## Studsvik Divests Shares in Associated Company

Studsvik's wholly-owned subsidiary, Stensand Specialserviceföretaget AB is selling its stake in MSI, Marieholm Industrierengöring AB to Skanska Miab. MSI will thereby become a wholly-owned subsidiary of Skanska Miab. In connection with the transfer of ownership, Skanska Miab will take over two service contracts from Stensand. In 2002, the Studsvik Group reported SEK 9 million in net sales from these operations.

MSI, which was founded at the beginning of 2000 by Stensand and Skanska Miab, provides repair and maintenance services to the automotive industry in Sweden, with Stensand and Skanska Miab as sub-contractors. In 2003, MSI also established business in Belgium.

"MSI has developed favorably. However, the strong business development in Belgium means that its operations are now outside the scope of our strategic business. Therefore, it is natural for us to divest our stake in MSI in order to concentrate fully on our operations in Sweden where specialist services to the automotive industry continue to be vital," says Jan Bjerler, President, Stensand.
