	**51.8**	**2,507**	**62.1**	**26,895**
Net financial indebtedness (A–B)	**27,379**	**48.2**	**1,531**	**37.9**	**25,848**

Capital invested in 1999 rose by 52,743 million euro, largely as a result of consolidation goodwill arising from the equity acquisition in Telecom Italia (in respect of both the Tender Offer and the subsequent stock purchases of the second half) and the inclusion of Telecom Italia in the Olivetti Group consolidation, net of the effect of the sale of controlling shareholdings (chiefly Omnitel and Infostrada).
Capital invested (56,781 million euro) was financed by non-financial sources for 51.8%, mainly through total shareholders' equity (26,310 million euro, equal to 46.4%), which rose by 24,367 million compared with 31 December 1998, largely as a result of the share capital increases at Olivetti S.p.A. (3,229 million euro), income for the year (4,939 million euro) and other movements totalling 120 million, as well as of the increase of 16,079 million in minority shareholders' equity.
The main capital operations performed during the year were as follows:
• share capital increases totalling 5,840,6 billion lire (3,016 million euro) completed in July 1999 with the issue of 1,497,601,424 common shares at 3,900 lire per share, in execution of the Board of Directors' resolution of 7 April 1999 making partial use of the powers granted by the Extraordinary Shareholders' Meeting of the same day, which authorised the issue of up to 1,521,923,691 common shares, each with a par value of 1,000 lire, reserved to holders of common, preferred and savings shares (including shares arising from the exercise of "Olivetti 1998-2002 common share warrants" prior to the utilisation of the pre-emptive right) and of holders of convertible bonds, at a price of 3,900 lire per share (equivalent to about 2.014 euro). In light of the actual number of warrants exercised, the exact number of shares issued was 1,497,601,424; the overall proceeds raised were used entirely to finance the Tender Offer;
• share capital increases totalling 270.4 billion lire (140 million euro), through the issue at par of 270,354,542 common shares following the exercise of an equal number of "Olivetti 1998-2002 common share warrants";

1162

• share capital increases totalling 78 billion lire (40 million euro), through the issue at par of 78,006,880 common shares following the exercise of an equal number of bonds in respect of the "Olivetti 1998-2002 floating-rate bond loan";
• a share capital increase for a total amount of 12 billion lire (6 million euro), through the issue at par of 12,000,000 common shares for the benefit of managers of Olivetti S.p.A. and its subsidiaries following the exercise of an equal number of warrants reserved to such managers, in execution of the Board of Directors' resolution of 18 February 1998 in respect of the powers granted to the Board by the Shareholders' Meeting of 29 April 1993;
• a share capital increase for a total amount of 48.8 billion lire (25.2 million euro) through the issue of 21,038,333 common shares at 2,320 lire per share reserved to managers of the parent company and its subsidiaries in execution of the Directors' resolution of 9 June 1999 in respect of the powers granted to the Board by the Shareholders' Meeting of 7 April 1999;
• a share capital increase of 0.8 billion lire (0.4 million euro) through the issue of 847,233 common shares following the conversion of an equal number of "Olivetti 1998-2002 floating-rate" bonds.
Group net financial indebtedness (27,379 million euro) financed the remaining 48.2% of invested capital and rose by 25,848 million euro (8,138 million relating to the Telecom Italia Group) compared with 31 December 1998 (1,531 million euro, after the reclassification for consistency with 1999 of 18 million euro comprising interest accruals, and prepayments, included in indebtedness, and receivables due after 12 months, excluded from indebtedness). Net financial indebtedness is analysed below:

	December 31, 1999			
(in millions of euro)	Telecom Italia Group	Other companies	Total	Dec. 31, 1998
Financial resources	(2,092)	(1,155)	(3,247)	(1,453)
Current portion of medium/long-term debt	1,292	232	1,524	278
Short-term bank loans and amounts due to other providers of finance	3,677	799	4,476	426
Interest accruals and prepayments, net	95	269	364	2
Total short-term net financial indebtedness (resources) (A)	**2,972**	**145**	**3,117**	**(747)**
Medium/long-term net financial indebtedness (B)	**5,166**	**19,096**	**24,262**	**2,278**
Total net financial indebtedness (A+B)	**8,138**	**19,241**	**27,379**	**1,531**

The short-term net financial position in 1999 worsened by 3,864 million euro as a result of the following components:

(in millions of euro)	Year 1999
Short-term net financial indebtedness of the Telecom Italia Group as of the acquisition date	1,305
Change in the short-term financial position of the Telecom Italia Group after the acquisition date	1,667
Extraordinary proceeds	(11,565)
Extraordinary payments	29,939
Changes in interest accruals and prepayments and other, net	186
New medium/long-term loans, net of current portions	(17,668)
Total	**3,864**

Extraordinary proceeds of 11,565 million euro included the Olivetti S.p.A. share capital increases for 3,229 million euro, the Tecnost S.p.A share capital increase for the portion subscribed by minority shareholders (398 million euro) and proceeds of 7,153 million euro from OliMan.
Extraordinary payments of 29,939 million euro mainly comprised 26,899 million euro for the Tender Offer on Telecom Italia, 863 million euro for expenses relating to share capital increases and the costs of the Tender Offer, and 1,707 million euro for subsequent acquisitions of Telecom Italia stock (1,349 million euro) and Tecnost stock (358 million euro).
Net medium/long-term financial indebtedness rose by 21,984 million euro as a result of the following components:

(in millions of euro)	Year 1999
Medium/long-term net financial indebtedness of the Telecom Italia Group as of the acquisition date	5,233
Change in the medium/long-term financial indebtedness of the Telecom Italia Group after the acquisition date	(67)
Deconsolidation of equity investments disposed of during the year and other	(850)
New medium/long-term debt, net of current portions	17,668
Total	**21,984**

The caption New medium/long-term debt included bond loans for a total amount of 15,868 million euro issued by Tecnost through its subsidiaries, which, with the related guarantees, were as follows at the end of December 1999:

Issuer	Denomination	Maturity	Rate	Garantor	In millions of Euro
Tecnost Int. NV	Tecnost International NV 1999-2004 t.v.	5 years	Euribor at 3 months+1,85%	Olivetti and Tecnost	9,444
Tecnost Int. Finance NV	Tecnost Intl. Finance NV 1999-2004	5 years	5 3/8%	Tecnost	4,500
Tecnost Int. Finance NV	Tecnost Intl. Finance NV 1999-2009	10 years	6 1/8%	Tecnost	1,750
Tecnost Int. Finance NV	Tecnost Intl. Finance NV 1999-2029	30 years	5%	Tecnost	174
Total					**15,868**

In June 1999, Tecnost International N.V. issued a bond loan for a nominal value of 9,444 million euro in respect of the Tender Offer for Telecom Italia.
The bonds mature over 5 years, from 23 June 1999 to 23 June 2004 (with early redemption at the discretion of the issuer: not earlier than 36 months from the date of issue, nor, in the event of heavier tax burden for the issuer, earlier than 18 months from the date of issue for tax purposes), and bear a floating interest rate equivalent to three-month Euribor plus 185 base points.
The bonds, listed in Italy and Luxembourg, were issued for a total nominal value of approximately 9,444 million euro (about 18,285 billion lire), of which approximately 7,944 million euro (about 15,381 billion lire) in respect of the relevant Tender Offer consideration and about 1,500 million euro (about 2,904 billion lire) underwritten by Chase Manhattan International, Donaldson Lufkin & Jenrette International, Lehman Brothers International (Europe) and Mediobanca.

1164

In July 1999, Tecnost returned to the international capitals markets with a mid-term 6.25 billion euro bond (12,100 billion lire, subdivided into two tranches). The rates applied to the bonds, which were issued by Tecnost International Finance N.V. (wholly owned by Tecnost International, which in turn is wholly owned by Tecnost S.p.A.) and guaranteed by Tecnost S.p.A. as part of a new program of Euro Medium-Term Notes (EMTN), are as follows:

- 5-year bonds for 4,500,000,000 euro, maturing in July 2004, at 5 3/8% p.a.
- 10-year bonds for 1,750,000,000 euro, maturing in July 2009, at 6 1/8% p.a.

The proceeds raised by the issue were used for early repayment on 30 July 1999 of the bank loan arranged in June to finance part of the cash consideration for the Tender Offer on Telecom Italia common shares. The operation was lead managed by Chase Manhattan, Donaldson Lufkin & Jenrette, Lehman Brothers and Mediobanca.

The early repayment of the bank loan enabled full release of all the guarantees and commitments pledged in respect of the Tender Offer, lowered average debt servicing costs and extended average maturity.

As part of the Euro Medium-Term Notes program, on 28 October 1999 Tecnost International Finance N.V. issued a bond loan repayable in 2009, subscribed in its entirety by a sole Japanese investor for an amount of 20 billion yen. The loan (over which a 5% yearly rate interest matures with reference to a notional amount of USD 18.6 million), was immediately converted into euro. An interest rate and currency swap contract was taken out on the loan for the entire amount and for a similar term, under which the original amount was converted into 174 billion euro and the fixed rate was converted into a six-monthly floating euro rate.

The changes analysed above in the short-term net financial position (a deterioration of 3,864 million euro) and in medium/long-term financial indebtedness (an increase of 21,984 million euro) generated a net financial requirement for the year of 25,848 million euro.

Information by sector (CONSOB communication no. 98084143)

A) Information by business sector

The consolidated statement of income set out on the following page shows the results for consolidation purposes of the companies included in the consolidation. These results differ from those appearing in the companies' respective statutory accounts. The principal consolidation adjustments are the elimination of intercompany gains and depreciation charges on assets transferred within the Group, the reversal of tax-related entries made largely in respect of depreciation, the valuation of equity investments (equity investments, by definition, appear in the consolidated accounts as the appropriate portion of the company's net equity used for consolidation purposes) and other adjustments made to align the results of the individual companies with the accounting policies adopted by the Group.
The reclassified consolidated balance sheet by company is also set out in the following pages.

B) Other information

It should be noted that:

- intercompany transactions between different business sectors or geographical areas are executed at market prices and eliminated during consolidation;
- a description of the types of products offered and services provided is given in the first half of the Report on operations.

"Introduction of the Euro" disclosure (CONSOB communication no. 98083971)

As from 1 January 1999, the accounts of the parent company Olivetti S.p.A. are kept directly in euro, beginning three years ahead of the 1 January 2002 date required by law.
The amounts disclosed in the parent company financial statements for 1999 and in the Group consolidated financial statements as of 31 December 1999, as well as the amounts in the Directors' Report on Operations, are therefore stated in euro.
With regard to the other Group companies included in the consolidation, plans are being made for the introduction of the euro as the currency of account, in parallel with the development of new information systems.
The expenses sustained by the Telecom Italia Group in this connection amounted to approximately 5 million euro, most of which have been charged as production costs since they concern services provided for adjustments and upgrades to information systems.

"Year 2000" disclosure (CONSOB communication no. 98079574)

The costs sustained by the Telecom Italia Group for information system adjustments (approximately 114 million euro) have been charged to the income statement; costs relating to the enhancement of software with new, more complex functionalities (62 million euro) have been capitalised as intangible fixed assets. These accounting policies are consistent with those adopted for the introduction of the euro.
With regard to the other companies in the Olivetti Group, the cost of projects undertaken in 1999 amounted to a total of 11 million euro. In accordance with the Group's general accounting policies, these costs have been capitalised since they relate to the introduction of new information systems based on technologies and architectures designed to implement the Year 2000 date change.
In a limited number of specific cases, existing information systems were adjusted to ensure Year 2000 compatibility; the relevant projects have been completed and the supplier has already provided the relevant certificates of conformity; a minimal amount of work is still underway and will be completed by the end of the current year.
The Plan for the introduction of new information systems will be completed during 2000 for an estimated total cost of one million euro.

The Parent Company, Olivetti S.p.A.

Olivetti S.p.A. closed financial 1999 with net income of 2,832.1 million euro (a net loss of 96.6 million euro in 1998).
Components contributing to this result included:
• positive components:
– 6,398.2 million euro of net extraordinary income, including a capital gain of 6,891.9 million arising from the sale of OliMan Holding B.V. (6,609.4 million euro from the sale of the residual 50.1% investment as a result of the Tender Offer for Telecom Italia common shares);
• negative components:
– 2,396.8 million euro in equity investment writedowns and coverage of losses, including a writedown of the equity investments in Tecnost S.p.A. and Olivetti International S.A. for 2,171.7 million in order to enjoy tax benefits for which the company would not otherwise have been eligible;
– 761.1 million euro in income taxes for the year;
– 175.6 million euro in provisions to the reserve for risks and future charges;
– 232.6 million euro in other net charges arising from ordinary operations, including interest expense of 72.2 million euro on borrowings raised mainly to finance the Tender Offer, depreciation, amortisation and writedowns of 39.1 million, contractual guarantees and indemnities for 53.1 million, personnel costs for 21.8 million, services for 40.9 million and other net charges for 5.5 million.
1999 capital expenditure totalled 17,241.5 million euro (396.7 million in 1998) of which:
– 17,239.4 million euro in equity investments (393.2 million in 1998);
– 2.1 million euro in tangible fixed assets (3.5 million euro in 1998);
Equity investment expenditure, totalling 17,239.4 million euro, comprised:
– 856.2 million euro for acquisitions, of which 827.8 million relating to 50% of the equity of C.C.I.L. Inc. purchased through a tender offer (and subsequently disposed of), 19.5 million for 9.8% of the capital of Tecnost S.p.A. (an operation performed before the share capital increase executed as a result of the Telecom Italia Tender Offer) and 8.9 million in other minor acquisitions;
– 16,208.3 million euro to underwrite share capital increases, mainly 16,205 million at Tecnost S.p.A. in respect of the Tender Offer and 2.8 million at Lottomatica S.p.A.;
– 174.9 million euro for loss coverage and share capital increases, relating to Olivetti International S.A. for 120 million euro, Olivetti Finanziaria Industriale S.p.A. for 19 million euro, Olivetti Ricerca S.p.A. for 11.5 million euro and Sy.F.A. S.p.A. for 24.4 million euro.
Parent Company shareholders' equity as of 31 December 1999 was 7,454.4 million euro (1,394.1 million euro at 31 December 1998) and net financial indebtedness was 2,058.4 million euro (59.7 million at 31 December 1998).

***

1174

The business performance of the Parent Company in 1999 is reflected in the income statement set out below, with companies holding equity investments reclassified in compliance with Consob requirements pursuant to communication no. 94001437.

Net income (loss) for the year	**2,832.1**	**(96.6)**	**2,928.7**

1999 ordinary operations closed with a loss of 2,805 million euro (418 million in 1998), which included the following items:

- 80.6 million of financial income (113.2 million in 1998), of which:
  * 16.8 million of dividends and tax credits (14.2 million from Lottomatica, 1.7 million from Mediobanca, 0.6 million from Finsiel and 0.3 million from Fin. Priv.) compared with 47.7 million in 1998;

1175

* 63.8 million of other financial income (65.5 million in 1998) of which:
  - 17.1 million from securities held as current assets (28.2 million in 1998) consisting largely of government securities;
  - 17.2 million of interest from subsidiary companies (19.9 million in 1998) of which 8.6 million from Tecnost for borrowings related to the Tender Offer on Telecom Italia shares;
  - 29.5 million of interest and other income from third parties (15.6 million in 1998), specifically:
    - ✓ 9.5 million of receivables from the tax authorities (8.3 million in 1998),
    - ✓ 7.2 million of exchange rate gains (2.1 million in 1998),
    - ✓ 6.4 million from bank current accounts (1.4 million in 1998),
    - ✓ 6.4 million of other income (5.2 million in 1998).

- 152.8 million euro of interest expense and other financial charges (78.8 million in 1998) of which:
  * 11.8 million on bond loans (20.1 million in 1998),
  * 15.4 million on medium/long-term borrowings (18.5 million in 1998),
  * 58.1 million on borrowings related to the Tender Offer, of which 52.1 million payable to subsidiary companies,
  * 20.2 million of exchange rate losses (3.1 million in 1998),
  * 6.3 million from use of bank credit lines (5 million in 1998),
  * 15.5 million for early resolution of a hedging contract relating to fluctuation risks,
  * 25.5 million on other financial operations (32.1 million in 1998).
- a 2,396.8 million writedown of equity investments in subsidiaries and associated companies (197 million in 1998) including:

(in millions of euro)	1999	1998
Tecnost S.p.A.	2,071.3	-
Olivetti Lexikon S.p.A.	212.3	34.6
Olivetti International S.A.	100.4	62.2
Olivetti Finanziaria Industriale (O.F.I.) S.p.A.	14.6	54.1
Olivetti Multiservices S.p.A.	5.3	-
Eurofly S.p.A.	1.4	-
Modinform S.p.A.	-	32.5
Olivetti Ricerca S.p.A.	-	11.8
Sy.F.A. S.p.A.	24.4	14.3
Others	0.1	0.2
Total write-downs	2,429.8	209.7
Provision to the reserve for write-downs of investments	-	33.0
less: utilization of the reserve for the write-down of investments	(33.0)	(45.7)
Total	**2,396.8**	**197.0**

The Tecnost S.p.A. and Olivetti International S.A. equity investment writedowns, pursuant to art. 2426 par 2 of the Italian Civil Code, were made exclusively in order to enjoy tax benefits for which the company would not otherwise have been eligible; specifically, the Tecnost S.p.A. writedown was obtained by

decreasing book value by an amount equal to the difference between book value and the arithmetic average of daily stock prices for the last six months, as provided under art. 66, par 1 bis of Presidential Decree no. 917/1986; the Olivetti International S.A. writedown was obtained by adjusting book value to use the net equity.
Had these writedowns not been made, net income for the year and shareholders' equity as of 31 December 1999 would both have been higher by an amount of 1,368.2 million euro (2,171.7 million euro before taxes).
Use of the reserve for equity investment writedowns amounted overall to 33 million euro, of which 24.4 million for losses at Sy.F.A. S.p.A. and 8.6 million to cancel the residual amount which was no longer considered necessary.

- 17.1 million in other income from operations (40.8 million in 1998) largely comprising revenues from Group companies;
- 353.1 million of other costs of operations (296.2 million in 1998), including:
  - * 40.9 million for non-financial services received (56.5 million in 1998);
  - * 20.9 million in depreciation and amortisation (40.5 million in 1998) which chiefly included:
    - 19.9 million relating to intangible fixed assets (29.4 million in 1998), of which 16 million relating to expenses on share capital increases executed in 1999 as a result of the Tender Offer, and 3.1 million to expenses on a 1998 share capital increase,
    - 1 million relating to tangible fixed assets (11.1 million in 1998),
  - * 18.2 million for writedowns of receivables (32.2 million in 1998) of which 17.5 million relating to receivables acquired from Wang Global S.p.A.;
  - * 175.6 million for provisions to the reserve for risks and future charges (125.4 million in 1998) which included:
    - 87.6 million relating to commitments to Mannesmann in relation to the sale of the equity investment in OliMan, in the event of Bell Atlantic exercising its option to purchase Omnitel Sistemi Radiocellulari shares at a pre-determined price,
    - 74.6 million for possible future charges arising from the public tender offer on C.C.I.L. formulated in 1999,
    - 7.5 million for guarantees to the subsidiary O.F.I.,
    - 5.9 million for other risks and future charges,
  - * 21.8 million for payroll costs (26.8 million in 1998) of which 1.9 million in lay-off charges;
  - * 72.1 million for other operating charges (14.8 million in 1998) which included:
    - 29.8 million for indemnities to Wang Laboratories Inc.,
    - 5.1 million for taxes other than income taxes,
    - 23.3 million for guarantees,
    - 8.6 million for losses on receivables,
    - 5.3 million for other charges,
  - * 3.6 million for leases and rentals.

The loss on ordinary operations of 2,805 million euro (418 million in 1998) was offset by net income of 6,398.2 million for non-recurring items, consisting of income of 6,925.3 million (370.4 million in 1998), which included capital gains on disposals for 6,907.1 million euro (286.8 million in 1998) and other income for 18.2 million (83.6 million in 1998).

1177

Capital gains on disposals of 6,907.1 million mainly arose from the sale of equity investments, as follows:
- 282.5 million euro from the sale to Mannesmann on 19 February 1999 of 12.4% of the equity investment in OliMan Holding B.V., as a result of which Olivetti's investment in the Dutch company decreased from 62.5% to 50.1%;
- 6,609.4 million euro of which 4,155.8 million from the sale to Mannesmann AG on 15 June 1999 of 31.5% of the equity investment in OliMan Holding B.V., as a result of which Olivetti's investment further decreased, from 50.1% to 18.6%; and 2,453.6 million from the sale of the residual 18.6% equity investment in OliMan Holding B.V. to the issuer in order to cancel the corresponding capital stake of the latter;
- 13.3 million euro from the sale of the equity investment in Wang Laboratories Inc. through take-up of the public tender offer launched by the Dutch group Getronics in June;
- 1.5 million euro from the sale of 12.13% in Eurofly Service S.p.A.;
- 0.4 million euro from the sale of other equity investments.

Other income, amounting to 18.2 million euro, included:
- 8.1 million on collection of receivables repurchased from Wang Global S.p.A.;
- 2.8 million on collection of a higher amount of the receivable from Wang Laboratories Inc. for shares to be received;
- 7.3 million in other income.

Extraordinary charges amounted overall to 527.1 million euro (49 million in 1998) and comprised:
- 509.6 million for costs relating to the Tender Offer for Telecom Italia, as follows:
  * commissions totalling 305 million on the "Bank Credit Line " of 6,060 million euro granted by bank consortia to the Olivetti Group;
  * fixed commissions of 35.3 million due to banks for pledges by these banks to underwrite a bond loan in the event of a Tender Offer take-up of more than 90%;
  * 7.8 million in commissions on the 2,600 million euro bridge loan granted by Mediobanca for the period between the closure of the Tender Offer and collection of proceeds from the Olivetti S.p.A. share capital increase;
  * fees of 60.4 million for the organisation and coordination of the operation;
  * 30.1 million in registration duty relating to the 1999 share capital increase;
  * 16.4 million in legal services;
  * 2.9 million in legal consultancy fees;
  * 1.6 million in tax services and consultancy fees;
  * 18.5 million in communication expenses;
  * 10.9 million in commissions payable to the banks handling the operation;
  * 12.1 million for the Consob surveillance contribution;
  * 2.4 million for contract stamp duty;
  * 6.2 million in other expenses, consultancy fees and commissions;
- 7.1 million relating to the sale of equity investments, specifically:
  * 3.6 million in respect of Olivetti Ricerca S.p.A.;
  * 1.7 million in respect of Modinform S.p.A.;
  * 1.4 million in respect of the sale of Olivetti Sanità to OiS S.p.A.;
  * 0.4 million in respect of other equity investments;

1178

- 10.4 million in other charges comprising:
  * 4.6 million relating to the guarantee given by Mannesmann A.G.;
  * 3.3 million to write off residual registration duty in respect of share capital increases; previously, registration duty was capitalised;
  * 2.5 million in other charges.

After providing income taxes totalling 761.1 million (of which 711 million for current taxes and 50.1 million for deferred taxes), net income amounted to 2,832.1 million (a loss of 96.6 million in 1998).
The **balance sheet** of Olivetti S.p.A. as of 31 December 1999 is summarised in the table below:

(in millions of euro)	Dec. 31, 1999	Dec. 31, 1998	Change
Short-term assets			
Financial resources	416.0	867.2	(451.2)
Operating assets	278.8	451.6	(172.8)
Total short-term assets	**694.8**	**1,318.8**	**(624.0)**
Medium/long-term assets			
Financial receivables and marketable securities	0.2	0.5	(0.3)
Equity investments	10,050.1	1,139.4	8,910.7
Other medium/long-term assets	170.8	63.5	107.3
Total medium/long-term assets	**10,221.1**	**1,203.4**	**9,017.7**
Total assets	**10,915.9**	**2,522.2**	**8,393.7**
Short-term liabilities			
Short-term debt	372.0	295.7	76.3
Operating liabilities	980.7	194.1	786.6
Total short-term liabilities	**1,352.7**	**489.8**	**862.9**
Medium/long-term liabilities			
Medium/long-term debt	2,102.6	631.7	1,470.9
Other medium/long-term liabilities	6.2	6.6	(0.4)
Total medium/long-term liabilities	**2,108.8**	**638.3**	**1,470.5**
Total liabilities	**3,461.5**	**1,128.1**	**2,333.4**
Shareholders' equity	**7,454.4**	**1,394.1**	**6,060.3**
Total liabilities and shareholders' equity	**10,915.9**	**2,522.2**	**8,393.7**

Short-term assets as of 31 December 1999 totalled 694.8 million euro, a decrease of 624 million compared with 1,318.8 million as of 31 December 1998, due largely to a reduction in interest-bearing current accounts relating to subsidiaries (341.2 million euro).
Medium/long-term assets as of 31 December 1999 totalled 10,221.1 million euro compared with 1,203.4 million as of 31 December 1998, a net increase of 9,017.7 million, of which 8,910.7 million in equity investments mainly arising from subscription of the share capital increase organised by the subsidiary Tecnost S.p.A. in respect of the Tender Offer (11,602 million), offset by a 2,071.3 million writedown of this equity investment.

Short-term liabilities amounted to 1,352.7 million euro compared with 489.8 million as of 31 December 1998; the 862.9 million increase comprised 76.3 million for increased debt and 786.6 million in operating liabilities, of which 761.1 million for income tax.
Medium/long-term liabilities, consisting largely of debt, totalled 2,108.8 million euro as at 31 December 1999, an increase of 1,470.5 million compared with 31 December 1998.
Specifically, medium/long-term debt rose by 1,470.9 million. The increase comprised the borrowing of 1,506.7 million from Olivetti Holding B.V. in respect of the Tender Offer, offset by a decrease of 74.3 million, of which a decrease of 35.8 million in amounts due to banks and 38.5 million for conversion of the "1998-2002 floating-rate bond loan".

The table set out below analyses capital invested as of 31 December 1999 and related financing:

(in millions of euro)	Dec. 31, 1999	%	Dec. 31, 1998	%	Change
Short-term operating assets	278.8	2.9	451.6	30.9	(172.8)
Short-term operating liabilities	(980.7)	(10.3)	(194.1)	(13.3)	(786.6)
Operating working capital, net	(701.9)	(7.4)	257.5	17.6	(959.4)
Long-term assets	10,220.9	107.4	1,202.9	82.4	9,018.0
Capital invested (A)	**9,519.0**	**100.0**	**1,460.4**	**100.0**	**8,058.6**
Medium/long-term non financial liabilities	6.2	0.1	6.6	0.5	(0.4)
Shareholders' equity	7,454.4	78.3	1,394.1	95.5	6,060.3
Total non financial sources (B)	**7,460.6**	**78.4**	**1,400.7**	**95.9**	**6,059.9**
Net financial indebtedness (B–A)	**2,058.4**	**21.6**	**59.7**	**4.1**	**1,998.7**

The rise of 8,058.6 million in capital invested arose from 9,530.7 million for subscription of the Tecnost share capital increase, net of the relative writedown and other equity investment writedowns, set against the 959.4 million euro change in operating working capital.
Capital invested was financed mainly by shareholders' equity (78.3%), which increased by 6,060.3 million as a result of net income for the year of 2,832.1 million and the share capital increase of 3,228.2 million. The residual (21.6%) was financed through external sources.

As of 31 December 1999, the Parent Company therefore had net financial indebtedness of 2,058.4 million, analysed in the table set out below:

(in millions of euro)	Dec. 31, 1999	Dec. 31, 1998	Change
Short-term financial resources			
Liquid funds	(98.9)	(55.0)	(43.9)
Financial assets and receivables from thrid parties	(251.7)	(391.3)	139.6
Financial assets and receivables from subsidiary companies	(65.3)	(419.6)	354.3
Financial assets and receivables from associated companies	(0.1)	(1.3)	1.2
Total short-term financial resources	**(416.0)**	**(867.2)**	**451.2**
Short-term debt			
Current portion of medium/long-term debt	63.7	168.0	(104.3)
Bank borrowings and amounts due to other providers of finance	280.3	106.0	174.3
Debt to subsidiary companies	28.0	21.6	6.4
Debt to associated companies	-	0.1	(0.1)
Total short-term debt	**372.0**	**295.7**	**76.3**
Total short-term net financial resources (A)	**(44.0)**	**(571.5)**	**527.5**
Medium/long-term financial assets			
Receivables for subsidised loans to subsidiary companies	(0.2)	(0.5)	0.3
Total medium/long-term financial assets	**(0.2)**	**(0.5)**	**0.3**
Medium/long-term debt			
Bonds	303.2	341.7	(38.5)
Debt to subsidiary companies	1,506.7	-	1,506.7
Bank borrowings and amounts due to other providers of finance	254.2	290.0	(35.8)
Medium/long-term accrued interest expenses	38.5	-	38.5
Total medium/long-term debt	**2,102.6**	**631.7**	**1,470.9**
Total medium/long-term net financial indebtedness (B)	**2,102.4**	**631.2**	**1,471.2**
Total net financial indebtedness (A+B)	**2,058.4**	**59.7**	**1,998.7**

The 527.5 million euro deterioration in the current net financial position reflected a decrease of 451.2 million in resources and an increase of 76.3 million in short-term debt. The decrease in resources was largely due to the decrease of 354.3 million euro in receivables and interest accruals from subsidiaries (of which receivables of 287.9 million due from OliMan Holding B.V. as of 31 December 1998 and collected on the sale of this company to Mannesmann A.G. in 1999) and to the decrease of 139.6 million in financial assets largely as a result of the closure of reverse repurchase agreements on securities.
Short-term debt rose by 76.3 million euro due to an increase of 174.3 million in exposure to banks and other providers of finance, largely in relation to the Tender Offer, offset by the 104.3 million reduction in the current portion of medium/long-term debt following payment of amounts due.

The medium/long-term net financial position deteriorated by 1,471.2 million euro, due for 1,506.7 million to the borrowing from Olivetti Holding B.V. in respect of the Tender Offer, offset by bond loan conversions of 38.5 million and repayments of amounts due to banks for 35.8 million.
The year's requirement therefore amounted to 1,998.7 million. In addition to the requirement of 89 million euro in respect of ordinary operations, it also included a requirement of 1,909.7 million euro in respect of the following extraordinary operations:

(in millions of euro)	Year 1999
Payments for Tecnost S.p.A. share capital increase (including the amount relating to shares subscribed by the Company deriving from the warrants not exercised by third parties for 0,8 millions of euro)	16,205.0
Disposal of Telecom Italia S.p.A. shares to Tecnost S.p.A.	(4,601.8)
Costs sustained for the Tender Offer for the Telecom Italia S.p.A. shares	502.4
Payments relating to equity investments acquired, loss coverage and reinstatements capital	257.6
Costs for share capital increase	81.2
Share capital increases:	
- 1999 share capital increase	(2,985.0)
- 1998-2002 common share warrants exercised	(171.1)
- conversion of 1998-2002 bond	(40.7)
- warrant exercise reserved to managers related to the stock option plan	(31.4)
Total financial effect deriving from the disposal of OliMan equity investment	(7,153.3)
Net financial effect deriving from the acceptance to Getronics N.V. tender offer on Wang Laboratories Inc.	(143.6)
Other income net	(9.6)
Total financial requirement for the year from extraordinary operations	**1,909.7**

Dealings with related parties

Olivetti S.p.A.'s financial and commercial dealings with subsidiaries and associated companies are conducted at market conditions and consist mainly of the provision of services, treasury operations and coordination of the activities of the subsidiaries, which is the natural role of a Group holding company. Transactions and balances with such related parties can be summarised as follows:

(in millions of euro)	Subsidiary companies	Associated companies
Financial income	17.1	-
Financial charges	54.2	-
Other revenues	8.5	-
Purchases of goods and services	157.5	-
Trade and other receivables	3.9	0.5
Financial receivables	65.5	0.2
Trade and other payables	3.4	0.1
Financial payables	28.0	-

1182

Employee stock options

During 1999, a "Three-Year 1999-2001 Stock Option Plan" for the benefit of approximately one hundred managers of Olivetti S.p.A. and its subsidiaries was approved as a tool to provide incentives and boost management loyalty. Authorised by a Directors' resolution of 9 June 1999 and supplemented with a subsequent resolution of 29 November 1999 (partly in recognition of the outstanding efforts during the Public Tender Offer for Telecom Italia), on the basis of the criteria previously established on 15 December 1998, the Plan provides for a maximum of 48 million warrants, which cannot be transferred inter vivos, to be assigned free of charge to the beneficiaries. Each warrant gives an option on one Olivetti common share at an overall price (nominal value + share premium) of 2,320 lire, for a maximum nominal share capital increase of 48 billion lire. This increase, resolved by the above-mentioned Directors' meetings in execution of the powers delegated in respect of art. 2443 of the Italian Civil Code (by the extraordinary Shareholders' Meeting of 7 April 1999) complies with the limits set by art. 134, par 2, of Legislative Decree 58/1998.

The warrants may be exercised at pre-specified times during the three-year period and may be accumulated until the end of the Plan. The first tranche was exercised during 1999; exercise of the second and third tranches has been set between 1 and 31 January of 2001 and 2002 respectively; the Plan also links access conditions to the performance of Olivetti's share price.

The Company has not implemented any operations favourable to subscription of its shares by its employees pursuant to art. 2358 of the Italian Civil Code.

During 1999, the Stock Option Plan approved in 1998 was completed with the second tranche of the Plan. These stock options were reserved for managers of Olivetti S.p.A. and its subsidiaries in recognition of the skills and efforts contributed by these managers to enable the Group, and the Parent Company in particular, to overcome the serious difficulties of the last few years.

The second tranche provided for the free assignment of 12,000,000 warrants with options on 12,000,000 Olivetti common shares at a price of 1,000 lire per share.

The exercise of these options generated a 12 billion lire increase in the share capital of Olivetti S.p.A.

1183

Shares in Olivetti S.p.A. and its subsidiaries held by Directors and Statutory Auditors of the Parent Company (Consob regulation no. 11971/1999)

In compliance with Consob regulation 11971/1999, shares in the Parent Company and its subsidiaries held by the Directors and Statutory Auditors of Olivetti S.p.A. are detailed below:

	Companies	Shares held at Dec. 31,1998 (*)	Type of shares	Type of ownership	Shares purchased in 1999	Shares sold in 1999	Shares held at Dec. 31, 1999 (**)

(3) deriving from the Tender Offer for Telecom Italia common shares
(4) operations carried out by an asset administration company within the mandate of autonomous administration
(5) sale including shares delivered in acceptance of the Tender Offer for Telecom Italia
(6) shares deriving from Stock Options plans, as well as from the subscription of 1999 capital increase deriving from the exercise of relevant warrants
(7) shares deriving also from the Tender Offer for Telecom Italia shares
(8) shares deriving from the exercise of warrants relating to the Stock Options plans

As of 31 December 1999 Roberto Colaninno held, through Omniaholding S.p.A., no. 17,782,962 shares of Fingruppo Holding S.p.A., the majority shareholder of HOPA S.p.A.. In addition, at the same date he owned no. 24,011,132 shares of HOPA S.p.A., the majority shareholder of Bell S.A. (a company formed in Luxembourg); this latter owned no. 841,265,829 Olivetti S.p.A. common shares, equal to more than the 17.47% of the share capital.

Other information

Olivetti S.p.A. treasury stock as of 31 December 1999 comprised 2,697,500 savings shares for a total par value of 2,697,500,000 lire, equal to 1.4 million euro. These shares are stated at cost of 2.3 million euro. As required by law, restrictions have been established on an equity reserve for a corresponding amount. Olivetti S.p.A. is not controlled by another company, as defined in art. 2359 of the Italian Civil Code (disclosure pursuant to art. 2428 of the Italian Civil Code).

1185

Equity investment writedowns pursuant to tax law

Olivetti S.p.A.

The writedowns of the equity investments in Tecnost S.p.A. (2,071.3 million euro) and Olivetti International S.A. (100.4 million euro) pursuant to art. 2426 par 2 of the Italian Civil Code were made in compliance with tax laws solely in order to take advantage of fiscal benefits for which Olivetti S.p.A. would not otherwise have been eligible. The Tecnost S.p.A. investment writedown was made by reducing book value by an amount equal to the difference between book value and the arithmetic average of daily stock prices for the last six months, as provided by art. 66 par 1 bis of Presidential Decree no. 917/1986. The Olivetti International S.A. investment writedown was made by adjusting book value to the net equity, on the basis of the financial statements as of 31 December 1999 approved by the Shareholders' Meeting in April.
Had these writedowns not been made, the year's result before taxes of Olivetti S.p.A. would have been higher by an amount of 2,171.7 million euro (the total amount of the writedowns), while net income after the theoretical tax charge and shareholders' equity as of 31 December 1999 would have been higher by an amount of 1,368.2 million euro.
As a result of the above, consolidated earnings benefited from the decrease of 803.5 million euro in taxes provided by Olivetti S.p.A.; had the above writedowns not been made, the Olivetti Group's consolidated net income and shareholders' equity would have been 803.5 million euro lower.

Tecnost S.p.A.

The writedown of 4,000 billion lire (2,065.8 million euro) in Tecnost S.p.A.'s equity investment in Telecom Italia S.p.A. pursuant to art. 2426 par 2 of the Italian Civil Code was made in compliance with tax laws solely in order to take advantage of fiscal benefits for which Tecnost S.p.A. would not otherwise have been eligible. The writedown was made by reducing book value by an amount not exceeding the difference between book value and the arithmetic average of daily stock prices for the last six months, as provided by art. 66 par 1 bis of Presidential Decree no. 917/1986.
Had this writedown not been made, Tecnost S.p.A. would have reported a positive result before taxes (2,698.9 billion lire, equal to 1,393.9 million euro), an improvement corresponding to the amount of the writedown (4,000 billion lire, equal to 2,065.8 million euro); net result after the theoretical tax charge and shareholders' equity as of 31 December 1999 would have been 2,929.1 billion lire better (1,512.8 million euro).

***

As a result of the above, consolidated earnings benefited from the record of a Tecnost S.p.A. deferred tax asset of 1,070.9 billion lire (553.1 million euro) arising from the tax losses originating as a result of the above writedown which the Tecnost Group is reasonably certain of realizing. Had the above writedown not been made, the Tecnost Group's consolidated net loss and consolidated shareholders' equity as of 31 December 1999 would have been 1,070.9 billion lire higher and lower respectively.

1186

These effects are obviously reflected in the Olivetti Group's consolidated financial statements for the relevant percentage amounts.
Since the above differences were generated as described from equity investment writedowns pursuant to art. 2426, par 2, of the Italian Civil Code, they will remain unchanged in subsequent financial statements, as will the related tax benefits.
In the event of and to the extent that the above equity investments are sold, such differences would be cancelled and subjected to the relevant taxation.

1187

Legal proceedings or arbitration

Telecom Italia Group

The companies in the Telecom Italia Group are involved in numerous legal proceedings relating to the normal course of their business; although the list of the various types of dispute is not complete, the main areas of litigation concern collection of unpaid bills, recovery of damages to community assets, complaints lodged by customers regarding services provided. In addition, a number of legal proceedings relating to alleged abuses of Telecom Italia's former monopoly position and antitrust proceedings opened by the Italian and European authorities in respect of market regulation and competition are underway.
Should the outcomes of these proceedings be unfavourable to the companies in the Telecom Italia Group, they would not have significant negative effects on the Group's financial position and results.
In order to provide a full description, the main legal proceedings concerning companies in the Telecom Italia Group are described below.

a) Dispute with the INPS (Italian national insurance board)

In compliance with Law no. 58/1992, Telecom Italia is required to provide full insurance coverage for all persons employed as of 20 February 1992 by the STET, SIP, Italcable and Telespazio companies, and for persons transferred from the Public Administration to IRITEL, including periods previously worked in other companies, through the "Fondo Previdenza Telefonici" (Telephone Sector Pension Fund). The contributions due are calculated by the INPS and must be paid in 15 annual instalments.
The total liability for these payments is uncertain due to a disagreement between Telecom Italia and the INPS with regard to the method used to calculate the amounts due.
The positions of the two parties are currently the subject of a legal proceeding. Telecom Italia believes that the total liability relating to these contributions as of 31 December 1999 can be estimated as between 1,800 billion lire (930 million euro) and 2,400 billion lire (1,240 million euro) of which 381 billion (197 million euro) have already been paid, net of the residual amount already recorded by IRITEL and currently stated in the accounts of Telecom Italia and TIM as of 31 December 1999 following the merger of IRITEL (1,477 billion lire, 763 million euro).
In compliance with the relevant accounting policies, and also in order to determine goodwill, the consolidated financial statements of the Tecnost Group therefore include a provision corresponding to the minimum estimated liability.

b) Dispute between TIM and the Antitrust Authority

On 28 September 1999, the Antitrust Authority ruled that TIM and Omnitel had adopted anti-competitive practices consisting of:
1) agreements on fixed-to-mobile communication charges in 1998;
2) an agreement dated 6 January 1999 relating to the re-balancing of end-user fixed-to-mobile charges,
3) similar practices with regard to the conditions applied to the other competitors (in particular as regards interconnection charges).
On the basis of its findings, the Antitrust Authority fined TIM for an amount of approximately 100 billion lire. Tim and Omnitel have filed an appeal with the Administrative Court for the Region of Lazio requesting the suspension of the fine.

1186

c) Dispute between Telecom Italia and the Antitrust Authority

On 8 September 1999, the Antitrust Authority initiated a formal investigation to ascertain whether Telecom Italia had abused its dominant position to the detriment of its competitors Tiscali and Albacom with regard to inverse interconnection charges.
On 10 March 2000, Telecom Italia submitted a proposal to the Antitrust Authority regarding standard inverse interconnection charges, which the Authority approved. In the findings of the investigation, notified to Telecom Italia by the Authority on 30 March 2000, the Authority acknowledges the proposal, ruling it sufficient to remove the abuses of which Telecom Italia is accused and eliminate any discrimination with regard to competitors. The proceeding is due to be closed by 31 July 2000.
On 7 February 2000 the Antitrust Authority served Telecom Italia with an ordinance stating the termination of the investigation initiated on 15 July 1998 following the denouncement made by the Italian Association of Internet Providers (AIIP) regarding abusement by Telecom Italia of its dominant position. The ordinance, whilst imposing a small fine (Lire 1,248,000,000) also acknowledges the outstanding support provided by Telecom Italia during the investigation and the competitive affects of the settlement agreement finalized by Telecom Italia with AIIP on 9 September 1999 eliminating any discriminations as far as Internet Providers are concerned.
On 17 November 1999, the Authority began an investigation to ascertain whether Telecom Italia had abused its dominant position in marketing innovative access methods based on ADSL technology. The investigative proceeding is due to close on 30 May 2000.
The Antitrust proceedings described above are regarded as physiological in view of the rapid liberalisation taking place in the high-growth telecommunications sector.

Olivetti S.p.A. and other companies in the Olivetti Group

1. As noted in previous Directors' Reports, transactions in the beneficial ownership of shares in Italian companies were once a common treasury management practice among leading Italian public- and private-sector groups. The transactions entered into by Olivetti, all terminated in 1992, were closed and executed in full compliance with prescribed accounting, statutory and fiscal requirements; they were disclosed in the Directors' Reports and the relevant financial statements were certified without exceptions by the auditors.
A number of investigating magistrates decided to bring criminal charges against the companies that had transacted these operations; however, the courts concerned (Milan, Ravenna, Padua, Udine, Vicenza, Mantua, Ivrea, Pordenone and Trieste) all rejected the allegations of illicit acts and acquitted all the defendants.
With regard to developments in the dispute relating to the administrative charges brought by the financial authorities, see "Comments on Liabilities – B) Reserves for risks and charges ".

2. The investigations opened by the Public Prosecutor in Milan in connection with the presentation on 16 May 1993 of the memorandum by the then Chairman-Chief Executive Officer regarding which the company has already issued a number of statements (including, in particular, a statement in the Directors'

1189

Report in the 1993 Annual Report) were continued by the Public Prosecutor in Rome following the transfer of the case for reasons of territorial jurisdiction. A number of proceedings are still underway, others have been closed with rulings in favour of Olivetti.

3. With regard to the dispute in the Rome courts between Olivetti and Poste Italiane S.p.A. for non-payment by Poste Italiane S.p.A. of products and/or technical assistance supplied, sentences passed until today are in favour of Olivetti. Such sentences were recently appealed by Poste Italiane S.p.A..

4. With a sentence filed on 25 February 1999, the Rome courts revoked an injunction obtained by Olivetti against the Ministry of Employment for the payment of supplies for an amount of approximately 42.4 billion lire (including interest). The Ministry of Employment had already paid Olivetti the full amount due during the proceedings, after the court had ruled that the sentence was provisionally effective.
Olivetti has contested the ruling of the Rome courts: given that the findings of the first-degree magistrate were substantially based on the absence of documentation deposited by Olivetti during the previous hearing, Olivetti is confident that the decision will be fully reversed by the appeal court, sanctioning its demand for payment.

5. The case brought by Centenary Corporation and Centenary International Corporation against Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A. (which merged Sy.F.A. S.p.A., which had in turn merged Olivetti Personal Computers S.p.A.) for damages (put at 250 billion lire) the plaintiffs allege they suffered as a result of the acquisition of the Olivetti Group's personal computers business is still underway in the Ivrea courts.
Olivetti and its legal advisors believe the case to be objectively groundless in fact and in law and intended to disguise the evident responsibilities and management shortcomings of the purchasers.
Olivetti and its subsidiary Olivetti Finanziaria Industriale S.p.A. are going to start legal proceedings against Piedmont International S.A. to collect receivables due from the latter, or well as for incurred damages.

1190

Events subsequent to the end of the financial year

Olivetti S.p.A.

Purchase of the industrial assets of the Tecnost Group

On 2 February, Tecnost S.p.A. sold Olivetti S.p.A. its equity investment in Tecnost Sistemi S.p.A., the company to which the industrial actitivies of the Tecnost Group, consisting of the operations in special service automation systems and gaming/betting systems, had been transferred on 31 December 1999. The sale price of Tecnost's equity investment in Tecnost Sistemi was set at a total of 250 billion lire.
The transaction meets the need to rationalise the Olivetti Group's current operating structure, with Olivetti S.p.A. focusing on the management and growth of operations in industries complementary to telecommunications, through directly controlled companies. The role of Tecnost, as a result of the role acquired following the Tender Offer for Telecom Italia, acts as a holding for the Group's telecommunications operations.

Acquisition of 45% of Logicasiel (now Webegg S.p.A.) and subsequent share capital increase

On 21 February, Olivetti paid Britain's Logica 52 billion lire to purchase its 45% investment in Logicasiel, a company owned 55% by Finsiel (Telecom Italia Group).
Today, Logicasiel has about 260 employees and offices in Milan, Turin and Bologna. Its 1999 revenues were approximately 60 billion lire (up 15% compared with 1998). After the operation, Logicasiel S.p.A. changed its name to Webegg S.p.A.
Webegg offers consultancy services and IT solutions for web companies, i.e., companies that operate, communicate and create business opportunities on the Internet. Webegg's strategy is to offer companies highly innovative Web solutions based on financial, services and telecommunications application platforms and a policy of partnerships with international companies. The strategic objective of this acquisition is to strengthen Olivetti's direct involvement in business network solutions, where it already operates through its TeleAP and Olivetti Lexikon subsidiaries, which are enhancing their offers with new products, services, technologies and web appliances.
On 27 March 2000, the Webegg Extraordinary Shareholders' Meeting approved a proposal to raise the company's share capital from about 700,000 euro to 20 million euro, granting the Board of Directors powers for a further increase of 26 million euro. The fresh capital will be immediately used to finance Webegg's growth plan, with investments in projects, acquisitions and international alliances; in this way, Webegg will strengthen its activities as an e-business developer for web companies, offering consultancy services on organisational repositioning, web consultancy and implementation of web-integration solutions. As a result of the share capital increase, Webegg will be jointly owned on a 50/50 basis by Olivetti and Finsiel.

Proposal to convert preferred and savings shares into common shares

On 24 February 2000, the Olivetti Board of Directors decided to ask forthcoming General and Special Shareholders' Meetings to approve the conversion at par of all 15,221,888 outstanding preferred shares and 78,629,488 outstanding savings shares into an equal number of common shares, with a nominal value of 1,000 lire per share, dividend rights accruing as from 1 January 2000, with all share categories maintaining the respective dividends accrued as of 31 December 1999. In this connection, on 16

1191

December last, the Board decided to ask the Shareholders' Meeting called to approve the 1999 Annual Report to approve payment of a per-share dividend of 60 lire to common shares, 70 lire to preferred shares and 375 lire to savings shares, with this latter amount including the larger sum accrued with reference to financial 1998 and 1997, as allowed under the Company By-Laws. At their next meeting, the Directors will convene the General and Special Shareholders' Meetings and arrange for the conversion to take place upon presentation/payment of dividend coupons, to be approved by the end of June. The decision to ask a forthcoming extraordinary Shareholders' Meeting to approve the conversion of preferred and savings shares was taken in order to align the interests of all shareholder categories by simplifying the company's capital structure, given that preferred and savings shares account respectively for only 0.31% and 1.63% of total capital.

Three-year stock options plan

On 24 February 2000, the Board of Directors resolved a three-year stock option plan to run as from 1 January 2002 until 31 December 2004, for the benefit of managers of the Parent Company and its subsidiaries, through the assignment of 29,500,000 free warrants with rights to subscribe to an equal number of Olivetti common shares, at a price per share of 3.705 euro (7,174 lire); this is the normal value of Olivetti common shares as of the Board of Directors meeting, i.e., the arithmetic average of the official stock price on the Italian Stock Exchange's automated trading system for the previous 30 days.

Tecnost S.p.A.

Sale of the equity investment in Tecnost Sistemi S.p.A. to Olivetti S.p.A.

As described in detail in the section illustrating the events relating to Olivetti S.p.A., on 2 February 2000, Tecnost S.p.A. sold Olivetti S.p.A. its equity investment in Tecnost Sistemi S.p.A.

Equity investment in Telecom Italia S.p.A.

On 2 February 2000, Tecnost announced that the equity investment held by the Parent Company and by its Tecnost Intenational N.V. subsidiary in the common capital of Telecom Italia S.p.A. had decreased from 55.001% to 54.95% as a result of the issue of new Telecom Italia shares carried out last december, in respect of stock option plans. Subsequently, on 11 February 2000, additional common shares were purchased on the market, bringing the total number of shares held to 2,894,171,132, representing 55.021% of Telecom Italia S.p.A.'s common capital.

Listing of Tecnost 1999-2004 warrants on the automated trading system

On 31 March, Tecnost S.p.A. filed an application with Borsa Italiana SpA for its Tecnost 1999-2004 Common Share Warrants to trade on the automated trading system. The application for admission to trading refers to 1,028,215,600 outstanding warrants, of which 889,790,894 owned by Olivetti, issued with respect to the share capital increase resolved by the Board of Directors on 6 April 1999 in partial execution of the powers conferred by the Extraordinary Shareholders' Meeting held the same day.

1192

Telecom Italia Group

A number of the important events that have occurred since the closure of the financial year implement the guidelines of the 2000-2002 Long-Term Strategic Plan approved by the Telecom Italia Board of Directors last December. The key points of the strategy planned by Telecom Italia are as follows:
- simplification and focus on three business areas - telecommunications services, Internet and multimedia services, IT pole - and disposal of non-strategic operations;
- core role of the Internet and data transmission;
- creation of Tin.it S.p.A. to enhance the Internet business and take advantage of all relevant opportunities;
- further growth of mobile telephony with a shift towards value-added services;
- focus on international expansion, with acquisitions and alliances on foreign markets, especially in the mobile telephony business in Europe and Latin America;
- recovery of efficiency and cost reductions of 4,000 billion in fixed line telephony.

The capital expenditure required by the plan amounts for the three-year period to approximately 30,000 billion lire, of which 16,500 for fixed-line telephony (more than 5,000 billion lire will be allocated over the period to upgrades to the fixed network, with priority on development of the broadband network infrastructure), 6,500 for mobile telephony and 7,000 for international operations and other activities.

Main events and initiatives:

Tin.it - Seat Pagine Gialle

On 15 March, the Board of Directors approved plans for a merger between Tin.it and Seat Pagine Gialle. The new company will be the leading Italian player in terms of Internet access, portals and advertising online and in telephone directories. It will be the only European operator covering the entire Internet value chain, thanks in part to an integrated business-to-business platform that is unique of its kind in Europe.
The operation involves, first, the creation of Tin.it S.p.A., a wholly owned Telecom Italia subsidiary comprising the assets of TIN, the Telespazio equity investment in Viasat, the Saritel content management division and the Subscriber Directory management. Tin.it S.p.A. was formed on 7 April; this will be followed by the transfer of 8% of the capital of Tin.it. S.p.A. to Seat, which will raise its own capital through a common-share reserved for Telecom Italia shareholders. Finally, Tin.it will be merged with Seat by the end of the summer; Telecom Italia's stake in Seat will rise to 64%.
A joint venture will be formed by Seat and TIM to exploit opportunities in e-commerce and build an offer of content and services on WAP and UMTS platforms. In the publishing field, an initiative will be launched with De Agostini to enhance the editorial content on the Seat-Tin.it Internet platforms.
On 8 May, Telecom Italia launched a public tender offer for Seat Pagine Gialle common and savings shares. The offer applies to all outstanding shares excluding those on which Telecom Italia has acquisition rights pursuant to a previous agreement dated 15 March. The tender offer, which ends on 26 May, is designed to give Seat Pagine Gialle shareholders who do not support the planned merger with Tin.it the opportunity to relinquish their shares on similar terms.

Commercial agreements for Internet services

As part of its Internet services development strategy, with a special focus on e-banking, Telecom Italia has reached a series of agreements with some of Italy's leading banks, including: Banca Popolare di Milano, Banca Popolare di Vicenza, Banca Nazionale del Lavoro, Banca di Roma, Banca Popolare di Verona, Banca Intesa. The agreement with Banca Intesa also covers an integrated offer of IBM hardware and Internet access via Tin.it.
Telecom Italia has also signed an accord with Cartasì for an offer combining a new, secure credit card for making purchases on the Internet and the Tin-it "e-Vai" web access package.
It has also reached agreements with Assicurazioni Generali, for the development of a broadband multi-service telematics network linking head office with the company's more than 800 branch offices, and with the "Il Sole – 24 Ore" business daily, for the development of online trading e-banking services.

Savings share buy-back

On 14 January 2000, the Shareholders' Meeting authorised an irrevocable voluntary public tender offer on 742,615,722 savings shares representing 10% of total share capital and 34.28% of savings capital, at a price of 6.5 euro per share, for a maximum countervalue of approximately 4.8 billion euro.
The offer, effective from 17 February 2000 to 17 March 2000, was executed in Italy and in the USA where it was filed as an issuer tender offer, pursuant to the 1934 Securities Exchange Act. In compliance with US law, and in order to guarantee equal treatment for all shareholders, irrespective of residence, the offer allowed for tenders to be cancelled at any time within the period of the offer.
For the first time in the case of a non-totalitarian offer, collection of tendered shares, and of any cancellations, took place via the automated trading system
On closure, just 1,793,820 shares had been tendered, all of which were collected and paid on 24 March 2000.
The Shareholders' Meeting of 14 January 2000 that authorised the offer also provided that, in the event of fewer shares being tendered than the number to which the tender offer applied, purchases should continue via the automated trading system, at the same price of 6.5 euro per share, for not more than nine months from the end of the offer period (and in any case within a maximum term of 18 months from 14 January 2000), to permit acquisition of a maximum amount of shares equal to the difference between the maximum number of 742,615,722 and the actual number of shares originally tendered.

Suppression of the Fondo Previdenza Telefonici

Pursuant to art. 41 of Law no. 488 of 23 December 1999 (2000 State Budget), on 1 January 2000 the welfare fund for employees running public telephone services (FPT, Fondo Previdenza Telefonici) was suppressed. As from the same date, the holders of benefits under this fund were registered under compulsory general insurance schemes, and are accounted for separately under the "employees pension fund". The regulations applied in relation to the suppressed fund continue to apply to these workers.
In order to finance the higher contributions arising from application of FPT regulations, it was decided that for the three-year period 2000-2002, the companies with personnel registered under the suppressed

fund would make an annual extraordinary contribution to the INPS national insurance board of 150 billion lire. The amount payable by the Telecom Italia Group will be expensed as incurred in the relevant three years.

UMTS

The Antitrust Authority is conducting a review of current mobile communications regulations. In this regard, TIM has asserted its right to launch a digital UMTS service in Italy without having to bid for a licence, since, under the terms of the current convention, TIM is already the holder of "public digital mobile communication services, independently of the technology used".
In March, the associated company Retevision Movil, which operates on Spain's mobile communications market with the Amena brand, was awarded a UMTS licence.

Italtel

On 9 February, at the Ministry of Employment, an agreement was reached with the trades unions regarding the company restructuring, under which a reduction of approximately 1,200 jobs will be made in the present workforce and a number of employees with new technical-professional skills will be recruited over the three years 2000-2002. The first phase of the plan provides for application of a mobility scheme and extraordinary redundancy benefits to 641 people as from 1 March 2000.

Sirti

On 7 February 2000, in execution of the resolution of the Extraordinary Shareholders' Meeting of 15 December 1999, Sirti S.p.A. underwent a partial spin-off, with the transfer of its property assets and related operations to the newly formed IMMSI S.p.A.. The new company was admitted for trading on 11 February; as from the same date, Sirti common shares are listed "after spin-off"".

Teleleasing

In early 2000, an agreement was reached for the sale of a 60% equity stake in Teleleasing, as a result of which Mediobanca, with 80%, will own a majority shareholding in the company; Telecom Italia's equity investment will decrease to 20%.

Iridium

On 17 March 2000, Iridium Llc. filed an application with the New York bankruptcy court requesting authorisation to cease mobile satellite communication services for its 55,000 customers. Its decision was taken as result of the failure to find a buyer for the network of 66 satellites handling the service. The network will remain in service for a number of months to meet the needs of certain customers in remote parts of the Earth (including a scientific expedition to the North Pole). A ruling is pending from the US judge regarding the company's transition from receivership to liquidation.

1195

Brazil

On 31 January 2000, Tele Centro Sul Participaçoes (TCS), in which Telecom Italia indirectly holds a 19.6% equity investment through Stet International Netherlands, made an offer to acquire 100% of Telebrasil Sul (TBS), which holds 31.5% of the total equity of Compania Riograndense de Telecomunicaciones (CRT). The TCS offer was the only offer presented in respect of a procedure for which ANATEL, the Brazilian regulatory authority, had ruled 4 February to be the final date by which Telefonica, CRT's majority shareholder, could sell its equity investment, which is incompatible with its position as controlling shareholder of Telesp, the São Paulo telephone operator.
Having rejected the TCS offer as inadequate, Telefonica has appealed to the Federal Court for a reversal of the ANATEL ruling. It is not possible at this time to predict the outcome of this matter nor the length of time involved.

Company reorganisation plan

On 28 March 2000, Telecom Italia reached an agreement with the trades unions regarding its development and reorganisation plan. The agreement will enable the company to implement the planned job cuts (approximately 13,000) and reductions in overheads. Telecom Italia will therefore be in a stronger and more efficient position to operate on a market that is changing rapidly and under growing competitive pressure.
In the three years 2000-2002, the reorganisation will concern the Network and Italian Market divisions and staff functions. Ordinary mobility facilities pursuant to Law no. 223/1991 will be implemented for 5,300 people, redundancy benefits for 2,200 people, intercompany mobility schemes for 1,000 people, solidarity and flexitime contracts for 600 people; the company also confirmed the overall number of surplus workers, for whom, in addition to the facilities described above, it will also be introducing retirement incentives for approximately 3,000 people, as well as non-replenishment of turnover. Retraining and skills conversion programmes will be organised for approximately 15,000 people. The plan also provides for the recruitment of 6,200 people (including 2,000 in southern Italy), most of whom will be working in areas related to the new economy, customer care and technological development.
The company is currently drawing up plans to implement the agreement.
In April, the Telecom Italia Group announced a new organisation comprising corporate functions and six business units: Fixed Telephony, Mobile Telephony, Internet, International, Information Technology, Venture Capital.

Peru: acquisition of the third mobile telephone licence

At the end of March, the Telecom Italia Group was awarded the third mobile telephone licence in Peru after presenting an offer worth US$ 180 million through STET Mobile Holding. The licence authorises Telecom Italia to offer a PCS 1900 MHz service throughout Peru, for a renewable 20-year period.

Turkey: acquisition of the third mobile telephone licence

On 12 April, a consortium formed by the Telecom Italia Group (49%) and IS Bank (51%) was awarded Turkey's third mobile telephony licence. TIM will have full powers to run future operations on this market, which has 1.5 million GSM users and offers significant potential.

1196

Auna, a new telecommunications holding in Spain

In April, Telecom Italia, Endesa and Union Fenosa formed a holding named Auna for their respective Spanish telecommunications equity investments. Auna holds the three partners' equity investments in Retevision, Retevision Interactiva-EresMas (Internet), Amena (mobile telephony), Quiero TV and a number of cable TV operators. Endesa owns 38.89% of the holding, Telecom Italia 37.50% and Union Fenosa 23.61%.

Meie

On 6 April, Telecom Italia and Unipol Assicurazioni signed an agreement for the sale of the majority shareholding in the Meie Group. The transaction provides for the sale of the 51.2% investment in Meie Assicurazioni and the 51% investment in Meie Vita (the remaining 49% is owned by Meie Assicurazioni), for a price of approximately 670 billion lire.

1197

Outlook on the year 2000 performance

The consolidated results of the Olivetti Group will be influenced by the performance of the Telecom Italia Group. Although the latter operates in a constantly changing and increasingly competitive industry, its plans for a gradual rationalisation of costs and investments, together with a general improvement in efficiency, should enable it to improve the business and earnings results reported for 1999.
These expectations, together with the improvement expected in Olivetti's business results, should enable the Group to come close to breakeven in 2000, considering interest expense but excluding amortisation of consolidation goodwill relating to the acquisition of the equity investment in Telecom Italia.
Similarly, results at Olivetti S.p.A., affected by interest expense deriving from the indebtedness and lower overheads than in 1999, will benefit from dividends accrued by Tecnost S.p.A. (to be paid during financial 2001) in respect of Telecom Italia's results for financial 2000.

1198

Proposal for the allocation of Parent Company net income for the year 1999

The 1999 financial statements of Olivetti S.p.A. show net income of 2,832,065,254.99 euro and shareholders' equity as of 31 December 1999 of 7,454,374,853 composed as follows:

(in euro)	December 31, 1999
Share capital (equivalent to lire 4,815,238,805,000)	2,486,863,301.59
Increase in share capital to be registered with the Register of Companies	11,323,082.53
Additional paid-in capital	2,267,219,725.35
Capital payment on exercise of warrants	22,048.58
Additional paid-in capital to be registered with the Register of Companies	14,342,317.73
Reserve for treasury stock	2,298,155.73
Loss carried forward	(159,759,033.50)
Total share capital, reserves and results carried forward	**4,622,309,598.01**
Net income for the year	2,832,065,254.99
Total	**7,454,374,853.00**

The Board of Directors therefore proposes that the net income for financial 1999 of 2,832,065,254.99 be distributed as follows:

- 159,759,033.50 euro to cover losses carried forward;
- 520,249,387.12 euro to the legal reserve, including 141,603,262.75 euro, equivalent to the 5% of the net income for the year, increased by 378,646,124.37 euro as additional legal reserve connected to potential future share capital increases resulting after 31 December 1999 up to a maximum of total 114,383,634 euro (equivalent to 221,477,599,000 lire), in the theoretical hypothesis that after 31 December 1999, and within the relevant maturities, all the outstanding bonds are converted and all the outstanding warrants (including those related to the Stock Options) are exercized;
- 14,705,849.65 euro to 75,931,988 savings shares (having deducted treasury shares) through payment of a dividend per share of 375 lire (*);
- 550,301.44 euro to 15,221,888 preferred shares through payment of a dividend per share of 70 lire (*);
- payment of a dividend per share of 60 lire to common shares;
- distribution of the residual amount of the net income to common shares through payment of a dividend per share of lire 60 (*), after allocation to the extraordinary reserve in accordance with the resolutions will be taken by the Shareholders' Meeting.

(*) in addition to the portion of the dividend attributable to no. 2,697,500 treasury savings shares the total dividend of which, equal to 522,428.43 euro, increases proportionally the dividend distributed to the outstanding shares.

The Board of Directors

Explanatory Notes

Form and content of the financial statements

The financial statements as of 31 December 1999 have been prepared in accordance with the Italian Civil Code interpreted by the accounting principles established by the "Consigli Nazionali dei Dottori Commercialisti e dei Ragionieri" (the Italian Accounting Profession) and, in absence thereof, by the International Accounting Standards Committee (IASC). They comprise the Balance Sheet (prepared in accordance with the formats specified in articles 2424 and 2424 bis of the Italian Civil Code), the Statement of Income (prepared in accordance with the format specified in articles 2425 and 2425 bis of the Italian Civil Code as amended) and these Explanatory Notes.
The Explanatory Notes are provided to illustrate, analyse and supplement the data reported in the financial statements and include the information required by article 2427 of the Italian Civil Code, by other provisions of Legislative Decree no.127/1991 or by other laws; furthermore, additional information is provided in order to present a true and fair view even where not required by specific legislation.
The Explanatory Notes also include information relating to holding companies pursuant to Consob communication no. 94001437 of 23 February 1994.

Accounting policies

The main accounting policies adopted to prepare the financial statements as of 31 December 1999 comply with art. 2426 of the Italian Civil Code and are described below.

1) Intangible fixed assets

Intangible fixed assets are recorded at purchase or production cost including related charges and amortised over the residual period in which they are expected to provide benefit.
Start-up and expansion costs and purchased goodwill are capitalised with the prior consent of the Independent Auditors and amortised over a period of five years. As from the current year, registration duty relating to share capital increases is not capitalised under intangible fixed assets as in previous years, but charged against income, under Other operational charges. Registration duty relating to the 1999 share capital increase in respect of the Tender Offer on Telecom Italia has been accounted for as an extraordinary charge, as have all the other costs relating to the Tender Offer. The residual cost of duty capitalised under start-up and expansion costs in previous years has been reversed and accounted for as an extraordinary charge. Fixed assets are written down to reflect any other than temporary impairment in value and their book value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

2) Tangible fixed assets and accumulated depreciation

Tangible fixed assets are stated at purchase or construction cost, including financial charges incurred over the period of construction of the asset if this period is of significant duration. Tangible fixed assets are written down to reflect any other than temporary impairment in historical value net of accumulated

1207

depreciation and their original book value is reinstated in subsequent years if the reasons for such write-downs no longer apply.
Ordinary depreciation is provided on a straight-line basis using rates that reflect the residual useful lives of the assets concerned.
The company also provides accelerated depreciation for some categories of assets in order to defer payment of taxation on income, as allowed by current tax legislation.
Ordinary maintenance is expensed as incurred. Expenditure that extends the useful life of an asset is capitalised as part of the asset and depreciated over its residual useful life.

3) Equity investments and securities held as financial fixed assets

Equity investments held as financial fixed assets are stated at purchase cost (LIFO method with annual increments), and written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such writedowns no longer apply.
Securities held as fixed assets are valued at purchase cost (LIFO method with annual layers) and adjusted on a time-apportionment basis for the difference between such cost and redemption value, written down to reflect any other than temporary impairment in value; their original value is reinstated in subsequent years if the reasons for such writedowns no longer apply.

4) Accounts receivable and payable

Accounts receivable are recorded at estimated realisable value and classified as financial fixed assets or as current assets. Accounts payable are stated at face value.

5) Equity investments and securities not held as financial fixed assets

Securities and investments in listed companies not held as financial fixed assets are valued at the lower of cost and market value, the latter determined as the arithmetical mean of December stock prices; if the reasons for writedowns no longer apply, cost is reinstated in subsequent years to the extent that it does not exceed market value.
Securities held under reverse repurchase agreements are recorded at purchase cost and classified as financial assets not held as fixed assets.
Income and charges relating to such transactions are recognised on a time-apportionment basis, taking into account both the difference between the related spot and forward prices, and the income generated by such assets over the duration of the transactions.

6) Accruals, prepayments and deferrals

Accruals, prepayments and deferrals are determined to reflect the correct apportionment of revenue and expense transactions covering two or more accounting periods.

7) Reserves for risks and charges

Specific reserves are provided to cover known or likely losses or liabilities, the timing or extent of which are uncertain at year-end; the provisions reflect best estimates based on the information available.

1209

8) Reserve for employee severance indemnities

This reserve is formed in accordance with current legislation and employment contracts and reflects the liability accrued to all employees as of the balance-sheet date

9) Recognition of revenues

Revenues from services are credited to income at the time the services are provided.

10) Research and development

Under the terms of specific legislation, the Company received subsidised loans for research activities carried out in prior years; the entire residual value of pre-financing charges incurred until the collection of such loans, which were deferred in previous years, was charged against income in 1998 since research and development is no longer consistent with the Company's present activity as a financial holding.
Operating grants for research and technological innovation are recorded as they become receivable. Interest-relief grants to reduce interest expense on research loans are credited against financial charges on a time-apportionment basis.

11) Exchange differences arising on transactions in foreign currency and translation criteria

Receivables and payables denominated in non-EMU currencies are originally translated into euro using the accounting rates at the date of the respective transactions. Gains and losses arising at the time of collection or payment are credited or charged to income.
Gains or losses arising from alignment with the exchange rates of December are credited or charged to income for the period.
On 31 December 1998, receivables and payables originally denominated in EMU currencies were translated using the respective euro exchange rates as announced by the European Commission; in compliance with the accounting policies adopted to date and illustrated above, translation gains and losses were definitively credited or charged in full to 1998 income, under financial income/charges.
Total translation differences are illustrated in the comment on financial income and charges.

12) Forward currency transactions

Gains or losses identified by comparing the fixed forward rate of currency transactions to hedge specific foreign currency receivables and payables or foreign currency exposure, with the spot exchange rate at the time of the contract are recognised over the duration of the contracts; furthermore, gains or losses arising from a comparison of the spot exchange rate at the time of the contract with the year-end rate are recognised immediately if the effects of exchange-rate fluctuations on the underlying foreign currency assets and liabilities are also recognised.
Gains or losses arising from other forward purchases of sales of currency at fixed exchange rates, determined by reference to the comparable forward rates at the balance-sheet date, are recorded in the statement of income.

1209

13) Forward interest rate transactions

The interest-rate differentials to be paid or received on interest rate swaps and similar agreements are recognised on a time-apportionment basis as interest income or expense.
The consideration for options acquired or sold in connection with forward interest rate transactions are recognised in the statement of income over the duration of such options.

14) Dividends

As from the current year, dividends and related tax credits of subsidiary companies are recognised in the year such income is formed; dividends of other equity investments are recognised at the time of collection.

15) Gains from demergers

Gains from the transfer of businesses in respect of the demerger process are credited to income and classified as extraordinary income.

16) Value adjustments and provisions charged exclusively for tax purposes

Value adjustments and provisions charged exclusively for tax purposes – accelerated depreciation as allowed under specific tax laws and writedowns of equity investments – are recorded under the respective income-statement headings.

17) Income taxes

Current tax liabilities are provided, where applicable, as amounts due to tax authorities, based on a reasonable estimate of taxation for the year. In addition, in accordance with the balance-sheet liability method, deferred taxes or prepaid taxes are recognised on all temporary differences between the book values of assets and liabilities and their corresponding tax values, applying current tax rates.
The future benefits of tax-loss carry-forwards are recognised to the extent that a reasonable certainty exists that future taxable income will be available against which such carry-forwards can be utilised, in accordance with current legislation.

18) Grouping of financial statement items

The financial statements as of 31 December 1999 do not include any groupings of items.

19) Accounting currency

As from 1 January 1999, the Company has adopted the euro as its accounting currency; all amounts in the explanatory notes are therefore in euro, to two decimal places unless otherwise specified. The balance-sheet and income-statement balances of the previous year have been translated into euro.

20) Departures allowed under par 4, article 2423 of the Italian Civil Code

No departures as allowed under par 4, art. 2423 of the Italian Civil Code have been applied.

1200

21) Changes in the application of accounting policies

As explained above, beginning in 1999 a new accounting policy was adopted for registration duty relating to share-capital increases.
The effects of this change on the result for 1999 and on shareholders' equity as of 31 December 1999 are described in the comments on "Intangible fixed assets".

1211

Comments on Assets

B) Fixed assets

I. Intangible fixed assets

Movements in intangible fixed assets in 1999 were as follows:

	Cost	Amortization	Residual value
As of 31 December 1998	**42,344,784.73**	**(24,771,600.49)**	**17,573,184.24**
Changes in 1999:			
Fully amortized costs	(16,981,156.76)	16,981,156.76	-
Registration duty charged to income	(4,141,580.98)	828,316.20	(4,969,897.18)
Additions	79,920,409.55	-	79,920,409.55
Disposals	(10,436.68)	10,436.68	-
Amortization	-	(19,852,441.43)	(19,852,441.43)
As of 31 December 1999	**101,132,019.86**	**(26,804,132.28)**	**74,327,887.58**

1) Start-up and expansion costs

Start-up and expansion costs comprise costs relating to share-capital increases and are amortised over five years. Consistently with the new accounting policy adopted for registration duty relating to share-capital increases, the residual values of costs capitalised in previous years were reversed and the corresponding amount, 3.3 million euro, was charged to income under extraordinary charges.
Registration duty relating to the Tender Offer share-capital increase amounted to 30.1 million euro and was recorded under extraordinary charges; stamp duty relating to the increases that took place during the year in respect of the conversion of the bond loan and the exercise of warrants amounted to 1.9 million euro and was recorded under operational charges.

1212

Had the accounting policy not been changed, the net result for the year would have been 18.6 million euro higher (28.1 million euro before taxes), as would shareholders' equity as of 31 December 1999.

	Cost	Amortization	Residual value
As of 31 December 1998	**22,612,615.83**	**(6,850,308.87)**	**15,762,306.96**
Changes in 1999:			
Fully amortized costs	(2,909,732.11)	2,909,732.11	-
Registration duty charged to income	(4,141,580.98)	828,316.20	(3,313,264.78)
Additions	79,920,409.55	-	79,920,409.55
Amortization	-	(19,096,342.46)	(19,096,342.46)
As of 31 December 1999	**95,481,712.29**	**(22,208,603.02)**	**73,273,109.27**

The increase for the year of 79.9 million euro consisted of costs other than taxes relating to the July share capital increase and costs relating to the share capital increases in connection with the "Olivetti 1998-2002 floating rate" bond and the exercise of warrants relating to the 1998 share capital increase.

3) Industrial patents and intellectual property rights

	Cost	Amortization	Residual value
As of 31 December 1998	**1,807,599.15**	**(1,800,368.75)**	**7,230.40**
Changes in 1999:			
Fully amortized costs	(1,797,270.01)	1,797,270.01	-
Amortization	-	(2,065.83)	(2,065.83)
As of 31 December 1999	**10,329.14**	**(5,164.57)**	**5,164.57**

7) Other

As of 31 December 1999 this heading comprised extraordinary maintenance, leasehold improvements, costs relating to the issue of bonds and to other borrowings; the movements for the year were as follows:

	Cost	Amortization	Residual value
As of 31 December 1998	**17,924,569.75**	**(16,120,922.87)**	**1,803,646.88**
Changes in 1999:			
Fully amortized costs	(12,274,154.64)	12,274,154.64	-
Disposals	(10,436.68)	10,436.68	-
Amortization	-	(754,033.14)	(754,033.14)
As of 31 December 1999	**5,639,978.43**	**(4,590,364.69)**	**1,049,613.74**

Extraordinary maintenance and leasehold improvements, which are capitalised and amortised over the duration of contracts, were as follows:

	Cost	Amortization	Residual value
As of 31 December 1998	**293,712.68**	**(270,375.14)**	**23,337.54**
Changes in 1999:			
Disposals	(10,436.68)	10,436.68	-
Amortization	-	(10,923.80)	(10,923.80)
As of 31 December 1999	**283,276.00**	**(270,862.26)**	**12,413.74**

Costs relating to the issue of bonds, to borrowings and related hedging contracts are amortised over the duration of the operations, and were as follows:

	Cost	Amortization	Residual value
As of 31 December 1998	**17,630,857.07**	**(15,850,547.73)**	**1,780,309.34**
Changes in 1999:			
Fully amortized costs	(12,274,154.64)	12,274,154.64	-
Amortization	-	(743,109.34)	(743,109.34)
As of 31 December 1999	**5,356,702.43**	**(4,319,502.43)**	**1,037,200.00**

12-19

II. Tangible fixed assets

Analysis of tangible fixed assets:

	Cost	Accumulated depreciation	Net book value at 31.12.1999	% Accum. deprec. at 31.12.1999	Net book value at 31.12.1998
1) Land and buildings	-	-	-	-	-

3) Industrial and commercial equipment	3,347,844.69	-	-	3,347,844.69
4) Other assets				
Vehicles	117,438.76	9,506.11	(7,122.02)	119,822.85
Leased products	312,065.35	10,136.92	(6,940.30)	315,261.97
	429,504.11	**19,643.03**	**(14,062.32)**	**435,084.82**
Total accumulated accelerated depreciation	**6,001,409.11**	**349,276.81**	**(807,962.05)**	**5,542,723.87**
Total accumulated depreciation	**28,539,864.26**	**1,008,513.23**	**(7,749,688.51)**	**21,798,688.98**

Ordinary depreciation was calculated using rates that reflect the residual useful lives of the respective tangible fixed assets.

12-16

The rates applied, reduced by 50% for assets acquired during the year, were as follows:

Buildings	3%
Plant and machinery	10% - 20%
Industrial and commercial equipment	20% - 40%
Other assets:	
Electronic office machinery	20%
Office furniture and fittings	12%
Vehicles	25%

Additionally, as in previous years, accelerated depreciation was charged in accordance with current tax laws. Accelerated depreciation totalled 0.3 million euro (included in the total charge for the year, heading B10b of the statement of income).
As of 31 December 1999, tangible fixed assets were depreciated by 90.1% compared with 95.1% at the end of 1998, as a result of the year's net investments.
Accelerated depreciation for the current year and previous years, charged in accordance with current tax laws, was classified as a deduction of the relevant asset items.

1217

III. Financial fixed assets

1) Equity investments

As of 31 December 1999, equity investments totalled 10,050.1 million euro, an increase of 8,910.7 million euro compared with 31 December 1998 (1,139.4 million euro), as analysed below:

	Gross value	Valuation allowance	Net book value
As of 31 December 1998	**1,172,443,330.35**	**(33,016,601.51)**	**1,139,426,728.84**
Operations connected with the Tender Offer on Telecom Italia S.p.A.			
Subscription of Tecnost S.p.A. capital increase	11,602,046,241.50		11,602,046,241.50
Subscription of Tecnost S.p.A. capital increase through exercise of warrants	4,602,193,914.00		4,602,193,914.00
Disposal of Tecnost S.p.A. shares in exchange with Telecom Italia S.p.A. shares	(4,602,193,914.00)		(4,602,193,914.00)
Acquisition of Telecom Italia S.p.A. shares in exchange with Tecnost S.p.A. shares	4,601,820,611.00		4,601,820,611.00
Disposal of Telecom Italia S.p.A. shares to Tecnost S.p.A.	(4,601,820,611.00)		(4,601,820,611.00)
Disposal of OliMan Holding B.V.	(261,429,822.08)		(261,429,822.08)
Value of shares acquired following the Public Tender offer on C.C.I.L. Inc.	827,804,421.96		827,804,421.96
Disposal of C.C.I.L. Inc. shares to Mannesmann A.G.	(827,804,421.96)		(827,804,421.96)
Other acquisitions, capital subscriptions and replenishments of losses	207,370,381.73		207,370,381.73
Other disposals	(240,522,927.94)		(240,522,927.94)
Write-downs	(2,429,779,753.48)		(2,429,779,753.48)
	8,877,684,119.73		8,877,684,119.73
Use of valuation allowance		33,016,601.51	33,016,601.51
As of 31 December 1999	**10,050,127,450.08**	**-**	**10,050,127,450.08**

In June 1999, in connection with the operations relating to the Tender Offer for Telecom Italia S.p.A. common shares, the Company subscribed the Tecnost S.p.A. share-capital increase for 11,602 million euro and exercised a portion of the warrants deriving from the operation for 4,602.2 million euro.
The shares acquired through exercise of the warrants were sold to third parties in exchange for 400,158,314 Telecom Italia S.p.A. shares, which were subsequently ceded to Tecnost S.p.A.
During the year, the Company sold its entire shareholding in OliMan Holding B.V., whose book value totalled 261.4 million euro, recording a gain of 6,891.9 million euro. At the same time as the sale of OliMan Holding B.V., on 15 June 1999 the Company sold the equity investment acquired in C.C.I.L. as a result of a Public Tender Offer which ended in February 1999, at its book value of 827.8 million euro.
Other changes comprised:

- *acquisitions for 28.4 million euro of shares in the following companies:*
- 19.5 million Tecnost S.p.A. (9.8% of capital acquired in March 1999)
- 2.1 million Telemedia Applicazioni S.p.A.

- 6.1 million Olivetti Sanità S.p.A.
- 0.7 million other equity investments

• share-capital increases for 4.1 million euro relating to:
- 0.8 million in respect of the exercise of pre-emptive rights on the Tecnost S.p.A. share-capital increase not exercised by third parties
- 2.8 million Lottomatica S.p.A.
- 0.5 million Sy.F.A. S.p.A.

• replenishment of losses for 174.9 million euro:
- 120 million Olivetti International S.A.
- 19 million Olivetti Finanziaria Industriale (O.F.I.) S.p.A.
- 11.5 million Olivetti Ricerca S.p.A.
- 24.4 million Sy.F.A. S.p.A.

• disposals for 240.5 million euro of equity investments in the following companies:
- 183.2 million Wang Laboratories Inc. as a result of acceptance of the Public Tender Offer launched by Getronics N.V.
- 25.8 million Olteco-Fin S.p.A.
- 21.2 million Olivetti Ricerca S.p.A.
- 3.6 million Modinform S.p.A.
- 6.1 million Olivetti Sanità S.p.A.
- 0.6 million other equity investments

• writedowns of equity investments for 2,429.8 million euro, as follows:
- 2,071.3 million for Tecnost S.p.A.
- 100.4 million for Olivetti International S.A.
- 212.3 million for Olivetti Lexikon S.p.A.
- 24.4 million for Sy.F.A. S.p.A.
- 14.6 million for O.F.I. S.p.A.
- 5.3 million Olivetti Multiservices S.p.A.
- 1.4 million for Eurofly S.p.A.
- 0.1 million for other equity investments.

The valuation allowance as of 31 December 1998 was used in full against these writedowns, the net amount of which therefore totalled 2,396.8 million euro.

The writedowns of the Tecnost S.p.A. and Olivetti International S.A. equity investments pursuant to art. 2426 par 2 of the Italian Civil Code were made purely for tax purposes; specifically, the Tecnost S.p.A. writedown was made entirely through application of tax laws (reducing book value by an amount equivalent to the difference between book value and the arithmetical mean of daily stock market prices for the last six months, as allowed under art. 66, par 1 bis of Presidential Decree no. 917/1986). With regard to Olivetti International S.A., book value was written down to reflect shareholders' equity.

Had these writedowns not been applied, the net result for the year would have been 4,200.3 million euro (5,764.9 million euro before taxes) and shareholders' equity 8,822.6 million euro.

1219

The opening balances of equity investments classified as financial fixed assets were as follows.

	Shares/quota at 31.12.1998	Original cost	Losses and writedowns	Replanishments and capital restorations	Book value at 31.12.1998

1223

Comparison of the book values of equity investments in subsidiary companies (cost written down for other than temporary impairments in value or for tax purposes) and the corresponding portion of shareholders' equity (determined in accordance with consolidation principles) shows overall equity investment book value to be lower by an amount of 2,066.3 million euro:

(in millions of euro)	Book value of equity investments (a)	Portion of net equity as adjusted for consolidation purposes attributable to the Parent Company (b)	Differences (a–b)
Equity investments the book values of which are lower than the portions of the net equity, as adjusted for consolidation purposes, attributable to the Parent Company			
Tecnost S.p.A.	9,646.6	11,565.1	(1,918.5)
Olivetti international S.A.	30.3	182.0	(151.7)
Olivetti Finanziaria Industriale S.p.A.	43.7	43.9	(0.2)
Olivetti Lexikon S.p.A.	76.4	78.7	(2.3)
Telemedia Applicazioni S.p.A.	2.1	2.8	(0.7)
	9,799.1	11,872.5	(2,073.4)
Equity investments the book values of which are higher than the portions of the net equity, as adjusted for consolidation purposes, attributable to the Parent Company			
Olivetti Multiservices S.p.A.	167.0	159.9	7.1
Total	**9,966.1**	**12,032.4**	**(2,066.3)**

The lower book values of the equity investments in Tecnost S.p.A. (1,918.5 million euro) and Olivetti International S.A. (151.7 million euro) largely arose (for 2,171.7 million) as a result of the writedowns described above.

1224

Receivables

Consorzio per il Distretto Tecnologico del Canavese	378,436.81	516,456.90	(138,020.09)
less: current portions	(170,458.31)	(1,444,027.58)	1,273,569.27
Due from tax authorities for advances on severance indemnities	1,167,550.74	1,651,068.38	(483,517.64)
Restricted deposit in favour of Wang Laboratories Inc.	76,297,670.32	-	76,297,670.32
Cash guarantee deposits	13,387,646.55	12,428,587.24	959,059.31
Total amounts due from other parties after 12 months	91,610,727.94	15,071,108.11	76,539,619.83
Total amounts due after 12 months	**91,937,834.79**	**15,624,532.63**	**76,313,302.16**

Receivables due within 12 months from third parties included 6.3 million euro due from Getronics Solutions Italia S.p.A. upon collection of receivables repurchased from Wang Global S.p.A. in 1998, and 8.4 million in interest-relief grants (law 346/1988). Receivables due after 12 months (91.9 million euro) included 76.3 million euro for an interest-bearing guarantee deposit with a leading bank in favour of Wang Laboratories Inc. The guarantee was provided to cover any residual liabilities to a group of former employees in Spain should the pension fund of an indirectly held subsidiary company prove insufficient. In connection with this guarantee deposit (for an amount of 80 million euro), an interest rate and currency swap hedging transaction expiring July 2001 was arranged for 74.1 million euro.

1225

Treasury stock

As of 31 December 1999, the Company held 2,697,500 savings shares acquired from employees for a nominal value equivalent to 1.4 million euro. These shares were recorded at cost, 2.3 million euro, and a special non-distributable shareholders' equity reserve was created for the same amount.

1227

Receivables due within 12 months totalled 364.4 million euro and decreased by 447 million euro compared with 31 December 1998.
The decrease arose as a result of the collection of the loan granted to OliMan Holding B.V. (287.9 million euro) and of the receivable due from Wang Laboratories on purchase of Olsy S.p.A. (37.9 million euro).
Receivables repurchased from Wang Global S.p.A. in 1997, 1998 and 1999 totalled 49.3 million euro, net of the allowance for doubtful accounts of 36.2 million euro, and were 40 million euro lower than at 31 December 1998 (gross receivables 108.9 million euro, allowance for doubtful accounts 19.6 million euro).
The decrease in receivables due from tax authorities (45.6 million euro) arose for 53.7 million euro as a result of the reclassification under the heading "others" of 1993 tax credits and related interest ceded "without recourse", compensated in part by the year's prepaid tax credits and withholdings. The entire amount relating to the above-mentioned ceded receivable was collected in January 2000. In addition to ceded receivables, an amount of approximately 97 million euro arose from similar cessions which had already been collected.

Prepaid tax credit as of 31 December 1999 was zero, compared with 50.1 million euro as of 31 December 1998.This amount reflected the tax benefit of prepaid taxes not offset against deferred taxes, calculated on the differences that would reverse in 1999; it also reflected the future benefit of tax loss carry-forwards to the extent that taxable income against which such losses could be used could reasonably be expected for 1999. Prepaid tax credit as of 31 December 1998 was used in full in 1999.
As of 31 December 1999, analysis of the temporary differences between the tax values of assets and liabilities and their book values generated net prepaid taxes; in accordance with prudent valuation criteria, these taxes were not recorded in the balance sheet given the lack of a reasonable certainty that income for an amount equal to or higher than the temporary differences will exist in the years in which such differences will reverse.
The temporary differences utilisable in future years essentially relate to the allowance for doubtful accounts and reserves for risks and charges; temporary differences that will be taxable in future years essentially relate to interest-relief grants, which are recognised and taxed on a time-apportionment basis, or, if not yet collected, taxed as collected.

Receivables due after 12 months

As a result of the Company's acceptance of the Public Tender Offer launched by Getronics N.V. on Wang Laboratories Inc., in 1999, the Company collected the receivables totalling 18.5 million euro as of 31 December 1998; these receivables consisted of 5,000,000 Stock Appreciation Rights arising from the sale of Olsy S.p.A. to Wang Laboratories Inc. in 1998.

1228

Interest-rate swaps for 16 million euro were transacted on the fixed-rate securities portfolio in order to counter-act the effects of a rise in interest rates.

Receivables for securities held under reverse repurchase agreements

This heading reflects the purchase cost of securities acquired under a commitment to resell them at a later date at a pre-arranged price.
Income and charges relating to these operations, computed taking account of the difference between the agreed spot and forward prices, are recognised on a time-apportionment basis and classified under other financial income or charges.

Total	**7,484,999.95**	**36,103,038.56**	**(28,618,038.61)**

The 28.6 million euro decrease in accrued income compared with 31 December 1998 resulted from amendments to the contractual terms of settlement of interest on interest-bearing transaction accounts; as from 1999, interest is settled on 31 December of the year in question rather than on 1 January of the following year.
Interest-relief grants pursuant to law 346/1988 (8.4 million euro as of 31 December 1999 and 13.2 million euro as of 31 December 1998) were classified as financial fixed assets due within 12 months.

1230

Comments on Liabilities and Shareholders' Equity

A) Shareholders' equity

I. Share capital

As of 31 December 1999, the share capital of Olivetti S.p.A., fully subscribed, paid-up and filed with the Register of Companies, was represented by 4,815,238,805 shares (2,914,614,817 shares as of 31 December 1998), comprising 4,721,387,429 common shares (2,820,763,441 as of 31 December 1998), 15,221,888 preferred shares (as at 31 December 1998) and 78,629,488 savings shares (as at 31 December 1998), each with a nominal value of 1,000 lire, for a total amount of 4,815,238,805,000 lire (2,914,614,817,000 lire as of 31 December 1998), equivalent to 2,486,863,301.59 euro (1,505,272,930.43 euro as of 31 December 1998).
The increase of 1,900,623,988,000 lire (981.6 million euro) compared with 31 December 1998 arose from the following operations:

- the filing with the Register of Companies, pursuant to art. 2444 of the Italian Civil Code, of the share-capital increases for a total amount of 42,700,121,000 lire, fully subscribed by 31 December 1998, through the issue of a total of 42,700,121 common shares, for which the authorisation of the Courts was still pending as of 31 December 1998; these new shares serviced the conversion of 58,513,375 bonds of the "Olivetti 1993-1999 7.50% bond" and 4,874,775 bonds of the "Olivetti 1998-2002 floating-rate bond", as well as the exercise of 376,786 "Olivetti 1998-2002 common share warrants";
- share-capital increases totalling 78,006,880,000 lire, through the issue of a total of 78,006,880 common shares following the conversion of an equal number of "Olivetti 1998-2002 floating-rate bonds";
- a share-capital increase of 12,000,000,000 lire, through the issue of 12,000,000 common shares at nominal value reserved for the managers of Olivetti S.p.A. and its subsidiary companies following the exercise of an equal number of warrants assigned to such managers pursuant to the Board of Directors resolution of 18 February 1998, which executed the powers granted to the Board by the Shareholders' Meeting of 29 April 1993;
- share-capital increases totalling 270,315,563,000 lire through the issue of 270,315,563 common shares following the exercise of an equal number of "Olivetti 1998-2002 common share warrants"; an additional 38,979 common shares for an overall nominal value of 38,979,000 lire were issued by 31 December 1999 following the exercise of an equal number of warrants; the relevant amount was classified under the shareholders' equity heading "Share-capital increase to be filed with the Register of Companies", given that the relative authorisation was not granted until the following January; an additional 42,692 warrants had been exercised by 31 December 1999 but the corresponding shares had not been issued; the proceeds collected, totalling 42,692,000 lire, were recorded under a shareholders' equity account called "Share-capital increase payment relating to the exercise of warrants";
- a share-capital increase of 1,497,601,424,000 lire completed in July 1999 through the issue of 1,497,601,424 common shares implementing the Board of Directors resolution of 7 April 1999, in partial execution of the powers conferred by the Extraordinary Shareholders' Meeting held the same day authorising the issue of up to 1,521,923,691 common shares with a nominal value of 1,000 lire each, to be

123(

offered with pre-emptive rights to the holders of common, preferred and savings shares (including shares arising from the exercise of "Olivetti 1998-2002 common share warrants" before tear-off of rights) and to the holders of convertible bonds, at a price of 3,900 lire per share (approximately 2.014 euro). The actual exercise of warrants gave rise to the issue of precisely 1,497,601,424 shares. The overall proceeds raised amounted to 5,840.6 billion lire (3,016.4 million euro) and were used to finance the Tender Offer on Telecom Italia.

Future potential changes in capital

At 31 December 1999, a total of 87,143,605 "Olivetti 1998-2002 floating-rate bonds" were still outstanding, net of:
- 847,233 bonds against which the corresponding shares had already been issued but not authorised by the Courts;
- 1,052,421 bonds whose conversion into common shares had been requested, with the subsequent issue of the relevant shares on 17 January 2000.

In respect of outstanding bonds, a total of 87,143,605 common shares for an overall value of 87.1 billion lire (45 million euro) could still be issued.

At 31 December 1999, a total of 54,852,669 "Olivetti 1998-2002 common share warrants" were still outstanding, net of:
- 38,979 exercised warrants against which the corresponding shares had already been issued but not authorised by the Courts until January 2000;
- 42,692 exercised warrants against which, at the end of the year, the corresponding shares had not been issued (17 January 2000).

In respect of outstanding warrants, 54,852,669 common shares at a price of 1,000 lire per share for an overall value of 54.9 billion lire (28.3 million euro) could still be issued

At 31 December 1999, 26,961,667 Olivetti 1999-2001 warrants assigned free of charge to managers of the Parent Company and its subsidiaries pursuant to the plan approved by the Board of Directors on 9 June 1999 and the additions approved on 29 November 1999 (as described in the section on employee stock option plans) had not been exercised.
Consequently, 26,961,667 common shares at a price of 2,320 lire per share including a premium of 1,320 lire, for an overall value of 62.6 billion lire, of which 27 billion as share capital and 35.6 billion as additional paid-in capital, could still be issued.

The Shareholders' Meeting of 12 May 1994 authorised the Directors to issue bonds, including convertible bonds, up to a maximum amount of 2,000 billion lire, within the limits allowed by law, and to issue shares up to a maximum nominal amount of 1,000 billion lire.
On 9 June 1994, in partial exercise of the powers conferred by the Shareholders, the Directors resolved to issue a 500 billion lire floating-rate bond maturing in 2001. The bond was fully subscribed and listed during 1994.

1232

I.bis Share-capital increase to be filed with the Register of Companies pursuant to art. 2444 of the Italian Civil Code

This heading amounted to 11,323,082.53 euro as of 31 December 1999, the equivalent of 21,924,545,000 lire. It represented the nominal value of the shares issued by the Parent Company in respect of share-capital increases for which the authorisation of the Courts was still pending as of the balance-sheet date. The heading comprised:

- a share-capital increase of 21,038,333,000 lire (equivalent to 10,865,392.22 euro) through the issue of 21,038,333 common shares reserved for managers of the Parent Company and its subsidiaries in execution of the Board of Directors resolution of 9 June 1999 implementing the powers conferred by the Shareholders' Meeting of 7 April 1999;
- a share-capital increase of 847,233,000 lire (equivalent to 437,559.33 euro) through the issue of 847,233 common shares following the conversion of a similar number of "Olivetti 1998-2002 floating-rate" bonds;
- a share-capital increase of 38,979,000 lire (equivalent to 20,130.97 euro) through the issue of 38,979 common shares following the exercise of a similar number of "Olivetti 1998-2002 common share warrants".

