Great Quest Announces Pre-Drill Program on the Bourdala Concessions

VANCOUVER, BC -- Willis W. Osborne, President of Great Quest Metals Ltd. (the "Company") (TSX Venture Exchange GQ), is pleased to announce a pre-drill program on the Bourdala concessions, located 45 km southeast of the Sadiola Mine in western Mali, West Africa. The focus of exploration, consisting of geological mapping, soil sampling and pitting, will be to further define the Bourdala Sud-Ouest and the Niaragui zones. The program is expected to start in two weeks.

Diamond drilling on the Bourdala Sud-Ouest zone in late 2002 intersected 10 metres of 3.92 g/t gold and 5 m of 8.63 g/t gold in Hole 06. In the spring of this year a program extended this zone for 475 m through the mapping of an area of orpillage, or hand pits dug by local miners, and sampling. There is evidence that this zone could extend north-northeast a further 1070 metres. The summer program will attempt to confirm this extension through pitting and sampling.

This spring a pitting and sampling program was completed on part of the Niaragui concession. A zone of gold mineralization was discovered with a very high-grade core. It was defined for only 40 m. Three samples, taken from the bottom of separate pits, assayed 23, 57, and 77 g/t gold. The quartz in the 77 g/t sample was removed before the sample was assayed. Many of the quartz fragments that were removed show visible gold. The summer's program will consist of further pitting, geological mapping and soil sampling to attempt to extend this zone before drilling.

Drilling this autumn will concentrate on the Bourdala Sud-Ouest and Niaragui zones and the TD area. Hole TD-02, the best hole in the TD area, intersected 5.5 m of 2.91 g/t gold and 7 m of 4.24 g/t gold.

ON BEHALF OF THE BOARD OF DIRECTORS
