## Press Information

### **Vienna International Airport: Slower passenger traffic, but solid cargo development in March 2003**

The good development of traffic recorded over the first two months slowed in March as a result of the Iraq crisis. The number of passengers declined by 0.5%, and the share of transfer passengers also remained below expectations with a minus of 1.6%. Maximum take-off weight increased by 6.7% and flight movements rose by 5.7% in March. Cargo turnover remained unaffected by the war in Iraq, and showed significant growth of 21.9% to 15,807 tonnes.

Long-haul flights showed highly differing results. Traffic declined to destinations in the USA, but a number of destinations in the Far East showed high growth. Increases were recorded by Bangkok at 29.6%, Tokyo at 49.9% and Osaka at 68.3%. The number of passengers travelling to Peking fell by 28.2% from the prior year level, and declines were also recorded in traffic to Delhi (-27.6%) and Taipei (-5.4%). The impact of the Iraq crisis was partly offset by a satisfactory level of reservations with low-cost airlines

For the first quarter of 2003 the number of passengers rose by 7.1% and the share of transfer passengers increased by 11.3%. Growth was also recorded in maximum take-off weight with a plus of 9.8%, flight movements at 6.9% and cargo at 18.6%.

	March 2003	Change in %	January to March 2003	Change in %
