Private Placement and Options Granted

Subject to regulatory approval, Tyler Resources Inc. ("Tyler") is pleased to announce a proposed non-brokered private placement of up to 2,500,000 Units at \$0.06 per Unit. Each Unit will consist of one common share of Tyler and one full non-transferable share purchase warrant. Each warrant will entitle the holder to purchase one additional common share at a price of \$0.10 per share for a period of one year from the date of issue.

The private placement will be placed to investors resident in Alberta and British Columbia and the shares issued will be subject to a four month hold period. No more than 50% of the private placement will be placed with individuals who are at non-arm's length. A fee of 3% will be payable on the portion of the private placement not raised from insiders or their business associates.

Proceeds of the financing will be used to conduct an airborne geophysical survey covering the Bahuerachi porphyry copper-gold project located in Chihuahua state, Mexico and for working capital purposes. The airborne survey, the first such survey ever flown over the area, will include magnetics, electromagnetic and radiometrics covering the entire property. The survey's main objective will be to assist in delineating the extent of the Main Zone high grade copper and gold bearing mineralized skarns and related lower grade porphyry intrusions which, although well documented, mapped and sampled at surface over 1,400 meters in strike length, are still open in all directions. The survey is expected to cost a total of approximately CDN\$ 115,000-\$125,000.

The Corporation has also granted stock options under its 2002 Stock Option Plan for 2,240,000 common shares for a period of five years commencing on December 16, 2003 and at an exercise price of \$0.10 per share to its directors, officers, an employee and its consultants.

All statements, other than statements of historical fact, in this news release are forward-looking statements that involve various risks and uncertainties, including, without limitation, statements regarding the potential extent of mineralization and reserves, exploration results and future plans and objectives of Tyler Resources Inc. These risks and uncertainties include, but are not restricted to, the amount of geological data available, the uncertain reliability of drilling results and geophysical and geological data and the interpretation thereof and the need for adequate financing for future exploration and development efforts. There can be no assurance that such statements will prove to be accurate. Actual results and future events could differ materially from those anticipated in such statements. These and all subsequent written and oral forward-looking statements are based on the estimates and opinions of management on the dates they are made and are expressly qualified in their entirety by this notice. The Company assumes no obligation to update forward-looking statements should circumstances or management's estimates or opinions change.
