**10. GOING CONCERN**

The corporation has sustained substantial operating losses in recent years. As shown in the accompanying financial statements, the corporation incurred a net loss of \$ 153,249 during the year ended December 31, 2002 and increases in additional paid in capital during the year of \$ 75,000. The additional paid in capital was needed to fund the loss. These factors create an uncertainty as to the corporation's ability to continue as a going concern. Management believes that actions presently being taken to revise the corporation's operating and financial requirements provide the opportunity for the corporation to continue as a going concern. The ability of the corporation to continue as a going concern is dependent upon the success of the plan and the ability of its shareholders to make additional capital contributions.

**11. NET CAPITAL REQUIREMENTS**

The Corporation is subject to the Securities and Exchange Commission Uniform Net Capital Rule (rule 15c3-1) which requires the maintenance of minimum net capital and requires the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1. At December 31, 2002, the Corporation had net capital and net capital requirements of \$ 53,980 and \$ 5,000 respectively. The Corporation's ratio of aggregate indebtedness to net capital was 1.82:1. The net capital rules may effectively restrict the payment of cash dividends.
