## Sanix Announces Revision of Full-Year Earnings Forecast

Fukuoka, April 8, 2003 – Sanix Inc. (TSE: 4651, TSE/OSE/FSE, President & CEO: Shin-ichi Munemasa) announced that its earnings for the full year ending March 31, 2003 are likely to be below the Company's previous forecast announced on November 5, 2002.

Details of the revision are as follows:

1. Revision to full-year non-consolidated results forecast

(April 1, 2002 - March 31, 2003)

(Millions of Yen)

	Sales	Recurring profit	Net income
Previous forecast (announced November 5, 2002)	58,000	2,500	1,070
Revised forecast	50,292	(2,600)	(3,770)
Difference	(7,708)	(5,100)	(4,840)
Rate of change (%)	(13.3)	-	-
Results from year before	59,180	7,766	4,034

2. Revision to full-year consolidated results forecast

(April 1, 2002 - March 31, 2003)

(Millions of Yen)

	Sales	Recurring profit	Net income
Previous forecast (announced November 5, 2002)	58,440	2,530	1,050
Revised forecast	50,358	(2,570)	(3,800)
Difference	(8,082)	(5,100)	(4,850)
Rate of change (%)	(13.8)	-	-
Results from year before	59,260	7,771	4,005

During the fiscal year ending March 31, 2003, the Home Sanitation division made efforts to reinforce its ability to attract new customers and to provide existing customers with more meticulous maintenance services. When the previous forecast was announced in November 2002, the management anticipated earnings taking into consideration the effects of prolonged reformation of the HS division's sales force and a drop in Home

Reinforcement System sales. However, the sales drop of the product was more than the estimate. In addition, media focus on illegal business practices conducted by other companies adversely affected Sanix's business causing reduced sales of Under-floor and Under-roof Ventilation. On the other hand, the Establishment Sanitation division and Environmental Resources Development division maintained strong business activities.

Though the Company made efforts in reducing costs, sluggish sales in the HS division were the primary factor in the downward revision of the Company's full-year non-consolidated and consolidated earnings forecasts. Consequently, Sanix expects to post net losses for the full year ending March 31, 2003.

In the ERD division, the Tomakomai electric power plant starts full-scale operations during the fiscal year ending March 2004. The electric power plant uses fuel made from plastic recycled at its plastic resources development plants. The Company will reserve allowances for storage and transportation costs needed for processed plastic fuel stocked as of the end of March 2003. As for the costs related to fuel stocked prior to March 31, 2002, Sanix will recognize approximately 700 million yen as extraordinary losses.

Sanix revised its full-year consolidated earnings forecast following a revision of its full-year non-consolidated earnings forecast.

About Sanix – Sanix is Japan's leading provider of sanitation and environmental services. The company's business is divided into three areas; Home Sanitation, and Establishment Sanitation, which provide pest control and sanitation maintenance and protection services for offices and public facilities. The Environmental Resources Development Division provides industrial waste management solutions and recycling services. This division positions Sanix as a leading provider of environmental services to society, which is becoming increasingly concerned about the health of the environment. Sanix's long experience in industrial waste management means the company is poised to take the lead in this new field.
