NEWS RELEASE

10 September 2003

1:30pm (WST)

NORTH WEST SHELF VENTURE CONTINUES BUSINESS RELATIONSHIP WITH KANSAI ELECTRIC

The North West Shelf Venture LNG Sellers today signed a heads of agreement with The Kansai Electric Power Company, Inc., for long-term LNG supply.

The agreement is for the supply and purchase of 0.5 million tonnes of LNG a year between 2009 and 2014 and 0.925 million tonnes of LNG a year between 2015 and 2023.

Kansai Electric is an existing customer of the North West Shelf Venture and signed an LNG sale and purchase agreement with the NWS LNG Sellers in 1985 for 1.13 million tonnes of LNG a year for 20 years, starting in 1989.

North West Shelf Australia LNG President John Banner, said the Venture was delighted to continue its business relationship with Kansai Electric.

"We are very pleased that Kansai Electric has chosen LNG from the North West Shelf Venture to meet its future energy needs," Mr Banner said.

"Kansai Electric was one of our first LNG customers and over the past 14 years its support and commitment has helped us to become Australia's biggest resource development. We look forward to further strengthening our valued relationship in the years ahead."

The Kansai Electric Power Company is Japan's second biggest power company and provides electricity to 13 million customers in Japan's Kansai region. The utility has a generating capacity of about 35,000 megawatts, which is produced by three nuclear plants, 13 fossil-fuelled plants, and 145 hydroelectric plants.

North West Shelf Australia LNG provides LNG marketing services to the North West Shelf Venture, which is operated by Woodside Energy Ltd.

Mr Banner added that the North West Shelf Venture recently reached a major milestone in delivering its 1500th cargo of LNG to Japan, demonstrating the project's excellent reputation as a reliable producer and supplier of LNG.

The six equal participants in the North West Shelf Venture are: Woodside Energy Ltd.; BHP Billiton Petroleum (North West Shelf) Pty Ltd; BP Developments Australia Pty Ltd; ChevronTexaco Australia Pty Ltd; Japan Australia LNG (MIMI) Pty Ltd; and Shell Development (Australia)

STOCK EXCHANGE RELEASE

**Gulf of Mexico Atwater Valley 574 #2ST1 and ST2
(Neptune-5 Sidetrack 1 and Sidetrack 2 Appraisal Wells)**

Woodside Petroleum Ltd. reports that operations on the Neptune-5 Sidetrack 1 and Sidetrack 2 appraisal wells, in the deepwater Gulf of Mexico, Atwater Valley Block 574, are being concluded. The sidetracks were drilled following positive results in the original Neptune-5 well which encountered a gross oil column of approximately 1,200 feet, with more than 500 feet of net oil pay.

Sidetrack 1 was drilled to a target down-structure from the original Neptune-5 location. The well penetrated an oil water contact and extended the gross oil column by approximately 100 feet. Good reservoir quality sands were encountered and the well was plugged back to enable drilling of a second sidetrack.

Sidetrack 2 was drilled to an up-structure location and encountered a net oil column that Woodside estimates to be approximately 120 feet. The oil recovered was of similar quality to the oil encountered in the original Neptune-5 well. Operations are currently being conducted to temporarily abandon the well as a potential producer in the event that Neptune is shown to be commercially viable.

The temporary abandonment of Sidetrack 2 concludes the current appraisal operations on the Neptune Field. The results of all three wells have been very encouraging and will be integrated with field development studies.

The Neptune discovery is located in the Atwater Foldbelt region of the Central Gulf of Mexico. This area includes the Mad Dog and Atlantis fields, which are currently being developed by other joint ventures.

Woodside Energy (USA) Inc., a wholly owned subsidiary of Woodside Petroleum Ltd., has a 20% working interest in the leases which contain the Neptune Field.

A handwritten signature in black ink, appearing to read 'Karen Lange', is positioned above the typed name.
