Introduction

Mikhail Gorbachev guest speaker
at the opening event in Essen

More than 350 financial experts from all over the world attended the 3rd Capital Market Conference of Hypothekbank in Essen AG in the premises of the 'Messe Essen'. The issues dealt with this year included current trends in securitization, bond market developments, *Pfandbrief* ratings and European monetary policy. As during our previous conferences, we had interesting discussions about the present and future standing of the *Pfandbrief* on the national, European and worldwide capital markets. The conference participants – capital market executives, analysts, research and investment specialists, experts and investors from all over the world – once again benefited from the transfer and sharing of knowledge.

This conference confirmed our belief that the success story of the *Pfandbrief* will continue into the future. Since its foundation, Hypothekbank in Essen AG has been committed to promoting the standing of Jumbo and Global *Pfandbriefe* on the international capital markets. Today, Essen Hyp is one of the biggest German mortgage banks and one of the most active capital market players in Europe. Together with our guests, we succeeded in developing strategies to justify investors' trust in the *Pfandbrief* and to secure its future as a funding instrument with an excellent reputation throughout the world. To sum it up: like the previous Capital Market Conferences, this year's Conference was a complete success.

Gala Dinner/Evening Event

July 12, 2003

Two Tours to Discover the Ruhr Area

Tour I:

Industry and Culture in the Ruhr Area:

During this tour you will experience the cultural diversity of a region which most people think of as a pure industrial area. You will visit the UNESCO World Heritage Site 'Zeche Landschaft Zollverein', a historical coal-mining site, and the 'Gasometer Oberhausen', which now serves as a venue for various exhibitions. Both sites reflect the Ruhr area's transformation into a major cultural center with a unique atmosphere.

Tour II:

About Miners and Cokers:

At the Westphalian Museum of Industry (Westfälisches Industriemuseum) in the historical coal mine 'Zeche Zollern II/IV' you will get an impression of what it was like to work in a coal mine, as you can see mining equipment and work processes in a genuine environment. After your visit you will explore the historical coking plant 'Kokerei Hansa'. This site with its abandoned coke ovens is characterized by a unique combination of industrial heritage and nature regaining its former territory.

Essen – The Ruhr Metropolis

With around 600,000 inhabitants, Essen is the sixth largest city in Germany and the number one city in the Ruhr area, which counts amongst Europe's most important economic and metropolitan regions. The Ruhr area is a region in transition: the heyday of the coal mines and furnaces has passed, and technology, trade and services have become the economic sectors of the future. Numerous former industrial sites were transformed into cultural centers, thus adding to a diversity of cultural activities which is unique in Europe.

Essen's 'Zeche Zollverein', a former coal mine and a site of outstanding architectural merit, was listed as a UNESCO World Heritage Site in 2001. Today this impressive industrial monument, which also hosts the Design Center NRW, is one of the most important cultural centers of the City of Essen. Founded more than 1150 years ago, Essen is older than Berlin or Munich. The city is characterized by its unique architectural treasures, such as the late-romanesque Werden Basilica and Essen Cathedral, the Old Synagogue, the Villa Hgel, former residence of the Krupp dynasty, or the Aalto Theater.

Essen offers a wide range of cultural activities, including the internationally renowned collection of paintings in the Museum Folkwang, the various exhibitions of the 'Kulturstiftung Ruhr' (Cultural Foundation Ruhr) in the Villa Hgel and excellent performances of the Essen Philharmonic Orchestra or the Schauspiel Essen.

In addition to this, the Folkwang College for Music, Theater and Dance enjoys an excellent reputation worldwide.

The University of Essen has become known internationally, not least due to the research carried out at the University Clinic. Furthermore, Essen is an important location for international trade fairs, with more than 12,500 exhibitors and 1.8 million visitors per year from all across the world. Nine of the 100 top German companies in terms of turnover are domiciled in Essen, including, for instance, RWE, RAG, Karstadt-Quelle, Ruhrgas, Hochtief and Deichmann. This reflects Essen's standing as an important business location and 'energy city'.

Institutions with regional and national tasks, such as the 'Kommunalverband Ruhrgebiet' (Association of Ruhr Area Local Authorities), the 'Landesumweltamt' (Environment Agency of the Land North Rhine Westphalia), the 'Stifterverband fr die Deutsche Wissenschaft' (Donors' Association for the Promotion of Sciences and Humanities) and the 'Ruhrbistum' (Ruhr Diocese), are also located in Essen. And, last but not least, Essen benefits from surprisingly spacious recreational and green areas, such as Lake Baldeney and its surroundings or the Grugapark, one of the largest and most beautiful German city gardens. As a result, Essen has become a popular destination for local tourism.

Investor relations

Essen Hyp: Key competence in capital market business

The focus of Essen Hyp's business is on lending to national and international public-sector debtors. In addition the Bank gives long-term mortgage loans to finance both commercial property and private housing.

Accordingly we make great use of the international capital markets on which, besides the "traditional" *Pfandbrief*, more and more Jumbo and Global *Pfandbriefe* are being issued.

Essen Hyp is one of the largest issuers of Jumbo *Pfandbriefe* worldwide.

Economic Growth and Interest Rate Outlook for the United States, Euro Area, Japan 2003/2004

- » United States
- » Euro Area
- » Japan

Economic Growth and Interest Rate Outlook for the United States 2003/2004

Economic Growth

U.S. economic growth will surmount all obstacles

The U.S. economy has had to assert itself against a large number of retarding factors which affected it in the recent past, e.g. a number of corporate scandals of previously unknown dimensions, headlines about misleading share recommendations by well-known investment banks, repeated warnings of new terrorist attacks, a threatening extension of the financial crisis in Argentina, a strike of dockworkers on the U.S. western coast and rocketing energy prices. Nonetheless, the expansion of the U.S. economy did not grind to a halt – despite several market participants' dark prophecies. In contrast: in the previous year the U.S. was among the first ranks in the growth league of the OECD with a comparatively strong economic growth of 2.4%, far ahead of the euro area and the previous laggard Japan.

At the beginning of this year the mood among consumers, in industry and in what was up to now a booming construction sector, cooled noticeably. Both, the Iraq conflict and the ensuing rapid increase of energy prices, have occasionally been given as reasons for the clouding of the economic climate. In spite of these obstacles in the first quarter of 2003, production in the economy as a whole rose, according to an initial estimate of the U.S. Department of Commerce, by an annualized change rate of 1.6%.

In fact, with the end of the Iraq war and due to some signs indicating a decline of geopolitical tensions in other regions, important economic growth restraints have disappeared. In the last few weeks raw material prices, for example, have significantly decreased: the price of one barrel of West Texas Intermediate oil dropped from its peak of around U.S. \$ 38 at the beginning of March 2003 to below U.S. \$ 26 at the end of April 2003. Gold and gas prices have also been clearly on the decline. Moreover, risk premiums on the capital markets have diminished. The various structural and cyclic lifting powers of the U.S. economy should, therefore, be able to unfold their effect unrestrictedly and thus initiate a strong economic recovery despite the prevailing pessimism. The structural lifting powers are the following:

- U.S. economic growth will also be supported by a rise in population in the coming years. According to the most recent projection made by the U.S. Census Bureau in 2000, the population of the United States will, in accordance with the basis scenario, increase from 270 million in 1998 to 404 million in 2050. This corresponds to an average annual change rate of +0.8%. The actual population increase of 288 million was even greater than the optimistic forecast value of 282 million by last year already. Two factors are responsible for this rapid population growth. Firstly, the United States is a traditionally preferred immigration country. Secondly, U.S. women have a greater birth rate than women in other industrial countries. On average, every woman in the United States gives birth to two children. This extraordinarily high birth rate applies to all social classes, and U.S. women of Hispanic origin are known to have a large number of children.

- Although at the technology stock market NASDAQ the bubble has burst, the past high investment activity in the IT segment continues to unfold its productivity-increasing effect. The thesis of a "New Economy" was proven during the last recession. For a long time sceptics of the "New Economy" claimed that the rise of productivity growth in the latter part of the 1990s was, to a large extent, due to a favourable business cycle. In the course of the recession of 2001 however, the previous year's change rate of productivity did not drop contrary to the normal pattern, below zero. During the following year of recovery, 2002 growth of productivity even reached, at 4.8%, the highest level since 1950. This enormous productivity progress enabled U.S. companies to expand their profit margins even in a situation of price stability due to falling unit labor costs. NIPA corporate profits after tax (without banks) surpassed their previous year's level by approximately 60% in the last quarter of 2002. The rise of profits and profit expectations will initiate an accelerated investment activity and, finally, result in more employment. To some extent this upswing pattern has already started: investments in information technology and software have risen in five successive quarters. At exactly 10% the previous year's change rate was again a double digit figure in the first quarter of 2003. The past poor situation on the NASDAQ forces the comparison with a similar situation in the 19th century. Investments in bonds and shares of railroad companies were the fortune-promising phenomenon of that time. In spite of the insolvency of the famous railroad financier Jay Cooke & Co. in 1873, which resulted in a panic on the stock markets, the railroad continued to expand in the following years and thus, comparable to the internet of our times, the possibility of using the welfare-increasing effect of labor division.
- The negative wealth effect of the past stock market baisse will be weaker than so far expected. The survey of the financial situation of U.S. consumers, made by the Federal Reserve every three years, revealed that in accordance with an extrapolation of October 2002 – the low point of U.S. stock markets in 2002 – wealth of U.S. consumers greatly exceeded the level at the end of 1998. Moreover, the survey shows, that it is still predominantly people with larger income who invest in the stock market. For typical U.S. consumers the value of their family home continues to be the decisive factor in their individual wealth situation. According to the Office of Federal Housing Enterprise Oversight (OFHEO), house prices increased on average by almost 7% in the final quarter of 2002, compared to the final quarter of 2001. Furthermore, the International Monetary Fund (IMF) alleged in its most recent global economic report that the retarding effect of the slump in share prices – almost three years after the all-time high – will soon ease off.

Due to the above-mentioned two structural arguments we evaluate the growth capacity of the U.S. economy at way above 3%. Also time series analytical research, too, comes to this result. The various cyclic lifting forces should, moreover, result in change rates above this rate in the coming quarters.

- First and foremost, the extremely expansive monetary policy of the Federal Reserve has to be mentioned here. After the Federal Reserve reduced the federal funds target rate in eleven steps from 6.5% to 1.75%, the key central bank rate was again cut to 1.25% in November 2002. This monetary loosening also contributed to improved conditions for long-term funding. The effective interest rate of 30-year mortgage contracts, for instance, was at 5.75% in March 2003, on the lowest level since the availability of corresponding data in 1971. This historically low interest rate level resulted in a renewed, and so far unprecedented, flood of mortgage loan applications in the first quarter of this

year. Home owners wanted to either reduce their debt burden by leaving their old contracts and newly contracting their mortgage loans with better terms, or to use the increased value of their home to apply for a higher mortgage loan. In view of this development U.S. consumers can expect a considerable influx of free funds in the coming weeks and months. According to the Federal Reserve, households extracted almost U.S. \$ 200 billion in form of liquid money from home as consequence of the recent flood of refinancings in 2002. Surveys of the Federal Reserve showed that in the past half of the money extracted from home equity was used for financing private consumption and property improvement, with the other half being used for paying off high interest-bearing consumer debts (credit card debts). As a result, again this time private consumer expenditure should be noticeably boosted through future refinance payments. Low interest rates not only stimulate refinancing activities but also original mortgage loan applications in order to buy property. The corresponding index of the Mortgage Bankers Association of America reached an all-time high at the beginning of May 2003 and is, thus, a forerunner for a rebound on the residential property market.

- U.S. President Bush had to withdraw from his initial intention to reduce taxes by U.S.-\$ 725 billion in the next ten years due to opposition in Congress. In April this year President Bush pleaded "only" for a tax relief of at least U.S.-\$ 550 billion. Tax plans of the U.S. administration include the removal of taxation on dividends as the largest relief, as well as an earlier implementation of previously-agreed income tax cuts. The Budget Office of the U.S.-Congress has estimated that the "Jobs and Growth Plan", proposed by the administration in January 2003, would reduce the balance of the Federal Budget in the fiscal years 2003 and 2004 by 34 and 118 billion U.S.-\$ respectively. Thus, following the impending budget debates and a restrictive fiscal policy by the federal states this and the next year, even against the background of further cuts to be expected in the volume of relief, an expansive impetus should be initiated by the fiscal policy of the overall state. Furthermore, the fact alone that taxes have been reduced in recent years and that further tax cuts still are number one on the political agenda, should influence long-term income expectations and thus also have a positive impact on consumer spending.
- In the past months U.S. companies have merely moderately raised their inventory levels – which is also due to the imponderabilities of the Iraq conflict. In February 2003 the relation of inventory to sales was, at 1.37 only slightly above the historic low of 1.35, reached six months ago. Therefore, companies will strongly increase their inventory investment if an acceleration of overall economic demand will materialize or is even only anticipated.
- Export activity will see a moderate upturn caused by the depreciation of the U.S. \$. Compared with the peak of February 2002 the external value of the U.S.-\$ has decreased by about 5.5%, against the currencies of a broad group of important trading partners. Nonetheless, the U.S. trade deficit will continue to grow and therefore weigh on GDP growth, because an accelerated import surge, due to an buoyant domestic demand, will do more than just compensate the risen export activity. However, compared to the previous year, the growth burden caused by net exports, will be weaker this and the next year. The fact that profits of multinational companies increase due to the dollar weakness, results in a further expansive impetus, since profit conversion of foreign subsidiaries into the domestic currency is conducted only on the low price of the U.S.-\$. The most recent examples for the positive currency effect are the quarter results of McDonald's and Procter & Gamble.

As a result of the above arguments the expected growth rate for this year is 2.7% and for next year 4.2%.

Development of Consumer Prices

A known pattern: inflation in an early upturn phase is no topic

In the United States there has been a noticeable upsurge in consumer prices. The annual change rate of the consumer price index increased from 1.1% in June 2002 to 3% in March 2003. This price increase is exclusively a result of the rise,, of energy prices. The core inflation rate however, which reflects the basic inflation trend more adequately, has declined since December 2002. The "Business Cycle Dating Committee" of the economic research institute NBER is very likely to determine this date as the end of the last recession. On this occasion a known pattern of the inflation trend is again proved true: the inflation rate drops in the early phase of an upturn.

In the course of the upturn following the recession of 1991/92 it took almost nine years until the disinflation process stopped. Regarding the current significant under-utilization of capacities and falling unit labor costs the decline of the core inflation rate will continue. This is not opposed by the noticeable price pressure which developed at the early stage of the production chain. In 1994, for example, an equally strong producer price increase for intermediate products did not initiate a sustained inflationary process at consumer level, although unit labor costs did not decrease, but increased slightly. In accordance with this argumentation the "Beige Book" of the Federal Reserve of March described: " Few firms said they were able to pass along much, if any, of these cost increases to their customers. Competition from both domestic and foreign producers helped keep final goods prices in check." Moreover, not only falling crude oil prices but also already declining quotations for non-energy crude materials indicate that price pressure on the early stage of the production chain, which currently can still be noticed, will considerably decrease.

