News Release

2nd December 2003

RENTOKIL INITIAL PLC

TRADING STATEMENT FOR THE TEN MONTHS ENDED 31ST OCTOBER 2003

James Wilde, Chief Executive of Rentokil Initial, said today:-

"I am pleased to report on the first ten months of this year.

At constant average exchange rates for 2002, turnover from continuing operations has increased by 5.8% and profits before tax by 4.9% over the first ten months of last year. These growth rates include the benefit of hyperinflation within our Parcels Delivery sector. Specifically, by sector, the performance was as follows:-

Hygiene

Total Hygiene turnover grew by 1.8%.

Hygiene Services was up by 1.8% in turnover with a small decline in operating profits, due to the anticipated indifferent UK Hygiene performance during the restructuring period and a disappointing performance in Germany. The UK Hygiene restructuring is proceeding as planned, including the launch of the new washroom product range in September, which, together with an increasing investment in sales management and sales staff, will position the division to achieve an increase in the annualised value of contracts during 2004.

Pest Control grew turnover by 2.0% with a larger growth in operating profits from good performances in the UK, Continental Europe and North America.

Security

Security increased turnover by 7.5%, driven by an excellent performance in North America, in particular in the United States where we continue to grow our market share, and good performances in Continental Europe and in the UK. Operating profits increased at a faster rate than turnover. I believe our new sector management structure has, in particular, contributed towards this strong performance.

Facilities Management

Total Facilities Management turnover grew by 3.0%.

Facilities Management Services turnover grew 3.4% with strong growth in the UK being offset by a poor performance in North America following the loss of some large cleaning contracts as reported at the half year. Operating profits declined largely as a result of the poor performance in North America, and in the UK margin pressure on re-tenders and new contract wins continues.

Tropical Plants turnover declined by 4.2% with a significantly larger reduction in operating profits from poor market conditions, the full year remaining heavily dependent on the seasonal activities in North America.

Conferencing turnover grew by 10.6%, with a decline in operating profits. We have seen signs recently of increased customer spending, and the two new centres opened in 2003 are now trading profitably, albeit, as expected, at lower margins than established centres.

Parcels Delivery

Parcels Delivery turnover was up by 28.8% with similar growth in operating profits. These results, however, include the benefit of hyperinflation in our Southern African business, which will be subject to substantial currency devaluation for the full year results. Turnover in the UK grew by 13.6%, with a lower level of growth in operating profits reflecting the impact of the increasing proportion of non-premium next-day consignments.

Operating Profits

Operating profits, at constant average exchange rates for 2002, grew by 2.6% over the first ten months of last year.

Currency

For 2003, both turnover and profit are expected to show net benefits from foreign exchange when compared to the rates of exchange which prevailed for the year 2002. The benefit from the euro is anticipated to exceed the combined adverse effects of, in particular, the United States dollar and Zimbabwean dollar. These full year gains, however, are now envisaged to be lower than those anticipated when reporting the 2003 interim results due to subsequent exchange rate movements which have adversely impacted all of the above currencies.

Cash

Operating cash flow has continued to be strong.

Prospects for the Full Year 2003

For the full year, we expect to continue to generate strong operating cash flow and good growth in turnover and pre-tax profits. The Board is confident that 2003 will show strong growth in earnings per share.

Prospects for 2004

The new management structure implemented at the beginning of this year is now firmly established, providing tighter operational control with a greater customer focus, and we are now well placed to further improve our sales, marketing and service provision.

We will continue to develop our four markets, Hygiene, Security, Facilities Management and Parcels Delivery, with the main emphasis, as announced with the half year results, being concentrated on Hygiene and Security within Continental Europe, where there is a medium-term opportunity to replicate the density and coverage of our UK operations. Bolt-on acquisitions will be targeted to supplement our organic growth, with an increased level of identification of opportunities already starting to be seen. We will be building upon the progress made under the new management structure and we will invest in additional sales management and sales staff.

In 2004, we aim to continue generating strong cash flow and good growth in turnover, pre-tax profits and earnings per share.

In 2004, we are planning for an increase of at least 10% in the full year dividend per share."

END

Note

The above statement is made based on unaudited management accounts and at constant rates of exchange, these being the average rates of exchange for foreign currencies for the year 2002, as used in the 2002 Annual Report.
