Flughafen Wien AG:

Growth trend continues with good traffic development in July.

The upward trend that began in June 2003 continued into July with solid growth in the number of passengers. A total of 1,282,015 passengers were handled during this month, for an increase of 6.0% over July of the prior year. Flight movements were 3.9% higher for the period, and maximum take-off weight rose by 3.3%. With modest growth of 0.9%, the development of transfer passengers fell somewhat below expectations. As a result of general economic conditions and the summer season, cargo volume increased by only 0.6%.

Scheduled traffic showed differing developments by region. Higher levels were recorded in flights within Europe (+7.0%) and to North America (+8.2%), but recovery in traffic to the Far East (-7.1%) and Near and Middle East (-9.0%) is still slow.

From January to July 2003, the number of passengers rose by 3.6%, flight movements increased by 4.5% and maximum take-off weight (MTOW) showed a plus of 5.5%. The number of transfer passengers increased by 1.1%, and cargo volume was 10.3% higher.
