NOTE 1 BASIS OF PRESENTATION

The interim period financial statements have been prepared in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the annual financial statements. These interim period statements should be read together with the audited financial statements and the accompanying notes included in the Company's latest annual report.

NOTE 2 COMPARATIVE FIGURES

Certain figures presented for comparative purposes have been reclassified to conform with the current year presentation.

June 11, 2003	Consultant	Marilyn Element	Common	Options	256,550	0.105	May 16, 2005
Summary of stock options outstanding for the period are					187,000		

4.0 Summary of securities as at the end of the period:
 a) Authorised capital: 100,000,000 common shares without par value
 b) Shares issued: 14,777,740 common shares without par value (June 11, 2003)
 c) Summary of options, warrants and convertible securities outstanding:

Type	Number of Shares	Exercise Price (\$)	Expiry Date
Options	60,000	0.100	December 08, 2004
Options	260,000	0.180	December 11, 2006
Options	374,620	0.180	July 03, 2006
Options	65,000	0.100	February 28, 2007
Options	50,000	0.135	May 07, 2007
Options	210,380	0.120	June 12, 2007
Options	59,9450	0.105	May 16, 2008
Options	256,550	0.105	May 16, 2008
Warrants	1,000,000	0.170	July 08, 2004
Warrants	900,000	0.110	June 04, 2004
Warrants	1,000,000	0.140	June 10, 2005
Convertible Securities	Nil		

The number of options outstanding are 1,870,000 common shares.
 The number of warrants outstanding are 2,900,000 common shares.
 The number of convertible securities outstanding are nil common shares.

d) Number of common shares held in escrow: Nil
 e) Number of common shares subject to pooling: Nil

6.0 List of Officers:
 Chief Executive Officer (CEO), Leonard W. Saleken
 President, Leonard W. Saleken
 Chief Financial Officer (CFO), Edwin R. Rockel
 Secretary, Graham H. Scott

SCHEDULE C: MANAGEMENT DISCUSSION AND ANALYSIS
0 CORPORATE BUSINESS

Goldcliff Resource Corporation is a mineral exploration and development company. It has three projects located in the Province of British Columbia, Canada and one project located in the Province of Quebec, Canada. The principle active project for 2003 is the Hedley Gold Basin Project, Panorama Ridge property that is located in the Hedley Gold Basin, Nickel Plate mining district, Hedley, British Columbia. The other two projects in British Columbia, the Cliff and Meadow Creek, are on a hold basis. These projects are being held and evaluated subject to market conditions and available funds. At present, no significant funds are currently being expended on them. The one project in the Province of Quebec is a diamond property located in the Olish Mountains in north central Quebec. Exploration activity and expenditures in Quebec for 2003 are contingent on competitor activity.

1.0 PROJECTS

1.1 BRITISH COLUMBIA (GOLD, SILVER, COPPER)

The principle active project for 2002 is the **Panorama Ridge Property** that is located in Hedley Gold Basin Nickel Plate mining district, Hedley, British Columbia. The other two projects in British Columbia, the Cliff (Au, Ag, Cu) and Meadow Creek (Au, Ag) are on a hold basis. These projects are being held and evaluated subject to market conditions and available funds. The diamond project is located in the Olish Mountains of north central Quebec.

The Panorama Ridge gold property consists of 4000 hectares is located 320 kilometres east of Vancouver, British Columbia, Canada, 40 kilometres north of the state of Washington's US border and six kilometres east of Hedley, in the Hedley Gold Basin, southern British Columbia. The Panorama Ridge gold skarn property is situated 3.5 kilometres east of the world-class gold skarn producing Nickel Plate mine (2.5 million ounces gold). The property is owned 100 per cent and operated by Goldcliff Resource Corporation and consists of 2,550 hectares in the Osoyos Mining Division, British Columbia, Canada. The mining infrastructure on the Panorama Ridge property is in place with roads, water sources, communication lines and electrical power. Goldcliff's exploration on Panorama Ridge has identified several gold skarn prospects that are associated with two exploration gold targets of world-class size. The Epic and Panorama gold targets are geologically similar to the Nickel Plate gold skarn mined deposits in size and potential gold values. The 2002 exploration program estimated drill targets for the 2003 exploration program.

The **Meadow Creek Property** consists of 1,490 hectares and is located 230 kilometres north east of Vancouver and 40 kilometres north of Merritt in southern British Columbia and contains two promising gold and silver prospects. The Plug prospect occurs in a quartz-sericite-chlorite schist within Nicola Group volcanic rocks. At the Plug main zone mineralization is 14.5 metres long and 1.70 metres wide (average true width) and contains gold and silver values ranging from 1.14 to 20.78 g/t Au and 13.2 to 113 g/t Ag along with anomalous As (90 ppm), Cu (116 ppm), Pb (15 ppm) and Zn (15 ppm). The best mineralized drill intersection is 3.5 metres containing 2.83 g/t Au and 37.7 g/t Ag.