The annual average change rate of the consumer price index will, thus, decline from this year's 2.4% to 1.5% next year.

Key Interest Rates

Interest rates will increase this year

In its press release of March 18, 2003 the Federal Reserve attributed the rather weak economic growth report of the first quarter of 2003 to the oil price increase and other consequences of geo-political instabilities. Since the Iraq war turned out to be a success for the allied troops in the mean time, other trouble spots like South America lost explosiveness and crude oil prices are slowing down, the Federal Reserve hold the view that most retarding factors have petered out. As a result, after its meeting at the beginning of May, the Federal Open Market Committee (FOMC) of the Federal Reserve described the upwards and downwards risks for economic growth as balanced, despite the most recent publication of disappointing industrial production and labor market data. In compliance with our forecast the U.S. economy will grow by change rates above the potential growth rate, starting from the third quarter of this year. Thus, it can be assumed that the U.S. Central Bank will consider economic growth as so safe, that there in no more need for an extremely accommodative monetary policy in the fourth quarter of this year at the latest.

This forecast is in line with the statement of Thomas Hoenig, President of the Federal Reserve Bank of Kansas City, that U.S. monetary policy is confronted with the challenge "... to keep rates low to sustain the recovery, while also maintaining a sense of when to begin reversing policy." The federal funds target rate will therefore be 1.5% at the end of this year and 3.25% at the end of next year. In spite of this forecast of a significant monetary tightening the monetary policy [1] of the Federal Reserve will continue to be expansionary by the end of 2004.

Bond Market Trends

Economic growth surprise makes yields rise up to 5% at the end of 2003

In the last months and quarters the expression "deflation" was a decorative headline not only of numerous economic articles, but also a number of Federal Reserve representatives dealt intensely with the scenario of a general decline in prices in presentations and articles. Nonetheless or perhaps just due to that the current price trend on the capital markets seems to have drawn only little attention up to now. Capital market participants rather doubt the sustainability of the U.S. upturn. The repeatedly occurring temporary falling behind of economic growth indicators, thus, affirms the pessimistic view of market participants. In that environment, for example, yields of U.S. Treasury notes maturing in February 2011 dropped from their 5.45% peak in March 2002 by 218 bp to a low of 3.27% in March of this year. Yields of inflation-indexed Treasury Notes with maturity in January 2011 dropped in the same period by 190bp. From the largely parallel development of nominal yields of conventional bonds and real yields of inflation-indexed bonds it can be derived that the bull market of bonds, which lasted until March this year, could be almost exclusively attributed to the clouding of economic growth expectations. The decline of the inflation premium has thus contributed only 13% to the extremely friendly bond market.

The analysis of the past yield development is therefore indicative of future capital market trend. The fulfilling of our economic growth forecast, which predicts a growth rate of 2.7% for the United States this year, will catch the capital markets on the hop. Economists surveyed by the British journal "Consensus Forecast" in April 2003, forecast an average growth rate of 2.3% for the year 2003. Indeed, various discussions with bond fund managers suggest that the economic growth expectations of market participants could be even more restrained. Besides, increased issue of government debts on the capital market by the U.S. administration could be employed as an argument for rising yields. The OECD showed, in the scope of its half-yearly economic growth outlook, that the expected budget deficit of the administration (in % of GDP) correlates positively with the interest rate spread between long-term Treasuries and money market securities.

Our expectation of strongly surging capital market yields is in no way contradicted by falling inflation rates. Firstly, the current implicit inflation premium of the market corresponds more or less, at approximately 1.6%, to our inflation forecast for 2004. Secondly, in an environment of strong economic growth, falling inflation rates will not supply the deflation speculators with further arguments to put forward. With a look at the U.S. economic history, deflation periods were always accompanied by a reduction of the aggregate economic demand [2].

Consequently, yields of 10-year U.S. Treasuries will rise from 3.94% in April 2003 to 5% by the end of the year. Next year yields will continue to increase up to a level of 5.5%.

1. Quoted pursuant a Bloomberg release of April 22, 2003.
2. It is controversial whether the period from 1882 to 1896, in which the price level dropped by average of 3.3% per year and GDP increased by average of 2.4% per year,

can still be classified as period of price stability or of moderate deflation.

Roadshows

The entry of the Jumbo into the international capital markets gave the German mortgage banks the opportunity of winning new investors for the German *Pfandbrief* at an international level. Essen Hyp reacted promptly and focussed its internationally targeted funding strategies on investors' needs.

Since its first international roadshow in October 1997 which went from London, via Asia, to the United States, Essen Hyp has been presenting itself and its products on a regular basis to international investors in all important financial and commercial centers of the world.

We will continue to commit ourselves to the task of intensifying our close contact with national and international investors.

Our latest roadshow presentation "Economic and Interest Rate Outlook" is available for download here.

During the roadshows investors have been asking many questions on, for example, the German legal system, the distinction between the German *Pfandbrief* and other products, the quality of our cover fund, etc. Information on these and other related issues can be found in our Glossary.

Investor relations

Corporate Governance Code of Hypothekenbank in Essen AG

The German Corporate Governance Code Commission set up by the German government, presented the German Corporate Governance Code on February 26, 2002. This Code of best practice describes key statutory provisions for the management and supervision of German listed companies and embodies internationally and nationally recognized standards for good and responsible governance. It is intended to make the German system of corporate governance transparent and understandable, and also to promote the trust of international and national investors, customers, employees and the general public in the management and supervision of listed companies.

The shares of Essen Hyp are not listed on a stock exchange. This is why certain legal requirements and stipulations set out in the German Corporate Governance Code, which are applicable to German listed companies, are not relevant to Essen Hyp

Nevertheless, and in view of maximum transparency, Essen Hyp expressly welcomes and supports the German Corporate Governance Code and the goals and objectives it pursues. The Corporate Governance Code of Essen Hyp complies with most of the requirements set out in the German Corporate Governance Code. Given that Essen Hyp's shares are not listed on a stock exchange and that the bank is thus not in a position to satisfy those requirements of the Code that are mandatory for listed companies, the bank does not expressly state which recommendations of the Corporate Governance Code are not complied with for this reason.

Declaration of Compliance with the German Corporate Governance Code pursuant to Section 161 of the German Stock Corporation Act (*AktG*)

Preliminary remark: The shares of Hypothekbank in Essen Aktiengesellschaft (hereinafter also referred to as "Essen Hyp" or the "bank") are not listed on a stock exchange. At present, the Hypothekbank in Essen Aktiengesellschaft has only two shareholder groups: Commerzbank Aktiengesellschaft, with a majority stake, and the Schuppli Group holding the remaining shares. This explains why certain legal requirements and stipulations set out in the German Corporate Governance Code, which are applicable to German listed companies, are not relevant to Essen Hyp.

Nevertheless, Hypothekbank in Essen Aktiengesellschaft expressly welcomes and supports the German Corporate Governance Code and the goals and objectives it pursues. The Corporate Governance Code of Hypothekbank in Essen Aktiengesellschaft complies with the recommendations of the German Governance Code Commission, announced in the official section of the electronic Federal Gazette (*Bundesanzeiger*) on May 21, 2003, except for those restrictions which relate to the fact that Essen Hyp is not a German listed company and does not produce consolidated accounts, and except also for the following recommendations:

Pursuant to Section 2.3.2 the bank shall inform all domestic and foreign shareholders, shareholders' associations and financial services' providers, who, in the preceding 12 months, have requested such notification, of the convening of the General Meeting, and shall provide them with the convention documents upon request, also using electronic channels. The shares of Hypothekbank in Essen Aktiengesellschaft are not listed on a stock exchange. Hypothekbank in Essen Aktiengesellschaft has only two shareholder groups: the Commerzbank Aktiengesellschaft and the Schuppli Group. All shareholders are known to the bank. This is why Essen Hyp makes use of the simplifications as regards the invitation to and convening of General Meetings laid down in the German Stock Corporation Act (*AktG*). Thus, Essen Hyp does not announce its General Meetings externally, e.g. in the Federal Gazette (*Bundesanzeiger*), and, contrary to the provisions laid down in Section 2.3.1, the agenda and the reports and documents required for the General Meeting are not published on Essen Hyp's company website.

Given that both shareholders are represented in the Supervisory Board and in the Presiding Committee as the committee responsible for the employment contracts of the members of the Board of Managing Directors, the Supervisory Board does not discuss and review the structure of the Board's compensation system as laid down in Section 4.2.2.

Contrary to Section 4.2.4 the information and figures on the compensation of the members of the Board of Managing Directors are not individualized.

Pursuant to Section 5.3.2 the Supervisory Board shall set up an Audit Committee which, in particular, handles issues of accounting and risk management. Given that the Supervisory Board of Essen Hyp is composed of not more than 6 members, the Board refrained from setting up such an Audit Committee. Risk management issues are the responsibility of the Credit Committee of the Supervisory Board, which also deals with the bank's credit and market risks. Issues relating to the annual audit are addressed by the Supervisory Board itself.

Due to our bank's shareholder structure we have refrained from specifying an age limit within the meaning of Section 5.4.1.

Contrary to Section 5.4.5 the information and figures on the compensation of the members of the Supervisory Board are not individualized.

Given that all shareholders carrying voting rights are directly or indirectly represented in the Supervisory Board, conflicts of interest are dealt with exclusively within the Supervisory Board in accordance with Section 5.5.2. Contrary to Section 5.5.3 the General Meeting is not informed about such conflicts of interest.

Given that no shares of Essen Hyp are in free flow or listed on a stock exchange, and that the bank does not have any stock option programs or comparable incentives in place, the provisions laid down in Sections 4.2.3, 6.6 and 7.1.3 of the German Corporate Governance Code are not relevant to Essen Hyp.

As long as Hypothekbank in Essen Aktiengesellschaft compiles its Annual Accounts in accordance with the provisions of the German Commercial Code (*HGB*), it will not pass information to third parties by means of Annual Reports or Interim Reports compiled in accordance with the International Accounting Standards (IAS), as stipulated in Section 7.1.1. Apart from the Annual Accounts and Interim Reports, the two shareholder groups of the company receive additional information during the Supervisory Board meetings, so that the above reports are not the only source of information available to them.

1 Preamble

1.1 Implementation of the German Corporate Governance Code.

The German Corporate Governance Code Commission (the “Code Commission”) set up by the German government, presented the German Corporate Governance Code on February 26, 2002. This Code of best practice describes key statutory provisions for the management and supervision of German listed companies and embodies internationally and nationally recognized standards for good and responsible governance. It is intended to make the German system of corporate governance transparent and understandable, and also to promote the trust of international and national investors, customers, employees and the general public in the management and supervision of listed companies.

The German Corporate Governance Code contains the following three elements:

- a presentation of applicable law
- recommendations of the Code Commission regarding the management and supervision of companies
- suggestions

This Code of best practice, as amended on November 7, 2002, has been officially published by the Federal Ministry of Justice, and is complemented by a provision in the German Stock Corporation Act (*AktG*) pursuant to which the Board of Managing Directors and the Supervisory Board of listed stock corporations (*Aktiengesellschaften*) are required to declare every year whether these recommendations were complied with and which recommendations were not applied (the “comply-or-explain declaration”).

The shares of Hypothekenbank in Essen Aktiengesellschaft (hereinafter also referred to as “Essen Hyp“ or the “bank“) are not listed on a stock exchange. At present, Hypothekenbank in Essen Aktiengesellschaft has only two shareholder groups: Commerzbank Aktiengesellschaft, with a majority stake, and the Schuppli Group holding the remaining shares. This is why certain legal requirements and stipulations set out in the German Corporate Governance Code, which are applicable to German listed companies, are not relevant to Essen Hyp.

Nevertheless, Hypothekenbank in Essen Aktiengesellschaft expressly welcomes and supports the German Corporate Governance Code and the goals and objectives it pursues. The Corporate Governance Code of Hypothekenbank in Essen Aktiengesellschaft (hereinafter referred to as the “Code”) complies with the requirements set out in the German Corporate Governance Code, except from those restrictions which relate to the fact that Essen Hyp is not a German listed company and does not set up consolidated accounts.

The Code clarifies the rights of shareholders who provide Essen Hyp with the necessary equity capital and bear the entrepreneurial risk. At the same time, it presents the rules set out in the Articles of Association and the rules of procedure for the Supervisory Board and the Board of Managing Directors.

1.2 Board system of Hypothekbank in Essen Aktiengesellschaft

A dual board system is prescribed by law for Hypothekbank in Essen Aktiengesellschaft as a German stock corporation.

The Board of Managing Directors is responsible for managing the company. Its members are jointly accountable for the management of the company, whereby the individual members are responsible for the areas assigned to them within the framework of Board resolutions. The chairman of the Board of Managing Directors co-ordinates the work of the Board members. Subject to certain legal provisions, such as Section 15 of the German Banking Act (*KWG*), Board resolutions are passed with the majority of votes cast.

The Supervisory Board appoints, supervises and advises the members of the Board of Managing Directors and is directly involved in decisions of fundamental importance to the company. The chairman of the Supervisory Board co-ordinates the work of the Supervisory Board.

Two thirds of the members of the Supervisory Board are elected by the shareholders at the General Meeting. The two remaining members of the Supervisory Board are staff representatives who are elected by the bank's employees at a secret ballot. The chairman of the Supervisory Board is appointed by the Commerzbank Aktiengesellschaft, being the majority shareholder. His deputy is appointed by the minority shareholder. Subject to certain legal provisions, Supervisory Board resolutions are passed with the majority of votes cast. In the case of a tie – also at elections – the chairman of the meeting has the casting vote. Both, the representatives elected by the shareholders and the staff representatives are obliged to act in the company's best interests.

The company's accounting follows the 'true and fair view' principle and presents a view of the company's net assets, financial position and earnings situation that corresponds to the actual circumstances.

As a rule this Code will be reviewed and, if necessary, adjusted once a year in the light of national and international developments and changes within the company.

2 Shareholders and General Meeting

2.1 Shareholders

2.1.1 Shareholders exercise their rights at the General Meeting and vote there.

2.1.2 Each share carries one vote. There are no shares with multiple voting rights, preferential voting rights (golden shares) or maximum voting rights.

2.2 General Meeting

2.2.1 The Board of Managing Directors submits the Annual Financial Statements to the General Meeting. The General Meeting decides on the appropriation of profit and the discharge of the acts of the Board of Managing Directors and of the Supervisory Board. It also elects the shareholders' representatives to the Supervisory Board and the auditors.

Furthermore, the General Meeting decides on the Articles of Association, the object of the company, amendments to the Articles of Association and essential corporate measures such as, in particular, inter-company agreements and transformations and the issuance of new shares, convertible bonds, bonds with warrants and profit-sharing certificates, or it authorizes the Board of Managing Directors to issue them with the approval of the Supervisory Board. In addition, the General Meeting decides on the authorization to purchase own shares.

2.2.2 When new shares are issued, shareholders shall have a subscription right reflecting their respective share of the equity capital, unless the General Meeting decides otherwise.