I.ter Share-capital increase payment relating to exercise of warrants

At 31 December 1999, this heading amounted to 22,048.58 euro and referred to the payment made by the holders of 42,692 "Olivetti 1998-2002 common share warrants" (equivalent to 42,692,000 lire) on the exercise of such warrants; the corresponding shares had not been issued as of 31 December 1999 (17 January 2000).

II. Additional paid-in capital

At 31 December 1999, the balance on this heading amounted to 2,267,219,725.35 euro, equivalent to 4,389,949,573,600 lire, of which 4,343,044,129,600 lire referred to the share-capital increase of 1,497,601,424,000 lire to finance the Tender Offer, and 46,905,408,000 lire reflected the difference between the nominal value of 130,292,800 "Olivetti 7.50% 1993-1999" bonds converted after 18 June 1997 (date on which the amended ratio of 16 new shares for every 25 bonds came into effect) and the nominal value of the 83,387,392 shares issued in respect of such conversions.

II.bis Additional paid-in capital in respect of share-capital increases to be filed with the Register of Companies.

At 31 December 1999, this heading amounted to 14,342,317.73 euro, equal to 27,770,599,560 lire, for the share-capital increase of 21,038,333,000 lire reserved for managers of the Parent Company and its subsidiaries, and awaiting registration in the Register of Companies (January 2000).

V. Reserve for treasury stock

This reserve totalling 2,298,155.73 euro (4,449,850,000 lire) reflected the value of Parent Company treasury stock classified under financial fixed assets in accordance with article 2357 ter of the Italian Civil Code. The reserve cannot be distributed while the shares are held.

1233

VIII. Retained earnings (accumulated losses)

At 31 December 1999, the Company had accumulated losses of 159,759,033.50 euro compared with 63,128,785.06 euro at 31 December 1998, an increase of 96,630,248.44 euro (equivalent to 187,102,251,144 lire) attributable to the net loss for 1998.

1234

Total shareholders' equity as of 31 December 1999 was 7,454.4 million euro. This amount reflected overall share capital (2,498.2 million euro, including the amount to be filed with the Register of Companies), reserves (2,283.9 million euro), residual accumulated losses from 1996, 1997 and 1998 (159.8 million euro) and income for 1999 (2,832.1 million euro).

B) Reserves for risks and charges

2) Taxation

The following years are subject to adjustment or to assessment by the tax authorities: for income taxes, the years from 1994;for value added tax, the years from 1995.
In 1999, the Company underwent a general tax inspection conducted by the Regional Corps of the Turin Tax Police, with specific reference to the years 1994, 1995 and 1996. The inspectors' report to the competent Inland Revenue office listed a series of hypothetical administrative anomalies regarding both value added tax and (predominantly) income tax. The objections regarding income tax essentially stem from a different configuration of tax results due to differences in the allocation to each of the three periods of costs sustained and revenues realised by the Company over the three years in question.
For all three years, the Company declared a tax loss; specifically, for 1994 a tax loss of 510 billion lire, for 1995 a loss of 904 billion lire and for 1996 a tax loss of 1,705 billion lire.
Should the recoveries proposed by the Tax Police be accepted in full, the 1994 loss would decrease to 431 billion lire, the 1995 loss to 551 billion lire and the 1996 loss to 1,375 billion lire.
Should the Inland Revenue office perform adjustments or assessments incorporating in full or in part the omissions alleged by the Tax Police, the Company will lodge counter-claims at every level, since it believes that, for the most part, the inspectors' conclusions have no sound basis in either fact or law.
In 1994, 1995 and 1996 the Company received assessment notices relating to income tax returns for the years from 1988 to 1992. No significant assessment notices have been received with regard to value-added tax.
In the assessment relating to 1988, the financial authorities objected to the treatment of lease-back contracts as financial leasing contracts, in view of the consequent tax regime. The assessments concerning 1991 and 1992 stemmed from objections raised by the Regional Corps of the Trieste Tax Police with regard to usufruct on share contracts entered into by the Company in previous years. The assessments relating to 1989 and 1990 concerned both matters.
With regard to usufruct on share contracts, in separate assessments, the authorities i) questioned the legitimacy of the deduction of tax credits and withholdings relating to dividends collected from resident companies by the Company as usufructuary, and ii) alleged the co-responsibility of the Company for failure to apply to such dividends the higher withholdings taxes due on payment of share income to non residents.
The Company has lodged appeals against all these assessments.
The objections raised with regard to lease-back contracts have been rejected by both the first-degree Provincial Tax Court and the second-degree Regional Tax Court. In the meantime, the Inland Revenue has decided not to proceed further with the matter.

1235

All the objections raised by the tax authorities regarding usufruct on share contracts for the years 1989, 1991 and 1992 and, for 1990, the deductibility of tax credit and withholdings on dividends, have been rejected by both the first- and second-degree Tax Courts. Only the appeal by the Company against the 1990 assessment alleging co-responsibility for lower tax withholdings has been rejected by both the provincial and the regional Tax Courts.
With regard to the deductibility of tax credit and withholdings, the Inland Revenue office has presented an appeal to the Court of Cassation for the years 1991 and 1992, and is still in time to present an appeal with regard to 1989 and 1990. As regards the assessments for 1989, 1991 and 1992 concerning the Company's co-responsibility for alleged non-application of withholdings on dividends, the Inland Revenue office has not presented an appeal to the Court of Cassation, but is still in time to do so. The Company will appeal to the Court of Cassation against the decision of the regional Tax Court regarding tax withholdings in 1990.
The Company's tax advisors believes that the disputes regarding usufruct on share contracts will be settled in favour of the Company, since the objections raised on both matters lack any juridical basis, as recognised during proceedings to date.

3) Other provisions

As of 31 December 1999, after a provision of 177.5 million euro (of which 1.9 million euro classified as personnel costs) and use of 117.9 million euro, the balance on this heading was 215.5 million euro, including 28 million euro for deferred social charges arising from reductions in the workforce pursuant to law 223/1991, 162.3 million euro in charges relating to commitments and possible future risks in connection with the sale of OliMan Holding B.V., 7.5 million euro in charges relating to guarantees given to subsidiary companies.

C) Reserve for employee severance indemnities

237

Payables due within 12 months rose by 817.1 million euro, mainly as a result of current income taxes (711 million euro) and the increase in financial payables due to banks (84.1 million euro).
The current tax liability (711 million euro) has been calculated in accordance with current tax laws. It relates entirely to IRPEG (State Corporation Income Tax), since no IRAP (Local Income Tax) taxable income arose in 1999, as illustrated in the comments on income taxes for the year.
In 1999, tax loss carry-forwards were used for 1,654.7 million euro.

Payables due after 12 months

1) Bonds

	31.12.1999	31.12.1998	Change
Olivetti 1994-2001 floating rate bonds	258,228,449.55	258,228,449.55	-

Amounts due to subsidiary companies	1,506,727,164.39	-	1,506,727,164.39

Amounts due to subsidiary companies referred to the loan granted by Olivetti Holding B.V., which was used to finance outlay in connection with the Tender Offer on Telecom Italia S.p.A. after use of the proceeds arising from the sale of the OliMan Holding B.V. equity investment (7,930.7 million euro).

***

As of 31 December 1999, financial payables and other financial operations secured by guarantees on company property totalled 52.6 million euro; these guarantees, provided in respect of research loans granted by San Paolo IMI, amounted to a total of 55.9 million euro (68.2 million euro as of 31 December 1998) and consisted of pledges on securities.

Medium/long-term debt was as analysed below:

(in millions of euro)	31.12.1999	31.12.1998
Amounts due to subsidiary companies		
Loan from Olivetti Holding B.V., interest rate 4,59% at 31.12.1999 repayable on 30 June 2002	1,506.7	-
Amounts due to third parties		
Olivetti 7.50% 1993-1999 bonds (nominal value lire 1,000 each), convertible into common shares, repayable in full on 1 January 1999, with early repayment option	-	0.2
"Olivetti 1994-2001" bonds (nominal value lire 1,000 each), floating rate (Ribor three months plus 0.75 p.p.p.a.; interest rate at 31 December 1999 4.2%) repayable in full on 26 January 2001, supported by swap contract to stabilise the rate at 4.145%	258.2	258.2
Olivetti 1998-2002 floating rate bonds, convertible into common shares, interest rate at 31 December 1999: 4.5%	45.0	83.5
IMI loans for research pursuant to Law 46/1982, average interest rate of 4.5% at 31 December 1999, repayable by 2001	0.5	0.8
IMI loans for research pursuant to Law 346/1988, average interest rate of 12.5376% (gross of interest relief grants) at 31 December 1999, repayable by 2004	116.4	212.8
Subsidized loans for technological innovation, average interest rate of 7.0981% at 31 December 1999, repayable by 2010	27.3	30.3
Other loans in Italian Lire, average interest rate of 4.7801% at 31 December 1999, repayable by 2002	178.1	218.2
Total	**2,132.2**	**804.0**
of which:		
Portion expiring within 12 months	68.2	172.3
Portion expirign after 12 months	2,064.0	631.7

Payables due after 12 months expire as follows:

(in millions of euro)	31.12.1999	31.12.1998
within 2 years	377.5	37.0
within 5 years	1,679.8	565.8
after 5 years	6.7	28.9
Total	**2,064.0**	**631.7**

1239

With regard to the 500 billion lire floating-rate bond (258 million euro) issued by Olivetti S.p.A. and maturing in July 2001, the Company arranged interest rate swaps for the entire amount and with the same expiry, which convert the floating rate to a quarterly fixed rate of 4.145%. It simultaneously closed previous hedging operations with collar structures (purchase of cap contracts and sale of floor contracts).
As of 31 December 1999, the Company had unused overdraft facilities on current accounts for 157.5 million euro (159.3 million euro as of 31 December 1998) and other unused stand-by lines of credit for 91.9 million euro (193.2 million euro as of 31 December 1998).

Summary of net financial position:

Total financial resources (A)	**416,223,474.03**	**867,662,729.58**	**(451,439,255.55)**
Financial payables			
Due within 12 months (of which 14,156,214.4 of accruals)	372,013,325.09	295,714,902.20	76,298,422.89
Due after 12 months (of which 38,529,574.88 of accruals)	2,102,605,349.47	631,658,629.80	1,470,946,719.67
Total financial payables (B)	**2,474,618,674.56**	**927,373,532.00**	**1,547,245,142.56**
Net financial indebtedness (B-A)	**(2,058,395,200.53)**	**(59,710,802.42)**	**(1,998,684,398.11)**

Financial payables totalled 2,474.6 million euro compared with 927.4 million euro as of 31 December 1998; the net increase of 1,547.2 million euro comprised 1,506.7 million euro for the loan from Olivetti Holding B.V., 38.5 million euro for the decrease in the "Olivetti 1998-2002 convertible floating rate bond following conversions, 35.8 million euro for the decrease in medium/long-term payables to banks and other providers of finance and 76.3 million euro mainly arising from the rise in short-term payables due to banks.

1240

Considering liquid funds and financial receivables, net financial indebtedness amounted to 2,058.4 million euro (59.7 million euro as of 31 December 1998).
As from 1999, the net financial position includes accrued interest income/expenses and excludes receivables due from third parties after 12 months. In order to permit comparison, similar adjustments have been made to the net financial position for 1998. Accrued interest income/expenses amounted respectively to 6.1 million euro (33 million euro as of 31 December 1998) and 52.7 million euro (28.6 million euro as of 31 December 1998).

Memorandum accounts

A) Personal securities given, net of counter-securities received

As of 31 December 1999, suretyships and other personal guarantees given, also indirectly through banks and insurance companies, totalled 12,284.3 million euro (1,385.7 million euro as of 31 December 1998) and were subdivided as follows:

(in millions of euro)	31.12.1999	31.12.1998
To third party holders of securities issued by subsidiary companies	11,706.4	762.0
To banks and finance companies for credit lines and financing given to subsidiary companies	21.4	52.6
Counter-securities given to third parties for guaranteees given on behalf of:		
subsidiary companies	28.4	136.9
associated and unconsolidated subsidiary companies	6.8	7.4
third parties	120.5	27.4
	11,883.5	986.3
Other personal guarantees given	400.8	399.4
Total personal guarantees given	**12,284.3**	**1,385.7**

The 10,944.4 million euro increase in guarantees given to third-party holders of securities issued by subsidiary companies arose almost in full from the following bond loans:

- Olivetti International N.V. 1,500 million euro, maturing in 2009;
- Tecnost International N.V. 9,443.6 million euro, maturing in 2004; this guarantee was given jointly with Tecnost S.p.A.

Other guarantees, totalling 400.8 million euro as of 31 December 1999, included:

- 37.8 million euro in suretyships for the completion of commercial supplies by Getronics S.p.A. (formerly Wang Global S.p.A.);
- 249.4 million euro in guarantees given on behalf of Infostrada S.p.A. to the Italian State Railways;
- 89.6 million euro in guarantees to Mannesmann A.G. with regard to the sale of the equity investment in OliMan Holding B.V.;
- 24 million euro in other guarantees.

To cover the above guarantees, as of 31 December 1999 the Company had received counter-securities totalling 9,767.5 million euro (137.7 million euro at 31 December 1998), largely comprising 9,443.6 million euro from Tecnost S.p.A. in respect of guarantees given to third-party holders of issued bonds, 249.4 million euro from Mannesmann A.G. in respect of guarantees given to the Italian State Railways and 42.3 million euro received from Wang Laboratories Inc.

1242

B) Guarantees on Company assets

Guarantees secured by Company assets relating to financial operations are analysed in financial payables.

C) Commitments

As of 31 December 1999, contractual commitments totalled 17 million euro (27.7 million euro at 31 December 1998) and referred to repurchase commitments on a building following the sale of the equity investment in Olivetti Ricerca S.p.A. to Getronics Solutions Italia S.p.A..

D) Other accounts

Other accounts as of 31 December 1999 totalled 3.8 million euro and related to third-party guarantee deposits (62 million euro at 31 December 1999).

***

Other information

Jointly with Tecnost S.p.A., the Company gave guarantees totalling 7,193 million euro in respect of the interest-rate hedging operations transacted by Tecnost International N.V. for an overall notional amount of 12,868 million euro (regarding bonds for an overall amount of 15,868 million euro issued by Tecnost International N.V. and Tecnost International Finance N.V. during 1999).
Additional guarantees for an amount of 3,501 million euro are currently being arranged.

1243

Comments on the Statement of Income

A) Value of production

5) Other income

Other income totalled 17.1 million euro (41.4 million euro in 1998); the 24.3 million euro decrease largely arose as a result of the reduction in charges to subsidiary companies for services provided following the transfer of the relevant business unit to Olivetti Multiservices S.p.A. on 31 December 1998.

B) Costs of production

9) Personnel

1999 payroll costs were 21.8 million euro compared with 26.8 million euro in 1998. They included a provision of 1.9 million euro to cover the estimated cost of early-retirement incentives relating to workforce reduction plans.
The average number of employees decreased from 377 in 1998 to 200 in 1999 (43 managers, 42 supervisors, 110 white collars and 5 blue collars), a reduction of 177 average units.
The change in unit costs was due in particular to the application of the two-yearly renewal of the wage agreement relating to the National Collective Labour Agreement signed on 8 June 1999, as a result of which the minimum wage for blue collars, white collars and supervisors increased, as from 1 July 1999, from a minimum of 13.98 euro to a maximum of 39.23 euro, depending on the category. A second contributory factor to the change in unit costs was a one-off payment of 61.97 euro for the period 1 January - 30 June 1999.

10) Depreciation, amortisation and writedowns

Amortisation of intangible fixed assets - The charge for the year amounted to 19.9 million euro and included 19.1 million euro for amortisation of the costs sustained in relation to share-capital increases executed in 1998 and 1999; as explained earlier, these costs do not include registration duty, which is classified under extraordinary charges relating to the costs of the Tender Offer.

Depreciation of tangible fixed assets - Depreciation for the year (1 million euro) was determined on a straight-line basis using rates that reflect the residual useful lives of the assets concerned.
Depreciation was lower in 1999 than in 1998 due to the transfer of the real-estate business unit to Olivetti Multiservices S.p.A. on 31 December 1998.

244

As noted in the comments on tangible fixed assets, accelerated depreciation was also provided, in accordance with tax laws:

(in millions of euro)	Year 1999	Year 1998	Change
Ordinary depreciation	0.7	10.2	(9.5)
Accelerated depreciation	0.3	0.9	(0.6)
Total depreciation	**1.0**	**11.1**	**(10.1)**

Writedowns of receivables classified as current assets – The allowance for doubtful accounts was 18.2 million euro (32.3 million euro in 1998), of which 17.5 million euro for the writedown of receivables repurchased in previous years from Wang Global S.p.A. in connection with the sale of Olsy S.p.A. to Wang Laboratories Inc.

12) Provisions for risks

Provisions for risks totalled 175.6 million euro (125.4 million euro at 31 December 1998) and included:
- 87.6 million euro for commitments to Mannesmann A.G. in connection with the sale of the equity investment in OliMan Holding B.V., to cover the eventuality of Bell Atlantic exercising its purchase option on Omnitel Sistemi Radiocellulari S.p.A. shares at a previously arranged price;
- 74.6 million euro for possible future charges relating to the Public Tender Offer on C.C.I.L. in 1999;
- 7.5 million euro provided in accordance with prudent valuation criteria to cover the risk of writedowns of receivables guaranteed to invested companies;
- 5.9 million euro for other risks.

14) Other operational expenses

	Year 1999	Year 1998	Change
INVIM (Property value increment tax)	-	2,117,473.30	(2,117,473.30)
Duties and non-income taxes	5,140,883.26	2,448,522.20	2,692,361.06
Losses on receivables	8,569,263.54	-	8,569,263.54
Guarantees	23,275,934.22	-	23,275,934.22
Early termination of contracts	-	4,957,986.23	(4,957,986.23)
Contractual indemnities	29,807,855.12	-	29,807,855.12
Additional social benefits	596,194.60	372,914.72	223,279.88
Other	3,626,361.67	510,839.75	3,115,521.92
Total	**71,016,492.41**	**10,407,736.20**	**60,608,756.21**

Other operational expenses included guarantees exercised by group companies in respect of uncollectible receivables due from O.P. Computers S.p.A., (23.3 million euro), indemnities granted to Getronics N.V. at the time of the sale of the equity investment in Wang Laboratories Inc. (29.8 million euro) and losses on receivables acquired from Wang Global S.p.A. (8.6 million euro).

1245

Taxes other than income taxes (5.1 million euro) referred in particular to non-deductible VAT (3 million euro) and registration duty (1.9 million euro) on share-capital increases in connection with the conversion of the "Olivetti 1998-2002 floating-rate bond" and the exercise of "Olivetti 1998-2002 common share warrants".

other subsidiary companies	903,802.92	1,178,402.44	(274,599.52)
Interest payable to associated companies	-	5,685.67	(5,685.67)
Interest payable to third parties			
Bonds	11,766,054.48	20,120,961.60	(8,354,907.12)
Medium/long-term loans	15,351,031.28	18,506,162.02	(3,155,130.74)
Olivetti Solutions (Olsy) S.p.A.	-	1,012,583.75	(1,012,583.75)
Bank current accounts	6,253,611.34	4,996,103.31	1,257,508.03
Interest rate swaps	27,285,518.17	8,653,194.28	18,632,323.89
Charges on borrowing relating to the Tender Offer on Telecom Italia	5,993,231.24	-	5,993,231.24
Losses on exchange rate fluctuations	20,177,995.58	3,126,588.27	17,051,407.31
Interest, commissions and charges on other finance operations	11,777,881.40	18,701,042.24	(6,923,160.84)
Total	**152,805,400.30**	**78,778,170.26**	**74,027,230.04**

1247

Financial charges (152.8 million euro in 1999, 78.8 million euro in 1998) increased by 74 million euro mainly as a result of:
- interest expense on borrowings relating to the Telecom Italia Tender Offer (6.0 million euro to third parties and 52.1 million euro to subsidiary companies), against which financial income due from subsidiary companies totalled 8.6 million euro;
- charges relating to the closure of a collar contract for a notional value of 258.2 million euro stipulated in 1994 and due to expire in July 2001 (15.5 million euro).
This operation was arranged in order to restructure current protection (cap contracts purchased at 10.75% and floor contracts sold at 7.50%); the low interest rates at the end of 1999 enabled the Company to block a fixed rate of 4.145% for the residual term of the bond (maturity in July 2001) by opening new interest rate swaps and simultaneously closing the previous collars.

D) Value adjustments to financial assets

The reasons for the writedown of the equity investments in Tecnost S.p.A. (2,071.3 million euro) and Olivetti International S.A. (100.4 million euro) are illustrated earlier in this Report.

1248

E) Extraordinary income and charges

20) Extraordinary income

	Year 1999	Year 1998	Change
Gains on disposals			
Equity investments			
subsidiary companies	6,892,248,937.35	279,775,998.30	6,612,472,939.05
associated companies	1,491,175.45	563,934.26	927,241.19
others	13,307,181.46	5,667,826.15	7,639,355.31
Tangible fixed assets	47,426.01	695,157.90	(647,731.89)
Business contribution to Olivetti Multiserves S.p.A.	-	106,517.45	(106,517.45)
	6,907,094,720.27	**286,809,434.06**	**6,620,285,286.21**
Other income	18,154,706.31	83,553,003.98	(65,398,297.67)
Total	**6,925,249,426.58**	**370,362,438.04**	**6,554,886,988.54**

Gains on the disposal of equity investments totalled 6,907.1 million euro and were as follows:
• OliMan Holding B.V. (sold to Mannesmann) for 6,891.9 million euro of which:
- 282.5 million euro from the sale in February 1999 of 12.4% of the investment (as a result of which Olivetti's investment in the Dutch company decreased from 62.5% to 50.1%);
- 4,155.8 million euro from the sale in June 1999 of 31.5% of the investment (as a result of which the investment decreased from 50.1% to 18.6%);
- 2,453.6 million euro from the sale, also in June, of the residual equity investment of 18.6% in OliMan Holding B.V. to the company itself as a buy-back operation in order to abate the corresponding capital stake of this company;
• Wang Laboratories Inc. for 13.3 million euro following acceptance of the Tender Offer made by Getronics N.V. With the sale of this investment, Olivetti was also able to collect the receivable for shares due from Wang Laboratories Inc., for an amount exceeding book value by 2.8 million euro (recorded under other income);
• other equity investments for 1.9 million euro.
Other income (18.2 million euro) arose from adjustments to costs relating to previous years (2.3 million euro), an indirect tax (INVIM) payment that was lower than the 1998 provision (1 million euro), collection of amounts in excess of the price paid to repurchase receivables from Wang Global S.p.A. (8.1 million euro), gains on receivables for shares due from Wang Laboratories Inc. (2.8 million euro) and sundry other items for 4 million euro.

1249

21) Extraordinary charges

	Year 1999	Year 1998	Change
Losses on disposals of:			
Tangible fixed assets	79,887.11	251,129.12	(171,242.01)
Equity investments			
subsidiary companies	7,148,352.02	46,771,054.18	(39,622,702.16)
associated companies		18,075.99	(18,075.99)
other investments	-	-	-
Other charges	519,864,473.05	1,934,797.74	517,929,675.31
Total	**527,092,712.18**	**48,975,057.03**	**478,117,655.15**

Extraordinary charges totalled 527.1 million euro (49 million euro in 1998) and largely consisted of losses on disposals of equity investments for 7.1 million euro (of which 1.7 million euro for Modinform S.p.A., 1.4 million euro for Olivetti Sanità S.p.A. and 3.6 million euro for Olivetti Ricerca S.p.A.) and of other charges totalling 519.9 million euro, of which 509.6 million euro for costs relating to the Tender Offer (commissions, guarantees and other bank expenses, legal and tax consultancy fees, registration duty on the 1999 share-capital increase).

22) Income taxes for the year

Income taxes for 1999 totalled 761.1 million euro, of which 711 million euro are current taxes and 50.1 million euro are net prepaid taxes recorded in the previous year and used in 1999.
Actual IRPEG for 1999 differs to the theoretical liability calculated using 1999 tax rates, as shown in the statement below; no provisions were made for IRAP, since both the theoretical and the actual taxable amounts were negative.

1250

Reconciliation of theoretical taxes and effective taxes

IRPEG

(in millions of euro)		Tax base	Tax effect
Income before taxes		**3,593.2**	
Theoretical tax effect (rate 37%)			**1,329.5**

(*) The Bonelli Erede Pappalardo professional association issued bills for professional activites carried out by its members in favour of Olivetti S.p.A. after 8 June 1999 for an overall amount of 154,937.07 euro

(**) In addition, the Bonelli Erede Pappalardo professional association issued bills for professional activities carried out by its members in favour of the subsidiary Telecom Italia S.p.A. (and its controlled companies) after 28 June 1999 (the day in which the control of Telecom Italia was acquired following the Tender Offer) for an overall amount of 890,888.15 euro.

125?

Additionally, in relation to the share capital increase reserved for directors of Olivetti S.p.A. and its subsidiary companies approved by the Board of Directors on 9 June 1999 and as amended on 29 November 1999 in execution of the powers granted by the Extraordinary Shareholders' Meeting of 7 April 1999 (already referred to in the comments on "Share Capital"), the following shares and/or stock options were attributed to the Chief Executive Officer Roberto Colaninno and the Chief Operating Officer Corrado Ariaudo.

	Rights or options allocated in 1999					Shares allocated or options exercised during 1999		
	Free allocation of shares		Options for purchase or subscription			Free allocation of shares	Options for purchase or subscription	
Name	Number of shares allocated	Date of allocation	Number of shares which could be purchased or subscribed	Price per per share (in lire)	Exercise period of option rights	Number of shares allocated	Number of shares purchased or subscribed	Price per share (in lire)
Roberto Colaninno	-	-	23,000,000	2,320	1999-2001	-	4,800,000 (*) 11,500,000	1,000 2,320
Corrado Ariaudo	-	-	2,100,000	2,320	1999-2001	-	540,000 (*) 1,033,334	1,000 2,320

(*) In the context of the Stock Option Plan allocated in the year 1998

Legal proceedings

As of 31 December 1999, the Company was involved in various legal proceedings. According to the Company's legal advisors, the outcome of such disputes should not have significant adverse effects on the Company's financial position.

Costs relating to the introduction of the Euro and to Year 2000 issues (Consob communications no. 98083971 and no. 98079574)

The costs sustained by the Company to ensure adequate coverage of the risks connected to the introduction of the euro and to Year 2000 issues totalled 1.9 million euro, of which 1.5 million euro were capitalised as tangible fixed assets.
Additional costs of approximately 0.5 million euro are expected for 2000, for the completion of the IT system upgrading project.

Tax treatment in the event of distribution of reserves

- Additional paid-in capital (2,267,219,725.35 euro).
- Additional paid-in capital in respect of share-capital increases to be filed with in the Register of Companies (14,342,317.73 euro).

These reserves are not treated as shareholders' taxable income in the event of distribution.

- Reserve for treasury stock (2,298,155.73 euro)

This reserve would be treated as shareholders' taxable income if made available and distributed, and would attract tax credit pursuant to art. 14, Presidential Decree no. 917 of 1986.

The Board of Directors

1254

Board of Statutory Auditors' Report on the Olivetti S.p.A. Financial Statements

olivetti

1260

Board of statutory auditors' report in accordance with article 153 of legislative decree n. 58/98 and with article 2429 of the civil code

Shareholders,

Starting from 1999, Legislative Decree no. 58/98 requires the Independent Auditors of quoted companies to control the regular preparation of accounting records, the correct correspondence between management events and the accounting journal entries and the correct correspondence between the financial statements and the company's accounting records.
For the above reason, this year the contents of our report on the financial statements are different when compared to that of the previous year.

The Board of Statutory Auditors has carried out the duties of control required by law, attending the meetings of the Board of Directors and obtaining from them, on a frequency of every three months, information on the most important activities as well as economic and financial operations undertaken by the Company and its subsidiaries.
The Board of Statutory Auditors has also held meetings with the Independent Auditors and with the Company management.
The above enables the Board of Statutory Auditors to express a favourable opinion on the actions decided and undertaken, which are in conformity of law and the Company By-Laws and do not represent a conflict of interest or are contrary to the decisions taken in the Shareholders' meeting; the Board of Statutory Auditors also express a favourable opinion on the adequacy of the management structure and on the correct management of the Company.
The Board of Statutory Auditors has also verified and controlled the adequacy of the internal control systems and the accounting system through the examination of Company documents and through the analysis of the work carried out by the Independent Auditors PricewaterhouseCoopers SpA.

On the 12th June 2000, the Independent Auditors have issued their audit opinion in accordance with article 156 of Legislative Decree no. 58/98 in which they declare that the Company financial statements and the consolidated financial statements as at 31st December 1999, give a true and fair view of the financial position of the Company and of the Group.
The Board of Statutory Auditors has verified the correct application of law regarding the preparation of the financial statements and the report on operations and expresses its favourable opinion.
During the activities of control, of the type and in the way described above, no significant events were noted which require indication in this report or which need to be communicated to the control institutions.

In view of the above, we invite the Shareholders to approve the financial statements for the year ended 1999 as well as the allocation of the net income as proposed by the Board of Directors.

In accordance with the CONSOB recommendation no. 1574 dated 20th February 1997, the Board of Statutory Auditors has met 12 times and has also participated in 12 meetings of the Board of Directors.

With reference to the CONSOB recommendation no. 1574 dated 20th February 1997, the fees for extra audit work carried out by the principal auditors of the Group (excluding the Telecom Italia Group) referring to and recorded in 1999, are summarised as follows:

1262

Olivetti Group (excluding the Telecom Italia Group)

Actual fees paid to the principal auditors for activities other than the annual and half yearly audit:

(in millions of lire)	US GAAP	Other activities	Total
Olivetti S.p.A.	523.7	165.0	688.7
Other companies	283.2	423.0	706.2
Total	**806.9**	**588.0**	**1,394.9**

The above fees are adequate for the complexity and type of work carried out.

Independent Auditors' Report on the Olivetti S.p.A. Financial Statements

olivetti

AUDITORS' REPORT IN ACCORDANCE WITH ARTICLE 156 OF LAW DECREE N° 58 DATED 24 FEBRUARY 1998

To the shareholders of
Olivetti S.p.A.

1 We have audited the financial statements of Olivetti S.p.A. as of 31 December 1999. These financial statements are the responsibility of Olivetti S.p.A.'s directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2 We conducted our audit in accordance with the auditing standards and criteria recommended by CONSOB. Those standards and criteria require that we plan and perform the audit to obtain the necessary assurance about whether the financial statements are free of material misstatement and, taken as a whole, are presented fairly. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the directors. We believe that our audit provides a reasonable basis for our opinion.
For the year ended 31 December 1999, as a consequence of the acquisition by Tecnost S.p.A. of Telecom Italia S.p.A. in June 1999, the financial statements of the main subsidiary companies of Olivetti S.p.A., composed mainly of Telecom Italia S.p.A. and its subsidiaries, were audited by other audit firms. In accordance with the requirements of Consob Communication n. 20778 dated 22 December 1986 and n. 1280 dated 15 February 1995, we have carried out additional work on Telecom Italia S.p.A. we considered necessary in order to maintain the role of principal auditors.
The financial statements of certain indirectly held Group companies representing respectively 18% and 43% of consolidated assets and consolidated revenues, have been examined by other audit firms who have supplied us with their audit reports. Our opinion, as expressed in this report, in relation to the values of those subsidiaries included in the consolidation, is also based on the audits carried out by other audit firms.
For the opinion on the financial statements of the prior period, which are presented for comparative purposes as required by law, reference is made to the report issued by Coopers & Lybrand S.p.A. dated 15 April 1999.

3 The company holds investments in subsidiary companies and has therefore prepared consolidated financial statements. These consolidated financial statements form an integral part of the annual financial statements for the purposes of providing adequate information on the financial position and the results of operations of the company and the Group. We have examined the consolidated financial statements and our audit report on them was issued on the same date as the present report.

Explanatory Notes

Basis of Presentation

The consolidated financial statements as of 31 December 1999 have been prepared in accordance with the relevant provisions contained in Legislative Decree no. 127 of 9 April 1991, and comprise the consolidated balance sheet (prepared in accordance with the formats specified in articles 2424 and 2424 bis of the Italian Civil Code as amended), the consolidated statement of income (prepared in accordance with the format specified in articles 2425 and 2425 bis of the Italian Civil Code as amended) and these explanatory notes.

The explanatory notes are provided to illustrate, analyse and, in some cases, supplement the data reported in the consolidated financial statements. They include the information required by article 38 of Legislative Decree no.127/1991 and by other provisions contained therein; furthermore, additional information is provided in order to present a true and fair view of the Group even where not required by specific legislation.

The financial statements used for consolidation purposes are those as of 31 December 1999 approved by the Shareholders' Meetings of the individual companies or prepared by the respective Boards of Directors for such approval, adjusted, where necessary, to eliminate entries recorded solely for fiscal purposes and to align them to the accounting policies adopted by the Group. Such accounting policies are consistent with legislation governing consolidated financial statements, interpreted by the accounting principles established by the Italian Accounting Profession and, in their absence, by the International Accounting Standards Committee (I.A.S.C.).

The financial statements of subsidiaries operating in highly inflationary economies are adjusted to reflect the current purchasing power of the local currency in accordance with inflation-accounting procedures.

Consolidation Area

The consolidated financial statements include the accounts of the Parent Company Olivetti S.p.A. and of those Italian and non-Italian companies in which the Parent Company directly or indirectly holds the majority of voting rights at ordinary Shareholders' Meetings or sufficient votes to be able to exercise a dominant influence at such meetings. The associated company Viasat (held through Telespazio) and its subsidiary Viasat Assistance are also included in the consolidation using the proportional method, pursuant to article 37 of Legislative Decree no. 127/1991. A full list of all the companies in which equity investments are held is provided in the Attachment to these explanatory notes ("List of the companies included in the consolidated financial statements as of 31 December 1999 and of equity investments, pursuant to articles 38 and 39 of Legislative Decree no. 127/1991").

The consolidation area as of 31 December 1999 is radically different to that of 31 December 1998, largely as a result of the inclusion of the Telecom Italia Group (following the acquisition of the majority of the common share capital of Telecom Italia S.p.A. after the success of the Public Tender Offer made jointly by Olivetti S.p.A. and its subsidiary Tecnost S.p.A.) and the exclusion of the equity investments in Omnitel, Infostrada, Modinform and Olivetti Ricerca, which were sold during the year.

1275

The Telecom Italia Group has been consolidated line-by-line as from 1 January 1999, since it was acquired during the first half of the year. Income-statement captions have been included in the consolidation for the full 12 months and the result of the Telecom Italia Group relating to the period prior to the acquisition has been deducted from the group consolidated result and shown under a special caption "Telecom Italia Group pre-acquisition result". The equity investments sold during the year have been excluded from the consolidation as from 1 January 1999, as have the respective income statements.

Consolidation Principles

The most significant consolidation principles adopted for the consolidated financial statements as of 31 December 1999 are the following:

a) The assets and liabilities of the companies included in the consolidation area are consolidated on a line-by-line basis, eliminating the book value of each investment against the related portion of shareholders' equity.

b) Unrealised gains and losses deriving from transactions between Group companies are eliminated, as are all receivables, payables, dividends and transactions between companies included in the consolidation area.

c) Goodwill (or consolidation difference), defined as the difference between the purchase cost of subsidiary and associated companies and their current value at the time of acquisition, was credited to or charged against consolidated shareholders' equity through 31 December 1993. As a consequence of the entry into force of Legislative Decree no. 127/1991, commencing from 1994 acquisitions, positive differences are classified as "Consolidation differences", representing the future income-earning capacity of the company acquired and are amortised over the period in which such goodwill is expected to provide benefits; negative differences are classified as "Consolidation reserves" under shareholders' equity. The income statements of subsidiary companies acquired during the year are consolidated in full; pre-acquisition results not attributable to the Group are reversed under special income-statement caption. The income statements of subsidiary companies that leave the consolidation area during the year are excluded from the consolidation as from the beginning of the financial year.

Consolidation differences in respect of associated companies were treated in the same way as those relating to subsidiaries through 31 December 1998. Beginning in 1999, positive consolidation differences – if positive – are recorded in the equity investment account and amortised over the period in which such goodwill is expected to provide benefits; the application of the new principle has not had any effect on the consolidated net result for the year and on consolidated shareholders' equity as of 31 December 1999.

d) Minority shareholders' interests in the net equity and net result for the year are disclosed separately under appropriate captions in, respectively, consolidated shareholders' equity and the consolidated statement of income.

e) Gains and losses arising from the sale of interests in Group companies to third parties are recorded in the statement of income. Any changes to the value of the Group's portion of shareholders' equity, arising from minority subscriptions to the capital increases of Group companies, are recorded as gains or losses in the consolidated statement of income.

1276

f) Provisions and adjustments recorded by consolidated companies solely to obtain fiscal benefits available under current legislation are eliminated from the consolidated financial statements, taking account of any related tax effects.

Translation into Euro of Financial Statements Denominated in Foreign Currencies

a) The balance sheets of foreign subsidiary companies are translated into euro using the year-end exchange rates [which for currencies of countries participating in the European Monetary Union (EMU) are those established by the European Commission as of 31 December 1998]. Average exchange rates for the year are used to translate the foreign subsidiaries' statements of income. The resultant translation gains and losses, including those arising from the translation of opening shareholders' equity using the closing rather than the opening rates of exchange, are reported separately in a specific consolidated shareholders' equity heading under "Other reserves".
b) The exchange rates as of 31 December 1999 and 1998 and the average rates for 1998 used to translate subsidiary financial statements denominated in the main non-EMU currencies into euro are as follows:

1277

(1) Reference exchange rates determined indirectly using the cross exchange rates between the euro and local currency

c) The 1999 average exchange rates used for the translation of income statements were determined as follows:

- for the companies in the Telecom Italia Group: the arithmetic average rates resulting from the explanatory notes to the Telecom Italia consolidated financial statements;
- for the other companies in the Olivetti Group: the average rates weighted against monthly revenues in order to take account of the seasonal business trends, in line with the principles adopted in previous years.

1278

Accounting Policies

The accounting policies adopted to prepare the consolidated financial statements comply with those required by law and are the same as those adopted the previous year.
The accounting policies used for the various headings are described below.

Intangible fixed assets

Intangible fixed assets are recorded at purchase or production cost including related accessory charges and amortised over the residual period in which they are expected to provide benefit; intangible fixed assets are written down to reflect any other than temporary impairment in value; their book value is reinstated in subsequent years if the reasons for such writedowns no longer apply.
Start-up and expansion costs are amortised over five years.
Industrial patents and intellectual property rights are amortised over their expected useful life – five years for industrial patents or, usually, three years for software – as from the year in which they enter service.
Concessions, licences, trademarks and similar rights are amortised over their expected useful life (licences are amortised over the term of the relevant contracts).
Purchased goodwill is generally amortised over a period of five years.
Assets in process of formation and advance payments refer to costs sustained for current software development projects of particular economic and business management importance, with good prospects of future revenues or containment of costs.
The heading Other includes expenses in respect of third-party buildings (generally amortised over the life of the relevant leases), rights of way acquired by Telecom Italia in order to extend its transmission capacity to non-Italian territory (amortised over the residual life of the contracts signed with the foreign operators who own the facilities to which the rights refer), and the exclusive rights acquired by Telecom Italia and by TIM with regard to the celebrations for the "2000 Grand Jubilee" (amortised over the term of the rights).
Research, development and advertising expenses are expensed as incurred.

Tangible fixed assets

Tangible fixed assets are recorded at purchase or construction cost, restated in accordance with specific monetary revaluation laws, and amortised over their residual useful lives.
Tangible fixed assets are written down to reflect any other than temporary impairment in historical value net of accumulated depreciation and their original book value is reinstated in subsequent years if the reasons for such writedowns no longer apply.
Tangible fixed assets under construction are recorded at direct cost.
Ordinary maintenance costs are expensed as incurred.

Equity investments

Long-term equity investments are classified as financial fixed assets; equity investments purchased for subsequent disposal are classified as financial assets not held as fixed assets.

1279

Equity investments classified as financial fixed assets in unconsolidated companies in which at least 20% of voting rights are held are accounted for using the equity method. Other unconsolidated equity investments held as financial fixed assets are stated at purchase cost written down to reflect the book value of equity as per the most recent balance sheet of the company concerned in order to reflect any other than temporary impairment in value. Losses in value in excess of the corresponding book values are provided for in Reserves for risks and charges. In all cases, the book value of such equity investments is aligned with any presumed lower value determined on the basis of reasonable expectations of future utility and recovery.
Investments in consolidated listed companies purchased for trading purposes and classified under current assets are recorded at the lower of purchase cost and realisable value determined on the basis of year-end stock market prices.
Writedowns of equity investments (both those held as financial fixed assets and those held as current assets) are eliminated in subsequent years if the reasons for such writedowns no longer apply.

Securities other than equity investments

Securities to be held until maturity are classified as financial fixed assets; marketable securities are classified as financial assets not held as fixed assets.
Securities held as financial fixed assets are recorded at purchase cost adjusted on a time-apportionment basis for the difference between such cost and their redemption value, and written down to reflect any other than temporary impairment in value.
Securities held as current assets are recorded at the lower of purchase cost – adjusted on a time apportionment basis for the issue spread – and realisable value based on market trends.
Writedowns are eliminated in subsequent years if the reasons for such writ-downs no longer apply.
Securities purchased through reverse repurchase agreements are classified as financial assets not held as fixed assets and stated at purchase cost. The difference between spot and forward prices is credited or charged against income on a time-apportionment basis, with contra-item recorded under accrued income/expenses.

Inventories

Inventories are valued at the lower of purchase or production cost and estimated market value.
The main methods used to determine cost are as follows:
- raw materials and finished products: LIFO with annual layers;
- goods: weighted average;
- work-in-progress and semi-finished products: production cost;
- short-term contract work-in-progress (less than twelve months): industrial cost;
- long-term contract work-in-progress: percentage of completion method based on agreed revenues and taking account of presumed losses until completion and of any other related risks.

Raw materials, finished products and goods in excess of foreseeable production requirements, subject to obsolescence or slow-moving, are written down to estimated realisable value.

1290

Accounts receivable and payable

Accounts receivable are recorded at their estimated realisable value and classified as financial fixed assets or as current assets.
Accounts payable are recorded at face value.
Foreign-currency receivables and payables are translated using year-end exchange rates; gains or losses arising from the difference between year-end values and original values are classified respectively as "financial income" and "financial charges".
The accounts receivable due to the consolidated subsidiary TIM from almost all its dealers are factored without recourse within the agreed limits. As each factored receivable falls due, the factoring company pays TIM the receivable face value minus amounts due to the dealer for services provided. TIM has not lodged guarantees in respect of such factoring operations.

Telephone employees social security fund (FPT)

Under law no. 58/1992, Telecom Italia is required to provide full national insurance coverage for all employees on the payrolls of STET, SIP, Italcable and Telespazio as of 20 February 1992 and for all employees transferred from the Public Administration to IRITEL, through the "Fondo Previdenza Telefonici – FPT" (Telephone employees social security fund). This coverage extends to previous periods of employment in other companies. The amounts due are calculated by the Italian National Insurance Board (INPS), for payment in 15 annual instalments. Subsequently, article 66 of law no. 427/1993 provided for these costs to be recorded in the company accounts and deducted against taxes in the years in which the payments are made.
The total liability is uncertain due to a disagreement between Telecom Italia and the INPS with regard to the method used to calculate the amounts due.
The positions of the two parties are currently being examined by the courts. Telecom Italia believes that the total liability relating to these contributions as of 31 December 1999 can be estimated between 1,800 billion lire and 2,400 billion lire (of which 381 billion have already been paid), net of the residual amount already recorded by IRITEL and currently stated in the accounts of Telecom Italia and TIM following the merger of IRITEL (1,477 billion lire as of 31 December 1999).
For the purposes of determining consolidation goodwill, and in compliance with the relevant accounting policies, a payable for an amount equivalent to the minimum estimated liability has been recorded in the Olivetti Group consolidated financial statements.

Accruals, prepayments and deferrals

Accruals, prepayments and deferrals are determined to reflect the correct apportionment of revenue and expense transactions covering two or more accounting periods.

Reserves for risks and charges

Taxation: provisions to this reserve cover both presumed tax liabilities (including any surcharges and interest) in respect of unassessed or disputed positions, and deferred taxes.
In addition to deferred taxes, prepaid tax credits determined on the basis of temporary differences

1261

between the book values of consolidated companies' assets and liabilities and their corresponding tax values and on the basis of consolidation adjustments are also recognised.
Prepaid tax credits prudentially are not recognised unless there is a reasonable certainty that in those years in which the temporary differences will be reversed future taxable income will be equal to or greater than the total amount of such differences.
Prepaid tax credits and deferred taxes are recorded, respectively, under the current assets heading "receivables due from others" and under the "reserve for taxation", with contra-items to "income taxes for the year".
The tax benefits of tax loss carry-forwards are recognised to the extent that such benefits can reasonably be expected to be realised.
Deferred taxes on reserves not liable for taxation in respect of consolidated companies or companies valued with the equity method are recognised as and when such reserves are expected to be distributed or used, giving rise to tax charges.
Other provisions: these provisions largely relate to known or likely losses or liabilities, the timing or extent of which are uncertain at year-end. The provisions reflect best estimates based on the commitments taken and the information available. They include, among others:
a) a reserve for liabilities arising from unfavourable legal proceedings, determined, in accordance with prudent criteria, on the basis of the probable outcome of disputes;
b) a reserve for risks on contracts and other risks, determined, in accordance with prudent criteria, by quantifying charges relating to the stipulation of commercial and other transactions;
c) a reserve for losses on equity investments, to cover losses in value of unconsolidated equity investments in excess of their corresponding carrying value.

Employee severance indemnities

This reserve is formed in accordance with current legislation and employment contracts and reflects the liability accrued to all employees of the consolidated companies at year end. The receivable arising as a result of the advance tax payment on severance indemnities pursuant to law no. 662 of 23 December 1996 and subsequent amendments is shown under the financial fixed asset heading "other receivables". The amount has been revalued in accordance with this law.

Grants

Grants related to income (which are directly credited to the income statement) and grants related to assets are recognised in the period in which the documents confirming payment of such grants are filed or, in cases where payment is based on established procedures, in the accounting period in which the relevant costs are sustained.
More specifically, grants related to assets are deferred and shown as deferred income; they are credited to income over the period in which the assets to which they refer are depreciated.

Revenues

Revenues are recognised as they arise and credited to consolidated income as follows:
a) *telecommunications services:* as provided; as from 1999, traffic revenues are stated gross of amounts due to third-party operators;

1282

b) *IT operations and innovative network services, miscellaneous operations:* to the extent that the relevant services are performed during the year;
c) *manufacturing and facilities operations:* on delivery in the case of supplies, on completion of work in the case of services, in compliance with contractual undertakings;
d) *office products:* on delivery of goods.

Sale and lease-back operations

Gains realised on the sale to leasing companies of fixed assets that are immediately leased back are deferred and credited to consolidated income over the term of the leasing contract.

Dividends

Dividends from subsidiaries are recorded when accrued (i.e., in the year in which the corresponding income is earned) and eliminated in the consolidation. Deferred taxes are provided against such dividends.
Also tax credits arising on collection of dividends are recorded under financial income in the year in which the dividends accrue, with contra-item under the other receivables heading "Prepaid taxes".
Dividends from non-subsidiary companies and the related tax credits are recorded at the time dividends are declared, which is generally the year of collection.

Memorandum accounts

Guarantees given - relating in the main to suretyships - are stated for the amount of the guarantee, net of counter-securities received.
Purchase and sale commitments reflect contract amounts as of year end date not included in the normal "operating cycle" and amounts yet to be executed.

Derivative instruments

Financial derivatives, entered into for hedging purposes, are assessed on the basis of the assets and liabilities covered. The relevant financial flows are charged or credited to income on accrual basis over the term of the contract, with contra-item to accruals and deferrals.
Non hedging financial derivatives are assessed through a comparison of the original contract value and the year-end contract market value. Any capital losses are charged against income. Gains are not recorded since they are not realised.
The premiums against the purchase and sale of put and call options to shares held in the portfolio are recorded as "other payables" or "receivables due from others". If the options are exercised the premium represents an additional component of the purchase or selling value of the underlying instruments. If the option is not exercised the premium is recorded as financial income or financial charges. Purchase or sale commitments in respect of the sale of put and call options are disclosed in these notes under the section "Financial hedging instruments".

1283

Departures pursuant to article 2423, par 4, Italian Civil Code

No departures from accounting principles allowed under article 2423, par 4 of the Italian Civil Code have been made in the consolidated financial statements as of 31 December 1999.

Changes in the application of accounting policies

As noted earlier, in 1999 changes were introduced in the accounting treatment of registration duty on share capital increases and of dividends from subsidiaries.
The impact of the new policies on the net result for financial 1999 and on shareholders' equity as of 31 December 1999 is discussed in the comments on "Intangible fixed assets" and "Income from equity investments".

1284

Comments on Assets

B) Fixed assets

I. Intangible fixed assets

Net intangible fixed assets at 31 December 1999 amounted to 28,044 million euro (1,729 million euro at 31 December 1998).

(in millions of euro)	Gross value at 31.12.1999 (a)	Accumulated amortisation 31.12.1999 (b)	Net book value at 31.12.1999 (c)=(a-b)	of which Telecom Italia Group at 31.12.1999	Net book value at 31.12.1998 (d)	Change (c-d)
Start-up and expansion costs	95	21	74	-	128	(54)
Research, development and advertising expenses	15	10	5	-	49	(44)
Industrial patents and intellectual property rights	2,775	1,986	789	778	174	615
Concessions, licences, trademarks and similar rights	274	121	153	153	799	(646)
Goodwill	36	27	9	4	6	3
Assets in process of formation and advance payments	398	-	398	390	49	349
Other	1,004	563	441	330	113	328
Consolidation differences	26,846	671	26,175	214	411	25,764
Total	**31,443**	**3,399**	**28,044**	**1,869**	**1,729**	**26,315**

Start-up and expansion costs comprise costs relating to share capital increases at Olivetti S.p.A. during 1999. Until 31 December 1998, these costs largely consisted of registration duty paid on the incorporation and share capital increases of the consolidated companies. Beginning in 1999, registration duty is fully expensed.
As noted above, beginning in 1999, registration duty relating to share capital increases is no longer capitalised as an intangible fixed asset, but expensed under other operational expenses; registration duty on the 1999 share capital increase relating to the Public Tender Offer on Telecom Italia has been expensed under extraordinary charges (as have all other expensed costs relating to the Public Tender Offer). The residual value of capitalised registration duty from previous years was written off and the corresponding amount recorded under extraordinary charges.
Had the accounting policy of 1998 been applied in 1999, 1999 net income and shareholders' equity as of 31 December 1999 would each have been 133 million euro higher.

Industrial patents and intellectual property rights essentially relate to application software owned or licensed indefinitely, and are attributable in the main to the Telecom Italia Group.

1285

Concessions, licences, trademarks and similar rights largely comprise the residual cost of the licence acquired by Stet Hellas Telecommunications to operate a GSM mobile communications service in Greece, and the residual costs sustained by Telecom Italia for the launch and acquisition of satellite utilisation rights.

Consolidation differences (or goodwill arising on consolidation) amounted to 26,175 million euro at 31 December 1999 and included:

- 24,896 million euro in respect of the acquisition by the subsidiary Tecnost S.p.A. at the end of the first half of 1999 of 52.12% of the common shares of Telecom Italia, net of amortisation for 1999 of 638 million euro.

Initial goodwill arising on consolidation (25,534 million euro) was determined by comparing the overall price of 31,501 million euro paid by Tecnost as a result of the Public Tender Offer with the pro-quota book value of Telecom Italia Group shareholders' equity at the time of the acquisition of the equity investment in Telecom Italia S.p.A., assuming this date to be 30 June 1999, as very close to the acquisition date.

Shareholders' equity, equivalent to 16,166 million euro (of which 5,967 million euro attributable to Olivetti) reflects all the information available for the purposes of correct determination.

Given the complexity and the magnitude of the fixed assets acquired, updated assessments of fixed assets are currently being made to ensure uniformity between book values and the current market values used in determining values.

(in millions of euro)	Total amount	Portion owned by Olivetti (36.91%)
Book value of Telecom Italia Group shareholders' equity as of 30 June 1999	16,227	5,989
Restoration of dividends previously deducted from Telecom Italia shareholders' equity as of June 30, 1999 but included in the purchase price of Telecom Italia shares during the Tender Offer	1,095	404
Write-off of goodwill arising on consolidation in respect of Telecom Italia subsidiary companies consolidated line-by-line, as required by accounting policies	(665)	(245)
Amount due to the INPS (Italian National Insurance Board) for the "Fondo Previdenza Telefonici" (telephone employees social security fund) in respect of social security charges relating to Telecom Italia Group employees pursuant to law no. 58/1992 not recorded in the financial statements as of 30 June 1999 (given that such charges are to be charged on cash basis pursuant to law no. 427/1993), net of the related tax effect of 289 million euro (106 million euro relating to Tecnost)	(491)	(181)
Shareholders' equity taken as reference	**16,166**	**5,967**

Goodwill relating to Telecom Italia Group associated companies, totalling 2,834 million euro at 30 June 1999, was not considered to adjust book shareholders' equity but was recognised in determining the goodwill in question.

Overall goodwill arising on consolidation totalling 25,534 million euro has been recorded under intangible fixed assets (justified by stock market prices, by the availability of the majority of voting rights and by the profitability projections arising from implementation of the Industrial Plan for Telecom Italia presented at the time of the Public Tender Offer) and is amortised over 20 years, beginning from the second half of 1999.

1286

• 1,026 million euro in respect of the acquisition on the stock market by the Tecnost Group of an additional 151,217,200 Telecom Italia common shares during the second half of 1999 (the equivalent of 2.875% of common share capital and 2.036% of total share capital), determined by comparing the total cost of 1,349 million euro with the pro-quota book value of Telecom Italia Group shareholders' equity at 31 December 1999 of 323 million euro (after negative adjustments totalling 1,184 million euro to Group book shareholders' equity, similar to those illustrated with regard to the stock acquired at the time of the Public Tender Offer); this consolidation goodwill is amortised over 20 years beginning from 2000;
• 253 million euro relating to other equity investments.

Assets in process of formation and advance payments amounted to 398 million euro, of which 390 million euro for costs largely sustained by Telecom Italia for current software development projects.

The caption *Other* totalled 441 million euro and included:
a) 191 million euro of leasehold improvements on buildings, of which 179 million euro attributable to the Telecom Italia Group;
b) 33 million euro of costs sustained by Telecom Italia and TIM to acquire exclusive rights for the "Grand Jubilee", net of the amortisation charges for the year;
c) 61 million euro in bank fees and commissions sustained by the Tecnost Group in respect of the Public Tender Offer for Telecom Italia;
d) 37 million euro in bond issuance expenses.
The net increase of 26,315 million euro in intangible fixed assets in 1999 was attributable to the following components:

(in millions of euro)	Year 1999	
Net effect on the Tecnost Group of Telecom Italia acquisition:		1,563
- industrial patents and intellectual property rights	659	
- assets in process of formation and advance payments	371	
- other	533	
Net increase in Telecom Italia Group intangible fixed assets in second half of 1999		305
Goodwill arising on consolidation in respect of Telecom Italia acquisition:		26,560
- Public Tender Offer	25,534	
- subsequent stock acquisitions	1,026	
Other capitalised costs:		217
- expenses relating to Public Tender Offer	67	
- costs relating to Olivetti S.p.A. share capital increase	80	
- other	70	
Amortisation:		(683)
- goodwill arising on consolidation in respect of Telecom Italia	(639)	
- other	(44)	
Net effect of the disposal of equity investments (principally OliMan Group)		(1,647)
Total net increase		**26,315**

1287

II. Tangible fixed assets

Net tangible fixed assets at 31 December 1999 amounted to 23,865 million euro (1,662 million euro at 31 December 1998) and comprised:

(in millions of euro)	Gross value at 31.12.1999	Accumulated depreciation at 31.12.1999	Net book value at 31.12.1999	of which: Telecom Italia Group net book value at 31.12.1999	Net book value at 31.12.1998	Change
Land and buildings	8,062	2,731	5,331	5,073	319	5,012
Plant and machinery	51,418	34,842	16,576	16,522	992	15,584
Industrial and commercial equipment	1,332	1,187	145	124	24	121
Other assets	2,390	1,812	578	567	158	420
Assets under construction and advance payments	1,235	-	1,235	1,222	169	1,066
Total	**64,437**	**40,572**	**23,865**	**23,508**	**1,662**	**22,203**

Changes in net tangible fixed assets during 1999 were as follows:

(in millions of euro)	
Net book value as of 31 December 1998	**1,662**
Effect of acquisition of the Telecom Italia Group	23,328
Effect of the sale of OliMan Holding B.V.	(1,237)
Other changes in the area of consolidation	(49)
New additions	2,405
Depreciation	(2,076)
Translation differences, disposals and other changes	(168)
Net book value as of 31 December 1999	**23,865**

Additions totalled 2,405 million euro, of which 2,357 million euro sustained by the Telecom Italia Group in the post-acquisition period (i.e., in the second half of the year) and 48 million euro sustained by other Group companies during the entire year.
Specifically, Telecom Italia Group additions of 2,357 million euro were as follows:

(in millions of euro)	1999
Telecommunication services	2,238
IT activities and innovative network services	20
Manufacturing operations	11
Installation	19
Sundry operations and consolidation adjustments	69
Total	**2,357**

1288

Additions by other Group companies totalled 48 million euro and comprised:

(in millions of euro)	1999
Olivetti Lexikon Group:	
Plant and machinery	12
Production equipment	14
Other	6
	32
Olivetti Multiservices:	
Work in progress	8
Other	2
	10
Olivetti S.p.A.	4
Other companies	2
Total	**48**

Depreciation was provided at rates reflecting the estimated useful lives of the assets. The annual rates applied, reduced for additions in the year, were as follows:

Buildings	3-10%
Plant and machinery	3-40%
Industrial and commercial equipment	15-40%
Other assets	12-33%

Depreciation policy was the same as that applied in 1998.

III. Financial fixed assets

Financial fixed assets as of 31 December 1999 totalled 7,090 million euro against 469 million euro at 31 December 1998. The detail is as follows:

(in millions of euro)	31.12.1999	of which Telecom Italia Group	31.12.1998	Change
Equity investments	6,459	6,365	281	6,178
Financial receivables	29	-	44	(15)
Non financial receivables	566	461	98	468
Other securities	34		44	(10)
Treasury stock	2	-	2	-
Total	**7,090**	**6,826**	**469**	**6,621**

1249

Equity investments

(in millions of euro)	31.12.1999	of which Telecom Italia Group	31.12.1998	Change
Equity investments in unconsolidated subsidiaries	127	121	12	115
Equity investments in associated companies	5,951	5,944	7	5,944
Equity investments in other companies	381	300	262	119
Total	**6,459**	**6,365**	**281**	**6,178**

The main investments in unconsolidated subsidiary companies were in Meie Assicurazioni and Meie Vita. These equity investments have been valued using the equity method because of the diversity of the insurance industry compared with the industry in which the Telecom Italia Group operates, pursuant to article 28, par 1 of Legislative Decree no. 127/1991.

Investments in associated companies (5,951 million euro) comprised:

(in millions of euro)	Book values as of 31.12.1999
Telekom Austria	1,997
Solpart Partecipaçoes	410
Mobilkom Austria	601
Retevision	439
Etec S.A.	489
Nortel Inversora	496
B.D.T.	170
Entel Chile	241
Astrolink LLC	247
Other	861
Total	**5,951**

The total includes the residual amount to be amortised (2,487 million euro) of the positive consolidation difference, at the time of acquisition, between acquisition cost and book value of the investments. This difference largely referred to:

(in millions of euro)	31.12.1999
Telekom Austria	1,195
B.D.T.	145
Mobilkom Austria	333
Retevision	258
Nortel Inversora	131
Other	425
Total	**2,487**

1290

Changes in equity investments in 1999 were as follows:

(in millions of euro)	
Net book value as of 31 December 1998	**281**
Effect of acquisition of the Telecom Italia Group	6,137
Disposals	(189)
Writedowns	(472)
Amortisation of consolidation differences	(347)
Revaluations	114
Acquisitions	718
Other changes	217
Net book value as of 31 December 1999	**6,459**

Non-financial receivables

At 31 December 1999, other receivables classified as financial fixed assets (but not included in the net financial position) amounted overall to 566 million euro (of which 100 million euro due within 12 months and 466 million euro after 12 months). Non-financial receivables due after 12 months included a receivable of 174 million euro, including revaluations, for advance taxes paid in relation to employee severance indemnities.

Other securities

As of 31 December 1999, this heading totalled 34 million euro (44 million euro at 31 December 1998) and comprised:

- 3 million euro of guarantee deposits in securities;
- 31 million euro for a bond covering commitments relating to possible supplementary pension liabilities due to former Olivetti employees in Spain.

Treasury stock

At 31 December 1999, the Group held 2,697,500 savings shares, also acquired from employees, with a nominal value of equivalent 1.4 million euro. These shares are recorded at cost – 2.3 million euro – and are fully matched by a specific restricted equity reserve (unchanged from 31 December 1998).

1291

C) Current assets

I. Inventories

Net inventories as of 31 December 1999 totalled 1,215 million euro (269 million euro at 31 December 1998); book value as of 31 December 1999 was substantially the same as current value at that date.
Long-term contract work-in-progress is valued on the basis of payments due under contractual terms, using the percentage of completion method.

(in millions of euro)	31.12.1999	of which Telecom Italia Group	31.12.1998	Change
Raw, ancillary and consumable materials	113	98	23	90
Work-in-progress and semi-finished products	90	69	31	59
Total manufacturing inventories	203	167	54	149
Finished products and goods for resale	355	220	211	144
	558	387	265	293
Contract work-in-progress	641	628	1	640
Advance payments	16	15	3	13
Total	**1,215**	**1,030**	**269**	**946**

II. Receivables

Accounts receivable not classified as fixed assets as of 31 December 1999 totalled 11,908 million euro (2,101 million euro at 31 December 1998).

(in millions of euro)	31.12.1999	31.12.1998	Change
Receivables due within 12 months	11,106	2,024	9,082
Receivables due after 12 months	802	77	725
Total	**11,908**	**2,101**	**9,807**

1297

Receivables due within 12 months

(in millions of euro)	31.12.1999	of which Telecom Italia Group	31.12.1998	Change
Financial receivables:				
Interest-bearing current accounts				
- subsidiary companies	10	10	-	10
- associated companies	23	22	1	22
- third parties	49	28	1	48
Financing account				
- associated companies	83	82	-	83
- third parties	7	7	-	7
	172	149	2	170
Non-financial receivables:				
from subsidiary companies	36	30	5	31
from associated companies	388	387	7	381
trade from customers	8,780	8,352	1,354	7,426
other	2,494	1,267	861	1,633
	11,698	10,036	2,227	9,471
less: allowance for doubtful accounts	(764)	(669)	(205)	(559)
	10,934	**9,367**	**2,022**	**8,912**
Total	**11,106**	**9,516**	**2,024**	**9,082**

Trade receivables net of writedowns amounted to 8,780 million euro and referred in the main to amounts due for telecommunications services provided and supplies of office products.
Receivables have been written down to presumed realisable value. Such writedowns largely concern amounts due to telecommunications companies.
During 1999 trade receivables ceded through factoring operations amounted to approximately 3,200 million euro, of which about 3,100 million euro relating to TIM (receivables due from dealers ceded without recourse within agreed limits, with collection on due date); ceded receivables not yet due as of 31 December 1999 totalled approximately 320 million euro.
Non-financial receivables due from others within 12 months amounted to 2,494 million euro and comprised:

(in millions of euro)	31.12.1999	31.12.1998	Change
Subsidies and grants due from the State and other public bodies	58	146	(88)
Amounts collected from customers, currently being credited	275	-	275
Amounts due from the tax authorities	662	429	233

Total	**2,494**	**861**	**1,633**

123

Prepaid taxes, determined in accordance with the principles laid out in Accounting Document no. 25 published by the Italian Accounting Profession Commission reflects the tax benefit arising from prepaid taxes not offset against deferred taxes, determined on the basis of differences that will be reversed in 2000, and from tax loss carry-forwards utilisable against 2000 taxable income.

Receivables due after 12 months

Receivables due after 12 months at 31 December 1999 totalled 802 million euro and included:
- 756 million euro for prepaid tax credits of which 297 million euro relating to the Telecom Italia Group, 289 million euro arising from the payable relating to the "Fondo Previdenza Telefonici" (accounted for by the Telecom Italia Group on cash basis) and 170 million euro reflecting the future benefit of tax loss carry-forwards utilisable against taxable income as from 2001;
- 46 million euro for other receivables, of which 35 million euro of trade receivables.

Receivables due from customers in the Russian Federation (dating back to 1991), which as of 31 December 1998 were stated at 10% of face value (i.e., at 7 million euro), have been prudently written off in full.

III. Financial assets not held as fixed assets

As of 31 December 1999 this caption amounted to 1,951 million euro (871 million at 31 December 1998).

(in millions of euro)	31.12.1999	of which Telecom Italia Group	31.12.1998	Change
Equity investments	69	69	-	69
Securities	1,749	1,265	614	1,135
Receivables for securities held under reverse repurchase agreements	133	-	257	(124)
Total	**1,951**	**1,334**	**871**	**1,080**

Equity investments totalled 69 million euro, of which TIM shares for 55 million euro; the year-end stock market value of these shares was 69 million euro higher than book value.
Receivables for securities held under reverse repurchase agreements (133 million euro) reflects the purchase price of securities acquired under a commitment to resell them at a later date for a fixed price. Income and expense arising from these transactions, taking into account the difference between the agreed spot and forward prices, are recognised on an accruals basis and classified as other financial income/charges.

IV. Liquid funds

As of 31 December 1999, liquid funds amounted to 1,162 million euro (533 million euro at 31 December 1998), of which 678 million euro relating to the Telecom Italia Group. They largely comprised cash held in bank current accounts.

1294

D) Accrued income and prepaid expenses

Accrued income and prepaid expenses as of 31 December 1999 amounted to 290 million euro (107 million euro at 31 December 1998).

(in millions of euro)	31.12.1999	of which Telecom Italia Group	31.12.1998	Change

Comments on Liabilities and Shareholders' Equity

A) Shareholders' equity

I. Share capital

As of 31 December 1999, the share capital of Olivetti S.p.A., fully subscribed, paid up and registered in the Register of Companies, was represented by 4,815,238,805 shares (2,914,614,817 shares at 31 December 1998), comprising 4,721,387,429 common shares (2,820,763,441 at 31 December 1998), 15,221,888 preferred shares (the same as at 31 December 1998) and 78,629,488 savings shares (the same as at 31 December 1998), each with a nominal value of 1,000 lire, for a total amount of 4,815,238,805,000 lire (2,914,614,817,000 lire at 31 December 1998), equivalent to 2,487 million euro (1,505 million euro at 31 December 1998), for an overall net increase of 1,900,623,988,000 lire, equivalent to 982 million euro.
Further details are provided in the comments on share capital in the explanatory notes to the Olivetti S.p.A. financial statements.

Future potential changes in capital

At 31 December 1999, a total of 87,143,605 "Olivetti 1998-2002 floating-rate bonds" were still outstanding, net of 847,233 bonds against which the corresponding shares had already been issued but not authorised by the Courts, and net of 1,052,421 bonds whose conversion into common shares had been requested by 31 December 1999 and completed, with the issue of the relevant shares, on 17 January 2000; in respect of such bonds, a total of 87,143,605 common shares for an overall value of 87.1 billion lire (45 million euro) could still be issued.
At 31 December 1999, a total of 54,852,669 "Olivetti 1998-2002 common share warrants" were still outstanding, net of 38,979 exercised warrants against which the corresponding shares had already been issued but authorised by the Courts in January 2000, and net of 42,692 exercised warrants against which the corresponding shares had not been issued by the end of the year (17 January 2000); in respect of such warrants, 54,852,669 common shares at a price of 1,000 lire per share for an overall value of 54.9 billion lire (28 million euro) could still be issued.
At 31 December 1999, 26,961,667 Olivetti 1999-2001 free warrants assigned to managers of the Parent Company and its subsidiaries pursuant to the plan approved by the Board of Directors on 9 June 1999 and the additions approved on 29 November 1999 (as described in the section on employee stock option plans) had not been exercised.
Consequently, 26,961,667 common shares at a price of 2,320 per share including a premium of 1,320 lire for an overall value of 62.6 billion lire, of which 27 billion as share capital and 35.6 billion as additional paid-in capital, could still be issued.
The Shareholders' Meeting of 12 May 1994 authorised the Directors to issue bonds, including convertible bonds, up to a maximum amount of 2,000 billion lire, within the limits allowed by law, and to issue shares up to a maximum nominal amount of 1,000 billion lire.

1296

On 9 June 1994, in partial exercise of the powers conferred by the Shareholders, the Directors resolved to issue a 500 billion lire bond, at a floating interest rate and maturing in 2001. This issue was fully subscribed and listed during 1994.

I.bis Share capital increase to be filed with the Register of Companies pursuant to article 2444 of the Italian Civil Code.

This heading, amounting to 11,323,082.53 euro at 31 December 1999, equivalent to 21,924,545,000 lire (22 million euro at 31 December 1998), includes the nominal value of the shares issued by the Parent Company in respect of share capital increases for which the authorisation of the Courts was still pending as of the balance-sheet date. The heading comprises:

- a share capital increase of 21,038,333,000 lire (equivalent to 10,865,392.22 euro) through the issue of 21,038,333 common shares reserved for managers of the Parent Company and its subsidiaries in execution of the Board of Directors resolution of 9 June 1999 implementing the powers conferred by the Shareholders' Meeting of 7 April 1999;
- a share capital increase of 847,233,000 lire (equivalent to 437,559.33 euro) through the issue of 847,233 common shares following the conversion of a similar number of "Olivetti 1998-2002 floating-rate" bonds;
- a share capital increase of 38,979,000 lire (equivalent to 20,130.97 euro) through the issue of 38,979 common shares following the exercise of a similar number of "Olivetti 1999-2002 common share warrants".

I.ter Share capital increase on exercise of warrants

At 31 December 1999, this heading relating to the Parent Company amounted to 22,048.58 euro and referred to the payment made by the holders of 42,692 "Olivetti 1998-2002 common share warrants" (equivalent to 42,692,000 lire) on the exercise of such warrants, even though the corresponding shares had not yet been issued at that date (17 January 2000).

II. Additional paid-in capital

At 31 December 1999, this heading relating to the Parent Company amounted to 2,267,219,725.35 euro, equivalent to 4,389,949,537,600 lire, of which 4,343,044,129,600 lire referred to the share capital increase of 1,497,601,424,000 lire completed in July to finance the Public Tender Offer, and 46,905,408,000 lire reflected the difference between the nominal value of 130,292,800 "Olivetti 7.50% 1993-1999" bonds converted after 18 June 1997 (effective date of the amended ratio of 16 new shares for every 25 bonds) and the nominal value of the 83,387,392 shares issued in respect of such conversions.

II.bis Additional paid-in capital in respect of share capital increases to be filed with the Register of Companies

At 31 December 1999, this heading relating to the Parent Company amounted to 14,342,317.73 euro, equal to 27,770,599,560 lire, for the share capital increase of 21,038,333,000 lire reserved for managers of the Parent Company and its subsidiaries, which as of the balance-sheet date had not yet been filed with the Register of Companies (January 2000).

1297

V. Reserve for treasury stock

This reserve of 2,298,155.73 euro (4,449,850,000 lire) reflects the value of Parent Company treasury stock, recorded under the appropriate financial fixed assets heading in accordance with article 2357 ter of the Italian Civil Code. The reserve cannot be distributed while the shares are held.

VII. Other reserves

As of 31 December 1999, this heading reflected a negative balance of 203 million euro (a negative balance of 323 million euro at 31 December 1998).

a) Cumulative translation adjustments

This balance reflects the cumulative differences arising from the translation of foreign currency financial statements, accounted for directly under shareholders' equity. As of 31 December 1999, these balances were negative for 92 million euro (negative for 70 million euro at 31 December 1998).

b) Sundry reserves

These reserves include the results for the years through 1992, the reserves of subsidiaries not eliminated on consolidation and the effect of specific consolidation adjustments. As of 31 December 1999, these balances were negative for 111 million euro (negative for 253 million euro at 31 December 1998).

VIII. Retained earnings (accumulated losses)

At 31 December 1999, the Group had retained earnings of 31 million euro arising from 1998 income of 128 million euro net of accumulated consolidated net losses at 31 December 1998 of 97 million euro.

Group shareholders' equity

As of 31 December 1999, Group consolidated shareholders' equity amounted to 9,549 million euro (1,261 million euro at 31 December 1998).
The reconciliation of the Group consolidated net result with the Parent Company net result for 1999 is as follows:

(in millions of euro)	Net result for the year
Net result shown in the financial statements of Olivetti S.p.A. as of 31 December 1999	**2,832**
Elimination of the portion of writedowns and losses on equity investments recorded by the Parent Company, also for tax purposes, exceeding the results of subsidiary and associated companies used for consolidation purposes	2,075
Differences on gains on the disposal of equity investments	41
Other differences	(9)
Net result shown in the consolidated financial statements of the Olivetti Group as of 31 December 1999	**4,939**

1298

The reconciliation of Group consolidated shareholders' equity with Parent Company shareholders' equity as of 31 December 1999 is as follows:

(in millions of euro)	Shareholders' equity
Shareholders' equity shown in the financial statements of Olivetti S.p.A. as of 31 December 1999	**7,454**
Lower carrying values of equity investments in subsidiary and associated companies than those used for consolidation purposes, also as a consequence of writedowns recorded for tax purposes only	2,058
Other differences, net	37
Shareholders' equity shown in the consolidated financial statements of the Olivetti Group as of 31 December 1999	**9,549**

X. Minority interests

Minority interests as of 31 December 1999 and 1998 comprised:

(in millions of euro)	31.12.1999	31.12.1998	Change
Reserves	14,705	378	14,327
Result of the year:			
before acquisition of Telecom Italia Group	911	-	911
after acquisition of Telecom Italia Group	1,145	304	841
Total	**16,761**	**682**	**16,079**

Total shareholders' equity

Total shareholders' equity as of 31 December 1999 and 1998 amounted respectively to 26,310 million euro and 1,943 million euro and comprised:

(in millions of euro)	31.12.1999	31.12.1998	Change
Capital and reserves			
Group	4,610	1,133	3,477
Minority interests	14,705	378	14,327
	19,315	1,511	17,804
Net result of the year			
Group	4,939	128	4,811
Minority interests	2,056	304	1,752
	6,995	432	6,563
Total	**26,310**	**1,943**	**24,367**

1299

B) Reserves for risks and charges

Reserves for risks and charges as of 31 December 1999 and 1998 amounted respectively to 1,391 million euro and 322 million euro.

1) Employee pensions and similar obligations

This reserve includes the liabilities to employees of Group companies operating abroad. It totalled 56 million euro as of 31 December 1999, compared with 56 million euro at 31 December 1998.

2) Taxation

This heading includes the reserve for tax risks and the reserve for deferred taxation.
Provisions to the reserve for tax risks cover potential charges in respect of disputed assessments relating to open tax years. At 31 December 1999, this reserve amounted to 205 million euro, of which 160 million euro relating to the Telecom Italia Group and 45 million euro to Tecnost International.
Deferred and prepaid taxation is calculated at tax rates in force in each country on all temporary differences arising between the book value of assets and liabilities and the tax values recorded by the individual companies and on consolidation adjustments.
Deferred taxation and prepaid taxation are offset only when permitted by tax law and in respect of the year in which the respective differences are expected to reverse.
Consequently, the liabilities for deferred taxation not offset against prepaid taxation are classified in the reserve for deferred taxation, while prepaid tax assets not offset against deferred taxation are classified in Other receivables under Current assets.
The balance of deferred and/or prepaid taxation as of 31 December 1999 is a tax credit of 1,317 million euro, compared with a credit of 123 million euro as of 31 December 1998, arising as follows:

(in millions of euro)	31.12.1999	31.12.1998	Change
Reserve for deferred taxation	153	42	111
Prepaid tax credit	(1,470)	(165)	(1,305)
Net tax liability (credit) balance	**(1,317)**	**(123)**	**(1,194)**

The net tax credit balance of 1,317 million euro comprises an amount of 553 million euro reflecting the future benefit of tax loss carry-forwards and an amount of 764 million euro reflecting net prepaid taxes, calculated on temporary differences as explained above.
As of 31 December 1999, the companies in the Olivetti Group had tax loss carry-forwards totalling 3,937 million euro. According to a prudent estimate based on the budget and on future plans currently available, only a part of these losses can reasonably be expected to be used to offset future taxable income; in fact, the residual losses reasonably considered to be utilisable in the future are quantified at 2,048 million euro, with a tax benefit of 553 million euro. This amount has been credited against Income taxes for the year (and included in the balance sheet under "Prepaid tax credit" in current assets) and derives from the partial writedown, made purely for tax reasons, of Tecnost S.p.A.'s equity investment in Telecom Italia S.p.A. pursuant to article 2426, par 2, of the Italian Civil Code.

1300

Tax loss carry-forwards whose future fiscal benefits have not been recognised owing to uncertainty about their realisation total approximately 1,889 million euro, of which approximately 303 million euro expiring within 3 years and 727 million euro with no expiry.

3) Other

Other reserves for risks and charges amounted to 977 million euro at 31 December 1999 and comprised:
- provisions for liabilities arising from disputes for 153 million euro, of which 149 million attributable to the Telecom Italia Group;
- provisions for contract-related risks for 392 million euro, chiefly consisting of an amount of 207 million euro for sundry risks relating to Telecom Italia S.p.A. and an amount of 162 million euro for charges relating to commitments and possible future risks in connection with the sale by Olivetti S.p.A. of the OliMan equity investment;
- provisions for restructuring charges of 182 million euro, of which 147 million euro attributable to the Telecom Italia Group and 28 million euro to Olivetti S.p.A. in respect of deferred social security charges connected to the reduction of the workforce pursuant to Law no. 223/1991;
- other sundry provisions for 250 million euro, of which 222 million euro attributable to the Telecom Italia Group.

C) Reserve for employee severance indemnities

This reserve represents the liability to employees for severance indemnities accrued in accordance with current legislation and employment contracts in the individual countries in which the consolidated companies operate.
Changes in the reserve during 1999 were as follows:

(in millions of euro)	
Balance as of 31 December 1998	**140**
Reserve of the Telecom Italia Group at the date of acquisition	1,490
Indemnity accrued: by the Telecom Italia Group in the second half-year	125
by other Olivetti Group companies	11
Indemnity paid in the year: by the Telecom Italia Group in the second half-year	(120)
by other Olivetti Group companies	(19)
Change in the consolidation area	(50)
Balance as of 31 December 1999	**1,577**

1301

D) Payables

As of 31 December 1999, total payables amounted to 44,881 million euro (5,079 million euro at 31 December 1998), comprising financial payables of 30,291 million euro (3,013 million euro at 31 December 1998) and trade and other payables of 14,590 million euro (2,066 million euro at 31 December 1998).

Other Olivetti Group companies	**523**	**2,905**	**3,428**	**697**	**2,303**	**3,000**

The main Olivetti Group financial payables were as follows:

Telecom Italia Group

Bonds amounted to 984 million euro and comprised:
- Telecom Italia S.p.A. 1992/2010 bond, reserved for active and retired company personnel, for an overall amount of 426 million euro;
- bonds maturing between 2000 and 2002, issued by Softe, through various financial institutes, for a total amount of 583 million US dollars, equal to 558 million euro.

1302

Amounts due to banks totalled 8,149 million euro and were secured by mortgages and liens for 62 million euro.
Amounts due to other providers of finance totalled 898 million euro and largely related to medium/long-term borrowings from "Cassa Depositi e Prestiti" and IRI.

Other Tecnost Group companies

Bonds issued by Tecnost S.p.A. and its subsidiaries totalled 15,868 million euro and comprised:
- a Tecnost International N.V. 1999-2004 floating rate bond (Euribor 3 months + 1.85%) for 9,444 million euro;
- two bonds totalling 6,250 million euro, issued by Tecnost International Finance N.V., as part of a new programme of Euro Medium-Term Notes (EMTN), on the following terms and conditions:
• 5-year 4,500 million euro bond, annual coupon 5 3/8%, maturing July 2004
• 10-year 1,750 million euro bond, annual coupon 6 1/8%, maturing July 2009
- a 20 billion yen bond repayable in 2029, issued by Tecnost International Finance N.V. as part of the Euro Medium-Term Notes programme, subscribed by a sole Japanese investor; this yen-denominated bond (bearing annual 5% interest on a notional reference capital of 185.6 million US dollars) was immediately converted into euro through an interest and currency swap contract, under which the original yen amount was converted into 174 million euro (337 billion lire) and the fixed interest rate converted into a six-monthly floating rate in euro.
Amounts due to banks totalled 858 million euro and included 505 million euro for use of a short-term line of credit for an original amount of one billion euro granted by Mediobanca and syndicated among a small group of Italian banks; this credit line was not secured by guarantees on assets but is subject to financial covenants commonly used for operations of this nature.

Other Olivetti Group companies

Bonds amounted to 2,520 million euro and comprised:
• Olivetti S.p.A. (258 million euro)
- 1994-2001 Italian lire floating-rate bond, converted through interest swap contracts into a fixed rate (4.145% quarterly) repayable in full in July 2001.
• Olivetti International N.V. (62 million euro)
- 1986-2046 Swiss franc fixed-rate bond (5.625% annual), converted by Olivetti International S.A., through an interest rate swap contract, into a floating rate (2.985% at 31 December 1999).
• Olivetti International N.V. (700 million euro)
- 1998-2003 bond, issued at a fixed rate of 5.875% and converted by Olivetti International S.A., through interest swap contracts into a floating rate (4.82% at 31 December 1999) for the same notional amount and currency
• Olivetti International N.V. (1,500 million euro)
- 1999-2009 bond issued at a fixed rate of 5% converted by Olivetti International S.A. for an amount of 1,000 million euro, as from February 2000, into a six-monthly floating rate, with protection against rising interest (collar).

1363

Convertible bonds totalled 45 million euro and comprised the "Olivetti 1998-2002" bond convertible into Olivetti common shares, repayable in full on 30 September 2002 (4.5% interest at 31.12.1999).
Amounts due to banks totalled 809 million euro (1,575 million euro at 31 December 1998, including 947 million euro relating to companies sold during 1999). The main items were as follows:
• Olivetti S.p.A.:
- IMI subsidised loans for research totalling one million euro, average interest of 4.5% at 31 December 1999, repayable by 2001;
- IMI loans for research pursuant to Law no. 346/1988 (interest-relief grants) totalling 116 million euro, average interest of 12.5376% at 31 December 1999, gross of the interest relief grant, repayable by 2004 (of which 21 million euro due by 31.12.2000);
- other loans totalling 178 million euro, average interest of 4.7801% at 31.12.1999, repayable by 2002 (of which 43 million euro due by 31.12.2000).
• Olivetti Lexikon Group:
- loans totalling 239 million euro (of which 160 million euro due by 31.12.2000)
• Other short-term payables totalling 275 million euro relating to other companies.
Amounts due to other providers of finance totalled 53 million euro and comprised:
• Olivetti S.p.A.: subsidised loans for technological innovation (FIT) totalling 27 million euro (of which 4 million euro due by 31.12.2000), average interest 7.0981% at 31.12.1999, repayable by 2010;
• other companies: sundry loans for a total amount of 26 million euro (of which one million euro due by 31.12.2000).

Amounts due to suppliers totalled 6,295 million euro, including 639 million euro due to other telecommunications services operators (mainly Omnitel and foreign operators).
Amounts due to tax authorities totalled 1,936 million euro, including current income taxes and withholding taxes.
Current income taxes refer to the current liability estimated by Group companies based on reasonable estimates of tax charges in accordance with local regulations and tax rates.
Other taxes as of 31 December 1999 mainly consisted of withholding taxes applied by Group companies.
The tax situation of Olivetti S.p.A. is illustrated in the explanatory notes to the Parent Company financial statements.

1306

Amounts due to social security authorities, totalling 1,749 million euro, reflects accrued contributions to be paid to social security authorities. It includes an amount of 763 million euro in respect of the residual amount due by Telecom Italia to the INPS (National Insurance Institute) in connection with the estimated charge pursuant to Law no. 58/1992 for the reabsorption of ex ASST employees, determined by a special ministerial commission during assessment of the assets transferred by the Post Authorities to IRITEL.
The heading also includes the payable in respect of the Telephone Workers fund (FPT) for Telecom Italia Group employees, amounting to 780 million euro (of which 133 million euro over the long term) determined as illustrated in the section "Accounting Policies" of these explanatory notes.

E) Accrued expenses and deferred income

The balance on this heading at 31 December 1999 was 1,367 million euro (257 million euro at 31 December 1998):

Hedging instruments and other derivatives

The Olivetti Group enters into forward contracts to hedge exchange risks linked to fluctuations in the various foreign currencies used by Group companies for commercial and financial transactions.
As of 31 December 1999, the Olivetti Group had commitments for the purchase and sale of foreign currencies at fixed exchange rates for the equivalent of 595 million euro, largely consisting of:
- hedging contracts on financial transactions arranged by Olivetti International SA for 262 million euro;
- hedging contracts on commercial transactions relating entirely to the Telecom Italia Group and largely consisting of the exposure in Greek drachma of Stet Hellas and the currency exposure of the trade receivables of the SOFTE company for the equivalent of 328 million euro.

The Olivetti Group enters into interest rate swaps and similar agreements to mitigate the effects of interest-rate fluctuations. As of 31 December 1999, Group companies had opened short- and long-term for-

1307

ward contracts covering financial assets and liabilities recorded in the financial statements with a total notional amount of 17,414 million euro (of which 2,497 million euro relating to the Telecom Italia Group). These contracts are listed below:

(in millions of euro)	31.12.1999
Telecom Italia Group:	
Interest rate swaps on Telecom Italia S.p.A. financial payables, due between 2000 and 2005	1,240
Interest rate swaps on the Euro Overnight Interbank Average (EONIA) rate transacted on Telecom Italia S.p.A. short-term financial payables	725
Hedging contracts through zero-cost collar contracts (purchase of cap contracts and sale of floor contracts) on Telecom Italia S.p.A. medium/long-term financial payables	74
Interest rate and currency swap operations on BEI pound sterling loans to Telecom Italia S.p.A.	312
Interest rate and currency swap operations on financial payables due from Brazilian subsidiaries for the purpose of converting dollar-denominated debt to Brazilian real-denominated debt	40
Other hedging contracts	106
Total	**2,497**
Other Tecnost Group companies:	
An interest rate and currency swap operation on the 20 billion yen bond maturing October 2029 issued by Tecnost Intl. Finance NV	174
Interest rate swap operations (with cap and floor structures):	
on the 1,750 million euro bond issued by Tecnost Intl. Finance NV maturing July 2009	1,750
on the 4,500 million euro bond issued by Tecnost Intl. Finance NV maturing July 2004	3,000
on the 9,444 million euro bond issued by Tecnost Intl. NV maturing June 2004	7,945
Total	**12,869**
Other Olivetti Group companies:	
Interest rate swap contract expiring June 2036, transacted by Olivetti Intl. SA on the 100 million Swiss franc bond (1986-2046) issued by Olivetti Intl. NV maturing June 2046	62
Interest rate swap contracts effective as from February 2000 transacted by Olivetti Intl. SA on the 1,500 million euro bond issued by Olivetti Intl. NV maturing February 2009	1,000
Interest rate swap operations transacted by Olivetti Intl SA on the 700 million euro bond issued by Olivetti Intl. NV expiring May 2003	700
Interest rate swap operations transacted by Olivetti S.p.A. on the 500 billion lire bond issued by Olivetti S.p.A. maturing July 2001 and simultaneous closure of previous hedging operations arranged with cap and floor structures for the same amount and expiring on the same date	258
Other hedging contracts	28
Total	**2,048**
Total Olivetti Group	**17,414**

The following hedging operations were transacted on Telecom Italia medium/long-term floating-rate financial payables due between 2000 and 2005:

- interest rate swap contracts with the same expiries with conversion of the floating rate into a fixed rate for 1,240 million euro (of which 252 million euro stipulated on 17 December 1999 with deferred effectiveness);

1308

• interest rate swap operations of less than 6 months correlated to the EONIA rate for 725 million euro.
• hedging contracts with zero-cost collar structures (purchase of cap contracts and sale of floor contracts) with the same expiries for 74 million euro;
• interest rate and currency swap operations on BEI sterling loans, with conversion of the sterling floating rate into a fixed rate and into a euro floating rate, for 312 million euro;
• interest rate and currency swap operations transacted by Tele Celular Sul and Tele Nordeste Celular on short-term dollar-denominated financial payables with conversion of the dollar floating rate to local currency (Brazilian real) floating rate, for 40 million euro.

With regard to the 20 billion yen fixed-rate bond maturing October 2029 issued by Tecnost Intl. Finance NV, Tecnost International N.V. transacted an interest rate and currency swap operation for the full amount and with the same expiry, with conversion of the fixed rate into a six-monthly euro floating rate.

With regard to the 1,750 million euro fixed-rate bond maturing July 2009 issued by Tecnost Intl. Finance NV, Tecnost International N.V. transacted interest swap operations for the same amount and with the same expiry, with conversion of the fixed rate into a floating rate, with the following additional hedges:

– purchase of cap contracts at a rate of 4.75% (converted to 7% should 12-month Euribor exceed this threshold during the period of the contract), for 1,000 million euro;
– purchase of cap contracts at a rate of 5.85% and sale of cap contracts at a rate of 7.95%, for 750 million euro, as from July 2002;
– sale of floor contracts at rates increasing from 2.65% to 2.85% for 750 million euro.

With regard to the 4,500 million euro fixed-rate bond expiring July 2004 issued by Tecnost Intl. Finance NV, Tecnost International N.V. transacted interest rate swap contracts for 3,000 million euro with the same expiry with conversion from a floating rate to a fixed rate, with the following additional hedges:

– purchase of cap contracts at a rate of 4.25% (converted to 5.25% should 12-month Euribor exceed this threshold during the period of the contract), for 1,000 million euro;
– purchase of cap contracts at a rate of 4.95% and sale of cap contracts at a rate of 6.85%, for 1,000 million euro;
– sale of floor contracts at rates increasing from 2.65% to 2.85% for 1,000 million euro.

With regard to the 9,444 million euro floating-rate bond issued by Tecnost Intl. NV, set at three-month Euribor plus a spread of 185 basis points, the following hedging contracts were transacted for a total amount of 7,944 million euro with expiry on 23 June 2002:

• interest rate swap contracts for 1,944 million euro with conversion of the bond floating rate (3-month Euribor) into an average annual fixed rate of 3.48%;
• an interest rate swap contract for 1,000 million euro with payment of 3-month Euribor minus a spread of 0.574%, and collection of 3-month Euribor.
• an interest rate swap contract for 3,000 million euro with conversion of the bond's quarterly floating rate into a six-monthly floating rate with an additional zero-cost collar structure made up as follows:
– purchase of cap contracts at 3.88% for the first year and 4.15% for the two subsequent years, for 1,500 million euro;
– purchase of cap contracts at 3.56% and sale of cap contracts at 5.19%, for 1,500 million euro;
– sale of floor contracts at 2.59% for the first year and 2.79% for the two subsequent years, for 2,000 million euro;

1309

• zero-cost collar structure for 2,000 million euro consisting of:
- purchase of cap contracts at 4.60%;
- sale of floor contracts at 2.60% for the first year, 3.15% for the second year and 3.38% for the third year.

With regard to the 100 million Swiss franc (62 million euro) fixed-rate bond maturing June 2046 issued by Olivetti International N.V., Olivetti Intl. S.A. transacted an interest rate swap contract for the full amount, expiry in June 2036, with conversion of the fixed rate into an annual floating rate in Swiss francs.

With regard to the 1,500 million euro 5% fixed-rate bond maturing in February 2009 issued by Olivetti Intl. NV, Olivetti Intl. SA transacted the following hedging contracts for a total amount of 1,000 million euro effective as from February 2000 and expiring in February 2009:

• interest rate swap operations for 500 million euro with conversion of the fixed rate into a six-monthly floating rate, with sale of floor contracts at an average rate of 4.15%; the floor is activated only if, during the six-month reference period, six-montly Euribor increases from 2.20% to 3.75% (this latter in the last five years);

• interest rate swap contracts for 500 million euro with conversion of the fixed rate into a quarterly fixed rate of 4.375% if 3-month Euribor remains below 5.52%, or else into a fixed rate of 5.8975%, should 3-month Euribor exceed 5.52%.

With regard to the 700 million euro 5.875% fixed-rate bond maturing in May 2003 issued by Olivetti Intl. NV, Olivetti Intl. SA transacted interest rate swap operations to transform the fixed rate into a six-monthly floating rate for the same amount and duration.

With regard to the 500 billion lire (258 million euro) floating-rate bond issued by Olivetti S.p.A. maturing July 2001, interest rate swap contracts were transacted for the full amount and with the same expiry, with conversion of the floating rate into a quarterly fixed rate of 4.145% and simultaneous closure of previous hedging contracts with collar structures (purchase of cap contracts and sale of floor contracts).

***

The following hedging contracts were transacted on securities or other assets for a total of 431 million euro:

• interest rate and currency swap operations by SOFTE on foreign currency securities for 341 million euro;

• interest rate and currency swap operations by Olivetti S.p.A. for an equivalent amount of 74 million euro to cover exposure in US dollars arising from a dollar-denominated restricted deposit relating to the sale of Olsy S.p.A. to Wang Laboratories Inc.;

• interest rate swap operations on fixed-rate securities for 16 million euro to mitigate the effects of a rise in interest rates.

***

The Telecom Italia Group transacted non-hedging operations relating to options on listed stocks in its share portfolio for 44 million euro (value determined on the basis of the exercise price).

1310

Memorandum accounts

A) Personal guarantees given, net of counter-securities received

As of 31 December 1999, personal guarantees given, also indirectly through banks and insurance companies, amounted to 1,884 million euro (495 million euro at 31 December 1998), of which 1,029 million euro in favour of unconsolidated subsidiary and associated companies (7 million euro at 31 December 1998).
As of 31 December 1999, personal guarantees given were as follows:

- personal guarantees given by the Telecom Italia Group to unconsolidated subsidiaries and associated companies (1,022 million euro) and to third parties (299 million euro) in respect of medium/long-term borrowings, for supply contracts and as guarantees on foreign telephone licences, for a total of 1,321 million euro;
- suretyships and counter-securities given by other Olivetti Group companies in favour of unconsolidated subsidiaries and associated companies (7 million euro), of consolidated subsidiaries (31 million euro) and of third parties (123 million euro), for a total of 161 million euro;
- 249 million euro for guarantees given by Olivetti S.p.A. in favour of Infostrada S.p.A. to the Italian State Railways;
- 90 million euro for guarantees given by Olivetti S.p.A. to Mannesmann AG in relation to the disposal of the equity investment in OliMan Holding B.V.;
- 38 million euro given by Olivetti S.p.A. to guarantee the fulfilment by Getronics S.p.A. (formerly Wang Global S.p.A.) of commercial supply contracts;
- 25 million euro for other guarantees.

As of 31 December 1999, against the above guarantees, the Olivetti Group received counter-securities totalling 674 million euro (91 million euro at 31 December 1998), and including:

- counter-securities from third parties totalling 374 million euro against guarantees given by Telecom Italia S.p.A.;
- counter-securities from Mannesmann AG totalling 249 million euro against guarantees given by Olivetti S.p.A. to the Italian State Railways;
- counter-securities from Getronics (in the place of Wang) for 43 million euro.

