33. Description of the Issuer's basic activities.

Industry general development in the second quarter of 2003

Favourable oil prices made much of a contribution to further development of oil industry. Brent prices rose by 4% to 26.11 USD/bbl while Urals (Med) prices rose by 3% to 24.11 USD/bbl, as compared with the same period of the previous year.

The Russian fuel-energy complex produced 102.91 million tons of oil, an 11% increase against the same period of 2002.

In April-June oil supplies to Russian refineries grew by 28% against the same period of 2002 and totaled 58.54 million tons with initial oil processing at Russian refineries increasing by 1.5% against April-June of 2002 and amounting to 46.59 million tons of oil.

As compared with the second quarter of 2002, overall gas production in Russia rose by 3.8% to 148.29 billion cubic meters as a result of a considerable rise in oil companies' gas production.

OJSC "Surgutneftegas" produced 13.3 million tons of oil and 3.4 billion cubic meters of gas, an 11% and 10% increase respectively. The Company's share in domestic oil and gas production amounted to 13% and 2% correspondingly.

Increase in the Company's production was mainly due to plans to bring new fields into service; the plans entailed boosting drilling operations and putting new oil wells into production. Compared to the first quarter of 2002,

the Company drilled 785 thousand meters, a 5.5% increase, and put onstream 244 new wells.

"KINEF" Ltd, the Company's refinery, processed 3.8 million tons of crude materials. In terms of volumes of oil processed the refinery maintains the lead among other Russian refineries.

The future of the industry will depend on a number of both internal and external factors: changes in the revenue code of the RF, global and domestic oil prices, higher tariffs on industrial pumping, oil export restrictions, political stability in major oil consumer countries.

Basic activities and their share in total revenue.

Basic activities of the Company include oil production and sales of oil and oil products. Table 1 shows the Company's revenue from oil production for three financial years prior to the year of the reporting quarter and for the second quarter of 2003.

Table 1

Basic activities of OJSC "Surgutneftegas"	Share in total revenue (sales proceeds), (%)					
	2000	2001	4Q2002	2002	1Q2003	2Q2003
Sales of oil and oil products	96.0	92.7	93.3	93.5	93.5	91.9

The types of products bringing over 10% of the Company's revenue during 2000 – 2002 and during the first and second quarters of 2003 are oil and oil products including those being exported.

Sources of raw materials, materials and services

In the quarter under review, a supplier providing more than 10% of overall material assets delivered is CJSC "Torgovy Dom Trubnaya Metallurgicheskaya Kompaniya" ("Trading House Pipe Metallurgical Company"), its share amounts to 10.93%.

In the second quarter of 2003, import content in the total material assets delivered to the Issuer was 21.58%.

Financial position of the Company allows ensuring the future availability to OJSC "Surgutneftegas" of sourcing for material assets.

Marketing outlets for the Issuers' products (work, services)

There are no consumers whose share in the Company's total sales proceeds during the second quarter of 2003 amounted to more than 10%.

Among the major negative factors that can affect the future efficiency of the Company's sales are possible tightening of tax policy, higher tariffs on industrial oil and oil products pumping, higher export tariffs on oil and oil products, and a possible fall in oil prices.

Reserves activities

At present, the working capital policy of the Company focuses on:

- lower portion of current assets included in the settlements with consumers;**
- constant analysis and control over collection of receivables;**
- asset liquidity valuation;**
- analysis and control over asset turnover.**

The inventory turnover ratio is calculated according to the procedure approved by the Ministry of Economics of the Russian Federation No. VK 477 dated June 21, 1994.

The inventory turnover ratio is calculated as a ratio of sales proceeds to the period average of inventory reserves value.

$$\text{Inventory turnover ratio} = \frac{\text{Sales proceeds}}{\text{Average value of inventory reserves}}$$

The inventory turnover ratio for 2Q2003 = 2.37

Seasonal nature of activities

OJSC "Surgutneftegas" activities are not of a seasonal nature.

The major competitors

The Company sells its oil and oil products at the domestic market and also to the CIS and non-CIS countries. The Company's competitive power is largely influenced by the location of other oil companies' refineries and marketing outlets, this makes a list of the Company's major competitors.

34. Investment declaration. The description of the Issuer's activities. Solely presented by investment funds

35. Plans of the Issuer's future activities.

In 2003 the Company is planning to further develop all spheres of its activity, that is oil and gas production, oil refining, gas processing, and oil products marketing.

The Company plans to increase its crude output up to 52.9 million tons, and gas production is to reach 13.6 billion cubic meters. We will continue to expand our resource base through both exploration of licensed fields and acquisition of new oil and gas sites. The Company intends to bring 3 new oil fields on stream in 2003.

On oil refining side, the Company will upgrade its refinery, Limited Liability Company "PA "Kirishinefteorgsintez." During the current year we will continue construction of the hydrocracking complex.

The Company's plans also include modernization of the gas processing complex and construction of the third line of the gas treatment plant, which will allow us to produce additional 6 to 7 billion cubic meters per year.