2.2.3 Each shareholder is entitled to participate in the General Meeting, to take the floor on matters on the agenda and to submit materially relevant questions and proposals.

2.2.4 The chairman of the General Meeting shall ensure that the meeting runs smoothly.

2.3 Invitation to the General Meeting, Proxies

2.3.1 The Board of Managing Directors shall convene the General Meeting at least once a year, giving details of the agenda. A quorum of shareholders is entitled to require that a General Meeting be convened and the agenda extended. The Board of Managing Directors shall not only make available the reports and documents that are required by law for the General Meeting, including the Annual Report, during the meeting itself, but also send them to the shareholders on request.

- 2.3.2 The bank facilitates the personal exercising of shareholders' rights and also assists the shareholders in the use of proxies. The Board of Managing Directors arranges for the appointment of a representative to exercise shareholders' voting rights in accordance with their instructions.

3 Co-operation between the Board of Managing Directors and the Supervisory Board

- 3.1 The Board of Managing Directors and the Supervisory Board shall co-operate closely to the benefit of the company.
- 3.2 The Board of Managing Directors co-ordinates the bank's business strategy with the Supervisory Board and discusses the current state of strategy implementation with the Supervisory Board at regular intervals.
- 3.3 Pursuant to specific provisions set out in the Articles of Association, by the Supervisory Board and in the German Banking Act (*KWG*), transactions of fundamental importance require the approval of the Supervisory Board. These transactions include decisions or measures which fundamentally alter the company's asset, financial or earnings situation, as well as fundamental credit decisions.
- 3.4 Providing the Supervisory Board with sufficient information is the joint responsibility of the Board of Managing Directors and the Supervisory Board.

The Board of Managing Directors shall inform the Supervisory Board regularly, without delay and comprehensively, about all issues that are relevant to Essen Hyp with regard to planning, business development, the risk situation and risk management. The Board of Managing Directors reports on deviations of the actual plans from previously formulated targets, indicating the reasons for these deviations.

The Supervisory Board specifies the information and reporting duties of the Board of Managing Directors. The reports of the Board of Managing Directors to the Supervisory Board are, as a rule, to be submitted in writing. Documents required for decision-making such as, in particular, the Annual Financial Statements and the Auditors' Report are, to the extent possible, forwarded to the members of the Supervisory Board in due time prior to the meeting.

- 3.5 Good corporate governance requires an open dialogue between the Board of Managing Directors and the Supervisory Board, as well as amongst the members within the Board of Managing Directors and the Supervisory Board. The strict observance of confidentiality is of paramount importance for this.

All Board members shall ensure that the staff members they employ also comply with the obligation to maintain confidentiality.

- 3.6 As necessary, the Supervisory Board meets without the Board of Managing Directors.
- 3.7 In the event of a takeover bid, the Board of Managing Directors and the Supervisory Board of the bank as the target company must submit a statement of their reasoned position so that the shareholders can make an informed decision on the bid.

After the announcement of a takeover bid, the Board of Managing Directors may not take any actions outside the ordinary course of business that could prevent the success of the bid unless the Board of Managing Directors has been authorized by the General Meeting, or the Supervisory Board has given its approval. In making their decisions, the Board of Managing Directors and the Supervisory Board are obliged to act in the best interests of the shareholders and of the company.

- 3.8 The members of the Board of Managing Directors and the Supervisory Board shall comply with the rules of proper corporate management. If they violate the due care and diligence of a prudent and conscientious member of the Board of Managing Directors or the Supervisory Board, they are liable to the bank for damages.

The bank has taken out a directors' and officers' liability insurance (D&O insurance) policy for the Board of Managing Directors and the Supervisory Board, placed through the majority shareholder, the Commerzbank Aktiengesellschaft. A suitable deductible has been agreed for both the members of the Board of Managing Directors and the members of the Supervisory Board.

- 3.9 Pursuant to Section 15 of the German Banking Act (*KWG*) the extension of loans from the company to members of the Board of Managing Directors or the Supervisory Board or their relatives (spouses and children who are still minors) requires the unanimous approval of the Board of Managing Directors, as well as the prior consent of the Supervisory Board.
- 3.10 The Board of Managing Directors and the Supervisory Board shall report in each year's Annual Report on the company's Corporate Governance. This includes the explanation of possible deviations from the recommendations of the German Corporate Governance Code.

4 The Board of Managing Directors

4.1 Tasks and Responsibilities

- 4.1.1 The Board of Managing Directors is responsible for independently managing the company. In doing so, it is obliged to act in the company's best interests and undertakes to increase the sustainable value of the company.
- 4.1.2 The Board of Managing Directors develops the company's strategy, co-ordinates it with the Supervisory Board and ensures its implementation.

4.1.3 The Board of Managing Directors shall ensure that all provisions set out by law are complied with.

4.1.4 The Board of Managing Directors ensures appropriate risk management and risk controlling within the company.

4.2 Composition and Compensation

4.2.1 The Board of Managing Directors is composed of several persons and has a chairman. Rules of procedure, which require the approval of the Supervisory Board, govern co-operation within the Board of Managing Directors. The Board of Managing Directors co-operates on a basis of trust with the bank's other bodies and the employee representatives to the benefit of the company.

4.2.2 The compensation of the members of the Board of Managing Directors is fixed by the Presiding Committee of the Supervisory Board at an appropriate amount, based on a performance assessment. Criteria for determining the appropriateness of the compensation are, in particular, the tasks of the respective Board member, his personal performance, the performance of the Board of Managing Directors as a whole, the economic situation, and the performance and future prospects of the bank, taking into account its competitors.

4.2.3 The overall compensation of the members of the Board of Managing Directors is composed of a fixed salary and variable elements. The variable part of the compensation includes result- and performance-linked components and is based on the achievement of the bank's business success, the results of the business segments for which the respective Board member is responsible, and his individual performance. All compensation components must be appropriate, both individually and in total.

4.2.4 The compensation of the members of the Board of Managing Directors is reported in the Notes to the Annual Accounts, broken down into fixed salary and variable components, each in a single sum.

4.3 Conflicts of Interest

4.3.1 During their employment with Essen Hyp, the members of the Board of Managing Directors are subject to a comprehensive non-competition obligation.

4.3.2 In connection with their work, the members of the Board of Managing Directors and employees may neither demand nor accept from third parties payments or other benefits for themselves or for any other person, nor grant unlawful advantages to third parties.

- 4.3.3 The members of the Board of Managing Directors are bound by the company's best interests. No member of the Board of Managing Directors will pursue personal interests in his decisions, or use business opportunities intended for Essen Hyp for himself.
- 4.3.4 Each member of the Board of Managing Directors must disclose conflicts of interest to the Supervisory Board without delay and inform the other members of the Board of Managing Directors. All transactions between the company and the members of the Board of Managing Directors, persons they are closely related to or companies they have a personal association with must meet the standards that are customary in the sector. Important transactions require the approval of the Supervisory Board or the Committee responsible according to the rules of procedure of the Supervisory Board.
- 4.3.5 Sideline activities of the members of the Board of Managing Directors, especially Supervisory Board mandates outside the company, are subject to the approval of the Supervisory Board.

5 The Supervisory Board

5.1 Tasks and Responsibilities

- 5.1.1 The task of the Supervisory Board is to provide continuous advice to and to monitor the work of the Board of Managing Directors in the management of the company. The Supervisory Board must be involved in all decisions that are of fundamental importance to the company.
- 5.1.2 The Supervisory Board appoints and dismisses the members of the Board of Managing Directors. Together with the Board of Managing Directors, the Presiding Committee of the Supervisory Board ensures that there is long-term successor planning. The Supervisory Board has delegated the preparations for the appointment of members to the Board of Managing Directors to the Presiding Committee, which also lays down the conditions of the employment contracts, including compensation.

A re-appointment prior to one year before the end of the appointment period with a simultaneous termination of the current appointment may only take place under special circumstances. For members of the Board of Managing Directors there is a fixed age limit of 65 years.

- 5.1.3 The Supervisory Board has issued rules of procedure.

5.2 Tasks and Powers of the Chairman of the Supervisory Board

The chairman of the Supervisory Board co-ordinates the work within the Supervisory Board and chairs its meetings.

The chairman of the Supervisory Board also chairs the Presiding Committee which, inter alia, deals with the employment contracts of the members of the Board of Managing Directors.

The chairman of the Supervisory Board maintains close contact with the Board of Managing Directors, and with the chairman in particular, in order to discuss the strategy, business development and risk management of the company. The chairman of the Supervisory Board shall, without delay, be informed by the chairman of the Board of Managing Directors of any events material for the assessment of the company's situation and development, or for the management of the company. The chairman of the Supervisory Board shall then inform the Supervisory Board and, as necessary, convene an extraordinary meeting of the Supervisory Board.

5.3 Formation of Committees

- 5.3.1 Depending on the specific features of the company and the number of Supervisory Board members, the Supervisory Board has formed a Presiding Committee and a Credit Committee from within itself. These two committees serve to increase the efficiency of the Supervisory Board's work and deal with more complex issues. The chairman of each committee regularly reports to the Supervisory Board on the work of the respective committee.
- 5.3.2 The rules of procedure of the Supervisory Board provide for committees to make decisions in place of the Supervisory Board. The Presiding Committee prepares Supervisory Board meetings, at which personnel decisions are to be made.
- 5.3.3 The Supervisory Board can delegate other subjects to be handled by one or several committees. These subjects include the strategy of the company, the compensation of the members of the Board of Managing Directors, investments and financing.

5.4 Composition and Compensation

- 5.4.1 When submitting proposals for the election of Supervisory Board members, care shall be taken that the Supervisory Board, is, at all times, composed of members who, as a whole, have the required knowledge, ability and expertise to properly complete their tasks and are sufficiently independent. Furthermore, the international activities of the company and potential conflicts of interest are taken into account.

- 5.4.2 To ensure the Supervisory Board's independent advice and supervision of the Board of Managing Directors, not more than one former member of the Board of Managing Directors shall be a member of the Supervisory Board. Moreover, Supervisory Board members shall not hold directorships or similar positions with main competitors of the bank or provide any advisory services to them.
- 5.4.3 The members of the Supervisory Board shall ensure that they have sufficient time to perform their mandate. Members of the Board of Managing Directors of a listed company shall not accept more than five Supervisory Board mandates in non-group listed companies.
- 5.4.4 The election or re-election of all Supervisory Board members takes place at the same time, and as a rule for the longest admissible period of office. Elections to replace members are for the remaining period of office of a member of the Supervisory Board who resigns prematurely, or, if the resigning member's period of office was shorter than the regular period of office in accordance with sentence 1 of this Section, up to the end of the period of office of the other members of the Supervisory Board who have been appointed for the longest admissible period of office.
- 5.4.5 The compensation of the members of the Supervisory Board is specified in the Articles of Association. It is based upon the responsibilities and tasks of the members of the Supervisory Board, as well as the economic situation and performance of the company. Also taken into account are the holding of a chair or deputy chair position in the Supervisory Board, as well as the chairmanship and membership in any Supervisory Board committee.

The members of the Supervisory Board receive fixed as well as performance-related compensation. The latter is based upon the dividend payments to the bank's shareholders. .

The compensation of the members of the Supervisory Board is reported in the Notes to the Annual Accounts, broken down according to components, each in a single sum. Should, by way of exception, compensation be paid to the members of the Supervisory Board or advantages extended for services provided individually, in particular, advisory or agency services, these payments are shown separately in the Notes to the Annual Accounts.

- 5.4.6 If a member of the Supervisory Board has taken part in less than half of the meetings of the Supervisory Board in a financial year, this will be noted in the Report of the Supervisory Board.

5.5 Conflicts of Interest

- 5.5.1 All members of the Supervisory Board are bound to act in the company's best interests. No member of the Supervisory Board will pursue personal interests in his decisions, or use business opportunities intended for Essen Hyp for himself.

- 5.5.2 Each member of the Supervisory Board shall inform the chairman of the Supervisory Board of any conflicts of interest, especially those which may result from a consultant or directorship position with clients, suppliers, lenders or other business partners. If necessary, the chairman of the Supervisory Board will then have the Presiding Committee discuss the issue. The chairman of the Supervisory Board shall disclose his own conflicts of interest to the Supervisory Board or the Presiding Committee.
- 5.5.3 Material and not merely temporary conflicts of interest with respect to the person of a Supervisory Board member shall result in the termination of his mandate.
- 5.5.4 Advisory and other service agreements between a member of the Supervisory Board and the bank require the Supervisory Board's approval.

5.6 Examination of Efficiency

The Supervisory Board shall examine the efficiency of its activities on a regular basis.

6 Transparency

- 6.1 The Board of Managing Directors shall disclose without delay any new facts within the company's field of activity that are not known publicly if they are likely to substantially influence the price of the company's listed securities, due to their impact on the asset and financial situation or general business development.
- 6.2 As soon as the company becomes aware of the fact that an individual acquires, sells or by any other means exceeds or falls short of 5, 10, 25, 50 or 75% of the voting rights in the company, the Board of Managing Directors shall disclose this fact without delay.
- 6.3 The company's treatment of all shareholders in respect of information shall be the same. The company shall also disclose all new facts made known to financial analysts and similar addressees to its shareholders without delay.
- 6.4 The company shall use suitable communication media, such as the internet, to inform shareholders and investors in a prompt and uniform manner.
- 6.5 Any information which the company discloses abroad in compliance with applicable capital market law provisions will also be disclosed domestically without delay.
- 6.6 As part of the bank's regular information policy, the dates of its most important regular publications (including the Annual Report, Interim Reports, General Meeting) are published sufficiently in advance in a 'financial calendar'.
- 6.7 Any information on the company disclosed by Essen Hyp shall also be published on the bank's website. The website shall have a clear structure.

7.1 Reporting

7.1.1 Third parties receive their information through the Annual Financial Statements. During the financial year, they receive additional information in the form of interim reports that are published at the end of the second and third quarters. The Annual Financial Statements and Interim Reports are prepared according to national legislation, i.e. the provisions set out in the German Commercial Code (*HGB*), which also form the basis for taxation.

7.1.2 The Annual Financial Statements are prepared by the Board of Managing Directors and examined by the auditors and the Supervisory Board. The Annual Financial Statements shall be publicly accessible within 90 days of the end of the financial year; Interim Reports shall be publicly accessible within 45 days of the end of the reporting period.

7.1.3 The company publishes a list of third party companies in which it has a participating interest that is not of minor importance for the company. The trading portfolios of the bank, on which voting rights are not exercised, are disregarded in this context. In accordance with the German Commercial Code (*HGB*) the following information is provided in the bank's Annual Accounts: name and registered office of the company, the amount of the interest, the amount of equity and the operating result of the past financial year.

7.1.4 Notes on the relationships with shareholders who are considered 'related parties' pursuant to the applicable accounting regulations, shall be provided in the Annual Financial Statements.