The increase of 806 million euro in personal guarantees given, net of counter-securities received, compared with 31 December 1998 largely arose from the change in the consolidation area, specifically the consolidation of the Telecom Italia Group and the deconsolidation of Omnitel Pronto Italia S.p.A. and Infostrada S.p.A., which were sold to Mannesmann AG.

B) Guarantees on Group companies' assets

These guarantees were represented by pledges and mortgages on assets of consolidated Telecom Italia Group companies in respect of non-financial operations for an amount of 9 million euro as of 31 December 1999.
Guarantees securing financial operations are analysed in the section on financial payables.

1311

C) Commitments

As of 31 December 1999, Olivetti Group commitments totalled 84 million euro (294 million euro as of 31 December 1998), net of counter-securities from third parties totalling one million euro (7 million euro at 31 December 1998). Commitments comprised:

- 65 million euro for leasing instalments, of which 9 million euro attributable to the Telecom Italia Group;
- 19 million euro for other commitments, of which 2.8 million euro attributable to the Telecom Italia Group.

D) Other accounts

As of 31 December 1999, other memorandum accounts totalled 586 million euro (64 million euro at 31 December 1998).
The increase of 522 million euro compared with 31 December 1998 was largely due to the consolidation of the Telecom Italia Group, and included third-party guarantee deposits for 231 million euro.

Other information

As of 31 December 1999, third-party assets deposited with the Olivetti Group amounted to the equivalent of 577 million euro (at stock market prices), and largely comprised:

- common shares, acquired through the take-up by employees of Telecom Italia S.p.A. and other consolidated Italian companies in the Telecom Italia Group of the Public Tender Offer, and sub-deposited with Monte Titoli S.p.A. (318 million euro);
- third-party shares deposited with TIM S.p.A. (178 million euro).

13/2

Comments on the Consolidated Statement of Income

As noted earlier, the revenues, income, costs and expenses of the Telecom Italia Group have been consolidated line-by-line for the full year, since the acquisition of the equity investment in Telecom Italia S.p.A. by the Olivetti Group took place in the first half of the year.
For consistency, the income statements of the controlling equity investments sold during the year (primarily Omnitel and Infostrada) have been excluded from the consolidation as from 1 January 1999.
1999 operating data are therefore not comparable with 1998 operating data. Nevertheless, in order to provide as complete a picture as possible, 1998 operating data are presented below.

A) Value of production

1) Revenues from sales and services

In 1999, revenues from product sales and the supply of services totalled 28,207 million euro compared with 3,702 million euro in 1998, a net increase of 24,505 million euro which largely reflected an increase generated by Telecom Italia Group revenues (27,104 million euro) and a decrease as a result of the sale of the controlling equity investments (2,479 million euro).

4) Capitalised production

Capitalised production amounted to 1,066 million euro of which 1,062 million euro attributable to the Telecom Italia Group and 4 million euro to the O.i.S. Group.

5) Other income

Other income amounted to 569 million euro in 1999 (85 million euro in 1998) and comprised:
- 22 million euro in grants to cover research, development and technological expenses (of which 20 million euro relating to the Telecom Italia Group);
- 73 million euro of grants related to assets released to income as accrued in the year, entirely attributable to the Telecom Italia Group;
- 474 million euro of other income from ordinary operations (of which 422 million euro relating to the Telecom Italia Group), mainly comprising amounts charged to customers for late bill payments (130 million euro), sundry indemnities and refunds, recovery of expenses and sundry income.

The overall movement of 484 million euro compared with 1998 reflects an increase of 515 million euro on the acquisition of the Telecom Italia Group and a decrease as a result of the sale of OliMan Holding B.V. and other equity investments, for 20 million euro.

313

B) Costs of production

6) Purchases of raw, ancillary and consumable materials and goods for resale

In 1999, this heading totalled 3,111 million euro (of which 2,476 million euro attributable to the Telecom Italia Group) compared with 1,156 million euro in 1998 (of which 406 million euro relating to the equity investments sold in 1999). It includes costs for the supply of materials relating to the Group's core businesses.

7) Cost of services received

In 1999, the cost of services received totalled 7,584 million euro (of which 7,380 million euro relating to the Telecom Italia Group) compared with 1,242 million euro in 1998, of which 1,078 million euro relating to the equity investments sold in 1999. The incidence of these costs on revenues decreased to 26.9% in 1999 (27.2% for the Telecom Italia Group) compared with 33.5% in 1998.

8) Leases and rentals

This heading includes the rental of buildings and other lease and hire charges. In 1999, these costs totalled 739 million euro (of which 704 million euro relating to the Telecom Italia Group), compared with 81 million euro in 1998, of which 57 million euro related to the companies sold in 1999, principally Omnitel and Infostrada.

9) Personnel

In 1999, payroll costs totalled 5,260 million euro (of which 4,977 million euro relating to the Telecom Italia Group). In 1998, payroll costs totalled 542 million euro of which 274 million euro related to the companies sold in 1999.
In 1999 the overall average number of Olivetti Group employees was 128,603 (15,657 in 1998), of whom 14,029 abroad (3,688 in 1998) and 114,574 in Italy (11,969 in 1998).
The breakdown of personnel in Italy is as follows (classification of personnel abroad is not consistent with that in Italy):

(in units)	Year 1999	of which Telecom Italia Group	Year 1998
ITALY			
Managers	2,470	2,319	298
Supervisors	9,501	9,055	1,012
White collars	83,380	81,047	8,470
Blue collars	19,223	17,971	2,189
Total average in Italy	**114,574**	**110,392**	**11,969**
Total average abroad	**14,029**	**10,935**	**3,688**

As allowed by law, the Group companies account for the relevant charge in the years in which the instalments fall due.

13/14

10) Depreciation, amortisation and writedowns

Provisions for 1999 totalled 6,018 million euro (of which 5,293 million euro relating to the Telecom Italia Group). They included 4,393 million euro for tangible fixed assets (4,351 million euro for the Telecom Italia Group) and 1,625 million euro for intangible fixed assets (942 million euro for the Telecom Italia Group).
In 1998 these charges totalled 457 million euro, of which 231 million euro relating to tangible fixed assets and 226 million euro to intangible fixed assets; of these amounts, 181 million euro and 175 million euro, respectively, referred to the companies sold in 1999.
1999 amortisation of intangible assets includes 638 million euro for goodwill arising on consolidation with regard to the acquisition of Telecom Italia after the success of the Public Tender Offer.
1999 writedowns totalled 504 million euro (436 million euro relating to the Telecom Italia Group) and included 88 million euro relating to fixed assets and 416 million euro relating to receivables held as current assets. In 1998, writedowns totalled 164 million euro of which 29 million euro relating to the companies sold in 1999.

12-13) Provisions for risks and Other provisions

In 1999, provisions for risks and other provisions totalled 334 million euro (of which 101 million euro relating to the Telecom Italia Group) and comprised provisions to the reserves for contract risks and for risks relating to legal disputes.
Specifically, the heading included:
- 88 million euro in relation to commitments to Mannesmann in respect of the sale of OliMan, in the event that Bell Atlantic should exercise its option on Omnitel Sistemi Radiocellulari S.p.A. shares at the previously agreed fixed price;
- 75 million euro for possible future charges relating to the Public Tender Offer on CCIL made in 1999;
- 8 million euro for charges from guarantees given to subsidiary companies;
- 163 million euro for other risks and charges, of which 101 million euro relating to the Telecom Italia Group.

14) Other operational expenses

The balance on this heading totalled 1,057 million euro (67 million euro in 1998) and included:

	Year 1999			
(in millions of euro)	Telecom Italia Group	Other companies	Year 1998	of which relating to the sold companies
Duties for telecommunications activities	606		49	49
Loss on disposal of intangible and tangible fixed assets	124			
Taxes other than on income and duties accrued in the year, including ICI (local tax on real estate)	111	41	8	1
Indemnities to Getronics deriving from the sale of Wang Lab. investment		30		
Association dues	125	20	10	10
Total	**966**	**91**	**67**	**60**

1315

C) Financial income and charges

15) Income from equity investments

Income from equity investments totalled 921 million euro and included:

(in millions of euro)	Year 1999 Telecom Italia Group	Other companies	Year 1998
Dividends and relevant tax credits	60	775	4
Other income from equity investments	86	-	15
Total	**146**	**775**	**19**

As noted above, beginning in 1999, dividends from subsidiary companies are recorded as they accrue (i.e., in the year in which income is formed) and eliminated during consolidation.
In line with accrual accounting principles, the tax credits that arise on collection of dividends are also recorded under financial income as they accrue.
In 1999, had dividends and related tax credits been accounted for as approved, which generally coincides with the year of collection, income net of current income taxes would have been 99 million euro lower, as would shareholders' equity as of 31 December 1999.

16) Other financial income

Other financial income totalled 547 million euro in 1999 (163 million euro in 1998) and included:

(in millions of euro)	Year 1999 Telecom Italia Group	Other companies	Year 1998
Interest income and gains on fixed income securities	97	40	63
Interest income and commissions from			
unconsolidated subsidiary companies	1	-	-
associated companies	16	1	-
banks	54	39	25
customers	12	-	-
Exchange rate gains	139	24	16

13/6

17) Interest expense and other financial charges

Interest expense and other financial charges amounted to 1,647 million euro (262 million euro in 1998) and included:

(in millions of euro)	Year 1999 Telecom Italia Group	Other companies	Year 1998
Interest payable and commissions due to suppliers and other providers of finance	95	-	
Interest expense and other charges on bonds	50	457	43
Exchange rate losses	164	29	39
Banks and others	572	280	180
Total	**881**	**766**	**262**

Specifically, interest expense, bank commissions and the other financial charges of the Telecom Italia Group, which totalled 572 million euro, are net of the state contribution of 3 percentage points on loans granted pursuant to the 1988 budget (Law no. 67 of 11 March 1988), which replace those that should have been paid by the "Cassa Depositi e Prestiti".

D) Value adjustments to financial assets

18) Revaluations

This heading mainly refers to writeups of unconsolidated equity investments accounted for using the equity method, which in 1999 totalled 242 million euro (241 million euro attributable to the Telecom Italia Group), and reversals of prior-year writedowns of 1 million euro.
In 1998, revaluations totalled 2 million euro.

19) Write-downs

This heading totalling 843 million euro includes write-downs of equity investments carried at cost following other than temporary impairments of value, writedowns of equity investments accounted for using the equity method, and writedowns of securities following other than temporary impairments of value (for securities held as fixed assets) or to reflect lower market value (for securities held as current assets); it also includes the portion of amortisation of goodwill raised at the time of purchase of equity investments valued with the equity method.

(in millions of euro)	Year 1999 Telecom Italia Group	Other companies	Year 1998
Equity investments	806	5	20
Financial fixed assets other than equity investments	19	-	-
Securities held as current assets, other than equity investments		13	4
Total	**825**	**18**	**24**

1312

E) Extraordinary income and charges

20) Extraordinary income

Extraordinary income in 1999 totalled 7,147 million euro, and comprised:
- 7,000 million euro of gains on disposals (of which 26 million euro relating to the Telecom Italia Group);
- 147 million euro of other income (of which 119 million euro relating to the Telecom Italia Group).

Gains on disposals totalling 7,000 million euro comprised:
- 289 million euro from the sale to Mannesmann on 19 February 1999 of a 12.4% stake in OliMan Holding B.V. (reducing Olivetti's investment in the Dutch company from 62.5% to 50.1%);
- 4,184 million euro from the sale to Mannesmann in June 1999 of a 31.5% stake in OliMan Holding B.V. (further reducing the investment from 50.1% to 18.6%);
- 2,454 million euro from the sale, also in June, of the residual stake in OliMan Holding B.V. to the company itself in a buy-back operation, and abatement of this company's share capital;
- 24 million euro from the sale of Telecom Italia shares on 29 March 1999;
- 13 million euro from the sale of Wang Laboratories Inc. shares through acceptance of the Getronics Public Tender Offer
- 26 million euro from the sale of Telecom Italia Group fixed assets and business units as part of the reorganisation of the Italtel Group;
- 5 million euro from other disposals;
- 5 million euro from the sale of the equity investment in Modinform S.p.A..

21) Extraordinary charges

Extraordinary charges amounted overall to 1,480 million euro (53 million euro in 1998) and arose from costs of 740 million euro relating to the Public Tender Offer and other non-recurring charges of 740 million euro.

Costs relating to the Public Tender Offer for Telecom Italia shares, totalling 740 million euro – as described in detail in the directors' report on operations – included 355 million euro of commissions on the 6,060 million euro bank credit line granted by bank consortia and 196 million euro in registration duty relating to the Tecnost S.p.A. and Olivetti S.p.A. share capital increases.

With regard to registration duty for share capital increases, in view of the size and nature of the charge, as from the current year this duty is charged directly against income, as illustrated in the Explanatory Notes to the consolidated financial statements.

Other extraordinary charges totalled 740 million euro and included:
- 256 million euro for charges in connection with the reduction of the workforce as a result of the reorganisation of the Telecom Italia Group (mainly Telecom Italia S.p.A. and manufacturing and installation companies);
- 187 million euro for reabsorption charges pursuant to Law no. 58/1992 of the Telecom Italia Group, accounted for prior to the acquisition and consequently reversed under the income statement heading "Telecom Italia Group pre-acquisition result";
- 29 million euro for charges sustained by Telecom Italia for the sale of 65% of Stream;

1316

• 70 million euro for the writeoff the residual value of share-capital registration duty capitalised in previous years (of which 66 million relating to the Telecom Italia Group), following the adoption of a new accounting policy for such taxes as from the current year;
• 198 million euro for other non-recurring charges (of which 179 relating to the Telecom Italia Group).

22) Income taxes for the year

Income taxes for 1999 totalled 3,207 million euro, compared with 53 million euro in 1998.

(in millions of euro)	Year 1999	Year 1998
Total current taxes	3,605	50
Deferred (prepaid) taxes	(398)	3
Total	**3,207**	**53**

Net prepaid taxes totalling 398 million euro included 278 million euro relating to the Telecom Italia Group and 120 million euro relating to other Olivetti Group companies, of which 170 million euro relating to Tecnost S.p.A.
Particularly, this latter amount includes 553 million euro represented by the tax benefit recorded following the writedown of the Telecom Italia S.p.A. shareholding (accounted for in Tecnost S.p.A. itself's books for 2.066 billion euro and made in accordance with tax laws exclusively in order to enjoy tax benefits for which the company would not otherwise have been eligible), partially offset by deferred taxes, totalling 383 million euro, on dividends from Telecom Italia recorded as accrued (893 million euro) and on the relating tax credit (524 million euro).

Earnings per share

Year 1999 earnings per common share, computed in compliance with International Accounting Standard no. 33, were as follows:

Year 1999	Net income (in millions of euro)	Number of shares	Earnings per share (in euro)	Earnings per share (in lire)
Income for the year, wholly attributable to common shares	4,933			
Average number of common shares		3,915,482,090		
Basic EPS			**1.26**	**2,440**
Dilutive effect attributable to common shares:				
exercise of 1998-2002 warrants		128,346,601		
exercise of warrants assigned to managers		946,259		
conversion of 1998-2002 Bonds	1	69,792,953		
Total after dilution effect:				
Income attributable to common shares	4,934			
Average number of common shares		4,114,567,903		
Diluted EPS			**1.20**	**2,324**

13/9

Other information

1) Legal disputes

As of 31 December 1999, the Group was involved in legal disputes. According to the Group's legal advisors, the outcome of such disputes should not adversely affect the consolidated financial position.

2) Transactions with related parties

All operations transacted by consolidated companies with related companies (defined as unconsolidated subsidiary companies and associated companies, as well as the Directors of the Parent Company and the companies in which these persons are officers or hold roles of senior responsibility) are part of normal operations and were conducted according to market conditions or in compliance with specific laws.
The main transactions with unconsolidated subsidiary companies and associated companies are illustrated below.

Main economic and financial items for the year 1999	Amounts in millions of euro	Description
Revenues from sales	557	They include principally revenues from Seat Pagine Gialle (159 million euro), Telecom Argentina (91 million euro), Stream (79 million euro) and Lottomatica (44 million euro)
Consumptions of materials and services	243	They refer principally to costs towards Seat Pagine Gialle (91 million euro), Siemens Telematica (61 million euro) and Siemens Informatica (38 million euro)
Miscellaneous income, net	26	They refer principally to payroll costs for personnel moved temporarily to some foreign subsidiaries
Interest income, net	20	They refer substantially to interest accrued on loans granted to some foreign companies
Receivables classified as financial fixed assets	151	They relate to capital contributions to joint ventures with Chinese companies and other loans to foreign invested companies
Trade receivables	421	They refere mainly to amounts due from Stream (111 million euro), Seat Pagine Gialle (62 million euro), Retevision (31 million euro), Telecom Argentina (30 million euro), Telekom Srbjia (25 million euro), Golden Lines International (18 million euro), Consorzio Cored (13 million euro) and Madritel (13 million euro)
Trade payables	321	They derive from supplies for investing and operating activities; particularly they include amounts due to Consorzio Ims (74 million euro), Siemens Informatica (60 million euro), Tecnosistemi (37 million euro), Seat Pagine Gialle (33 million euro)
Short term financial receivables	118	They include amounts due from Etecsa (30 million euro), Stream (29 million euro) and Telekom Srbjia (19 million euro)
Other liabilities	358	They include mainly the amounts due to Solpart (186 million euro) and Astrolink (166 million euro) for arrears of subscribed capital
Capital expenditure in tangible and intangible fixed assets	639	They refer principally to the purchases from Italtel for the period from January to October during the which the company was consolidated on proportional basis at 50% (389 million euro), from Consorzio Ims (96 million euro) and from Siemens Informatica (79 million euro)

1329

3) Emoluments payable to Parent Company Directors and Statutory Auditors

Emoluments payable to Parent Company Directors and Statutory Auditors for 1999, including remuneration for services provided to other consolidated companies, totalled 3,366,479 euro and 307,776 euro respectively.

4) Supplementary statements

In order to provide a clearer and more complete representation of the consolidated financial situation as of 31 December 1999 and of the consolidated result for 1999, the following exhibits are provided:
a) statement of changes in consolidated financial position;
b) statement of changes in consolidated shareholders' equity;
c) reclassified statement of income,
d) list of companies included in the consolidated financial statements as of 31 December 1999 and of equity investments, pursuant to articles 38 and 39 of Legislative Decree no. 127/1991.

Independent Auditors' Report on the Olivetti Group Consolidated Financial Statements

olivetti

AUDITORS' REPORT IN ACCORDANCE WITH ARTICLE 156 OF LAW DECREE N° 58 DATED 24 FEBRUARY 1998

To the shareholders of
Olivetti S.p.A.

1 We have audited the consolidated financial statements of Olivetti S.p.A. as of 31 December 1999. These financial statements are the responsibility of Olivetti S.p.A.'s directors. Our responsibility is to express an opinion on these financial statements based on our audit.

2 We conducted our audit in accordance with the auditing standards and criteria recommended by CONSOB. Those standards and criteria require that we plan and perform the audit to obtain the necessary assurance about whether the financial statements are free of material misstatement and, taken as a whole, are presented fairly. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the directors. We believe that our audit provides a reasonable basis for our opinion.
For the year ended 31 December 1999, as a consequence of the acquisition by Tecnost S.p.A. of Telecom Italia S.p.A. in June 1999, the financial statements of the main subsidiary companies of Olivetti S.p.A., composed mainly of Telecom Italia S.p.A. and its subsidiaries, were audited by other audit firms. In accordance with the requirements of Consob Communication n. 20778 dated 22 December 1986 and n. 1280 dated 15 February 1995, we have carried out additional work on Telecom Italia S.p.A. we considered necessary in order to maintain the role of principal auditors.
The financial statements of certain indirectly held Group companies representing respectively 18% and 43% of consolidated assets and consolidated revenues, have been examined by other audit firms who have supplied us with their audit reports. Our opinion, as expressed in this report, in relation to the values of those subsidiaries included in the consolidation, is also based on the audits carried out by other audit firms.
For the opinion on the consolidated financial statements of the prior period, which are presented for comparative purposes as required by law, reference is made to the report issued by Coopers & Lybrand S.p.A. dated 15 April 1999.

3 In our opinion, the consolidated financial statements of Olivetti S.p.A. as of 31 December 1999 comply with the laws governing the criteria for their preparation; accordingly, they give a true and fair view of the financial position and of the results of operations of the Company.

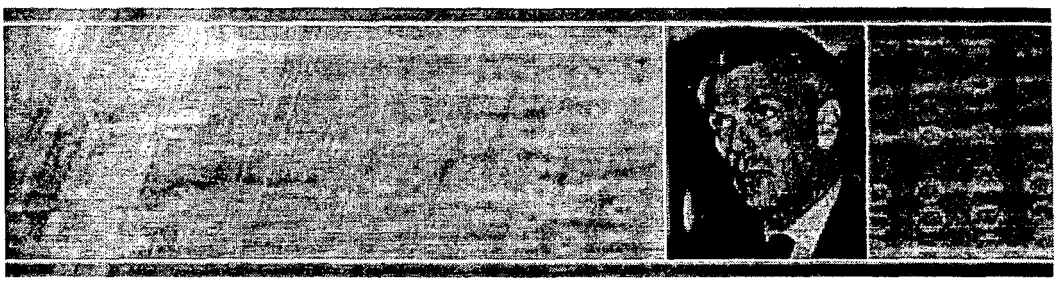
■ LETTER FROM THE CHAIRMAN



Dear Shareholders,

One of the new management's first objectives at Telecom Italia, after its entry in the Group, was to take action on an industrial level to achieve a turnabout of this great Italian company.

The Telecom Italia Group occupies an extremely important place in Italy's industrial scenario, both because of the high level it has reached technologically and the impressive level of professional skills to which it has access. In fact, we saw that what was needed was a more solid, more efficient productive and financial structure, which would reinforce its capacity to play a role of primary importance in the key sector of Information and Communication Technology.

In order to achieve these objectives, in the first few months after we took over management of the Group, we carried out some important transformations. Firstly we completely reorganized the Group's staffing and business structures. We also implemented a series of measures to bring about a decisive improvement in its level of efficiency and profitability.

We adopted a strict policy to control costs and investments, continued with the policy of divesting non-core activities and started a gradual program to restructure and reduce debt. Furthermore, we adopted accounting criteria that are a better reflection of the market values of some assets, particularly in the case of the foreign operations of the Group.

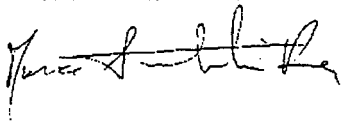
Now that the period of special measures has more or less come to an end, we can start anew with a cycle of operations which aims to consolidate our strategy of creating value.

In February of this year the new industrial plan for the Group was presented to the international financial community. It is based on strategies that will strengthen the leadership position of the companies of the Group on the domestic market, particularly the markets of wireline and mobile telephone services and Internet services, and energize its international presence, particularly the presence of TIM in Latin America, Turkey and Greece.

Several factors are fundamental to this development plan: strengthening the core business, the ability to offer ever higher quality and better services, which are truly the source of creating value, the reorganization of the foreign portfolio and technological innovation. And a factor of primary importance in the success of all of these is customer satisfaction.

I would like to conclude by saying that I am convinced that, by putting this solid basis to the best possible use, together with a newfound awareness of its role in the revitalization of Italy, the Telecom Italia Group can face the future with confidence, and guarantee its shareholders and all its stakeholders the best possible chances of success in the future.

Marco Tronchetti Provera

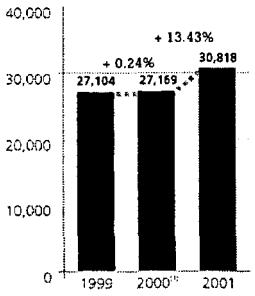


SELECTED ECONOMIC AND FINANCIAL DATA OF TELECOM ITALIA GROUP

In 2001, the investment in the Nortel Inversora group (Telecom Argentina) - which in 2000 had been consolidated using the proportional method - was accounted for using the equity method. For purposes of comparison, the financial statements for 2000 have been restated to give effect to the consolidation of the Nortel Inversora group using the equity method. Moreover, the following changes in the scope of consolidation took place during the year:

- the groups Seat Pagine Gialle, Jet Multimedia, Magéos Explorer and Maxitel and the company Corporacion Digitel: only the balance sheets were consolidated in 2000 since they were acquired at the end of the year, whereas in 2001 they were consolidated line-by-line, including the statements of income
- the Entel Chile group and the companies TIM Celular Centro Sul, TIM Sao Paulo and TIM Rio Norte: included in the scope of consolidation beginning 2001
- the Sirti and Italtel groups: excluded from the scope of consolidation since they were sold during 2000, the year in which they were consolidated line-by-line for the first nine months

Revenues (euro/million)



Gross operating profit (euro/million)

	2001	2000 (1)	2000	1999

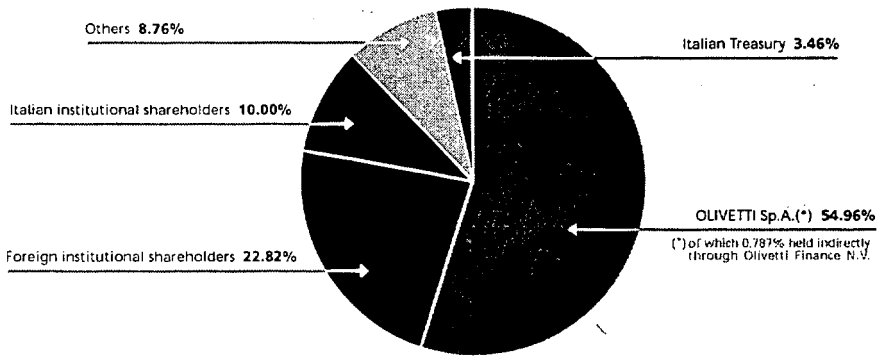
■ Shareholders

Shareholders of record at 12/31/2001
Telecom Italia S.p.A. (Ordinary shares)



■ Translation of share capital into euro

Subsequent to the resolution passed by the extraordinary session of the Shareholders' Meeting on May 3, 2001, the share capital was translated into euro by the redenomination of the par value of the ordinary and savings shares and rounding up the par value from Lire 1,000 to euro 0.55 and the consequent bonus increase in share capital effected by:

- the cancellation of No. 112,998,070 savings shares of treasury stock of par value Lire 1,000 each held in portfolio and the allocation to share capital, for replenishment of the same, of an amount equal to the par value of the shares cancelled corresponding to the portion of the reserve for treasury stock in portfolio which became available after cancellation of the shares, with a consequent increase in the par value of the shares outstanding;
- the allocation to share capital of an amount of euro 187 million from the revaluation reserve No. 72, March 19, 1983, with the consequent increase in the par value of the shares outstanding.

■ Expiration date for the promotion of an offer for the voluntary conversion of savings shares into ordinary shares

December 31, 2001 was the expiration date set by the extraordinary session of the Shareholders' Meeting on May 3, 2001 for promotion of the offer for the voluntary conversion of savings shares into ordinary shares. The conversion called for the payment of a price difference commensurate with the percentage (between 38% and 42%) of the arithmetic average of the official price of ordinary shares over a significant period of time, and, in any case, not less than euro 5.25 per share. In the absence of a conversion offer, the Company will not proceed with the plan to buy back ordinary shares through a vehicle company, to be effected - as voted by the Shareholders' Meeting of May 3, 2001 - with the proceeds from the conversion.

REPORT ON OPERATIONS (*)

(*) For purposes of a more meaningful comparison, the data for 2001 is commented in relation to the data for 2000, which is restated to give effect to the valuation of the Nortel Inversora group (Telecom Argentina) using the equity method

Dear Shareholders,

The consolidated result of the Group for 2001 is a net loss of euro 2,068 million (euro 1,658 million *before minority interest*), after nonrecurring expenses of euro 4,613 million (euro 3,036 million net of the lower tax expense of euro 1,577 million) that were not present in the previous year, and after further net extraordinary items of euro 23 million. The net loss compares to a net income of euro 2,028 million in 2000 (euro 2,892 million *before minority interest*), which included net extraordinary items of euro 184 million.

Nonrecurring expenses. The following nonrecurring expenses impacted the net result for 2001 and had an effect on the financial statements, before income taxes, as detailed below:

(in millions of euro)	Value adjustments to financial assets	Financial expense, net	Extraordinary income and expense	TOTAL
Impact of Argentina	356		50	406
Adjustment to investments, goodwill and losses of subsidiaries and affiliated companies:				
- International operations of the International Operations BU			2,136	2,136
- International operations of the Mobile Services BU			547	547
- Operations of the Internet and Media BU			416	416
- Operations of the Satellite Services and TILab BU	259		32	291
Impact of Stream			248	248
Provision for put option on Seat Pagine Gialle shares		569		569
TOTAL NONRECURRING EXPENSES	**615**	**569**	**3,429**	**4,613**

- the Adjustment to investments, goodwill and losses of subsidiaries and affiliated companies is consistent with the strategic guidelines of the new industrial plan. In particular, on the basis of a careful examination, adjustments were made to investments and goodwill and provisions were set aside for the losses of subsidiaries and affiliated companies in which it was apparent that the reason for the performance of the companies was not solely due to the economic situation. The most important adjustments refer to:
  - International operations of International Operations BU: GLB Serviços Interativos (Globo.com), 9Telecom group, Entel Bolivia, Solpart Brazil and Telekom Austria.
  - International operations of the Mobile Services BU: Maxitel, Bitel (Tele Celular Sul, Tele Nordeste Celular) and Tim Brasil.
  - Operations of the Internet and Media BU: NetCreations, Matrix, Mondus and costs connected with the restructuring of La 7 television programming.
  - Operations of the Satellite Services and TILab BU: this includes the effect of the writedown of Astrolink by Telespazio, on account of the suspension of the relative project.
- the impact of Argentina comprises the value adjustments made in relation to the evolution of the economic situation in Argentina which caused significant exchange differences after parity between the Argentine peso and the US dollar was abandoned.
- the impact of Stream includes the provision made under the agreement with Vivendi/Canal Plus for the sale of the investment in this company.

- the provision for the commitment of the put option on Seat Pagine Gialle S.p.A. shares is connected to the nonrecoverability of the original price to exercise the option, as described on page 198.

Besides the aforementioned nonrecurring expenses, and the improvement in operations, other factors which impacted the net loss are as follows:
- higher financial expense, net of euro 974 million (from euro 610 million in 2000 to euro 1,584 million in 2001) due to higher debt exposure;
- higher value adjustments to financial assets of euro 196 million (from -euro 1,145 million in 2000 to -euro 1,341 million in 2001) referring mainly to the Group's share of the earnings or losses of the companies accounted for using the equity method, including the amortization charge for goodwill;
- lower extraordinary items of euro 161 million (from -euro 184 million in 2000 to -euro 23 million in 2001). In particular, this reduction is due to lower extraordinary expense of euro 801 million (mainly in connection with the extraordinary provisions set aside in 2000), only partly compensated by lower gains on the disposals of investments for euro 640 million;
- lower income taxes of euro 985 million.

Sales and service revenues total euro 30,818 million, with an increase of 13.4% compared to 2000 (+2.7% with a comparable scope of consolidation, that is, considering the same companies in consolidation in both years). The positive performance of domestic mobile telephone services can be compared to a reduction in the contribution made by wireline telephone services, whose revenues from traffic, in spite of a significant increase in terms of minutes, fell due to the effect of the pricing policy.

Gross operating profit of euro 13,619 million shows an increase of 11.5% over 2000 (+6.6% with a comparable scope of consolidation) and represents 44.2% of revenues (45% in 2000). The increase in the amount is substantially due to the good performance by the TIM group (+euro 313 million) and the inclusion in consolidation of the Seat Pagine Gialle group (+euro 444 million) and the Entel Chile group (+euro 374 million).

Operating income, equal to euro 6,674 million, is 3.6% higher than in 2000, representing 21.7% of sales, compared to 23.7% in 2000. The increase is due to the change in the scope of consolidation, the improvement in operations and the negative impact of higher amortization charges for goodwill.

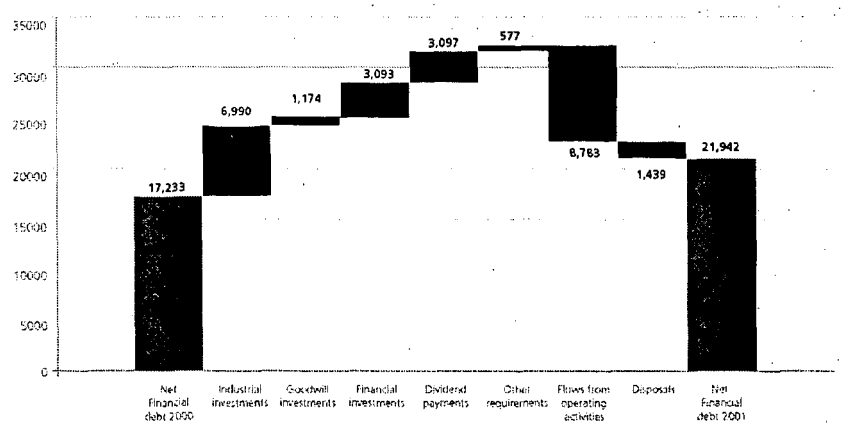
Employees at December 31, 2001 number 109,956, with an increase of 2,785 persons compared to the end of 2000. This is due to the change in the scope of consolidation (especially for the inclusion of the Entel Chile group which led to 4,681 more employees at the end of 2001) and a reduction in Telecom Italia employees.

Investments total euro 11,257 million (compared to euro 20,009 million in 2000). Details are as follows:

(in millions of euro)	
Industrial	6,990
Goodwill [1]	1,174
Financial investments	3,093
Total investments	**11,257**

(1) Goodwill mainly refers to the acquistion of the control of the Entel Chile group.

Financial debt of euro 21,942 million shows an increase of euro 4,709 million compared to December 31, 2000. The following chart presents the most important items which had an impact on the net financial debt during the year:



The debt structure was also modified in 2001: the portion of debt due beyond one year rose from 31% to 64% (considering the February 2002 issue of notes, the medium/long-term debt increased to 72%) and the average cost of debt was equal to 5.9%.
Investments in former satellite consortiums were sold during year which gave rise to net proceeds of euro 450 million and a net gain of euro 130 million (euro 83 million after taxes). The continuation of the divestiture program will have a positive impact on the financial position in the years after 2001. In particular, the transactions currently underway which produced no impact on the 2001 financial statements refer to: Auna S.A., BDT - Bouygues Decaux Telecom S.A., Lottomatica S.p.A. (offer to purchase accepted), Stream S.p.A..

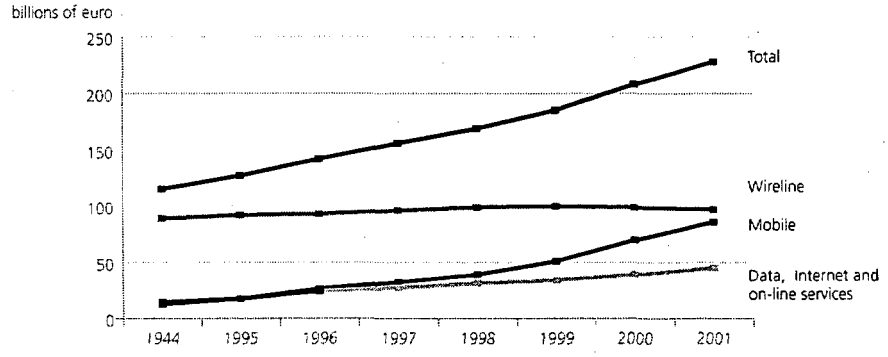
Telecom Italia S.p.A. The statutory financial statements of the Parent Company Telecom Italia S.p.A. closed with a net income of euro 151 million, after nonrecurring expenses of euro 3,760 million (euro 2,498 million net of lower tax expense of euro 1,262 million), that were not present in the previous year. The net income in 2000 was euro 2,559 million.
The proposed dividends, equal to euro 0.3125 per ordinary share and euro 0.3237 per savings share, as in 2000, will be distributed by utilizing retained earnings, for a total of euro 2,184 million.

Market scenario. In recent years, the demand for telecommunications services has grown at an annual rate of approximately 10%, both worldwide and in Europe, driven by the spread of mobile telephone services and by the development of Internet and data services. The sector will continue to expand during the next few years and part of the expenditures of households and businesses will continue to be diverted towards digital products and services, creating more space to integrate transmission services and applications content on-line.
Technological innovation continues, although major revolutions are not expected in the short-to-medium term. However, the services demanded by final users may further stimulate consumption and innovation, especially with regard to the range of value-added services, thus bridging the gap between the potential of available technologies and their use.

The sector experienced a phase of restructuring and consolidation after the strong boost to growth generated by the phenomenon of the Internet and the boom of stock market listings at the beginning of 2000. During 2001, the financial markets partially re-directed

Performance by the European telecommunications market

(*) Source: Eito 2001.



investments and resources away from "alternative" operators towards those that can leverage assets, have specific qualifications and a consolidated financial strength (typically "incumbent" operators).

The Italian market compared to other major European countries, has a high penetration of mobile telephone services, whereas the spread of Internet services and both residential and business broadband services is still relatively limited. At the end of 2001, in Italy, the penetration rate of the Internet had reached 23% for households and 44% for small and medium-size businesses (SMB). Households almost exclusively use dial-up technology (98%) to access the Internet and only a small proportion (2%) use ADSL broadband for this purpose. However, what has happened in Germany suggests that the spread of ADSL access may occur relatively soon. There is also ample space for growth in data transmission, services connected to the web and new generation mobile services (GPRS, UMTS).

The Telecom Italia Group is one of the largest international companies offering information and communication technology. The companies in the Group, which lead the field in fixed communications, mobile communications, satellite communications, Internet and the media, information technology and research offer integrated innovative services in Italy and abroad. On the domestic market, the Group is both technological and market leader in the segments of fastest growth (mobile, broadband, data transmission). Geographically speaking, its international presence is concentrated in Latin America and in Europe.

Change in shareholders. In 2001, Olimpia S.p.A. acquired a 26.96% stake in Olivetti S.p.A. from Bell S.A. and from market trading. This event led to a turnover in top management and a significant revision to the Group's development strategies.

Corporate reorganization took the form of the creation of a completely new top-management team, with new structures at Group level and Top Management Committees (Business Management Meetings, Investments Committee and International Steering Committee). The Domestic Wireline, Internet and Media and Information Technology Business Units underwent radical transformation. At Group level, the professional categories were reinforced in order to ensure greater organizational effectiveness, and new procedures were introduced to approve and control investments and acquisitions with the centralization of governing responsibility. A process was begun to streamline the corporate structure with the aim of significantly reducing the number of companies in the Group from the approximately 700 existing at the end of 2001 (561 of which are subsidiaries and affiliated companies).

Strategic guidelines. The fundamental goal decided by the new management for the next few years will be the creation of value, which must be ensured by leveraging assets and by strengthening the financial structure in order to sustain further growth.
These are the priorities for industrial operations indicated by the new management:

- to safeguard the profit margins of domestic businesses, increasing the value of the existing customer portfolio by strengthening its leadership position in the fastest-growing segments (web services, broadband, GPRS, UMTS), and also by augmenting the value of the Group's already considerable competence in information technology and systems integration. In wireline telephone services, Telecom Italia will strive to achieve major improvements in its service to the customer, in its management processes and in the efficiency of its distribution channels. In domestic mobile telephone services, TIM will defend its leading role by exploiting all the opportunities arising from new technologies, starting with GPRS and then UMTS;
- to concentrate the Group's foreign presence in markets where it has control of the activities and to pinpoint sustainable directions of development on an international level. In keeping with these priorities, the strategy of the Telecom Italia Group will be to complete a divestiture program for investments where it does not have control, in non-core businesses and in marginal markets. TIM will continue to pursue its foreign development policy, concentrating particularly on Latin America, through the creation of a common GSM platform and by stepping up the launch of services that offer a high degree of Group synergies;
- to manage the Group according to strict criteria of efficiency. The introduction of professional categories and the unification of the criteria for the return on investments will make it possible to monitor expenditures even more effectively, both at the proposal stage and at the stage of controlling the results.

ECONOMIC AND FINANCIAL REVIEW OF TELECOM ITALIA GROUP [1]

(1) For purposes of a more meaningful comparison, the data for 2001 is commented in relation to the data for 2000, which is restated to give effect to the consolidation of the Nortel Inversora group (Telecom Argentina) using the equity method

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.
(**) Reduced by related cost recoveries.

Sales and service revenues amounted to euro 30,818 million in 2001, an increase of 13.4% over 2000 (+2.7% with a comparable scope of consolidation, that is, only considering the same companies in consolidation for both years).
Revenues, net of the amount due to other telecommunications operators, totaled euro 27,104 million and increased by euro 2,649 million (+10.8%) compared to 2000. The increase in revenues is due to the following:

- the positive performance of mobile telephone services countered by a reduction in wireline telephone services in Italy, whose revenues from traffic, in spite of a significant increase in terms of minutes - show a reduction in the average return on traffic (retail and wholesale) that went from euro 5.5 cents to euro 3.9 cents per minute;
- the contribution made by the new companies included in the scope of consolidation, especially the Entel Chile group (euro 1,247 million) and the Seat Pagine Gialle group (euro 1,707 million), that was partly reduced by the exclusion of the companies in the manufacturing and installations sector (Sirti and Italtel groups).

Sales and service revenues can be analyzed as follows:

GEOGRAPHIC AREA

(in millions of euro)	2001		2000 (*)		2000	
Italy	24,863	80.7%	23,033	84.8%	23,037	79.7%
Other European countries	1,817	5.9%	1,809	6.7%	1,843	6.4%
North America	913	3.0%	174	0.6%	185	0.6%
Central and South America	2,592	8.4%	1,555	5.7%	3,217	11.1%
Australia, Africa and Asia	633	2.0%	598	2.2%	629	2.2%

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Raw materials and outside services totaled euro 13,042 million, 14.8% higher than in 2000 (+2.8% with a comparable scope of consolidation, that is, only considering the same companies in consolidation for both years). This increase mainly referred to the following:

- change in scope of consolidation, especially the contribution of the Entel Chile group (euro 752 million) and the Seat Pagine Gialle group (euro 941 million), that were only partly offset by the exclusion of the manufacturing and installations sectors;
- higher rent costs for Telecom Italia on the buildings sold to IM.SER at the end of 2000 (euro 252 million) countered by lower depreciation and amortization charges;
- increase in costs to operate and develop mobile telecommunications in and outside Italy.

This item included euro 524 million for the TLC license fee due to the state administration, of which euro 290 million relate to Telecom Italia, euro 182 million to TIM and euro 52 million to foreign subsidiaries.
The percentage of raw materials and outside services to revenues was 42.3% (41.8% in 2000).

Labor costs, totaling euro 4,647 million, decreased by euro 76 million compared to 2000 (-5.6% with a comparable scope of consolidation). The reduction, due to the exclusion from the scope of consolidation of the Sirti and Italtel groups (euro 383 million) and the decrease in Telecom Italia costs following employee layoffs, was only partly offset by the inclusion in the scope of consolidation of the Seat Pagine Gialle group (euro 360 million) and the Entel Chile group (euro 114 million). As a percentage of revenues, labor costs fell from 17.4% in 2000 to 15.1% in 2001. Employees at December 31, 2001 numbered 109,956 (107,171 at December 31, 2000). The breakdown is as follows:

	2001	2000 (*)	2000
Italy	90,628	93,817	93,817
Abroad	19,328	13,354	20,852
Total employees	**109,956**	**107,171**	**114,669**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Gross operating profit, of euro 13,619 million increased by euro 1,402 million, compared to 2000, (+11.5%; +6.6% with a comparable scope of consolidation) and represented 44.2% of revenues (45.0% in 2000). The increase in the gross operating profit is substantially due to the good performance of the TIM group (+euro 313 million) and the inclusion in the scope of consolidation of the Seat Pagine Gialle group (+euro 444 million) and the Entel Chile group (+euro 374 million).

Depreciation and amortization, totaled euro 6,275 million (euro 5,209 million in 2000). Details are as follows:

(in millions of euro)	2001	2000 (*)	2000
Fixed assets	4,034	4,131	4,515
Intangible assets	2,241	1,078	1,132
of which goodwill	*1,022*	*168*	*180*
Total depreciation and amortization	**6,275**	**5,209**	**5,647**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

The increase in the amortization of goodwill (euro 854 million) was mainly due to the acquisition of Seat Pagine Gialle (euro 574 million), the acquisition of Jet Multimedia (euro 102 million) and other companies in the Seat Pagine Gialle group (euro 99 million).

Other valuation adjustments, totaling euro 455 million, were substantially in line with those of 2000. They mainly referred to writedowns to reduce receivables from customers to their estimated realizable value. They referred, in particular, to:

- Telecom Italia: euro 159 million
- Seat Pagine Gialle group: euro 73 million
- Entel Chile group: euro 57 million
- TIM: euro 52 million

Provisions to reserves for risks and charges, amounting to euro 278 million, increased by euro 132 million principally due to the inclusion in the scope of consolidation of the Seat Pagine Gialle group (euro 31 million) and higher provisions set aside by Telespazio (+euro 48 million) for the closing of the Astrolink contract.

Net other income (expense), showed an income balance of euro 63 million (euro 20 million in 2000). It refers to:

(in millions of euro)	
Indirect duties and taxes	(120)
Net losses on sales	(17)
Fees charged by the telecommunications companies to customers for late payment of telephone bills	112
Portion of capital grants credited to income during the year	73
Other income and expense, net	15
Total	**63**

Operating income, of euro 6,674 million (euro 6,440 million in 2000) increased by euro 234 million compared to 2000, (+3.6%); operating income represents 21.7% of revenues compared to 23.7% in 2000.
The increase in operating income was mainly attributable to the improvement shown by Telecom Italia (+euro 388 million) - connected with the reduction in the depreciation charge - the good results of the TIM group (+euro 148 million) and the negative effect of a higher amortization charge for goodwill (euro 854 million).

Net investment and financial income (expense) comprised the following:

(in millions of euro)	2001	2000 (*)	2000
Net investment income	154	301	302
Net financial expense	(2,153)	(610)	(766)
Value adjustments to financial assets	(1,956)	(1,145)	(1,159)
Total	**(3,955)**	**(1,454)**	**(1,623)**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Details are as follows:

- net investment income related mainly to dividends received from unconsolidated subsidiaries and affiliated companies and other companies and net gains realized on the sales of listed stocks carried in current assets;
- net financial expense reflected:
  - the increase in the financial exposure of the Group;
  - the inclusion in the scope of consolidation of the groups Maxitel (euro 187 million), Seat Pagine Gialle (euro 85 million) and Entel Chile (euro 67 million);
  - provision relating to the forward commitment to purchase Seat Pagine Gialle shares for a total of euro 569 million in connection with the estimate of the nonrecoverability of the original price to exercise the option.
- value adjustments to financial assets mainly referred to the Group's share of the earnings and losses of the unconsolidated companies valued using the equity method, which also include the amortization of goodwill upon the purchase of these investments equal to euro 316 million (euro 462 million in 2000). In particular, value adjustments include:
  - the loss by IS TIM (Turkey) of euro 334 million, deriving not only from expenses connected with the start-up phase but also the effects of the currency crisis in Turkey and the application of hyperinflation accounting principles;
  - the writedown of Stream (euro 241 million) and the writedown to adjust the value of listed stocks and securities carried in current assets to market price (euro 291 million);

- the loss by the Nortel Inversora group of euro 238 million, connected with the economic crisis in Argentina and mainly due to the exchange losses on financial debt;
- the writedown of Astrolink of euro 259 million, made by Telespazio in connection with the suspension of the relative project.

Net extraordinary income (expense), showed an expense balance of euro 3,452 million (-euro 184 million in 2000), made up of euro 852 million of income and euro 4,304 million of expense.

Extraordinary income included:

- gains on the sale of the 70% holding in Mirror International Holding (the company through which the satellite companies were contributed to the Lehman Brothers group) for euro 170 million and the 30% holding in Mediterranean Nautilus S.A. to the Israeli company F.T.T. Investment for euro 94 million;
- income (euro 32 million) deriving from the partial cancellation, by the Council of State, of resolution No. 7533/1999 by the Antitrust Authority under which TIM and Omnitel Pronto Italia were levied administrative fines for the alleged violation of antitrust laws relating to the price fixing of fixed-mobile rates;
- income from the release of reserves by Telecom Italia set aside in prior years for risks which did not materialize (euro 120 million, euro 62 million of which relate to the reserve for the contract with Iraq and euro 50 million to the reserve for corporate restructuring).

Extraordinary expense comprised:

- euro 2,984 million for the writedown of goodwill relating to consolidated companies (9Telecom group, Entel Bolivia, Entel Chile group, Maxitel group, Tele Celular Sul group, Tele Nordeste Celular group, Tim Brasil, Med-1 group and certain companies in the Seat Pagine Gialle group) and companies accounted for by the equity method (GLB Serviços Interativos, Solpart Participacoes, Telekom Austria and the Nortel Inversora group), as well as other provisions relating to investments. Such writedowns have been made on a consistent basis according to the new business plans and market trends;
- euro 248 million relating to the provision for expenses connected with the Vivendi/Canal Plus agreement for the transfer of the investment in Stream;
- euro 380 million of expenses for employee cutbacks and layoffs (of which euro 203 million refer to Telecom Italia);
- euro 155 million for social security charges under Law 58/1992 to guarantee uniform status under the former Telephone Employees Pension fund (FPT) which, as required by the 2000 Finance Bill, has become part of the general Employees Pension Fund;
- euro 77 million of extraordinary contributions to INPS – established by the 2000 Finance Bill for the three years 2000-2002 to meet the higher financial requirements covered by the rules of the fund that was abolished;
- euro 85 million resulting from the decision to reposition the broadcasting station La 7 as a consequence of the closing of a series of contracts.

Income taxes, totaled euro 925 million and decreased by euro 985 million from 2000 due to a reduction in the taxable base caused mainly by the extraordinary expenses of Telecom Italia and TIM for the writedown of investments.

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.
(**) Net of "Receivables from shareholders for capital contributions".

The balance sheet of the Telecom Italia Group showed a net invested capital of euro 41,250 million (euro 41,923 million at December 31, 2000), of which 46.8% is financed by shareholders' equity (58.9% at December 31, 2000) and 53.2% by net borrowings (41.1% at December 31, 2000).

Intangibles, fixed assets and long-term investments, of euro 45,018 million showed a decrease of euro 330 million compared to December 31, 2000 and include:

INTANGIBLE ASSETS

Writedowns	(11)	(11)	(11)
Change in scope of consolidation	1,345	367	2,978
Translation adjustment and other	(346)	70	71
At December 31	**21,757**	**20,721**	**23,425**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Additions for goodwill in intangible assets for the year 2001 included euro 731 million for the acquisition of the control of the Entel Chile group. Other additions included the costs of the awarding of the new mobile telephone licenses in Brazil and Greece (euro 1,080 million). *Writedowns of intangible assets* (euro 1,308 million) included the writedowns of goodwill made as part of the mentioned adjustment to the value of some investment holdings in the wireline, mobile and Internet areas for euro 1,303 million.
Both for intangible assets and fixed assets, the *change in scope of consolidation* referred to the Entel Chile group and more companies in the Seat Pagine Gialle group; the translation adjustment mainly referred to the Brazilian companies and the Entel Chile group.

LONG-TERM INVESTMENTS

(in millions of euro)	2001	2000 (*)	2000
At December 31	**7,064**	**9,056**	**8,675**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

The reduction in long-term investments of euro 1,992 million, compared to 2000, derives from the following:

- Additions: euro 3,093 million
- Disposals: -euro 842 million
- Cancellation of Telecom Italia treasury stock: -euro 711 million
- Investments accounted for by the equity method: -euro 1,921 million
- Change in scope of consolidation: -euro 497 million
- Extraordinary writedowns of foreign investments: -euro 1,078 million

Working capital showed a negative balance of euro 2,418 million (-euro 2,106 million at December 31, 2000).

The decrease of euro 312 million was due to the following:

- the increase in "trade accounts receivable", from euro 7,890 million at the end of 2000 to euro 8,346 million, connected principally to the consolidation of the Entel Chile group (euro 337 million) and the increase in the receivables of Seat Pagine Gialle group (euro 172 million), Tele Sistemi Ferroviari (euro 86 million) and Telespazio (euro 59 million). The securitization of the receivables by Telecom Italia also had an effect on trade accounts receivable from residential customers, which led to a reduction of euro 877 million, of which euro 684 million were not yet due. The transaction is fully described in the notes to the financial statements of Telecom Italia, to which reference should be made;
- the increase in "other assets" from euro 3,668 million at the end of 2000 to euro 5,047 million, mainly attributable to deferred tax assets and current taxes receivable by Telecom Italia and the TIM group;
- the decrease in "trade accounts payable" from euro 6,936 million at the end of 2000 to euro 6,793 million. This was due to a reduction in the payables of Telecom Italia (-euro 807 million), Telespazio (-euro 174 million), that were partly offset by the inclusion in the scope of consolidation of the Entel Chile group (+euro 201 million) and by the higher debt of the mobile sector (+252 million), of the Latin American Nautilus group (+euro 110 million) and of Netsiel (+euro 88 million);
- the increase in the "reserves for risks and charges" from euro 1,599 million at the end of 2000 to euro 3,053 million, mainly ascribed to the extraordinary provisions to the reserve for losses of subsidiaries and affiliated companies which is consistent with the strategic guidelines of the recently designed plan (euro 603 million), the provision for the forward commitment of Seat Pagine Gialle shares (euro 569 million) and the expenses connected with the transfer of Stream (euro 248 million);
- the increase in "other liabilities" from euro 5,804 million at the end of 2000 to euro 6,601 million, principally ascribed to Telecom Italia and TIM.

Shareholders' equity totaled euro 19,308 million (euro 24,690 million at the end of 2000), of which euro 13,522 million (euro 18,821 million at December 31, 2000) is Telecom Italia's interest and euro 5,786 million (euro 5,869 million at December 31, 2000) the minority interest. The change of -euro 5,382 million is analyzed below:

(in millions of euro)		2001	2000 (*)	2000
At January 1		**24.690**	**19.788**	**19.788**
Net income (loss) of the Parent Company and minority interest		(1.658)	2.892	2.948
Dividends to third parties paid by:		(3.097)	(3.049)	(3.049)
- Telecom Italia	*(2.309)*		*(2.327)*	*(2.327)*
- TIM	*(743)*		*(657)*	*(657)*
- Other Group companies	*(45)*		*(65)*	*(65)*
Cancellation of the Telecom Italia treasury stock		(711)	-	-
Conversion of savings shares into TIM ordinary shares		-	4.169	4.169
Change in scope of consolidation		358	665	1.446
Other changes		(274)	225	225
At December 31		**19.308**	**24.690**	**25.527**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Net debt, of euro 21,942 million showed an increase of euro 4,709 million compared to the end of 2000, caused by the following factors:
increasing debt:
- dividends paid out (euro 3,097 million)
- investments in Turkey (euro 1,906 million), Brazil and Greece (euro 1,080 million)
- acquisition and consolidation of the controlling interest in Entel Chile (euro 1,858 million)
- recapitalization of Stream (euro 173 million)

decreasing debt:
- sale of the satellite consortiums (euro 450 million)
- cash flows from operating activities (euro 8,783 million).

During the year Telecom Italia and Sogerim issued notes as part of the program to restructure the Group's debt.
In June 2001, a securitization program was begun for trade accounts receivable generated by the services rendered to residential customers of the Telecom Italia Domestic Wireline BU and the customers of Path.Net (a wholly-owned subsidiary of Telecom Italia, which provides services to the Public Administration).
The above securitization transaction led to an improvement in net debt at December 31, 2001 of about euro 848 million.

Gross debt is detailed in the following table:

(in millions of euro)	12/31/2001						12/31/2000 (*)		12/31/2000	
	euro	%	Currency	%	Total	%	Total	%	Total	%
Medium/long-term debt	12,420	59	3,663	86	16,083	64	6,733	31	8,268	35
Short-term borrowings	8,534	41	580	14	9,114	36	14,745	69	15,136	65
Total	**20,954**	**100**	**4,243**	**100**	**25,197**	**100**	**21,478**	**100**	**23,404**	**100**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.
(**) The difference with respect to the consolidated balance sheets is due to the movements in capital grants.

The change in net debt was due to the following:

(in millions of euro)	2001	2000 (*)	2000
Increases (decreases) in medium/long-term debt	9,350	1,568	3,103
Increases (decreases) in short-term borrowings	(4,641)	7,527	7,788
Total	**4,709**	**9,095**	**10,891**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

EVENTS SUBSEQUENT TO DECEMBER 31, 2001

Besides the events described in other parts of this report, significant events subsequent to December 31, 2001 are commented below:

2002-2022 notes reserved for employees of the Telecom Italia Group

On January 1, 2002, following the resolution passed at the Board of Directors' Meeting on July 27, 2001, the offer began for subscription to the "Telecom Italia 2002 – 2022 floating rate notes, open special series, reserved for the employees of the Telecom Italia Group, in service and retired", maturing January 1, 2022, for a maximum amount of euro 1 billion. At the same time, the SIP 1992 – 2010 notes with features similar to the new notes were called for early redemption.

The new notes, which pay gross interest semiannually (payable on January 1 and July 1 of each year not in advance), can be subscribed to over the entire period of the notes until the maximum offer has been entirely subscribed and also contain a right to sell by the noteholder to Telecom Italia that can be exercised at any time at face value; the notes can also be called for early redemption by the Company at each interest payment date at face value, with notice at least three months in advance. As of March 26, about euro 160 million of notes had been subscribed to and noteholders numbered 10,061.

Issue of notes

In February, a note issue was concluded for a total of euro 2.5 billion. The issue is divided into two tranches of euro 1.25 billion each, at a fixed rate of interest, respectively, at maturity dates of February 1, 2007 and February 1, 2012. This issue is part of the "Global Note Program" aimed at restructuring the Group's debt and whose total amount, by vote of the Board of Directors on December 18, 2001, has been raised from US dollars 10 to 12 billion.

Conclusion of the agreement for the revision of the put/call options on Seat Pagine Gialle shares

On February 25, Telecom Italia and the JPMorgan Chase group signed the definitive agreements relating to the re-negotiation of the put and call options on Seat Pagine Gialle shares; the economic effects of this agreement are disclosed in the Notes to the financial statements of Telecom Italia.

Approval of the 2001 interconnection price list by AGCOM

On March 4, the Regulator approved Telecom Italia's interconnection price list for 2001, after having made some technical and economic changes. Some of the most significant changes, the economic repercussions of which are reflected in 2001 accounts, include the reduction of the costs for the interconnection of phone services and configuration costs for the exchanges; with regard to the unbundling of the local loop, the Regulator maintained the prices applied in 2000, extending the range of services offered by Telecom Italia to interconnected operators.

Telephone calls via Internet protocol

In February, Telecom Italia began to adapt the first systems to allow the transmission of voice and data using Internet protocol. The conversion of the network to the IP protocol, which will lead to a reduction in the costs because of the operation of a single infrastructure, will become operational as early as June (for telephone traffic carried on the Milan-Rome route), and, by the end of the year, 10% of national calls carried on the carrier network is expected to be transferred to Internet protocol.

Telecom Italia's new rate plans

Rate rebalancing has been operational since February 1. Residential basic subscriber charges have been increased by 6.3% (from euro 10.69 to euro 11.36 a month, net of VAT) while the weekend rate (euro 0.02582 per minute plus the unit charge when the call is answered and VAT) has been extended from 6.30 p.m. to 8 a.m. on weekdays and from midnight until midnight on Saturday, Sunday and public holidays for all local and long-distance calls. Further incentives are planned for families and, in particular, one hour of free local calls for every two-month period and free subscription to innovative services (answering service, the "400" information service, automatic re-dialing if the number called is engaged, and the sending and receipt of SMS). In March, Telecom Italia launched its new ADSL rate package. For the wholesale market, from March 16, a package has been marketed with a capacity of up to 640 Kbit/s, directed at other operators and Internet Service Providers, with discounts of up to 45% on previous prices, improved quality and standardization of the levels of service, and reduction of the time taken to activate connections. As far as retailing is concerned, April 15 will see the start of the marketing of two different rate plans directed at families and small and medium-size companies: one based on "consumption" and the other on a "flat" rate, the latter having unlimited access to Internet traffic.

Divestiture program

- **Lottomatica**: Finsiel S.p.A. accepted the offer of purchase by the Tyche S.p.A. (De Agostini group) contributing its 18.3% investment in Lottomatica S.p.A. Proceeds for Finsiel were euro 211 million.
- **Auna:** in December, an agreement was reached with the Telecom Italia Group and Endesa, Union Fenosa and Santader Central Hispano for the sale of the 26.89% interest held by the Telecom Italia Group in the company. The agreements, concluded in January and subject to normal regulatory approvals, will give rise to net proceeds of euro 1,850 million.
- **BDT**: in February 2002, the Telecom Italia Group reached an agreement for the sale of the 19.61% stake held by TIM International in BDT (Bouygues Decaux Telecom), which controls 55% of Bouygues Telecom. The value of the transaction is equal to about euro 750 million.
- **Stream**: an agreement was reached with News Corporation and Vivendi Universal/Canal+ for the sale of the 50% stake in Stream held by Telecom Italia for a price of US $42 million. The agreement, which is subject to the approval of the appropriate Italian regulatory agencies, calls for the simultaneous sale of Telecom Italia's 50% holding to News Corporation and the purchase of 100% of the capital of Stream by the French group Vivendi Universal. At the time of sale, Telecom Italia has agreed to waive its right to the trade accounts receivable due from Stream of about US $80 million. The economic effects of this transaction have already been set aside in the extraordinary provisions.
- **Telemaco Immobiliare**: as part of a broader plan to leverage the value of the investments in real estate activities, negotiations are underway for the sale of the 40% stake in Telemaco Immobiliare held by Telecom Italia.

Buy-back of Telecom Italia stock

By authorization of the ordinary shareholders' meeting of November 7, 2001, the Company, in March, began to buy-back treasury stock on the market according to the terms and in the manner established by existing laws and the shareholders' resolution. As of March 26, 2002, a total of No. 2,225,000 Telecom Italia savings shares had been bought as treasury stock at an average price of euro 6.06 per share, for a total investment of about euro 13.5 million.

OUTLOOK FOR 2002

For the current year, the Group expects there to be a growth in operating income that is at least in line with that of the prior year. The Group confirms its commitment to reduce the level of net financial debt through the careful management of investments and costs and the continuation of its divestiture program.

RELATED PARTY TRANSACTIONS

With reference to art. 2428 of the Italian Civil Code and Consob communications No. DAC/RM 97001574 dated February 20, 1997 and No. DAC/RM 98015375 dated February 27, 1998 concerning related party transactions among Group companies, the effects of such transactions on the balance sheet and statement of income of the consolidated financial statements at December 31, 2001 of Telecom Italia Group are presented in the following table.
Beginning from the 2001 financial statements, the disclosure concerning the effects of related party transactions between Telecom Italia S.p.A. and the relative parent companies, subsidiaries and affiliated companies are no longer presented in the report on operations, inasmuch as such transactions, which are already partly included in those of the Telecom Italia Group, are reported - to supplement this disclosure - in the notes to the statutory financial statements of Telecom Italia S.p.A..
In the consolidated financial statements, the effects of intercompany transactions on the balance sheet and statement of income, that is, all transactions between consolidated companies, have been eliminated.
All related party transactions, including intercompany transactions, fall within the ordinary operations of the group, are governed by market terms or on the basis of specific laws, and there are no transactions of an unusual and exceptional nature.

MAJOR STATEMENT OF INCOME AND BALANCE SHEET COMPONENTS

	Transactions with:		Nature of transactions
(in millions of euro)	unconsolidated subsidiaries and affiliates	parent companies, subsidiaries and affiliates of parent companies	
Sales and service revenues	877	4	These comprise revenues from Astrolink (euro 296 million), Brasil Telecom (euro 120 million), Telecom Argentina (euro 119 million), Teleleasing (euro 82 million), Auna group (euro 63 million), Stream (euro 55 million) and Lottomatica (euro 53 million)
Raw materials and outside services	567	19	These mainly comprise rent payable to IMSER (euro 199 million) and Telemaco Immobiliare (euro 77 million) and Tlc service costs from Etecsa Cuba (euro 79 million)
Net other income (expense)	25	-	These mainly relate to cost recoveries for personnel on loan to some subsidiaries and affiliates
Net financial income (expense)	(8)	-	These include accrued interest income on loans made to certain foreign subsidiaries and affiliates (euro 22 million) and interest expense payable to Teleleasing (euro 30 million) for financial leasing transactions
Loans in long-term investments	119	-	These refer mainly to loans made to BDT (euro 108 milion)
Financial receivables	213	-	These comprise mainly short-term loans receivable from Stream (euro 122 million), IS Tim (euro 29 million) and Telekom Srbija (euro 23 million)
Financial payables	570	600	These refer mainly to payables for finance leases to Teleleasing (euro 522 million) and a payable by Softe to Olivetti Finance N.V. (euro 600 million)

MAJOR STATEMENT OF INCOME AND BALANCE SHEET COMPONENTS

	Transactions with:		Nature of transactions
(in millions of euro)	unconsolidated subsidiaries and affiliates	parent companies, subsidiaries and affiliates of parent companies	
Trade accounts receivable	428	2	They mainly regard receivables from Auna group (euro 90 million), Stream (euro 82 million), Telekom Srbija (euro 56 million net of provisions), Telecom Argentina (euro 21 million net of provisions) and Teleleasing (euro 18 million)
Trade accounts payable	473	12	These refer to supply contracts connected with operating and investment activities: they include payables to the Italtel group (euro 173 million), Siemens Informatica (euro 51 million), Teleleasing (euro 42 million) and advances from Consorzio Telcal (euro 85 million)
Contract work in process	116	-	These refer mainly to activities on behalf of Consorzio Telcal for the Telematico Calabria Plan (euro 110 million)
Guarantees and collateral	1,261	-	These include sureties given on behalf of the Auna group (euro 510 million), IS Tim (euro 228 million) and Stream (euro 86 million) as well as collateral given on behalf of IS Tim (euro 147 million)
Investments in fixed assets and intangibles	660	5	These mainly consist of acquisitions telephone exchanges from the Italtel group (euro 567 million) and information and computer projects from Siemens Informatica (euro 31 million)

Related party transactions in 2001 also include those by the Telecom Italia Group with the Pirelli group:

(in millions of euro)	2001	
Sales and services revenues	6.9	These mainly refer to telephone services
Trade accounts receivable and other	0.6	These mainly refer to the above-mentioned telephone services
Trade accounts payable and other	6.4	These mainly refer to the supply contracts connected with investment activities
Investments in fixed assets and intangibles	21.5	These mainly refer to purchases of telecommunications cables.

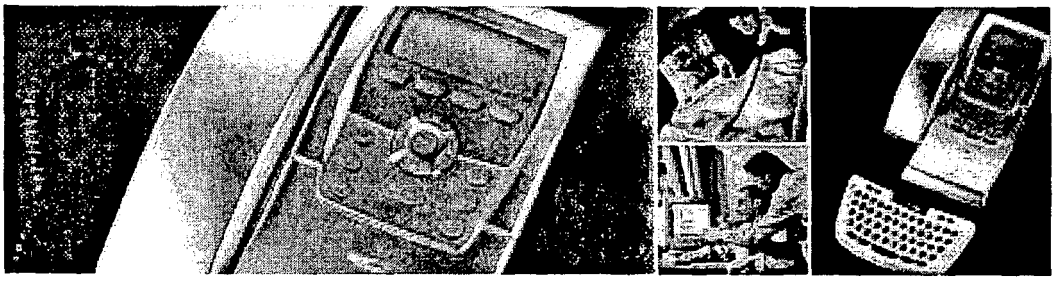
In order to provide more complete information, the following comments contained in the six-month report are reported here and concern the relationships between Telecom Italia and companies in which the directors of Telecom Italia (who resigned in the second half) held specific positions, as well as relationships with key managers and/or directors of the company who resigned in the meantime:

- in April, Telecom Italia Lab (a 100%-owned subsidiary of Telecom Italia), joined with the Ramius Capital Group, an American investment management company (in which the then director, Peter Cohen, was the CEO), to set up an United States-registered venture capital fund called Saturn Venture Partners which targets investments in fixed and mobile TLC technologies and service infrastructures. The fund's participants also included (and still include) the companies TIM, Olivetti and Hopa, in which the then Chairman Roberto Colaninno and the director Emilio Gnutti were shareholders and directors;
- the law firm of Studio Bonelli, Erede, Pappalardo in which the then Deputy Chairman Mr. Erede was the senior partner, has performed professional legal services on behalf of Telecom Italia and some companies in the Group;

- in March 2001, Telecom Italia purchased a 12.3% stake in Netesi S.p.A. – with headquarters in Milan and operating in the area of on-line applications services – by subscribing to a first tranche of new shares issued for a capital increase for an investment of approximately euro 6.2 million. In September 2001, Telecom Italia's stake rose to 17.98% following a successive increase in share capital. Netesi's shareholders included and still include, among others, Omniaholding (a related party of Telecom Italia, through the then Chairman Roberto Colaninno) with a current stake of 7.92%;
- in August 2001, Huit II, a subsidiary of Telecom Italia, purchased - by exchanging 186 million Seat Pagine Gialle ordinary shares - a 100% stake in ISM S.r.l. (owned by Messrs. Ainio and Gualandri, both of whom are managers and directors of companies in the Group in service at the time), a company that holds – through the subsidiary Vertico N.V. - a 33.3% stake in Matrix S.p.A.;
- furthermore, two executives of Telecom Italia (in service at the time) have each purchased a building from Telecom Italia, paying the market price.

ECONOMIC AND FINANCIAL REVIEW OF THE BUSINESS UNITS OF TELECOM ITALIA GROUP

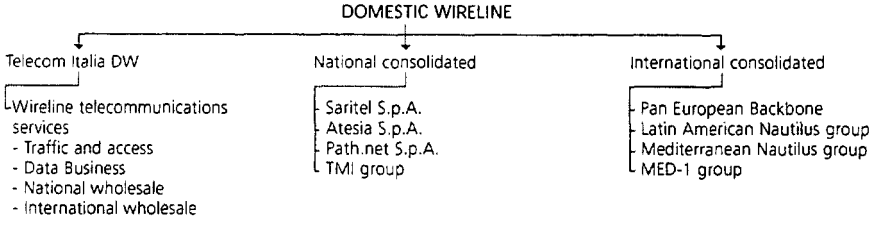
DOMESTIC WIRELINE



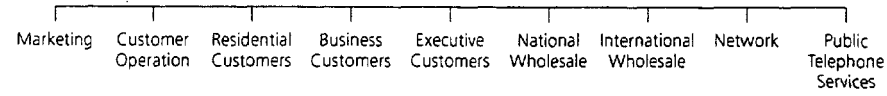
- **Strengthening of the market leadership position**
- **Increase in "transported" traffic and on-line traffic**
- **Launch of commercial policies and innovative services**
- **Development of high-connectivity international networks**
- **Change in the organizational structure**

THE STRUCTURE OF THE BU

The Domestic Wireline Business Unit operates on a national level as the consolidated market leader in wireline telephone and data services and call centers, for final customers and other operators. On an international level, Domestic Wireline develops fiber optic networks for wholesale customers, mainly in Europe and Latin America.



At the end of the year, a new organizational structure was implemented, as follows:



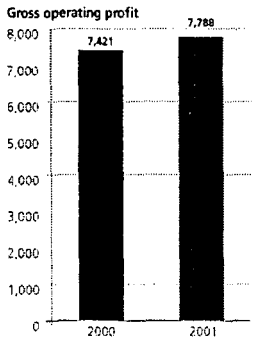
The new organizational structure aims to:
- Shift the focus from the product to the customer
- Accelerate the decision-making process
- Increase efficiency
- Increase the integration and sharing of information
- Streamline the chain of control with the aim of improving time to market

MAJOR EVENTS/SCOPE OF CONSOLIDATION

No significant corporate events took place, apart from the companies that were set up for the "Pan European Backbone", "Mediterranean Nautilus" and "Latin American Nautilus" projects. The relative companies were established between the end of 2000 and the beginning of 2001 and were consolidated line-by-line in the 2001 financial statements.

ECONOMIC AND FINANCIAL DATA

The following table shows the key results in 2001, compared to those in 2000.



(millions of euro)	2001 (A)	2000 (B)	Change (A-B) Amount	%
Sales and service revenues	17,291	17,514	(223)	(1.3)
Gross operating profit	7,788	7,421	367	4.9
% on revenues	*45.0%*	*42.4%*		
Operating income	4,379	3,915	464	11.8
% on revenues	*25.3%*	*22.4%*		
Investments:				
- industrial	2,835	2,746	89	3.2
- goodwill				
Employees at year-end (number)	58,406	62,782	(4,376)	(7.0)

Almost all of the results refer to the Domestic Wireline function of Telecom Italia and take into account the exchanges with other functions of Telecom Italia S.p.A.. For comments on the trend of operations, please refer to the section "Economic and financial performance of Telecom Italia S.p.A.".

2001 was marked by fierce competition, based on the reduction of prices in the "Voice traffic" business area and in the market of Internet-access (ISP). In this context, the activity of Domestic Wireline was characterized by the following:
- the consolidation of its market leadership in the business areas of access, data services, web services and wholesale
- an increase in efficiency by means of strict control over costs and investments
- the return to traditional services, with the successful introduction of flat-rate offers for residential customers and customized offers for business customers
- a considerable increase in "transported" traffic on behalf of other operators and on-line traffic
- the reduction of rates for national, local and long-distance traffic, and outgoing international traffic, which was partly compensated by an increase in basic subscription charges

■ INFORMATION ON OPERATIONS

The following table shows the operating highlights in 2001, compared to those in 2000:

Operating data	2001	2000
Fixed network connections (in thousands)	27,353	27,153
- of which ISDN	5,403	4,584
Annual increase in minutes of traffic on the fixed network (%)	30.7	27.6
- national traffic	31.3	28.1
- international traffic	16.9	11.5
- outgoing	11.4	13.2
- incoming	12.6	(0.1)
- in transit	39.3	52.9

■ Telephony

During 2001 numerous commercial plans were offered for residential and business phone services, including:

Residential telephone services	Teleconomy voce	Subscription with 3,240,000 customers at the year end (+97% compared to the end of 2000)
	BBB/Teleconomy ADSL	Broadband subscription in bundling with the Teleconomy plan
	Sirio 187	First telephone in the world able to handle SMS
Business telephone services	Teleconomy24 aziende	Subscription with approx. 840,000 customers at year-end
	Teleconomy ADSL	Broadband subscription in bundling with the Teleconomy offer
	ADSL Smart	Broadband subscription for small and medium-size companies

With reference to Public Telephone Service installations, terminals using ISDN technology numbered 70,000 units at the year end (+54% compared to the end of 2000).

■ Data transmission

During the year, the commercial range of data packages was expanded by products such as:

"Hyperway"	A private national virtual network based on an IP protocol and a virtual LAN network for metropolitan areas, in which all services and applications are available (voice, data and video)
"NetVantage"	E-business solutions distributed through Internet Data Centers (IDC) to handle virtual communities' processes on-line
"Full Business Government"	E-business solutions distributed through IDC for the local Public Administration
"Full Business Banking"	E-business solutions distributed through IDC for the financial sector
"Web-Kit"	E-business solutions distributed through IDC for ADSL connectivity

■ Wholesale national

During the year, Telecom Italia consolidated its activities in the Wholesale national area with an increase in interconnection traffic of 126.4% (from 38.8 to 87.9 billion minutes) compared to 2000.

During the year, the range of rate plans was extended by products such as:

Permanent virtual channel	Allows Internet Service Providers and other operators to offer final customers data services through broadband access technologies on two-pair copper or fiber optic cables
Dark optic fiber	Supply without installation for using the Telecom Italia network, ensuring a potentially unlimited carrying capacity given the growing demand for broadband services from the market

- Wholesale international

As far as International Wholesale is concerned, the year was characterized by a growth in demand, particularly with regard to Internet and data services, with an increase in the volume of traffic by 18.7% (from 5.8 to 6.8 billion minutes) compared to 2000.

- National network

The national network in statistics at December 31, 2001 is as follows:

Exchange areas	about 10,400, served by 11,551 Line Stages (LS)
Switching areas	615, served by 653 Local Group Stages (LGS)
Gateway areas	33 served by 80 Transit Group Stages (TGS)
Copper access network	104.3 million of kilometers-pair
Fiber optic access network	417,000 kilometers-line
Fiber optic carrier network	2.8 million kilometers-line
Direct dialing circuits	3.9 million
Network for direct digital circuits	641,000 access points with speeds up to 2 Mbit/s
Network for direct analog circuits	166,200 access points
Frame Relay accesses	about 52,000 gates at 2Mbit/s

As far as the national network is concerned, during 2001 infrastructures and operation systems were improved, partly as a result of the growth in the activities of other providers on the Italian market. The following activities are worthy of note:

Dialing without the "zero"	Activation of dialing without the first "0" when calling mobile phone numbers
Call return	Activation of the call return service which provides customers with information about the last call received, including the number, date and time of the call, and with the option of re-calling the number automatically
National switching	Completion of the digitization of national switching, by transferring customers previously registered with analog exchanges to digital exchanges
Arianna	Continuation of the development of "Arianna", a ring network which uses the latest generation of SDH and DWDM (Dense Wavelength Division Multiplexing) technologies. These act as a basis for the new OCN (Optical Carrier Network) on which flows are carried requiring high quality and availability
SDH	The fiber optic network has been increased with 25 new DWDM systems, integrated by OADM (Optical Add Drop Multiplexer) systems
CNM (Customer Network Manager)	Module for the operation of private virtual networks on the WEB platform, which became operational during the year
T-Bone	Start of the project, with work that began on the eastern backbone of the fiber optic ring linking Milan and Palermo, consisting of 2,300 km of cable with 96 optic fibers and the laying of two submarine links under the Straits of Messina
Radio links	Installations with a higher capacity were created to cope with the growth in the demand of mobile operators

■ International network

The international network in statistics at December 31, 2001 is as follows:

Connected countries	237
- of which direct dialing	229
- of which ISDN	53
Switching exchanges	8 (4 in Milan, 3 in Rome and 1 in Palermo)
Extent of European backbone	36,600 kilometers-line
Bands	2 rings of 60,000 Mbit/s

As far as the international network is concerned, infrastructures and operating systems were developed in geographical areas with a strong growth in demand for capacity, which are of strategic importance to the subsidiaries and affiliates located in those areas. Highlights during the year include:

Pan European Backbone	Activation of the pan-European regional network, which connects nine countries (Austria, Belgium, France, Germany, Italy, Holland, Spain, Switzerland and Great Britain) with high-speed optical fibers and a ring structure which will guarantee the self-protection of traffic should a fault occur on any given section. 100%-owned subsidiaries have been set up by Telecom Italia in each of the countries linked by the network; they own the installations within the national borders and offer services mainly to Telecom Italia, to enable it to sell cross-border services to the wholesale clientele.
LAN (Latin American Nautilus)	Activation of the initial configuration of the LAN ring network, which connects eight junctions in Latin America, including Rio de Janeiro, São Paulo, Buenos Aires and Santiago with the junction in Miami
Mediterranean Nautilus	Work continued on the "Mediterranean Nautilus" project, the submarine optical fiber ring network which will connect Italy, Greece, Turkey, Israel and Egypt, with the collaboration of the subsidiaries Med-1 (installation) and Med Nautilus (operations)

■ SUBSIDIARIES

SARITEL TELEMATICA ITALIANA

Saritel S.p.A.

Held by: Telecom Italia 100.0%.

The company operates as the "Internet factory" of the Telecom Italia Group. It handles the management of basic services and platforms, the integration of systems and the development of applications. The services are mainly offered to Domestic Wireline, TIM, Seat Pagine Gialle, Retevision Movil in Spain and IS Tim in Turkey.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	186	142	31.0
Gross operating profit	39	21	85.7
Operating income	17	12	41.7

Activities during the year:

- development of the range of dedicated products for the Telecom Italia Group

ATESIA

Atesia S.p.A.

Held by: Telecom Italia 100.0%.

The company operates in the sector of telemarketing and market research.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	83	77	7.8
Gross operating profit	40	39	2.6
Operating income	36	34	5.9

Activities during the year:

- development of the services performed on behalf of Telecom Italia and TIM

P.A.th Net

PathNet S.p.A.

Held by: Telecom Italia 99.9%, Sodalia 0.01%.

The company is responsible for the development and management of the single Public Administration network.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	79	28	182.1
Gross operating profit	3	1	200.0
Operating income	1	(0.1)	*

Activities during the year:

- stipulation of important new contracts with the Public Administrations (56 contracts at year-end)

TMI group - Telemedia International Italia

Held by: Telecom Italia 100.0%.

The group offers international voice and data services on fixed networks.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	91	136	(33.1)
Gross operating profit	(53)	(55)	3.6
Operating income	(126)	(88)	(43.2)

Activities during the year:

- start of the reorganization of the group's operations with the sale of TMI Hong Kong

Latin American Nautilus group

Held by: Telecom Italia 70.0%, Entel Bolivia 10.0%, Entel Chile 10.0%, Telecom Arg. 10.0%

The group ensures the transport of traffic and the supply of transmission capacity for wholesale customers in Latin America.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	3	-	*
Gross operating profit	(26)	(0.1)	*
Operating income	(27)	(0.4)	*

Activities during the year:

- activation of the initial configuration of the network
- re-negotiation with Global Crossing of the conditions for supplying transmission capacity in Latin America

Mediterranean Nautilus group

Held by: Telecom Italia 62.51%, SIN 7.49%.

The group ensures the transport of traffic and the supply of transmission capacity for wholesale customers in the Eastern Mediterranean.

The table shows the key economic highlights:

	2001 (millions of euro)	2001 (millions of US$)	2000 (millions of US$)	Change in local currency (%)
Sales and service revenues	54	48	56	(14.2)
Gross operating profit	20	18	28	(35.7)
Operating income	(20)	(17)	21	*

Activities during the year:

- completion of the northern section (between Catania, Chamia-Crete, Haifa and Tel Aviv) and the southern section (between Tel Aviv and Catania) of the network, which has been available for traffic since December

Med-1 group

Held by: Telecom Italia 23.17%, SIN 27.83%.

The group is responsible for installing land-based and submarine networks in the area of the Middle East.

The table shows the key economic highlights:

	2001 (millions of euro)	2001 (millions of US$)	2000 (millions of US$)	Change in local currency (%)
Sales and service revenues	13	12	6	100.0
Gross operating profit	2	1	(1)	*
Operating income	(5)	(5)	(6)	16.7

Activities during the year:

- cooperation in the laying of the fiber optic submarine Med Nautilus network

Pan European Backbone

Held by: Telecom Italia 100.0%.

A group of companies which is responsible for the transport of traffic and the supply of transmission capacity for wholesale customers in Europe.

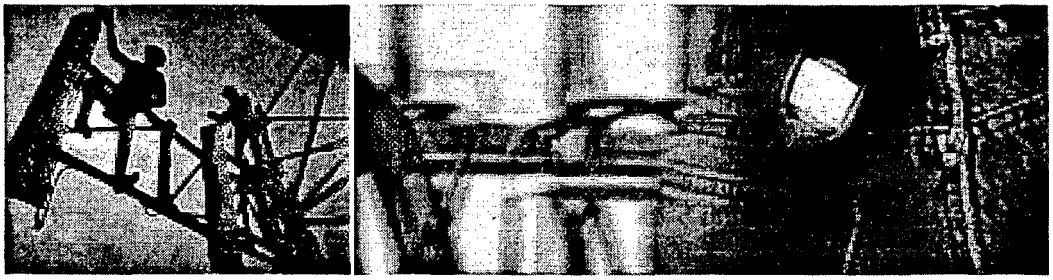
The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	19	-	*
Gross operating profit	13	(1)	*
Operating income	7	(1)	*

Activities during the year:

- completion of the junctions for Milan, Zurich, Frankfurt, Amsterdam, Brussels, London and Paris and the start-up of commercial activities

MOBILE SERVICES



- **Growth of revenues and profit margins**
- **Extension of the range of products and services offered**
- **Diversification of rate plans**
- **Expansion in strategic foreign markets**

■ THE STRUCTURE OF THE BU

The Mobile Services Business Unit (TIM group) operates in the sector of national and international mobile telecommunications. Its international presence is concentrated in the Mediterranean Basin and in Latin America.

The Business Unit is organized as follows:

MOBILE SERVICES

- National subsidiaries
  - TIM S.p.A.
- International subsidiaries
  - TIM International
    - Stet Hellas group (Greece)
    - Tele Nordeste Celular Participaçoes group (Brazil)
    - Tele Celular Sul Participaçoes group (Brazil)
    - Maxitel group (Brazil)
    - TIM Perù S.A.C.
    - Corporacion Digitel C.A. (Venezuela)
- Affiliated companies
  - Mobilkom Austria
  - IS Tim (Turkey)
  - Bouygues Telecom S.A. (France)

■ MAJOR EVENTS/SCOPE OF CONSOLIDATION

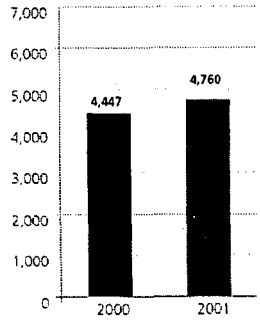
Key events in 2001 include:

- consolidation of the financial statements of Corporacion Digitel and the Maxitel group, acquired at the end of 2000
- setting up the company Tim Brasil, sub-holding company for the subsidiaries TIM Celular Centro Sul, TIM Sao Paulo, TIM Rio Norte, set up during the first months of the year
- contribution of the investment in Bitel (majority shareholder of Tele Nordeste Celular and Tele Celular Sul) to TIM Brasil by TIM International N.V.
- merger by incorporation of TIM International B.V. in SMH N.V. and the simultaneous change of the name of the latter to TIM International N.V.

■ ECONOMIC AND FINANCIAL DATA

The following table shows the key results in 2001, compared to the results in 2000.

Gross operating profit



(millions of euro)	2001 (A)	2000 (B)	Change (A-B) Amount	Change (A-B) %
Sales and service revenues	10,250	9,418	832	8.8
Gross operating profit	4,760	4,447	313	7.0
% on Revenues	46.4%	47.2%		
Operating income	3,136	2,988	148	5.0
% on Revenues	30.6%	31.7%		
Investments:				
. industrial	3,151	4,206	(1,055)	(25.1)
. goodwill	31	899	(868)	*
Employees at year-end (number)	16,721	15,257	1,464	9.6

Compared to 2000, the growth in sales and service revenues, shown gross of the amounts due to third-party telecommunications operators, is 8.8% and can be attributed to the positive trend in the revenues of TIM S.p.A.. The percentage increase of the gross operating margin is lower than the growth of revenues as a result of the start-up of international companies.
For a description of operations, please refer to the comment on the group holding company TIM and the individual consolidated companies.

■ TELECOM ITALIA MOBILE S.P.A.

Held by: Telecom Italia 54.82%, Softe 0.14%.
The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	8,357	7,929	5.4
Gross operating profit	4,225	3,845	9.9
Operating income	3,231	2,862	12.9

The growth of revenues can be attributed to a further expansion of traffic (+7.6% in terms of revenues, +13.6% in terms of minutes). Compared to 2000, there was an increase in revenues from value-added services of approximately 56.5%, especially as a result of the spread of Internet services (more than 140%) and outgoing SMS (approximately 35%). The gross operating profit benefited from a reduction in outside costs. TIM's net income (equal to euro 1,907 million) reflects adjustments to the investments in the international segment, which involved an extraordinary writedown of the subsidiary TIM International N.V. of euro 532 million, before taxes.
In addition, important investments made during the year include:
- development of the GSM network, both for the development of the radio access network and the backbone network;
- completion of the infrastructures for the launch of data services (WAP, GPRS);
- continuation of work on the development of UMTS, laying the foundations for integrated voice, data and multimedia services for access networks (radio stations and control junctions).

During the year, TIM confirmed its leadership on a domestic market marked by fierce competition. The following objectives were pursued:

- new rate packages proposing innovative products
- further diversification in rate plans
- customer care, through the strengthening of CRM structures
- effectiveness and promptness in communication (both advertising and financial)
- stepped-up productive efficiency
- active participation in the main standardization bodies worldwide (3GPP, CEPT/ERC Committees, GSM Association, UMTS Forum)

The following table shows the key operating highlights, compared to 2000, and the main activities carried out by each sector:

TIM - Operating data	2001	2000
TIM lines in Italy (thousands)	23,946	21,601
Annual increase of mobile traffic in minutes (%)	13.6	24.6
GSM penetration in Italy (% population)	99.7	99.6
E-TACS penetration in Italy (% population)	98.0	98.0

During 2001, TIM reported significant progress in the development of SMS traffic, the creation of innovative services and the enhancement of offers with initiatives such as:

"LoSai di TIM"	Free service letting GSM customers know who has called while the telephone is switched off or out of range
FreeSMS	Package offering an automatic charging mechanism based on the number of SMS sent
CartAmici/ CartAuguri	Commercial package with special seasonal rates
Last Minute di TIM	Commercial package offering products and services that can be used for a limited time at very low unit costs
Autoricarica	Possibility of increasing the frequency with which bonuses are credited
GPRS	All TIM lines are also equipped to handle GPRS traffic, of fundamental advantage to the professional market, which acknowledges TIM as the only provider able to guarantee this service.

■ SUBSIDIARIES

■ EUROPE

TELESTET

Stet Hellas group

Held by: Tim International 63.95%.

The Group operates the GSM service in Greece.

The table shows the main economic and operating data:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	523	526	(0.6)
Gross operating profit	188	156	20.5
Operating income	89	76	17.1
	2001	**2000**	
Number of lines at year-end (millions)	2	1.6	
Market share	27%	28%	

Activities during the year:

- Acquisition in the month of July of a UMTS license for Greek drachmas 50 billion (euro 145 million) and a DCS 1800 license for Greek drachmas 9 billion (euro 26 million). The acquisition of the new licenses was partly financed by a share capital increase of Greek drachmas 30 billion (euro 87 million). This capital increase, concluded in October, was entirely subscribed and raised the stake owned by TIM International from 59.29% to 63.95%.

■ LATIN AMERICA - Brazil

TIM
Tele Nordeste Celular

Tele Nordeste Celular Participaçoes group

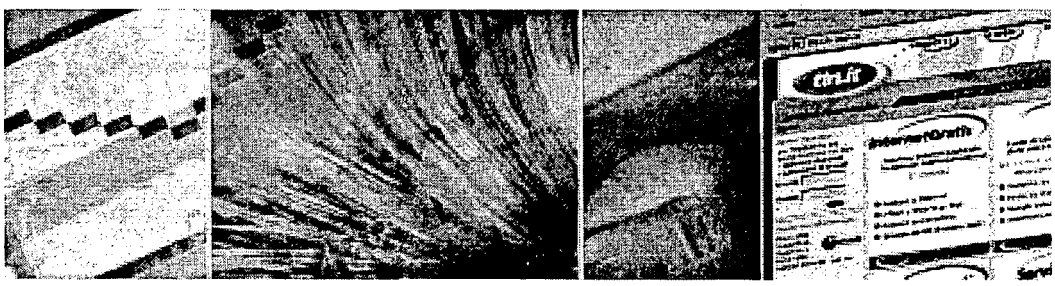
Operating income (loss)	53	(195)	•
	2001	**2000**	
Number of lines at year-end (millions)	6.4	5.2	
Market share	18%	18%	

- During the first few months of 2002, the Telecom Italia Group reached an agreement for the sale of the 19.61% holding in BDT held by TIM International. The overall equivalent amount of the transaction will be equal to euro 750 million

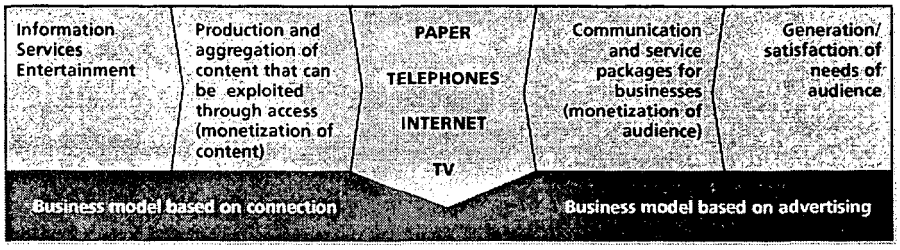
INTERNET AND MEDIA



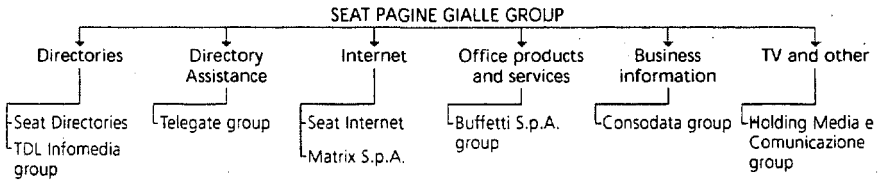
- **Growth of revenues**
- **Improvement in profit margins**
- **Change in the scope of consolidation**
- **New mission**

■ THE STRUCTURE OF THE BU

The Internet and Media Business Unit is responsible for the whole chain of value in the media sector. Its operations include telephone publishing and television and the BU is the national leader in the marketing of products and services for the office. Seat Pagine Gialle promotes the development of all Internet services for residential customers and for small and medium-size companies: access, portals and web services.
Within the framework of the new strategic guidelines, the mission of the BU includes the creation of a multi-platform media group which, using the mediums of paper, telephones, the Internet and television, will meet the needs of the public for information and entertainment, and the needs of businesses for communication and services.



The Business Unit consists of the Seat Pagine Gialle group, which is organized as follows (the table shows the main consolidated companies/areas of consolidated operations):



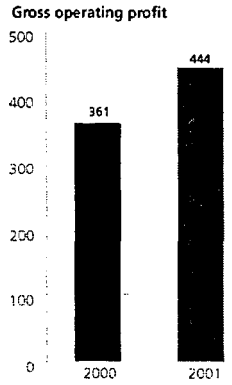
■ MAJOR EVENTS/SCOPE OF CONSOLIDATION

In 2001 the scope of consolidation was extended to include numerous companies that have been acquired recently, including the French group Consodata (Business Information), the British telephone publishing company TDL Infomedia (Directories), the German company Telegate (Directory Assistance), and the television group Holding Media e Comunicazione, formerly Cecchi Gori Communications (TV). The details of the main transactions carried out during the year are described below:

- Acquisition of a 64.532% investment (direct and indirect) in Telegate A.G. after acquiring Telegate Holding's remaining (48.63%) share capital
- Acquisition of the control of four Italian call centers by the company Giallo Voice (100%-owned by Seat Pagine Gialle)
- Exchange of 186 million Seat Pagine Gialle shares for a 100% stake in ISM by Huit II (subsidiary of Telecom Italia). ISM holds 33.3% of Matrix's capital through the subsidiary N.V.Vertico. After this transaction, the Telecom Italia Group holds control of Matrix with a 56.88% stake
- Acquisition of 54.5% of the French company Consodata, according to the terms of the agreement stipulated on July 31, 2000 between Seat Pagine Gialle and the founder shareholders of the same company, which operates in the sector of marketing information. The company is listed on the Nouveau Marché in Paris
- Conclusion in May of the takeover bid by Seat Pagine Gialle for the remaining shares of the Buffetti S.p.A. group not yet held
- Acquisition in June, following the share capital increase carried out in April, of 100% of the share capital of Cecchi Gori Communications (now Holding Media e Comunicazione)

ECONOMIC AND FINANCIAL DATA

The table shows the key economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis.



