**Board of Directors
Kalos Capital, Inc.
Atlanta, Georgia**

We have audited the financial statements of Kalos Capital, Inc. at and for the year ended December 31, 2003 and have issued our report thereon, dated February 17, 2004. As part of our audit, we made a study and evaluation of the Company's system of internal accounting control to the extent we considered necessary to evaluate the system as required by generally accepted auditing standards and Rule 17a-5 of the Securities Exchange Act of 1934. This study and evaluation included, in the accounting system, the practices and procedures followed by the Company in making the periodic computations of net capital under Rule 17a-3(a)(11). Rule 17a-5 states that the scope of the study and evaluation should be sufficient to provide reasonable assurance that any material weakness existing at the date of our audit would be disclosed. The purposes of our study and evaluation were to determine the nature, timing and extent of the auditing procedures necessary for expressing an opinion on the Company's financial statements and to provide a basis of reporting material weaknesses in internal accounting control under Rule 17a-5. Our study and evaluation was more limited than would be necessary to express an opinion on the system of internal accounting control taken as a whole.

The Company claims exemption from the computation for determination of reserve requirements pursuant to Section (k)(2)(ii) of Rule 15c3-3 of the Securities Exchange Act of 1934 whereby all customer transactions are cleared through another broker dealer on a fully disclosed basis and therefore no transactions are cleared through the Company. We have reviewed the terms and conditions pursuant to Rule 15c3-3 and found the Company in compliance with the exemption requirements.

The management of the Company is responsible for establishing and maintaining a system of internal accounting control. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of control procedures. The objectives of a system are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles.

Because of inherent limitations in any system of internal accounting control, errors or irregularities may nevertheless, occur and not be detected. Also, projection of any evaluation of the system to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the degree of compliance with the procedures may deteriorate. Our study and evaluation, described in the first paragraph, would not necessarily disclose all material weaknesses in the system. Accordingly, we do not express an opinion on the system of internal accounting control of the Company taken as a whole. However, our study and evaluation did not disclose any conditions that we believe to be material weaknesses.

This report is intended solely for the use of management, the Securities and Exchange Commission and other regulatory agencies pursuant to their requirements and should not be used for any other purpose.