7.2 Audit of the Annual Financial Statements

7.2.1 Prior to submitting a proposal for election, the Supervisory Board will obtain a statement from the proposed auditor stating whether, and where applicable, which professional, financial and other relationships exist between the auditor and its executive bodies and head auditors on the one hand, and the company and its Board members on the other hand, that could call its independence into question. This statement shall include the extent to which other services were performed for the company in the past year, especially in the field of consultancy, or which are contracted for the following year.

The Supervisory Board agrees with the auditor that the chairman of the Supervisory Board will be informed immediately of any grounds for disqualification or partiality occurring during the audit, unless such grounds are removed immediately.

7.2.2 The Supervisory Board shall commission the auditor to carry out the audit and conclude an agreement on the latter's fee.

- 7.2.3 The Supervisory Board shall arrange for the auditor to report on all facts and events of importance for the tasks of the Supervisory Board which arise during the performance of the audit.

The Supervisory Board shall arrange for the auditor to inform it and/or note in the Auditors' Report if, during the performance of the audit, the auditor comes across facts which show a misstatement by the Board of Managing Directors and Supervisory Board on the Corporate Governance Code.

- 7.2.4 The auditor takes part in the Supervisory Board's deliberations on the Annual Financial Statements and reports on the relevant results of the audit. He is available to answer the questions the members of the Supervisory Board may have.

Risk Report

Risk monitoring systems

Hypothesenbank in Essen AG aims not only to protect its corporate value, but also to increase it within an existing risk limitation framework. This requires us to continuously develop our organization and to optimize our models and procedures so that we can identify, quantify and handle potential risks. This is the only way to ensure their transparency and manageability. The information which we receive from our comprehensive risk management system not only forms the basis for our strategic decisions but also enables us to recognize new opportunities.

Whereas, on the one hand, the management of Hypothesenbank in Essen AG must ensure a responsible strategy that focuses on creating added value, it must also install effective control mechanisms.

The business activities of mortgage banks as specialist banks are subject to certain legal constraints set out in the German Mortgage Bank Act (HBG) and relative communiqués issued by the Federal Financial Supervisory Authority (BaFin). Compliance with these regulations, as well as the obligation to meet the ever increasing requirements of market participants, necessitates the efficient handling of risks and are, as such, characteristic of a modern mortgage bank's image. Due to the far-reaching internationalization, market transparency and product diversity, business transactions have become ever more demanding and complex. In this context not only market, liquidity, credit and counterparty risks but also operational risks are of major importance.

Essen Hyp defines the term 'risk' as a possible loss resulting from unexpected changes, which might lead to adverse deviations from the bank's projected asset development and its financial and earnings performance. Appropriate forecast periods have been assumed for each type of risk.

- Market risks hold the danger of losses resulting from adverse changes in prices or price-influencing parameters. Here, interest rate risks are by far the most important risk category for Essen Hyp. Establishing the total of possible overnight losses constitutes the main aspect of our risk analysis. Currency risks are ruled out by specific hedging transactions.
- Liquidity risks hold the danger that, in the case of illiquid markets, contractual payment obligations cannot be met in a timely manner or even at all, or that due to market disturbances or an insufficient market depth, deals either cannot be wound up, or if so only with losses.
- Credit and counterparty risks consist of the partial or total failure of any of our business partners to fulfill their obligations under a legally binding contract.
- In accordance with the Basel Consultation Paper (Basel II), Essen Hyp defines operational risks as the danger of losses resulting from inadequacies or failures of internal procedures, staff, technology or external procedures. Legal risks resulting from the legal framework, legal actions or contracts are also included in our understanding of operational risks.

Risk management under two different accounting standards. So far Hypothesenbank in Essen AG has prepared its annual accounts and financial statements in accordance with the provisions of the German Commercial Code (HGB). However, given that the consolidated accounts of the Commerzbank AG are now being compiled in accordance with the International Accounting Standards (IAS), Essen Hyp was required to introduce IAS as an additional accounting system. As a non-trading-book institution, Essen Hyp primarily manages its interest rate positions at a macro level. However, risk management under IAS focuses much more on market values. Thus, loans not originated by the bank and derivatives that do not pertain to any micro-hedge relationship are reported at market value. Whether or not changes in the market value affect the bank's net income depends on their classification on the balance sheet. Due to this partial reporting at market value we were required to split our interest rate book into different portfolios for corporate management purposes. This enables us to manage potential effects on the balance sheet within the scope of predefined limits. In addition to

this new portfolio structure, we have begun to measure our performance under IAS on a daily basis. Essen Hyp has thus created a suitable framework for simulating the potential effects of asset and liability management measures on our IAS results.

Management of market and liquidity risks

| Equipment and infrastructure | Organization Department |
| Internal controlling | Internal Audit Department |

Risk management structure – Tasks and responsibilities. The risk management policies of Essen Hyp have been decided by the Board of Managing Directors within the framework of the targets set out by the Group. These policies form the basis of our bank's risk management and control system.

The following table shows the allocation of the most important tasks relating to risk control and risk management to the responsible organizational units.

Risk acceptance. In the period under review the acceptance of risks was the responsibility of the departments dealing with customers and products. It is their task to identify, evaluate and actively manage risk positions as it is only the operational units that are in close proximity to the markets, and so in a position for the timely recognition of risks and for taking suitable measures to counter them. In the course of 2003, our current procedures will be revised in the framework of implementing the minimum requirements for lending operations

(MaK).

Risk monitoring

Market risks – Value at risk (VaR). The data required for risk measurement is taken from the gap report, which is updated by the Controlling Department on a daily basis and which indicates the mismatches per quarter. The risks deriving from gap positions in the case of interest rate fluctuations, are measured and quantified on market-to-market key figures. The arbitrage-free zero-coupon discount factors used for this purpose are calculated on a daily basis. These calculations are made on the basis of a yield curve composed of the current public-sector Pfandbrief yields and interest swap rates. With the help of these discount factors, the accruing cash flows from interest and principal payments are discounted and summarized into a key figure.

As a next step the unchanged cash flows are discounted by new discount factors, calculated from a simulated market price change and a holding period of one business day. This simulation is carried out by applying the historical yields of the past 255 trading days. The calculated 254 market scenarios form the basis for the respective revaluation of the current portfolio and the calculation of the differences between the individual market values.

The corresponding maximum change in the interest rate book's value is then calculated on the basis of a confidence level of 97.5%. The VaR of the entire interest rate book describes the bank's aggregate market risk.

The efficiency and practical relevance of this method is permanently monitored with the help of back-testing procedures, i.e. the projected VaR is compared to the actual market value changes on a daily basis. Any outliers, i.e. market value changes outside the forecast interval, are identified by using a one-sided confidence interval, which covers both positive and negative changes in value. In 2002, we observed four outliers when assuming a 97.5% confidence level and one outlier when assuming a 99% confidence level.

In order to limit losses exceeding the confidence level of 97.5%, another upper limit for losses has been fixed, taking into account worst case scenarios. The potential for such losses is also calculated daily.

The worst case scenario is set up in such a way that the maximal overnight changes in interest rates for each key point on the yield curve are determined on a stand-alone basis and for a period of 10 years. These uncorrelated figures are then applied to the current yield curve by means of a yield curve shift.

The Board of Managing Directors, in co-operation with the Supervisory Board, fixes limits for the VaR, as well as for worst case scenarios. These limits have to be complied with at all times.

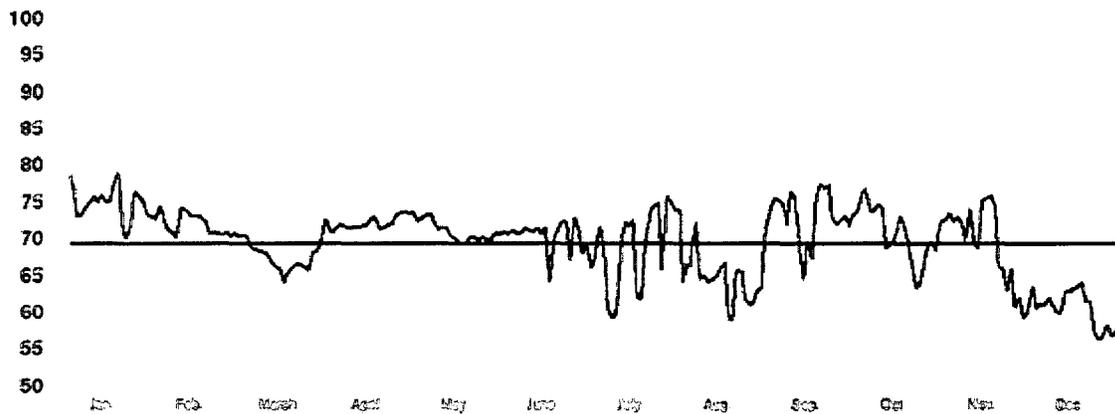

The VaR utilization of the authorized limit came to 57.3% as of December 31, 2002 and to 69% on an annual average. The utilization of the limit for worst case scenarios stood at 63.4% on the balance sheet date, while the annual average was 56.4%.

In addition to this, simulations of stress test scenarios are carried out in order to be in a position to better assess and limit possible losses arising from extreme market shifts, which are generally not appropriately represented by VaR models. Thus stress testing represents a suitable complement to the VaR analyses which use historical simulation.

Apart from the calculation of the VaR and the possibilities for simulations based upon user-defined parameters, the underlying portfolio can be adjusted by simulating the impact of changed interest rate curves, as well as the effects of planned new lending operations close to their point in time.

For its VaR, market value and interest rate risk calculations, Essen Hyp uses the well-established ATLAS software (formerly INTAS Arena), as well as other evaluation tools developed within the bank.

Value at risk on a daily basis and on an annual average of the authorized limit in 2002 in %

'Traffic light system'. Pursuant to the requirements set out by the Federal Financial Supervisory Authority (BaFin), Essen Hyp also calculates the potential market value loss of the whole portfolio in the case of a general interest rate increase of 1 basis point and 100 basis points from one business day to another. These calculations are carried out for all maturities, taking into account certain predefined breakpoints (the so-called 'traffic light system'). This basis point value, calculated with the help of the key rate method, may, in the case of an interest rate increase of 100 basis points, not exceed a certain limit in proportion to the liable capital as defined in Section 10 of the German Banking Act (KWG). This limit is fixed by the BaFin.

These figures are calculated on a daily basis. In 2002 the average limit utilization within this 'traffic light system' came to 15.05%, while, on the balance sheet date, it stood at 17.97%. We not only report this data to the rating agencies Moody's, Standard & Poor's and FitchRatings, but also publish it on our website in an aggregate form and on a regular basis in order to provide investors with an insight into the level of interest rate risk incurred by the bank.

Internal reporting. The Board of Managing Directors, as well as the Head of Treasury and the Head of Corporate Management, are provided with information on the development of the gap report's market value, the VaR level, the utilization of the different risk limits and the level of interest rate risk calculated with the help of the 'traffic light system' on a daily basis. Moreover, the market values of our public-sector and mortgage Pfandbriefe and their respective cover pools, as well as the changes in value under predefined stress scenarios, are calculated and reported.

Furthermore, the Head of Treasury reports on the bank's short-term and long-term liquidity situation in the course of the weekly meetings of the Board of Managing Directors.

As a part of our corporate management activities, our Asset Liability Committee (ALCO) meets on a weekly basis. This Committee deals with and, within the scope of its competencies, decides on the bank's interest rate position, the development of key figures as regards earnings and risk exposure, and reporting requirements. The ALCO is composed of the member of the Board of Managing Directors who is responsible for the Treasury Department (or his deputy), the heads of all operational and back-office units, and the heads of the Risk Controlling and Research Department. The Chairman of the Committee reports on the decisions and recommendations of the ALCO in the course of the weekly Board meetings.

On a monthly basis the Board of Managing Directors receives a number of reports from the individual departments and sections. For instance, the detailed report prepared by the Controlling Department, provides, inter alia, information on the transactions effected in the previous month and the development of the market value. Furthermore, this report contains an overview of the pending forward transactions, including options and

repurchase agreements. The monthly report prepared by the Accounting and Taxes Department provides information on the development of the balance sheet and profit and loss account in accordance with the provisions of both the German Commercial Code (HGB) and IAS. The monthly report submitted by the Settlements Department includes, amongst other things, information on the structure of the bank's loan portfolios. The report from the Notifying and Credit Research Department shows the ratings of our borrowers, including, if applicable, information on changes in the assessment of their credit quality.

Credit and counterparty risks

Public-sector loans and securities issued by other borrowers. With a percentage of 84.8% of the balance sheet, public-sector loans and loans to credit institutions governed by private law and other borrowers constitute the core business of Essen Hyp in accordance with the bank's overall business strategy. As of December 31, 2002, the volume of this portfolio came to €60.2bn, including pro-rata interest of €1.5bn.

The high quality of our public-sector cover assets, amounting to €50.5bn as of December 31, 2002, is reflected on the one hand by the low average risk weighting pursuant to the BIS standards and, on the other hand, by the external ratings of the leading international rating agencies. Taking into account the BIS standards, 63.4% of these assets are classified at a risk weighting of 0%, 12.2% at 10% and 24.4% at 20%. A breakdown of the loan portfolio by rating reveals that 40.4% of the assets have been awarded a triple A, 34% a double A, 6.1% a single A and 0.5% a triple B. Those assets which were not rated by an external rating agency, i.e. 19% of the total loan volume, mainly include loans to credit institutions governed by public law (46.6%) and public-sector bodies (46.4%), whose excellent credit quality was confirmed by our internal credit quality analysis.

The composition of our loan portfolio which is held in trust by a trustee in order to serve as cover for our public-sector Pfandbriefe, can be seen on our website. This site is updated monthly and provides investors with information on the structure and quality of our cover pool, while complying with banking secrecy provisions.

As a basic principle, an investment grade rating is the prerequisite for the granting of loans to foreign public-sector bodies, as well as to credit institutions governed by private law and other borrowers. Our non-cover transactions (excluding derivatives) with these counterparties amounted to €4.1bn as of December 31, 2002. While 22.1% of these counterparties were rated double A, 68.1% were rated single A and 6.1% triple B. Loans totaling less than €0.2bn were not rated by an external rating agency. The breakdown of our non-cover assets under different criteria is also published in detail on our website. These figures are updated periodically. Hypothekbank in Essen AG rigorously complies with the 'gentlemen's agreement' concluded between the member institutions of the Association of German Mortgage Banks (VDH) and the Federal Financial Supervisory Authority (BaFin). This agreement stipulates that new commitments that are not eligible for cover may only be entered into if the respective counterparty has a minimum rating of A-/A3 by an external rating agency or a comparable internal rating.

The total volume of loans whose rating is downgraded to a level below the minimum rating of A-/A3 during their term, is limited to one time the liable own capital as defined in Section 10 of the German Banking Act (KWG).

Country risks. In order to co-ordinate all questions concerning country risks and to implement appropriate measures, Essen Hyp makes use of the Commerzbank Group's know-how. Risk limits are fixed on the basis of internal and external credit quality assessments and in close co-operation with our supervisory bodies, also taking into account the total credit exposure of the Commerzbank Group.

