There has been no revision to the solvency margin ratios for Taiyo and Daido.

Others	1,641	1,641

Notes: 1. The above ratio is calculated in accordance with Articles 86, 87, 161, 162 and 190 of the ministerial ordinance for Insurance Business Law as well as Announcement No. 50 issued by the Ministry of Finance in 1996.

2. Equity represents equity on the balance sheet less net unrealized gains on securities.

## 3. Reasons for Revision:

In the "Total risk" amount, there was a calculation error in the "Amount equivalent to market risk", the "Amount equivalent to credit risk" and the "Amount equivalent to risk from derivative transactions", all included in the "Investment risk" (R<sub>3</sub> above).

With respect to investment trusts, there was an error in the amount included of one investment trust in the calculation of the relevant portion of total investment trusts to be treated as subject to risk. A revision was made based on the correct amount and the division of investments so that the "Amount equivalent to market risk", the "Amount equivalent to credit risk" and the "Amount equivalent to risk from derivative transactions" were adjusted.

As a result, the "Investment risk" was adjusted to 2,764 million yen from 2,756 million yen (an increase of 8 million yen).
