NEWS RELEASE

“ ST. JUDE INTERSECTS 50 METERS OF 3.6 g/t GOLD AT NEW GOULAGOU PROJECT ”

Vancouver, March 5, 2003, St. Jude Resources Ltd. (SJD: TSX.V) is pleased to announce that it has completed 9 RC holes on its new Goulagou property in Burkina Faso. St. Jude can earn up to 90% of the property (subject to a 5% Vendor NPI) while the government maintains its standard 10% interest. The results from the ongoing exploration are as follows:

Hole #	Dip Degrees (-)	Azimuth	Coordinates		From -To (m)	Interval Width (m)	Grade g/t Au

*stopped in mineralization ** stopped before mineralization *** hole lost before 2nd zone

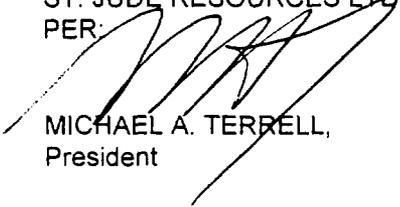

The Goulagou property formed part of a larger land assembly (Somifa) that was operated by Channel Resources Ltd. ("CRL") from 1994 to 2001. CRL carried out extensive exploration on Goulagou including mapping, soil and rock sampling, airborne geophysics as well as 311 drill holes (RAB, RC and core) totalling 17,488 meters. This extensive exploration established two parallel gold zones (GG1 and GG2) with a cumulative strike length of 3.4 kilometers.

The drill holes in the table above were drilled in the proximity of a previous CRL core hole (SO-DDH-3), which returned grades of 2.53 g/t over 22m, 3.33 g/t over 34m and 6.76 g/t over 17m in three parallel zones of mineralization at GG2. Drilling carried out by St. Jude correlates well with the earlier CRL drilling and not only verifies the presence of significant gold mineralization but also indicates the oxide facies extends to 100 meters.

St. Jude's exploration team is extremely encouraged by these drill results and have mobilized an extensive exploration program at the Goulagou property. The Company is optimistic that the 2003 exploration program will confirm the potential of an economically viable gold resource in the area of GG1 and GG2 along the 3.4 kilometers of strike as defined by CRL drilling.

Under the direction of one of the most successful gold exploration teams in West Africa, St. Jude is now actively exploring three major gold projects. With over 318 square kilometers on one of the richest gold belts in the world St. Jude is well positioned to continue growing its gold resource in 2003.