The bank granted loans totaling €0.3bn in the form of securities that are listed on European stock markets to EU candidate countries. These securities have an average maturity of six and a maximum maturity of eight years. Essen Hyp did not place any investments in emerging market countries.

Derivatives. Essen Hyp reduces counterparty risks by applying bilateral outline agreements with netting arrangements. Again, as far as these agreements are concerned, uniform contractual regulations are in place within the Group.

The structure of our derivative portfolio, broken down by counterparty rating, can be taken from the following table (cf. also p. 74 of the Notes on the Bank's Annual Accounts).

| Counterparty ratings | in € m/remaining time to maturity | | | |
|----------------------|-----------------------------------|----------------|---------------|----------------|
| | < 1 year | 1-5 years | > 5 years | Total |
| Rating | | | | |
| Triple A | 4,250 | 10,464 | 5,304 | 20,018 |
| Double A | 18,166 | 42,571 | 24,172 | 84,909 |
| Single A | 21,669 | 56,986 | 34,780 | 113,435 |
| not rated | 6,496 | 15,434 | 11,412 | 33,342 |
| Total | 50,581 | 125,455 | 75,668 | 251,704 |

To a certain extent, the portions of our non-rated counterparties relate to German subsidiaries of foreign credit institutions with a good rating. In the table below we have notionally attributed the ratings of these foreign credit institutions to the portions of the respective counterparties as an 'implicit rating'.

| Implicit counterparty ratings | in € m/remaining time to maturity | | | |
|-------------------------------|-----------------------------------|---------------|---------------|---------------|
| | < 1 year | 1-5 years | > 5 years | Total |
| Rating | | | | |
| Double A | 150 | 359 | 0 | 509 |
| Single A | 6,346 | 14,875 | 11,129 | 32,350 |
| not rated | 0 | 200 | 283 | 483 |
| Total | 6,496 | 15,434 | 11,412 | 33,342 |

Currently no interest rate derivatives for a collateralization at market value. The recently implemented 4th Financial Market Promotion Act (Finanzmarktförderungsgesetz) and the related amendments to the German Mortgage Bank Act (HBG) now permit the inclusion of derivatives in the cover pool.

The reason for this is that a match between the nominal value of the cover assets and the nominal value of the outstanding Pfandbriefe, as is currently required by law, does not take into account changes in value resulting from interest rate fluctuations. It is intended to eliminate these interest rate risks by stipulating that a match between the market value of the cover assets and the market value of the Pfandbriefe outstanding is a prerequisite for issuing Pfandbriefe.

Currency swaps, which have been entered into prior to the implementation of the 4th Financial Market Promotion Act for the purpose of eliminating currency risks relating to foreign-currency loans in the cover pool, have been included in our market-value cover pool at their market value of currently A-9m.

However, Hypothekenbank in Essen AG currently has no reason to include interest rate derivatives of any

considerable amount in its cover pool. The market value of our cover assets has always exceeded the market value of our public-sector Pfandbriefe outstanding. The relevant reports are made available to the rating agencies on a quarterly basis. In addition to this, market values and market value changes are published on our website. Nevertheless, we entered into negotiations with our derivative counterparties in order to be able to include derivatives in our cover pool with their consent should this turn out to be necessary. Any further steps to be taken basically depend on the stress scenarios, which indirectly fix a legal overcollateralization of our cover pools on the basis of current interest rates.

Risks relating to mortgage lending

The assessment of credit risks relating to mortgage lending is the responsibility of the Property Financing Department, and, in particular, the Transaction Management Division. Further assistance is provided by a special working group on risk management, and by our subsidiary, the Essen Hyp Immobilien GmbH.

The responsibilities and competencies with regard to the granting of loans are clearly and unambiguously defined in an organizational manual, which is available to our staff in electronic form. As far as retail lending is concerned, the bank makes use of an appropriate customer and property scoring system, which is also applied when co-operating within the Group. With regard to loans that are not classified as retail loans, Essen Hyp not only attaches particular importance to the borrower's credit standing but, above all, to the valuation of the property concerned, which is carried out by the certified valuers of our subsidiary Immobilien Expertise GmbH. The sustainable income from the charged property must at all times exceed the interest and principal payments due to our bank. Essen Hyp drew up specific guidelines for both domestic and international property financing, which were approved by the Credit Committee of the Supervisory Board. These guidelines stipulate, amongst other things, the minimum debt service cover (DSC) ratios, and they also include a list of property types which are currently not eligible as security for mortgage loans or which can only be lent against if certain conditions are met.

For the timely recognition of credit risks, we established an early warning system which enables us to plot latent risks in a more efficient way, taking into account potential risk factors, such as interrupted performance, an adverse development of the sector, risks of rent losses or an adverse market-induced impact on the quality of the property location. Furthermore, the processing of loans in default or other loans showing performance interruptions (and thus bearing a certain risk potential) was optimized in 2002. As in the previous years, we reassessed the risks inherent in the large-volume transactions in our loan portfolio, and especially those in the East German Federal States. In this context a number of risk-reducing measures were taken, such as demanding additional security, restructuring certain commitments, and, finally, ensuring an adequate provision for possible loan losses in accordance with the strict standards of Hypothekbank in Essen AG. Prior to each of its periodical Committee meetings, the Credit Committee of the Supervisory Board is informed about the progress of non-performing loans exceeding a certain amount and about the structure of our mortgage loan portfolio.

Internal ratings

The changes in the regulatory framework governing credit risks and their capital backing as set out in the Basel II requirements, as well as the provisions regarding loan administration procedures laid down in the minimum requirements for lending operations (MaK), make great demands on all German banks. Against this background Essen Hyp accelerated the development of suitable methods for the determination of the minimum capital requirements and for risk measurement under the Internal Rating Based Approach (IRB) for both public-sector and mortgage lending in 2002. This was done in close co-operation with our parent company, the Commerzbank AG.

Furthermore, we participate in two projects on loss given default (LGD) grading and probability of default (PD) rating which were initiated by the Association of German Mortgage Banks (VDH). These projects aim at optimizing the elements which are required to achieve a PD rating that satisfies the Basel II requirements, and at developing the related tools while taking into account the special characteristics of German mortgage banks.

The LGD project for mortgage lending operations focuses on a rating module which calculates the loss ratio after the realization of the security should the borrower default. This calculation takes into account general criteria which apply to all VDH member institutions, such as the recovery rate or the duration of the liquidation, as well

as individual parameters specific to each bank, such as recovery costs or the time prior to realization. Thanks to this system each bank will be in a position to individually calculate the loss given default (LGD) for any mortgage loan on the basis of the relevant loan security. At the end of the project the so-called 'LGD calculator' was accomplished, which illustrates the calculation of the LGD. This tool will be fully integrated into our internal IT system in 2003. As a result, we will be able to systematically calculate the LGD – and thus to internally measure the loss in an event of default – in accordance with the advanced IRB approach.

The agreement on the PD project, in the framework of which Essen Hyp will co-operate with a number of other mortgage banks and with the publishing house Bank-Verlag Köln, is about to be concluded. Measuring the 'probability of default' shows the probability of default for any loan allocated to one of the internal rating categories. The time horizon applied is one year. These measurements will be effected by means of a specific model which is meant to serve as a basis for statistical analyses and mathematical calculations. This model will form the basis for the rating tool to be applied in future in accordance with the Basel II requirements relating to the extension of mortgage loans.

In order to ensure adequate PD ratings, the quantity and quality of the available data plays a key role. The banks that are involved in the PD rating project have committed themselves to continuously providing suitable data, which will form the basis for an adequate calibration and validation. In addition to this, Essen Hyp will continue to develop PD ratings for any mortgage loan extended in close co-operation with the Commerzbank AG.

Provision for possible loan losses

Through the creation of individual and, in the case of latent credit risks, overall value adjustments, the recognizable risks of the lending business are adequately taken into account. Until now there has been no need for individual value adjustments or provisions in respect of our lending business with public-sector bodies or entities governed by public law.

Based upon thorough analyses, our Property Financing Department continually makes assessments of any necessary precautions in order to ensure the quality of the bank's planning.

Liquidity risks

The bank's liquidity management is the responsibility of the money dealing unit within our Treasury Department. It is based upon the daily listing of all payment flows. In order to be in a position to assess the liquidity situation, it is important that the assets relating to public-sector lending are extremely liquid so that they can be disposed of or sold under agreements to repurchase at short notice, if this is required and within the scope of nominal overcollateralization, in order to generate liquidity.

The bank calculates its liquidity risk by determining the ratio between the volume of mismatches taken from a capital outflow account and the existing short-term funding limits, plus liquidity reserves. Our liquidity positions are additionally managed pursuant to the Grundsatz II requirements relating to the adequacy of a credit institution's liquidity provision. Our bank's liquidity ratio calculated according to Grundsatz II was 1.21 at the end of the year (ratio required by law: 1.0).

Operational risks

In anticipation of the Basel II requirements concerning risk management and the monitoring of operational risks, Essen Hyp categorized all relevant risks according to their causes as early as in 2001. As a result, our bank not only meets the Basel II criteria, but also complies with the risk categorization that is applied within the Commerzbank Group as a whole.

Based upon this risk categorization, existing or potential risks in the individual departments and sections are identified by means of a self assessment in which nearly all employees are required to participate.

The statements and analyses by the participants in this self assessment cover IT issues (i.e. impacts of system failures, the quality of software administration, interface functionality, protection against wrong user input), internal procedures (quality and comprehensiveness of organizational directives, competencies as regards the initiation, approval and conclusion of business transactions), together with criminal and unauthorized acts

(control mechanisms, protection of customer data and system and application files).

In June 2002 this self assessment was carried out for the second time. To be able to process the huge amount of data collected we have developed a database which allows us to adequately administer, historicize and analyze the results.

In addition to this, Essen Hyp is involved in a Commerzbank Group project which focuses on the collection of data relating to operational risk losses.

In view of the expected legal requirements concerning the standard approach and the advanced measurement approach, it has become necessary to collect, historicize and analyze any losses incurred in a systematic way. The aim is to quantify operational risks by calculating a value at risk figure.

Against this background Essen Hyp has recorded all losses exceeding €5,000 as from the beginning of 2002. These losses are reported in a specific 'Loss Collection Form'. We expect that in 2003 our bank will be integrated in the Commerzbank's intranet-based 'Loss Collection Tool', which serves to collect and assess all losses incurred within the Group, in 2003. Within Essen Hyp, the Board of Managing Directors receives a monthly report of all operational losses incurred.

However, even before the introduction of the self assessments referred to above, Essen Hyp was concerned about the issue of operational risks. In order to detect possible weak points, we have, for several years, been analyzing the 'classical' operational risks relating to the bank's structural and procedural organization, EDP, internal and external electronic communication (intranet, internet, e-mail), availability of qualified staff, adequate equipment and legal matters. With regard to certain specific issues, we seek external advice from consultants and other specialists. For instance, external specialists have been tasked with analyzing and validating the safety of our IT systems in regular intervals, e.g. in view of so-called 'hacker attacks'.

Other pre-emptive measures in terms of operational risks include the preparation and improvement of contingency plans for all business units, as well as the setting up of our alternate headquarters at year-end 2002. To rule out potential EDP failures, the bank disposes of two separate central computer systems located in different parts of Essen, one of which serves as a backup system, should the working system fail. Our alternate headquarters referred to above are situated in the same premises as our back-up system, so that a continuation of the bank's key business activities is ensured for a transitional period should the bank's headquarters be destroyed or severely damaged.

Thus a trouble-free 24-hour data flow, without interruption of operations in an emergency, is ensured. In addition to this, we continued our qualification program for employees in the operational units and in the back office in 2002 by organizing certified seminars on job-specific as well as general issues. This aims, as far as possible, to prevent errors that result from a lack of expertise.

Legal risks

Essen Hyp's Legal Department acts as an internal service provider for all legal matters. This includes providing general and specific legal advice on contracts, outline agreements and agreements that are not standard constructions. By integrating the Legal Department from the beginning, limitations of our scope of activity resulting from existing legal frameworks can be quickly recognized. At the same time, we are in a position to make use of the whole range of legally permissible options in an innovative way. Our Legal Department is also involved in the processing of non-performing loans. If required, we additionally seek external legal advice. When dealing with mortgage and public-sector loans to foreign borrowers, we always make use of the services of suitable international law firms.

The Legal Department regularly provides the Board of Managing Directors with information on the latest legal developments and the relating risks or impact on our bank's business activities.

Internal auditing

Internal auditing forms an integral part of our internal monitoring system.

The Internal Audit Department, which functions independently of all working procedures, has been tasked by the Board of Managing Directors with controlling the existing structures and procedures in terms of the early recognition of potential risks. The main focus is put on examining and evaluating the quality of the safety measures and the prescribed internal controls integrated in the working procedures. Feedback about the structuring and suitability of the bank's risk management system is provided to the Board of Managing Directors and to the individual departments and sections. Material findings by the Internal Audit Department are reported to the Supervisory Board during the subsequent ordinary Supervisory Board meeting. During the first meeting in every new financial year the Supervisory Board is informed about all important findings by the Internal Audit Department, and also about the extent to which deficiencies observed in the past financial year have been remedied.

The Internal Audit Department acts according to a long-term inspection plan, which is continually improved. This plan also forms the basis for an annual inspection scheme agreed by the Board of Managing Directors and submitted to the Chairman of the Supervisory Board for information purposes. The inspections stipulated in this scheme cover all parts of the bank. Checks on correct working procedures and systems are carried out at fixed time intervals. As far as specific risks and legal requirements (provisions relating to the German Money Laundering Act (Geldwäschegesetz)) are concerned, inspections are carried out at least once per year. The inspection intervals are fixed in the long-term inspection scheme. This also ensures that each of the bank's working procedures is, as a matter of principle, inspected once every three years. In terms of a risk-oriented inspection, the audit mainly focuses on the bank's structural and procedural organization, risk management and controlling mechanisms and the internal monitoring system for all working procedures within Essen Hyp.

The early recognition and limitation of all currently measurable and qualifiable operational risks constitute the main tasks of the Internal Audit Department. Our EDP Audit, which is integrated in the Internal Audit Department, is primarily charged with all issues relating to electronic data processing, such as the maintenance of the safety and consistency of our electronic files by controlling the granting of licenses to access the system, and by limiting the number of users.

The findings of each inspection are recorded in an audit report. These reports are made available to the relevant departments, the Board of Managing Directors and the external auditors.

Future prospects

Due to regulatory as well as Group-internal requirements, the importance of risk management is set to further increase in the future. The minimum requirements for trading activities (MaH) and the – new – minimum requirements for lending operations (MaK), together with the Basel II requirements, play a key role in our risk management activities. Equal importance is attached to the further development of our organizational structures and procedures. In the coming years, the further development and sophistication of our risk management system will, as before, focus on ensuring an adequate, e.g. transparent capital allocation for all existing, recognizable and potential operational risks in the framework of the implementation of the recommendations of the Basel Committee on Banking Supervision.