The **Cliff Project** is located 15 kilometres east of the Panorama Ridge property, Ojala, BC and covers an area of 1600 hectares in the Osoyos Mining Division. The Ojala Gold camp is a historical gold and base metal district which is located 15 kilometres SE of the famous Nickel Plate gold camp. The gold mineralization in the camp is related to structural features containing quartz veins (Sweetner, Sunrise, Shepherd and Cliff veins), quartz breccia (Powder breccia) and quartz-carbonate veins (Something Good, Valley zone). Gold-copper mineralization occurs at the Copper King (skarn) and at the Lee zone (porphyry).

The **Powder Breccia zone** is a silica-pyrite breccia zone. Four core drill holes (1962) intersected the zone at a depth of approximately 90 metres. The significant intercepts are (ounces per ton): 12.0 metres of 0.06 ounces (including 1.6 metres of 0.17 ounces), 10.8 metres of 0.11 ounces (including 2.5 metres of 0.330 ounces), 2.4 metres of 0.14 ounces and 1.6 metre of 0.06 ounces.

The Lee Zone is a porphyry gold-copper prospect with gold and copper values associated with an altered, feldspar-hornblende porphyry stock. The intrusive is poorly exposed, bleached, weakly clay altered and fractured. The anomalous rock samples range from 100 to 974 ppb gold and 500 to 700 ppm copper. The soil geochemical anomaly covers an area of 1800 metres.

The **Something Good shear zone** is a three metre wide, quartz-carbonate brecciated vein structure. The zone was chip sampled across 2.95 metres and returned the following gold values (grams per tonne): 2.54 grams (1.25 metres), 21.98 grams (0.85 metres) and 16.35 grams (0.85 metres). The geochemical anomaly extends the Something Good zone to the west for over 600 metres.

2.2 QUEBEC (DIAMONDS)

In the Olish Mountains diamond play, Goldcliff's **Olish Diamond Project** has positioned the Company to take advantage of the diamond exploration opportunities in Canada. Goldcliff Resource Corporation has an option to purchase a 100-per-cent beneficial interest in 32 cells (1600 hectares) located on NTS sheet 33A04, ranges 4 through 8, columns 5 through 15, located in the Olish Mountains of Northern Quebec in consideration of \$15,000 and 100,000 common shares in the first year and additional cash payments of \$30,000 for the next two following years.

The mineral lands are located in the Arctean craton of the Superior Province in the Olish Mountains region (NTS-33A) where six kimberlites have been discovered and drilled by Ashton Mining of Canada Inc and its joint venture partner, SOQUEM Inc. Ashton has reported (April 9, 2002) that two of the six kimberlites are diamondiferous (Renard 1 & 2).

Goldcliff's mineral lands in the Olish Mountains of Quebec are well positioned to take advantage of competitor kimberlite diamondiferous discoveries by Ashton Mining of Canada Inc. and Majesco Resources Inc.

2.3 EXPLORATION OVERVIEW

Goldcliff has 7100 hectares (17750 acres) of gold (silver) mineral lands that are directly under its control. In diamonds, the Company has 1600 hectares (4000 acres) under option.

3.0 LIQUIDITY AND SOLVENCY

The Company has approximately \$ 193,500 in cash for exploration and corporate purposes. The Company intends to raise additional funds by way of a private placement and/or short-term offering in 2003.

4.0 SUBSEQUENT EVENTS & MANAGEMENT CHANGES

On June 25, 2003, Edwin R. Rockel, PGeo (Director and Co-founder of Goldcliff) was appointed Chief Financial Officer (CFO).

5.0 PROMOTIONAL DISCLOSURE

On January 31, 2003, the Company retained the services of Beloud Management Consultants Ltd of Kelowna, BC, for the purposes of market-making activities. Beloud will receive a fee of \$3000 per month for a period of nine months. The contract may be renewed thereafter with the consent of both parties. There are no performance factors contained in the agreement. Beloud Management is owned by Lorne Beloud, a chartered accountant, with many years of market experience.

The rules of the Toronto Venture Exchange, Policy 3.4, define market-making activities in part as: "Proper market-making activities corrects temporary imbalances in the supply of and demand for an issuer's securities. The market should be allowed to rise and fall naturally, with the market-making activity operating primarily to smooth out these imbalances and facilitate an orderly market. Although a Person involved in market-making is not expected to ignore his or her economic self-interest or be precluded from also holding securities for investment purposes, he or she should normally be selling into a rising market and buying into a falling market. If the price stabilizes and there are sufficient buyers and sellers on both sides of the market, market-making activities should generally not occur at a level which materially affects the market."

On May 12, 2003, Martyn Element & Associates Corporate & Project Finance Limited were retained by Goldcliff as an independent contractor to provide corporate advisory services to the company. The initial term of the engagement shall be for a period of six months at a monthly fee of \$7500 plus expenses. A finders fee will be paid to Element for facilitating the completion of an equity financing involving registrants. Martyn Element has been granted incentive stock options of 256,550 common shares of Goldcliff at an exercise price of \$0.105 for two years, expiring May 16, 2005.

Timely disclosure of information is being disseminated through news releases and designated media outlets (Canada Stockwatch (Canjex Publishing Ltd.) and Market News Publishing Inc). Timely disclosure of information is being maintained with news releases and website updates (www.goldcliff.com).