(millions of euro)	2001 (A)	2000 (1)	2000 - with the same scope of consolidation (2) (B)	Change (A - B) Amount	%
Sales and service revenues	1,957	263	1,908	49	2.6
Gross operating profit (loss)	444	(35)	361	83	23.0
% on Revenues	22.7%	•	18.9%		
Operating income (loss)	31	(73)	(1)	32	•
% on Revenues	1.6%	•	•		
Investments:					
. industrial	175	34	251	(76)	(30.3)
. goodwill	203	-	n.d.		
Employees at year-end (number)	9,264	7,515	8,932	332	3.7

(1) Data refer only to Tin.it, with the exception of those pertaining to number of employees, which include the Seat Group.
(2) The data include the consolidated financial statements of the Seat Group, the operations of Tin.it from January 1, 2000 and companies recently acquired by the Seat Group.

Considering the same scope of consolidation, revenues increased by 2.6%, a satisfactory result given the economic slowdown which hit the European economy and, in particular, the advertising sector, where the Seat Pagine Gialle group generates a large proportion of its business. The main contributor to the growth was telephone publishing, which compensated the decline in Internet activities. The relative customers of Directories of Seat Pagine Gialle reached 670 thousand (+3.6% compared to the prior year), thanks partly to the boost from the launch and development of new products. The growth in the gross operating profit for the year (+23.0% with the same scope of consolidation) can be attributed to the policy of rationalizing costs and improving the profit margins of the telephone publishing business. The positive performance in these areas more than compensated the losses in Television.
The operating income was euro 31 million, a significant increase compared to the operating loss of euro 1 million reported in the financial statements in 2000, on a comparable consolidation basis.

INFORMATION ON OPERATIONS

During the year, Seat Pagine Gialle strengthened its presence in the markets in which it operates, thanks to its portfolio of brands with a high degree of awareness. The operations of the Group were marked by:

- continuity between platforms and products, making it possible (now and in the future) to exploit the potential of synergies and integration between directories, telephones and the Internet on the one hand, and between the Internet and TV on the other
- control over a commercial network that is unique from the standpoint of coverage, the number and type of clientele, platform coverage (paper, telephone, Web and TV) and in terms of the availability of a physical network through which to distribute products and services;
- greater cooperation with Telecom Italia Domestic Wireline for the sale of Internet ADSL connections (132,800 units at year-end compared to approximately 6,500 in the prior year).

For a description of operations during the year, please refer to the comments on the group holding company Seat Pagine Gialle and its main consolidated companies, presented below.

1396

SEAT PAGINE GIALLE

■ SEAT PAGINE GIALLE S.P.A.

Held by: Telecom Italia 53.21%, Huit II 1.90%, Softe 0.13%, Saritel 0.02%.

The company operates in the sectors of telephone publishing and the Internet.
The table shows the economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	1,089	1,037	5.0
Gross operating profit	505	337	49.9
Operating income	285	130	119.2

Activities during the year:

Telephone publishing	Telephone directories	Use of a new print font (Nomina)
	Pagine Gialle (Yellow pages)	Use of a new graphics layout for Yellow Pages (WhiteSpotLight)
	PGOL	New search engine, synergies with Virgilio and Yahoo
	Pagine Bianche.it	New alphabetic on-line search
	PPG	Enhancement of content, main city routings
Internet	Dial up	Volume of traffic equal to approximately 13.3 billion minutes in 2001 (+14% compared to 2000)
	"Prodotti free"	Number of active users equal to 1.3 million at the end of 2001 (+13% compared to 2000)
	"Utenti Pay"	Average daily consumption equal to 31.7 minutes/day/user (+18% compared to 2000)
	Broadband Access	Number of active users equal to 132,800 at the end of 2001 (+2000% compared to 2000)

telegate

■ SUBSIDIARIES

Telegate group

Held by: Seat Pagine Gialle 100.0%.

The group operates in the sector of Directory Assistance, and is the second-largest operator in Germany after Deutsche Telekom.
The table shows the key economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	135.0	130.1	3.8
Gross operating loss	(11.9)	(1.1)	*
Operating loss	(32.3)	(10.7)	(201.9)

Activities during the year:
- revision of the pricing model
- launch of new value-added telephone services (distribution of various kinds of information other than simple directory assistance)

1397

THOMSON Directories

TDL Infomedia group

Held by: Seat Pagine Gialle 99.60%.

The group operates in the telephone publishing sector, and is the second-largest publisher of directories in the United Kingdom.

The table shows the economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	151.2	155.4	(2.7)
Gross operating profit	48.4	45.1	7.3
Operating income	19.1	20.0	(4.5)

Activities during the year:

- 173 local directories published and distributed compared to 170 in the prior year, representing 89% of revenues
- advertising on the Thomweb on-line directories
- business information services

MATRIX

Matrix S.p.A.

Held by: Finanziaria WEB 66.00%, NV Vertico 33.30%, Seat Pagine Gialle 0.70%.

The company operates in the Internet sector.

The table shows the key economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	26.1	32.4	(19.4)
Gross operating loss	(38.6)	(16.4)	(135.4)
Operating loss	(39.8)	(20.4)	(95.1)

Activities during the year:

- strengthening of the position of the Virgilio portal, despite a marked slowdown in the whole sector (reach of 61.3%, more than 3,507 million annual page-views compared to 1,705 million in 2000)
- market share of 23% of the on-line advertising market for the Virgilio portal and the internal Active Advertising agency.

Buffetti

Buffetti S.p.A. group

Held by: Seat Pagine Gialle 100.0%.

The group operates in the sector of products and services for the office.

The table shows the key economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	238.7	228.8	4.3
Gross operating profit	11.4	14.0	(18.6)
Operating income	4.4	8.9	(50.6)

Activities during the year:

- completion of the reorganization of activities associated with direct sales to businesses and consumer products, created with the aim of specializing the sales networks and fully exploiting the synergies existing within the Group

- preparations for the start-up of the new print-on-demand service (customized printing on demand), including the signing of an agreement with a qualified partner to create a joint venture.

Consodata

Consodata group

Held by: Seat Pagine Gialle 90.74%.

The group operates in the sector of business information in the French market.
The table shows the economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	83.2	83.8	(0.7)
Gross operating profit	3.4	8.9	(61.8)
Operating loss	(14.5)	(12.0)	(20.8)

Activities during the year:

- application in the field of direct and information marketing, through the development of one-to-one services (collecting data on models of household consumption), data management services (processing and data analysis) and market intelligence (enhancement and sale of the same information).

Holding Media e Comunicazione group

Held by: Seat Pagine Gialle 100.0%.

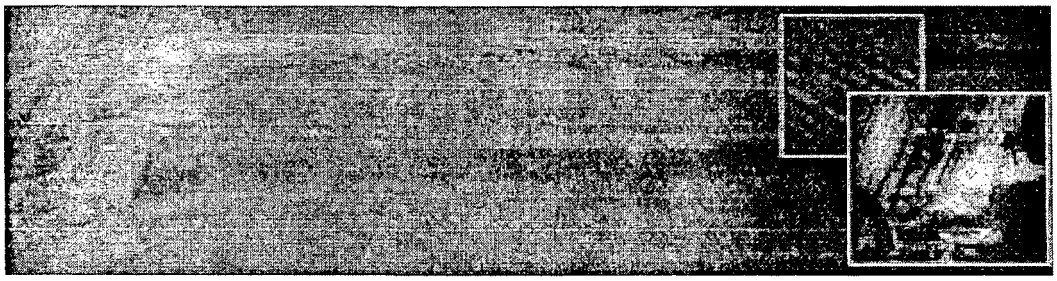
The group operates in the sector of radio and television broadcasting.
The table shows the key economic highlights for 2001, compared to those in 2000, on a comparable consolidation basis:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	85.5	81.8	4.5
Gross operating loss	(74.8)	(29.9)	(150.2)
Operating loss	(98.6)	(38.9)	(153.5)

Activities during the year:

- joint venture with the Viacom Group for broadcasting the MTV Italia channel (on air since May 2001) on television frequencies
- launch of the La7 brand (June 2001)
- revision of the initial project to create a general-type TV channel on La 7, with high costs and considerable financial risk; outlining and definition of a project for a television channel with a high information content (on air since March 2002)
- increase of geographical penetration and the percentage of the population served by the TV signal distribution network

INTERNATIONAL OPERATIONS

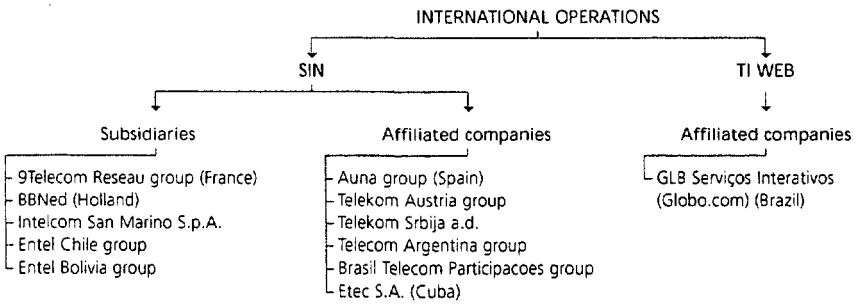


- **Strengthening of the Group's international presence in business segments with good growth potential**
- **Optimization of the portfolio of business activities**

■ THE STRUCTURE OF THE BU

The International Operations Business Unit operates in the sector of fixed and integrated fixed-mobile telecommunications. Its operations are mainly concentrated in Europe and Latin America.

The Business Unit is organized into companies – coordinated by Telecom Italia's "International Operations" business segment – for the most part controlled by the holding company Stet International Netherlands.



■ MAJOR EVENTS/SCOPE OF CONSOLIDATION

The following transactions took place during the year 2001:

- in France, Jet Multimedia (9Telecom Reseau group) acquired a 100% stake in Victoire Multimedia from the LVMH group.

- in Spain, the shareholder base changed in AUNA (the holding company created in December 2000) after which the Telecom Italia Group holds 26.89% of the share capital. In December, an agreement was reached between the Telecom Italia Group and Endesa, Union Fenosa and Santader Central Hispano for the disposal of the investment in the company.

- in Chile new stakes were acquired in the Entel Chile group, bringing the total to 54.76%.

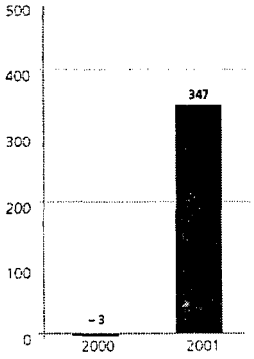
- during the first quarter, 30% of Mediterranean Nautilus S.A. (which also includes Elettra) was sold to F.T.T. Investment, a company belonging to the Israeli group Fishman.

Compared to the prior year, the transactions carried out in 2001 led to the inclusion in the scope of consolidation of the Entel Chile group and the Jet Multimedia group, whose balance sheets only were consolidated in 2000, and the exclusion of the Nortel Inversora group -Telecom Argentina. At December 31, 2001 the latter was consolidated using the equity method.

■ ECONOMIC AND FINANCIAL DATA

The table shows the key results for 2001, compared to those in 2000.

Gross operating profit (loss)



(millions of euro)	2001 (A)	2000 (*) (B)	Change (A-B) Amount	%
Sales and service revenues	1,879	505	1,374	272.1
Gross operating profit (loss)	347	(3)	350	*
% on Revenues	*18.5%*	-		
Operating loss	(268)	(135)	(133)	(98.5)
% on Revenues	-	-		
Investments:				
. industrial	517	204	313	153.4
. goodwill	773	780	(7)	(0.9)
Employees at year-end (number)	7,307	2,572	4,735	184.1

(*) Restated to give effect to the consolidation of Nortel Inversora group using the equity method instead of the proportional consolidation method.

The above data take into account the exchanges between the International Operations function and the other functions of Telecom Italia S.p.A..

In 2001, the revenues and the gross operating profit of the Business Unit increased following a larger contribution by 9Telecom and the inclusion in the scope of consolidation of the Entel Chile and Jet Multimedia groups. On the other hand, there was a significant increase in the operating loss compared to 2000 which can mainly be attributed to higher amortization of goodwill, and the increase in provisions for adjustments relating to the Entel Chile and 9Telecom groups.

■ INFORMATION ON OPERATIONS

In 2001, the development and management of the foreign investment portfolio was aimed at maintaining the presence of the Telecom Italia Group in strategic markets (Latin America and Europe) and in business segments with high growth potential.

■ SUBSIDIARIES

■ EUROPE - France

9Telecom Reseau group

Held by: SIN 97.34%, T.M.I. Telemedia Int. 0.04%.

Internet customers at year-end (thousands)		12	12	

Activities during the year:

- GSM technology introduced in Bolivia
- consolidation of its leadership position in the business and corporate clientele services segments
- complete deregulation of the TLC market, introduction of carrier selection and local access, previously in the exclusive hands of cooperatives

■ AFFILIATED COMPANIES

■ EUROPE - Spain

Auna group

Held by: SIN 22.77%, Tim International 3.81%, Multimedia Cable 0.31%.

The group operates in the sectors of fixed and mobile telephone services, data-transmission and Internet-access services.

The table shows the key economic and operating highlights:

	2001 (millions of euro)	2000 (millions of euro)
Sales and service revenues	2,333	585
Gross operating profit	174	(52)
Operating loss	(524)	(259)
	2001	**2000**
Active fixed indirect telephone customers at year-end (thousands)	1,287	1,084
Active fixed direct telephone customers at year-end (thousands)	228	90
Number of mobile lines at year-end (thousands)	5,225	3,719
Internet customers at year-end (thousands)	1,225	888

NB - The data for 2001 are not comparable with those of the prior year on account of the reorganization that took place in 2000.

Activities during the year:

- position strengthened as Spain's second-largest integrated telephone operator in Spain
- 40% market share reached by subsidiary Eresmas for Internet portals and ISPs

- investments continued in the mobile market for the development of GPRS and UMTS networks

In December, an agreement was reached between the Telecom Italia Group and Endesa, Union Fenosa and Santader Central Hispano for the sale of the 26.89% stake owned by the Telecom Italia Group. The agreement, which became official in January and is subject to normal regulatory approvals by the Regulator, will make it possible to generate net proceeds of euro 1.85 billion.

Telekom Austria

■ EUROPE - Austria

Telekom Austria group

Held by: SIN 29.78%.

The group operates in the sectors of wireline and mobile telephone services, data-transmission and Internet-access services.

The table shows the key economic and operating highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	3,943	3,897	1.2
Gross operating profit	1,488	1,087	36.9
Operating income (loss)	326	(5)	*
	2001	**2000**	
Number of fixed lines at year-end (thousands)	3,166	3,269	
Number of mobile lines at year-end (thousands)	2,850	2,804	
Internet customers at year-end (thousands)	656	293	

Activities during the year:

- restructuring of human resources with a cutback of approximately 2,700 persons
- introduction of a new, more customer-oriented organizational model
- continued international expansion in the mobile segment
- launching of the new portal for the development of new services and applications

Telekom Srbija

■ EUROPE - Serbia

Telekom Srbija a.d.

Held by: SIN 29.00%.

The company operates in the sector of fixed telephone services, data services and mobile telephone services.

The table shows the key economic and operating highlights:

	2001 (millions of euro)	2001 (millions of dinars)	2000 (millions of dinars)	Change in local currency (%)
Sales and service revenues	438	26,152	21,819	19.9
Gross operating profit	161	9,592	9,240	3.8
Operating income	49	2,910	3,836	(24.1)
		2001	**2000**	
Number of fixed lines at year-end (thousands)		2,264	2,206	
N. of mobile lines at year-end (thousands)		821	433	

Activities during the year:
- two rate increases carried out to compensate for the devaluation of the dinar and inflation in 2000
- aims of operational repositioning and restoring economic and financial equilibrium of the company upheld

■ LATIN AMERICA - Argentina

TELECOM

Telecom Argentina group

Held by: Telecom Italia and SIN through Nortel Inversora 13.97%.

The company operates in the sector of fixed and mobile telephone services, data-transmission and Internet-access services.

The table shows the key economic and operating highlights:

	2001 (millions of euro)	2001 (millions of pesos)	2000 (millions of pesos)	Change in local currency (%)
Sales and service revenues	3,558	3,188	3,362	(5.2)
Gross operating profit	1,904	1,705	1,661	2.6
Operating income	636	570	691	(17.5)
		2001	**2000**	
Number of fixed lines at year-end (thousands)		3,584	3,575	
N. of mobile lines at year-end (thousands)		2,136	2,058	
Internet customers at year-end (thousands)		247	250	

Activities during the year:
- implementation of radical process to optimize costs and investments
- market leadership position achieved in ADSL access packages and role of market leader in the mobile segment upheld
- plan approved to merge Telecom Internet and Telecom Argentina by incorporation

■ LATIN AMERICA - Brazil

BrasilTelecom

Brasil Telecom Participações S.A. group

Held by: SIN through Solpart 7.28%.

The group operates in the sector of fixed local and long-distance telephone services.

The table shows the economic and operating highlights for 2001, compared to those in 2000:

	2001 (millions of euro)	2001 (millions of reais)	2000 (millions of reais)
Sales and service revenues	3,074	6,464	4,732
Gross operating profit	1,633	3,434	2,664
Operating income	571	1,201	869
		2001	**2000**
Number of fixed lines at year-end (thousands)		8,638	7,446

NB - The data for 2001 are not comparable with those of the prior year on account of the reorganization that took place in 2000.

Activities during the year:
- formation of the company BrTurbo with the aim of developing activities associated with access (narrow band and broadband) and the relevant value-added services
- acquisition of a 19.9% stake in VANT with the aim of developing data traffic approved by the Board of Directors of Brasil Telecom

1406

■ LATIN AMERICA - Brazil

GLB Serviços Interativos S.A.

Held by: TI Web 28.57%.

The company operates in the Internet sector. It owns the "Globo.com" brand.

The table shows the key economic and operating highlights:

	2001 (millions of euro)	2001 (millions of reais)	2000 (millions of reais)	Change in local currency (%)
Sales and service revenues	7	14	12	16.7
Gross operating profit	(73)	(150)	(109)	(37.6)
Operating income	(75)	(157)	(112)	(40.2)
		2001	**2000**	
Internet customers at year-end (thousands)		11.7	11.7	

Activities during the year:

- investments made with the aim of improving the quality of the portal and its ranking as one the most visited portals (in 3rd place at end December 2001)

■ LATIN AMERICA - Cuba

Etec S.A.

Held by: SIN 29.29%.

The company operates in the sector of national and international fixed telephone services and Internet services.

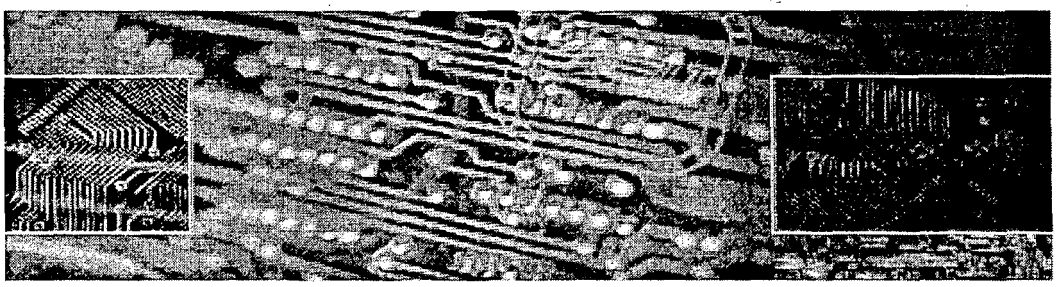
The table shows the key economic and operating highlights:

	2001 (millions of euro)	2001 (millions of US$)	2000 (millions of US$)	Change in local currency (%)
Sales and service revenues	314	281	293	(4.1)
Gross operating profit	206	185	202	(8.4)
Operating income	153	137	169	(18.9)
		2001	**2000**	
Number of fixed lines at year-end (thousands)		555	470	
Internet customers at year-end (thousands)		5	3	

Activities during the year:

- transit agreements reached for international traffic as an alternative to the severing of telephone communications with the United States
- Internet plans consolidated and a horizontal portal launched about Cuba

INFORMATION TECHNOLOGY SERVICES



- **Industrial rationalization and corporate reorganization**
- **Improvement in profit margins**

■ THE STRUCTURE OF THE BU

The "Information Technology Services" (IT Services) Business Unit is responsible for the information technology activities of the Group and covers the whole chain of value of information services, while pursuing objectives to reposition its activities on higher value-added products.

The Business Unit, established as part of a plan to integrate various companies, such as Finsiel, Netsiel, Telesoft, Sodalia and the former information technology function of Telecom Italia, is organized as follows:

INFORMATION TECHNOLOGY SERVICES
↓
Subsidiaries
- IT Telecom S.p.A.
- Finsiel group
- Telesoft group
- Netsiel S.p.A.
- Sodalia S.p.A.

To reflect the new strategic guidelines, the Business Unit was altered at the beginning of 2002 and is now subdivided into two new organizational structures:

- **Information Technology Group (ITG)**
  The companies comprising the ITG Business Unit (IT.Telecom, Telesoft group, Netsiel, Sodalia, Netikos) will be oriented towards increasing efficiency and quality within the framework of service activities directed at all the Business Units of the Telecom Italia Group operating on the market. The companies Saritel and TILAB will also report to ITG.

- **Information Technology Market (ITM)**
  The companies comprising the ITM Business Unit (Finsiel group) will continue to pursue activities geared directly to the external market. This market is made up of central and local administrations moving towards decentralization and e-government, as well as banks and businesses.

■ MAJOR EVENTS/SCOPE OF CONSOLIDATION

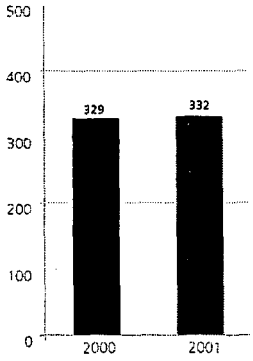
During the year, the first phase of industrial rationalization and corporate reorganization was fully implemented according to homogeneous areas of the Business Unit through the following transactions:

- the sale of Telecom Italia's "Information Systems Development Service" business segment to Telesoft
- the sale of Finsiel's "Applications Software Development Services" business segment to Telesoft
- the sale of the Eis "Services" business segment to Netsiel
- the sale of Consiel's "Health" business segment to Finsiel
- the transfer of the investment in Lottomatica to Finsiel, through the partial, nonproportional spin-off of Sogei. This transaction was aimed at its subsequent listing on the stock exchange, which took place in 2001
- sale of Consiel's "Training" business segment to the Scuola Superiore G. Reiss Romoli

■ ECONOMIC AND FINANCIAL DATA

The following table shows the key results for 2001, compared to those in 2000.

Gross operating profit



(millions of euro)	2001 (A)	2000 (B)	Change (A-B) Amount	Change (A-B) %
Sales and service revenues	2,033	2,138	(105)	(4.9)
Gross operating profit	332	329	3	0.9
% on Revenues	*16.3%*	*15.4%*		
Operating income	162	134	28	20.9
% on Revenues	*8.0%*	*6.3%*		
Investments:				
- Industrial	129	125	4	3.2
- Goodwill	1	1	-	-
Employees at year-end (number)	11,288	12,005	(717)	(6.0)

The trend in sales and service revenues was affected by the new outsourcing contracts signed in 2001 by Telesoft and Netsiel with the Domestic Wireline Business Unit of the Parent Company, completing the corporate spin-offs of Telecom Italia's former information technology function. These contracts, which aim to achieve maximum efficiency at competitive market prices, produced a considerable reduction of revenues in the areas devoted to those activities. However, during the year, profitability gradually improved, both in terms of gross operating profit and operating income.

■ INFORMATION ON OPERATIONS

During the year, operations were marked by a series of initiatives with the following aims:

- ensuring innovation, development and optimum IT-operations within the Group
- developing the range of professional IT services in new and traditional segments of the market
- starting to take action with regard to the organization, governance processes, technologies and expertise necessary for implementing the new IT industrial plan

Finsiel

Finsiel group

Held by: Telecom Italia 77.92%.

The group supplies software and information technology services to the market, particularly the areas of banking, finance and the Public Administration.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	1,209	1,167	3.6
Gross operating profit	168	159	5.7
Operating income	124	107	15.9

Activities during the year:

- development of processes for the administrative and tax decentralization of central and local Public Administrations
- broadening of the range of on-line services in the fields of e-business, e-banking and training
- launch of a range of customized web-based solutions for companies, banks and Public Administrations

telesoft

Telesoft group

Held by: Telecom Italia 60.00%, Finsiel 40.00%.

The group supplies software and information technology services for the Telecom Italia Group.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	525	450	16.7
Gross operating profit	42	35	20.0
Operating income	25	20	25.0

Activities during the year:

- development of activities on behalf of the Telecom Italia Group, partly by creating management processes for the telecommunications network and support systems for marketing

netsiel

Netsiel SpA

Held by: Telecom Italia 68.65%, Finsiel 31.35%.

The company manages Telecom Italia's information technology structures.

The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)
Sales and service revenues	359	63
Gross operating profit	119	20
Operating income	14	3

NB - The data for 2001 are not comparable to those of the prior year.

Activities during the year:

- start-up of the new activity, following the contribution of Telecom Italia's "Information Systems Operation" business segment on December 31, 2000

SODALIA

Sodalia SpA

Held by: Telecom Italia 100.0%.

The company creates innovative software for telecommunications.

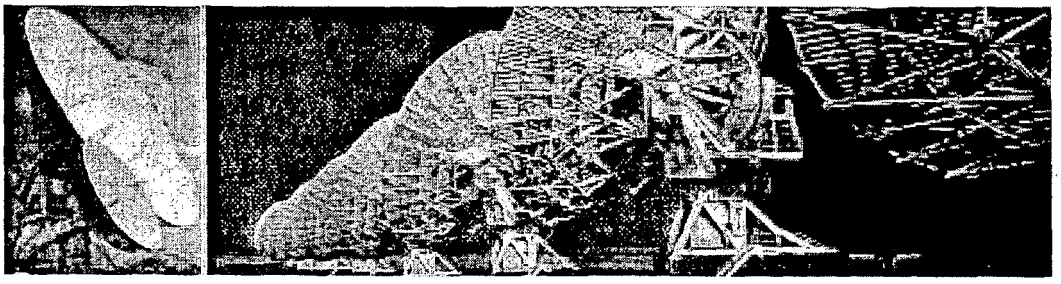
The table shows the key economic highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	21	26	(19.2)
Gross operating profit	6	7	(14.3)
Operating income	2	3	(33.3)

Activities during the year:

- in the wireline area, the most significant project involved the creation of an integrated platform to manage the broadband network, on which work will continue in 2002.

SATELLITE SERVICES



- **Growth in consolidated revenues**
- **Development of operating performance**
- **Focus on multimedia and broadband satellite services**
- **Participation in the most important space projects in Europe**

■ THE STRUCTURE OF THE BU

The "Satellite Services" Business Unit (consisting of the Telespazio group and Telecom Italia's "Satellite Telecommunications" business segment) is responsible for developing satellite communication systems for phone and data, radio and television broadcasting and earth-observation.

SATELLITE SERVICES

National subsidiaries
- Telespazio S.p.A.
- e-GEOS S.p.A.
- Eurimage S.p.A.
- CTM S.C.p.A.

International subsidiaries
- Telespazio Brasil S.A.
- MCS Europe group
- Telespazio Luxembourg S.A.
- Telespazio North America Inc.

■ MAJOR EVENTS/SCOPE OF CONSOLIDATION

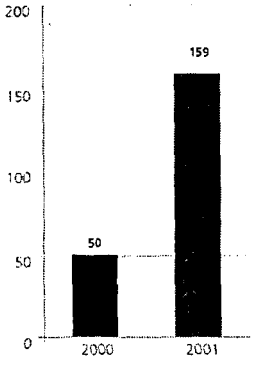
The main corporate events during the year include:
- the suspension of the Astrolink project, a description of which is given below
- the sale of the investments in the Intelsat, New Skies Satellite, Inmarsat and Eutelsat satellite consortiums at the end of 2001

These transactions had no effect on the scope of consolidation.

ECONOMIC AND FINANCIAL DATA

The following table shows the key results for 2001, compared to those in 2000.

Gross operating profit



(millions of euro)	2001 (A)	2000 (B)	Change (A-B) Amount	%
Sales and service revenues	648	340	308	90.6
Gross operating profit	159	50	109	218.0
% on Revenues	*24.5%*	*14.7%*		
Operating income (loss)	60	(52)	112	*
% on Revenues	*9.3%*	*		
Investments:				
. industrial	29	31	(2)	(6.5)
. goodwill	-	-		
Employees at year-end (number)	1,196	1,206	(10)	(0.8)

The positive results of operations in 2001 were influenced by industrial growth and by the early conclusion of the important Astrolink order, as well as the positive trend of the "Media & Communication" and "Space System" segments. More precisely, in the "Media & Communication" segment, the volumes generated by the Television sector partly compensated the fall in volumes of the Telecommunications sector. With regard to space activities, work was stepped up on large international projects. As far as Astrolink is concerned, the difficult economic scenario that emerged from the collapse of the New Economy and the tragic events of September 11 influenced the strategic priorities of Lockheed Martin (majority shareholder and main supplier of Astrolink). The project came to a definitive halt in December, making it necessary to writedown the financial investment. Overall, the negative effects deriving from the Astrolink project were partly absorbed by the gains realized on the sale of shares in portfolio.

INFORMATION ON OPERATIONS

Media & Communication

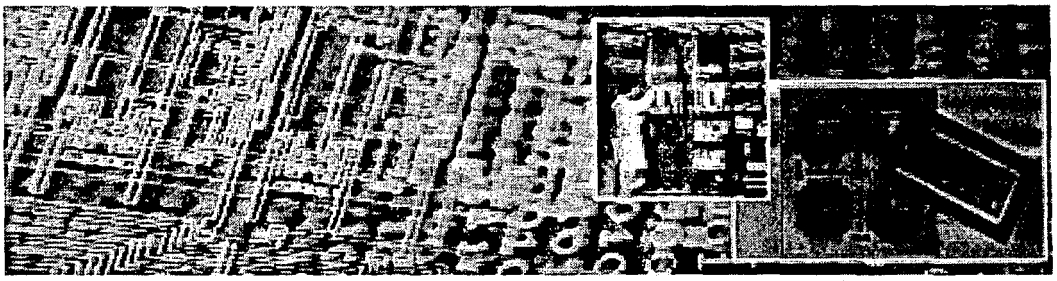
- Start-up of the marketing of multimedia services on the Evolv-e platform. These activities acquire greater importance in relation to the competitive scenario that has resulted from the emergence of new operators and from the transformation of the satellite consortiums Eutelsat and Intelsat into companies
- Continuation of outsourcing activities for the United States Navy, the Ministry of Defense and for the management of a new broadband service for Inmarsat, scheduled to become operational in 2002
- Acquisition of a contract with Unicredito (Xelion) to connect on-line trading stations situated on mobile vehicles which traveled around Italy in 2001
- Consolidation of the FIAT network which currently connects the headquarters in Turin to more than 1,700 dealers located in 17 European countries, for which further expansion is planned
- Acquisition of the services for "Il Sole24Ore", which uses the broadcasting capacity of Skyplex technology on board Hot Bird satellites to broadcast a television channel, a radio channel, an information bulletin about stock-exchange listings (Radiocor) and the pages of its newspaper to printers located nationwide for printing

Space System

- Intensification of activities associated with the major projects currently in progress: Galileo (positioning, navigation and mobile communications system), Cosmo Skymed (the high-resolution earth-observation with both fiber optic and radar systems), SICRAL (the national military satellite telecommunications system) and ARTEMIS (the advanced satellite telecommunications system of ESA, the European Space Agency)

1413

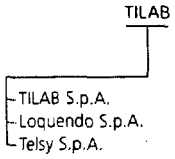
TILAB



- **Creation of TILAB with the contribution of Telecom Italia's "Venture Capital" business segment to CSELT**
- **New projects for the mobile and wireline networks**
- ***Innovative solutions in strategic ICT sectors***
- **Research in areas capable of leveraging synergies for the Group**

■ THE STRUCTURE OF THE BU

The TILAB Business Unit, created from the integration of the technological experience of CSELT and the Venture Capital Management experience of Telecom Italia, identifies and manages innovative initiatives, creating business opportunities both for companies within the Group and for the external market.

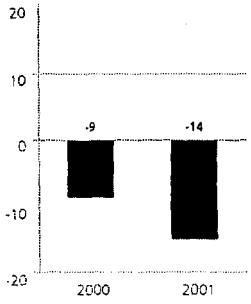


■ MAJOR EVENTS/SCOPE OF CONSOLIDATION

- sale of the business segment devoted to general services and real-estate management to Olivetti Multiservices (OMS);
- formation of Loquendo from the spin-off of vocal technologies;
- acquisition, through Loquendo, of 100% of the share capital of Vocal Point, a California company operating in the field of vocal web, re-named Loquendo Inc.; at the same time, Vocal Point shareholders acquired an approximate 16% stake in Loquendo.
  This initiative, the primary objectives of which were industrial integration, with the development of portfolio of products and an outlet for Loquendo on the North American market, was not successful. Loquendo Inc. was therefore placed in liquidation;
- creation, with the American group Ramius Capital, of the United States Saturn Venture Partners fund for investments in ICT technologies;
- acquisition from SAIAT of 100% of Telsy, a manufacturing company for products and services in computer security systems in TLC;
- reorganization of the investment portfolio through the concentration of Venture Capital investments in foreign subsidiaries, maintaining direct control over industrial investments.

■ ECONOMIC AND FINANCIAL DATA

Gross operatign loss



The following table shows the key results of 2001, compared to those in 2000.

(millions of euro)	2001 (A)	2000 (B)	Change (A-B) Amount	%
Sales and service revenues	134	123	11	8.9
Gross operating loss	(14)	(9)	(5)	(55.6)
% on Revenues	-	-		
Operating loss	(34)	(34)	-	-
% on Revenues	-	-		
Investments:				
- Industrial	16	33	(17)	(51.5)
- Goodwill	6	-	6	*
Employees at year-end (number)	1,422	1,287	135	10.5

Despite the difficulties associated with the repositioning of activities within the Telecom Italia Group and the fall in orders on the part of certain functions of the parent company, revenues increased by 8.9%, thanks to the growth in demand by TIM and the growth in non-captive activities. The deterioration of the gross operating loss (-55,6%), on the other hand, was caused by the considerable increase in the consumption of raw materials and outside services, and by the increase in labor costs, due essentially to a rise in the number of employees (+10.5%), and partly the result of the acquisition of Telecom Italia's "Venture Capital" business segment.
The operating loss, despite benefiting from lower operating costs, remains unchanged compared to the prior year.

■ INFORMATION ON OPERATIONS

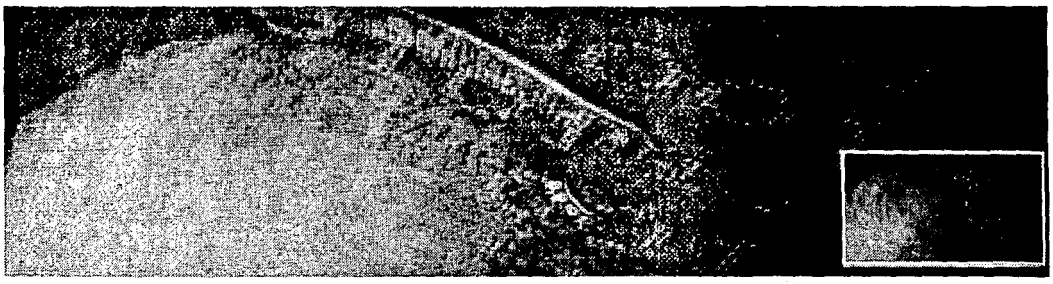
The activity of the Business Unit, which focuses on R&D and which also involved the start of cooperation with Pirelli Labs and with suppliers of strategic importance for the Telecom Italia Group, included:
- the study of qualified techniques in mobile and fixed sectors
- the definition of tools for network design, planning and management
- the definition and testing of local access techniques
- the development of solutions, products and architectures that can be integrated in silicon
- the development of modular products, developed as software and which can be transformed into firmware for special solutions or hardware components
- the creation of the first prototypes of intelligent aerials and passive filtering systems for UMTS
- the refinement and multi-lingual extension of techniques for voice synthesis and voice recognition

The most significant achievements in 2001 include:
- An experimental fiber optic automatic routing network (ASON/GMPLS), able to automatically activate optic connections (wavelengths) whenever the need arises (the Optical transport network for the new Internet). Furthermore, in the field of optical networks a measurement system has been developed to characterise the polarisation dispersion of single-mode optical fibres. Both projects are essential in terms of the cooperation begun with Pirelli Labs.
- Definition of analytical models for dimensioning the radio resources of a *GSM/GPRS* cell

shared by voice and data services, and for characterizing data traffic. Models were also created for dimensioning the access network and the *UMTS Core Network*.

- Consolidation of the NETPLANNER platform, to dimension various network structures and carry out the resulting technical and economic assessments, and the NETCOST platform, which can analyze the actual and incremental costs of services supplied by the telecommunications network.
- Creation of a platform to locate mobile land-based terminals based on in-house technology.
- Creation of the AMICO platform, which can create and manage Instant Messaging (or chatting) services. The platform, which has been adopted by TIM, is particularly innovative because it integrates mobile access.
- Definition of the business models and the relative reference architectures for the Content Delivery Network. In addition, the CDN Services Center was designed with the aim of offering innovative content distribution (policy definition/enforcement, configuration, monitoring, reporting) in a multi-Content Provider logic to Networks/Service Providers.
- Reproduction of the JADE platform, formerly completely developed by TILAB, in a *light* version known as JpL (JADE powered by LEAP), and subsequently transferred to a mobile platform (iPaq).
- Development of the *JoeXpress* platform, in the field of the development of MPEG, a service which will become operational in June, and *Movida*. In the same field, the *Easy Video Platform* proposal was designed to supply audiovisual services on mobile systems.
- With reference to the VIPLibrary system (System on Chip) the new product *VIPlatform* was launched, making it possible to produce complete simulations of ICT systems (for example: complete transmission and reception chains for Level 1 UMTS, data compression and de-compression).

OTHER OPERATIONS



- **Rationalization of the "Real Estate" function**
- **Enhancement of the Stream package**
- **Creation of the single decoder**

With regard to the "Other operations" of the Telecom Italia Group, there follows a description of the key highlights of the "Real Estate and General Services" business segment, the company Stream and the financial companies Softe and Sogerim.

■ REAL ESTATE AND GENERAL SERVICES

The "Real Estate and General Services" segment provides *asset and property management* services and leverages the value of the real estate properties of the Group, carries out the project design and work on properties and provides *project and facility management*.
The BU comprises the internal structures of Telecom Italia (Telecom Italia's Real Estate and General Services business segment), as well as the consolidated companies Emsa, Telimm and Immsi and the affiliates Im.Ser and Telemaco Immobiliare. The two latter companies became operational from December 1, 2001 and from May 1, 2001, respectively, following the real-estate spin-off transactions carried out by the parent company Telecom Italia at the end of 2000.
The economic performance of the segment, the revenues of which were affected by adjustments to the corporate pricing system to agree with the best market conditions, can be summarized as follows:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	953	980	(2.8)
Operating costs	809	836	(3.2)
Gross operating profit	145	147	(1.4)
% on Revenues	*15.2%*	*15.0%*	
Operating loss	(65)	(55)	(18.2)

The above data takes into account the exchanges between the Real Estate function and General Services and the other functions of Telecom Italia S.p.A..

■ SUBSIDIARIES

Softe S.A.
Held by: Telecom Italia 99.99%, Saiat 0.01%.
In 2001 Softe and Sogerim provided financial support to the companies in the Telecom Italia Group on international markets.

As far as Softe is concerned, because of the uncertainty surrounding the macro-economic situation which emerged during the year and became more serious in the last months of 2001 as a result of the tragic international events, and which also caused a high level of instability on all the financial markets, it was decided to writedown the stocks and bonds portfolio for a total of US $193 million.

This led to a loss for the year 2001 of US $192 million (compared to a profit in 2000 of US $25.3 million).

Sogerim S.A.
Held by: Softe 99.95%, Saiat 0.05%.
As far as Sogerim is concerned, in the first half of 2001, within the framework of the plan to reduce the debt exposure of the Telecom Italia Group, notes were issued for a total of euro 8.5 billion, subdivided as follows:
- euro 2.5 billion that can be converted into TIM or Seat Pagine Gialle ordinary shares, which expire on March 15, 2006 (the noteholder has the option of redeeming the notes prior to March 15, 2004);
- euro 6 billion subdivided into three tranches of between euro 1.3 billion and euro 2 billion, respectively, which expire on April 20, 2004, at a variable rate of interest, and on April 20, 2006 and April 20, 2011, at a fixed rate of interest.

The year ended with a loss of euro 61 million (euro 0.3 million in 2000).

Saiat S.p.A.
Held by: Telecom Italia 100.0%.
During 2001, in addition to its traditional activities of providing support to Telecom Italia in the financial sphere and in the management of its investments, the company began to operate as a servicer (under Italian Law 130/99) within the framework of the securitization program for trade accounts receivable undertaken by Telecom Italia S.p.A..

■ AFFILIATED COMPANIES

Stream S.p.A.
Held by: Telecom Italia 50.00%.
The company operates in the Pay TV sector.
In February 2002, Telecom Italia reached an agreement with News Corporation and Vivendi Universal/Canal+ for the sale of its 50% holding in Stream. The agreement, which is subject to the approval of the competent Italian authorities, involves the simultaneous sale of 50% of Telecom Italia to News Corporation and the acquisition of 100% of the share capital of Stream by the French group Vivendi Universal.
The price of the sale of the 50% stake in Stream owned by Telecom Italia was fixed at US $ 42 million. When the sale will be concluded, Telecom Italia will waive its rights to the trade accounts receivable from Stream of approximately US $80 million. The economic effects of the transaction have already been considered in the extraordinary provisions set aside in the financial statements.
The following table shows the key economic and financial highlights:

	2001 (millions of euro)	2000 (millions of euro)	Change (%)
Sales and service revenues	250	147	70.1
Gross operating loss	(286)	(238)	(20.2)
Operating loss	(475)	(344)	(38.1)

Activities during the year:
- better package offers including the Calcio channel and three new theme-oriented channels (MT Channel, Stream Verde and Fox News)
- acquisition of the broadcasting rights for all the matches of the Uefa Champions League for seasons 2001-2002 and 2002-2003, and the rights to Bologna Calcio starting in season 2001-2002
- creation of the "single decoder"

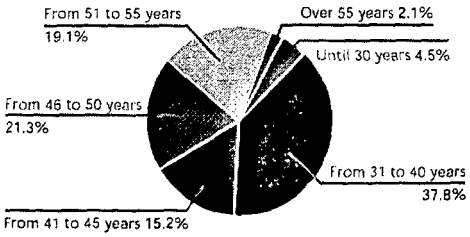
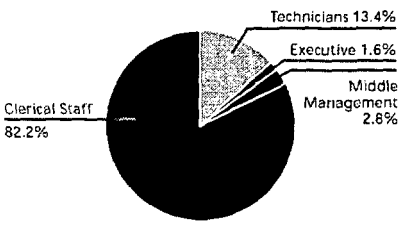
(*) Restated to give effect to the consolidation of Nortel Inversora group using the equity method instead of the proportional consolidation method

At December 31, 2001 employees numbered 109,956, with an increase of 2,785 compared to the restated 2000 figures, deriving from the change in the scope of consolidation and, with a decrease due to the effect of employee turnover mainly at Telecom Italia.
With regard to employee turnover, the principal component is the reduction in the employees of Telecom Italia S.p.A. (see table below).
The change in the scope of consolidation mainly refers to the International Operations Business Unit (in which the most significant variations took place: the exclusion of the Nortel Inversora group in Argentina with -7,498 persons and the entry of Entel Chile with +4,681 persons), Mobile Services (new companies in Brazil) and Internet and Media (increases in media and information technology activities), resulting in a final total which is substantially unchanged in terms of numbers (equal to 0.1%).
The following graph shows the number of employees of Telecom Italia S.p.A. by age-group and professional category:

Distribution by age



Distribution by professional



TELECOM ITALIA

Employees at December 31, 2000	Employees at December 31, 2001	Change	Hired	Terminated employment	Transferred to other Group companies
66,541	61,081	(5,460)	795	(5,562)	(693)

■ DEVELOPMENT / TRAINING

In 2001, development and training activities refer to the following areas:
- management topics: economics, technological and market scenarios, customer relationship management, teamwork and change management;
- special topics: TLC systems design, sales techniques, call center management, network design, data networks, network help desks, SAP.

In particular, in order to develop the new professional skills associated with the Internet, the project "Development of Professional Internet Skills" was launched, with the aim of selecting, training and developing talented high school and university graduates in order to meet the needs of the Business Units and the companies in the Group. Within the framework of this initiative, 3 crash program courses were held, involving 300 young employees (126 university graduates and 174 high school graduates), for a total of 145,000 participant /hours in the classroom and 106,000 participant/hours of on-the-job training.

■ INDUSTRIAL RELATIONS

The industrial relations of the Group mainly covered the following areas:

Employment
- on February 16, an agreement was signed with the labor unions according to which 300 new high school graduates and new university graduates were recruited by the Group under on-the-job training contracts for the Internet profession;
- on March 5, the agreement was signed for a return to work of 600 employees who had been laid off under government unemployment compensation programs, concluded with the agreement reached to layoff 1,522 employees on September 6;
- on September 12, in Naples, the first of the call centers under the March 28, 2000 reorganization agreement was established, with the setting up of the company Telecontact Center. Under the agreement with the labor unions, the National Labor Contract for Telecommunications will be applied and 450 young people will be hired under on-the-job training and employment contracts.

Corporate reorganization
- In keeping with the strategy established in the "Development and Reorganization Plan", activities continued to focus on the core business of telecommunications through the following transactions:
  - sale of the business segment that deals with the printing of Telecom Italia telephone bills to Printel;
  - sale of the "Fleet Management" business segment to Savarent Fleet Services (with effect from March 1, 2002).
- Organization units were decided for the various companies according to their mission.

National contract for Telecommunications and profit bonus
- On July 16, Telecom Italia and the labor unions reached agreement about the application of the National Labor Contract (in force at Telecom Italia since October 1, 2000) and the relative company labor agreements. Similar agreements were reached with regard to TIM, Telecom Italia Lab, Telespazio, Telesoft and Sodalia.
- On July 16, agreements were reached about the amounts of the profit bonus to be paid in 2001 for Telecom Italia. Agreements about a profit bonus were also signed for TIM, Telesoft, Telespazio, Telecom Italia Lab, Sodalia, Netsiel, Finsiel, Sogei and Saritel.
- On December 22, agreements were reached with the labor unions to apply the National Labor Contract for Telecommunications to Atesia.

Labor union rights
- On October 9, agreement was reached to set up Unitary Union Representatives in Telecom Italia. The subject of permission slips for union business was defined in the agreement of November 28, 2001.

Foreign subsidiaries

- On June 7, agreement was reached between Entel Bolivia and the national labor unions for the renewal of the collective national labor contract. The agreement introduces a bonus calculated on the basis of the EBITDA, reviews the levels of the long-service mechanism and advocates flexible working hours and incentives to reduce the workforce.

■ STOCK OPTION PLANS

On July 27, 2001 the Board of Directors approved a Stock Option Plan involving approximately 1,400 executives and middle management employed by companies in the Group, selected on the basis of special responsibilities and/or expertise.
This initiative follows those already begun in 1999 and 2000 and described in the notes to the financial statements of those years.
The common factor to all these initiatives is the assignment of personal and non-transferable *inter vivos* rights that can be used to purchase an equal number of new Telecom Italia ordinary shares against payment. The 2001 plan - which does not involve employees of the TIM and SEAT groups which, since the companies are listed on the stock exchange, have already launched their own Stock Option Plans - led to the assignment of No. 67,025,000 options to purchase shares at the price of euro 10.488 (equal to the arithmetic average of the official prices of Telecom Italia ordinary shars on the screen Trading Market organized and managed by Borsa Italiana S.p.A. during the period June 27, - July 27, 2001). The exercise of the options, which are subdivided into two separate lots, each equal to half the options attributed, is subject to the achievement of performance parameters correlated to the best average trend of Telecom Italia shares compared to that of the Dow Jones EuroStoxx TLC share index in certain periods. However, the achievement of the parameters relating to the second lot mean that the options in the first lot can be exercised.
In compliance with the recommendation contained in Consob Communication No. 11508 of February 15, 2000, the following table summarizes the key features of the Stock Option Plan in force in 2001:

	2001 Plan			2000 Plan			1999 Plan		
(Amounts in euro)	Number of options	Exercise price	Market price	Number of options	Exercise price	Market price	Number of options	Exercise price	Market price
Rights existing at 1/1/2001	-	-	-	51,430,000	13.815	11.902	11,411,500	6.791	11.902
New rights assigned during the year	67,025,000	10.488	10.702	-	-	-	-	-	-
Rights exercised during the year	-	-	-	-	-	-	1,496,350	6.791	11.904
Rights expired and not exercised during the year	-	-	-	-	-	-	-	-	-
Rights expired during the year due to termination of service/other reason	575,000	10.488	9.076	860,000	13.815	11.590	68,500	6.791	11.426
Rights existing at 12/31/2001	66,450,000	10.488	9.713	50,570,000	13.815	9.713	9,846,650	6.791	9.713
of which exercisable at 12/31/2001	-	-	-	15,173,333	13.815	-	4,258,550	6.791	-

Plan	Exercise price (in euro)	Number of rights assigned at December 31, 2001 and exercisable from 2001	2002	2003	Total	Maximum duration of options
1999	6.791	4,258,550	5,588,100	-	9,846,650	3 years beginning from each year
2000	13.815	15,173,333	15,173,333	20,223,334	50,570,000	5 years beginning from each year
2001	10.488	-	33,225,000	33,225,000	66,450,000	5 years beginning from each year

As far as the 2000 plan is concerned, because the exercise price is approximately 40% higher than the current price of the shares, a new plan is being drawn up for executives who were assigned options and are still working for the company, subject to their voluntary relinquishment of the 2000 plan, with the aim of recapturing the goals of management incentives and retention which are fundamental to stock option plans.

RESEARCH & DEVELOPMENT

In addition to what has already been described in the section about the TILAB BU, there follows a description of the key activities of the Telecom Italia Group with regard to Research & Development.
In 2001, most of the R&D activities of the Telecom Italia Group were conducted by TILAB by its 1,080 employees.
The activities involved research and testing in the field of fixed, mobile and Internet telecommunications. Particular attention was devoted to the study of qualified techniques (radio-locating, messaging and multimedia services), the definition of tools for network design, planning and management, the definition and testing of local access techniques, and the development of solutions, products and architectures that can be integrated in silicon. Significant results were achieved in this sector with regard to the ADSL access modem and IP networking (network processor). The overall R&D costs incurred during 2001 amounted to approximately euro 138 million. The total of grants and low-interest loans to support R&D costs, already received or awaiting receipt by TI Lab, amounted to approximately euro 10 million.

CHANGEOVER TO THE EURO

In 2001, the Telecom Italia Group carried out the necessary action to bring the information systems in line with the new single currency. This was achieved in two phases:
- during the first nine months of 2001 the first phase involved changes and the expansion of the software and data structures of all the procedures involved, both within the Group and in its external dealings;
- during the last quarter (final phase) contingency plans were created and tested and an "Independent verification and validation" of the most important corporate systems was carried out through suppliers, methodologies and tools that are different from those used in the adaptation phase, in order to highlight any problems in time for them to be corrected.

CORPORATE GOVERNANCE

Supporting the principles of corporate governance recommended by Borsa Italiana S.p.A. is a fundamental decision for the Telecom Italia Group which, during 2001, continued with the procedure of gradually improving the present system, paying continuous attention to matters of transparency and comparison with the best practices.
There follows a summary of the how the governance systems of Telecom Italia S.p.A. effectively work:

■ THE MARKET

In 2001, the Company organized eight formal meetings with the market (for analysts, institutional investors, and members of the national and international specialist Press). They included conference calls, road shows and Press conferences, as well as the annual meeting held in Florence on February 4 and 5, and the provision of copious amounts of detailed information disseminated through press releases and the publication of institutional documentation (periodical compulsory and voluntary reports, such as the social and environmental report, information about shareholders' meetings and individual transactions conducted on the market).
The constant aim, one that will apply equally in the future, was to ensure a supply of efficient, continuous, timely information to the financial market, resorting to the most suitable tools and adopting special organizational solutions for the purpose. In this connection, it should be mentioned that the Investor Relations function has been entrusted to an autonomous Central Function, the mission of which extends to the Group as a whole, while the special section of the corporate website *www.telecomitalia.it* was recently enhanced and its content updated with the aim of meeting ever-more sophisticated information requirements.
The Board of Directors has not yet adopted a formal procedure for communicating documents and information concerning the Company, and particularly price sensitive information, to the outside world. Furthermore, the subject is governed by a consolidated practice, which has been shown to be functional to corporate requirements. The process of defining the content of information which must be communicated to the market involves the Central Functions of "Investor Relations", "Communication and Image" and "Corporate and Legal Affairs" of the company, together with the supervision by top management and the support of the structures which, from time to time, are in possession of the necessary information. Within this framework, from an organizational point of view, relations with the media are entrusted to a special structure operating within the Central Function of "Communication and Image", which acts in association with the corporate information office that relays information to Borsa Italiana S.p.A. (which is the Central Function of "Corporate and Legal Affairs") with the aim of verifying that the obligations laid down by governance standards are observed.

■ SHAREHOLDERS'

Meetings

During 2001 the rules concerning shareholders' meetings approved by the Ordinary Shareholders' Meeting of October 20, 2000, and laid down in Article 20, last section, of the corporate by-laws, was applied for the first time.
The ordinary shareholders met three times (on May 3, June 12 and November 7[1]);

1 The above-mentioned Shareholders' Meetings discussed the following matters respectively:
- May 3, 2001 – conversion of the share capital into in euro, authorization to launch an offer for the conversion of savings shares into ordinary shares against payment and to buy-back ordinary shares;
- June 12, 2001 – financial statements, appointment of a Director, review of the salaries of Directors and Statutory Auditors, review and appointment of the audit firm, authority to increase the share capital for the purposes of stock option plans and to issue notes, other changes to the by-laws;
- November 7, 2001 – election of the new Board of Directors, authorization for the purchase and acquisition and the subsequent disposition of treasury stock, a payment supplement based on the actual figures for the auditors' work in 2000, transfer of the registered office and other changes to the corporate by-laws.

savings shareholders also met once (on October 31) to appoint the common representative, leading to the election of Professor Carlo Pasteris.
As usual, the meetings provided an opportunity for dialogue and comparison between management and the shareholders, however, this was conducted in full respect of the standards about the dissemination of price sensitive information.

Shareholder pacts

It is well-known, since it was communicated on a timely basis to the market in accordance with current laws, that a series of shareholder pacts have been reached containing, amongst other things, important clauses concerning the composition and the resolutions of Telecom Italia's Board of Directors.
The above-mentioned agreements were made among the shareholders of Olimpia S.p.A. (Pirelli S.p.A., Edizione Holding S.p.A. - Edizione Finance International S.A., Unicredito Italiano S.p.A. and IntesaBCI S.p.A.), which holds approximately 28.7% of the share capital of Olivetti S.p.A., the parent company of Telecom Italia.

■ BOARD OF DIRECTORS

Composition

Following the resignation of most of the Directors, and the consequent discharge from office of the whole Board, the Ordinary Shareholders Meeting of November 7, 2001 elected a completely new Board, fixing the number of Directors at 15 (Gilberto Benetton, Enrico Bondi, Carlo Orazio Buora, Umberto Colombo, Francesco Denozza, Luigi Fausti, Guido Ferrarini, Paolo Maria Grandi, Natalino Irti, Gianni Mion, Massimo Moratti, Carlo Alessandro Puri Negri, Pier Francesco Saviotti, Marco Tronchetti Provera, Roberto Ulissi) and establishing that the Board will serve for a three-year term.
According to the terms of Article 10 of the corporate by-laws, the appointment was made through a ballot based on lists of candidates which were published prior to the meeting and deposited at the registered office by the shareholders presenting the lists, together with the *curricula vitae* of the people concerned.
The mechanism ensured the presence of three Directors chosen by minority shareholders, who are to be regarded as independent (Umberto Colombo, Francesco Denozza and Guido Ferrarini); furthermore, the Minister of Economy and Finance, in a decree agreed with the Ministry of Production, appointed Roberto Ulissi as a Director of the Board – in compliance with the special powers described in Article 5 of the corporate by-laws – who is also to be regarded as being independent. The following Directors chosen from the list put forward by the majority shareholders are to be regarded as being independent (since they are not majority shareholders, neither do they belong to the above-mentioned shareholder pacts, nor do they have economic relations that would affect their independent judgement with regard to the Telecom Italia Group, the executive Directors, the majority shareholder or the various parties of the shareholder pacts): Luigi Fausti and Natalino Irti.
In the light of the powers that were assigned (see specific paragraph), the executive Directors are the Chairman Marco Tronchetti Provera and the Managing Directors, Enrico Bondi and Carlo Orazio Buora.

Activities and granting of powers

In 2001, the number of meetings of the Board of Directors totaled 18 (three of which took place after the board was renewed), with a consistently high attendance record by the Directors and Statutory Auditors.
In the absence of any indications in the by-laws as to the timing of the meetings, eight meetings have initially been planned for 2002, at general dates communicated to the market as regards corporate events for the dissemination of economic and financial data. The number of meetings planned has been established with a view towards reorganizing the operating activities through the adoption

1424

of specific organizational[2] solutions which, disciplining responsibility and operating procedures, make it possible to plan work more effectively, thus emphasizing the Board's role of guidance and supervision over the general operations of the company, which are continuously coordinated and run by the executive Directors and management.
In view of the regularity of the meetings, the information due to the Directors, the Board of Statutory Auditors and the Board of Directors from the executive Directors has usually been provided during the course of the Board meetings.
A specific procedure is in the advanced stages of preparation to ensure the completeness and effectiveness of the information flows, also to comply with art. 150, sec. 1, of Legislative Decree No. 58/1998 (see specific paragraph).
This mechanism could also prove to be useful for a effective preparation of the board meetings, insofar as this will allow the Directors to be kept continually and systematically abreast of basic information that will be supplemented by other elements before each single meeting. The need for preliminary information, in fact, will continue to be met, as in the past, by sending the Directors and Statutory Auditors the specific information covering the matters for business on a timely basis, as stated in the Code of Self-discipline of the Company
After the aforementioned Shareholders' Meeting of November 7, 2001, the Board of Directors granted powers within its board as follows:

- to the Chairman Marco Tronchetti Provera (legal representative of the Company), all necessary powers were assigned to carry out all the acts pertaining to corporate activity in its various forms, with certain exceptions as regards the power to issue personal and real guarantees (where the signature of the Chairman must be joined by that of a Managing Director, for obligations in excess of single amounts of euro 100 million in the interest of the subsidiaries and the same Telecom Italia as regards real guarantees, or in excess of single amounts of euro 40 million in the interest of third parties) and investments and acts to dispose of, for any reason, investments in subsidiaries and affiliated companies, as well as companies or businesses thereof (where the limit for each transaction is equal to euro 250 million). The Chairman also has emergency powers regarding matters under the Board of Directors' responsibility, the task of reporting to the Board of Statutory Auditors in the manner and under the terms required by art. 13 of the by-laws, the delegation of power to take charge of the management of confidential information and ensure the functioning and adequacy of the internal control system;
- to the Deputy Chairman Gilberto Benetton, signature powers and legal representation of the Company has been assigned, before third parties and in legal cases, in the event of the absence or the impediment of the Chairman;
- to the two Managing Directors, Enrico Bondi and Carlo Orazio Buora, full operating powers have been assigned, with limits in amount differentiated according to the area (the general limit for commitments is currently established at euro 100 million for each transaction). Both Managing Directors have signature powers and can legally represent the Company, before third parties and in legal cases, as stated in the by-laws.

The Board of Directors has also

2 For example, mention should be made of the creation of a Steering Committee to define the direction and strategic guidelines for management of the foreign investment holdings of the Group, an Investments Committee for the approval of investments/disposals over a preaset limit, diversified based on the type of transaction (according to the manner established by specific procedures), as well as Business Management Meetings (one for each Business Unit/Operating Activity) to check the results achieved, the analysis of forecasts/operating performance, the determination of action plans and the monitoring of projects. These are stable bodies for affiliation, coordination and planning, that include the presence of executive Directors and management responsible for the business and corporate structures involved in these areas.

emphasized the principle that all the aforementioned powers shall be exercised in accordance with the limits of the applicable laws (in areas where such powers have not been delegated by the Board of Directors), as well as the principles and the limits (especially with regard to those reserved for the Board of Directors) envisaged by the Code of Self-discipline of the Company, in this consistent with the Code drawn up by the Corporate Governance Committee of the listed companies (so-called Preda Code). In summary, as stated in the Code of Self-discipline of Telecom Italia, the Board of Directors is reserved powers for the adoption and revision of the rules of corporate governance, the strategic industrial and financial plans, the budget and summary documentation, the investments and divestitures of more than Lire 500 billion (euro 258.2 million), the operations (including the acquisition and divestiture of direct and indirect controlling investments) that are particularly important economically or strategically, with particular reference to related party transactions, the assignment of powers and the definition of the relative limits and manner of reporting, the assignment of the posts and positions in the subsidiaries with annuals sales equal to or more than Lire 2,000 billion (about euro 1,033 million), the eventual appointment of general managers, the determination of the remuneration paid to the Directors with specific responsibilities, the supervision of the trend in operations and the verification of the adequacy of the general organization and administration of the Company and the Group. The identification of the transactions to be jointly examined and approved by the Board is taken on the basis of the materiality of the amount (the value of the investment or divestiture involved), in addition to a qualitative analysis of the effect of the transaction on the financial statements or prospects of the Company and the Group (economic or strategic importance). The solution adopted avoids a detailed list of the transactions reserved for the Board of Directors, susceptible to a rigidness in the functionality of the managerial activity; using this rationale, it becomes clear why the inclusion of "transactions" involving the acquisition or divestiture of investments with direct or indirect control has merely been given as an example.

■ INTERNAL COMMITTEES

The Board of Directors in office has two Committees with controlling and consulting functions: a Committee for Internal Control and Corporate Governance and a Directors' Remuneration Committee. It was decided not to set up a committee to propose candidates, because, at this time, there was deemed to be no need, since the by-laws cover this question, and also in view of the current shareholder base of the Company.

Committee for internal control and corporate governance

The Committee for Internal Control and Corporate Governance is composed of the Directors Roberto Ulissi (Chairman), Guido Ferrarini and Natalino Irti, thus ensuring its utmost independence. The Chairman of the Board of Statutory Auditors, and often the entire Board of Statutory Auditors participates in the work of this Committee. The Committee – in close cooperation with the Board of Statutory Auditors – essentially

- evaluates the adequacy of the internal control system;
- evaluates the work plan prepared by those in charge of internal control and receives reports from the same periodically;
- evaluates the proposals formulated by the independent audit firms in order to be appointed as auditors as well as the audit work plan and the results expressed in the letter of recommendations. To this end, as advised by the Board of Directors, the Committee monitors the manner of application of accounting principles;
- informs, the Board, at least every six months, at the time of the approval of the annual financial statements and six-month financial statements, about the work carried out and the adequacy of

the system of internal control;
- monitors that the rules of corporate governance are followed and periodically updated.

In 2001, the Committee for Internal Control and Corporate Governance formally met six times, meeting – among other things – with representatives of the firm in charge of the audit and management.
Between the end of 2001 and the beginning of 2002, the Committee reviewed the theoretical-legal issues and the operating implications connected with fulfilling the disclosure obligations to the Board of Statutory Auditors as stated in art. 150 of Legislative Decree No. 58/1998 and the related Consob regulation, conducting a preliminary examination of the draft of the aforementioned internal procedure, aimed at ensuring the completeness and effectiveness of information flows from the Directors to the Board of Statutory Auditors and from the executive Directors to the entire Board of Directors. Such procedure is being drawn up on the basis of in-dept studies conducted by an inter-department working group assisted by authoritative consultants.
In the meetings held in 2002, the Committee approved the organizational decision to concentrate the internal audit activities of Telecom Italia and its subsidiaries TIM and Seat, in a specific consortium company, which, in February led to the creation of In.Tel.Audit - Società consortile a r.l..
The project – to which the Board of Statutory Auditors is also in agreement – led to the repositioning and reorganization of the system of internal control (of which internal audit is an essential component), which has assumed characteristics of greater sophistication also to take into account the objective complexity of the Group (at the same time evaluating the professional resources within), in addition to the new requirements set forth by Legislative Decree No. 231/2001 with regard to the administrative responsibility of the entities with resepct to the offenses committed by its associates. The revision of the entire system is still underway (especially with reference to identifying the persons to be in charge), but the Committee has at this time deemed that it can be considered adequate, an evaluation that was shared by the Board of Directors at the time of approving the draft 2001 financial statements. At that time, the Committee agreed with the Company concerning the adoption of a Code of Ethics which is currently under study.

Directors' Remuneration Committee

The Directors' Remuneration Committee is also largely composed of independent Directors. Sitting on the Committee, in fact, are the Directors Luigi Fausti (Chairman), Umberto Colombo and Pier Francesco Saviotti.
As is the practice, the Remuneration Committee is in charge of formulating a proposal for the remuneration of the Directors who hold specific responsibilities, establishing that a significant part of the amount be subject to having reached the budget targets.
Furthermore, as in the past, as part of the review of the proposal by the Board, to determine the criteria for the remuneration of top management of the Company, the Committee has been charged with the analysis of the issues connected with the stock option plans.

■ BOARD OF STATUTORY AUDITORS

As you know, the Board of Statutory Auditors of Telecom Italia (renewed on July 3, 2000) is composed of five Acting Auditors (Paolo Germani - Chairman, Mario Boidi, Paolo Golia, Fabrizio Quarta and Gianfranco Zanda), of which two (Paolo Germani – Chairman and Fabrizio Quarta) are appointed by the government and one (Paolo Golia) was elected from the list presented by the minority shareholders. At the time the lists were registered, in accordance with the Code of Self-discipline, the curricula vitae of the candidates were also made available.

The Board met in 2001 for a total of 29 times, in addition to numerous preliminary and in-depth meetings with management, participation in the work of the Internal Control and Corporate Governance Committee and other institutional commitments envisaged by existing laws.

During the course of its work, the Board, as set forth by art. 149 of Legislative Decree No. 58/1998, monitored the observance of the law and the by-laws, the following of correct administrative principles, the adequacy of the organizational structure of the Company for the part that regards its responsibility, the internal control system and the administrative accounting system.

In light of Consob Communication No. 1025564 dated April 6, 2001 regarding the contents of the report of the Board of Statutory Auditors to the Annual General Shareholders' Meeting, a coordination effort was suggested with the controlling bodies of the other listed Group companies, in close cooperation with the Board of Statutory Auditors of the parent company Olivetti S.p.A.. Moreover, in agreement with the Committee for Internal Control and Corporate Governance, as well as the Offices of the Company, an in-depth study was initiated on the subject of the disclosure obligations set forth in art. 150 of Legislative Decree No. 58/1998 and the relative Consob regulation.

SOCIAL AND ENVIRONMENTAL AWARENESS

The Telecom Italia Group publishes a Sustainability Report which describes and evaluates the activities conducted to benefit the main stakeholders through specific indicators and based on the most reliable international standards, which are described below:

- **customers/consumers**, based on the CEP (Council of Economic Priorities) criteria
- **suppliers**, based on the SA 8000 Index
- **future generations**, based on the GRI (Global Reporting Initiatives) guidelines
- **the Community**, based on the guidelines of the London Benchmarking Group
- **employees**, in the light of the Human Development Enterprise (HDE) model
- **shareholders**, in the light of the Dow Jones Sustainability Group Index, the Ftse4good and the SIRI.

By publishing this document, the Group is completing its reporting system by making an integrated economic/financial, social and environmental report ("triple bottom line") about its activities.
Through the tool of the Sustainability Report, the Group confirms its earnest wish to strive towards sustainable development and the creation value within a framework of social and environmental responsibility. The reliability of the data, the completeness and exhaustive detail of the information contained in this document have been confirmed by the independent opinion expressed by Reconta Ernst & Young.
There follows a description of the key data and the most significant information taken from the Telecom Italia Group's 2001 Sustainability Report.

■ CONSUMERS

The main results of 2001 revealed a high degree of customer satisfaction:

- 87.5% of "Residential" customers and 86.2% of "Business" customers were satisfied by the regular functioning of fixed telephone lines in Italy;
- 89% of customers were satisfied with the quality of the mobile phone network in Italy.

■ SUPPLIERS

The services produced and distributed to the Telecom Italia Group are supplied by companies that are already highly qualified (through subscription to professional registers, SOA declarations and ISO certifications) and for some product sectors regarded as being at risk, are monitored in terms of Vendor Ratings and subjected to incoming quality controls.

■ FUTURE GENERATIONS

Environmental performance is assessed by means of various indicators which make it possible to monitor environmental impact and improve management. There are four main indicators:

- waste management, of which 85% is sent for reuse and recycling processes;
- consumption of natural resources and energy, which is lower than in 2000;
- the quality of the air and the climatic changes which have evolved positively;
- electro-magnetic emissions which are kept systematically under control.

The Group is active in the preparation of "Environmental Management Systems":

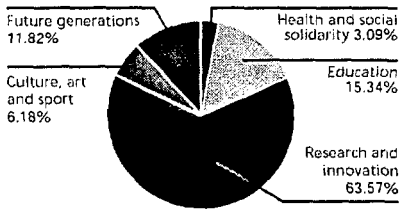
- in 2001, the Domestic Wireline Network Business Unit started to produce its own Management System, in compliance with the UNI EN ISO 14001 International Standard, which will be incorporated within the Quality Management System;
- the Mobile Services (Northwest Network) Business Unit implemented a Management System for Quality and the Environment with the aim of obtaining the ISO 9001 certification for Quality and the ISO 14001 certification for the Environment;
- the TILAB Business Unit obtained the certification from DNV for its Environmental Management System, which was developed in compliance with the UNI EN ISO 14001 International Standard.

■ COMMUNITY

The contribution of the main companies in the Group to the Community in 2001 was estimated at euro 77,212 thousand (equal to approximately 1% of the operating income of the Group), in line with the values reported in 2000.

(thousands of euro)	2001	2000
Future generations	9,132	13,441
Research and innovation	49,087	38,773
Education	11,840	5,540
Health and social solidarity	2,384	3,397
Culture, art and sport	4,769	12,702
	77,212	**73,853**

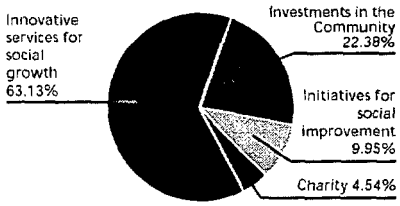
Distribution of the social and environmental contribution of the Telecom Italia Group
(euro 77.212 million)



The reclassification of this contribution according to the model of the London Benchmarking Group (which uses the pyramid diagram from the bottom to the top to measure the benefits and business returns deriving from the various activities in temporal terms) can be summarized as follows:

London Benchmarking Group Model
(millions of euro)

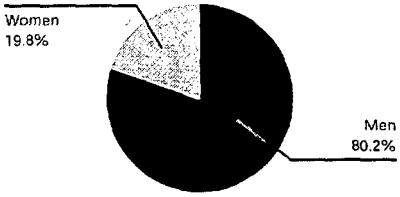
Distribution of the social and environmental contribution of the Telecom Italia Group (LBG model)
(euro 77.212 million)



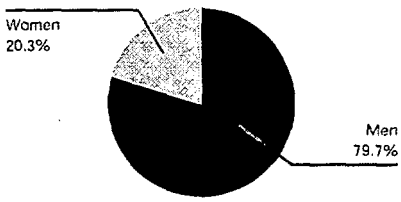
■ EMPLOYEES

In 2001, a survey of the organizational climate was conducted, involving all the resources of the Telecom Italia Group. The study was devised with a precise aim: to comprehend the level of motivation and job satisfaction. Motivation proved to be "good", job satisfaction "sufficient".
In Telecom Italia S.p.A. equal opportunities for female employees continue to be a priority in the Group. Women represent 8% of the executives and 16% of middle management.

Distribution of men/women at December 31, 2000



Distribution of men/women at December 31, 2001



THE REGULATORY FRAMEWORK

As set forth by Italian Law No. 249/1997, which instituted the National Regulatory Agency for Communications (referred to as "the Regulator"), and by Presidential Decree No. 318/1997 and Presidential Decree No. 77/01, which implemented directives at Community level, the process of deregulation can now be regarded as complete. There follows a summary of the main decisions adopted during 2001 by the Regulator.

■ RATE REBALANCING

Within the framework of the price cap mechanism and in observance of Resolution No. 847/00/CONS of December 11, 2000, which increased the value of the sub cap applied to the basic subscription charges, the Regulator approved Telecom Italia's proposals to increase the monthly subscription charges for both residential and business customers and to reduce the charges for local, long-distance and international calls.

■ INTERNATIONAL TRAFFIC FROM PUBLIC TELEPHONES AND OPERATOR SERVICES

In Resolutions No. 375/01/CONS and 376/01/CONS, the Regulator approved the prices of international calls from public telephones made through the operator as well as a new method of organizing rate zones. Furthermore, in Resolution No. 271/01/CONS of July 4, the Regulator also approved the new price of the "12" directory information service, which is part of the universal service, fixing it at Lire 840, net of VAT, per call.

■ UNIVERSAL SERVICE

Telecom Italia continues to maintain its obligation to provide certain services – including phone services – at "accessible" conditions. Such services, which are guaranteed in unprofitable geographical areas to low-profile customers, constitute the so-called "Universal Service", for the supply of which Telecom Italia sustains a "net cost". In Resolution No. 23/01/CIR of November 21, the Regulator estimated the net cost sustained by Telecom Italia for supplying the Universal Service in 2000 at euro 58.90 million, to which Telecom Italia itself contributes 48.26% (euro 28.42 million).

■ GENERAL TELEPHONE DIRECTORY

Following a special public consultation held last summer (Resolution No. 332/01/CONS), on February 6, 2002, the Regulator approved Resolution No. 36/02/CONS on "Rules and organizational methods for the creation and supply of a general telephone directory service and adaptation of the universal service".

The resolution lays down the standards for compiling and supplying the general telephone directory, suggesting the creation of a data bank containing the numbers of all the operators. By June 2002, the Regulator will be able to define the rules for auctions or other competitive mechanisms for the supply of the telephone directories.

■ INTERCONNECTION AND LOCAL LOOP UNBUNDLING

On September 7, 2001, Telecom Italia published the 2001 rate charges for interconnection. The rate charges cover both interconnection services and local loop unbundling services. On March 4, 2002 AGCOM approved the charges, and made a few technical and price changes, the details of which are described in the section "Significant subsequent events".

With regard to interconnection services:
- in Resolution No.18/01/CIR of August 7, the Regulator established the technical and economic conditions for billing services with the risk of non-payment for access by Telecom Italia subscribers to non-geographical numbers belonging to other operators and the rates for the partial circuits for the interconnection of dedicated lines;
- in Resolution 13/01/CIR Telecom Italia was authorized not to insert the economic conditions for the routing of international traffic of other operators towards the United States, Canada, Switzerland, Norway or the member states of the European Community;
- with regard to direct calls to Internet, Resolution No. 25/01/CIR establishes that Telecom Italia should introduce the new flat-rate interconnection rate known as "FRIACO" (the licensed operators pay a fixed charge instead of a an amount based on the minutes of interconnection). On March 12, 2002 the Regulator issued Resolution No. 5/02/CIR, approving Telecom Italia's flat interconnection rate, but reducing the prices proposed by the Company.

With regard to local loop unbundling:
- during the year, in line with the suggestions made by the Regulator, special areas were made available in exchanges to accommodate other operators with the aim of unbundling local loops (ULL). At December 31, 2001 Telecom Italia handed over equipped technological areas to operators in 748 exchanges.
- Following Resolution No. 24/01/CIR, on December 12, 2001 Telecom Italia presented its rate plan to the Regulator for shared access and sub loop (shared access to the local network and access to line boxes).

■ NUMBERING PLAN

Resolutions No. 12/01/CIR and 19/01/CIR establish the rules for Number Portability on mobile networks (start-up scheduled for April 2002). The impact of the service on fixed networks (fixed/mobile calls) will only take effect from April 2003, using routing of direct routing calls.

■ LOWER SUBSCRIPTION CHARGES FOR WEAKER SEGMENTS

In Resolution No. 330/01/CONS of August 1, the Regulator established the guidelines to make Resolution No. 314/00/CONS of June 1, 2000 operational. According to this resolution, the so-called "weaker segments of the clientele" will be able to benefit from a reduction in the monthly subscription charge. The reductions came into effect on December 1, and the Regulator has estimated that they will benefit about 1.3 million customers.

■ WHOLESALE DIRECT CIRCUITS RATES

In Resolution No. 393/01/CONS of October 10, the Regulator requested the publication of the rates for rented lines destined for licensed operators and operators who supply Internet access, and are holders of general authorizations (ISP). The rates of this kind proposed by Telecom Italia were approved by the regulator in Resolution No. 59/02/CONS of March 4, 2002.

■ EQUALITY FOR ISP/OLO

On March 20, 2002, the Bill was approved that recognizes the right of ISPs to take advantage of the interconnection charges that Telecom Italia applies to OLOs, based on the relevant rate plan.

■ RATE PLAN FOR DATA USING X-DSL AND SDH TECHNOLOGY

In Resolution No.04/01/CIR of February 22, the Regulator approved the rates for Telecom Italia's Permanent Virtual Channel, thus removing the barriers to

the marketing of Telecom Italia's RING and Full Business Company retail services.

■ INTRODUCTION OF THE EURO

In Resolutions No. 417/01/CONS of November 17 and No. 468/01/CONS of December 19, the Regulator provided all the operators in the Telecommunications sector with guidelines on informing the public about the rates for telecommunications services, including public telephone services, and the introduction of the euro. With reference to public telephone services, the new rate for a single unit charge has been fixed at euro 0.10.

■ SERVICE CARD

In observation of Resolution No. 820/00/CONS, on July 19, 2001 Telecom Italia adopted the "Service Card" and the "General Conditions of Subscription" for telephone services; the latter establish, for customer subscribers, without interruption of service with regard to the Service Regulations, the manner and terms of supplying the telephone service.

■ ACCESS TO INFRASTRUCTURES AND SHARING OF SYSTEMS

The Regulator is working on the text of three regulations concerning civil responsibilities, backbone networks and access to Telecom Italia's civilian infrastructures.
The issue of the first two regulations is a result of Italian Law No. 249/97 and follows a special public consultation held in the first months of 2001. Conversely, the regulation about access to Telecom Italia's civilian infrastructures implements what is laid down in the terms of Telecom Italia's license.
The proceedings initiated by the antitrust authorities, regarding the correct observance by Telecom Italia of the measure, which was a condition of the SEAT-TMC transaction, obliging it to grant access to its civilian infrastructures to operators who intend to use them for supplying interactive multimedia services to final users, ended in favor of Telecom Italia.

LITIGATION

There follows a description of the main disputes and litigation in which the Telecom Italia Group is involved at December 31, 2001. Except where specifically mentioned, the Telecom Italia Group did not make any provision to the risk reserves because of the absence of definite and certain elements and/or because a negative conclusion of the litigation is considered improbable.

■ DISPUTES CONCERNING RESOLUTIONS PASSED AT SHAREHOLDERS' MEETINGS

The rulings originating from the resolution with which the Shareholders' Meeting of January 14, 2000 authorized the buy-back of savings shares through a tender offer and subsequent acquisitions on the stock market, concluded on January 10, 2001, are still pending at the first degree court.
In particular, some shareholders filed a claim for damages against Olivetti, Telecom Italia, as well as the Chairman and Deputy Chairman pro tempore of the latter company, for a total of euro 18.9 million. The claim is based on the alleged non-fulfillment of the commitments contained in the "Offer Document" relating to the takeover and exchange bid by Olivetti and Tecnost for Telecom Italia in 1999, and also for the resolutions passed by the shareholders' meeting of January 14, 2000, especially in relation to the mandate to purchase Treasury savings stock on the screen trading market, as set forth by applicable laws, subsequent to the end of the period of the offer.
This same resolution was contested by another shareholder who pleaded that the proposal put to the shareholders' meeting had been changed from the one deposited prior to the shareholders' meeting.
With regard to the expiry of the deadline established for promoting the offer to voluntarily convert savings shares into ordinary shares (as a result the proposed buy-back of ordinary shares will not take place), the proceedings opposing the resolutions passed at the shareholders' meeting of May 3, 2001, which involved the authorization to establish a subsidiary for the purpose of acquiring Telecom Italia ordinary shares, through a tender offer, as well as the offer to convert savings shares against payment, has been abandoned.

■ SEAT PAGINE GIALLE/ DE AGOSTINI ARBITRATION

De Agostini has initiated arbitration proceedings against Seat, Matrix, Buffetti Group and Finanziaria Web for the alleged nonfulfillment of the framework agreement of September 20, 2000, with regard to Seat's obligation to acquire the Finanziaria Web S.p.A. shares still held by the De Agostini Group (40% of the share capital, whereas the remaining 60% was already held by Seat).
Effectively, De Agostini Group maintains that all the conditions stipulated in the contract for executing the agreement were verified, whereas Seat maintains that this is not true and that, in any case, the fact that market conditions changed rendered the quid pro quo excessively onerous.
The De Agostini Group is asking for the specific execution of the framework agreement and therefore that the Finanziaria Web shares should be disposed for transfer to Seat for the amount originally agreed of euro 700 million, with payment beginning on June 30, 2003, as well as the payment of unspecified damages.

■ SEAT PAGINE GIALLE/CECCHI GORI COMMUNICATIONS

Following the acquisition of Cecchi Gori Communications by Seat Pagine Gialle,

through the contract stipulated on August 7, 2000 with Fin.Ma.Vi. S.p.A. and Cecchi Gori Group Media Holding S.p.A. (Cecchi Gori Group), a dispute has been in progress.
In particular, in May 2001, the Cecchi Gori Group had a summons presented to Cecchi Gori Communications and Seat Pagine Gialle, asking that the resolutions passed by the Cecchi Gori Communications shareholders' meeting on April 27, 2001 be declared invalid, after their suspension (rejected).
In August 2001, the Cecchi Gori Group also filed suit before the Court of Milan asking for the annulment of the pledge of the Cecchi Gori Communications shares owned by the Cecchi Gori Group, stipulated to guarantee the correct fulfillment of all the obligations of the seller companies laid down in the contract of purchase dated August 7, 2000.
Under the arbitration clause in the same contract, arbitration proceedings are also pending, brought by the Cecchi Gori Group with the aim of establishing the invalidity, ineffectiveness or termination of the contract of purchase (essentially because the condition for suspension, represented by obtaining the necessary authorizations from the pertinent authorities by the established deadline, did not take place) or ask for fulfillment and, in any case, to obtain payment of damages.
The Board of Arbitration was established on October 2001 and set itself the deadline of December 31, 2002 as the date by which the proceedings must be completed.

■ DISPUTE REGARDING ITALIAN LAW NO. 1369/1960

Two rulings are pending in which INPS – by virtue of the provisions of Law No. 1369/1960 – is demanding payment from Telecom Italia for a total of approximately euro 31 million for the failure to pay social security contributions on the part of Comitel and Telefon, contracted to carry out work on the network, and now bankrupt.
In particular, the sentence regarding Comitel is under appeal, while the sentence regarding Telefon ended with a ruling in Telecom Italia's favor in the appeals courts, subject to an appeal by INPS to the Supreme Court.
A third verdict, resulting from Telecom Italia's opposition to an injunction by INPS for approximately euro 15 million, was recently concluded with the injunction being cancelled.
Numerous disputes are pending involving workers (formerly employed by contracting companies), some of whom are demanding to be employed by Telecom Italia, others to be paid according to the telephone contract, for a total of more than euro 35 million.
Furthermore, any risk to Telecom Italia in these disputes, given the current legal standing, is considered remote.

■ UNIVERSAL SERVICE

The companies Omnitel and Infostrada presented an appeal to the Regional Administrative Court (TAR) of Lazio to obtain the annulment of the resolution issued by the Regulator on the subject of sharing the net cost of the universal service for the year 1999. According to the above-mentioned resolution, part of the net cost of the universal service, recognized as an unfair burden for Telecom Italia (which is legally bound to supply the service), was divided between the companies presenting the appeal and TIM.
While judgment was pending, the companies presenting the appeal did not pay the portion of the fees (fixed at a total of euro 9 million) to the special fund set up at the Ministry of Communications, thus so far preventing the latter from paying the whole amount owed to Telecom Italia to cover part of the costs of 1999 (euro 27 million).
With a sentence reached in January of this year, the TAR ruled in favor of the appeal presented by Omnitel, only for the part where it contested the regular constitution of the discussion. The TAR did not rule in favor as to the merits

under dispute or the appeal by Telecom Italia which is concentrated on excluding the "12" Directory Information Service from the universal service.
In February 2002, appeals were presented before the TAR of Lazio by Omnitel Pronto Italia and Wind Telecomunicazioni to annul, after suspension, the efficacy of the resolution issued by the Regulator with regard to the sharing of the cost of the universal service for the year 2000. Effectively, both the companies appealing contested the illegality of the resolution for the lack of an inquiry and for not having had access to the documentation resulting from the consultancy commissioned by the Regulator on the analysis of the net costs.
Omnitel also asked for the case to be referred to the Court of Justice of the European Community, for a preliminary interpretation, in order to ascertain the correct interpretation of the Community directives, and, secondly, the non-application of the national law in question.

■ DATA-TRANSMISSION SERVICES AND INTERNET ACCESS BASED ON X-DSL TECHNOLOGY

Following the start of an investigation into Telecom Italia's conduct with regard to the supply of basic band direct circuits, the offer to its business users of broadband data-transmission and Internet access services based on x-DSL technology, without any corresponding wholesale rate plan for its competitors, the definition of the charges to competitors of wholesale services with ADSL access, on April 27, 2001 the antitrust authorities imposed a fine of euro 59 million on Telecom Italia. In November, the TAR of Lazio reduced the fine to euro 29 million. The fine was paid in January. However, the deadline for presenting an appeal to the Council of State is still pending and no decision has as yet been taken.
Meanwhile, claims have been brought before the competent civil courts for the payment of damages for a total of euro 351 million by Albacom, Infostrada, AIIP, Unidata, Data Service and other operators, for the alleged abuse of a dominant position on the part of Telecom Italia in supplying broadband data transmission and Internet access services based on the application of x-DSL technologies, in the absence of any corresponding wholesale rate plan destined for the competition.

■ GALACTICA DISPUTE

At the end of May 2001 a dispute arose between Telecom Italia and the Internet Service Provider Galactica S.p.A. (currently in liquidation) for the failure to renew the agreement concerning the testing of an Internet access service, at a flat rate.
In this connection – after appeals were urgently presented to a civil court, and to the Milan Court of Appeal under Law No. 287/1990, both were rejected - Galactica cited Telecom Italia for the alleged illegality of withdrawal, claiming damages and challenging Telecom Italia not to interrupt the distribution of the service.
In February 2002, Galactica therefore presented another summons for damages caused by the alleged unfair trade practices of Telecom Italia.
In addition, it should be mentioned that reconcilement proceedings brought before the Regulator concluded with no agreement having been reached.

■ "12" DIRECTORY INFORMATION SERVICE

At the end of March, Telecom Italia presented an appeal to the TAR of Lazio (with a simultaneous claim for damages) for the annulment of the resolution adopted by the Regulator, referred to in its letter of March 23, 2001, which imposed – after having authorized the new "12" directory information service – the resumption of the original technical and economic conditions.
At the hearing on July 11, 2001, the new resolution of the Regulator of July

4, 2001 was filed, changing the conditions of the service charge to Telecom Italia's satisfaction. The hearing was therefore postponed to a date as yet to be agreed.

■ ALLEGED UNFAIR TRADE PRACTICES BY TELECOM ITALIA HURTING MARKET DEVELOPMENT

Following a petition by 27 operators of the competition concerning the fact that the strategies of Telecom Italia are allegedly hurting market development, in regulation No. 179/01/CONS the Regulator objected to a series of violations committed by the Company, and, in July 2001, proceeded to apply the previously announced sanctions with special resolutions.
Telecom Italia contested both the regulation and the special resolutions.

■ FEE CONCERNING ARTICLE 20, SECTION 2 OF LAW NO. 448 OF DECEMBER 23, 1998

Telecom Italia, Tim, Wind and Omnitel, before the TAR of Lazio, contested the Ministerial Decree of March 21, 2000 introducing Italian Law No. 448 of December 23, 1998, which, on January 1, 1999, established a new license fee in place of the concession fee, the amount of which progressively declines until 2003. The TAR asked the administrative offices of the Ministries of the Treasury and of Communications to consign a documented report of clarifications regarding the correspondence that had taken place with the European Commission in connection with the approval of the above-mentioned law. Furthermore, with regard to extraordinary appeals presented by Infostrada and Albacom to the Head of State, asking for the annulment of the above-mentioned decree, the Council of State brought the case before the European Court of Justice, raising the question of the non-compatibility of the fee with Community regulations relating to telecommunications.
Following the dispute, Telecom Italia and Tim did not pay the amount that they were ordered to pay for 2000 (equal to euro 307 million and euro 179 million, respectively).

■ INQUIRY BY THE ATTORNEY GENERAL'S OFFICE OF TURIN

In February 2001, the Attorney General's Office of Turin ordered the start of a preliminary investigation into the transaction involving the acquisition, by Telecom Italia, of 29% of the capital of Telekom Srbija. Telecom Italia immediately made all the documentation and figures relating to the above-mentioned transaction available to the judicial authorities.
As regards the inquiry that was carried out with the full cooperation of the pertinent functions of the company, in conducting its work on the 2000 financial statements, the audit firm of PricewaterhouseCoopers and the Board of Statutory Auditors advised that no facts emerged, at the time, that could invalidate the correctness of the statutory and consolidated financial statements of Telecom Italia for the years ended December 31, 1997, 1998 and 1999, also with regard to the effects on the year ended December 31, 2000.

* * *

At the beginning of July, the company was asked to present documentation concerning mainly the transactions for the acquisition of Seat and the merger of Tin.it-Seat.
The corporate offices provided the utmost cooperation to the authorities conducting the investigation and placed all documentation at their disposition.

■ SOGEI CONCESSION

Sogei (a subsidiary of Finsiel) was entrusted with the concession for the management of the financial information

systems by the Ministry of Finance (now the Ministry of Economy) in 1992, expiring in May 2001.
Sogei - under the provision of art. 14 of Legislative Decree No. 333/1992, converted into Law No. 359/1992 - maintains that this concession should now be considered as being extended until May 2012. According to the Ministry of Health, instead, the concession would have expired without any extension; thus the Ministry has identified an Advisor for bids to be called for assigning the operation of its information services systems.
Sogei has therefore contested, before the TAR of Lazio, the notice for the bid to identify an Advisor and also initiated arbitration proceedings in order to establish its right to the extension of the concession. The Administration contested the competence of the Board of Arbitration and did not appoint an arbitrator of its choice, which was then nominated by the President of the Courts. The formation of the Board of Arbitration, with the appointment of its president is being awaited.
In May 2001, the Ministry and Sogei, with the rights of the parties remaining unchanged, agreed to a "technical extension" of the original concession up to May 2003.
There are also arbitration proceeding in progress to ascertain whether the right of Sogei (covered by the convention) to take advantage of the cooperation of the companies in the Finsiel Group, without these companies being considered third-party companies, is not precluded by Community law and the national law that introduced it.

■ FINSIEL CONCESSION

Italsiel (merged by incorporation in Finsiel on July 1, 1994) was granted a concession on July 24, 1991 by the Ministry of Sanitation (now the Ministry of Health) to set up and run the health information system; the concession was to expire on July 31, 2000.
Finsiel - under the provision of art. 14 of Legislative Decree No. 333/1992, converted into Law No. 359/1992 - maintains that this concession should be considered as being extended by law. According to the Ministry of Health, instead, the concession would have expired without any extension.
On July 28, 2000, as requested by the Administration - with the positions of the parties remaining unchanged - a private contract was stipulated between Finsiel and the Ministry of Health to complete the development and operation of the health system, with an expiration date of July 31, 2001. On August 1, 2001, another contract was signed for the period to July 31, 2002.
The Ministry, in the meantime, published two calls for bids, one for the "design and development of the New Health Information System (N.S.I.S.) and the system for the security of national health information", and the other, for the assignment of the services for the "Functional and Technical Operations at the National Level of the National Health Information System", which Finsiel has contested before the TAR of Lazio, although it took part in the bids.
Finsiel also initiated arbitration proceedings in order to have the concessions judged as being extended by law. The Ministry of Health, nevertheless, has declined to accept the Board of Arbitration's competence, according to the general specifications of expenses for the supply and services carried out by the General Supervisory Office of the State, approved by Ministerial Decree No. 16 dated October 28, 1985.

■ NORTEL INVERSORA DISPUTES

In April 2001, Nortel Inversora S.A. was cited to appear before a commercial judge in Buenos Aires for an obligatory attempt at reconcilement with regard to the opposition of certain resolutions passed by the shareholders' meeting of January 19, 2001 which covered, among other things, the approval of the financial statements at September 30, 2000. No

outcome was reached at the mediation hearing. Consequently, the counterpart initiated action.
In August, a further citation was received, similar to the previous one, for an obligatory attempt at reconcilement with regard to the opposition of certain resolutions passed by the shareholders' meeting of Nortel on April 26, 2001 which covered, among other things, the approval of the financial statements at December 31, 2000. No agreement was reached at the mediation hearing. The counterpart has not yet initiated action.
In the meantime, the effectiveness of the shareholders' resolutions that were opposed was suspended and an appeal is pending, filed by Nortel, against the precautionary measures that were taken.

■ BRASIL TELECOM DISPUTE

In April 2001, Brasil Telecom filed suit against Telecom Italia and Stet International Netherlands (SIN), and also the two directors of Brasil Telecom nominated by Telecom Italia.
This suit has been filed in order to obtain the damages that Brasil Telecom would have suffered following the purchase of CRT (Companhia Riograndense de Telefonia) shares and also because it did not participate in the SMP bid (Serviçio Móvel Pessoal). The judge has been asked to quantify the damages.
At this time, the preliminary claims by the petitioners is being examined.

■ ENTEL CHILE DISPUTE

The company, Americatel Corporation, in which Entel Chile has a direct 80% stake, carries receivables of about US $30 million from OAN, a company that provides billing and collection services for Americatel's customers. OAN filed for bankruptcy and it was authorized to sell to third parties the receivables that belong to Americatel. The latter, in the meantime, immediately filed suit in order to avoid confusion over its receivables and OAN's assets, contesting the legitimacy of the above-mentioned sale of the receivables.

■ WTC DISPUTE

In March 1999, Telecom filed suit, in the Miami courts, for payment of unpaid invoices of about US $13 million from the local Wholesale Telecom Corporation ("WTC") that were issued for the capacity supplied for international traffic.
WTC presented a counterclaim, also citing TMI USA (a Telecom Italia subsidiary), asking damages from each for a total of US $60 million. At this time, the pre-trial inquiry is in the process of being concluded. Telecom Italia provided an amount of euro 6 million in a specific reserve in 2001.

■ CHASE MANHATTAN BANK DISPUTE

In June 2000, Chase Manhattan initiated a civil suit in the United States against the shareholders of Iridium LLC after it failed to repay a US $800 million loan granted by the same Chase to Iridium Operating LLC (subsidiary of Iridium LLC). In particular, Chase requested the specific execution of an alleged commitment by the shareholders to guarantee repayment of the loan by contributing the share capital of Iridium LLC; to this end, the amount claimed from Telecom Italia amounts to about US $7.5 million, which had already been set aside in the financial statements of the subsidiary Iridium Italia at December 31, 2000. However, Chase was authorized by the judge to change its claim to one of fraud and as a result filed claim for responsibility against all of Iridium LLC's shareholders, jointly and severally, for the entire amount of the loan.
Telecom Italia presented a claim in February 2001, stating that it should not have been called to stand judgement since its investment in Iridium LLC, as early as October 1996, had been sold to Iridium Italia S.p.A., a company in which Telecom Italia has a 30% stake, TIM 35% and Telespazio 35%.