Risk Management

Interest rate risk

Essen Hyp not only calculates the value at risk, but also, since the beginning of 2001, the potential market value loss of the whole portfolio in the case of a general interest rate rise of 1 basis point (bp) and 100 bp from one business day to another. These calculations are executed for all maturities, taking into consideration certain predefined breakpoints ("traffic light system"). Essen Hyp thus complies with the requirements set out by the German Federal Financial Supervisory Authority (BAFin), which are binding on all mortgage banks since April 1, 2001. This basis point value, calculated with the help of the key rate method, may, in the case of an interest rate increase of 100bp, not exceed a certain limit in proportion to the liable capital pursuant to Section 10 of the German Banking Act (KWG). This limit is fixed by the German Federal Financial Supervisory Authority (BAFin).

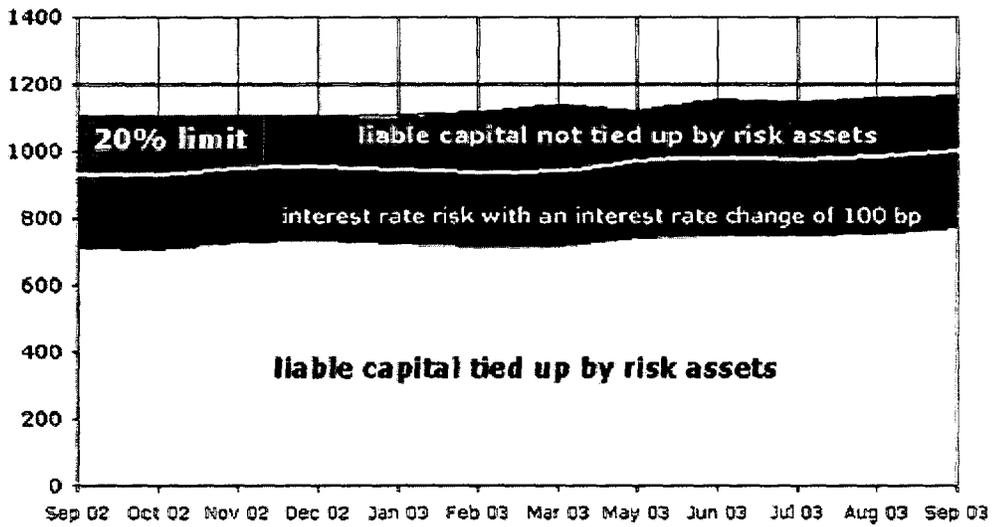

| Date | Average utilization |
|------------|---------------------|
| 30/09/2003 | 14.36% |
| 31/08/2003 | 13.05% |
| 31/07/2003 | 12.08% |
| 30/06/2003 | 13.06% |
| 31/05/2003 | 14.31% |
| 30/04/2003 | 12.78% |
| 31/03/2003 | 13.11% |
| 28/02/2003 | 17.14% |
| 31/01/2003 | 17.68% |
| 31/12/2002 | 17.72% |
| 30/11/2002 | 16.45% |
| 31/10/2002 | 16.75% |
| 30/09/2002 | 14.56% |
| 31/08/2002 | 12.79% |
| 31/07/2002 | 11.84% |
| 30/06/2002 | 15.98% |
| 31/05/2002 | 16.93% |
| 30/04/2002 | 15.73% |
| 31/03/2002 | 12.77% |
| 28/02/2002 | 15.28% |
| 31/01/2002 | 13.69% |
| 31/12/2001 | 14.27% |
| 30/11/2001 | 16.60% |

These figures are calculated daily and are reported to the BAFin monthly in arrears. Own capital is charged at zero percent interest. The transaction that has the longest running maturity is taken into consideration. Since April 2001 Essen Hyp also makes these reports available to the rating agencies Moody's, Standard & Poor's and Fitch.

However, the coefficient calculated with the help of this method does not indicate to what extent the liable capital is already exposed to other credit risks. Nonetheless, with a total capital ratio of 12.1% (percentage required by law: 8%) and a core capital ratio of 6.1% (percentage required by law: 4%) as of September 30, 2003, Essen Hyp has "free capital" as a further security in addition to the limitation of interest rate risks in accordance with the BAFin stipulations and to the limitation of the interest rate risks through value at risk calculations.

Risk Management

Grundsatz I - overview

Pursuant to Sections 10 (1) and 10a (1) of the German Banking Act (*KWG*), *Grundsatz I* establishes rules concerning the adequacy of a credit institution's equity capital. Pursuant to *Grundsatz I* the ratio of the liable capital of an institution to its risk weighted assets must not fall below 8% at the close of each business day (Tier II capital ratio), while the ratio of the core capital of an institution to its risk weighted assets must not fall below 4% at the close of each business day (Tier I capital ratio).

| Date | Tier I | | Tier II | |
|------------|-----------------|-------|-----------------|-------|
| | Required by law | Ratio | Required by law | Ratio |
| 30/09/2003 | 4.0 | 6.1 | 8.0 | 12.1 |
| 31/08/2003 | 4.0 | 6.2 | 8.0 | 12.3 |
| 31/07/2003 | 4.0 | 6.2 | 8.0 | 12.2 |
| 30/06/2003 | 4.0 | 6.2 | 8.0 | 12.3 |
| 31/05/2003 | 4.0 | 6.3 | 8.0 | 12.2 |
| 30/04/2003 | 4.0 | 6.5 | 8.0 | 12.6 |
| 31/03/2003 | 4.0 | 6.5 | 8.0 | 12.7 |
| 28/02/2003 | 4.0 | 6.2 | 8.0 | 12.4 |
| 31/01/2003 | 4.0 | 6.1 | 8.0 | 12.2 |
| 31/12/2002 | 4.0 | 6.0 | 8.0 | 12.0 |
| 30/11/2002 | 4.0 | 6.1 | 8.0 | 12.1 |

Grundsatz II

Grundsatz II concerns the adequacy of a credit institution's liquidity provision. It is required and sufficient that the liquid assets cover all actual and potential liquidity outflows over the following twelve months. Since December 1, 2000 German mortgage banks have to comply with *Grundsatz II*.

| Date | Ratio | Required by law |

Investment of available funds

Quantitative and qualitative restrictions

Compliance with the self-restrictions regarding the total volume of securities held as assets and rated below A- or A3

These self-restrictions, which form part of a "gentlemen's agreement" between the Association of German Mortgage Banks (VDH) and the Federal Financial Supervisory Authority (BaFin), stipulate that any and all bonds and unit certificates that are acquired pursuant to Sections 5(3)(3d) and 5(3)(5) of the German Mortgage Bank Act (HBG) on the investment of available funds, must have a minimum rating of A3/A- by the rating agencies Moody's, Standard & Poor's and/or Fitch Ratings. In the case of divergent ratings, the worst rating applies. In addition to this, the total volume of bonds and unit certificates acquired pursuant to Sections 5(3)(3d) and 5(3)(5) of the German Mortgage Bank Act (HBG) whose rating is downgraded to a level below the minimum rating of A3/A- during their term, is limited to one time the liable own capital of Essen Hyp.

Hypothesenbank in Essen AG hereby confirms that it complies with the agreed self-restrictions regarding the investment of available funds.

Code of Conduct

Outline

In co-operation with its member institutions, the Association of German Mortgage Banks (VDH) has established a code of conduct for the issuers of Jumbo Pfandbriefe.

This Code of Conduct contains (a) rules of conduct and (b) disclosure requirements, with which the mortgage banks will voluntarily comply:

- a. The rules of conduct nos. 1) to 3), which apply to the issuers of Jumbo Pfandbriefe, stipulate that
 - new issues and increases are to be announced duly in advance in order to make sure that there is sufficient time for the book-building process;
 - new issues and increases are to be marked to the market at all times;
 - as a rule, increases are to be launched by the laid down minimum number of market makers.
- b. The rule of conduct no. 4) lays down minimum standards on the information to be disclosed. This will allow investors to evaluate the quality of cover assets. The information, which should be updated at least quarterly, is to be published in suitable electronic media.

Since mid-2001 Essen Hyp has been publishing detailed information about its cover pools, derivatives and interest rate risks. This information is now being complemented by further details in accordance with the provisions of the Code of Conduct.

| | Already published on our Credit Research sites | New on our Credit Research sites |

The German *Pfandbrief*

During the past 100 years, *Pfandbrief* investors have never failed to receive full repayment – a clear proof of the *Pfandbrief*'s high level of safety. This is just one reason why *Pfandbriefe* account for as much as 38% of all fixed income securities in Germany and have also become more and more popular with international investors.

In recent years the *Pfandbrief* market has seen significant changes due to the increasing volume of *Pfandbriefe* that are issued in the form of Jumbos and Globals. The key characteristics of a Jumbo *Pfandbrief* are a minimum issuance volume of €500m and the commitment of at least three market makers to simultaneously quote bid/offer spreads for tickets of up to €15m during normal trading hours. As a result, Jumbo *Pfandbriefe* show a higher liquidity and more flexibility than traditional *Pfandbriefe*.

Basic Principles of the German Mortgage Bank Act

The strict requirements of the German Mortgage Bank Act (HBG), in conjunction with the comprehensive banking supervision exercised by the Federal Financial Supervisory Authority (BAFin), ensure that German mortgage banks maintain a particularly high safety standard. The German Mortgage Bank Act stipulates, amongst other things, that:

- the scope of business activities permitted to German mortgage banks is restricted to the granting of public-sector and mortgage loans;
- loans may only be granted if the securities offered meet the quality standards set out by law;
- a match between maturities and interest rates of the lending and funding business must be ensured at all times.

In addition to this, the German Mortgage Bank Act contains a number of provisions to ensure the quality of the assets serving as cover for public-sector and mortgage *Pfandbriefe*. A key prerequisite for including an asset in the cover pool is, for example, that the *Pfandbrief* creditor's preferential claim must be guaranteed in the event of bankruptcy. Furthermore, there are provisions that govern the legal structuring of the cover assets, the composition and management of the cover pool and, for mortgage *Pfandbriefe*, the establishment of the lending value.

A mortgage bank must ensure that sufficient cover is available at all times, so that the principal and interest payments from the loans included in the public-sector and mortgage cover pools match, or even better, exceed the principal and interest payments due to the *Pfandbrief* creditors. All cover assets are held on trust by a trustee who is appointed by the Federal Financial Supervisory Authority (BAFin). Any disposal of a cover asset by a mortgage bank requires the trustee's prior approval.

Experience has shown that the provisions of the German Mortgage Bank Act constitute a suitable basis for the supervision of the mortgage banks' business activities.

Amendment of the German Mortgage Bank Act (HBG) as of July 1, 2002

A) A wider range of business activities

A1.) Expansion of mortgage lending activities

Following the amendment of the German Mortgage Bank Act (HBG), German mortgage banks are now allowed to expand their non-cover business activities in the area of mortgage lending to the non-European G7 countries (United States, Canada, Japan). The total volume of these transactions, plus the total volume of mortgage loans granted to the Central European full member states of the OECD (i.e. Hungary, Czech Republic, Slovakia and Poland) is limited to five times the liable own capital (Section 5 (1) (2b) of the German Mortgage Bank Act), Japan limited to three times the liable own capital.

A2.) Expansion of public-sector lending activities

Public-sector loans that are eligible for cover may now be extended to central governments, regional governments and local authorities in Switzerland, the United States, Canada and Japan. In addition to this, loans to the central governments of other European full member states of the OECD (i.e. Poland, the Czech Republic, Slovakia and Hungary) may

now also be funded through the issuance of public-sector Pfandbriefe (Section 5 (1) (1) (a) and 5 (1) (1) (c) of the German Mortgage Bank Act).

The previously permitted range of public-sector cover transactions in EU member states and contracting states to the Agreement of the European Economic Area (EEA) was also expanded. It is now possible to grant public-sector loans to non-profit administrative organizations, which are subordinated to the central governments, regional governments or local authorities in these countries (Section 5 (1) (1) (d) of the German Mortgage Bank Act).

B) Inclusion of derivatives in the cover pool

For the first time, the derivative transactions entered into by German mortgage banks have been put on a legal basis. Pursuant to Section 5 (1) (4a) of the German Mortgage Bank Act German mortgage banks are now in principle entitled to enter into derivative transactions. In addition to this, the mortgage banks have the possibility of including derivatives in their Pfandbrief cover pools as ordinary cover (Section 6 (6) of the German Mortgage Bank Act).

An English translation of the German Mortgage Bank Act (HBG) can be retrieved from the website of the Association of German Mortgage Banks www.hypverband.de.

Bonds & Notes

Essen Hyp EUR 20,000,000,000 Debt Issuance Program (DIP)

Essen Hyp's €20bn Debt Issuance Program, which was launched on May 28, 1998 increased to €20bn in July 2002, aims to facilitate Essen Hyp's funding on the international capital markets.

The main intention of this Program is to provide structured financing transactions. However, any underlying risk exposure of a structured deal must be hedged against. In general, the required swap will be entered into with the dealer proposing the transaction. As a rule, each swap counterparty must have a minimum rating of AA- (S&P).

Jumbo *Pfandbriefe*, Global public-sector *Pfandbriefe* and similar benchmarks are launched outside the DIP.

The Program allows international fund-raising in almost any currency by means of a syndicated or non-syndicated, public or private placement. Funding proceeds are swapped back into EURIBOR. Pursuant to the German Mortgage Bank Act, Essen Hyp as a mortgage bank is not allowed to run any currency risks.

Maturities under this Program can reach up to 30 years, depending on the type of transaction. There is no specific maturity target.

Notes, including public-sector *Pfandbriefe*, may be issued in bearer or registered form. Depending on the agreement between issuer and dealer, Notes can be launched as Fixed Rate Notes, Floating Rate Notes, Indexed Notes, Dual Currency Notes or Zero Coupon Notes. The minimum volume per drawing is €5m.

Essen Hyp's DIP is listed on the Luxembourg stock exchange. The terms and conditions of the DIP also provide for a listing of bearer notes (including public-sector *Pfandbriefe*) on the Düsseldorf stock exchange, or any other stock exchange. Registered Notes (including public-sector *Pfandbriefe*) are not listed on any stock exchange.

The following ratings have been assigned to the Notes listed under Essen Hyp's Debt Issuance Program:

| | Standard & Poor's | Moody's |
|----------------------------------|-------------------|---------|
| Public-sector <i>Pfandbriefe</i> | AAA | Aa1 |
| Senior Unsecured Debt | A- | A2 |
| Subordinated Debt | BBB+ | A3 |

The Program is governed by German Law.

Our Debt Issuance Program has been arranged by Commerzbank and Merrill Lynch International. The dealers are ABN AMRO, Barclays Capital, Commerzbank, Goldman Sachs International, HSBC Trinkaus & Burkhardt, Lehman Brothers, Merrill Lynch International, Morgan Stanley, Schroder Salomon Smith Barney, Deutsche Bank, UBS Warburg, Credit Lyonnais and SG Investment Banking. The Program allows for reverse inquiry. Bids are welcome.

Bonds & Notes

Essen Hyp EUR 5,000,000,000 Commercial Paper Program

Following the launch of its €5bn Commercial Paper Program in December 1998, Essen Hyp has been able to issue short-term notes since the beginning of 1999.

