NEWS RELEASE

December 10, 2003

TSX Trading Symbol: **FNC**
S.E.C. Exemption: 12(g)3-2(b)

The Company wishes to report that three additional vertical holes have been completed, two, #14 and 14A, drilled at close intervals 35 metres east of Hole #5, on the flank of a small gravity high. Massive hemoilmenite was encountered over narrow intervals from surface to a depth of 49 metres. Hole #15, drilled 160 metres ENE of #14, in the central part of a large residual gravity high, encountered highly altered country rock laced with hemoilmenite veinlets, from 17.7 m to 40.8m in the hole. Equipment problems forced a stop, and the hole will be completed when drilling resumes in late January. This type of alteration is typical of country rock in close proximity to massive hemoilmenite, which occurs in outcrop in the immediate vicinity.

Construction of a winter road into the property is scheduled to begin in early January.

Warrants for the purchase of 200,000 common shares, at a price of \$0.15 per share, have been exercised, with the proceeds being added to general working capital.

ON BEHALF OF THE BOARD

"Peter H. Smith", Ph.D., P.Eng., President