At this time, the pre-trial stage of the case, in which Telecom Italia filed an appeal to be excluded from the case, is still in the process of being concluded.

■ STET HELLAS DISPUTE

In December 1996, Mobitel, a company in the Greek Interamerican group (now Demco Reinsurance), a minority shareholder of Stet Hellas and, at that time, its exclusive representative, initiated arbitration proceedings at the Paris International Chamber of Commerce, principally maintaining its right to receive commissions not only on outgoing traffic generated by the subscribers it had signed up, but also on incoming traffic and that generated by customers in default of payment. The total damages requested are equal to about US $38 million. Mobitel and Interamerican have also requested damages for a total of US $172 million following the dissolution of the exclusive representative contract as notified by Stet Hellas.
The latter and Telecom Italia, which took over from Stet International (formerly the guarantor of the first company and, as such, a party to the contracts at one time signed) presented a counterclaim for an amount of about US $210 million, mainly to cover the damages suffered as a result of the loss of the acquisition of market share caused by non-fulfillment by Mobitel. In October 2000, a partial award was given which, in principle, agreed with Mobitel's request for recognition of a commission also on Stet Hellas's revenues from incoming traffic; in November 2001, the Board of Arbitration rejected Telecom Italia/Stet Hellas' claim that the Board of Arbitration did not have jurisdiction but that the ordinary Greek courts had exclusive jurisdiction concerning the decision over the quantum, since the Arbitration Board had only been asked to decide on the obligation to pay, a matter which the Board of Arbitration had already decided.

EQUITY INVESTMENTS HELD BY DIRECTORS AND STATUTORY AUDITORS

Pursuant to art. 79 which introduced Legislative Decree No. 58 of February 24, 1998, adopted by Consob under Resolution No. 11971 of May 14, 1999 and later amended by Resolutions No. 12475 dated April 6, 2000 and No. 13086 dated April 18, 2001, the following table presents the equity interests held by the Directors and Statutory Auditors of Telecom Italia S.p.A. and its subsidiaries.

Name	Company	Number of shares held at the end of prior year	Number of shares purchased	Number of schares sold	Number of shares held at the end of 2001

(3) Shares not held directly up to September 25, 2001, date of resignation from the post of Director;
(4) Shares not held directly. The purchase took place on December 27, 2000 by the contribution of an indirectly held investment in Databank S.p.A. to Seat Pagine Gialle and the information was not communicated by the person for purposes of the report on operations at December 31, 2000;
(5) Shares not held directly up to November 7, 2001, date of resignation from the post of Director;
(6) Shares held up to November 7, 2001, date of resignation from the post of Director.

PERFORMANCE OF INTERBUSINESS SERVICES

As required by the antitrust authority, the accounting principles used to determine the economic values for Interbusiness services are described below. These accounting principles have been audited starting from the year 1996.
In 2001, this examination was performed by the firm of Reconta Ernst & Young S.p.A..

• **Revenues:** are stated at market prices for competitive services and at rates established by law for services granted by license and are recorded on the accrual basis. In the case of services provided that imply the use of dedicated access lines by the final customer, the revenues also include the income from leasing such lines (valued on the basis of the rates defined in the ministerial decrees), with the consequent recognition the same amount in costs.

• **Direct costs**

- *labor costs*: represent the cost of personnel who worked to provide such services; the cost includes salary and wages, social security costs, provisions for employee termination indemnities and other sundry costs recorded on the basis of the number of persons in the dedicated operating structures and using cost accounting standards;

- *network utilization costs*: include the cost to use the regulated carrier services (usually direct connections) and the cost to use the carrier products/services offered in a competitive environment; they are therefore valued, respectively, using the rates established by law and the rates applied to all third-party customers, the same as that which occurs in the cost structure of other carriers in the sector;

- *other direct costs*: refer to direct costs (advertising, marketing, service connection, operating and maintenance, etc.) and indirect costs (corporate structure costs supporting the operating lines) valued using cost accounting standards and applying specific allocation methods.

• **Depreciation:** of fixed assets directly employed in providing the services in question are determined on the basis of the estimated useful lives of the assets of Telecom Italia.

The economic results of the interbusiness services are reported as follows:

(in thousands of euro)	2001 (A)	2000 (B)	Change (A-B) Amount	Change (A-B) %
Revenues	88,913	121,204	(32,291)	(26.6)
Cost	(80,810)	(100,920)	20,110	(20.0)
of which:				
Labor cost	(5,920)	(6,415)	495	(7.7)
Network utilization costs	(44,878)	(53,209)	8,331	(15.7)
Other costs	(30,012)	(41,296)	11,284	(27.3)
Gross operating profit	8,103	20,284	(12,181)	(60.1)
Depreciation and amortization	(18,439)	(13,669)	(4,770)	34.9
Operating income (loss)	(10,336)	6,614	(16,950)	n.s.

The results for 2001 show an operating loss of euro 10.3 million compared to an operating income of +euro 6.6 million in 2000. Such result is due to the reduction in revenues mainly on account of a decline in customers, who switched to other alternative plans, the decrease

in market prices and the revision in the manner of how the service is used by Seat-Tin.it and other Internet Service Providers.
The reduction in revenues was only partly compensated by the reduction in costs, which led to a sharp decline in gross operating profit. The operating result was also impacted by the significant increase in depreciation, as a result of higher depreciable assets for the dedicated platform, due to the full use of assets that went into operation in 2000 and the new installations that came into use during the year.

ECONOMIC AND FINANCIAL REVIEW OF TELECOM ITALIA S.P.A.

The financial condition and the results of operations of Telecom Italia for the year 2001 reflect the results emerging from the transactions involving the companies described below that took place in 2000 and 2001.

- Contribution to Tin.it S.p.A., with effect from May 1, 2000, of all the assets and liabilities consisting of the business segments and investment holdings inherent to the operations and marketing of on-line services and products by Telecom Italia, Telespazio and Saritel; on the following November 15, the merger of Tin.it in Seat Pagine Gialle was finalized and became effective for accounting and tax purposes as from May 1, 2000;
- contribution to TE.SS. - Tele Payroll Services S.p.A., operational since November 1, 2000, of the business segment for the management of the personnel administration services of the companies of the Group;
- contribution, on December 1, 2000, of the business segment "Large Buildings", consisting of Telecom Italia's most prestigious real estate properties, to IM.SER., and the successive sale of 60% of this company to Beni Stabili (45%) and Lehman Brothers (15%);
- total spin-off of Stet International to Telecom Italia and TIM as part of the rationalization of the international communications sector. The spin-off was concluded on December 27, 2000 and became effective for accounting and tax purposes as from January 1, 2000;
- contribution to Netsiel, which took place on December 31, 2000, of the business segment for the operations of the information technology services. This transaction falls under the reorganization program of the sector which calls for concentrating all of the Group's operations in the Information Technology sector;
- sale to Telesoft, on March 1, 2001, of the business segment devoted to the development of information systems and the creation of applications software;
- sale of the business segment for printing telephone bills to Printel, which took place on February 1, 2001, and the outsourcing of the related activities to Postel;
- contribution to CSELT, which then changed its name to Telecom Italia Lab, of the "Venture Capital" business segment on March 1, 2001.

The following table shows the results of operations for the year 2001 compared to the year 2000, which has been restated to give effect to the changes consequent to the aforementioned corporate transactions.

(in millions of euro)	2001 (a)	2000 (b)	Adjust-ments	2000 proforma (c)	Change % (a/b)	Change % (a/c)

(*) Reduced by related cost recoveries.

Sales and service revenues, amounting to euro 17,309 million, decreased by 0.9% compared to 2000 (euro 17,463 million). The total includes revenues from services of euro 17,045 million and revenues from sales of euro 264 million (respectively, euro 17,108 million and euro 355 million in 2000).

The reduction in sales revenues (-euro 91 million, -25.6%) is due to the fact that the Company, from the second half of 2000, leaves manufacturers with the responsibility for the direct sale of the equipment to some customers and limits itself to only providing the plans for the telecommunications systems (which also explains the reduction in costs for the sales of products, discussed later).

The reduction in service revenues (-euro 63 million, -0.4%) can be attributed to traffic revenues which fell by 6.9% even though the number of minutes rose by 30.7% (corresponding to +euro 1,257 million in terms of revenues). However, this increase was reduced by a decline in the average return on traffic (retail and wholesale) of 28.8% (from euro 5.5 cents per minute in 2000 to euro 3.9 cents per minute), a decrease of euro 1,912 million in terms of revenues.

Such performance was affected by:

- the discount policies aimed at customer retention;
- the strong growth in traffic "carried" on behalf of other operators and on-line traffic, which caused an increase in the volumes of minutes handled on one hand and, a shift to a less remunerative mix in the types of traffic;
- the rate changes in the second half of 2000 and 2001 which lowered the prices of local, long-distance and international traffic.

These phenomena were partly compensated by the increase in basic subscriber charges of

+8.7%, as a result of the aforementioned rate changes, the development of data connections, the growing number of subscribers to various discount rate plans proposed by the Company and the demand for interconnecting services with the Telecom Italia network by other wireline operators.

Sales and service revenues, net of amounts due to other telecommunications operations, instead, amount to euro 13,894 million, with a decrease of euro 419 million (-2.9%) compared to 2000.

Gross operating profit, of euro 7,571 million increased by euro 15 million compared to 2000 (+0.2%). The percentage of gross operating profit to sales and service revenues shows a slight improvement and was 43.7% compared to 43.3% in 2000.
The change is mainly due to the above-mentioned reduction in revenues (-euro 154 million) and higher raw materials and outside services (+euro 239 million) that were completely absorbed by the labor costs, which fell by euro 441 million compared to 2000.
The change in raw materials and outside services is mainly due to the following factors:

- the increase in operating costs (+euro 367 million), chiefly attributable to the rental payments on the buildings sold to IM.SER in December 2000, and the costs to operate the information systems (business conferred to Netsiel in December 2000), which both totaled euro 371 million;
- the increase in the amounts due to other operators (+euro 265 million), owing to the sharp growth in interconnecting traffic;
- the reduction in marketing costs (-euro 173 million), chiefly attributable to the sales of products (-euro 125 million) – in relation to the comments made under sales revenues - to costs (-euro 25 million) connected to the business for the printing of the White Pages telephone directories contributed to Tin.it and advertising and promotional campaign costs (-euro 59 million);
- the reduction in direct service costs (-euro 144 million), due to the effect of both the savings consequent to the continuation of the program to rationalize installations and the lower installation and maintenance costs connected with switching and data transmission systems.

Total raw materials and outside services, net of the amount due to other operators, amounted to euro 3,694 million in 2001 and is euro 26 million lower than last year.
The reduction in labor costs (-euro 441 million) can be ascribed mainly to the effects of a decrease in the average number of employees (-11,145 persons compared to 2000, -15.4%) due to employee cutbacks under Law 223/1991 and employees no longer with the company on account of the contributions or the sales of business segments in 2000 and 2001.

Operating income, amounted to euro 3,983 million, an increase of euro 388 million from 2000 (+10.8%). The ratio of operating income to revenues was 23.0%, compared to 20.6% in 2000; the increase is due to lower depreciation and amortization (-euro 398 million), euro 242 million of which is due to the reduction in depreciable assets following the contribution of assets to IM.SER and Netsiel, in December 2000, and Telesoft in 2001, as well as the change in the mix of depreciable assets.

Net income, euro 151 million, is euro 2,408 million lower than in 2000. The change is due to the following:

- the increase in financial expenses, net (+euro 1,166 million), as a result of higher interest expense mainly due to the increase in debt exposure and the provision for the forward purchase commitment on Seat Pagine Gialle shares for euro 569 million in connection with the estimated nonrecoverability of the original price to exercise the option;
- increase in the writedowns of investments (+euro 337 million), mainly in the subsidiaries Telespazio (euro 91 million), TMI - Telemedia International Italia (+euro 60 million), TI Lab

(euro 50 million), Softe (euro 87 million) and in the affiliated company Stream (+euro 39 million);

- increase in extraordinary expense (+euro 2,454 million) principally as a result of the extraordinary provisions, euro 2,527 million, made in respect of the investments held by SIN and TIWEB, and the provision, euro 248 million, for expenses on the agreement with Vivendi/CanalPlus for the transfer of the investment in Stream. The extraordinary expenses in 2000 included the costs for the corporate reorganization plan that followed the agreements reached with the labor unions over layoffs and unemployment compensation plans (euro 285 million) and expenses and provisions relating to the transactions for the disposal of investment holdings and the contribution of business segments (euro 170 million);
- reduction in extraordinary income (-euro 260 million) mainly due to the fact that 2000 included gains of euro 666 million, largely relating to the contribution of the business segment "Large Buildings" to IM.SER (euro 510 million) and the sale of Sirti (euro 117 million), while in 2001, the gains realized totaled euro 264 million (of which euro 139 million relate to the contribution of the investments in Intelsat, Inmarsat and New Skies Satellites to Mirror International Gmbh, euro 111 million to the sale of the investment in Eutelsat to Mirror International Holding and euro 120 million to the reserves released for provisions made in excess in prior years relating to the reserve for the contract with Iraq (euro 62 millions) and the reserve for corporate restructuring costs (euro 50 million).

The above negative effects were only partly absorbed by net investment income (+euro 233 million) and lower income taxes (-euro 1,187 million) as a result of the reduction in the taxable base which was impacted by the aforementioned extraordinary provisions regarding the international investment holdings.

		6,542	**13,651**	**(7,109)**
	(G+H)	**16,913**	**16,839**	**74**
I. Total	(F+G+H)	**32,784**	**35,553**	**(2,769)**

As far as **intangibles, fixed assets and long-term investments** are concerned, the reduction in fixed assets from December 31, 2000 is due to the difference between additions (euro 2,466 million), depreciation (euro 3,321 million) and disposals (euro 343 million) covered almost entirely by accumulated depreciation (euro 303 million). "Long-term investments" amounted to euro 18,370 million and decreased by euro 2,389 million since December 31, 2000. The reduction is mainly due to:

- new investments for euro 1,889 million;
- writedowns for euro 3,148 million including the extraordinary writedowns to the value of the investments in SIN and TIWEB for a total of euro 2,527 million;
- disposals/decreases in investments for euro 578 million;
- cancellation of No. 112,998,070 savings shares of treasury stock for a total of euro 711

million when the share capital was re-denominated in euro. The transaction is described in the note on "share capital".

Working capital, showed a positive figure of euro 12 million (-euro 499 million at December 31, 2000) and increased by euro 511 million. The increase is mainly due to higher "other assets" (+euro 719 million) principally as a result of higher income tax and VAT receivables and the reduction in "trade accounts payable" (-euro 820 million). Such effects have been partly absorbed by the increase in the "reserve for risks and charges" (+euro 729 million) - primarily for the provision relating to the forward purchase commitment on Seat Pagine Gialle shares for a total of euro 569 million, and expenses connected with the sale of Stream - and the increase in other liabilities (+euro 318 million).
The securitization of accounts receivable from residential customers during the year led to a reduction in trade accounts receivable at December 31, 2001 of euro 877 million, of which euro 684 million were not yet due. The transaction is fully described in the notes to the financial statements of Telecom Italia S.p.A. to which reference should be made.

Net invested capital of euro 32,784 million (euro 35,553 million at December 31, 2000), is financed by shareholders' equity for 48.4% and net borrowings for 51.6%.

Shareholders' equity went from euro 18,714 million at December 31, 2000 to euro 15,871 million at the end of 2001. The reduction of euro 2,843 million is due to:

(in millions of euro)	2001	2000
At January 1	**18,714**	**18,374**
Net income	151	2,559
Portion of capital grants available	15	16
Dividends paid out	(2,309)	(2,327)
Cancellation of the reserve for treasury stock in portfolio	(711)	-
Increase in paid-in-capital	10	-
Share capital increase	188	-
Reduction in revaluation reserve Law 72, 3/19/83	(187)	-
Increase in other reserves	-	92
At December 31	**15,871**	**18,714**

Net debt totals euro 16,913 million (euro 16,839 million at December 31, 2000) and is substantially in line with that at December 31, 2000, thanks to the equilibrium between the following factors:
requirements for:
- financial investments;
- distribution of dividends;

financed by:
- sale of investments in the former satellite consortiums;
- effect of securitization transaction;
- cash flows provided by operating activities.

The composition of debt has changed as a result of the issue of four Telecom Italia notes for a total of euro 8,250 million, thus making it possible to consolidate a significant portion of short-term borrowings.

The above notes refer to:

- three issues for a total of euro 6,750 million, at a fixed interest rate, subscribed to entirely by Sogerim; the first on May 31, 2001 for euro 3,300 million, the second on August 3, 2001 for euro 3,000 million and the third on December 28, 2001 for euro 450 million.
- one issue on December 21, 2001 placed on the market and listed on the Luxembourg stock exchange for euro 1,500 million, at a floating interest rate.

Gross debt at December 31, 2001 totals euro 17,909 million (euro 18,901 million at December 31, 2000); details are provided in the following table:

	12/31/2001						12/31/2000	
(in millions of euro)	Euro	%	Currency	%	Total	%	Total	%
Medium/long-term debt	10,055	57	316	78	10,371	58	3,188	17
Short-term borrowings	7,449	43	89	22	7,538	42	15,713	83
Total	**17,504**	**100**	**405**	**100**	**17,909**	**100**	**18,901**	**100**

The previously mentioned transaction for the securitization of receivables led in an improvement in net debt at December 31, 2001 of euro 848 million.

(*) Restated statement of income for the year ended December 31, 2000 giving effect to the valuation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements have been prepared in accordance with the provisions of the Italian Civil Code and are also accompanied by the Report on the Group's operations together with the Report on Telecom Italia.
The consolidated statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these Notes to consolidated financial statements pursuant to Article 29, Section 3 of Legislative Decree No. 127/1991.
The scope and principles of consolidation, the summary of significant accounting policies, along with the composition and changes in the individual components of the consolidated financial statements are set out below.

SCOPE OF CONSOLIDATION

The scope of the consolidation at December 31, 2001 includes the Italian and foreign companies listed in Annex 5, in which the Telecom Italia holds a majority of voting rights, and all other companies in which it exercises a dominant influence.

The companies in which Telecom Italia holds between a 20% and 50% investment in share capital, including jointly controlled companies, have been accounted for using the equity method.

Beginning from the financial statements for the year ended December 31, 2001, Nortel Inversora and the Telecom Argentina group (Nortel Inversora group), which in 2000 were consolidated proportionally as allowed by art. 37 of Legislative Decree No. 127/1991, have been accounted for using the equity method.

For purposes of comparison, the most important changes in the balance sheet and statement of income components are also shown in comparison to 2000 data which have been restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

The following changes have taken place in the scope of consolidation since December 31, 2000:
a) added to the scope of consolidation:
- for *Domestic Wireline*: the new companies set up during the year for the Latin American Nautilus and Mediterranean Nautilus projects, Telecom Italia Spain, TI Telecom Italia (Austria) Telekommunikationsdienste and Telecontact Center;
- for *Mobile Services*: TIM Brasil, TIM Celular Centro Sul (former-Blucel), TIM Sao Paulo (former-Starcel) and TIM Rio Norte (former-Unicel);
- for *Internet and Media*: the companies Free-Finance, Xoom.it, the groups Consodata, Telegate, TDL Infomedia and Holding Media e Comunicazione (former-Cecchi Gori Communications), NetCreations and some companies in the publishing and professional communications sector;
- for *International Operations*: Entel Chile group, and in the Jet Multimedia group, Victoire Multimedia, Victoire Multimedia Informatique;
- for *IT Services*: Webred and Netikos Finland;
- for *Satellite Services*: Telespazio North America and e-Geos;
- for *Telecom Italia Lab*: Loquendo, Telecom Italia Lab S.A., Telecom Italia Lab General Partner;
- for the "other" operations: ISM and N.V. Vertico.

Moreover, the groups Seat Pagine Gialle, Jet Multimedia, Mageos Explorer (former-Europe Explorer) and Maxitel and the companies Corporacion Digitel and Eustema, whose balance sheets only were consolidated at December 31, 2000, have now been fully consolidated line-by-line, including the statement of income.
a) eliminated from the scope of consolidation:
- for *Domestic Wireline*: TMI Hong Kong and TMI Hungary;
- for *Mobile Services*: U-Mobil;
- for *Internet and Media*: Polix, Consodata Interactive, Consodata Italia, Consodata Systeme, Living Lifestyle and companies in the Thomson Directories group;
- for *International Operations*: Nortel Inversora, Telecom Argentina group, Infoconcert and Iber Explorer;
- for *IT Services*: Bisiel, Aska, Jmac Consiel and Sit;
- for *Satellite Services*: Com.star, Iridium Italia and Telespazio Ireland.

Furthermore, in 2000, for the Sirti and Italtel groups, only their statements of income were consolidated since they were sold towards the end of the year.

Annexes 6 and 7 list those subsidiaries excluded from consolidation for the following reasons: their inclusion would not have been material for purposes of a true and fair representation of the consolidated financial statements and/or because they were not operational or in liquidation.

At December 31, 2001, Telecom Italia's subsidiaries and affiliates listed in Annexes 5 to 7, were categorized as follows:

	Subsidiaries			Affiliates			
	Italy	Abroad	Total	Italy	Abroad	Total	Total
Companies:							
consolidated line-by-line	107	197	304				304
valued by the equity method	2	9	11	57	91	148	159
valued at cost	30	33	63	24	11	35	98
Total companies	**139**	**239**	**378**	**81**	**102**	**183**	**561**

■ SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements used for consolidation purposes are those of each consolidated company at December 31, 2001, approved by the respective boards, and adjusted where necessary to conform to the accounting principles adopted by the parent company Telecom Italia.

The financial statements expressed in foreign currency have been translated into euro by applying the average annual exchange rate to the individual items of the statement of income and the year-end exchange rate to the items of the balance sheet.

The difference arising from the translation of beginning shareholders' equity and the net result for the year at the year-end exchange rate is recorded in the reserves under consolidated shareholders' equity.

For the consolidated subsidiaries and affiliates which use inflation accounting to eliminate distorting effects on the results for the year, the statements of income have been translated at the year-end exchange rates instead of at the average rates. The companies in the Group which apply inflation accounting principles are Corporacion Digitel C.A. (Venezuela), Finsiel Romania S.r.l. (Romania) and IS TIM Telekomunikasyon Hizmetleri A.S. (Turkey).

As regards the evolution of the economic situation in Argentina, which led to significant exchange fluctuations after parity with the US dollar was abandoned, the financial statements expressed in Argentine pesos have been translated by applying the average exchange rate of Argentine peso 1 = US$ 1 to the statement of income, except for exchange differences originating from items in currencies other than the peso that were translated in euro, at the same exchange rate as the balance sheet of Argentine peso 1.7 = US$ 1.

The exchange rates used are those presented in "Other information".

All subsidiaries included in the scope of consolidation have been consolidated using the line-by-line method, which can be summarized as follows:

a) assumption of the total amount of assets, liabilities, revenues and expenses, regardless of the interest held, separately showing the minority interest in shareholders' equity and net income;

b) the difference arising from the elimination of the carrying value of an investment in a company included in the scope of consolidation against the underlying share of the shareholders' equity at the date of acquisition is allocated, where possible, to the assets and liabilities of the company. Any residual amount is treated as follows:
   - if positive, it is recorded in "consolidation difference" under "intangible assets" and is amortized on the straight-line method over the estimated time required to recover the amount and, in any case, not more than a period of 15 years;
   - if negative, it is recorded in shareholders' equity as "consolidation reserve", or, when the amount is due to expectations of unfavorable financial results, to "consolidation reserve for future risks and charges";

c) elimination of receivables and payables, as well as expenses and revenues among consolidated companies;

d) elimination of profit included in fixed assets and intangible assets which stem from intraGroup purchases of goods and services at market prices. The portion of intraGroup revenues referring to the above goods and services has been reclassified, net of intraGroup profit, to the item "increase in capitalized internal construction costs".

Provisions and value adjustments made by individual consolidated companies exclusively for the purpose of securing tax benefits allowed by law have also been eliminated from the consolidated financial statements.

■ ACCOUNTING PRINCIPLES

The accounting principles adopted in preparing the consolidated financial statements conform to the law and have been applied on a basis consistent with the prior year.
The accounting principles are set out below:

■ Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit. When full recovery of the investments is not expected, appropriate writedowns are made.

■ Fixed assets

Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include inflation adjustments made on the basis of the law.
Fixed assets are written down when there is a permanent impairment to below their net book value. Such amount will be reversed in subsequent years if the underlying assumptions are no longer correct.
Construction in progress is stated at the amount of direct costs incurred.

■ Equity investments

Equity investments considered long-term in nature are recorded in long-term investments or, if acquired for subsequent sale, recorded in short-term financial assets.
Long-term equity investments in unconsolidated subsidiaries and affiliated companies are normally valued by the equity method; positive differences arising upon acquisition, between the carrying value of the investments in said companies and the underlying share of net equity at current values, are included in the value of the investments and amortized on the straight-line method over their expected period of recoverability and, in any case, for a period not exceeding 15 years. Such amortization is charged to the statement of income in "value adjustments to financial assets" under writedowns of investments.
Other long-term investments in unconsolidated subsidiaries are recorded at acquisition or subscription cost, including incidental costs, adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.
In the case of a permanent impairment, the value of such investments is written down and the impairment in value in excess of the corresponding carrying value is recorded in "reserves for risks and charges".
Contracts for the loan of securities are represented in the financial statements as two functionally related transactions: a loan and a "repurchase transaction" on the securities with the obligation of the borrower to resell them at maturity. Accordingly, "Other receivables" and "Other liabilities" include, respectively, a receivable and a payable of the same amount at the fixed amount of the contract (market price of stock at the date of delivery of the securities).
Equity investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost and realizable value, based on the year-end stock market prices.
Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.

■ Other securities (other than equity investments)

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.
Securities held as long-term investments are valued at cost, adjusted by any permanent impairment in value.
Securities included in current assets are valued at the lower of cost of acquisition and realizable value based on market prices.
Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.
Securities acquired under "repurchase agreements", for which the obligation exists to resell them at maturity, are included at purchase cost in receivables under short-term financial assets. The difference between the sales price and the purchase price is allocated to income as it accrues with a contra-entry to accrued income/expense in the balance sheet.

■ Inventories

Inventories are valued at the lower of purchase or production cost and market.
The methods mainly used in computing cost are the following:
- raw materials and finished goods: LIFO with annual adjustments;
- merchandise: weighted average;
- work in progress and semifinished goods: production cost;

- contract work in process:
  - contracts covering less than 12 months: industrial cost;
  - contracts covering more than one year: at estimated revenues using the percentage of completion method.

In determining the value of contract work in process, anticipated losses upon completion and any other risks are also taken into account.
Inventories of raw materials, finished goods and merchandise which exceed foreseeable manufacturing requirements or have become obsolete are written down to their estimated realizable value.

■ Accounts receivable and liabilities

Receivables are stated at the estimated realizable value and classified under long-term investments or current assets. Liabilities are shown at their nominal value.
Accounts receivable and liabilities in foreign currency, based on the concept of prudence, are recorded at the year-end exchange rates. The positive and negative differences between the balance of accounts receivable and liabilities converted at year-end exchange rates and their balance at the original exchange rates are recorded in the statement of income, respectively, in "*financial income*" and "*financial expense*".
Receivables and payables in Argentine pesos are adjusted at the exchange rate of Argentine peso 1.7 = US$ 1.

■ Accruals and deferrals

These items are recorded on the accrual basis.

■ Reserves for risks and charges

"*For taxes*": this reserve includes prudent provisions for estimated tax charges, including any surtaxes and late payment interest, on positions not yet agreed or in dispute.
"*For deferred taxes*": this reserve includes deferred taxes calculated on the timing differences of the individual consolidated companies between the value attributed to assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes, as well as those generated by consolidation adjustments.
Deferred tax assets are recorded among "*other receivables*" in current assets.
Deferred tax assets and deferred tax liabilities are set off, whenever the assumptions for doing so exist.
Deferred taxes on reserves on which taxation has been deferred, regarding consolidated companies or companies valued by the equity method, are recorded when such reserves are expected to be distributed or otherwise used and their distribution or utilization will give rise to tax charges.
The tax benefit of tax loss carryforwards is recorded whenever there is reasonable expectation of realization.
"*Other reserves*" relate primarily to provisions to cover charges of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data.

■ Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws and collective bargaining agreements and includes the liability matured at the end of the year in favor of all personnel employed by the Italian consolidated companies, net of advances paid.

■ Employee benefit obligations under Law No. 58/1992

Employee benefit obligations, as required by Law No. 58/1992, are accounted for on a cash basis, as described in the notes to financial statements of the Telecom Italia. The remaining liability for such obligations, payable in fifteen deferred annual installments on the basis of the statement updated to December 31, 2001 by the National Social Security Institute (INPS) and according to its interpretation, amounts to euro 1,347 million, divided as follows:
a) euro 910 million for the principal amount (except for the portion attributable to former Iritel employees);
b) euro 437 million for accrued interest.
As regards pre-amortization interest and the related accrued interest, as described in the Notes to the financial statements of Telecom Italia, in compliance with the sentence handed down by the Court of Appeals, No. 4242 of April 5, 2000, payment (for a residual amount of euro 407 million) has been suspended as from June 2000.

The consolidated balance sheet also includes euro 656 million due to INPS, relating to the estimate for the employees of the former State Company for Telephone Services (ASST) made by the special Ministerial Commission established under Law No. 58/1992, upon the contribution of the assets of the Post and Telecommunications Administration to Iritel.

The employee benefit obligations to guarantee uniform insurance status recorded in the consolidated statement of income for the year 2001 (under "extraordinary expense") amount to euro 155 million inclusive of accrued and pre-amortization interest.

- Grants

Operating grants (directly credited to the statement of income) and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures.
Specifically, capital grants are recorded in deferred income and recognized in future years in the statement of income in relation to the amount of depreciation taken on the underlying assets to which the grants refer.

- Revenues and expenses

Revenues and expenses are recorded on an accrual basis and recognized in the consolidated statement of income as follows:
a) telecommunications services: in the year in which the services are rendered; in particular traffic revenues are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost;
bi information technology and innovative network services, other activities: to the extent to which the connected services were rendered during the fiscal year.

- Leased assets

Assets covered by finance lease contracts with a purchase option are recorded in fixed assets and depreciated from the date of the lease contract using rates consistent with those used for similarly owned assets. At the same time, a liability is recorded for the same amount, adjusted by the principal lease payments. The statement of income is charged for the financial expenses for the period and the depreciation charge on the assets acquired in leasing.

- Income taxes

Current income taxes are computed on the basis of a realistic estimate of the income tax charge according to the tax laws of the country; the related income tax payable is shown net of payments on account, withholding taxes and tax credits in "income taxes payable". Any net receivable position is shown in "other receivables".

- Memorandum accounts

"Collateral and guarantees provided" are recorded for an amount equal to the guarantee provided; those in foreign currencies are translated at year-end exchange rates.
"Purchases and sales commitments" are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".
"Other memorandum accounts" mainly refer to assets of third parties held by consolidated subsidiaries.

- Financial derivatives

Financial derivative contracts are used by the Group to hedge exposure to interest rate and exchange rate risks. They are valued consistently with the underlying asset and liability positions and any net expenses connected with each single transaction are recognized in the statement of income.

For financial instruments used to hedge interest rate risks, the interest differentials are recorded in the statement of income in "financial income and expense" based on the accrual principle.
For financial instruments used to hedge exchange rate risks, the cost (or "financial component" calculated as the difference between the rate at the date of stipulating the contract and the forward rate) is recorded in the statement of income in "financial income and expense" based on the accrual principle.

CONSOLIDATED BALANCE SHEETS

ASSETS

INTANGIBLES ASSETS

euro 16,197 million

(euro 16,037 million at December 31, 2000)

Intangible assets increased by euro 160 million compared to December 31, 2000. A breakdown of the composition and the changes in this account are provided below:

(in millions of euro)	12/31/2000	Deconsolidation Nortel Inv. group	12/31/2000 (*)	Additions	Amortization	Other changes	12/31/2001
Start-up and expansion costs	100	-	100	39	(36)	1	104
Industrial patents and intellectual property rights	819	(10)	809	483	(955)	937	1,274
Concessions, licenses, trademarks and similar rights	3,505	(190)	3,315	1,142	(84)	(66)	4,307
Goodwill	69	-	69	3	(12)	(13)	47
Consolidation difference	10,230	(128)	10,102	1,174	(1,022)	(1,160)	9,094
Work in progress and advances to suppliers	840	-	840	1,018	-	(984)	874
Other intangibles	474	(138)	336	51	(132)	242	497
Total	**16,037**	**(466)**	**15,571**	**3,910**	**(2,241)**	**(1,043)**	**16,197**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

- Start-up and expansion costs

Start-up and expansion costs refer primarily to registration fees paid when consolidated companies are established or when their capital is increased.

- Industrial patents and intellectual property rights

Industrial patents and intellectual property rights consist mainly of applications software either owned outright or acquired under a license for an unspecified period of time.

- Concessions, licenses, trademarks and similar rights

Concessions, licenses, trademarks and similar rights increased by euro 802 million mainly as a result of the acquisition of new licenses in Brazil and Greece (euro 1,080 million).

- Consolidation difference

The *consolidation difference* decreased by euro 1,136 million since the end of 2000, mainly due to:

- writedowns to adjust the value of the following investments:

(in millions of euro)	
International operations of the International Operations BU	764
International operations of the Mobile Services BU	392
Operations of Internet and Media BU	147
Total	**1,303**

- amortization charge for the year (euro 1,022 million).

The remaining amount of euro 9,094 million mainly refers to Seat Pagine Gialle (euro 5,882 million), Entel Chile (euro 799 million), TIM (euro 798 million), Corporacion Digitel (euro 337 million), TDL Infomedia (euro 310 million) and Holding Media e Comunicazione (euro 184 million).

- Work in progress and advances to suppliers

Work in progress and advances to suppliers increased by euro 34 million, compared to December 31, 2000, and represent the difference between the capitalization of costs incurred mainly by Telecom Italia for software development projects in progress and the projects which came into use during the year.

- Other intangibles

Other intangibles, totaling euro 497 million (euro 474 million at December 31, 2000), include euro 231 million (euro 261 million at December 31, 2000) of leasehold improvements.

■ FIXED ASSETS

euro 21,757 million

(euro 23,425 million at December 31, 2000)

Fixed assets decreased by euro 1,668 million compared to the end of 2000. They are shown net of depreciation and writedowns and have been adjusted to eliminate intraGroup profits generated by purchases of internally produced goods and services by the Group. An analysis of fixed assets is provided in the following table:

	Owned assets			Leased assets					
(in millions of euro)	Gross value	Accumulated depreciation	Total	Gross value	Accumulated depreciation	Total	12/31/2001 Total	12/31/2000(*) Net book value	12/31/2000 Net book value
Land and buildings	3,942	(1,514)	2,428	549	(100)	449	2,877	2,656	2,947
Plant and machinery	57,023	(40,404)	16,619	59	(29)	30	16,649	16,299	18,126
Manufacturing and distribution equipment	985	(912)	73	2	(2)	-	73	79	78
Other fixed assets	1,929	(1,287)	642	107	(18)	89	731	600	836
Construction in progress and advances to suppliers	1,345	-	1,345	82	-	82	1,427	1,087	1,438
Total	**65,224**	**(44,117)**	**21,107**	**799**	**(149)**	**650**	**21,757**	**20,721**	**23,425**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

The gross value of fixed assets includes euro 1,301 million of monetary revaluations made by the Italian companies.

Accumulated depreciation covered 65.9% of gross fixed assets, compared to 68.5% at the end of last year.

A summary of the changes in fixed assets during the year is shown in the following table:

(in millions of euro)	2001	2000 (*)	2000
At January 1	**20,721**	**23,508**	**23,508**
Additions	4,254	3,405	3,889
Disposals	(172)	(95)	(103)
Sale of "Large Buildings" business segment		(2,392)	(2,392)
Depreciation for the year	(4,034)	(4,131)	(4,515)
Writedowns	(11)	(11)	(11)
Change in the scope of consolidation	1,345	367	2,978
Translation adjustment and other	(346)	70	71
At December 31	**21,757**	**20,721**	**23,425**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Additions for the year amounted to euro 4,254 million (euro 3,889 million in 2000), with an increase of euro 365 million compared to 2000. Details by Business Unit are as follows:

(in millions of euro)	2001	2000 (*)	2000
Domestic Wireline	1,976	1,917	1,917
Mobile Services	1,547	1,194	1,194
Internet and Media	82	55	55
International Operations	427	95	579

Telecom Italia Lab	12	29	29
	4,158	**3,402**	**3,886**
Other operations and intraGroup eliminations	96	3	3
Total	**4,254**	**3,405**	**3,889**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

■ LONG-TERM INVESTMENTS

euro 7,064 million

(euro 8,675 million at December 31, 2000)

Long-term investments, which decreased by euro 1,611 million from December 31, 2000, include the following:

(in millions of euro)	12/31/2001	12/31/2000 (*)	12/31/2000
Equity investments in:			
unconsolidated subsidiaries	18	21	21
affiliated companies	4,764	7,589	7,199
other companies	145	188	191
	4,927	7,798	7,411
Advances on future capital contributions	1,659	187	187
	6,586	**7,985**	**7,598**
Accounts receivable:			
unconsolidated subsidiaries	2	-	-
affiliated companies	117	127	127
other receivables	273	279	282
	392	**406**	**409**
Other securities	86	3	6
Treasury stock	-	662	662
Total	**7,064**	**9,056**	**8,675**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

■ Equity investments in affiliated companies

Equity investments in affiliated companies, amounting to euro 4,764 million, decreased by euro 2,435 million since December 31, 2000 chiefly due to the consolidation of the Entel Chile group and the Holding Media e Comunicazione group and the writedown of foreign investment holdings according to the strategic guidelines of the plan recently drawn up by the new management.

Equity investments in affiliated companies refer to the following:

(in millions of euro)	12/31/2000	Additions	Disposals	Change in scope of consolidation	Extraordinary writedowns	Valuation using equity method (*)	12/31/2001
Telekom Austria	1,819				(225)	(134)	1,460
Auna	509	460	(91)			(188)	690
GLB Serviços Interativos	809				(586)	(199)	24
Etec S.A.	538					13	551
Mobilkom Austria	586					(42)	544

Stream	100	173				(241)	32
Mondus	57					(39)	18
Other	144	152	(47)		(66)	(4)	179
Total	**7,199**	**1,382**	**(711)**	**(107)**	**(1,078)**	**(1,921)**	**4,764**

(*) Includes the share of earnings or losses for the period, amortization of goodwill and adjustments on the translation of foreign currency financial statements.

The investments valued by the equity method include the unamortized portion (euro 1,688 million, against euro 2,915 million at December 31, 2000) of the excess of book values over the corresponding share of the underlying shareholders' equity at the time of purchase. The excess mainly refers to Telekom Austria (euro 677 million), Mobilkom Austria (euro 280 million), Auna (euro 253 million), BDT (euro 121 million), Etec S.A. (euro 106 million) and Netco Redes (euro 103 million).
A list of the companies valued by the equity method is provided in Annex 6; equity investments in unconsolidated subsidiaries and affiliates are listed in Annex 7.

- Advances on future capital contributions
  Mainly refer to advances made by Tim International to IS TIM.

- Accounts receivable from affiliated companies
  Mainly refer to loans made to foreign affiliates, in particular, to BDT (euro 108 million).

- Other receivables
  Included the revalued amount of the tax receivable from the prepayment of the tax on the reserve for employee severance indemnities (euro 112 million), loans to employees (euro 87 million), loans to other companies and security deposits.

- Other securities
  Increased by euro 80 million from December 31, 2000, mainly due to the investments made in the Wisequity S.p.A. closed mutual fund by Seat Pagine Gialle (euro 53 million).

- Treasury stock
  Telecom Italia No. 112,998,070 shares was cancelled subsequent to the bonus increase in share capital at the time the capital was re-denominated in euro.

CURRENT ASSETS

■ INVENTORIES

euro 636 million

(euro 725 million at December 31, 2000)

Inventories include the following:

(in millions of euro)	12/31/2001	12/31/2000 (*)	12/31/2000
Raw materials and supplies	22	20	21
Merchandise	253	169	214
	275	**189**	**235**
Work in progress and semifinished goods	6	10	13
Finished goods	2	1	2
	8	**11**	**15**
Contract work in process	352	467	467
Advances to suppliers	1	8	8
	353	**475**	**475**
Total	**636**	**675**	**725**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Inventories are held by companies providing telecommunications services for euro 245 million (euro 233 million at December 31, 2000), companies providing information technology services for euro 229 million (euro 217 million at December 31, 2000) and companies in the satellite sector for euro 113 million (euro 224 million at December 31, 2000). "Raw materials and supplies and "work in progress and semifinished goods" are substantially in line with current costs.

■ ACCOUNTS RECEIVABLE

euro 13,027 million

(euro 11,883 million at December 31, 2000)

A breakdown of accounts receivable, which increased by euro 1,144 million, is provided below:

(in millions of euro)	12/31/2001	12/31/2000 (*)	12/31/2000
Trade accounts receivable	8,712	8,208	8,737
- allowance for doubtful accounts	(808)	(671)	(740)
Total trade accounts receivable	7,904	7,537	7,997
Accounts receivable from unconsolidated subsidiaries	31	41	41
Accounts receivable from affiliated companies	567	435	413
Accounts receivable from parent companies	1	2	3
Other receivables	4,524	3,364	3,429
Total	**13,027**	**11,379**	**11,883**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

■ Trade accounts receivable

Gross *trade accounts receivable* totaled euro 8,712 million and consist, for the most part, of receivables for telecommunications services. Receivables have been adjusted to estimated realizable value by writedowns and they, too, refer mostly to telecommunications companies. Trade accounts receivable refer, in particular, to Telecom Italia (euro 4,242 million), TIM (euro 917 million) and Seat Pagine Gialle group (euro 885 million).

This caption also includes euro 1,610 million of receivables from other telecommunications carriers and euro 122 million of services to be performed by Seat Pagine Gialle representing the advertising commitments undertaken and invoiced by the company for directories that will be published in 2002. The same amount is recorded in other liabilities.

Furthermore, the securitization of receivables by Telecom Italia led to a reduction in trade accounts receivable at December 31, of euro 877 million, of which euro 684 million were not yet due.

During 2001, TIM sold trade accounts receivable under factoring arrangements for euro 3,297 million. At December 31, 2001, receivables sold and not yet due totaled euro 106 million.

■ Accounts receivable from unconsolidated subsidiaries

Include loans of euro 7 million and trade accounts receivables from subsidiary companies of euro 10 million.

■ Accounts receivable from affiliated companies

Increase of euro 154 million and they refer to financial receivables for euro 206 million, and trade and other receivables for euro 361 million. Financial receivables mainly refer to Stream (euro 122 million), IS TIM (euro 29 million) and Telekom Srbija (euro 23 million), while trade and other receivables chiefly refer to the Auna group (euro 90 million), Stream (euro 82 million), Telekom Srbija (euro 56 million), Telecom Argentina (euro 21 million) and Teleleasing (euro 18 million).

■ Other receivables

Included the following:

- financial receivables of euro 591 million (euro 935 million at December 31, 2000), almost entirely in reference to the loan of securities by Telecom Italia, covered by the specific guarantee contracts;
- other receivables totaling euro 3,933 million (euro 2,494 million at December 31, 2000), which referred to the following:

(in millions of euro)	12/31/2001	12/31/2000
Government and other public entities for subsidies and grants	45	42
Customer payments in transit	210	187
Receivables from the Tax Administration	1,544	576
Deferred tax assets	1,410	996
Receivables relating to personnel	93	79
Other receivables (from the Government, other public entities and other miscellaneous items) in transit	631	614
Total	**3,933**	**2,494**

Net deferred tax assets are composed as follows:

(in millions of euro)	12/31/2001	12/31/2000
Deferred tax assets	1,410	996
Reserve for deferred taxes	(35)	(201)
Total	**1,375**	**795**

Deferred tax assets mainly refer to the writedowns of receivables and the reserves for risks and charges; deferred tax liabilities mainly originated from gains.

No deferred tax assets have been set aside because of uncertainty over their recoverability against future taxable profits. In particular, tax loss carryforwards, which have not been considered in the determination of deferred tax assets, amount to some euro 5,970 million, of which about euro 2,256 million can be utilized under the known circumstances.

■ SHORT-TERM FINANCIAL ASSETS

euro 2,194 million

(euro 2,457 million at December 31, 2000)

This item, which decreased by euro 263 million compared to December 31, 2000, includes the following:

(in millions of euro)	12/31/2001	12/31/2000 (*)	12/31/2000
Equity investments in unconsolidated subsidiaries	247	392	392
Equity investments in affiliated companies	-	6	6
Other equity investments	9	38	38
Other securities	1,935	1,869	2,020
Receivables for sale of securities	3	1	1
Total	**2,194**	**2,306**	**2,457**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Equity investments refer mainly to listed shares purchased for trading.

■ Other securities

Other securities, which consist almost entirely of government securities and bonds, decreased by euro 85 million compared to December 31, 2000.

The carrying values of both equity investments and other securities have been adjusted by euro 291 million to approximate market values at year end.

■ LIQUID ASSETS

euro 762 million

(euro 1,304 million at December 31, 2000)

Liquid assets decreased by euro 542 million. They consist mainly of funds on deposit in Italian and foreign banks on current accounts.

ACCRUED INCOME AND PREPAID EXPENSES

euro 1,032 million

(euro 1,007 million at December 31, 2000)

This item, which increased by euro 25 million, can be analyzed as follows:

(in millions of euro)	12/31/2001	12/31/2000 (*)	12/31/2000
Issue discounts and similar charges	**94**	**2**	**2**
Accrued income:			
- production value	95	12	12
- financial income	57	60	60
- other	-	-	-
Total accrued income	152	72	72
Other prepaid expenses:			
- production costs	127	83	100
- financial expense	60	77	77
- other	599	756	756
Total other prepaid expenses	786	916	933
Accrued income and other prepaid expenses	**938**	**988**	**1.005**
Total	**1,032**	**990**	**1,007**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Other prepaid expenses decreased primarily as a result of the charge to the statement of income for the portion of expenses on the deferral of the put option on Seat Pagine Gialle shares referring to the current year.

An analysis of accounts receivable and accrued income by maturity and type is provided in Annex 1.

■ LIABILITIES AND SHAREHOLDERS' EQUITY

SHAREHOLDERS' EQUITY

euro 19,309 million

(euro 25,529 million at December 31, 2000)

A breakdown of shareholders' equity is presented below:

(in millions of euro)	12/31/2001	12/31/2000 (*)	12/31/2000
Parent company interest	13,522	18,821	18,821
Minority interest	5,787	5,871	6,708
Total	**19,309**	**24,692**	**25,529**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Telecom Italia's interest in shareholders' equity decreased by euro 5,299 million compared to December 31, 2000. The reduction was due mainly to the payment of the dividends relating to the fiscal year 2000 (euro 2,309 million), the net result for the year (- euro 2,068 million), the cancellation of No. 112,998,070 savings shares of treasury stock by Telecom Italia at the time of the re-denomination of share capital in euro (euro 662 million at December 31, 2000 in addition to euro 49 million for purchases in the early months of 2001) as well as the decrease in the net equities of some foreign companies as a result of the unfavorable trend of the local currency against the euro.

■ SHARE CAPITAL

The *share capital of Telecom Italia* consists of 5,261,533,481 ordinary shares and 2,053,122,025 savings shares, both with a par value of euro 0.55 each.

■ PARENT COMPANY INTEREST IN RESERVES AND RETAINED EARNINGS

Parent company interest in *reserves and retained earnings* includes Telecom Italia's own retained earnings and reserves, as well as the consolidated companies' retained earnings and inflation adjustment reserves and tax-deferred reserves. No deferred taxes have been provided on the latter reserves since, based on current plans, no transactions are expected to be entered into that would warrant taxation.

The reconciliation of Telecom Italia's financial statements with the consolidated financial statements as regards shareholders' equity and net result for the year, and the changes in the components of consolidated shareholders' equity, are provided in Annexes 3 and 4.

RESERVES FOR RISKS AND CHARGES

euro 3,053 million

(euro 1,768 million at December 31, 2000)

These reserves increased by euro 1,285 million from December 31, 2000 and refer to the following:

- Reserve for taxes
  Amounting to euro 154 million, mainly consists of estimated tax liabilities on positions still to be agreed or in dispute;

- Reserve for deferred taxes
  Amounting to euro 35 million (- euro 166 million compared to December 31, 2000), includes deferred taxes provided by the individual consolidated companies on the income components subject to deferred taxation and on consolidation adjustments; the reserve practically shows a nil balance;

■ Other reserves

Amounting to euro 2,815 million, increased by euro 1,422 million compared to December 31, 2000.

They include:

- the reserve for the losses of subsidiaries and affiliates of euro 603 million for extraordinary provisions set aside on the basis of the strategic guidelines of recent plans;
- the reserve for forward purchase commitments regarding Seat Pagine Gialle shares of euro 569 million provided to cover the estimate of the nonrecoverability of the original price to exercise the option;
- the reserves for contractual risks and other risks of Telecom Italia for a total of euro 590 million provided in previous years and in the current year, relating to the contribution of the business segment "Large Buildings", the sales of Italtel and Sirti, the sale of the satellite consortiums and the agreement with Vivendi/CanalPlus for transfer of the investment in Stream;
- the reserves for the technological revisions and risks inherent to the regulatory framework of TIM for euro 465 million.

RESERVE FOR EMPLOYEE TERMINATION INDEMNITIES

euro 1,350 million

(euro 1,319 million at December 31, 2000)

A breakdown of the changes during the year is provided below:

(in millions of euro)	
At January 1, 2001	**1,319**
Change during year:	
- provisions charged to income	211
- utilization for:	
indemnities paid to employees	(127)
advances	(18)
- other changes	(35)
At December 31, 2001	**1,350**

"Other changes" mainly refer to the change in the scope of consolidation.

LIABILITIES

euro 37,482 million

(euro 35,682 million at December 31, 2000)

A breakdown of liabilities, which increased by euro 1,800 million from December 31, 2000, is as follows:

	12/31/2001		12/31/2000(*)		12/31/2000	
(in millions of euro)	Financial payables	Trade accounts payable and other payables	Financial payables	Trade accounts payable and other payables	Financial payables	Trade accounts payable and other payables

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

■ Debentures

Debentures, which totaled euro 8,183 million and increased by euro 6,369 million from December 31, 2000, include the following:

- on April 10, 2001, notes were issued by Sogerim on international markets for euro 6,000 million. The issue was divided in three tranches: the first, equal to euro 1.000 million of floating rate notes, maturing on April 20, 2004; the second, equal to euro 3,000 million of fixed-rate notes, maturing on April 20, 2006; the third, equal to euro 2,000 million of fixed-rate notes, maturing on April 20, 2011.
- on December 21, 2001, Telecom Italia issued floating rate notes of euro 1,500 million (this is the first issue under the Global Medium-Term Note Program with Telecom Italia as the issuer). The maturity date is June 21, 2005 and the issuer can call in the notes at an earlier date at the face value beginning from the second year and at every coupon date for interest thereafter.
- notes maturing in 2003 issued by the Brazilian companies Tele Nordeste Celular and Tele Celular Sul for euro 196 million;
- notes maturing between 2002 and 2021 issued by Entel Chile for euro 102 million;
- notes maturing in 2002 issued by Softe through various financial institutions for a total of euro 174 million;
- notes maturing between 2009 and 2010 issued by the TDL Infomedia Ltd group for euro 211 million.

■ Convertible debentures

Include notes issued by Sogerim for euro 2,500 million convertible into TIM or Seat Pagine Gialle shares, with the right of issuer to pay off the amount due in cash. These are five-year notes and can be redeemed by the noteholders before maturity at the end of the third year after issue.

■ Due to banks

Of euro 10,235 million, are secured by mortgages for euro 37 million and liens and pledges for euro 686 million; they decreased, compared to December 31, 2000, by euro 6,561 million.

■ Due to other lenders

Of euro 2,163 million, increased by euro 474 million compared to December 31, 2000. They refer to loans payable to Cassa Depositi e Prestiti and IRI by Telecom Italia (euro 489 million), loans payable by Seat Pagine Gialle (euro 780 million) to Seat Pagine Gialle Finance S.r.l., a corporate vehicle, entirely owned by third parties, operating under Law No. 130/99 on securitization and a payable by Softe (euro 600 million) to Olivetti Finance N.V. negotiated on December 28, 2001 and due on May 28, 2002.

■ Advances

Advances, which totaled euro 388 million, increased by euro 18 million compared to December 31, 2000 and include advances received from customers of euro 311 million (of which euro 85 million is from Consorzio Telcal) and installment billings of euro 77 million.

■ Trade accounts payable

Of euro 6,226 million decreased by euro 555 million from December 31, 2000, mainly as a result of the reduction in payables by Telecom Italia (- euro 592 million). An amount of euro 131 million of these payables are secured by pledges on Maxitel shares, owned by TIM International and Bitel, and liens on installations guaranteeing the supply contracts with Ericsson. This item also includes euro 743 million of amounts due to other telecommunications operators.

■ Notes payable

Of euro 221 million, increased by euro 171 million and refer to the investment certificates issued by Seat Pagine Gialle as part of the securitization transaction.

■ Accounts payable to affiliated companies

Of euro 902 million, decreased by euro 370 million compared to the end of 2000. They include financial payables for euro 553 million, mainly to Teleleasing (euro 522 million) for financial lease contracts. Trade accounts payable and other payables amount to euro 349 million and are due to the Italtel group (euro 173 million), Siemens Informatica (euro 51 million) and Teleleasing (euro 42 million).

■ Taxes payable

Of euro 922 million decreased by euro 8 million compared to December 31, 2000. Taxes payable include euro 150 million for income taxes and euro 722 million for indirect taxes and withholding taxes paid by the companies as substitute taxpayers, as well as euro 50 million for medium/long-term financial debt relating to the agreement reached with the Tax Administration over the assessments received in 2001 by Telecom Italia.

■ Contributions to pension and social security institutions

Of euro 865 million, decreased by euro 69 million compared to December 31, 2000; they include amounts owed to social security and health institutions. This item includes euro 656 million payable to INPS for the remaining balance of the estimated charges assessed for employees of the former ASST pursuant to Law No. 58/1992.

■ Other liabilities

Of euro 4,851 million, decreased by euro 187 million compared to December 31, 2000. A breakdown is provided below:

(in millions of euro)	12/31/2001	12/31/2000
Customer-related items	1,650	1,684
Residual amounts due for equity investments	-	163
Employee-related items	631	805
Telecommunications license fee	1,034	615
Other financial items	1,108	1,536
Other recurring and miscellaneous items (contra-entries for accrued costs, accrued interest expense at December 31 and payable the following year, sundry payables, etc.)	428	235
Total	**4,851**	**5,038**

In particular, customer-related items consist of deposits paid by customers and pre-billed basic subscriber charges (mainly for January and February), as well as prepaid traffic. The item also includes other liabilities for services to be performed by Seat Pagine Gialle (euro 122 million). The financial items payable refer to Telecom Italia for euro 395 million, including the transaction for the loan of securities (euro 236 million), and also the TIM group for euro 670 million, relating to the remaining amounts payable on the UMTS licenses acquired in Italy and Greece and the PCS licenses in Brazil.

ACCRUED EXPENSES AND DEFERRED INCOME

euro 1,476 million

(euro 1,217 million at December 31, 2000)

A breakdown of accrued expenses and deferred income, which increased by euro 259 million over December 31, 2000, is as follows:

(in millions of euro)	12/31/2001	12/31/2000 (*)	12/31/2000
Accrued expenses:			
- production costs	51	43	43
- financial expense	352	146	185
- other charges	-	-	-
Total accrued expenses	403	189	228
Deferred income:			
- capital grants (unavailable amount)	349	426	426
- production value	452	342	342
- financial income	14	11	11
- other income	258	210	210
Total deferred income	1,073	989	989
Total	**1,476**	**1,178**	**1,217**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

An analysis of liabilities and accrued expenses by maturity and type is provided in Annex 2.

MEMORANDUM ACCOUNTS

Memorandum accounts at December 31, 2001 total euro 7,241 million and decreased, compared to December 31, 2000, by euro 829 million.

Memorandum accounts are detailed as follows:

(in millions of euro)	12/31/2001	12/31/2000
Guarantees provided	1,422	2,931
Collateral provided	163	3
Purchases and sales commitments	5,369	4,902
Other memorandum accounts	287	234
Total	**7,241**	**8,070**

GUARANTEES PROVIDED

Guarantees provided, net of counter-guarantees received of euro 567 million, total euro 1,422 million and mainly consist of sureties provided by the Telecom Italia and TIM on behalf of affiliated companies and others for medium/long-term loan transactions and guarantees on bids to acquire fixed line and mobile licenses abroad.

COLLATERAL PROVIDED

Collateral provided of euro 163 million refers to liens and mortgages on the assets of the companies included in consolidation. In particular, the collateral includes IS TIM shares pledged as guarantees by TIM International for the performance of the obligations covered by the supply contracts signed by IS TIM with Ericsson and Siemens.

PURCHASES AND SALES COMMITMENTS

Purchases and sales commitments outstanding at the end of the year of, respectively, euro 3,305 million (euro 4,826 million at December 31, 2000) and euro 2,064 million (euro 76 million at December 31, 2000), refer to commitments which do not fall within the normal operating cycle of the individual consolidated companies.
In particular, the purchases commitments refer to:

- Telecom Italia's commitment for the put option on Seat Pagine Gialle shares (euro 2,985 million); at the expiration date the purchase of Seat Pagine Gialle shares will require an entry to record the difference on consolidation equal to the purchase cost, recorded in commitments, less the underlying share of net equity at current values at that date.
  At December 31, 2001, the valuation of the forward purchase commitment of Seat Pagine Gialle shares led to a provision in the reserves for risks and charges (other reserves) of euro 569 million to cover the estimated nonrecoverability of the original price to exercise the option. This provision is in line with the cost deriving from the revised strike price (from euro 4.2 to euro 3.4 per share) after the put and call options were renegotiated with JPMorgan Chase on February 25, 2002. This is described in a note to the statutory financial statements of Telecom Italia, to which reference should be made.
- contractual commitment by Telecom Italia Lab S.A. (euro 113 million) to pay the remaining amounts subscribed to but not yet paid to four mutual funds specialized in financing emerging companies in telecommunication, Internet, Intranet and Broadband networks. The reduction of euro 1,521 million from December 31, 2000 is relative to the purchase of Entel Chile for euro 959 million during the first months of 2001 and Seat Pagine Gialle's commitment to purchase 40% of Webfin S.p.A. for euro 700 million which is no longer considered to exist because of the excessive expense which arose as a result of the unexpected loss in value of the company which operates in the Internet sector.

The sales commitments include the Group's commitment for the sale of the investment in the Spanish company Auna (euro 1,999 million).

■ OTHER MEMORANDUM ACCOUNTS

Other memorandum accounts of euro 287 million refer mainly to third-party assets held by the individual consolidated companies, mainly those in the information technology sector.

Furthermore:

- the consolidated companies of the Group issued weak letters of patronage totaling euro 241 million chiefly on behalf of unconsolidated subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements;
- assets held by third parties on loan, on deposit for safekeeping or for similar purposes amounted to euro 360 million and consist mainly of equipment leased to customers;
- collateral received amounted to euro 7 million;
- guarantees received amounted to euro 68 million;
- guarantees provided by others for obligations of the Group companies, which consist primarily of sureties to guarantee the performance of non-financial contractual obligations, totaled euro 608 million. They comprise euro 207 million for the surety policy replacing the security deposit for contracts with public agencies, issued by Fondiaria Assicurazioni S.p.A. on behalf of Raggruppamento Temporaneo di Imprese, of which Finsiel is the principal on behalf of the guaranteed agency (MIPAF - Ministero delle Politiche Agricole and Forestali) after having won the bid for the contract;
- the value of the stock of employees and private shareholders deposited on December 31, 2001 at the listed companies of the Group amounted to about euro 230 million;
- the total amount of Telecom Italia commitments at December 31, 2001 for building rental obligations to be paid to IM.SER under 21-year contracts was euro 3,678 million. The commitment from 2002 to 2006 is euro 185 million per year.

■ FINANCIAL DERIVATIVES

The Group uses derivatives mainly for the management of its debt positions, primarily interest rate swaps (IRS) and interest rate options (IRO) to reduce the interest rate exposure on fixed-rate and floating-rate bank loans and bonds, and cross-currency & interest rate swaps (CIRS) and currency forwards to convert various currency loans - mainly in US dollar and euro - into the functional currencies of the various subsidiaries.
The following table gives a description of the financial derivative contracts used to hedge medium/long-term debt positions of the Group, outstanding at December 31, 2001.

(in millions of euro)	**Notional amount/ Capital exchanged at 12/31/2001**
Interest rate swaps and interest rate options	5,979
Cross currency and interest rate swaps	1,847

IRSs and IROs involve or can involve the exchange of flows of interest calculated on the notional amount of reference at the agreed fixed or variable rates at the specified maturity date with the counterparts. This amount does not represent the amount exchanged between the parties and therefore does not constitute a measure of exposure to credit risk, which is instead limited to the amount of interest or interest differentials to be received at the interest date.
The same also applies to CIRSs which involve the exchange of capital, in the respective currencies of denomination, in addition to the settlement of periodic interest flows, at maturity and eventually at another date.

Furthermore, the counterparts to derivative contracts are only the best rated banks and financial institutions and continually monitored in order to minimize the risk of non-performance.

Besides the derivative contracts concluded as part of the management of debt exposure, at December 31, 2001, there were IRSs and CIRSs at the Luxembourg subsidiary Softe to hedge investments in notes and for cash management purposes for a principal amount of euro 2,084 million. Lastly, the subsidiary Sogerim has entered into transactions to hedge funds for cash management purposes for a principal amount of euro 368 million.

Finally, at December 31, 2001, Telecom Italia is carrying transactions to hedge interest rate and exchange risks on short-term loans for a total of euro 311 million, using forward rate agreements for euro 300 million and currency forwards for euro 11 million.

CONSOLIDATED STATEMENTS OF INCOME

PRODUCTION VALUE

euro 31,701 million

(euro 30,528 million in 2000)

Production value increased by euro 1,173 million (+3.8%; +10.6% compared to 2000, restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method). The main components of production value are described in the following paragraphs.

- Sales and service revenues

Amount to euro 30,818 million and show an increase of euro 1,907 million over 2000 (+6.6%; +13.4% compared to 2000, restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method). This growth is due to the positive performance of mobile telephone services and the contribution made by the new companies that were added to the scope of consolidation, in particular, the Entel Chile group (euro 1,247 million) and the Seat Pagine Gialle group (euro 1,707 million), which was partly offset by the exclusion from the scope of consolidation of the Nortel Inversora group and the companies in the manufacturing and installations sectors. A breakdown by Business Unit is presented below:

				Change	
(in millions of euro)	2001 (a)	2000 (*) (b)	2000 (c)	Amount (a)-(c)	%
Domestic Wireline	17,291	17,514	17,514	(223)	(1.3)
Mobile Services	10,250	9,418	9,418	832	8.8
Internet and Media	1,957	263	263	1,694	*
International Operations	1,879	505	2,292	(413)	(18.0)
IT Services	2,033	2,138	2,138	(105)	(4.9)
Satellite Services	648	340	340	308	90.6
Telecom Italia Lab	134	123	123	11	8.9
	34,192	**30,301**	**32,088**	**2,104**	**6.6**
Other operations and IntraGroup eliminations	(3,374)	(3,132)	(3,177)	(197)	6.2
Consolidated Group revenues	**30,818**	**27,169**	**28,911**	**1,907**	**6.6**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Revenues from telecommunications services are shown gross of the amount due to other carriers of euro 3,714 million (euro 2,790 million in 2000).

Revenues from foreign operations totaled euro 5,955 million (euro 5,874 million in 2000).

- Increases in capitalized internal construction costs

Totaled euro 581 million, with a decrease of euro 331 million, compared to 2000; they may be analyzed as follows:

(in millions of euro)	2001		2000 (*)		2000		Change
intragroup revenues from sales of systems		549		805		843	(294)
- personnel	14		13		23		
- financial expenses	3		9		41		
- materials and other costs	15	32	4	26	5	69	(37)
Total		**581**		**831**		**912**	**(331)**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

The financial expenses were charged to "construction in progress and advances to suppliers" in fixed assets.

■ Other revenues and income

Of euro 417 million (euro 426 million in 2000) include the following:

(in millions of euro)	2001	2000 (*)	2000	Change
- operating grants	24	20	20	4
- gains on disposal of intangibles and fixed assets	12	8	10	2
- portion of capital grants recorded in income	73	72	72	1
- other income	308	302	324	(16)
Total	**417**	**402**	**426**	**(9)**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

In particular:

- operating grants refer chiefly to the amounts bestowed by public institutions to defray the costs incurred for research, development and technological innovation;
- the portion of capital grants recorded in income represents the portion that became available during the year;
- other income from operations mainly includes charges to customers of the telecommunications services companies for the late payment of telephone bills (euro 112 million compared to euro 110 million in 2000).

PRODUCTION COST

euro 25,027 million

(euro 23,723 million in 2000)

Production cost increased by euro 1,304 million compared to 2000 (+5.5%; +12.5% compared to 2000, restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method). The main components of production value are described in the following paragraphs.

■ Raw materials, supplies and merchandise and costs for semifinished and finished goods

Raw materials, supplies and merchandise total euro 1,767 million (euro 2,011 million in 2000) and *semifinished and finished goods* amount to euro 205 million (euro 248 million in 2000). These costs, which represent purchases of raw materials and other goods to be used in operations, decreased by euro 287 million.

■ Services costs and cost for the use of property not owned

Services costs total euro 9,552 million (euro 8,394 million in 2000) and *cost for the use of property not owned* are euro 1,069 million (euro 798 million in 2000). Overall, these two items increased by euro 1,429 million, mainly due to the higher costs for the operation and development of mobile telecommunications (euro 516 million), higher costs sustained by Telecom Italia on the rentals of the buildings sold to IM.SER (euro 252 million) and the change in the scope of consolidation.

■ Personnel costs

Amount to euro 4,666 million (euro 5,025 million in 2000), including euro 3,546 million relating to companies which provide telecommunications services. The average cost per capita for the Group was euro 43 thousand (euro 40 thousand in 2000).

At December 31, 2001, employees of the Group numbered 109,956 (114,669 at December 31, 2000, 107,171 at December 31, 2000, restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method). This is a reduction of 4,713 owing to personnel turnover, particularly at Telecom Italia, and the effect of the change in the scope of consolidation. A breakdown of personnel by business unit is presented as follows:

	12/31/2001	12/31/2000 (*)	12/31/2000	Change
Domestic Wireline	58,406	62,782	62,782	(4,376)
Mobile Services	16,721	15,257	15,257	1,464
International Operations	7,307	2,572	10,070	(2,763)
Internet and Media	9,264	7,515	7,515	1,749
IT Services	11,288	12,005	12,005	(717)
Satellite Services	1,196	1,206	1,206	(10)
Telecom Italia Lab	1,422	1,287	1,287	135
Other operations	4,352	4,547	4,547	(195)
Total	**109,956**	**107,171**	**114,669**	**(4,713)**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

The equivalent average number of salaried employees was 107,491 in 2001 (124,696 in 2000).
A breakdown by category follows:

	2001
Executives	2,454
Middle management	6,379
Clerical staff	89,066
Technicians	9,592
Total	**107,491**

■ Amortization, depreciation and writedowns

Amounted to euro 6,730 million (euro 6,172 million in 2000), with an increase of euro 558 million. Details are as follows:

Amortization of intangible assets

Of euro 2,241 million, compared to euro 1,132 million in 2000, with an increase of euro 1,109 million. The change is due to a higher amortization charge for goodwill (+euro 842 million, of which euro 574 million relate to the acquisition of Seat Pagine Gialle, euro 102 million to the acquisition of Jet Multimedia and euro 99 million to the companies in the Seat Pagine Gialle group);

Depreciation of fixed assets

Of euro 4,034 million, compared to euro 4,515 million in 2000, with a decrease of euro 481 million. A breakdown of depreciation expense by asset category is provided below:

(in millions of euro)	2001	2000 (*)	2000	Change
Nonindustrial and industrial buildings	152	249	265	(113)
Plant and machinery	3,542	3,542	3,844	(302)
Manufacturing and distribution equipment	34	49	49	(15)
Other fixed assets	306	291	357	(51)
Total	**4,034**	**4,131**	**4,515**	**(481)**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Depreciation decreased as a result of the change in the scope of consolidation, a reduction in the depreciation expense of Telecom Italia (euro 415 million), owing to a lower amount of depreciable assets following the contribution of assets to IM.SER, and a change in the mix of depreciable assets.

Other writedowns of intangibles and fixed assets
Totaled euro 16 million (euro 48 million in 2000).

Writedowns of receivables included in current assets and liquid assets
Of euro 439 million (euro 477 million in 2000) and represent the provisions made during the year to adjust receivables to their estimated realizable value.

- Provisions for risks and other provisions
Totaled euro 278 million (euro 157 million in 2000) and consist of provisions made during the year to the various reserves for contractual risks and pending disputes.

- Miscellaneous operating costs
Amounted to euro 817 million compared to euro 916 million in 2000. They refer to the following:

(in millions of euro)	2001	2000 (*)	2000
- TLC license fee	524	543	572
- losses on disposal of intangibles and fixed assets	29	52	52
- indirect duties and annual taxes, including the local property tax (I.C.I.)	120	116	139
- membership dues and other costs	144	147	153
Total	**817**	**858**	**916**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

FINANCIAL INCOME AND EXPENSE

- euro 1,999 million

(- euro 464 million in 2000)

Financial income and expense shows a net financial expense balance referring to the following items:

(in millions of euro)	2001	2000 (*)	2000	Change
Income from equity investments, net	154	305	302	(148)
Other financial income	922	501	541	381
Interest and other financial expense	(3,075)	(1,116)	(1,307)	(1,768)
Total	**(1,999)**	**(310)**	**(464)**	**(1,535)**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

- Income from equity investments, net
Totaled euro 154 million (euro 302 million in 2000); this item includes dividends from unconsolidated companies and a gain realized on the sale of listed stocks that were carried in current assets.

- Other financial income
Of euro 922 million (euro 541 million in 2000) includes the following:

(in millions of euro)	2001		2000 (*)		2000		Change
Interest and capital gains on fixed-income securities		138		99		105	33
Interest and fees from:							
- unconsolidated subsidiaries	1		1		1		
- affiliated companies	23		25		23		
- banks	110		57		74		
- customers	2	136	3	86	3	101	35
Foreign exchange gains		217		195		196	21
Other financial income		431		121		139	292
Total		**922**		**501**		**541**	**381**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Interest and capital gains on fixed-income securities refer to interest on long-term investment securities for euro 3 million (euro 1 million in 2000) and interest and capital gains on marketable securities for euro 135 million (euro 104 million in 2000).
"Other" includes euro 298 million of income on hedging contracts and income from the application of inflation accounting principles.

- Interest and other financial expense

Interest and other financial expense of euro 3,075 million (euro 1,307 million in 2000) can be analyzed as follows:

(in millions of euro)	2001	2000 (*)	2000	Change
Interest and fees paid to:				
- unconsolidated subsidiaries	1	1	1	
- affiliated companies	31	33	33	
- banks	815	619	678	
- suppliers and other lenders	165 1,011	74 727	91 803	208
Interest and other charges on note issues	449	35	148	301
Foreign exchange losses	348	175	175	173
Other financial expense	1,267	179	181	1,086
Total	**3,075**	**1,116**	**1,307**	**1,768**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

In particular, interest and fees paid to banks include euro 546 million of interest on short-term borrowings and euro 269 million of expenses on medium/long-term debt positions.
Other financial expense refers to the provision of euro 569 million for the forward purchase commitment of Seat Pagine Gialle shares connected with the estimated nonrecoverability of the original price to exercise the option, the portion of expenses for the year of euro 149 million relating to the deferral of the put option on Seat Pagine Gialle shares recorded in prepaid expenses and expenses on hedging contracts of euro 272 million.

VALUE ADJUSTMENTS TO FINANCIAL ASSETS

- euro 1,956 million

(- euro 1,159 million in 2000)

These include:

(in millions of euro)	2001	2000 (*)	2000	Change
Upward adjustments of:				
- equity investments	167	297	275	(108)
	167	**297**	**275**	**(108)**
Writedowns of:				
- equity investments	(1,933)	(1,440)	(1,432)	(501)
- long-term investments, other than equity investments included in current assets	(49)	-	-	(49)
- securities, included in current assets other than equity investments	(141)	(2)	(2)	(139)
	(2,123)	**(1,442)**	**(1,434)**	**(689)**
Total	**(1,956)**	**(1,145)**	**(1,159)**	**(797)**

(*) Restated to give effect to the consolidation of the Nortel Inversora group using the equity method instead of the proportional consolidation method.

Value adjustments primarily refer to the Group's share of net income or loss of unconsolidated subsidiaries and affiliated companies accounted for by the equity method, including the amortization of goodwill that arose upon the acquisition of such investments, which is equal to euro 316 million (euro 453 million in 2000). Value adjustments were particularly affected by:

- the loss of IS TIM (Turkey) for euro 334 million due not only to the expenses incurred in conjunction with the start-up phase but also the effects of the currency crisis in Turkey and the application of inflation accounting principles;
- the writedown of Stream (euro 241 million) and the writedown to adjust the value of securities recorded in current assets to market prices (euro 291 million);
- the loss of the Nortel Inversora group (euro 238 million), which is related to the economic crisis in Argentina and due mainly to exchange losses on financial payables;
- the writedown of Astrolink for euro 259 million, made by Telespazio since the related project was suspended.

EXTRAORDINARY INCOME AND EXPENSE

- euro 3,452 million

(- euro 214 million in 2000)

Extraordinary income and expense shows a net expense balance of euro 3,452 million (- euro 214 million in 2000) which includes euro 852 million of income and euro 4,304 million of expense.

Extraordinary income includes:

- gains on the sale of the 70% holding in Mirror International Holding, the company through which the satellite companies were contributed to the Lehman Brothers group (euro 170 million) and the 30% holding in Mediterranean Nautilus S.A. to the Israeli company F.T.T. Investment (euro 94 million), the dilution of the investment in Auna (euro 16 million) and the increase in the net equity of Lottomatica as a result of the capital increase set aside for third parties when it was listed (euro 35 million);
- income (euro 32 million) deriving from the partial cancellation, by the Council of State, of resolution No. 7533/1999 of the Antitrust Authority under which TIM and Omnitel Pronto Italia were levied administrative fines for the alleged violation of antitrust laws relating to the price fixing of fixed-mobile rates;
- income from the release of reserves by Telecom Italia set aside in prior years for risks which did not materialize (euro 120 million relating to the reserve for the contract with Iraq of euro 62 million and the reserve for corporate restructuring of euro 50 million).

Extraordinary expenses include:

- euro 2,984 million for the writedown of goodwill relating to consolidated companies (9 Telecom group, Entel Bolivia, Entel Chile group, Maxitel group, Tele Celular Sul group, Tele Nordeste Celular group, Tim Brasil, Med-1 group and certain companies in the Seat Pagine Gialle group) and companies accounted for by the equity method (GLB Serviços Interativos, Solpart Participacoes, Telekom Austria and the Nortel Inversora group), as well as other provisions relating to investments. Such writedowns have been made on a consistent basis according to the new business plans and market trends;
- euro 248 million relating to the provision for expenses connected with the Vivendi/Canal Plus agreement for the transfer of the investment in Stream;
- euro 380 million of expenses for employee cutbacks and layoffs (of which euro 203 million refer to Telecom Italia);
- euro 155 million for social security charges under Law 58/1992 to guarantee uniform status under the former Telephone Employees Pension fund (FPT) which, as required by the 2000 Finance Bill, has become part of the "General Employees Pension Fund";
- euro 77 million of extraordinary contributions to INPS – established by the 2000 Finance Bill for the three years 2000-2002 to meet the higher financial requirements covered by the rules of the fund that was abolished;
- euro 85 million resulting from the decision to reposition the broadcasting station La7 as a consequence of the closing of a series of contracts.

■ Income taxes

euro 925 million

(euro 2,020 million in 2000)

Income taxes decreased by euro 1,095 million due to a reduction in the taxable base caused mainly by the extraordinary expenses of Telecom Italia and TIM regarding the valuation of foreign investments.
Income taxes include current taxes for euro 1,186 million and deferred tax assets for euro 261 million.

OTHER INFORMATION

■ INTRODUCTION OF THE EURO

The expenses borne for the introduction of the euro currency total about euro 14 million and have been charged to the statement of income under Production cost as they refer to services rendered to revise and update the information systems.

■ REMUNERATION TO DIRECTORS AND STATUTORY AUDITORS

The remuneration to which the directors and statutory auditors of Telecom Italia are entitled for fiscal year 2001 for carrying out their responsibilities and functions in Telecom Italia and also in other consolidated companies, total euro 4,245 thousand for the directors and euro 656 thousand for the statutory auditors.

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Telecom Italia S.p.A.

1. We have audited the consolidated financial statements of Telecom Italia S.p.A. as of and for the year ended December 31, 2001. These financial statements are the responsibility of the Telecom Italia S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the consolidated financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries and associated companies, which represent respectively 19% and 17% of consolidated total assets and consolidated total revenues, have been examined by other auditors, whose reports have been furnished to us. Our opinion, expressed herein, insofar as it relates to the data relating to these subsidiaries and associated companies included in the consolidated financial statements, is based also on the reports of the other auditors.

   For the opinion on the consolidated financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to the auditors' report dated May 21, 2001, issued by other auditors.

3. In our opinion, the consolidated financial statements of Telecom Italia S.p.A. comply with the Italian regulations governing consolidated financial statements; accordingly, they clearly present and give a true and fair view of the consolidated financial position of Telecom Italia S.p.A. as of December 31, 2001, and the consolidated results of its operations for the year then ended.

■ Reconta Ernst & Young S.p.A.

NOTES TO FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with the provisions of the Italian Civil Code.
The accounting policies adopted in the preparation of the financial statements have been applied on a basis consistent with the prior year and are described below.
No special situations arose during the year that would require the use of the waivers allowed under Article 2423, Section 4, of the Italian Civil Code.
Following certain changes to the classification of some items of the financial statements, the financial statements at December 31, 2000 have been duly reclassified for purposes of a meaningful comparison.
As required by Legislative Decree No. 127/1991, consolidated financial statements have also been prepared and are presented together with the financial statements of Telecom Italia.
The disclosure relating to the introduction of the euro is presented in a specific paragraph "Other information" of these Notes and in the Report on operations.
The statement of cash flows, although presented in the Report on Operations, constitutes an integral part of these Notes to financial statements pursuant to Article 2423, Section 3 of the Italian Civil Code.
Unless otherwise specified, all figures are stated in thousands of euro.
As described in the comments under "Management's discussion and analysis of financial condition and results of operations", as a result of the sales and contributions made during 2001, the balance sheet does not include the assets and liabilities that were transferred, whereas the statement of income takes into account the results of the companies sold/contributed up to the date the transactions went into effect.

■ SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

■ Intangible assets

Intangible assets are recorded at acquisition or production cost and are amortized systematically over their estimated period of benefit.
Intangible assets are written down when there is a permanent impairment to below their net book value, in accordance with article 2426, Section 1, item 3 of the Italian Civil Code.
Detailed amortization policies are presented in the following paragraphs.
"Industrial patents and intellectual property rights" are amortized over their estimated period of benefit on a five-year basis (industrial patents) or on a three-year basis (software), starting from the year of their initial use.
The item *"Others"* consists primarily of:

- leasehold improvements: amortization is calculated on the basis of the remaining period of the lease contracts;
- rights of use of transmission systems (DDP) and indefeasible rights of use (IRU) that guarantee the extension of transmission capacity of the Company over a foreign territory: amortization is calculated over the period of the contracts entered with the foreign operators who own the installations to which the rights refer.

"Research, development and advertising costs" are charged to income in the year incurred.

■ Fixed assets

Fixed assets are recorded at acquisition or production cost and depreciated on the straight-line method at rates determined on the basis of their estimated remaining useful life. They include monetary adjustments made on the basis of the special laws regarding assets existing on or before December 31, 1981, the entries required under Law No. 823 of December 19, 1973, regarding the settlement of tax liabilities, as well as mandatory inflation adjustments of buildings as required by Law No. 413 of December 30, 1991.
Fixed assets are written down when there is a permanent impairment to below their net book value, in accordance with article 2426, Section 1, item 3 of the Italian Civil Code.
Construction in progress is stated at the amount of direct costs incurred (materials used for or intended for installations, third-party services, miscellaneous expenses, as well as company labor). The value of fixed assets does not include maintenance costs incurred for their upkeep to guarantee their expected useful life, their original capacity and productivity, and costs borne to repair malfunctions and failures; such expenses are charged to the statement of income in the year incurred.
Depreciation is calculated on the basis of the estimated useful lives of the installations.
Total accumulated depreciation for fixed assets was upwardly adjusted where called for by the previously mentioned special laws.

■ Equity investments

Equity investments in subsidiaries, affiliated companies and other companies considered long-term in nature are recorded in long-term investments or, if acquired for subsequent sale, recorded in short-term financial assets.

Long-term equity investments in "*subsidiaries, affiliated companies* and *other companies*" are valued at acquisition or subscription cost - determined according to the continuous LIFO method - increased by the statutory inflation adjustments, as well as the voluntary one made to several investments during the preparation of the financial statements at December 31, 1981.

The carrying value of investments recorded in long-term investments is adjusted for any reasonable expectations of a decline in profitability or recoverability in future years.

In the case of a permanent impairment, the value of such investments is written down and the impairment in value in excess of the corresponding carrying value is recorded among "*reserves for risks and charges*".

Contracts for the loan of securities are represented in the financial statements as two functionally related transactions: a loan and a repurchase transaction on the securities with the obligation of the borrower to resell them at maturity. Accordingly, "Other receivables" and "Other liabilities" include, respectively, a receivable and a payable of the same amount at the fixed amount of the contract (market price of stock at the date of delivery of the securities).

Equity investments included under current assets, consisting mainly of shares of consolidated listed companies purchased for trading purposes, are stated at the lower of cost - determined according to the continuous LIFO method - and realizable value, based on the year-end prices on the Italian Online Stock Market.

The costs of investments in foreign companies have been translated at historical exchange rates prevailing at the time of acquisition or subscription.

Writedowns of investments, whether included in long-term investments or current assets, will be reversed in subsequent years if the underlying assumptions are no longer correct.

■ Other securities (other than equity investments)

Securities that the company intends to hold to maturity are included among long-term investments; those bought for trading purposes are listed under short-term financial assets.

Securities held as long-term investments are valued at cost, adjusted by any permanent impairment in solvency of the issuers.

Securities included in current assets are valued at the lower of cost of acquisition and realizable value based on market prices.

Writedowns of securities will be reversed in subsequent years, if the underlying assumptions are no longer correct.

■ Inventories

Inventories - consisting of goods intended for sale, as well as stock on hand of technical materials and replacement parts to be used in the business during the year and for maintenance - are valued at the lower of cost, calculated using the weighted-average method, and realizable value.

The carrying value of goods in stock is reduced, through appropriate writedowns, for obsolete materials.

Inventories include the amount of work on behalf of third parties in progress at the end of the year, valued according to the "costs" already incurred.

■ Accounts receivable and liabilities

Accounts receivable are stated at estimated realizable value and classified under long-term investments or current assets. They include - as far as telecommunications services are concerned - the amount of services already rendered to customers and other carriers, already billed or still to be billed, as well as the invoices for the sale of telephone and online products.

Liabilities are shown at their nominal value.

Accounts receivable and liabilities in foreign currency are recorded at the year-end exchange rates; the positive and negative differences between the balance of accounts receivable and liabilities converted at year-end exchange rates and their balance at the original exchange rates are recorded in the statement of income, respectively, in "*financial income*" and "*financial expense*".

1520

■ Securitization

During 2001, Telecom Italia began a program for the securitization of receivables generated by the services rendered to the residential, top and business customers of Telecom Italia Domestic Wireline (TIDW) business unit and the customers of Path.Net (a wholly-owned subsidiary of Telecom Italia, which provides telephone services to the Public Administration). Such program makes it possible to follow up the first issue of euro 700 million of notes in June 2001 by TI Securitisation Vehicle S.r.l., the vehicle company for the program which operates under Law No. 130/1999, with successive issues of notes all with the same rights and risk profile, up to the total maximum limit of euro 2 billion.

The transaction, regulated by the aforementioned law, presupposes, usually on a monthly basis, the stipulation of buy-sell contracts containing without recourse clauses between Telecom Italia and Path.Net (assignors) and TI Securitisation Vehicle S.r.l. (assignee), exclusively for outstanding trade accounts receivable. The flows of receipts from the trade accounts receivable covered by the contracts constitute the funds which the securitization vehicle uses to pay the interest and the principal to the noteholders. Within the framework of TI Securitization Vehicle's disbursement plans and the time frame for the collection of the receivables, the sums received are also used to purchase new receivables generated by the sales activities of the assignor companies.

The price for this transaction, equal to the nominal value of the receivables, net of a discount which takes into account the expenses that TI Securitization Vehicle S.r.l. must bear, will be paid to the assignor company partly as the advanced purchase price, at the time of sale, and partly as the deferred purchase price. The deferred portion, which constitutes the credit enhancement of the transaction, will be paid to the assignor company each time new receivables are sold, subject to the collection of the receivables, and is prudently calculated by the rating agencies on the basis of pre-established estimates of the collection times and the amounts of the credit notes that will eventually be issued. Such estimates and therefore also the deferred purchase price, will be adjusted monthly on the basis of the effective performance of the receivables (dynamic type of credit enhancement).

As regards the risk of uncollectibility, the assignor company is responsible for the solvency of the debtors on the receivables sold only up to the limit of the amount of the deferred purchase price.

The first issue of notes backed by the securitization of receivables (called *Series 2001-1*) for a total of euro 700 million, was divided into three classes having the following characteristics:

- *Class A1*: variable rate notes denominated in euro for euro 100 million with maturity at approximately 18 months (maturing January 25, 2003) with a margin of 19 basis points over the 3-month Euribor;
- *Class A2*: variable rate notes denominated in euro for euro 150 million with maturity at approximately 3 years (maturing July 25, 2004) with a margin of 27 basis points over the 3-month Euribor;
- *Class A3*: variable rate notes denominated in euro for euro 450 million with maturity at approximately 5 years (maturing July 25, 2006) with a margin of 34 basis points over the 3-month Euribor.

These notes have been rated by Fitch, Moody's and Standard & Poor's at AAA/Aaa/AAA. The high ratings reflect the quality and diversification of the receivable portfolio, the element of overcollateralization represented by the dynamic mechanism for managing the deferred purchase price, the legal structure of the transaction and other qualifying aspects of the program. The notes were subscribed to at face value and requests were received from Italy for about 20% of the total amount and the remaining 80% from abroad, particularly Spain, France, the United Kingdom and Germany.

The total amount of the trade accounts receivables sold under securitization transactions in 2001 was euro 5.9 billion and solely referred to receivables from residential customers generated by Telecom Italia. At December 31, 2001, the receivables sold and not yet collected amounted to euro 877 million (of which euro 684 million were not yet due).

As far as the accounting treatment of the securitization transaction is concerned, the total amount of receivables sold without recourse is reversed from the balance sheet with a contra-entry for the consideration received on the sale: the amount paid is represented by the non-repeatable amount received immediately (without recourse) whereas the deferred portion is recorded in *Other receivables (financial)* in current assets. The difference between the accounting value of the receivables sold and the consideration on the sale (*securitization expenses*) is charged on the accrual basis to *Miscellaneous operating costs* in the statement of income. The costs and expenses relating to the start-up and completion and implementation of the securitization program (arrangement, underwriting, legal, rating, audit, etc.) are charged directly to the statement of income in *Costs for Services*.

The securitization transaction led to an improvement in net debt at December 31, 2001 of euro 848 million.

Lastly, under the securitization program, TI Securitisation Vehicle can invest the temporary excess liquidity in Telecom Italia. At December 31, 2001, the balance of such investments totaled euro 168 million against which financial payables to TI Securitisation Vehicle have been recorded for the same amount in the balance sheet of Telecom Italia.

■ Accruals and deferrals

These items are recorded on the accrual basis. "*Issue discounts and similar charges*" consist of costs in connection with long-term loans, which are charged to the statement of income over the duration of the loan in proportion to the accrued interest.

■ Reserves for risks and charges

"*For taxes*": this reserve includes prudent provisions for estimated tax charges (including any surtaxes and late payment interest) on positions not yet agreed or in dispute.

"*For deferred taxes*": this reserve includes deferred tax liabilities - net of deferred tax assets, whenever the assumptions for doing so exist - calculated on the timing differences between the value attributed to assets and liabilities for statutory purposes and the value attributed to the same assets and liabilities for tax purposes.

Whenever the amount of deferred tax assets is higher than deferred tax liabilities, the balance is recorded among "*other receivables*" in current assets.

"*Other reserves*" relate primarily to provisions to cover charges of certain or likely existence whose amount or date of occurrence could, however, not be determined at the end of the year. The provisions reflect the best possible estimate, based on the commitments made and on the available data.

■ Reserve for employee termination indemnities

The amount of this reserve is determined in accordance with current laws (in particular Law No. 297 of May 29, 1982, which provides for fixed and variable cost-of-living adjustments) and collective bargaining agreements. The reserve is adjusted to the liability matured at the end of the year for personnel in force at that date and is net of advances paid.

■ Employee benefit obligations under Law No. 58/1992

With regard to Telecom Italia's obligation required by Law No. 58/1992 to guarantee a uniform insurance status under the Telephone Workers' Social Security Fund – FPT (part of the general "Employees Pension Fund" beginning January 1, 2000) to all employees in service in the Group's telephone companies (Stet, Sip, Italcable and Telespazio) as of February 20, 1992, as well as those who moved from the Public Administration to Iritel, Article 66, Section 1 of Law 331/1993 and converted into Law No. 427/1993 specifies that the sums due to the Fund should be recorded in the financial statements and are tax deductible in the years in which the fifteen equal annual deferred installments are paid to discharge this obligation.

At the present time, the amount of the liability, which will be determined by the National Social Security Institute (Istituto Nazionale della Previdenza Sociale - INPS), can be estimated only roughly, due to problems relating to the interpretation and application of the social security legislation and to the lack of certain data which only the social security institutions currently possess. Nevertheless, these financial statements include euro 651 million of residual payables to INPS, (net of the amount attributed to Group companies for the employees transferred to those companies), relating to the estimate made for the employees of the former State Company for Telephone Services (ASST) by the special Ministerial Commission established under Law No. 58/1992 upon the transfer of the assets of the Post and Telecommunications Administration to Iritel, and recorded by the latter company in its financial statements at December 31, 1993. As a result, these charges will have no impact on the results of future years, since they were already included in the aforementioned calculation.

A dispute concerning the application and interpretation of this law is pending with INPS regarding, firstly, the effective date for the computation of the accrued interest due under Law No. 58/1992, in view of the fact that the liability is paid in installments. Telecom Italia maintains that interest should accrue from the time INPS notifies it of the actual amount of the liability, while INPS claims that the computation should be made as from February 20, 1992 or from the date of the transfer to Iritel, thus giving rise to pre-amortization interest. The second issue is the exclusion from the estimates under Law No. 58/1992 of all employees (except for employees of the former Iritel) who had filed an application to join pursuant to Law No. 29/1979 before February 20, 1992, unless that application had not been processed by INPS. The position of the Company is that the criteria set forth in Law No. 29/1979 – and, therefore, payment of the respective obligations – apply to these employees.

At the present time, the parties have agreed that the differences in interpretation shall be settled through test appeals, with recourse to the Court of Appeals being waived for a final determination of the correct interpretation of the law in question.

While the proceedings are pending, Telecom Italia has agreed to pay under protest the amounts requested by INPS based on the criteria determined by the latter, subject to subsequent equalization adjustments, if the Courts ultimately accept the Company's interpretation. Based on the above, a reasonable estimate of the principal amount of the liability attributable to Telecom Italia (excluding, as mentioned earlier, the part relating to the former Iritel employees) could vary between euro 960 million and euro 1,284 million (euro 334 million of which has already been paid), depending on conflicting interpretations and taking into account all personnel involved. However, these estimates are merely indicative, lacking complete data from INPS. As of December 31, 2001, INPS had submitted formal requests for about 97% of the employees whose change in insurance status will result in a charge for Telecom Italia.

In either case, the impact of the charge should definitely be compatible with the income of future years, since, as allowed under Article 5, Section 3 of Law No. 58/1992, the payments requested by INPS will be made in fifteen equal annual deferred installments (including annual interest of 5%), starting when INPS formally submits its requests.

The remaining liability for obligations under Law No. 58/1992, to be paid in fifteen annual installments on the basis of the formal requests made by INPS on December 31, 2001 and the interpretation of said requests, amounts to euro 1,347 million, divided as follows:

- euro 910 million for the principal amount (except for the portion attributable to former Iritel employees);
- euro 437 million in accrued interest.

The amount referring to 2001 and charged to the statement of income in "extraordinary expense" amounts to euro 155 million, including only accrued interest.

Pre-amortization interest (including that relating to the employees of the former Iritel), subsequent to the agreement between INPS and Telecom Italia, was paid by the latter - with reservation - in fifteen equal annual deferred installments, including interest at an annual rate of 5%, up to the end of 1999, for a total amount of euro 112 million. In compliance with the sentence handed down by the Court of Appeals, No. 4242 of April 5, 2000, which upheld Telecom Italia's position, payment of the above-described interest and accrued interest related thereto was suspended as from June 2000 (for a residual amount of euro 407 million).

During 2001, Telecom Italia paid INPS the above-mentioned charges also on behalf of other Group companies - mainly TIM and TI Lab - for those employees transferred and covered by the obligation of a uniform insurance status under Law No. 58/1992, recovering the amounts paid from these same companies. The recovery is recorded in the statement of income under "extraordinary income" and amounts to euro 2 million.

■ Grants

Operating grants (directly credited to the statement of income) and capital grants or grants for installations are recorded in the accounting period in which the paperwork documenting the grants is received, or in the period in which the respective costs are incurred, provided that the certainty of payment is confirmed by established procedures.

The treatment of capital grants and grants for installations in the balance sheet is as follows:

a) grants received through December 31, 1992, are included under "*reserves for risks and charges*". The portions equivalent to the depreciation taken on assets financed with the grants in question (the so-called "available" portion) are transferred to a special equity reserve in order to obtain the benefits allowed under the tax law;

b) for grants received from January 1, 1993 to December 31, 1997, 50% of the amount received is recorded in a special reserve of shareholders' equity in order to take advantage of the benefits available under the tax laws, and the remaining 50% is recorded under "*deferred income*". These amounts are gradually credited to income in accordance with the pertinent laws;

c) for grants received from January 1, 1998, the amount is recorded under "*deferred income*" and progressively credited to the statement of income in relation to the depreciation taken on the assets to which the grants refer.

■ Revenues and expenses

Revenues and expenses are recorded on an accrual basis. Revenues relating to telecommunications services are shown gross of the amounts due to other carriers which are recorded, for the same amount, in production cost.

Fees for new access lines and line transfers are recorded as income when the service is provided.

Dividends from subsidiaries are recorded on the maturity principle, that is, in the year when the income from which they are paid is earned by the subsidiaries, providing there is a substantial certainty that they will be paid, and, in any event, when the shareholders' resolution declaring the dividend is passed or when the appropriation of net income is set forth in the preliminary financial statements prepared by the management of the subsidiaries prior to the Board Meeting of the parent company that resolves upon the financial statements. Dividends from affiliated companies and other companies, on the other hand, are recognized in the statement of income according to accrual principle, that is, in the year in which the respective right to the receivable arises, following the declaration of dividends approved by the shareholders' resolution of those companies. The tax credits are recorded in the same manner as the dividends to which they refer.