Essen Hyp actively uses this Program in order to ensure flexible funding at low cost.

The Program allows drawings in EUR and any other internationally recognized currencies, as agreed between Essen Hyp and the dealer(s). The Notes that are issued under the Program must have a maturity of not less than two days. Clearing can be made through Euro Clear and Clear Stream Banking. In accordance with the existing legal and regulatory requirements, the maximum maturity in both cases is two years less one day. The minimum amount of the Notes is €2.5bn. There is no issuance of Definitive Notes under this Program.

One of the special features of the Program is that it allows for the issuance of

- Fixed-Rate Notes or
- Floating Rate Notes or
- Discounted Notes

all of which may be listed on a German stock exchange. The Notes may be deposited with the European Central Bank as Tier I securities.

Unless otherwise agreed, Floating Rate Notes under the Program have a maturity of at least six months and a minimum period of three months between two interest payment dates. Unless otherwise agreed, the EURIBOR is taken as the reference rate.

The Program itself is listed on the official market of the Düsseldorf stock exchange. Individual Notes may be listed with official quotations on the Düsseldorf stock exchange, or on any other stock exchange. However, Notes to be listed must have a minimum maturity of three months.

The Program offers a high degree of flexibility for both the dealer(s) and the issuer. Further day-to-day dealers are welcome.

Rating: Standard & Poors's: A-2 (Standard & Poor's)
P-1 (Moody's)

Arranger: Commerzbank AG

Frequent dealers: Commerzbank AG, Deutsche Bank AG, Société Générale

Day-to-day dealer: Goldman Sachs, London; Barclays, London; Dresdner,
FFM; JP Morgan Chase, London; Lehman Brothers, London

The Program is a supplement to Essen Hyp's Debt Issuance Program, which was signed in May 1998 and increased to €20bn in July 2002.

For further information please contact Essen Hyp's Money Market Desk:

Whether office buildings or shopping malls – real estate financing has become a global business. Major first-class projects can only be put into practice at a profit if matching lenders are found on the international capital markets. Investors, developers and real estate companies look for banking partners who are familiar with the highly complex real estate business. Developing successful strategies that ensure maximum planning security requires the expertise of specialists. And these specialists are at your disposal at Hypothekenbank in Essen AG (Essen Hyp) – because our real estate markets are global.

Bringing in their knowledge of the individual countries and real estate market segments, our experts from various departments will, together with you, work out a tailored and innovative financing structure for your project – for existing properties and future investments alike. Available options include loan volumes from ten million euros (or the equivalent amount in foreign currencies) to several hundred million euros, terms of up to 10 years or more, fixed or floating interest rates. Essen Hyp participates in loan syndicates, but is also prepared to act as a stand-alone lender. We will accompany your project right from the start. Further to our expertise, we offer you a committed team and competitive loan terms: as a mortgage bank, Essen Hyp is entitled to issue *Pfandbriefe* and thus benefits from excellent funding opportunities.

Your partner for international real estate projects.

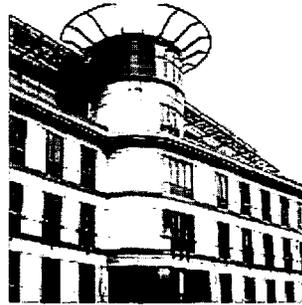

In addition to mortgage lending in Germany, our core activity is the granting of loans on the West European and North American real estate markets, mainly concentrating on Great Britain, France, Belgium, the Netherlands, Spain, Switzerland, the United States and Canada. Essen Hyp is thus active on the world's most important real estate markets.

We are particularly interested in properties that benefit from a good location in major West European and North American cities. By providing the necessary funds and developing loan structures that are tailored to the borrowers' specific requirements, we make an active contribution to the successful realization of each individual transaction. In addition to this, we are also prepared to support regional real estate projects.

Capable of dealing with selected projects.

Borrower-specific financing structures.

Essen Hyp's international mortgage lending activities are bundled at our *International Property Financing Desk*. Our committed and efficient team will advise you of all relevant facts and decisions within a short period of time, so that you can put your plans into practice without delay. A basic decision will be made within a few days after receiving an enquiry for a loan. Having obtained and reviewed all documents needed for decision-making, we will issue an irrevocable lending commitment within a period of time agreed with you. The entire financing transaction – from counseling via loan commitment and disbursement to full redemption – will be accompanied by one particular internal expert who is familiar with all project-specific requirements and will always be at your disposal.

We are currently expanding our network of international representative offices so that you can additionally benefit from *local contact partners*. *Establishing and maintaining* fruitful and long-lasting customer relations always is the main objective of our efforts.

City Point, London

With 37 floors, the City Point Tower is the second highest building in the City of London, benefiting from an excellent location. Essen Hyp participates as a syndicate partner in the financing of this property which was reopened in 1998. The building offers a total office area of 54,000 sqm, retail units totaling 4,700 sqm and storage space of 8,200 sqm.

Milton & Shire, London

Built in 1996, this office building is located on the northern edge of the City of London. Essen Hyp arranged the financing of an effective floor area totaling 42,500 sqm, with offices accounting for 39,800 sqm of this figure.

Quality is the key to success.

We see our task in providing you with specialist knowledge to ensure the long-term success of your project. Our credit decision is based on the in-depth analysis and evaluation of all risks that are inherent in a transaction. Important factors to be looked at are the state of the property, location, investment profitability and tenant credit quality. Each property to be financed is appraised by our internal appraisers or by external specialists who are based in the region concerned and have to give evidence of their qualification and their experience with regard to the respective property type. The question as to whether a property can be used for multiple purposes and the cash flows from rental income are the most important parameters in our project analyses. We are only prepared to accept a loan transaction if our analysis comes to the conclusion that the project meets our high requirements for profitability and safety and that the risks are calculable over the long term.

The standard securities we require for providing a loan include a first-ranking mortgage over the property, the assignment of rental income and insurance proceeds and, in certain cases, additional securities to be agreed individually.

Successful realization of international real estate projects Des projets immobiliers internationaux à succès

Whether office buildings or shopping malls — major first class real estate projects can only be put into practice at a profit if matching lenders are found on the international capital markets. Tailored and innovative financing structures which aim to ensure maximum planning security are available to you at Hypothenkbank in Essen AG (Essen Hyp).

Essen Hyp's international mortgage lending activities are bundled at our International Property Financing Desk, which combines the expertise of real estate specialists, financial experts and attorneys with swift decision-making and competitive loan terms. Our customers include leading national investors as well as well-known international borrowers who are active on international, national and regional real estate markets.

Qu'il s'agisse d'immeubles de bureaux ou de centres commerciaux, la rentabilité d'importants projets immobiliers de première qualité dépend aussi du partenaire financier adéquat. Hypothenkbank in Essen AG, en bref Essen Hyp, vous propose des stratégies de financement innovatrices tout en garantissant un maximum de visibilité pour l'avenir.

Au sein de notre équipe des financements internationaux nous avons concentré le savoir-faire de spécialistes en immobilier et en finance, ainsi que de juristes, une réactivité accrue et des conditions financières avantageuses. Parmi notre clientèle, nous comptons des investisseurs nationaux importants et des investisseurs internationaux de renommée agissant au niveau régional, national et mondial.

Financements immobiliers taillés sur mesure

We bring in our know-how and expertise to work out innovative financing structures – for existing properties and future investments alike. Our basic terms and conditions, which can be tailored to the specific requirements of each individual borrower, are as follows:

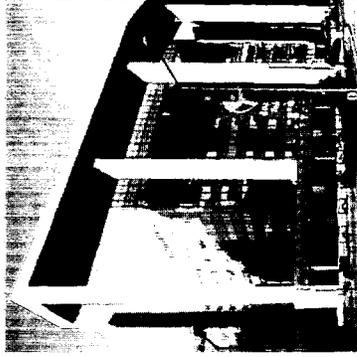

- We can make available loans ranging from 10 million euros to several hundred million euros (or the equivalent in other currencies).
- We offer competitive loan terms.
- We accept terms of up to 10 years or more.
- We offer fixed or floating interest rates.
- We participate in loan syndicates – as arranger or as syndicate partners – but we are also prepared to act as stand-alone lender.
- We are prepared to accept subordinated mortgages in selected cases.

Establishing and maintaining fruitful and long-term business relations is always our main objective. Our team will inform you of our basic decision on your loan application within a few days so that you can put your plans into practice without delay. Having obtained and reviewed all documents needed for decision-making (due diligence) we will issue an irrevocable lending commitment within a period of time agreed with you.

Nous mettons nos capacités d'intervention et notre expérience en service de vos investissements actuels ainsi que vos projets futurs. Nous adaptons à chaque projet sa structure de financement:

- Nous accordons des prêts immobiliers d'un montant compris entre dix millions d'euros et plusieurs centaines de millions d'euros (ou l'équivalent en autres monnaies).
- Vous bénéficiez de conditions financières intéressantes.
- La durée de nos prêts immobiliers peut aller jusqu'à dix ans et plus.
- Nous appliquons des taux d'intérêt fixes ou variables.
- Essén Hyp peut agir en tant que prêteur unique, en participation ou en syndication.
- Dans des cas particuliers, nous assumons le financement hypothécaire de deuxième rang.

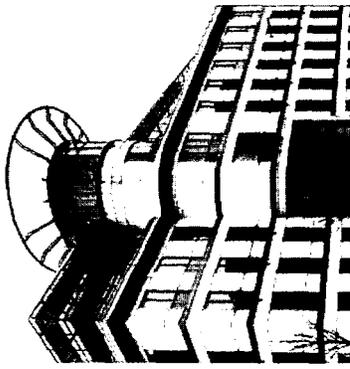

Une collaboration fructueuse et de longue durée a toujours été le but de nos efforts. Afin de vous permettre la mise en œuvre immédiate de vos projets, nous vous communiquerons notre décision de principe dans le plus bref délai. Sur la base de la vérification de tous les documents fournis (« due diligence »), nous vous présenterons une offre ferme dans le délai convenu avec vous.

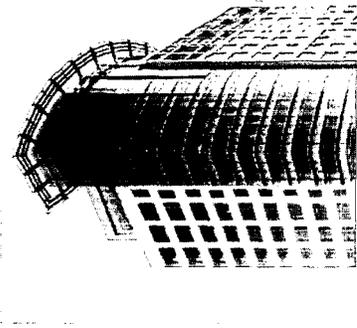

Arc de Seine, Paris, France
This office building, in whose financing Essén Hyp is involved, is located south west of the city center of Paris. It was completed in 2001 and offers a total floor area of 46,151 sqm.

Arc de Seine, Paris, France
Cet immeuble d'une surface utile de 46,151 m² et achevé en 2001 dans le sud-ouest de Paris fut financé avec des fonds de Essén Hyp.

Morrison Street, Edinburgh, Scotland
"The Exchange" is an up-and-coming office district in the center of Edinburgh. Here Essén Hyp participates in the financing of this administrative building with a total office area of 50,000 sqm. The project was completed in 2001.

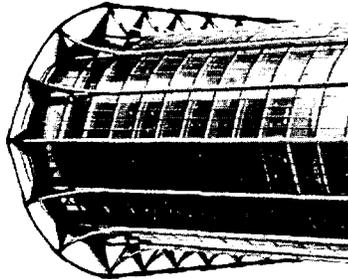

Morrison Street, Edinburgh, Écosse
Essén Hyp a cofinancé cet immeuble administratif d'une surface utile de 50,000 m² et achevé en 2001 dans le quartier d'affaires émergent "The Exchange" au centre d'Edimbourg.

Smart Building, Rosslyn, United States
This building with a total office area of 31,752 sqm and retail units totaling 519 sqm was completed in March 2002. It is located in the Rosslyn office sub-market in Arlington County, close to Washington D.C. The construction of the building was partly financed with funds provided by Essén Hyp.

Smart Building, Rosslyn, États-Unis
Inauguré en mars 2002, cet immeuble offre 31,752 m² de bureaux et 519 m² de surface commerciale. Smart Building est situé dans la zone tierrière de Arlington County près de Washington D.C. Il fut cofinancé par Essén Hyp.

City Point, London, England

With 37 floors, the City Point Tower is the second highest building in the City of London, benefiting from a good location. Essen Hyp participates as a syndicate partner in the financing of this property which was re-opened in 1998. The building offers a total office area of 54,000 sqm, retail units totalling 4,700 sqm and storage space of 8,200 sqm.

City Point, Londres, Angleterre

L'immeuble de bureaux - City Point - avec ses 37 étages compte parmi les deux tours les plus hautes de la City de Londres, profitant par la même d'une bonne situation. Récouvert en 1998, cet actif offre 54.000 m² de bureaux, 4.700 m² de surface commerciale et 8.200 m² d'archives. Essen Hyp a participé à son financement.

Know-how for your international real estate projects Un esprit d'équipe pour vos projets immobiliers internationaux

The entire financing transaction - from counseling via loan commitment and disbursement to full redemption - will be handled by one particular internal expert who is familiar with all project-specific requirements. In addition to this, our bank has representative offices at the most important international real estate markets.

Besides mortgage lending in Germany our core activity is the granting of loans in Great Britain, France, Belgium, the Netherlands, Switzerland, Spain, the United States and Canada. Our particular focus is on properties that benefit from a good location in major cities. However, we are also prepared to support regional projects.

The properties that interest us most are office buildings, logistics centers and shopping malls that are located in major catchment areas and benefit from low vacancy rates, as well as multi-family residential properties. A particular focus is on existing properties that are fully let under long-term leases and to tenants of good standing.

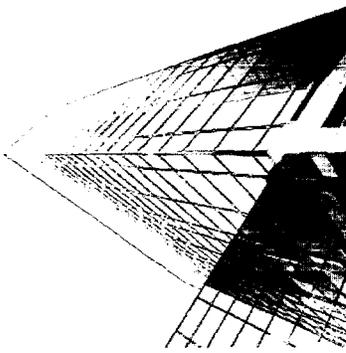

Du conseil initial, en passant par la signature de l'acte de prêt et le versement des fonds jusqu'au remboursement complet du prêt, votre conseiller individuel de Essen Hyp, qui connaît les exigences particulières de votre projet, vous accompagnera dans toutes vos démarches. En plus, Essen Hyp entretient des bureaux de représentation sur les marchés les plus importants du monde.

Outre le financement immobilier en Allemagne, Essen Hyp est active au Royaume-Uni, en France, en Belgique, aux Pays-Bas, en Suisse, en Espagne, aux États-Unis et au Canada. Notre attention est attirée en particulier par des actifs avec un bon emplacement en métropole mais nous sommes également à votre écoute pour vos projets en province.

Notre centre d'intérêt comprend des immeubles de bureaux, des centres logistiques et commerciaux, ayant un faible taux de vacance, dans les zones à forte concentration urbaine, et des projets résidentiels importants ainsi que des actifs existants, entièrement loués à long terme à des locataires renommés.