■ Leased assets

Capital goods acquired under leasing agreements are recorded in the financial statements by a method consistent with current legislation, which requires that leasing payments be recorded as operating costs.

■ Memorandum accounts

"*Guarantees provided*" are shown for the amount of the remaining liability or other obligation guaranteed; those provided in foreign currencies are translated at year-end exchange rates.

"*Purchases and sales commitments*" are determined on the basis of the unperformed portion of contracts outstanding at the end of the fiscal year which do not fall under the normal "operating cycle".

- Financial derivatives

Financial derivative contracts are used by the Company/Group to hedge exposure to interest rate and exchange rate risks. They are valued consistently with the underlying asset and liability positions and any net expenses connected with each single transaction is recognized in the statement of income.

For financial instruments used to hedge interest rate risks, the interest differentials are recorded in the statement of income in "financial income and expense" based on the accrual principle.

For financial instruments used to hedge exchange rate risks, the cost (or "financial component" calculated as the difference between the rate at the date of stipulating the contract and the forward rate) is recorded in the statement of income in "financial income and expense" based on the accrual principle.

- Income taxes

Current income taxes are computed on the basis of a realistic estimate of the income tax charge according to the tax laws of the country; the related income tax payable is shown net of payments on account, withholding taxes and tax credits in "income taxes payable". Any net receivable position is shown in "other receivables".

BALANCE SHEETS ASSETS

INTANGIBLES, FIXED ASSETS AND LONG-TERM INVESTMENTS

INTANGIBLE ASSETS

euro 1,317,922 thousand

(euro 1,188,704 thousand at December 31, 2000)

A summary of the changes during the year is presented as follows:

(in thousands of euro)	2001
- additions	726,701
- disposals	(49,799)
- sales and contributions of business segments	(10,510)
- use of allowances for writedowns	49,587
- amortization	(617,565)
- reclassifications	30,804
Total	**129,218**

An analysis of the composition and the changes in intangible assets during the year is presented as follows:

12/31/2000

Rights of use of transmission systems and indefeasible rights of use	*168,844*	*-*	*(96,751)*	*72,093*

In particular:

- Industrial patents and intellectual property rights"
  Consist almost entirely of applications software. Eliminations refer to software projects that were abandoned during the year or sold to Telesoft, Printel and Ti Lab following the sale and contribution of business segments by Telecom Italia during the first quarter of 2001;

- Work in progress and advances to suppliers
  Mainly refer to software projects for network and operating program applications. Beginning in 2001, all acquisitions of intangibles are managed through specific work orders and recorded in this caption. Reclassifications refer to intangible assets that went into operation during the year. *In particular, the acquisitions of intangibles from subsidiaries, affiliated companies and parent companies amounted to euro 479,610 thousand and principally refer to software projects from Telesoft (euro 347,150 thousand), Finsiel (euro 40,833 thousand) and Siemens Informatica (euro 24,904 thousand);*

- Other intangibles
  "Other intangibles" refer to:
  leasehold improvements consisting of costs incurred to adapt leased properties to the Company's operating needs;
  Rights of use of transmission systems (DDP) and indefeasible rights of use (IRU) that guarantee the extension of the Company's transmission capacity over a foreign territory. Such rights were reclassified from "Plant and machinery" in fixed assets.

■ FIXED ASSETS

euro 14,109,590 thousand

(euro 15,135,036 thousand at December 31, 2000)

A summary of the changes during the year is presented as follows:

(in thousands of euro)	2001
- additions	1,738,821
- disposals	(283,008)
- contributions of business segments	(658)
- utilization of the allowance for writedowns	253,877
- depreciation	(2,703,674)
- reclassifications	(30,804)
Total	**(1,025,446)**

An analysis of the composition and the changes in fixed assets during the year is presented as follows:

12/31/2000

Plant and machinery	46,349,627	785,054	(711,165)	(34,622,928)	11,800,588
Manufacturing and distribution equipment	859,082	-	-	(831,129)	27,953
Other fixed assets	642,942	4,312	-	(544,419)	102,835
Construction in progress and advances to suppliers	680,743	-	-	-	680,743
Total	**50,779,525**	**1,254,904**	**(713,021)**	**(37,211,818)**	**14,109,590**

Beginning 2001, all acquisitions of fixed assets are managed using specific work orders, recorded in "construction in progress and advances to suppliers". The reclassifications refer to fixed assets that went into use during the year. *In 2001, the acquisitions of fixed assets from subsidiaries, affiliated companies and parent companies amounted to euro 558,568 thousand and refer almost entirely to the acquisition of telephone exchanges from Italtel (euro 551,144 thousand).*

Accumulated depreciation at December 31, 2001, as a whole, is considered sufficient in relation to the remaining period of utilization of the assets, determined on the basis of the estimated useful lives of the installations making up the domestic telecommunications network. Depreciation is calculated by the rates used in the previous year. Accumulated depreciation covered 72.5% of fixed assets, net of writedowns at December 31, 2001, compared to 70.1% at December 31, 2000.
Rights of use of transmission systems (DDP) and indefeasible rights of use (IRU) were reclassified to "other intangibles".

At December 31, 2001, the upward adjustments made to fixed assets in 1952, 1975, 1983 and 1991 as well as those made under Law No. 823/1973 have been depreciated by an average of 77.1%.

The Company uses fixed assets purchased through lease contracts with its subsidiary Teleleasing, which are essentially stipulated under market conditions, as disclosed in the memorandum accounts and related notes. Had these contracts been accounted for using the financial method, entries would have been made in the statement of income for the interest on the financed principal and the depreciation charge attributable to the leased assets and assets would have been recorded in fixed assets and the residual debt under liabilities. The use of this method, however, would have had no material economic effect on the financial statements. The amount of financial expense included in the lease payments recorded in the 2001 statement of income is separately indicated in the note on the "use of property not owned".

■ LONG-TERM INVESTMENTS

euro 18,370,044 thousand

(euro 20,758,240 thousand at December 31, 2000)

Long-term investments decreased by euro 2,388,196 thousand compared to December 31, 2000. They include the following:

(in thousands of euro)	12/31/2001	12/31/2000
Equity investments in:		
- subsidiaries	17,659,160	18,216,954
- affiliated companies	386,923	574,830
- other companies	24,327	91,780
	18,070,410	18,883,564
Advances on future capital contributionsi	78,896	963,135
Accounts receivable:		
- subsidiaries	60,000	50,000
- other receivables	160,738	200,181
	220,738	250,181
Treasury stock		661,360
Total	**18,370,044**	**20,758,240**

■ Equity investments

euro 18,070,410 thousand

Annexes 1 and 2 present the changes in each investment during the year, together with the corresponding amount at the beginning and end of 2001, as well as, according to Article 2427, Section 5, of the Italian Civil Code, a list of all the Company's equity investments in subsidiaries and affiliated companies. Overall, investments in subsidiaries, affiliates and other companies decreased by euro 813,154 thousand compared to December 31, 2000, as shown below:

1528

INCREASES:		(in thousands of euro)
• Subscription to capital increases, recapitalizations and loss coverage of: TI Lab (40,338), Finsiel (2,181), Mediterranean Nautilus (1,115), Tecno Servizi Mobili (103), Seat Pagine Gialle (3), Telecom Italia Capital (1,035), TE.SS (1,550), TI Spain (703), TI Austria (1,150), TI Belgium (1,500), TI France (10,300), TI Germany (9,300), TI Netherlands (3,500), TI Switzerland (2,618), TI United Kingdom (3,702), Telecontactcenter (110), Eutelsat (38,970), Telemaco Immobiliare (75,798), Nordcom (26,983), Istituto della Enciclopedia Italiana fondata da Giovanni Treccani (710), Netesi (10,625), Stream (173,052), elespazio (70,000), TMI - Telemedia International Italia (129,522), Mirror International (30), Mirror International Holding (150,404).		755,302
• Share capital increases following the contribution of the "Venture Capital" business segment to TI Lab.		44,741
• Permanent transfer to share capital of advances on future capital contributions relating to Stet International Netherlands (2,017,341) and TI Austria (35).		2,017,376
• Subscription to Mediterranean Nautilus shares through contribution of Elettra to the same company.		13,202
• Subscription of TI Web shares through contribution of Telsi to the same company.		550,589
• Formation of TI Media through the total nonproportional spin-off of Huit.		51,005
• Subscription of Mirror International shares through contribution of investments in Inmarsat, Intelsat and New Skies Satellites to the same company.		184,100
• Subscription of Mirror International Holding shares through contribution of Mirror International to the same company.		184,100
Total increases	**(A)**	**3,800,415**

DECREASES:		
• Sale/reduction of shares/quotas in: Tecno Servizi Mobili (50), Geis (946), IM.SER (75,058), Società Trasporto Telematico (2,272), Accel (99), Centro Multimediale di Terni (142), Dmail (1,309), Iri Management (6), Intelsat (8,330), Consorzio CAISI (2), Eutelsat (255,146), Mirror International Holding (234,153).		577,513
• Writedown for losses of value charged to the statement of income on the following investments: Telecom Italia Capital (1,069), Stream (241,352), TMI - Telemedia International Italia (155,166), TI Web (542,257), Trainet (668), TI Lab (49,609), Telespazio (90,782), Stet International Netherlands (1,984,511), Softe (43,938), Latin American Nautilus (28,566), IT Telecom (1,085), Edotel (116), TESS (708), TI of North America (110) and Netesi (7,764).		3,147,701
• Writedown for losses of value covered by the reserve for risks and charges on investments on the following investments: Centro Multimediale di Terni (116), Czechtel (17), Stoa' (89), Trainet (6), Consorzio Formazione Internazionale (21), Rete Telematica Piemontese (247).		496
• Investments contributed with the "Venture Capital" business segment to TI Lab: Cygent Inc (11,851), Fintech (12,911), Siosistemi (3,305), Consorzio Dreamfactory (89), Accel (1,480), Dmail.it (3,066), ITXC (2,067), Gemini Israel III LP (610), IFM Infomaster (683), Jerusalem Global Venture (773), Media Technology Venture (3,780), The Fantastic Corporation (320), Vertical Networks (2,562).		43,497
• Contribution of the investment in Elettra to Mediterranean Nautilus.		13,202
• Contribution of the investment in Telsi to TI Web.		550,589
• Total nonproportional spin-off of Huit to TI Media		51,005
• Contribution of the following investments to Mirror International: Inmarsat (9,844), Intelsat (15,135) and New Skies Satellites (20,457)		45,436
Contribution of the investment in Mirror International to Mirror International Holding		184,130
Total decreases	**(B)**	**4,613,569**
Net change for the year	**(A-B)**	**(813,154)**

In particular:

- on March 1, 2001, Telecom Italia contributed the "Venture Capital and Innovation" business segment to CSELT, which then changed its name to Telecom Italia Lab, through the subscription of No. 1,352,000 shares of the same for an equivalent amount of euro 44,741 thousand. In April and November, Telecom Italia subscribed to Telecom Italia Lab's capital increases of, respectively No. 9,015,000 shares and No. 14,515,000 shares for a total of euro 40,338 thousand;
- on March 31, Telecom Italia subscribed to the Mediterranean Nautilus share capital increase for No. 20,405,000 new shares by contributing its investment in Elettra;

- on May 7, IM.SER sold to its shareholders, including Telecom Italia, the entire investment in the company Telemaco Immobiliare that was set up by the contribution of IM.SER's "Trading Portfolio" business segment, such as to arrive at IM.SER's original shareholder base (40% Telecom Italia). The value of the purchase of the Telemaco Immobiliare shares was equal to euro 75,767 thousand. Moreover, Telecom Italia received euro 75,734 thousand from the distribution of the additional paid-in-capital by IM.SER, realizing a gain of euro 676 thousand;
- on August 20, the pledge on No. 339,291,608 ordinary Seat Pagine Gialle shares to Chase Manhattan, set up in 2000, as part of the merger of Seat Pagine Gialle and Tin. it was cancelled.
- on September 28, Telecom Italia subscribed to No. 85,674,900 TI Web shares by contributing the company Telsi Ltd.;
- on December 6 and 7, respectively, the companies Mirror International Holding and Mirror International were set up for a total investment of euro 55 thousand. On December 19, Telecom Italia contributed the investments in Intelsat, Inmarsat and New Skies Satellites to Mirror International for a total of euro 184,100 thousand, realizing a gain of euro 138,664 thousand. At the same time, Telecom Italia subscribed to two capital increases by Mirror International Holding: the first (No. 700 class A shares and No. 300 class B shares), through the contribution of the investment in Mirror International worth euro 184,130 thousand, with a loss of euro 30 thousand; the second (No. 5,600 class A shares and No. 2,400 class B shares) for euro 150.379 thousand. Also on December 19, Telecom Italia sold the entire investment in Eutelsat to Mirror International Holding for euro 365,900 thousand, realizing a gain of euro 110,754 thousand. Lastly, Telecom Italia sold the 70% stake in Mirror International Holding to Lehman Brothers for euro 234,153 thousand, bringing the percentage ownership in Mirror International Holding to 30%;
- on December 13, Telecom Italia formed the company TI Media through the total nonproportional spin-off of Huit S.A.;
- consistent with the strategic guidelines of the new Industrial Plan, extraordinary writedowns were made to the investment in Stet International Netherlands (euro 1,984,511 thousand) and in TI Web (euro 542,257 thousand) as a result of the permanent impairment in value of their relative holdings, mainly 9Telecom Group and Telekom Austria for Stet International Netherlands and GLB Serviços Interativos S.A. for TI Web;
- during the year, No. 246,989,234 Seat Pagine Gialle shares loaned in 2000 were returned by JPMorgan and Morgan Stanley. At December 31, 2001, Seat Pagine Gialle shares still on loan totaled No. 78,000,000;
- some investments in subsidiaries and affiliated companies are recorded at an amount in excess of the corresponding share of the underlying shareholders' equity, net of dividends and after consolidation adjustments (see Annex 2). These investments are maintained at their carrying values since they are expected to show future earnings and their assets are worth more than their respective book values.
  In particular, in the case of the investment in Seat Pagine Gialle S.p.A., on the basis of the plans and programs drawn up by the subsidiary and designed to regain economic and financial equilibrium and profits, it is deemed that there are no elements that suggest a permanent impairment in value. The performance of Seat Pagine Gialle's stock was also considered: the market price fell to below the average carrying value (euro 1.11) and by carefully evaluating such trend it was decided that it did not reflect a permanent impairment in value. In fact, the Company maintains that the stock market price of Seat Pagine Gialle's stock is not particularly significant as regards the volumes traded, which are a very modest percentage of shares outstanding, and in relation to the particular moment in time that the world stock markets have experienced, and are still experiencing.

A comparison between the market price of the listed shares at December 31, 2001 and their carrying value shows an unrealized gain of euro 24,178 million. Further details are given in Annex 3.

■ Advances on future capital contributions **euro 78,896 thousand**

These show a decrease of euro 884,239 thousand compared to December 31, 2000, principally due to the reclassification of euro 2,017,341 thousand to "equity investments in subsidiaries" in respect of the payments made to Stet International Netherlands in prior years and during 2001, in which a non interest-bearing loan was made for euro 1,133,234 thousand for the acquisition of foreign investment holdings. After this reclassification, the amount of advances on future capital contributions at December 31, 2001 to Stet International Netherlands are equal to euro 78,896 thousand. Also during the year, the advances made to Ti Austria Gmbh (euro 35 thousand) were used to increase the capital of the company and those to Tecno Idro meteo (euro 97 thousand) were used to cancel the company from Companies Register.

1530

■ Accounts receivable **euro 220,738 thousand**

Accounts receivable decreased by euro 29,443 thousand compared to December 31, 2000, and are analyzed as follows:

		Changes during the year				
(in thousands of euro)	12/31/2000	Disburse-ments	Reimburse-ments	Riclass. / Other	Total	12/31/2001
Subsidiaries	50,000	60,000	(50,000)	-	10,000	60,000
Others	200,181	31,012	(66,001)	(4,454)	(39,443)	160,738
Total	**250,181**	**91,012**	**(116,001)**	**(4,454)**	**(29,43)**	**220,738**

Subsidiaries **euro 60,000 thousand**

The increase is due to the reimbursement of the loans made to Telespazio, for euro 50,000 thousand, and the loan of *euro 60,000 thousand made to Stet Hellas for the acquisition of UMTS licenses.*

Other receivables **euro 160,738 thousand**

These mainly refer to:

- receivables from employees (euro 49,385 thousand), for the remaining amount of loans receivable;
- the prepayment of the tax on the reserve for employee termination indemnities (euro 90,518 thousand) required under Law No. 662 of December 23, 1996 and subsequent amendments, revalued as required by law;
- the loan made to Ros Telecom (euro 11,617 thousand) to complete the special ITUR project for the optic submarine cable linking Italy, Turkey, Ukraine and Russia.

■ Treasury stock

The extraordinary Shareholders' Meeting on May 3, 2001 voted to cancel all the savings shares of treasury stock (No. 112,998,070), for a total value of euro 710,865 thousand, following the bonus increase of share capital due to the re-denomination of share capital in euro.

The transaction is described in the note on share capital.

As required by Article 2358 of the Italian Civil Code, we report that the amount of the available reserves recorded in the financial statements at December 31, 2001 is sufficient to cover the outstanding balance of the loans made to employees of Telecom Italia and Telecom Italia Group companies for the purchase of ordinary Telecom Italia shares in connection with the Initial Public Offering under Decree of August 8, 1997 by the President of the Council of Ministers.

Furthermore, the Shareholders' Meeting on November 7, 2001, in authorizing the Board of Directors of the company to buy-back ordinary and/or savings shares for a maximum amount of euro 1,500,000,000, within the limits established by law, also authorized the directors to dispose of, for an unspecified period of time, the shares purchased for any stock option plans.

As required under Article 2427, Section 6 of the Italian Civil Code, Annex 4 sets forth a breakdown of loans under long-term investments by maturity within and beyond five years.

* * * * *

As required by Article 10 of Law No. 72/1983 the table below sets forth a breakdown of upward adjustments by type of asset held by the Company at December 31, 2001.

Description	Fixed assets						Investments	
(in thousands of euro)	Land and buildings	Plant and machinery	Manufacturing and distribution equipment	Other assets	Construction in progress and advances to suppliers	Total	Subsidiaries	Affiliates
Historical cost of additions to 12/31/2001:								
- Upward adjustments under special lawsi	815,314	2,037,146	-	7,903	-	2,860,362	770,153	2,417
- Not adjusted	1,431,817	44,312,481	859,082	635,039	680,743	47,919,163	19,545,946	602,925

CURRENT ASSETS

■ INVENTORIES

euro 76,894 thousand

(euro 77,153 thousand at December 31, 2000)

Inventories, which increased by euro 259 thousand compared to December 31, 2000, consist of "contract work in process" (euro 16,593 thousand) and "merchandise" (euro 60,301 thousand).

■ ACCOUNTS RECEIVABLE

euro 9,220,393 thousand

(euro 9,119,142 thousand at December 31, 2000)

Accounts receivable increased by euro 101,251 thousand compared to December 31, 2000. A breakdown and the changes that occurred during the year are given in the table below:

		Changes during the year			
(in thousands of euro)	12/31/2000	Utilizations	Provisions	Change	12/31/2001
Trade accounts receivable	4,633,346			(85,192)	4,548,154
- allowance for doubtful accounts	(337,763)	159,405	(128,142)	31,263	(306,500)
Total trade accounts receivable	4,295,583			(53,929)	4,241,654
Accounts receivable from subsidiaries	2,703,482			(489,462)	2,214,020
- allowance for doubtful accounts of subsidiaries	-	-	(17,100)	(17,100)	(17,100)
Total accounts receivable from subsidiaries	2,703,482			(506,562)	2,196,920
- of which financial receivables	*1,062,416*			*(565,427)*	*496,989*
Accounts receivable from affiliated companies	241,609			83,261	324,870
- allowance for doubtful accounts of affiliated companies	-	-	(13,300)	(13,300)	(13,300)
Accounts receivable from affiliated companies	241,609			69,961	311,570
- of which financial receivables	*62,528*			*59,962*	*122,490*
Accounts receivable from parent companies	1,208			(118)	1,090
Other receivables	1,877,260			591,899	2,469,159
- Government and other public entities for grants and subsidies	1,265			-	1,265
- deferred tax assets	485,206			23,888	509,094
- other receivables	1,390,789			568,011	1,958,800
Total	**9,119,142**			**101,251**	**9,220,393**

■ Trade accounts receivable

euro 4,241,654 thousand

Trade accounts receivable are shown net of the relative allowance accounts (euro 306,500 thousand, of which euro 128,142 thousand provided in the period) and decreased by euro 53,929 thousand compared to December 31, 2000. They include euro 1,204,080 thousand of receivables from other telecommunications carriers, of which euro 943,769 thousand are from wireline and mobile carriers and euro 260,311 thousand from foreign correspondents. Furthermore, the securitization of receivables, described in the accounting principles, led to a reduction in trade accounts receivable at December 31, 2001 of euro 877,448 thousand, of which euro 684,399 thousand were not yet due.

■ Accounts receivable from subsidiaries

euro 2,196,920 thousand

Accounts receivable from subsidiaries decreased by euro 506,562 thousand, compared to December 31, 2000, and include trade, financial and other receivables.

The financial receivables, equal to euro 496,989 thousand, reflect current account transactions carried out at market rates for cash management purposes and short-term loans granted to *Finsiel (euro 104,664 thousand), Tilab (euro 102,693 thousand), Saritel (euro 67,416 thousand) and Telespazio (euro 61,563 thousand).* Trade receivables (euro 671,132 thousand) related to TLC services rendered mainly to *TIM (euro 213,106 thousand), Telespazio (euro 132,026 thousand), Seat Pagine Gialle (euro 48,069 thousand), Path.Net (euro 47,899 thousand)* and a management fee from *Stet International Netherlands (euro 31,293 thousand net of the relative allowance for doubtful accounts of euro 17,100 thousand).* Other receivables (euro 1,028,799 thousand) represent accrued dividends from *subsidiaries (euro 1,002,456 thousand, the details of which are shown in the note on "income from equity investments" in the statement of income,* and other receivables connected with the Group's VAT settlement system.

■ Accounts receivable from affiliated companies

euro 311,570 thousand

Accounts receivable from affiliated companies increased by euro 69,961 thousand compared to December 31, 2000, and mainly refer to financial and trade accounts receivable.

The financial receivables, equal to euro 122,490, reflect current account transactions carried out at market rates for cash management purposes and short-term loans, and mainly refer to the receivable from *Stream (euro 121,641 thousand).* Trade accounts receivable (euro

188,847 thousand) refer to TLC services rendered principally to *Auna (euro 82,073 thousand), Stream (euro 23,192 thousand) and Telekom Srbija (euro 21,545 thousand)* and include an allowance for doubtful accounts that was set up during the year in respect of receivable positions from Brasil Telekom and Telecom Argentina.

■ Accounts receivable from parent companies **euro 1,090 thousand**

These accounts receivable are trade in nature and are receivable from the parent company *Olivetti*.

■ Other receivables **euro 2,469,159 thousand**

Government and other public entities for grants and subsidies **euro 1,265 thousand**

These consist of the receivable from the Ministry of Industry, Commerce and Handicrafts for grants to defray the costs incurred for the realization of the telecommunications installations in Southern Italy.

Deferred tax assets **euro 509,094 thousand**

These are shown net of the reserve for deferred taxes (euro 588,236 thousand). The main items which gave rise to deferred tax assets are tax credits on dividends accrued but not yet received, provisions to the reserves for risks and charges and value adjustments to long-term assets and short-term assets; deferred taxes are almost entirely composed of dividend tax credits.

At December 31, 2001, about euro 211 million of deferred tax assets have not been recorded since their future recovery is not assured.

The balance of deferred tax assets and liabilities is made up as follows:

	12/31/2001 Amount due				12/31/2000 Amount due			
(in thousands of euro)	Within 1 year	From 2 to 5 year	Beyond 5 year	Total	Within 1 year	From 2 to 5 year	Beyond 5 year	Total
Deferred tax assets	988,499	108,831	-	**1,097,330**	912,547	146,508	-	**1,059,055**
Reserve for deferred taxes	(573,895)	(14,341)	-	**(588,236)**	(566,920)	(6,929)	-	**(573,849)**
Net balance	414,604	94,490	-	**509,094**	345,627	139,579	-	**485,206**

Other receivables **euro 1,958,800 thousand**

These increased by euro 568,011 thousand compared to December 31, 2000 and can be analyzed as follows:

(in thousands of euro)	12/31/2001	12/31/2000
- receivables from the Tax Administration	986,212	42,967
- receivables relating to personnel	114,335	80,867
- transaction for the loan of securities	235,552	867,636
- customer payments in transit with the banking and postal banking system	89,670	143,647
- receivable from TISV for "Deferred Purchasing Price"	308,049	25,775
- other items	224,982	229,897
Total	**1,958,800**	**1,390,789**

In particular, the receivables from the Tax Administration rose by euro 943,245 thousand, inasmuch as taxes paid on account in 2001, at December 31, 2001, proved to be excess of actual tax requirements.

The contra-entry to the transaction for the loan of securities described under "Investments" is in "Other liabilities".

■ SHORT-TERM FINANCIAL ASSETS **euro 240,457 thousand**

(euro 331,879 thousand at December 31, 2000)

The composition and changes during the year are shown in the following table:

		Changes during the year				
(in thousands of euro)	12/31/2000	Acquisitions	Sales/ Reimbursements	Writedowns/ Reimbursements	Total	12/31/2001
Equity investments in subsidiaries	326,732	-	-	(86,275)	(86,275)	240,457
Other equity investments	5,147	1,089	(4,995)	(1,241)	(5,147)	
Total	**331,879**	**1,089**	**(4,995)**	**(87,516)**	**(91,422)**	**240,457**

These refer to the value of listed stock purchased for trading purposes; the "equity investments in subsidiaries" consist of TIM ordinary shares purchased for later sale.
Further details are given in Annex 3.

■ LIQUID ASSETS — **euro 80,613 thousand**

(euro 108,947 thousand at December 31, 2000)

Liquid assets decreased by euro 28,334 thousand compared to December 31, 2000 and include the following:

(in thousands of euro)	12/31/2001	12/31/2000
Bank and postal accounts	80,220	108,621
Checks	9	5
Cash and valuables on hand	384	321
Total	**80,613**	**108,947**

ACCRUED INCOME AND PREPAID EXPENSES — **euro 695,039 thousand**

(euro 844,073 thousand at December 31, 2000)

These decreased by euro 149,034 thousand compared to December 31, 2000 and include the following:

(in thousands of euro)	12/31/2001	12/31/2000
Issue discounts and similar charges	**25,097**	**1,245**
Accrued income		
- financial income	11,944	17,424
Other prepaid expenses		
- production costs	54,652	54,044
- financial expense	4,715	20,464
- other	598,631	750,896
	657,998	825,404
Accrued income and other prepaid expenses	**669,942**	**842,828**
Total	**695,039**	**844,073**

■ Issue discounts and similar charges — **euro 25,097 thousand**

These increased by euro 23,852 thousand compared to December 31, 2000 owing to the issue, below face value, of notes subscribed to by Sogerim and the market. See also the note on "Debentures" in the liabilities. They also include consulting expenses incurred to connection with the transaction.

■ Accrued income and other prepaid expenses — **euro 669,942 thousand**

These decreased by euro 172,886 thousand compared to December 31, 2000.
Accrued income includes the interest expense (euro 5,317 thousand) subsidized until 1991 by the government under Law No. 67/1988, equivalent to three percentage points of the cost of the loans which replaced those assigned to the Company through Cassa Depositi e Prestiti under Law No. 887/1984; they also include euro 5,450 thousand of income on financial derivative instruments.
Prepaid expenses are mainly related to building rents paid to *IM.SER (euro 30,780 thousand)* and *Telemaco Immobiliare (euro 12,680 thousand)*, financial expenses (euro 4,715 thousand) pertaining to amounts already accrued or paid, but attributable to future years and expenses relating to *Stet International Netherlands, (euro 584,349 thousand)* for the deferral of the put option on Seat Pagine Gialle shares. See also "Purchases and sales commitments" in the memorandum accounts.

A breakdown of receivables and accrued income by maturity and type is given in Annex 4.

■ LIABILITIES AND SHAREHOLDERS' EQUITY

SHAREHOLDERS' EQUITY

euro 15,870,654 thousand

(euro 18,713,989 thousand at December 31, 2000)

Shareholders' equity decreased by euro 2,843,335 thousand, compared to December 31, 2000; the table below shows the changes that occurred during the year:

		Changes during the year				
(in thousands of euro)	12/31/2000	Appropriation of 2000 net income	Other changes	Net income	Total	12/31/2001
Share capital	3,835,290	-	187,771	-	187,771	4,023,061

Comments on the main changes during the year are discussed for the following captions:

■ SHARE CAPITAL

Share capital increased by euro 187,771 thousand, compared to December 31, 2000. Euro 790 thousand of this increase is due to the subscription against payment, by executives of the Group, of No. 1,496,350 ordinary shares, of which No. 1,022,650 of par value Lire 1,000 each and No. 473,700 of par value euro 0.55 each, under the stock option plan. The remaining amount of euro 186,981 thousand refers to the bonus share capital increase following the re-denomination of the share capital into euro. In fact, the extraordinary Shareholders' Meeting of May 3, 2001 passed a resolution to re-denominate the share capital into euro by re-denominating the par value of the ordinary and savings shares in euro and rounding up the par value of Lire 1,000 to euro 0.55 and consequently effecting a bonus increase in share capital by:

- cancellation of No. 112,998,070 savings shares of treasury stock of par value Lire 1,000 each held in portfolio and the allocation to share capital, to simultaneously replenish the same, of an amount equal to the par value of the cancelled shares corresponding to the share of the reserve for treasury shares in portfolio which became available as a result of the cancellation;
- allocation to share capital of an amount equal to euro 186,981 thousand from the revaluation reserve ex Law No. 72 dated March 19, 1983.

After these transactions, share capital at December 31, 2001 consists of No. 5,261,533,481 ordinary shares and No. 2,053,122,025 savings shares of par value euro 0.55 each .

■ ADDITIONAL PAID-IN CAPITAL

Additional paid-in capital increased by euro 9,372 thousand, compared to December 31, 2000, due to the foregoing options exercised under the stock option plan.

■ RESERVE FOR INFLATION ADJUSTMENTS UNDER LAW NO. 72 OF 3/19/1983

This reserve decreased by euro 186,981 thousand, compared to December 31, 2000, due to aforementioned transaction regarding the re-denomination of share capital in euro.

■ RESERVE FOR TREASURY STOCK IN PORTFOLIO

- This reserve now shows a nil balance, compared to December 31, 2000, due to the following: reclassification from the "Extraordinary reserve" of No. 8,020,000 savings shares of treasury stock with a par value of Lire 1,000 each, for an equivalent amount of euro 49,505 thousand, following the extension of the tender offer to January 10, 2001 as voted by the Shareholders' Meeting on January 14, 2000;
- cancellation of No. 112,998,070 savings shares of treasury stock of par value Lire 1,000 each held in portfolio, as described in the note on share capital, for euro 710,865 thousand.

■ RESERVE FOR ACCELERATED DEPRECIATION

The changes during the year are due to the following:

- increase as a result of the appropriation of 2000 net income (euro 121,789 thousand);
- decrease of euro 121,789 thousand after euro 6,443 thousand was subjected to ordinary taxation and euro 115,346 thousand became available by applying the 19% substitute tax, in accordance with Law No. 448/2001, art. 4; the total amount was then reclassified to "Reserve Law No. 488/92" for euro 118,678 thousand and the "Extraordinary reserve" for euro 3,111 thousand.

■ RESERVE LAW No. 488/92

This reserve includes the reclassification from the "Reserve for accelerated depreciation" which became available during the year 2001. As you will recall, Telecom Italia's Shareholders' Meeting on June 12, 2001 a portion of this reserve was restricted, equal to euro 118,678 thousand, to obtain the benefits provided under Law No. 488/92 for investment projects in the south of Italy. Since, during 2001, all the projects listed below were subsidized, the restriction became fully effective.

Details of the projects subsidized under Law 488/92 are as follows:

- project No. 01080-11 relating to the Sardinia region (euro 19,918,193.23);
- project No. 08160-12 (ex-No. 38039-11) relating to the Campania region (euro 21,809,974.85);
- project No. 08161-12 (ex-No. 38040-11) relating to the Sicily region (euro 21,809,974.85);
- project No. 08162-12 (ex-No. 38042-11) relating to the Puglia region (euro 42,465,668.53);
- project No. 08163-12 (ex-No. 38043-11) relating to the Basilicata region (euro 12,673,852.30).

■ RESERVE LAW No. 342 OF NOVEMBER 21, 2001, ART. 14

This reserve decreased by euro 172,082 thousand owing to the reclassification, to the "Special reserve", of the amount corresponding to the definitive payment of the substitute tax as set forth by this law, covered by the utilization of deferred taxes set aside in previous years.

■ SPECIAL RESERVE

The special reserve shows an increase of euro 125,688 thousand compared to December 31, 2000. The change is due to the following movements:

- reclassification of euro 49,505 thousand to "Reserve for treasury stock in portfolio";
- reclassification of euro 172,082 thousand from "Reserve Law No. 342 of November 21, 2001, art. 14";
- reclassification of euro 3,111 thousand from "Reserve for accelerated depreciation".

■ RESERVE FOR CAPITAL GRANTS

This reserve increased by euro 15,330 thousand as a result of the transfer from the "reserves for risks and charges" of the portion of grants received up to December 31, 1992 that became available in 2001 in relation to the depreciation of the assets to which such grants refer.

■ RESERVE LEGISLATIVE DECREE NO. 124/93, EX ART. 13

This reserve was established in the current year as a result of the appropriation of net income for the year 2000. It is equal to 3% of the portion of termination indemnities destined for the reserve for supplementary benefits.

Current plans do not include any transactions affecting tax-deferred equity reserves which would be subject to taxation under current laws.

RESERVES FOR RISKS AND CHARGES

euro 1,612,737 thousand

(euro 883,705 thousand at December 31, 2000)

These increased by euro 729,032 thousand compared to December 31, 2000. The composition and changes in these reserves are described as follows:

		Changes during the year					
(in thousands of euro)	12/31/2000	Provision	Utilization	Released to income	Reclassifications/ Other	Total	12/31/2001
Reserves for taxes	141,238	570,957	(651,651)	-	56,104	(24,590)	116,648
For taxes	141,238	-	(57,644)	-	33,054	(24,590)	116,648
For deferred taxes	-	570,957	(594,007)	-	23,050	-	-
Other reserves	742,467	1,042,349	(141,704)	(131,693)	(15,330)	753,622	1,496,089
Reserve for litigation	135,411	27,844	(11,415)	(11,215)	-	5,214	140,625
Reserve for capital grants	130,843	-	-	-	(15,330)	(15,330)	115,513
Reserve for losses of subsidiaries and affiliates	15,093	66,431	(592)	-	-	65,839	80,932
Reserve for corporate restructuring	152,108	-	(101,610)	(50,498)	-	(152,108)	-
Reserve for purchase commitments	-	568,622	-	-	-	568,622	568,622
Reserve for contractual risks and other risks	309,012	379,452	(28,087)	(69,980)	-	281,385	590,397
Total	**883,705**	**1,613,306**	**(793,355)**	**(131,693)**	**40,744**	**729,032**	**1,612,737**

■ Reserve for taxes

euro 116,648 thousand

The reserve for taxes decreased by euro 24,590 thousand compared to December 31, 2000 and refers entirely to income taxes and other duties and taxes.

The reserve for deferred taxes shows a nil balance attributable to the set-off with deferred tax assets.

■ Other reserves

euro 1,496,089 thousand

These increased by euro 753,622 thousand, compared to December 31, 2000 and include the following reserves:

- reserve for litigation (euro 140,625 thousand): this includes prudent provisions - charged to various items of the statement of income - for probable expenses in connection with personnel disputes and litigation with third parties which had not yet been settled at the end of the year. Both the provisions and the utilizations mainly relate to disputes with third parties, whereas the releases to income refer to litigation with social security agencies;
- reserve for capital grants (euro 115,513 thousand): this includes the unavailable portion of capital grants received up to December 31, 1992 recorded herein solely for purposes of taking advantage of the tax benefits. Utilizations during the year (euro 15,330 thousand) stem from the transfer to shareholders' equity of the portion of the capital grants which became available;
- reserve for losses of subsidiaries and affiliates (euro 80,932 thousand): this includes the provisions to account for the losses in excess of the carrying value of some investments; in particular Softe (euro 42,955 thousand), TMI - Telemedia International Italia (euro 5,698 thousand), TI Capital (euro 4,529 thousand) and Trainet (euro 8,647 thousand);
- reserve for corporate restructuring: set up in 2000 subsequent to the operating agreements reached in July 2000 with the unions concerning cutbacks and layoffs under unemployment compensation plans, the reserve was utilized for euro 101,610 thousand and the portion in excess of requirements was released to income;
- reserve for purchase commitments (euro 568,622 thousand): the amount provided in 2001 relates to the forward purchase commitment of Seat Pagine Gialle shares connected with the estimate of the nonrecoverability of the original price of the options. See also "Purchases and sales commitments" in the memorandum accounts.
- reserve for contractual risks and other risks (euro 590,397 thousand): this includes the provisions recorded in previous years (mainly in relation to the contribution of the business segment "Large Buildings", the sales of Italtel and Sirti and disputes over regulations) and those arising during the year to cover the expenses related to the agreement with Vivendi/CanalPlus for the transfer of the investment in Stream (euro 247,373 thousand) and the sale of the satellite consortiums (euro 40,000 thousand). The releases to income mainly refer to the risks connected with the Iraq contract (euro 61,975 thousand).

1538

RESERVE FOR EMPLOYEE TERMINATION INDEMNITIES

euro 1,025,349 thousand

(euro 1,031,274 thousand at December 31, 2000)

This reserve decreased by euro 5,925 thousand, compared to December 31, 2000. The following changes took place during the year:

(in thousands of euro)	
Balance at December 31, 2000	**1,031,274**
Changes during the year:	
- Provisions charged to income for amounts to fund employee termination indemnities accrued in favor of employees during the year plus the fixed and variable cost-of-living adjustments required under Law No. 297/1982	142,975
- Utilizations for:	
Indemnities paid to employees who took retirement or resigned during the year	(99,496)
Advances	(12,946)
Supplementary benefits (Telemaco)	(26,313)
- Amounts transferred to/from subsidiaries and other changes	(10,145)
Balance at December 31, 2001	**1,025,349**

LIABILITIES

euro 24,898,003 thousand

(euro 26,423,069 thousand at December 31, 2000)

A breakdown of liabilities and accrued expenses pursuant to Article 2427, Section 6, of the Italian Civil Code, is provided in Annex 5. Liabilities, which decreased by euro 1,525,066 thousand compared to December 31, 2000, include the following:

	12/31/2001			12/31/2000		
(in thousands of euro)	Financial accounts payable	Trade accounts payable and other payables	Total	Financial accounts payable	Trade accounts payable and other payables	Total
Debentures	8,250,000	-	8,250,000	145,456	-	145,456
Due to banks	7,308,420	-	7,308,420	12,770,486	-	12,770,486

Other liabilities	395,266	2,219,990	2,615,256	1,194,648	1,729,130	2,923,778
Total	**17,908,873**	**6,989,130**	**24,898,003**	**18,901,150**	**7,521,919**	**26,423,069**

■ Debentures

euro 8,250,000 thousand

Debentures increased by euro 8,104,544 thousand, compared to December 31, 2000, due to the issue of four notes by Telecom Italia for a total of euro 8,250,000 thousand and to the early redemption, effective December 31, 2001 with reimbursement on January 1, 2002 (as voted by the Board of Directors' Meeting on July 27, 2001), of the "SIP 1992/2010 notes reserved for subscription by employees, in service and retired". The amount to be reimbursed to employees for these notes at December 31, 2001 (euro 138,545 thousand) was recorded in "Other liabilities".

Notes were issued as follows:

- three fixed-rate notes for a total of euro 6,750,000 thousand, entirely subscribed to by Sogerim: the first issue on May 31, 2001 in two tranches, for euro 3,300,000 thousand (the first for euro 1,800,000 thousand maturing January 20, 2006 and the second for euro 1,500,000 thousand maturing January 20, 2011); the second issue on August 3, 2001, in two tranches, for euro 3,000,000 thousand (the first for euro 1,000,000 thousand maturing January 20, 2006 and the second for euro 2,000,000 thousand maturing January 20, 2006); the third issue on December 28, 2001 for euro 450,000 thousand maturing on January 20, 2011;
- one floating-rate note issued on December 21, 2001 for the market and listed on the Luxembourg stock exchange for euro 1,500,000 thousand maturing June 21, 2005 callable at the same face value on December 21, 2003 and at every coupon date for interest thereafter.

The relative nominal rates of interest at December 31, 2001 are:

(in thousands of euro)	
From 2.5% to 5%	1,500,000
From 5% to 7.5%	6,750,000
Total	**8,250,000**

Moreover, as from January 1, 2002, new notes were issued for euro 1 billion to substitute the notes that were extinguished. Such subscription was also extended to employees, in service and retired, of the companies with head offices in Italy, directly or indirectly, controlled by Telecom Italia. The new notes, with a face value of euro 50 each, issued at face value, are for a period of 20 years, are not listed and are negotiable at face value solely with Telecom Italia. The semiannual interest payable on January 1 and July 1 of each year not in advance is linked to the 6-month Euribor rate.

■ Due to banks **euro 7,308,420 thousand**

These decreased by euro 5,462,066 thousand compared to December 31, 2000. They comprise medium/long-term debt totaling euro 2,581,365 thousand - of which euro 37,185 thousand is secured by collateral - and short-term borrowings totaling euro 4,727,055 thousand. Of the latter amount, euro 1,734,000 thousand refer to loans taken out to cover temporary liquidity requirements, euro 2,500,000 thousand of credit facilities and euro 492,454 thousand of bank overdrafts.

■ Due to other lenders **euro 657,777 thousand**

These decreased by euro 1,205 thousand compared to December 31, 2000. They consist of medium/long-term financing (euro 489,988 thousand), referring almost entirely to loans made by the Cassa Depositi and Prestiti (euro 390,615 thousand) and amounts payable to IRI (euro 97,607 thousand), short-term loans payable to TI Securitisation Vehicle S.r.l. for financing using the excess liquidity generated by the securitization of receivables (euro 167,789 thousand).

■ Trade accounts payable **euro 2,240,654 thousand**

These decreased by euro 592,190 thousand compared to December 31, 2000. They comprise payables to other TLC carriers amounting to euro 558,883 thousand, of which euro 250,325 thousand are due to foreign correspondents and euro 308,558 thousand to wireline and mobile operators.

■ Accounts payable to subsidiaries **euro 2,350,730 thousand**

These decreased by euro 2,817,228 thousand compared to December 31, 2000. They consist of financial payables, trade accounts payable and other payables.

Financial payables (euro 1,218,043 thousand), refer to current account transactions negotiated at market rates for cash management purposes and mainly include accounts payable to *TIM (euro 692,646 thousand) and Seat Pagine Gialle (euro 389,129 thousand).* Trade accounts payable (euro 1,090,902 thousand) mainly refer to payables to *TIM (euro 344,058 thousand)* and *Telespazio (euro 93,933 thousand)* for the portion of TLC services invoiced by Telecom Italia to customers, and *Telesoft (euro 218,507 thousand), Netsiel (euro 126,682 thousand)* and *Finsiel (euro 55,427 thousand)* for supply transactions. Other payables (euro 41,785 thousand) primarily refer to capital contributions paid to the company *Path.Net (euro 18,074 thousand)* and amounts owed in connection with the Group's VAT settlement system.

■ Accounts payable to affiliated companies **euro 244,744 thousand**

These decreased by euro 326,500 thousand, compared to December 31, 2000. They refer to financial payables, trade accounts payable and other payables.

Financial payables (euro 29,205 thousand), refer to current account transactions negotiated at market rates for cash management purposes and mainly refer to accounts payable to *Teleleasing (euro 12,541 thousand)* and *Webegg (euro 11,584 thousand).* Trade accounts payable (euro 215,446 thousand) mainly refer to payables to *Italtel (euro 129,728 thousand)* for supply transactions, *Telekom Srbija (euro 22,609 thousand)* and *Teleleasing (euro 19,197 thousand)* for portions of TLC services invoiced by Telecom Italia to customers. Other payables (euro 93 thousand) refer to the liability for capital contributions payable to *Consorzio Res.*

■ Accounts payable to parent companies **euro 11 thousand**

These refer to trade accounts payable to the parent company *Olivetti.*

■ Taxes payable **euro 460,552 thousand**

These decreased by euro 33,556 thousand, compared to December 31, 2000, and mainly refer to:

- the payable to the Italian Treasury for withholding taxes of euro 69,697 thousand;
- the VAT liability totaling euro 270,391 thousand;
- medium/long-term financial debt (euro 50,162 thousand) relative to the agreement with the Financial Administration over the assessments received in 2001;
- the income tax liability for the year, net of advances paid and dividend tax credits, of euro 49,113 thousand.

■ Contributions to pension and social security institutions **euro 767,412 thousand**

These decreased by euro 88,317 thousand compared to December 31, 2000.

They include amounts owed to social security and health institutions with regard to personnel. These specifically include euro 651,003 thousand payable to INPS for charges, pursuant to Law No. 58/92 (see related accounting policy) and referring to the merged company Iritel, estimated by the special Ministerial Commission in relation to the valuation of assets contributed to Iritel by the Post and Telecommunications Administration.

■ Other liabilities **euro 2,615,256 thousand**

These decreased by euro 308,522 thousand compared to December 31, 2000.

They include, in particular, liabilities for the:

- payable to customers totaling euro 1,064,994 thousand, including deposits by subscribers against telephone conversations, pre-billed basic charges (mainly for the months of January and February 2002) and the unused portions of prepaid telephone cards;
- payable to employees amounting to euro 382,086 thousand for 2001 payrolls paid in 2002;
- payable for the TLC license fee totaling euro 656,793 thousand. Telecom Italia contested the Ministerial Decree dated March 21, 2000 that introduced Law No. 448/1998, which set forth a new license fee as from January 1, 1999 in lieu of the previous concession fee. Consequently, it did not pay the license fee for the year 2000 (euro 306,865 thousand) nor the on-account payment for the year 2001 (euro 291,522 thousand);
- transactions for the loan of Seat Pagine Gialle ordinary and savings shares (euro 235,552 thousand); these transactions, described under "Investments" in long-term investments, have a contra-entry to "Other receivables ";
- payable of euro 138,545 thousand to the subscribers of the "SIP 1992/2010" notes that were called for early redemption on December 31, 2001; this is described in the note on "Debentures" in the liabilities.

ACCRUED EXPENSES AND DEFERRED INCOME

euro 704,209 thousand

(euro 511,137 thousand at December 31, 2000)

These increased by euro 193,072 thousand, compared to December 31, 2000, and include the following:

(in thousands of euro)	12/31/2001	12/31/2000
Accrued expenses		
- production costs	3,109	2,794
- financial expense	265,069	104,461
	268,178	107,255
Deferred income		
- capital grants (unavailable portion)	134,975	146,552
- production value	297,368	254,098
- financial income	3,688	3,232
	436,031	403,882
Total	**704,209**	**511,137**

Accrued financial expenses, in particular, relate to interest accrued on notes (euro 209,734 thousand) and other medium/long-term (euro 32,613 thousand). Deferred income mainly includes pre-billed basic charges and rentals of telephone equipment (euro 145,565 thousand), the unavailable portion of capital grants received after December 31, 1992, and financial items mainly connected to loans to employees.

An analysis of liabilities and accrued expenses by maturity and type is provided in Annex 5.

■ MEMORANDUM ACCOUNTS

Memorandum accounts totaled euro 14,936,969 thousand at December 31, 2001 and can be analyzed as follows:

■ GUARANTEES PROVIDED

euro 11,541.329 thousand

Guarantees provided consist of sureties (net of counter-guarantees received totaling euro 2,037,702 thousand), of which euro 11,191,303 thousand are on behalf of subsidiaries, euro 185,450 thousand on behalf of affiliated companies and euro 164,576 thousand on behalf of third parties. The guarantees were given mainly in respect of the notes issued by Sogerim for a total of euro 8,500,000 thousand (part of the Global Medium-Term Note Program which is completely guaranteed by Telecom Italia), other medium/long-term financial transactions, supply contracts and guarantees on bids to acquire licenses abroad.

■ PURCHASES AND SALES COMMITMENTS

euro 3,388,580 thousand

These mainly consist of commitments for the purchase of Seat Pagine Gialle shares (euro 2,985,264 thousand) under the put option on the same shares, described below, and future lease obligations plus the related purchase options (euro 378,149 thousand).

Put option on Seat Pagine Gialle shares

Under the contract stipulated on March 15, 2000 (as subsequently amended and integrated), Telecom Italia gave Huit II a put option on No. 710,777,200 Seat Pagine Gialle shares at a strike price of euro 4.2 per share. The contract provided for the exercise of such option after the deed of merger between Seat Pagine Gialle and Tin.it was recorded in the Companies Register. Huit II later transferred the put option to Chase Equity Limited (CEL), together with the ownership of the corresponding Seat Pagine Gialle shares. On December 4, 2000, CEL renegotiated the contract with Telecom Italia, extending the period to five years, with the possibility of exercising the option at an earlier date in April and May 2003, 2004 and 2005. The time extension made it possible to defer the financial impact.

Stet International Netherlands (a wholly-owned subsidiary of Telecom Italia) then purchased from CEL, through the Liberator Ltd. trust, a call option on No. 660,777,200 Seat Pagine Gialle ordinary shares with the same expiry date and strike price as the put option, paying a total premium of euro 747,016,226. Moreover, for the purpose of transferring the effects of this latter transaction to Telecom Italia, a call option was stipulated, with the same features, between the same Telecom Italia and Stet International Netherlands.

On February 25, 2002, Telecom Italia concluded the renegotiation of the December 4, 2000 put and call options with the JPMorgan Chase group.

In particular, a decision was made to reduce the price to exercise the aforementioned options from euro 4.2 to euro 3.4 per shares; in view of the reduction, Telecom agreed to pay JPMorgan Chase an amount of euro 568,622 thousand at the original expiration date of December 2005, unless Telecom Italia's decides to exercise the right to pay the present value of the same amount prior to that date.

A decision was also made to eliminate the right of either party to exercise the options, which thus expire on December 6, 2005, except for Telecom Italia's right to exercise part of the call options beforehand; the early exercise of the option per tranche, beginning from December 2004, covers 355 million Seat Pagine Gialle shares.

At the conclusion of the above transactions, Telecom Italia intends to record the equivalent value of these same shares in "Investments" under long-term investments.

The valuation of the forward purchase commitment of Seat Pagine Gialle shares at the end of 2001 led to a provision in the reserves for risks and charges (other reserves) of euro 568,622 thousand to cover the estimated nonrecoverability of the original price to exercise the option.

This provision is in line with the cost connected with the above-mentioned revision of the strike price.

■ OTHER MEMORANDUM ACCOUNTS

euro 7,060 thousand

These mainly refer to assets of third parties on loan, on deposit for safekeeping or for similar purposes (euro 6,048 thousand).

* * * * *

Moreover:

- the Company issued weak letters of patronage totaling euro 1,343,595 thousand, chiefly on behalf of subsidiaries and affiliated companies to guarantee insurance polices, lines of credit and overdraft arrangements;
- assets held by third parties on loan, on deposit for safekeeping or for similar purposes amounted to euro 287,904 thousand and consist mainly of equipment leased to customers;
- guarantees provided by others for Company obligations, which consist primarily of sureties to guarantee the performance of non-financial contractual obligations, totaled euro 315,930 thousand;
- the stock of employees and private shareholders deposited at December 31, 2001 with Telecom Italia, and thus subdeposited with Monte Titoli S.p.A., equal euro 97,274 thousand, whereas those awaiting assignment or in the process of being replaced totaled euro 61,804 thousand;
- at December 31, 2001, the expense fund to safeguard the holders of savings shares, set up by resolution of the Shareholders' Meeting of June 21, 1999, amounts to euro 2,176 thousand; the remuneration of the common Representative of said shareholders will be paid out of this fund, as voted by the Meeting of the Savings Shareholders on October 31, 2001;
- the total amount of commitments at December 31, 2001 for building rent obligations to be paid to IM.SER under 21-year contracts was euro 3,678,000 thousand. The commitment from 2002 to 2006 is euro 184,670 thousand per year.

■ FINANCIAL DERIVATIVES

Derivatives refer to cross currency and interest rate swaps (to convert pound sterling loans into euro) and interest rate swaps (to convert variable rate loans into fixed rate loans and convert debt linked to domestic parameters to the 6-month Euribor rate). The following table gives a description of the financial derivative contracts outstanding at December 31, 2001 used to hedge medium/long-term debt positions, compared to those at December 31, 2000.

(in millions of euro)	Notional amount/ Capital exchanged at December 31, 2001	Notional amount/ Capital exchanged at December 31, 2000
Interest rate swap	1,437	1,698
Cross currency and interest rate swap	390	390

The following table indicates the notional amount and the average interest rate to be paid/received for interest rate swaps by maturity date.

	Maturity				
	2002	2003	2004	2005	2006
Interest rate swap:					
Fixed pay rate, variable receive rate:					
- notional amount (millions of euro)	154,9	568,1	6,0	24,1	=
- weighted average pay rate	4,65%	3,84%	4,25%	4,71%	=
- received parameter	Libor 3M euro	Libor 3M euro	Libor 3M euro	Libor 3M euro	=
Variable pay rate, variable receive rate:					
- notional amount (millions of euro)	=	=	231	237,4	215,3
- paid parameter	=	=	Euribor 6 M	Euribor 6 M	Euribor 6 M
- received parameter	=	=	Rolint	Rendint	Rendint
			Robot	Rendibot	Rendibot
				Rolint	Rolint
				Robot	Robot

Derivative transactions hedging interest rate and exchange rate risks on short-term loans equal euro 311 million at December 31, 2001 (euro 36 million at December 31, 2000), of which euro 300 million relate to forward rate agreements and euro 11 million to currency forward agreements.

STATEMENTS OF INCOME

PRODUCTION VALUE

euro 17,537,266 thousand

(euro 17,758,995 thousand in 2000)

Production value, which decreased by euro 221,729 thousand compared to 2000, includes the following:

Sales and service revenues

euro 17,309,066 thousand

Sales and service revenues decreased by euro 153,718 thousand (-0.9%) compared to 2000.
A breakdown of sales and service revenues by type of business and geographical region, as required under Article 2427, Section 10 of the Italian Civil Code, is given below:

Breakdown by type of business

(in thousands of euro)	2001	2000	Change
Sales:			
- telephone products	260,207	349,876	(89,669)
- other goods	3,751	5,114	(1,363)
	263,958	**354,990**	(91,032)
Services:			
- Traffic (*)	8,813,352	9,468,380	(655,028)
- Basic charges (of which):	7,270,113	6,686,578	583,535
lines leased to TLC operators	*924,581*	*814,678*	*109,903*
- Activation fees	259,871	238,516	21,355
- Other	701,772	714,320	(12,548)
	17,045,108	**17,107,794**	(62,686)
Total	**17,309,066**	**17,462,784**	(153,718)

(*) of which:

(in thousands of euro)	*2001*	*2000*	*Change*
Traffic by Telecom Italia customers:			
- domestic	*6,005,914*	*6,803,565*	*(797,651)*
- outgoing non-domestic	*482,584*	*703,082*	*(220,498)*
- special services and other	*480,553*	*444,590*	*35,963*
	6,969,051	**7,951,237**	**(982,186)**
Traffic by other operators:			
- domestic	*1,042,499*	*803,383*	*239,116*
- foreign correspondents	*801,802*	*713,760*	*88,042*
	1,844,301	**1,517,143**	**327,158**

Breakdown by geographical region

(in thousands of euro)	2001	2000	Change
Italy	15,823,442	15,769,831	53,611
Rest of Europe	810,590	1,012,476	(201,886)
North America	231,612	224,493	7,119
Central and South America	215,307	87,456	127,851
Australia, Africa and Asia	228,115	368,528	(140,413)
Total	**17,309,066**	**17,462,784**	(153,718)

As regards the geographical breakdown of revenues from sales and services, the "Rest of Europe", "North America", "Central and South America" and "Australia, Africa and Asia" refer almost entirely to revenues from traffic to and from these geographical regions.

Sales revenues, which decreased by euro 91,032 thousand (-25.6%) compared to 2000, derive from the sales of telephone and telematic products. The reduction is attributable to the fact that from the second half of 2000, for some customers, the Company only plans the telecommunications systems, leaving manufacturers with the responsibility for the direct sale of the equipment.

Service revenues, which decreased by euro 62,686 thousand (-0.4%) compared to 2000, are mostly composed of traffic revenues and are shown gross of the amount due to other carriers (euro 3,414,875 thousand), which are also included in costs of "services", and basic subscriber charges. In particular, traffic revenues decreased by 6.9% mainly due to the effects of the rate changes in the second half of 2000 and 2001 which lowered the price of calls, and the strong growth in less remunerative types of traffic (traffic "carried" on behalf of other operators). Basic subscriber charges increased by 8.7% mainly as a result of the aforementioned rate changes, the development of data connections and the growing number of subscribers to various discount rate plans proposed by the Company.

Transactions for revenues from sales and services with subsidiaries, affiliated companies and parent companies totaled euro 1,507,435 thousand. They refer to:

- *TIM (euro 699,929 thousand) – revenues for mobile-fixed interconnections and lines leased;*
- *Telespazio (euro 122,620 thousand) – sale of satellite capabilities;*
- *Telecom Argentina (euro 64,078 thousand) – management fee;*
- *Teleleasing (euro 80,083 thousand) – sale of products;*
- *Auna (euro 62,520 thousand) – telephone services.*

■ Changes in inventory of contract work in process **- euro 19,318 thousand**

Changes in inventory of contract work in process represent the difference between the increase in work in progress and the decrease as a result of completed contracts.

■ Increases in capitalized internal construction costs **euro 5,615 thousand**

These consist entirely of capitalized labor costs. The item decreased by euro 5,750 thousand (-50.6%) compared to 2000.

■ Other revenues and income **euro 241,903 thousand**

Other revenues and income, which decreased by euro 34,911 thousand (-12.6%) compared to 2000, include the following:

Operating grants **euro 278 thousand**

Operating grants decreased by euro 244 thousand compared to 2000 and refer to grants made by the european Community to defray the costs of personnel training programs.

Other **euro 241,625 thousand**

This item decreased by euro 34,667 thousand, compared to 2000, and include the following:

(in thousands of euro)	2001	2000	Change
Gains on disposal of production assets	2,532	1,629	903
Refunds for costs of employees on loan at Group companies	28,734	31,306	(2,572)
Capital grants recorded in income	29,941	40,544	(10,603)
Late payment fees	95,658	77,130	18,528
Indemnification, reimbursements and recoveries and other miscellaneous income	84,760	125,683	(40,923)
Total	**241,625**	**276,292**	**(34,667)**

Transactions involving other revenues and income with subsidiaries, affiliated companies and parent companies total euro 62,932 thousand. They refer to the recovery of costs for personnel on loan and sundry services, mainly in respect of:

- *TIM (euro 10,348 thousand);*
- *TILab (euro 6,729 thousand);*
- *Telesoft (euro 5,538 thousand);*
- *Telekom Austria (euro 2,876 thousand);*
- *Auna (euro 3,550 thousand);*
- *Netsiel (euro 3,017 thousand).*

PRODUCTION COST

euro 13,553,981 thousand

(euro 14,164,129 thousand in 2000)

Production cost, which decreased by euro 610,148 thousand compared to 2000, includes the items below:

■ Raw materials, supplies and merchandise **euro 301,447 thousand**

These decreased by euro 103,139 thousand (-25.5%) compared to 2000, mainly due to lower costs for the sale of products (-euro 82,792 thousand) since, beginning from the second half of 2000, for some customers, the Company only plans the telecommunications systems, leaving manufacturers with the costs of supplying the equipment.

This item includes euro 51,664 thousand of costs incurred on behalf of subsidiaries, affiliated companies and parent companies mainly in reference to Italtel (euro 37,032 thousand) for the maintenance costs of telephone exchanges.

■ Services **euro 5,945,961 thousand**

Service costs, which increased by euro 250,199 thousand (+4.4%) compared to 2000, include the following:

(in thousands of euro)	2001	2000	Change
Direct service costs	702,824	722,960	(20,136)
Operating costs	1,172,237	1,054,495	117,742
Marketing costs	574,541	630,538	(55,997)
Know-how development costs	81,484	137,995	(56,511)
Amounts due to other carriers	3,414,875	3,149,774	265,101
Total	**5,945,961**	**5,695,762**	**250,199**

An analysis of the composition of such costs shows the following:

a) "direct service costs" include the operating and maintenance costs of the TLC network (euro 322,100 thousand), operating and maintenance costs of customer installations (euro 194,863 thousand), public telephone installations (euro 82,168 thousand) and the costs for operating the satellite systems (euro 58,037 thousand);

b) "operating costs" refer to the operating and maintenance costs of buildings, vehicles, information systems and equipment, as well as general expenses, Operating costs include euro 300,757 thousand for information systems, euro 164,792 thousand for electricity for buildings and installations and euro 128,595 thousand for indirect personnel costs;

c) "marketing costs" include selling expenses, after-sales assistance, customer relations, advertising and promotion; in particular, such costs include euro 215,268 thousand for advertising and promotional, euro 27,347 thousand for printing telephone bills (business contributed to Printel on February 1, 2001) and euro 69,778 thousand for the trade agreements with Internet Service Providers. The contribution of the business for printing the White Pages to Tin.it led to a reduction in costs of euro 24,966 thousand;

d) "know-how development costs" are made up by costs pertaining to training, studies and research and consulting services;

e) "amounts due to other carriers" mainly include euro 2,296,412 thousand due to Italian mobile operators, euro 295,885 thousand to domestic fixed carriers and euro 754,417 thousand to foreign correspondents.

The costs for services include euro 2,186,946 thousand regarding transactions with subsidiaries, affiliated companies and parent companies. They refer, in particular, to:

- *TIM (euro 1,332,026 thousand) - amounts due for telecommunications services;*
- *Netsiel (euro 265,417 thousand) - operating information systems;*
- *Etec S.A. (euro 78,370 thousand) and Seat Pagine Gialle (euro 77,122 thousand) - telecommunications services;*
- *Saritel (euro 50,066 thousand) - supply of information services ;*
- *Telespazio (euro 50,702 thousand) - use of satellite circuits.*

■ Use of property not owned **euro 619,499 thousand**

Use of property not owned, which increased by 167,412 thousand (+37.0%) compared to 2000, includes mainly "service costs" (for the lease of TLC lines and satellite systems), amounting to euro 177,772 thousand, and "operating costs" (for building rentals, building and vehicle leases and equipment rentals), totaling euro 440,342 thousand. As regards lease installments, principal and interest total, respectively, euro 20,304 thousand and euro 22,071 thousand.

This item comprises euro 324,824 thousand of costs for the use of property not owned relating to subsidiaries, affiliated companies and parent companies. They regard, in particular:

- *IM.SER (euro 198,277 thousand) and Telemaco Immobiliare (euro 76,310 thousand) – building rentals;*
- *Teleleasing (euro 47,079 thousand) - mainly building leases.*

■ Personnel **euro 2,644,240 thousand**

Personnel costs decreased by euro 444,323 thousand (-14.4%), compared to 2000. The reduction is mainly due to the change in the average number of the work force (-11,145, -15.4%, as shown in the table below), as a result of both employee cutbacks under Law No. 223/1991 covered by the agreements reached with the labor unions in July 2000 and employees no longer with the company on account of contributions or the sale of business segments in 2000 and 2001.

Personnel costs include the costs of employees on loan to other companies (euro 28,734 thousand) and recovered from the same companies; the income from the recovery of such costs is recorded under "*Other revenues and income*".

A comparative breakdown of the average number of employees by professional category is given below:

	2001	2000	Change
Executives	1,005	1,084	(79)
Middle management	1,655	4,951	(3,296)
Clerical staff	49,953	54,909	(4,956)
Technicians	8,846	11,660	(2,814)
Total	**61,459**	**72,604**	**(11,145)**

■ Amortization, depreciation and writedowns **euro 3,479,781 thousand**

Amortization, depreciation and writedowns, which decreased by euro 430,233 thousand (-11.0%) compared to 2000, include the following:

Amortization of intangible assets **euro 617,565 thousand**

Amortization of intangible assets increased by euro 17,476 thousand and refers to the following assets:

(in thousands of euro)	2001	2000	Change
Start-up and expansion costs	-	527	(527)
Industrial patents and intellectual property rights	578,542	529,028	49,514
Concessions, licenses, trademarks and similar rights	37	12,155	(12,118)
Goodwill	-	655	(655)
Other intangibles	38,986	57,724	(18,738)
Total	**617,565**	**600,089**	**17,476**

Depreciation of fixed assets **euro 2,703,674 thousand**

Depreciation of fixed assets decreased by euro 415,101 thousand (-13.3%) compared to 2000. This is attributable to the reduction in depreciable assets following the contribution of assets to IM.SER and Netsiel in December 2000 and Telesoft in the first half of 2001, as well as the change in the mix of depreciable assets.

The average depreciation rate, calculated by taking into account the above depreciation charge and the assets being depreciated, is equal to 8.4% (8.6% in 2000).

The following table shows the depreciation charge for each asset category and the related depreciation rate:

(in thousands of euro)	2001		2000		Change
Land and building	3.3%	89,888	3.3%	203,614	(113,726)
Plant and machinery	8.8%	2,548,024	9.1%	2,744,535	(196,511)
Manufacturing and distribution equipment	23.9%	18,806	25.0%	32,283	(13,477)
Other fixed assets	19.0%	46,956	29.8%	138,343	(91,387)
Total		**2,703,674**		**3,118,775**	**(415,101)**

Writedowns of receivables included in current assets and liquid assets **euro 158,542 thousand**

This item, representing the provision to the allowance for doubtful accounts, decreased by euro 13,175 thousand compared to 2000, owing to lower provisions as a result of a reduction in doubtful receivables.

- Change in inventory of raw materials, supplies and merchandise **- euro 19,059 thousand**

The change reflects the purchases of the products intended for sale and maintenance that were not used, net of writedowns made to account for obsolescence and the diminished usefulness of materials.

- Provisions for risks **euro 76,785 thousand**

These refer to provisions made to the *"reserve for litigation"* to cover expenses connected with the probable outcome of disputes with third parties (euro 25,871 thousand) and to the *"reserve for contractual risks and other risks"* to cover risks stemming from the settlement of trade and regulatory questions (euro 50,914 thousand).

- Other provisions **euro 23,430 thousand**

Other provisions refer to amounts set aside in the "reserve for risks" in the current year in respect of services that have accrued in relation to the suppliers of Audiotel services which use the Telecom Italia network.

- Miscellaneous operating costs **euro 481,897 thousand**

Miscellaneous operating costs, which decreased by euro 17,143 thousand compared to 2000, include the following:

Losses on disposal of assets **euro 24,747 thousand**

Losses on disposal of assets decreased by euro 23,981 thousand from 2000 as a result of the completion of the network rationalization and modernization program, begun in previous years.

License fee **euro 289,582 thousand**

The TLC license fee decreased by euro 21,598 thousand, compared to 2000, owing to a reduction in the revenue base and a reduction in the rate which went from 2.7% in the prior year to 2.5% in 2001; this item mainly includes the fee on amounts invoiced under Law No. 448/1998 (euro 270,085 thousand), the fee for the assignment of available numbers (euro 7,721 thousand) and that for use of radio frequencies (euro 7,720 thousand) established by Ministerial Decree of February 5, 1998.

Other miscellaneous costs **euro 167,568 thousand**

Other miscellaneous costs, which increased by euro 28,436 thousand, compared to 2000, include the following:

(in thousands of euro)	2001	2000	Change
Other indirect duties and annual taxes, relating mainly to the local property tax, local duties, stamp and register tax, vehicle tax, Technical and Finance Office taxes and fees, license tax on mobile equipment	87,857	80,708	7,149
Contributions and membership fees	14,601	10,171	4,430
Losses on the sale of receivables	36,769	-	36,769
Other costs, essentially relating to compensation due to customers under service regulations for delays in hookups or line transfers, damages paid to third parties for line installations and maintenance and losses on settlements	28,341	48,253	(19,912)
Total	**167,568**	**139,132**	**28,436**

FINANCIAL INCOME AND EXPENSE

euro 397,336 thousand

(euro 1,329,825 thousand in 2000)

The income balance, net, of financial income and expense, which decreased by euro 932,489 thousand, compared to 2000, includes the following:

(in thousands of euro)		2001	2000	Change
Income from equity investments	(A)	2,022,090	1,789,300	232,790
Other financial income	(B)	188,052	182,609	5,443
Interest and other financial expense	(C)	1,812,806	642,084	1,170,722
Total	**(A+B-C)**	**397,336**	**1,329,825**	**(932,489)**

■ Income from equity investments

Refers to the following:

(in thousands of euro)	2001	2000	Change
Dividends from subsidiaries, affiliates and other companies	1,304,634	1,181,608	123,026
Other income from equity investments:			
- tax credits on dividends	717,456	574,781	142,675
- gains on sales of investment	-	32,911	(32,911)
	717,456	607,692	109,764
Total	**2,022,090**	**1,789,300**	**232,790**

Tax credits on dividends are made up of euro 563,881 thousand of tax credits on dividends from subsidiaries accrued in 2001 and euro 153,575 thousand of dividends collected in 2001.

Dividends can be analyzed as follows:

(in thousands of euro)	2001			2000			Change		
Dividends from subsidiaries	**Accrued**	**Received**	**Total**	**Accrued**	**Received**	**Total**	**Accrued**	**Received**	**Total**

■ Other financial income
Includes the following:

	2001				
(in thousands of euro)	**Included in long-term investments**	**Included in current assets**	**Total**	**2000**	**Change**
Interest and fees on:					
- accounts receivable					
from subsidiaries	2,466	57,163	59,629	46,321	13,308
from affiliated companies	-	8,336	8,336	10,969	(2,633)
from others	11,918	-	11,918	8,255	3,663
- banks and the Postal Administration	-	3,966	3,966	7,332	(3,366)
- securities	-	-		1,307	(1,307)
	14,384	**69,465**	**83,849**	**74,184**	**9,665**
Foreign exchange gains			38,971	46,975	(8,004)
Other income			65,232	61,450	3,782
Total			**188,052**	**182,609**	**5,443**

Other financial income includes euro 67,995 thousand of interest and fees on receivables from subsidiaries, affiliated companies and parent companies almost all of which refer to interest on current accounts for cash management purposes, mainly with:

- *TIM (euro 18,638 thousand);*
- *Telespazio (euro 7,202 thousand);*
- *Stream (euro 7,682 thousand);*
- *Finsiel (euro 6,333 thousand);*
- *Sogei (euro 4,308 thousand).*

■ Interest and other financial expense

Can be analyzed as follows:

	2001				
(in thousands of euro)	Medium/long-term debt	Short-term borrowings	Total	2000	Change
Interest and fees:					
- subsidiaries	-	257,800	257,800	78,187	179,613
- affiliated companies	-	1,455	1,455	5,703	(4,248)
- banks	133,964	429,383	563,347	412,762	150,585
- other lenders	34,583	13,763	48,346	47,567	779
- suppliers	-	858	858	34	824
- others	-	13,878	13,878	2,036	11,842
	168,547	**717,137**	**885,684**	**546,289**	**339,395**
Interest, premiums and other similar charges on notes			215,328	9,448	205,880
Foreign exchange losses			34,255	28,716	5,539
Accrued portion of issue discounts and similar charges on loans			2,197	605	1,592
Provision for "purchease commitment" for Seat Pagine Gialle shares.			568,622	-	568,622
Other financial expense			106,720	56,641	50,079
Total			**1,812,806**	**641,699**	**1,171,107**

The increase in interest and other financial expense is due mainly to the provision relating to the forward purchase commitment for Seat Pagine Gialle shares connected with the estimate of the nonrecoverability of the original price to exercise the option. See also "Purchases and sales commitments" in the memorandum accounts.

Interest and other financial expense include euro 259,255 thousand of interest and fees on payables to subsidiaries, affiliated companies and parent companies with regard to:

- *Stet International Netherlands (euro 148,632 thousand) – financial expenses on the call option on Seat Pagine Gialle shares as part of the put option on the same shares;*
- *TIM (euro 61,849 thousand) and Seat Pagine Gialle (euro 27,321 thousand) – interest expenses accrued on current accounts for cash management purposes.*

VALUE ADJUSTMENTS TO FINANCIAL ASSETS

- euro 774,867 thousand

(- euro 437,757 thousand in 2000)

Value adjustments to financial assets increased by euro 337,110 thousand compared to 2000. They represent the difference between the upward adjustments of investments for euro 14 thousand and the writedowns of investments for euro 774,881 thousand regarding the following companies:

(in thousands of euro)	Writedowns to the carrying values	Writedowns recorded in the reserve for losses of subsidiaries	Total
Recorded in "long-term investments"			
- Stream	241,352	-	241,352
- TMI - Telemedia International Italia	155,166	5,698	160,864
- TI Lab	49,609	-	49,609
- Softe	43,938	42,955	86,893
- Latin American Nautilus	28,566	-	28,566
- Netesi	7,764	-	7,764
- Trainet	-	8,647	8,647
- Telecom Italia Capital	1,069	4,529	5,598
- IT Telecom	1,085	-	1,085
- Telespazio	90,782	-	90,782

Total	**620,934**	**66,431**	**687,365**
Recorded in "short-term financial assets"			
- TIM	86,275	-	86,275
- Other companies	1,241	-	1,241
Total	**87,516**	**-**	**87,516**

EXTRAORDINARY INCOME AND EXPENSE

- euro 2,892,922 thousand

(-euro 179,460 thousand in 2000)

This item shows a net expense balance, with an increase of euro 2,713,462 thousand. Details are as follows:

(in thousands of euro)		2001	2000	Change
Income				
- gains on disposals		264,388	666,425	(402,037)
- release of sundry reserves to income		120,478	-	120,478
- other		110,346	88,319	22,027
	(A)	495,212	754,744	(259,532)
Expense				
- losses on disposals		1,134	9,870	(8,734)
- provisions and writedowns of investments		2,526,768	-	2,526,768
- restructuring costs (employee reduction plans and territorial programs)		202,556	171,740	30,816
- expenses for the sale of Stream		247,373	-	247,373
- expenses and provisions to reserve for corporate restructuring (cutbacks and layoffs)		-	285,004	(285,004)
- provisions for sale of satellite consortiums		40,000	-	40,000
- other		370,303	467,590	(97,287)
	(B)	3,388,134	934,204	2,453,930
Total	**(A-B)**	**(2,892,922)**	**(179,460)**	**(2,713,462)**

The reduction in "income" is mainly due to the fact that 2000 included gains on the contribution of the business segment "Large Buildings" to IM.SER (euro 509,598 thousand) and the sale of Sirti (euro 117,345 thousand), while in 2001, the gains realized related principally to the *contribution of the investments in Intelsat, Inmarsat and New Skies Satellites to Mirror International Gmbh for euro 138,664 thousand and the sale of the investment in Eutelsat to Mirror International Holding for euro 110,754 thousand.*
Furthermore, in 2001, reserves were released for provisions made in prior years for euro 120,478 thousand for the reserve for the contract with Iraq (euro 61,975 thousand) and the reserve for corporate restructuring costs (euro 50,498 thousand).
"Expense" increased mainly on account of *extraordinary writedowns referring to the investments in Stet International Netherlands (euro 1,984,511 thousand) and in TI Web (euro 542,257 thousand)* in order to rationalize the foreign investment portfolio; the increase is also due to *the provisions related to the agreement with Vivendi/Canal Plus for the transfer of Stream (euro 247,373 thousand) and the sale of the satellite consortiums (euro 40,000 thousand).* Extraordinary expense also comprises euro 155,245 thousand of expense to guarantee uniform status according to Law 58/1992 under the former Telephone Employees Pension Fund (FPT) which, as required by the 2000 Finance Bill, has become part of the general "Employees Pension Fund", and euro 71,431 thousand for the extraordinary annual contribution to INPS (established by the aforementioned Finance Bill for the three years 2000 - 2002) to meet the higher financial requirements covered by the rules of the fund that was abolished.

INCOME TAXES

euro 562,022 thousand

(euro 1,748,811 thousand in 2000)

This item includes current income taxes of euro 73,555 thousand, and deferred income taxes of euro 488,467 thousand. The total decrease of euro 1,186,789 thousand is principally due to the reduction in the tax base mainly as a result of the previously mentioned extraordinary provisions charged in respect of the international investments.
Income taxes include euro 268,085 thousand for income taxes (IRPEG) and euro 293,937 thousand for the regional tax on productive activities (IRAP).
The effective tax rate in 2001 (78.84%) is higher than that of 2000 (40.60%) mainly on account of the effect of the IRAP tax on pre-tax profits as a result of higher financial and extraordinary items which are only deductible for IRPEG tax purposes. The elements for the determination of the tax rate in 2001 are as follows:

(in thousands of euro)		IRPEG	IRAP	TOTAL
Theoretical taxes	(A)	**256,620**	**289,638**	**546,258**
Temporary timing differences taxed and deductible in future years				
- dividends accrued		(563,881)	-	(563,881)
- provision for writedown of receivables		57,809	-	57,809
- provision to the reserves for risks and charges		158,001	-	158,001
- net change relating to installation writedowns and other items		105,118	3,013	108,131
Reversal of prior years' temporary timing differences				
- accelerated depreciation		2,320	274	2,594
- writedowns and amortization and depreciation		(125,147)	(11,136)	(136,283)
- sundry		(138,714)	435	(138,279)
Permanent differences		35,602	4,042	39,644
Differences arising from tax benefits		-	(439)	(439)
Current income taxes		**(212,272)**	**285,827**	**73,555**
Deferred income taxes		**480,357**	**8,110**	**488,467**
Taxes charged to statement of income	(B)	**268,085**	**293,937**	**562,022**
Income before income taxes	(C)			712,832
Theoretical tax rate	(A/C)			76.64
Effective tax rate	(B/C)			78.84

OTHER INFORMATION

■ REMUNERATION TO DIRECTORS AND STATUTORY AUDITORS

In compliance with the art. 78 giving effect to Legislative Decree 58/1998 dated February 24, 1998, that was adopted by Consob under resolution No. 11971 of May 14, 1999 and subsequent changes under resolution No. 12475 of April 6, 2000 and No. 13086 of April 18, 2001, the remuneration to which the directors and statutory auditors are entitled for fiscal 2001 are presented in the following table.
The table has been prepared by reference to the term of office, with remuneration considered on the accrual basis, except for bonuses and other incentives linked to the achievement of personal targets which are reported on a cash basis.
The remuneration for the post is decided for the individual by the appropriate corporate governance body.
Non-cash benefits correspond to the amount subject to taxes based on current tax laws.
Remuneration - prorata over the term of office in Telecom Italia - for the posts of director or statutory auditor in companies of the Group and not handed over to third parties are reported in the column "Other compensation".
Any other type of remuneration paid in 2001 is shown in the column "Other cash compensation".

INDIVIDUAL	DESCRIPTION OF POST		REMUNERATION (in thousands of euro)

(1) The amount includes the remuneration ex art. 2389, section 2. of the Italian Civil Code;
(2) Remuneration for the post of director in the subsidiary Seat Pagine Gialle;
(3) Remuneration for the post of Chairman of Seat Pagine Gialle, Telecom Italia Mobile and Telespazio paid over to Telecom Italia;
(4) Remuneration for the post of Deputy Chairman in Telecom Italia Mobile paid over to Telecom Italia;
(5) Remuneration for the posts of director and Committee member in Telecom Italia Mobile;
(6) Remuneration paid over to Banca Intesa BCI;
(7) Remuneration paid out to Edizione Holding;
(8) Remuneration for the posts of director and Committee member in Seat Pagine Gialle and director in Telecom Italia Mobile paid over to Edizione Holding;
(9) Remuneration for the post was not received by the person but will be paid over to the Administration Fund of the entity for which he works;
(10) The remuneration comprises all remuneration, including remuneration for all posts of whatever nature as well as posts covered in other subsidiaries or affiliates of Telecom Italia. In particular, waiver has been given for the portions to which he is entitled of the remuneration to the Board of Directors already voted by the Telecom Italia Shareholders' Meeting ex. art. 2389, section 1 of the Italian Civil Code;
(11) Remuneration for the post of Chairman and Deputy Chairman of the subsidiaries Telecom Italia Mobile and Seat Pagine Gialle was paid over to Telecom Italia;
(12) Remuneration for the posts of director and Committee member in Seat Pagine Gialle;
(13) Fees paid in 2001 to the professional association Bonelli Erede Pappalardo of which l'Avv. Erede is a shareholder. The amount includes the fees paid by Telecom Italia Mobile and by Seat Pagine Gialle;
(14) Remuneration paid to Studio Benessia Maccagno in 2001 for professional services rendered to Telecom Italia Mobile S.p.A.;
(15) Remuneration for the post of Chairman of the Board of Statutory Auditors in the subsidiary IT Telecom and Statutory Auditor in the subsidiaries Finsiel, Immsi, Telespazio and Telecom Italia Mobile.

■ INTRODUCTION OF THE EURO

The expenses borne during the year for the introduction of the euro currency total euro 22 million. Euro 2 million of this amount have been charged to the statement of income in *"production cost: services"* since they refer to work on the system for the conversion of the accounting balances into euro and euro 20 million have been charged to intangibles under *"industrial patents and intellectual property rights"* in respect of new and more complex software programs now in use.

AUDITORS' REPORT
pursuant to article 156 of Legislative Decree of February 24, 1998, n. 58
(Translation from the original Italian text)

To the Shareholders
of Telecom Italia S.p.A.

1. We have audited the financial statements of Telecom Italia S.p.A. as of and for the year ended December 31, 2001. These financial statements are the responsibility of the Telecom Italia S.p.A.'s management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. Our audit was made in accordance with auditing standards and procedures recommended by CONSOB. In accordance with such standards and procedures we planned and performed our audit to obtain the information necessary in order to determine whether the financial statements are materially misstated and if such financial statements, taken as a whole, may be relied upon. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, as well as assessing the appropriateness of the accounting principles applied and the reasonableness of the estimates made by management. We believe that our audit provides a reasonable basis for our opinion.

   The financial statements of certain subsidiaries, which represent 40% of the account "Equity investments, long-term", and 16% of total assets, have been examined by other auditors, whose reports have been furnished to us. Our opinion, expressed herein, insofar as it relates to the data relating to these subsidiaries, is based also on the reports of the other auditors.

   For the opinion on the financial statements of the prior year, which are presented for comparative purposes as required by the law, reference should be made to the auditors' report dated May 21, 2001, issued by other auditors.

3. In our opinion, the financial statements of Telecom Italia S.p.A. comply with the Italian regulations governing financial statements; accordingly, they clearly present and give a true and fair view of the financial position of Telecom Italia S.p.A. as of December 31, 2001, and the results of its operations for the year then ended.

REPORT OF THE BOARD OF DIRECTORS TO THE SHAREHOLDERS' MEETING OF TELECOM ITALIA S.P.A. PURSUANT TO LEGISLATIVE DECREE 58/1998 ART 153 AND ART. 2429, PARAGRAPH 3 OF THE ITALIAN CIVIL CODE

Dear Shareholders,

During the year ended December 31, 2001, the Board of Statutory Auditors carried out the supervisory work required by law, taking into account the code of ethics recommended by the National Boards of Dottori Commercialisti and Ragionieri. In preparing this report, the Board also took into consideration Consob Instruction No. 1025564 dated April 6, 2001, No. 97001574 dated February 20, 1997 and No. 98015375 dated February 27, 1998.

1. The obligation to keep the Board of Statutory Auditors informed pursuant to Legislative Decree 58/1998, art. 150, paragraph 1 and article 13 of the corporate by-laws, resulted in the Board receiving periodic information and data from the directors at the Board of Directors' Meetings, which have always been attended by the Board of Statutory Auditors, and written communications dated October 26, 2001 and April 16, 2002 received respectively, from the Managing Director, Mr Enrico Bondi and the Chairman Mr Marco Tronchetti Provera. This information described the most important economic, financial and equity transactions entered into by Telecom Italia S.p.A. and which are described below:
   - contribution to CSELT, which was simultaneously renamed Telecom Italia Lab, of the "Venture Capital and Innovation" business segment with the relative subscription to shares. Two additional capital stock increases were later subscribed to by Telecom Italia Lab;
   - direct and indirect issue, through the subsidiary Sogerim, of three notes under the Global Medium Term Note Program;
   - conversion of capital stock in euro following the resolution passed by the Extraordinary Shareholders' Meeting on May 3, 2001, through the re-denomination of the par value of the ordinary and savings shares and rounding up of the par value from Lire 1,000 to Euro 0.55 through the bonus increase of share capital (carried out by increasing the par value of the shares outstanding) effected by utilizing the reserve for treasury stock which became available following the cancellation of No. 112,998,070 savings shares of treasury stock and by the transfer of about Euro 187 million from the revaluation reserve ex law No. 72 of March 19, 1983;
   - start of the securitization program of trade accounts receivable generated by services rendered to customers of Telecom Italia Domestic Wireline and the customers of Path.Net, a company which provides telephone services to the Public Administration;
   - contribution to TIWeb S.A. of the investment held by Telecom Italia S.p.A. in Telsi Ltd, against a share capital increase by TIWeb S.A. to service the contribution;
   - authorization for the buy-back of treasury stock for a maximum amount of Euro 1,500,000,000.00 voted by the Ordinary Shareholders' Meeting of Telecom Italia S.p.A. on November 7, 2001;
   - divestiture of the investments held by Telecom Italia S.p.A. in the ex-consortiums Eutelsat (20.48%), Intelsat (2.77%), Immarsat (2.09%) and New Skies Satellites (3.91%). These investments were directly and indirectly conferred to a Newco, named Mirror International Holding, whose shares, in an amount equal to 70% of the holding, were then sold to a Lehman Brothers Merchant Banking mutual fund;
   - incorporation of TI Media through the total non-proportional spin-off of Huit S.A..

   The above transactions were described in the 2001 directors' report on operations and in the notes to the financial statements.
   The Board of Statutory Auditors has ascertained that the above transactions have been carried out in accordance with the law, the by-laws and general principles of economic rationale, ensuring that such transactions were not patently imprudent, risky, with potential conflict of interests, in contrast with the resolutions passed by the Shareholders' Meetings or such as to compromise the whole of the assets of the company.

2. The Board of Statutory Auditors has not noted any unusual and/or atypical transactions entered into with third parties, related parties or intercompanies.
   The directors, in their report on operations, disclose the major related party transactions entered into by Telecom Italia Group (including Telecom Italia S.p.A.), to which reference should be made, also with respect to the characteristics of the transactions and their economic effects. In this sense, it should be pointed out that the manner of disclosure on this subject has been changed beginning from the 2001 financial statements, as described in the report on operations in "Related party transactions".
   The Board of Statutory Auditors has verified, with the assistance of the Internal Auditing function, that, in Telecom Italia S.p.A., ade-

quate procedures are in force and have been followed in order to ensure that the above transactions are conducted at arms' length or according to specific regulatory provisions.
Based on recommendations by the Board of Statutory Auditors, the Company, starting from the second half of 2001, began a thorough review of the issues connected with the obligation of disclosure pursuant to Legislative Decree 58/1998, art. 150, paragraph 1. Such review led to the drawing up of a new procedure, in March 2002, for complying with such obligations, that the Company has intention of experimenting beginning from the year 2002. The Board of Statutory Auditors, taking into account the size and structure of the Company and the Group, in principle, has expressed a positive opinion on this new procedure.

3. The disclosure provided in the report on operations and in the statutory and consolidated financial statements, concerning transactions entered into by Telecom Italia S.p.A. with related parties or intercompanies, is sufficient, taking into account the size and structure of the Company.

4. The audit firm, Reconta Ernst & Young S.p.A., on April 15, 2002, has issued its audit report in accordance with Legislative Decree No. 58/1998, art. 156 stating that the statutory financial statements and the consolidated financial statements at December 31, 2001 give a true and fair view of the financial position and results of operations of the Company and the Group.
The report makes reference to the usual comments concerning the pension costs regulated by Law No. 58/1992.
The same audit firm of Reconta Ernst & Young S.p.A. issued its report dated April 16, 2002, which contained no exceptions, on the sustainability report of the Telecom Italia Group for the year ended December 31, 2001.

5. The Board of Statutory Auditors received five complaints under ex art. 2408 of the Italian Civil Code in 2001, concerning corporate matters and company problems In particular, such complaints related to the following issues: a) installation of a telephone pole by the Company on private property b) the alleged non-fulfillment of the deadline dates for filing documents for the Shareholders' Meeting c) the alleged existence of reasons for the ineligibility of a Managing Director d) the alleged illegal mechanism of overinvoicing some telephone bills e) the alleged impossibility of examining the corporate Books. The Board of Statutory Auditors, in all cases, carried out the appropriate inquiries and ascertained that there were no omissions, censurable facts or irregularities that needed to be brought to the attention of the Shareholders' Meeting.

6. The Board of Statutory Auditors received no petitions.

7. In 2001, Telecom Italia S.p.A. appointed Reconta Ernst & Young S.p.A. and PricewaterhouseCoopers S.p.A. to perform certain work other than the legal audit of the financial statements. The fees for this work, excluding out-of-pocket expenses and VAT, are summarized below:

Reconta Ernst & Young S.p.A.	*(Euro)*
Accounting assistance connected with the preparation of Form 20-F	376,000.00
Issue of comfort letters in relation to the issue of "Telecom Italia S.p.A. € 1,500,000,000 Floating Rate Notes due 2005"	77,500.00
Audit procedures carried out with respect to the accounting situations at September 30, 2001 of certain Telecom Italia Group companies	362,000.000
Other work (procedures agreed and accounting assistance)	42,700.00
Total	**858,200.00**
PricewaterhouseCoopers S.p.A.	*(Thousands of lire)*
Work related to the "registration form F4" – conversion offering of saving shares	495,000
Coordination work in the capital market area	50,000
Total	**545,000**

The above fees appear adequate in relation to the complexity and magnitude of the work performed.

8. In 2001, Telecom Italia S.p.A. did not confer any appointments to parties connected by continuous working relationships with Reconta Ernst & Young S.p.A., whereas it appointed a party connected by continuous working relationships to PricewaterhouseCoopers S.p.A. for a total of about Euro 105,000.

9. In 2001, the Board of Statutory Auditors issued a specific opinion to the Board of Directors, pursuant to ex art. 2389, paragraph 2 of the Italian Civil Code, concerning the remuneration assigned to the Chairman and Managing Directors, as well as opinions pursuant to ex art. 2386, paragraph 1 of the Italian Civil Code with regard to the replacement of directors. It also issued opinions ex art. 159 of Legislative Decree 58/1998 with regard to the proposal for the revocation of the appointment for the audit for the three years 2000-2002, previously conferred to PricewaterhouseCoopers S.p.A., and on the proposal to appoint the firm of Reconta Ernst & Young S.p.A. for the audit of the financial statements for the three years 2001-2003, and the proposal to adjust the fees due PricewaterhouseCoopers S.p.A. in relation to the activities carried out for the audit of the financial statements for the year 2000. The Board of Statutory Auditors also issued an opinion on the conversion of the share capital in euro voted by the Extraordinary Shareholders' Meeting on May 3, 2001.

10. In 2001, the meetings of the Board of Directors numbered eighteen; those of the Audit and Corporate Governance Committee numbered six. The Board of Statutory Auditors, in 2001, met twenty-nine times. The Board also attended the ordinary and extraordinary sessions of the Shareholders' Meetings and the Board of Directors' Meetings. The Board, lastly, through its Chairman, another statutory auditor or jointly, took part, by express invitation, in the meetings of the Audit and Corporate Governance Committee held during the year.

11. The Board of Statutory Auditors has acquired information and monitored, as far as its responsibilities are concerned, the proper keeping of administration, through direct observation, the gathering of information from those in charge of the organizational functions, pursuant to Legislative Decree No. 58/1998, ex art. 151, paragraph 2, and meetings with the Internal Auditing function and meetings with the audit firm of PricewaterhouseCoopers S.p.A. up to July 2001 and Reconta Ernst & Young S.p.A. from August 2001, for purposes of a reciprocal exchange of important information and data.

12. The Board of Statutory Auditors, in the same manner, has acquired information and monitored, as far as its responsibilities are concerned, the adequacy of the organizational structure of the Company.
In particular, the Board took note of the change in the organizational model of the Telecom Italia Group, which, as regards Telecom Italia S.p.A., is formed by a top management composed of the Chairman and two Managing Directors (instead of a President-Managing Director) and the first line is represented by the corporate functions, business units and operating activities.
The functioning of the organizational structure is ensured by three macro-areas headed, respectively, by the Chairman, with the aim of creating economic value and overseeing the identity and responsibilities of the Group, and by two Managing Directors who guarantee respectively, both the governing of the Group, the rationalization and search for synergies, in addition to the management of the common service areas, and also the development, management and integration of the businesses. The definition of policy and the governing of questions transversal to the business units, the operating activities and the Companies of the Group, are guaranteed by a model based on "professional families" which, by grouping operating resources based on functional homogeneous environments found at the different organizational levels, makes it possible to bring the governance of the various business units/companies functionally to top management and the corporate structures. Governing mechanisms have also been introduced which lend support to the management and control of the business units and the operating activities on the part of top management constituted by the Steering Committee, Business Management Meetings and the Investment Committee.
to the evolution of powers conferred for operations, the decisional structures and the internal control system – subjects on which the Board of Statutory Auditors has already expounded at the Shareholders' Meeting of Telecom Italia S.p.A. for the 2000 financial statements that was held on June 12, 2001 and in the memorandum on the "Comments by the Board of Statutory Auditors on the report for the six months ending June 30, 2001" – a new systems of powers has been designed for corporate representation on the basis of the powers conferred by the Board of Directors to the Chairman and Managing Directors in the Meeting on November 7, 2001 and in conjunction with the rules for corporate governance of the Company. This new system is based on the following principles:
- strict correlation between the organizational positions and the powers conferred, attributing power of attorney exclusively to those parties who, on the basis of their organizational mandates, carry out trading activities with third parties;
- right to sub-delegate powers which allows a more direct definition of the powers of corporate representation and control attributed to those with powers without the need of going to top management for the assignment of the relative power of attorney;
- introduction of precise limits in exercising the powers in relation to the commitments for expenditures, areas of expertise and joint signatures;
- period of the power of attorney connected with the permanence of the position covered by introducing a specific clause in the act attributing the powers;
- notation indicating the type of power of attorney correlating the use with the budget system and the corporate procedures.

Furthermore, it should be noted that currently sub-powers of attorney are being issued by the persons in charge of the functions and business units to the various corporate structures.

The procedures in Telecom Italia S.p.A. that are now being followed by the Group have been prepared with a view towards achieving common rules, relative to the more critical corporate processes, in terms of homogeneity and the strengthening of the internal control systems. Such procedures are aimed at defining the relationships for coordination of the various business functions and the relationships between the corporate functions and business units.

The Board of Statutory Auditors, as far as its responsibilities are concerned, has monitored the aspects of legitimacy and correct administrative procedures relating to the decisional process concerning the valuation of the corporate investment holdings.

The monitoring, in particular, regarded whether the pertinent bodies made decisions on the basis of information, appraisals and data gathered and/or processed by internal technical staff or outside consultants.

Even at the time of the aforementioned Shareholders' Meeting on the 2000 financial statements, the Board recommended that the economic value of certain foreign subsidiaries operating in the Internet sector should be monitored more closely in view of the evolutionary stage of this business that was characterized by instability and unforeseen factors on a world scale.

In the "Comments by the Board of Statutory Auditors on the report for the six months ending June 30, 2001", as well, – observations were made as to the fact that some companies in the new economy sector had not been written down because they were considered strategic or because they were in the start-up phase or, finally, because there was substantially no change in the business – the Board of Statutory Auditors itself recommended that the value of the investments should be continuously monitored.

As recommended by the Audit and Corporate Governance Committee and the Board of Statutory Auditors, the Board of Directors of Telecom Italia S.p.A., in its meeting of September 12, 2001, voted to develop a procedure for checking the value of investment holdings.

At the end of the year, the new management developed and implemented a new systematic procedure for valuing investments, establishing the pertinent bodies, the level for delegating powers and the process for approving and monitoring investments over time.

At the time of preparing the draft financial statement for 2001, the directors checked the value of the investments and adjusted them in relation to the results of the new procedures and the new strategic guidelines of the Company. The process of estimation was also supported by the results of some outside consultants regarding the valuation of Seat Pagine Gialle S.p.A. and a large part of the portfolio of Stet International Netherlands N.V. and Tim International N.V. (ex-S.M.H. N.V.).

The audit firm of Reconta Ernst & Young S.p.A., for purposes of furnishing the necessary elements for valuing the investment holdings, carried out – according to a specific appointment by Telecom Italia S.p.A. – verification procedures relating to the companies in the Telecom Italia Group, presenting the documents in December 2001 and March 2002.

Last year, a delegated law – Legislative Decree No. 231 of June 8, 2001 – introduced administrative responsibility into Italian law as regards the criminal proceedings of companies for specific offenses that eventually may be committed in the interests of and/or to the benefit of the companies themselves by those who hold positions of representation, administration, management and/or by their employees.

The Board of Statutory Auditors has regularly followed, together with the Audit and Corporate Governance Committee, all that has been proposed to date as regards this issue. To this end, the Company is outlining a development plan within the Group aimed at ensuring that the law in question will be followed

13. The Board of Statutory Auditors has evaluated and monitored the adequacy of the internal control system. In particular, it regularly gathered information on the activities carried out, by meetings with those in charge of the Internal Auditing function and by obtaining specific documentation on a periodical basis; it also requested and obtained evidence of the steps taken to correct critical areas.

    After the adoption of the new organizational model in the second half of the year, the scope of the audit examination was revised as it, too, was affected by the new organizational structure. The re-examination of the internal control system recently led to the concentration of the internal audit work of Telecom Italia S.p.A. and the subsidiaries Tim S.p.A. and Seat Pagine Gialle S.p.A. in a specific company, In.Tel.Audit - Società consortile a r.l..

14. The Board of Statutory Auditors has evaluated and monitored the adequacy and the administrative and accounting system, as well as its reliability to correctly represent the operating events, by obtaining information from those in charge of the respective functions, examining corporate documentation and reviewing the results of the work carried out by the audit firm.

15. The instructions given by Telecom Italia S.p.A. to its subsidiaries, pursuant to art. 114, paragraph 2, of Legislative Decree No. 58/1998, appear adequate for purposes of fulfilling the obligation regarding communication as required by law.

16. The Board of Statutory Auditors has ascertained, through direct verification and information obtained from the audit firm, that the laws have been respected with regard to the preparation and formation of the statutory financial statements of Telecom Ita-

lia S.p.A. and the consolidated financial statements of the Group as well as the directors' report accompanying said statements. In particular, the Group's performance by business sector and by geographical area has been presented by taking into account Consob Instruction No. 98084143 dated October 27, 1998.
The Sustainability Report of the Telecom Italia Group at December 31, 2001 is being presented, for the first time, at the Shareholders' Meeting of Telecom Italia S.p.A..

17. The Company, through its own code of conduct, follows the Code of Self-discipline of the Committee for the Corporate Governance of listed companies. To this end, the Audit and Corporate Governance Committee and the Remuneration Committee for the compensation to directors have been set up and are operational.

18. During the course of the foregoing monitoring activities, there were no significant facts that came to our attention such that would need to be reported to the controlling bodies or mentioned in this report except for a note to Consob concerning the omission of two situations that should have been communicated to the Board of Statutory Auditors in accordance with art. 150, paragraph 1, of Legislative Decree 58/1998 and which became known when the six-month financial statements at June 30, 2001 were examined. A review by the Board of the transactions connected with these situations did not result in any matters to report.
The examination of the reports issued as set forth by art. 153 and art. 156 Legislative Decree 58/1998, respectively by the Board of Statutory Auditors and the audit firms of the subsidiaries of Telecom Italia S.p.A., with stocks listed on regulated markets and managed by Borsa Italiana S.p.A. or organized as business units (Tim S.p.A., Seat Pagine Gialle S.p.A., IMMSI S.p.A., Finsiel S.p.A. and Telespazio S.p.A.), show no significant matters for attention.

19. The Board of Statutory Auditors, at the Shareholders' Meeting of Telecom Italia S.p.A. on the 2000 financial statements held on June 12, 2001, discussed, as to its knowledge, the events regarding the acquisition, in June 1997, by Stet International Netherlands N.V., of a 29% stake in Telekom Srbija. The Board followed the matter also by interviewing the persons in charge of foreign operations: based on the activities carried out, currently, no significant variations have emerged in the situation described at the aforementioned Shareholders' Meeting and at the time of preparing the "Comments by the Board of Statutory Auditors on the report for the six months ending June 30, 2001".

20. The Board of Statutory Auditors, at the Shareholders' Meeting of Telecom Italia S.p.A. on the 2000 financial statements held on June 12, 2001, discussed, as to its knowledge, the events regarding the compensation package to Lorenzo Pellicioli, who, at that time, was the Managing Director of Seat Pagine Gialle S.p.A., reserving the right to reach its conclusions after obtaining an authoritative and independent opinion on the aspects of the resolutions and disclosures on the subject. This opinion was issued on June 11, 2001 and transmitted to the Board of Statutory Auditors on June 13, 2001.
The Board of Statutory Auditors, in its "Comments by the Board of Statutory Auditors on the report for the six months ending June 30, 2001" referred to the later evolution, which can be summarized by the decision taken by the Audit and Corporate Governance Committee and by the Board of Statutory Auditors – which worked together closely on the question – to ask the aforementioned legal counsel for certain additional information, as well as to ask an authoritative and independent consultant in corporate matters certain precise information on the method and the calculation of the compensation package later paid to Mr Pellicioli.
The additional information from the legal counsel and the precise information from the consultant in corporate matters were issued, respectively, on February 6, 2002 and January 21, 2002.
The Board of Statutory Auditors submitted the matter to the Consob in its memorandum dated March 6, 2002 (sending a copy to the Chairman of the Company and the audit firm of Reconta Ernst & Young S.p.A.), whereas the Audit and Corporate Governance Committee presented its memorandum to the Board of Directors of the Company in its meeting of March 26, 2002, the same date on which the Board of Statutory Auditors sent its memorandum to the Consob.
The Board of Statutory Auditors, on the basis of the above opinions and after a careful analysis of the available documentation, reached the following conclusionsi:
- Telecom Italia S.p.A. under the contracts on August 8, 1997 and March 15, 2000, assumed and then confirmed its obligation to contribute to the compensation package in favor of Mr Pellicioli.
- The purchase contract dated August 8, 1997 was signed by the Deputy General Manager of Telecom Italia S.p.A. who had received power of attorney on August 5, 1997 from the Managing Director by the powers vested in him by the Board of Directors on February 26, 1997.
- From a quantitative standpoint, the benefits paid by Huit Sarl to Mr Lorenzo Pellicioli, both with regard to the variable and fixed compensation, result from the agreements that had at one time been decided.
- The compensation package to Mr Pellicioli does not appear to fall within the framework of the advantages to the directors, in respect of which the project for the demerger/merger of Tin.it-Seat must make reference. The economic benefit was decided and

developed when the project for the merger of Tin.it-Seat had not yet been either contemplated or drawn up.

- External information to the market about the compensation package does not conform to the rules of best practice as regards communication, but this does not mean that the company violated an laws.
- Information on the compensation package to the Board of Directors and Board of Statutory Auditors, by the directors with powers, was not specific and direct, with possible violation by them of their responsibilities to fully refer such information. Nevertheless, the comments made by the legal counsel should be mentioned, according to which, on the one hand, this "does not invalidate the commitments undertaken with the counterparties, and, on the other hand, could legitimize actions for damages if it could be demonstrated (of which I have no evidence at this time) that a better disclosure could have caused a change in direction and that this (which I do not believe) could have been legally possible without the agreement of the counterparties".

Lastly, the Board of Directors, having been informed – as described above – through the memorandum of the Board of Statutory Auditors to Consob on this specific issue and in light of the results of the investigation carried out by the Audit and Corporate Governance Committee, reached its own conclusions which concur with those of the two consultants, respectively as to the legal and corporate issues, excluding – at this time – that further inquiries or initiative should be started.

21. As far as the Board of Statutory Auditors is concerned, having taken note of the results of the statutory financial statements for the year ended December 31, 2001, it has no objections to the proposal by the Board of Directors for the appropriation of the net income for the year.

Rome, April 19, 2002

The Board of Statutory Auditors
The Chairman

FINANCIAL STATEMENTS AT DECEMBER 31, 2001 – APPROPRIATION OF NET INCOME FOR THE YEAR AND RESERVES. PERTINENT AND RELATED RESOLUTIONS

Dear Shareholders,

The documentation available for your information gives an exhaustive illustration of the statutory financial statements of the Company and the consolidated financial statements of the Group, as well as the reasons which led to a net income of only Euro 150,809,706.79 for the year ended December 31, 2001.

The solid equity position of Telecom Italia and its future prospects nonetheless allow the Board of Directors to confirm the distribution of total dividends that substantially correspond to the those of the prior year 2000, commensurate to Euro 0.3125 per ordinary share and Euro 0.3237 per savings share.

To this end, we propose the distribution of not only over 94.9% of the net income for the year but also the reserves, for a maximum amount of Euro 2,183,907,497.39, withdrawn partly from the extraordinary reserve (which thus will be fully distributed) and – for the remaining amount – from the miscellaneous reserves. In this regard, we would like to remind you that the variability of the dividend pay-out is the consequence of the share capital increases to service the stock option plans which are liable to being partly exercised before payment so as to increase the number of ordinary shares with regular dividend rights up to a maximum of No. 5,319,962,031.

In view of the above, we submit the following proposal for your approval

The Shareholders' Meeting of Telecom Italia S.p.A.

- having examined the statutory financial statements of the Company for the year ended December 31, 2001, which show a net income of Euro 150,809,707 and an extraordinary reserve of Euro 1,369,062,099, as well as miscellaneous reserves for a total of Euro 3,792,576,214;
- having seen the Directors' Report on Operations;
- having taken note of the Report of the Board of Statutory Auditors and the Auditors' Report by the audit firm of Reconta Ernst & Young;
- having considered that the share capital increase pursuant to art. 6 of the by-laws, for the part that can be subscribed to before payment of dividends, are liable to being increased by the number of ordinary shares with regular dividends rights up to a maximum of No. 5,319,962,031;
- having considered the resolution authorizing the buy-back and successive disposition of treasury stock passed by the ordinary Shareholders' Meeting of November 7, 2001;

resolves

1. to approve the Board of Directors' Report, the balance sheet, the statement of income and the notes to the statutory financial statements of Telecom Italia S.p.A. for the year ended December 31, 2001, which show a net income of Euro 150,809,707 and an extraordinary reserve of Euro 1,369,062,099, as well as miscellaneous reserves for a total of Euro 3,792,576,214;
2. to pay to the Shareholders total dividends calculated on the basis of the following amounts, which will be applied to the number of shares in their possession (thus excluding the treasury stock of the Company in portfolio) on May 20, 2002, detaching the coupon:
   - Euro 0.3125 for each ordinary share of par value Euro 0.55 each,
   - Euro 0.3237 for each savings share of par value Euro 0.55 each, through the distribution of
     - the net income for a maximum of 94.9%, and thus up to maximum of Euro 143,176,237, in an amount of Euro 0.0163 for each ordinary share and Euro 0.0275 for each savings share;
     - the reserves for a maximum of Euro 2,183,907,497 (Euro 1,369,062,099 taken from the extraordinary reserve and a maximum of Euro 814,845,398 taken from the miscellaneous reserves), in the amount of Euro 0.2962 for each ordinary and savings share.

   Be it understood that any net income not distributed in the form of dividends as a result of the failure to fully subscribe to the portion of the capital increase that can be exercised pursuant to art. 6 of the by-laws, or treasury stock held by the Company, will be transferred to retained earnings;
3. to appropriate the remaining net income for the year (equal to Euro 7,633,470, corresponding to 5.1% of total net income) to the legal reserve;
4. to authorize the Board of Directors – and on its behalf the Chairman and Managing Director Mr Buora – to ascertain in due course, in relation to the exact number of shares to be paid dividends, the exact extent:
   - of the total amount of the dividends to be effectively distributed;
   - of the net income for 2001 to be transferred to retained earnings;
   - of the total amount of the miscellaneous reserves to be effectively distributed;
5. to pay the dividends beginning May 23, 2002, detaching the coupon on May 20, 2002.

On the basis of Art. 14 of DPR No. 917 dated December 22, 1986 and subsequent amendments, the total dividends carry a tax credit 56.25% for the shareholders which can be used in full and without limitations.

1583

DEAR SHAREHOLDERS,

The year 2000 was a year full of new achievements and successes. During the year we completed a demanding organizational transformation and undertook important business development initiatives aimed to enhance growth prospects. At the same time, the Group implemented immediate efficiency measures that led to solid financial results.

The business configuration was radically changed, with the divestment of many non-core activities and the constitution of seven business units. Each of the business units was endowed with strategic and operational autonomy. An integral part of the business reconfiguration was the reorganization of the Group's international holding structure, which more clearly delineated the ownership control of the fixed/integrated telephony activities and the pure mobile telephony activities outside Italy.

Today, the Telecom Italia Group is streamlined and concentrating on its core businesses. Moreover, the Group now operates with heightened dynamism and focused competitive skills, which are brought to bear on an international scale.

In 2000 the results of this transformation are already evident, as the Group became

- more competitive, having dismantled the old, bureaucratic top-heavy structures and orienting personnel and resources to focus on innovative business segments, thereby ready to challenge the competition;
- more international, expanding in markets of strategic importance. Sales of telecommunications activities abroad grew by approximately 25.5% with respect to 1999, equal to roughly 14% of total Group revenues. At the end of 2000, the Group's international activities numbered 18.7 million fixed telephony customers and 23.4 million mobile telephony customers.

IN 2000 THE KEY FIGURES DEMONSTRATE THE RENEWED DYNAMISM OF THE GROUP. GROUP REVENUES TOTALLED LIRE 55,979 BILLION, INCREASING BY 6.7% COMPARED TO 1999. EBITDA, OR GROSS OPERATING MARGIN, INCREASED BY 7.3% TO LIRE 25,400 BILLION. GROUP CONSOLIDATED NET INCOME ROSE TO 3,927 BILLION, AN INCREASE OF 16.7% COMPARED TO 1999.

1584

The Group achieved these results while at the same time maintaining its commitments to shareholders and the financial markets in terms of profitability.

In 2000 the key figures demonstrate the renewed dynamism of the Group. Group revenues totalled Lire 55,979 billion, increasing by 6.7% compared to 1999. EBITDA, or gross operating margin, increased by 7.3% to Lire 25,400 billion. Group consolidated net income rose to 3,927 billion, an increase of 16.7% compared to 1999.

The divestments of non-core activities carried out in 2000, most importantly those of Italtel and Sirti, generated approximately Lire 8,300 billion in cash and Lire 1,500 billion in terms of capital gains.

During the year, the workforce of Telecom Italia S.p.A., following the agreement with the labor unions, was gradually reduced. In terms of Group employment, a further 17,000 reduction was achieved through the sale of non-core activities. As a result, the Group shed a total of 27,000 employees during 2000. As a result of the entry into the Telecom Italia Group of several companies, including Seat and several foreign companies, the net reduction of employees for the Group was some 8,000.

The Group kept its net financial indebtedness within the planned limits thanks to a strict policy of financial management and ended the year at Lire 36,845 billion. This reflects the commitment to financial discipline and to maintain the strength of the Group, while continuing to pursue growth through the acquisitions of Seat Pagine Gialle, new foreign participations and the UMTS license in Italy.

The financial and operating results exceeded budget objectives set at the beginning of the year. More particularly, they demonstrate how we stack up against our main European competitors in creating value for our shareholders. The Group boasts high profitability, as demonstrated by its return on invested capital equal to 18.8%, and an EBITDA margin of 45.4%, while its debt/EBITDA ratio is relatively low (1.5 times).

In 2000 Telecom Italia S.p.A. recorded revenues of Lire 33,723 billion (-5.9% compared to 1999) and a net income of Lire 4,954 billion (-1.9% compared to 1999). This last figure reflects the effective action taken to curb external costs and labor costs, which were reduced by 9.1% and 3% respectively, compared to 1999.

Telecom Italia maintained a total market share of 89%, confirming its ability to face effectively increased competition in spite of the growing pressure on prices. Although volumes increased significantly (+27.3% compared to 1999), revenues from traffic declined. This decline, in turn, was partially offset by the growth in revenues from data transmission, wholesale business and Web services (+26% compared to 1999).

Therefore the dividend proposed to the Shareholders' Meeting will be Lire 605 for ordinary shares (Lire 603 in 1999) and Lire 627 for savings shares (Lire 623 in 1999), with a pay-out equal to 90% of the net income, in line with that of 1999.

I would like to emphasize that we achieved these results in a scenario characterized by significant change and fierce competition, where the dynamics of technological and market evolution often clash with the slow regulatory procedures.

1585

The expansion of international business is a key element of our strategic plan. The Group aims to become a global operator in the wireline, wireless and Internet sectors, in particular in Latin America, Southern Europe and the Mediterranean Basin.

The series of acquisitions made in 2000 has led our Group to assume a size which I regard as ideal for ensuring the best development prospects in our activities. Now we can continue to build our future, starting in 2001, with a fundamental objective: the creation of value.

To create shareholder value is our main objective for the future. Therefore, Telecom Italia, Tim and Seat will be committed to further improve their productivity levels and competitiveness, also through a re-organization of their international structures, and to exploit opportunities for operational synergies.

In 2000, Tim laid the foundations to become a truly multi-national group for mobile services, thanks to the creation of the first pan-American GSM network and the awarding of the GSM licences in Spain, Austria and Turkey. A leader in text-messaging and in offering interactive services based on technologies such as WAP or high-tech networks such as GPRS, Tim is preparing to launch a new generation of products and services based on UMTS technology.

Telecom Italia, in keeping with its strategic plans to re-position its business, will develop initiatives to collect the flows of data and Internet traffic. Two such projects will become operational in 2001 (the Nautilus projects) to take advantage of the expected future growth in the Mediterranean and in North and South America.

Seat is acting as market organizer for traditional and new media, able to supervise the whole value chain. In particular, Seat aims to become leader, both in Italy and abroad, in those sectors which are intended to promote integration between the traditional economy and the new economy, such as professional publishing, directories and business information, business and consumer portals. The resolution of the purchase of the television broadcaster Telemontecarlo, which we hope to be positive, will guarantee Seat the control of significant content targeted to an audience mainly composed of young people and the most demanding and highly-evolved consumers.

For 2001 we have set ambitious although achievable financial targets, which require strict financial management to be met.

We will therefore undertake the following actions: generalized cost containment; a selective investment policy geared to sustaining innovation; tight control of indebtedness; and a diversification of financing sources including a recourse to long-term bond issues to improve the Group's financial flexibility and capability.

I believe that this brief overview highlights the great industrial dynamism which has characterized the activities of the Telecom Italia Group in 2000. Once again, I wish to underline that we succeeded in achieving a dual objective: we strengthened the growth prospects for our business both in Italy and abroad and, in an unfavourable stock-exchange environment, recorded the best share performance of the major European telecommunications operators, to the benefit of the investors who support our company.

1587

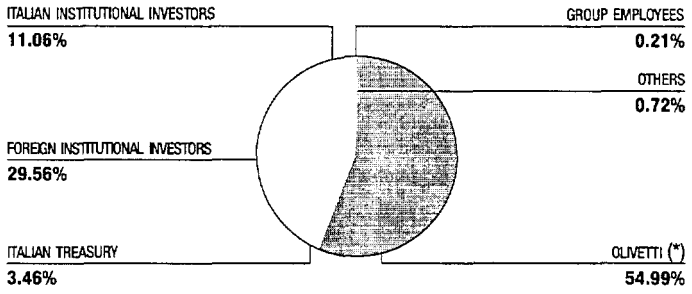
STOCKHOLDER INFORMATION

The stockholders of record of Telecom Italia ordinary shares and other information available as of the date of February 28, 2001 are as follows:

Stockholders (Ordinary shares)

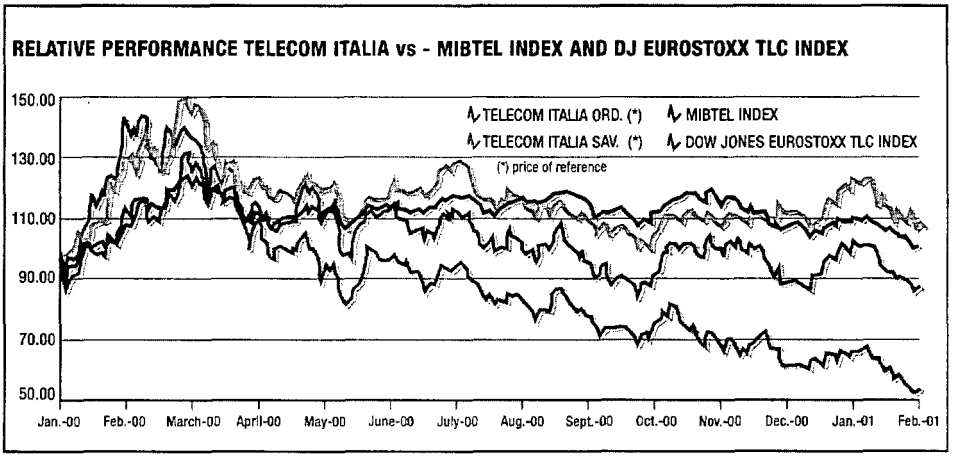
Olivetti S.p.A. (*)	54.99%
Italian Treasury	3.46%
Foreign institutional stockholders	29.56%
Italian institutional stockholders	11.06%
Dipendenti del Gruppo	0.21%
Others	0.72%

(*) of which 0.81% is held through Olivetti Finance N.V.



Stock markets

Telecom Italia ordinary shares and savings shares are listed on the screen trading market, organized and operated by Borsa Italiana S.p.A., and on the New York Stock Exchange in the form of ADS (American Depositary Shares). Each ordinary or savings ADS represents 10 Telecom Italia shares of the respective class of stock.



1588

Conversion of share capital into euros

The Board of Directors of Telecom Italia has put forth a proposal to the extraordinary stockholders' meeting called for April 18, 2001 and May 3, 2001 (respectively, in first call and second call) for the conversion of share capital into euros by rounding off the par value of the shares, currently equal to Lire 1,000, to Euro 0.55.

Market capitalization of Telecom Italia

On the basis of the closing prices at December 31, 2000, Telecom Italia is one the largest companies of the Italian stock market with a capitalization about Euros 76 billion.

Financial Indicators

(in lire)	2000	1999	1998
Dividends			
• ordinary share	605	603	280
• savings share	627	623	300
Consolidated earnings (1)			
• ordinary share	530	447	510
• savings share	552	467	530
Consolidated cash flow per share	2,241	2,020	2,120
Consolidated equity per share	4,907	4,444	4,265

(1) Consolidated earnings per share of the Parent Company have been calculated on the basis of the consolidated net income attributable to the Parent Company and the number of ordinary and savings shares outstanding at year-end (respectively, No. 5,260,037,131 and No. 2,061,142,025; the latter figure is net of No. 104,978,070 shares of treasury stock in portfolio). For purposes of this calculation, savings shares were assigned a dividend of Lire 2% higher than the par value of the shares at December 31, 2000.

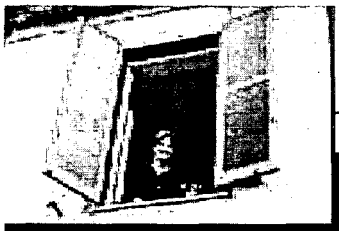
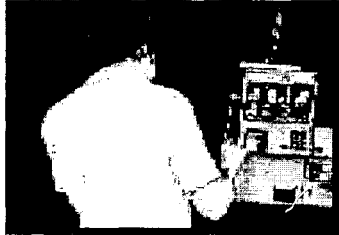
REPORT ON OPERATIONS



THE MARKET



1.1 DIMENSIONS AND DYNAMICS OF THE GLOBAL MARKET FOR TELECOMMUNICATIONS SERVICES

The global market for telecommunications is experiencing an unprecedented growth rate; in 2000 it grew by 14% compared to 12% in 1999, reaching an overall value of Lire 1,650,000 billion (1).

The main factor behind the increase in revenues was again the mobile sector (+33% in 2000; +36.7% in 1999) which, at the end of 2000, represented 33% of the whole market. The data segment also grew at a pace that was considerably above average (+22%), reaching 12% of the market.

Wireline telephone services, on the other hand, despite the fact that they still constitute the largest slice of the market (56% at the end of 2000), only grew by 4% during the year. The dynamics of this growth are due to fierce competitive pressure, the consequent lowering of prices and the substitution of wireline with mobile, which, however, was more than compensated by the growth in traffic, especially the *dial-up* type.

In Western Europe, at the end of 2000, the value of the market was equivalent to Lire 461,000 billion, with a growth of 17% mainly attributable to the wireless sector.

In fact, the number of mobile subscribers increased by 62%, reaching 250 million at the end of the year, equivalent to a level of penetration of 64% (compared to 40% at the end of 1999). The increase well exceeded forecasts thanks to the increase in the prepaid market, which, at the end of 2000, constituted 62% of subscribers, compared to 49% at the end of 1999 (2). As a result, at the end of 2000, wireless connections accounted for 53% of the total. The latest estimates point to an annual average increase in the number of mobile subscribers in Europe of 10.4% between 2000 and 2003, with a level of penetration of 86% by the end of the period.

The *Internet* market reached 119 million users (3) (+46.2% compared to the end of 1999), equal to 30.6% penetration (21% at the end of 1999), though with broad differences within Europe. Various factors contributed to the increase, both on the side of the offering ("free access", "fast *Internet*"), and the demand (greater flexibility in the use of advanced telecommunications systems, greater attention from the media, an increased presence of companies on the network, greater use of the Web for work-related activities and increased activity to promote awareness on the part of governments).

1.2 DIMENSIONS AND DYNAMICS OF THE ITALIAN MARKET FOR TELECOMMUNICATIONS SERVICES

In 2000, the Italian telecommunications market grew by 13.4%, resulting in overall revenues of more than Lire 61,000 billion (4), of which 47% can be attributed to wireline telephone services, 40.6% to wireless services and 12.4% to the *Internet* and data segment. Wireless telephone services provided the greatest contribution to growth, with an increase in the number of subscribers of 38.4% and a rise in value of 25.4%; the Italian market, which had about 42 million subscribers at the end of 2000, is the second largest in Europe

(1) Source: Dataquest; preliminary 2000 figures (based on currency /US dollar exchange rates); final 1999 figures.
(2) Source: Dataquest.
(3) A user is defined as someone who has used Internet in the last three months, excluding those who only use e-mail. Source: IDC.
(4) Source: Dataquest and Lehman Research.

1593

after Germany (47 million subscribers) but it shares first place with Finland in terms of market penetration. Mobile lines represent 60.3% of total connections and correspond to 73% of the population, compared to 57% in Germany, 66% in the United Kingdom and 49% in France (respectively the first, third and fourth largest markets in Europe).
At the end of 2000, the number of *Internet* users had risen from 8.2 million at the end of 1999 to 14.1 million (+72%). Despite the considerable increase fostered by "free access" and by commercial offerings such as "E vai" promoted by Tin.it, the level of penetration (25%) is still below the European average, highlighting the scope for further growth. In fact, the average annual growth rate for the next three years has been estimated at 27%, compared to the Western European average of 22%.
At the moment, the Italian telecommunications market in Europe is one of the markets where competitive pressure is greatest. The following main factors affected its development in 2000:

- the marked growth in the number of public operator licenses issued, which, by the end of 2000, had reached 151 compared to 89 at the beginning of the year;
- the issue of *UMTS* licenses (October 2000);
- the launch of local *carrier selection* phone services on the part of many operators and the start of international, national and long distance (from January 2000) and local (from May 2000) *carrier preselection*;
- the proliferation of CLECs (Competitive Local Exchange Carriers) operators, conceived with a mix of public and private capital, generally contributed by municipal companies operating in the services area, venture capital funds and other private partners. The fact that the territories in which they operate are limited means that the close relations established with the clientele (mainly small and medium-size private companies, but, in many cases, also selected businesses) constitute a fundamental competitive advantage. Generally the offering includes basic, added value and broadband services;
- the introduction of new data services (*ADSL* fiber access on fixed networks, *WAP* on mobile networks) and innovative tariff plans (such as the flat rate for phone services);
- communication policies, with considerable investments being geared to trademark awareness, the launch of new products and services and specific price campaigns.

1.3 COMPETITIVE DYNAMICS AND STRUCTURAL CHANGES IN THE TELECOMMUNICATIONS SECTOR

In 2000, the telecommunications sector was characterized by the following factors:

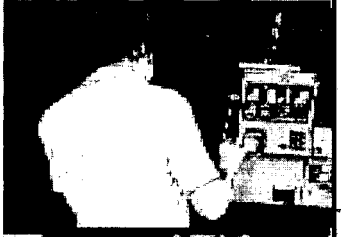
- the increase in competitive pressure on national fixed phone services markets, resulting in further losses of market shares by the main operators;
- the continuation of the consolidating trend of mobile operators (Vodafone/Mannesmann, France Telecom/Orange, Deutsche Telekom/Voicestream); currently, the European mobile market is dominated (66%) by 6 large operators;
- the start of radical restructuring on the part of the former monopoly operators, geared to rationalizing activities by creating business units and then listing them on the stock exchange;

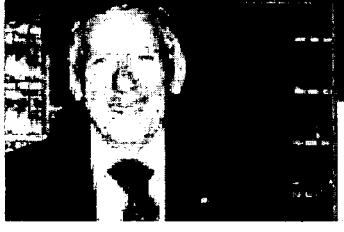
1594

- the resumption of investments to develop broadband infrastructures, the migration towards networks of the new generation, the acquisition of *UMTS* licenses and network development with the aim of seizing the opportunities offered by the growth of *Internet* and data traffic;
- the acceleration of broadband access network offerings, particularly using *ADSL* technology;
- the development of value-added services offerings on the part of mobile operators and the start of wireless portals (*WAP*);
- the large number of new operators of the *Internet*/Application Service Provider type, and new portals.

1595

THE REGULATORY FRAMEWORK





As set forth by Italian Law No. 249/1997, which instituted the Regulatory Body of the Communications Authority, and by Presidential Decree No. 318/1997, which implemented directives at Community level, the process of deregulation can now be regarded as complete, since all segments of the market have been opened up to competition. There follows a summary of the main decisions adopted during the year by the Regulator.

2.1 CONVERSION OF CONCESSIONS AND AGREEMENTS TO LICENSES AND PERMITS

With the aim of bringing concessions issued to Telecom Italia in the past into line with current laws, by eliminating the obligations and special rights which conflict with the new regulations, at the end of 2000, three individual licenses were awarded to the Company (Resolution No. 737/00/CONS of November 15, 2000: "Installation and operation of radio-electrical stations for use on board ship and the supply of mobile maritime satellite services using Inmarsat terminals"; Resolution No. 738/00/CONS of November 15, 2000: "Installation and operation of a network of coastal stations with the aim of providing mobile maritime service and mobile satellite service through Inmarsat"; Resolution No. 820/00/CONS of November 22, 2000: "Installation and supply of public networks for providing the public with the vocal telephone service") and a general authorization (Resolution No. 821/00/CONS of November 22, 2000: "The supply of satellite network and communication services").

2.2 RATE REBALANCING

With reference to the "*price cap*", the Regulator has approved the proposals submitted by Telecom Italia to increase the basic monthly residential subscription charge (from Lire 18,000 to Lire 18,700) with effect from August 1 and to reduce the tariffs applied to international traffic, as well as lower the price of long-distance inter-district calls with effect from December 28, 2000.

Following the suggestions about rate rebalancing formulated by the European Commission for the Italian government, with Resolution No. 847/00/CONS of December 11, 2000 the Regulator modified the "sub price cap" applied to the basic monthly subscription charges. This made it possible to apply an average increase of 4% to the basic monthly subscription fees, with effect from February 1, 2001 and to reduce the prices of local and inter-district calls. The completion of the rate rebalancing plan is scheduled for July 10, 2002.

Furthermore, with Resolution No. 310/00/CONS of May 24, the Regulator approved another variation – divided into two stages: July 1 and October 1, 2000 – to change the structure and rates of the telephone services provided by public telephones, while leaving overall expenditures on the part of customers virtually unchanged.

2.3 FINANCING THE UNIVERSAL SERVICE

As the former monopoly holder, Telecom Italia still has the obligation to supply phone services at uneconomic terms; these services, provided in areas and to unprofitable customers, constitute the so-called "universal service". With Resolution No. 8/00/CIR of August 1, 2000, the Regulator established that, in the light of the competitive and market conditions which

1597

existed in the telephony sector in Italy in 1999, the pre-requisites existed to justify the application of a sharing mechanism for the net cost of this service, the overall expenditure of which has been estimated at Lire 120.8 billion. A special fund has been created by the Ministry of Communications to which the following companies are bound to contribute in the percentages indicated: Telecom Italia (with a contribution of 57.1%), TIM (28.1%), Omnitel (13.8%) and Infostrada (1%).

2.4 INTERCONNECTION

Following a public hearing and having received the opinions of the European Commission and the Antitrust Authority, in Resolution No. 10/00/CIR of October 18, 2000, the Regulator approved the 2000 offering of the reference interconnection rates of reference, making certain changes and some technical and economic alterations to the proposal submitted by Telecom Italia.

2.5 FIXED-TO-MOBILE CALLS

In Resolution No. 4/00/CONS of January 12, 2000 the Regulator approved the proposal submitted by Telecom Italia to vary the rates of fixed-to-mobile calls which became effective on February 17, 2000.

2.6 NUMBERING

In order to bring the regulatory framework into line with the evolution of market requirements and with the availability and the efficient allocation of numbering resources, the Regulator, under Resolution No. 6/00/CIR of June 8, 2000, approved the new numbering system, which updates the previous rules on the subject, particularly with reference to the way of assigning numbering for the *Internet*, for which part of the "7th decade" of numbers has been reserved. Under Resolution No. 11/00/CIR of November 14, 2000 the Regulator subsequently amended Resolution No. 6/00/CIR, with the result that, as from December 29, 2000, 11-digit numbers will be assigned.

2.7 LOCAL LOOP UNBUNDLING

Under Resolution No. 2/00/CIR of March 16, 2000 the Regulator approved the measure for unbundled access services at the local network level (local loop unbundling), thus implementing the principles sanctioned by Community Directives Nos. 97/13/CE and 98/10/CE. On May 12, 2000 Telecom Italia presented its offering. Later, in Resolutions Nos. 13 and 14/00/CIR of December 6 and 21, 2000 the Regulator stipulated the technical and procedural conditions for requests by the other operators involving the co-location sites, and approved the economic terms incorporated in the offering of reference with certain changes.

1598

2.8 NEW LICENSE FEE

Pursuant to Italian Law No. 448 of December 23, 1998, a new fee was instituted from January 1, 1999 to take the place of the previous license fee, the rate of which will gradually decrease until 2003. In implementing the above-mentioned law, the Ministerial Decree issued on March 21, 2000 established that the fee must be applied exclusively to the revenues from the activity of installing and supplying public telecommunications networks, supplying the public with vocal-telephone services, and supplying the public with mobile and personal communications services. The Company has contested the above Ministerial Decree to the regional administrative court of Lazio (TAR), questioning the legitimacy of certain parts.

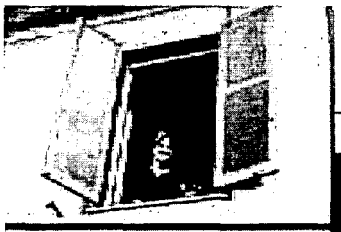
2.9 EVOLUTION OF EUROPEAN UNION REGULATIONS

Within the framework of the "1999 Communications Review", the European Commission began to review Community legislation regarding telecommunications, aimed principally at promoting and developing a competitive European market for communications services, consolidating the convergence process, and gradually eliminating certain legislative obstacles in relation to the degree of competition. In this connection, on July 12, 2000 the Commission submitted to the European Parliament and the European Council the proposals for directives on "Framework", "Universal Service", "Authorization", "Access and interconnection" and "Data Protection".

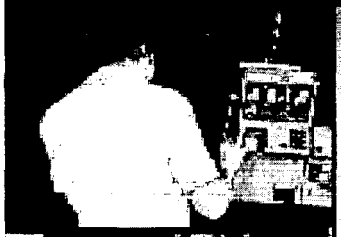
2.10 MOBILE TELECOMMUNICATIONS

In Resolution No. 6/00/CIR, the Regulator defined the new structure of the National Numbering Plan which, as far as mobile numbering is concerned, involves the gradual elimination of the initial "0" and the "portability" of the number among various operators. Because of some technical difficulties which are in the process of being resolved, the Regulator has decided that the new structure will come into force on June 30, 2001.
Following official requests made by TIM both to the Ministry of Communications and the Regulator, in Resolution No. 895/00/CONS, the Regulator brought forward the liberation (with effect from January 1, 2001) of another 15 MHz for mobile systems operating in the *GSM* 1800 frequency bands, originally scheduled for January 1, 2002. Thanks to this measure and on the basis of roaming agreements made with other operators, 5 MHz of band have already been awarded to TIM, and, during 2000, another 5 MHz will be assigned to TIM which is to share the frequencies with Blu.

1599



THE TELECOM ITALIA GROUP



1600

In Italy, Telecom Italia Group operates in the following business sectors: wireline telephone services operated by Telecom Italia, mobile telephone services supplied by TIM and satellite telecommunications provided by Telespazio. In fiscal 2000, the revenues of Telecom Italia and TIM account for 52.6% and 26.3%, respectively, of consolidated revenues.

Outside Italy, the Group's telecommunications business is conducted by its subsidiaries and affiliated companies, mainly, in Europe and Latin America. Some of these companies are held directly by Telecom Italia while others are owned through the subsidiaries TMI - Telemedia International Italia, Stet International Netherlands and Stet Mobile Holding, the latter company being entirely held by TIM.

The other sectors in which the Group operated in 2000 are: information technology which is currently composed of the companies Finsiel, Telesoft, Netsiel and Sodalia; manufacturing operations conducted by Italtel; installation operations supplied by Sirti. At December 31, 2000, the Group held a minority investment in Italtel (19.9%) following the sale of an 80.1% stake to a group of foreign investors. The Group no longer operates in the manufacturing sector after its acceptance of the take-over bid for all of Sirti S.p.A.'s operations. These two transactions were finalized in the last quarter of the year. On November 15, on the other hand, the merger of Seat Pagine Gialle and Tin.it was finalized and, consequently, control of the Seat group was acquired, giving rise to the *Internet* sector of the Telecom Italia Group.

With reference to the consolidated book value at december 31, 2000, investments in affiliated companies is concentrated in Europe for about 69%, in Latin America for about 30% and the remainder in the rest of the world.

The Group's workforce at December 31, 2000 numbered 114,669 (122,662 at December 31, 1999). The reduction by 7,993 is due to personnel turnover, variations in the consolidation area and acquisitions and sales of companies effected during the year. As far as turnover is concerned, the main component refers to the termination of employment at the Parent Company Telecom Italia, partly as a result of employee cutbacks under Law No. 223/1991 following the agreements with the labor unions in March and July 2000. As a result of transactions involving corporate entities, 17,978 units are no longer in the Group, mainly on account of the sale of the operating companies in the manufacturing and installations sectors (-17,857), offset by an increase of 17,567 units principally in reference to the Nortel Inversora group (7,498 units), Maxitel (1,229 units) and the Seat group (7,515 units).

The following table presents the Group's results by business segment. Beginning in 2000, the Nortel Inversora group was consolidated proportionally, since it is controlled on a 50-50 basis with France Telecom.
As regards the Seat group and the foreign companies acquired in the last part of the year, only their balance sheets have been consolidated.
Following the sale of investment holdings towards the end of the year, only the statements of income for the nine-month period were consolidated for the manufacturing sector (Italtel group) and the installations sector (Sirti group).

1601

In 2000, the reorganization of the Group was begun which led to the creation of autonomous Business Units, coordinated by a Corporate function with the responsibility for strategy and control. The new organizational structure will become fully operative during 2001. Additional details are provided in the section "Management's discussion and analysis of financial condition and results of operations of Telecom Italia Group".

(in billions of lire)	(1)	Wireline telecommunications in Italy	Mobile telecommunications in Italy	Satellite telecommunications	International telecommunications	Information technology activities	Manufacturing activities (2)	Installation activities	Subtotal	Other activities and eliminations	Consolidated total

(1) The figures for 1999 have been reclassified for purposes of comparison with 2000.
(2) For 1999, these refer to 50% of the consolidated figures of Italtel group from January 1 to October 31 and 100% from November 1 to December 31.
(3) Investments in fixed assets and intangible assets, including goodwill on the acquisition of consolidated companies, total Lire 17,637 billion.

3.1 WIRELINE TELECOMMUNICATIONS IN ITALY

The wireline telecommunications sector is operated directly by the Parent Company, **Telecom Italia**. A comparison of the highlights between 2000 and 1999 is shown in the following table:

(in billions of lire)	2000	1999	Change	
			amount	percentage
Sales and service revenues	33,723	35,856	(2,133)	(5.9)
Gross operating profit	14,552	15,434	(882)	(5.7)
Operating income	6,961	7,096	(135)	(1.9)
Capital expenditures	4,974	5,926	(952)	(16.1)
Number of employees at end of period	66,541	76,113	(9,572)	(12.6)

Althought there was a marked increase in traffic volumes (+27.3% in terms of minutes), results fell compared to 1999 due to the intensification of competition and to the price-reduction and discount policies adopted by the Company. The increase in minutes during the year was affected by the substitution of totally "operated" traffic with traffic that was only "carried" on behalf of other operators and of non-local traffic with the less remunerative "online" (local) traffic, in addition to the "flat" rate that was introduced as

1602

part of the "Teleconomy" offerings. The result, compared to the prior year, was a fall in the average yield per minute of almost 36%.
The fall in revenues was, however, largely compensated by a significant reduction in external costs, labor costs, amortization and depreciation and other operating items. In the second half of the year, labor costs were also affected by cutbacks and layoffs as defined in the agreement drawn up with the labor unions on March 28, 2000 and in the agreements signed at the end of July, the effects of which will be felt more particularly from 2001 onwards.

■ THE OFFERING

In 2000, the phenomena which had characterized the prior year intensified. In particular, the growth of the *Internet*, the entry of new operators following deregulation and the growth of the data segment counterbalanced the voice market, which has for some time now assumed a nature status. The obligation – established during the year by the Regulator – to supply other operators with unbundled access to the local Telecom Italia network (*Local Loop Unbundling* - LLU) effectively completed the opening up to competition of all areas of the market.
In response to these pressures, the first action taken was to concentrate all of the *Internet* activities in the new company Tin.it, which was subsequently merged with Seat Pagine Gialle; the latter company then reached an agreement to acquire the third largest Italian television operating company, confirming the ever more rapid convergence which is characterizing the Information & Communications Technology (ICT) sector. Innovative flat rate plans were introduced, which are particularly advantageous to residential customers having high traffic consumption. Finally, the LLU offering was presented to the Regulator.
The reorganization of Telecom Italia became effective through the first disvestments of non-core activities (including the "Grandi Immobili" business segment), and through the setting up of operative units capable of responding effectively to the requirements of specific market segments; in this context, the business segment "Information Systems Operations" was contributed to Netsiel.

Mass Market

The growth in phone traffic compared to 1999 (+12.5%) can be mainly attributed to the *Internet* factor and to the commercial offerings launched during the year, in particular the "Teleconomy" offerings. These led to a decline in revenues, which were also negatively affected by the new measures aimed at rate rebalancing for mobile, inter-district and international traffic.

In fact, 2000 marked a turning-point in the pricing strategy in the market of residential and small business customers. During the first quarter, with the "160/89" offering (maximum and minimum prices per minute for long-distance calls of the 3rd level), Telecom Italia ranked among the price leaders in some clientele segments. This trend was further reinforced from June onwards with the "Teleconomy" offerings ("24", "No Stop" and "24 Aziende"), which overturned the traditional concepts of distance, time-band (with "24" and "24 Aziende" all local and long-distance calls have one price) and duration (with "No Stop" it is possible to make unlimited local and long-distance calls, subject to the payment of a flat rate). In November, the "Teleconomy *ADSL*" offerings were conceived, which combine a fast *Internet* connection with the advantage of a pre-established price,

1603

regardless of the connection time. The increase in pricing offerings recorded in 2000 was more than double that of 1999.

A growing level of customer satisfaction and the creation of a continuous, privileged rapport with customers were confirmed as fundamental points of Telecom Italia's loyalty policy. In February and March, with the aim of securing the loyalty of the most valuable clientele, the "Comunico" club (reserved for the best customers, for whom there are special offers and previews) and "Minuti Preziosi" (a program with prizes based on the amount on the phone bill) were launched, the success of which is demonstrated by the number of applications received from interested customers.

Telecom Italia is the first wireline network operator in the world to offer the SMS (Short Message Service) to its customers. The service, activated on December 1, 2000 makes it possible to send and receive SMSs on special fixed handsets, like the new Sirio 187, with which the Company soon hopes to replace the telephones in Italian households. In 2000, the product range was radically enhanced partly through the introduction of 11 new cordless phones and the creation of the new "products for *Internet*" segment, with the launch of the Web-phone.

In December, the "400" return call service was activated which informs customers about the last unanswered call received, by means of a vocal message giving the telephone number, date and time of the call. The service also makes it possible to call the recorded number automatically by pressing the "1" button. The customer pays Lire 100 (+VAT) for each consultation; the service is free if no new information has been received since the previous inquiry.

In 2000, there was a further growth in network services which, in addition to augmenting customer satisfaction, distinguish the Telecom Italia offerings from those of its competitors and constitute an effective tool for building customer loyalty. Compared to 1999, applications increased by more than 60%. In particular, the "Memotel" services (centralized answering service) and "Chi è" (which displays the number of the call) both acquired about 1,400,000 new customers, demonstrating a strong response to the needs of the market. The number of subscribers to "Chi è" increased by 210% compared to 1999, while the new "prepaid" and "pay per use" offerings also contributed to the growth of "Memotel".

The *ISDN* superline again confirmed its strong growth trend; in fact, at December 31, the number of basic access lines had grown by 81.5% since the beginning of the year.

The purchase of Call IT cards increased by 23% compared to 1999, thanks partly to the success of the offering of the card to members of the "Comunico" club.

As regards public telephone services, efforts continued to diversify the offering of prepaid cards, which, in particular, involved the launch of contests with prizes linked to the purchase of cards and the issue of cards to commemorate special events. With collectors in mind, and in partnership with specialized publishing companies, some series of limited-issue cards were circulated to mark special events, and a contest was launched which helped to raise the average expenditure per customer. For outgoing international traffic, in December, the pricing of the "Welcome" card was re-positioned.

During the year, "*Internet* Corner" terminals were successfully tested. The terminals make it possible to surf the *Internet* using a phone card, and plans are now going ahead to extend the service. The optimization process continued, with the retirement of 68,000 telephone sets and the replacement of traditional public telephones with more highly evolved equipment which can take advantage of the potential offered by the *intelligent network*. This innovation, based on *ISDN* technology, will make it possible to extend the offering further, improve the quality of the service and reduce operating and maintenance costs. By the end of the year, 294,000 telephones had been installed; 45,000 of the 100,000 on the *intelligent network* use *ISDN* technology.

During the year, the company began to renovate the information services. For the "12" directory information service, a voice-recognition system was put into place, allowing customers to obtain the information they require automatically by following the spoken instructions provided by the system. The new "ZeroeVia" service was also launched, giving customers the option of being directly connected to the number requested from the "12" information service by pressing the zero button. In December, in Bologna, experimental access to a vocal portal was opened, enabling customers to obtain information about drugstores, films being shown in theaters, the weather, the state of the roads and the stock exchange by interacting with an automatic voice system. Finally, the website *www.info12.it* was activated to supply, from an online list, all the Telecom Italia information services via *Internet*, based on the "search-find-communicate" concept. In addition, the duties of the "187" customer service were extended and the service can now be consulted round-the-clock from Monday to Sunday.

Finally, with reference to sales channels, points of sale were given a new logo, "Punto 187", which now applies to 84 direct shops and 1,481 indirect partners; the "187" telephone channel was developed, specializing in the commercial component; a special *e-commerce* channel was made accessible through the *www.187buy.it* website.

Small and Medium-size companies

In 2000, Telecom Italia further improved its offering of telecommunications services for the segment of small and medium-size companies, which are a particularly important component of the manufacturing cycle in Italy. As far as general phone connectivity is concerned, the following features are significant:

- the net increase in *ISDN* connections, with 161,000 new *BRA* access lines and 1,000 new *PRA* access lines (respectively, +39% and +145% compared to the numbers on January 1; by the end of the year the level of penetration was 37% of the total number of phone access lines (54% in terms of equivalent lines);
- the significant increase in the number of *intelligent numbers* (toll-free numbers and numbers with intelligent charges), with 2,200 new codes.

In addition to the basic proposal, in order to interpret the needs of small and medium-size companies, special value-added solutions were introduced for the voice, data and *Internet* segments. As far as the voice segment is concerned the new solutions include:

- the launch of the "Teleconomy 24 Aziende" offering, which introduced an extremely innovative pricing system in terms of transparency, simplicity and economy (all local and long-distance calls are charged at a single price, regardless of the distance and time-band involved); this offering led to the achievement significant results in terms of customer retention, as attested by 156,000 subscriptions reached by the end of the year;

1605

- the "Easy Start" offering, devoted to start – up companies, under which a single company supplies the whole telecommunications system, from the design consultancy to services and the Information & Communications Technology products; financial assistance is also provided with this offering.

In the data and *Internet* segment, the following offerings were launched:
- the "Teleconomy *ADSL*" offering, which combines particularly advantageous phone pricing with the benefit of a fast *Internet* connection charged at a flat rate, regardless of the connection time;
- the "Neteconomy *ADSL*" offering ("Group" and "Multigroup"), intended to facilitate the introduction of small and medium-size companies into the world of *Internet*; the service allows high-speed connection for groups of LAN users and always-on connection at a flat rate; about 1,800 contracts were stipulated after the launch of the offering (at the end of September);
- the "Full Business Company" offering, which introduces companies to the world of the new economy, offering network services, security services, *Internet* data center services, hosting and basic applications;
- the "Easy Cabling" offering, which creates integrated phone and data cabling solutions in flexible versions.

Experimental services have also been started in the form of direct Application Server Providers for companies wishing to concentrate on their core business, and delegate the technical and operative responsibility for their information system. Partnership agreements were stipulated with leading companies in the field of applications software to manage small and medium-size companies.

Finally, in 2000, the company's commercial organization was strengthened, both in terms of internal resources, with the setting up of specialized centers for telephone selling, and by recruiting more external resources, bringing the indirect network, launched in 1999, to number 900 agents. The result was a significant increase in contacts with customers, partly through goal-oriented selling campaigns, with positive repercussions both on the marketing of services, and on the retention of market shares of traffic.

Business Market

Within the framework of extending the offering portfolio, in 2000, the following offerings were introduced: "Business One", which aims to give support to customers in managing their telecommunications systems and in defining the development of related infrastructures; "Full Business Company", which assists companies to evolve towards e-company models; "Full Business Security", which supplies customers with network security services in *IP* applications; "Dataw@n", which, for data services, makes connectivity possible at the corporate level for companies with a number of offices.

The *ADSL wholesale* offering is geared to operators who wish to market *Internet* access services using this technology. Within the framework of *IP* services, the "Videonet" service was introduced (videocommunication on *IP*). The offering of "Net Manager" services was extended, geared to the control, management and analysis of telecommunications consumption, through the introduction of "*Internet* SecurP@y", for the payment of invoices

1606

through the *Internet* by credit card, and "*Internet* Billing" services, for the acquisition of invoices in electronic format which are legally valid. As far as phone services are concerned, the "Full Business Card" offering was extended with new profiles and applications. Finally the InterBusiness offering was extended with new ways of subscribing.

With reference to the individual services offered, the results were as follows:

- 83,000 connections to *ADSL wholesale* since the beginning of the year;
- 22,000 *retail* contracts on broadband, through the "Full Business Company" and "Ring" offerings;
- 1,300 subscriptions to "Full Business Security" since the beginning of the year;
- Business Frame/*ATM*/Dataw@n, which generated about 8,800 accesses during the year, with revenues far exceeding forecasts;
- increase in connections to the *ISDN* network, with more than 300,000 equivalent lines installed in 2000 and an increase of 22% compared to the end of 1999;
- results obtained from "Intelligent Numbers": (Numero Verde (toll-free numbers), Addebito Ripartito (numbers with intelligent charges), Numero Unico (Single Number), Numero Universale (Universal Number), and by InterBusiness with revenues exceeding forecasts.

International traffic

2000 was devoted largely to the evolution of the architecture of the international network, from the traditional "bilateral" model, in which operators in different countries share transmission media to transport the flows of incoming and outgoing traffic, towards the "cross border" model, which consists of multi-lateral *backbones* with regional extensions, incorporated into voice and data services and interconnected between them.

This evolution affected are Europe, where the creation of the pan-European Backbone is in progress; the Mediterranean, with the Mediterranean Nautilus project; and Latin America, with the Latin American Nautilus project.

The new architecture, which, to begin with, will function alongside the already-existing one, is destined to support the new business models which are establishing themselves in an ever more competitive scenario, heavily influenced by the gradual deregulation of the markets and the emergence of continuous technological innovations which make it possible to collect, route and terminate international traffic in alternative ways to those used under the bilateral agreements made between the various countries involved.

Great efforts have also been devoted to developing the transmission capacity across the Atlantic in order to accommodate the increasing demand for *Internet* access services, and the rationalization of the corporate network, with a view to curbing the per unit costs of products and services, while keeping an ever-watchful eye on parameters of quality. Compared to 1999, in fact, the average cost of band unit used has fallen by about 30%.

The development of the international network has led to the launch of new services which, by further broadening the offering for *wholesale* customers and improving competitive capacity, have made it possible to preserve the market share, and to generate an increase in volumes. The characteristics of reliability and quality of service have also continued to differentiate the offering of the Company from that of its competitors.

In 2000, despite the fact that fierce competitive pressure led to a fall in terminal incoming traffic, compared to 1999, there was a significant increase in overall traffic volumes, as shown in the following table:

Total international traffic	+11.5%
• incoming Italy	-0.1%
• outgoing Italy	+13.2%
• in transit	+52.9%

A considerable increase was also recorded in *IP* services for access to the Big *Internet* through the SEA-BONE *backbone*; in fact, the band capacity marketed by the end of 2000 had more than tripled (+205.5%) compared to the amount sold at the end of 1999.
During the year, cashless services were further developed, by increasing the operational system of international phone cards (the capacity of which reached 30 million cards), and new services were introduced for foreign markets.

■ THE NETWORK

The national network

During the year, the aim of keeping up to date the range of services offered to the clientele, for which the demand for connection to data networks was increasing, partly as a result of the rapid growth of the *Internet*, led, on the one hand, to the continuous upgrading of the network infrastructures and, on the other, to the need to upgrade the hardware and software of operating systems and apparatus. To this end, special attention was given to finding innovative technological solutions capable of proposing competitive solutions while maintaining the quality standards offered.

The national network in statistics at December 31, 2000 is as follows:

Exchange areas:	about 10,000 served by 11,449 Line Stages (SL)
Switching areas:	615 served by 653 Local Group Stages (SGU)
Gateway areas:	33 served by 66 Transit Group Stages (SGT)
POTS accesses:	24.7 million
ISDN PRA accesses:	44,650
ISDN BRA accesses:	2,163,300
Copper network accesses:	104 million of kilometers-pair
Optic fiber access network:	454,000 kilometers-line
Optic fiber carrier network:	2.6 kilometers-line
Tele-selective circuits:	3.7 million
Network for direct number circuits:	641,000 access points with speeds up to 2 Mbit/s
Network for direct analogic circuits:	166,200 access points
Frame Relay accesses:	26,000 gates a 2 Mbit/s
ATM accesses:	2,800 gates at 34-155 Mbit/s and 2,700 gates at 2 Mbit/s

The national territory is subdivided into "exchange areas", served by "line stages" to which users are connected; "switching areas", served by "local group stages" which collect the

1608

telephone traffic of the exchange areas connected to them; and "*gateway* areas", served by "transit group stages" which collect the inter-district and international traffic of the switching areas. National switching has reached a level of numbering of 99.7%, compared to 98.7% at the end of 1999.

In 2000, the necessary technical preparations were made for the launch of the SMS service; for the activation of the "400" call return service in about 75% of the country; for the services available with the "Carta Unica" prepaid card, which can be used from public and private terminals on the fixed network, in Italy and abroad; for the NetCard/Business, the evolution of the virtual private network service, to which the phone card service has been added with charges being made to a single account; for the personal number service with access through TIM; and, finally, to make new games available through the telephone, such as LottoTel and Totobingol.
Work continued to bring the network in line with the telephone numbering plan by releasing more numbering "groups"; in fact, once the "National Numbering Plan" is fully functioning, customers will be assigned numbers starting with "1", currently reserved for public services.
The industrialization process of the national multi-service *backbone* has begun, with the creation of a test network; traffic tests are currently in progress to verify the efficiency and reliability of the decisions made hitherto, and to assess possible alternatives in terms of implementation.

The need to house other operators' equipment for *local loop unbundling* or interconnection in Telecom Italia exchanges has led to the creation of a modular prototype that can be installed, without the need of any wall space or air conditioning. This solution provides the answer to the need to equip hundreds of sites all over Italy in a short time following recent decisions made by the Regulatory Authority.

As far as the *intelligent network* is concerned, the network structure was further strengthened, partly to support the new services offered to Telecom Italia customers. In particular, a virtual *call center* platform was created, which can function with operators distributed on a nationwide scale. Telecom Italia uses this platform for the new customer care services ("177", "181", "187", "188", "191") and directory information services ("12" and "1412"); as regards the "12" directory information service, the voice-recognition system has also been completed. The testing of the new public telephone platform has been completed. The new platform will improve the operations of terminals and make it possible to offer new services thanks to the use of *ISDN* technology. Following the growth in the number of users of the virtual private network, the dedicated network structures were extended.

Action was taken to augment the capacity of the existing carrier network.
Work on the development of the new national transit network, "Arianna" continued. Thanks to the use of the latest generation of *SDH* technologies and the new DWDM (Dense Wavelength Division Multiplexing) technology, the new network will form the basis for a new optic fiber carrier network with a high transmission capacity, able to provide national coverage and carry flows with high requirements in terms of quality and availability. In 2000, work was completed on the first stage of the 7 *backbone* rings which connect the 16 national transit junctions; 10 rings linking the *backbone* level with the

regional level; and 8 rings linking up with the international network. Transmission installations were also built to transfer flows between junctions.
During the second half of the year, testing was also completed on a high capacity optic fiber carrier network, which functions with DWDM and OADM (Optical Add Drop Multiplexer) apparatus, and is able to carry various signals and to carry out operations such as routing and protecting flows entirely within the optic fiber domain.
Within the framework of the "Reseau" project, experiments have begun involving a high-performance *IP* network, based on an architecture involving a carrier infrastructure relying on DWDM connections nationwide and optical ring networks in cities on a local level realized on OADM apparatus. The cities involved in the project are Milan, Rome and Turin.
In the *SDH* network, testing was started on new apparatus which offers the option of extending the functionality of the synchronous network onto copper lines up to the customers' premises. During the year, the number of connections made on the network (about 180,000) almost tripled.
In the second half of 2000, a project was also drawn up to create an optic fiber ring between Milan and Palermo (I-Bone), which will involve the installation of approximately 4,200 km of cable with 96 optic fibers on two backbones and the laying of two submarine links under the Strait of Messina.
Finally, in radio link systems, a plan is underway to install new equipment with a higher capacity starting in the first quarter of 2001, in anticipation of an increase in the demand for capacity from radiomobile operators.

Access network lines numbered more than 27 million at the end of 2000, thanks to the growth in *ISDN* connections. The following table shows the trend.

((in thousands)	2000	1999	1998
Fixed connections			
Total	27,153	26,502	25,986
- general telephone network	22,569	23,453	24,251
- *ISDN* (equivalent connections)	4,584	3,049	1,735

Experiments with the "new network termination" which, by replacing the current 3-pin socket, will also make it possible to take advantage of new telecommunications and multimedia services, has been postponed to 2001 and will take place in Florence and Milan. During the year, however, testing proceeded on an "in-house" cabling system for apartments to facilitate the supply of high-speed telecommunications services by integrating all the existing cabling systems (including telephone and TV) and allowing immediate use of *ISDN* access and *ADSL* technology. This policy is also being supported by Telecom Italia at the level of national legislation.

Other achievements during the period under examination include:
- in broadband, the development of the network in Siena, where the city council intends to transmit all the television channels via cable, and the stipulation of a contract with TELE+ for seven cities (Turin, Milan, Bologna, Florence, Rome, Naples and Bari) where the network is already available for use, for a total of 604,000 potential customers;

1610

- the success of four tests involving optic fiber broadband access on the GigaBit Ethernet platform in Bologna, Padua, Rome and Milan, the city where, in November, the commercial phase was initiated;
- the installation of *ADSL* systems in 117 urban areas, for a total of 80,000 access lines;
- the preparation of support infrastructures for *ADSL* services for the Mass Market ("Teleconomy *ADSL*") and for the business clientele ("Neteconomy group" and "Multigroup");
- the evaluation of the possible participation of Telecom Italia in the bid for the allocation of radio frequencies for WLL (Wireless Local Loop) systems, and the testing of LAN wireless systems with limited extension combined with *xDSL* access systems;
- the development of the access network for Tin.it and the design and introduction to the network of new services in response to customers' requests;
- the expansion of the infrastructures of the Itapac network, for about 7,000 new access lines, and the updating of the tax rates to the volumes of traffic offered by the network;
- the consolidation of the offering of data services for the Public Administration according to the contract with the Single Public Administration Network (RUPA); in 2000, the transmission capacity of the network was also increased;
- the extension and updating of the *IP* Interbusiness network, resulting in an increase in transmission capacity and the availability of 26,000 new access lines for customer services; the pilot network in GigaBit Ethernet technology is connected to this;
- the development and consolidation of the *ATM / Frame Relay* network, partly to support the launch of the new "RING" and "Full Business Company" services, for which a system has also been introduced to invoice traffic volume.

On the subject of interconnection with other operators, the main achievements of 2000 were the availability of the functional prerequisites for *carrier preselection* and *number portability* and the creation of automated solutions for requests and provisioning of both the local loop unbundling of copper networks and for housing (co-location) in the local Telecom Italia exchanges.

Still on the subject of interconnection, during 2000, with the start of local loop unbundling on the local network, the Italian telecommunications market completed its deregulation process. In this connection, the following developments should be emphasized:

- the signing of 25 new interconnection agreements, bringing the total to 65 contracts signed since deregulation first initiated;
- the signing of 28 "reverse" agreements (termination of calls on the network of other operators) and 13 renewals, for a total of 44 contracts;
- the signing of 20 agreements to supply direct connections into the network switches belonging to other operators, for a total of 30 contracts;
- interconnection with the networks of 30 other operators, for a total of 53 interconnected operators;
- the signing of 8 wholesale agreements to supply high-speed access services using *ADSL* technology;

- the signing of 40 *carrier preselection* contracts, 40 district *carrier selection* agreements, 19 *number portability* agreements and 9 co-location housing framework agreements for interconnection;
- the signing of 16 contracts for testing the local loop unbundling service on the local network and two contracts to supply the local loop unbundling service to the local network;
- the signing of an agreement with TELE+ to carry signals relating to multimedia broadcasting services, similar to the one already signed with Stream.

In 2000, interconnection traffic totaled 66.6 billion minutes, including traffic from and to other wireline and wireless network operators.

Finally, the technical quality of the network can be summarized by its "rate of effectiveness", based on the number of phone calls actually reaching the number called, the trend of which is shown in the following table.

	2000	1999	1998
Local calls	99.6%	99.7%	99.5%
Long-distance calls	99.1%	99.1%	99.2%

International network

At December 31, 2000, there were 197,000 international circuits (+62.4% compared to the end of 1999), of which 160,000 between Italy and foreign countries and 37,000 among foreign countries and, of these, about 4,000 are by satellite. More than 37% of resources are devoted to phone services but, during the year, there was a sharp increase (+240%) in the resources used for *Internet*, which represented 32% of the total. The remaining capacity is mainly dedicated to "rigid" transits and private circuits. The overall number of countries connected is 235, of which 53 also in *ISDN*. The numbering process on the international network has exceeded 98%.

In Europe, work continued to create the pan-European Backbone which, with two pairs of optical fibers, will connect nine European countries through points of presence located in Europe's main cities (Milan, Zurich, Paris, Barcelona, London, Brussels, Amsterdam, Frankfurt and Vienna). The network, designed according to a ring architecture, which will guarantee the self-protection of traffic should a fault occur on any given section, will be about 11,500 km long. The first part was completed in July (Italy - Switzerland - Germany - France - United Kingdom). The structure is scheduled for completion by 2001.

In the Eastern Mediterranean, where the Group is present with its subsidiary (51%) Mediterranean Nautilus, Telecom Italia has won the order to supply the "Med Nautilus" system, a submarine optical fiber ring network linking Italy, Israel, Greece, Turkey and Egypt. The first section of the network (Italy- Greece-Israel) will be available at the end of 2001.

1612

Finally, as regards South America, where Telecom Italia is present through various companies of the 70%-owned subsidiary Latin American Nautilus (Telecom Argentina, Entel Chile and Entel Bolivia equally hold the remaining 30% stake), work continued on the "Latin American Nautilus", a network connecting New York and Miami with important cities in Latin America. In December the connection was completed between Buenos Aires and St. Croix (Virgin Islands), with transit in Brazil. The connection with Florida is provisionally assured by leased circuits, until the new system, scheduled to open at the end of 2001, comes into service. Through Telecom trans-Atlantic connections, the network will be linked to the European backbone, the domestic network of the Parent Company and the Med Nautilus system. The project will offer multi-national operators and customers international connectivity for *Internet* web-hosting services.

As regards the traditional network components, consisting of submarine cable connections in co-participation with other operators, specific action was taken to expand the capacity in the areas of Latin America and North Atlantic. In order to meet the growing demand for band wide for new services, action was also taken to expand the transmission capacity of the trans-Atlantic submarine systems. In addition, the creation of the SAT 3 system was started, which will make it possible to open up connections between Italy and some African countries. As regards the satellite network, in 2000, the process of optimizing connections and land-based installations was completed; in this regard, steps were taken to activate *Internet* connections via satellite with India.

In 2000, the quality of the international network, measured by the ABR (Answer Bid Ratio - the ratio between the calls which obtain a reply and the overall number of attempts at calling) produced the following results:

	2000	1999
ABR outgoing	54.5 %	55.1 %
ABR incoming	64.0 %	62.6 %

The outgoing ABR deteriorated slightly again because of the greater amount of traffic directed towards low-quality national networks, despite further technical work carried out during the year.

HUMAN RESOURCES

Employees of Telecom Italia at December 31, 2000, including the 2,144 resources laid off under government sponsored unemployment compensation plans ("Cassa Integrazione Guadagni Straordinaria - CIGS"), numbered 66,541, compared to 76,113 at the end of 1999; the net reduction of 9,572 is in line with the objectives set in the strategic plan.

36.3% of the 10,071 employers terminated under revisiament employment contracts in 2000 did so as a result of the application of Italian Law No. 223/1991, 30.6% due to incentive

1613

packages according to criteria defined in the same plan, 18.5% due to corporate spin-offs (including the 1,051 resources transferred to Netsiel at December 31, 2000), 2.4% due to transfers to other companies in the Group and the remaining 12.2% due to other reasons.

At the same time, 384 new permanent employees were recruited, including university graduates or persons with high school diplomas in subjects of corporate interest, 83 were transferred from other companies in the Group, 30 were acquired from Stet International, which was absorbed following the reorganization of the international sector. At December 31, 2000, there were also two resources under temporary employment contracts (none at the end of 1999).

In 2000, training activities were characterized by a particularly selective approach, in strict correlation to the strategic requirements of the Company and the professional assets required. In this connection, the main activities were as follows:

- support for the restructuring processes consisting of a professional re-training of the resources involved (the "Jobnet" project for personnel laid off under unemployment programs);
- strengthening knowledge and skins in "critical" areas for the development of corporate business focusing mainly on technological and commercial content.

Overall, about 1.6 million hours were devoted to training activities, of which 15,000 were geared to executives (600 in attendance), 35,000 to middle management (1,640 in attendance) and more than 1,500,000 to operational staff (36,600 in attendance).
During the year, increasing use was made of multi-media teaching methodologies, which are more effective in terms of the learning process. Furthermore, with the integration of online, off-line and classroom training, it proved possible to optimize the time and resources involved for projects geared to particularly large groups (SAP, Office Automation, language training).

On March 28, 2000, at the Ministry of Labor, an agreement was reached with the labor unions regarding the "Development and Reorganization Plan for the three-year period 2000-2002". The talks, which kept the various parties busy for months in intensive negotiations, made it possible to pinpoint a balanced range of operational tools – early retirement incentives, cutbacks under Law No. 223/1991, transfers between companies, new flexible modes of part-time work, and professional re-training initiatives aimed at re-employment, with recourse to unemployment compensation (CIGS) benefit plans – which will create the necessary re-equilibrium of employees during the period covered by the Plan, on the basis of a declared excess number of 13,500.

Layoffs under unemployment compensation plans (CIGS), used for the first time by Telecom Italia, were articulated into two stages and involved a total of 2,200 resources (678 in the first and 1,522 in the second stage; at December 31, 2000, as the result of a few resignations, the number of resources receiving unemployment compensation numbered 2,144). According to the above mentioned agreement, employee cutbacks under Law No. 223/1991 will involve 5,300 resources over the three-year period 2000/2002; 3,656 had left at December 31.

On October 1, 2000, the new Collective National Labor Contract (CCNL) for companies operating in telecommunications services, signed at the Confindustria (the national federation of industrialist) the previous June 28, became effective. The economic part of the contract will remain in force until December 31, 2002, whereas the part regarding the

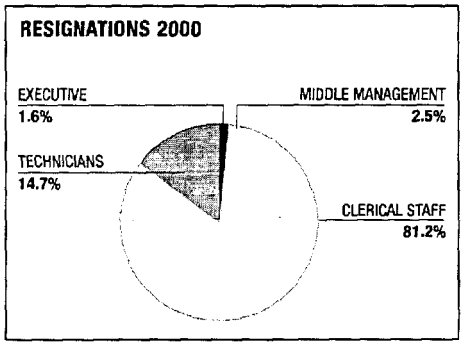
1614

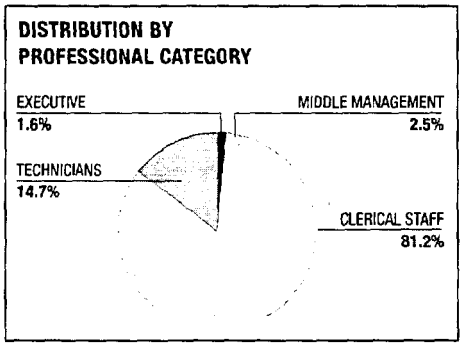
other clauses of the contract will remain in force until December 31, 2004. At the same time, the Company applied the transitory CCNL for the interim period as established in the draft signed on July 19, ensuring substantial continuity with regard to previous agreements, for all personnel already in service.

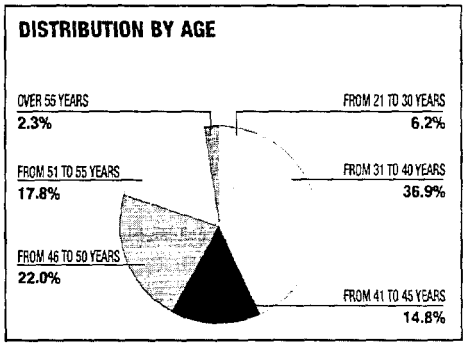
In 2000, in line with the strategy established in the "Development and Reorganization Plan" to focus activity on the core business of telecommunications, the Company contributed some business segments not strictly connected to the corporate mission to: Tin.it (*Internet* services), which was subsequently incorporated into Seat Pagine Gialle, TE.SS. (personnel administration), Netsiel (Information Systems Operations) and IM.SER. (Grandi Immobili). As part of the restructuring of the international sector, on the other hand, Stet International was absorbed. As a result of these operations, there was a net decrease in employers of 1,838.

On October 27, 2000 the Commission in charge of supervising pension funds authorized the operations of TELEMACO, the supplementary national pension fund for workers in telecommunications companies, the legal status of which was recognized by the Ministerial Decree issued on November 22, 2000. The collection of contributions to the fund began in November.

The following charts depict the breakdown of employee resignations in 2000 and the breakdown of employees by professional category and by age as at December 31, 2000.







1615

■ RESEARCH AND DEVELOPMENT

In 2000, Telecom Italia again relied mainly on CSELT for its R&D activities, thus confirming the importance of its role in defining the strategies of technological innovation on behalf of all the companies in the Group. The main subjects tackled during the year were as follows:

- the development of services for companies and for the residential clientele ("Business Net", telephone cards, the new public telephone platform on *ISDN*);
- the development of an offering of integrated intranet-extranet access for the transmission of voice and data on *IP* networks and the definition of innovative services for *Internet* Service Provider customers;
- the creation of a virtual *call center* for the "12" directory information service through the application of voice recognition and synthesis technologies;
- the creation of tools to support operations in providing *ADSL* services, in testing and managing of products and procedures, and in monitoring operative processes on a nationwide scale;
- the definition of the architecture and the bidding requisites and the testing of the Telecom Italia pan-European *backbone* network, created with high-capacity DWDM systems;
- the "observatory" activity of the evolution of technologies and services in which the Parent Company is interested;
- evaluations of investment opportunities in expanding companies in support of venture capital initiatives and the creation of environments ("incubators") in which new initiatives can develop effectively as companies.

In 2000, Telecom Italia devoted Lire 170 billion to R&D, of which Lire 164 billion refer to the work conducted by CSELT.

Interaction Design Institute

In 2000, Telecom Italia and Olivetti set up the Interaction Design Institute Association of Ivrea, ensuring financial backing for the initiative. The Institute, based in Ivrea, will be a post-university school where it will be possible to develop technical and cultural know-how in the sector of communications services, and receive training in management and business initiatives. An integral part of the project will be the creation of a research laboratory for young talent with different academic backgrounds, with the aim of creating the right mix between design and technologies.

3.2 MOBILE TELECOMMUNICATIONS IN ITALY

The Telecom Italia Group operates in the mobile telecommunications sector through the TIM (Telecom Italia Mobile) group. The new corporate framework of international operations, in fact, as approved by the extraordinary stockholders' meetings of Telecom Italia and TIM held between October 20 and 24, has been in place since December. The reorganization led to the total non-proportional spin-off of Stet International to Telecom Italia (88%) and TIM (12%); as a result, TIM was attributed 55.04% of Stet Mobile Holding (SMH) and control of all the foreign subsidiaries operating in the mobile telecommunications business; Telecom Italia was attributed the remaining shares in SMH and all the shares in Stet International Netherlands

1616

(SIN), the holding company for all the foreign wireline and integrated fixed-mobile network companies. Telecom Italia subsequently contributed all the shares still held in SMH to TIM in exchange for the subscription to a share capital increase by TIM reserved entirely for Telecom Italia.
This transaction led to a significant simplification of the Group structure, eliminating the intermediate level constituted by Stet International and, in particular, ensuring greater focus on the business and a clearer identification of management responsibility.
For the purposes of the actual figures, the results of the mobile sector are still shown separately for Italy (where the parent company TIM operates) and for foreign operations. The following table therefore presents the highlights of 2000 for TIM alone, compared to those of 1999:

(in billions of lire)	2000	1999	Change	
			amount	percentage
Sales and service revenues	15,352	14,425	927	6.4
Gross operating profit	7,445	6,734	711	10.6
Operating income	5,542	5,126	416	8.1
Capital expenditures	6,955	1,992	4,963	°
Number of employees at end of period	9,634	9,375	259	2.8

At the end of 2000, the level of penetration of the domestic mobile market exceeded 73%. Competition increased markedly due in part to the entry, in May, of the fourth operator Blutel. Despite this, TIM improved its economic results. Revenues increased by 6.4% compared to 1999, thanks partly to the increase in revenues value-added services, which more than doubled compared to 1999. The gross operating profit increased by 10.6%, representing 48.5% of revenues (46.7% in the prior year). The significant increase in operating income caused the percentage on revenues to rise to 36.1% (35.5% in 1999).
The improvement in the results can be mainly attributed to the increase in traffic volumes, which grew by 24.6% in terms of minutes and 9.8% in terms of revenues, where the net increase in lines (+16.6% compared to 1999) was partially offset by the fall in average revenues per line and per minute, owing to growing pressure on prices.
The process of simplifying the capital structure, approved by the extraordinary stockholders' meeting of October 10, 2000, led to the conversion of 91.56% of savings shares into ordinary shares, with a premium of Euros 3.7 per share paid by those who converted. The inflow of new capital was used in part to finance the acquisition of the *UMTS* license (Lire 4,680 billion), the value of which is included in capital expenditures.

■ THE OFFERING

The Italian mobile market, which is the second-largest in Europe in terms of the number of customers, comprises 42.3 million lines compared to 30.3 million at the end of 1999 (+40%), with TIM's share being equal to 51% and corresponding to 21.6 million lines, of which 89% were *GSM* lines. Since the beginning of the year, TIM activated 3.1 million new lines, most of them (86.2%) on a prepaid basis.

1617

At December 31, 2000, the overall number of customers of the TIM group, in Italy and throughout the world, numbered 27.3 million on an equity basis (compared to 21.8 million at the end of 1999); the number increases to 28.3 million if we consider the other mobile telecommunications companies that belong to the Telecom Italia Group (22.3 million at the end of 1999). The increases, compared to the end of 1999, are partly due to the exceptionally good results of the Spanish operator, Retevision Movil, where the number of customers jumped from 1 million to 3.7 million, and to the buoyant performance of other European and Latin American operators. These results confirm the important position that TIM now occupies among international operators. The success is also partly due to TIM's "plug & play" approach, which involves the export of successful rate offerings, innovative services and "turnkey" operating processes, in order to achieve immediate economies of scale and develop start-up quickly.

On the domestic market, in the consumer segment, TIM promoted alternative ways of recharging prepaid cards during the year, especially using ATMS (Bancomat) including free SMS or traffic incentives; it also offered tariff plans to encourage customers to join without activation charges or with free traffic offers. For the prepaid market, the "Duetto" formula was launched, with the option of combining it with other tariffs, enabling users to call a TIM number at Lire 90 (+VAT) per minute. The Short Message Service (SMS) was also extended to *TACS*, while users who had subscribed for at least four years were rewarded with discounts on traffic and the Long TIM rate was extended to all users to further develop the service.
After the success of the summer initiatives "Carta vacanze" (based on a call tariff of Lire 100 + VAT per minute towards TIM customers and 100 free SMSs) and "TIM raddoppia l'estate" (bonus of Lire 50,000-worth of traffic at the first re-charge, which could be increased by a further Lire 50,000) the new family of "Flash" rates was launched (with no set-up charge, Lire 400 per minute applied to the effective time of conversation and the option of accumulating discounts on traffic). For the Christmas campaign, the "Cartauguri" was launched which, at a cost of Lire 10,000, offered 60 minutes of traffic at Lire 90 per minute and 100 SMSs over the holiday season (the same tariff was also retained for *WAP* i-TIM in *Internet*).
Finally, agreements were stipulated with leading banks for mobile banking and for online trading and, in order to augment the information potential of services, an agreement was signed with ANSA (the Associated Press National Agency) to provide free information (on economics, sport, and so on) directly to the customer's cell phone.

In order to provide the best possible response to the needs of business customers (a segment in which TIM leads the market with a share of 65%), a special trademark and customer care service were launched on a dedicated website. In the segment of small and medium-size companies, which TIM intends to develop, offerings were introduced such as the "2-4" plan (for companies which hold from 2 to 4 *TACS* or *GSM* subscriptions, with a particularly advantageous basic rate and the possibility of customized services) and the "Mix" plan (the same tariff for traffic towards TIM and the Telecom Italia fixed networks). In the segment of medium-large companies, in which the Company intends to maintain an effective presence, the basic "Soluzione Azienda Mobile" rate plan was changed and services were added. The new TIMDuo option enables companies to charge employees for personal traffic, but to benefit from discounts on the total traffic. The "Business Easy" offering, destined for companies which hold between 2 and 30 *GSM* subscriptions, and the launch of the TIMCard Aziendale completed the offering to the business segment, with the aim of augmenting the level of penetration of the market by reaching all the professional figures who are not yet

1618

covered by a corporate mobile service. The "Numero Verde Mobile" (Mobile Toll-free Number), lastly, has been proposed to companies as a tool for augmenting business opportunities.

In 2000, TIM enhanced its range of value-added services, combining it under the new *i*-TIM trademark. This includes, in an integrated solution, *WAP*, SIM ToolKit technology, voice information and UNI.TIM applications (a universal number which makes it possible to operate voice, fax, e-mail and surfing the *Internet* in an integrated manner) in their most highly evolved form. The *i*-TIM services also make it possible to access the *Internet* directly in a fast, simple way; the content of the services will be developed also thanks to agreements stipulated with Seat-Tin.it and Yahoo! Europe.

Lastly, as far as applications designed for specific markets are concerned, TIM was the first Italian operator to allow its clientele to use cell phones for banking transactions, based on an architecture which provides high levels of security in terms of the authentication and coding of communications. In parallel, activities continued for the standardization of this architecture among international organizations.
In October, TIM launched the *GPRS* (General Pocket Radio Service) in the areas of Rome and Milan, thus enabling a pioneering group of customers to use the new technology; initially, the service will be extended to business customers, and later to consumers.

At December 31, 2000, TIM products and services were being marketed in more than 100,000 points of sale, composed of: 1,752 dealers in 4,837 shops; 18 large-scale retailers with 326 commercial outlets; 100,000 points of sale in the distribution channel (tobacconists, newsagents, motorway service stations, and Autogrill restaurants) and 93 "Il telefonino", shops, managed both directly and indirectly. Considerable investments were also made during the year to develop e-commerce, in which TIM, through the UNI.TIM website, aims to become one of the largest European operators.

In terms of quality, the overall level of customer satisfaction increased (about 82.3% compared to 79.6% at the end of 1999); in particular, there was an increase in the satisfaction of network quality (87%) and the use of the number customer care "119" (up 85.3%).

■ THE NETWORK

Industrial investments during 2000 responded to the dual need to maintain the company's position on the forefront in the implementation of new technologies and to improve the quality of the services which constitute TIM's core business. The transition to new mobile systems is gradually happening through the spread of technologies (*WAP*, *GPRS*) which use the existing network to introduce multi-media in mobile telecommunications.
80% of capital expenditure was devoted to strengthening the *GSM* network, to augment its capacity both in terms of access and traffic. In fact, in the access network more than 127,000 incremental channels have been installed, of which about 35,000 at 1800 MHz, and more than 1,900 new base transceiver stations have been built, of which 656 at 1800 MHz; in the *backbone* area, the activation of 14 new exchanges has made it possible to further improve the network's performance, coverage and capacity to handle traffic. In addition, the platform of the centralized answering service was upgraded with the building of 27 new installations.

1619

In 2000, through the activation of a dedicated platform, it also proved possible to provide SMS service to customers on the *TACS* network; in 2001, further developments of the same system will make it possible for customers of Telecom Italia's fixed network to send and receive SMSs. 20% of capital expenditure was spent on developing new services, particularly *WAP* and *GPRS*, and strengthening operating systems and the quality of the network. Regarding *GPRS* specifically, the installation of network components was completed, which made it possible to activate the service on a national scale at the beginning of 2001.
The figures for coverage of the population reached at December 31, 2000 are 99.6% for *GSM* and 98% for *TACS*; coverage of the territory was equivalent to 92.4% for *GSM* and 83.2% for *TACS*.

UMTS

On November 7, as a result of the *UMTS* license auction held in October, TIM was awarded one of the five available licenses, against a bid of Lire 4,680 billion, together with Andala, Ipse2000, Omnitel and Wind. Furthermore, having obtained the experimental concession from the Ministry of Communications, in 2001, TIM will install a pilot system in the city of Padua, taking advantage of industrial co-operation with Siemens and NEC.

■ HUMAN RESOURCES

At December 31, 2000, there were 9,634 employees in the TIM workforce, an increase of 2.8% compared to 9,375 at the end of 1999, due to 1,023 employees hired (of whom 22% came from other companies in the Telecom Italia Group) and 764 who left the company during the year. 44% of the workforce is female, and operates mainly in the Customer Service structures. 19% of the workforce are university graduates and 80% have high school diplomas. The average age of the workforce is 31, with an average of 3.5 years' service.
During the year, 1,700 temporary staff and 350 part-time staff were employed in Customer Service on a nationwide scale, in an effort to improve and render more flexible the structures covering the "peak" periods of customer demand.
Training programs aimed at developing corporate business and improving the professional skills of corporate personnel, with special attention to making effective use of "critical" resources, focused on developing expertise with regard to the new economy, business mobile services, the international context and customer requirements.

■ RESEARCH AND DEVELOPMENT

The activities carried out by TIM in collaboration with CSELT focused on maintaining and extending its competitive advantage by defining strategies of evolution for the *GSM* system and experimenting with the *UMTS* system.
Work continued on integrating hi-tech intelligent network solutions, which made it possible to supply new services (including the "916", "915", "920", UNI.TIM, SMS for *TACS*, TIM Card Azienda, Wireless Office, Wireless *Internet* and international prepaid services).
New value-added mobile services were developed and implemented and, in particular, the "TIMPLAN 3G" planning tool for mobile telecommunications networks, used as a support feature in the *UMTS* auctions in Europe. Finally a precision system was created for positioning *GSM* terminals.
Research and development costs incurred by TIM in 2000 totaled about Lire 50 billion.

1620

3.3 SATELLITE TELECOMMUNICATIONS

The Telecom Italia Group operates in the satellite telecommunications sector through **Telespazio** and its subsidiaries. The key figures of fiscal year 2000, compared to those of 1999 (excluding those relating to Viasat, the participation in which was transferred to Seat Pagine Gialle as part of the Seat-Tin.it deal) are as follows:

(in billions of lire)	2000	1999	Change	
			amount	percentage
Sales and service revenues	659	619	40	6.5
Gross operating profit	98	91	7	7.7
Operating loss	(100)	(19)	(81)	°
Capital expenditures	59	67	(8)	(11.9)
Number of employees at end of period	1,194	1,287	(93)	(7.2)

In a scenario featuring increasing competitive pressure, the Telespazio group reported a production value of Lire 728 billion, a figure substantially in line with that of 1999. The group achieved interesting results in the "Space System" and "Media & Communications" segments partly due to the first positive effects of the actions begun in respect of its strategic positioning, commercial offering, organizational restructuring and productivity initiatives. Nevertheless, operations were affected by the negative performance, Lire 45 billion (Lire 43 billion in 1999), of the satellite telephony company Iridium Italia which was put into a wind-up in March 2001. The operating result was also impacted by nonrecurring expenses borne by the Telespazio group, including those following the settlement of commercial dealings with a foreign customer which were severed in 1999 (Lire 59 billion), writedowns and provisions made following the difficulties encountered by the Orbcomm satellite system, of which certain companies of the Group are licensees (Lire 34 billion) and the writedown of other assets to take into account their recovery value (Lire 18 billion).
The net consolidated result of Telespazio group was Lire 24 billion (Lire 1 billion in 1999), notwithstanding the aforementioned nonrecurring expenses and other extraordinary expenses incurred during the year which were partly compensated by the gains on the sale of stock in listed companies of the Telecom Italia Group.

■ THE OFFERING

The rapid transformation process taking place in the telecommunications sector also had an increasing influence on the satellite segment, This occurred as a result of the specific economic developments, particularly in the television sector where privatization of the satellite consortiums will lead to the definition of a new competitive framework, and also on account of interesting development prospects: in fact, until 2003, rates of growth of 10% and 29% are predicted for the "Space System" and "Media & Communications" segments.

As a result, in 2000, the activities of Telespazio focused on the strategic positioning of the offering, the review of internal processes and the productivity increases, so as to create the structural conditions for managing the changeover and taking timely action in the market.

1621

In this context during the year the satellite activities were integrated with those of Telecom Italia that relate to the management of investments in the satellite consortiums Eutelsat, Intelsat and Inmarsat.

The growth of the "Media & Communications" segment was limited for traditional business areas and rose significantly in the case of multimedia and broadband services, especially for the development of *IP* infrastructures. The satellite systems, which are more costly than cable systems, are, however, a viable proposition in areas lacking in infrastructures and for applications requiring very rapid time-to-market. In any case, the current scenario will be radically modified both by the transformation of the satellite consortiums into joint-stock companies, with the definition of new distribution and price policies, and by the growing competition in the television segment, in which global operators and local service providers operate. However, the use of digital technology and interactivity are capable of revolutionizing the concept of television, through new criteria of product exploitation due to the implementation of technological platforms and the use of standards which permit returns from new integrated services (web-tv, *Internet*). This is therefore a growing market, which requires hi-tech services and space capacity to which it can have flexible access, but, at the same time, one which is characterized by a gradual eroding of margins.
In this sphere, there was a generalized growth in the services offered by the Company, including space capacity oriented on non standard orbiting positions, no longer available, and services characterized by flexibility and value added services (portable transmitters, business TV events). The clientele still consists mainly of major broadcasting networks (83%), although services provided to other operators for digital platform or random services increased. The clientele portfolio includes some of the leading national and international networks; in addition, during the year, some new long-term contracts were acquired. Business with foreign customers, which accounted for 29% of the total revenues of the segment, increased.
In 2000, Telespazio ensured the television coverage of such important events as the Jubilee Celebrations, the Olympic Games, the Italian and European soccer and volleyball championships, the world motor-cycle championship and the international film festival in Venice.

In the "Telecommunications" segment, and in particular, in the user systems segment, VSAT services were re-launched, by strengthening the offering portfolio and setting up a commercial network that is complementary to that of Telecom Italia, aimed at protecting the average customer. In 2000, an important network was started on behalf of the World Food Program, linking 15 African countries with the headquarters of the organization in Rome. The network was so effective that Telespazio was also mandated to create a similar network for Central and South America.
The company's foreign presence was strengthened with the aim of supporting specific commercial initiatives and safeguarding the Group interests in satellite services, mainly in Argentina, Bolivia and Romania. During the year, some projects were undertaken in Latin America and Eastern Europe and the foundations were laid for developing engineering services in various Asian countries.

Telespazio attained a position of excellence on a European scale in the design, development and marketing of "Mobile satellite services" (voice, data and messaging), through international agreements and by developing innovative solutions based on the most advanced satellite technologies; in this sphere the company lends its services to international systems such as Emsat and Euteltracs.

1622

The market of "Space systems and services" continued the growth trend of the last few years, thanks partly to international programs (Astrolink, InfoTerra, EuroStar, SkyBridge) associated with broadband communications and earth observation activities, which made it possible to overcome the problems encountered by mobile satellite telecommunications initiatives such as Iridium and Orbcomm.
In the medium term, the company foresees a significant growth in the development and management of the earth segment (telemetry stations and control centers), while other activities will be stable. Recognition of the role played by Telespazio in the sector is confirmed by the services supplied to customers such as Astrolink, Eutelsat, the European Space Agency (ESA) and NASA and the company's participation in such projects as CosmoSkymed, Artemis and Galileo.
In 2000, relations with national and international space agencies were consolidated. On a national level, the design phase of CosmoSkymed was completed. This is the main initiative of the Italian Space Agency (ASI), which aims to develop the first Italian earth-observation system for civilian and military applications. Telespazio will be responsible for the creation of the earth segment of the system, which is based on a constellation of satellites capable of supplying continuous high-resolution remote observation data, regardless of the amount of sunlight, with a very short distribution time.
The collaboration with the Italian Space Agency in the development of earth observation systems has led to the creation of a company called E-Geos, controlled by Telespazio, which will become operative in 2001 following the contribution of earth-observation operations. Thanks partly to the CosmoSkymed program, the new company will lead the market in Europe and will thus assume strategic value for the Telespazio group in a field of particularly important applications.
On a European level, Telespazio collaborated with the European Space Agency on the Artemis project and the completion of the preliminary study of the satellite civilian navigation and radio-locating system, Galileo, which constitutes the most interesting project to be tackled in Europe over the next few years. Telespazio will be responsible for defining the project, the services, the commercial applications, the telecommunications requirements and the earth segment.

On behalf of the Ministry of Defense, the pre-operative phase of the "Sicral" project was completed which, on February 8, 2001 made it possible to launch the first satellite successfully. The project also involves the launch of a second satellite. With "Sicral", Telespazio will be carrying out the first launch and transfer into orbit ever to be performed in Italy, thus confirming its position as the only European operator capable of performing all the stages of operative satellite management: release from the carrier, transfer into the final orbit, and control and management of the satellite while in orbit.

During the year, activities also continued in building the earth segment and control stations for the Astrolink system, a global satellite telecommunications system capable of supplying "on demand" interactive broadband services, to be offered to customers worldwide. In particular, the executive project phase of the system was completed.

In 2000, the commercial service and operational activities of the Iridium system were permanently halted and, in the United States, the Orbcomm system was forced into a receivership, following the financial problems encountered by the initiative.

1623

■ THE NETWORK

During the year, investments were directed to updating and extending corporate installations.
In the "Media & Communications" business area, there was a reduction, particularly in the field of telecommunications services, where the new climate of competition prompted reflection on the role of the company and the consequent level of investments given current financial resources.
There was also a reduction in the television segment, in which capital expenditures focused on expanding the digital platforms at the center in Fucino, the modernization of the installations devoted to special television services, the installation of infrastructures for the supply of services and the acquisition of portable transmitters for customers.
Infrastructures were also built for the supply of transmission services to the Army and, in general, to expand broadband transmitters.
Investments linked to the expansion of remote medical services by satellite have made it possible for the start-up of collaboration between hospitals in Italy and abroad.
The "Space services and systems" segment recorded an increase in capital expenditures due to the development of various space programs, although the amounts are lower. Capital expenditures mainly concerned the building of a telemetry station and a control center for the "Sicral" satellite at the center at Fucino, the acquisition of systems for the management in orbit of the new MITA satellite, and the upgrading of transmitters devoted to monitoring the Intelsat satellites.
Finally, small investments were made to strengthen the service center of the "Earth Observation" segment.

■ HUMAN RESOURCES

At December 31, 2000, employees operating in the sector numbered 1,194, compared to 1,287 at the end of 1999. On the same date, employees of the parent company Telespazio numbered 1,009 compared to 1,041 at the end of 1999; during the year, 64 new staff were recruited and 96 people left the company.
The company takes pride in the high level of education of its personnel, 34% of whom are university graduates and 57% of whom have high school diplomas. Training activities during the year concentrated mainly on specialist courses in technical subjects, languages, information and management. Overall, 24,773 hours were devoted to training activities, equal to 25 hours per capita.