West Jackson, Chicago, United States
The 'City Loop' is situated in the Central Business District of downtown Chicago, thus benefiting from an excellent location close to the financial center. Here, Essen Hyp participates in the financing of a 22-floor property with a total office area of 129.385 sqm and retail units totalling 3.646 sqm.

West Jackson, Chicago, États-Unis
Cet immeuble de 22 étages offre 129.385 m² de bureaux et 3.646 m² de surface commerciale. Il est situé dans le « City Loop » qui fait partie du quartier central d'affaires de Downtown Chicago et profite de la proximité du quartier financier. Essen Hyp a participé à son financement.

Thomas More Square, London, England
This building complex, which was financed by Essen Hyp, is situated at St. Katherine Docks on the River Thames, between the City and the Docklands. The property offers a total office area of 44,500 sqm, retail units totalling 2,500 sqm and storage space totalling 2,500 sqm.

Thomas More Square, Londres, Angleterre
Situé entre la City et les Docklands, sur le dock St. Catherine, cet ensemble d'immeubles offre 44.500 m² de bureaux, 2.500 m² de surface commerciale et 2.500 m² d'archives. Essen Hyp a mis en place son financement.

Far-sighted financing transactions Un financement prévoyant

We see our task in providing you with specialist knowledge to ensure the long-term success of your project. Safety, and the question as to whether the risks are calculable over the long-term, are key determinants for our credit decision. This is why we thoroughly analyze the quality of each property, including its location and investment profitability. The question as to whether a property can be used for multiple purposes, together with the cash flows from rental income, are the most important parameters in our project analysis.

Each property to be financed is appraised by our internal experts. We additionally seek the advice of external specialists who have to give evidence of their qualification and experience with the respective type of property.

With a few exceptions, the standard securities we require for providing a loan include a first-ranking mortgage over the property, the assignment of rental income and insurance proceeds and, in certain cases, additional securities to be agreed individually.

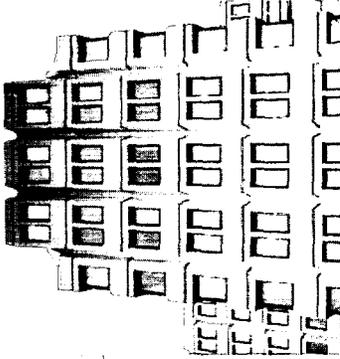

Nous nous considérons comme des spécialistes, garantissant le succès durable de vos projets. Notre engagement assure la rentabilité et la pérennité de votre projet. C'est pourquoi notre décision de crédit est basée sur une évaluation approfondie des risques, de l'état de l'immeuble, son emplacement géographique, la rentabilité du projet et en particulier les possibilités de la recommercialisation en cas de libération de surfaces et la stabilité du cash-flow issu des revenus locatifs.

Chaque actif est évalué par nos experts ou par des spécialistes externes. Selon le type d'actif, nous coopérons avec des spécialistes sur place choisis selon leurs qualifications et leur expérience.

Sauf certaines exceptions, tout prêt sera sécurisé par une hypothèque ou un privilège, par une cession des revenus locatifs, de primes d'assurance et, si nécessaire, d'autres sûretés tel que le mantissement des parts de la société emprunteuse.

Sun Trust International Center, Miami, United States
This 31-floor property, in whose financing Essen Hyp participates as a syndicate partner, is located in the heart of downtown Manhattan and offers a total office area of 39,900 sqm.

Sun Trust International Center, Miami, États-Unis
Cet immeuble de bureaux de 31 étages et de 39.900 m² de surface utile, situé au cœur de Miami, fut cofinancé par Essen Hyp.

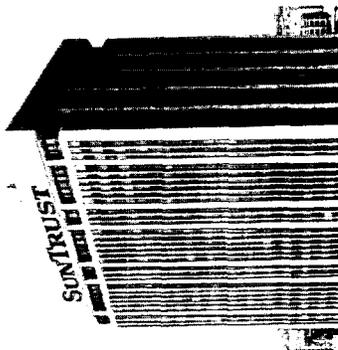

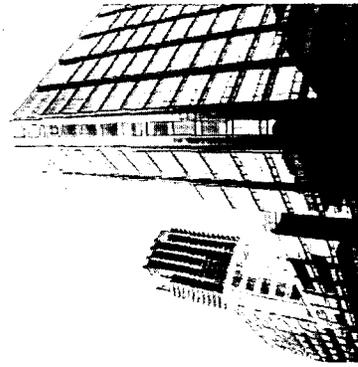

Long Acre, London, England
In Central London, only a few steps from the famous Covent Garden, Essen Hyp participates as a syndicate partner in the financing of an office building (total office area of 18,000 sqm), which will be fully modernized by 2003.

Long Acre, Londres, Angleterre
Situé dans le centre de Londres, à quelques pas du célèbre Covent Garden, cet immeuble dispose d'une surface de bureaux de 18.000 m². Sa rénovation sera achevée en 2003. Essen Hyp a participé à son financement.

Milton & Shire, London, England
Built in 1996, this office building is located on the northern edge of the City of London. Essen Hyp arranged the financing of an effective floor area totaling 42,500 sqm, with offices accounting for 39,800 sqm of this figure.

Milton & Shire, Londres, Angleterre
Cet immeuble d'une surface utile de 42.500 m² dont 39.800 m² de bureaux, et construit en 1996 est situé au nord de la City de Londres. Essen Hyp a mis en place son financement.

Your contact partners Nos interlocuteurs

Thomas Link has been working as an attorney in the international real estate business for several years. Based on his expertise, he is tasked with the systematic project analysis and smooth handling of transactions. As Relationship Manager, he maintains close contact with customers and partners, as well as with external law firms and appraisers. In order to ensure a functioning workflow he acts as the intermediary between all parties involved in the loan process.

Thomas Link a travaillé longtemps en tant qu'avocat dans le domaine des financements immobiliers internationaux. Se fondant sur cette expérience il est chargé de l'analyse des projets ainsi que de la supervision de leur réalisation. En tant que Relationship Manager il maintient d'étroits contacts avec nos clients, notaires et experts externes, ainsi qu'avec nos avocats, notaires et experts externes. Afin d'assurer un déroulement efficace des projets, il joue un rôle d'intermédiaire entre les parties intéressées.

Assem El Ammi worked as an attorney in Berlin before being employed as an in-house Counsel by a German mortgage bank. He made a substantial contribution to the setting up of the bank's international financing business. Having been appointed head of the bank's representative office in Paris, he assumed full responsibility for real estate financing in France and Spain. Now with Essen Hyp, he heads our bank's representative office and is our specialist for the French real estate market.

Assem El Ammi a travaillé en tant qu'avocat à Berlin avant d'être employé dans le service juridique d'une banque hypothécaire allemande. Il a grandement contribué au lancement des financements du bureau de représentation Banque. Nommé directeur du bureau de représentation à Paris, il a pris la responsabilité des financements en France et en Espagne. Aujourd'hui, directeur du bureau de représentation de Essen Hyp, il est notre expert du marché français.

Hypothekebank in Essen AG Hypothekebank in Essen AG

Far-sightedness is the basis for the success of Hypothekebank in Essen AG, whose core activities are public-sector and mortgage lending. Established as a specialist bank in 1987, Essen Hyp soon became one of the leading German mortgage banks. Thanks also to our benchmark Jumbo and Global Pfandbrief issues, the German Pfandbrief, our key funding instrument, has become an investment vehicle that is highly appreciated on the international capital markets.

The key advantages of the Pfandbrief are its high level of safety, liquidity, transparency, standardized structures and efficient pricing. Today, the Pfandbrief market is one of the world's most important non-government bond markets.

The leading international rating agencies, too, acknowledge the excellent quality of the Pfandbriefe issued by Hypothekebank in Essen AG. Our public-sector Pfandbriefe were given the best possible rating, i.e. AAA, by Standard & Poor's and FitchRatings. Moody's also confirms the high level of safety of Essen Hyp's public-sector Pfandbriefe by awarding an Aa1 rating.

With a balance sheet total of €71bn as of December 31, 2002, Essen Hyp today ranks amongst the top five German mortgage banks. Our website www.essenhyp.com enables our investors to carry out their individual credit research of our bank. Essen Hyp currently runs representative offices in London, Paris and Brussels. The opening of additional representative offices in New York and other European capitals is planned for the near future.

La prévoyance a toujours été la base du succès de la Hypothekebank in Essen AG. Fondée en 1987, l'établissement est devenu rapidement une des banques hypothécaires les plus importantes d'Allemagne. L'activité de Essen Hyp repose sur deux piliers: le financement de collectivités locales et les prêts immobiliers hypothécaires. Les Jumbos et les Globales Pfandbriefe de Essen Hyp ont contribué à développer l'obligation foncière allemande, le Pfandbrief, en un investissement fortement apprécié par les marchés financiers internationaux. Grâce à son niveau élevé de fluidité, sa transparence, ses structures standardisées et la fixation efficace des prix, le marché des Pfandbriefe est devenu l'un des plus grands marchés des obligations non-gouvernementales du monde.

Les agences de rating les plus importantes reconnaissent, elles aussi, la qualité de nos Pfandbriefe: Standard & Poor's et FitchRatings ont accordé leur meilleur rating, le triple A, à nos Pfandbriefe publics. Leur niveau extrêmement élevé de sécurité est également confirmé par le Aa1 rating de Moody's. Avec un total de bilan de 71 milliards d'euros au 31 décembre 2002, Essen Hyp compte parmi les cinq premières banques hypothécaires d'Allemagne. Notre site internet www.essenhyp.com vous offre de plus amples informations et vous permet d'effectuer vos recherches sur notre qualité. Essen Hyp entretient des bureaux de représentation à Londres, Paris et Bruxelles et nous envisageons d'élargir ce réseau avec des bureaux à New York et dans d'autres métropoles européennes dans un avenir proche.

Qualification and Training

Interview with Marita Kraft, Vice President and Head of the Personnel Department, on the bank's comprehensive training program

What are the particular characteristics of the training program that Hypothekenbank in Essen AG offers to its employees?

In the past we made frequent use of external training programs and seminars in order to improve the qualification of our employees. However, we realized that, in many cases, only a small portion of the huge amount of information provided in the framework of these programs is actually relevant to our bank's business activities. This is why we have decided to focus on in-house seminars that are either tailored to a homogenous group of employees and their specific job requirements or address our executive staff in general and cover multidisciplinary issues. These seminars are held by experts from international training academies, from university or from within our own institution. The quality of our training program will be certified by means of an internationally acknowledged certificate.

Could you please give an example?

The series of lectures within our 'Essen Hyp University' program deals with issues that are particularly important for our bank, such as risk controlling, corporate management, property financing or international accounting. There will be a total of 24 lectures, held every two weeks. These lectures are designed for and attended by our executive staff, junior executives and skilled employees, i.e. 50% of our total number of staff. A characteristic of this training program is that the Ruhr Graduate School, an academy for further education within the University of Essen, analyzes and certifies the academic relevance of each lecture. At the same time, this academy provides us with university lecturers. The employees who attend these lectures will be awarded a certificate issued by the University of Essen.

Why does Essen Hyp make such efforts to promote the further training of its employees?

Our comprehensive offer basically has three objectives: the transfer of knowledge, multidisciplinary thinking and action and the development of personal skills. By organizing this training program, we wish to promote corporate thinking, expertise that goes beyond one particular workplace, and the personal skills of our employees. The key question with regard to a certain task will no longer be: "Who is responsible for this?" but rather: "Who can do it in the best, quickest and most efficient way?"

Does this also include language training?

Yes, definitely. For an internationally operating bank, it is essential that an employee answering the phone is able to 'do his job' in English. This is why more than 90 of our employees, i.e. nearly 70% of our total number of staff, have been attending on-the-job conversation courses for years. We have recruited a native speaker of English who basically 'visits' his customers, i.e. our employees, at their workplaces and trains their language skills by dealing with job-related issues and questions. Since August 2001 we have also been offering French classes, albeit to a much more limited number of staff.

Can you say something about the acceptance of these measures by your

employees?

I can only look at this question by pointing to the 'half life period' of our knowledge. Of course, all these training measures are optional offers to our employees, which they can accept or refuse. However, the great willingness to accept these offers – the high number of participants is a clear sign of this – and the predominantly very good final results show that our employees agree with the aim of these measures, i.e. to ensure their own – and therefore our bank's – future competitiveness. The employees' investment in this respect is their spare time, as the majority of these training measures take place after regular working hours or during the week-ends, without any compensation through time off.

About Us

Success needs far-sightedness

Success needs far-sightedness - guided by this motto, Hypothekbank in Essen AG, which was founded in 1987, has become one of the leading mortgage banks in Germany within just one decade. The bank's business activities basically rest on two pillars: the granting of public-sector and mortgage loans. Our mortgage lending activities range from the extension of retail loans to finance detached or semi-detached houses or owned flats in Germany to the financing of large commercial properties on the domestic market, as well as abroad. To refinance these lending activities Essen Hyp is active on the national and international capital markets. In this context, one of our key objectives is to increase the popularity of our most important funding instrument, the Pfandbrief, with national and international investors. The fact that we have been awarded excellent ratings from the three leading rating agencies is just one proof of the quality of our work. Essen Hyp's most important shareholder is the Commerzbank AG.

You can find more detailed information on our bank, its management and its business activities on the following pages. Should you have any further questions please feel free to contact us and we will be happy to provide you with any information you require.

Hypothekenbank in Essen AG - Fifteen years

Introduction

Hubert Schulte-Kemper
Chairman of the Board
of Managing Directors

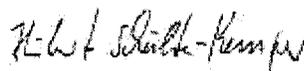

Those who trust in themselves have future! This was our conviction when founding Hypothekenbank in Essen AG in 1987 - and all skeptics, and despite the fact that a mortgage bank to be founded dated back as many as 26 years. We took the professional challenges which needed to be overcome. The belief in a good idea has always been our driving force.

Hard work is the key to success. However, it goes without saying that a bank does not reach top results when standing alone. What has been - and will be - decisive is to find partners who have the courage to explore new shores and who trust in our work. We like to thank you very much for your commitment, which has been a key factor in our success. It was not least due to your support that we have become the second largest provider of Jumbos and Globals in Germany and succeeded in capturing a market share of 15% in the past 15 years.

Striving for success is important, but it is even more important never to forget our roots. To be aware of one's origins helps to release the necessary energy and to set positive examples. This is why our identification with, and close connection to, our region have always been an integral part of our self-conception. We are a long-standing member of the "Initiativkreis Ruhrgebiet", a working group aiming at promoting the Ruhr area, and participated in a number of major events. In addition to this, Essen Hypo has organized numerous expositions and round table discussions on science and culture.

As a part of these activities we had the pleasure of welcoming a number of illustrious guests and partners to the premises of our bank. For more than one and a half decades we have established and cultivated contacts all over the world.

Even though we were right from the beginning confident that we would put our bank into practice, the success of the project by far exceeded our expectations. Today Hypo enjoys an excellent standing on the global *Pfandbrief* markets. Trusting in our courage to realize new ideas, we face the future with confidence. We look forward to the future together with you.