■ RESEARCH AND DEVELOPMENT

In 2000, research activities were stepped up in fields characterized by a high level of innovation, in order to stay abreast of technological evolution and broaden the scope of the offering. Important alliances were established, such as the one with the ASI (Italian Space Agency), in specific segments of activity. The same activities were partly sustained by internal investments and partly financed by organizations interested in space activities and by the European Community.

1624

In the "Telecommunications" segment, which is increasingly oriented towards broadband technologies, made necessary by the explosion of the *Internet* and by the growing demand for data transmission on networks, the company concentrated on developing applications and services which can immediately be offered to customers, using technologies that are already available. The analysis of new platforms for distributing multimedia services and the participation in activities promoted by Astrolink geared to creating a base of services representative of the potential of this system fits into this context. Equally important is the development of the *UMTS* system through participation in programs co-financed by the European Community. Activities were geared both to defining the system, with particular emphasis on the integration between satellite and earth components, and the development of specific applications, such as infomobility.
In the segment of "Earth Observation", activities concentrated on developing new systems, for remote satellite observation, for the performance of high-definition services and the technological platform for the supply, partly by computer, of terrestrial information services. The latter include the monitoring of areas liable to landslide and the measuring of shifts of land in centimeters, performed using particularly precise innovative technologies.
Considerable resources were devoted to consolidating the role of Telespazio in the "Galileo" system, by means of integration between navigation systems and new applications in the field of specific development programs partly financed by the European Community.
In the "Space systems and services" segment, activities continued both in the sphere of ASI programs for new standard platforms and in the study of complete systems for innovative activities, such as the locating of fires and emergency calls. These also include research into satellite systems for digital audio broadcasting, which was started recently.

3.4 INTERNATIONAL TELECOMMUNICATIONS

The Telecom Italia Group is present internationally through several non-Italian companies, of which the majority are owned directly by **SIN (Stet International Netherlands)**, a holding company for integrated fixed-mobile companies and by **SMH (Stet Mobile Holding)**, a holding company for mobile telecommunications companies. During the period, the management and development of the international portfolio of the Group was aimed at strengthening the Group's presence in strategic markets, mainly in Europe and Latin America.
In this context, the strategy adopted had the following objectives:

- to step up the investment in companies operating in areas of greatest strategic importance, by developing a presence in business segments characterized by high growth potential (mobile telecommunications, *Internet* and data segments);
- to develop the presence of the Group in the Mediterranean Basin;
- to divest investments with little strategic value.

At the end of 2000, work proceeded on the reorganization of the Group's international holdings, already discussed in the section entitled "Mobile telecommunications in Italy", whereby Telecom Italia took over the investments held by SIN and TIM those of SMH.
Other transactions entered into during the year are described below.

Europe

Austria. In November, the state stockholder, OIAG, floated 25.8% of Telekom Austria (128.8 million shares) on the Vienna and New York stock exchanges. The offer closed at a price of Euros 9 per share and a total placement equal to 22.4% of capital (112 million shares).
In fact, the agreement between the Telecom Italia Group and OIAG established that – if the placement price was less than 75% of the price paid per share when they were originally purchased – SIN would have the right to receive shares in Telekom Austria to compensate for the difference at no charge. In this way, SIN received an additional 4.78% stake, bringing its holding in the company from 25% + 1 share to 29.78%. The new stockholder composition of the company after the float is as follows: OIAG 47.8%, SIN 29.8% and traded on the market 22.4%.
With the aim of repositioning itself on the market, in which the company has lost market share in the segment of wireline telephone services, Telekom Austria began to concentrate on the *Internet* sector during the year, acquiring 100% of Czech on Line, the Czech Republic's leading *Internet* Service Provider, for the sum of Euros 235 million, and setting up the company Jet2Web *Internet* Services in Austria, which will offer integrated broadband access and *Internet* services (portal, services and content).
In November, Mobilkom Austria was awarded one of the six *UMTS* licenses auctioned by the Austrian government; the cost of the license was Euros 172 million.

France. In November, the Telecom Italia Group acquired Jet Multimedia, a leading company in the supply of value-added services for business clientele and in the development of online applications using *Internet*, Audiotel and Minitel platforms. The acquisition, resulting from a take-over bid launched by 9Telecom, was aimed at acquiring a 100% holding of the company (comprising shares and warrants) at the price of Euros 83 per share and Euros 71.7 per warrant. At the end of the offer, 95.5% of the shares and 97% of the warrants had been tendered, with a total outlay of Euros 810.6 million. The transaction was entirely financed by SIN.
The acquisition fits into the framework of the 9Telecom strategy aimed at entering business segments which are more profitable and under less pressure from the competition. In addition to data/voice/*IP* connectivity, these include integrated solutions for value-added services, hosting and the development of *Internet* sites.
Within the scope of this transaction, 9Telecom has also acquired indirect control of Europe Explorer (90%-controlled by Jet Multimedia), a French *Internet* Service Provider operating in the segment of the residential clientele. On December 30, 2000 as part of a far-reaching program of reorganizing its *Internet* activities, Jet Multimedia sold Europe Explorer to 9Telecom for Euros 15 million, concentrating its activities on the business segment.
In order to strengthen its presence on the territory, in November, 9Telecom also concluded an alliance with Pinault-Printemps-Redoute (PPR), a French industrial group which is a leader in the distribution sector, particularly in the media and "new media" sector.
The partnership, which is of a commercial nature, can be summarized as follows:

- an exclusive distribution agreement (for 3 years, renewable for up to 5 years) of 9Telecom products by PPR, valued, for the first 3 years, at Euros 70 million (of which Euros 25 million in services offered by 9Telecom and Euros 45 million in shares in the same company);

1626

- the acquisition, valued at Euros 40 million, of 100% of Mageos, PPR's *Internet* Service Provider, with a customer base of about 500,000 subscribers.

The acquisition will give 9Telecom the opportunity of cooperating with one of the largest industrial groups in the country, opening the way to other forms of collaboration between the partners.

Greece. In 2000, Telecom Italia evaluated whether to enter the Greek fixed telecommunications market, deregulated in January 2001, through solutions based on the Med Nautilus business model involving Application/*Internet* Service Provider initiatives in Mediterranean countries and also on the presence of Stet Hellas, with the aim of activating operative synergies and creating new value for the Telecom Italia Group.
In this context, on December 4, through Mediterranean Nautilus S.A., the Parent Company concluded a strategic partnership with the operator Forthnet, acquiring a 5% stake at the cost of approximately Euros 9 million; the investment may be increased to 38% by 2002. On December 5, through the subsidiary Mediterranean Broadband Access, Telecom Italia and Forthnet were awarded a "Fixed Wireless Access" license for the sum of Euros 8.5 million.

Spain. With the aim of maximizing the value of investments in the local telecommunications market, Telecom Italia, Endesa and Union Fenosa set up the holding company AUNA. The transaction, begun in April 2000 with the signing of the agreement between the partners, was concluded at the end of December.
AUNA is an offspring of the former Retevision following the spin-off of the "operational" business segment which, having been approved by the stockholders meeting held on June 21, sanctioned the formation of the new company Retevision I; the former Retevision, which still holds the investments, then changed its name to AUNA.
In December, the three main partners and the minority stockholders supporting the initiative contributed the stakes held in the Spanish companies operating in the telecommunications sector to the holding company. At the end of this process, the structure of the main investments of AUNA is as follows:

- Retevision I: 100% (company set up on July 1, to which all the telecommunications and audio-visual business segments of Retevision have been contributed);
- Retevision Movil (Amena): 97.9%;
- Cable i Televisio de Catalunya (Menta): 100%;
- Madritel: 100%;
- Supercable Andalucia: 96.36%;
- Supercable Almeria: 100%;
- Supercable Sevilla: 98.16%;
- EresMas Interactiva: 99.32%;
- Quiero TV: 49%;
- Hispasat: 30.32%;
- Aragon del Cable: 100%;
- Cable Telca: 100%.

The holding in AUNA held by the Telecom Italia Group through SIN and SMH is 30% (22.76% SIN and 7.24% SMH; however, a stock option equal to 3.43% was exercised), to which an interest (0.71%) owned through Multimedia Cable, of which SIN owns 44%, must be added.

Euskaltel and Netco Redes (18% and 30%, respectively, held by SIN) were not contributed to AUNA.

Other significant activities in Spain in 2000 were as follows:

- the award, in March, through Retevision Movil, of one of the four *UMTS* licenses sold by the government in the first *UMTS* auction in Europe;
- the launch, on May 5, of Quiero TV, 49%-owned by AUNA through Retevision I, which, on November 1999, was awarded the only Spanish land-based digital pay-TV license. The offering platform includes the broadcasting of 14 channels, 3 of which will be "pay per view" and the possibility of accessing the *Internet* through television. At the end of 2000, approximately 70,000 customers had been activated.

Turkey. In line with its expansion strategy in the Mediterranean Basin, in April, the Telecom Italia Group was awarded a mobile *GSM* 1800 license.

The bid involved the issue of two new licenses to private operators through an auction, and the award of one license reserved for the fixed network operator. A special consortium was created to compete, 49% of which was owned by the Telecom Italia Group and 51% by Is Bank (the leading private bank in Turkey) in compliance with the restrictions imposed by local laws about foreign investment.

The consortium was awarded the license at the price of USD 2,525 million; the license was awarded to the fixed operator at the same time. The third license was not awarded because the bids were not raised.

In September, TIM and Is Bank formed the company Is TIM, which launched the activities for the start-up of mobile telecommunications services. According to the agreements with its local partner, TIM will be responsible for the technical and commercial operation of the enterprise. The project is of great significance because of the high growth potential of the Turkish market which, until 1999, had recorded a mobile phone service penetration of 11%, considerably lower than the European average (40%), and that of emerging countries (20%).

Latin America

Brazil. On July 31, the subsidiaries Brasil Telecom Participacoes (formerly Tele Centro Sul Participacoes) and Brasil Telecom (formerly Telepar) acquired, respectively, 1.17% and 98.83% (in total, now 100%) of the holding company Tele Brasil Sul (TBS), for the sum of USD 800 million. TBS holds 85.19% of the stock with voting rights and 1.27% of the preferred shares (31.56% of total capital) of CRT (Companhia Riograndense de Telecomunicacoes), a company offering local and long-distance fixed services in the state of Rio Grande do Sul. Since Brasil Telecom Participacoes already owned 8.01% of the ordinary shares and 0.07% of the preferred shares (2.94% of the total) of CRT, its total ownership in CRT is now 93.2% of the ordinary shares and 1.34% of the preferred shares (equal to 34.6% of the total). The acquisition is strategically important because the state in which CRT operates is potentially a very interesting market, with one of the highest levels of GDP per capita in Brazil (Reais 6,272, compared to Reais 5,240 in the region where Brasil Telecom operated previously and Reais 5,861 for the country as a whole), on account of the geographical proximity between the area covered by Brasil Telecom and the region covered by CRT, and, finally, because it enabled Brasil Telecom to increase to a size equal to that of the fixed network operators resulting from the spin-off of Telebras.

1628

In November, TIM, through Bitel Participacoes, acquired from UGB and Vicunha, respectively, 19.43% and 18.53% of the ordinary and preferred shares of Maxitel, the Brazilian mobile telephony operator in which it already held a 58.7% interest (43.15% of ordinary share capital). The transaction involved a total investment of approximately USD 240 million.
In the *Internet* sector, in June, the Group (through the subsidiary Softe, which was taken over by the other subsidiary TI Web) acquired 30% of GLB Servicos Interativos, an *Internet* company in the Globo group for the sum of USD 810 million. The deal is of great strategic importance; in fact, at the beginning of the year, GLB launched "Globo.com", a portal destined for the Portuguese-speaking community worldwide, using exclusively multimedia contents produced by Globo, a leader in the "media" sector in Latin America. The portal has already reached a position of primary importance in the Brazilian *Internet* market, which is fiercely competitive and expanding rapidly. The Telecom Italia Group will be responsible mainly for the technological aspects.

Chile. On December 18, the Telecom Italia Group signed an agreement to increase its investment holding in Entel Chile to 54.76% by acquiring the shares held by the Chilquinta group (25.63%) and the Matte group (3.5%, of which 0.52% had already been acquired by December 31), for an overall cost of USD 905 million. Previously, Entel had been jointly controlled by Chilquinta and SIN.
The acquisition of the control of the Entel group was concluded on March 12, 2001 following a special authorization from the US Antitrust Authority; in fact, the subsidiary Americatel operates on the American market on the basis of a license issued by the American authorities. The deal will enable the Group to consolidate and strengthen its presence in Latin America; in fact, the company, which is developing as a global telecommunications operator, is growing rapidly and, in some segments of the market, has already overtaken CTC, the dominant operator, controlled by the Spanish group Telefonica.

Peru. In March, TIM Perù, a 100%-controlled company by SMH, was awarded the third mobile PCS (Personal Communication System) license in the country at a cost of USD 180 million.
The license has a duration of 20 years, is renewable, and involves the supply of mobile telecommunications service on the 1900 MHz frequency band; furthermore, it offers the possibility of requesting other licenses for supplementary services, including basic and long-distance telephone services.
The terms of the bidding allow the operator the freedom to choose the technology; in light of the positive experience of other countries in the area, the Group has decided to use *GSM* technology, which constitutes a competitive advantage, both in terms of the quality and scope of the services offered, and on account of the potential deriving from *GSM* roaming worldwide.

Venezuela. On November 17, through TIM, the Group acquired control (56.56% of share capital) of the mobile operator Digitel, by acquiring stock worth USD 256 million and simultaneously subscribing to a capital increase of USD 107 million. Digitel owns a mobile *GSM* 900 license in the central region of Venezuela, which includes the capital, Caracas, and many other important cities. The region, which is the largest in the country, with 50% of the population, contributes more than 60% to the GDP. At the end of 2000, the level of penetration of mobile services in Venezuela had reached 28.4%, highlighting a high potential for growth, particularly following the deregulation of telecommunications which took place in November.

1629

The company, which launched the service at the end of 1999, is proving highly successful; at the end of 2000, in fact, it had more than 253,000 customers. This deal, too, is of high strategic content, since it allows the expansion of *GSM* coverage by TIM in Latin America.

Other areas

India. In September, Telecom Italia sold all its investments in companies belonging to the Bharti group: 20% in the holding company Bharti Tele-Ventures, 30.2% in Bharti Telenet (a fixed network operator in the region of Madhya Pradesh) and 2% in Bharti Cellular (a mobile *GSM* operator in Delhi).
The investment holdings in Bharti Cellular and Bharti Telenet were first sold to Bharti Tele-Ventures, which, in turn, were transferred to the Singapore Telecom group, which is establishing strategic alliance with Bharti. The deal was concluded for an overall amount of USD 121 million.

International *backbones*. 2000 saw the incorporation of the companies which will create and operate the *backbones*. In Europe, asset companies were created in the countries involved in the pan-European Backbone, completion of which is scheduled for 2001. In Latin America and in the Eastern Mediterranean, companies are being set up to handle the connections with the individual countries involved. Taking part in the latter project is the subsidiary Elettra – engaged in the laying of submarine cables – contributed to the holding company Mediterranean Nautilus.

At December 31, 2000, international wireline customers of the Telecom Italia Group had reached 18.7 million (6 million on an equity basis), an increase of 12% compared to the end of 1999; international mobile customers numbered 23.4 million (6.7 million on an equity basis), an increase of 70% compared to the end of 1999.

■ CONSOLIDATED SUBSIDIARIES

The following table shows highlights of the results, adjusted to conform with Group accounting principles, reported by the consolidated companies which make up the international sector. Nortel Inversora was consolidated using the proportional method for the entire year for statement of income and balance sheet purposes; other companies, acquired at the end of 2000, were only consolidated for balance sheet purposes.

(in billions of lire)	2000	2000 on a comparable consolidation basis (A)	1999 (B)	Change (A-B) amount	Change (A-B) percentage
Sales and service revenues	7,615	4,083	3,253	830	25.5
Gross operating profit	2,741	997	635	362	57.0
Operating income (loss)	579	(129)	(204)	75	36.8
Capital expenditures	5,977	2,321	1,856	465	25.1
Number of employees at end of period	15,943	6,173	5,714	459	8.0

1630

The economic results of the sector, excluding the Nortel group, were affected by improvements in the operational management of the companies, some of which are emerging from the start-up phase, as well as the strengthening of the exchange rate of the Brazilian real against the Italian lira. The increase in the gross operating profit, based on the same exchange rate, would be 18%.
Capital expenditures, in addition to those of the Nortel Inversora group (Lire 1,014 billion), also take into account the goodwill of the new acquisitions of foreign holdings, such as the Jet Multimedia group, Digitel and Maxitel (Lire 2,727 billion). The number of employees at the end of the period also includes those of the new companies acquired (2,300) and of the Nortel group (7,498).

Europe

The **TMI - Telemedia International Italia** group is 100%-owned by Telecom Italia and operates in the global providers market. This market is passing through a period of sustained growth and fierce price competition. The company offers voice and data telecommunications services internationally for fixed networks and realizes projects with a high technological and professional content.
As regards the commercial policy, which focuses on developing international customers through offices in Italy and abroad, in 2000, TMI concentrated its efforts on corporate offerings of data-transmission on *Frame Relay* and *IP* platforms, while scaling down less profitable services such as voice, messaging and services offered to re-sellers.
In 2000, the group reported revenues of Lire 264 billion, a reduction of 12% compared to 1999 (Lire 300 billion), brought about by the launch of the new commercial strategy. Operating result, which showed loss of Lire 171 billion compared to -Lire 192 billion in 1999, improved thanks to lower network costs as a result of the rationalization program adopted during the year. There was a consolidated net loss of Lire 197 billion, compared to Lire 88 billion in 1999, which, however, had benefited from the gain of Lire 119 billion on the sale of the investment in Concentric Network Corporation to Softe.

9Telecom Reseau is a French wireline telephone carrier which offers indirect access to voice, data and *Internet* services for the residential, professional and small and medium-size business segments. The holding in the group (through the subsidiaries SIN and TMI Ltd.) rose during the year to 93.99%.
In the last quarter, the company concluded some important deals, aimed at a strategic and corporate reorganization of its operations: the acquisition of Jet Multimedia and the previously mentioned agreement with PPR.
From the commercial point of view, in 2000, 9Telecom acquired 520,000 new customers (reaching 750,000 customers compared to 230,000 at the end of 1999). In addition, it acquired about 70,000 new *Internet* customers (for a total of 130,000 or +117% compared to the end of 1999).
The company recorded revenues of French francs 628 million (Lire 185 billion), five times the figure of 1999 of French francs 120 million (Lire 35 billion). The deterioration of the operating result, which showed loss of French francs 1,153 million (-Lire 339 billion) compared to -French francs 1,024 million (-Lire 302 billion) in 1999 and the loss of French francs 1,165 million (-Lire 343 billion) compared to -French francs 1,018 million (-Lire 300 billion) in 1999 were again due to the start-up phase.

1631

In 2000 the **Jet Multimedia** group, which operates in the sector of online services and is controlled through 9Telecom Reseau, reported revenues of French francs 585 million (Lire 173 billion); the operating result showed an operating loss of French francs 50 million (-Lire 15 billion); the net income for the parent company was French francs 10 million (Lire 2.8 billion).

Intelcom San Marino offers international telephone services, value-added services and data-transmission services. During the year, it began experiments with the *ADSL* offering. At December 31, the company had accumulated 3,500 *Internet* customers and 6,300 mobile customers through Telefonia Mobile Sammarinese (TMS), of which it owns 51%. In addition it has a 10% investment in Comunicare Via Satellite (a company operating in satellite services, business television and data-transmission) and a 20% investment in BBS (which supplies and develops interactive and broadcasting multimedia services).
The company reported revenues for the year of Lire 111 billion, an increase of 147% compared to 1999 (Lire 45 billion); the operating income was Lire 4 billion compared to Lire 2.5 billion in 1999 (+72.7%); the net income was Lire 4 billion, an increase of 32% compared to 1999 (Lire 3 billion).

Stet Hellas. In 2000, the Greek mobile telecommunications market grew by more than 52% compared to 1999, reaching a level of penetration of 55.7%. Despite the increase in the level of competition following the aggressive market policies adopted by other operators, Stet Hellas achieved a good performance in terms of overall lines (approximately 1.6 million, an increase of more than 33% compared to the end of 1999) thanks especially to the growth of the prepaid service, achieving a market share of 28%.
During the year Stet Hellas also concentrated on quality and innovation, introducing the first mobile portal for online services accessible via *WAP* in June.
The company reported revenues of Greek drachmas 177 billion (Lire 1,019 billion, +17% compared to 1999). The review of the interconnection agreements with the fixed network operators tripled the costs per *access charge*, thus partly canceling the benefits deriving from the commercial costs cutback policy costs adopted during the year. This affected the operating income, which almost totaled Greek drachmas 26 billion (Lire 148 billion, + 2.2% compared to the end of 1999); the net income was Greek drachmas 9 billion (Lire 52 billion) and was significantly higher (+251%) than that of the prior year, which was heavily penalized by extraordinary expenses and financial expenses.

Latin America

Entel Bolivia. The regulatory context of the country dictates that, until November 2001, fixed, local and long-distance telecommunications services will be offered under a monopoly. Currently local telephone services are provided by cooperatives with territorial responsibility limited to specific areas of the country, while long-distance services are provided on a national scale by Entel Bolivia, controlled by SIN. In view of the imminent deregulation of the market, the company has consolidated its current leadership position in the various segments of activity, in which it is able to offer integrated services. By the end of 2000 it had accumulated 262,000 mobile customers, 18,500 *Internet* subscribers and 33,000 accesses through direct lines, with respective increases of 81%, 68% and 19% compared to 1999.

1632

During the year, Entel reported revenues of Bolivian bolivianos 1,301 million (Lire 446 billion), which is in line with 1999; mobile telephone services contributed Bolivian bolivianos 234 million (Lire 80 billion). The stability of revenues reflects the economic crisis currently affecting the country, highlighted also by a slowdown in the growth of GDP and a reduction in per capita income. The operating income was Bolivian bolivianos 131 million (Lire 45 billion), a reduction of 22% compared to 1999 of Bolivian bolivianos 167 million (Lire 53 billion). The net income was Bolivian bolivianos 217 million (Lire 74 billion), a reduction of 3% compared to the prior year of Bolivian bolivianos 224 million (Lire 71 billion).

Nortel Inversora - Telecom Argentina. Nortel Inversora is the company which controls Telecom Argentina. 50% of the ordinary share capital is held by Telecom Italia and SIN. In April, Nortel's stake was reduced from 58.26% to 54.74% following the conversion of securities held by third parties (MEDS - Mandatory Exchangeable Debt Securities) into Telecom Argentina shares held by Nortel.

With the award of the PCS mobile licenses (in July 1999) and the deregulation of the wireline telephone market (in October 1999 for the long-distance telephone market and in November 2000 for the local telephone market), Telecom Argentina was transformed into an integrated operator capable of supplying telecommunications and value-added services nationwide. In this way, it has strengthened its strategic positioning, despite the fact that the results – in terms of lower revenues and higher operating and financial costs – were affected by the recession in the country and the changed competitive scenario.

During the year, the group effected the spin-off of Telecom Soluciones, originally set up to provide data and *Internet* services: the data segment passed to the parent company and the *Internet* segment to the new company Telecom *Internet*.

At the end of 2000, Telecom Argentina had accumulated 3.5 million fixed network subscribers corresponding to a market share of 45% (+12% compared to 1999). Through Telecom Personal, a leading company in its segment, it accumulated more than 2 million mobile customers (57% with prepaid cards), with a market share of 32%. In the *Internet* sector 250,000 subscribers were reported, with a market share of 20% and a growth of 146% compared to the end of 1999.

In 2000, the Nortel Inversora group, through Telecom Argentina, recorded consolidated revenues of Argentine pesos 3,362 million (Lire 7,068 billion), +2.5% compared to 1999. The increase can largely be attributed to the positive performance of mobile telephone services (+14% compared to 1999) and the data business (+28% compared to 1999). The operating income was Argentine pesos 691 million (Lire 1,454 billion); the net income attributable to Telecom Argentina was Argentine pesos 143 million (Lire 301 billion).

Bitel Participacoes, a wholly owned subsidiary of SMH, has two mobile operational holding companies Tele Celular Sul Participacoes and Tele Nordeste Celular Participacoes. In the market, the commitment of the Telecom Italia Group focused on strengthening its competitive position in relation to the other macro-regional operators, Telefonica and Bellsouth. In Brazil, in particular, a restructuring process is in progress, aimed at developing operational synergies through the creation of shared technological platforms.

During the year, Bitel incurred financial expenses of Brazilian reais 70 million (Lire 75 billion) on its debt to the Brazilian government arising from the acquisition of subsidiaries. Moreover, in December, it acquired 37.96% of Maxitel.

1633

Tele Nordeste Celular Participacoes supplies mobile telephone services in the regions of Alagoas, Ceará, Paraiba, Pernambuco, Piaui and Rio Grande do Norte. At the end of 2000, in a market characterized by a level of penetration of 9%, the company had more than 1.5 million customers (+27% compared to 1999), corresponding to a market share of 65%, thus confirming its leadership position in the sector.
During the year, Tele Nordeste considerably extended its range of services for the consumer and business segments, in preparation for the launch of the *WAP* service and its own virtual network.
The results for the year reflect the results from the new strategies adopted by the company; customer care, customer retention and the suspension of defaulting customers.
In 2000, the company reported revenues of Brazilian reais 890 million (Lire 1,024 billion), +26.2% compared to the end of 1999, thanks to the increase in traffic; the operating income of Brazilian reais 199 million (Lire 229 billion), + 64% compared to 1999 was also influenced by the policy to reduce costs. The consolidated net income for the year attributable to the parent company for the year was Brazilian reais 25 million (Lire 29 billion), an increase of 164.5% compared to 1999.

At the end of 2000, **Tele Celular Sul Participacoes**, a mobile telephone operator in the states of Paranà, Santa Caterina and in the city of Pelotas, thanks to an innovative marketing strategy, had accumulated 1.4 million lines (+37% compared to 1999), with an overall market share of 75% and an incremental market share of 57%. The prepaid service reached 47% of the customer base of 659,000.
The company reported revenues of Brazilian reais 750 million (Lire 863 billion), +4.7% compared to 1999. The increase can be attributed to higher revenues from traffic, which were partially compensated by a reduction in revenues from the sale of terminals deriving from the policy of outsourcing commercial activities; this is also reflected in a fall in costs, which had a positive influence on the operating income of Brazilian reais 125 million (Lire 144 billion), +13.4% compared to 1999; the net income attributable to the parent company was Brazilian reais 14 million (Lire 16 billion), 59.4% less than in 1999, owing to higher amortization and depreciation and financial expenses incurred by the company during the year.

June saw the formation of the company **TIMnet.com**, in which Tele Nordeste Celular and Tele Celular Sul each have a 50% stake, and which aims to become the largest ISP on Brazil's mobile telephone network and in Latin America as a whole.

Maxitel, the Brazilian mobile operator in which, in December, TIM acquired control, operates in the states of Bahia and Sergipe. During the year, it achieved significant results, totaling 953,000 lines, equivalent to a market share of 33%. In 2001 the company intends to present a competitive, segmented offering and to attain a leadership position in terms of technological innovation, partly through its close collaboration with TIMnet.com.
The company reported revenues of Brazilian reais 484 million (Lire 557 billion), a marked increase (+64.9%) compared to 1999, as a result of the increase in traffic and the sales of terminals. The operating result showed a loss of Brazilian reais 125 million (-Lire 144 billion), particularly because of higher amortization and depreciation charges. The net result, which showed a loss of Brazilian reais 641 million (-Lire 737 billion) compared to - Brazilian reais 295 million in 1999, was also affected by the charge to the statement of income for accumulated deferred taxes recorded up to the previous year in receivables which are no longer recoverable on the basis of the new corporate business plan.

1634

TIM Perù, the holder, since March 2000, of the third mobile PCS 1900 license in the country, launched the service in January 2001 in the areas of Lima, Callao and Panama Highway. As the first *GSM* operator in Peru, the company is proving to be very successful with a broad, innovative offering in terms of services and distribution. 2000 was characterized by costs deriving from the technical and commercial start-up, which were reflected in a loss of Peruvian nuevo sols 61 million (Lire 36 billion).

Digitel has been a mobile telephone operator in Venezuela since the end of 1999. The ownership of a license which, in addition to the *GSM* 900 mobile service, also enables it to offer fixed national and long-distance services, public telephone services, value-added and broadband services and satellite communications, ranks it as a potential operator on a global scale. Thanks to the high quality of its services and a network coverage that is greater than that of its competitors, at the end of 2000, Digitel had accumulated 253,000 mobile customers (74% with prepaid cards), and a market share of 8%.
The company reported revenues for the year of Venezuelan bolivars 57 billion (Lire 174 billion). Reflecting the effects of the start-up process, the operating result showed loss of Venezuelan bolivars 40 billion (-Lire 122 billion), and reported a loss of Venezuelan bolivars 25 billion (-Lire 77 billion).

■ AFFILIATED COMPANIES AND OTHER COMPANIES

Europe

Spain

As mentioned above, the holding company **AUNA** was created in 2000 as part of the reorganization of the Spanish companies of the Group. AUNA is the new name of the former Retevision company, which, after de-merging the contribution of the operational business segment to the new company Retevision I, is left with only the investment holdings.
Since the contributions from the three main partners only took place at the end of 2000, the consolidated economic figures of AUNA for 2000, in effect, are comparable to those of Retevision's 1999 figures, which included the activities now managed by Retevision I and EresMas Interactiva.
Retevision I closed 2000 with more than 1,950,000 customers, corresponding to 2,766,000 indirect access lines and 62,000 direct access lines, confirming its position as the second largest fixed telecommunications operator in Spain. Fierce competition led to a reduction in rates and a consequent contraction of margins.
EresMas Interactiva is the new name of Retevision Interactiva, established by the de-merger of the business segment of Retevision operating in the *Internet* sector for residential customers. The change in the name of the company is consequent to changing the name of the portal from Alehop.com to EresMas.com. The company closed 2000 with 1,420,000 customers, confirming its position as the second largest operator in the Spanish market of *Internet* Service Providers and portals, with 664 million pages visited during the year.
In 2000, **AUNA** reported revenues of Spanish pesetas 97.4 billion (Lire 1,133 billion), an increase compared to Spanish pesetas 91.4 billion (Lire 1,064 billion) in 1999; the operating result shows an operating loss of Spanish pesetas 42.9 billion (-Lire 500 billion) compared to - Spanish pesetas 10.4 billion (-Lire 121 billion) in 1999; there was a loss for the year of Spanish pesetas 53.3 billion (-Lire 623 billion); in 1999, the company reported a loss of Spanish pesetas 19.1 billion (-Lire 221 billion).

In 2000, in a rapidly growing mobile market of 24 million final customers (+62% compared to 1999), **Retevision Movil (Amena)** reported excellent results, with more than 3.7 million lines (+267% compared to the end of 1999), with 15% of the total market and 29% of the incremental market. The operator distinguished itself by the dynamic, innovative nature of its offering, launching the first *WAP* service in Spain and proving very successful thanks particularly to the prepaid market and the "Duo" offering (similar to TIM's "Duetto" offering). In fact, Amena is the affiliated company in which TIM has most successfully applied the "plug & play" type approach (the exportation of successful tariff plans and innovative services and turnkey operational processes in order to create fast start-ups), particularly in the franchising of the commercial chain, the installation of the UNI.TIM platform and the segmentation of the clientele.
In March the company was also awarded a *UMTS* license for a total cost of Lire 255 billion.
The company reported revenues of Spanish pesetas 139 billion (Lire 1,618 billion), showing a significant increase (+372%) compared to the end of 1999, as a result of the commercial success achieved during the year. However, the expansion of the clientele led to a considerable increase in operating costs, and reflected negatively on the operating result, which showed an operating loss of Spanish pesetas 113 billion (-Lire 1,317 billion), and on the result for the year, which was a loss of Spanish pesetas 81 billion (-Lire 938 billion).

Madritel has the telephone and cable TV license for the Madrid area. At the end of 2000, the company had approximately 33,000 active customers against 59,000 contracts already stipulated (compared to, respectively, approximately 6,000 and approximately 13,000 at the end of 1999). The access network is based on integrated HFC technology (optical fiber + co-axial cable); at the end of the year connections had been provided to 351,000 building units, of which 243,000 were passed to the sales team.
In May, along with Cable i Televisio de Catalunya and nine other cable operators, Madritel created the company Estreno Digital to acquire the contents for pay-TV on advantageous terms.
During the year, moreover, the company extended its offering with the broadband *Internet* service and a broad range of services specially designed to meet customer requirements.
The company reported revenues of Spanish pesetas 2.9 billion (Lire 33 billion); the operating result showed an operating loss of Spanish pesetas 12.8 billion (-Lire 149 billion); the loss of Spanish pesetas 9.6 billion (-Lire 111 billion) can be attributed to the start-up phase.

Cable i Televisio de Catalunya (Menta) has the license for telephone services and the license for cable TV and operates in the Catalan region offering fixed telephone services, broadband *Internet* services, cable TV and data services. At the end of 2000, the company had approximately 20,000 active customers against 40,000 contracts. The network in HFC technology (optical fiber + co-axial cable), a common platform for the supply of voice, data and cable TV services, reached an adequate level of development, despite the delay in receiving digging permits: in fact, cables were laid to 320,000 building units, of which more than half are already available at a commercial level.
In 2000, the company reported revenues of Spanish pesetas 788 million (Lire 9.2 billion) compared to Spanish pesetas 132 million (Lire 1.5 billion) in 1999; the operating result showed an operating loss of Spanish pesetas 8,142 million (-Lire 94.8 billion); the loss of Spanish pesetas 5,664 million (-Lire 65.9 billion) is again due to the start-up phase.

Euskaltel was not involved in the process of setting up AUNA. The company offers direct and indirect telephone services, *Internet* services, mobile telephone and cable TV services

1636

in the Basque regions, in which it has consolidated its position as the second largest wireline network operator, with about 330,000 indirect lines and 17,000 direct lines (respectively, +9% and +247% compared to 1999), and the third largest mobile telephone operator, with about 280,000 customers (+312% compared to 1999). *Internet* customers numbered 273,000, compared to 131,000 at the end of 1999 (+109%).
The positive trend for the year is reflected in revenues, which amounted to Spanish pesetas 14.1 billion (Lire 164 billion), +26% compared to 1999; the operating result showed an operating loss of Spanish pesetas 10.7 billion (-Lire 125 billion), -Spanish pesetas 5.8 billion (-Lire 67 billion) in 1999, and was affected by higher costs incurred for the acquisition of mobile customers which was also reflected in the net result for a loss of Spanish pesetas 8.2 billion (Lire 96 billion).

Netco Redes, again, was not involved in the creation of AUNA. Its business purpose is the administration, operation and maintenance of the fiber optic telecommunications networks of the Spanish electrical companies Endesa, Union Fenosa, Red Electrica de Espana and Hidrocantabrico. At the beginning of 2000, the company lost, against a modest compensation, its exclusive rights to use the networks, following a decision on the part of the Spanish Antitrust Authorities.
In 2000, the company closed with revenues of Spanish pesetas 3.4 billion (Lire 40 billion) and a net income of Spanish pesetas 0.9 billion (Lire 10 billion), in line with those of the prior year.

France

In a market that grew by 43% compared to 1999, which totaled almost 30 million lines and with a level of penetration of 50.2%, **Bouygues Telecom**, a mobile telecommunications operator in France achieved the best performance in the sector with a growth rate of 61.2%, enabling it to total 5.2 million lines at the end of 2000, with a market share of 18%. The company recently decided not to participate in the award of *UMTS* licenses owing to the high cost reached during the bidding (Euros 4.95 billion). However, the French government, which only awarded two of the four available licenses, is evaluating the possibility of starting another auction for the frequencies that have not yet been assigned.
The company reported revenues of French francs 12.8 billion (Lire 3,783 billion), an increase of 62% compared to 1999 on account of the increase in the customer base. This was accompanied by a reduction in industrial and commercial costs, with significant repercussions on the operating result, which showed an operating loss of French francs 1.2 billion (-Lire 364 billion) +57% compared to 1999). The net result, which showed a loss of French francs 2.2 million (-Lire 655 billion), is however an improvement of 37% compared to 1999.

Austria

In 2000 **Telekom Austria**, the dominant carrier of wireline telephone services, *Internet* and data, lost a significant amount of the market share on account of growing pressure from competition. The company was therefore forced to speed up the launch of new services (including those using *ADSL* technology) and strengthen the *Internet* offering with the new company/trademark "Jet2 *Internet* Services", which will offer integrated broadband access and *Internet* services.
At the end of the year, corporate market shares amounted to 71% in terms of traffic (-18% compared to 1999) and 94% in terms of the number of lines, equal to almost 3.8 million (96% in 1999). *Internet* customers numbered 388,000 (with a market share of 25%); in this context its leadership in the residential segment was confirmed. *ADSL* lines amounted to over 39,000.

Within the framework of the plan to contain structure costs, the company Telekom Austria Personalmanagement (100%-owned by Telekom Austria) was set up at the end of the year. This company comprises staff with a public contract who will be asked to change to a private contract so that they can return to Telekom Austria. Thanks to outsourcing projects and early retirement schemes, at the end of 2000, the number of employees had already been reduced by 7% compared to the end of 1999.
In 2000, Telekom Austria reported revenues of Austrian schillings 35.7 billion (Lire 5,020 billion), slightly less than that in 1999 of Austrian schillings 38.2 billion (Lire 5,381 billion). The operating result showed an operating loss of Austrian schillings 1.9 billion (-Lire 276 billion), compared to an operating income in 1999 of Austrian schillings 3.8 billion (Lire 534 billion). This difference is due particularly to the higher costs of marketing and interconnection. The writedown of the investment in Libro AG and the extraordinary expenses of Austrian schillings 3.5 billion (Lire 493 billion) deriving from early retirement incentives generated a loss of Austrian schillings 6.3 billion (Lire 881 billion), compared to a profit in 1999 of Austrian schillings 2.8 billion (Lire 395 billion).
Jet2Web Internet Services (*Internet* activities) reported revenues of Austrian schillings 507 million (Lire 71 billion); the operating result showed an operating loss of Austrian schillings 306 million (-Lire 43 billion) and the loss for the year was Austrian schilllings 309 million (Lire 44 billion), both a result of the start-up phase.

In 2000, the Austrian mobile market, which is characterized by fierce competition, partly as a result of the entry, in May, of the fourth operator, reached a high level of penetration (74.5%, corresponding to more than 6 million lines), which slowed down development. In this context **Mobilkom Austria** confirmed its leadership position with 2.8 million lines (+24% compared to the end of 1999) and a market share of 45%. The strategy of the company is geared to promote customer retention, develop customer service and, more particularly, develop value-added services. In particular, the offering has evolved towards the *Internet* sector with the launch, in January, of *WAP* applications and, subsequently, the start of the first large-scale experiments with *GPRS*. In November, Mobilkom Austria was awarded *UMTS* license. Within the framework of a strategy of international growth, the company also acquired control of Vipnet Gsm in Croazia and Mobilkom Liechtenstein.
During the year, the company reported revenues of Austrian schillings 18 billion (Lire 2,554 billion), +10% compared to 1999; the operating income was Austrian schillings 2.8 billion (Lire 389 billion); the net income was Austrian schillings 1.8 billion (Lire 258 billion). The net income was affected by high financial expenses attributable to the acquisition of the *UMTS* license and the investments in *GPRS*.

Czech republic

The Czech mobile market, which is characterized by a level of penetration of 38%, showed a net growth thanks partly to the entry of the third operator. In this context, at December 31, **Radiomobil** had more than 1.8 million lines, with an increase of 113% compared to the end of 1999. This commercial performance affected the economic results: the company reported revenues equal to Lire 966 billion (+65% compared to 1999); the net income was equal to Lire 93 billion (+33%).

Serbia

In Serbia, the Telecom Italia Group is present with a 29% investment through SIN in Telekom Srbija, the wireline carrier operating as a monopoly and the country's second

1638

largest mobile operator. At December 31, 2000 the company had 2,220,000 subscribers to the fixed network (compared to 2,121,000 at the end of 1999) and 432,000 customers of the mobile network (compared to 99,000 at the end of 1999).

No official evaluation of the extent of the damage resulting from the hostilities in 1999 has as yet been forthcoming; the state secret imposed on this subject, which should have expired on June 26, has been postponed indefinitely. As a result of these events Telekom Srbija is still barred from operating telecommunications in the region of Kosovo. For this reason steps have already been taken to writedown the investment in SIN's 1999 and 2000 financial statements.

The results of 2000 show revenues of Serbian dinars 17,610 million (Lire 581 billion based on an exchange rate of 6 Serbian dinars to the German mark), compared to Serbian dinars 8,640 million (Lire 1,424 billion based on an exchange rate of 30 Serbian dinars to the German mark) in 1999. The gross operating profit was Serbian dinars 7,335 million (Lire 242 billion), compared to Serbian dinars 3,408 million (Lire 562 billion) in 1999. The company reported a loss for the year of Serbian dinars 2,970 million (Lire 98 billion), compared to a profit in 1999 of Serbian dinars 1,050 million (Lire 173 billion). The loss can be attributed to the devaluation of the Serbian dinar against the German mark.

Latin America

Brazil

The Telecom Italia Group operates in the wireline telephony sector through **Brasil Telecom Participacoes** (BTP, the new name of Tele Centro Sul Participacoes), a company in which SIN has an investment through Solpart Participacoes, which owns 51.79% of the ordinary share capital.

Within the framework of the corporate restructuring process, begun in 1999, during the year, action was taken to incorporate the eight operational companies controlled by Tele Centro Sul in Brasil Telecom (the new name of Telepar Partecipacoes), as well as acquire and incorporate Tele Brasil Sul and Companhia Riograndense de Telecomunicacoes (CRT). After these transactions, at the end of 2000, BTP holds 65.47% of the total share capital of Brasil Telecom (97.97% of ordinary shares and 39.34% of preferred shares).

The investments made during the year had the aim of strengthening the transmission and switching structures and completing the digitalization of the exchanges. At the end of 2000, including CRT, there are 7.2 million lines in service (of which about 2 million have been newly installed). In addition, during the year, the technological platform to support the new broadband *Internet* services became available.

The consolidated financial statements (which include the economic figures of CRT from August 1, 2000) showed revenues of Brazilian reais 4,732 million (Lire 5,444 billion) +48% compared to 1999; the operating income was Brazilian reais 869 million (Lire 999 billion); the consolidated profit attributable to the parent company was Brazilian reais 342 million (Lire 393 billion), with an increase of 21% compared to the prior year.

Chile

Entel Chile is the leading operator in the long-distance telephony sector, the mobile telephony sector (through the subsidiary Entel PCS) and the data-transmission/*Internet* segment. Through the subsidiary Americatel, the Group also addresses the American Hispanic-speaking market in the United States with the offering of long-distance telephone services between the USA and Latin America.

During the year, Entel stepped up the long-distance, mobile and *Internet* sectors, which were less sensitive to the recession that has been sweeping the country since 1998.
Through the mobile telecommunications subsidiary Entel Telefonia Personal it reached a total of 1.3 million customers (+94% compared to the end of 1999); results were even more favorable in the *Internet* sector, where traffic increased by 96% compared to that of the prior year.
The company reported consolidated revenues of Chilean pesos 523 billion (Lire 2,076 billion), an increase of 39% compared to 1999 (Chilean pesos 377 billion) particularly as a result of the positive trend of mobile telephone services (+86%) and the long-distance sector (+55%).
The net income attributable to the parent company was Chilean pesos 3 billion (Lire 12 billion), a considerable reduction compared to 1999 (Chilean pesos 28 billion) due to nonrecurring extraordinary expenses. Furthermore, the 1999 result benefited from a gain of Chilean pesos 36 billion from the sale of a mobile telephone license to Bellsouth.

Cuba

The Telecom Italia Group operates in the country through **Etec S.A. Cuba**, exclusive carrier for national and international fixed telephone services. In order to achieve the objectives imposed by the regulations governing the license, during the year, the company made investments geared to developing the number of lines in service (from 424,000 in 1999 to 484,000 in 2000), increasing the level of digitalization of the network (from 40% to 53%) and strengthening the data network with the new *ATM/Frame Relay* technology.
During the year, Etec S.A. reported revenues of USD 293 million (Lire 616 billion), with a growth of 17% compared to 1999 due mainly to greater incoming international traffic (+22%). Net income was USD 160 million (Lire 336 billion), +11% compared to 1999.
On December 15, telephone connections with the United States were again interrupted because of the failure on the part of American operators to recognize the tax on calls between the USA and Cuba. The tax was levied by the Cuban government against the decision to destine part of the Cuban funds frozen in the United States to compensate the families of the victims of the two American civilian aircrafts shot down by Cuban aviation in 1996.
The company has already taken action to minimize the negative effects of this decision by negotiating new transit agreements and developing connections with other operators.

Other areas

Israel

The Telecom Italia Group operates in the Israeli market through **Golden Lines**, the second largest international telephony operator in the country. During the year, the company launched the offering of *Internet* access (through dial-up, *ISDN* and rented circuits), reaching a base of approximately 25,000 residential customers and 1,300 business customers.
In 2000, the company reported revenues of Israeli shekels 558 million (Lire 284 billion) +13% compared to the prior year. The net result was a loss of Israeli shekels 56 million (-Lire 28.5 billion), which shows an improvement of 30% compared to the 1999 (-Israeli shekels 80 million).

1640

3.5 INFORMATION TECHNOLOGY ACTIVITIES

The Telecom Italia Group operates in the sector through the **Finsiel group, Netsiel, Telesoft** and **Sodalia**. The following table shows the highlights for fiscal year 2000, compared to those of 1999. It should also be mentioned that the contribution of the business segment "Information Systems Operations" by Telecom Italia to Netsiel affected capital expenditures and personnel, whereas the exclusion from the scope of consolidation of Webegg, which came under the direct control of Olivetti in 2000 as a result of corporate transactions, had an impact on the economic results.

(in billions of lire)	2000	1999	Change	
			amount	percentage
Sales and service revenues	3,137	3,074	63	2.0
Gross operating profit	388	405	(17)	(4.2)
Operating income	251	237	14	5.9
Capital expenditures	303	129	174	*
Number of employees at end of period	11,280	10,206	1,074	10.5

The mentioned companies above, together with the Information Technology function of the Parent Company, make up the "Information Technology Services" Business Unit. In 2001, their activities will come under the control of Telecom Italia Information Technology, a company 100% owned by Telecom Italia, set up in the second half of 2000 with the aim of ensuring the coordination of the information technology activities distributed throughout the various companies. The main aims of this reorganization are to fully concentrate the sector activities on the product/customer/market, make better use of specific professional skills and improve production efficiency.
The B.U. will be diversified into the following areas: "Telecommunications Services", specialized in applications consultancy and in system integration services for the telecommunications market; "Operational Services", devoted to managing computer infrastructures; "Market", geared to the segments of finance, industry and the central Public Administration; "Web Professional Services", with the aim of playing a leading role in the offering of professional services and innovative web-related solutions; "Regional Services", devoted to the local Public Administration; "Consulting", specialized in executive consultancy; and "Tax Services", devoted to support activities for the tax-records office and the Ministry of Finance.

With reference to the individual companies, the **Finsiel** group, in addition to continuing its traditional activities geared to offering services to the central and local public administrations, extended its offering of services relating to systems integration and development, "Enterprise Resources Planning" (ERP) platforms, online services in the fields of e-business, e-banking and training.
For the group companies, the *Internet* constituted the main reference point in 2000; in fact, the whole offering was upgraded to offer customized web-based solutions to companies, banks and the Public Administration, with the aim of transforming traditional public or private enterprises into e-companies, partly through a review of internal processes.
For large industrial and services companies, the offering of ERP management systems was integrated with e-commerce and e-procurement solutions.

1641

The offering for banks focused not only on the transition to the euro, but also on web-based solutions capable of seizing the new business opportunities arising from the network and meeting the requirements of a clientele demanding customized financial services that are available through a variety of channels, from the bank counter to the mobile phone or the web. These lines of development were a strong addition to the Banksiel group, which specializes in services for financial operators.
During the year, progress was made in the development of Tele Sistemi Ferroviari, a company supplying exclusive ICT services under an outsourcing contract to Ferrovie dello Stato (the Italian State Railroad) and in the growth of the Consiel group, specialized in management consultancy, which began a complex process of corporate restructuring.
SOGEI, in the role of main operations partner of the Ministry of Finance, expanded its telematic services by extending the possibility of digitally transmitting deeds and documents regarding the departments of Internal Revenue Service, Customs, Territorial administrators, by extending the number of users (taxpayers, professional people and companies) and, at the same time, guaranteeing security and privacy in relations between the user and the tax office. "Telematic taxation", begun in 1999, enabled the approximately 100,000 registered tax intermediaries to transmit more than 45 million documents online, including tax returns, deeds and other documents. In this sphere, for the first time, taxpayers can send their tax returns through the *Internet*. The technological foundations have also been laid to combat tax evasion, such as a system for verifying accounting documents and displaying a company's position. In addition, the company supervised the computer side of the management of ICI and other taxes, the computer system for the Tobacco Agency, the creation of special software for managing road taxes, the totalizers used for betting and the start-up of network services for professionals and craftsmen.
Overall, the Finsiel group reported revenues in 2000 for Lire 2,259 billion, with an increase of 2.5% compared to the prior year. The operating income was Lire 207 billion, which grew by 18.9% compared to 1999, while the net income attributable to the parent company was Lire 132 billion, with a growth of 57% due partly to the gains arising from the sales of data-processing centers to Lottomatica, Bisiel to Banca Agricola Mantovana, stock in Praxis and the dilution of Webegg capital.
At December 31, 2000, employees numbered 7,407 (8,130 at the end of 1999). The fall compared to the prior year also takes into account the 361 Netsiel employees who are no longer in the Finsiel group.

At December 31, 2000, Telecom Italia contributed the "Information Systems Operation" business segment, which operates the information infrastructures of Telecom Italia itself and related services, to **Netsiel**. After this transaction, Netsiel (formerly a wholly-owned subsidiary of Finsiel) is 68.65%-owned by Telecom Italia and 31.35%-owned by Finsiel.
From 2001, thanks to the outsourcing contract stipulated with the Parent Company, Netsiel will gradually concentrate the operation of the information services of the Telecom Italia Group in its own hands, thus creating synergies and economies of scale which will be useful in terms of developing its role in the "Operational Services" sector. Three channels, in fact, have been identified as being important for the development of this market (the "Information Technology Services" Business Unit, other Telecom Italia Group companies, the direct market), each requiring a different commercial approach. To this end, Netsiel will be the object of a reorganization plan with the aim of strengthening its

1642

specific know-how (web, systems support, client server, help desk) and gearing its activities to the market, so that it will already be able to generate an increase in its sales to third parties by 2001.
In 2000, Netsiel revenues amounted to Lire 122 billion compared to Lire 141 billion in 1999. The operating income, which amounted to Lire 5 billion, and the net income of Lire 2 billion, are in line with the figures for 1999.
At December 31, 2000, employees numbered 1,467 compared to 361 at the end of 1999. The increase compared to 1999 also takes into account the 1,051 units who were transferred from Telecom Italia to Netsiel following the contribution of activities.

Telesoft confirmed its role as the main supplier of IT software and services in the Telecom Italia Group. In fact, the company is the Group's main partner in the creation and development of telecommunications network operating processes and support systems for marketing activities. In addition to consolidating its position on the national market, the company strengthened its presence in South America, Spain and Greece, in keeping with the Group's expansion strategies.
The production value in 2000 (Lire 832 billion) increased compared to 1999 (Lire 779 billion); the operating income was down (from Lire 40 billion to Lire 38 billion) and this was also reflected in the net income (which fell from Lire 17 billion to Lire 11 billion).
At December 31, 2000, employees numbered 1,726 (1,554 at the end of 1999).
On March 1, 2001, Telesoft received, from Telecom Italia, the "Development" business segment which is devoted to developing information systems and creating applications software, with 619 employees and, from Finsiel, the "Telecommunications" business segment, with 234 employees.

Sodalia is active in developing software systems of the new generation, to support network management and telecommunications services. The quality of its production, confirmed by the award of ISO 9001 certification and by "level 3-CMM" (Capability Maturity Model) of the Software Engineering Institute, has strengthened its role as the strategic supplier to Verizon (formerly Bell Atlantic) and Telecom Italia.
The production value (Lire 47 billion) was virtually unchanged compared to 1999, despite the fact that, in 2000, grants formerly received from the Province of Trento were no longer forthcoming. The operating income (Lire 6 billion) grew principally as a result of the reduction in consumption; the net income (Lire 0.7 billion) on the other hand, was unchanged compared to 1999.
At December 31, 2000, employees numbered 318 (compared to 303 at the end of 1999).

■ RESEARCH AND DEVELOPMENT

In 2000, the **Finsiel** group devoted 174 years/person to research; the parent company, Finsiel S.p.A., on the other hand, devoted 25 years/person. The main areas of activity were telematic systems for monitoring and tutoring in large training projects; online territorial services that can be accessed through the Public Administration; the development of platforms for multi-channel distribution via the *Internet* or *GSM* of online banking services. In the various areas of the *Internet*, the main initiatives developed were electronic commerce for corporate closed systems, web learning and process improvement.

In 2000, **Telesoft** continued with the activities which had been started in the previous years, with the main aim of ensuring that its products keep up with technological evolution. Activities were mainly concentrated on methodologies and architectures, to allow the development, integration and re-engineering of systems that are flexible and can be rapidly applied in projects on behalf of Telecom Italia and TIM; software usability and re-usability, thanks to a laboratory in which the products undergo continuous tests, both during development and after installation; *Internet* and e-commerce, with particular attention to the evolution of web applications.

The activities of **Sodalia** are geared to developing hi-tech software products with special characteristics in terms of modularity, portability, and re-usability, starting, wherever possible, with standardized basic products. This has generated the need to carry out applied research, oriented towards the study and realization of tools and infrastructures which permit the creation of a software "factory", capable of supplying high-quality products at competitive prices, and allowing for further developments in the course of their life cycle. The main sectors of activity once again involved data network management and advanced telecommunications services.

3.6 MANUFACTURING ACTIVITIES

The Telecom Italia Group operates in the manufacturing sector through Italtel. In December, 80.1% of the capital of the company was sold to a group of foreign investors headed by Clayton, Dubilier & Rice and Cisco System. The new stockholder structure is as follows: CD&R, an investment company with considerable experience in turning around companies, 50.1%; Advent International and Brera Capital, companies belonging to the CD&R group, 11.1%; Cisco, 18.9%; Telecom Italia Group, 19.9%. The Group has retained an interest in the company with the aim of developing synergies with its industrial American partner, Cisco, the repercussions of which could find applications in services which Telecom Italia will offer the market.
Only the economic results for the first nine months of the year have been included in the 2000 consolidated financial statements of Telecom Italia Group. The figures cannot, therefore, be compared to those of 1999, a year in which, furthermore, following its reorganization, the results of Italtel were proportionally consolidated at 50% for the first ten months of the year and at 100% for the last two months.

(in billions of lire)	1/1-9/30/2000	Year 1999
Sales and service revenues	1,221	3,114
Gross operating profit	38	10
Operating (loss)	(26)	(115)
Capital expenditures	39	127
Number of employees at end of period	4,892	5,153

In fact, in the second half of 1999, the activities and subsidiaries operating in the sectors of radio, transport and mobile networks were transferred to Siemens; the simultaneous sale by Siemens of 50% of Telsi Ltd. gave Telecom Italia a 100% stake in Italtel. The company has therefore concentrated its activities in the wireline network segment, with

1644

the aim of competing in the offering of switching systems and in the development of innovative solutions for the integration of phone and data by making better use of its specific expertise.
The experience of Italtel in this field, together with that of Cisco in the *Internet* sector and in network hardware, will mean that the potential exists for taking advantage of the commercial opportunities on the horizon and which, as has already been mentioned, the Telecom Italia Group also intends to exploit.

The results of the first nine months show revenues of Lire 1,221 billion, thanks partly to the significant contribution of activities conducted on foreign markets. Industrial operations also show a positive trend; however, the effects of writing down receivables and inventories have affected the operating income.
The number of employees, just like the balance sheet, was not considered for the purposes of the 2000 financial statements of the Telecom Italia Group.

3.7 INSTALLATION ACTIVITIES

In 2000, the Telecom Italia Group operated in the sector through the Sirti group. In November, Telecom Italia accepted the voluntary take-over bid launched by Wiretel on October 4 on 100% of the share capital, handing over all the shares owned (equal to 49.05% of capital) in exchange for a price of Euros 1.502 (Lire 2,910) per share. Wiretel is controlled by a group of companies comprising Stella International, Techint, Interbanca, 21 Investimenti and the venture capital company 3i.
Only the economic results for the first nine months of the year have been included in the 2000 consolidated financial statements of Telecom Italia Group and, therefore, are not comparable to the those of 1999.

(in billions of lire)	1/1-9/30/2000	Year 1999
Sales and service revenues	1,165	1,501
Gross operating profit	107	123
Operating income	20	76
Capital expenditures	29	81
Number of employees at end of period	11,775	12,704

In the Italian market, which was characterized by constant growth in data services and the *Internet*, the investments made by Telecom Italia have decreased; however, the evolution of the strategies and business models of other operators led to a marked increase in the demand for the installation of fixed and mobile networks from Sirti.
Foreign activities – with the exception of Brazil – showed comforting signs of recovery, which were accompanied by a general improvement in margins.
In the main European countries, business was affected by the persisting weakness in the demand from some traditional operators. However, significant new opportunities arose as a result of the investment programs of the new network and services operators, which favored an expansion of business in almost all the European subsidiaries. Particularly positive results were achieved in Spain and France, while the performance of the German and British subsidiaries also improved.

In Latin America, emphasis must be given to the results achieved in Argentina, where production in the first nine months of 2000 almost doubled compared to that of the same period in 1999, with a marked increase in operational profitability. In Brazil, on the other hand, the trend in operations of Construtel was affected by the unfavorable market conditions, which can be attributed both to the economic crisis affecting the country and the increase in competition, which led to a generalized fall in prices.
Although Sirti is no longer in the Group, Telecom Italia committed itself to maintaining commercial relations with the company, agreed in terms of price and duration, in the field of network installation and maintenance.

The first nine months of 2000 showed an increase in the production value (Lire 1,405 billion) and the gross operating profit, reflecting a general improvement in the operating conditions of the Group. The fall in capital expenditures, on the other hand, can be connected to the completion of the restructuring plan during 1999.
The number of employees, just like the balance sheet, was not considered for the purposes of the 2000 financial statements of the Telecom Italia Group.

3.8 OTHER ACTIVITIES

In 2000, the real estate segment of the Group was reorganized, with the following results:

- the creation of IMMSI S.p.A. (on February 10) following the partial demerger, on a proportional basis, of the real estate and connected activities of Sirti S.p.A., as voted by the extraordinary stockholders' meeting of December 15, 1999; on February 11, 2000 the stock exchange authorized the start of trading of IMMSI shares and the listing of the Sirti shares ex demerger;
- the contribution of the "Grandi Immobili" business segment of Telecom Italia, including the most prestigious properties of the Company, to IM.SER. S.p.A. (on December 1), and the subsequent sale of 60% of this company to Beni Stabili (45%) and Lehman Brothers (15%) Telecom Italia, for this operation, has realized a total cash of 2,7 billion of euro. In particular the real estate portfolio held by IM.SER consist of 581 properties, totalling 3.7 million square meters, divided into:
  - 386 properties, totalling 2.4 million square meters, including telecommunications equipment leased to Telecom Italia under long term leases (21 plus 6 years) at market rates;
  - 195 properties, totalling 1.3 million square meters, mainly leased to Telecom Italia utilizing standard contracts at market rates (6 years plus 6 years).

In 2000, **Emsa** continued to manage part of the Group's real estate assets. Revenues in 2000 amounted to Lire 79 billion, in line with those of 1999 (Lire 80 billion). The net income of Lire 38 billion (compared to a breakeven in 1999) is also due to the sale of a particularly important property during the year. At December 31, 2000, employees numbered 83, compared to 94 at the end of 1999.

1646

The activities conducted by the two financial support companies, **Saiat** and **Softe**, continued during the six months. In particular, Saiat, entrusted with the domestic market, reported a net income of Lire 385 billion compared to Lire 4 billion in 1999 owing to the sale of the investments in Meie and Teleleasing, while Softe, which operates on international markets, posted a net income of Lire 34 million compared to Lire 37 billion in 1999.
As regards sales of participation, in February, Telecom Italia and the Mediobanca group reached an agreement for the sale of a 60% stake in Teleleasing. The sale reduced the Group's holding to 20%, bringing Mediobanca group's investment in Teleleasing to 80%.
In April, Telecom Italia and Unipol Assicurazioni signed an agreement for the sale of the majority interest in Meie group. The agreement ended with the sale of 51.2% of Meie Assicurazioni and 51% of Meie Vita owned by Telecom Italia Group (the remaining 49% stake in Meie Vita is held by Meie Assicurazioni).

Atesia confirmed its leadership position in the Italian market of telemarketing and market research, by consolidating its supporting role for the Group marketing policies, with particular reference to the promotion of new services and *ISDN/ADSL* connections on behalf of Telecom Italia and the numerous initiatives on behalf of TIM. Revenues increased from Lire 98 billion in 1999, to Lire 149 billion in 2000; the net income amounted to Lire 43 billion compared to Lire 25 billion in 1999. At the end of 2000, employees numbered 120, 14 more than at the end of 1999.

Saritel, in keeping with its mission as the "*Internet* factory" of the Group, operated in the management of basic services and platforms and also in the integration of systems and the development of applications, thus contributing to the strengthening of the offering of *Internet* services on the fixed and mobile networks of Telecom Italia and TIM.
In more detail, activities in 2000 focused on supporting the extension of the offering of Telecom Italia for the corporate segment, which saw Saritel occupied in the "Village" services and in the start-up of the "Full Business Company" and "Full Business Management" offerings; the marked growth in Tin.it customers, of which the company managed the services center under an outsourcing arrangement; the installation of operational platforms and hi-tech services for TIM – for which Saritel supervised the integration of networks and systems to carry data and messages through mobile phones (the UNI.TIM service) – and for foreign mobile operators of the Group.
The offering of hi-tech telephony services, which was previously focused on voice messaging services, has gradually been directed towards the supply of "interactive voice response" applications, with significant repercussions on corporate know-how and on revenues; in this context achievements mainly involved the customer care services and unified messaging.
To support its activity, in 2000, two new *Internet* data centers were created with advanced content, capable of hosting a large number of customer servers and on the forefront in Europe, both from the technical point of view and in terms of size.
Revenues in 2000 amounted to Lire 276 billion compared to Lire 188 billion in 1999 (+46.8%); the increase is due mainly to the growth in *Internet* activities. The net income for the year is Lire 6 billion, an improvement compared to the previous year's result of Lire 5 billion.

At December 31, 2000, the company had 500 employees, compared to 384 at the end of 1999. When Tin.it S.p.A. was created on May 1, Saritel contributed the "Content Management" business segment to the new company, which is active in the field of information services and access to database banks for professional people and small and medium-size companies, and which has 10 employees.

In the area of advanced research, **CSELT** (Centro Studi e Laboratori Telecomunicazioni) confirmed its key role in the technological innovation process of the whole Group, in Italy and abroad, on the one hand transforming its knowledge of the most innovative technologies and applications into a competitive advantage for customers, through the timely transfer of the results of research, which is ever-more oriented towards results, and, on the other, identifying new opportunities for business areas that are already established and ways of creating value that can be configured as new business areas. In order to provide a more effective response to the pressures of a competitive context which now extends even to research activities, which are increasingly regarded as business opportunities, on March 1, 2001, Telecom Italia's "Venture Capital" unit, composed of the research and development activities of the Group, was conferred to CSELT, which then changed its name to Telecom Italia Lab.
In 2000, the offering of the Center was diversified into three strategic areas, as follows: "Integration of systems and services", "Development of solutions, products and technologies", and "Consultancy".
In the first area of activity, CSELT contributed firstly to extending the Telecom Italia offering in voice and data services for corporate and for residential clientele; the development of paper-based services was particularly important; the new public telephone services platform on *ISDN*; integrated intranet-extranet solutions based on *IP* to support voice and data services. With regard to mobile services, CSELT created a center for *WAP* services and a multi-access portal for Stet Hellas and, on behalf of TIM, implemented hi-tech solutions for network intelligence, making it possible to supply new services.
Important progress in the second area of activity includes the new "VoxNauta™" platform, which permits vocal surfing on websites using a fixed line or cell phone, the creation of tools to support the provisioning of services in *ADSL* technology, the management of information relating to the testing and operating of products and procedures and the monitoring of operative processes. On February 1, 2000, as a result of the contribution of the business segment "Tecno Voice", the "VoxNauta™" platform was taken over by the joint stock company Loquendo, a company 100%-owned by CSELT.
Finally, as regards consultancy, the following actions are worthy of mention: the assistance offered to national and foreign operators in their dealings with the Regulatory Authorities; the support guaranteed to mobile operators in the *UMTS* (TIM, Telekom Austria, Bouygues Telecom) and DCS 1800 (Is TIM in Turkey) auctions; the activities carried out for the creation of the Group's pan-European *backbone*.
In April, CSELT sold the Optical Technologies Center S.r.l., a wholly owned company to which the Optical Technologies Center business segment had been contributed (in November 1999), consisting of 50 researchers, to Agilent Technologies. The transaction made it possible to exploit an asset composed of human resources, know-how and advanced laboratories, thus concentrating the Center's activities on its core business.
In 2000, CSELT reported revenues of Lire 276 billion compared to Lire 278 billion in 1999; the financial statements closed with a profit of Lire 4 billion, compared to Lire 15 billion in 1999, including the gain from the contribution of the aforementioned business segment).
At December 31, 2000 employees numbered 1,181, compared to 1,149 at the end of 1999.

1648

For **Stream**, 2000 was a year of significant change, both for the company and the pay-TV market. On June 29, the sale was concluded for the stakes held by the Cecchi Gori Group (18%) and SDS (12%) with 50% of each going to Telecom Italia and News Television, which then transferred the entire holding to Sky Global Networks. 50% of the share capital of Stream is therefore currently owned by Telecom Italia and 50% by Sky Global Networks.

During the year, the company changed its commercial offering for both new and existing subscribers although to a different extent in different ways. This was accomplished by significantly enhancing its services. In particular, the rights to seven new channels were acquired and added to the basic offering, including National Geographic (the best-known channel in the world for documentaries), Mt Channel (a highly respected channel of scientific information), Duel and Comedy Life (two of the most prestigious film channels). In addition, it acquired the rights for broadcasting the "Big Brother" television format, the success of which contributed largely to the growth in the number of customers.

The company also gave more coverage to sports by acquiring the television rights to broadcast the matches of Napoli Calcio in Series A, some teams in Series B and C and the "2000-2001 UEFA Champions League" game. In addition, some interactive and *Internet* applications were developed; in December, Stream was thus able to launch its first e-mail service via TV, which can be accessed by means of a decoder.

Commercial initiatives made it possible to considerably increase the number of customers who, at the end of 2000, numbered approximately 670,000, compared to 385,000 at the end of 1999, an increase of 74%. As a result, revenues also increased, reaching Lire 274 billion (+238% compared to 1999). However, the expenses incurred for the acquisition of content, sales assistance and extension of the technical infrastructures correlated to the increase in the number of subscribers led to a deterioration in the results for the year, which closed with a loss of Lire 687 billion, Lire 229 billion (+50%) more than in 1999.

Internet/Media

The Telecom Italia Group operates in the *Internet* sector through **Seat Pagine Gialle**, control of which was acquired (60,17% of ordinary share capital owned by Telecom Italia) in 2000. The entire process started on May 1, when the TIN Business Unit of Telecom Italia was conferred to the new joint-stock company Tin.it, the first step in the merger with Seat which was concluded on November 15 and which created the foremost *Internet* Service Provider in Italy and one of the most important in the world.

Specifically, the Board of Directors of Telecom Italia approved the plan for the industrial and corporate integration of Tin.it and Seat Pagine Gialle on March 15, 2000. The plan called for the following stages:

- contribution to Tin.it S.p.A., with effect from May 1, 2000, of a group of companies composed of the TIN division, the holdings in Esri Italia (49%), Excite Italia (50%) and the operational and advertising management of the official telephone directory of subscribers by Telecom Italia, the holding in Viasat (50%) by Telespazio and the Content Management division by Saritel;
- subsequent partial demerger through a transfer of a portion of the capital of Tin.it S.p.A. (about 8%) to Seat Pagine Gialle, which increased its capital by issuing new ordinary shares to be assigned equally to the ordinary and savings stockholders of Telecom Italia;

- merger by incorporation, with retroactive effective for accounting and tax purposes to May 1, 2000, of Tin.it S.p.A. in Seat Pagine Gialle, which increased its capital by issuing new ordinary shares to Telecom Italia.

The merger between the two companies stems from the desire to create an Italian pole with the infrastructures, the size and the business skills necessary for accelerating the development of the *Internet* market in Italy and to compete with large groups in Europe and the rest of the world.

With reference to *Internet*, in 2000, the Italian market confirmed the extraordinary growth of the prior year: according to a Sirmi survey, during the year, the network was "visited" by more than 10 million Italians. At the end of 2000, Tin.it had reached 4 million registered customers, an increase of 101% compared to December 31, 1999; about 1.5 million customers were acquired in the last month of the year (compared to 0.9 million in December 1999). There was a fall in the number of active paying customers to 524,000 (180,000 less than in December 1999). During the year, telephone traffic for *Internet* access almost doubled compared to 1999 (11.6 billion minutes, compared to 5.9 billion minutes in 1999), thanks partly to the increase in the average time of connection to the network.
In this context, the strategy of Seat was to promote value-added access services and to exploit the synergies between the contents of the Virgilio portal and the other *Internet* products of the Group. To this end, during the year, marketing began for broadband services in *ADSL* technology – capable of supporting an ever more complete offering of online content with high standards of quality and service accessories – through the "always on" *Internet* connection subject to the payment of a fixed monthly fee. At December 31, there were 8,000 active customers. The offering was also enhanced by the web services of the "Easy" and "Village" lines, geared mainly to the world of small and medium-size companies.

In 2000, revenues of the Seat group (whose economic results were not included in the consolidated financial statements of the Group because the legal effects of the merger with Tin.it became effective on November 15) were Lire 2,581 billion; the operating income amounted to Lire 275 billion; the loss attributable to the parent company was Lire 1.7 billion.
At December 31, 2000 employees numbered 7,515.

■ RESEARCH AND DEVELOPMENT

In addition to the activities conducted on behalf of other companies in the Group, which have already been mentioned, in 2000, **CSELT** conducted a certain number of experiments for technological and hi-tech service solutions, in the fields of supplying telephone services on *IP* networks, the access platform for broadband multimedia and interactive services and solutions for optical networking.
In the micro-electronics sector, a "bookcase" of complex circuit functions was planned, oriented towards networking, wireless and multimedia applications; in the multimedia sector a platform was created to distribute news in real time.

1650

Finally, CSELT developed its own new models of innovation and value creation, by starting preparatory initiatives for the development of autonomous business areas in such sectors of excellence as vocal technologies, multimedia and the integration of systems using silicon.
In 2000, R&D expenditures by CSELT were approximately Lire 290 billion, of which almost Lire 200 billion were spent on commissioned activities and more than Lire 90 billion on strategic research activities.

The activities of **Saritel** again focused on technical and market exploration, creating prototypes and experimenting with innovative technologies, with particular attention to the development, implementation and organizational support of services that can be exploited by mobile phones (UNI.TIM, the *WAP* offering, extending the productive capacity of the Short Message Service center).
The achievements of the year (including the extension of SMS to TIM's *TACS* customers in Italy and the development of SMS for Amena in Spain), based on the integration between the technical competence and experience acquired in the provision of services, highlight the value of accumulated know-how, heralding further applications developments.
The commitment to research in 2000 remained virtually unchanged compared to 1999: approximately Lire 2 billion, equal to 12 years/person.

SOCIAL AND ENVIRONMENTAL AWARENESS

1652

With the publication of the "Social and Environmental Report" (based on data from 1999), the Telecom Italia Group wanted to consolidate a practice which would measure precisely the level of satisfaction of its stockholders, identify new aims of excellence and help to spread the culture of sustainability through the simple example of its operations.
"Value" and "sustainability" are the two key words in terms of aims – and principles – which must guide the strategies and conduct of a company that wants to be a protagonist on the market.
The challenge for the future is to interpret "sustainability" as a competitive advantage, enabling the Group to operate efficiently in a stable framework, optimizing the management of risks for future generations.

The primary requirement to improve the competitiveness and remuneration of the capital invested and to gain the confidence of investors generated particular attention for the various internal and external stakeholders, highlighted by the conformity of the performance of Telecom Italia with the strict standards of the Dow Jones Sustainability Group Index, regarded as the definitive index of sustainability on a world scale, for which the company was selected in September 2000.

The Parent Company, firstly, contributed to the development of new technologies in schools, with the creation of the website http://webscuola.tin.it, which is the first virtual community for Italian schools where students and teachers can easily access information, qualified teaching resources and communication tools and interaction online, in an attempt to broaden and test new dynamics of teaching and learning.

Telecom Italia's activities geared to the social sphere include financing the creation of prototypes for the "Domus Aurea Project", a control system for an "intelligent house" aimed at managing a domestic environment that is able to ensure the well-being and safety of the occupant, especially if afflicted by physical/motory disabilities or intellectual limitations, through the control of the various domestic functions (opening and closing doors and windows, operating lighting) and a dedicated safety system (controlling gas leaks, a burglar alarm, tele-emergency help, tele- assistance).

In the field of tele-medicine, TIM, through the mobile network, has made it possible to transmit electro-cardiograms and other vital parameters, for the long-distance management of health emergencies. To encourage the development and spread of this technology, the company has also activated a series of projects which include agreements with leading structures in the area of national health.

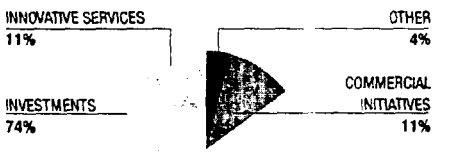
The "Great Jubilee of the Year 2000" involved Telecom Italia in a project which, in addition to supplying hi-tech structures and services devoted to the Holy See, the Nunciatures and Bishops' Conferences all over the world, consisted in creating services for the common good, such as a *"Call Center"* to provide pilgrims with information, a website and additional public telephone structures in places where the Jubilee was being celebrated. During the various events, TIM, as the only mobile operator, made 1,000 speaker phone devices available to the disabled and supplied the health services of the Vatican with sophisticated tele-medicine equipment connected via the *GSM* network, for controls and

emergency cardiac treatment in the Vatican City and in the Roman basilicas involved in the events.

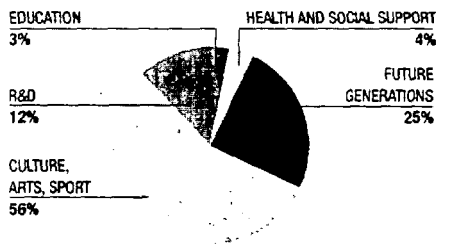
The Group assured its support of cultural events, art exhibitions, concerts and sporting events with a commitment corresponding to 56% of the contribution given to the stakeholders "Community" and "Future generations", which, in 1999, was equal to 1.1% of the consolidated operating income.

SOCIAL AND ENVIRONMENTAL COMMITMENT OF THE TELECOM ITALIA GROUP

141 BILLION LIRE
(London Benchmarking Group model)



(DIVIDED BY AREA)



1654

With regard to the environment, the main indicators of the impact of corporate activities highlighted the sharing of the principle of sustainable development, with explicit reference to safeguarding the rights of future generations. The total consumption of electrical energy was about 1.3% lower than the prior year. This figure, despite a continuous development of the network and the xtension of the offering of services, shows the considerable results achieved with regard to the optimization of consumption.

Telecom Italia has begun to collaborate with the department of "Production Engineering" at the University of Genoa, to identify a program of technical and operational intervention on air conditioning and electrical systems, with the aim of limiting energy consumption, such as: rationalizing the rooms where the energy stations (transformers) are located, introducing electronic controls to start the hydraulic pumps on cooling units, controlling internal and external lighting at industrial sites (with light-sensitive switches and timers), using a system to manage the switching on of cooling units according to necessity.

TIM carried out operational and maintenance work on the power units used in the base transceiver stations not connected to the ENEL network, replacing some of the older units with new apparatus with a low environmental impact and implementing improvements on the others.

The consumption of diesel fuel remained virtually unchanged, while methane consumption, increasingly used to heat offices, increased.

The amount of waste produced was reduced by 10.8%, mainly as a result of the significant efforts made in previous years to remove and replace obsolete apparatus and cables. The ways and techniques used to recover and treat industrial waste showed no change from the prior year, with approximately 80% of the waste being sent to processing plants with the aim of recovering or recycling materials.

In line with the methodological guidelines of the UNI EN ISO 14010-11 standards, Telecom Italia carried out a review to verify the effectiveness of its internal control system over the most significant environmental aspects of the corporate context. It looked at the main factors of environmental impact associated with the operation and maintenance of the telephone network, such as the management of waste, emissions from electro-magnetic fields, noise pollution, the release of emissions into the earth's atmosphere, as well as the aspects relating to the acquisition, management and disposal of dangerous substances and products which are to be introduced in the company.

With regard to safety – with reference to the principles and recommendations in Legislative Decree No. 626/1994 – audits were conducted regarding both the whole range of measures implemented to contain and control risk in the work environment, and specific aspects of particular importance, such as fire prevention and electrical hazards.

Within the framework of the purchasing processes, Telecom Italia has a practice of introducing and updating the technical specifications of products in compliance with international standards ISO Guide 64 (Guide for the inclusion of environmental aspects in product standards), IEC Guide 109 (Environmental aspects – inclusion in electro-

technical product standards) and the main environmental laws in force and, in particular, with Legislative Decree No. 22/1997 and subsequent modifications to the decree. The general aims pursued try to ensure that the products and materials brought into the company are designed, created and supplied in a responsible way from the environmental point of view and that, overall, the specifications issued by Telecom Italia contain technical and environmental requirements recognized by the manufacturers, with the following objectives: to minimize the use of energy and materials in the production phase; to minimize energy consumption and emissions during use; to encourage the use of materials and components which can be renewed and recycled; to minimize the amount of waste produced; to ensure that products/services comply with current laws on safety and safeguarding the environment.

In 2000, work continued to develop an organic management system for purchasing that is compatible with the environment, by integrating existing procedures with the use of innovative management tools, and able to cover most of the goods acquired by the companies in the Group. The aim is to ensure that all the goods and services are created and supplied in a responsible way from the environmental point of view.

All the installations of the Telecom Italia Group operate in full compliance with the national and international laws aimed at protecting the population from risks and dangers to health deriving from radio frequencies. This objective has been achieved and maintained thanks to the accuracy adopted in the design and installation phases, the care taken in the choice of locations and the continuous maintenance and control of the installations involved.

With regard to research in the medical and scientific field, the Group supports research in the field and carries out independent specific research through CSELT, geared, in particular, to identifying the possible consequences on biological systems, of electro-magnetic fields emitting from antennas and mobile telephones. In particular, in order to carry out a far-reaching verification nationwide that the intensity of electric fields (in Volts/m) and density of power emitted (in Watts/square meter) comply with current laws, the procedure of designing and controlling radio systems has been enhanced with a module that is capable of assessing the levels of emissions from radio installations. In this way, even for very large radio centers with numerous antennas, it is possible to identify precisely the global electro-magnetic field levels generated on the surrounding area.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF TELECOM ITALIA GROUP

chapter 5 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS OF TELECOM ITALIA GROUP

The year 2000 was characterized by a number of transactions within the framework of the industrial and corporate reorganization of the Telecom Italia Group. Such transactions had a significant impact on the scope of consolidation with varying degrees of effect on the statement of income and balance sheet.

The consolidated statement of income takes into account the consolidation of the Nortel Inversora group on a proportional basis as from January 1, 2000, the deconsolidation of Teleleasing and Webegg for all of 2000 and the Sirti group and the Italtel group as from October 1, 2000.

In addition to the above-mentioned transactions, the most significant effects on the consolidated balance sheet can be ascribed to the consolidation of the balance sheets of Seat Pagine Gialle, Maxitel, Jet Multimedia groups and the Venezuelan company Digitel. Only the balance sheets of these businesses were consolidated as they were acquired by the Group during the last part of the year.

The contributions of business segments effected by the Parent Company did not have an impact on the consolidated financial statements, as they took place among companies of the Group, except for the contribution of the "Grandi Immobili" business segment to IM.SER, whose controlling interest was later sold to third parties.

Comments on the most significant variations in the statement of income and the balance sheet also give an indication of the changes on a comparable consolidation basis, for purposes of the comparison.

1658

5.1 RESULTS OF OPERATIONS

CONSOLIDATED STATEMENTS OF INCOME

(in billions of lire)		2000	1999	Change Amount	Change %
A.	Sales and service revenues	55,979	52,481	3,498	6.7
	Changes in inventories of work in progress, semifinished and finished goods	54	(127)	181	*
	Changes in inventory of contract work in process	487	341	146	42.8
	Increases in capitalized internal construction costs	1,765	2,056	(291)	(14.2)
	Operating grants	39	39	=	=
B.	Standard production value	58,324	54,790	3,534	6.4
	Raw materials and outside services (*)	(23,234)	(21,531)	(1,703)	7.9
C.	Value added	35,090	33,259	1,831	5.6
	Labor costs (*)	(9,690)	(9,586)	(104)	1.1
D.	Gross operating profit	25,400	23,673	1,727	7.3
	Depreciation and amortization	(10,933)	(10,338)	(595)	5.7
	Other valuation adjustments	(1,017)	(844)	(173)	20.5
	Provisions to reserves for risks and charges	(305)	(195)	(110)	56.4
	Net other income (expense)	34	160	(126)	(78.7)
E.	Operating income	13,179	12,456	723	5.8
	Net investment and financial income (expense) and value adjustments	(3,143)	(1,764)	(1,379)	78.2
F.	Income before extraordinary items and taxes	10,036	10,692	(656)	(6.1)
	Net extraordinary income (expense)	(415)	(981)	566	(57.7)
G.	Income before taxes	9,621	9,711	(90)	(0.9)
	Income taxes	(3,912)	(5,046)	1,134	(22.5)
H.	Net income before minority interest	5,709	4,665	1,044	22.4
	Minority interest	(1,782)	(1,301)	(481)	37.0
I.	Net income	3,927	3,364	563	16.7

(*) Reduced by related cost recoveries.

Results of operations for 2000 showed a consolidated net income of Lire 3,927 billion (Lire 5,709 billion less the minority interest of Lire 1,782 billion), with an increase of Lire 563 billion (+16.7%) compared to 1999.

Positive contributions were made to consolidated net income by the gains on the sale of a part of the real estate properties, the sales of Sirti, 80% of Italtel, the Meie group and Teleleasing, as well as a more favorable tax rate.

The consolidated result, however, was hurt by the deterioration in the balance of financial income and expense on account of the results of the affiliated companies still in the start-up stage, which were impacted by the amortization of goodwill and higher financial expenses connected with higher debt.

1659

The key figures are analyzed in the following paragraphs.

■ *Sales and service revenues* amounted to Lire 55,979 billion in 2000, an increase of 6.7% over 1999 (+1.7% on a comparable consolidation basis).
Revenues, net of the amount due to other telecommunications operators, totaled Lire 50,576 billion and increased by Lire 2,721 billion (+5.7%) compared to 1999. The growth in revenues can be ascribed to the inclusion in the scope of consolidation of Nortel Inversora group (Lire 3,532 billion) that was partly offset by the reduction in revenues of the manufacturing and installations sectors which, in 2000, cover a period of nine months against 12 months in the prior year, in addition to the deconsolidation of Teleleasing.
While mobile telecommunications in Italy and abroad showed a positive performance (+9.7%), revenues from wireline telecommunications services supplied in Italy decreased (-5.9%). Such reduction can be ascribed to the Parent Company, whose revenues from traffic, in spite of an increase of 27.3% in minutes (+Lire 2,273 billion) fell by 13.9%; the average return on traffic, in fact, was Lire 71 per minute compared to Lire 111 in the prior year (-35.8%; -Lire 5,006 billion in revenues). This reduction was partly compensated by the increase in basic subscription charges (+9.9%) following the August 1, 2000 rate changes, the development of data connections and the growing demand for interconnecting services with the Telecom Italia network by other operators.

■ *Raw materials and outside services* totaled Lire 23,234 billion, 7.9% higher than 1999 (+3.1% on a comparable consolidation basis). This increase is connected to the changes in the scope of consolidation (Nortel Inversora group: +Lire 1,335 billion; Sirti group and Italtel group: -Lire 204 billion) and to the increase in the costs of operating and developing mobile telecommunications services. Consumption by the Parent Company, instead, decreased by 7.6% due a general policy to control and reduce costs.
This item includes Lire 1,107 billion of the TLC license fee due to the state administration, of which Lire 603 billion relate to the Parent Company, Lire 359 billion to TIM and Lire 145 billion to foreign subsidiaries.
The percentage of raw materials and outside services to revenues was 41.5% (41% in 1999).

■ *Labor costs*, totaling Lire 9,690 billion, increased by Lire 104 billion compared to 1999 following the changes in the scope of consolidation (Nortel Inversora group: +Lire 541 billion; Sirti group and Italtel group: -Lire 367 billion) compensated by the lower costs of the Parent Company (-Lire 186 billion) essentially due to the reduction in the average number of employees compared to 1999, also on account of the resignations following the cutbacks under the agreements with the labor unions. As a percentage of gross revenues, labor costs fell from 18.3% in 1999 to 17.3% in 2000.

■ *Gross operating profit* of Lire 25,400 billion increased by Lire 1,727 billion, compared to 1999, (+7.3%; +1.5% on a comparable consolidation basis) and represented 45.4% of gross revenues (45.1% in 1999). The increase in the gross operating margin was due to the changes in the scope of consolidation (Nortel Inversora group: Lire 1,746 billion) and the good performance of mobile telecommunications (TIM's gross operating margin rose by Lire 723 billion), which was partly offset by the reduction in the Parent Company's gross operating margin (-Lire 829 billion).

1660

■ *Depreciation and amortization* totaled Lire 10,933 billion (Lire 10,338 billion in 1999), including Lire 2,192 billion for the amortization of intangibles (of which Lire 349 billion relate to goodwill, Lire 198 billion in 1999) and Lire 8,741 billion for the depreciation of fixed assets. The increase is due to the entry of the Nortel Inversora group in the scope of consolidation for Lire 828 billion and higher depreciation and amortization taken by TIM, which was only partly compensated by the decrease in the depreciation and amortization taken by the Parent Company owing to a lower amount of depreciable assets, the change in the mix of depreciable assets, lower depreciation on public telephony installations and *DECT* assets written down in the 1999 financial statements and the adjustment of depreciation rates relating to the submarine network in the 2000 financial statements.

■ *Other valuation adjustments* of Lire 1,017 billion increased by Lire 173 billion compared to 1999 and mainly refer to the writedowns to reduce receivables from customers to their estimated realizable value. Of the total, Lire 370 billion refer to the Parent Company, Lire 162 billion to Nortel Inversora group, Lire 123 billion to TIM, Lire 115 billion to Tele Nordeste Celular Participacoes and Lire 62 billion to Tele Celular Sul Participacoes.

■ *Provisions to reserves for risks and charges*, amounting to Lire 305 billion, increased by Lire 110 billion, of which Lire 22 billion are for the inclusion in the scope of consolidation of Nortel Inversora group and Lire 47 billion for higher provisions by TIM and the Parent Company.

■ *Net other income (expense)* showed an income balance of Lire 34 billion (Lire 160 billion in 1999) and basically refers to fees charged by the telecommunications companies to customers for late payment of telephone bills (Lire 213 billion), the portion of capital grants credited to income during the year (Lire 139 billion), indirect duties and taxes (Lire 270 billion), together with other income and expense in the normal course of business.

■ *Operating income* of Lire 13,179 billion (Lire 12,456 billion in 1999) increased by Lire 723 billion compared to 1999, (+5.8%; +1.2% on a comparable consolidation basis); operating income represents 23.5% as a percentage of gross revenues compared to 23.7% in 1999. The increase in operating income is mainly attributable to the Nortel Inversora group (Lire 726 billion) and the good results of TIM (whose operating income increased by Lire 423 billion), partly reduced by the lower operating income of the Parent Company (-Lire 110 billion).

■ *Net investment and financial income (expense) and value adjustments* showed an expense balance of Lire 3,143 billion which comprises the following:

- value adjustments to financial assets show a negative balance of Lire 2,243 billion (Lire 1,131 billion in 1999). They mainly refer to the Group's share of the income and losses of the unconsolidated companies valued using the equity method, which also includes the amortization of goodwill upon the purchase of these investments (Lire 877 billion; Lire 356 billion in 1999). The increase in the balance is mainly due to the losses of some subsidiaries (in particular, Telekom Austria – owing to the extraordinary expenses incurred for the corporate reorganization - Maxitel and Stream) and the amortization of goodwill on the purchase of the investment in Seat Pagine Gialle (Lire 423 billion). The total also includes writedowns to adjust the value of the shares of listed subsidiaries carried in current assets to market price at the end of the year for a total of Lire 259 billion;

1661

- net investment income (expense) showed an income balance of Lire 585 billion (Lire 277 billion in 1999) essentially in relation to dividends received from unconsolidated subsidiaries and affiliated companies (Lire 273 billion) and net gains on the sale of listed securities carried in current assets (Lire 312 billion);
- net financial income (expense) of Lire 1,485 billion (-Lire 910 billion in 1999). The higher expense balance is primarily attributable to the financial expenses of the Nortel Inversora group (Lire 297 billion) and the higher net expense balance of the Parent Company.

■ *Net extraordinary income (expense)* showed an expense balance of Lire 415 billion (-Lire 981 billion in 1999), including Lire 2,676 billion of income and Lire 3,091 billion of expense.
Extraordinary income includes:

- gains deriving from the Group's divestiture policy (Lire 1,877 billion) referring to the sale of 80% of Italtel group (Lire 760 billion), Meie group (Lire 450 billion), Teleleasing (Lire 41 billion) and Sirti group (Lire 22 billion) and the sale of the "Grandi Immobili" business segment by the Parent Company through the sale of 60% IM.SER (Lire 604 billion) to third parties;
- gains from the sale of other investment holdings, intangibles, fixed assets and business segments (Lire 342 billion) of which Lire 107 billion are from the sale of the investment in Bharti group;
- income (Lire 91 billion) representing lower previous taxes for TIM following the application of the official interpretations concerning the so-called Visco tax benefits.

Extraordinary expense comprises:

- restructuring expenses for Lire 953 billion, of which Lire 884 billion refer to the Parent Company in respect of the costs of the corporate reorganization plan;
- social security charges pursuant to Law No. 58/92 to guarantee uniform status under the former Telephone Employees Pension Fund (FPT) which, as required by the 2000 Finance Bill, has become part of the general "Employees Pension Fund" as from January 1 for Lire 297 billion and an extraordinary annual contribution of Lire 150 billion to INPS as established by the same Bill for the three years 2000 - 2002 to meet the higher financial requirements covered by the rules of the fund that was abolished;
- provision by TIM to the reserve for technological risk and the reserve for the costs to liberalize frequencies for Lire 812 billion;
- expenses and provisions connected to the transactions for the disposal of investment holdings and the reorganization of the Group for Lire 349 billion;
- Lire 78 billion for the fine imposed on TIM and Omnitel Pronto Italia by the Antitrust Authority for the alleged violation of rules against price-fixing; this figure is equal to an amount in excess of that recorded in the reserve for risks by TIM in the December 31, 1999 financial statements (Lire 22 billion).

■ *Income taxes* amount to Lire 3,912 billion, of which Lire 215 billion are due to the consolidation of the Nortel Inversora group.
Income taxes represented 40.7% as percentage of income before income taxes in 2000 compared to 52% in 1999. The reduction from 1999 is principally the result of the tax benefits on investments utilized by TIM and the taxation of gains from the sale of investments and the contribution of the business segment "Grandi Immobili" by the Parent Company to IM.SER using the substitute equalization tax. The tax rate was also affected by the release of deferred taxes by the Parent Company consequent to the application of art. 14 of Law 342/2000. Under this law, the "Reserve for accelerated depreciation" was reclassified and the tax expense for the year was reduced by the excess amount of the "reserve for deferred taxes".

1662

5.2 FINANCIAL CONDITION

CONSOLIDATED BALANCE SHEETS

(in billions of lire)		12/31/2000	12/31/1999	Change

		20,835	5,756	15,079
	(G+H)	36,845	15,758	21,087
I.	Total (F+G+H)	86,273	54,069	32,204

(*) Net of "Receivables from stockholders for capital contribution".

1663

The balance sheet of the Telecom Italia Group shows a net invested capital of Lire 86,273 billion (Lire 54,069 billion at December 31, 1999), of which 57.3% is financed by stockholders' equity (70.9% at December 31, 1999) and 42.7% by net borrowings (29.1% at December 31, 1999).

■ *Intangibles, fixed assets and long-term investments* of Lire 93,207 billion show an increase of Lire 29,173 billion compared to December 31, 1999.
"Intangible assets" amount to Lire 31,052 billion; the main changes during the year were as follows:

(in billions of lire)	2000	1999
At January 1, 2000	5,299	3,647
– additions	25,402	3,057
– disposals	(23)	(98)
– amortization	(2,192)	(1,913)
– writedowns	(70)	(7)
– change in scope of consolidation	2,646	692
– other	(10)	(79)
At December 31, 2000	31,052	5,299

Additions include goodwill deriving from the acquisition of subsidiaries for Lire 17,637 billion and mainly refer to the following transactions:
- acquisition of controlling interest in Seat Pagine Gialle (Lire 13,159 billion);
- acquisition of controlling interest, through 9 Telecom Reseau, in the Jet Multimedia group and Europe Explorer (Lire 1,381 billion);
- acquisition, by the Parent Company, of 50 million TIM ordinary shares (Lire 1,196 billion);
- acquisition of the controlling interest, through TIM, in Maxitel (Lire 646 billion) and Digitel (Lire 700 billion);
- transactions involving the reorganization of the international telecommunications business (Lire 409 billion).

Additions in 2000 also refer to the cost of the *UMTS* license acquired by TIM (Lire 4,680 billion) and a PCS 1900 license obtained through TIM Perù (Lire 381 billion).
The effect of the changes in the scope of consolidation mainly refers to the inclusion of the Nortel Inversora group (+Lire 931 billion, of which Lire 253 billion refer to the remaining goodwill on the increment in the investment in Nortel Inversora in 1999), Maxitel group (+Lire 1,055 billion) and Seat Pagine Gialle group (+Lire 1,238 billion) and to the exclusion of Italtel and Sirti (-Lire 375 billion, of which Lire 336 billion refer to the residual goodwill for the purchase of 50% of Italtel in 1999).

1664

"Fixed assets" total Lire 45,358 billion; the main changes during the year were as follows:

(in billions of lire)	2000	1999
At January 1, 2000	45,518	45,665
– additions	7,530	7,503
– disposals	(199)	(330)
– sale of "Grandi Immobili" business segment	(4,632)	=
– depreciation	(8,741)	(8,425)
– writedowns	(22)	(138)
– change in scope of consolidation	5,766	1,513
– other	138	(270)
At December 31, 2000	45,358	45,518

Additions remain substantially unchanged compared to the prior year as a result of the combined effect of a reduction in investments by the Parent Company and the inclusion of the Nortel Inversora group (Lire 937 billion).
The increase due to the changes in the scope of consolidation principally refers to the inclusion of the Nortel Inversora group (Lire 5,056 billion), Seat Pagine Gialle group (Lire 340 billion), Maxitel (Lire 734 billion) and Digitel (Lire 207 billion) and to the exclusion of Sirti group (Lire 398 billion) and Italtel group (Lire 336 billion).
